

TROOPS ARE BOOKED FOR EXTENDED STAY

Will Be Two Years at Least Before It Will Be Possible to Withdraw the Army of Occupation from Cuba.

Political Unrest Continues, and It Is Not at All Unlikely It Will Eventually Be Necessary to Establish an American Protectorate—Fifty Million Dollars to Be Expended on Good Roads to Make All Portions of the Island Easily Accessible.

Washington, Nov. 10.—Cuban affairs have been almost lost sight of by reason of the interest taken in various other matters, such as the financial situation, presidential politics, the visit of the fleet to the Pacific coast and the like.

At best it will be well toward two years before the American troops will be withdrawn from the island. It has been announced by Secretary Taft that the municipal elections will take place after the completion of the census.

Political Parties Split. The liberal party is split into two factions, followers of Jose Miguel Gomez and Alfredo Zayas, each ambitious to be president.

Some Want Annexation. Among business men, so the information reaches here, there is much sentiment for outright annexation, but there would be considerable opposition in this country to annexing Cuba.

Manila, Nov. 10.—During the visit of Secretary Taft to Aguinaino he attended several functions for the first time since his capture. Discussing the probable results of the visit of Mr. Taft he said today:

INSULTING TO WILHELM.—British Commander's Signal May Cost Him His Commission.

London, Nov. 10.—An extraordinary incident has occurred in connection with the visit of Emperor William. At the conclusion of the recent maneuvers of the channel fleet the first cruiser squadron was ordered to repaint, in honor of the German emperor.

LONDON WANTS HIM. Will Be Keenly Disappointed if Taft Does Not Visit England.

London, Nov. 10.—If Secretary Taft does not visit England on his way home from the East, it will be a keen disappointment to many admirers.

Fog Delays Kaiser's Yacht.

London, Nov. 10.—The German imperial yacht Hohenzollern, which is being repaired at Southampton, is expected to enter the harbor on Friday night.

TERRORISTS BAFFLED. Supposed Plot to Kill the Czar Frustrated by Vigilance of Railroad Guards.

St. Petersburg, Nov. 10.—What is believed to have been a carefully conceived plot to take the life of Emperor Nicholas while enroute from Peterhof to the winter palace at Tsarskoe Selo was frustrated by the vigilance of the railway guards.

Early in the morning a guard discovered six men trying to cut the signal wire at Ligovo station at the junction of the railroads to Peterhof and Tsarskoe Selo.

STILL MME. ANNA GOULD. Story of Marriage to Prince De Sagan Is Considered Untrue.

Paris, Nov. 10.—There is every reason to believe that the report that Mme. Anna Gould, recently divorced from Count Boni De Castellane, has been married to Prince Belle De Sagan is untrue.

DEAD NUMBER 14,000. Nearby Villages as Well as Karatag Destroyed by Earthquake.

St. Petersburg, Nov. 10.—The first direct reports from the great earthquake at Karatag, Russian Turkestan, about three weeks ago, reached here today from a correspondent who accompanied the relief expedition sent from Jamarakan.

SPIES IN LIMBO. Ringleaders of an International Gang Arrested at Toulon.

Toulon, Nov. 10.—Five of the ringleaders of an important association of international spies were arrested here today. The authorities also got a mass of papers.

ANTI-CLERICALS WIN. Claim Sweeping Victory in the Municipal Elections in Rome.

Rome, Nov. 10.—General municipal elections were held here today. It was declared tonight that the anti-clericals have gained the greatest victory since the fall of the church from temporal power.

GENERAL BOOTH STARTS HOME.

New York, Nov. 10.—General William Booth, the father of the Salvation Army, sailed yesterday on the steamer St. Louis for Europe.

GIVES PRESIDENT VALUABLE TIPS

Attorney Eugene E. Prussing of Chicago Is Caller at the White House to Present His Views on Corporate Reform.

Nation's Chief Executive Compliments Him—Finds the Suggestions Practical, Some Entirely New, and Will Give Them His Serious Consideration—National Supervision Over All Banks, State Control of Corporations, the Basis of the Proposition.

Washington, Nov. 10.—Attorney Eugene E. Prussing, of Chicago, former president of the Chicago association there, called on the president yesterday to present his views on corporate reform.

The change of state banks and trust companies to national banks, which can be accomplished by a single amendment to the national banking act, would be popular, and can be along state's rights lines.

MICHIGAN BANKS. Can Take Out \$6,744,000 in New Note Circulation.

Washington, Nov. 10.—Delegations of business men from various commercial centers are still coming to Washington for the purpose of trying to induce the secretary of the treasury to enlarge the government deposits in their respective cities.

EAST HAS NO SHOW. Both the Republican and the Democratic Convention to Be Held in the West.

Washington, Nov. 10.—The situation regarding the meeting places of the two great national conventions next summer may be put like this:

WEATHER FORECAST

COMMITTS SUICIDE BY INHALING GAS

Mrs. Julia Moran Wyman, Wife of a Wealthy Chicago Clubman from Whom She Had Separated, Ends Her Life.

Famed as an Oratorio Singer She Created a Sensation Some Years Ago by Abducting Her Children from the Family Home at Evanston and Taking Them to Europe After Cleverly Eluding the Detectives in the Employ of Her Husband.

WESTON AT SYRACUSE.

Syracuse, N. Y., Nov. 10.—Edward Peyton Weston, the veteran pedestrian, walking from Portland, Me., to Chicago, spent a quiet Sunday here, and is greatly refreshed as a result.

SHOT MAN FOR DEER

Bessemer Hunter Gives Himself Up—Now Faces Ten Years in the Penitentiary.

Bessemer, Mich., Nov. 10.—John Walcott, in from hunting at North Bessemer, reports that he shot a man, presumed to be a deer, for a deer.

ELEPHANT EXECUTED.

Bridgetown, Conn., Nov. 10.—Columbia, the first elephant born in this country, was executed in the presence of twenty other elephants in this city.

FOR GOEBEL'S MURDER.

Fourth Trial of Caleb Powers Will Open This Morning.

Lexington, Ky., Nov. 10.—For the fourth time Caleb Powers will be put on trial at Georgetown on Monday for alleged complicity in the assassination of former Governor and Senator William Goebel in 1900.

DEATH OF JUDGE M'COMAS.

Washington, Nov. 10.—Louis Emery M'Comas, associate justice of the court of appeals of the District of Columbia, former United States senator and for four terms a congressman from Maryland, died today from heart failure.

GREAT FIRE IN CHILE.

Liquique, Chile, Nov. 10.—This port was visited yesterday by a fire, the biggest since 1882. The losses are over \$1,000,000. Seven blocks were burned, and 2,000 persons are homeless.

GEORGE ADE'S TOWN DRY.

Laport, Ind., Nov. 10.—Beginning Monday four counties in northwest Indiana will become dry.

(Continued on Page Five.)

The backsliding of Pittsburg, seen in retrospect, was the beginning of the end of the International Hockey league.

The percentage of hoarded money in the Lake Superior region is very small. Most of the loose money has some time since been put up in margins.

There is no doubt about the demise of the International Hockey league. The managements of both the American and Canadian Soo teams, also the Portage Lake team, have announced that they will give up the game for this season at least.

If the Calumet & Hecla miners persist in striking because of the proposed wage reduction of 12 1/2 per cent they will doubtless discover, and that without any loss of time, that the Calumet & Hecla company is not very particular whether or not it produces copper for the present metal market.

It has been virtually decided to submit the new constitution as a whole for ratification. The legislature enacted that this should be done, but many of the delegates have questioned the legislature's right to in any way dictate to the convention, and the project of submitting the instrument by provisions has been seriously discussed.

Senator Smith is thoroughly convinced that Michigan wants another term of Roosevelt. Nine out of ten voters in the state, regardless of politics, want to see the president renominated, he says.

The late striking telegraphers have found little opportunity to secure employment. The trouble has been not so much discrimination against them as the fact that the telegraph companies had succeeded in so completely filling their offices with strikebreakers that there were no places.

SUPERIOR TRUST COMPANY HANCOCK MICHIGAN Capital - \$150,000 This company is under the supervision of the state banking department...

unitied to see them through, and even then they are hard to win. Whatever the merits of the telegraphers' case, and they were not inconsiderable, the issue has proved that their strike, at the time it was called, was a great mistake, and one for which the individual members of the union have already suffered heavily and are destined to suffer further.

Those Republican papers and those Republican leaders who have not been in accord with the Taft movement at any time since its inception have been hailing the election of Tom Johnson in Cleveland as definitely putting Secretary Taft out of the presidential race. They arrive at this conclusion by considering that the administration would have liked to have seen Burton elected mayor of Cleveland, and did what it could to bring about that result.

AN IMPORTANT CONFERENCE. What the Washington correspondents generally regard as a conference that will have an important bearing on next year's politics has been set for Washington on the 16th, when President Roosevelt will meet State Chairman Woodruff and other Republican leaders from New York.

At the forthcoming conference it is stated that there will be a frank discussion of the presidential situation. The president, it is asserted, will be informed that the New York delegation cannot be delivered to any man but a New Yorker. He will be frankly told that Taft cannot have it. Two men can have it, the president himself, or Governor Hughes.

Let a man with these characteristics make head as a presidential nominee and there will be little likelihood of the president's paying any attention to the demand that he again be a candidate. If anything could shake his announced resolve to retire with the completion of his present term it would be the outlook that the next administration was to be dominated by his enemies and near friends.

MINE INSPECTION. A few days ago The Mining Journal reprinted an article from the Soo News the burden of which was an argument for state inspection of mines, on the grounds that the system of county inspection cannot be depended on to insure the best working conditions for the miners, as the county inspectors are elected by the boards of supervisors and the boards of supervisors in the mining counties are controlled by the mining companies, which naturally protect their own interests.

thirty-seven fatal accidents occurring in the last fiscal year. In the current issue of the Iron Ore, George A. Newett has an extended discussion of the subject, in which he defends the present system and asserts the belief that it is more effective for the protection of the men, the determination of the causes of accidents, and the cutting down of the risk to the miners, than any system of state inspection could be. He says, in part:

Now let us see how the state inspector would act: The accident occurs at the Rolling Mill mine and the state inspector is telegraphed, arriving today, tomorrow, the next day, or next week, according to the press of business he has in hand. Upon his arrival he goes to the place where the accident occurs. He finds the hoisting machinery in good condition, the cables sound, the brakes intact, the cage bent but together, but the men are dead. He may summon witnesses and proceed as does the average coroner's jury. He discovers that the men were handled on the cage in safety, that the cables were not broken, but that the cage bent but together, but the men are dead. He may summon witnesses and proceed as does the average coroner's jury.

And you hadn't lost the money at all? Inquired a companion of the fortunate possessor, as the two comfortably rested their elbows on the bar and proceeded to hide the respective ends of their noses in a couple of glasses. "Of course not. But, you see, I gave the kid two shillings, which was certainly fair. And I used eighteen shillings to the good," exclaimed the individual, as he tossed the coin under discussion on to the counter and called for change. The barmaid picked up the coin, gave it a careless glance, and quietly pushed it back.

To the Preacher. The preacher was making his annual call. In the midst of the conversation the small son of the family, named Reginald, came running in. His clothes were torn, and one of his eyes was blackened. "Reginald," said the preacher, "you've been fighting again. Your clothes are torn and you have a black eye. Fighting is very wicked. Come here and let me pray for you."

The Cause of the Smash-up. The old dorky was suing the railroad company for damages. The man contended that not being warned by whistle or engine bell he had started to drive his rig across the company's track when a lumber box car of said company crashed into his outfit, causing the death of the horse, loss of the wagon and minor injuries to himself. After the prosecution had closed its side of the case, the company's lawyer called the old dorky to the stand and asked him a few questions.

Bill Nye's Cow. Bill Nye, the humorist, once had a cow to sell, and advertised her as follows: "Owing to my ill-health I will sell at my residence, in township nineteen, range eighteen, according to the government's survey, one plump raspberry cow, aged eight years, of an unusual color, and a very nice milk freemaster. To a man who does not fear death in any form she would be a great boon. She is very much attached to her present home with a stay chain, but she will be sold to any one who will agree to treat her right. She is one-fourth shorthorn and three-quarters byena. I will also throw in a double-barrel shotgun, which goes with her. In May she usually goes away for a week or two and returns with a tall red calf with wabbling legs. Her name is Rose. I would rather sell to a non-resident." - Judge's Library.

CANT BE SEPARATED. Some Marquette People Have Learned How to Get Rid of Both. Backache and kidney ache are twin brothers. You can't separate them. And you can't get rid of the backache until you cure the kidney ache. If the kidneys are well and strong, the rest of the system is pretty sure to be in vigorous health. Doan's Kidney Pills make strong, healthy kidneys. Charles Viery of 106 Oak street, Ishpeming, Mich., says: "Terrible pains through the back over the kidneys bothered me for several years, and in addition I suffered with a weakness of the bladder that caused me untold annoyance. I was unable to control the kidney secretions night or day, and this trouble was very embarrassing. I was weak, and could do nothing for nothing I did seem to help me, and at length I really stopped trying medicines. One day I read that Doan's Kidney Pills had cured somebody of kidney weakness and the case seemed to be so much like mine that I felt a hope and got a box and began using them. This one box rid me of the pain and added some strength to my back. I got a second and a third box and the result of this continuation of their use was a complete cure. I feel twenty-five years younger than I did before I used Doan's Kidney Pills. Plenty more proof like this from Marquette people. Call at The Stafford Drug Co.'s store and ask what their customers report. For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other."

Why Cuddey's Peacock Ham and Eggs of course; they are always acceptable, especially at this season of the year. (11-27-eod)

maturely and slowly. Ground will fall upon men and men will fall into shafts. Dynamite will be destructive so long as it is used. Gases will form, fires will start and timbers will give way. Men will fall out of skips and off ladders, will be thrown from trestles and killed by electric wires. It is regrettable that this is true, but there is no disputing it. If a state inspector could help we would be glad to engage him, but we cannot figure out where he has his headquarters over the system of protection now in vogue.

A STORY OR TWO.

Finding a Lost Sovereign. "Look here, mister! Did you drop this here sovereign?" The party addressed turned around and looked at the bookblack, as the latter held out a sovereign in his hand. "Why, good gracious! let me see—why yes; you're a fine boy, you are, but's a couple of shillings for you. That's right, my boy; be honest—it pays."

"And you hadn't lost the money at all?" Inquired a companion of the fortunate possessor, as the two comfortably rested their elbows on the bar and proceeded to hide the respective ends of their noses in a couple of glasses. "Of course not. But, you see, I gave the kid two shillings, which was certainly fair. And I used eighteen shillings to the good," exclaimed the individual, as he tossed the coin under discussion on to the counter and called for change. The barmaid picked up the coin, gave it a careless glance, and quietly pushed it back.

To the Preacher. The preacher was making his annual call. In the midst of the conversation the small son of the family, named Reginald, came running in. His clothes were torn, and one of his eyes was blackened. "Reginald," said the preacher, "you've been fighting again. Your clothes are torn and you have a black eye. Fighting is very wicked. Come here and let me pray for you."

The Cause of the Smash-up. The old dorky was suing the railroad company for damages. MARQUETTE COMMON COUNCIL PROCEEDINGS. (Official) Marquette, Mich., Nov. 4th, 1907. A regular session of the common council was called to order at 8 o'clock p. m. by the mayor, the Hon. John Robertson. Present—Aldermen Asire, Campbell, Corbett, Donovan, Downey, Ekstrom, McCarthy, Peters, Reichel, Schauer, Siegel and Williams—12. The record of the session of October 7th, approved. The petition of the Marquette Boiler & Sheet Iron Works and twenty-five others, requesting that an arc light be placed on Washington street in front of the Marquette Boiler Works was presented, and referred to the committee on parks, cemeteries, streets and sewers. The petition of John O'Falvey, requesting relief from the payment of taxes against his property, Lots 171, 172 and E. 1/2 of Lot 173 of Caroline Burt's Addition No. 2, for the year 1907, was presented, and referred to the committee on finance and taxation. The following was presented and referred to the committee on licenses and trade regulations: To the Common Council of the City of Marquette: The undersigned, George H. Knapp, respectfully states to your honorable body that the late fire in my place of business, at the corner of Front and Spring streets, has made it impracticable for me to continue in business, and I respectfully petition your honorable body to rebate to me the sum of \$250, being the portion of the tax paid on said business, from Nov. 1, 1907, to May 1, 1908, and that a warrant for the sum be drawn to my order upon surrender to the city of my red car tax receipt on said business for the current year. Very respectfully, GEO. H. KNAPP. The reports of the justices of the peace were presented and ordered placed on file. The committee on finance and taxation, to whom had been referred the petition of Andrew G. Larson, requesting relief from the payment of assessment against his property, Lot 145 of Blomhuber's Addition No. 1, amount \$41.41, for grading, curbing and macadamizing Blumebur avenue, recommended that the same be allowed. On motion of Alderman Asire, supported by Alderman Ekstrom, said recommendation was adopted and a warrant ordered drawn on the general fund, in favor of Robert P. Byrne, Treas., for payment of said amount. Yes—Aldermen Asire, Campbell, Corbett, Donovan, Downey, Ekstrom, McCarthy, Peters, Reichel, Schauer, Siegel and Williams—12. Nays—None. The committee on parks, cemeteries, streets and sewers recommended that Cleveland avenue be accepted as a public street, and that the recorder give notice thereof as required by law. On motion of Alderman Williams, supported by Alderman Campbell, said recommendation was adopted. On motion of Alderman Williams, supported by Alderman Asire, the following was adopted: Resolved, That the grade of Lake Shore boulevard and Walnut street, from Hewitt avenue to Arch street, and the same is hereby established in accordance with profile thereof made by Charles Cummings, civil engineer, and hereto attached, and that this resolution and said profile be duly certified by the recorder and placed on file. The controller presented the reports of the market keeper and poundmaster, which were ordered placed on file. The following bills and claims, having been audited by the controller and the committee on finance and taxation, on

Trains from Ishpeming and Negaunee arrive. 9:15 am HUNTING We can fit out all parties with good, substantial outfits. Hodgkins Bros. Co., Marquette 6-27-tf Michigan.

Copper Country

STEAMER LOUISIANA SINKS.

Nor'wester Drives Wooden Freighter Against Breakwater.

The steamer Louisiana, loaded with iron ore, sank in Lily pond, Portage lake, yesterday morning after a fierce battle with Lake Superior. The steamer reached the entrance to the breakwater at the upper end of Portage lake early yesterday morning, but the nor'wester which was blowing, and which was also filled with blinding snow, made her unmanageable. Captain Buchanan missed the entrance at the first attempt and rammed against the Breakwater pier. The steamer pounded on the rocks for a time until the breakwater. The life saving crew went to her assistance. Captain Buchanan finally got his steamer headed out into the open lake again. He steamed well out, and negotiated the turn with the steamer making water very fast through a big hole in her side, caused by contact with the rocks and the breakwater.

The second attempt was successful, and the steamer made the basin with eight feet of water in her hold. Captain McCormick and the life saving crew accompanied the Louisiana through the canal and into the harbor of refuge at Lily pond, where the Louisiana sank in twenty feet of water. Divers and tugs went to her assistance from Houghton, and it is believed it will be possible to raise her this week.

WILL SALVAGE THE SPOKANE.

Steamer Nef Will Take Cargo of Coal from the Wreck.

The steamer Nef of Duluth secured permission Friday night from the underwriters on the wrecked steamer Spokane at Gull island reef to salvage her cargo of blacksmith coal, and she left Portage Entry Saturday morning to make the attempt. The weather yesterday and Saturday was against it, and it was thought yesterday that the Nef had gone into Bete Gris for shelter. The Western line steamer Delaware will be in Houghton today to take on at the Copper Range dock one of the largest cargoes of coal forwarded from Houghton this season.

SEND TO AUSTRIA FOR ORGAN.

The Young Men's Catholic club of St. Joseph's Austrian church, Calumet, has sent an order to Austria for a \$6,000 pipe organ for the new church edifice. The cost will defrayed entirely by the club, and it said the organ will be the finest instrument of its kind in the peninsula. St. Joseph's church is to be the finest house of worship in the peninsula, the cathedral at Marquette alone excepted. It has been in process of erection for the past five years, and when completed it will be virtually free of debt, as the parish began the building under instructions from Bishop Eis not to incur any indebtedness.

C. & H. EMPLOYEES SUBMIT.

Convinced That Company Is Doing All It Can for Them.

The employees of the Calumet & Hecla Mining company, to the number of nearly 3,000, have unanimously voted to accept the reduction in wages announced by the company a week ago, and to take no further steps in the direction of expressing dissatisfaction with present conditions. They voted their confidence in the company and its management and their approval of the sentiments expressed in a letter from President Agassiz which was read before the meeting. None but employees of the company were present in the palestra, where the meeting was held.

The meeting was called by the committee of employees which was appointed a week ago to wait upon President Agassiz and Manager MacNaughton for the purpose of petitioning for the redress of minor grievances and a lesser reduction in wages than the 12 1/2 per cent which was announced. President Agassiz had addressed a letter to the employees, and the committee called the meeting for the purpose of reading this communication to all the employees.

The letter stated that in view of present industrial and financial conditions the company could not recede from its purpose to reduce the wages as announced. It also stated that the requests of the employees would be given careful consideration and investigation and in such cases as required adjustment the requests of the men would be complied with. In one instance the request was for the retention of the helpers who had been recently taken from the miners. This request will be complied with. The men had made general charges against officials of the mine, and the company asked that if there is anything requiring adjustment as between the men and their treatment by officials, specific charges be made so investigation might result.

The employees discussed the questions in an orderly manner and the resulting vote showed their confidence in the management. There has been no trouble at the C. & H., the men merely went at the situation in a businesslike manner and are now satisfied. Any talk of an impending strike emanated from outside sources. The employees of the Calumet & Hecla Mining company are more than ever with the good intentions of the company, and that the company will in the future permit them to share in the prosperity of good times they are assured.

The reduction in wages and working hours at some of the mines of the copper country has resulted in no labor troubles of any kind. And the action of the C. & H. employees will have the effect of preserving harmony. Mine employees in the copper country are usually pretty well informed as to the conditions and they require little argument to prove to them that at present the companies must reduce operating expenses. The Bigelow mines have at yet announced no reduction.

CHAMPIONSHIP DECIDED.

Escanaba High School Defeat Hancock—Hokey Terms Withdrawn.

The Escanaba High school football team practically won the high school championship of the upper peninsula Saturday afternoon at the Hancock Park by defeating the Hancock eleven with a score of 11 to 5. The game was witnessed by a big crowd, and was admitted to be the most exciting and most interesting game of the season. The Escanabas were held by Hancock during the second half, and neither team scored.

Henry Olmstead of Escanaba refereed the game. The two teams were entertained at a reception and musical in the high school Saturday night. The victory makes the Escanabas eligible for the state championship contest with the winner of the lower peninsula honors, though the Soo has a chance to play for the upper peninsula title if it desires, which is not likely.

Last of Professional Hockey.

Manager McNamara of the Portage Lake hockey club announces that he had arranged terms that they need not part this season. These included practically all of his last year's champions except Stuart, Lake and Holden. These three men would want big salaries this season, and their management had not yet started after them. It is understood that Barney Holden, the great cover-point, was holding out for \$900 for the four months. Lake and Stuart had not made any demands as far as can be learned. Portage Lake wanted Campbell to keep up the contest for the Amphidrome cup. There may also be a commercial league.

Nothing has been done so far in regard to organized amateur hockey, but there will be several leagues this winter. The high schools will of course have to keep up the contest for the Amphidrome cup. There may also be a commercial league.

Good Hunting Weather.

The deer hunting season opened yesterday, and the weather was most favorable. The snow which opened up Saturday morning had been continuous and was falling all day yesterday. This was exactly the condition which the hunters wanted. Without snow to assist in tracking wounded deer and to assist in deadening the sound of the stalker, deer hunting is not very successful. The snow undoubtedly drove a larger number of men than usual into the woods. Count Clerk Richards had sold 700 licenses up to Saturday, and this number will be greatly increased today in consequence of the better hunting conditions.

SUSPENDS DIAMOND DRILLING.

The Copper Range Consolidated Mining company on Saturday suspended its diamond drilling operations west of its present producing properties. The discontinuance is for the winter season, at least it is expected the work will be resumed in the spring. It is believed, too, that the suspension is also a measure to curtail expenses. The machinery will be stored in temporary quarters for the winter.

Some dealers are invariably out of what you ask for, and offer you a substitute which they claim is just as good. This dealer is working for his own profit. Go to the honest dealer, who will sell you what you ask for and not try to sell a substitute in order to make a larger profit.

HOUGHTON TAX RETURNS.

The following return of village taxes was made by Treasurer Romph of Houghton to County Treasurer Foley on Saturday:

Collected, real estate	\$18,814.00
Collected, personal	5,038.70
Total collected	\$23,852.70
Delinquent, real estate	1,930.00
Delinquent, personal	29.50
Delinquent special assessment	1,784.95
The total taxes were	\$27,617.15.

COPPERDOM BREVITIES.

The Calumet & Hecla band will have the management of the Park rink, Calumet, this winter again.

The county board of supervisors will meet tomorrow morning in Houghton. It will be the regular monthly session.

The conclusion of the celebration of the tenth anniversary of the Hancock M. E. church occurred last night when a special service was conducted by Rev. James S. Steinger of Munising. At the morning service Rev. C. L. Adams of Ishpeming presided.

Opportunity for Investment Never Better, Writes Boston Man.

The recent high prices in copper are not surprising to those who do not exactly comprehend how much it costs to produce the metal under the most auspicious circumstances, writes "Lemon" in the Boston Herald. The advance from 11 1/2 cents to 14 1/2 was too rapid to suit many of us. We should have liked to see a steady, progressive advance, but the fact is that the copper that had to be sold at any price is now all out of the market. What remains is still in the hands of its producers who cannot afford to sell it at anything less than 14 1/2 cents a pound. The price is still at an extreme high level, and it is almost that much to produce.

Amconda, for instance, can only afford to sell copper under thirteen cents a pound when it is working its high grade ores, which assay at least 5 per cent, and while the price is so high, it is making copper at a very low price, owing to the rich mineralization, it cuts down to the high earning power of the company when it has to do so. All the Amalgamated companies are depending upon the electrical installation, which they have had under way for the past two years, and so much in decreasing the price of production, and they are now about ready to avail themselves of the work that has been done at the neighboring water powers.

Mining News

BLOCKING OUT ORE BODIES.

Big Companies at Bisbee Are Pushing Development Work Vigorously.

There has been practically no change in the local mining situation during the past week, although there has been a report of a new discovery in the copper country market, reports the Bisbee (Ariz.) Review. All of the big local companies are pursuing the policy of opening up new ground and blocking out ore bodies to be worked when the price of the metal returns to its normal level.

CHASSELL PASTOR TALKS.

Rev. William Steensma Is Interviewed by a Detroit Paper.

The Rev. William S. Steensma, a former Detroit boy, now pastor of the First Congregational church at Chassell, seven miles from Houghton, Mich., is visiting his old friends in this city, says a Detroit paper. He supplied all summer in the largest church in the northern peninsula, and just before leaving on his present trip moved into a new \$3,000 parsonage building for him last year. Before coming to the ministry the Rev. Mr. Steensma was assistant cashier and advertising clerk in the business office of the Detroit Times.

Mr. Steensma brings good news for Detroit miners who are contemplating going north this season. He says, "I can identify this year than in many seasons, and it is not an uncommon thing, says, to scare them up along the highways."

Speaking of the recent slump in stocks and its effect in the copper country, he said: "Northern people were hit hard by the decline. Those who suffered most are the people who derive their income almost wholly from stock dividends, depending on them for everything."

BATES TO BE GENERAL?

Commander of Third Regiment Opposed for Brigade Head.

Copper company National Guard companies are naturally interested in the outcome of the present argument regarding a successor to Brigadier General Harrah. Colonel Bates of the Soo, commander of the Third regiment, of which the Houghton Light Infantry is an element is the logical successor.

Under the state military law the term of General W. Harrah, of Detroit, as commander of the brigade, will terminate the first of year. Following the usual custom and precedent he would be succeeded on that date by Colonel Robert J. Bates, of the Soo, a former colonel, but some military men who discussed the matter at camp last August and during recent visits to this city, says a Lansing dispatch, have expressed a doubt as to whether he will land. The dispatch continues:

There has long been a factional fight in his regiment, and there are officers in the brigade who say they are opposed to his promotion, on the grounds that he is a troublemaker and that he will cause considerable friction if placed in command of the state troops. His ability to handle a tactical problem such as is the fashion in the annual tour of duty of the state troops, is admitted, but it is claimed that he lacks tact and the ability to get along with his subordinates without a row.

"It is said that the matter was called to Governor Warner's attention some time ago by some of the upper peninsula politicians, who urged that Colonel Bates, but whether the fight can be made strong enough to break the precedent is a question. There is also raised the question as to whether, if Bates is not promoted, the governor would not feel at liberty to go out of the usual order of seniority, or perhaps retain Colonel Harrah as brigadier, in view of the excellent record he has made."

tain of that company in 1898 in the Spanish-American war, has worked his way up through the various shoulder straps until he commands his regiment and has been twice elected to succeed himself. His record is a long one, and as an officer is a very good one. It has been Colonel Bates' ambition to head the Michigan National Guard, and copper country militiamen believe that if there is no specific reason why he should not have the office it would be an example of vindictive cruelty to stop the little colonel just as he is on the threshold of his ambition.

BULLISH ON "COPPERS."

Opportunity for Investment Never Better, Writes Boston Man.

The recent high prices in copper are not surprising to those who do not exactly comprehend how much it costs to produce the metal under the most auspicious circumstances, writes "Lemon" in the Boston Herald. The advance from 11 1/2 cents to 14 1/2 was too rapid to suit many of us. We should have liked to see a steady, progressive advance, but the fact is that the copper that had to be sold at any price is now all out of the market. What remains is still in the hands of its producers who cannot afford to sell it at anything less than 14 1/2 cents a pound. The price is still at an extreme high level, and it is almost that much to produce.

no dividend on its 1,000,000 shares, and even the small disbursement which was made will be used in its entirety to open the property and to thoroughly develop the ore bodies against the time when the company can operate at full capacity and take full advantage of a fair price for its copper.

During the month of October shipments from all the Red Metal properties, which latter is the operating company of Butte Coalition, were 500 tons of ore a day which returned 4 1/2 per cent copper against 4 1/2 per cent for North Butte; 1/2 per cent for Amconda, 4 1/2 per cent for Boston & Montana. The company is still doing a lot of development on its surface workings and is getting some of its shafts in shape for large shipments of ore that will be made when the copper situation resumes its normal course. The company has recently cut down all its labor to the smallest possible requirement, and all development work under ground has ceased, but with the lowered cost of labor undoubtedly the company will continue to do development work which it has had under way for a long time past and which will add largely to the developed ore reserves when completed. The fire has been traced to a source outside the Minnie Healey mine and additional work will at once be started to bring the two shafts which are intended to control it down to the fire zone.

Ores from the Rarus, Minnie Healey and Tramway properties will shortly be lifted from the Tramway's new big three-compartment shaft which is now almost completed. The treasury is in fair shape and has upward of a half million cash, which can be used either as a cash reserve or to pay dividends. It will not likely be used for the latter purpose at the present time as the company would not be justified in making disbursements when running at only 2 1/2 per cent of its entire capacity. The Alice property is still being worked by leasers, who give the company a profit which goes into a reserve for the Alice treasury. In time the Butte Coalition will have this property as a decided source of revenue. The company has always intended to develop the Alice on a large scale and after the present properties are taken care of it will doubtless turn its attention to the property. The ore in the direction of the Alice is of the highest quality, and the present mines and large evidence of the ore which better at depth. The books of the company show that there has been a large proportion of buying for permanent returns in small lots.

DAVIS-DAILY.

Captain C. H. Palmer, manager of the Davis-Daily Estate, in Boston of the property, was at Houghton this week in conference with President Coram regarding the affairs at the property. He talked very hopefully regarding the future. His latest advice from Butte after a visit to the Colorado property, was that the property has always intended to develop the Alice on a large scale and after the present properties are taken care of it will doubtless turn its attention to the property. The ore in the direction of the Alice is of the highest quality, and the present mines and large evidence of the ore which better at depth. The books of the company show that there has been a large proportion of buying for permanent returns in small lots.

THOUSANDS HAVE KIDNEY

Trouble and Never Suspect it.

Most people do not realize the alarming increase and remarkable prevalence of kidney disease. While kidney disorders are the most common diseases that prey upon the human system, they are almost the last recognized by patient and physicians, who consider them as a last resort.

WYANDOT.

The assessment of \$1 a share voted by the directors of the Wyandot Mining company calls for fifty cents payable Nov. 27 and fifty cents on May 27, 1908. The company had a net surplus on hand of \$38,655, compared with \$49,408 on March 30, 1906. The directors in a circular notifying stockholders of the calling of a \$1 assessment say: "It is the general opinion of our most prominent mining men, and the opinion of the highest grade of the best indicators, that the company has a net surplus on hand of \$38,655, compared with \$49,408 on March 30, 1906. The directors in a circular notifying stockholders of the calling of a \$1 assessment say: "It is the general opinion of our most prominent mining men, and the opinion of the highest grade of the best indicators, that the company has a net surplus on hand of \$38,655, compared with \$49,408 on March 30, 1906. City Brevities

O. C. Oleson of Duluth is paying a visit to Marquette friends.
W. Dahl of the copper country is visiting friends in the city.
H. W. Jackson of Green Bay was a recent visitor in the city.
R. P. Bronson of Ishpeming was a Marquette visitor Saturday.
D. H. Campbell of Iron Mountain was a visitor in the city yesterday.
Mrs. L. A. LeVeque has returned from a visit with friends at Newberry.
Mrs. Jack Steele and son visited friends in Ishpeming Saturday and Sunday.
T. A. Ronson of Green Bay paid a recent visit to friends in the city.
John A. Struble of the copper country is paying a visit to Marquette friends.
Louis Riedinger and J. Werner spent the day yesterday at the Werner camp.
C. D. Hutchinson of the copper country paid a recent visit to Marquette friends.
George A. McKeegan was a visitor at the Trettheway camp north of the city yesterday.
State Deputy Game, Fish and Forestry Warden William Harrington was in the city yesterday.
Alex. LaVallee left yesterday for the woods near Birch, where he joined a hunting party.
The success of the pantry sales at the Studio and Woman's Exchange continues. A sale was held Saturday.
Mrs. S. S. Ormsbee, who has been visiting Mrs. H. B. Stitt of Grand Rapids for the past few weeks, has returned.
H. J. St. Johns has returned from a trip to Chicago and has joined a party of hunters in the woods north of the city.
George Bingham of Chicago, representing the Dennison company of Chicago, spent Sunday with friends in the city.
Mrs. Emilie Zenius, who has been visiting her daughter, Mrs. William A. Brown, 322 Morton street, left Saturday for her home in St. Paul.
Arthur Sayles and Tom Marshall, officers at the Marquette prison, are enjoying a hunt at Gene Johnson's home-stand, down the line of the Northwest.
E. F. Wixon of Milwaukee, who formerly lived in Marquette, is here visiting friends. Mrs. Wixon is at Republic and her husband will join her there within a few days.

Children who need winter garments. Captain Corliss will appreciate a quick response to this appeal, as he can use any clothes sent to the army headquarters to good advantage.

THREE LIFERS RECEIVED.

Sheriff Burns and Deputies Brought Them Up From Detroit.

The population of the Marquette prison was increased last week by three lifers, sent up from Wayne county, and brought here by Sheriff Burns and five deputies. The train from the east was stopped opposite the prison, and the men transferred to the institution without bringing them to town. One of the convicts was David C. Walters, convicted of murder in the first degree. He slew his wife. She had fled from him and he found her living with another man. The others were Fred Dumais and Xavier Kryza, convicted of robbery, armed with dangerous weapons. These men assaulted an old couple living in Detroit, and tortured them to try and compel them to reveal the hiding place of money they were supposed to possess. The body of the pair was confined to a jackknife. They had criminal records, having been previously convicts in the penitentiaries at Ionia and Jackson.

Besides gaining three lifers last week, the Marquette prison lost one. Giovanni B. Gentilla, who was sent up for life from Dickinson county, for murder, beginning his term at the institution October 12, 1904, died in the hospital, as a result of dropsical trouble. He had been in the hospital for a few months past.

Water System at Prison.

In the past few months Engineer Kane has completed the installation of a water system at the prison. Pure well water, pumped from a depth of nearly a hundred feet, is now distributed throughout the institution, and is drawn through taps wherever it is needed. The well from which it is obtained was sunk just east of the engine house, and a steam pump is operated continually, keeping pressure on the pipes. The new system is a great convenience. Previously it was necessary at times to haul water from the lake to get a wholesome supply, as the dam up in the hills relied on to furnish the prison with water frequently ran dry. The water now being used is of fine quality and absolutely safe. The expense of pumping it is merely nominal, as was the expense of installing the system.

500 CANAL PASSAGES.

Boats Locked Through, Bound for Ports on Lake Superior.

Sault Ste. Marie, Mich., Nov. 10.—[Special.]—The upbound boats passing the canals the last twenty-four hours were the following: Albright, 9:30 p. m.; Hutchinson, Helard, Laughlin, 2:30 a. m.; Pope, 4:30; Ward, Ames, Penicott, 5; L. C. Smith, W. W. Brown, 5:30; Van Hise, Simola, 6:30; Snyder, Goodyear, 7; Gayley, 8; Arthur Hawgood, 8:30; Mary Elphicks, Midland Prince, 9; Benson, Mueller, Goss, Gould, 10; Egan, Arnoor, 10:30; Ketchum, German, 11; George Williams, Garretson, noon; Damaolona, Deric, 12:30 a. m.; Siemens, 1:30; Troy, 4:40; Augustus, Wolvin, 6:30.

Marquette Port List.

D. S. S. & A. docks. Cleared—Hoyt, Matatia, Cleveland. The Mariner, for Cleveland, and the Cumberland, for Sault Ste. Marie, are loaded and will clear today.

L. S. & L. docks. Arrived—Presque Isle, Pioneer, Chattanooga. The Sheafle and Winnipeg are also at these docks. The latter for pig iron.

The case was moved to the upper harbor yesterday and will load Monday.

The Warriner is at the coal dock. She will have discharged her cargo by Tuesday noon, after which she will load on at the South Shore docks.

NEW TEN-DOLLAR GOLD PIECE.

The new ten-dollar gold piece, designed by S. Gaudens, has finally appeared, and for the first time in thirty-four years the inscription "In God we trust" does not appear on coins of this denomination. No explanation is offered at the treasury for the omission of those words, except that the president approved the design of the late sculptor, and ordered the design executed without alteration. On one side the coin shows the head of an Indian, with the year inscribed below. Underneath the date are the words "United States of America." On the reverse side appears the eagle, with thirteen stars above and to the right "E Pluribus Unum." Forty-six stars encircle the coin, representative of the states of the Union.

An every night all year round medicine, pleasant to take, positive results. It's Hollister's Rocky Mountain Tea, the greatest family remedy. 35 cents, Tea or Tablets. The Stafford Drug Co.

SOME names on boys' clothing are stronger than others. Some labels stand for more in quality and worth than do others. "Extragood" clothing is known to be the best made for boys. The best merchants all over the country sell it. Those that don't, know there is none quite so good for the public. The label stands for more in the way of materials and tailoring than does any other label. The mother who is buying it for her boy is buying more satisfaction than she can get in any other brand. We want the confidence and trade of all particular people in this section. That's why we sell "Extragood" and not the other kind.

Boys' 2-piece, double breasted and Norfolk Suits with belt and Knickerbockers; new fall styles; large variety of small and large checks and sizes 7 to 17 years; \$4.00 to \$8.00

Sailor, Russian and Junior Suits; pretty chevots, worsteds and serges; 3 to 10 years; \$3.50 to \$7.00

Boys' Overcoats in great variety of material and colors; 3 to 10 years; \$3.50 to \$7.50

We offer a large line of boys' Knee Pants in both plain and Knickers, in cassimers, worsted, serges; 3 to 17 years; 50c to \$1.50

Commercial Club Meets

There will be a meeting of the Queen City Commercial club at the city hall this evening at 8 o'clock.

Will Initiate Class—The Knights of Columbus will initiate a class of candidates Wednesday night. After the initiation ceremony a reception will be held and refreshments will be served.

Said First Mass—Father Timmons, who was recently ordained a priest, said his first mass yesterday morning. He officiated at solemn high mass at 10:30 o'clock at St. Peter's cathedral.

Death of Infant—Elmo, the six-month-old son of Archie LaCrosse, of 433 West Washington street, died yesterday. The remains will be taken to Michigan and the former home of the family, today for burial.

Christmas Sale—The Methodist Aid society will hold its annual sale of Christmas goods on Dec. 10 and 11. The ladies have been busy for some months preparing for this sale and numerous dainty and useful articles will be on display.

Saturday Morning Musicals—There was an unusually large attendance at the musicals of the Saturday Morning Musical club, at the Northern Normal. The members gave an excellent program, one which was much appreciated.

To Be Married—The marriage of Miss Margaret Fassbender to William Carr will take place on Nov. 27. Miss Fassbender is the daughter of J. C. Fassbender of 222 Rock street, and is well known here. She was given a linen shower by her friends Saturday afternoon.

President of Class—Norman Parker of Chicago, who has visited in Marquette the past three summers and has many friends here, has been elected president of the senior class at the University of Chicago. He has been pursuing studies in the law department for the last year and will graduate next June.

W. R. C. Meeting—The Woman's Relief Corps, No. 188, will hold their regular meeting this afternoon at 2:30 o'clock at Keough's Hall. The yearly inspection of the corps will be made by Alice Rowland, of Escanaba. A class of candidates will be initiated and at the close of the meeting, a banquet will be served and a program, consisting of recitations and musical selections, will be given. All Veterans and Sons of Veterans have been invited to attend.

Judge Brown Here—Judge Charles R. Brown and Mrs. Brown, parents of City Attorney Brown, who have resided for the past two years at Munising, are to be now living at the home of their daughter, Mrs. E. S. Bush, of 316 Michigan street. Judge Brown has disposed of a number of his interests at Munising in order to come to Marquette. It is probable that he and his wife will travel in the south during the winter. Until two years ago they were residents of the city.

NEEDS SOME ASSISTANCE.

Captain Corliss Has a Number of Worthy Applicants for Relief.

Captain Corliss of the Salvation Army, who looks after the greater part of relief work done in the city, informs The Mining Journal that he has had fewer requests for assistance this fall than in previous years. This condition he ascribes to the fact that everybody who has desired to work has had little difficulty getting employment. Also, he says, several men who have neglected their families here have turned over a new leaf, and are now giving them more assistance and care. However, Captain Corliss says that he has recently had a number of applications for aid and that investigation has shown the cases to be meritorious. There are two or three old couples who need relief, and he would like donations of garments which they could use. There is also need of children's clothes, as on the army's list are a number of families who have chil-

THEATRICAL.

"The Land of Nod" with its massive, beautiful stage effects, and presented by a large organization of comedians, singers and dancers, will be the attraction at the Opera House Wednesday.

When the words, "Howe's pictures will return to Marquette this season," were thrown on the canvass at the opera house Saturday, the approval of the audience was at once manifest.

Lyman H. Howe is probably beyond dispute the most famous exhibitor of moving pictures in the world today.

AMERICAN NAVY SECOND.

Washington, Nov. 10.—An interesting statement showing the relative order of the warship tonnage of the principal naval powers has been compiled at the office of naval intelligence.

FOOTBALL SCORES.

Chicago, Nov. 10.—Leading football games played Saturday resulted as follows: Wisconsin, 11; Indiana, 8.

FIRST SNOW OF THE SEASON.

Omaha, Nov. 10.—The first snow of the season fell over Omaha and much of the state this morning.

FOR SALE.

The Grand Family theatre is for sale, the owners having other matters which require their entire attention.

MARKETS

NEW YORK STOCKS.

Writing from New York Saturday Paine, Webber & Co.'s correspondent said: "The financial situation is still surrounded by so many uncertainties there is still no prospect for an early development of bullish activity in the general stock market."

Table with columns for U.S. Steel, M. Pac, C. & O., Am. Locom., etc., listing various stock prices.

Writing from Boston Saturday, Paine, Webber & Co. said: "In the face of the expected poor bank statement the market held very well."

Table with columns for High, Low, and various stock prices including Adventure, Arcadian, etc.

Paine, Webber & Co.'s Summary. Paine, Webber & Co.'s Chicago correspondent said Saturday concerning the Chicago wheat market:

PRESENT WEEK IS OPENING WELL

(Continued from Page One.) "Now that the worst is over, the universal question asked is, what must be expected? All previous panics show that after the acute stage of crisis was passed a substantial recovery followed on the Stock exchange to be succeeded by a period of more or less inertia and depression."

EMPLOYEES OF MINES TO RECEIVE TWO CHECKS

SHIPMENTS FAIRLY HEAVY.

Railroad Companies Not Allowing Loaded Cars to Stand Very Long.

"The movement of ore is fairly heavy, and we do not look for a complete shut-down before the first of December," said a railroad man Saturday. "The weather for the past month has been favorable for the movement of ore, but as a rule we get out all our cars every night, as the temperature is usually too low at night to take chances on the ore freezing in the cars. While we have had no trouble on account of frost our men are instructed not to leave any loaded cars at the mines, if possible to avoid it. For two or three weeks trains have several times been held beyond their schedule time in order to take away cars loaded late in the afternoon.

"The stockpiles are pretty well cleaned out. There is some loading from pits, but the bulk of the ore being shipped is going from the pockets. Ore is being dumped at some of the mines, but the amount placed in stock between now and the close of navigation will be light compared with that which will be shipped.

"During the many years I have rail-roaded in this country I have never seen such favorable weather for the ore movement at this time of the year as we now are enjoying. Our envelopes, but one night, Oct. 26, when the temperature went below twenty above zero, since then there were mornings when it was as high as thirty-two above at 6 o'clock."

Several inches of snow fell here Saturday night and yesterday, but there is not enough snow on the ground to interrupt the movement of ore. The first good sleighing here last year followed the storm of Nov. 8.

For some days past the principal topic among the business men, the working men, and in fact nearly everybody in Ishpeiming, has been the monetary question. All have wondered what plan the mining companies would adopt for the payment of their employees this month. The Mining Journal is advised that the companies have decided on a plan that will cause neither hardship nor inconvenience to the Ishpeiming business or working men. Each employee is to receive two checks on pay day. One will be exchangeable for cash at the bank, and the other will be negotiable for merchandise in any business house in the city. The latter will be as good as greenbacks or gold so far as its trading value is concerned. They will be guaranteed by the companies and banks, and will be accepted by the latter in the regular course of business. A merchant who cashes these checks can deposit them to his credit, or can send them to his wholesaler, by whom they will be accepted at their face value, as they will be regarded in the same light as clearing house certificates.

A working man having an account in one of the banks can deposit the second check which will receive on pay day and issue checks against it. The business man can give cash or their personal checks in exchange for the ones issued by the mining companies if they see fit. Doubtless many of the checks, especially the ones drawn for small amounts, will be exchanged for currency in the business houses.

There need be no apprehension on the part of any employee of the companies about the method to be adopted in paying them off. Discussing the plan a mining man said:

"The companies could pay in the regular way this month, but inasmuch as the plan we have decided on has been adopted in other sections we think it advisable to follow it. I don't believe it will make any difference to our employees, as the extra check is as good as currency. It can be used in the payment of accounts just the same as gold, silver or greenbacks. By paying in this way we believe that most of the money for the workmen will be kept at home. Our banks are doing the same as other banking institutions of the country. They intend to keep as much of the money at home as possible.

"There is every reason to believe from the reports coming from New York and other money centers, that the currency situation is improving daily. The big concern employing any considerable number of men are paying part in checks and part in clearing house certificates, as we now propose to do, and so far as we can learn the working men are satisfied. I do not believe it will be necessary to follow this plan next month, as it now looks as though the country's financial affairs will be running along as usual within a short time. With currency pouring into the country from abroad and not being obtained from other sources, it would seem as though money will soon be as free as it was a few weeks ago. The banks of this section have never had larger reserves than at this time."

The pay days the latter part of the month will occur at the usual time, but the early pays may be a day or two late, as it has taken time to prepare the extra checks and complete other arrangements for the change.

SHORTAGE OF ENVELOPES.

Government Has for Some Weeks Past Been Unable to Supply Patrons.

"I have been waiting for some stamped envelopes from the government for nearly three months," said an Ishpeiming business man Saturday. "Up to a year or so ago we usually got our envelopes within a week or so after ordering them, but for more than six months past we have had to wait weeks instead of days. I do not know when to expect the last lot ordered, nor can the postoffice employees tell me when they will be here.

Under a new ruling recently announced by Postmaster General Meyer, business men who use stamped envelopes need pay only \$1.24 down on each order of 1,000 two-cent stamped envelopes, instead of the entire amount. While official notice of this change has not yet been received at the Ishpeiming postoffice, it is expected shortly.

MANY IN THE WOODS.

Many Ishpeiming men were in the woods after deer yesterday. Most of them left the city Saturday. H. T. Smith, president of the Cable Piano company of Detroit, the company's managing manager, R. W. Wilson, and its Ishpeiming manager, A. A. Duff, went north Saturday, to remain a week or more. Both Mr. Smith and Mr. Wilson hunted out from here last fall in company with Mr. Duff, and they intend to use their lives in the woods. Harry Hooper, agent of the Menominee River Brewing company, will be accompanied to the north district by several Menominee men, including the officers of his company, who have hunted in that district for several years past. C. E. Kruse, foreman Erickson and P. Connell are at Mr. Kruse's camp south of the city. Captains Alfred Collick, James Stephens and James H. Rough are south of the Swanzy district. Carl Tellefsen, J. S. Waldman, A. G. Johnson, Thomas McNamara, J. Webster, H. E. Yelver, Robert Wilson, William Vivian, A. C. Ludington, W. P. Bedding and several others will hunt to the north of town. Captain Frank Platto and a friend from Chicago are hunting west of here.

SUCCESSFUL CONFERENCE.

Ishpeiming Minister Attended Meeting Held Recently at Ironwood.

Rev. J. A. Sallstrom, pastor of the Mission church, reports that the conference held recently at Ironwood was attended by fifteen ministers, also several laymen. Rev. Andrew Anderson, pastor of the Mission church at Norway, was selected chairman of the conference; Editor A. E. Rutquist of Iron Mountain was elected secretary, and Rev. A. J. Eklund of Menominee is treasurer.

Rev. P. Lindman, the missionary in the upper peninsula, was commended for his excellent work. There are a number of mission societies in the smaller places and Mr. Lindman visits each place frequently. Reports received from the missionary districts were satisfactory.

Three ministers were admitted as members of the conference. They are: John Hellund of Bark River, Rev. Carl Benson of Stambaugh and Rev. O. W. Bengtson of Carlend. Rev. A. R. Martin of Gladstone is to leave the conference, taking up work at Stanton, Ia.

BEAUTIFUL PRODUCTION.

A beautiful production of musical comedy and extravaganza will occupy the stage of the Ishpeiming theater Friday evening, when "The Land of Nod" will be presented. "The Land of Nod" has impressed itself strongly on all who have witnessed it on account of its unique character creations, such as "The Man in the Moon," "The Welsh Rarebit," "The Sand Man," "April Fool," "The King and Queen of Hearts," the "Jack of Hearts" and his unusual personages. The locale in which they move is only encountered in tales of fairyland and in the Arabian Nights. It is all clever and interesting, and its comedy is wholesome and good. The score contains plenty of "catchy" music.

Do you know that Binesalve Carbolicized acts like a poultice in drawing out inflammation and poison? It is anti-septic. For cuts, burns, eczema, cracked hands it is immediate relief. Sold by The People's Drug Store.

HAD FINISHED HIS BOOK.

Ernest Ludlow arrived home Saturday from the lower peninsula, where he had been called on account of the sudden death of his brother, William Ludlow. As related in The Mining Journal at the time Mr. Ludlow was called away the deceased had been engaged for some time in writing material for a publication to be entitled "Pioneer Days in Michigan." Mr. Ludlow says that the young man completed his work just two days before his death, and the book is to be published. The author had spent the greater part of seven years collecting data and writing the matter for his publication.

DE VOSS COMPANY TONIGHT.

The Flora De Voss company, which has been on the road for the past six years, will open this evening at Ishpeiming theater for a five nights and Saturday matinee engagement. The company comes well recommended. It is producing plays of the better class. It will open with a very pretty comedy, "The Man of Mystery." The prices will be twenty and thirty cents for seats on the first floor and in the balcony, and ten cents for the gallery. There will be specialties, moving pictures and illustrated songs between the acts of the play.

ISHPEMING IN BRIEF.

Professor Smythe has returned from the East. He was absent from the city for several weeks.

The Misses Mabel Russell and Alma Bigelow of Marquette were the guests of Miss Geraldine Quinn yesterday.

The fire department was called out Saturday by an alarm coming from Pearl street. The blaze was a chimney fire.

Wederman Lofberg, 214 South First street, got the diamond ring given away at the Grand theater Friday evening.

The Boss Creed club will meet tomorrow evening at 7:30 o'clock with Miss Sophie Wolcott, 600 South Pine street.

The Salisbury Stars defeated the Winthrop football team Saturday with the score of 3 to 4. The teams averaged about 100 points to the player.

J. H. Quinn arrived home yesterday from Cuba City, Wis., where he spent a few days looking over the Vandeventer and other mines of the district.

Mr. and Mrs. Fred P. Tillson entertained a company of friends Saturday evening, the occasion being the twenty-fifth anniversary of their marriage.

The Uniform Rank of the Knights of Pythias will give the next of its series of parties Thursday evening at Branstad's Hall. Dancing will start at 8, continuing until 12 o'clock.

The walls of the pumping station being erected by the city at the Oliver Iron Mining company's Section 16 property are about completed. The structure will be enclosed within a few days.

The Diamond Drill enjoyed a visit from Peter Fitzpatrick of Ishpeiming last Tuesday. Mr. Fitzpatrick is the deputy factory inspector for this district and was here on official business. He was for thirty years car despatcher for the C. & N. W. at Ishpeiming and was retired on a pension some time ago. Mr. Fitzpatrick is a very pleasing gentleman to meet and the position which he holds fits in admirably with his situation at this advanced stage of life—Diamond Drill.

Harry Hickory and wife are to occupy the Oliver Iron Mining company's bluff street dwelling vacated a few months ago by Andre Fornis and family. William Hooper and family will occupy the Kellgren dwelling on South Pine street, and David Devine and his family will move to the house on South Pine street formerly occupied by D. H. Anderson and family. The Kellgren sisters have purchased Mrs. Mullins' property, at the corner of Fifth and North streets, and will occupy it as soon as the tenants vacate.

CARD OF THANKS.

I desire through The Mining Journal to express my sincere thanks to the many kind friends who in any way assisted me during the last illness and after the death of my wife. I feel very grateful to those who sent flowers, to the pastor and choir of the First Methodist church and to others who lent me valuable aid in my late bereavement.

ROSS MORRELL.

NOTICE.

Water rates on all metered services for the three months ending September 30th, 1907, are due and payable. If not paid on or before November 15th water will be shut off and the penalty of \$2.00 will be charged for again turning on the water.

Trapper Arrested and Fined.
Victor D. Letorsky of Bohemia township, Ontonagon county, got into trouble the other day for illegally trapping mink, muskrats and skunks. He was arrested by Deputy Game Warden Townsend, was taken before Justice of the Peace E. A. Mack and was fined \$20 and costs or thirty days in jail.

Canning Factory Seeks Location.
Joseph E. Cuney of Cheboygan, ex-mayor of that city and one of its substantial business men, was at the State other day looking over the ground with a view of establishing a canning factory. Mr. Cuney is one of the principal stockholders of a company that annually puts up thousands of cans of peas. Chippewa county has long been noted for the excellence of its peas, and for years D. M. Ferry & Co. as well as other seed growers, have obtained their supply of seed peas from that district.

Aske \$50,000 Damages.
One of the most important cases to come up at the November term of the Menominee county circuit court will be the case of Edward Lundquist vs. the J. W. Wells Lumber company. The case was held over from the August term. The plaintiff is suing for \$50,000 which he claims is due him as personal damages. Lundquist, it is alleged, was injured in an accident at the Wells plant a year or more ago when a tramway broke down with him. He is alleged to be totally disabled as a result of the accident and is unable to do any kind of work.

Seeks Balm of \$50,000.
Frank Deitsch, the driver of the six horses attached to a van of the Norris & Roe's show that was run into by a street car on Saturday evening at the \$500 on the night of Aug. 17, has begun suit for \$10,000 damages, claiming permanent injuries by reason of the accident. Deitsch was thrown from the van, his left leg being broken and he also received other injuries. Since the accident he has been in the Sault Ste. Marie hospital. He is still confined. Norris & Roe also expect to bring suit against the traction company, but will await the outcome of the Deitsch case before so doing.

Fine New School.
The Roosevelt school, the most recent addition to Menominee's educational institutions, has been opened and the various classes are now being organized under the supervision of the principal, Mrs. Katherine Sawyer. The school is a handsome two-story brick structure, situated on Baker avenue, and is one of the most modern in the state. It is divided into eight airy and well lighted class rooms. There are four of these rooms on each floor and their construction and equipment includes everything that architectural science and modern educational methods can suggest. The rooms on both floors are approached from a central passway and each has a separate entrance hallway and cloak rooms for the girls and the boys. The rooms are lighted by immense windows. These windows are all double and the upper outside window is of translucent glass. Great care has been taken in the installation of the heating plant, which is operated by the fan system of forced ventilation under automatic control. For the present only four rooms in the Roosevelt school will be occupied. When the building is fully occupied, however, it will include the kindergarten and grades one to eight. This will immensely relieve the congestion in the Menominee schools and will permit a larger scope of operation in the departments of science, commerce and manual training.

BIDS WANTED.

By the board of education, School District No. (1) one, city of Ishpeiming, county of Marquette, state of Michigan, for plumbing, sewerage and gas fittings for the new high school now being erected on the school property, East Division street, in said city of Ishpeiming.

Contractors to make bids on the work and furnish surety company's bonds for at least 50 per cent of contract price for the faithful performance of such contract, and completion of all work according to its terms.

Also a surety bond running to the people of the state of Michigan for at least 20 per cent of the contract price, conditioned for the payment of all (in)debtedness for labor and material as required by the statute in such case made and provided.

The plans and specifications to be furnished as per plans and specifications prepared by John D. Chubb, architect, Chicago, Ills.

Plans and specifications may be had from the undersigned. All bids to be signed, sealed and delivered to N. M. Nelson, director board of education, on or before 4 o'clock p. m., Monday Nov. 11, 1907.

The plans and specifications must be returned with bid, otherwise bid will not be considered.

A certified check for \$200 must accompany each bid.

The board of education reserves the right to reject any and all bids.

(Signed),
CHARLES BURT,
Chairman Building Committee.
Dated, Ishpeiming, Mich., Oct. 22, 1907.

Cobalt Gossip

AN ENGLISH VIEW.

Summary of a London Editor's Opinion After Visiting the Field.

R. R. Mabson says in the London Statist: Since my return from Canada, I have been very impudently heckled respecting a rough statement I have made that perhaps only 5 per cent of the Cobalt mining companies are so far advanced to be considered serious mining propositions. Passing by the impudence, and addressing myself to one of the main reasons for my assertion, I may mention that Cobalt was not discovered until quite late in 1903. Company formation only commenced some months later, and in about three and a half years the registrations of companies reached an aggregate nominal capital of, in round figures, \$365,000,000. Making liberal allowance for two or three very promising undertakings that are not formulated as companies, and, therefore, have not fixed amounts of capital, I should estimate that those companies which have done any appreciable quantity of development work, or have been able to effect shipments, do not represent a nominal capital of more than, say, \$50,000,000; and one may strike out about one-third of these companies as having done very little indeed to prove the value of their properties.

As to the remaining 95 per cent, however, there are in many directions excellent chances, and in my observations I was careful to say that the 95 per cent represented prospects and possibilities. I might, indeed, have emphatically added that a large proportion of them are of mere "wildcat" character not likely to be ever worthy of the serious consideration of any business man. As to my statement of the 5 and 95 per cent proportions being entirely condemnatory of the region of Cobalt, I beg respectfully to say that it is nothing of the kind; for my remarks, if referred to, will show that I stated some very rich finds had been made; and, further, I added that the surface of the very large area where there are possibilities has only been scratched, and the bulk of the work in it has been concentrated within the very small extent of ground immediately in

the vicinity of what is termed the "city" of Cobalt.

The erratic character of the ore deposits at Cobalt makes it extremely difficult to mine on a systematic scientific plan. The thin veins criss-cross, branch off at angles, are at points disturbed by broken strata in the rock formation, and so forth. Hence, owing to the peculiarities it is never certain whether a drive on a vein will continue or have to be diverted to another or other directions, or be stopped entirely. Under these circumstances, my attempt to formulate the "contents" brought into sight in a property partially developed is extremely difficult, even in cases where there are well defined, and driven upon, lodes. As to depth of continuance, a great deal has to be ascertained as to each individual property. Early preconceived notions existed that the vein did not continue in depth. West Australian gold mines at first were believed to be payable only to shallow depths, but workings down to over 2,000 feet are now being effected in good ore.

As to Cobalt, the deepest working so far, I believe, is in the La Rose, where continuance of almost vertical lode is being driven on at the 300-foot level, and the shaft is being carried down below such depth. With one property the lode may have high-grade contents in Huronian strata lying above Kewatin rock, and it may become non-payable when exposed in the Kewatin rock below. With, perhaps, an adjoining property the lode in depth where Kewatin rock ceases it may continue to be of good grade. It was at first thought that Kewatin rock meant uniformly non-payable veins embedded in it; but there appear to be cases where the rule does not apply. Still, in selecting virgin areas preference is given to the areas that have at surface the slate-like, and granite-splashed, Huronian rock, and the best lodes, discovered in the Coleman township, in which is situated Cobalt "city," have so far been found in the Huronian outcrop. Indeed, to the present time very few promising developments have been effected in regions outside the Coleman township, the south part of Bruce township adjoining to the north, and the township that is immediately east of Lake Temiskaming.

Notes of Cobalt News.

Nipissing has taken out very rich ore from vein No. 54. Manager Drummond has several large slabs of native silver about an inch thick from vein 54. One

of these is nearly two feet in length. The Kendall vein has produced practically one hundred thousand dollars per month since its discovery last May. Nipissing has started a dozen men on the lot north of Cobalt town, which will undoubtedly produce much rich ore from veins discovered there during the summer.

It is expected that the concentrating plant of the Cobalt Central Mines company will begin operations before Nov. 15. The engine which was required to finally complete the plant having arrived, and is now being installed. The operation of this plant is a matter of much interest in and around Cobalt, as it will greatly increase the ore handling capacity. The Comogas and Nipissing companies, the largest shippers and greatest earning companies in Cobalt, are handling only from fifty to sixty tons of ore per week, while the Cobalt Central company, with its concentrating plant in operation, will handle a minimum of fifty tons per day, or six times as much as the companies which up to the present time are the heaviest shippers.

The Rothschilds mine has been turned over to the owners of the Kerr Lake mine on a lease and bond similar to the system of many deals in the western camps. It is reported that the sale price is to be \$150,000, the option to run six months, and the operators agree to spend \$20,000 in development work in the month. A large force has been employed in surface prospecting. This will be continued during the open weather, and during the winter extensive work will be done on the property with diamond drills. During the summer the Kerr Lake company installed a new seven-horsepower compressor plant, built a fine new power house, new sleeping camps and made many other surface improvements, all of which are of permanent character. No. 7 vein, which runs from fifteen to twenty inches in width, is of solid metal, small file and silver, and in many cases passes the test of the cyanide solution. It is constantly used with the various devices connected therewith, too much care cannot be exercised in installing the equipment so that it would be almost impossible for an accident to happen in connection with its use, and by following the rules laid down by the National Electric Code, which is authority on electrical wiring, this end could be obtained. Therefore, it is the object of this communication to interest your honorable body in framing an ordinance which would necessitate the correct installation of electric wiring, before allowing the current to be used in connection therewith. In this manner the concerns furnishing electricity, and those doing construction work, would be placed upon a satisfactory footing, and the result would be a much more efficient and safe service.

Negaunee Department

WIRING IN NEGAUNEE SAID TO BE DEFECTIVE

MANAGER OF U. P. BRANCH OF THE STATE INSPECTION BUREAU SAYS THE WORK SHOULD BE MORE CAREFULLY DONE.

According to H. W. Trembath, manager of the upper peninsula branch of the Michigan Inspection Bureau, the electric light and telephone wiring in Negaunee is defective and the standard of work done on companies with this in other cities and towns of the upper peninsula. The council Thursday evening received the following letter from Mr. Trembath: "In view of the fact that the city of Negaunee has expended in the neighborhood of \$50,000 in bringing the electric light plant to a point where efficient service and a reserve energy sufficient to meet the requirements for some time to come might be expected, and is also employing a competent electrical engineer at a good salary to superintend it, it seems but reasonable to expect better results than have been obtained in the past. It does not require an electrical expert, nor even a person with a moderate electrical training, to readily see that the electrical wiring done in this city in the past is of a very poor quality and very much below the standard of work done in cities and towns of the upper peninsula which would not begin to compare with Negaunee in size and importance, and such being the case it is a continual source of expense to the property owner, in addition to his portion of the cost of maintenance as a taxpayer, in that where electrical defects exist in his or adjoining property he is assessed by the fire underwriters carrying his risk, according to the gravity of the defect.

It does not follow that because electrical material, which has been approved by the National Board of Fire Underwriters, is now generally used, that the wiring is safe, either from a fire or life standpoint, as much, and more, depends upon the correct installation of the electrical equipment. This does not apply to electric light and power alone, but to telephone service as well. Under existing conditions regarding outside wiring, it is hardly safe to use the telephone, the wires of which, in many cases, pass over a network of high tension light and power wires, across with any one of which, might under certain conditions, result in loss of life or fire.

"In this day when electricity is so generally used for illuminating the home, where children and grown persons so pass the longest hours of their lives, and are constantly using the various devices connected therewith, too much care cannot be exercised in installing the equipment so that it would be almost impossible for an accident to happen in connection with its use, and by following the rules laid down by the National Electric Code, which is authority on electrical wiring, this end could be obtained. Therefore, it is the object of this communication to interest your honorable body in framing an ordinance which would necessitate the correct installation of electric wiring, before allowing the current to be used in connection therewith. In this manner the concerns furnishing electricity, and those doing construction work, would be placed upon a satisfactory footing, and the result would be a much more efficient and safe service.

MANY GO TO THE WOODS.

Over 100 Negaunee Men Are Hunting Deer Today.

The early trains out of Negaunee Saturday and yesterday morning carried large delegations to the woods. Among those who left Saturday were C. L. Spoor and his son, Everett, Thomas Gribble, Thomas Connors, John Shea and Dr. J. H. Andrus, who will hunt in the vicinity of Mr. Connor's sawmill in the Birch district; Al. F. Maitland, F. A. Bell, Dr. B. J. Miller and W. M. Sterling, who went to the Maitland camp north of Clowery; and Thomas Pellow, Captain William Penglass, W. H. Mitchell and Robert Thompson, who left for a camp a few miles out from Munsing. Others who left the city during the last three days of the week were: Morris Wainwright, Angus McDonald, Charles Anderson and Alfred Hellstrom, who will hunt at Twin Lakes; William Gratzie, Warren Thomas, John Henry and Gunnar Larson and Bert Balcom, who are at Nine Kilns; Henry Lee, James O'Brien and H. P. Johnson, who will hunt near Cascade Junction; H. G. Muck, Fred Merton, J. A. Wasmuth, James Gaffney, Joseph Barabee and Christ Johnson, who will spend a few days in the vicinity of Little Lake, near the Muck homestead; Steve Ladigan, Swan Pilo, Carl Pello and M. Ladderbakka, who are located at a camp near Princeton; Herman Thela and John Arnet, who left Thursday morning for the woods north of Clowery, where Mr. Thela owns a camp, were joined Saturday by William Chapman, Clarence Thela, Louis Merrill and Dr. N. J. Robbins. Negaunee men hunting in the Green Creek country are: L. P. Peterson, Al. Willman, Jacob Sale, John S. Mitchell, Louis Villeneuve and John McDougall. Mayor Winter's party, consisting of himself and his brother, Dr. J. A. Winter, of Calumet, and Andy Suss of this city, and four Chicago friends, left Saturday for the district north of Clowery, where they will spend a week or ten days. Others who have already gone out are Dr. A. W. Halde, J. M. Perkins and E. B. Raymond, who are with a party of friends some miles out from Michigan.

The Mining Journal was advised yesterday that many lower peninsula hunters have already arrived at Michigan, where some of them have hunted deer for several seasons past. There were fifteen in one party arriving Friday, and another good sized delegation reached there yesterday.

FOOTBALL GAME A GOOD ONE.

Negaunee Defeated Marquette Saturday Afternoon by Score of 23 to 0.

The football game Saturday afternoon at the Union Park gridiron between the Negaunee and Marquette high school teams was won by the former. The score was 23 to 0. The attendance was not particularly large, but this was due very largely to the unfavorable weather. Twenty-five minute halves were played. Negaunee won the toss. It chose the west goal, playing with the wind, and kicked off to Marquette's twenty-yard line. Marquette advanced the ball for six downs to the center of the field, where Negaunee held. In four plays Negaunee had the ball over for the first touchdown. McAuliffe taking it for fifteen yards on the first run, Coombe advancing it twenty yards, Burge twenty, and McAuliffe going over. The latter also kicked goal. Marquette kicked off to McAuliffe on Negaunee's twenty-five yard line. McAuliffe advanced twenty yards, and on the second down Burge went around the right end for thirty yards. Steady advances followed until the ball was within one yard of Marquette's goal. Then McNabb was pushed over for the touchdown, and McAuliffe kicked goal. Negaunee kicked off to Marquette's ten-yard line. Marquette began to hit the center with considerable force, making the necessary gain several times. Richardson, one of the half backs, did particularly good work. Negaunee finally secured the ball, but Marquette recovered it again when Negaunee attempted an on-side kick. Marquette was held for downs, and a punt sent the ball to Negaunee's thirty-yard line. McAuliffe took it forty-five yards around the left end, but Negaunee was then held and was forced to punt. Marquette returned the punt, sending the ball back to the center of the field, Negaunee recovering it. Yonkers took it thirty-five yards on an end run and in the second down following Burge was sent over the line for the third touchdown. McAuliffe missed the goal. Marquette kicked off to Burge on Negaunee's twenty-yard line, but the ball was punted back. Marquette again made good gains through the line, but when on Negaunee's thirty-yard line the visitors were sent back fifteen yards for huddling. A punt was called for, Shea getting the ball near Negaunee's goal, advancing it forty yards. After a few more downs the half ended with the ball in the center of the field. In the second half Marquette kicked off to Shea on Negaunee's thirty-yard line. The ball was carried fifteen yards. In the first down Burge took twenty yards, Shea following with fifteen in a quarter-back run. Negaunee was held for downs, but soon recovered the ball, advancing to Marquette's fifteen-yard line, when it was lost on a fumble. Marquette advanced seventeen yards on a forward pass. Negaunee recovered the ball on downs on Marquette's forty-yard line. After some minutes of stubborn playing Negaunee went over again for the last touchdown, with three-quarters of a minute to play. McAuliffe kicked goal. The officials were Squires of Negaunee and Crowl of Marquette, the former refereeing the first and the latter the last half. The Marquette line-up was as follows: Center, Burrows; left guard, Pondill; right guard, Patrick; left tackle, Christie; right tackle, Campest; left end, McKerrigan; right end, Seft; left halfback, Catlin; right halfback, Richardson; full back, Maddigan; quarter-back, Richardson.

DEATH OF WILLIAM FARM.

Former Wellknown Resident of Negaunee Died at Hurley, Wis.

Richard Kappes received a telegram Friday evening advising him of the death at Hurley, Wis., of his son-in-law, William Farm. The deceased had been in poor health for over a year past, having suffered with heart trouble, and dropsy. He was the head chemist at the Ashland mine, Ironwood, operated by the Cleveland-Cliffs iron company. He had worked steadily, though he had felt very poorly since last Christmas, but about a week ago was ordered to give up. His condition became precarious early in the week and relatives here were advised Wednesday that there was very little hope for his recovery.

The deceased is very wellknown both in Negaunee and Ishpeming. He was born and raised in the latter city, but he worked in Negaunee for a few years before moving to the Gogebic range. He was employed as chemist at the Cambria mine and after leaving there went to the Colby mine at which his uncle, Captain Peter Backlund, was the superintendent. From the Colby he went to the Ashland.

The deceased was thirty-two years of age and was married in Negaunee about fifteen years ago to Miss Annie Kappes, both he and his wife being unusually young at the time of their marriage. Besides the widow, six children, the oldest about fourteen years of age, survive him. His father and mother are both living, the former residing at Norway and the latter is with her daughter, Mrs. Ramquist, at Grand Rapids, Minn. Another sister, Mrs. Thomas Jensen, formerly of Ishpeming, lives in the west, while there are three brothers, John Farm of Ishpeming, Charles of Sault Ste. Marie, and James of the Saginaw location.

The remains will be received in Negaunee on the early South Shore train this morning.

WILL CONDUCT HOPS.

The degree team of the Negaunee camp of the Modern Woodmen of America will give a series of dancing parties during the fall and winter season. The first will take place next Friday evening at the society's regular meeting place in the Boulouise block. Music will be furnished by the Negaunee high school orchestra, and tickets will be fifty cents per couple.

Ely's Cream Balm has been tried and not found wanting in the treatment of the sore throat and swelling. It gives immediate relief and a day or two's treatment will put a stop to a cold which might, if not checked, become chronic and run into a bad case of catarrh.

PASTOR TO BE INSTALLED.

A mission meeting of the Ippening district of the Illinois conference of the Swedish Lutheran church will be held at the Negaunee church Tuesday and Wednesday of next week. The district includes practically all of the upper peninsula, and it is expected that there will be ten or more ministers in attendance. Tuesday evening Rev. S. Bergdahl, pastor of the church here, will be formally installed. Special sermons will be preached by two or more of the visiting pastors and there will be special music by the choir.

LOCAL LAONICS.

Mrs. William Anderson and daughter, Miss Mable, will spend the winter in Chicago.

Allen McDonald has returned from Illinois, where he spent the greater part of the past month.

The funeral of the late William Farm will be held this afternoon with services at the Kappes home.

A number of the Finnish young men of the city conducted a hop Saturday night at McDonald's Opera House.

Charles C. Fouch of St. Ignace was in the city Saturday, having come up here to join Negaunee friends on a hunting expedition.

Harry Pentecost, a former resident, who has been on the Mesaba range for more than a year past, has accepted a position at Princeton.

The L. & H. Tigers football team has accepted the challenge of the Union Depot Hotel eleven, and will play the game next Saturday if agreeable.

The Ladies Aid society of the Danish Lutheran church will conduct a basket social and bazaar at Christ Johnson's hall a week from next Friday afternoon, the 22nd.

Since dispensing with the vaudeville features, Manager Arber of the Bijou theater has reduced the admission prices to ten cents for adults and five for children.

Cyril Houle, Negaunee agent of the American Express company, is enjoying a few weeks' vacation. William E. Roblee, one of the company's relief agents, is filling his place.

R. E. Ford, employed at the South Shore station here for a year or more, has given up his position and returned to his home at Corunna, Mich. John Starnaway takes his place.

The Negaunee and Ishpeming shareholders of the Bellmore Bay Gold Mining company will meet this evening at 8 o'clock at Joe Barabee's store. A directors' meeting has been called for tomorrow at Escanaba.

John Q. Adams, one of the oldest and best known attorneys in the upper peninsula, who has resided in Negaunee since 1872, last week celebrated the seventieth anniversary of his birth. He was born at Cornwall, Conn. His father was born at Westerley, R. I.

A musical entertainment was given Saturday evening, the date of the anniversary of the birth of Gustavus Adolphus, at the Swedish Lutheran church. The program consisted of instrumental and vocal numbers, also recitations. Rev. S. Bergdahl, the pastor, gave an address on Gustavus Adolphus. Among those who took part were Professor Fohman Helma Eriksson, Edwin Morse and Joan Lindquist, Hulga Arverson, E. Gorlin and T. A. Thoren.

DINNER TO "LIGHT BRIGADE."

Only Thirty-five of "the 600" Have Not Received the Final Summons.

London, Nov. 10.—"All that is left of them—left of 600." They total thirty-five, and of these only thirteen were well enough to attend the dinner given recently at The Horns, Kennington, to celebrate the fifty-third anniversary of the Balaklava charge. Hoary-headed, weather-beaten old sons of Mars they were—the youngest of them seventy-four years of age, the oldest eighty-eight. Some of them hale and hearty yet, but others showing unmistakably the effects of want and privation.

It was delightful and touching to notice the joy with which the old heroes met to fight their battles over again, to compare notes of the happenings since their last meeting a year ago, and to greet the comrades who had in the interval departed to the "Great Beyond"—and to point out with bated breath the fact that at the table were now seated the fatal thirteen.

T. H. Roberts, who started the fund for the relief of those members of the Light Brigade who were in necessitous circumstances, explained that in 1857 he wanted to invite the survivors to Fleet street to view the Diamond Jubilee procession. On application to the war office the names of seventeen were given him, but, as a result of his own investigations no fewer than sixteen-seven accepted his invitation. It then occurred to him that something must be done for these men who had fought for their country. Some of them were found in various homes. None are there now. The fund had paid the funeral expenses of twenty, who would otherwise have been buried by the parish. The war office had been approached with regard to pensions, and as a result nine men were now receiving from 6d. (12 cents) to 1s. (25 cents) per day on which they were expected by a grateful country to live. Of the thirty-five men who were now alive, twenty-six were wholly or partially dependent on the fund for their living, which costs \$3,250 per annum.

Much appreciation was expressed when it was announced that the following telegram had been received from Lord Knollys: "I am commanded by the king to thank the survivors of the Light Brigade for their expression of loyalty and to tell them that his majesty hopes they may long live to celebrate their historical charge." Very impressive was the drinking of the closing toast, "The memory of the dead," in solemn silence. Many an eye was dimmed when the memory of departed comrades came so directly home to the little company.

PILES CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c

FOR SALE—A desirable residence property on C-7 street. Also two coal heaters and a gas range. Enquire of E. E. Drake, Negaunee, Mich. 11-11-07.

TAKEN UP—Cow John Niemisto. On county road, south of Silver St., Negaunee. 11-8-107.

WAITING FOR THE SPEAKER. PRESIDENT LIKELY AGAIN TO HAVE CO-OPERATION.

Legislative Program Will Be Arranged When Cannon Arrives in Washington—Roosevelt, as Usual, Probably Will Ask for More Than He Expects to Get—Already There is Gossip of Coming Trouble; but Proximity of National Election Likely to Check Any—Mt. Vernon China Lent to National Museum.

Washington, Nov. 10.—When Joseph G. Cannon returns the program for the coming session of congress will begin to take form. Four weeks from next Friday he will be nominated for speaker by the Republicans, which is equivalent to election, and selected with power to select what the lower branch of congress shall and shall not do.

The president has realized that he could not make much headway with legislation unless he had the cooperation of the speaker. It is generally understood that during the last two sessions of congress the speaker has stood out against any "interference" with the Dingley tariff law, and has supported loyally practically all the legislation the chief executive asked of congress.

Waiting for the Program. Until the president and the speaker of the next house talk things over there can be only speculation as to what the coming winter's legislative program will be. The public knows in a general way what the president wishes—what he will ask for in his message—but he has always made a practice of asking for a deal more than he expected to get.

Gossip of Trouble Begins. This is the time of year when Washington is alive with gossip to the effect that congress is getting ready to "back" the president, and throw overboard all his recommendations for important legislation.

Other Nations Waive Duties. "Now, in the navy it's the same way, and a sailor on an American warship in Manila harbor, under the American flag, can't get a dinky pair of suspenders without contributing to the Philippine customs service. Now, did I tell you why one of our ships happened to be stationed at Honk Kong, on the Chinese station, at Christmas time, the sailors could get all the old Christmas presents in the world right on board, free of duty. British courtesy, by ding, smooths the way. Same case if a warship's stationed on the European station.

MAY RAZE HISTORIC HOUSE. Talk of Skyscraper Where Author of "Star Spangled Banner" Dwelt. Washington, Nov. 10.—The historic old mansion of Francis Scott Key, author of "The Star Spangled Banner," is threatened with destruction. This house was Key's home when he made his memorable trip to Baltimore to save a friend held as a prisoner on the British fleet in Chesapeake Bay, which trip resulted in his witnessing the bombardment of Fort Mifflin, and writing the words of the patriotic anthem.

TRAMPED 1100 MILES. Two Workways on Steamer Footed It from Valparaiso to Buenos Ayres. Boston, Mass., Nov. 10.—Eleven hundred miles is quite a tramp, especially when the greater part of it is over wild and unfrequented country and two hundred miles of it above the snow-line, in the mountains. Nevertheless, that was the distance covered by two men who arrived at this port this morning on the steamer Horatius from South America.

KEEP BURROWS IN. Michigan's Senior Senator a Strong Man, Says Newberry. Washington, Nov. 10.—If Truman H. Newberry, assistant secretary of the navy, has heard the alluring voice of political ambition he gives mighty little evidence of it. Although he has been mentioned as a strong candidate for the Michigan senatorship in 1911 he spoke a kind word today for Julius Caesar Burrows as his own successor.

NEW FACES IN THE SENATE. MORE CHANGES THAN USUAL THIS YEAR.

Many Old Members Removed by Death or Defeat; but There Still Are Enough Left to Control the Body—Eight Democrats and Seven Republicans Gone; Eleven Republicans and Four Democrats Take Their Places—The Minority Without a Leader.

UNCLE SAM AS SANTA CLAUS. Will Carry Christmas Boxes to Soldiers and Sailors Abroad. Washington, Nov. 10.—Uncle Sam is planning to give his soldiers and "Jackies" in foreign climes a Merry Christmas. As has long been the custom friends and relatives may send to our khaki boys in the Philippines and Cuba Christmas presents without cost of transportation except to the port of departure in this country.

DEFEND PEACE CONFERENCE. Choate and Porter Talk on Gathering. New York, Nov. 10.—General Horace Porter and Joseph H. Choate, two of the American delegates to the recent peace conference at The Hague returned home today on the steamer Kroepinnessin Celes, and will go to Washington in a few days to submit a report to the president.

RECORD OCEAN TRAVEL. Total of 2,007,994 Passengers Carried East and West Since Jan. 1. Boston, Mass., Nov. 10.—Figures of the transatlantic conference on the number of ocean travelers to and from this country since Jan. 1, of this year, show that a new record has been established. The total carried east and west is 2,007,994 as compared with 1,707,143 in the corresponding period last year.

JAPAN'S PLAN SEEN IN TRUE LIGHT. Removed Purchases of Guns and Torpedoes Are Great Exaggerations. Washington, Nov. 10.—The many mysterious reports that indicated tremendous Japanese preparations for war are being dispelled by the war and navy department. Officers of both the military branches are learning that numerous statements, taken at first on their face, have little, if any, foundation.

CROKER AROUSES FIREMEN. New York, Nov. 10.—When the operator in Fire Hall received the "three lives and a two" call at twelve minutes before noon he nearly fell off his chair. A few seconds later every fire house in Manhattan and the Bronx was in a state of unparelled excitement, and everywhere fire telephone wires were whirring with inquiries as to the location of the "cattastrophe." The call is known as the "Sappers and Miners," who compose the dynamite squad of the fire department, and it is sounded only in the event of such devastating fires as visited Baltimore and San Francisco, when it becomes necessary to blow up buildings to check the course of the flames.

DARANTELLA. 10c Havana Cigars, 10c. "Let us have some Cudahy's Peacock bacon and calves liver for supper Mamma" say young and old. (11-27-07)

Bald? Judging from the tops of their heads, some people like hard-wood floors! To take now for Ayer's Hair Vigor to completely cover this upper story, but you may add arg or here and there by the systematic use of Ayer's Hair Vigor. Does not color the hair. Formula with each bottle. J. C. Ayer & Co., Lowell, Mass.

HEALTH INSURANCE AT LITTLE COST

Key was shot and killed in front of the White House by General Sicks. When the British burned Washington in 1814, and President Madison fled, Francis Scott Key was aide-de-camp to Major Peter, Dr. William Beane, a native of Marlborough, Md., was captured by the British army on its retreat to the Chesapeake bay. Armed with papers from the state department, Mr. Key started to Baltimore to secure his release.

At Bargain Prices. 2 horse power, complete.....\$45.00. 3 horse power, complete..... 60.00. 4 horse power, complete..... 75.00. 6 horse power, complete.....150.00. 8 horse power, complete.....190.00. 12 horse power, complete.....250.00. Above engines are second-hand, but are all in good condition and have been returned to us in exchange for larger sizes. Lake Shore Engine Works.

RECORD OCEAN TRAVEL. Total of 2,007,994 Passengers Carried East and West Since Jan. 1. Boston, Mass., Nov. 10.—Figures of the transatlantic conference on the number of ocean travelers to and from this country since Jan. 1, of this year, show that a new record has been established. The total carried east and west is 2,007,994 as compared with 1,707,143 in the corresponding period last year. The movement both to and from England from Jan. 1 to Nov. 1 shows as follows: West—1st. 2nd. 3rd. 1907.....92,152 196,434 1,186,784. 1906.....85,144 163,343 1,041,819. Increase.....7,008 33,091 144,965. East—1907.....90,762 92,467 249,395. 1906.....84,370 78,541 253,292. Increase.....6,392 13,926 95,469. While the above total for the third-class westward-bound passengers is not entirely accounted for by the immigrant movement to the United States, it indicates that the total arrivals of foreigners during the current year will be well in excess of 1,200,000, the number of immigrant arrivals through the port of New York during the government's fiscal year ended June 30 last. KEEP BURROWS IN. Michigan's Senior Senator a Strong Man, Says Newberry. Washington, Nov. 10.—If Truman H. Newberry, assistant secretary of the navy, has heard the alluring voice of political ambition he gives mighty little evidence of it. Although he has been mentioned as a strong candidate for the Michigan senatorship in 1911 he spoke a kind word today for Julius Caesar Burrows as his own successor. "As it looks to me," said Mr. Newberry, "Michigan would do well to keep Mr. Burrows in the current year as long as his health will permit. He has been in the senate so long that he has reached a position of influence. All of the members of the senate know him and they defer to him because of his experience. His service twelve years has also given him exceedingly good committee appointments. His position is such that he can make Michigan's power felt in national legislation. For Michigan to elect another in his place would mean the sacrifice of a large proportion of the state's influence in the senate. No new senator however able can hope to take the place of a veteran. He cannot get the good committee appointments and it takes time for him to win the respect and high consideration of his colleagues. "What I say with regard to Senator Burrows applies equally to William Aldrich Smith. The same principle is involved. It is for the state's best interest to keep him in the senate until age deprives him of his strength. Every year will mean added influence and better committee assignments. "As for my own future I have hoped that when I am through with this work in the navy department I might be permitted to look after my own business. "But you are a candidate for delegate-at-large to the next national convention, are you not? "Only to this extent: I have been asked up in Michigan whether I should like to go to the convention as a delegate. I replied that I would be willing to go. But that as far as my candidacy has gone, I have done nothing to push it and I expect to do nothing. An election to the convention would be a compliment, but only that, inasmuch as the Michigan delegation will doubtless be given strict instructions by the state convention." CROKER AROUSES FIREMEN. New York, Nov. 10.—When the operator in Fire Hall received the "three lives and a two" call at twelve minutes before noon he nearly fell off his chair. A few seconds later every fire house in Manhattan and the Bronx was in a state of unparelled excitement, and everywhere fire telephone wires were whirring with inquiries as to the location of the "cattastrophe." The call is known as the "Sappers and Miners," who compose the dynamite squad of the fire department, and it is sounded only in the event of such devastating fires as visited Baltimore and San Francisco, when it becomes necessary to blow up buildings to check the course of the flames. There are four battalions of the Sappers and Miners, and the "three lives and a two" is the call for the first. It meant that twenty-three assistant foremen from as many fire houses south of Great Jones street were wanted at Great Jones street and the Bowers, where box number 287 had been sprung. Lieutenant Hughes, from Chief Croker's own fire house, was the first to get there—six minutes after the call had sounded. A minute later he was followed by Lieutenant Lakesstream, from Mercer street, who fell off a cart in his eagerness to reach the spot. Then, in quick succession, came others. Chief Croker, accompanied by Captain Robert Oswald and Dr. H. M. Archer of the fire department, welcomed them with a smile and a shake of the hand until somebody asked about the fire. "Oh, it was only a test," replied the chief, "and the result is fine. Every man whose duty it was to respond turned up in good shape," and he sent them all back to their stations. JAPAN'S PLAN SEEN IN TRUE LIGHT. Removed Purchases of Guns and Torpedoes Are Great Exaggerations. Washington, Nov. 10.—The many mysterious reports that indicated tremendous Japanese preparations for war are being dispelled by the war and navy department. Officers of both the military branches are learning that numerous statements, taken at first on their face, have little, if any, foundation. An example was the widely circulated information that Japan had purchased great quantities of torpedoes in Europe and had probably purchased about all the available supply. The facts are that Japan had acquired some torpedoes in Europe, probably not as many as the fifty the navy department purchased some weeks ago for our own ships. The torpedo factory at Newport will not be in operation till next spring, and the purchase of torpedoes from abroad was regarded as imperative. Instead of there being a dearth in the supply of European-made torpedoes there is something like a glut in the market. Several firms have been nibbling recently for an opportunity to sell this government large orders of these destructive weapons of maritime warfare. Japan's orders for big guns, placed aboard, have been greatly exaggerated. Her activities in accumulating stores of powder have likewise been overdrawn. Because of certain discoveries in the latter connection this government is now feeling very comfortable. While there is still need of extensive preparations in acquiring a powder supply, it is known that in case of a long war the United States would not be deprived of adequate supplies, even though they were needed speedily. These and other incidents have quieted the war agitation, as far as it proceeded from army and navy sources. There is just as much determination as ever to keep ahead of Japan in preparations, but there is less alarm in the knowledge that the Yankees of the east are not making strides in armament. It is a well known fact that persons living in the Pine forests do not suffer from kidney diseases. One dose of Pinesules at night usually relieves backache. 30 days' treatment, \$1.00. Your money refunded if not satisfied. Sold by The People's Drug Store. "Let us have some Cudahy's Peacock bacon and calves liver for supper Mamma" say young and old. (11-27-07)

SNOW STORM BRINGS JOY TO THE HUNTERS

ONLY TWO DEER ARE BROUGHT TO THE CITY AT CLOSE OF FIRST DAY OF THE SEASON.

NO ACCIDENTS ARE REPORTED

Camps in Unbroken Line from Marquette to Big Bay and Beyond—Weather Keeps Hunters Near Camps.

The first big snow of the year marked the opening of the hunting season, and while the snow was most welcome to the hunters many of them kept close to their camps yesterday on account of it.

Most of the hunters established their camps early in the week and were well prepared for the storm yesterday and last night. A large number, however, could not afford to leave from their busi-nesses yesterday, and there were some nesses only the single day were in the who did not go to their camps until the actual opening of the season.

The two hunters who brought in deer last night were Ed. Sink and Joseph Reany, both of them Marquette men. The two were together and during the day confined their operations to the country around Buckroe.

William Suttell was with him when the deer was killed. It is not to be doubted that many other deer were shot, but no other reports were brought to the city.

Hunting Difficult in Storm.

The snow storm began about 1 o'clock yesterday morning and continued intermittently through the day Sunday and Sunday night. Through the day there was a brisk wind from the northeast and traveling against it was difficult.

One of the new provisions of the game law this year is that deer lawfully killed may be kept for thirty days after the close of the season, which will be November 30.

The secretary of state sent nineteen hundred licenses to the county clerk and it is probable that all of these will be sold. By far the largest number of hunters are from lower Michigan, as has been the case in former years.

U. P. Leads Slaughter.

As upper Michigan led the country in the number of deer slain, it also led in the number of casualties in the woods. The government's estimate of the number killed during the hunting season is apparently increasing and in 1906 the loss of life from this cause was appalling.

In the states which forbid the killing of does and of deer whose horns are less than three inches in length, accidents were least frequent and provisions of this sort have been suggested to the Michigan legislature, but without effect.

Law of Slight Avail.

It is now generally conceded that the law, which has been on the statute books of Michigan for some years and which makes it a felony to kill through carelessness, is of slight avail. In the woods it is usually a friend who kills a friend, or matters of the sort are quietly settled out of court.

have been introduced. The expanding bullet now used by many hunters is another source of danger. Many of the rifles now in use might easily tear off a limb and the expanding bullet makes a wound of anything from four to eight inches in diameter before it even strikes a bone.

MRS. SPEAR'S FATHER DIES.

T. O. Hampton Was a Resident of Marquette for Twenty-Five Years.

Thomas O. Hampton, a former well-known and esteemed Marquette resident, died at his home in Carterville, Ill., yesterday morning. His death was due to a complication of ailments brought on by old age.

Mr. Hampton was the father of Mrs. J. W. Spear, of 214 East Ridge street. He came to this city in 1867 and built the rolling mill in South Marquette.

OPEN ALLEYS TOMORROW.

Bowling Match Will Be Played by the Chauffeurs and the Maids.

The bowling alleys, which have been undergoing repairs the past week, will reopen tomorrow night with a match game between the Chauffeurs and the Maids.

The improvements on the alleys were made by Mr. Egerstedt, of the Brunswick-Balke-Collender company of Chicago, and they are now in first-class condition.

THE WEATHER QUESTION.

Three Replies Received for Information of the Ones Who Bet.

In answer to the query regarding the weather in Marquette a year ago, three replies, given below, have been received. The query grew out of a bet which two readers of The Mining Journal made.

One of them bet that after the snow storm which occurred about Oct. 9 of last year there was continuous snow on the ground and that winter had practically set in, that there was sleighing almost all the time from that date with the exception of probably a day or so.

Another of the replies, it is stated, was taken from a young lady's diary. Here it is: "Oct. 4—Warm as summer. Oct. 16—Fine. Oct. 26—Warm—no snow. Oct. 27—Rain, turning to snow. Nov. 21—Blizzard. Nov. 25—Rain—warm. Nov. 26—Rain."

The other reply is from a city employe who makes it a point to keep tab on the weather at all times, he says. This is his report: "On the morning of Oct. 10 there were ten inches of snow on the ground with the thermometer 20 degrees above zero. From the 13th to the 18th of October it was pleasant and warm and there were three days during which heat was not needed in buildings. From the 18th of November on it was cold."

It is possible that the two bettors would be grateful for further light on the question and if there is any forthcoming, The Mining Journal will report it, if the communications are addressed to Dept. L.

TRAFFIC BLOCKED.

Must Obtain Permission From Council to Tear Up Streets of City.

Property owners, who without obtaining permission to do so have torn up sections of the streets in part of the city, have incurred the displeasure of the street car company and a number of complaints have been filed with the city authorities. Work which one man was doing was interrupted recently, when he was asked to show his permit. A hole which he had made in the street had blocked the passage of the street cars. It developed that the man had no permit, but in view of the fact that he was willing to arrange matters so that the cars could pass no prosecution was begun.

STORM SASH.

We make all sizes on short notice. Don't wait. Consolidated Fuel & Lumber Co. (4-27-11)

HUNTERS' MAPS.

County and city maps for sale at my office, Fred Beck, corner Front and Washington streets. MRS. ELMER JOHNSON. (11-7-1w)

FURNACE EMPLOYEE DIES OF INJURY

PETER PENTTINEN, WHOSE SKULL WAS FRACTURED, EXPIRES AT ST. LUKE'S HOSPITAL.

Peter Penttinen, the employe at the Pioneer furnace plant whose skull was fractured Thursday when a heavy piece of cord wood fell from a trestle and struck him on the head, succumbed to his injuries early Saturday morning.

Accident Occurred at Noon.

It was just before the noon hour that the accident occurred. Penttinen had started across the yard and his path led him beneath the trestle. His movements were so timed that just as he started under the trestle, the heavy piece of wood became dislodged and dropped a distance of about twenty feet. It crashed down upon the man's head and instantly rendered him unconscious.

Had Slight Chance.

Thursday night the man rallied slightly and through the day Friday he appeared to be holding his own, but he suddenly took a turn for the worse Saturday night, and efforts of the physicians at the hospital to save him were unavailing.

It expels all poisons, stimulates the internal organs, cleanses the system and purifies the blood. Such is Hollister's Rocky Mountain Tea, the most effective preventative of disease. 35 cents, Tea or Tablets. The Stafford Drug Co.

LEHIGH COAL.

The best coal on earth. Now is the time. Consolidated Fuel & Lumber Co. (4-27-11)

ORMSBEE & ATKINS, Nester Block, Washington St.

Jacob Rose The Store of Quality. MARQUETTE.

"Merit" Defined, is excellence Deserving honor or reward.

The rewards of merit in clothes-value are the satisfaction-giving qualities which influence the wearer to unconsciously recommend them to his neighbors--our most potent kind of advertising and the foundation of our success.

But rather, it is the inevitable result of our exacting demand in the manufacturing, our superb taste, originality and concentration of thought and energy upon one object.

Craftsmen who tailor our garments: plan, study--create! They trace life-lines, consider correct dimensions, relative proportions, and in fact, draw drafts of human beings with a positive exactness. Executing art, character and style in every garment.

FIRST NATIONAL BANK of MARQUETTE. It is easy to save money if you go about it systematically. A little saved each week doesn't amount to much at the time--perhaps only a dollar--maybe less--but keep on saving and these small sums will grow in a few years to a very comfortable bank account. All Savings accounts earn three per cent. at this bank. SEND FOR OUR BOOKLET BANKING BY MAIL.

Fall and Winter UNDERWEAR. We wish to call your attention to our most complete line of heavy cotton and woolen Underwear for ladies and children. Our stock includes the very best makes of Underwear in the country, and our assortment is the most complete in Marquette. We advise you to come and see our line before buying as we have some very tempting bargains for you. THE VARIETY STORE 149-151 Washington St. J. A. MALHIOT, Prop
