

POLITICS TORRID IN TWO STATES

Illinois and Indiana Are Hotbeds, With Sharp Factional Contests in Both the Republican and Democratic Ranks.

G. O. P. Is Split on Deneen and Taft in the Former Commonwealth, and Roger Sullivan Is Fighting Bryan—Attitude of Watson, Who Would Be Governor, Complicates Things for Fairbanks in Hoosierdom, and General Row Is Brewing.

Washington, Sept. 23.—Illinois and Indiana are the hotbeds just now of some of the liveliest politics, having a bearing on the 1908 presidential campaign, that are being played in any part of the country.

The Illinois situation is probably the more important. There the Republicans are split on the question of defeating Governor Deneen for re-election. Complicated with this is the question whether the state shall be Taft or anti-Taft, which is another way of saying Roosevelt or anti-Roosevelt.

Two-Cent Fares for Kansas. Chicago, Sept. 23.—At an all-day conference here today between the presidents of the Kansas railroads and their general counsel it was decided to put a two-cent rate into effect in Kansas, as ordered by the commission of that state recently, provided it can be done and still preserve the right of the roads to contest in the courts.

Sullivan Fighting Bryan. Illinois Democrats are as badly split as the Republicans. Bryan leaders are making light of assertions they are fearful of losing Illinois, but the fact is there are complications that are giving them much trouble.

Fairbanks' Men Worried. The Republican situation in Indiana has been much complicated by the announcement of Representative James Watson, Republican whip of the house, that he wants the governorship and is going after it.

SCHOOL GIRL A HORSE THIEF. Spokane, Wash., Sept. 23.—Reading nickel thrillers and yellow newspaper accounts of daring in livestock stealing inspired Elizabeth Paschik, a sixteen-year-old school girl of Marcus, Wash., to carry out a series of horse-stealing jobs in northeastern Washington which for cleverness in plan and execution are without parallel in criminal history in the Pacific Northwest.

Greater Mobility for Infantry Is Suggested by Experts. Washington, Sept. 23.—The reports which continue to come from the army officers who served as military observers with the Russian and Japanese forces in Manchuria contain many suggestions of improvements in the American establishment. One of the most important of these is the promotion of greater mobility for the infantry.

MAN HUNT IN PROGRESS

Posses With Bloodhounds on the Trail of Train Bandits in the Far Northwest.

Spokane, Wash., Sept. 23.—Man-hunting bloodhounds, armed posses and the constabulary of Washington, Idaho, Montana and southeastern British Columbia are searching the hills and valleys for the bandits who held up the Orient Express train on the Great Northern railway near Rexford, Mont., early in the morning of Sept. 12, and since it has become known that \$40,000 in currency, consigned by the Commercial National bank of Chicago to the Old National bank at Spokane, was the booty obtained by the robbers, the searchers have redoubled their efforts.

RATES DECLARED EXCESSIVE. Greater Des Moines Committee Files Complaints Against Railroads. Washington, Sept. 23.—Six complaints were filed with the interstate commerce commission today by the greater Des Moines committee against the Chicago Great Western, Chicago, Rock Island & Pacific, Lake Shore & Michigan Southern and several other railway companies alleging that the rates on lumber products from Arkansas, Louisiana and Texas and on various commodities from Eastern states are excessive, unreasonable and unjust.

ORDER IS SWEEPING. UNITED STATES JUDGE LOCHREN ENJOINS. Minnesota's New Commodity Rate Law, Attacked by the Stockholders of Nine Railroad Companies, Is Absolutely Tied Up. St. Paul, Sept. 23.—Federal Judge Lochren issued an order today for an injunction which absolutely ties up the state's commodity rate law pending the final decree in the cases, or until the lower court's decision is overruled on appeal by the state. The order is sweeping in its terms, taking in not only the defendants at bar, including the attorney general and the shippers' trade parties to the actions, but all other persons as well.

LESSON OF LATE WAR. Greater Mobility for Infantry Is Suggested by Experts. Washington, Sept. 23.—The reports which continue to come from the army officers who served as military observers with the Russian and Japanese forces in Manchuria contain many suggestions of improvements in the American establishment. One of the most important of these is the promotion of greater mobility for the infantry.

JOHN D. ARCHBOLD MAKES DENIAL

Vice President of the Big Corporation Declares Untrue the Report the Standard Oil Company Contemplates Reorganization.

Statement Issued on Apparently Creditable Authority Asserts the Capitalization Is to Be Increased to an Amount More in Harmony with the Assets, and a Policy of Publicity Is to Be Entered Upon, but at the New York Office Magnate Says This Is Not So.

KEEP FLAG THERE, IS DEWEY'S PLEA

Would Be Cowardly to Part With the Philippines, the Admiral Says—United States Has too Much at Stake.

Only by Possession of the Archipelago Can America Hope to Maintain the Open Door in the Far East, He Declares; for Should Japan Get the Islands, as She Greatly Desires, She Would Command Every Gateway and Shut Us Out.

Washington, Sept. 23.—That it would be cowardly for the United States to part with the Philippines just now is the privately expressed opinion of every member of the joint general board of the army and navy and notably of Admiral Dewey.

China's Fate in the Balance. The admiral declares that the abandonment of the archipelago would leave every gateway to China to the possession of one or more strong military powers, all commercial rivals of the United States.

PEACE IN MOROCCO

Delegates Representing the Warring Tribes Come to Terms With the French.

Paris, Sept. 23.—Peace has been declared in Morocco, so far as Europe is concerned. The delegates of three important tribes have accepted the French peace overtures and will see that the terms of the agreement are carried out. Hostilities are now at end.

LOSS IS \$270,000. Big Hotel at Saranac Lake, N. Y., Burns to the Ground.

Saranac Lake, N. Y., Sept. 23.—The Hotel Imperator burned to the ground tonight, entailing a loss of about \$270,000. It was closed for the season last Saturday.

SCORE OF LIVES LOST. Seventy-Five Vessels Wrecked on the Newfoundland Coast.

ST. JOHNS, N. F., Sept. 23.—Additional reports from remote points show that sixteen and possibly twenty-four lives were lost along the Newfoundland coast during the equinoctial gale of Thursday. Seventy-five fishing vessels were wrecked, and much damage was done to wharves and fishing gear.

SHUT-DOWN LIKELY. LEAD AND ZINC PRODUCERS TO CONFER. Ore Now Bringing Very Low Prices, a General Suspension Such as Is in Effect in Missouri Is Proposed in Wisconsin.

MUCH MYSTERY IN GIRL'S DEATH

Body of an Unknown Young Woman, Aged About Eighteen, Is Found in a Trunk on the Beach at Seattle.

Seattle, Wash., Sept. 23.—The body of an unknown girl, aged about eighteen, was found in a trunk on the beach here today. In the trunk were two letters, one of which may lead to the identification of the girl was written on a letter-head of the J. B. Covington Fuel, Feed & Hauling company, St. Paul, and was signed "Edith."

AN EXPLANATION FROM ST. PAUL. St. Paul, Sept. 23.—J. B. Covington, whose firm's letter paper was found in a trunk containing the body of a young girl near Seattle, gave this explanation tonight of how the letter paper had undoubtedly come to be in the trunk:

Edith Covington, aged twenty-five, and Frank Covington, aged twenty-two, sister and brother, were raised by their grandparents in Catterburg, Ky. After they had grown up they paid me a visit, and the boy left for San Francisco. While he was there his sister, who was still here, received a letter saying that he was going to the Klondike. That was the last we heard from the young man. Later Edith married, and is now living in Rutherford, Va. I have had news from her recently, and she is happily situated.

A few days ago a letter came to her here from Seattle, and we forwarded it to her. I presume that while Edith was here she wrote her brother on the firm's letter paper, and that may explain how the letter got into the trunk. Our theory is Frank left the trunk behind him when he went to the Klondike, and it may have fallen into other hands.

PLAN REVOLT IN PORTO RICO. Adventurers in Cuba and United States Involved in Looting Scheme. Washington, Sept. 23.—Some of the government's secret agents have recently stumbled across the trail of a gang of enterprising soldiers of fortune who are planning no less an undertaking than a revolution against the United States in Porto Rico.

NEWPORT TO LOSE CHURCH. All Saints, Scene of Many Society Weddings, to Be Sold. Newport, R. I., Sept. 23.—Quaint old All Saints' chapel, famous the world over for its society weddings, is to be sold at auction and its site cut up into building lots. To this end a bill in equity was filed in the superior court here this morning by Attorney General Greenough.

MINING MEN TO MEET. Mining men are interested in the announcement from a committee at Mineral Point calling for a meeting of mining interests at that place Friday, Sept. 27, in the circular letter it is pointed out that the price of ore is at a low figure and the price of labor and supplies high; that the mining companies are operating under many disadvantages and that much capital is unproductive of returns, owing to these and other causes, some of which can be beneficially altered by a disposition for concerted effort on the part of ore producers.

WOMAN'S APPETITE CHANGING. Another physician asserts that the diet of the woman is now changing on account of the growing habit of cigarette smoking, which destroys all tastes for sweets. It is noticeable, he says, that women now order savories and spiced and seasoned dishes instead of creams and ices, for dessert. For the same reason a druggist lozenge having a strong taste, appeals much more to the jaded feminine palate than ordinary candy.

HIS FLIGHT DISASTROUS. High Wind Wrecks the New Aerial Contrivance of Louis Malesco. Paris, Sept. 23.—Louis Malesco today made another ascent in his combination balloon and aeroplane. A high wind wrecked the airship. Repairs will be completed next spring.

HANGED BY OWN NECK RIBBON. Worcester, Mass., Sept. 23.—An infant child, Madeline Farrell, daughter of Andrew Farrell, was accidentally hanged while asleep in its crib last night. A piece of pink ribbon had been placed around the little one's neck to hold a rubber teething ring. When the mother went to look at the child in the night she found it dead, the pink ribbon having been caught on the side of the crib and tightened, so that the child was strangled to death.

**DAILY MINING JOURNAL**

 MINING JOURNAL CO. (LIMITED.)  
 Issued daily except on Sundays. Contains  
 Associated Press dispatches and is especially  
 devoted to the Upper Peninsula interests.  
**SUBSCRIPTION RATES:**  
 Per month, by carrier.....\$ .60  
 Per year, by mail.....6.00  
 Entered as mail matter of the second class  
 in the postoffice at Marquette, Mich.

The football season is opening; so are  
 the colleges.  
 The American league pennant race  
 promises to be a real race right up to  
 the finish.

Tom Johnson has been nominated for  
 mayor of Cleveland by the Democrats.  
 The open question now is whether a  
 sufficient number of Republicans will  
 vote for him to insure his election over  
 the Hon. Theodore Burton.

Not for Longworth, the majority  
 nomination in Cincinnati. He says he  
 will not accept it under any conditions.  
 Perhaps he believes the administration  
 will be kept busy enough landing its  
 majority nominee in the northern part  
 of the state—in Cleveland.

Representative Bennett of the Soo has  
 declared for Auditor General Bradley  
 for governor. So has the Soo Times.  
 It is to be suspected, however, that the  
 Times' declaration for Bradley is due  
 in large measure to the fact that the  
 Soo News appears to be against him.

There is not wanting evidence that  
 voters in general have little prejudice  
 against third term governors. There's  
 Cummings of Iowa and a little while ago  
 there was La Follette of Wisconsin. It  
 is largely a matter of what the man  
 wanting the third term stands for, and  
 what his opponent stands for.

Belvidere Brooks, manager of the  
 Eastern division of the Western Union,  
 has announced that telegrams are no  
 longer subject to delay; in other words,  
 that the strike is over, at least on the  
 eastern division. It requires announce-  
 ments like that to remind us that the  
 strike is still supposed to be on.

"The independent Republicans of the  
 Soo are becoming more cocky every  
 day," remarks the Times, "and now  
 there is talk of an organization which  
 will have for its object the nomination  
 and election of candidates for county  
 offices who are in no wise tinged with  
 mire from the old machine. A united  
 effort all together will accomplish the  
 result." Here we have another example  
 of the heroic efforts of the Democratic  
 Times to promote discord among the  
 Republicans. Who are the Times' inde-  
 pendent? Possibly ex-officers holders and  
 prospective ex-officers. The Times  
 appears to be paving the way for a  
 smashing Democratic campaign next  
 fall.

Concerning the Pennsylvania capitol  
 scandals the New York Globe remarks:  
 "Seldom has a building been so thor-  
 oughly gutted. According to the state  
 treasury books the building and equip-  
 ment has cost \$13,000,000, of which \$9,  
 000,000 went to furnish the building.  
 State Treasurer William Y. Berry  
 charged that \$5,000,000 of this was  
 graft—gotten by false entries, by de-  
 ceit and pretense, by the substitution  
 of inferior and fake materials. Thieves  
 differ little save in the measure of their  
 brazen sophistication. The bigger the  
 thief the harder his surface. The state  
 of Pennsylvania has on hand a work of  
 extermination which is to be satisfactory  
 at all must be thoroughly done. Its ob-  
 ligations are not less than those of San  
 Francisco, and its failure or success in  
 their performance will not be less con-  
 spicuous."

The state of South Carolina is finally  
 out of the whiskey business. The last  
 of the \$700,000 worth of liquor on hand  
 last February, when the legislature re-  
 pealed the dispensary law, and to dis-  
 pose of which a commission was appoint-  
 ed, has been gotten rid of. The dis-  
 pensary system, by which the state be-  
 came the retailer of all liquor sold with-  
 in its borders, was one of Senator Till-  
 man's pet schemes and it had his enthu-  
 siastic support. Its extreme advocates  
 in the beginning claimed that the sys-  
 tem would eliminate state taxes. This  
 it failed to do. It did possess certain  
 advantages, however, and worked fairly  
 well until it was sucked up into poli-  
 ties. That was the beginning of the end.  
 In politics the system became a hotbed  
 of corruption and abuses, and when the

issue was fairly drawn, even Senator  
 Tillman could not save it. Thus the  
 first state monopoly in whiskey ended,  
 and the experiment is not likely to be  
 repeated, at least in any of the southern  
 states.

The Northern Normal is about to en-  
 ter on the first half of its ninth year,  
 and there is every prospect that it will  
 be the most successful regular school  
 year since the institution was opened in  
 1899. It closed some weeks ago the most  
 successful summer school ever held here.  
 The enrollment reached 400, and the  
 work was attended by excellent results.  
 It is probable that the enrollment for  
 the regular term about to open will also  
 reach a new high mark, as many in-  
 quiries have been received. The stu-  
 dents will have excellent facilities. The  
 new south wing, which was available  
 for only a part of the last regular school  
 year, will be occupied throughout the  
 year 1907-08. It is a well equipped and  
 beautifully furnished structure and one  
 in which the Normal work can be pro-  
 ceeded to the greatest advantage. The  
 faculty will be in the main the same as  
 last year. It will be strong and large,  
 large enough to assure the students in  
 the school much personal attention from  
 their instructors.

The Chicago Tribune has completed a  
 poll of sentiment among Republicans in  
 regard to the presidency that has cov-  
 ered every state in the Union and in  
 the course of which congressmen, state  
 legislators, newspaper editors and others  
 who are presumably in touch with the  
 feeling of the people have responded to  
 inquiries to the extent of several thou-  
 sands. The answers show a practical  
 unanimity in support of President  
 Roosevelt's policies and a very general  
 endorsement of the candidacy for pres-  
 ident of the man who is understood to  
 best represent those policies, Secretary  
 Taft. Secretary Taft was given all but  
 a small share of the first choice votes.  
 After him Governor Hughes of New  
 York appears to have the largest follow-  
 ing. These polls are not, of course,  
 conclusive, but usually they are straw  
 which show the way the wind is blow-  
 ing. In this case the results check up  
 with a rather general opinion that Taft  
 is just now the favorite in the presidential  
 race and Hughes the strongest man af-  
 ter him, among those who have been  
 mentioned in connection with the great  
 office. These men stand out so promi-  
 nently from the other candidates that  
 it appears that it would be difficult to  
 reconcile the rank and file of voters to  
 any man but either of them at the  
 head of the Republican ticket, unless  
 that man should be President Roosevelt  
 himself.

**WATER ONCE AGAIN.**

The acting mayor of the city has sus-  
 pended the water board, under specified  
 charges, and the water board has replied  
 with a statement in defense. The bur-  
 den of the latter appears to be that in  
 February, 1905, the council entered into  
 an agreement with the Cleveland-Cliffs  
 Iron company whereby an effort was to  
 be made to alleviate the creosote nu-  
 isance. The board's position is, evi-  
 dently, that this action of the council,  
 together with the fact that it has never  
 balanced accounts with the Cleveland-  
 Cliffs Iron company, lets it out, but does  
 it?

Councils come and councils go, but  
 the water board goes on forever. Its  
 members have a long tenure of office  
 and have extensive powers in regard  
 to water supply. It is to them that the  
 people look for advisory direction of all  
 action in regard to water supply, if not  
 for action itself. The fact that the coun-  
 cil may have obscured the issue by get-  
 ting in between the board and the Cleve-  
 land-Cliffs company may be an extenu-  
 ating circumstance for the board, but  
 it by no means excuses all its procrastina-  
 tion in handling this considerable prob-  
 lem.

The water board did not put the  
 whole responsibility up to the council.  
 This is evidenced by the fact that it  
 has been experimenting and discussing  
 ways and means to satisfy the people  
 by giving them good water. Further-  
 more, it does not appear that it ever  
 submitted Mr. Mather's letter to the  
 council, thus serving notice that it was  
 expecting the council to definitely dis-  
 pose of the questions involved. This  
 letter, which might have been productive  
 of some action, was apparently held up  
 until it could be used in a controversy.

The biggest fact in connection with  
 the matter under dispute is that the wa-  
 ter problem is now several years old;  
 that the board has never taken a defini-  
 tive step toward solving it; that it has  
 not applied itself diligently to that end;  
 that it is now apparently as far from  
 having clear, definite ideas on the sub-  
 ject as it ever has been. Besides these  
 things minor details of controversy are  
 comparatively unimportant. The council  
 doubtless deserves some blame, but it  
 should be remembered that it did not  
 take a hand in the matter until the  
 board had toyed with the situation two  
 years or more without arriving any-  
 where.

The board has been suspended. Whether  
 or not it will be replaced by a new board  
 or not is by no means certain. If it  
 can get some action on the problem in-  
 volved, making up its mind what had  
 best be done and doing it, it is a mat-  
 ter of indifference whether it is replaced.  
 Few people have any objection to the  
 personnel of the board. Personally its  
 members are good enough men. What is  
 objected to is its apparent inability to  
 get results; this irrespective of the question  
 whether its suspension is legal and

can be made to stick. That is another  
 question, and not a small one either.

**PERHAPS.**

The Soo Times says that the entire  
 upper peninsula is pretty much for  
 "Doc" Bradley for governor; that he will  
 not unlikely have a unanimous upper  
 peninsula delegation and that he can  
 have the Chippewa delegation whenever  
 he wants it. Perhaps these things are  
 true. Apparently the Soo Times can  
 look more certainly into the future than  
 anyone else in the upper peninsula can.  
 Why is the Times so sure about the  
 Chippewa delegation, for instance? The  
 Times' daily contemporary, the News,  
 if we remember aright, helped pick the  
 prospective new postmaster at the Soo,  
 and now we observe that it is not num-  
 bered among "Doc" Bradley's friends  
 but is, on the contrary, pro-administra-  
 tion, and will stick. Also it will have  
 plenty of company.

The Times would have been quite cor-  
 rect, doubtless, if it had asserted that  
 many of the oldtime leaders were with  
 Bradley, or, more properly speaking, with  
 the men behind Bradley. But the Times  
 must not forget that even in the event  
 that nothing is done to improve the  
 present direct nominations law the rank  
 and file of the voters are assured a di-  
 rect vote on the gubernatorial candi-  
 dates, and it is not possible to tell in a  
 cocksure manner what they will do. If  
 they should study attentively, and with  
 fair intelligence, the respective records  
 of "Doc" Bradley and Governor Warner,  
 should the governor be a candidate for  
 a third term, the conclusions they would  
 arrive at might naturally be expected to  
 strongly favor the latter. His record  
 is one that carries the most appeal for  
 popular support. He has done much  
 good work for the state and advocated  
 many things in the interest of all the  
 people. The Mining Journal doubts not  
 that if he runs again it will be found  
 that he has a very substantial support  
 among the rank and file of voters in the  
 upper peninsula, and his friends among  
 the rank and file would be able to make  
 their votes count, for this time they  
 will not be throttled by conventions.

**EQUIPPING THE ROADS.**

It was asserted a few months ago that  
 the money which must be expended by  
 the railroads during the coming two  
 years for actual needs in the way of  
 equipment and construction would be  
 sufficient to maintain the prosperity of  
 the country for those years regardless  
 of other factors. Some of the reports  
 now coming in seem to lend verity to  
 that assertion.

From the Pacific coast it is reported  
 that the railroads there, notwithstanding  
 the difficulty of obtaining money at fair  
 rates of interest or on long time securi-  
 ties, have been compelled to lay out  
 large sums. The Southern Pacific, the  
 Santa Fe, Tonopah & Goldfield, North-  
 western Pacific, and the Wells-Fargo  
 Express company are ordering new cars  
 and locomotives and as fast as they  
 are received are putting them into com-  
 mission. President Ripley of the Santa  
 Fe has placed an order for thirty-five  
 locomotives for freight and switching  
 service. Mr. Harriman has asked for  
 figures on 5,000 steel underframe box  
 cars of a capacity of 100,000 pounds  
 each, 500 all steel gondola cars of a ca-  
 pacity of 100,000 pounds each, and 200  
 steel underframe flat cars each with a  
 capacity of 80,000 pounds. This new  
 equipment is to be divided between the  
 Union Pacific and Southern Pacific sys-  
 tems.

Such orders as these result in wide-  
 spread activity. The coal, coke and iron  
 industries are all called on for the raw  
 materials which come from the various  
 mines and give business to transporta-  
 tion companies. The shops in which the  
 raw material is converted into the fin-  
 ished product employ many men and  
 these support many tradesmen. Thus  
 far only a comparatively small portion  
 of the equipment and construction the  
 need of which is acknowledged has been  
 actually ordered. The great bulk of or-  
 ders remains to be placed when the mon-  
 ey for it can be obtained and those who  
 seek to peer into the future must reckon  
 with this factor.

**U. S. TO BUILD RUSSIA'S NAVY.**

Within the next four years Russia will  
 have a large naval squadron in the Far  
 East, and for this purpose has appropri-  
 ated 40 millions of dollars. The Russian  
 officials have recommended that the  
 squadron be built in the United States,  
 declaring that we can turn out the ships  
 in much quicker time than any other  
 country. The quickest and safest way  
 to correct a bad stomach, to strengthen  
 a weak system and to recover robust  
 health again is to commence taking  
 Hoster's Stomach Bitters at once. For 34  
 years it has been proving its superior  
 merit in cases of dyspepsia, indigestion,  
 costiveness, poor appetite, flatulency,  
 heartburn, bloating, insomnia, liver or  
 kidney troubles and malaria, fever and  
 ague. Don't experiment any longer  
 when you know the Bitters will cure you.  
 We guarantee the genuine to be pure.

**CURED HAY FEVER AND SUMMER  
 COLIC.**

A. J. Nusbaum, Batesville, Indiana,  
 writes: "Last year I suffered for three  
 months with a summer cold so distress-  
 ing that it interfered with my business.  
 I had many of the symptoms of hay  
 fever, and a doctor's prescription did not  
 reach my case, and I took several medi-  
 cines which seemed to only aggravate  
 my case. Fortunately I insisted upon  
 having Foley's Honey and Tar in the  
 yellow package, and it quickly cured me.  
 My wife has since used Foley's Honey  
 and Tar with the same success." The Staf-  
 ford Drug Co.

Never let a dealer sell you a substitute  
 for an article you ask for. He is working  
 for his own profit and not yours. Get  
 what you ask for.

**THE VALUE OF PERSONAL KNOWLEDGE**

Personal knowledge is the winning factor in the culminating contests of this competitive age and when of ample character it places its fortunate possessor in the front ranks of

**The Well Informed of the World.**

A vast fund of personal knowledge is really essential to the achievement of the highest excellence in any field of human effort.

**A Knowledge of Forms, Knowledge of Functions and Knowledge of Products** are all of the utmost value and in questions of life and health when a true and wholesome remedy is desired it should be remembered that Syrup of Figs and Elixir of Senna, manufactured by the California Fig Syrup Co., is an ethical product which has met with the approval of the most eminent physicians and gives universal satisfaction, because it is a remedy of a

**Known Quality, Known Excellence and Known Component Parts** and has won the valuable patronage of millions of the Well Informed of the world, who know of their own personal knowledge and from actual use that it is the first and best of family laxatives, for which no extravagant or unreasonable claims are made.

This valuable remedy has been long and favorably known under the name of—Syrup of Figs—and has attained to world-wide acceptance as the most excellent family laxative. As its pure laxative principles, obtained from Senna, are well known to physicians and the Well Informed of the world to be the best we have adopted the more elaborate name of—Syrup of Figs and Elixir of Senna—as more fully descriptive of the remedy, but doubtless it will always be called for by the shorter name of—Syrup of Figs—and to get its beneficial effects, always note, when purchasing the full name of the Company—California Fig Syrup Co.—printed on the front of every package, whether you call for—Syrup of Figs—or by the full name—Syrup of Figs and Elixir of Senna.

**CALIFORNIA FIG SYRUP CO.**

**Northern State Normal School**  
**MARQUETTE**  
**School Begins October 2, 1907**

The Northern State Normal School admits graduates of approved high schools to the two years' course leading to a life certificate and diploma. It offers courses leading to a three-year certificate, which is renewable for three years and valid in graded schools, and also a rural school certificate. It has excellent facilities for training teachers for special work in Kindergarten, Music, Drawing and Nature Study. It has an exceptionally fine corps of teachers who are specialists in their departments, and its training school gives a splendid opportunity for the training of teachers.

There is a splendid dormitory in connection with the school which is an ideal home for the student. The building is lighted with electricity and heated with steam; the living rooms are large, well lighted and pleasant, and the dining room has a seating capacity of one hundred and fifty persons. The expenses are moderate.

Students of the Northern Normal School who finish the life certificate course are given fifty-six hours credit at the University of Michigan. For information and catalogue write to

**JAMES HAMILTON KAYE, Principal**

**Upper Peninsula**

ready this year twenty-seven new  
 freighters have gone into commission in  
 the Lake Superior trade, and a number  
 of others are nearing completion. Last  
 season forty-four steamships were added  
 to the bulk cargo service. Of these  
 craft thirty-two are 500 feet or more in  
 length and carry from 4,000 to 9,000  
 net tons of freight. It is scarcely to be  
 expected that last year's record will be  
 bettered this season. However, the per-  
 centage of boats 500 feet in length or  
 over will be greater. The twenty-seven  
 vessels going into commission for the  
 first time this year have a combined  
 length of more than 14,000 feet, or about  
 two and two-thirds miles. In the 1905-  
 '06 season the length of the Smith  
 Thompson 438' and that of the John  
 Mitchell, W. B. Davey, Henlock, Olan-  
 ah and Galumet each 440 feet. These  
 latter are the smallest freighters that  
 have come to Lake Superior on their  
 maiden trips this season, with the ex-  
 ception of the Canadian, a 250-footer  
 built at Newcastle, England.

**St. Paul to Build to Escanaba—**  
 Not only is the Wisconsin & Michigan  
 railroad to be extended from Quinnesec,  
 its present terminal, to Iron Mountain,  
 metropolis of the Menominee iron range  
 —the contract for this work has already  
 been awarded and the grading is in  
 progress—but just as soon as the final  
 atmosphere is cleared the Chicago, Mil-  
 waukee & St. Paul railroad is to be  
 built through Iron Mountain to the  
 company's ore docks at North Escanaba.  
 This has been definitely decided upon.  
 The branch line is absolutely necessary  
 if the railroad intends to increase its  
 ore traffic or to compete more vigorously  
 or more successfully with the Chicago  
 & Northwestern. Engineers have al-  
 ready investigated the proposed route,  
 and it is entirely probable that the  
 permanent survey will be made during  
 the coming winter. It has been estab-  
 lished that the branch can be built  
 cheaply. There is a down-grade nearly  
 all the way with only one cut of im-  
 portance, but few fills and a small bridge  
 cost. The distance is less than fifty  
 miles.

The C. M. & St. P. company's ore  
 traffic from the Iron Mountain district  
 now reaches the docks at North Escanaba  
 by a round-about way, from  
 Channing, twenty-four miles north of

Iron Mountain, it goes over Senator  
 Isaac Stephenson's Escanaba & Lake  
 Superior railroad, a distance of seventy  
 miles, or some 100 miles in all. When  
 ore is received from the mines at Nor-  
 way and Vulcan, which will be when a  
 short extension, now building, is com-  
 pleted to a junction with the Wisconsin  
 & Michigan at Quinnesec, the haul will  
 be fifteen miles more. The grade from  
 Iron Mountain to Channing is a very  
 heavy one. Twenty 30-ton cars is a  
 load for the company's most powerful  
 engines. From Channing the grade per-  
 mits the hauling of one hundred loads.  
 By building the branch from Iron Moun-  
 tain direct to North Escanaba a haul  
 of fifty miles is saved and the number  
 of loaded cars can be increased from  
 twenty to one hundred. As it is  
 now the Chicago & Northwestern hauls  
 twice the tonnage per train less than  
 half the distance.

**WATER BOARD NOTICE OF PRO-  
 POSED ASSESSMENT.**  
 Marquette, Mich., Sept. 9th, 1907.  
 To the owners of lots and parcels of  
 land in the Ayer, Towar and Mar-  
 quette Land company's additions to  
 the city of Marquette.  
 Notice is hereby given, that the board  
 of fire and water commissioners of the  
 city of Marquette, have, at the request  
 of the owners of lots in these additions,  
 decided to extend the water mains of  
 the city to these additions, provided the  
 streets are graded so as to enable the  
 board to lay pipes at proper depth to  
 protect from frost. And have deemed  
 it just and equitable that a portion of  
 the cost of such extensions shall be as-  
 sessed upon the lots and parcels of real  
 estate especially benefited, and for the  
 purpose of examination by the owners  
 of the lots in these additions, and others  
 interested, a map of the proposed  
 district to be assessed, together with an  
 estimate of cost of the improvement, as  
 also of the amount proposed to be raised  
 by special assessment, may be seen at  
 the office of the board in the city hall,  
 during usual office hours, from this date  
 to and including the 23rd of September.  
 Notice is hereby given to the owners  
 of lots and others interested in these  
 additions, that the board will meet at  
 their office in the city hall at 8 o'clock  
 in the evening of the 23rd day of Sep-  
 tember, prepared to hear any objections  
 and suggestions relative thereto.  
 By order of the board of Fire and Wa-  
 ter Commissioners.

**City Brevities**

Today's weather: Brisk winds mostly southerly; showers. Yesterday's temperatures: Seven a. m., 50 degrees; noon, 53; 7 p. m., 51. Maximum, 55 degrees; minimum, 48.

Thomas P. Pollis left yesterday for Ishpeming.

Dr. E. L. Drake and daughter have gone to Chicago.

John C. Beckwith of Kankakee is visiting friends in the city.

Will Stickney of Winnipeg is visiting his brother, Frank Stickney.

C. O. Swanson and family have returned from a visit in Ishpeming.

The Misses Annie Kelly and Mary Cleary are visiting friends in Duluth.

W. P. Healy, a former Marquette resident is visiting friends. He now lives in Chicago.

P. C. Beanston of West Ridge street is entertaining his niece, Miss Edith Wherry of Racine, Wis.

Homer Pierce has returned to Ann Arbor where he is taking a course in electrical engineering.

M. L. Oleson, who recently organized the Swedish Temperance society here, has gone to Kansas City.

William Leighton of Grand Marais, oil inspector for this district, was a Marquette visitor yesterday.

Miss Elsie Rivers, who has been visiting relatives at Minneapolis for the past week, returned home yesterday.

Mrs. J. W. Spear is back from a lake trip to Connetquot. On the trip she was accompanied by her brother and family.

Mrs. Phil Carroll, who has been visiting her sister, Mrs. K. H. Barnes on Bluff street, has returned to the copper country.

Mr. and Mrs. Chat Hampton and daughters, the Misses Margaret, Mary and Helen Hampton, were recently entertained at the home of Mr. and Mrs. J. W. Spear.

Alderman Alex. B. Campbell and family left yesterday for the copper country, where they will attend the Houghton county fair and visit Mrs. Campbell's people.

Otto Tuch, a former resident and South Shore employe who went to Duluth when the passenger department of the road was transferred, is visiting friends in the city.

Mrs. Nettie Burton and Mrs. Frank King and daughter, Miss Viva King of Belvedere, Ill., who have been visiting Mr. and Mrs. Alexander LaVallee, returned to Belvedere yesterday.

Mrs. Archie Graham and Miss Emma Lalochelle are visiting at the home of their parents, Mr. and Mrs. Eugene Lalochelle on Champion street. They have just returned from an eastern tour.

Beginning yesterday the Western Express company resumed its express service on the C. M. & St. P. train which arrives here at 5:30 o'clock in the afternoon from Chicago and on the train which leaves at 8 o'clock in the morning for Chicago.

E. W. Lawton, who left the city several months ago because of sickness, has returned and resumed the duties of his position in Bell and Ball's office. Immediately after leaving home Mr. Lawton was operated on for appendicitis at Ann Arbor, and his recovery has been slow.

George O. Randolph, a well-known Marquette young man who graduated from the Michigan College of Mines, class of '07, has been appointed to a position of instructor in the geology and mineralogy department of that institution. He will take up his duties at the opening of the school year next Monday.

To Give Concert—The Salvation Army will give a concert at its hall on South Front street tonight. Refreshments consisting of ice cream, coffee and cake will be served.

Copper Country Fair—The Copper Country Fair opens tomorrow and continues through the week. A number of attractions including balloon ascensions are advertised.

Taken to Hospital—Albert Arthur, a sailor was taken from the ore boat Michigan at the L. S. & L. dock last night to St. Mary's hospital. It is believed that he is suffering with typhoid fever.

Supper Wednesday Night—The ladies of the M. E. church will serve a supper Wednesday evening at the usual hour. All the good cooks of the congregation will assist, and the ladies promise a fine menu.

Condition Is Critical—It is stated that the injuries suffered by Mrs. Michael Cueliff when she was gored by a bull at her home four miles west of the city Saturday last, are more serious than it was thought at first. She is in a critical condition. The bull, it is said, was killed Sunday.

No Race Suicide There—Mr. and Mrs. Louis Lewis of North Marquette are the parents of twins, a boy and a girl. This is the third pair of twins born at the location since April last—"and no water yet," one of the North Marquette residents remarked last evening.

Says He Is Bankrupt—Frank Giulio of Opechee, Houghton county yesterday filed a voluntary petition in bankruptcy in the United States district court. He relates that he owes \$806.59 and owns property amounting to only \$250, the amount exempted by law. He is represented by MacDonald & McCormack of Calumet.

Civil Service Examinations—United States civil service examinations will be held at the federal building, Marquette, Wednesday, Oct. 30, commencing at 9 a. m. Applications for this examination must be made on the prescribed form, which, with necessary instructions, may be obtained from the local secretary, W. A. Jellison, at the customs office, Marquette.

**\$5.00 REWARD**

The above reward will be paid to any person giving us information which will lead to the arrest and conviction of any one stealing Mining Journals from subscribers' premises. A newspaper thief is the most contemptible of all thieves. We will prosecute to the limit of the law any one caught.

**MINING JOURNAL CO., LTD.**

Committee on Return Trip—The rivers and harbors committee, which spent an hour and a half in Marquette Friday, was in port last evening on the steamer Juniata, but its members did not leave the boat. The party was joined here by W. H. Johnston and Hon. H. O. Young of Ishpeming, who accompanied it to Soo. The committee is on the return trip of its tour of the lakes.

At Opera House—Clyde Fitch's latest comedy of New York life, entitled, "The Girl Who Has Everything," will be the attraction at the opera house Wednesday evening. The production, which is under the direction of Lobbler & Co., brings out as a star, the comedienne, Isabel Irving. Miss Irving exercises her art with such delicate discrimination that she always makes her points tell whether they lie in comedy or sentiment.

**GOOD WILL FARM.**

Mrs. G. M. Walker Is Now the Superintendent of the Work.

Mrs. G. M. Walker, for several years in charge of the finances of the Good Will farm for children, has taken the superintendency, and is now in Marquette in the interests of the institution. Good Will farm stands for a normal life—the original home first, if by advice and encouragement that can be kept; the adopted home, if the child's welfare requires it. The period spent in the receiving home is to be only long enough to find the right home for the child's needs. The following from the Hancock Evening Journal outlines the present condition and purposes of the home:

"Mrs. Walker is developing a number of plans for the work of the association along lines which promise to result in much good for the institution and the children that are entrusted to its care. One of these ideas is relative to the boarding out children, not destitute or surrendered to the Good Will farm association, but children for whose care there are persons able to provide funds to pay for their board, but who are not in a position to maintain them at home, or who have no suitable homes.

"Many such cases have been brought to the attention of the Good Will farm association, but under their system of operation no provision was made for caring for them. However, if plans now being developed can be put into execution, it is proposed to enlarge the scope of the institution by securing homes for children such as those mentioned.

"To this end it is proposed to establish in each important place in the territory of the institution local advisory boards which will have at heart the interest of all homeless children which can work either independently or in conjunction with the directors of the association so far as getting homes for children is concerned. No general rule will be adopted relative to the children to be accepted, but each individual case submitted will be considered solely upon its merits.

"In the two years since Mrs. Walker was last associated with the Good Will farm she has been doing work along similar lines for the Illinois Children's Home and Aid society, the third largest society of the kind in the world, being exceeded in extent of influence and activity only by Dr. Barnardo's home in London, which is the greatest in the world and by the New York Aid society, which is the largest in the United States. In the Illinois Home five hundred children are cared for annually in the home department, which takes nothing but surrendered children, and 1,200 in the aid department, which looks after children for whom some relative or friend provides payment for their board and keep in a home secured for them by the society. It is this latter feature that is contemplated for adoption by the Good Will Farm and Home Finding Association.

"Mrs. Walker states that it is expected that the institution will be soon placed on a better footing than at any time in its history, enabling it to render more efficient aid to destitute and homeless children. A few articles of furniture are needed at the home, such as a range, rugs and carpets, etc., and it is expected that some of these will be donated by friends of the institution."

**Upper Peninsula**

New House for Priest—The Catholic parish at Iron River will build a new home for Rev. Father Lenhart. It will be a fine dwelling of modern design and equipment.

More Houses for Employes—The Munising Paper company has let a contract to William Hinton, of Munising, for the construction of ten comfortable houses for rent to employes. The dwellings will be located near the mill. Part of the material is now on the ground and building work will be commenced immediately.

County Fair Abandoned—There is a stir among the agriculturists of Gogebic county over the abandonment of the county fair this year, says the Iron River Reporter. The usual agricultural tax, amounting to \$600, was levied last fall and has been paid over to the Agricultural society with headquarters at Ironwood. Now the farmers of that county are wondering what is to be done with the money.

Loan of \$10,000 Proposed—Ten thousand dollars of water works bonds having matured, and there being no funds in the village treasury with which to redeem the securities, a proposition to borrow the sum needed for the redemption of the paper will be submitted to a special election of the people of Munising called for Monday, Oct. 6. It is proposed to borrow \$10,000 for fifteen years at 5 per cent interest, payable semi-annually.

Got a Circus Horse—Charles Fook purchased what he supposed was a fast driving horse from Burlington, Wis., parties last week, but received instead a circus broncho, reports a Sagola (Dickinson county) correspondent. The animal evidently was well trained in the art of bucking. He would first stand erect on his hind feet and then turn a back summersault, which was all very amusing to the bystander. If not to the owner. Mr. Fook has shipped the horse back to its former owner, as the season is too far advanced for him to go on the road with a trained trick horse.

Marquette, Michigan.

### MARKETS

#### NEW YORK STOCKS.

New York, Sept. 23.—The rise in the price of securities, which showed signs of gaining headway toward the end of last week, was brought to a rather abrupt pause today. The London market gave clear intimation early today that it was not prepared to adopt fully the assumptions of a definite clearing of the money outlook which became prevalent in New York last week owing to the improved position of our own money market. The Bank of England was again obliged to share with Berlin and Paris the open market supply of gold and money and discounts hardened in London. Sterling exchange in New York also advanced.

From the standpoint purely of banker and borrower of money, the exhibit has another significance, coming at a time of year when foreign credits are looked to for assistance in moving crops and are usually drawn on by anticipation for that purpose. The value of the exports of cotton, however, showed a heavy shrinkage in August compared with August of the previous year, and there was a notable decrease in the value of mineral oil.

The depressed conditions in the copper market also resorted their influence on the securities markets both here and abroad. The price of the metal showed a violent decline at London, and information regarded as reliable was of sales made in New York by great producers at the equivalent of 15 cents a pound for cash. Rumor was busy at the same time with suggestions of coming fortunes in the dividends of copper stocks. The resumption of the Standard Oil hearing, the expectation of the decision of the Chicago & Alton immunity question and the belief that the determination was imminent on the troubled problems confronting the New York traction companies were contributing factors to the lackluster in the market.

Paine, Webber & Co. telegraphed from New York yesterday as follows: "The stock market displayed a reactionary tendency today and stocks were generally lower. The weakness of copper metal in London was a disturbing influence and caused considerable selling of Amalgamated and Smelters. The delay in the declaration of the dividend on Anaconda has caused some apprehension, although it is generally thought that the large proceeds will reduce dividends to a very great extent. Call money was very easy, and the demand for time loans was not as aggressive as heretofore. The monetary situation is still regarded as the barometer, and the easier conditions now prevailing lead to the belief that the fall stringency will not be as great as predicted. Call money was inclined to favor the purchase of standard rails on recessions."

**AMERICAN CAPITALISTS MINING IN FINLAND**

COMPANY ORGANIZED BY LAKE SUPERIOR MEN—MUCH STOCK HELD IN THE UPPER PENINSULA.

J. E. Sari, one of the best known Finns in this country, for some years publisher of a Finnish paper, is spending a few days in the country interesting people in the Finnish-American mining company, organized last December at Calumet under the laws of Minnesota. The corporation is composed principally of Americans and all of its officers are Lake Superior men, its president being John Daniell. The other officers are Ed. Useth, vice president, O. J. Larson, secretary; H. Kitti, treasurer. Mr. Sari is one of the members of the board of directors. The company is incorporated at \$750,000, divided into 750,000 shares at a par value of \$1 each. The shares are full paid and non-assessable.

The Finnish-American Mining company has control of a property in Finland which was opened in 1877 and was worked continually for 18 years. It was then closed down, remaining inactive until the promoters of the Finnish-American company obtained possession of it. The property produces copper, zinc, silver and gold, and was formerly known as the Orijari. The mine produced over \$5,000,000 worth of ore and there is at present on surface about \$200,000 of zinc ore. While no estimate has been made by the company's officials of the silver values the ore contains, Professor Meller, a Finnish mining engineer, some time ago estimated it at about \$50,000.

Experts Examine Mines.

Before organizing the company the properties were examined by Professor A. Koenig of the Michigan College of Mines and Mr. Daniell, the company's president. Both made favorable reports. A half dozen or more shafts were opened during the years the property was active, but none of them were sunk to a very great depth, as the machinery in use was not suited for deep mining work. According to Mr. Daniell high grade ore was taken from all of the shafts, as well as from the drifts opened. At the time of his visit it was impossible to examine the lower drifts as they were filled with water, but the upper levels looked promising.

The mines are located in Kisko, province of Aho, and are owned by the Fisker's Stock company. The estate of the Fisker's company consists of fifty square miles and all its mineral rights, other than iron, have been surrendered to the Finnish-American company.

Unprosperousness and mismanagement are responsible for lack of information regarding the extent of the deposit. One can be seen in both extremities of the mine, indicating that the ends of the deposit were not reached. Measurements showed the width of the deposit to be 100 feet or more, but maps and records made years ago give it as 100 feet in width in some places. Gold and silver occur, but their presence is only revealed in assays or in the process of separation. The extent of the ore body below the 100 foot level, which is the deepest point reached by underground openings, has been partially ascertained by diamond drill holes. Eight holes had been bored up to the time Captain Daniell inspected the mine. An approximate estimate of all of the ores of various grades and characters on surface at the mine is 140,000 tons.

Former Ishpeeming Man in Charge.

Captain Jacob Wilson, at one time underground superintendent of the American mine, also for a time at the American, a few miles west of this city, and for eighteen years captain of the Quincy mine, is the general superintendent of the Finnish properties. A force of about seventy men is now employed and a complete equipment of machinery has been installed.

Labor is ridiculously cheap in Finland, and living expenses are correspondingly low. The company will be able to deliver its copper into the general markets of Europe at less than \$2 per ton. This is remarkably low when it is considered that it cost the mines operating in Arizona about \$20 per ton to place their product in New York and other trade centers.

There is an abundance of labor in the district. It is figured that the ore can be produced at a much smaller cost than is possible to produce mineral of similar quality in any of the American mines. The management figures that it will be able to produce its copper for less than five cents per pound.

The transportation problem has been adequately solved. The mines of the company are accessible to a well equipped railway system, and it is also possible to receive and ship by water.

The Finnish mining laws are liberal. The Finnish authorities have shown an unusual interest in the affairs of the new company and it is already evident that they will aid the management in

**WAS ILL A SHORT TIME.**

Former Ishpeeming Woman Died at Virginia Hospital, After Brief Illness.

The remains of the late Mrs. Robert Koob, who died at Virginia Sunday, as announced in yesterday's issue of The Mining Journal, will be received in Ishpeeming this morning, and will be accompanied by her husband. The announcement of Mrs. Koob's death was not only a shock but a great surprise to her many friends in this country, where she was very well known, having been raised in this city. It was not generally known that she was ill. She died at the Virginia hospital, where she had been confined only a few days. Mrs. Koob spent nearly a month here during the summer, visiting relatives, returning to her home four weeks ago.

Prior to her marriage, which occurred a year ago last January, she was employed as a school teacher, having taught in the kindergarten departments of the Ishpeeming, Negamess and Negamess schools. She was a graduate of the Ishpeeming high school, also of one of the lower Michigan institutions. She possessed a most amiable disposition and she numbered her friends by her acquaintances. For a short time after her marriage she resided in Negamess, where her husband was employed.

The time of the funeral has not yet been decided on, though it will probably be held tomorrow morning from St. John's church.

**WILL RETURN TO ISHPEMING.**

Capt. Joseph Hodgson Has Purchased Own Home on Fifth Street.

Joseph Hodgson, assistant general superintendent of the Breitung-Kaufman mining operations in this county, has purchased William C. Uren's residence on North Fifth street, and will occupy it as soon as Mr. and Mrs. Uren find it convenient to vacate. The property is one of the best situated and most desirable in the city.

Captain Hodgson's duties will require frequent visits to Humboldt, where the Breitung interests are preparing to re-open the Humboldt and Washington mines, and he returns to Ishpeeming because it will be more convenient for him to live there than at Negamess, where his family has resided since shortly after he accepted his present position at the Mary Charlotte mine a few months ago.

Mr. and Mrs. Uren plan to spend the greater part of their time away from the city. They decided some months ago that they would not spend many more winters in Ishpeeming, as the climate is too severe for them. Mr. Uren advertises his fine driving horse for sale and he advised The Mining Journal yesterday that his business block at the corner of Cleveland avenue and First street, also his dwellings and barn on Pearl street, are for sale. He desires to sell all his property here before he and Mrs. Uren depart for Iowa, where they expect to spend the winter with her mother.

Mr. Uren and his wife are old residents here for more than thirty years, past. During his early years in Ishpeeming he followed mining, having had charge of operations at the old Parsons property at the Winthrop, which has now been inactive for something like a quarter of a century. He was successful in business for years before retiring.

**OF INTEREST TO MANY.**

Foley's Kidney Cure will cure any case of kidney or bladder trouble that is not beyond the reach of medicine. No medicine can do more. The Stafford Drug Co.

**WILL REPAIR CLUB HOUSE.**

Headquarters of the Ski Organization Will be Greatly Improved.

Eric Hoyseth, president of the Ishpeeming Ski club, yesterday appointed four members to serve on the board of directors during the coming year. In addition to these men, the board is composed of the five officers—president, secretary, treasurer and first and second captains. The appointive directors named yesterday are Carl Tellefsen, G. A. Newett, M. M. Duncan and T. W. Durham.

Mr. Hoyseth stated that the officers intend to make the coming season the most successful that the club has ever had. New social features will be introduced. A big tournament will be held on Washington's birthday as usual. The club house at Deer lake is to be considerably improved. A fine dancing floor will be put in. The building is of good size and it will easily accommodate seventy-five persons. The usual weekly tramps will be taken. Every alternate week will have a ladies' night. Mr. Hoyseth intends to appoint a committee shortly to look after the improvement work at the club house.

**IMPROVED EXPRESS SERVICE.**

The Western Express company has completed arrangements with the Chicago, Milwaukee & St. Paul railway to carry express between this city and Chicago twice daily, instead of once, as formerly. Express matter will now be received on the trains arriving here at 10 a. m. and 4:55 p. m., and, outbound, it will leave on the trains departing at 8:45 a. m. and 6:45 p. m. The improved service will be much appreciated. Under the new arrangement express matter to and from Marquette will be carried on two additional trains daily.

**FROM HOPKINS' CURB LETTER.**

"The strength that developed in the coppers Saturday and which was expected to extend further today received a decided bump when the London quotations appeared this morning. Both spot and futures were down about \$2 and the weakness displayed in other directions caused our market to open decidedly lower. North Butte, which was the feature in Saturday's strength, was the most active today, losing about 2 points. Copper Range and Calumet & Arizona were also under pressure and lost 1/2 to 2 points."

The day's prevailing prices were:

American	Bid.	Asked.

Advertise in The Mining Journal.

**RED TAGS EVERYWHERE**

**They Tell About the Greatest Sale of Pianos Ever Heard Of in Michigan.**

One of the most unique methods ever used in advertising direct to the people was adopted last week by Grinnell Bros. Music House to let all the people know about the sale of Summer Resort Pianos now in progress at their Escanaba store, and at their Ishpeeming branch in Anderson & Co.'s jewelry store.

A Red Tag was hung on every door knob in the city and a circular left with it telling in no uncertain language the story of the greatest special piano bargain sale offered by Grinnell Bros. during 1907.

The large number of pianos rented by the firm for use at many Michigan summer resorts, are all returned within a space of about four weeks. Rather than store them at large expense, it was decided this year to sell every one at a discount equal to all the rent collected and in some cases more, in order to make room for new fall stock.

Every one of these Summer Resort Pianos is warranted by Grinnell Bros. to be in first-class condition and worth more money than is being asked. They have been in the best summer homes in the state. No real damage has been done to any of them and they defy anyone to show for the contrary.

While the sales for the first four days were very large, more instruments are coming back by every train, and the second week of the sale finds the stock on the floor even larger than at the opening of the sale. As the rent received is more the longer the pianos are rented, a greater discount is offered now than on those returned earlier.

Have you been thinking for six months or more about buying a piano, or do you expect to buy one "some time" in the future? The sale is bona fide—the discounts are real. The prices have not been raised so apparent discounts can be made, which are not discounts at all.

Grinnell Bros. never make, nor stand for, misrepresentation. Their guarantee is good and it is put back of every piano sold by them at this sale of Summer Resort Pianos. The customers take no chance whatever except the certainty of a personal loss if advantage is not taken of the large discounts offered.

These pianos are sold on the usual easy payment plan (made famous by Grinnell Bros.) if it is desired. The cash price and the payment price are the same. Every piano marked in plain figures, and the best plan is to go to the store and see for yourself what wonderful bargains are to be had. The store is open evenings during this sale, so everybody can be accommodated.

You will find Steinway, Knabe, Schmeck, Chickering, Vose, Sterling, and many other well known pianos on the floors.

You cannot afford to miss this chance. Grinnell Bros. have already been asked by other dealers if they would sell these pianos in lots of a dozen or more, but such propositions have invariably been rejected, as the firm is determined to give the people (the consumers) the benefit of the great reductions offered.

**PRICES: 25 to 75 cents.**

9-20-07

PRICE IS REASONABLE.

A few weeks ago it was predicted by farmers in this city that potatoes would probably be unusually high this fall, but at the present time they are not commanding a very big price. While they are quoted from sixty to seventy cents per bushel in the Chicago and other large city markets, the farmers of this county are retailing them at from sixty-five to seventy-five cents. Only a small percentage of the potatoes have yet been taken out of the ground, as they are not ripe and only those wanted for immediate use have been dug. It will be from two to three weeks before the potatoes will be thoroughly ripened and it will be near the first of November before the last of the crops here will be harvested.

LOCAL LACONICS.

W. E. Nankeville's "Human Hearts" melodrama which has had an unusual success in this city, will be offered at McDonald's opera house this evening.

Dr. N. J. Robbins is expected to arrive home this morning from his European trip. He and his mother, who accompanied him, arrived in Chicago Saturday.

Dr. R. W. Obrembt of Milwaukee, who has been in the city, attending to the practice of Dr. N. J. Robbins while the latter has been abroad, left Saturday night for his home. He will be back again today, remaining a few days before completing his work here.

The walls of the new block being erected by the Odd Fellows of this city have been extended to the first floor and the rafters were put in position yesterday. Contractor Solar expects to have the building enclosed within two or three weeks, provided the weather remains favorable for outside work.

James Gaffney and wife left yesterday for Milwaukee and Oshkosh on a visit of a week or more. While in the latter city Mr. Gaffney will endeavor to dispose of his residence property, which he purchased a few years ago, after locating there. The family has concluded to remain permanently in Negaunee.

The workmen employed converting C. G. Griffey's big barn into a tenement house are making good headway with the work. The interior has been rearranged and will be ready for the plasterers within a few days. A new foundation has been built and the structure has been raised from two to three feet. The exterior has been painted.

The regular monthly meeting of the board of education will be held Friday evening. It is possible that the contract for the plumbing for the new high school structure will be awarded at that time. Bids for the work were received from three different parties at the time the bids were submitted for the construction of the building, but the board decided to hold them over for a month or so.

The Bell Telephone company's men are making good headway with the improvement work in this city. The big cables have already been put in position, although they have not yet been spliced. C. A. Walker of Detroit, who is installing the new switchboard, said yesterday that the transfer from the present office can be made inside of a week or ten days. Mr. Walker expects to remain here about two weeks.

The announcement in yesterday's issue of The Mining Journal of the death at Virginia of Mrs. Robert Koob, formerly of this city, was a shock to her relatives and friends in Negaunee, as it was not known that she was ill. As Miss Kallink the deceased taught school for a short time in Negaunee and after her marriage she lived here for a time before moving to the Mesaba with her husband. The remains will be received in Ishpeming this morning.

Show the substitutor that you have a mind of your own by getting what you ask for.

# Negaunee Department

## NEGAUNEE TO HAVE VAUDEVILLE THEATRE

ILLINOIS MAN HAS LEASED VACANT STORE ROOM IN SUNDBERG BLOCK--WILL REMODEL FRONT AND IMPROVE THE INTERIOR.

Floyd D. Archer, who conducts two moving picture theaters at Chicago Heights, Ill., has leased the vacant store room in the Sundberg block for a period of three years and will open a vaudeville theater there. Mr. Archer has leased the latter part of last week and left Sunday night for Chicago, to purchase opera chairs and other equipment for the house.

Before leaving here Sunday Mr. Archer let a contract for the remodeling of the front, the building of a stage and gallery, and the decorating. The latter will be done by Trembath Bros. of Ishpeming, who decorated the two moving picture theaters in that city. W. B. Shaver of Ishpeming has the contract for the carpenter work. The present front will be entirely remodeled and arches will be put in, similar to those in the Ishpeming picture houses. It will be brilliantly illuminated.

Before leaving Negaunee Mr. Archer said that he intended to fit up a modern place, and something over \$1,000 will be spent for the remodeling of the front, the decorating, and the equipment. The stage will extend across the entire width of the room and will be equipped with scenery. It is expected that there will be seating capacity for about 300 people on the main floor and about fifty in the gallery.

In addition to presenting vaudeville attractions, moving pictures will also be shown and there will be illustrated songs, the entertainment lasting one hour or more. Mr. Archer has had several years experience in the show business and expects to secure some good people for his house. It is expected that the attractions appearing here will be the same as those appearing at Marquette and Calumet. Three or four entertainments a day will be given.

Five-Cent Theater.

John F. Allison, proprietor of the jewelry store and billiard hall in the Sundberg block, yesterday advised The Mining Journal that he intends to open a five-cent moving picture theater in the large room directly opposite the main stairs on the second floor, to which place his billiard hall was removed during the time he conducted the moving picture theater at the rear of his jewelry store. The room was nicely decorated and the billiard hall was about to be opened when Mr. Allison concluded to close the theater down stairs. He has the greater part of the equipment used in his down stairs house, so that it will not cost him a great deal to fit up the place on the second floor. The program will consist of one reel of film from 200 to 500 feet long and one illustrated song, the entertainment lasting from twenty to thirty minutes. Mr. Allison will begin to install the equipment at once. He and Mr. Archer both plan to open their houses a week from Saturday night.

Mr. Allison was forced to close his theater on the ground floor because certain regulations in the insurance law were not being complied with. He said yesterday that he will be able to live up to all of these regulations will be lived up to, and that there will be no further trouble on that score.

Wonderland May Close.

Carl Holmberg, manager of Wonderland, in McDonald's opera house, said yesterday that he may decide to close the theater and again go on the road. His lease expires within a few weeks. Mr. McDonald desires him to renew, but he has not yet made up his mind to remain permanently.

Wonderland has been a success from the start and Mr. Holmberg has made money there, but he thinks he can do even better traveling. He had a moving picture show on the road for several years before opening Wonderland, having conducted the business in partnership with his father, who is now managing moving picture houses at Iron Mountain and Crystal Falls. If Mr. Holmberg goes on the road he will probably produce the "Passion Play" exclusively. He returned on the "Life of Christ" for some time and his talks in connection with the "Passion Play" produced here recently at Wonderland was a strong feature of the entertainment.

BONDS TO REMAIN AT HOME.

The Negaunee officials had no difficulty finding home people to take up the \$10,000 bond which are to be issued on account of the improvements at the municipal lighting plant. The announcement in a previous issue of The Mining Journal that bids were desired for the bonds was all that was necessary to bring out a sufficient number of applications from local people to take up the entire allotment. At a meeting of the council the next evening, held for the purpose of canvassing the vote, the mayor advised the board that all of the bonds would be placed at home. They are to be issued at 5 per cent, commencing Oct. 1. With this \$10,000 worth of bonds issued the bonded indebtedness of the city will be only \$29,000.

ORE SHIPMENTS LIGHT.

Less Ore Moving from the Mines Now Than at Any Previous Time This Year.

The employees in the ore shipping departments of the railroads are not as restless as they were some weeks ago. While the falling off in the movement of ore is not very great, there is less going forward now than at any previous time this season. The curtailment is largely due to the fact that there are not as many boats arriving at the ports as there were earlier, and it is reported that most of the docks are filled with ore, while many of the cars are also loaded and standing in the yards.

In spite of the present lull, it is expected that the season will be a record breaker in the tonnage of ore shipped from this range. The heavy shipments while the Mesaba strike was on greatly increased the tonnage sent out as compared to a similar date last season. Since then the movement of ore has been normal until a few days ago, when the docks began to fill up. There are not as many steam shovels in operation now as formerly, as most of the ore shipped is going forward from the pockets. From present indications there will be very little, if any, large stockpiles left at the mines on this range at the close of navigation.

While the ore shipment is light the movement of coal is now greater than it has been at any previous time this season. The shipments will continue to increase from now on, as all of the mines as well as the coal dealers, are stocking up for the winter. There is hardly a day passes but some coal arrives for one or more of the range properties. The Oliver Iron Mining company is at present dumping coal at several of its mines.

EDUCATIONAL MEETING.

Annual Session of Upper Peninsula Association Will Be Held at Escanaba.

It is expected that this year's meeting of the Upper Peninsula Educational Association, which will be held at Escanaba Oct. 31 and Nov. 1 and 2, will be one of the most successful the organization has held. The program has not yet been completed, but it will be unusually interesting. Educators of national prominence will be secured to make the principal addresses.

During the three days of the meeting all of the schools of the upper peninsula will be closed, and it is expected that the superintendents and teachers will attend. A number of the superintendents, county commissioners and teachers, will participate in the various programs. The committee on resolutions, of which H. E. Kratz of Calumet is chairman, will convene before the regular session to draft such resolutions as may be deemed desirable for the consideration of the association. It is predicted that there will be nearly 1,000 teachers present. Special rates of fare will be given on all the railroads and special rates are also to be given at the hotels and boarding houses in the city.

"PANAMA"

The following names of the players in the successful melodrama "Panama," which will be seen here at McDonald's Opera House, are a guarantee of the worth of the attraction from an artistic standpoint. Miss Margaret Minton, formerly with Chauncey Olcott, Miss Marcelle Marion, for two years character woman with Richard Carle, Miss Juanita Russell, last season with the Frawley Stock company, Joseph H. Morrison with Frederick Ward, E. K. Conaughy from the Kirk LaSalle forces; Scott Leslie, last season with the Orpheum circuit, and others equally capable. Seats are on sale at Perkins' drug store.

## ISHPEMING

PICTURE ENTERTAINMENT.

The Moving Picture company of Washington, D. C., will fill an engagement at the Ishpeming theater Friday and Saturday evenings of this week, producing Edison's genuine moving pictures in natural colors, with full equipment. There will be a complete change of program each evening. Nearly everyone has seen moving pictures in plain black and white, but very few have seen pictures in their natural colors. The difference is as great as that between a common charcoal sketch and an oil painting. The cost of a hand-colored picture is from three to five times as great as that of an uncolored one. Some idea of the tediousness of the coloring process can be gained when it is considered that a picture fifteen or twenty feet long on the screen is really less than an inch square at the machine, and a life-size figure is less than a quarter of an inch high. Yet each is as perfect as in life. The process is a secret one, and it is claimed there are only two persons in the United States—both women—who do this work. The admission prices will be ten, twenty and thirty cents.

WOODMEN'S BIG INITIATION.

Director C. J. Byrns of the Modern Woodmen of America will leave today for Detroit to attend the adoption of a class of 1,000 members. This will be the largest number of members ever admitted by the Michigan Woodmen at one time. Others of the head officers of the order will be present, and it is expected that the meeting will be attended by a greater number of members than any other previous rally of Woodmen ever held in the state. On his return home Mr. Byrns will probably be accompanied by his friend, Dudley C. Watters, president of the First National bank of Grand Rapids and vice president of the Michigan State Telephone company. Mr. Byrns received a telegram from Mr. Watters yesterday, advising him that he was coming to Ishpeming next week to visit him at the conclusion of his sojourn at Petoskey, where he has spent the past two weeks.

ISHPEMING IN BRIEF.

Mrs. John Keifer has gone to Detroit for a two weeks visit.

Mrs. June Blackney is visiting relatives at Iron Mountain.

Miss Emma Dugas of Menominee is visiting Mrs. George Jones.

Jacob Levine of Champion transacted business in the city yesterday.

O. D. McClure and wife arrived in the city Sunday and are keeping house on Jasper street.

State Bank Examiner Zimmerman was here yesterday from the lower peninsula. His home is at Pontiac.

F. Branstad & Co. announce their fall millinery opening for Thursday, Friday and Saturday of this week.

There will be no meeting of Zenith lodge, Knights of Pythias, Wednesday evening, the hall being used by the St. Joseph's church fair.

The Grand theater will offer its patrons moving pictures of the "Passion Play" for four days, commencing today.

Mrs. Robert Cuthb and children have arrived here from the Soo and have started housekeeping in the Carlson dwelling on East Ely street.

Herman Jaedecke arrived home Sunday from Chicago, where he accompanied Mrs. Jaedecke, who is to remain there a short time receiving treatment for rheumatism.

Anderson & Kibbide had a concrete walk in front of John Nolan's residence property on Second street between Cleveland avenue and Pearl street, yesterday.

The valve put in the water main at the intersection of Division and Pine streets Sunday morning burst early that evening and it was necessary to shut off the water again while it was being repaired.

The funeral of the late Alfred J. Wills, one of the victims of the Rolling Mill mine disaster, was held yesterday afternoon under the auspices of St. Ignace rectory Davey lodge, Sons of St. George. It was very largely attended. Members of

both societies in this city, also of the Negaunee lodge, escorted the remains. Services were conducted at the Division street Methodist church by Rev. C. L. Adams, the pastor.

Dr. N. J. Robbins and his mother, Mrs. E. Robbins, will arrive home this morning, to be accompanied by Dr. E. G. Robbins, who went to Chicago Saturday to meet them.

August Hendrickson announces that his display of fall millinery will take place Sept. 30 to Oct. 3. Miss Anna Anderson, in charge of the department, returned recently from the markets, and goods are now being received.

Anderson & Kibbide, the concrete walk builders, do not expect to complete their season's work here until the cold weather sets in. They have a large number of jobs contracted for, and they will have no trouble keeping their men constantly employed.

Robert Maxwell has been very much annoyed by cows that have been damaging his lawn, on which he has expended considerable money. Naturally he has been much provoked. One of the cows was gathered in Sunday morning by Poundmaster Tasson.

The ladies of St. Joseph's church congregation living in the Third ward will serve a chicken pie supper tomorrow evening at the fair. The charge will be twenty-five cents. The Misses Minnie Shoney, Flora and Anna Lemire, Della Perrault and Louise Trombley will serve. A chicken pie supper also will be served tonight.

### PRIZES ARE OFFERED TO MINING STUDENTS

INTERESTING FACTS CONNECTED WITH COLLEGE OF MINES ARE BUT SLIGHTLY KNOWN.

### FUND PROVIDED BY LONGYEAR

Peter White, D. H. Ball and J. M. Longyear Control \$10,000 Trust Fund to Be Used at Houghton School.

It is a fact but slightly known that Marquette has a direct interest in a number of the prizes, scholarships and funds of the Michigan College of Mines at Houghton. One of the funds of the school is \$2,500 given by J. M. Longyear. This is to be used in aiding students of the college by loans to those who are unable to maintain their connection with the school without such aid. The conditions governing loans from this fund are that they may be made upon recommendation of the faculty to students who have completed at least one term of study, and who are deemed worthy.

Upon a receipt of a loan from this fund, the student receiving it shall give his note for the amount of the loan. The note shall bear interest at the rate of 5 per cent per annum for the first three years from the date of the student's graduation or of his leaving college, and for the following two years at the rate of seven per cent per annum. It will then be due.

This method of loaning Mr. Longyear believes to be of more benefit to students than outright gifts, as it affords the opportunity to a student of paying for his education and at the same time gives him financial help when he most needs it. Besides this loan fund, J. M. Longyear for some years has offered a number of prizes, which are explained in the following letter sent by him announcing the offer:

"I wish to offer three first prizes of seventy-five dollars (\$75) each, and three second prizes of fifty dollars (\$50) each to be competed for by the members of the senior class of the Michigan College of Mines. The competition to be by means of papers on three subjects, written by members of the class, and submitted to the board of control for examination in such a manner and at such a time as the board may determine. I desire subjects selected with a view of producing papers which will be of practical use in developing the mineral resources of the State of Michigan. I should like something which would be of service to the average woodsman or explorer, and suggest the subjects of Practical Field Geology, and the use of the Dial and Dip Compass in explorations; leaving the selection of the third subject to the judgment of the board. If this offer is accepted and there are two or more papers on each subject submitted, I will pay seventy-five dollars to each of the writers of the three papers which may be awarded the first prizes, and fifty dollars to each of the writers of the three papers which may be awarded the second prizes.

I would suggest, however, that in case only two papers are submitted, the board reserve the right of awarding only one prize, in case such action should seem advisable. In case only one paper should be submitted, I should like the board to exercise its judgment in awarding a prize. It is my desire to publish the papers under the writer's name, in pamphlet form, for distribution among miners, explorers, land owners and others. Yours very truly, J. M. LONGYEAR."

In conformity with the foregoing letter, the board of control have decided upon the following subjects and conditions:

**Subjects.**  
Field Geology; its Methods and their Applications.  
The Dial and the Dip Compass and their Uses.  
The Diamond Drill and its Uses.

The conditions under which the prizes are awarded are as follows:  
The papers are to be presented by August 15th, for each year. A student may write upon each of the three subjects, which will entitle him to three prizes, if his papers are found worthy. The dissertations must be prepared in the same manner as the theses, the regulations for which can be procured on application to the secretary of the college.  
The title page is to have upon it an assumed name, and each paper is to be accompanied with a sealed envelope bearing the same name. This envelope must contain the writer's true, as well as assumed name, and his address. It will be opened until the awards have been made.

No prizes will be awarded, unless the papers are judged by the committee to whom they are referred, to be of a sufficiently high standing to be entitled to a prize; hence, there may be awarded all, part, or none of the prizes, as the case may be. These prizes can now be competed for by any student of the college whether special, graduate or regular, without restriction to the graduating class.

**\$10,000 Fund.**  
A fund of the college is one of \$10,000 given some years ago by A. Lanfear Norrie. As told in the following announcement of the gift, it is controlled by three Marquette men: Peter White, D. H. Ball and J. M. Longyear.  
"I, A. Lanfear Norrie, of the city of New York, hereby give, grant, assign, and set over unto the Michigan College of Mines, of Houghton, Michigan, and to Peter White, D. H. Ball and J. M. Longyear, of Marquette, Michigan, as trustees, the sum of ten thousand dollars (\$10,000), lawful money of the United States.  
The conditions of this gift, and upon which this fund is to be taken, are that the said trustees shall invest the same upon bond and mortgage in the City of Marquette or in the City of Detroit, in the State of Michigan, or in the City of Milwaukee, in the State of Wisconsin, or in the City of Chicago, in the State of Illinois upon unincumbered improved real estate.

"That one-half of the income of said sum of \$10,000 shall be paid yearly by said trustees unto the board of control, for the support of some student whose father has worked in, or in some way been connected with mining operations in the Upper Peninsula of Michigan, who shall be designated by the faculty of said college; and the remainder of said income shall be accumulated and invested as said principal shall be invested, and that this fund with its accumulations shall be the basis of a larger fund, to be obtained from other contributions, amounting to at least one hundred thousand dollars (\$100,000), to be used for the erection of a dormitory building for the use of such students as shall be designated by said faculty; which building, when erected, shall be under the exclusive control of the corporation of board of control of the said Michigan College of Mines.  
This gift is to the said trustees and their successors forever, for the benefit of said college. In case of the death of either of said trustees, the survivor or survivors shall appoint a successor or successors.  
When the erection of said building shall be commenced, after the said fund of one hundred thousand dollars is obtained, the sum hereby given, with all its accumulations, shall be paid over to the said college for the purpose aforesaid.  
Witness my hand, the 30th day of January, 1890.  
A. LANFEAR NORRIE."  
**MANTHEL-HOWE WEDDING.**  
Popular Normal Girl and Young Physician Married Last Night.

Marquette's water board is still on the job. It is still doing business at the same old stand and water is selling at the same old price. There was a meeting of the water board last night.  
**To Hear Objections.**  
The purpose of last night's meeting was to hear objections to plans recently announced by the board for supplying North Marquette with water. The result of the meeting is that the announced plans are to be altered and another meeting of the same sort is to be held. The indications are that North Marquette will get water.  
In the announced plans, the board stated that mains would be extended as far north as Center street. It is now proposed to extend them as far north as Norway street and there may be other extensions. Besides this change, the mains will not be laid in certain of the streets announced in the first plans. Just exactly what changes are to be made has not yet been fully determined.

**SWEDISH MASSAGE**

### MEETING OF WATER BOARD LAST NIGHT

BODY SUSPENDED BY ACTING MAYOR LISTENS TO OBJECTIONS TO PROPOSED PLANS.

### TO HOLD ANOTHER MEETING

Northside District in Which Proposed Improvements Are to Be Made Will Be Enlarged and Extended.

Marquette's water board is still on the job. It is still doing business at the same old stand and water is selling at the same old price. There was a meeting of the water board last night.  
**To Hear Objections.**  
The purpose of last night's meeting was to hear objections to plans recently announced by the board for supplying North Marquette with water. The result of the meeting is that the announced plans are to be altered and another meeting of the same sort is to be held. The indications are that North Marquette will get water.  
In the announced plans, the board stated that mains would be extended as far north as Center street. It is now proposed to extend them as far north as Norway street and there may be other extensions. Besides this change, the mains will not be laid in certain of the streets announced in the first plans. Just exactly what changes are to be made has not yet been fully determined.

**NEBEL OBJECTS.**  
Nebel, the single member of the board who was not included in the suspension announcement of Acting Mayor Asire was the first to voice objection to the plans at the meeting last night and the reasons he gave were practically the ones advanced by the other objectors. There were not more than a dozen at the meeting.  
Nebel stated that he objected because never before had the property benefited by an improvement of the sort now proposed been assessed in the city. The property benefited, he stated, for years has been paying a water tax and has not been receiving a water supply. He stated that the Lake Shore Engine works was to be supplied by the board, but that no assessments had been made. In answer to this last, a board member stated that it had not yet been determined where the mains for the Lake Shore Engine works are to be laid. Nebel also said that a part of the mains to be laid as proposed, passed Normal school property and that the board had not assessed this property. A charter provision denying the right of the board to tax public property was produced and he said that the property had been assessed for other improvements. A member of the board said that if it were found that they could make assessments against this property, such assessments would be made.

**SCHAUER OBJECTS.**  
Alderman Schauer was another one who voiced objection. He spoke of the fact that the district had paid a water tax for a long period, and had not received a water supply. A member of the board answering said that the water tax had been exceedingly light and stated that as North Marquette property had been without a water supply, the general tax assessment against it had been very low.  
J. E. Sherman stated that he represented Longyear and Ayer and he said he wished to voice the objections advanced by the others. He said that the interests he represented had no use for the water in two of the blocks where the board proposed to lay mains, and upon the suggestion of a member, these two blocks are not to be included in the new plans. James Deegan was another of the objectors.  
It is in line with a suggestion made by Mr. Sherman that the plans are to be changed in the district in which the improvement is to be made, enlarged. The reason that another meeting to hear objections will have to be held is that it is so prescribed by the law which governs the board.

**THE WATER QUESTION, AGAIN.**  
To the Editor of The Mining Journal:  
The attempted removal of the water board by Acting Mayor Asire will not, I believe, and ought not to command general approval. It looks too much like a blow struck for certain interests by one of those interested. It is an action of doubtful legality, and I am heartily opposed to attempting to test its legality. We were not asking for a dog fight, just now and yet that seems to be the idea; a fight might divert attention from the main issue. But, in passing, I am glad the board has struck back hard enough to show that the council is really responsible for the crocodile nuisance. They had it in their power to guard absolutely against it, and they did not, and they are asking the water board to take all the blame. My sympathies are all with the under dog, not that I would make a canine comparison for the members of the suspended board, except so far as they are "good setters."  
The action of the acting mayor is a hindrance, not a help. We want practical results, and these call, not for the creation of parties and bitterness, but for co-operation.  
It would not be at all impossible that a new board might find itself in difficulties from which they might greatly wish to be relieved by advice from the suspended members.  
Do not let this be taken as a change of heart. I am not going to propose the water board, but I would like to be fair to them, and I would like to co-operate with them or anybody who can relieve the situation.  
Yours truly,  
G. MOFF WILLIAMS.
