

SHIP WRECKED ON LAKE SUPERIOR

Caught in a Gale Near Vermilion Point, the Steamer Alexander Nimick Becomes Disabled and Is Driven Ashore.

Captain Randall and Five of His Sailors Go Down to Watery Graves, the Others, Eleven in Number, Being Rescued by the Lifesaving Crew—The Vessel a Total Loss, It Is Reported—Was a Gilchrist Boat, Upbound, Loaded With Coal.

Sault Ste. Marie, Mich., Sept. 22.—[Special.]—The Gilchrist steamer Alexander Nimick, upbound, loaded with coal, was caught in a northwest gale between Whitefish and Vermilion points, on Lake Superior, early today, and becoming disabled she was driven ashore. The vessel is a total wreck.

LIMITED TRAIN DERAILED

Thirty-Two Passengers Injured in Wreck on Southern Railway.

Washington, Sept. 22.—Thirty-two passengers were injured, none of them seriously, by the derailment of the Chattanooga and Washington limited train on the Southern railway just north of Ryan's siding early today. A broken rail was the cause of the accident.

OCEAN FARES SLASHED AGAIN

North German Lloyd Cuts Both Eastern and Western Rates \$25.

New York, Sept. 22.—The North German Lloyd Steamship company has made a cut of \$25 on both east and west bound business, and the growing rate was may involve not only first but second and third class passengers.

AFTER THE EASTWARD RECORD

Big Turbine Lusitania Sails From New York for Europe.

Halifax, Sept. 22.—A wireless dispatch to the Associated Press from Cape Sable station at noon today reports that the steamer Lusitania, which left New York yesterday for the eastward record, was in latitude 40.57 north, longitude 65.54 west, or about 360 miles from Sandy Hook. The big turbine was not being pushed, her average speed the first day being about twenty-two knots.

ELECTRICIANS LAID OFF

Westinghouse Company Discharges 1,000 Men at Pittsburgh Plant.

Pittsburg, Sept. 22.—Announcement is made that the Westinghouse Electric & Manufacturing company is laying off about 1,000 employees. During the last year the company has made large improvements such as installing new machinery and erecting a new shop.

TO BREAK THE STRIKE

Non-Union Boiler-Makers Arriving at St. Paul From the East.

St. Paul, Sept. 22.—It is announced from railroad headquarters that one hundred more men arrived from the East today to break the boiler makers' strike. Fifty will go to work tomorrow in the St. Paul shops of the Omaha road, and fifty will be sent to Livingston, Mont., to work in the Northern Pacific shops.

ALABAMA NEGRO LYNCHED

His Attempted Victim a Ninety-Year-Old White Woman.

Pritchard Station, Ala., Sept. 22.—Mose Dosssett, a negro, was lynched here today for an attempted assault upon Mrs. J. Brewer, a white woman, ninety years old.

BLOWN TO PIECES

Dynamite Storehouse Used as Target, Fearful Explosion Kills Three Boys.

Cheboygan, Mich., Sept. 22.—Using the side of a warehouse containing dynamite as a target brought sudden death to three boys of this city. Their bodies were blown to pieces by the explosion of the dynamite. They were LESLIE TERRILL, aged eighteen, CLIFFORD SALMON, aged seventeen, ALBERT SALMON, aged thirteen.

FIVE DIE IN WRECK

Freight Train on Santa Fe Crashes into Light Engine.

San Bernardino, Cal., Sept. 22.—Five men are known to have been killed and one fatally injured in a wreck on the Santa Fe railroad. Four of the victims were burned to death. Breaking away at Devoe station, on the top of the steep San Jose grade, a long freight train crashed into a light engine at the bottom. The wreckage caught fire and burned fiercely. The dead include H. K. Stratton of San Bernardino, the engineer; Brakeman Day and Bryan, and two tramps. Day, Bryan, and the tramps were burned to death. Fireman Thresher sustained a fractured skull and probably will die.

IN HONOR OF ROOT

Lavish Entertainment Planned by the Mexican Government.

Mexico City, Sept. 22.—When asked as to the probable cost to the government of the elaborate entertainment being planned for Secretary Root, a high official said today that it would amount to not less than \$160,000, and probably more. This is not counting the large number of private entertainments that are being planned. Many of the City of Mexico's 400 are receiving gowns ordered from Paris or the fashions which are to take place.

LOST TO AMERICA

EMMA GOLDMAN MUST STAY IN EUROPE.

Much Disgusted, Anarchists Find Leader in Their Own Trap—Not a Citizen, Immigration Laws Shut Her Out.

Chicago, Sept. 22.—Chicago's anarchist group is a pretty disgusted lot. They have sent Emma Goldman, their Joan of Arc, straight into a trap which will probably bar her forever from the United States.

According to dispatches from Ellis island, the immigration authorities have concluded to deny Miss Goldman admission to this country when she attempts to return, as she probably will in a week or so, from the international anarchist convention at London, to which her Chicago comrades sent her.

Miss Goldman, the immigration authorities hold, is not a citizen of the United States, having been born abroad, never married an American citizen, and never claimed American citizenship through any of the channels open to women—such as voting or making a declaration to the state department at Washington in an application for a passport. Therefore, Uncle Sam, will classify her as an immigrant and deny her admission on the grounds that she is an anarchist.

Persecution, Says Mrs. Parsons. "It is a perfectly expatriating form of persecution," declared Mrs. Lucy Parsons. "It was not until after Miss Goldman had left the country that it occurred to any of us that she might not be able to come back. If she can't come back, then we lose, perhaps, our strongest worker. I decided it is too bad! Of course, it is persecution," she went on wearily, "but it is no worse than going to jail. However, I shall see some of the comrades and see what sort of an agitation we can start in behalf of our friend."

Chance of Smuggling Her In. "Any likelihood of her being smuggled back into the United States?" was asked. "Oh, I don't know," he said impatiently. "If she did slip in I suppose the zealous police would arrest her and turn her over to the government. Still, there may be some possibility that her residence here has given her a few rights. We shall see."

Kansas City, Mo., Sept. 22.—Rev. Albert Bushnell, superintendent of the Anti-Saloon league in the Kansas City district, said today that in his estimation it will be only a few weeks until Missouri will be half prohibition.

HIS VACATION

A VERY BUSY ONE

Much Work Accomplished by the President During the Three and One-Half Months Spent at Sagamore Hill.

His Message Is Ready Except for a Few Finishing Touches—Leaving Oyster Bay Wednesday, He Will Depart Next Sunday for the West and South and Will Not Return to the White House Until Oct. 24—The Plans for His Tour.

Oyster Bay, New York, Sept. 22.—President Roosevelt's summer vacation at his Sagamore Hill home will end at 10 o'clock a. m. Wednesday, when with Mrs. Roosevelt and others of the family, together with the executive staff, he will take a special train for Washington. During the three and one-half months the president has occupied the home-stand, he has had the quietest and at the same time the busiest vacation in which he has indulged since he became an occupant of the White House.

The records show that since June 12 the president has received 125 parades at Sagamore Hill. The callers have been distinguished foreigners, and a few have been purely social calls, but the majority of them have been government officials on strictly governmental business. While the visitors have been comparatively few, the work which the president has accomplished in other directions has been great.

Spectacular Tour Arranged. Washington, Sept. 22.—While the preparations for President Roosevelt's Western trip have not all been completed, the program has been sufficiently arranged to make it certain that the tour will be one of the most spectacular ever undertaken by him. He will leave here a week from today and will be absent from the seat of government until the 23rd or 24th of October.

The trip has three distinct objects: The dedication of the McKinley memorial at Canton, O.; an inspection of the Mississippi river with a view of arousing interest in the project of a ship channel from its mouth to Keokuk, Ia., and the Great Lakes, and the securing of a period of recreation for the chief executive before beginning his duties in October. He will be given a notable public reception, deliver an address and begin his journey by boat down the "Father of Waters," said to be, with the exception of a short voyage by President Pierce, the first trip on the river ever made by a president.

Will Meet Many Governors. At Keokuk the presidential party will be met by the governors of twenty-three states, all interested in projects looking to deepening the channel of the Mississippi and the general improvement of inland navigation, and then on another boat than that on which the president will travel they will constitute his guard of honor to Memphis, where the party will arrive Oct. 4. There will be very important stops on the voyage—at St. Louis on the 21 and at Cairo, Ill., on the 31—and at both places speeches bearing upon the country's future will be delivered by the president.

Reports from all points at which stops are to be made indicate that the party will be entertained on a lavish scale throughout. At Keokuk there will be a water pageant. Many citizens will convey the president down the river in craft of all sizes for twenty or thirty miles, and a number of them will accompany him all the way to Memphis. At Memphis the president will inaugurate the deep waterways convention in session, and he will deliver a speech. Then the president will turn his back to civilization for a period of rest and sport in the wilds of northern Louisiana.

Office Force Stays Behind. This part of the program has been arranged largely by Civil Service Commissioner McElhenny, of Louisiana, who is a sportsman of fame. The president will be accompanied to the border of this game region by a staff from the executive offices, headed by Assistant Secretary Latta, and also by representatives of the press associations, but they will not accompany the hunters on the quest. Communication with the White House will be established at a convenient point, and Mr. Latta will keep his chief informed of important developments in affairs of state.

The party will be in camp from the 5th to the 21st of October. Returning, the president will speak at Vicksburg and at Hermitage, near Nashville. At the latter place he will pay his respects to the memory of President Jackson.

WEATHER FORECAST

Washington, Sept. 22.—The following is the weather bureau's forecast for Upper Michigan: Showers, Monday; Tuesday, fair; fresh to brisk shifting winds, becoming northwest.

CONFERENCE A FIASCO

Attendance at The Hague Dwindles to a Mere Handful of Officials.

London, Sept. 22.—To call the international peace conference at The Hague a fiasco would merely be to repeat public opinion for a whole year. Its meetings long since have ceased to command attention, and the newspapers are giving them less and less space. The cosmopolitan throng which appeared at Wilhelmshafen capital early in the summer has dwindled to a comparative handful of officials. Only those compelled to remain on the spot for signing documents embodying the results of the meetings, and a few secretaries, remain.

BASEBALL

STANDINGS OF THE CLUBS.

Table with columns for National League and American League, listing teams and their records (W, L, P.C.).

SCHEDULES FOR TODAY

Table listing baseball games for today, including National League and American League matchups.

GAMES PLAYED YESTERDAY

Table listing results of baseball games played yesterday, including scores and key players.

SATURDAY'S SCORES

Table listing results of baseball games played on Saturday.

KNOCKS HER EYES IN

Slight Blow by Boy Restores an Aged Woman's Sight.

Philadelphia, Pa., Sept. 22.—It was not a hard blow which little Harry Muesst struck his grandmother several days ago. It was only an accident that the cadet's rifle which he carried on his shoulder hit her as he was playing about the room. But since that blow Mrs. Susan Freoler has given him candy and cake as much as his heart could desire, for the shock did something for her which surgeons had been unable to do for years, and now she is able to walk about the house without fear of stumbling and doing herself injury.

Forty-four years Mrs. Freoler had suffered partial blindness. She could distinguish objects and the light, but always as though through a fog. She feared to leave her house unaccompanied, and always had to be very cautious when ascending and descending stairs.

Harry, her 14-year-old grandson, is a student at Girard college. Several days ago his mother decided to have his photograph taken in uniform. While waiting for his mother to get ready for the trip down town, he began to play to go through the maneuvers he had learned at school. As he marched past, his grandmother he "shouldered arms," the point of his bayonet striking her on the right temple. A moment later she found that her eyesight was quite a little clearer, and the improvement, she believes, will prove permanent.

NEW ORGANIZATION

FOR STANDARD OIL

Huge Corporation to Be Reconstructed Along Entirely Different Lines, According to a Story from New York City.

Important Conference With Reference to the Matter Is Held at Rogers' Home at Fair Haven—Radical Changes Are Contemplated, It Is Said, Even to the Extent of Changing Name of the Company and Installing a New Head.

New York, Sept. 22.—Acting directly on the suggestion of John D. Rockefeller there was a conference at the residence of Henry H. Rogers at Fair Haven, Mass., today, of the men most closely associated with the affairs of the Standard Oil company. The purpose, it is said, was a complete reorganization of the great corporation.

John D. Archbold, William Rockefeller, Fosley M. Tildford, Charles Pratt and others were either in Fair Haven or in communication with those on the ground. The oldest counsel that the Standard can rely upon also was present, and the entire question of the rearrangement of the directorate and the remaining of the company, it is said, was thoroughly threshed out.

While the meeting was in progress, it is understood, John D. Rockefeller, who is at present at Cleveland, was in constant communication with the president of the conference who will be submitted to him for confirmation before any radical steps are taken.

Sweeping Changes Proposed. It was said in New York last night that the plan which the Standard Oil magnates have in mind is a complete and sweeping reorganization of the corporation, this reconstruction possibly reaching sufficiently far to embrace the dissolution of the holding company, which has been chartered in New Jersey; the substitution of a new name, and the reorganization of management by the selection as directors of a number of young men whose connection with the Standard Oil has been most remote.

The tentative reorganization, it was learned, is in a purely formative stage as yet, but so far the facts have become known. The plan contemplates the ultimate retirement of John D. Rockefeller, president of the present concern, and with him, it is said, will retire H. H. Rogers, William G. Rockefeller, Archbold, Flagler, Pratt and others who for years have been closely identified with the disintegration.

New blood will be brought into the concern. It is probable that a man will be placed at the head of the company who will be a guarantee to the public that affairs will be honestly managed. Just as in the reorganization of the Equitable, all the best-remembered directors retired and President Roosevelt's cabinet was invited to secure a chief executive who could command public confidence, all the old directors will get out, new men will be brought in and a president selected whose integrity will be unquestioned.

"Name a Dangerous Asset." This is the present plan. Whether a dissolution of the corporate entity and the changing of the name will be necessary is yet to be determined, but it is said that within a short time the plan of reorganization will be announced and that when it is made known it will shake the whole organization to its very foundation and eliminate from at least public appearance in all places of influence men whose management has brought the Standard Oil company to its present condition of turmoil.

Information was sought for the names of the men who will be selected by Mr. Rockefeller to aid in this contemplated rejuvenation of the Standard, and it was developed that a plan is on foot to bring to the front a number of young men whose families have long held stock in the big company. The names prominent as mentioned are Payne Whitney, H. C. Ledward, H. H. Rogers, Jr., William G. Rockefeller, John D. Rockefeller, Jr., and Walter L. Jennings.

TOM JOHNSON RENOMINATED

Cleveland Democrats Name the Mayor to Run Against Burton.

Cleveland, O., Sept. 22.—Mayor Tom L. Johnson was nominated by acclamation at the city Democratic convention yesterday for mayor to oppose Congressman L. Burton, the Republican nominee. Mayor Johnson is now a candidate for a fourth term. In the platform adopted three-cent fare is put to the front and the injection of national issues is condemned. In his speech of acceptance Mayor Johnson said: "Shall we have a monopoly over our city? Shall we have a city owned monopoly? That is the question."

"TOD" SLOAN WEDS.

Actress Julia Sanderson Becomes Wife of Former Jockey.

New York, Sept. 22.—James Tadhunter (Tod) Sloan and Julia Sanderson, the pretty little actress who has been playing the part of Peggy, the dairy maid, in the "Dairy Maids" at the Orpheum theater, were married today. The ceremony was performed at the Little Church Around the Corner by the Rev. Mr. Broughton. The Sloan, Victor Williams, son of Percy Williams, was the best man.

CANNON IS CHEERFUL

Hits at Calamity Howlers—Says Conditions Are Better Than for 50 Years.

Tuscola, Ill., Sept. 22.—Speaker Cannon was the orator of the day at the celebration of the fiftieth anniversary of the founding of Douglas county here yesterday. Fully 3,000 persons listened to him as he spoke from the steps of the court house in which he made his first official appearance in the '60s, when he was district attorney for Douglas county. Limitation of wealth was the principal theme of Speaker Cannon's address. He said that the question of what sum should be fixed as the maximum amount which any one could be allowed to hold was frequently raised, but that it was a question which would take care of itself. He reviewed the progress of the country and declared that the best conditions in fifty years exist today. The entire tone of his speech was optimistic. "The country is in the best condition it has been in the last fifty years," declared the speaker. "Of course the millennium has not yet arrived, and I do not want to be on earth when it does. There are a great many calamity howlers in the country. It is an easy thing for a man to set his tongue wagging, and go away and leave it. Calamity howlers are abroad in the land. From their view of the affairs of the world is through a ginnet hole. What the country wants is men who do things; not those who talk and howl calamity."

KEEP JAPANESE OUT

White Miners at Altin, B. C., Turn Back Mongolian Arrivals.

Seattle, Wash., Sept. 22.—Seventy-seven Japanese miners, arriving at Altin, B. C., to work in the mines, were turned back toward Vancouver by 300 white miners, who caused them to be taken to the steamer Cleator. The Japanese were told that if they did not stay away violence would be shown. They were almost destitute and will be turned loose in Skagway, Alaska.

NOT FOR LONGWORTH

Congressman Will Not Take the Mayoralty Nomination at Cincinnati.

Cincinnati, Sept. 22.—Congressman and Mrs. Nicholas Longworth arrived here today from their Hawaiian trip. Mr. Longworth, who has been mentioned as a possible Republican candidate for mayor of Cincinnati, today said he would not under any consideration accept the nomination.

LAND FRAUD CASE

TRIAL OF U. S. SENATOR BORAH OPENS TODAY.

Prominent Western Statesman Charged With Having a Hand in Plundering the Government of Valuable Timber.

Boise, Idaho, Sept. 22.—A special session of the federal court will begin here Monday, to try United States Senator William E. Borah, charged with conspiring to defraud the federal government by securing illegal entry of timber lands. The indictment was returned last April and included beside Senator Borah, Frank Martin, attorney general of Idaho under Governor Steunenberg's administration; Sumner G. Moon and J. T. Barber, millionaire stockholders of the Barber Lumber company, residing in Wisconsin; F. H. Downes, J. L. Wells, L. M. Pritchard, John Kincaid, William Sweet, Albert M. Miller and H. S. Rand. Senator Borah asked for and has been accorded the privilege of a separate trial.

The investigation of the grand jury last spring into the timber land frauds produced a sensation. One hundred and fifty witnesses were called and the evidence is declared to have shown that an organized raid had been made by lumber companies on the timber land of the federal government. The plan was very simple. The law permits a person to file a claim for land, but the person must take oath that he is buying the land with his own money, and that the transaction is bona fide. He is limited to 160 acres, and upon payment of \$2.00 an acre a certificate for the quarter section is turned over to him. The lumber company is charged with having furnished hundreds of men with money to buy land with. It was necessary to have the protection of government officials, so it is said, political leaders of both the Democratic and Republican parties were put on the payroll of the lumber company.

"FIENDS" ARE STILL SMOKING

Cigarette Users in Washington Get Supplies Across State Line.

Spokane, Wash., Sept. 22.—Five dollar gold pieces could not be exchanged for a cigarette over the counter of any tobaccoist in Spokane or throughout the state of Washington today, the anti-"white stick" law, enacted by the last legislature, providing for fines up to \$300 or not more than 180 days' imprisonment, or both, being in operation.

However, this does not prevent the smokers from getting their "dope," as dealers at Coeur d'Alene, Idaho, thirty-four miles east of here, and Baker City, Ore., Whitefish, Mont., and other towns outside the state have laid in big stocks, one of them in the Idaho city having invested \$50,000 in manufactured cigarettes and papers and tobacco in anticipation of a heavy mail order business. Dealers in Spokane sold their remaining stock at bargain counter rates the night before the law became effective, and what was left they gave away or destroyed in the streets.

LIFE SENTENCE

FOR CONSTANTINE

Former Lodger in the Woman's Home Is Convicted of the Murder of Mrs. Arthur Gentry at Chicago.

"Hardly What I Expected," Remarks the Prisoner as the Jury Reports After Deliberating Less Than Two and One-Half Hours and He Receives News of the Verdict With Seeming Indifference—A Daring Escape from the County Jail.

Chicago, Sept. 22.—Frank J. Constantine was found guilty of the murder of Mrs. Arthur Gentry by a jury in Judge Kavanaugh's court last night. His punishment was fixed at imprisonment in the penitentiary for life.

The jury deliberated less than two and one-half hours, announcing at 11:42 o'clock, after court had been reconvened by Judge Kavanaugh following an earlier evening session, that it had agreed. The prisoner received the announcement of his fate with seeming indifference. As he was being led back to his cell, he remarked, "This is hardly what I expected."

LOCKED GUARD IN CELL

Two Men Make Daring Escape from Cook County Jail.

Chicago, Sept. 22.—After having locked the jail guard and a "trustee" in a cell, two prisoners climbed through a window on the fourth floor of the county jail this afternoon and escaped in plain view of a number of persons passing in the street. At a late hour tonight the men were still at large. The escape was accomplished by a clever ruse. Choosing a moment when the prisoners in that tier of cells were exercising, one of the prisoners asked the guard, Michael Bloomberg, to unlock his cell that he might get a pack of playing cards. John Scott, a "trustee," was about to hand Bloomberg a note, when both he and the guard were seized, the keys secured and the two men forced into a cell and locked in.

Preaching saws which are supposed to have been smuggled to them by some accomplice, the prisoners saved two iron bars from a window and descended from the window by clinging to the bars on the windows below, and dropping into the street.

The men who escaped are William Rogers, twenty-five years old, charged with larceny, and Stanley Weslek, twenty-six years old, accused of larceny.

WHEN PARISH DEBT IS PAID

Not Till Then Will Father Barth Accept Milwaukee Appointment.

Milwaukee, Sept. 22.—The Rev. F. X. Barth of Stephenson, Mich., who was appointed while he was traveling in Europe as a member of the faculty of St. Francis seminary to succeed the late Rev. Dr. Lehl, was in the city today on his way home from his trip abroad and held a conference with Archbishop Messenger.

While pleased with his appointment and delighted with the prospect of the seminary work, Father Barth felt it to be his duty to remain with his parish until it is clear of debt. Consequently, because "I felt so strongly that he is the desirable man for the parish," it was arranged to hold the position for him until he is free from his present obligations. Father Barth does not expect to be able to assume his duties at the seminary for at least a year or two.

Father Barth also brought to the archbishop personal messages of interest in the province, its head and his bishops from the pope, with whom he had a brief audience while in Rome. His vacation trip of four months was given to a leisurely tour of Ireland, England, Belgium, Germany, Switzerland, France and Italy. He assisted at the alumni meeting of the University of Louvain, Belgium, from which he was graduated in 1885.

"The pope is greatly interested in America and Americans and he keeps in as close touch with them as possible," said Father Barth. "He is the most lovable old man imaginable, not at all like one might naturally conceive a pope to be. Simple, kindly, and unassuming he makes the person to whom he grants an audience feel perfectly at ease and converses on subjects of personal interest. He asked a number of questions about this province, about the archbishop and about the bishops."

"I should be glad indeed to take up the work at St. Francis seminary at once if I felt free to do so. I have just learned of my appointment since my arrival in Milwaukee. It is work which I shall especially enjoy but I can not break in a few days my connection with a parish of which I have been pastor for the last twelve years, ever since I was ordained. I have built up the work at Stephenson and now have a parish of 400 families in an agricultural district. Under my advice they have built a church and parish house on which there is still a debt. Until that debt is cleared, I do not think I ought to leave them."

"I explained the situation to the archbishop and it has been decided that I am to go back to the parish to finish up my work there."

While in the city Father Barth was the guest of the Rev. F. C. Ryan of St. Francis church.

Bloomington, Ill., Sept. 22.—Vice President Charles W. Fairbanks today delivered the address at the laying of the cornerstone of the Y. M. C. A. building in this city.

**DAILY MINING JOURNAL**  
 A MORNING PAPER PUBLISHED BY THE  
 MINING JOURNAL CO. (LIMITED.)  
 Issued daily except on Sundays. Contains  
 Associated Press dispatches and is especially  
 devoted to the Upper Peninsula interests.  
 SUBSCRIPTION RATES:  
 Per month, by carrier, \$3.00  
 Per year, by mail, \$30.00  
 MARQUETTE, MICH., SEPT. 23.

Entered as mail matter of the second class  
 in the postoffice at Marquette, Mich.

The public is waiting with bated  
 breath on the board of fire and water  
 commissioners. Does it not know that  
 it is now its move?

The stock slump also hit many other  
 big sized investors besides Mr. Rockefeller.  
 For once the little fellow is traveling  
 in strictly high class financial society.

If the rivers and harbors committee  
 should report favorably on all the projects  
 presented to them by the people  
 whose hospitality they have been enjoying,  
 the next appropriation bill it  
 asked for would indeed be a genuine  
 staggerer.

The agitation against the Standard Oil  
 company may have cut the paper value  
 of Mr. Rockefeller's stock in two, but  
 as yet there is no evidence going to show  
 that it has unfavorably affected the  
 annual dividends, and it is dividends, not  
 share values, with which Mr. Rockefeller  
 is chiefly concerned. His stock is not on  
 the market.

A United States judge at St. Paul has  
 given an opinion that the two-cent fare  
 bill in Minnesota is not confiscatory.  
 Therefore this judge rules that the federal  
 government can afford the railroads  
 no relief from it. The law may not be  
 confiscatory, but it will doubtless cause  
 the railroads to do some close figuring  
 to get the former returns for the stock-  
 holders from now on.

In their interest in the rate war for  
 first cabin passengers the traffic managers  
 of the Trans-Atlantic liners over-  
 looked the fact that they had gotten  
 the first cabin rates slightly lower than  
 the second cabin rates. Unless this  
 condition is corrected we shall presently  
 see those exclusive travelers who always  
 want the most expensive accommodations  
 traveling second class, and if the  
 contradictory state of affairs now  
 reported goes far enough they may even  
 be forced into the steerage.

Marquette is getting a bad reputation  
 for dishonest and discreditable politics.  
 It is reflected by newspaper comment,  
 serious and facetious, on its elections  
 and their usual abundance of after-  
 math. Fortunately there are not  
 wanting signs that Marquette's elections  
 will hereafter be very different from  
 what they have been in the past. For  
 one thing in the future voting machines  
 will doubtless be used, and that will  
 mean returns that will not, and cannot,  
 be questioned. This in turn will mean  
 that disappointed candidates will have  
 no excuse for going to the courts. Elec-  
 tions will be settled on election day, and  
 there will be no broils between heated  
 political factions following the counting  
 of the ballots. Then after a time our  
 neighbors will forget that it was ever  
 otherwise.

Yes, to be sure, Marquette is one of  
 the prettiest cities the rivers and har-  
 bor committee has visited, but don't its  
 members think the harbor could be im-  
 proved? There's that harbor of refuge  
 project, for instance. It is one in which  
 the lake shipping is interested, as well  
 as Marquette, it being the opinion of  
 many prominent marine men that a har-  
 bor of refuge here would well serve lake  
 interests. To provide it is an easy  
 problem, once the money is forthcoming.  
 There are no insurmountable engineering  
 difficulties in the way. And if we  
 can't have the harbor of refuge let the  
 committee carry out the plans for the  
 ornamental bulkhead at the end of the  
 present breakwater. The designer's  
 sketches persuade that it would begood  
 to look upon.

The disaster at the Rolling Mill mine  
 last week recalls the Cage shaft disaster  
 at the Lake Superior property in Janu-  
 ary, 1899, an accident that was never  
 satisfactorily explained and which is re-  
 called as one of the worst ever occurring  
 in this county. As in the case of the  
 Rolling Mill disaster, a party of miners  
 were being lowered in the cage to their  
 work. In some unaccountable manner  
 the cage was tipped in the shaft and six  
 men slid off to a terrible fall of some  
 hundreds of feet to death in the bottom

**SUPERIOR TRUST COMPANY**  
**HANCOCK MICHIGAN**  
 Capital - - \$150,000

This company is under the supervision of the state banking department and is authorized by the law to act as executor, administrator, guardian, assignee, receiver or trustee.

C. A. WRIGHT, Pres.  
 JACOB BAER, Vice Pres.  
 M. C. GETCHELL, Secy.

of the shaft. A searching inquiry failed  
 to satisfactorily explain the cause of  
 the accident. The equipment was in ex-  
 cellent order, as far as could be deter-  
 mined, and had been used daily in hand-  
 ling the men. Various ingenious theories  
 were advanced to explain the disaster,  
 but as far as positive knowledge is con-  
 cerned there is as little known about it  
 today as there was the day after its oc-  
 currence.

The report to the effect that the lumber  
 interests that have been warring with  
 Homesteader Dietz at Cameron  
 Dam, Wis., had settled with that  
 doughty outlaw for \$15,000 is denied.  
 They have arranged instead to get the  
 logs which Dietz has been holding up  
 out in another way, and they will be  
 hauled to the waters of another stream,  
 to be taken to the saws. Dietz will be  
 left in undisputed possession of Cam-  
 eron Dam, as far as these interests are  
 concerned, and will be welcome to sit  
 there until doomsday, rifle in hand.  
 How the first story, which is an absolute  
 contradiction of the real facts on all  
 important points, got out is not ex-  
 plained. It would now be a fit sequel to  
 the lumbermen's decision to go around  
 Mr. Dietz, if they cannot go over him,  
 to have that gentleman taken by the  
 officers on one of the numerous counts  
 against him. He is, to all intents and  
 purposes, an outlaw, and he should not  
 be permitted to go his way without an  
 accounting for his criminal defiance of  
 the statutes and the law's processes.

One of the Detroit papers has been  
 asking the members-elect of the coming  
 constitutional convention if they favor  
 the nomination of United States sena-  
 tors by direct vote and also if they  
 believe in primary election methods for  
 the nomination of state, congressional,  
 county and municipal officers. There is  
 no doubt that the stand of delegates  
 on these questions will be a matter of in-  
 terest to the people, but it is not easy to  
 see where their pertinence comes in. The  
 convention might, perhaps, give consid-  
 eration to such questions, but let us hope  
 it will not do so. The nomination of sena-  
 tors by direct vote and how state and  
 other officials shall be named are matters  
 of detail which the convention should not  
 attempt to deal with, but on the con-  
 trary should leave to the legislatures of  
 the future. One of the evils of the  
 present constitution is that it is too  
 legislative. It is a code of laws instead  
 of a frame work of general principles  
 upon which to base laws. In drafting  
 the new constitution the greatest weak-  
 ness of the old constitution should be  
 avoided. Public sentiment in the state  
 is strongly in favor of the direct vote  
 for senators and the primary election  
 methods of nominating candidates for  
 office, but the constitutional convention  
 will be no place in which to reflect this  
 sentiment.

**PICKING UP A BIT.**  
 At the prices at which copper shares  
 closed Saturday there was a considerable  
 recovery from the low points reached in  
 the recent slump. The improvement in  
 stock quotations reflects an improve-  
 ment in the sentiment in regard to the  
 metal situation. The latter is by no  
 means clarified, but in the past ten  
 days a considerable amount of definite  
 information regarding it has been se-  
 cured, and it has been of a nature to  
 justify a conclusion that things are not  
 as desperate as they may seem.

There is, it appears, some 200,000,000  
 pounds of copper metal on the producers'  
 hands. However, by common consent  
 the consumers stocks are unusually low,  
 though just how low they are does not  
 definitely appear. Therefore the over-  
 production, so-called, is not as great as  
 may appear on the surface. The produc-  
 ers are carrying metal that under ordi-  
 nary conditions the consumers would  
 carry.

The thing that puzzles many and is a  
 cause for much misgiving by holders of  
 copper stocks at high prices is the fact  
 that there are no sales even at the low  
 prices now quoted for the metal. It  
 appears, however, that the consumers  
 need not press for the metal when they  
 know that there is a floating stock of  
 some 200,000,000 pounds to draw on.  
 Under such circumstances they can af-  
 ford to wait developments, living from  
 hand to mouth for supplies in the mean-  
 time, and it is but natural that they  
 should do so.

The most reassuring feature of the  
 situation from the viewpoint of people  
 interested in a stable price for the  
 metal at a quotation at least two or  
 three cents above those now made is  
 the eminently clearheaded way in which  
 the producers of copper are meeting the  
 situation. Drastic curtailments in out-  
 put are being made in the Butte district  
 and considerable curtailments in the  
 Bisbee district. Outputs will also be  
 restricted at other points. With less  
 copper being made demand, even under  
 present conditions, will steadily eat into  
 the surplus of copper in the producers'  
 hands, while any favorable developments  
 in the general financial situation would  
 very quickly result in the surplus being  
 cleaned up and the market put on a  
 normal basis.

In the Butte camp the apparent neces-  
 sity of curtailing production comes as  
 something of a blessing in disguise, for  
 it affords the operating companies an  
 opportunity to get a new grip on the  
 labor situation, which has been getting  
 away from them of late. It will settle  
 strike talk, and will insure that the  
 miners will live up to their agreement  
 to accept a reduced scale in the event  
 of the price of the metal running below  
 eighteen cents. The men are not likely

to have stomachs for a strike which it  
 is so evidently a matter of indifference  
 to the mine managers whether, for a  
 time, the mines are operated at all or  
 not. When the temporary disturbed  
 conditions in the copper market are past  
 it will doubtless be found by the oper-  
 ating companies at Butte that the men  
 are more reasonable, more tractable and  
 somewhat more industrious and efficient  
 than they have been since they have  
 been experiencing the fruits of the high  
 pressure prosperity in the copper busi-  
 ness.

As for the shares in general, there is  
 no immediate reason for believing that  
 prices will run away with themselves.  
 There will be a general scaling of divi-  
 dends, for the time being at least, that  
 in conjunction with other conditions will  
 operate to make the improvement in  
 prices deliberate and probably slow  
 enough. However, it is coming to be  
 believed that the unfavorable develop-  
 ments have all been discounted, and if  
 this is true it naturally follows that we  
 have seen the lowest prices for the pres-  
 ent movement.

**Upper Peninsula**

**Sues City for Damages—**  
 Annie Cicero has commenced suit  
 against the city of St. Ignace for \$1,000  
 damages for injuries claimed to have  
 been received by her on a defective side-  
 walk last April. Her petition for an  
 investigation by the city council was filed  
 last June, but no action having yet been  
 taken by that body, she asserts she has  
 waited long enough.

**Baptists Will Have New Church—**  
 A contract for the erection of a new  
 church for the Immanuel Baptist con-  
 gregation of Iron Mountain has been let  
 to Henry Koepe, a local contractor. The  
 edifice will occupy the same site as the  
 old one, which is on the corner of Lud-  
 dington street and Iron Mountain avenue.  
 The work of excavating is under way.  
 The new edifice will be constructed of  
 red brick and will be a two-story struc-  
 ture, with stone basement. The building  
 will cost in the neighborhood of \$7,000.  
**City to Borrow Money—**  
 Because Escanaba's funds are now ex-  
 hausted and bidders have not appeared  
 to purchase the recent issue of \$38,000  
 in special assessment bonds provided for,  
 the finance committee has been instructed  
 to borrow \$10,000 on the general  
 credit of the city. The total amount to  
 be raised by taxes next year for city  
 purposes will be \$87,100. The rate will  
 be 1 1/2 per cent. One year ago the  
 amount raised for city purposes was  
 \$88,962.63 and the tax rate was fixed at  
 1 per cent.

**Prosperous Season at Mackinac—**  
 The season just closing at Mackinac  
 Island has been very successful. There  
 has been a larger number of visitors than  
 ever before. The fourteen hotels, which  
 accommodate 2,500 guests, and the thirty  
 boarding houses, which accommodate  
 about 650, have all been filled. Only  
 one or two cottages have been unoc-  
 cupied. Mr. Arnold, who is agent for all  
 the steamship companies and railroads,  
 says that there have been at least 20,000  
 people there, and 49,000 pieces of baggage  
 were handled during the season. An av-  
 erage of twenty-four sleeping cars a day  
 have arrived and departed and ten pas-  
 senger steamship lines have furnished  
 connections with Detroit, Cleveland, Buf-  
 falo, Chicago and Duluth.

**Tomato Crop Is Large—**  
 Tomatoes are being brought into the  
 city by the wagonload and Marquette is  
 rapidly becoming one of the most im-  
 portant shipping points for the product  
 in the peninsula. The farmers through-  
 out the county have raised successful  
 crops which are now ripe and large red  
 tomatoes can be purchased at all the  
 local grocery stores at very low prices.  
 The greatest crop reported, however, is in  
 Delta county, and reports from Escanaba  
 state that unless frosts visit the region  
 within the next week the biggest tomato  
 crop in the history will result. Several  
 large experienced parties from Marquette  
 have been raising tomatoes exclusively,  
 and a considerable portion of the crop  
 will be shipped to Menominee, where it  
 will be redistributed.

**New Ball League Planned—**  
 Marinette and Menominee baseball en-  
 thusiasts expect to organize a twin city  
 team and will direct their efforts toward  
 the organization of a new league to con-  
 sist of the cities of Fond du Lac, Osh-  
 kosh, Appleton, Green Bay, Marinette,  
 Menominee and Escanaba. It is con-  
 tended that such a league would be a  
 great success, as the longest jump would  
 be only sixty miles. Three of the cities  
 are now in the present Wisconsin State  
 league. The idea as far as the twin  
 cities are concerned is to raise by sub-  
 scription \$5,000 and organize a stock  
 company, half of the stock to be sub-  
 scribed by each city. This would be done  
 on condition that the land just across  
 the Dunlap Square bridge and the  
 street could be secured for grounds. This  
 would be a central point for both cities.  
 It is believed the attendance there would  
 pay all expenses and permit a handsome  
 dividend.

**Soldiers Accused of Hold-Ups—**  
 Sensational developments are resulting  
 from the investigation now afoot at Fort  
 Brady for the detection of the men who  
 it is now quite certain were guilty of  
 many of the hold-ups in the Soo this  
 summer. Suspicion had been directed  
 against the soldiers for sometime and  
 last week one of them, Private Fox, was  
 taken aside and questioned by Captain  
 Tillman. The man is said to have made  
 a confession implicating several, among  
 whom was Private Merrick. The Soo  
 News says: Fox confessed to being con-  
 nected with the robbery on Fort street  
 a short time ago, when a man named  
 Petre was held up near the bridge and  
 relieved of a gold watch and gold. In  
 this robbery Fox claimed Merrick was  
 also connected. Merrick was called and  
 when told that Fox had 'peached' admit-  
 ted his connection with the Fort street  
 robbery. Fox had also admitted to being  
 implicated in the holdup on Ashmun  
 street last sometime ago when Archie  
 McKillops was relieved of \$240. He  
 implicated Merrick in this also, but this  
 is stoutly denied by Merrick. Later four  
 more soldiers were put under arrest. One  
 of them is Private McQuin, upon whom  
 the stolen watch was found. How he  
 came into possession of it has not been  
 exactly determined as yet. He claims  
 that it was given to him. In answer  
 to the request that victims of hold-ups  
 report at the fort, Archie McKillops pos-  
 itively identified Fox as the man who

stood in front of him with the revolver.  
 He claims he easily recognized him. His  
 identification of Merrick is not so good.  
 He claims to recognize him, but his identi-  
 fication is not considered by the officers  
 as sufficient. The only thing he recog-  
 nizes is the voice. Not enough evidence  
 against the other men has been secured  
 as yet to warrant giving out their names  
 but further investigation will be car-  
 ried on. Both the civil and military au-  
 thorities are now of the opinion that  
 they have finally succeeded in getting  
 next to an organized gang that can  
 account for practically all of the hold-  
 ups that have taken place in the city  
 of late. They are not certain, however,  
 that the gang is entirely made up of  
 soldiers, in fact there is some reason  
 for believing that there are at least a  
 few civilians involved to some extent.

**Going to the Philippines—**  
 The Seventh infantry, a battalion of  
 which is stationed at the Soo, is billeted  
 for the Philippine islands. According to  
 orders just issued, the regiment will  
 leave its present stations, Fort Brady  
 and Fort Wayne, the latter part of  
 March and sail from San Francisco for  
 the far east on April 1. The Seventh  
 will relieve the First infantry at Camp  
 Connelly, Samar. The post at the city  
 of Manila will be filled by the Sec-  
 ond infantry, one battalion going to  
 Fort Brady, one to Fort Benjamin Har-  
 rison at Indianapolis and one battalion  
 with regimental headquarters at Fort  
 Wayne. This assignment makes of the  
 post at Detroit a commanding officer at  
 that city with a commanding officer at  
 Detroit and many cordial friends in a  
 short time as has Major Duat.

**WATER BOARD NOTICE OF PROPOSED ASSESSMENT.**

Marquette, Mich., Sept. 20, 1907.  
 To the owners of lots and parcels of  
 land in the Ayr, Towar and Mar-  
 quette Land company's additions to  
 the city of Marquette.  
 Notice is hereby given, that the board  
 of fire and water commissioners of the  
 city of Marquette, have, at the request  
 of the owners of lots in these additions,  
 decided to extend the water mains of  
 the city to these additions, provided the  
 streets are graded so as to enable the  
 board to lay pipes at proper depth to be  
 protected from frost. And have deemed  
 it just and equitable that a portion of  
 the cost of such extensions shall be as-  
 sessed upon the lots and parcels of real  
 estate especially benefited, and for the  
 purpose of examination by the owners  
 of the lots in these additions, and other  
 interested, a map of the proposed  
 district to be assessed, together with an  
 estimate of cost of the improvement, as  
 also of the amount proposed to be raised  
 by special assessment, may be seen at  
 the office of the board in the city hall,  
 during usual office hours, from this date  
 to and including the 23rd of September.  
 Notice is hereby given to the owners  
 of lots and others interested in these  
 additions, that the board will meet at  
 their office in the city hall at 8 o'clock  
 in the evening of the 23rd day of Sep-  
 tember, prepared to hear any objections  
 and suggestions relative thereto.  
 By order of the board of Fire and Wa-  
 ter Commissioners,  
 JOHN P. KEENE,  
 Secretary.

**NATURE PROVIDES FOR SICK WOMEN**

LYDIA E. PINKHAM

a more potent remedy in the roots and herbs of the field than was ever produced from drugs.

In the good old-fashioned days of our grandmothers few drugs were used in medicines and Lydia E. Pinkham, of Lynn, Mass., in her study of roots and herbs and their power over disease discovered and gave to the women of the world a remedy for their peculiar ills more potent and efficacious than any combination of drugs.

**Lydia E. Pinkham's Vegetable Compound**

is an honest, tried and true remedy of unquestionable therapeutic value. During its record of more than thirty years, its long list of actual cures of those serious ills peculiar to women, entitles Lydia E. Pinkham's Vegetable Compound to the respect and confidence of every fair minded person and every thinking woman.

When women are troubled with irregular or painful functions, weakness, displacements, ulceration or inflammation, backache, flatulency, general debility, indigestion or nervous prostration, they should remember there is one tried and true remedy, Lydia E. Pinkham's Vegetable Compound.

No other remedy in the country has such a record of cures of female ills, and thousands of women residing in every part of the United States bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable compound and what it has done for them.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. For twenty-five years she has been advising sick women free of charge. She is the daughter-in-law of Lydia E. Pinkham and as her assistant for years before her decease advised under her immediate direction. Address, Lynn, Mass.

**Northern State Normal School**  
**MARQUETTE**  
**School Begins October 2, 1907**

The Northern State Normal School admits graduates of approved high schools to the two years' course leading to a life certificate and diploma. It offers courses leading to a three-year certificate, which is renewable for three years and valid in graded schools, and also a rural school certificate. Has excellent facilities for training teachers for special work in Kindergarten, Music, Drawing and Nature Study. It has an exceptionally fine corps of teachers who are specialists in their departments, and its training school gives a splendid opportunity for the training of teachers.

There is a splendid dormitory in connection with the school which is an ideal home for the student. The building is lighted with electricity and heated with steam; the living rooms are large, well lighted and pleasant, and the dining room has a seating capacity of one hundred and fifty persons. The expenses are moderate.

Students of the Northern Normal School who finish the life certificate course are given fifty-six hours credit at the University of Michigan. For information and catalogue write to

# Copper Country

## COPPER COUNTRY FAIR.

Big Exhibition at Houghton Will Open Tomorrow Afternoon.

The fifth annual Copper Country Fair, the fall show of the Houghton County Agricultural society, will open tomorrow afternoon in the Amphidrome. Today Secretary-Manager-Superintendent McNamee will be receiving exhibits and classifying them. He will have a numerous corps of assistants, and tomorrow morning the big building will be the grandest exhibition hall in Michigan.

The fair promises to be better than ever this year. There are more departments, there are more exhibits, there are more attractions of all sorts. A visitor can see a balloon ascension by one of the most daring aeronauts in the business. He can see a livestock show, a bench show, a poultry show. He can see as fine a collection of fruits, vegetables and grasses and grains as can be found anywhere in this latitude. He can see a candlestick show, he can see a variety of hand concerts. He can have just the best time in his life for just the least money.

It may be that all this is fulsome praise for the Copper Country Fair, but this fair is unique—it is in a class by itself. After all, the mining centers every year is the crowd. Just to go to the Amphidrome and see that grinding mass of people, moving slowly through the aisles, is worth the trip. The fascination of the fair brings the people back day after day, and they regret when it is all over. It is more Mardi Gras than fair for a fact.

## MAJOR FITCH OPPOSES.

Reports Unfavorably on Project to Change Outlet of Ontonagon River.

The project of improving the Ontonagon harbor by opening a new outlet for the river has gone glimmering. It has been turned down by Major Fitch, of the Lake Superior engineering corps, and while his decision is not final, it is an important factor with the board of engineers.

Major Fitch's report of the preliminary examination which he made of the harbor has been forwarded to Washington. He states in communications to the board of supervisors and others interested in the project that his report is unfavorable to the improvement.

The project to change the outlet of the river to overcome the shoaling of the harbor every spring was first advanced by James Corgan and was subsequently advocated by the Business Men's association and others, the board of supervisors giving it strong endorsement. A survey of the proposed outlet was made and this, together with data concerning the harbor and the resources of the territory, were submitted to the engineers' office at Duluth.—Ontonagon Herald.

## STANTON BUST UNVEILED.

Hartley's Bronze of the Late Mining Director on View.

The Hartley bust of the late John Stanton was unveiled in the auditorium of the Sara Sargent Paine Memorial library Saturday afternoon. The ceremony was witnessed by a large number of copper country people, including many who had been associated with the late Mr. Stanton in mining affairs.

The exercises were brief. F. W. Denton, general manager of the Copper Range Consolidated, acted as chairman. The C. & H. orchestra, Charles Frisk of Calumet and Mrs. H. Stewart Goodell of Painesdale contributed musical numbers. The oration of F. A. Jeffers of Atlantic, superintendent of the Adams township schools, was the official portion of the exercises. Mr. Jeffers' address was in language chosen well and delivered admirably. His was a discourse by one who evidently felt a personal sentiment for the man whose eulogy he was making. He included a short biographical statement of Mr. Stanton, who was born in Bristol, Eng., Feb. 25, 1820. He was the son of an English mining and civil engineer, who brought the boy to the United States at a very early age.

Mr. Stanton received merely an elementary education in New York school and was a self-made man. He was a student of the law when copper attracted him and the story of his search for paying copper deposits would carry one into many of the eastern and central states. He found at Ducktown, Tenn. the property he sought, and he worked this profitably for some years before the Civil war, which compelled him to abandon the operations. It was then that Lake Superior attracted him, and it was only a short time after the war that he was made secretary and treasurer of the Atlantic and Michigan mines. He was well advanced in years but still active when death came to him in 1906.

William A. Paine, president of the Copper Range Consolidated, donor to the people of Painesdale of the Memorial library, accepted on behalf of the trustees of that building the bust, which is the history of the copper country. He developed nine big mines in the three counties of this district, made possible the present Copper Range Consolidated, and the Mohawk, Michigan, Wolverine, Atlantic and Michigan mines. He was well advanced in years but still active when death came to him in 1906.

Major Fitch's report of the preliminary examination which he made of the harbor has been forwarded to Washington. He states in communications to the board of supervisors and others interested in the project that his report is unfavorable to the improvement.

The project to change the outlet of the river to overcome the shoaling of the harbor every spring was first advanced by James Corgan and was subsequently advocated by the Business Men's association and others, the board of supervisors giving it strong endorsement. A survey of the proposed outlet was made and this, together with data concerning the harbor and the resources of the territory, were submitted to the engineers' office at Duluth.—Ontonagon Herald.

## ONTONAGON CIRCUIT COURT.

Change of Venue May Be Directed in Mine Strike Cases.

The September term of circuit court for Ontonagon county will convene today with Judge Cooper presiding. According to the Ontario circuit court indications are that it will be a short session.

Twelve of the Michigan strike cases—one for assault with intent to commit murder and eleven for intimidation of laborers—are again listed in the calendar, but it is not likely that any of them will ever be tried in Ontonagon county. There is a probability, however, that a change of venue may be ordered and one or two of the cases be brought to trial in Houghton or some other county. Strange as it may seem, if such action is taken, it will be upon the petition of the prosecution.

Five cases for violation of the liquor laws are listed. The defendants are: Emmet Cole, Frank Connelly and John Cosgrove of Even, charged with having their saloons open on the night of the last township election day; Ben Fink and Archie Lackie, both of Bergland, accused of keeping their saloons open on Sunday.

Daniel Barry is confronted with the charge of larceny. It is alleged that he entered the saloon of George D. Robinson and helped himself to a quantity of old coins and some other things. He has been languishing in the jail for some time.

The civil list contains but three actions—two issues of fact and one challenge—as follows: T. A. Green vs. E. J. Ostrander; Rhode Island Manufacturing company vs. E. J. and S. H. Ostrander; Margaret E. Stephenson et al. vs. Hans Mohlberg.

## CHESTY COX IN VAUDEVILLE.

"Chesty" Cox, outfielder for the Winnipeg Maroons and well-known in the copper country, having finished his season's work on the diamond has gone back to vaudeville. For years Chesty has followed the national game in the summer and the footlights in the fall and winter. He has a contract with the Sullivan-Considine circuit and will play most of the houses in the Northwest. Chesty is open at Superior this evening. He does not ten-minute stunts, his topic being "Baseball as She's Played in America." He also does a little singing stunt.

"What shall we have for breakfast?" "Why Cudaly's Peacock Ham and Eggs, because they are always acceptable, especially at this season of the year." (11-27-e-o-d)

## SCHOOL DEDICATION.

Calumet School Board Prepares the Program for the Event.

Selection—Orchestra. Invocation—Rev. Daniel Stalker. Address—James MacNaughton. Response—W. J. Galbraith. Selection—Orchestra. Dedication—James B. Angell. Selection—Orchestra.

The above is the program which will be given in the Calumet Armory Nov. 15, when President James B. Angell of the University of Michigan dedicates the Calumet high school. The board of education announced the program on Saturday. The decision to hold the exercises in the armory is due to the fact that a great number of people will desire to be present, and it is hardly possible that the weather on the date selected will be of a sort conducive to a pleasant outdoor program.

It is just possible that Judge Claudius Grant of the supreme court will also be present on this occasion. He is an old copper country man and is prominent in connection with his efforts to erect a memorial building at the university. The Copper Country Association of the Alumni of the University of Michigan is considering the question of tendering to President Angell and Judge Grant a banquet during their visit. Nothing definite has been done however. The association is a comparatively new organization. It is officered as follows: President, Hon. N. W. Haire; vice president, Miss Estelle Hunt; secretary and treasurer, W. J. Galbraith; executive committee, Miss Estelle Hunt, Miss Emma E. Lacey, Frank C. Condon, Miss Stewart, Dr. Howlett.

## HOUGHTON COUNTY'S TAX.

Wayne county's share of the state tax as apportioned by the auditor general today is \$1,092,830.93, says a Lansing dispatch. The tax levy is the highest ever known in the state, the increase in railroad taxes not operating to relieve the general taxpayer. The tax levied for the state is \$4,884,532.67, the highest previous levy being in the vicinity of \$4,000,000. Houghton county pays the second highest tax, \$349,731.36, with Kent county third, \$309,863.21.

## ANOTHER LONGYEAR GIFT.

J. M. Longyear of Marquette has just forwarded to the trustees of Good Will Farm his annual donation of \$100. Mr. Longyear has given this sum to the farm every year for many years. The arrival of the gift makes timely the suggestion to the public that Good Will Farm will gratefully accept at any time gifts of food, clothing, furniture or money. The farm is supported by contributions; it must come to you to live.

## CIRCUIT COURT.

The September term of the Houghton county circuit court is still grinding away at criminal business. John Fabitz was tried Friday and Saturday on a charge of assault with intent to do great bodily harm. He was acquitted, the first prisoner to be freed by a jury this term. This morning Judge Streeter will create some eighty-five new citizens.

## STRIKE AT THE GLOBE MINE.

A gang of Austrian miners at the Globe mine, now to be known as the Stanton, in honor of the late John Stanton, went on a strike Saturday. They asked more pay, but the demand was refused. They have been advised by the company to go back to work, and unless they do so today they will be discharged.

## COPPERDOM BREVITIES.

Mayor A. J. Scott of Hancock leaves today for New Jersey to join his family, who have been spending the summer in that state.

W. J. Gram, janitor of the Hancock mine, who was so badly burned during the week, died of his injuries Saturday.

The steamer George Stone arrived in portage lake Saturday and reported the drowning of James Gasto, one of the crew. He went overboard in Lake Superior.

A ten-year-old child was struck at Point Mills Friday by a flag pole which fell from the school house, blown down by the wind. The child was seriously injured.

George Jacka of Calumet is subpoenaed to appear at El Paso, Texas, at the October term of the United States circuit court at a witness in a Mexican smuggling case.

The manual training department in the Calumet High school will begin work this morning for the first time in the new school. It did not open at the commencement of the school year, owing to delay in securing material.

The Copper Range railroad company yesterday closed the Erie Park for the season. A big crowd was present in spite of cold weather and the Calumet & Hecla band concert fittingly closed a successful season for the people's playground.

Genevieve Burt, eight years old, was struck by a piece of flying steel on Saturday, while playing near her father's boiler shop. Workmen were blasting a large casting from the scrap heap. A flying piece of the metal knocked her down. She sustained a broken leg and several painful wounds, and it was necessary to take her to St. Joseph's hospital.

Although the Cobalt strike is still unsettled, it is causing the mine managers little inconvenience. The Foster, Temiskaming, McKinley-Darragh and King Edward are working union hours, and paying union wages. The Buffalo, Nipissing, O'Brien, Conings, Cobalt Lake, and Silver Queen report that they have a full complement of men, although they are all definitely opposed to the union. The Silver Leaf and University mines are not working, although shortage of labor is not given as the reason. The fall is the season when prospecting operations are most extensively carried on, but they are now being considerably retarded. The season has set in unusually early and extremely wet, and traveling through the woods is difficult. Work underground will not be resumed in earnest until winter compels the cessation of development work based. At least one-third of the Nipissing force of 300 men is now engaged in prospecting on the property.

"Let us have some Cudaly's Peacock bacon and calves liver for supper Ma'am," says young and old. (11-27-e-o-d)

# Mining News

## COPPER MUDDLE.

The only change that has come over the copper situation is that the producers have made still farther reduction in the price of the metal, and are discussing the curtailment of the output to a large extent. The conditions are anomalous. Only a few months ago consumers could not obtain copper enough above 24 cents a pound, now they can find no use for it at 10 cents.

It is singular that whereas last spring there was a scarcity of copper, now there is a tremendous accumulation of the metal. Nothing comparable to this has been seen in business circles for years. Mines that were being pushed to fill an order a few months ago are curtailing production or shutting down altogether. Companies that were enjoying marked prosperity are reducing dividend payments.

There is no question that the price of copper was too high. While the fault is charged against the producers, it is likely that the consumers were equally responsible, if not more so. They became panic-stricken lest there should not be copper enough to supply their needs which idea was carefully fostered by the producers. Now they are equally panic-stricken lest there will be a great overproduction. The extent of the accumulation is not absolutely known, but there has been scarcely any copper sold since the low price was reached. It is estimated that 200,000,000 pounds of metal. The greater accumulation the less ready are consumers to purchase. They are waiting for the accumulation to be thrown on the market.

The curtailment that is planned is carried out the accumulation heretofore will be small. Granting that consumption has declined greatly, the consumers have practically no copper on hand, and their purchases for immediate needs will be small. The low price has not been maintained for many months. There are other causes which are quite certain. It is very possible that the stock market has had some thing to do with the slump in the metal. The decline in copper stocks, it is thought, has been used to persuade large holders to accept a price which has not been reached. How far this has been carried cannot be said, but there is little question that ownership of some very important properties will be found to have changed.

## RETRENCHMENT AT CANAEA.

Retrenchment is the order in the camp and promises to continue so indefinitely, reports a Cananea correspondent. Both Green-Canea and Phelps-Dodge have closed their prospecting camps in the Manzana and Wolfenden sections in the southern part of the district, where where prospecting has been going on for several months.

Closer in, Green-Canea has shut down several prospect shafts and working forces in the producing mines have been reduced to a minimum. The Phelps-Dodge mines can stand in case of need the dropping of half the present force of operatives. High price copper and the policy early adopted by Colonel Green when the rise began of mining operations, however, on a new ground at the northern part of the district, which where prospecting has been going on for several months.

There has been many a rumor in Butte to the effect that the Pittsburg and Montana had purchased a controlling interest in the Bullwhacker, but interested persons are quoted as denying it. The reason advanced for the desire of the Pittsburg and Montana is that the Bullwhacker is that a drift on the 15-foot ore body recently opened on the 800 of the Pittsburg & Montana runs in ore to the end lines of the property and shows that the vein continues into Bullwhacker. The story is that the Pittsburg and Montana had purchased the Patsy Clark stock in the Bullwhacker company, and appeared to originate from reliable sources, but the denial comes from officials of the Bullwhacker company.

The Copper Queen Mining company, which regularly operates nine blast furnaces at Douglas, has shut off two instead of one of its furnaces, which it usually does at this time of the year, and will run six furnaces during the fall and early winter. This may reduce the production from 25 to 35 per cent. The Copper Queen has been running this summer at the rate of about 9,000,000 pounds of month. The present cut will come from custom ores, including those from both Arizona and Sonora. At Calumet & Hecla all the work of enlargement that has been done for some time will be completed. The Shattuck shaft, which has 400 tons of ore a day to Douglas, and the Denn about 100 tons.

## VIEW OF F. A. HEINZE.

F. Augustus Heinze declares that the price of copper metal has declined about as far as it will go, and that there might be a good deal of business done around 15 cents a pound. "I want to say positively, however, that with copper selling at 14 or 15 cents a pound, there is plenty of money in the business for the producing companies. The reaction which the trade is now witnessing is natural under the circumstances. The fact is that a few months ago the large consuming interests became so terror-stricken by the story that the mines had been closed that they bid up the price, almost one another and purchased immense supplies. Of course, this demand made the producing companies think they had the market in their own hands, and they bid up the price to 25 and 26-cent basis, regardless of what was going on in the money market and the reduced consumptive demand. I do not expect to see any radical improvement in the demand for the metal until the money market becomes sufficiently normal to enable a resumption of the work that had to be abandoned by so many constructive enterprises. The banks that have had to make advances on the bills of lading, based on shipments of copper by the producing companies through the selling agencies, have been forced to restrict fresh advances until the old loans were taken up. For this reason there has been a good deal of copper pressing on the market, which I think can now be handled around 15 cents or within one cent of that basis.

## NOTES OF COPPER NEWS.

A director of several copper companies facetiously remarks that it might be a good idea for some of the dividend paying companies to declare the dividend in copper, delivering to stockholders six pounds of copper in lieu of each \$1 cash dividend.

Eventually, Victoria will produce considerably more copper. The mill is now in readiness to treat more rock and upon the installation of the electric tramming system will be largely operated in the future. The property is being systematically developed by the means of prospecting shafts which will give a fair conception of the value of the different lodes which traverse the property among which is doubtless the Baltic.

Information from Cole-Ryan sources states that, in addition to 50 per cent reduction in the output of the North Butte property, a 60 per cent restriction will be instituted at the Green-Canea mines, although, before this order is put into effect, a conference must first be had with the officials of the Mexican government. Although it has been decided to curtail the output of the North Butte and Calumet & Arizona 50 per cent and that of Green-Canea 60 per cent, decision has been reached to make no curtailment in case of Superior & Pittsburg.

There seems to be nothing new to encourage Adventure stockholders, says the Foster Financial News. Even the assessment has not yet been called. Adventure, along with Mass and Lake, is out for the Baltic lode but there is nothing doing yet. Adventure is pushing in to the ledge with the drill. After it had been struck, shots were made and no progress was made to set it was necessary to fill the cavity with cement. This necessitated a delay with the drilling, which was resumed some days ago.

Favorable developments are taking place in the explorations now being prosecuted on the lands of the St. Mary's Mineral Land company. Recently a crosscut of the lode encountered in the King Philip has been completed, and was found to be twenty-eight feet wide. Since then the developments continue of the same favorable nature. At the Challenge property, located three miles south of the Globe, two copper-bearing veins of the Foster property, 62,950 pounds; Silver Queen, 12,000; Buffalo, 60,000; La Rose, 438,000.

J. M. Elmer, manager of the Cobalt Central properties, reports the uncovering of several new large bodies of ores containing free silver in the Big Peacock. This confirms the views of many mining engineers that Cobalt values go to great depths.

Eminent engineers from England, France and America have recently made searching examinations of the Cobalt Lake gold fields, and without exception have endorsed previous reports of the district being the "mining world of the world."

The Cobalt Lake Mining company will ship no more ore until after the directors' meeting in October, and in the meantime enquiries will be made as to more satisfactory smelter treatment. The company has about fifty-seven tons of ore sacked.

The Drummold mine has two veins upon which mining is undertaken. The east or Wright vein has been sunk upon 150 feet, and 150 feet of drifting has been done at fifty feet and 200 feet at the 100-level. The west or main vein has a considerable open-cut work. This vein body averages five inches in width. One carload of ore ran over 6,000 ounces, but the average is not as high as that for many of the shippers.

The Colonial Mining company's veins are generally erratic and hard to follow. With eight to eleven machine drills employed and an average of seventy-five men the company has accomplished considerable underground work, including an adit of 350 feet into the hillside. The main shaft runs to 100 feet or 200 feet below hilltop. The equipment, including compressor and three boilers, cost \$45,000.

The King Edward Silver Mines company is closely controlled from the United States. Little is heard of its work, but the property is without doubt being actively worked on open mining principles and with promising results. The veins run parallel to the Cross lake, on whose west shore the company's plant and buildings lie. These veins have been cut by two tunnels 1,000 feet apart. The King Edward is unlikely to take rank among the richer shippers, though some persistent shoots of good value will probably be proved.

The Silver Bar mine, which has been lately in the control of Ottawa men, has passed into the hands of J. P. Killoran of Duluth, Minnesota, and E. P. Stone and associates of Saginaw, Mich. The reorganization of the company took place in Ottawa when E. P. Stone was elected president and managing director, Charles McRae of Sudbury is secretary-treasurer. The head office will be removed from Ottawa to Sudbury. A new mining engineer has been appointed to thoroughly overhaul the machinery and have operations commenced as soon as possible.

The Temiskaming & Hudson Bay formerly held the Silver Queen. Its habitat of chief value today lies to the north of the Tretaway, where there exists one of those highly metallic outcrops which are also very useful for Cobalt show purposes. A shaft has been sunk upon this vein for seventy feet and from it two carloads of ore were obtained of twenty-eight tons (824,000) and twenty three tons, respectively. Drifting will be commenced at seventy feet. There is a 14-drill air compressor installed. A diamond drill is employed for prospecting.

# COBALT GOSSIP

Arrangements are being made to develop aluminum prospects in and about North Cobalt.

About fifty men are now at work at the Tretaway, operating a full day shift. Night work will be started shortly.

Cobalt shipments for the week ended Sept. 14 included the following: Foster property, 62,950 pounds; Silver Queen, 12,000; Buffalo, 60,000; La Rose, 438,000.

J. M. Elmer, manager of the Cobalt Central properties, reports the uncovering of several new large bodies of ores containing free silver in the Big Peacock. This confirms the views of many mining engineers that Cobalt values go to great depths.

The Temiskaming & Hudson Bay formerly held the Silver Queen. Its habitat of chief value today lies to the north of the Tretaway, where there exists one of those highly metallic outcrops which are also very useful for Cobalt show purposes. A shaft has been sunk upon this vein for seventy feet and from it two carloads of ore were obtained of twenty-eight tons (824,000) and twenty three tons, respectively. Drifting will be commenced at seventy feet. There is a 14-drill air compressor installed. A diamond drill is employed for prospecting.

At the Foster the principal veins, meeting at right angles, are known as Nos. 5 and 6, the former supplying most of the ore. In this vein occurs a remarkably rich shoot, averaging over a foot in thickness and which is fifty feet long. Of its persistence no positive statement can be made. Shipments from the property during the first half of the year totaled about \$100,000. Unfortunately it has been found necessary, or apparently so, to force shipments without regard to the requirements of the property by way of advanced development. On No. 5 a shaft has been sunk to 100 feet and 250 feet of drifting done at fifty feet. An arrangement is being pushed down to hasten production. Beyond the shoot of rich silver ore, in which argentic sulfide containing copper is reported to occur in the bottom workings, the vein is represented by small ore with very little silver.

The Cleveland-Cobalt has now in full operation one of the most up-to-date and complete plants in the camp. It consists of a steam heating plant, gas producer, power plant, three 3-drill compressors, three hoists, pumps and a dynamo for electric lighting, and it has just recently been installed. The plant is being pushed down to hasten production. Beyond the shoot of rich silver ore, in which argentic sulfide containing copper is reported to occur in the bottom workings, the vein is represented by small ore with very little silver.

# S.S.S. HEALS

## S.S.S. OLD SORES

An old sore or ulcer is only a symptom, an outlet for the impurities and poisons which are in the blood, and as long as this vital fluid remains in this impure, contaminated state the place will never heal. The application of salves, washes, powders, etc., may cause the spot to scab over, but a fresh outpouring of diseased matter from the blood starts afresh, and thus it goes on, gradually growing worse and slowly affecting the entire health of the sufferer. There are many ways in which the blood becomes contaminated and poisoned. A long spell of sickness breeds disease germs in the system, the failure of the eliminative members to remove the refuse and waste matter of the body, the excessive use of mineral medicines in certain diseases, all infect the blood with morbid matter and germs which sooner or later is manifested by a sore that refuses to heal. Persons with inherited blood taint are very apt to be afflicted with sores and ulcers. The taint may be dormant during young, vigorous life, but when middle age is reached or passed and the natural energies begin to grow weaker, the tissues in some weak point break down and a chronic sore is formed and kept open by the constant drainage of impure matter from the blood. If the cause is not removed the sore will continue to grow worse by eating deeper into the flesh, festering, discharging, and slowly undermining the constitution. S. S. S. heals old sores by going down to the very bottom of the trouble, driving out the impurities and building up the entire circulation. When S. S. S. has removed the cause the blood becomes rich and healthy, the sore begins to heal, new flesh is formed, and soon the place is cured. Do not depend on external applications, which do not reach the blood, but begin the use of S. S. S. and remove the cause, and then the sore must heal. **City Brevities**

Herman Bellmore left Saturday for Powers.

William P. Healy, of Chicago, is in the city.

William Artz is visiting friends in Detroit.

H. C. Pease left recently for Battle Creek, Mich.

Joseph Reay has gone to Detroit. He left Saturday.

J. N. Williams returned from Cleveland yesterday.

John Farney left Saturday for a visit to eastern points.

J. C. Wilson of Ypsilanti visited friends in the city Saturday.

W. P. Belden of Ishpeming was in the city Friday and Saturday.

Mrs. W. S. Hill entertained at her home Saturday afternoon.

Mrs. S. E. Byrne entertained Saturday afternoon at her home.

Mr. and Mrs. F. J. Keough left Saturday for Detroit and eastern points.

Rev. H. R. McCabe and Miss N. McCabe left Saturday for a visit in Detroit.

M. G. Rossman of Minneapolis is visiting friends in the city. He is to go to the Soo tomorrow.

Mrs. Anton Conrad, of Milwaukee, is visiting her sister, Mrs. T. L. Wolf, of Prospect street.

Mr. and Mrs. E. Swisher left Saturday for an eastern tour. They will be away two weeks.

Mr. and Mrs. Andrew Forbes are visiting in Detroit. They will be away two weeks.

Allen E. Philbrick, of Chicago, is visiting at the home of Mr. and Mrs. E. B. Palmer, of East Ridge street.

The Misses McLaughlin and McGuire were among the excursionists to Toledo, Buffalo and Detroit Saturday.

H. C. Russell of Munising left here Saturday, aboard the steamer Centurion for the round trip to Cleveland.

Miss Agnes Keough, of Hancock, is visiting her grandparents, Mr. and Mrs. William Smith, of 145 West Ridge street.

Miss Flora Retaille left Saturday for Detroit, where she is to begin her second year in the Detroit Conservatory of Music.

Miss Mary McCarthy will return home this afternoon from Chippewa county, where she has spent the past ten days with friends.

S. McFarlane, of N. M. Kaufman's club house near Oota, recently captured one of the largest wolves seen in that part of the state.

Mr. and Mrs. J. E. Kraft and son, Fred, left Saturday morning for Detroit and Ann Arbor, where Fred will enter the Michigan University.

Sam Kopp, manager of the Grand theater, left yesterday for Chicago to make arrangements for the Passion play which is soon to be presented at the theater.

Charles Retaille, superintendent of the city's electrical department, left last night for Chicago. The trip is in connection with business of the department.

Mr. and Mrs. D. R. Haring are in Escanaba for a visit with Mr. Haring's parents and other relatives. Mr. Haring is train dispatcher for the South Shore railroad.

J. W. Barber, secretary of the corporation which proposes building a trolley line between Marquette, Negaunee and Ishpeming, left Saturday for Cleveland. Mrs. Barber accompanied him.

Miss Gem Sherman left last night for Eveleth, Minn., where she has accepted a position in the schools. The superintendent at Eveleth is Bert Greening, formerly a teacher in the Negaunee High school.

Suffers an Attack—Dr. C. H. Morse, of 127 East Ridge street, suffered a light attack of paralysis Saturday and will be confined to his home for several days.

Cement and Tar Paper—The freighter, Lackawanna, now in port, brought five carloads of cement consigned to F. B. Spear & Sons and 600 bundles of tar paper consigned to M. R. Manhard & Co.

Manhei-Hove Wedding—Miss Nettie Manhei, daughter of A. Manhei of North Third street and Dr. L. W. Howe of Pellston, Mich., are to be married at 6 o'clock this evening at Miss Manhei's home.

Send in Your Bills—All claims against the county poor fund in the first district should be in the hands of Secretary Blanchard on or before Sept. 27th to insure their payment at the annual meeting Oct. 4 next.

North Ends Won—The North Ends defeated a picked team in a football game played at the old fair grounds yesterday afternoon, by the score of 6 to 5. The sole touchdown of the game was made by Charles Ekstrom, the left tackle.

Low Rates to Fair—For the Alger county fair which opens at Munising next Wednesday and continues through the week, the L. S. & I. Munising railway and Marquette & Southeastern railway companies have announced a round trip fare from Marquette of \$1. The round trip fare from Negaunee and Ishpeming is \$1.25.

Portage Leaves—The ore boat Portage, which was partially destroyed by fire at the L. S. & I. dock, left Saturday towed by the Frontenac. Inspectors York and Gooding examined the pumps of the damaged vessel before she left. A new davy on the port side amidships was placed aboard. The estimated loss from the fire is \$10,000.

Prison Team Defeated—The Mining Journal baseball nine and the prison team played Saturday in the prison yard and the prison team was defeated by a score of 14 to 11. This is the second

game of the season between the two teams. On Labor Day the prison team won by a score of 17 to 2. Dessottell and Richardson were the battery for The Mining Journal team.

Bill at Bijou—Ben W. Dawson, the black face comedian, heads the bill at the Bijou this week. "Colleen Bawn" is the illustrated song to be given by the tenor, J. J. Ryan. A number of songs are to be given also by Pearl Evelyn and by Russell & Mack, high class vocalists in standard operatic selections. Among the pictures to be shown by the kinetoscope this week are "The Gentleman Farmer," and "Salmon Fishing, Rogie Falls, Scotland."

Lecture Series—Colonel French, the noted traveler and educator, Saturday night delivered the last of the series of lectures which he gave at the high school. The subject he presented Saturday night was "India." The lectures have been found highly instructive and the illustrations used in connection with them added greatly to the interest. After touring the upper peninsula, Colonel French purposes going to Cleveland, where he will speak in the schools.

**KIMBERLEY-WILFLEY CO.**

The following letter is self-explanatory, and will be found of much interest to the stockholders of the Kimberley-Wilfley Co.:  
Kokomo, Colo., Sept. 16, 1907.  
Mr. D. J. Caven,  
Kimberley-Wilfley Mines Co.,  
Marquette, Wis.

Dear Sir:

At the request of Mr. F. W. Gregory, who is very busy getting out his statements, I will try and give you an outline of how the work is progressing here. The air pipe line and track for the mine, for which we have waited so long, have at last arrived and will, as soon as possible to do so by rushing, be put in the mine. This work will not take very long to complete and will count a long way toward the starting of the mill, as we will use air altogether in the work of breaking the ore.

The new compressor is practically ready to start as soon as we get some concrete around the boilers. This will be finished tomorrow, but it must have time to set. When the compressor goes in action there will be quite a change around here—a great saving in power, for instance. The compressor and boilers at the Wilfley will be cut out, and the power furnished by running a steam pipe over to it from the Kimberley. I do not mean that we will cut down the expense of the power, but we will get a great deal more power at the same cost, enabling us to do considerable more work underground. We have been lammered to quite an extent, as the old Wilfley plant was too small for the work we want to do. Almost all the Wilfley tables in the new mill are in place, both on the upper and lower floors. Considerable of the piping in connection with them is finished. The concrete floor on the first floor should be finished this week.

The masons will have the furnace finished this week, and there will only be the connecting of the water jackets and the elevators to complete this part of the work. The ore bin for the furnace is about completed, in fact the furnace building right now is beginning to see the finishing touches put on.

The Central Colorado Light & Power company has worried about the contract for power and light. After carefully going into it he finally made the contract. Do you think a company doing business on a business basis would go after a contract the size of this one and run a line 19 miles over the mountains in order to furnish us with power unless they saw a good thing in it? They are rushing the line, doing good work, all steel towers, no cheap construction. This is a pretty good endorsement of us, too, as they looked into us pretty well, so must feel confident that this is a large and permanent proposition with possible expansions, or they would never go to the expense they are at.

The Wilfley mill is pounding right along, night and day, and is turning out a lot of concentrates, more than the railroads can handle just now. We are tied up for want of cars. The bins are running over, but will be relieved a little today, as they have just set in a couple of cars. The railroads have not fully recovered from the effect of the strike, so it affects us in the matter of cars.

Both the smelters want our product. They are fighting over us, but that does not hurt us; does us good in fact.

I do not think of anything else to write about, so will close assuring you that everything possible is being done to rush the work here, in order that it will be completed in a very short time.

Yours very truly,  
(Signed) W. J. KEOUGH

**SOO-CANAL PASSAGES.**

Boats Locked Through, Bound for Ports on Lake Superior.

**ISHPEMING WRESTLER WINS THE MATCH**

**WILLIAM PENBERTHY OF THIS CITY GIVES MIKE DOOLEY THREE FALLS—HE WINS OUT IN FOURTEEN HITCHES, DOOLEY SECURING FIRST FALL.**

er nor is he any quicker, though he has the reputation of being one of the quickest of the Cornish wrestlers in this district. Penberthy, although wrestling only two or three years, would have been a worthy opponent for the best of the lightweights, and there are many here who would like to see him in a match with Davey of Calumet or Shea of Crystal Falls. Dooley said Saturday that he is suffering from a broken leg, so he will not be able to wrestle any more this year.

**TO EXPLORE OLD TUNNEL.**

Operations May be Resumed at Washington Property at Humboldt.

The Breitung interests are preparing to clean out and explore the Washington mine tunnel at Humboldt, from which a considerable tonnage of ore was produced over a quarter of a century ago. The tunnel was the principal working of the Washington mine.

According to some of the men who worked there the Breitung will find ore of good quality in the tunnel and from all reports a sufficient quantity of it will be disclosed to warrant a resumption of mining. It will be considerable of a task to clean out the tunnel, as the greater part of the timber has rotted and portions of the walls have fallen in. If the showing of mineral is as good as the Breitung people expect, a diamond drill will be put in operation at the mine with a view to determining the extent of the deposit. The Washington is a short distance southeast of the South Shore depot and only a few hundred feet from the main line. The tunnel was opened on a level with the surface and extends into the hill in a southerly direction.

About twenty-five men are now employed at the Humboldt mine, which the Breitung interests are putting in condition for a resumption of operations. A boiler house, also an enginehouse, each about forty by twenty-five feet in size, are being erected, and a boiler is being installed. Two pumps are on the ground and will be ready for commission as soon as the boiler is fired. From present indications it will be possible to begin pumping out the workings not later than two or three weeks hence. It is not anticipated that it will take very long to pump out the mine, and inasmuch as it is a hard ore formation it is expected that operations can be resumed as soon as the water is removed and the shaft is repaired. The company expects to be mining before the first of the year.

There is a quantity of ore on hand, a part of which will probably be shipped this fall. A railway spur has been extended to the mine and the greater part of the material and equipment thus far received have been brought in over the track. Shipments can be started on short notice, as the track is within a short distance of the mine.

A coal trestle is being erected and will be completed within a few weeks. It will have a capacity of 1,500 tons. This quantity of coal will not be needed at the mine this winter, but the trestle will be filled before he close of navigation.

**ALFRED WILLS' FUNERAL.**

The funeral of the late Alfred Wills, who met an untimely death in the Rolling Mill mine last Friday, along with eight of his companions, will be held this afternoon under auspices of Sir Humphrey Davey lodge of the Sons of St. George. The cortege will leave the family home in Negaunee at 1 o'clock, and services will be held at the First M. E. church here an hour later. Rev. C. L. Adams will officiate. Mr. Wills was a former resident of Ishpeeming. His wife and two sons, Alfred and John, survive him.

**DEATH OF MRS. KOOB.**

A message from Virginia, Minn., last evening brought the sad news of the death at that place yesterday afternoon of Mrs. Robert Koob. The deceased was formerly Miss Mary Kallink. She was born and reared in Ishpeeming. Her husband was a former Negaunee young man, and that was the city of her grandfather, father, and Mrs. Wm. McGinty, also of Ishpeeming, was her aunt. The funeral will take place here. The remains will arrive on tomorrow's early train.

**WILL CONDUCT CAMP AGAIN.**

The Oliver Iron Mining company will soon send a crew to the woods, west of Michigan, where operations were conducted last winter. It has not yet been decided who will be placed in charge of the work the coming winter, but an experienced man will be given the job. A crew of between sixty and seventy men was employed last year, and it is expected that as many will be on the job this winter. The company has comfortable camps in the district and good roads were put in, so that there will be no delay in starting after the men are engaged. The company has sufficient timber there to keep a crew busy for two or three winters.

**FAIR LARGELY ATTENDED.**

The fair being conducted by the ladies of St. Joseph's church, which opened Saturday evening at the Woodmen's hall, promises to be a big financial success. The hall was crowded from early until late, and the merry throng had a most pleasant evening. There was music by Trombly's orchestra and amusements of various kinds. The ladies served supper early in the evening and refreshments were to be had later. This evening the supper will be served by the ladies of the Second ward, and tomorrow evening the Junction ladies will serve a chicken pie supper.

**HOW'S THIS!**

We offer One Hundred Dollars Reward for Hall's Catarrh Cure. We, the undersigned, have known P. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligations made by him.

Hall's Catarrh Cure is taken internally, setting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75 cents per bottle. Sold by The Standard Drug Co.

**FROM HOPKINS' CURB LETTER.**

"Coppers opened this morning with a display of strength that has not been witnessed for some time. As the session advanced the market increased in strength and there was good buying throughout the balance of the day. North Butte was the feature, advancing nearly 4 points, up to 52, and seven points from the low. This stock has been the weakest spot in the market, during the recent decline. Today, however, indicates that the heavy liquidation in this issue has been completed. The shorts have been on the anxious seat for a turn and indications point to a still further advance, especially if the heavy short interests are forced to cover."

Saturday's prevailing prices were:

**ISHPEMING IN BRIEF.**

A. C. Braastad has returned from a two weeks' trip through the Dakotas.

Miss Hilda Skoglund, daughter of Emanuel Skoglund, has taken a position with a Lake Linden milliner.

Andrew Fandrem and wife have returned from their old home in Norway, where they spent a few months.

The water service was suspended for several hours yesterday when a valve was being placed in the main at the intersection of Division and Pine streets.

The heavy frost Saturday night killed off most of the blue berries. They were reported fairly good north of here last week and some Ishpeeming people visited the district.

The first of the series of hops to be given by the degree team of the Fraternal Order of Eagles will take place Friday evening, instead of Saturday, as previously announced.

Mrs. C. C. Mitchell and her son Chauncey will leave tomorrow for St. Louis, Mo., where they will spend a short time visiting Mr. Mitchell's folks. From there they will go to Pittsburg, Kan., to visit relatives.

The last summer excursions to be conducted jointly by the South Shore and D. & C. lines was well attended by upper peninsula people. The South Shore train passing through here Saturday morning contained ten coaches, including three sleepers.

The Mining Journal was in great demand in both Ishpeeming and Negaunee Saturday, due to the report of the Rolling Mill mine disaster. Several hundred extra copies were sold and many more could have been disposed of.

The fire department was called out Saturday evening about 6 o'clock to extinguish a blaze in the shed back of the house occupied by J. M. Forsvick. The fire was started by boys with matches and paper. No damage resulted.

The L. R. club will give the next of its series of hops at Braastad's hall a week from next Saturday evening, Oct. 5. The organization is composed of a popular young men of the city, who spare neither labor or expense to enter into their guests pleasantly.

John Locher and daughter, Miss Harriet, are here from Ducktown, Pa., on a visit to his parents, Mr. and Mrs. Jacob Locher of the Lake Angeline location. John and his family left Ishpeeming in 1890. He holds a responsible position at one of the mines at Ducktown.

Mrs. C. Kennedy arrived home Saturday from Green Bay, where she had been confined by the Sisters' hospital, having submitted to a surgical operation shortly after arriving there. She was accompanied by her daughter, Miss Louise. Mrs. Kennedy is feeling much improved in health as a result of the operation.

Ed. Peterson left Friday evening for Rockford, Ill., after spending three weeks with his parents, Mr. and Mrs. Gust Peterson. Since leaving here three days ago Mr. Peterson has received a diploma as an architect from the Scran

**THE GIRL WITH EVERYTHING.**

Isabel Irving Will Be Seen Here in Clyde Fitch's Latest Comedy.

One of the best of the Liebler & Co. attractions, Miss Isabel Irving in the Clyde Fitch play, "The Girl Who Has Everything," will be the attraction at the Ishpeeming theater Thursday evening. A Liebler attraction, a Fitch play, and a favorite star is a strong combination with which to pry open the early theatrical season. The play is best described as a comedy drama. The scene is New York—the time, the present; and among the characters are two children whom Mr. Fitch uses, especially in their relations to their mother, with much the same shrewdness that he showed with the youngsters in "Her Only Way." They are motherless and Sylvia, their aunt, mothers them. Their father, worthless and scrupulous, has devised a scheme to trick even his own children out of the fortune that their mother has left them. Sylvia seeks to frustrate him. He retaliates by still another trick, that places the young lawyer for whom she cares in the light of a sordid fortune-hunter. The dialogue is in the style for which Clyde Fitch is noted, bright, snappy and epigrammatic. The situations are cleverly drawn, and the action is rapid.

**GUARDING MEXICAN BORDER.**

Precaution Taken to Checkmate Any Attempt at Japanese Invasion.

San Antonio, Tex., Sept. 22.—United States troops are guarding the Mexican border to keep out the Japanese invasion. One troop of the First Cavalry is stationed at Del Rio and one troop is stationed at Eagle Pass. These troops are supposed to be out on a surveying expedition, but the impression here is that they are on the border for nothing else than to watch the movement of the Japs who are trying to cross the Rio Grande from Mexico into Texas.

It is a well-known fact that there is a large number of Japs in Mexico, who entered that country as miners, but are believed to be an organized force of soldiers, and are moving on to the United States. The passing of a number of Japs through San Antonio several months ago aroused suspicion at the time that this was a quiet movement to invade the United States, and the guarding of the Mexican border at present is regarded as the result of the suspected move toward invasion.

The First Cavalry is distributed among the posts of San Antonio, Texas, and a squadron of which consists of four troops, being stationed at Fort Sam Houston; two squadrons, with headquarters and band, being stationed at Fort Clark; one troop at Del Rio, supposedly on a surveying expedition, and one troop at Eagle Pass.

**Women as Well as Men Are Made Miserable by Kidney and Bladder Trouble.**

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds or if, when the child reaches an age when it should be able to control the bladder, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women, as well as men are made miserable with kidney and bladder trouble and both need the same great remedy. The mild and the immediate effect of Swamp-Root is soon realized. It is sold in 50-cent and one-dollar packages. You may have a sample bottle by mail free, also a Home of Swamp-Root pamphlet telling all about Swamp-Root including many of the thousands of testimonials letters received from sufferers. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper. Don't make any mistake, but remember the name, Swamp-Root. Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

### SUSPENDED MEMBERS MAKE A STATEMENT

IF NEED OF IMMEDIATE ACTION ARISES, THEY WILL ACT UNHESITATINGLY, THEY SAY.

### IMPORTANT MEETING TONIGHT

"Is There Any Question With Whom the Responsibility Rests for the Creosote Trouble?" Is Asked.

Recently one of the four water board members named in the acting mayor's suspension announcement was asked by The Mining Journal what he intended to do and he said, "I did not seek a place on the water board and I did not want the appointment, but as I have been made a member, I intend to do my part of the work as earnestly and thoroughly as I can whatever happens."

As stated in the published proceedings of the common council a few days ago, four members of the board of fire and water commissioners have, by Acting Mayor Asie, been suspended, during which suspension and pending further action, it is supposed no meetings of the board will be held or business transacted, but should anything happen in the operations of the city's water works requiring necessary and immediate action by the board, such action as may be necessary to protect the city from loss or damage will unhesitatingly be taken.

There is a persistent and proper demand from the water consumer for better water, most of the objections offered being caused by creosote in the water, and if we are to judge by the expressed opinions seen in The Mining Journal from time to time, as also by the reasons stated by the acting mayor for the suspension of four members of the water board, the fault lies entirely with the board of fire and water commissioners.

That the public may intelligently judge with whom the responsibility rests, we quote from a letter received from Mr. W. C. Mather, president of the Pioneer Iron Company, in reply to our request for an interview on the subject of placing the furnace discharge by pipe or by sewer and sewer connection, either into the harbor, or into the bay west of Presque Isle, or some other less objectionable point than where now discharged. He says:

"I would be quite willing to meet with you and talk the matter over at any time that would suit our mutual convenience. In the meantime, however, it seems appropriate to call your attention to the fact that in February, 1905, we made a definite proposition to the city, which was accepted on February 20 at a council meeting. This proposition was:

First: To lay a pipe to connect our plant with the city sewer.

Second: Donate to the city of Marquette for the purpose of extending its intake, \$5,000.00; and

Third: We signified our willingness to try the filter experiment and to operate the same, the cost of installation and operation to be jointly borne by the city and by ourselves, and that, if this filter was mutually deemed to have failed in its purpose, same was to be abandoned and we would be permitted to deduct our expenses on account of same from the proposed donation to the city.

"I judge that the filter has not been satisfactory, but nothing has been paid to us thus far by the city in accordance with the terms of the proposition which it accepted.

"As stated above, however, I shall be glad to talk with you on this subject if you desire whenever mutually convenient; but does not it seem to you that the position of our company was already defined and recognized by the city when it accepted the proposition in February, 1905?"

Is there any question as to with whom the responsibility rests for the creosote trouble?

The one other reason stated in our notice of suspension call may be mentioned is, "Failure and neglect to provide funds by means of the sale of bonds, after the same were directed by the vote of the citizens of this city, to provide for domestic use in said city, palatable water and water free from foreign substances."

As we recall it the vote was taken at the request of the board, to authorize them to issue bonds for the purpose of extending the intake pipe, if they deemed it advisable. At that time the board were not sufficiently informed as to the conditions existing at points beyond the present intake to say anything positive, but were inclined to think it would be best. Our reasons for not doing so were fully explained in our former letter, and from our present knowledge, our failure to do what common sense indicated would prove a failure, without first having the furnace discharge elsewhere, has not resulted in harm to the city so far as we are informed.

The agitation for the removal of the board appears to come from but a few individuals. That they are active and persistent is not questioned. Their reasons for desiring the removal of the present board as it appears to us, was outlined in our letter of August 19th, and it is not necessary to repeat them.

The only change noticeable in the situation being that the removal was first asked for because of our refusal to give North Marquette water. Now it is because we do not at all times furnish palatable water, being aware that the council is permitting the water to become unpalatable by reason of a working agreement with the Pioneer Iron Company.

Very truly,  
THE SUSPENDED MEMBERS OF THE WATER BOARD.  
Meeting Tonight.  
For the past two weeks an adjournment of an important meeting of the board has appeared in The Mining Journal, and this meeting, at which the North

Marquette question is to be discussed, is to be held tonight.

The meeting is to be for the purpose of hearing objections to improvements in North Marquette which the board plans to make.

The plans are for a water supply as far north as Center street. North Marquette wants the water, but does not want to pay the assessment imposed by the board. They assert that other parts of the city have been supplied with water without assessments—being made against the property benefited and they say that they do not want to pay for the extension of mains particularly as for some years they have been paying a water tax and have not been receiving a water supply.

The water board contends that it is acting under a resolution passed by a former board which provides that, for improvements of the kind now proposed, the property benefited shall be assessed. The estimated cost of the proposed improvement is \$8,617.18 and the amount of the assessment that north side residents are asked to pay is \$2,105.

### OCTOBER DOCKET OF THE SUPREME COURT

AFTER LARGE NUMBER OF CASES WERE DISPOSED OF, ADJOURNMENT WAS TAKEN LAST NIGHT.

The Mining Journal has received from Mr. Hopkins, clerk of the Supreme Court, a list of the cases on the October docket from the upper peninsula. They are as follows:

- 13—Peter White vs. George W. Shaw, et al.
- 24—Fred Erickson vs. Nante Lampi.
- 26—Ansel F. Temple vs. William P. Preston.
- 27—Kate Schwartz vs. Mineral Range Railroad company.
- 65—Brunswick-Balke Collender Co. vs. Northern Assurance Co.
- 66—Alfred Youngren vs. J. Stephen Lumber Co.
- 67—Augustus W. Wolfe vs. John K. Stack.
- 68—Charles Maloney & Co. vs. Charles H. Norton, et al.
- 69—Abe Stein Company vs. James C. Wood.
- 70—Joseph LaPlant, et al. vs. Solon Lester.
- 71—John K. Stack vs. Detour Lumber & Cedar Company.

A number of cases disposed of the latter part of last week in the supreme court are as follows:

- Affirmed: Bangs vs. Williamson; Mudge vs. Supreme Court; L. O. F. White vs. Onasoo Sugar Company; Lomber vs. State Savings Bank; Gillette vs. Maser; Taylor vs. Scott & Co.; Starkweather vs. Chatfield; North Michigan Live Stock Company vs. Kneeland; Roberts vs. First National Bank of Yale; Ransier vs. Dwyer; Muskegon vs. Hanes; Moffat vs. Salasain; Delray Land Co. vs. Township of Springwells.

Modified and affirmed: Cala Colony Co. vs. Kirby; Cusick vs. Spencer.

Reversed: Holmes vs. Lord; Merrill vs. Leisenring; Hilliker vs. Farr; Meagher vs. Coving; Clark vs. Grand Trunk Western Ry.; Webster vs. Ypsilanti Canning Company; Hull vs. Hull; Preston vs. Newcomb; Brown vs. Evans; People vs. Brock; Keeley Institute Co. vs. Shaw.

Writs of Certiorari were granted in Barr vs. Supervisors of Ottawa; Davidson vs. Hines; Hicks vs. Village of Perry; Cranger vs. French; in the matter of Jennie Smith; Ruffel vs. Ruffel; and Quay in Blakelee vs. Covert and in Quay vs. Crowley.

Orders to show cause were granted in Michigan Corn Association vs. Auditor General; in Hudson vs. Attorney General; in Page vs. Ionia Circuit Judge; in Small vs. Cheboygan Circuit Judge; and in Macomber vs. Berrien Circuit Judge; in McMeekin vs. Saginaw Probate Judge; in Robertson vs. Hosmer, Judge; and in McQuinn vs. Bohner, Judge.

W. W. Macpherson and Richard M. Sprague were admitted to the bar. Court has adjourned until October 4th.

HIS INTENTION WAS GOOD.  
Judge Cray is Not Impressed by Prisoner's Plea and Fines Him.

Domestico Ricco admitted Saturday afternoon in the court of Justice of the Peace Cray that he had taken money, clothing and belongings from Harry Rock in a Dead river boarding house, but he declared that when he took the things and went to Newberry, it was his intention to bring them back. Judge Cray fined him \$50, and lacking the money, he has begun a sentence of ninety days in the county jail.

In the warrant upon which he was arrested, it is stated that the theft took place Friday afternoon. The articles seized were a suit of clothes valued at \$18; a watch chain valued at \$1.25; \$3.50 in cash and a collar and a necktie. Complaint was made immediately after the man and the property were missed. By telegraph it was learned that the fugitive was on the train to Newberry and when Ricco stepped off the train at that point, he was intercepted by a policeman. Marshal Manning brought him to Marquette Saturday.

FORTUNE SMILES ON THEM.  
We have received personal and unquestionable information from the crew that "The Irish Pawnbrokers" is making the strongest kind of a hit and have been doing an enormous business. Since the day it was started the management have been digging out and adding to it without fear or favor, until now it stands without an equal in its line.

Father says: "Say, Mother, can't you make us some more of those fine doughnuts if I will bring home a pair of Cudahy's Peacock Lard again?"

POLARIS MINERAL WATER delivered to any part of the city in sterilized one-gallon bottles. Telephone, Bell, No. 217. Polaris Water Co., Marquette.

### WORRELL CAPTURED BY SHERIFF'S RUSE

CORRESPONDENT TELLS INTERESTING INCIDENT OF THE ARREST OF HOGAN'S SLAYER.

The murder of Wallace Hogan by Charles Worrell, now a prisoner at the county jail, aroused interest over the entire upper peninsula and in Wisconsin, and it is due to this widespread interest and to the efforts made by Marquette authorities that the man was captured. Concerning the capture, an Ashland, Wis., correspondent gives the following interesting report:

"Worrell escaped into the woods, and walked from Marquette every step of the way, avoiding inhabited places, and arrived at Port Huron Monday, Sept. 16, slept in the shingles mill and left there the following morning. He said he did not know where he was going, but was in constant fear of the officers.

Mr. Charters, janitor of the high school, was out to his farm and telephoned Sheriff LaFlamby that a man bearing the description given by the Marquette chief of police at Ashland Sunday, passed his place. Mr. LaFlamby drove down the Ellis avenue road, crossed the Central track and overtook the man, who disappeared in the bushes as he neared him.

The sheriff drove on to a deserted house where there was a pile of lumber, and began industriously to pile the lumber, to give the impression that he had driven out to do that work.

"Worrell watched him from his concealment and was completely fooled. He emerged from his hiding place, and attempted to pass the house. LaFlamby stepped out into the road, and Worrell ran into a clump of bushes. The sheriff pursued him and caught him there. At first Worrell denied his identity, but as they neared Ashland he suddenly burst out: "For God's sake, tell me if the man is dead," followed by a complete confession.

"Sheriff LaFlamby received the reward of \$100 offered for the arrest of the fugitive by the Marquette county board of supervisors."

### TO BUILD BRICK PLANT.

Marquette Men Interested in Establishing Industry at West Duluth.

Eugene Lewis and Emil Menzer of Marquette are associated with J. A. Kennedy of Port Huron, a representative of the Cement Brick company of Port Huron, in the project of building a brick plant at West Duluth. Recently the three men were in West Duluth and they spoke of their plans before the West Duluth Commercial club.

The Cement Brick company, represented by Mr. Kennedy, manufactures what is known as the McIntosh Automatic press, with which the cement brick is manufactured. The brick is made of Lake Superior sand and cement. Five parts of sand to one part of cement. It is manufactured in gray and red, and excellence of appearance is added to durability to make it a desirable building material.

The manufacture of brick from sand and cement by the pressing process, is quite common of recent years, but the industry has not yet established itself. The people interested in the proposed plant count on getting in early, and being firmly established before the field is invaded. They say that once the manufacture of the brick is begun, and its worth demonstrated to prospective builders, there will be no fear of the industry failing to make a complete success.

The West Duluth business men, including several contractors, who examined the samples and heard an explanation of the properties of the brick and the process by which it is made, were very favorably impressed.

TAXES HIGH THIS YEAR.  
Generous Appropriations Boost Rate from \$1.95 to \$2.81.

Taxes in Michigan next December will be higher than ever before, on account of the generous appropriations of the last legislature.

Auditor General Bradley Saturday forwarded the annual apportionment of state taxes to the officers of the several counties of the state. The total levy for the state is \$4,844,832.67. The tax rate is \$2.81 on each \$1,000 valuation, as compared with a rate of \$1.95 one year ago.

Marquette county's share of the tax is \$85,916.62.

The following is the amount of state taxes to be assessed against the upper peninsula counties:

Alcona county	\$ 9,859.28
Benzie	8,732.51
Chippewa	35,211.73
Delta	26,760.91
Dickinson	33,803.26
Gogebie	42,254.07
Houghton	394,374.36
Iron	18,210.19
Keeweenaw	21,127.04
Lapeer	7,042.35
Macquinn	10,422.67
Marquette	85,916.62
Menominee	30,986.32
Ontonagon	14,084.09
Schoolcraft	9,859.28

POLARIS MINERAL WATER delivered to any part of the city in sterilized one-gallon bottles. Telephone, Bell, No. 217. Polaris Water Co., Marquette.

Critical clothes buyers are the kind we like to see coming in; men who have pretty definite ideas of what they want in style and color of fabrics. They can't be too exacting for us; we've got the goods; and we know we can satisfy these men.

Styles this fall are characterized by a particular "smart" air; the coats are made with long, deep lapels, broad concave shoulder and full chest; the back varying from a moderately form fitting to a full back.

A wealth of fine and beautiful fabrics; browns, grays, all shades, \$15 to \$30.
