

DAILY MINING JOURNAL

MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED.)

Per month, by carrier, \$3.00; Per year, by mail, \$30.00

MARQUETTE, MICH., SEPT. 13.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

The merry margin call has been heard again, but those who have hung on ought now to be able to stand anything.

Out of a field of five candidates the most final voter ought to be able to find some one to suit him.

A shortage of \$100,000 in the accounts of the Louisiana state tax commission is reported to be the third large shortage discovered in six months.

The legacy of Archibald Blount to Yale, some \$400,000, has developed the interesting fact that the officials of the university know nothing of the testator.

No ballots get lost in the shuffle in voting machines. They spoil no ballots. There is no count, with its great possibilities of mistakes or jugglery.

A prominent lumberman of the upper peninsula who sold the Western Union, under contract, some \$300,000 worth of poles, reports that the Western Union, after taking not more than a fourth of the poles, is trying to get out of its obligation to take the remainder.

If the stretch of road between Marquette and Escanaba were improved it would be possible to drive an automobile from Marquette county to almost any part of the middle west or east where it might be desired to go.

Crop moving time is at hand. This means stringency in the money market and congested traffic on the railroads.

SUPERIOR TRUST COMPANY HANCOCK MICHIGAN Capital - - \$150,000

new cars added to the rolling stock number up into the thousands. Scarcely a road but has done something and some of the larger systems have spent millions.

The action of a lower court on the two-cent fare law in Pennsylvania has caused much comment. An injunction relieving the railroads from the operation of the law was granted.

Why NOT A VOTE? Governor Warner will ask the special session of the legislature to repeal the 40 per cent provision of the present primary election law.

But why not have this vote? What harm can it do? The people of the state have never had an opportunity to show their sentiment toward the direct nominations movement on a clean cut issue.

Of course should the people of the state vote heavily for the elimination of the 40 per cent provision it would put the "Boxer" senators in something of a hole. But if those of their number who insist that direct nominations sentiment has been much overestimated have the courage of their convictions they would not be afraid of any such outcome.

THE POLE STILL SAFE. According to Captain Isachen, who has just returned to Tromsø from the arctic regions, there is little likelihood that Walter Wellman will "lag the pole" this year.

Mr. Wellman seems to be more efficient as a writer than as an arctic explorer. His recent magazine article, detailing his plans for conquering the pole, was a very convincing document.

Mr. Wellman was particularly strong on the winds of the arctic region, and had any quantity of records showing that in July and August boreas spent most of his time pushing atmosphere toward the pole in just the direction the America would travel.

What seems reasonably certain now is that the pole is safe for another year. Mr. Wellman will probably go back in 1908 and still further improve the America, perhaps attach another great leather trailing snake in which to carry extra provisions, or build a stable abate the engine room for housing a couple of reindeer, or a tame polar bear to catch seals for the party.

seals for the party. Indeed, it is possible that he may even change the vessel's name to Albin or Deutschland. He will certainly describe all these changes in a well-written article, whether he sails for the pole in August, 1908, or not.

MUNISING ALGER COUNTY FAIR.

Preparations Being Made for Annual Show, to Be Held Sept. 25, 26, and 27.

The Alger county fair, to be held in Munising, Sept. 25, 26 and 27, promises to far eclipse anything in the line ever attempted in this county.

Some clever schemes have been devised for carrying on the advertising features of the fair. Most conspicuous among them is the certificate of membership to the "Booster club," certifying that the holder is a member in good standing, and thereby obliges him to attend and boost the fair at all times.

FOUND DEAD BESIDE TRACK. Early Tuesday morning the body of William Simmons was found about three miles east of Wetmore. It was discovered by a train crew on the D. S. & A. line.

HIGH SCHOOL FOOTBALL. The Munising High school will again be represented on the gridiron. Coach Goodrich called the candidates together the early part of the week and practice would have been started at once but for unfavorable weather.

FRENCH LECTURES POSTPONED. Colonel French, who was to deliver his illustrated lecture on India in the M. E. church Sunday evening and to give his lecture on the Yellowstone Park before the public schools, is unable to fill either engagement.

MUNISING ECHOES. C. E. Stebbins spent Tuesday at Au Train. Judge C. R. Brown was in Au Train Tuesday on business.

Clarence Brown of Marquette spent the first of the week here.

Vikering Ricket returned, after spending a week in Chicago.

Miss Elizabeth Cox of Ishpeming was the guest of friends here Sunday.

Sam Marks' store was closed Monday and Tuesday, because of the Jewish holidays.

Munising may have a combined concert and lecture course this winter, given by the Y. M. C. A.

Paving on the streets has progressed very slowly this week, on account of the frequent, in fact almost constant, rains.

Madame Lennox, who has been visiting relatives in Milwaukee the past summer, arrived here Wednesday to make her home with her son, W. A. Lennox.

H. R. Freeman, who was elected lay delegate from the First M. E. church, has gone to Detroit to attend the annual conference.

Danderine

GREW MISS CARROLL'S HAIR AND WE CAN PROVE IT

Beautiful Hair At Small Cost.

WITHIN the last decade great and rapid strides have been made in Materia Medica. Many diseases that were considered incurable fifteen years ago are now cured in a few days, and in many cases prevented altogether.

The natural and logical thing to do in either case is, feed and replenish the soil or scalp as the case may be, and your crop will grow and multiply as nature intended it should.

Dr. Knowlton's DANDERINE

is the only remedy for the hair ever discovered that is identical with the natural hair foods or liquids of the scalp. It feeds and nourishes the hair and does all the work originally carried on by the natural nutrients or life-giving juices generated by the scalp itself.

One twenty-five-cent bottle is enough to convince you of its great worth as a hair-growing and hair beautifying remedy—try it and see for yourself.

FREE To show how quickly Danderine acts we will send a large sample free by return mail to any one who sends this advertisement to the Knowlton Danderine Co., Chicago, with their name and address and 10 cents in silver or stamps to pay postage.

MISS J. CARROLL 2307 Irving Ave., Chicago

Northern State Normal School MARQUETTE School Begins October 2, 1907

The Northern State Normal School admits graduates of approved high schools to the two years' course leading to a life certificate and diploma. It offers courses leading to a three-year certificate, which is renewable for three years and valid in graded schools, and also a rural school certificate.

FISH BITES ANGLER'S FOOT.

President of California Electrical Railroad Is Badly Poisoned. Los Angeles, Cal., Sept. 12.—While wading in a stream near Bear Valley, two weeks ago, angler for trout, John B. Miller of Pasadena, president of the Edison Electric company, was bitten on the foot, supposedly by a fish. The injury was considered trifling, but a few days ago Miller's foot began to swell and a serious case of blood poisoning developed...

LAKE COPPER PRODUCTION.

The estimated production of the Lake Superior mines in August was 19,525,867 pounds of copper. This compares with an estimated production of 19,661,675 pounds in July and of 18,919,000 pounds in August, 1906. For the first eight months of 1907 the copper production of the Lake mines has been nearly 100,000,000 pounds in excess of the same period last year. The comparison follows: First 6 months 1907 121,674,499 113,347,200 1906 121,674,499 113,347,200...

NOT A PARTICLE OF SKIN ON BODY.

Worst Case of Eczema Doctor Had Seen in 40 Years—For Six Months Father Expected His Baby to Die—Blood Oozed Out All Over Her Body—Had to be Wrapped in Silk and Carried on a Pillow—Now She is Fully Cured.

DOCTOR RECOMMENDED CUTICURA REMEDIES

"My little girl was born two weeks before her time and my wife died four days after the birth of our child and I had to raise the baby on artificial milk. She was born with eczema on her body and for six months she was wrapped in silk and carried on a pillow. I had two doctors in attendance. There was not a particle of skin left on her body, the blood oozed out just anywhere, and we had to wrap her in silk and carry her on a pillow for ten weeks. She was the most terrible sight I ever saw, and for six months I looked for her to go to her mamma, but thank God and his agents, she is alive and well today and she will be three years old in the month of December. She never had a sign of the dread trouble since. I used every known remedy to alleviate her suffering, for it was terrible and then I went to C. and got Dr. B. and he and Cuticura Soap and Cuticura Ointment cured her. He recommended the Cuticura Remedies, or said we were right in making use of them. As nearly as I can remember, we used eight cakes of Cuticura Soap and three boxes of Cuticura Ointment; but you must take into consideration that hers was an exceptional case, for an old and good doctor said that it was the worst case that had come to him in forty years. I have always hinged on Cuticura Soap to keep her skin soft and to give her a pure complexion. James J. Smith, Wood and Metal Pattern Maker, Box 234, Buena Vista, Va., Oct. 14 and 22, 1906."

NOTES OF COPPER NEWS.

Eastern interests identified with the Adventure Consolidated have as yet received no advice from the property regarding the striking of the Butte lode. The construction of a rockhouse for shaft No. 2 at the Michigan mine is being held back by the non-arrival of the Oregon timbers. It will be finished this fall. Work has been resumed at the stamp mill, where sixty-five men are employed. It will be early spring before the plant goes into commission. The "Kirkey" vein, which was opened on the tenth and twelfth levels of the Old Dominion mine, and was ten feet wide of a good grade of sulphide ore averaging about 8 per cent copper, has been uncovered on the United Globe near the Gray shaft. It will be extensively developed on the United Globe lands and the management believes that it will prove a very important ore body, not only for its high copper content, but also for its sulphur contents. The Old Dominion output for August is estimated at about 3,500,000 pounds. A depth of over 700 feet has been attained in the new shaft sinking on section 16 of the Atlantic Mining company. Before drifting the management intends to sink the shaft 1,000 feet. The company has just gone through some broken ground in which copper was found, although not to any great extent. At various depths the Atlantic workers have discovered findings of copper, but even up to this time the officials of the company are not absolutely sure that the Butte lode has been touched. At one place on the Superior property, the lode was exposed in exploratory work for a width of over thirty feet. The current dividend on Butte Coalition stock will be sent to approximately 1,800 persons, this being an increase of about 200 over the number on the company's books at the time of payment of the previous dividend. Just prior to the declaration of the regular quarterly dividend of fifty cents a share on Butte Coalition, the directors of the Red Metal Company, all of which stock is owned by the Butte Coalition, declared the usual quarterly dividend of \$4 a share. No preparations are being made to start operations on the Alice Gold & Silver company, control of which is lodged with the Butte Coalition.

Southern Pure White Lead

is worth \$7.50 to \$8.00 per hundred pounds. One hundred pounds of barytes or silica is worth 65 cents.

Paint Buyers

who accept 65-cent barytes or silica and pay \$8.00 (the price of White Lead) for it, or who pay even half the price of White Lead, could hardly be called shrewd buyers.

That is the "chargin" which the buyer of "standard" or so-called "cheap" lead makes. When in need of paint, buy PURE White Lead. The Dutch Boy Painter on the keg is your guaranty.

SPEEDOMETER FOR TRAINS.

Northwestern Company Is Experimenting With a German Invention.

It is reported in railroad circles that the management of the Chicago & Northwestern Railway company is experimenting with a German speedometer and expects to adopt it for use on the passenger trains of the entire system. Speedometers were some time ago introduced on the Burlington line and they are said to be working satisfactorily. The German speedometer is unlike the one now being used by the Burlington and is in some respects superior to it. Instead of being placed on the locomotive it is stationed in one of the cars composing the train. The principal purpose of fitting trains

with speedometers is to educate the engineers to drive for smooth running and to also educate the train and station crews to faster work at the stations. For some years past both the train and station crews have frequently lost valuable time in doing their work. They have many times been brought to task, but no satisfactory method has yet been devised to make correct reports of the time actually wasted at these points. The new device not only records the speed which the train makes, but also records every stop, as well as the length of time spent at each station. The speedometer is enclosed in a box and cannot be tampered with unless the glass surrounding it is broken. So far as now can be judged, the speedometer will not result in reducing the cost of operating trains to any extent, but the management of the system believes that it will result in better service on the part of both the engineers and train crews, and it will also have a tendency to reduce the speed of certain trains where there are frequent stops.

Bloomington, Ill., Sept. 12.—Jacob Hochstrasser of Kane county made a remarkable discovery of mastomys bones upon his farm. He found four enormous teeth and a large number of bones, sufficient to fill a bushel basket. One of the teeth measures seven inches in length and eight inches in circumference. Among the bones in his possession are those composing the head of the animal. One weighs ten pounds and contains a portion of a tusk. The finder is willing to turn the bones over to any college desiring to exhibit them.

Negaunee Department

NEGAUNEE'S OLDEST FARMER MAY LEAVE

ROBERT EWING WILL INSPECT LANDS IN WEST AND MAY LOCATE IN WASHINGTON—HAS BEEN FARMING HERE FOR FORTY YEARS.

Robert Ewing, Negaunee's oldest, as well as one of its most successful farmers, left Wednesday for the West, to look up a new location. He will visit Washington and other states, but if he decides to leave Negaunee he will probably locate in Washington, as he has relatives there who have been urging him to purchase a place, believing that the farming business will be far more profitable in that region than it has been here. Members of Mr. Ewing's family have visited Washington the past few years, and they, too, wish to make the change in location. He intends to spend six or eight weeks looking over the country.

Mr. Ewing has been engaged in farming in this city for the past forty years, having been located all this time on a tract a short distance south of the Minty Charlotte mine on the Cascade road. He has eighty acres under cultivation and his farm is one of the best in this district. Mr. Ewing has been successful as a farmer, but he has worked unusually hard, and at times he has been much discouraged on account of the weather conditions. The present year does not promise to turn out as well as some previous years and this is one of the reasons he desires a change of location. A few months ago he thought of plating out-hillside lots that portion of his farm facing the road, but there does not appear to be much of a demand for lots in that vicinity, though it is believed that within a few years a great many houses will be erected near the neighboring mines.

Mr. Ewing has one of the finest orchards in the upper peninsula. Three years ago he raised over 500 bushels of apples, and he also had large crops of cherries, plums, etc. His apple crop will be of fair size this season, but he does not expect to dispose of the fruit to very good advantage, as he is obliged to sell it in bulk to Negaunee people. Mr. Ewing has taken much pride in his orchard and has given it his personal attention for several years past. Before leaving for the west he sold a portion of his stock and in case he decides to go west he will dispose of the rest of his cattle and equipment immediately on his return. He does not expect to sell the land, but will probably rent it. The place is well equipped with buildings and it is one of the most conveniently located farms in the city.

Imitations pay the dealer a larger profit, otherwise you would never be offered a substitute when you ask for an advertised article.

TROLLEY TO GO UP SOON.

Street Railway People Expect to Have Line in Good Condition Before Winter.

A force of men has been employed putting up the span poles on the Marquette County Gas & Electric company's street railway line for more than a month past, but it will be some time yet before all of the poles are in position. The work was started on the Ishpeming end and the crew will soon be in Negaunee. The new span wires have been placed between the poles through the business streets of Ishpeming and the new trolley will be strung from the Lake Angeline end to High street, or perhaps to the old gas house, within the next two or three weeks. It is the intention of Manager McCormick to extend the new trolley to the more important districts of both cities and if possible to install it along the entire system before winter sets in. The trolley wire has been here for more than a month past. The new trolley will be from four to five feet higher than the present trolley, and as it is made of much heavier wire it is not anticipated that it will break very frequently. The repair of the old wire last winter caused a great deal of inconvenience and expense. There were times when the trolley broke three or four times a day.

One of the old cars is to be equipped with extra motors and will be used for the operation of the snow plow. The new cars are equipped with plows, but these will not be used for opening the line. With the new trolley and improved rolling stock it is expected that the cars will be operated to much better advantage the coming winter than ever before.

It is also expected that the new engine, boiler, and other equipment, for which bids are now being received, will be installed in the power house before the first of the year. With the new outfit in use additional power will be available for the operation of the street cars. This will result in a vast improvement in the service during the storm periods, when extra power is needed more than at any other time. It is thought that with the increased power at the station the cars can be run without trouble on the steep grades where the hardest work has been experienced in the past.

DANCING AND CARD PARTY.

The Negaunee branch of the Alpena society will conduct a party at Shea's Hall a week from tonight, the 20th. A general invitation is to be extended to the friends of the members and it is expected that there will be a large attendance. Those who do not care to dance will play cards. The admission will be twenty-five cents.

BELMORE BAY MEETING.

Peter Hern, president of the Belmore Bay Gold Mining company, has announced the fourth annual meeting of the shareholders of the corporation, to be held at Sault Ste. Marie, Ont., a week from next Monday, the 23rd, at 2 p. m. At this meeting the report of the directors for the past year will be received, and a new board will be elected for this ensuing year. This will be

one of the most important meetings the company has ever held as ways and means are to be devised to take up a mortgage of \$10,000, which was given on part of the property on the 29th of last April. The president announces that one or two propositions, which have been offered by interested mining men to finance the company, will be considered.

LOCAL LACONICS.

Alex Larson is spending a week with friends at Marinette.

Mrs. E. G. Jackson and her daughter-in-law, Mrs. Harry Jackson, are visiting relatives in Marquette.

Mayor J. H. Winter has returned home from Chicago and points in Wisconsin, after an absence of a week.

Mr. and Mrs. James D. Palmer have gone to Port Huron on a visit to friends.

Miss Louise Ferguson of Marquette is in the city visiting her grandmother, Mrs. H. E. Wood.

Harry and Bert Sawbridge, who are now visiting their parents, will leave today, accompanied by two or three friends from this city, for a camp south of Ishpeming, where they will remain a week.

Joseph Richardson is suffering from a severe attack of rheumatism. He has been up from his homestead for several days and he does not expect to return until his condition is improved somewhat.

Thomas Milroy is here from Illinois, where he is in the employ of the Great Western Railway company as a steam shovel operator. For some time past he has been working at a small town outside of Chicago.

Notices were posted yesterday in the several wards of the city calling attention to the registration tomorrow and the special election next Tuesday. The board of registration will be in session in the several wards from 8 a. m. to 3 p. m.

The cables for the Bell Telephone company's Main and Lincoln street lines were received yesterday and the work of installing them was immediately started. A force of a dozen or more men is employed on the job. The improvements at the company's new office in the Neely block have also been started. It is expected that the change of stations will be made within two weeks.

John Shea has hired a number of extra clerks for his special sale, which opens tomorrow under the management of the Duluth Auction company. A number of changes have been made in the store and the goods are now displayed to excellent advantage. Mr. Shea said yesterday that the sale will be the biggest he has ever conducted during his twenty-five or more years in business in Negaunee. The doors will open tomorrow morning at 9 o'clock.

"What shall we have for breakfast?" "Why Cudahy's Peacock Ham and Eggs of course; they are always acceptable, especially at this season of the year." (11-27-e-o-4)

LOST—A pearl brooch. Finder will please return to 213 Main St., and receive liberal reward. 9-3-17

MAKES SENSATIONAL CHARGES IN SPEECH

EDWARD MCCARTHY DECLARES SECOND WARD BALLOT BOX WAS STUFFED LAST SPRING.

TWO AFFIDAVITS ARE READ

Tells of Alleged Irregularities and Describes Startling Discrepancies Which He Says Exist.

In an address before some eighty odd citizens in the assembly room of the hall, Edward J. McCarthy, candidate on the Citizens ticket for the vacancy in the recorder's office last night asserted that fraud of the most flagrant sort had been committed in the Second ward polling place in the city election of last spring. If the evidence of any one of a number of offenses he described were presented in court and were substantiated, the consequences could not be most serious to the offenders. Boldly stated, McCarthy declared that the Second ward ballot box had been stuffed with illegal ballots, that there were gross irregularities, discrepancies between the polling books, tally sheets and number of votes cast and he stated also that the recount he had asked for had been conducted in an irregular manner.

The Election.

McCarthy was the opponent of Dan S. Donovan in the city election of last spring and when the votes were counted it was announced that Donovan had won by three votes. McCarthy asked for a recount which was held and which resulted in the announcement that Donovan had been elected by a larger majority than that was at first announced.

Polling Book Missing.

McCarthy said that one of the challengers had been put out of the polling place a number of times. He said that the name of Fred E. Roberts had been voted and registered and he produced two affidavits which set forth that Fred E. Roberts, who formerly lived in Marquette, was in Traverse City on the day that the election had been held. He stated that the polling book of the second ward which should now be in the recorder's office is missing.

The Recount.

Another charge he made was that when the recount was being taken, two votes were counted which had not been cast at the polling place. These he said had been taken from the unused ballots and he declared that when an attempt was made to verify this at the recount, one of the tellers appointed refused to permit a count of the unused ballots which might have shown the discrepancy he charged. It had been explained to him, he said, that the teller had been cast after the polls closed.

He said that the last name on the polling place register was that of Carl Giesegen and he said he had evidence, that of Giesegen himself, of Attorney Button and another to prove that two votes were cast at the polling place after Giesegen had deposited his ballot. He declared that a count of the unused ballots would today show that the two votes in question had been taken from the unused ballots.

Discrepancies.

A discrepancy he said existed was that 245 votes were cast that day according to the polling books and according to the register showed that 247 votes had been cast and the tally sheet had still a different result showing that 244 votes had been cast. One polling book in the office of the county clerk, he said had 255 names registered and the other, the city recorder has been unable to find.

Besides describing the election of last spring McCarthy reviewed his life in Marquette and he again referred to charges which he said his political opponents were making against him. He answered these as he had before. He declared that he had been elected last spring and he asked his hearers' support at the election next Tuesday. He stated that another meeting might be held at which he would again review the charges he makes.

Result Doubtful.

Even the best informed are unwilling to venture a forecast of the result of the voting next Tuesday. A number of interests are represented by the five candidates entered for the race and each one is strong in one particular or another. The candidates are Arthur W. Moore on the Union ticket; Daniel S. Donovan on the People's ticket; E. J. McCarthy on the Citizens' ticket and two on Independent tickets, H. L. Siegel, present acting recorder and L. M. Spencer.

"HUMAN HEARTS."

The melodrama, "Human Hearts," presented by an exceptionally strong company of players, will be offered for the approval of the lovers of melodrama at the opera house next Wednesday. "Human Hearts" has been firmly established as one of the most original and interesting of modern dramas. The author has long been famous as a playwright, but in the present instance, he has surpassed all his former efforts. For ingenuity, strength and brilliancy, "Human Hearts" is a marvel of stage craft. The author has poured out his entire store of theatrical knowledge in this play. He has produced a work of magnificent possibilities for a melodramatic public. The characters are finely drawn, the dialogue is crisp, the human interest is all absorbing, the comedy is charming, the pathos is sincere. Taken on its entirety, "Human Hearts" is probably one of the strongest plays ever shown on the American stage.

TO USE VOTING MACHINES.

Mayor Calls Special Meeting of Council to Consider Project.

Mayor Robertson last night issued a call for a special meeting of the city council to be held tonight to discuss the feasibility of using voting machines at the election next Tuesday. The machines, which, it is proposed, will be used are those of the Abbott Voting Machine company and the five of them are now at the city hall. The five machines are the ones used in the state election last spring. It had been planned to use them for both the city and the state elections which were held on the same day, but a few hours before the election took place, the council rescinded a resolution in which it had been ordered that they be used for the city election. The reason for the change, it was stated at the time, was that the people were unacquainted with machines and that as both a state and a city ticket were to be voted, many mistakes might be made.

MUNISING BANK IN NEW HANDS

WM. G. MATHER AND ASSOCIATES ACQUIRE THE CONTROLLING INTEREST AND EFFECT A REORGANIZATION.

Control of the Munising State Savings bank passed into new hands yesterday, President Wm. G. Mather of the Cleveland Cliffs Iron company and his associates have acquired a majority of the stock, and a reorganization of the affairs of the institution has been effected. The old board has stepped out, and in its place there has been chosen the following directorate: Wm. G. Mather, W. F. Hopkins, C. V. E. Townsend, George J. Forsyth, H. S. Sherman Collins. Mr. Mather succeeds Mr. Utter as president, and Mr. Hopkins replaces Fred F. Case as vice president. Mr. Collins continues as cashier. The bank is capitalized at 300 shares, and as reported to The Mining Journal, control was acquired on the basis of \$220 for each share changing hands, eighty of which were held, it is understood, by Mrs. B. S. Case of Marquette.

The fact that the Munising bank has passed into the strong interests identified with the Cleveland Cliffs Iron company will be of decided benefit to the Alger county seat. Having the effect of a measure of harmony, it will bring two heretofore opposing factions into an accord that will be conducive to the welfare of the town. It ends, too, all talk of the organization of a second bank. The transaction is in all respects a good thing for Munising. These were the sentiments expressed to The Mining Journal last night by a Munising business man.

RAPID PROGRESS OF WORK AT NEW PLANT

BUILDING OF NEW LAKE SHORE ENGINE WORKS BEGAN JUST ABOUT SEVEN WEEKS AGO.

Work on the new plant of the Lake Shore Engine works north of the city is progressing rapidly and the present indications are that the plant will be completed and ready for occupancy earlier even than was planned. The building was delayed but slightly by the recent rains. Change-Shift. At the present time the regular force is composed of eight members including the marshal. One of these is on duty all day, five of them are on duty all night and one is on duty from twelve at noon until midnight each day. It was proposed that this last shift be abolished which will leave but one man, besides the marshal on duty during the day. The man who served from noon until midnight will probably be the one chosen for station duty at night. Caused By Escape. The single purpose of having a station officer is that emergency calls may be promptly cared for and the action of the board last night is directly due to the escape of the murderer of Wallace Hogan. When Hogan was stabbed, the murderer remained about the corner of Front street and Baraga avenue for a long period while efforts to get the police were being made. Other instances when the police were needed in a hurry are known and in the past the experience of citizens has been that telephone calls and messages sent to the police station were of no avail because never was there anyone there. In the past when a policeman was needed, the only way to get one was to go out on the street and search until one was found, and the result of this is that a number of badly wanted offenders have escaped.

CHANGE ORDERED BY THE POLICE BOARD

NO ADDITION TO PRESENT FORCE IS MADE AND STATION OFFICER WILL BE ON DUTY ONLY DURING NIGHTTIME.

At a meeting of the board of police commissioners held last night at the city hall, it was ordered that beginning today, a policeman is to be kept at the station throughout the night between the hours of 7 p. m. and 7 a. m. No new appointment to the force was made and the station officer is to be chosen from the present force. May Make Further Change. At the meeting Commissioner Hallam stated that he was in favor of having a man kept at the station all the time, day and night, and he suggested that this be done. The board, however, decided that for the present, the station officer shall serve only at night, but if it is found necessary, a further change will be made and some one will be kept at the station all the time. If this is done, it is said that it will be necessary to appoint a new man to the force. The officer for night service is to be appointed by Marshal Manning and the choice of a man has been left to his discretion.
