

STOCK SLUMP HITS J. D. ROCKEFELLER

His Standard Oil Holdings Worth \$109,000,000 in the Market Now, Compared With Double That a Decade Ago.

Chicago University Also Is Out Because of the Depreciation in Price of the Securities, the Loss in Its Case Reaching Two Million Dollars—Who All the Big Shareholders Are an Interesting Record Disclosed at the Hearing in the Government's Suit.

New York, Sept. 20.—The record of the stockholders of the Standard Oil company of New Jersey was laid bare today at the hearing in the government's suit for the dissolution of the alleged oil combine. It disclosed the fact that John D. Rockefeller owns 247,692 shares, or nearly five times as much stock as any other individual shareholder, and that he and his associates who signed the trust agreement in 1882 still control the majority stock of the Standard Oil company.

Measured by the present market price of \$40 a share, the holdings of Mr. Rockefeller in the Standard Oil company have a value of \$109,000,000. The stockholders' record of Aug. 17, 1905, shows that the University of Chicago is the owner of 5,000 shares of Standard Oil stock. The depreciation in the price of the stock within the ten years, or since the agitation against the company began, has been more than \$100 a share. This represents a loss of \$100,000,000 on the holdings of John D. Rockefeller. The shrinkage affects the University of Chicago to the extent of about \$2,000,000.

The respective holdings of the largest stockholders are as follows: Shares, John D. Rockefeller, 247,692; Charles H. Pratt estate, 52,582; D. M. Harkness estate, 42,000; O. H. Payne, 40,000; H. M. Flagler, 30,500; O. B. Jennings estate, 17,000; H. H. Rogers, 16,929; J. A. Bostwick, 15,000; William Rockefeller, 11,700; C. M. Brewster, 10,000; Charles Lockhart estate, Pittsburg, 8,500; L. C. Ledyard and Payne White, 8,000; Wm. C. Whitney estate, 8,000; W. H. Tilford, 6,000; John D. Areshoff, 6,000; W. G. Warden estate, 5,588; University of Chicago, 5,000; C. M. Pratt, 5,000; Daniel O'Day, 2,665.

Agreement With Independents. Through Wesley H. Tilford, treasurer of the Standard Oil company, the government's attorney, Frank B. Kellogg, was able to obtain evidence of an understanding between the Standard and independent refiners near Cleveland and Pittsburg. This agreement, which was entered into the latter part of 1902, provided that these companies should sell their entire output of oil refined to the Standard's export department, in return for which the Standard was to sell the companies a certain amount of crude oil each day. Mr. Tilford said that previous to the agreement the supply of crude oil had been reduced.

Small Point, Me., Sept. 20.—Catching lobsters by means of hook and line is rather a novelty, but this is exactly what Charles Chase of Bath did late yesterday afternoon, and today he has been exhibiting his catch. The crustacean is the biggest that has been seen hereabouts for a score of years. The body weighed nearly fifteen pounds, and the length from the tip of the claw to the tail was thirty-two inches.

NEGRO SUSPECTED

Chicago School Teacher Is Found Murdered, Choked to Death in Her Room.

Chicago, Sept. 20.—Mrs. William White Grant, a kindergarten teacher in the Chicago public schools, was found dead in bed today in her home, 5520 Madison avenue, and the indications are that she was murdered. The room showed signs of a struggle, and around the woman's throat was a tightly twisted piece of linen with which she had been choked to death. The police are looking for a negro who did chores around the neighborhood, on the theory he is the murderer.

SELF-DEFENSE IS CLAIMED. Campbell Attacked by Man He Slew, Is Attorney's Argument.

Chicago, Sept. 20.—That Amasa Campbell shot Dr. Benjamin F. Harris in the stock exchange building here last winter in self-defense was the argument of Attorney James Hartnell in the closing address to the jury today. "Harris was capable of murder," said Hartnell, "and I am positive that my client killed him only in self-defense." The attorney declared that several witnesses had testified to having heard seven or eight shots, but that none saw the discharge of more than three. "Who fired those other shots?" asked Mr. Hartnell. "Some of that shooting was done by Harris, and there has been no testimony to controvert that fact."

TELLS STORY IN COURT

Frank J. Constantine, Accused of Murder, Declares Mrs. Gentry Killed Herself.

Chicago, Sept. 20.—Frank J. Constantine, on the trial for the murder of Mrs. Louise Gentry, took the stand in his own defense today. He said that when he entered a room at the Gentry home, he told Mrs. Gentry that his father was a wealthy real estate man. Constantine declared that he had heard the Gentrys quarrel many times, and said that they lived unhappily.

On the day of the tragedy, he said, he went into his room to shave, and found Mrs. Gentry there packing the bed. He told her she was about to leave the city, and she asked him if he would not take her with him. She insisted, according to Constantine, and he positively refused. She then, according to his story, picked up the razor and cut her throat. Constantine asserted that he carried her down to the door of Dr. Doherty's office, pounded on the door and then left her standing there while he ran for another doctor. He said he noticed while hunting for this second doctor that there was blood on the sleeve of his coat, and he thought that if he returned he would be accused of murder and would not receive justice in the courts because he was a stranger. He then declared that he fled from Chicago.

On cross-examination Constantine declared that Mrs. Gentry had thrown her arms about him and otherwise shown her infatuation for him. Later in the day the state introduced letters from Mrs. Gentry to her husband showing her devotion to him. They were written a few days before her death. Constantine refused to identify letters signed with the name of his sister Clara, which were found in his room after his flight from the Gentry apartments. He also repudiated a letter from his mother, found in his pocket at the time of his arrest.

HOOKED GIANT LOBSTER.

Small Point, Me., Sept. 20.—Catching lobsters by means of hook and line is rather a novelty, but this is exactly what Charles Chase of Bath did late yesterday afternoon, and today he has been exhibiting his catch. The crustacean is the biggest that has been seen hereabouts for a score of years. The body weighed nearly fifteen pounds, and the length from the tip of the claw to the tail was thirty-two inches.

NOT CONFISCATORY

MINNESOTA'S 2-CENT FARE LAW SUSTAINED.

However, While Affirming Rate-Making Power, U. S. Judge Lochren Enjoins State from Enforcing Commodity Tariffs.

St. Paul, Minn., Sept. 20.—Judge William Lochren, of the United States circuit court, this afternoon in a lengthy opinion delivered from the bench granted the request of the complaining stockholders of railroads operating in Minnesota that a temporary injunction issue against the commodity rates enacted by the last state legislature.

The court, however, made preliminary rulings with the attorneys for the state on three other points: First, that the exercise of the rate-making power by the state does not interfere with interstate commerce; second, that the interstate rates ordered by the state railroad commission Sept. 1, 1906, shall remain in force; third, that the two-cent passenger rate enacted by the last legislature is not confiscatory and shall remain in effect.

The injunction affects only those rates which were to have taken effect June 1 last, but which did not because of the restraining order of the court.

FARES ORDERED REDUCED.

St. Paul, Minn., Sept. 20.—The state railroad commission today ordered the passenger rates on all railroads in the state reduced from 3 cents to 2 1/2 cents per mile. The order takes effect Oct. 15.

AWFUL DISASTER AT THE ROLLING MILL MINE

Brake Band of the Hoisting Drum Failing to Work, Cage Filled With Human Freight Drops Like a Meteor 662 Feet Down the Shaft of the Jones & Laughlin Steel Company's Property at Negaunee—Nine Men Are Dashed to Death, One More Has Since Expired, Three Injured Have Broken Backs and Two Others Are Suffering from Grievous Hurts—Entire Marquette Range Appalled at the Terrible Consequences of the Accident, the Second Underground Horror in the History of the City.

—The Dead— CHARLES KENT, ALFRED J. WILLS, JOSEPH RHODDA, MATT LIND, EMIL MUTHONEN, JOHN CHERRY, THOMAS BLIGHT, ANTONIO CERTO, JOHN JOHNSON, WILLIAM HYVA, or HYARENEN. —The Injured— Samuel Stevens, John Makki, John Nelson, George Sebastiano, Thomas Roberts.

Negaunee, Mich., Sept. 20.—The worst disaster that has ever taken place at a mine on the Marquette range occurred today at the Rolling Mill property, operated by the Jones & Laughlin company. Nine miners were killed outright and seven others were injured, four of them perhaps fatally, by the cage falling to the bottom of the shaft. The only other disaster on this range that in any way compares with the one today occurred at the Negaunee mine on Tuesday, Jan. 7, 1902, when ten men lost their lives by a cave-in from the old workings.

Cage Falls from Surface. The victims of today's disaster were dropped from surface to the bottom of the mine, a depth of 662 feet, in the cage, which they had just entered to descend into the workings. How the cage happened to get away from the brakeman will perhaps never be known, as the man at the wheel did nothing more than he had done many times before in handling the cage, and was today unable to explain just how the accident occurred. The cage had been used all night, and some of the miners were frightened when they saw a short time before it came to surface in it. It was resting on the clutches at the top of the shaft when the brakeman was given the signal to lower. The cage was raised a few feet to release the clutches, and it appears that the latter had barely been freed when the cage dropped as suddenly as if it were dropped in the free air. A number of the other men, who were to go into the mine on the cage later on, were standing at the entrance to the shaft and saw their fellow workers go down to their death, powerless to help them.

Cage Could Not Be Checked. So far as could be ascertained today, the brakeman, Ernest Kronberg, did not lose his head when he realized that the brakes were not working properly, but put all his strength to the wheel, turning it as tightly as possible. However, he could not check the speed of the cage, which increased rapidly. John Nelson, the engineer, was in the room, and ran to Kronberg's assistance. He saw fire flying from the brake band, and realizing that the strength of a dozen, or perhaps fifty, men would not check the falling cage, he threw on the hoisting gear, but even this did not seem to slacken the progress of the cage, which, when it reached the bottom of the shaft, was traveling at such a terrific speed that it crashed through the foundation timbers and into the sump, which is twenty-two feet deep. The shaft is 640 feet in diameter, and with the total distance that the cage traveled was 662 feet. All of the two-inch steel cable, 1,700 feet of it, went into the shaft, and coiled on top of the cage, which was found in a twisted mass. The drum revolved at a terrific rate when the cage after the drum had struck the bottom. Engineer Nelson stating that its movement was not checked until after the rope had left it.

Engine's First Accident. The engine and drums were installed at the Rolling Mill about a year ago, the plant having been transferred from the East End Angeline mine, Ishpeming. There are two drums, one being used on the cage and the other on the skip. The cage drum is the farthest from the platform. The shaft was used for twelve years before it was transferred to the Rolling Mill and was in good repair when it went into commission. It was found in good condition after the accident. It is assumed that the brake band, which was worn after being used during the night, had contracted; that when the brakeman tried to bring it down it did not adjust itself readily and that when it did come back its force was insufficient to check the speed of the cage, which weights several tons. In addition to the weight of the cage was the weight of the net, so that the load was a heavy one, though there have been times when twenty-one or twenty-two men have ridden on it. Once the cage got from under control of the brakeman it would have taken an enormous power to have stopped it, as the shaft is perpendicular.

WEATHER FORECAST

Washington, Sept. 20.—The following is the weather bureau's forecast for Upper Michigan: Fair Saturday and Sunday; light to fresh west winds.

PINKERTON RICH MAN

Head of the Big Detective Agency Left Fortune of Three Million Dollars.

New York, Sept. 20.—The will of Robert Allan Pinkerton, head of the Pinkerton Detective agency, who died Aug. 12 on board the steamship Brenon, was filed today. It makes disposition of \$3,000,000. Nearly all the property is left to his widow, his son Allan and his two daughters.

\$100,000 Estate for Mennonites.

Lancaster, Pa., Sept. 20.—The will of Adam Lantz, Lancaster township, who committed suicide a week ago by hanging himself in his barn because of ill health, which was probated yesterday, leaves \$100,000 to the old Mennonite home at Orville, Lancaster county. It is the largest bequest ever made to a Mennonite institution anywhere.

RABBI ATTACKS DECREE OF POPE.

Says Encyclical Against Modernism Is a Long Step Backward.

New York, Sept. 19.—Rabbi Joseph Stenover, Temple Emanu-El, in his statement day address criticized the pope's recent encyclical against modernism and declared that governments should undertake all education so that no retrograde step might be taken. He said: "It is time, high time, that the governments of the great religious organizations should protest against such a decree; a dictum that would tend to shut the human race 1,000 years backward, and makes for the upholding of a blind faith that can never bring happiness to humanity."

Had Assistance Immediately.

A part of the night shift crew, the trimmers and other workers on company account, had come to surface shortly after 6 o'clock, all using the cage, and the eight-hour men, who usually start to surface after the first cage of day men comes down, had started to assemble at the shaft on the bottom level when they heard the crash in the shaft. This was followed by a terrific cracking of timbers, when the cage struck the bottom gates, and then came the agonized cries of the injured. The men realized what had happened, and as fast as the last of the cable had coiled about the top of the cage they began the

Plenty of Room to Work.

work of rescue. It was evident from the instant the rescuers began work that most of the men were either badly injured or were dead. Some of those who were hurt were able to pull themselves from among the dead bodies of their fellow workers, and their cries for help could be heard some distance into the mine. Most of the injured were conscious, and they were the first to be removed.

Few People at Shaft.

There were in the neighborhood of 500 people at the mine at one time on either during the morning, but at no time was there any excitement, as very few relatives of the dead and injured had assembled. The sad news was not sent to the afflicted until most of the bodies were removed, as for a time there was doubt as to what men were among the victims.

Most of Dead Men Married.

Six of the dead were married, and all but one, Thomas Blight, have families in Negaunee. Blight is a new comer in the city, he having recently arrived here from his native place in England, where his family lives. The other married men were Charles Kent, Alfred J. Wills, Joseph Rhodda, Matt Lind and one other. Most of the married men were middle aged and nearly all of them are old residents of the county, and are well known in Negaunee. Kent was a foreman in the mine. The other married men were Alfred Jewell and John Kivisto.

The injured there were more men in the bottom of the shaft than could work to advantage. The first of the injured men reached the surface at 10 o'clock, and the last at 11 o'clock.

Mine Has Remarkable Record.

There are few, if any, mines in the country that could show the record of the Rolling Mill mine. In the history of the mine, ground was broken for the shaft two years ago last May. There had never been a fatality, or even a serious injury, at the property up to this morning. The record was frequently commented on by mining men of the range. The shaft was put down in remarkably quick time, considering the nature of the ground and the underground workings have also been opened rapidly. A number of buildings have been erected, machinery installed, a large coal trestle built, and numerous other improvements made. Considering all these things and taking into account that a force of nearly 150 is employed the record up to today is seldom equaled.

Captain Edward Cory was much grieved at the disaster. He said that most of the men killed and injured were skilled miners. Some of them he considered to be as good men as there are on the range. Most of them are old miners and men whose death will be mourned for a long time in this community. C. T. Kruse, assistant manager, and R. T. Smith, master mechanic of the company's properties, were at the mine soon after the accident occurred, as was also Superintendent Thomas Walters, Jr.

The sad news of the catastrophe spread throughout the city and county within a comparatively short time after word was telephoned from the mine to the Negaunee hospital. When the bodies were being brought to the morgue on Iron street there were hundreds of people standing around discharging the duties of a funeral home. Many were among the victims, the reports circulated being of a conflicting nature.

Negaunee Mine Disaster.

Today's accident called to the minds of many the facts relative to the catastrophe at the Negaunee mine in 1902. The latter was a most distressing affair, and the search for the bodies of the victims was continued for more than a week. The dead were William Williams, George J. Sullivan, Joseph H. Hakanen, Eric Lahti, Jacob Hanalla, Louis Mattson, Angelo Carilli and John Anderson. The disaster occurred at 1 o'clock in the afternoon and by that evening only one body had been recovered. The others were taken out at intervals between that time and the 15th of the month.

NO MONEY FOR DIETZ

Reported Settlement Is Denied—Logs to Come Out Via New River Route.

Chippewa Falls, Wis., Sept. 20.—The 5,000,000 feet of logs held for three years by John Dietz at the Cameron dam will be flooded to this city by way of the Flambeau river, the Mississippi River Logging company having given a contract to A. L. Moses, of Northfield, Minn., to haul them five miles by team from the Thornapple river to the Flambeau river. This eliminates all further trouble with Dietz and makes unnecessary the rebuilding of the Cameron dam to flood the logs by the Thornapple river route. The report that Dietz has been paid \$15,000 is denied. Sheriff Clark still has three criminal warrants against Dietz which he is trying to serve.

AUTHORIZED BY PARENTS.

Missing Detroit Girl Taken to a Roman Catholic Institution.

Detroit, Sept. 20.—Miss Helen Ferency, whom it was reported to the police when she was abducted from her boarding place last evening by two men, was taken, it develops today, to Roman Catholic institution under authority of her parents.

LIGHTNING TEARS OFF SHOE.

Muskegon, Mich., Sept. 20.—Lightning today struck Grace Boole, eighteen years old, residing near here, ran down her right side, tearing the shoe from her right foot, and left her uninjured.

WILL HUNT BEAR

President to Spend Seventeen Days in Cane Brakes of Northeastern Louisiana.

New Orleans, Sept. 20.—John M. Parker, who will be one of President Roosevelt's hosts during his camping and hunting expedition in Louisiana next month, arrived here today from Mississippi. Holt Collier, a famous Confederate negro scout, freed man and hunter, will act as guide for the president's party. Collier is noted especially as a bear hunter and was in charge of President Roosevelt's hunting party in Mississippi a few years ago.

Although the itinerary of the expedition is not arranged, it is known that the president will be offered opportunities to hunt in Louisiana, and he, as far as known, no human being has ever made permanent habitation and where the sport is in some respects quite out of the ordinary.

Leaves Oyster Bay Wednesday.

Oyster Bay, N. Y., Sept. 20.—President Roosevelt will unburden himself of the responsibilities associated with the office of chief executive for seventeen days, beginning Oct. 5, and enjoy the rigors of camp life. Though nominally on his vacation at Oyster Bay this summer, there have been but few hours in which official business has not intruded upon the president. A physical and mental recreation, as complete as his cares will permit, is now arranged.

President Roosevelt will pitch his camp in the northeastern corner of Louisiana, on or about Oct. 5. The exact spot is yet to be determined. The plans provide for a "camping trip," but as the cane brakes of northeastern Louisiana are noted as a shelter for game, those who are to accompany the president expect that the monotony of camp life will occasionally be broken by a hunt. The president will leave Oyster Bay for Washington next Wednesday, and on the following Sunday will start on his Western and Southern speech-making tour.

At Memphis, Tenn., on Oct. 4, the speech-making program will be interrupted and the president will start for the camping grounds. He will break camp on Oct. 21, going directly to Vicksburg, Miss., to make his promised speech there. The return to Washington will immediately after be begun, and the White House will be reached on the afternoon of Oct. 23.

BIG MIMIC BATTLE

GERMAN ARMY FIGHTING UNDER KAISER'S EYE.

Siege of Port Arthur the Idea Being Followed in Extensive Operations in Which Live Projectiles Are Used.

Posen, Prussia, Sept. 20.—Emperor William is personally watching the siege operations which the German troops are carrying out near here along the same general lines as those of the Japanese at Port Arthur. Many heavy, long range siege guns and numerous batteries of field artillery are engaged, the distinguishing feature being the firing of live projectiles against improvised fortifications, the live shells being obtained by practice under conditions resembling those of the actual warfare.

One part of the operations is the pursuit of a retreating army with artillery, the gunners finding the ranges of dum-dums moved by electricity. As the artillery is using shells with full bursting charges the ground over which the operations are being conducted has been cleared of inhabitants and domestic animals, and extreme precautions are being taken to prevent any one from entering the fire zones, not alone because it is dangerous but also on account of the accuracy observed regarding the results attained. No permits have been given to military attaches or other foreign officers to witness these maneuvers. It is understood that the present German army operations are a result of the gigantic siege experiments conducted by the French army last year.

IMPORTANT EDICT ISSUES AT PEKIN

Evolution of the Chinese Despotism Into a Constitutional Government Is Foreshadowed by Dowager Empress' Action.

After Six Months' Consultation With Advisers, Manchu Autocrat Takes Advanced Step Toward Reform by Authorizing Regulations Be Framed for the Establishment of a Council of Deliberation Preliminary to the Institution of a Parliament.

Pekin, Sept. 20.—An imperial edict was issued today authorizing Sun Chian and Prince Pu Lun, the latter the Chinese envoy at St. Louis, to frame regulations in co-operation with the grand council for the establishment of a council of deliberation for the purpose of aiding the government "so that a foundation may be laid for a parliament."

The dowager empress says that in the establishment of a republic the government for China the opinions of all were considered. Both Chang Chi Tung and Iuan Shi Kai, since coming to Peking on their appointment as grand councilors, have urged the establishment of a constitutional form of government, recalling that this reform has been promised and that China and the world expected to see it carried out.

Gratifying News to Washington.

Washington, Sept. 20.—The important edict referred to in the Peking cablegram, relative to the establishment of a council of deliberation, has been received in preparation for more than six months. The American legation at Peking has been keeping close watch on the development of this great scheme for the evolution of the Chinese despotism into a constitutional government, and the state department has been kept fully advised of the project, which meets with full approval here. As in the case of Japan, America is ready to lend every assistance to China in adopting modern methods of government and in attaining to the rank of a fully civilized state.

WILL VISIT LAKE SUPERIOR.

Waterway Commission to Cruise from Lorain, Ohio, to Duluth.

Washington, Sept. 20.—Members of the internal waterway commission are to cruise the great lakes to familiarize themselves with the project of diverting the lake waters to the Mississippi system, making the great lakes-gulf waterway.

General MacKenzie, chief of engineers, left today for Cleveland, Ohio, where he will meet Representative Burton, president of the commission, and the two will proceed to Lorain, Ohio, to join several other commissioners, including Director Sewell, government reclamation service; Senator Burkhead, Alabama; Gifford, Pinchot, chief of the forestry bureau, and Dr. W. J. McGee. On board a big lake ore carrier the party will spend three days in a voyage from Lorain to Duluth.

At Duluth the party will disembark and cross by rail to St. Paul, where the commission will board the big government snagboat MacKenzie and descend the Mississippi river to Keokuk, Iowa, leaving St. Paul on Saturday morning, during the daytime, and arriving at Keokuk Oct. 1.

OCEAN FARES IN A MAZE.

First Cabin Passage Cheaper Than Second, Due to Rate War.

New York, Sept. 20.—There is an amusing side to the present rate war of the various steamship companies maintaining service between this port and Europe.

On any American line steamship beginning Nov. 1 it would cost a passenger \$52.50 to come from Cherbourg to New York, first class, at the present cut rate. The price for the second cabin accommodations on the same ship stands \$35, so that the passenger in the first cabin is \$2.50 ahead of the game. This little discrepancy in the first and second cabin rates was not discovered until today.

As there will likely be a further cut in the first cabin rate this week, it is not unlikely that stevedores will find it cheaper and very much more comfortable to get into the second cabin when that rate is lowered slightly below the present stevedore quotations.

FORMER SLAVE DIES.

Negress Once Owned by Thomas Jefferson Was 105 Years Old.

Danville, Ill., Sept. 20.—Mrs. Lucy White, a negress 105 years old and once the slave of Thomas Jefferson, is dead at her home in this city. She leaves a husband ten years her junior. Mrs. White was regarded as the oldest resident of Illinois. She retained her faculties to a marked degree until death. After Jefferson's death she was sold to a slave dealer at Lexington, Ky. When there she witnessed the funeral of Henry Clay.

**DAILY MINING JOURNAL**  
 A MORNING PAPER PUBLISHED BY THE  
 MINING JOURNAL CO. (LIMITED.)  
 Issued daily except on Sundays. Contains  
 Associated Press dispatches and is especially  
 devoted to the Upper Peninsula interests.  
 SUBSCRIPTION RATES:  
 Per month, by carrier, \$1.00  
 Per year, by mail, \$10.00  
 MARQUETTE, MICH., SEPT. 21.

Entered as mail matter of the second class  
 in the postoffice at Marquette, Mich.

But what will our rivers and harbors  
 do without Mr. Burton, if he is successful  
 in getting himself elected mayor of  
 Cleveland?

Candidate Burton's bill of particulars  
 concerning the alleged rottenness of the  
 Cleveland municipal government will  
 come later, when the campaign heats  
 up.

Eight Democrats will have seats in the  
 constitutional convention. In the assembly  
 of ninety-six delegates there will be  
 fifty-nine lawyers and but six farmers.  
 Certainly there is to be a sufficiency of  
 legal talent.

The next thing we hear of Home-  
 steader Dietz of Cameron Dam he is  
 likely to be on the stage. The story of  
 the last few years of his life furnishes  
 admirable material for a melo-drama.

The water board, like Davy Crockett's  
 coon, has now been politely requested  
 to come down. But whether, like Davy  
 Crockett's coon, it will actually come  
 down or not is a matter which only time  
 and developments can settle.

William E. Curtis, in an article on  
 Clergue and the Clergue enterprises, con-  
 cludes with a prediction that ultimately  
 the Soo will build a monument to the  
 man whose mind conceived the immense  
 projects on St. Mary's river. Meanwhile  
 the lock city is wondering when the  
 busted water power canal is to be fixed  
 up.

The rivers and harbors committee was  
 respectfully informed that Marquette  
 would like an extension of the break-  
 water, the creation of a harbor of refuge  
 or any other little thing that the com-  
 mittee has hanging around loose that no  
 other lake port wants. Of course Mar-  
 quette is becomingly modest.

The congressional boomer turned loose  
 for Hon. Chase S. Osborn by a number  
 of disgruntled Chippewa county Repub-  
 licans established one thing clearly, re-  
 marks the Iron Mountain Press: that  
 Mr. Osborn has lost none of his well de-  
 served popularity with the newspapers  
 in the upper peninsula. Expressions of  
 good-will were in evidence in nearly ev-  
 eryone of the exchanges.

At last the city of Marquette has held  
 an election to which no scandal can be  
 attached, says the Escanaba Mirror.  
 This desirable condition in a city where  
 charges of election frauds were lodged  
 as frequently as they have been in the  
 Lake Superior city in the past has been  
 brought about through the use of voting  
 machines. It would seem proper that  
 those interested in Marquette's welfare  
 should now see that the mechanical vot-  
 ing devices become a permanent fea-  
 ture of that city's elections in the future.

Washington, D. C., is one place where  
 our old friend Carrie Nation, who has  
 bobbed up again, has been treated in no  
 uncertain manner. In default of a pay-  
 ment of a fine she was given a stiff  
 jail sentence, for persistent occupancy  
 of the public streets to make noisy and  
 disorderly harangues, and if the  
 present sentence doesn't suffice it is  
 plainly intimated that Carrie will get  
 another. Evidently the Washington au-  
 thorities do not like her methods.

It is reported on what seems to be  
 good authority that Mr. Bryan will soon  
 issue a statement to the effect that he  
 will run again, if his party wants him  
 to be its standard bearer. Also he is  
 said to be of the opinion that the cam-  
 paign of 1908 will be in every way more  
 intense and hard fought than even the  
 famous good money campaign eleven  
 years ago. To surpass that fight in these  
 particulars the campaign of 1896 will  
 have to open early and open hot, but  
 such an expert political prognosticator  
 as Mr. Bryan ought to know whereof he  
 speaks.

Just as we were congratulating our-  
 selves that all the jobs were filled and  
 all the municipal troubles over we are  
 informed that our very deliberate water  
 board is under suspension, and must

appear before the council and give an  
 account of itself, or all sorts of dire  
 things are likely to happen to it. What  
 will the board do. We don't know au-  
 thoritatively, but we imagine that it  
 will get its back up and fight, refuse  
 to appear, refuse to quit, refuse to give  
 up its books. The council and board  
 are not unevenly matched. Both have  
 some choice fighting spirits, some real  
 last ditchers. Numerically the board is  
 much the smaller body, but doubtless  
 it will prove able to take care of itself.  
 On with the ball.

The original park, cemetery and street  
 commission does not appear to be des-  
 tined to have a very long life. Two of  
 the men appointed by former Mayor  
 Culver have resigned, so that its com-  
 plexion is already materially changed.  
 The original commission was not a homo-  
 geneous or particularly harmonious body,  
 and on that account, and some others,  
 has not had a particularly satisfactory  
 reason. If the experiment was to be  
 judged on what has been seen of it to  
 date it is to be feared that the commis-  
 sion plan of managing street and sewer  
 work would be pronounced a failure, or  
 an indifferent success. However, it has  
 not had a fair trial, and judgment should  
 not be pronounced until it is seen what  
 a harmonious board, working to one pur-  
 pose and with efficient and helpful sub-  
 ordinates, can do.

Alger county people, and particularly  
 the residents of Munising, have taken  
 hold of the plans and arrangements for  
 the Alger county fair with vigor. This  
 year a premium list has been published  
 and in various other ways the fair will  
 be made more elaborate. An Ishpeming  
 band has been engaged to furnish music  
 and various entertainment features are  
 being arranged. The exhibits of farm  
 produce will furnish an index to the  
 possibilities of Alger county's farming  
 lands that will doubtless prove impres-  
 sive even in an off season and they will  
 probably excel the displays at fairs in  
 this region held on earlier dates. The  
 Alger county fair is an institution that  
 ought to be an excellent thing for Mun-  
 ington and the county at large, and it is  
 to be hoped that it will continue to be  
 successful.

The conference of M. E. clergymen re-  
 cently closed did not result in much dis-  
 turbance of the pastors in the upper  
 peninsula, most of those to whom calls  
 had been extended being returned to their  
 old fields of labor. In the lower  
 part of the state, however, it is reported  
 that there was a general shakup of the  
 clergymen, and that large numbers of  
 them were allotted to new charges. The  
 policy of rather extended terms of ser-  
 vice which prevails generally in the up-  
 per peninsula has many things in its fa-  
 vor. A clergyman isn't moved, if he is  
 acceptable to it, before he has opportunity  
 to know his congregation thor-  
 oughly, to learn its peculiarities and  
 give it opportunity to learn his. The  
 right kind of a clergyman should be more  
 effective the longer he remains in a  
 given field, and when a congregation has  
 what it believes to be the right kind of  
 a clergyman it should be allowed to en-  
 joy him. In this connection it may  
 be remarked that the M. E. congregation  
 here is greatly pleased with the return  
 of Mr. Maywood to Marquette. In him  
 it believes it has the right kind of a  
 clergyman, and such of the non-Metho-  
 dist public as know Mr. Maywood whole-  
 ly agrees with it.

**PROFITS PROVE A MONOPOLY.**  
 The statement of dividends and profits  
 of nearly a score of subsidiary corpora-  
 tions belonging to the Standard Oil  
 company of New Jersey, the trust, sub-  
 mitted in evidence in the New York  
 hearing of the government's suit to dis-  
 solve the combine, reads more like the  
 glittering prospectus of some self-ex-  
 plained financial transactions of a legiti-  
 mate business undertaking. Profits of  
 1,000 per cent earned by the Standard  
 of Indiana are unusual even in these  
 days of get-rich-quick improvement com-  
 panies, mining bonanzas and fake pro-  
 motions. The profits of the rest of the  
 allied corporations also run into fabulous  
 percentages, as based on their paper cap-  
 ital. How much of this stock, in the  
 aggregate, is watered, is a question, the  
 answer to which undoubtedly would still  
 further swell the rate of earnings. From  
 the showings here made it may be safely  
 concluded that on its actual invest-  
 ment the Standard Oil company of New  
 Jersey, including its subsidiary  
 possessions, is making profits far in ex-  
 cess of those of any other enterprise in  
 this or any other country. Contrary to the  
 economic rule that the larger the in-  
 vestment and greater the business the  
 smaller is the margin of profit, which  
 applies to most competitive industries,  
 the Standard company's fiscal statement  
 shows a reverse condition, or a tremen-  
 dous increase of the profit margin as  
 the business has expanded.

These profits are abnormal, excessive  
 and illegitimate. They represent the  
 practice of extortion upon millions of  
 consumers. They are simply preposter-  
 ous when measured in the light of re-  
 turns from any other investment of a  
 large character. That it is possible in  
 a single year to pile up net earnings of  
 \$10,000,000 on a capital of \$1,000,000,  
 or turn one dollar into ten, proves that  
 the prices of kerosene and the by-prod-  
 ucts from the petroleum industry are  
 many times what they should be. Com-  
 pare these facts with the statement of  
 H. H. Rogers and defenders of his cor-  
 poration that Standard Oil is a philan-

**SUPERIOR TRUST COMPANY**  
**HANCOCK MICHIGAN**  
 Capital - - \$150,000

This company is under  
 the supervision of the  
 state banking depart-  
 ment and is authorized  
 by the law to act as ex-  
 ecutor, administrator, guar-  
 dian, assignee, receiver or  
 trustee.

C. A. WRIGHT, Pres.  
 JACOB BAER, Vice Pres.  
 M. C. GETCHELL, Secy.

thropic industry, that it has been a  
 blessing to mankind and that it sells  
 "cheap" oil to the public. The truth is  
 that the lighting of humble homes with  
 kerosene is the most excessively paid for  
 necessity that has to be provided. In-  
 stead of being cheap, it is the dearest of  
 all commodities. There is just one and  
 only one reason why this is so. The  
 Standard Oil company is a monopoly.  
 Its war against competitors has been so  
 successful that it has been enabled to  
 practice extortion to any degree its greed  
 might dictate. Its profits alone prove  
 that it is an illegal combination, to say  
 nothing of the direct evidence establish-  
 ing such contention.

**A TERRIBLE DISASTER.**  
 Among the disasters that have oc-  
 curred in the conduct of the great min-  
 ing businesses of the Lake Superior dis-  
 trict during more than half a century  
 past and which are recalled with horror  
 from time to time the one at the Rolling  
 Mill mine, Negaunee, operated by the  
 Jones & Laughlins interests, which wiped  
 out the lives of ten men and perhaps  
 fatally injured a number of others, will  
 have a prominent place. It was dis-  
 cussed with the greatest regret through-  
 out the county yesterday, and there is  
 widespread sympathy for the afflicted  
 families and poignant sorrow for the  
 men whose lives were snuffed out with  
 such brief warning.

The disaster doesn't appear to be sat-  
 isfactorily explained at this writing. It  
 is known that the brake controlling the  
 drum on which the cable operating the  
 cage used by the men in entering and  
 leaving the mine failed to work in a  
 proper manner, but just why it failed  
 does not clearly appear. It has been  
 commented that perhaps the cause of  
 the disaster will never be definitely  
 known. It is a little early, however, for  
 such a prediction, for a right inquiry  
 may throw a good deal of light on the  
 matter.

The Phelps-Dodge interests will make  
 no such drastic curtailment. They will  
 reduce the production of the Copper  
 Queen 2,000,000 pounds per month, but  
 neither the Detroit Copper company, pro-  
 ducing 1,700,000 pounds, nor the Old Do-  
 minion, producing 3,500,000 pounds per  
 month, will curtail except in so far as  
 they will refuse the treatment of cus-  
 tomer ores beyond such sulphides as are  
 necessary for smelting operations.

It is quite possible that the Bigelow  
 properties at the Lake will curtail, as  
 Hanson has been active in the endeavor  
 to secure the adoption of a general cur-  
 tailment plan by other Lake mining com-  
 panies, but so far no orders have been  
 given to this effect. The Copper Range  
 company stands ready to curtail 50 per  
 cent, provided other Lake producers will  
 do likewise.

The American Smelting & Refining  
 company controls 100,000,000 pounds of  
 copper production per annum, but it is  
 under contract to receive and treat these  
 ores, and it cannot restrict very readily,  
 as it has to pay for the ores whether  
 they are smelted or not. Utah copper  
 production will be curtailed from neces-  
 sity by reason of the lack of fuel. This  
 situation likewise applies to the Bound-  
 ary district of Canada.

With an accumulation of 200,000,000  
 pounds of copper, there is no immediate  
 fear that the consumers will not be able  
 for the present to get what supplies they  
 need, but on the other hand, with any  
 revival of business, the present unsold  
 stocks would be wiped out very quickly,  
 and by that time the supplies from the  
 electrolytic refineries would be so re-  
 duced that the demand would be very  
 quickly reflected in the price. Some of  
 the leading copper interests say that the  
 prospective demand for copper during the  
 next five years is something enormous,  
 and once let the money market straight-  
 en up, the railroads and industrial pro-  
 cesses with construction work would hold  
 up for over six months, and no one need  
 have any fear of an over-production.

The present is the first time in the  
 history of the trade that the producers have  
 acted with any degree of unanimity, and  
 the present situation gives promise of a  
 closer alliance among the copper produc-  
 ers in the future than has ever occurred  
 in the past.

**BINGHAM CONSOLIDATED.**  
 It is said that important developments  
 are being worked out by the Bingham  
 Consolidated company in connection with  
 a consolidation of mining and smelting  
 interests in Utah under the control of F.  
 Augustus Heinze. It is asserted that the  
 Bingham Consolidated has not proved the  
 success anticipated either as a mining or  
 as a smelting company. When present  
 plans are worked out, it is said, it will  
 probably dispose of its smelter to a new  
 Heinze smelting company recently organ-  
 ized under Maine laws with \$10,000,000  
 capital, and it will be used in the con-  
 struction of the new big smelter to be  
 built by the Heinze interests on the  
 shores of the Great Salt Lake, two miles  
 from Garfield. The Bingham company  
 will probably also dispose of other assets  
 not considered necessary for its needs as  
 a mining company, such as the Mascot  
 tunnel, which can be made of great value  
 in solving transportation problems in  
 Bingham. In any sale of its assets the  
 company's rights and future needs will  
 be taken care of. It will secure smelting  
 and transportation contracts to com-  
 pensate it for the sale of its assets. The  
 company's future, however, will be more  
 dependent upon its mining properties in  
 Bingham and Tintic than upon its custom-  
 er possibilities.

**HEALTH IN THE CANAL ZONE.**  
 The high wages paid make it a mighty  
 temptation to our young artisans to  
 join the force of skilled workmen need-  
 ed to construct the Panama Canal. Many  
 are restrained, however, by the fear of  
 fevers and malaria. It is the knowing  
 ones who have used Electric Bitters,  
 who go there without this fear, well  
 knowing they are safe from malarious  
 influence with Electric Bitters on hand.  
 Cures blood poison, too, biliousness, weak-  
 ness and all stomach, liver and kidney  
 troubles. Guaranteed by The Stafford  
 Drug Co., druggists, 50c.

**Northern State Normal School**  
**MARQUETTE**  
**School Begins October 2, 1907**

The Northern State Normal School admits graduates of approved high schools to the two years' course leading to a life certificate and diploma. It offers courses leading to a three-year certificate, which is renewable for three years and valid in graded schools, and also a rural school certificate. Has excellent facilities for training teachers for special work in Kindergarten, Music, Drawing and Nature Study. It has an exceptionally fine corps of teachers who are specialists in their departments, and its training school gives a splendid opportunity for the training of teachers. There is a splendid dormitory in connection with the school which is an ideal home for the student. The building is lighted with electricity and heated with steam; the living rooms are large, well lighted and pleasant, and the dining room has a seating capacity of one hundred and fifty persons. The expenses are moderate. Students of the Northern Normal School who finish the life certificate course are given fifty-six hours credit at the University of Michigan. **CURTAINMENT OF PRODUCTION.**

The 50 per cent curtailment on the part of the Amalgamated and Cole-Ryan properties should cut off copper production at the rate of 15,000,000 pounds per month. The Amalgamated companies' production has been at the rate of about 27,500,000 pounds per annum and the Cole-Ryan producers, the Greene-Canaan, North Butte, Butte Coalition and Calumet & Arizona, have been outputting at the rate of about 150,000,000 pounds per annum or combined with Amalgamated at the rate of 425,000,000 pounds per annum. This is at the rate of 35,000,000 pounds per month.

The Phelps-Dodge interests will make no such drastic curtailment. They will reduce the production of the Copper Queen 2,000,000 pounds per month, but neither the Detroit Copper company, producing 1,700,000 pounds, nor the Old Dominion, producing 3,500,000 pounds per month, will curtail except in so far as they will refuse the treatment of customer ores beyond such sulphides as are necessary for smelting operations.

# Copper Country

R. AND H. COMMITTEE.

Doubt as to the Identity of the Party Here Yesterday.

Up to the time of the arrival of the Juniata yesterday no one knew whether the distinguished party aboard was the deep waterways commission or the rivers and harbors committee. The party has been called both. The visitors proved to be the rivers and harbors committee.

Those in the party were Ernest F. Acheson and wife, of Pennsylvania; Alva S. Alexander, of New York; Harvey D. Gould, of Ohio; James H. Davidson and wife, of Wisconsin; J. Adam Bede and wife, of Minnesota; Edgar C. Ellis and wife, of Missouri; Stephen M. Sparkman, of Florida; Joseph F. Burgess, of Texas, and John A. Moon and wife of Tennessee.

### POLE QUESTION STILL ON.

Hancock Street Commissioner Started to Dig, But—

Street Commissioner Lee of the city of Hancock started to dig up, or down, the telephone poles on West Quincy street Thursday afternoon. Representatives of the company stood by and saw the commissioner in action. Attorney Thompson of Detroit was here, but he did not attempt to interfere.

The commissioner had not completed the work yesterday as the company's representatives wanted to get out and secure leases of residence lots on which they could set up their poles. The council seems to be willing to do most anything to settle the matter and the company is now evidently imbued with a spirit of arbitration so that the great cause may be settled very soon.

COPPER COUNTRY FAIR.

Bonanza Arrives—Fair Notes and Exhibit Gossip.

The Copper Country Fair opening Tuesday, there are just three more days in which to get ready for it and the management and assistants are working hard toward that end. It begins to look like fair time. Bonanzaing, the great aerobically, which means balloon ascension, arrived Thursday. He is here early in order to get his paraphernalia ready. Bonanzaing is undoubtedly a master balloonist. He never disappoints, goes up in the meanest kind of weather and makes particularly brilliant ascensions at night. He is a good fair feature and will always be one if he desires.

The business houses which have advertising space in the main exhibition hall are beginning to decorate. The Presbyterian and Episcopal churches of Houghton are included in this list. They will serve refreshments. Then comes A. W. Buck, photographer; W. B. Hoar, general merchandise; Steve Rickard, Hancock candy manufacturer; Lakeside Floral company, Houghton County Electric Light company, Gately-Wiggins company, house furnishers; Grinnell Bros. music and musical instruments; Otto Borresen, souvenirs; Dover & Halverson, pianos; C. H. Markham, candy manufacturer; Haas Brewing company, pure drugs.

Announcement was made yesterday by F. R. Bolles, general passenger agent of the Copper Range railroad, of special train service from various points to Houghton next week. Special trains will be run by the Calumet division, in addition to the regular trains, and there will also be a special train service from Ontonagon and Rockland.

There will be a special train leaving Houghton at 6:30 p. m. Wednesday for Ontonagon. A special will leave Ontonagon for Houghton Thursday morning, leaving Houghton at 7:30, and returning, leaving Houghton at 6:30 the same evening. The Copper Range trains will run through.

Special trains will leave Calumet Wednesday, Thursday, Friday and Saturday at 11 a. m., 5 and 11:15 p. m. The regular service will take care of people from the south range and lake shore towns.

BAD EFFECTS OF STORM.

Rain Thursday Night the Most Severe of No Bad Results.

The copper country was visited by a heavy rain storm Thursday night, the most severe of the season. Water came down in sheets and kept it up for hours so that by midnight the entire country was thoroughly soaked.

Hancock suffered most ill effects. Back of Hancock is Quincy hill, which is largely composed of loose earth and has also a liberal sprinkling of boulders. Everything that was spiked down came off the hill Thursday night and landed in Quincy street. In some places the flood undermined the curbs of the cross streets and broke them down. A deeply rutted road was left in the street near the Hotel. Street railway and steam road tracks were washed out and the street car service between Houghton and Hancock was stopped at 9:30 o'clock.

Hundreds of tons of earth and rubbish littered the streets of Hancock yesterday and the early morning scene was a desolate one. The most serious damage from the storm was to M. C. Getchell's new residence. This handsome house is located in West Hancock, not far from the hydraulic land reclaiming operations. The sandy soil there was very soft for the rain and it actually washed into the Getchell basement until it filled up completely, burying the heating plant and every other thing in the basement. It will cost Mr. Getchell \$1,000 to repair the damage which the storm worked in his house.

At the Trimountain mine a heavy rush of water caused a suspension of operations yesterday.

TO INVITE I. O. O. F.

William H. McGinn and Theo Steller will present Pilgrim lodge of Odd Fellows at the grand lodge meeting at Jackson next month. They go empowered to invite the grand lodge to meet in Houghton next year. They are going to make the invitation so pressing and urgent that the grand lodge will not resist.

The desire of Houghton to entertain the Odd Fellows grand lodge comes somewhat from the fact that Calumet had the grand encampment last spring. At that time the Houghton men declared: "We'll have the grand lodge and we'll show 'em." It is thus evident that the grand lodge is much more important than the grand encampment, though for purposes of display and eclat the grand lodge is a cleverer weapon and should be used more uniformly than the grand encampment. Lodge matters in general are waking up in the copper country. The Elks of both Calumet and Hancock are talking of their annual show and the Knights of Columbus of Hancock expect to have big initiatory ceremonies about the middle of October.

The South Range camp of Modern Woodmen of America is to be staged with the Houghton camp. The South Range camp is already a consolidation of the Painesdale and South Range camps and the new arrangement will make the Houghton camp a three-ply affair. The change is due to the lack of activity in the camp at South Range. Red Lodge, No. 129, Ancient Order of United Workmen, has given up the ghost. The collapse of the Michigan grand lodge left the subordinate lodges without a parent and the Red Jacket lodge dissolved. Its members do not lose their membership in the order however as they will now be affiliated directly with the supreme lodge. It is interesting to note that at one time this now defunct lodge had 750 members, its largest membership of any fraternal society in the upper peninsula.

TO BECOME NUNS.

The Misses Celia Wurm, May Herres and May Moreau of Hancock left yesterday for St. Louis, where they will enter the novitiate of the Sisters of St. Joseph. The young ladies graduated from St. Joseph's school, Hancock, in June.

## IN THE CIRCUIT COURT.

Alfred Wainio Convicted—Fabitz Case in Progress Yesterday.

Alfred Wainio, charged with assault with intent to murder, was found guilty in the circuit court Thursday evening of a somewhat lesser charge—assault with intent to do great bodily harm less than the crime of murder. Wainio was arrested for stabbing Charles Heikkinen near Redridge some weeks ago. It was a drunken row and Heikkinen nearly lost his life.

Tony Fabitz of Calumet was put on trial yesterday morning, he having been arrested with cutting up some other Austrian in a drunken row in Calumet.

### UNVEIL STANTON MONUMENT.

Bronze Bust to be Gift to the Paine Memorial Library.

The bronze bust of the late John Stanton, former head of the Atlantic Mining company, will be unveiled this afternoon at 4:30 o'clock in the lobby of the Paine Memorial Library at Painesdale. The bust is donated by the family of the deceased mine president and is a splendid example of sculpture.

There will be simple exercises in connection with the unveiling. F. A. J. Jones, superintendent of the Stanton and Adams boarding schools, will deliver the oration and there will be selections by the Calumet & Hecla orchestra and a selected choir. There will be present a large number of prominent mining men, including William A. Paine, president of the Copper Range Consolidated Mining company, who is here visiting that company's properties.

### CANADIAN SOO HOCKEY.

Game "Canuck" Town Will Have Bigger and Better Team.

The hockey enthusiasts of the Soo are getting into line for this season as evidenced by the action of the enthusiasts, says the Soo News. At a meeting it was enthusiastically decided to retain the present management, its work during the past season being declared very satisfactory. Steps were taken to appoint a representative to the meeting of the league officials to be held in Chicago on the 27th inst., and it was practically decided that the secretary, H. Langhorne, be that person. Asked this morning if the management had taken any steps to engage a new team for this year, a prominent member stated that negotiations had been going on all summer, but it would not be advisable to make any announcement as to the composition of the team until after the meeting in Chicago. It was stated, however, that the Canadian Soo would have a stronger team than last year and that it would consist of a larger staff than formerly. This feature is due to the desire, of rather intention, of the local team to land the Carby trophy, and to make a try for the Stanley cup if the trustees receive the challenge of the Canadian Soo team in a favorable light.

### HEGIRA TO THE COLLEGES.

A large number of copper country students have left for various colleges. The Misses Wilma Henner and Vera McNair of Houghton and Ruth Fawcett of Calumet went to Madison to enter the University of Wisconsin. The Misses Kate and Louise Weibler, Anne Haug, Valerie Croze and Jane Quirk left yesterday for Ann Arbor and the University of Michigan. Charles and Richards Edwards of Houghton have gone to the M. A. C. at Lansing, and Miss Myrtle Harris of Calumet has gone to Ann Arbor. At least twenty Calumet young men and women have gone to Ann Arbor in the past two days.

### IMPORTANT SPORTING EVENT.

Mike Dooley of Calumet is in Ishpeming today to wrestle William Penberthy at the Cornish style. The match is supposed to be for the light weight championship of the iron and copper countries. Dooley will weigh 136 pounds and says he is in fine condition. He is a clever wrestler and should give Penberthy a lot of work. Penberthy's articles are unknown in the copper country, so hazards on the result of the bout are few.

### FOR STEALING DYNAMITE.

Stepie Simonski and his son, miners employed in the Osceola, were brought before Justice Fisher of Calumet Thursday, charged with stealing powder. They are mining on contract and have to provide their own powder. The son confessed to stealing 135 sticks from miners working on the company account. They were dismissed on payment for the dynamite and the costs of the case.

### COPPERDROM BREVITIES.

Dr. Percy R. Glass has as his guest his father, John Glass of Detroit. R. T. McKeever, vice president and general manager of the Copper Range railroad, is in the copper country. The funeral of Alexander Halonen, who was killed Wednesday in the Quincy mine, was held in Hancock yesterday afternoon. Clyde Emmons of Houghton has resigned his position with the Osceola Mining company and is going to Virginia, Minn., to locate.

Mrs. C. H. Kelsey of Milwaukee, formerly a resident of Houghton, where her husband was editor of the Gazette, visited Houghton friends Thursday. The funeral of the late John Daly, who died last week in Denver, was held yesterday at Lake Linden. Mrs. Campion, sister of the deceased, brought the body from Denver. George Green of Lake Linden has resigned his position in the C. & H. mills and will go on the road with his brother, who has a repertoire show. Young Green is a popular singer.

A reception was tendered Rev. S. Polkinghorne, retiring pastor of the Lake Linden M. E. church, in the church parlors last night. Rev. Polkinghorne will be succeeded by Rev. H. C. Shaw, at present pastor of Trimountain.

"Human Hearts," a popular melodrama, played at the Kerredge last night. The new attraction is Isabelle Irving in "The Girl Who Has Everything," one of Clyde Fitch's society comedies. Miss Irving appeared here last season in the Jerome comedy "Susan in Search of a Husband" and was well liked so that theater-going people hail her second appearance with joy.

## Mining News

REDUCED PRODUCTION AT BUTTE.

Leasets and Small Operators Cannot Sell Their Copper Ore.

As outlined heretofore, the stagnation existing in the metal market is having its effect on the copper industry. The Boston Statesman writes a Butte (Mont.) correspondent. To market conditions are added the weight of the hand of unreasonable labor, and while the big mining companies are gradually and very materially reducing their output, smaller operators are gradually being forced out altogether, as they are unable to find buyers for their ore. At first they were put off with the excuse that cots were scarce, but recently they have been told that smelters did not want their ore and did not care to put money into copper that could not be sold.

### Several Small Mines Closed.

As a result of the refusal of the smelters and one buyers to take any large amount of ore from the small companies and independent operators in the Butte district many of the small mines have been compelled to close, while the output from other mines is very much reduced. Among the companies that are affected are La France Copper, East Butte Extension, Bullwacker Mining, the Farrel Copper, Alliance Copper, lessees in the Ophir, Amazon-Butte, East Butte and several other properties. With copper at twenty cents, the small companies are unable to sell their ore to the smelters and make a good profit, but at 18 cents they cannot do it, even were the smelters willing to take the ore, which they are not.

### Machinists' Strike.

The machinists of Butte twice within two days rejected, by a almost unanimous vote, the propositions of the mining companies to settle the strike and permit resumption of operations at all the mines. The machinists struck Aug. 15, an increase of wages from \$4.50 to 5.50. Some months ago the mining companies offered them \$4.75, which offer was refused and the strike resulted. Through the mediation of machinery operators at the mines have been hampered.

James Stratton of Washington, D. C., an executive officer of the International Association of Machinists, was called to Butte to bring about a settlement. He had a conference with some of the mining managers and received from them an offer to pay the men \$4.75 per day and waive a time contract, which had been demanded from the machinists in the first place. The proposition was submitted to the machinists at a special meeting and was rejected by an almost unanimous vote. The following night the matter came before them at a regular meeting and was again rejected. "I think this is a good time to shut down at the mines," commented one of the big mining managers after the reading of the vote was conveyed to him. That is what the mining and business interests fear will happen.

The Gagnon mine of the Trenton company, which was compelled to close because of the machinists' strike, has resumed operations. The suspension had been made necessary by a break down of the air compressor. The Gagnon, like all other mines in the Amalgamated company, has reduced its ore output little more than half the usual quantity being mined.

### Bulls-hacker.

Operations at the Bullwacker mine have been out of line for some time. The results of an experimental leaching plant test near Spokane. Several car loads of Bullwacker ore have been shipped to Spokane to be tested, and if the result is satisfactory a leaching plant will be erected at the mine. The company claims that it can produce 200 tons of oxidized ore in the mine above the 200-foot level ready to be taken out. The Snowstorm Mining company near Mullan, Idaho, is operating one of these leaching plants with great success, being able to make a good profit. The average yield of the camp has been 15 and 18 cents. The Snowstorm ore runs much higher in copper than that of the Bullwacker, the latter assay average being about 4 per cent.

### North and East Butte Extensions.

The North Butte Extension company has completed its new surface equipment and it is working satisfactorily. The shaft is now down 200 feet and Manager Jones expects to make a room for sinking during September, if there are no accidents. He feels confident that at a depth of 300 feet good ore bodies will be opened. A crosscut will be run at that depth. The indications have been good from the start, and it is the general belief that some of the rich veins of the "hill" strike through the North Butte Extension ground. The company is well prepared to handle any amount of water, and no trouble is anticipated from that source.

### The East Butte Extension Company.

The East Butte Extension company has begun the sinking of a new shaft, to be known as No. 7. This shaft will tap the ore body close to the line which was recently under dispute with the Amalgamated company. Shaft No. 5 is now being sunk at a depth of 250 feet, in order to get under the ore body that was opened on the 200. Good progress is being made with shaft No. 6, and when completed it will be used for raising the ore which has been blocked out in the shafts from shafts 3, 4 and 5. The shaft is now down 120 feet and a station is being cut at the 100.

### Parrot.

The Parrot company has begun mining in the Little Mina, and after a shutdown of that property for seven years it is again producing ore. The ore from the Clear Grit mine is also being raised through the Mountain Consolidated shaft. The Little Mina is expected to contribute materially to the production of the Parrot, for it contains a good vein of copper ore. The shaft is 1,000 feet deep, having been sunk 300 feet during the past year. The shaft in the Parrot mine is also being sunk deeper, and is now down about 1,200 feet. At the 2,000 foot level a station will be cut and crosscutting to the veins. From the top workings the mine yields about 300 tons of ore per day, and the veins at the 2,000 are expected to add materially to the output.

### Boston & Montana.

The shaft of the Greenleaf mine of the Boston & Montana has reached a depth of 1,000 feet and after a station is cut some crosscutting will be done in order to determine the character of the country at that depth. The company will, however, continue sinking and intends to put the shaft down at least 1,500 feet. That section of the district where the company owns several hundred acres of mineral ground, will be thoroughly explored by the Boston & Montana company. The Greenleaf shaft and a fine looking vein of sulphide ore at a depth of about 600 feet and it is considered likely that good commercial ore will be found in it at the 1,000 foot point.

## ANACONDA.

The station at the 2,800 foot level of the High Ore mine is nearly completed and crosscutting to the veins at that depth will begin as soon as the pumping machinery is installed. With the opening of the High Ore at the 2,800 level the Anaconda company will have 400 feet of stopping ground in the High Ore, as no other crosscutting has been done below the 2,400 foot level. The object in going to the 2,800 foot point without crosscutting at the 2,000 is to drain the ground of the High Ore as well as handle the water from adjoining mines.

### FUTURE OF NORTH BUTTE.

The fact that North Butte reached a low figure does not mean that the property is going to the low-woods, says the Boston Statesman. North Butte is admitted to have a future that is extremely bright; it has large and permanent ore bodies; it has a progressive management that will develop it along sound lines. The salient fact about North Butte at the present time is that it has a very large and permanent ore body. The stated capacity of that opening is 1,500 tons daily, but it has never shown itself capable of handling more than 1,250 tons daily on the average. Mining men well know that it takes a long time to develop a mine, and that considering the moribund condition of things being equal, the property having the greatest number of shafts would be given the highest place. This single shaft, then, is a serious defect. It is true that a second operating shaft has been promised, but in spite of the very efficient management, it will be a year or more before a second effective operating shaft can be built. Then the present is a very unpropitious time for the beginning of such an undertaking; labor is plentiful, but the average of sulphides is not so high as it was some time ago. When the property was in its hey-day the ore that was sent to the Washoe smelter returned 7 per cent copper, which is to say 140 cents to the ton of ore shipped, based on value in gold and silver. The ore that was shipped during the past six months returned 4 per cent or eighty cents to the ton. It was frequently stated that the company was saving its high grade ore for just such a time as the present. There was the authority of officials for this statement, yet it would be casting reflection upon the intelligence of the very intelligent men who are running the property to believe that they ever expected to see a time when copper would bring them more than twenty-four to thirty-six cents a pound. The matter of fact would logically seem to be that the company had extracted all the ore in the upper and richer levels of the property that it could safely do without depriving itself of that very necessary reserve "sweetener" and then, having established a comfortable cash reserve, turned to the lower grade articles. Another fact needs consideration. In 1898 the average of the Butte camp was 8 per cent copper. One lower than this grade was looked upon as second class. The average of sulphides today is a little less than 3 per cent, some call it 2.85 per cent while still others rate it as low as 2.65 per cent. The level at which the rich ores of the North Butte were extracted is co-incident with the sinking of the Washoe extension of ten years ago came. It would seem logical then to believe that the property will show the same diminution with depth that all other properties have shown.

What then of the future of the property? It is simple. That future will depend upon a more thorough opening up of the property and in the establishment of a concentrating plant to meet the condition, just as it has been met at Anaconda and other properties. This will take time, but when that is accomplished there is no reason for thinking otherwise than that it will return to as good a prosperity as it has known and a far more enduring one. The present problem is whether the company can pay dividends at its present rate of production and it would be unwise madness to expect that it will do better than pay 84 per annum, which would mean halving the present rate.

### ISLE ROYALE.

Partly due to the high price of copper, and partly to a betterment in mineral values, Isle Royale has during the past three years accumulated a surplus amounting to very nearly a million dollars. The share of the mine has been bettered constantly with depth until at present it seems but a matter of development until Isle Royale responds to the hopes that have been held out for it. New methods of mining, together with the fact that lower grade ore can be treated to advantage now than was the case some years ago, have been partly responsible for the bettered outlook. Besides the Malbis vein the Isle Royale has more than an even chance of running into a valuable deposit on the Baltic side of the property, such as it appears in the exploratory shaft on this formation very near the boundary next the Superior Copper company, on which the Calumet & Hecla has such an excellent showing. The formation is much disturbed on the Isle Royale property, such as it appears in the explorations that the Atlantic has made in the ground adjoining the Baltic property of the Copper Range.

The solution of the property seems to be that neither company has gone deep enough and has especially applied to the Isle Royale as its property above Portage lake, where the entire country sinks to ward the lake bed. With depth there is good hope that values will be shown as good as in the other Baltic lake properties. The management is pushing this line of development, and has been materially improved in the past year; while it has not been specially strong in cash surplus heretofore, net earnings for the year of about \$800,000, in view of the many interruptions to production through no fault of the Shannon management, have been highly satisfactory. There are now 4,000 stockholders. N. L. Amster and Wm. A. Paine both have larger shareholdings than at any previous time since their connection with the company.

### GREENE-CANANEA.

Thomas F. Cole and John D. Ryan, if he recovers in time from his sickness, are expected to arrive at Cananea in the early part of October for inspection of the Greene-Cananea properties, and conference on the ground with Dr. L. D. Richards and Colonel Greene as to future plans. These will include determination as to the site for the new smelter and the date upon which its erection will commence. The visitors will find a great deal accomplished since their last previous visit, both in the mining and the reduction divisions. Greene-Cananea's ore reserves are much larger today than six months ago, and the average in copper values much higher. Development work is being pushed with vigor, and has brought much of this. This is Cananea-Duluth ground, and it has shown up

### COST OF COPPER.

There is little appreciation of the extent to which the current item of wages enters into the cost of making copper. At the Lake the wage item contributes 67 cents to the cost of making every pound of copper produced in Michigan. At Butte the labor cost is equivalent to 67 cents per pound. All manner of supplies, including lumber, timbering, coal, powder, etc., make up the balance of the cost.

# THE CITIZENS' NATIONAL BANK

HOUGHTON, MICHIGAN

OFFICERS. DIRECTORS.

Graham Pope, President. C. V. Secher, Vice-President. C. H. Moss, Cashier.

Graham Pope, C. V. Secher, C. H. Moss, J. P. Chynoweth, J. H. Isaberg, R. H. Hill, A. M. Schults, John G. Stoen, C. H. Moss.

cost. There are today 16,000 men employed in the Lake mines, mills and smelters. Calumet & Hecla pays its underground men the highest wages in the district of 86¢ per month; the contract miners of course make more than this. The general run of surface hands at the mines and mills receive \$2 per day. A fair average for all classes of labor in all the Michigan copper mines would be \$2.85 per day. In Butte the underground men get \$4 per day, but among them are included shaft men who get from \$5 to \$6 per day. Surface men generally get \$3.50 per day, but among this class are included engineers, machinists, etc., who get from \$4.50 to \$6. The Washoe smelter at Anaconda employs 2,200 men at an average wage of \$3.50 per day. At the Great Falls smelter of the Boston & Montana 1,600 men are employed at the same figure. At a Butte reduction works of Wm. A. Clark 450 men are employed. Including all the men working on the many small miscellaneous mining properties in the Butte camp, on the surface as well as underground, and including also the smelter men, machinists, etc., the Butte mines give employment to about 12,800.

Independent visitors in the Butte copper camp lately found that the Miners' union had taken a hold upon the situation that they watched the output of every mine and when a foreman or superintendent produced more copper with less men than the Miners' union approved, orders were given that more men must be employed in that mine to balance the increased copper production. A series of affairs in Butte has become well nigh intolerable, it is contended, and the eastern management holds the present a good time to settle some of the issues that have been growing for years.

### OLD DOMINION.

There seems little doubt that the Old Dominion made a mistake when it diverted the funds of the United Globes, derived from ore shipped the Old Dominion furnace, for the purposes of paying two desultory dividends upon the stock. The twenty-four per cent dividend in pursuance of the development work necessary to further establish the extent and value of the ore bodies. By the forthcoming spring the company hopes to be in a position to use its new shaft which has been in course of construction for over a year. When this shaft gets into operation it will make possible much larger ore extraction. At the present time the company is extracting some ore from the sulphides at the 1,000-foot level. Shipment of sulphides are also being made from the Continental, but in a desultory manner. The main attention now given to the property is upon getting it into condition for large production against the time that the Globe, Globe Valley and Northern extension reaches the mine. The increased production will make the income larger, but the decreased price of copper will more than offset this. The loss in copper price has amounted to almost \$200,000 per month, and on this basis the directors will doubtless think twice before they act on the second dividend. The company is not yet on a regular dividend basis. In spite of the fact that new money has recently been raised there is still a world of equipment to be purchased and the expense of having this continually charged against copper costs. Expansion is still under way in the smelter plant. There is also the continual cost of the underground work. It is still a question that has to be settled by actual experience whether present pumping facilities will handle the strain of the internal floods.

### SHANNON.

Several weeks ago, when it was believed that copper could be maintained at 18 cents, resident Amster publicly stated that if copper was maintained at 18 or even 17 cents the Shannon company could continue the payment of quarterly dividends of fifty cents per share. Copper, however, is now selling at 16 cents, and it is becoming more evident that prices will go still lower, notwithstanding the efforts being made to restrict production. The quarterly dividend of fifty cents per share would call for the payment of \$150,000 out of the earnings of the fiscal year ended with August. The company's annual report will show that the company could pay this dividend of fifty cents per share and still have a surplus for the year of about \$150,000. In view of the uncertainty of the metal market, however, it is possible that no dividend action will be taken at this time, on the ground that the company's interests will be better conserved by running strong in cash. The company's position in the copper world has been materially improved in the past year; while it has not been specially strong in cash surplus heretofore, net earnings for the year of about \$800,000, in view of the many interruptions to production through no fault of the Shannon management, have been highly satisfactory. There are now 4,000 stockholders. N. L. Amster and Wm. A. Paine both have larger shareholdings than at any previous time since their connection with the company.

### A HUMANE APPEAL.

A humane citizen of Richmond, Ind., Mr. U. B. Williams, 107 West Main St., says: "I appeal to all persons with weak lungs to take Dr. King's New Discovery, the only remedy that has helped me and fully comes up to the proprietor's recommendation. It saves more lives than all other throat and lung remedies put together. Used as a cough and cold cure the world over. Cures asthma, bronchitis, croup, whooping cough, quinsy, hoarseness, and phthisis, stops hemorrhages of the lungs and builds them up. Guaranteed at The Stafford Drug Co.'s drug store, 50c and \$1.00. Trial bottle free.

### COPPER RANGE CONSOLIDATED COMPANY.

Dividends Nos. 14 and 15. At a meeting of the Board of Directors, held this day, a quarterly dividend of \$1.50 per share, being dividend No. 14, and an extra dividend of 50 cents per share, being dividend No. 15, were declared payable on Tuesday, October 1st, 1907, to stockholders of record at the close of business on September 8th, 1907. The transfer books of the company will be closed at the close of business on Monday, September 16, 1907. FRREDERIC STANFORD, Treasurer, Boston, September 4th, 1907. (9-9-25-74)

Today's weather: Fair; diminishing northwest wind; stationary temperature. Yesterday's temperatures: Seven a. m., 68 degrees; noon, 68; 7 p. m., 54. Maximum, 71 degrees; minimum, 54.

Captain Johnson of Ishpeming was in the city yesterday.

The usual Saturday night hop will be given at Fraternity Hall tonight by the Ideal Orchestra.

C. Peterson of Humboldt is a patient at St. Luke's hospital. He arrived in the city yesterday.

George Higbee and his daughter, Miss Alma Higbee of Evansville, Wis., are in the city visiting relatives.

M. Andrews of Ishpeming visited friends in the city yesterday, and Joe Sness and J. M. Edgerton of Negaunee were also here.

Mr. and Mrs. Fred Freiberg of St. Louis, who have been visiting in the city for the past month, have returned to their home.

Mr. and Mrs. Rollin Swisher have left for Columbus, O., where they will attend the grand circuit races. They will be absent about a month.

Rev. Ames Maynard has returned from the Detroit conference and will preach tomorrow morning and evening at the Methodist church.

Congressman H. O. Young of Ishpeming was in the city yesterday and helped entertain the members of the rivers and harbors committee while they were in the city.

The Passion Play which was to have appeared at the Grand Hotel today has been delayed and will not be presented until Saturday, Sept. 28. Parsifal is to be given today.

Joseph Richardson, of Philadelphia, of the Pennsylvania road and his family were passengers on the Juniata yesterday. J. K. Gross, general agent of the same road with his family was also on the boat.

Marquette Girl to Wed—A copper country paper says that Miss Mary A. Snell of Marquette and Emil Gwin of Lake George have obtained a license to marry in Baraga county.

Handford-Tripp Wedding—Miss Mary E. Handford, daughter of John Handford of Hewitt avenue and Chester A. Tripp of Bad Ax, Mich., are to be married at the bride's home Oct. 2 next at noon.

Appointment Made—Dan W. Powell has been appointed member of the park, cemetery and street commission to succeed A. W. Shepley who resigned recently. The appointment was confirmed at the recent council meeting.

South Shore Excursion—The last of the series of four excursions to the east recently announced by the South Shore left this morning. The excursions were on Sept. 9, 12, 16 and 21 and were for the round trip to Detroit, Toledo, Cleveland and Buffalo and other points by rail and water.

High School Lectures—The lectures at the high school yesterday by Col. French were well attended and very much enjoyed. He will repeat the lecture on Mt. Pelee this morning at 10 o'clock and this afternoon at 6 o'clock. In the evening the subject will be changed and he will show a series of pictures of India. The proceeds from these lectures are to be used in purchasing pictures, flags, etc. for the various school rooms. Last year the lectures netted \$65 for this purpose.

Mean Man's Joke—A Marquette man recently had a visitor from Ontonagon and now the visitor's wife would like to interview the Marquette man. The visitor was Robert Mooney, a well-known Ontonagon hotel man. While on his visit here, his Marquette friend, whose name is withheld for obvious reasons, conceived the idea of sending Mrs. Mooney a gentle surprise. He obtained a postcard and sent it to her. That was all right, only the postcard happened to be a memorial card, and on it was inscribed, "In loving memory of Robert Mooney, who died in Marquette today." Mrs. Mooney took a purely feminine view of the matter. It never occurred to her that it was a joke until about 84 worth of telegrams had been exchanged between her and her husband. Mooney had to curtail his visit, and it is said that he has been explaining ever since.

**ANNUAL STATEMENT READ AT MEETING**

ALL DIRECTORS OF DULUTH, SOUTH SHORE AND ATLANTIC ROAD HAVE BEEN RE-ELECTED.

The annual statement of the South Shore recently presented and approved at the annual meeting of the road shows an increase of income for 1907 over 1906 of \$254,102.66. The gross earnings of the road for 1906 were \$3,057,775.49; for the year ending June 30, 1907, they were \$3,311,878.06. There was also an increase of \$203,208.13 in operating expenses this year, a part of which, it is said, consists of increases of salaries in the various departments. The net earnings of the road for the past year show a decrease of \$9,295.47.

The interest paid upon bonds this year amounts to \$859,700 and this with the interest on other liabilities and taxes, amounts to \$1,060,210.35, a deficit of \$55,535.95. The deficit last year was \$156,336.10. Following is a description of the road:

—Main line owned— Miles.  
Sault Ste. Marie to Superior, Wis., 408.90  
Soo Junction to St. Ignace, 42.97  
Marquette to Winthrop Junction, 17.33  
Nestora, Mich. to Houghton, 48.24

Total, 517.44  
—Branch lines owned— Miles.  
Negaunee to Voltmeter, 2.26  
Humboldt to Republic, 8.70  
Bessemer Jet, to Bessemer, 2.23  
To various mines and industries, 50.41

Total, 63.60  
Total Mileage owned, 581.04  
—Trackage rights leased— Miles.  
Sainte Marie Union Depot Co., 56  
Dead River R. R., 2.98  
C. St. P. M. & O. R'y., 1.35  
Lake Superior Term. & Trans. Co., 72  
Northern Pacific R'y., 3.83  
Duluth Union Depot & Trans. Co., 20

Total, 96.4  
Total Mileage Operated, 677.44  
Equipment.

The road now has seventy locomotives over thirty tons and four under thirty tons, seventy-four in all. There are sixty-two passenger cars including first and second class coaches, sleeping cars, combination baggage and passenger cars, dining cars, baggage and express cars and official cars. There are 2,880 freight cars, including 1,208 box cars and 820 one cars. The total number of cars is 3,042. During the past year one 85-ton switching locomotive, 100 gondola cars and 10 coal cars have been added to the road's equipment.

The directors of the road who were re-elected are: Sir Wm. C. Van Horn, Walter R. Baker, Charles Drinkwater, Richard B. Angus, all of Montreal, Can.; John W. Sterling, R. Y. Hobbs, George H. Church, James O. Bliss, E. V. Skinner, all of New York; Thomas W. Peasall, of Black Rock, Conn., and William F. Fitch of Marquette.

**SUGGESTION IS MADE BY BISHOP WILLIAMS**

TO SOLVE CITY'S WATER PROBLEM, "GO TO THE HILLS AND DRIVE WELLS," HE SAYS.

The following communication from Bishop G. Mott Williams conveys a wholly new suggestion for the solution of the city's water problem.

Marquette, September 20th, 1907.

To the Editor of The Mining Journal.

May I discuss the Water Problem again? Has not the delay of the water board to proceed with the extension of the intake been, on the whole, a good thing for the best settlement of the problem before us? Unpopular as the delay has been, I think to be done has been neither certain nor easy. I think we can be sure now, that no moderate extension will give us much relief from occasional erosive contamination, and we now know more about the probability of other filth being found in the water. It is no longer a question for argument. We have found it. The sedimentary deposits from our sewers are never going to be less than they are now, and under proper conditions of the weather, these deposits are going to be stirred over and over again, and give us increasing trouble.

There is plenty of water to be had in the hills. The well at the prison, and the well at the brewery are proof of this. This water can be secured for us at a much smaller cost than going north of Presque Isle with the intake, which is the only proper thing to do if we still take the lake water. And even that would not entirely save us, let us go to the hills.

Leave the present system alone while we work, except for putting a hood on the intake to relieve us from such ice, and begin with the wells at once.

The wells are no experiment. They can be sunk in the valley of any of our streams. There is not the slightest reason why we should not continue to use our present supply for fires and flushing, even after the installation of a pure drinking water supply. Hundreds of places have a double supply.

I most sincerely hope that nothing will divert attention from the subject of pure water. It is not a personal question and ought not to be, but there is a danger that we may use up too much of our energy in scuffling over persons and details.

If the city is not prepared to get the water from the hills let them give someone a franchise to do it, and it will be done.

Truly Yours,  
G. MOTT WILLIAMS.

Mr. L. C. Francis, representing the famous Birge & Lorus line of wall paper, is in the city and can be found at Gell's wall paper store today. THE ONWARD MARCH OF PROSPERITY

Are you in the procession, or simply remaining at a standstill, watching it move along? Have you a system for saving? If not, cultivate one. Determine to deposit a certain sum every week or month in this bank. The habit will grow to be a part of your daily life. Your bank account will grow steadily with each added deposit. We will assist its growth by adding 3 per cent interest compounded twice each year.

Marquette - National Bank.

Marquette, Michigan.

SUNDAY AT THE CHURCHES.

Presbyterian Church—Sacrament of the Lord's Supper and reception of members at 10:30 a. m. At 7:30 p. m., the sermon theme will be "A Theory of Human Nature." First Church of Christ, Scientist—Service Sunday at 10:30 a. m.; subject, "Reality." Felix Hall Opera House block. Mission feast in the German Lutheran church on Ridge street, Sunday morning at 10 o'clock. Rev. W. Ulrich of Brookside, Wis., will preach. First Baptist church, Rev. C. H. Maxson, pastor—Services at 10:30 a. m. and 7:30 p. m., with preaching by the pastor.

Upper Peninsula

Injuries Result in Death—Jerry Sullivan, a former well-known resident of Ironwood, is dead. His demise was the result of injuries sustained while he was working in an engine house at the Adams mine at Eveleth, Mesabi range. He was run into by a coal car. He was fifty-eight years of age and leaves a wife and seven children. Naval Station Bidders Few—The Edward Bros. dredge company of Sault Ste. Marie has the only bidder at eighty-one cents a cubic yard, for completing the grading at the naval training station for the great lakes at North Chicago. There are about 35,000 cubic yards of earth to be removed. The bids were opened at the navy department in Washington. New General Manager—E. J. Brady of Menominee has been engaged as general manager of the Ontonagon Lumber & Cedar company, succeeding Dennis J. Norton, who has been serving in that capacity since last spring. Mr. Brady has assumed his new duties. He has had many years of practical experience in the mill and lumber business, being associated with the August Spies Lumber company of Menominee for a long time, and is a man well qualified to handle this big industry. Mr. Norton relinquished the place owing to his private interests demanding his undivided attention. He is the president of the company and will of course continue to be a directing force in its affairs. Soo Woman Chosen—Miss Frances Puller, of Sault Ste. Marie, the new physical director of the Young Women's Christian association, has arrived ready to take up her duties in the organization of the classes for the winter work, says the Duluth News-Tribune. Miss Puller comes to Duluth well recommended, and endorsed by every association with which she has been connected. She graduated from the New Haven (Conn.) school of Physical Culture, and since then has devoted most of her time to Y. W. C. A.'s. While at Sault Ste. Marie she combined her efforts with the Y. M. C. A. and the public schools, having charge of all the gymnastic work and athletics. The gymnasium will open this year on Oct. 1 and classes will be held in the mornings, afternoons and evenings. Conscience Money Returned—At the meeting of the Iron Mountain council a five dollar bill was turned over to the city fathers. It came as a surprise, and the members of the council are still wondering why it came, from whom it came, for what it came, why enshrined in mystery. It is "conscience money." Just previous to adjournment, Rev. Father Nosslich stepped to where the mayor's chair was being grazed by Mayor Barron. On the desk in front of his honor placed the five dollar note, and in substance this is what he said, "This is conscience money. A request was made that through me this money be paid to the council. I presume you have a fund for this." He said nothing further, but upon the execution of his trust, walked to the outside of the railing to which his hat and umbrella lay on a chair. Picking them up, he then departed from the chambers. Fire at the Soo—Fire of unknown origin started in the rear of Warner's drug store, located in the Martyn & Stuart block, South Ashmun street, at the Soo, and destroyed practically all of the stock of the drug store and ruined much of the adjoining grocery stock belonging to P. T. McLaughlin. The drug store owned by C. Bruce Warner was valued at about \$2,000, on which \$3,000 insurance was carried. The salvage, it is expected, will not amount to any more than \$100. The jewelry stock owned by Mead Warner, valued at about \$2,400, was insured for \$1,000. The tools were the only things saved. The exact amount of damage

done to the grocery stock of P. T. McLaughlin is not known as yet. No fire got into that portion of the building. The only damage done in the Martyn & Stuart block was from smoke. Most of the meat stock was in the refrigerator. This fire is the second met with by Warner Bros. since being located in the Martyn & Stuart building. Last summer a small fire started in the rear of the drug store, but was extinguished before a great deal of damage was done. Miner's Marvelous Escape—Escaping death as if by a miracle, James Brown, a miner employed in "D" shaft of the Mass cooper mine, in Ontonagon county, passed through a frightful experience 700 feet below the surface. Apparently doomed to be literally crushed to a pulp, he emerged from his perilous situation with a few insignificant scratches as his only hurts. The man was at work in a stope, when a tons of rock suddenly gave way and with it he was swept down through a chute to the level below. Fellow miners at once began the work of rescue, but only in the hope of recovering his mangled remains. Seven cars of rock were taken out, and then, much to the amazement of the crew, Brown was coughed safe and sound and practically none the worse for the experience. The rock had entombed him in such manner as to form a niche within which he calmly awaited until assistance came. Was Wealth in Alaska—The reputed possessor of upwards of a hundred thousand dollars, Charles Vogel, a former resident of Sault Ste. Marie, is reported returning to Upper Michigan with a fortune won in the Cape Nome region of Alaska. Lured to the Arctic circle by advice of successive rich gold strikes, he is the sole survivor of a party of argonauts attracted to that bleak and dismal country nine years ago. His companions long ago became discouraged and returned home. Vogel persevered, and according to mail advices from Nome his labors have been rewarded, a line of the precious metal developing so well that he has disposed of his claim for \$105,000 cash. Thomas A. Dickson, also formerly of the Soo, is in a fair way of becoming a wealthy man in similar manner. Copper ore of reported wonderful richness has been struck on a property held by himself and brother on Spring creek, in the Yukon valley, and the claim is now being exploited by a Pennsylvania syndicate. Railroad Construction Held Up—The Chicago & Northwestern railway is endeavoring to block the entrance of the St. Paul into the Norway mining center over the Wisconsin & Michigan, says the Iron Mountain Tribune. The St. Paul and Wisconsin & Michigan recently concluded traffic arrangements whereby the Wisconsin & Michigan railway was to get entrance into Iron Mountain and the St. Paul into Norway. A connection several miles long is necessary. Work on this connection was under way but the Northwestern refused to allow the extension tracks a crossing over its right of way. It will undoubtedly mean a fight before the Michigan railway commissioner may delay the work for some time. The Norway Current says: The work of excavating for the Chicago, Milwaukee & St. Paul spur from the Wisconsin & Michigan to the Chicago & Northwestern spur at West Vibron has been suspended and the men sent to other points. The cause of the suspension is said to be the refusal of the Chicago & Northwestern to allow the crossing at this time of that company's spur to the West Vulcan coal docks. It is probable that the matter will be amicably arranged. Weeks Without Food—In a terribly emaciated condition—literally reduced to a mere skeleton—a cow firmly anchored to a tree, in the crotch of which her tail had become fastened, is believed to have spent upwards of a month in the area of a few square feet that proved her prison, subsisting all that time without water and without more than one day's supply of food. The animal is owned by Joseph Blake of Greenland, Ontonagon county. She had been missing for five weeks when a man passing through the woods accidentally found her in the odd situation described. Notwithstanding the pitiable plight of the cow, she gave forceful demonstration that some vitality yet remained. Crazed from starvation, the sight of the man apparently infuriated the bovine. With a wild lunge she broke loose from the tree, leaving her tail behind, and charged her would-be rescuer. He sought safety on a woodpile a short distance away and was kept there for three-quarters of an hour. The desire for food finally becoming uppermost to the animal she wandered away in quest of it. She had eaten the bark from all the few small trees within the confines of her prison and had tramped a hole in the ground to a depth of about two feet.

The cow was rounded up, and although minus her tail she is recovering from her queer experience. Remarkably Intelligent Dog—Caught in a trap set for wolves, a valuable bird dog belonging to Deputy Sheriff Richard Harcourt of Seney, defied its release through a rare display of canine intelligence. Roaming the woods alone, the animal sighted the bait and proceeded to take such close inspection of its find that the trap was sprung with the result that the cruel steel jaws firmly seized the dog by the leg. The trap was fastened by a chain to a sapling. To gnaw this down was the canine's only salvation, and presumably after mature contemplation of its dangerous situation, the dog undertook the task. Evidently it was the work of many hours to fell the tree, comparatively small though it was, but the animal persevered until it had accomplished the result. Then despite the loss of much blood, and notwithstanding the great pain it was suffering, the dog laboriously dragged its weary way homeward, still in the grip of the steel jaws. The canine's back trail was followed, and it was discovered that it had drawn the heavy trap with him for a distance of several miles. The remarkable manner in which it had secured its freedom was plainly apparent from the evidence visible at the spot where the wolf trap had been set.

Means Better Train Service—An order that will affect thousands of lower Michigan sportsmen who annually visit the upper peninsula in quest of deer has, according to correspondence from Seney, been issued by the management of the Duluth, South Shore & Atlantic railroad. Hereafter, it is said, none other but baggage in the true sense of the term will be checked for hunters. Such supplies as boxes of provisions, bags of potatoes, cans of oil and the like will be carried as usual, but only by freight. The new arrangement is intended to do away with the demoralization of the passenger service which has attended the transportation of hunters and their effects each fall for many years past. With many tons of baggage to be handled daily, much of it in exceedingly bulky and awkward form, it has been impossible to maintain schedule time, so impossible, in fact, that it is the exception when trains westbound from the Straits of Mackinac to Marquette during the hunting season are not several hours late. The mail service from lower Michigan has consequently been greatly delayed, and because of this there has been much complaint from upper peninsula business interests, hence the present action of the railroad management.

Body Crushed by Fall—Crushed and mangled, from a fall of 125 feet from the top of one of the towers of cableway No. 2 to the top of a tool shed below at the Noelish works, Isaac Edgar Lounds, of the Soo, fell to his death. The young man, who has been in the employ of Grant Smith & Co. on those works for the past two years, was engaged during the noon hour at its usual duty of oiling the machinery in the top of the tower. How the accident happened nobody knows as the young man was alone and the first intimation received by others that anything had happened came to some workmen who were cutting their ladders in the tool shed by the sound of his body striking on the roof over their heads. Nobody saw the fall, and investigations reveal no reason for his having fallen. It is claimed that he had been accustomed to working on the towers for some time. The young man was born near Marquette, Ont., about twenty years ago and went to the Soo with his people about thirteen years ago, so that he practically grew up at the Soo. He was sober, industrious and well-liked and his death is a shock to both relatives and friends. He leaves besides his parents, Mr. and Mrs. Isaac Lounds, five brothers and three sisters: T. J. Lounds, J. H. Lounds, W. J. Lounds, G. E. Lounds, Benjamin Lounds, Mrs. J. E. Henry, Mrs. C. A. Robertson and Miss Lillian Lounds, all residents of this city. Funeral services have not yet been arranged, but will probably take place in the church of Christ some time to-morrow.

GIRL KILLED BY AUTO. Daughter of Springfield (Mass.) Physician Run Over in Front of Home.

Springfield, Mass., Sept. 20.—Pauline H. Fearlon, aged six and one-half years, the daughter of Dr. Thomas F. Reardon of 394 Chestnut street, was struck and almost instantly killed in front of her home by an automobile owned by Dr. Charles P. Hooker and driven by Ernest E. Southard, a chauffeur. The child had just left the parochial school, which is located almost across the street from her home. She ran across the street in front of the machine, and was struck by one of the headlights and her skull fractured. Dr. Hooker, without knowing who the child was, carried her into Dr. Reardon's house, and the latter physician's first knowledge of the accident was the sight of the child lying on his operating table. She was then in a dying condition. The chauffeur went to the police station and was arrested on a charge of manslaughter, Dr. Hooker furnishing the required bail.

KILLS HIMSELF BY ACCIDENT. Nebraska Banker's Son Shot Through Heart While Handling Pistol.

Lincoln, Neb., Sept. 20.—While handling a revolver he supposed was unloaded John J. Hunt, son of N. J. Hunt, president of the St. Paul State bank, accidentally shot himself through the heart. He was twenty-three years of age and a director in his father's bank.

LOST AND FOUND. Lost, between 9:30 p. m. yesterday and noon today, a bilious attack, with nausea and sick headache. This loss was occasioned by finding at The Stafford Drug Co.'s drug store a box of Dr. King's New Life Pills. Guaranteed for biliousness, malaria and jaundice. 25c.

AN INSIDIOUS DANGER. One of the worst features of kidney trouble is that it is an insidious disease and before the victim realizes his danger he may have fatal results. Take Foley's Kidney Cure at the first sign of trouble as it corrects irregularities and prevents Bright's disease and diabetes. The Stafford Drug Co.

DETROIT AUTO RETURN \$7.00. Via the South Shore. Tickets on sale Sept. 9th, 12th, 16th, 21st, connecting at St. Ignace with steamer of the D. & C. N. Co. To Buffalo \$2.00 higher. Limit three weeks. For sleeping car and steamer reservations apply to Agent agents, (8-15-324)

**COOK WITH GAS**

The news of the disaster at the Rolling Mill mine yesterday morning caused much alarm in Ishpeming, as several former residents of this city are employed there. A number of the miners formerly worked at the Lake Angelina mine, and it was first thought that some of them were among the dead or injured. It was late in the forenoon before the exact facts could be ascertained here, as the office men at the Rolling Mill were busy about the mine and did not answer the telephone. The men at one Lake Angelina office were among the first to learn of the disaster and C. T. Kruse, assistant general manager of the company, called for aid from the hospital staff and also sent the ambulance to Negaunee. Mr. Kruse arrived at the mine shortly after 8 o'clock. Master Mechanic R. T. Smith and Thomas Walters, Jr., superintendent of the Rolling Mill, had gone down earlier, and both arrived at the mine a few minutes after the cage had fallen.

Alfred J. Wills, one of the victims, was much better known in Ishpeming than Negaunee, as he spent the greater part of the past fifteen years here. Early last spring Mr. Wills, his wife and son John, left Ishpeming with the intention of returning to Rockford, Ill., where they lived a few years before leaving here. After a few weeks they decided to return to this county, as Mr. Wills did not enjoy the good health at Rockford. He had worked in a number of the Ishpeming mines and was well and favorably known in the city. He had been at the Rolling Mill about two months and his family was preparing to keep house in Negaunee.

Thomas Roberts, one of the men injured, spent the greater part of his life at the Winthrop. He is a son of James Roberts of the Salisbury location, and is a cousin of Mayor W. H. Roberts of this city. He is well known here, though for some time past he has been boarding at Negaunee.

Charles Kemp, the foreman in the employ of the company who was among the men killed, was well known in Ishpeming, as he worked at the Lake Angelina for some time prior to the opening of the Rolling Mill. His brother James left here a few years ago, moving to Tri-mountain, where he is still residing.

**ISABEL IRVING COMING.**

Well Known Actress Will Appear Here Thursday in a New Play.

A particularly noteworthy engagement will be the appearance at the Ishpeming theater next Thursday evening of Miss Isabel Irving, one of America's most popular actresses.

The name of the play in which Miss Irving appears is called "The Girl Who Has Everything," a comedy-drama from the pen of Clyde Fitch. Miss Sylvia Lang, played by Miss Irving, is the girl who has everything. At the beginning of the play she has wealth, social position, every-day happiness and a lot of other things which help to contribute to the pleasing carrying on of an every day existence. At the end of the play she has lost all these material comforts, but she has gained the one great supreme thing in life, which is love, and that is what makes her "The Girl Who Has Everything."

The struggle between Sylvia and her mother-in-law for the possession of the fortune, and Sylvia's love for a young but poor lawyer, who acts as her counsel, form the main theme of the charming little comedy-drama which Mr. Fitch has written. All the characters are said to be true types of real people. The New York Herald, a short time ago, said in describing this play, "It is like taking down the four sides of a real house and letting the public look in and see what is going on among real people." The story is a natural one, and the incidents might happen in any big city in the United States today.

**THE TOUCH THAT HEALS**

Is the touch of Bucklen's Arnica Salve. It's the happiest combination of Arnica flowers and healing balsams ever compounded. No matter how old the sore or ulcer is, this Salve will cure it. For burns, scalds, cuts, wounds or piles, it has no equal. Guaranteed by The Stafford Drug Co., druggists, 25c.

**BIDS WANTED.**

By the board of education, School District No. (1) one, city of Ishpeming, county of Marquette, state of Michigan, for heating and ventilating, plumbing, sewerage and gas fittings for the new high school, now being erected on the school property, East Division street, in said city of Ishpeming.

Contractors to make separate bids on the work, and furnish separate surety company's bonds for at least 50 per cent of contract price for the faithful performance of such contract, and completion of all work according to its terms.

Also a surety bond running to the people of the state of Michigan for at least 20 per cent of the contract price, conditioned for the payment of all indebtedness for labor and material as required by the statute in such case made and provided.

All work and material to be furnished as per plans and specifications prepared by John D. Chubb, architect, Chicago, Ill.

Plans and specifications may be had from the undersigned. All bids to be signed, sealed and delivered to Mr. N. M. Nelson, director board of education, on or before 4 o'clock p. m., Monday, Sept. 23, 1907.

The plans and specifications must be returned with bid, otherwise bid will not be considered.

The board of education reserves the right to reject any or all bids.

(Signed) CHAS. BURT,  
Chairman Building Committee.  
Dated, Ishpeming, Mich., (9-12-07), 1907.

**COPPER COUNTRY FAIR.**

The management of the South Shore announces special rates of fare from all points on its system between Marquette and Houghton and Saxon and Houghton for the fifth annual county fair, which will be held at the Amphitheatre next week, commencing Tuesday and continuing until Saturday. The round trip fare from Ishpeming, Negaunee, Marquette and Republic will be \$3; from Champion and Michigan, \$2.50; Nestora, \$2.00; Herman, 1.25; L'Anse and Baraga, \$1; Keweenaw Bay, seventy-five cents, and Chassel, thirty-five cents.

**BASEMENT COMPLETED.**

Improvements at Anderson Block, Start of Several Weeks Ago, Are Finished.

The excavating for the basement at the Anderson block has been completed and the concrete and other work is now being brought to a close. The basement extends under the entire structure. The piles affording additional space the piles have been removed and stone walls built in their place. The building is one of the heaviest in the city, but none of the walls cracked while the improvements were being made, nor did the foundation settle to any extent. The owners of the block were wise in putting in the new foundation before the piles had rotted very much.

It will not be many years before new foundations will have to be placed under several other business blocks. A few of the buildings are now showing signs of settling and the sooner the piles are replaced with stone or concrete walls the less expensive the work will be for the owners. The Veecker block is perhaps in worse condition than any other of the larger structures standing on piles, and it is expected that a new foundation will be placed under it next year, and the entire space used for a basement.

The McKay block, corner Main and Pearl streets, is also settling, and a new foundation will soon be necessary. Buildings under which new foundations have been put in since the installation of the sewer system are in much better condition than are those on which no work has yet been done. Among the larger buildings provided with new foundations are the Dunlop, Robbins and Mitchell blocks.

**ISHPEMING IN BRIEF.**

Mrs. E. P. Tilson and Mrs. W. T. Potter will serve tea at the golf club house this afternoon between 3 and 5 o'clock.

The Eagles baseball team will cross bats with a nine from Republic at this place tomorrow. The Republic team has not been defeated this season.

The ladies of Grace Episcopal church will hold a rummage sale next week, commencing Wednesday at William Andrews' building on East Division street.

Don Tehan and wife, former residents here yesterday from Escanaba visiting relatives. Mr. Tehan is conducting the Chicago & Northwestern line running out of Escanaba.

Tom Clancy left last evening for Ann Arbor, where he will resume his school work. He was accompanied as far as Chicago by his father, James Clancy, who will spend a few days in the city.

The ladies of Calvary Baptist church will conduct a pantry sale between 12 o'clock today at the Grand Union Tea company's store. The sale will be in charge of Mesdames M. Lee and Russell Betson.

T. M. Bargh was last evening elected captain of the Ishpeming High school football team, and Wellington Burt is the student manager. The first and second teams of the school will try conclusions this afternoon at 3 o'clock at Union Park.

Rev. James Levy, pastor of the Salisbury Methodist church, arrived home Thursday night from the Detroit conference. He has been returned to the

**ANNUAL HARVEST FESTIVAL.**

At the Salvation Army hall next Monday, Tuesday and Wednesday evenings, the local corps will have its annual harvest festival sale. A large quantity of vegetables have been collected and other things are also to be disposed of. All of the goods will be sold at auction to the highest bidder. The public is invited to attend. The auction will start each evening at 7:30 o'clock.

**FROM HOPKINS' CURB LETTER.**

There was a higher opening this morning all around and a much better feeling prevailed throughout the list. There have been gains of about a point in the more active coppers and the feeling in the copper is on bottom is increasing daily. Runners of large sales of copper were floated early, but have not been confirmed. However, we believe that the only obstacle in way of higher prices is the high rates for money, but this should soon right itself after the severe liquidation that the market has passed through.

The prevailing prices were:

	Bid.	Asked.

**PLAYING GREAT BALL.**  
Former Negaunee Man Is Doing Excellent Work With Hibbing Team.

Charles Calligan, who was born and raised in Negaunee, and who for the past three or four years has been one of the star players of the Hibbing baseball team, has made good again this season. During the time he has been with the Hibbing nine Mr. Calligan has been credited with a number of sensational plays, but none equaled the one here described in the last issue of the Mesaba Ore:

"There is scarcely a game of baseball in which one or another of the Hibbing

players does not make a sensational play, but it remained for Second Baseman Calligan to eclipse all previous records. Calligan made a triple play Saturday that stiffened out every Duluth man in the grand stand. Duluth had a man on first and another on second when McCormick, the heavy hitter, came up. Mac let go and a liner was sailing over the second baseman's head--just smacking, too. Both men on bases started to move up when Calligan went into the air and speared the red hot ball with one hand. He ran to second with it and from there threw the ball to first, cutting both base runners and retiring the side. It was the most brilliant piece of baseball work ever seen on the Hibbing diamond."

### BELMORE BAY COMPANY.

At a meeting of the Negaunee shareholders of the Belmore Bay Mining company, held last evening, Joseph Barabe was selected as a delegate to represent them in the annual meeting of the company called to take place at the Canadian Soo Monday next. All stockholders who have not yet given their proxies to Mr. Barabe, and intend doing so, are requested to attend to the matter by Saturday evening. Mr. Barabe can be found at his store until that time.

### ATTEMPTED BURGLARY OF NEGAUNEE SALOON

**JOSEPH TRATHEN'S PLACE WAS ENTERED WEDNESDAY NIGHT, BUT THIEF, WHO WAS AFTER CASH, FOUND NONE.**

A thief forced entrance into Joseph Trathen's saloon some time Wednesday night or Thursday morning, but nothing of value was taken. The burglar worked money and after opening several of the drawers in which Mr. Trathen usually keeps his cash, he left the place without taking either liquor or cigars. Entrance to the saloon was obtained through a rear window. The burglar took great pains to remove the patty surrounding a pane of glass in the window, evidently with the intention of taking it out without making any noise, but he had difficulty in removing the glass and he finally broke it and crawled in through the opening. Two drawers in the desk were pried open but two others in which Mr. Trathen keeps his papers, etc., were not disturbed. The proprietor of the place is satisfied that the attempted burglary was committed by some one familiar with the place, and it surprised him that the liquor and cigars were not disturbed. Mr. Trathen does not usually leave any cash in the saloon. This is the fourth time Mr. Trathen's place has been broken into. In each case the thief tampered with the desk, and each time it was damaged more or less, until now it looks as though it had been through railroad work. At one of the previous burglaries the panel on the door on one side of the upper portion of the desk was broken open, the intruder being unable to force the lock. This is the first time since occupying his present stand that Mr. Trathen's place has been entered.

### HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.  
F. J. CHENEY & CO., Toledo, O.  
We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.  
WALDEN, KINMAN & MARVIN, Wholesale Druggists, Toledo, O.  
Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 25 cents per bottle. Sold by The Stafford Drug Co.

### HOW TO AVOID APPENDICITIS.

Most victims of appendicitis are those who are habitually constipated. Orino Laxative Fruit Syrup cures chronic constipation by stimulating the liver and bowels, and restores the natural action of the bowels. Orino Laxative Fruit Syrup does not nauseate or grip and is mild and pleasant to take. Refuse substitutes. The Stafford Drug Co.

### ATTEND MARRIAGE AT ROCKLAND.

Mrs. Mary Goodman and Mrs. F. Millman will leave today for Rockland to attend the marriage of the former's grand daughter, Miss Pansy Goodman, daughter of William H. Goodman. The young lady is to be married next Wednesday to Michael Hackett. The bride-to-be is very well known in this city as she has departed from Negaunee several years ago, she has visited relatives here a number of times.

### LOCAL LACONICS.

John Northey is here from Detroit, for the benefit of his health.

Opar Antilla left Tuesday evening for his old home in Finland.

Mr. and Mrs. E. C. Anthony arrived home yesterday from Chicago, where they spent a few days.

Miss Mildred Viant of this city is spending a few days as the guest of Miss Lulu Warcham at Laurium.

Mrs. D. Strauss and Mrs. Katherine Price of Chicago are visiting with Mrs. D. Benyas, the former's sister.

Miss Celeste Beaudette, who has been in the city for the past two months, has returned to her work in Chicago.

Mrs. Lena Katus, accompanied by her son Guy, is in Detroit, where they will spend a few days, visiting relatives.

Mrs. T. C. Yates and her daughter, Mildred, arrived home yesterday from Chicago, where they visited relatives.

Miss Irene Sheehan of Duluth, who enjoyed an extended visit here for the past two months, has returned to her home.

Mrs. I. Mackeyvitch, who has been visiting Mrs. Cohen the past few days, has returned to her home at Bark River.

The fire department was called out yesterday morning on account of a chimney fire on Park street. No damage resulted.

Rev. James Stenaway has returned from the copper country. While there he established Sunday schools in the different churches.

Miss Nina Foley left early in the week for Maukato, Minn., where she will spend some time visiting her sister, Mrs. H. C. Bohmbach.

Mrs. John Burns is confined to her home as a result of a strain of her foot, which she received while walking on Teal Lake avenue a few days ago.

Mrs. Herman Greenwald, who has been the guest of Mr. and Mrs. Abel Levine for the past few days, will return to her home in Detroit today.

Mrs. Paul Hornberger of Pasadena, Cal., who is visiting her mother, Mrs. C. S. Mitchell, has returned from a few days' visit with friends in Menominee.

Miss Edith VanDorp, of Topeka, Kas., who visited relatives here for several weeks, has gone to Iron Mountain, where she will visit with her aunt, Mrs. John Salehert.

Mrs. Frank Finning and daughter, Maybelle, who have been visiting with Mr. and Mrs. Andrew Anderson for the

past few days, have returned to their home in Eschschaba.

Miss Barbara Karschner, an employee of the Negaunee postoffice, has gone to Escambia, where she will spend a few weeks visiting friends. She will visit points in Wisconsin before returning to this city.

The exterior of the First National bank has been given the first coat of paint, greatly improving its appearance. The brick is painted red with the window trimmings a slightly darker color.

Mrs. William Piper, who spent the summer visiting her father, Benjamin Neeley, and family, in this city, has returned to her home in Birmingham, Ala. She was accompanied as far as Chicago by her sister Miss May Neeley.

Mrs. Miles Doyle left early in the week for Chicago and Buffalo. She will be accompanied home by her husband, who is on his way here from Norway where he has been engaged in diamond drill work for the past year.

T. M. Kieren, a representative of the Columbia Conserve company and a former resident of this city, who has been here for the past few days, has left for the copper country. He will later go to Birmingham, Ala., where he will locate.

The Cornish wrestling match between Mike Donley of Calumet and William Penberthy of Ishpeming, which will be held at Ishpeming theater this evening, will doubtless attract a large number of the followers of the Cornish sport in this city.

Andrew Selsback has secured a lease on the Cornelius Keiting building on West Iron street, and intends to open a restaurant there in the near future. Mr. Selsback is well versed in the restaurant business, having conducted a restaurant and boarding house in Marquette for some time.

### MARKETS

GRAINS SELL HIGHER.

Crop Damage Reports Put Up Prices in All the Pits.

Chicago, Sept. 20.—Wheat for May delivery sold on the board of trade today at 1.08 1/2, the high record mark for the season. The other options showed a corresponding advance. The sharp upturn was caused by sensational reports of damage by weather to the crop in western Canada. At the close the December delivery was 1/4 @ 1/2 higher, corn was up 1/2 @ 1/4; oats were 1/4 higher and provisions were ten to twenty cents higher.

The sentiment in the wheat pit was extremely bullish all day, and the volume of trade was large. The opening quotations on the leading options were 1/2 to 1 1/4 @ 1/4 higher than the close yesterday. The reason for the opening strength was an advance of almost 2d in the price of wheat at Liverpool because of crop damage reports from Canada and greatly decreased shipments from Argentina. The local market was further strengthened by a dispatch from Winnipeg which said that the last of this crop goes down and out tonight, killing frosts being predicted everywhere. This message caused a stampede against the shorts, who bought almost regardless of price. A report that 100 boatloads of wheat had been taken for export at New York also strengthened the market. Part of the gain was lost on heavy realizing, but the market closed strong.

The corn market followed closely the pace set by wheat, the final quotations of the leading options showing gains of 3/4 to 2c. The official prediction of frosts tonight in the Dakotas, Nebraska and northern Iowa, was the main cause of the strength. The close was strong.

Oats were strong, in sympathy with wheat and corn, but were not active. Commission houses were good buyers, but the offerings were light.

### Wheat Summary.

Paine, Webber & Co. reported yesterday's wheat market as follows:

"Prices scored an advance today of 2 1/2 cents for December and nearly as much for May. The starting of the great strength in the market for today was the very exciting close of the market yesterday, when the December price went over the \$1 mark so quickly. This morning came the Liverpool cable, with the most sensational advance of the year, 1 1/2 to 1 3/4 higher, and at the close the English market was up 2d. The northwest markets shared in the advance during the morning. It looks as if wheat traders the world over have arrived at the conclusion that the Canadian northwest was damaged by three distinct freezes when wheat up there in the milk and subject to great injury. The heavy rains over the northwest for several days have put great quantities of wheat in the shocks in very bad condition. Everything combined to indicate a decided shortage of wheat of a quality for export purposes. Europe continues to buy wheat wherever it can be had.

The export sales today were reported as high as 125 boat loads, one million bushels of wheat. There is big professional trading, but not a large public interest in the market. Conservative traders will want to see some reaction from this sharp advance before taking hold, no matter what the news."

### NEW YORK STOCKS.

New York, Sept. 20.—The stock market became very quiet today. Reports from brokers of the return of large blocks of stocks which had been bor-

### STATE OF THE NATION'S TRADE.

This Week's Reviews of Bradstreet's and R. G. Dun & Co.

New York, Sept. 20.—Bradstreet's will tomorrow say:

"Neither attributable to improvement in the financial situation, or because of favorable weather following crop development, there is perceptible a better feeling in commercial lines. The retail trade has hardly been as brisk as desired because the warm weather has de-stimulated fall buying. The reports as to the jobbing trade are in the main favorable, though an undertone of conservatism is still perceptible. Still, the volume of shipments is heavy, and the smaller markets are reporting the influence of the completed harvests. There are still many cross currents visible which prevent generalization, and though irregularly to the downward, the general picture is a quieting down of the market, concededly desirable in some lines, is not improbable. Collections as a whole are better, but there are reports from some markets of more requests for renewals, and some large manufacturing enterprises with profitable contracts on hand looking for financial assistance to tide them over the tight money period. The feeling in iron is better, the stronger inquiry manifesting itself, but the quotations are still firmer, some lines being lower. The steel further reduced quotations for copper have only induced a small volume of buying, and lead is lower, with the restriction of the output of both metals actively in progress.

### FORECASTS BIG COAL STRIKE.

Official of the Miners' Union Sees Trouble Looming Up.

Pittsburg, Pa., Sept. 20.—In a statement which breathes no every line the probability of more trouble in the bituminous coal fields next spring, T. L. Lewis, national vice president of the United Mine Workers, expresses the dissatisfaction of the workers in the soft coal fields with the agreement under which they are now at work.

### SCHOOL FOR CONSULS.

No Agents Will Be Sent Abroad Until Thoroughly Posted.

Washington, Sept. 20.—Hereafter none but thoroughly schooled consuls are to be sent abroad to represent the United States if the plans of the state department which have just been put in practice, realize expectations.

### MARRIES MOTHER-IN-LAW.

Denver, Colo., Sept. 19.—Enamored of his mother-in-law, with whom he was thrown into constant companionship after the death of his wife two years ago, James Parsons, a millionaire wool merchant of Boston and a leader in exclusive Brookline (Mass.) society, has married Mrs. Augusta A. King, mother of his dead wife, Parsons, Mrs. King and Parsons' former wife, Julia King Parsons, are well known in Denver, the Kings having lived in this city for several years. After his wife's death Parsons was apparently heartbroken, but as he gave up worries and cares temporarily, and after the funeral went to St. Augustine, Fla., with Mrs. King, mother of his wife. When they returned here Mrs. King took the body of her former husband back to Boston. Denver friends were today surprised to hear of the marriage.

### QUITS BIBLE TEACHING.

New York, Pa., Sept. 20.—Wearied of the publicity "notoriety" some of his friends told him it was attaching to his weekly appearance as a religious teacher, John D. Rockefeller, Jr., has given up the leadership of the Bible class of the Fifth Avenue Baptist church. His resignation has been accepted, and will take effect Oct. 1. In a letter received by the executive committee of the Bible class, young Mr. Rockefeller gave as his reason for quitting a fear of a recurrence of ill health, and also the increasing pressure of business affairs. At his

office, No. 26 Broadway, today, the junior oil magnate declined to discuss his abandonment of Bible teaching. Mr. Rockefeller has been the leader of the Bible class about eight years.

### CHILDREN TATTOOED.

Philadelphia, Sept. 20.—Nearly a score of young children have had all kinds of designs tattooed on their arms by an elderly man who has been loitering around Payne Park, Camden. The designs are all the way from snakes to a ferryboat and exented in India ink. The man did not confine his operations to the boys, and more than one young woman will carry

# ANNOUNCEMENT

As announced by us last January, we then retired from the promotion business, confining ourselves to our former business of mine operating, successfully devoting our time to the development of the mining enterprises in which we are jointly interested with our clients. As we stated then, any future offerings of mining securities which we would make would be strictly in the nature of an invitation to join with us in the development of any exceptionally meritorious mining enterprise which must present the greatest certainty of success and the minimum of risk.

We now have such an opportunity in the stock of the Goldfield Jupiter Mining Co., of Goldfield, Nevada, of which we have just succeeded in securing the entire allotment to be sold, amounting to 200,000 shares of treasury stock.

The Jupiter mine, owned by this company, is too well known to need but slight mention or endorsement by us. The property is situated in the Sandstorm section of the Goldfield district, immediately north of the mine by that name and on the strike of the same leads from which such phenomenal production was made on this and the bonanza mines in the central portion of the camp, such as the Mohawk, Jumbo, Red Top, Florence, etc., which have during the past two years been productive of so many millions in gold.

The Jupiter is developed by a two-compartment shaft to a depth of 270 feet, with over 400 feet of lateral work on the 200 and 254-foot levels. It is equipped with the most complete plant of machinery in the Goldfield district, consisting of a 50-horsepower electric hoist, air compressor, machine drills, etc., and the large amount of work already performed and in progress places the property on the very verge of developing into a shipping and producing mine, upon which basis it is the determination of the able management to place it at the earliest possible moment, in which worthy effort we are confident they will meet with early success.

It was the firm decision of the Directorate of the Goldfield Jupiter company that the present allotment of 200,000 shares should not be actually worth to-day, based on the intrinsic value of the property represented, and we are pleased to announce that we have secured it on a basis which enables us to receive subscriptions from our clients at the price at which the original allotment was sold last January, namely, 60 cents per share, at which price we invite subscriptions and unhesitatingly recommend its purchase.

As all our special offerings in the past have been greatly oversubscribed, we suggest that you telegraph your order for Jupiter stock immediately, and let remittance and subscription follow by mail, as this allotment will undoubtedly be several times oversubscribed, and first come will be first served, all orders being entered in the order in which they are received.

### PASTOR STARTLES SOCIETY.

Utica (N. Y.) Clergyman Emulates Earle and Takes a "Love Bride."

Utica, N. Y., Sept. 20.—A serious breach among the clergymen of Utica, which has startled society, was disclosed when the Rev. William P. M. Sims, formerly of New York city, and Mrs. Ellen Burlingame Dudley Dorra publicly declared their belief in freedom of love, heaven-made affiances and prenatal marriages. The case promises to become of even wider celebrity than that of Ferdinand Pinney Earle and Miss Julia Kuttner.

Dr. Sims' attitude is as implacable as that of Earle. Veiled threats of ostracism uttered even from the pulpits have failed to move him, and earnest letters from the Rev. C. E. Miller and others of equal prominence in the Utica clergy have been powerless to influence the minister against his "soul's bride," whose home he has made his own for the last three months.

### VICTIM'S SON KILLS SLAYER.

"This Avenges My Father," He Cries as He Shoots Enemy.

New York, Sept. 19.—Two weeks out of the Emira Reformatory, where he had spent fifteen months for the killing of Michael Marantino, James Beslin of 228 North Fifth street, Brooklyn, was shot and instantly killed by Joseph Marantino, son of the man he had stabbed to death more than a year ago.

Rose Beslin, sister of the victim, also was shot by Marantino, as she sat with her brother on the stoop of their home. Marantino is a prisoner in the Bedford avenue station, having been captured after an exciting chase of nearly half a mile. About fifteen months ago Michael Marantino went to the Beslins and demanded a month's rent, he being their landlord when they lived at Graham avenue and First street. The landlord and Beslin's father had a quarrel and Michael Marantino made a motion as if to draw a revolver. Young Beslin at once pulled a knife and stabbed Marantino to the heart, killing him at once.

### MIRACULOUS ESCAPE.

"Steeple Jack" Falls from a Church Spire But Is Not Killed.

Toledo, O., Sept. 20.—A miraculous escape from death was that of E. E. Benner, a "steeple jack," who fell from the top of the spire of St. Paul's Lutheran church when the rope supporting his scaffold broke. Benner landed on the cornice at the base of the tower, seventy-five feet below, with but a small scratch on his right elbow. After he had fallen fifty feet the painter struck the side of the tower and shot down its steep side until he was stopped by the cornice, his limbs hanging over the edge, still eighty feet above ground. He managed to hang on until a rope was let down from a window in the steeple. He fastened it

### VISITORS PRAISE BEAUTY OF CITY

CONGRESSIONAL PARTY AND THEIR WIVES ARRIVE AND ARE ENTERTAINED BY CITIZENS.

### JUNIATA SIX HOURS LATE

Houghton Sends Committee of Three to Accompany Congressmen—Reception Held at Home of Peter White.

That Marquette is the most beautiful of the lake cities that they have visited in the verdict of some of the members of the congressional party and their wives who were entertained here yesterday. The following persons composed the party which arrived on the steamer Juniata at 4 o'clock yesterday afternoon: Congressman Edgar C. Ellis of Missouri and Mrs. Ellis; Congressman John A. Moon of Tennessee, and Mrs. Moon; Congressman J. H. Davidson of Wisconsin, and Mrs. Davidson; Congressman James B. Ramsdell of Louisiana, and Mrs. Ramsdell; Congressman Ernest F. Acheson of Pennsylvania, and Mrs. Acheson; George A. Maer, secretary of the Lake Carriers' association, and Mrs. Maer; and Mrs. J. Adam Belle, wife of Congressman Belle, the author of Minnesota. Congressman S. M. Sparkman of Florida was a member of the party as far as Port Huron where he was obliged to leave the boat. Harvey Goulder, attorney for the Lake Carriers' association took the place of William Livingston, president of the Lake Carriers' association, who was unable to join the party, and accompanied the party as far as the Steamer Buffalo. The congressmen and their wives were the guests of the Lake Carriers' association on the trip.

Reception Committee. Those who composed the Marquette reception committee which entertained the visitors were: Congressman H. O. Young of Ishpeming; Captain W. H. Johnston of Negaunee; W. P. Belden of Ishpeming; Peter White; Gad Smith, Dan H. Ball, J. E. Ball, E. N. Breitung, Dan W. Powell, J. G. Reynolds, F. J. Jensen, Frank E. Spear, Sr., William Ross, Joseph Neidhart, M. E. Asire, Alderman Downey, Joseph Fay, James Russell, M. J. Sherwood, H. R. Harris, F. G. Jenks, George Shiras and J. D. Mangum.

As soon as the Juniata landed the members were placed in the Ball, Breitung and Kaufman automobiles and in carriages. They were driven through the city and members of the reception committee who were in each vehicle pointed out the places of interest. All the visitors were taken over the Presque Isle drive after they had passed through the residence district and they then went to the home of Peter White where refreshments were served. At the White home Mr. George Shiras and Mrs. Francis E. Jopling aided in entertaining the party.

Up on the Roof. From the roof of the White home they

viewed the harbor, and improvements the city is seeking were explained to them. No speeches were made but Mr. White consented to recite a dialect poem which was hugely enjoyed.

Houghton sent a committee composed of Richard B. Lang, postmaster; W. D. Calverley, member of the board of control of the Marquette prison and Judge N. W. Haire, general manager of the Bigelow group of copper mines and vice president of the Mineral Range road to Marquette to accompany the congressional party from the city to Houghton, and the Houghton committee accompanied the party yesterday.

The Juniata was looked for at 9 o'clock yesterday morning and a large number of the members of the entertaining committee were at the passenger dock at that hour awaiting the visitors. At half past nine, word was received that the boat had been delayed at the Soo and would not arrive until 3 o'clock in the afternoon. The visitors were in the city an hour and a half. Captain Edward Marth of the Juniata stated yesterday that the delay had been caused by the fog early yesterday morning when the Juniata was obliged to tie up for several hours.

No special significance is said to attach to the tour of the committee, whose members desire to view conditions on the lakes for themselves. This desire becoming known, the Lake Carriers' association tendered the use of the steamer Juniata, and it was accepted by the committee.

### SOO CANAL PASSAGES.

Boats Locked Through, Bound for Ports on Lake Superior.

Sault Ste. Marie, Mich., Sept. 20.—[Special]—The upbound boats passing the canals the last twenty-four hours were as follows: Black, Saginaw, General, 9:30 p. m.; Australia, Polynesia, 10:30; Juniata, 11; Snyder, Dave Whitney, 1 a. m.; Cornell, 2; Mesala, 4; Frank Peavey, 4:30; Ralph, 5; McDougall, Holly, 6; Colonel, 6:30; Cuddy, Holland, Exile, Keith, 7:30; Eads, Fritz, 8:30; French, Osborne, Perkins, P. C. W. Elphicke, Winnipeg, 10; Stewart, Bradley, Woolson, Brightie, Delaware, 11; Davidson, noon; Scottish, Hero, Strathcona, Pathfinder, Ishpeming, 1 p. m.; Umbria, 2; Crescent, City of Superior, Ketchikan, 2:30; Wood, 3; India, 5; Leaffield, 5:30; Ream, Cambria, Emma, Thompson, 7.

### Marquette Port List.

D. S. S. & A. docks: Cleared—Mesala. Due today—Colgate, whaleback barge 133, Edenborn.

L. S. & L. dock: Cleared—Pontiac, Cleveland; Spokane, Toledo. Loading—Centurion, Robbins.

Coal docks: Unloading—Frontenac.

### UNANIMOUS VERDICT.

From our many articles the past few weeks received from various sources it will be seen that the comedy farce, "The Irish Pawnbrokers," is a strictly first-class attraction with more originality and novel features than any company that has yet visited us. It remains to be seen how they will be appreciated.

Let the public hereby be warned not to buy any wall paper or paints of any non-union wall paper and paint stores, as union painters and paper hangers will not apply such materials. Local Union 817 of P. D. & P. of Marquette. (9-19-07)

### BRAVE DOG SAVES WOMAN FROM DEATH

MRS. MICHAEL GUELFY IS GORED BY MAD BULL AND SERIOUSLY HURT AT HER HOME.

Gored by a maddened bull which was about to trample her to death, Mrs. Michael Gueffy, who lives on a farm four miles west of the city, was saved by a dog which kept the bull away from its prostrate victim until help arrived. Mrs. Gueffy is now at her home in a serious condition.

Was Picking Apples. The woman's encounter with the bull occurred at daybreak yesterday. She had arisen early and was picking apples blown off trees in the orchard by the storm of the night before when the animal attacked her. The orchard of the farm is directly behind the barn which is about eighty feet from the house. The pasture from which the bull escaped adjoins the orchard. It is thought that, through an oversight, the gate leading from the pasture to the orchard had been left open overnight.

### Dog to the Rescue.

Mrs. Gueffy was unaware of her danger until the bull was almost upon her. As she saw it, she turned screaming and started to run, but the animal easily overtook her and with lowered head, it lashed her high into the air. The brave dog heard his mistress scream and he at once went to her rescue. As she lay semi-conscious where the bull had tossed her, the dog charged the animal as it was about to trample her.

Concerning about the woman the dog kept the bull off until a boy passing in the roadway nearby saw the trouble and awakened Mr. Gueffy, his son Joe Gueffy and Edward Greene of Crescent street who has been visiting at the Gueffy home for the past few days.

### Injuries Not Fatal.

They drove the animal away and Mrs. Gueffy was carried into the house. Dr. A. W. Hornboga was called to attend her. Dr. Hornboga stated last night that the injuries are not fatal. He said Mrs. Gueffy is badly bruised and that a number of her ribs are broken. Only a few months ago the same animal that gored Mrs. Gueffy attacked her young daughter in a similar manner.

### Munising, Sept. 17, 1907.

J. W. Spear, Marquette, Mich. Dear Sir:—Six weeks ago I sent you twenty dollars for investment. I find that I have made \$188.75 clear profit from the \$20.00. I am so well pleased with the investment that I have advised my wife and friends to send you \$20.00 to invest in pool. You have treated me fair in all orders I have sent you.

Yours respectfully, C. J. HOLMSTEDT, Munising, Alger Co., Mich., Box 381, (9-19-07)

ITS HIGH TIME You were thinking of some new Fall Togs

We've got them. Not the ordinary kind, but clothes that are in a class by themselves. Tailored by some of America's most expert tailors. The "Regent Styles" are sure to please you. What's the matter with looking them over? We're only too pleased to help you get better acquainted with our lines.

PRICES LOWER THAN SOME FELLOWS ASK FOR SIMILAR GRADES.

# Extraordinary Announcement

Having just arrived home from Chicago and the Eastern Markets, we urgently request all of our customers and friends to come and inspect our lines of Ladies' and Misses' Coats, Jackets and Skirts which are now complete. Those contemplating buying Suits, we would like to ask them to wait until ours come, which will be in a few days, before purchasing elsewhere.

We went to market later this season in order to secure for our trade the very latest cuts and makes and also the newest goods. Therefore you can depend on what you get in our store as being the correct styles in this season's wear.

Our head trimmer, Miss Jessie Andrew, is now preparing for our Fall Millinery Opening, which will occur in a short time.
