

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED).

Issued daily except on Sundays. Contains Associated Press dispatches and is especially devoted to the Upper Peninsula interests.

Subscription Rates: Per month, by carrier, \$1.00; Per year, by mail, \$10.00.

MARQUETTE, MICH., JAN. 26.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

Hostilities will be resumed at Springfield, Ills., today.

If there were any men "higher up" at Escanaba they got off scot free.

Lovely weather? Yes. But we will probably pay for it when we ought to have spring.

What's become of the state of Superior; also the Michigan-Wisconsin territorial dispute?

Well, we thought all along that the Escanaba grand jury would turn out about that way.

Senator LaFollette appears to be what might be termed a negative influence in the upper house of congress.

In regard to the Illinois senatorial situation: Senator Hopkins has the most votes, but the Hon. William Lorimer, Esq., appears to have the pole.

Mackinac Island wants a big juicy appropriation from the present legislature. What did Mackinac county do for the present administration, we would like to know?

It might be well for the upper peninsula to memorialize the legislature to the effect that the state experiment station at Chatham, Alger county, is still on the map.

There continues to be much discussion in the state press of Chas. S. Osborn of the Soo as gubernatorial timber, and it is attended by agreement that Mr. Osborn makes very good timber, indeed.

From the interest displayed by private water power companies in the investigation at Lansing it appears that they must have designs on any powers that they have heretofore overlooked.

If all judges followed the example of the Tennessee jurist who has allowed "toddy" to the jurors who will try the slayers of Senator Carmack, jury duty would, for the mass, lose much of its terrors.

Representative Townsend, who aspires to be senator, is one of the busiest letter writers in the country just now. Representative Townsend plans to give Senator Burrows a race, even if no one else does.

As far as New York is concerned, the election of Secretary Root to be senator, and the re-election of Governor Hughes himself, shows that the people do sometimes have their way, even without direct nominations.

Friends of Judge Perkins of Grand Rapids, who wants to go on the supreme bench, are trying to make much out of the fact that the judge is but forty-seven years of age, but the state at large seems to accept it as evidence that he can very well afford to wait for the preferment that he desires.

Commenting on the situation in regard to the nomination of a successor to Claudius B. Grant, a Grand Rapids dispatch says: "Judge Stone's strength lies in the fact that he has the support of the upper peninsula and Wayne county. In addition his long and distinguished career on the circuit bench has made him many friends all over the state. He has consistently refused to make a campaign himself, but his friends have been very active and his selection is assured."

The upper peninsula press generally approves the suggestion that an upper peninsula conference be held to frame up a schedule of recommendations in regard to game law changes, to be presented to the legislature. It is commented that the effect of contradictory resolutions from many upper peninsula sportsmen's clubs will be distinctly bad, and will not unlikely result in the suggestions from this region being largely overlooked. It is important that there be a large and representative attendance at the meeting called for Marquette for Feb. 16 by the Grand Island Rod & Gun club.

"There is absolutely no truth whatever in the report that Benjamin Ide

Wheeler, president of the University of California, has announced that he will not accept an invitation to become the head of the University of Michigan, for the very good reason that no such invitation has been extended to him or anyone else." Regent Beal is quoted as saying, "That's conclusive enough, even if it were not backed up by other officers of the university. There appears to be no more foundation for the report that President Wheeler has declined to become the head of the U. of M. than there has been for the numerous other reports of recent months that have carried the suggestion that President Angel would presently retire from the office he has so greatly honored.

The Escanaba grand jury, it appears, failed to turn up anything out of the ordinary. To be sure, sixteen indictments were returned, but they were found against saloonmen, keepers of houses of prostitution and persons who rent property for such houses. There are none of the indicted persons who could not have been arrested by the peace officers, and prosecuted by the prosecuting attorney under the general statutes, if those officers had cared to do their full duty. The indictments returned at Escanaba could be duplicated in almost any other upper peninsula city. They could be duplicated here in Marquette, where there have been violations of the saloon law—if they have not been as bold as at Escanaba—and where, also, landlords take rents from keepers of houses of prostitution who lease the properties so used from their agents. Outwardly, it seems, Escanaba is not so different from some of its neighbors. The difference, it would appear, is mainly one of degree. Altogether Escanaba and Delta county have come out of their grand jury ordeal much better than might have been expected.

Representative Young furnishes The Mining Journal with the following information relative to the present status of the Marquette harbor of refuge project: "Under date of Dec. 1, 1903, the chief of engineers of the army report, speaking of the vicinity of Marquette, said: 'Greater harbor of refuge facilities are needed in this vicinity; Marquette harbor is the best place to select for improvement to this end, and the sheltered area needed can be secured by extending the present breakwater. The estimated cost of extending this breakwater 1,500 feet is \$303,000. In the opinion of the board this expenditure is reasonable when compared to the advantages to commerce that would follow its construction and the locality is therefore regarded as worthy of improvement by the United States in the manner proposed. In this I concur.' General Marshall, chief of engineers, again refers to this project favorably. It has been recommended, therefore, by all the engineer officers, from the local engineer to the chief of engineers, and is still regarded favorably. I expect to be able to get it into the next general rivers and harbors bill and have little fear that I can do so. By the next general rivers and harbors bill I, of course, do not mean the maintenance bill that will be passed this winter. There will be nothing but a maintenance and emergency bill; all talk of anything else is sheer nonsense."

The Grand Rapids Press flatly disagrees with Representative Whelan's idea that the state can very well dispense with the service of a state highway commissioner, and should also cease paying bounties for good roads built by the counties. "Mr. Whelan's idea that the counties and townships will raise as much money as is now spent on good roads and do the work themselves is ill founded," says the Press. "A large portion of the money now raised comes from the state at large. Some, perhaps, may regard it as unjust that money raised by taxing one county is spent in some other county. It is necessary, however, that the money be concentrated in order to effect results. The money raised by the state is spent on all of the roads of the state would not pay for a load of gravel per mile and its expenditure would be an absolute waste. Concentrated on a comparatively few miles it secures a considerable amount of first-class construction. No community receives any of it until it taxes itself at least an amount equal to that drawn from the state, and every community is at liberty to avail itself of the state aid if it chooses to. The state has had experience with a law which left the matter wholly to the townships and counties and the experience was not such as commends that system. The money was frittered away and nothing was accomplished of value. Roads constructed under state supervision are good roads and conform to certain recognized standards because if they do not the town can draw no state money. Left to the townships there would be no necessity for conforming to the best standards. Every town official would build according to his own ideas and limited knowledge. This has been the experience of every state, and in every state in the Union a state department has been found necessary. The Michigan department is one of the most economically conducted of them all and one of the most efficient. To abolish it would be a long step backward."

A French army officer has invented eyeglasses which enable the wearer to see on all sides and the rear.

TO CURE A COLD IN ONE DAY Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

25 CENTS. FIO'S CURE. Throat and Lungs. 25 CENTS. FIO'S CURE. Throat and Lungs. At all druggists, 25 cts.

WHY NOT PRICKETT? There is always peril in asking for too much that less may be obtained than would have been the case were the original demands more modest. The upper peninsula will ask of the state convention next month the nomination, to succeed Justice Grant, of Judge Stone, that this request will be granted is now believed to be assured, for the tide appears to be setting strongly toward the Marquette candidate.

There is, however, another thing that the upper peninsula is entitled to ask of the convention—if it is judged wise to put forth the claim—and that is the selection of an upper peninsula man for member of the board of agriculture of the state, for which six nominations are to be made. And for this nomination the name of W. S. Prickett of Sidnaw, Prickett of Roycroft farm, has been suggested.

There is no denying that the agricultural interests of the upper peninsula—and they are by no means as inconsequential as our southern neighbors have been prone to insist—have suffered greatly through having no representative on the state board. The upper peninsula branch of the state experiment station has been compelled to get along on inadequate appropriations, and little of practical value has been done under state auspices to develop the agricultural resources of the district.

They are not inconsiderable, as persons who really know the upper peninsula now realize. In Menominee county they have attained a fine development, and the agricultural wealth of that county is really important, while its interest in agricultural development is strikingly shown by the fact that it was the first county in the state to establish an agricultural school. In Chippewa, too, the number of people subsisting on farms, and making good livings, is large, and an important factor in the population. After these counties come Delta, Mackinac and Schoolcraft, and all but a few counties in the district have beginnings of farming that are at least worthy of encouragement. Nothing would, or could, mean more for the upper peninsula than the upgrowth of a rural population such with the task of making fruitful use of its lands as lend themselves to successful cultivation.

From experience we learn that this development will proceed with but little help from the state until the upper peninsula gets representation on the state board of agriculture. Boards composed entirely of lower Michigan men consistently limit, for all practical purposes, their field of work to the lower peninsula, and this will remain true until the region north of the straits has a forcible and eloquent member on that body. We know of no better man for this office than Mr. Prickett of Sidnaw. It would be a great boon for upper peninsula agriculture if the delegates from this region to the state convention next month, after securing the nomination of Judge Stone, could have Mr. Prickett designated as one of the six candidates for the state board.

IT TICKLES HIS APPETITE. Big Zoo Snake Takes First Voluntary Meal in Fourteen Months.

After fourteen months of puzzling and worrying the Bronx Zoo folks have at last found something that tickles the palate of their regal python Salome. The biggest snake of its kind in captivity. The big reptile yesterday partook of its first voluntary meal since it came to New York and last night it was coiled up in the cage, the picture of sleepy contentment.

Salome is twenty-nine feet and ten inches long, and weighs 200 pounds. When it came here, fourteen months ago, it was accompanied by a wicked reputation as a man eater, a reputation which the Zoo people considered amply confirmed when its snaking in its time disgorged a home which, upon examination, was found to be the shins of a human being.

The Zoo folks had long since resigned themselves to the situation, when, on Thursday, one of the peacocks became seriously disabled. A peacock, forsooth, is a sort of pig, very sleek and fat. An idea struck Dimars. Maybe Salome would relish peacock.

It was with mingled feelings of hope and doubt that the keepers laid the dead peacock, weighing forty-five pounds, in the cage of the fastidious Salome. Salome awoke in less than two minutes. It looked at the pig a moment and then began to uncoil itself with all most electrical rapidity. In less than a minute it takes to tell it Salome had swallowed the peacock's head, and in a quarter of an hour most of the pig's body had disappeared.

The only sign of the peacock last night was a big lump that had traveled slowly along the snake's course and was now resting about amidships.

Curator Dimars says that as peacocks are so scarce in the Bronx to feed to mythons he will try pig as a substitute hereafter—New York World.

You would not delay taking Foley's Kidney Remedy at the first sign of kidney or bladder trouble if you realized that neglect might result in Bright's disease or diabetes. Foley's Kidney Remedy corrects irregularities and cures all kidney and bladder disorders. Sold by all druggists.

Upper Peninsula

Fought in Spanish War—As the result of an attack of pneumonia, William Cameron, a well-known and popular young man, is dead at Iron Mountain, Mich. He was 24 years of age. He leaves a wife and four children. He was reared in Iron Mountain, was a Spanish War veteran. At the time that he was taken ill he was assistant electrician at the Chapin mine.

Escanaba Sportsmen to Meet—Sportsmen at Escanaba will meet this week for the purpose of discussing proposed changes to the state game laws which are to be made at this session of the legislature. It is the hope that some definite understanding will be arrived at. Delegates will also be named to attend the conference of sportsmen of the peninsula which is to be held at Marquette early in February.

Newspaper in New Hands—Claude D. Riley of Greenville, Mich., will succeed Z. C. Kincaid as editor and manager of the Ontonagon Herald Feb. 1st. Mr. Riley is a newspaper maker, with fifteen years' experience, the last six of which he has managed the Daily Call of Greenville. Mr. Kincaid tendered his resignation two months ago to enter the U. S. military service in the South-west. Accompanied by his wife and daughter, he will depart about Feb. 1st for a month's visit at the old home in Pennsylvania and will then go to Albuquerque, New Mexico, where he expects to permanently locate.

Upper Michigan Apples Famous—In the windows of Simpson's furniture store in Menominee is displayed a framed document, the property of Magnus Nelson, which is valued far more than the ordinary piece of parchment by its owner. The document is the notice of the award of a silver medal by the officials of the St. Louis exposition upon a simple apple made at the World's Fair by Mr. Nelson. The Menominee county farmer's fruit attracted much attention in the horticultural building at the big exposition, and was of such superior quality that Mr. Nelson secured a medal for his apples from all over the country. President Corey of the United States Steel corporation noticed the particularly fine display and each year is furnished a number of barrels of the finest fruit direct from Mr. Nelson's orchard. So many orders will be filled that orders are accepted only at the fruit season in advance and at that the demand is greater than the supply.

Leave or Long Tour Abroad—Mr. and Mrs. John Henes have left Menominee for New York, where they will board the steamer Moltke Jan. 28 and begin a nine months' tour of the Orient and Europe. The first section of Mr. and Mrs. Henes' trip will be to Algeria, then to Sicily and to Italy. After stopping at a number of Italian ports, Alexandria and Cairo will be visited, following which a long trip to the Holy Land will be made. On the return, Turkey and Greece will be visited. The Moltke returns to Italy before coming back to America and there Mr. and Mrs. Henes will leave the ship, tour Italy and thence proceed leisurely northward to Germany, where they will spend some time.

Saloons to be Restricted—The Michigan Brewers' association has introduced two bills at the present session of the Michigan legislature which are of much interest. One provides that liquor men shall be permitted to sue for property interest lost in counties and districts affected by local option. The other asks that the saloons be restricted to one for every five square miles, and that three convictions for violation of the liquor laws will mean the loss of license. Should the number of saloons be restricted as proposed, the upper peninsula retail liquor establishments would be cut down by nearly one-half.

Mr. General also manager, W. H. Onsworth, Mr. Onsworth, who has been manager of the Cable Pionea company's Menominee store for the past five years and who has been one of Menominee's most popular vocalists and comedians, will resign his position and take the Cable Pionea company's place until the first of February. His successor has not been named as yet, but will probably be sent from Detroit. Pres. Woodford & Bill company's piano sales averaged about 300 a year and the sales territory included Menominee, Delta, Dickson and Iron counties in Michigan and St. Ignace, Marquette, Florence, Oconto and Brown counties in Wisconsin. Mr. Onsworth will remain in Menominee until the time, but will have full supervision of the sales made throughout the company's territory. Six agents are now on the road, but this force is to be increased in the near future. Roy E. Deann, formerly cashier of the Cable Pionea company's Menominee office, was recently appointed manager of Woodford & Bill company's Green Bay store. The concern represents over twenty-five different companies and also features the sale of organs. It deals also in bion the sale of phonographs.

At the present moment the countries of Europe are spending on their armies and navies as much as \$4,000,000 a day.

BASALT FOR ROAD BUILDING.

Dust Problem May Be Solved by Use of Road Metal from Ireland.

Reports have been current for some time past about the possible danger to the Giant's Causeway on the North Antrim coast of Ireland by the granting of mining rights to a company which may quarry this remarkable basaltic formation. As a matter of fact, four quarries have already been opened and about 1,200 tons of columnar basalt have been shipped from Portsmouth to Glamorganshire, where it is being used for road metal. One of the most active spirits in the undertaking is a well-known London importer of Rhineland basalt from the neighborhood of Cologne. The immediate purpose at which the syndicate aims is the making of road metal for which, it is said, Irish basalt is much superior to that which comes from the Rhineland provinces. In the opinion of the concessionists there are great commercial possibilities in the unlimited store of columnar basalt which exists out along the east coast from Bally castle to Portrush. They may go to face an Essex sea wall, to make a Kentish roadway, or to adorn a New York boulevard.

Freights from Belfast to New York are so low that the broken stone could be used instead of the ordinary ballast and sold at a profit to those who wish to solve the dust problem in the eastern cities of the union. Faced and backed with concrete, whole columns could be used for making dikes and other structures strong enough to defy the heaviest buffeting of waves or storm; as a matter of fact, a number of seawalls in England, including that at Blackpool and several on the Essex coast, are "laid with these columns above." Cologne—Manchester, Eng. Guardian.

SUGAR AS AN ANTISEPTIC.

Household Nurses Started Practice Approved by Doctors.

Popular superstitions, so termed, are often founded upon a firm basis of scientific truth. An instance of this is the practice of household nurses who follow some traditional course of conduct, rather asking for, nor receiving, the sanction of the attending physician. All over the civilized world people have seen a doctor or a nurse in a sick room—a practice which has been considered by doctors and professional nurses to be an innocent superstition, having no direct effect on the atmosphere and, therefore, being neither beneficial nor harmful to the patient. Professor Tribert, of the Pasteur Institute at Paris, has, however, demonstrated that burning sugar develops for medicinal acetylene-hydrogen, one of the most powerful antiseptic gases known. Five grains of sugar (7.5-10 grains) were burned under a glass bell capable of holding ten quarts. After the vapor arising from the sugar had had time to cool, bacilli of typhus, tuberculosis, cholera, smallpox and other infectious diseases were shown to be killed in ten to fifteen minutes and within half an hour all the microbes were dead.

Further experiments by Professor Tribert disclosed the fact that if sugar is burnt in a closed vessel containing a patient's excreta, the offensive odor arising from the decaying matter disappears at once. It will thus be seen that so far from being a mere superstition, the popular faith in the disinfecting qualities of burnt sugar rests on a solid scientific foundation.

A WOMAN'S LONG VIGIL AT LIGHT.

The One Who Has Tended a Pacific Coast Beacon for 27 Years.

Miss Laura A. Hecox, who for twenty-seven years has tended the light on the Santa Cruz lighthouse, has but recently returned to her post from the last of the six vacations she has taken during that period. Since 1881 this woman has had absolute charge of the light, and in all that time it has never gone out during the night.

Miss Hecox followed her father in charge of the light. He was a retired clergyman, who took the work of caring for the light when his health broke down under the stress of his pastoral duties. With him were his wife and a girl, who cared for him as well as the light.

During the thirteen years her father was in charge Miss Hecox was practically the real mistress of the lighthouse. When his death came she applied for and obtained the position. Since that time she has been steadily at it, cleaning, tending and watching the light that it may be never dimmed.

Then her mother died in the old lighthouse and the woman was left alone with her work. She is now 80 and is never satisfied if she is away from it for long. Her only recreation is an occasional visit to her brother, who lives at Ocean side, and gathering in sea specimens, a collection of which she recently gave to the Santa Cruz library.

Fortunately for Miss Hecox the Santa Cruz lighthouse is not built on a rock-bound coast, but is howered among trees. The light is modern, of twelve candlepower, made by the use of kerosene, something like 655 candlepower. During the twenty-seven years it has been tended by Miss Hecox no ship has been wrecked on the Santa Cruz coast—Los Angeles Times.

FRIDAY—LUCKY OR UNLUCKY.

On Friday, Aug. 21, 1492, Christopher Columbus sailed on his great voyage of discovery. On Friday, Oct. 12, 1492, he first discovered land. On Friday, Jan. 4, 1493, he sailed on his return to Spain, which, if he had not reached in safety, the happy result would never have been known which led to the settlement of this vast continent. On Friday, March 15, 1493, he arrived at Palos in safety. On Friday, Nov. 22, 1493, he arrived at Hispaniola, on his second voyage to America. On Friday, June 13, 1494, he, though unknown to himself, discovered the continent of America. It was on Friday that Harry VIII of England gave to John Cabot his commission, which led to the discovery of North America. This is the first American State paper in England. On Friday, Sept. 7, 1565, Melendez founded St. Augustine, the oldest town in the United States by more than forty years. On Friday, Nov. 10, 1620, the Mayflower, with the Pilgrims, made the harbor of Provincetown, and on the same day they signed that august compact, the forerunner of our present glorious Constitution. On Friday, Dec. 22, 1620, the Pilgrims made their final landing at Plymouth Rock. On Friday, Feb. 22, George

Washington, the father of American freedom, was born. On Friday, June 16, Bunker Hill was seized and fortified. On Friday, Oct. 7, 1777, the surrender of Saratoga was made, which had such power and influence in inducing France to declare for our cause. On Friday, Oct. 19, 1871, the surrender at Yorktown, the crowning glory of the American arms, occurred. On Friday, July 7, 1776, the motion in congress was made by John Adams, seconded by Richard Henry Lee, that the United States colonies were, and of right ought to be, free and independent.

NOT IN STOCK.

It was wash morning, and the kettle had boiled over, the baby had dropped the whole paper of blue into the sink water, the wringer wouldn't work, and a raw-boned woman of the house that a storm was brewing—outside the house as well as in. He came up the steps briskly and walked into the kitchen through the open door without as much as saying, "My own love's Henry Lee!" "Want any combs, brushes, hairpins, tablecloths, towels, lead pencils, tooth brushes, or chewing gum?" The peddler put his hat on the floor and began to open his pack, but was brought up sharply by the first return fire. "No, I don't. Nor I don't want any 'fime novels or cheap eggs, nor five-cent candles, nor face powder, nor desiccated hazelnuts, nor lamp wicks, nor eye salve, nor corn plasters, nor imitation bees-wax, nor sperm candles, nor needle pads, nor celluloid buttons, nor anything else." "Last say, and I don't suppose it's any use to ask you whether you'd like to look at a bottle of wrinkle-killer?" "Showdown complexion?" he asked, looking back at the peddler. "No, I don't. I know you haven't any books on good manners, or you'd 'read 'em yourself occasionally."

"None o' the people I call on would appreciate 'em, madam. And now, if you think you'd have no use for the new patent magnifying, telephonic, invisible ear trumpet that you can fasten to your kitchen window here and distinguish clearly everything your neighbors say, or the famous and celebrated long-range telescopic binoculars with which you can positively see through any glass window glass, and look directly into the kitchens of houses forty rods away, why, I'll be on my way again, and he picked up his pack cheerfully. "Hold on!" exclaimed the lady, following him to the door. "I don't know but I'll look at them things—if they don't cost too much."

"All right, madam," rejoined the peddler, putting his hat on one side and hitching it down the garden path. "I'll send you a list of 'em to see if I'll send him around."—New York Times.

MADE IT A LIFE STUDY.

Dr. J. S. Leonardt Found the Cause and Cure of Piles.

Dr. J. S. Leonardt, the celebrated specialist of Lincoln, Neb., proved, after years of study, that the cause of piles is internal—bad circulation. Then he perfected Hem-Roid, an internal remedy, and in 1,000 different cases it cured 99 per cent. By Dr. Leonardt's order, Hem-Roid is sold under an iron-clad guarantee. If it fails, the money is paid back. It is sold at The People's Drug Store, Marquette, Mich., or mailed by Dr. Leonardt Co., Station B, Buffalo, N. Y. Write for booklet.

REPUBLICAN COUNTY CONVENTION.

A Republican convention for the county of Marquette, is hereby called to meet at the City Hall, in the city of Marquette, on Saturday, the 6th day of February, A. D. 1909, at eleven o'clock a. m., for the purpose of electing twenty-two delegates to the state convention, called to meet in the city of Grand Rapids, on Friday, February 12th, 1908, to nominate two candidates for the office of justice of the supreme court, two candidates for the office of registrar of the university, one candidate for the office of superintendent of public instruction, one candidate for the office of member of the state board of education and six candidates for the office of member of the state board of agriculture, and for the transaction of such other business as may properly come before the convention.

The several wards in the cities of Marquette, Ishpeming and Negaunee, and the townships of the county, are called to delegates in the convention, based on the vote for governor at the general election held in November, 1908, as follows:

Table with 2 columns: Wards/Townships, Votes Delegates. Includes First ward, Second ward, Third ward, Fourth ward, Fifth ward, Negaunee City, Ishpeming City, and Townships.

Table with 2 columns: Precincts, Votes Delegates. Includes Forsyth, Humboldt, Ishpeming, Michiganame, Marquette, Negaunee, Republic, Richmond, Sands, Skandia, Turin, Tilden, West Branch, Wells, and Powell.

Table with 2 columns: Townships, Votes Delegates. Includes Champion, Cheoclay, Ely, Forsyth, Second precinct, Humboldt, Ishpeming, Michiganame, Marquette, Negaunee, Republic, Richmond, Sands, Skandia, Turin, Tilden, West Branch, Wells, and Powell.

Total delegates, 80. Dated, Ishpeming, Michigan, January 14th, 1908. M. M. DUNCAN, Chairman Marquette County Republican Committee. E. W. McPHERRAN, Secretary.

Classified Want Directory

HELP WANTED. WANTED—At the Colonial Inn, a dining room girl. 1-26-09.

WANTED—A competent girl for general housework in small family. Mrs. James E. Sherman, 414 East Hewitt avenue. 1-26-09.

WANTED—A cook at the Summit House. 12-26-08.

WANTED—50 wood choppers to cut chemical wood. The I. Stephenson Co., Wells, Mich. 9-26-08.

WANTED—Fleecemakers at Cleveland Cliff's camp, Humber and Dorsey, Mich. Board 18 cents per meal. Apply at camp. 9-25-07.

LOST AND FOUND. FOUND—Small silver lady's watch. Lower can get the same by calling at 201 Pine at east and paying for this advertisement. 1-26-09.

Today's weather: Snow; stationary temperatures; 7 a. m., 31 degrees; noon, 38; 7 p. m., 34; maximum, 42 degrees; minimum, 29.

Charles Anderson went to Deerton yesterday.

J. E. Ball went to Milwaukee last evening.

Attorney A. C. Jurua, of Ishpeming, was in the city yesterday.

Bishop G. Mott Williams went to Manistique yesterday afternoon.

Harry Nightingale, of Negaunee, was a business visitor here yesterday.

A. E. Sterne, county superintendent of schools, was in the city yesterday.

E. O. Vendim and H. Kjellin, of Munising, spent yesterday in Marquette.

Hon. John R. Gordon has returned from a trip to the West and Lake Erie ports.

H. A. St. John, freight agent for the Cleveland-Cliffs roads, went to Chicago last evening.

M. T. Thorsen, G. H. Brotherton and E. Lahnala, all of Escanaba, were in the city yesterday.

Mrs. C. A. Wheeler has returned home from Detroit. She spent a month in the Michigan metropolis.

Arthur D. Wood, of Grand Marais, prolate judge of Alger county, was in Marquette yesterday.

J. A. Stewart arrived from Western Canada last night. He has been in the Dominion the past two years.

F. W. Bogges and son, Harry, of Beloit, are visiting at the home of S. B. Bowron, on North Third street.

Mr. and Mrs. Charles Schaffer and daughter, Onota, and Mrs. S. S. Ormsbee will leave tonight for Mexico, where they will spend a month or more.

Two marriage licenses were issued at the county clerk's office yesterday: to Andrew Easley and Clara Gother, both of Marquette, and to Fred Grimes and Mrs. Daphne C. Grimes, both of Turin.

Rev. Oscar Sandahl will leave this morning for Iron Mountain to attend the Ishpeming district conference of Swedish Lutheran churches, to be held in that city today and tomorrow. He will return Thursday.

C. W. Humphrey, of Chicago, who had charge of the installation of the electrical apparatus at the city light and power plant last summer, is in the city inspecting the work, in the capacity of consulting engineer.

**Baskeball at Houghton**—The Ferguson business college basketball team will go to Houghton Friday to play the Michigan College of Mines team.

**Joint Installation**—Queen City tent and Busy Queen hive, K. O. T. M. M. will hold a joint installation at Keough's Hall tomorrow evening. All members and their families are invited to be present.

**New Arrival at Prison**—The most recent arrival at the prison is Paul McKenzie, who was sent up from Sighaw. McKenzie was convicted of defrauding a railroad company, and was sentenced from two and a half to five years, with a three-year sentence recommended.

**Visiting Nurse Association**—Mrs. Clark has given the Visiting Nurse association the use of a room in the Harlow block, and the headquarters of the organization will be located there. Arrangements have been made whereby Miss Bronson will be at headquarters certain hours each day.

**Barber Takes a Wife**—Andrew Easley, a barber at the shop in the basement of the Marquette National bank, last evening took unto himself a wife, the bride being Miss Clara Gother, of this city. The marriage ceremony was performed at the Methodist parsonage, the Rev. Ames Maywood officiating.

**Defects Being Made Good**—Radiation installed in French church about a year ago by Herman Stensrud has proved defective, owing to hardness of the casting. It is now being removed and an entire new outfit of radiators is being set in the church by Mr. Stensrud, without further cost to the congregation.

**Hearing Wednesday**—The preliminary hearing of O'Neill and Lanmer, the two men accused of criminal assault by Mrs. Frank Pommerville, of this city, has been set for Wednesday, before Justice Samuel Byrne. The men were brought from Green Bay by Marshal Manning yesterday, arriving here on the 10:55 train.

**Student's Mother Dead**—Mrs. Joseph Patisseau, mother of Miss Yvonne Patisseau, a student at the Normal, died at her home in Iron Mountain Friday afternoon, after an illness of several months. The funeral was held at St. Joseph's church, in Iron Mountain, yesterday. A husband and six children are left to mourn her death.

**Drug Store Closed**—The drug store at the corner of Third street and Baraga avenue, owned by W. J. Hebbard, was closed yesterday by Charles Maynard, of Milan, who holds a chattel mortgage on the stock, to the amount of \$1,800. The goods in the store are thought to be worth considerably more than that amount. Mr. Hebbard gave the mortgage at the time he bought the Meloshe drug store in Ishpeming.

**City Team Won Easily**—In a one-sided game of basketball between the City team and the Marquette Rifles at Legion Hall last evening, the latter were defeated by the score of 6 to 54. The line-up of the teams was as follows: City: Reinhardt, Sullivan, A. Catlin, O'Donnell, Johnson and Fraser. Rifles: Reese, McKeeraghan, Richardson, Hatch, Quinn and Patrick. Wednesday evening the Cleveland-Cliffs team of Ishpeming will meet the City team at Legion Hall. After the game there will be dancing.

**Police Board Meeting**—A meeting of the city police board was held last evening, which was largely devoted to a discussion of the proposed legislation requiring prisoners paroled or discharged from the state prisons to be returned to the counties from which they were sentenced, or to their homes. A large number of letters were read from prominent Michigan men, all favoring the proposed legislation. Among the number may be mentioned one from Warden Fuller, of the Ionia prison, one from Justice C. B. Grant, one from County Prosecutor Bell and many others. George Freeman read the first draft of the proposed bill, which was expected to be presented to the

proper senate committee at Lansing last evening by Senator M. H. Moriarty. It is expected to hold another meeting of the board soon to further consider the proposed bill, and, if it is found necessary to secure its passage, the board may send a representative to Lansing to personally represent its cause.

**K. of C. Meeting Tonight**—Marquette council, Knights of Columbus, will meet at Keough's hall tonight to install officers, and to discuss the advisability of leasing new club rooms for a five-year period. The installation will be conducted by District Deputy M. H. Kern, of Menominee, and a luncheon and smoker will follow the ceremonies. The rooms which the knights have under consideration to rent as yet exist only on paper, being the second story of a new brick block which F. Donckers contemplates erecting the coming summer. Mr. Donckers has as yet let none of the contracts for the building, but the plans drawn provide for a two-story brick structure, with a twenty-five-foot front, to be erected on the site of his present Washington street store. The plans call for a building seventy feet deep. The first floor would be used by Mr. Donckers for a tobacco and confectionery store, and, as has been suggested, the second floor has been offered the Knights of Columbus for a club room.

**INSURE WITH PETER WHITE & CO. BIG BAY BOOMING.**

Reported That Brunswick-Balke-Collander Interests Will Build Factory.

Representatives of the Brunswick-Balke-Collander interests at Big Bay are reported to have announced the intention of the company to build a large factory at that place this spring. This company is the largest manufacturer of billiard, pool and bowling supplies in the world, and recently bought the mill and property of the Big Bay Lumber company.

It is said that the company intends to manufacture all the lumber gotten out in the Big Bay region, and to ship only finished products. This will mean the erection of a large factory, employing hundreds of men, at that place. Houses for 125 families are expected to be ready for occupancy by the first of May, it is said. At first the company will manufacture only ten pins, for use in bowling alleys, but later it is reported that the manufacturing plant will be extended to include billiard and pool tables, cues, bowling alleys, and other articles for the manufacture of which the Brunswick-Balke-Collander people are known the world over.

**GUILD HALL GYM IS BEING EQUIPPED**

APPARATUS COSTING OVER \$1,300 NOW BEING PUT IN PLACE FOR ATHLETIC PURPOSES.

The gymnasium equipment for the new guild hall arrived a few days ago and is now being put in position on the top floor of the building by Mr. Stillwell, of A. G. Spalding & Co. The installation of the apparatus will be completed within a few days, and consists of the following: Eight chest weights, rowing attachment, six sections bar stalls and benches, vaulting horse, vaulting rack, high and low parallel bars, horizontal and vaulting bars, pair flying rings, seven combination ladder, vaulting standards, spring and jump bars, incline board, climbing ropes, striking bag discs, "Globe Universal" exerciser, fifty pair dumbbells, fifty pair Indian clubs, two dozen wands, three medicine balls, giant stride, quarter circle attachment, wrestling machines, special abdominal masser, basketball equipment, boxing gloves, striking bag, indoor baseball set, and one volley ball set.

The equipment is up-to-date in every respect, and the gymnasium when completed will be one of the finest in this part of the country.

**Work Progressing Rapidly.**

The work in other departments of the guild hall is progressing rapidly, and it is hoped that it may be finished in three weeks. The billiard and pool tables have arrived but have not yet been set up. The concrete work of the swimming pool is finished, and the tile for the lining has been shipped and its arrival is daily expected. The auditorium is well along and the carpenters will soon have finished their work. The bowling alleys will likely be the last part of the hall to be completed.

The woodwork is now being stained by the Marquette Decorating company. A green olive oil stain with a dead finish is being used throughout the building, and gives a handsome appearance to the interior. The side walls will probably be left white, at least for the present.

**BOWLING SCORES.**

Team No. 8, to which had been given a handicap of thirty-one pins, won all three games of its match with team No. 2 at the bowling alleys last evening. The scores were:

Team No. 2—	Tot.
Gooding .....	127 147 149 423
Wheeler (sub) .....	101 116 101 318
L. Drake .....	136 140 132 408
Godwin .....	151 146 129 426
Bell .....	183 159 180 522
Totals .....	740 708 691 2139

Team No. 8—

Anderson .....	108 151 126 385
McDermott .....	140 121 148 409
J. Miller .....	130 147 114 391
Stafford .....	163 150 178 491
Manes .....	172 154 143 469
Handicap .....	31 31 31 93
Totals .....	744 754 740 2238

Tonight teams 3 and 5 will play. No. 3 is after No. 5's scalp, and as the latter is to give a handicap of thirty-two pins a game No. 5 will have to do some pretty tall bowling to retain its place at the top. There will also be a special match of five games, total pins to count DeTrain and Stromer of Negaunee vs. Manes and Godwin of Marquette will bowl.

When you want milk, cream, butter or buttermilk of the finest quality call up Marquette City Dairy. Bell phone 223.

## Ishpeming Department

### GUNDERSON BREAKS WORLD'S SKI RECORD

LID IS ON.  
Mayor Keese Says That Liquor Dealers Must Obey the Law.

Within the past week or ten days every liquor dealer in Ishpeming has been notified by Marshal Trevarrow, under special instructions from Mayor Keese, that they must obey the law to the letter. The mayor has received complaints as to the manner in which certain dealers were conducting their business and it is deemed to see that the law is strictly observed in the future.

Mayor Keese yesterday said that so far as he can learn the saloon keepers are closing their places promptly at 11 o'clock on Sunday. One dealer was arrested yesterday, but he was the only one against whom a complaint has been entered. There are a few others who have been in the habit of doing business after hours and on Sunday who are being watched, and they will be brought into court in case it is found that they are doing business in violation of the law.

Mayor Keese yesterday said that so far as he can learn the saloon keepers are closing their places promptly at 11 o'clock on Sunday. ### PLEASANT WEATHER.

Yesterday Was by Several Degrees the Warmest Day of the Winter.

The unusually mild weather yesterday was much commented on by Ishpeming people. The temperature at noon was nearly fifty, and in the morning at 6 o'clock thermometers registered from thirty to thirty-two degrees. The soft spell and rain of Saturday and Sunday took away much snow and many bare spots are now visible on the hills and fields, and the roads are in wretched condition for sleighing.

The weather this month compares very favorably with that of last January. There was a heavy thaw prior to Jan. 20 last year, and on the latter date there were more wagons in use than at any time since. All the snow in the month, but they were out of commission on the 20th, when there was a heavy snow storm. The temperature on the 20th of last January was a few degrees higher than yesterday.

### NATIONAL TOURNAMENT PLANS.

Aksel Holter, secretary of the National Ski association, who recently returned from Minneapolis, Eau Claire and other Minnesota and Wisconsin points, has advised The Mining Journal that the national tournament, to be held at Eau Claire, Feb. 6 and 7, will be a big success. The arrangement committee raised \$1,300 among the business men and other citizens of Eau Claire in a single afternoon and 500 people joined the club, each paying the \$2.50 membership fee. The entire city is to be decorated for the national tournament, and it is expected that there will be 10,000 visitors present.

### Much Mesaba Ore Will Be Treated at Steel Corporation's New Plant.

It is reported that the officials of the United States Steel corporation do not deem it advisable to rush work on the new steel plant being constructed at Duluth until there is a revival in the steel business. The work on the inter-ferate road and the bridge across the St. Louis river will be completed as soon as possible because if this is not done the steel company will lose the charter under which they were built. It will not be long before the company will smelt the ore by electricity and in that case the plant would smelt all of the low grade ore which it will not pay to send down the lakes because of the cost of transportation. Inasmuch as there is a great deal more low grade ore on the ranges than high grade it is easy to see what that will mean for the Duluth plant.

## DR. HUMPHREYS' SPECIFICS.

## MUNISING

Frank Plumb, of Saginaw, is in the city, visiting friends.

Wm. G. Mather of Cleveland visited Munising Tuesday last.

I. H. Battin of the Soo called on Munising friends last week.

M. A. Doty has returned from a business trip to Southern Michigan.

R. A. Brotherton of Negaunee was here last Wednesday, calling on friends.

Prosecuting Attorney W. J. O'Brien was here last week, on legal business.

Attorney Fred H. Berg of Ishpeming was a business visitor here last Thursday.

C. H. Worcester of Chicago has been a business visitor here for the past few days.

Supervisor Collie D. Doig of Grand Marais, was in the city several days last week.

Leo, M. Gelsamer, of Chatham, was here last week, attending the meeting of the board of supervisors.

At the last meeting of the board of supervisors of Alger county it was decided to build a county poor house.

L. C. Locklin, of Green Bay, and formerly superintendent of the Munising Paper company, called on friends here last Wednesday.

H. H. Eversard, of Detroit, formerly general manager of the Munising Paper company, was here recently to attend the meeting of the board of directors.

George A. Jackson and W. K. Jackson, of Buffalo, secretary and treasurer, respectively, of the Superior Veneer & Co. paper company, were in Munising last week.

Burdie Anderson, general manager of the Great Lakes Veneer company, has been appointed to fill the vacancy on the school board, caused by the death of the late Louis Lowe.

The following Marquette people have been social and business visitors here the past few days: C. A. Shelton, H. E. Harris, T. J. Nesbit, A. C. Cameron, T. H. Noble, and Y. Vanhala.

The sale of the Olson House, on East Superior street, was held by Circuit Court Commissioner Simmons last week, to satisfy a claim held by the Upper Peninsula Brewing company of Marquette.

The first annual banquet of the Munising Business Men's association was held last Wednesday evening at the Beach Inn.

The chief topic of discussion was a proposition to bond the city for civic improvements.

The first appearance of the Parland Newhall company, musical artists, here occurred last Friday night, under the auspices of the Y. M. C. A. As a company of general entertainers they probably have no peer.

### STRIKE IN GLOBE DISTRICT.

Walkout of Miners Caused Reduction in the Prices of Shares Yesterday.

When the news came over the wire yesterday that the mines of the Globe, Ariz., district had been closed on account of labor troubles, there was an immediate decline in the prices of the shares of the companies operating there. In spite of the sharp decline it is reported that the stock offered was readily taken and practically all selling orders were filled. Superior & Boston broke almost three points to \$12; Arizona Commercial, three points to \$33, and Old Dominion three points to \$10. The market for the recent flotations, particularly those in the Globe district, were also dull, though they were not subjected to radical breaks.

The decline in the general copper list this past week or ten days has had a discouraging effect on the local traders. It is thought that Judge Hunt's decision in the Washoe smelter case, announced late yesterday, will be a bull card on the Butte stocks. It was reported that there was strong selling in these issues, before the decision was announced, with Amalgamated as the leader, though it is thought that there will be a strong buying movement when the market opens this morning.

### A RELIGIOUS AUTHOR'S STATEMENT.

For several years I was afflicted with kidney trouble and last winter was suddenly stricken with a severe pain in my kidneys and was confined to bed eight days unable to get out without assistance. My urine contained a thick white sediment and I passed some frequently day and night. I commenced taking Foley's Kidney Remedy, and the pain gradually abated and finally ceased and my urine became normal. I cheerfully recommend Foley's Kidney Remedy. Sold by all druggists.

### USE OF BAMBOO BY CHINESE.

The bamboo is used for everything by the Chinese. Houses are built from it, furniture is manufactured from it, as well as baskets, fences, tiles on the roof, water pipes, matting, and even cables with which the big junks are moored. In addition the bamboo is used as a food, the shoots being steamed and fried in a hundred and one different ways, some being exceedingly palatable. Finally, the beauty and gracefulness of a luxuriant bamboo grove can hardly be described. Whenever such groves occur they add character to the landscape. Chicago Record-Herald.

### ISHPEMING IN BRIEF.

William Lejninger had business in Republic yesterday.

R. P. Bronson left last night for Chicago, on a business trip.

Mr. and Mrs. Henrik Hojola, 512 North Second street, are the parents of a son.

Louis Lafreniere has sold his residence property at the Junction location to Frank Savello.

Miss Carrie N. Williams left Sunday evening for Rogers Park, Chicago, where she will visit her sister, Miss Evelyn Williams.

The officers of the Ishpeming Ski club have decided to hold the annual banquet a week from tomorrow night, Feb. 3, at the clubhouse.

Harry Lowmiller and wife of Escanaba spent Sunday in the city, visiting her parents, Mr. and Mrs. Henry Hosking. They returned home yesterday.

C. A. Crinnian, proprietor of the Bijou theatre, in the Voelker block, will leave today for Saint Ste. Marie, where he expects to remain for some time.

Dennis Mooney left Sunday night for El Paso, Tex., where he will spend two or three weeks visiting his son, John, who is engaged in railroad work there.

Frank Hastings, night operator at the South Shore depot, who has been confined to his home with heart trouble for a few weeks past, was reported critically ill yesterday.

Phillip Quayle, who, a short time ago bought out T. F. Gill's furniture and undertaking business, has completely filled his store in the Quayle block on South Main street with new goods. He has a fine line of furniture and picture moulding.

The feature pictures at the Bijou theatre last night were scenes depicting the life of Abraham Lincoln and the life of Julius Caesar. The comedy pictures are entitled, "If It Don't Conquer You, Leave It Alone" and "He Who Laughs Last Laughs Best."

A surprise party was given at the home of Peter Rule last evening in honor of Miss Anna Simons, of Ishpeming, who is visiting here. Divers forms of

### CROWD KEPT AWAY.

There was not as large a crowd as usual at the South Shore station Sunday evening. Marshal Trevarrow and other officers were on hand to see that the crowd was kept back a few feet from the edge of the platform, so that passengers could get on and off the trains. This practice is to be continued indefinitely unless the people who have been causing trouble keep out of the passengers' way of their own accord.

### CARDS ATTRACT ATTENTION.

The cards distributed about the city advertising the entertainment, were the decision was made to hold the annual meeting of the board of directors on Friday evening, have attracted unusual attention on account of their catchy expressions. The company will be greeted by a good house here. "Little Johnny Jones" comes with the endorsement of all the leading cities, where it has played during the past two seasons.

### TRYING TO CONFINE WAR ON ROOSEVELT

Leaders in Congress Would Continue the Fight Only in Committees—Believe That Talk Would Weaken Their Cause.

Washington, Jan. 25.—Congress is trying very hard to choke off the anti-Roosevelt orators and agitators. This does not mean, as has recently been said, that the investigation of three special committees—two in the senate and one in the house—entrusted with anti-Roosevelt inquiries are to be dropped. On the contrary, that work, while going forward quietly, is to be done thoroughly and as expeditiously as may be. But for two or three good reasons the leaders want the war against the president to be confined to the limitations of their committees. They are aware that discussion now is likely to weaken their cause before the country.

A reason, possibly stronger, is that only about five weeks of this session remain and both legislative branches are far behind with the appropriation bills. So much time has been taken already with discussion and agitation that other business has been sadly neglected. A tremendous jam the last two or three weeks and long evening sessions to dispose of the necessary appropriation bills now seems assured, unless some of the supply bills are to go over to the extra session of the spring, which is to be called for tariff revision.

Republicans have already ceased to participate in the anti-Roosevelt debates. The house is setting down to serious work. The senate will do so as soon as the house disposes of enough of the appropriation bills to give the senate something to busy itself with. But the anti-Roosevelt debates in the senate are now confined chiefly to Democrats.

The senate has dallied along with the legislative, executive and judicial appropriation bill, discussing the matter of salaries for days and days, solely because the house had sent over no other appropriation bills and the senate leaders did not want the postal savings bank bill pressed to a final vote. It has been hinted that the increase in the salaries of the president, vice president, speaker

### and other federal officials were put into

and other federal officials were put into budget bill largely for the purpose of diverting the senate and occupying time. It is many years since congress at a short session was so far behind with its work. The situation has become so bad that the leaders are much concerned. They will make great efforts to catch up, because it would be something of a reflection upon the legislative branch should it fail to complete its allotted tasks within the limits set by the constitution.

### TUBERCULOSIS FROM MILK.

Disease in Cattle and Man Found Related—Children Die.

Washington, Jan. 25.—Partly through accident, a discovery has been made by the government experiment station at Bethesda, Md., revealing the close relation which exists between bovine and human tuberculosis. The experiments conducted there were not primarily with a view to determining the value of the Koch theory that consumption cannot be transmitted from the animal to man, but the accidental revelations made emphasize the correctness of weighty American medical opinion that bovine tuberculosis contains a menace to the human race. Several children of the employees of the experiment station died and under such circumstances that autopsy were deemed advisable. These developed the cause of death was tuberculosis of the glands of the neck and the intestines. The children had been fed on the milk of cows kept upon the government farm. The cows were killed, and the autopsies upon their carcasses and the bodies of the children revealed absolutely that identity of the disease from which each suffered. The difference will be noted, however, between bovine and human tuberculosis; that the former does not attack the lungs, but is lodged in the neck glands and intestines. In the case of infants the disease contracted from impure milk is found to be especially dangerous. A sub-committee of the committee on agriculture made the discoveries herein described, and it is understood that as a result the efforts to stamp out tuberculosis in cattle will be redoubled.

About 96 per cent of the world's product of coal is derived from north of the equator.

### LOCAL LACONICS.

J. F. Allison, who spent the past few weeks in Indiana, has returned to the city.

Mrs. Ripper, wife of Superintendent Ripper of the Ohio mine, near Mishigamme, spent Sunday with Negaunee friends.

Roy Ellis, son of Captain John Ellis of the Austin and Stephenson mines, drove up from Princeton Saturday, returning Sunday. On his way up he ran across a deer, near Cascade Junction.

J. W. Elliott, who had the contract for the decorating of the Negaunee Masonic society's new headquarters in the Williams block, finished the work Saturday. The lodge will take possession the first of the month.

In the bowling contest at Ladigan's alley in the Sundberg block, Saturday, Ed. Alho won the watch, with 569 pins. A. Roberts was the second highest, with 559. Sixty games were bowled by the fifteen contestants.

R. G. Jackson, who has been absent in the lower peninsula the past ten days, arrived home last night. The greater part of last week was spent at Jackson, where the board of control of the Old Fellows home held its quarterly session.

Richard Kappes yesterday began filling the Upper Peninsula Brewing company's ice house. The building holds several hundred tons and it will take several days to complete the job, especially if the roads do not improve. Mr. Kappes has contracts to fill several of the Negaunee refrigerators.

## Negaunee Department

### ANNUAL STATEMENT OF CARNEGIE RELIEF FUND

OVER \$210,000 DISTRIBUTED LAST YEAR AMONG EMPLOYES OF THE STEEL CORPORATION AND CONSTITUENT COMPANIES.

The seventh annual report of the Carnegie Relief fund, established Jan. 1, 1902, by Andrew Carnegie, and applicable to the employees of the Carnegie Steel company and its constituent companies, has been received at the office of the Oliver Iron Mining company. The several corporations whose employees are entitled to participate in the benefits of the relief fund are the Carnegie Steel company, Pittsburg Limestone company, Oliver Iron Mining company, H. C. Frick Coke company, Bessemer & Lake Erie Railway company, Union Railway company, Pittsburg Steamship company, Pittsburg & Conneaut Dock company, Keystone Bridge company and the National Mining company.

During the seven years the beneficiaries of the fund have received \$1,339,549.29. The disbursements were greater in 1908 than during any other year, the amount distributed for accident benefits, death benefits and pension allowances in that year having been \$266,290.15. The total annual disbursements for each fund, also the grand totals for the seven years period, are as follows:

	Accident Benefits	Death Benefits	Pension Allowances	Totals
Totals for 1908	\$20,307.70	\$1,093,300.00	\$81,682.45	\$1,115,290.15
Totals for 1907	\$17,545.13	101,972.50	58,212.55	177,730.18
Totals for 1906	15,923.70	101,972.50	58,212.55	175,908.75
Totals for 1905	96,187.80	123,249.00	46,833.35	266,269.15
Totals for 1904	128,471.57	76,943.00	36,573.75	241,988.32
Totals for 1903	106,655.37	46,824.00	27,172.80	180,652.17
Totals for 1902	19,700.99	16,316.00	12,196.95	48,213.94
Grand totals	\$403,892.19	\$904,776.50	\$330,872.30	\$1,339,540.99

The sum distributed last year to the beneficiaries of the different companies was as follows: Carnegie Steel company, \$109,373.29; Pittsburg Limestone company, \$1,031; H. C. Frick Coke company, \$52,906.95; Oliver Iron Mining company, \$26,294.90; Bessemer & Lake Erie Railway company, \$5,794.63; Union Railway company, \$3,410; Pittsburg Steamship company, \$1,410; Pittsburg & Conneaut Dock company, \$2,294; National Mining company, \$1,770; and Keystone Bridge company, \$6,133. The Oliver Iron Mining company's beneficiaries received \$1,011,005 more in 1908 than in 1907.

The number of cases benefited since the establishment of the fund is 7,559 in the accident list; 1,027 in the death claims and 684 on the pension list, making a grand total of 9,270. Cases extended beyond the 31st of last month were sixty-three accident, 226 death and 515 pension.

### Benefits in Iron District.

The report contains a summary of the amounts distributed through the different funds to beneficiaries of the Oliver Iron Mining company on the several iron ranges of the Lake Superior district. The pension allowances have thus far been small, but there will be an increase annually from now on. In 1907, there was only one pension allowed in the Lake Superior district, that being for \$19.60, the beneficiary being an employe on this range. As will be noted in the following table, pensions were last year allowed on two ranges, the Marquette and Gogebic, with a considerable increase over the previous year in the sum distributed in this county:

	Accident Benefits	Death Benefits	Pension Allowances	Totals
Gogebic Range—				
Atlantic mine	\$396.00	\$60.00	.....	\$456.00
Aurora mine	517.50	3,720.00	.....	4,237.50

Vermilion Range—				
Pioneer mine	\$141.00	\$126.00	.....	\$267.00
Soudan mine	.....	918.00	.....	918.00
Zenith mine	.....	240.00	.....	240.00
Totals	\$141.00	\$2,484.00	.....	\$2,625.00
Totals (O. I. M. Co.)	\$3,471.25	\$22,316.00	\$507.65	\$26,294.90

### TWO WINDOWS BROKEN.

One of the plate glass windows in the building on the corner of Gold street, near the Union depot, was smashed Saturday night. It is thought that a stone was deliberately thrown through the glass. This is the second time within a few months that a window in this building has been broken. An arrest followed the first offense, but August Raatikainen, the owner, has not been able to recover damages, and the insurance company has also held up payment of the claim. One of the windows in S. S. Thomas' meat market on Iron street, was broken Sunday evening, a young man standing in front of the building having slipped and fallen through it.

The size of the fund has a good deal to do with the fundamental principles of success.

### NEW BOOKS RECEIVED.

Nearly 100 Publications Placed on Library Shelves.

The following new books, recently received, are now available at the Negaunee public library:

- Trimble—The Lake Pilots' Handbook (gift).
- Danite—The Mormon Menace (gift).
- De Mott—Joan of Arc.
- Denslow—The Scarecrow and the Tin Man.
- Denslow—Humpty Dumpty.
- Bridgman—Jest Nuts.

Refuse substitutes. Sold by all druggists.

# TEST WELL TO BE SUNK IN THE SAND

### WATER BOARD COMMITTEE REPORTS FAVORABLY ON SCHEME RECENTLY SUGGESTED.

## FULL INVESTIGATION MADE

#### Plan Found to Be in Accord With Science, and to Work Successfully in Many Cities.

The special committee appointed at the December meeting of the fire and water board to investigate the practicability of sinking a large well or cistern on or north of lighthouse point and so obtaining pure city water from the lake by filtration through the sand, submitted a thorough and exhaustive report favoring the plan at the special meeting of the water board held last evening. William H. Greene and R. C. Young were the members of the committee, and their report shows that they have spent a large amount of time in consideration of the city water problem. Their report is divided into two distinct parts: the first showing that the idea of purifying water by filtration through sand is in accord with the scientific thought of today, and the second part making suggestions as to how the plan might be tried out in this city.

The report of the committee was received with favor by the members of the board, and it was decided to communicate with an expert relative to sinking a test well on the strip of city land adjoining the government reserve on lighthouse point. The report is of such general interest that we publish the greater part of it verbatim:

#### The Committee's Report.

To the Board of Fire and Water Commissioners:

Your committee to whom was intrusted the work of investigating the possibility of obtaining a suitable supply of pure water from the ground in the vicinity of the present pumping station, beg to submit the following progress report:

First. We have endeavored to investigate the practice of the country in using ground water or what is known as "natural filtration."

In reading the discussion of the international engineering congress at the exposition in St. Louis in 1904 upon the subject of "Purification of Water for Domestic Use," we find from a paper written by M. Beauchamp, a prominent French engineer, that the system of taking water from rivers through sand and gravel into filter galleries was not introduced in 1825 and is still in use and effective. There are fifty-seven cities in France over 5,000 inhabitants each, notably Toulouse and Lyons, using this system. In some instances they have gone so far as to create artificial beds of fine sand and pump polluted river waters over these beds and collect them again below. Vertical filtration through artificial beds of fine sand has been used in London, England, since 1829 and until a very recent date.

#### Ground Waters Safe.

From a paper by L. J. LeConte, U. S. engineer in charge of Oakland harbor works, Oakland, Cal.: "The writer thinks that the author's remarks regarding ground waters are highly commendable. From a hygienic point of view these waters are better than surface waters even when filtered. It is strange to note the prevalent lack of confidence which some of our most intelligent citizens seem to have toward ground waters in general, that is, as to quantity and reliability of supply. Nothing could be more fallacious. Now that the country is filling up with new population, the troubles with stream pollution are becoming more pronounced every day and the relative value of ground water as a supply is rapidly on the increase. It certainly avoids the usual dangers of surface pollution, and the constant expense of filtration."

Mr. Fuller gives a list of twenty-one cities in the state of Massachusetts over 5,000 population using ground waters, among which are:

Population.	Gallons Daily.
Brookline .....	21,443
Lowell .....	1,961,000
Newton .....	69,210
Waltham .....	35,986
Waltham .....	24,229
	2,435,000

#### Sand Filters Efficient.

Dr. Adolph Kerma, manager of the Antwerp Water Works company, Antwerp, Belgium, says: "The main point of sand filters is their striking hygienic efficiency even only when moderate care is given their working. Mr. Howatson's contention that typhoid and other germs are continually found in filtered water is not consistent with facts."

#### Results in Michigan.

Looking nearer home, we find Hancock takes its water from a filtration gallery near the lake. Also Cheboygan, Mich., with 6,000 population, has a well sunk in the sand near the shore of Lake Huron for its water supply.

From the proceedings of the tenth annual convention of the Michigan League of Municipalities, we learn that the city of Manistee, Mich., gets its water from wells at a depth of 110 feet, as follows: They sank a masonry well built on a steel shoe or cutting edge forty-five feet in diameter and forty-five feet deep. In the bottom of this reservoir they sunk pipes to the depth of seventy or eighty feet. The last well sunk cost \$8,000 and when pumping 1,000,000 gallons daily the water stands constant at a depth of about twelve feet in the reservoir.

#### Recommendations of Committee.

From the above data and much more that your committee has been able to reach during its research we deduct the following conclusions:

First. That the possibility of obtaining an ample supply of pure water for the present and future needs of this city from the water bearing sands near the shore of the lake is not without precedent and is in entire harmony with good engineering practice.

Second. That sand such as we have on our lake shore is recognized to be one of the most adequate filtering mediums

in existence even for the sewage polluted waters of many of our large rivers.

Third. That the cost of obtaining water in the manner proposed will be much less and the expenditure of a much more permanent nature than any other method at hand.

It has been said that the sand will not filter the crocote in solution and your committee will accept that without argument, but still we think that as the crocote is of such a transitory nature floating on the water and drifting with the winds, it is hardly probable that the waters of the lake would ever be so polluted with crocote to impregnate the sands below the lake bed where we expect to get our supply.

We have in mind the laying of one twenty-four-inch suction pipe from the pumps to the point where the well is to be located and sinking a concrete wall of some economical size, say twenty-five feet in diameter to a point about twenty feet below the surface of the water in the lake. Then fill up the bottom of the well about two feet with agate gravel from Presque Isle, to keep the sand from working up into the well and into the suction pipe. After this well is sunk make a test with the pumps and see just how much water it will furnish. From this data we will be able to make a close calculation as to how many wells of this character we will need. The wells should be connected together with pipes and eventually both suction pipes from the pumps should be laid to the wells.

Your committee does not expect to do this work without encountering difficulties. We are liable to strike rock ledge where we do not expect it. We are liable to strike a bed of quicksand or very fine sand which, as is very often the case, will run wherever water will run. We are liable to strike sand that is impregnated with iron or other impurities that will make the water undesirable.

#### Preliminary Tests.

For the purpose of forestalling these difficulties we recommend that the work of making tests of these points be started at once in the following manner:

Take an ordinary well casing about three inches in diameter and a sand pump bucket with a cutting edge and valve used for this work. Put these pipes down to such depths as is deemed desirable, keeping a sample of the sand taken from every foot in depth and a record of the same. As many of these pipes can be put down as is deemed necessary to determine the points in question after which samples of water can be taken with an ordinary well pump after thoroughly pumping the water from the casings to avoid local impurities.

Your committee recommends that this work be started at once and estimates be made and arrangements made for the necessary funds so that if the tests prove satisfactory, the actual work of sinking wells, etc., can be started as soon as warm weather comes.

In regard to the location of test holes, we recommend that the first holes be put down near the north end of the strip of land acquired by the city for boulevard purposes by act of congress in 1901. This strip is along the western boundary of the lighthouse reserve. If insurmountable obstacles are found at this point, then tests should be made at some available point further north, perhaps as far north as the city's lots north of Hewitt avenue. The first mentioned point is only about 900 feet from the pump house and from an economical standpoint the work should be kept as close to the pump house as possible.

#### INTERIOR WILL BE MODERNIZED.

Extensive Alterations to Be Made at Archambeau's Clothing Store.

The interior of A. E. Archambeau's clothing and furnishing store, on South Front street, will undergo extensive alterations and improvements within the next few weeks. While in Chicago recently, Mr. Archambeau got some new ideas in twentieth century merchandising equipment, and has determined to remodel his store rooms in order to better display and show his stock.

The wall shelves and glass show cases near the front of the store, on the right side, will be removed and handsome clothing cabinets will take their place. These cabinets will be of golden oak with glass fronts, and will be filled with ready made suits. The cabinets will have a capacity of about 800 suits, all of which will be suspended on hangers, not folded. The cabinets are the first to be used in this city, although they are often found in the larger stores in other places. The cabinets not only make it possible to keep clothing in shape and free from dust, but afford a much more satisfactory showing goods to a customer.

In the rear of the cabinets, which will extend two-thirds of length of the store, the shelves will be extended to the ceiling, and a bicycle ladder installed, giving more room to the shoe department. The rear half of the second floor will be devoted entirely to the children's department, and the front half will be filled with the cheaper lines of stock, broken lots, etc., it being Mr. Archambeau's idea to show only first class, up-to-date stuff on the first floor. The left side of the first floor will be devoted to men's furnishings, and the glass cases, now on the right side of the store, will be moved across the aisle.

These improvements will be begun next week and will be completed in a short time. Mr. Archambeau has obtained the exclusive agency for Hart Schaffner & Marx clothing in this city, and will also carry a full line of Cluett and Monarch shirts.

#### CARD OF THANKS.

We desire to express our appreciation for the many kindnesses rendered by our friends during the sickness and after the death of our wife and mother. We also wish to thank those who sent floral tributes.

JOHN WANBERG and Family.

#### ATTENTION, SIR KNIGHTS.

All members and their families of Queen City tent, No. 448, K. O. T. M. M., are requested to be present at Keogh's Hall Wednesday night to attend the joint installation of Busy Queen hive and Queen City tent. A good time is promised. (1-20-14)

#### HARDWOOD FLOORING.

We deliver direct from our dry kilns. No shrinking or warping after being laid. Consolidated Fuel & Lumber Co. (9-23-14)

#### SKATES BOUGHT AND SOLD.

Cash paid for second-hand skates, sharpening and repairing. C. R. Nelson, opposite postoffice. (1-19-14)

# TWO OLD PAPERS OF GREAT INTEREST

### S. J. TOWNES OF THIS CITY HAS VALUABLE RELICS OF CIVIL WAR TIMES.

## NEWS PRINTED ON WALL PAPER

#### Odd Sheet Issued in Vicksburg on the Day of Its Surrender—Lincoln's Assassination.

The Mining Journal is in receipt of two remarkably interesting old papers from S. J. Townes, assistant traveling auditor of the D. S. S. & A. railroad, one being a copy of the Vicksburg (Miss.) Daily Citizen, published on wall paper, July 2, 1863, and the other, the New York Herald of April 15, 1865, announcing the assassination and death of Abraham Lincoln. Mr. Townes is a native of Richmond, Va., and the papers were found among the personal effects of his great grandfather, after his demise.

The Vicksburg paper was published at the time General Grant and the Union army were besieging the city, and consists of a single page, four columns wide, printed on the plain side of red and green figured wall paper, which was used because there was no other paper obtainable. About half of the two columns consists of semi-editorial city news, all of which reflects the dire distress and starving condition of the besieged inhabitants. The remaining two columns are filled with war news headed "Yankee News from All Points." In an article of about 500 words, the editor, J. M. Sworis, tells of the wonderful successes of General Lee and the panic-stricken condition of the Yankees in Pennsylvania, Maryland and Ohio, these being the days just preceding the battle of Gettysburg.

The head of the paper bears the date of July 2, 1863, but at the lower right hand corner is a note dated July 4, announcing the fall of the city, and the consequent demise of the "Citizen." The editor is not entirely bereft of humor in his hour of trouble, as the following quotation will show:

#### No More Fricasseed Cat.

"Two days bring about great changes. The banner of the Union floats over Vicksburg. General Grant has caught the rabbit; he has dined in Vicksburg, and he did bring his dinner with him. The 'Citizen' lives to see it. For the last time it appears on wall paper. No more will it indulge the luxury of multi-colored and fricasseed kitten—urge Southern warriors to such dire never more. This is the last wall paper edition, and is, excepting this note, from the types as we found them. It must be valuable hereafter as a curiosity."

The following quotations, evidently written before the city capitulated, to General Grant, show in a vivid way the devotion of the inhabitants of the city to the Southern cause and the sacrifices they underwent before hauling down their flag to the Union army.

#### Confederate Beef, Alias Meat.

"We are indebted to Major Gillespie for a steak of Confederate beef, alias meat. We have tried it and can assure our readers that it is rendered, as they, they need have no scruples at eating the meat. It is sweet, savory and tender, and so long as we have a mule left, we are satisfied that our soldiers will be willing to subsist on it."

#### A Negro Wedding.

"Mid the din and clash of arms, the screech of shells and whistle of bullets, which are a continual feature in our beleaguered city, incidents of happiness often arise to vary in a cheerful way the phases of so stern a scene. Last evening, with gaiety, mirth and good feeling, at a prominent hospital of this city, through the ministerial office of a chaplain of a gallant regiment, Charles Royall, prince imperial of Ethiopia, of the Barbarigo family, espoused the lovely and accomplished Rosa Glass, arch duchess of Senegambia, one of the most celebrated princesses of the Laundress-in regime. The affair was conducted with great magnificence, although, as usual in troublesome times, the sabbler element was predominant."

#### Anent Grant and the Yanks.

"The Yanks outside our city are considerable on the sick list. Fever, dysentery and disgust are their companions, and Grant is their master. The boys are deserting daily and are crossing the river, deserting Grant and abolitionists generally. The boys are down on the earth delving, the burrowing, the bad water and the hot weather."

"That the great Ulysses—the Yankee Generalissimo, surnamed Grant—has expressed his intention of dining in Vicksburg on Saturday next, and celebrating the Fourth of July by a grand dinner and so forth. Ulysses must get into the city before he dines in it. The way to cook a rabbit is 'first to catch the rabbit.'"

#### The Death of Lincoln.

The copy of the New York Herald already referred to, is a six-column, four page sheet, the column rules on the first page being the heavy black lines of mourning. On the front page is an extended account of the assassination of Abraham Lincoln, which occurred the evening before. On the same page is a special dispatch announcing the death of President Lincoln, which occurred at 7:22 that morning. The type used is very small, and would strain the eyes of the present generation to read, but the bold headlines are not materially different from those in use by newspapers of today.

Two columns on the front page are taken up with war news from a Confederate standpoint, most of which is copied from Southern papers. The second page contains an editorial on the death of Lincoln, and another on the war situation; also a quarter column of European news and an equal space is devoted to the doings of the state legislature. The entire third page is taken up with a patent medicine advertisement. The last page is taken up entirely with news of the war situation. The terms of Lee's surrender at Appomattox and the story of Grant's occupation of Richmond are given in detail; Sherman's army is given its famous march to the sea, and his movements are described fully. The remainder of the last page is devoted to Washington news and war miscellany, 8 p. m. (1-20-14)

the reconstruction problem, which the public had under discussion, being featured in the headlines.

The two papers are remarkably interesting relics of war times, and especially so just now, when the whole nation is preparing to honor the 100th anniversary of Lincoln's birth.

# Last Week OF OUR Pre-Inventory Clothing Sale

We close our fiscal year Jan. 31, and on Saturday night, Jan. 30, our inventory and books are closed for the 22nd year. If you expect to buy clothing this year (or next) it will be money in your pocket to buy now.

## ORMSBEE & ATKINS

Nester Block, Washington Street.

# Freshly Cut Flowers

### In greatest profusion are always found at Stafford Greenhouses

Try our Carnations and Roses, long stem, large and lasting flowers; none better. Prompt attention given out-of-town orders.

Down town branch Mack Block.

Both Phones.

T. M. SORENSEN, Proprietor, Marquette. 6-28-14

# Chas. Dorais

I have opened a first-class meat market on Third St., near corner Rock St., where I would be pleased to have you give me a share of your trade. I have been in the business for nearly fourteen years, so that I have had ample experience. I will carry a first-class line of meats at all times; will have quick delivery service and both telephones.

## CHAS. DORAIS

Meats, Poultry and Fish.

Third St., next to F. Bureau's grocery store. 1-5-1m-cod

# \$5 GLASSES, \$2

Greatest value in Eye Glasses and Spectacles ever offered. Make your own choice. Gold mountings, fitted with lenses, all complete, \$2. If your glasses are not satisfactory or if you have weak eyes come and see me. No case too difficult to correct. Come and be convinced. I do as I say.

# In Paying Household Expenses

women will find it much easier to settle by check. Not only is it safer than paying in currency, but so convenient—such a saving of time. The First National Bank of Marquette respectfully invites the checking accounts of women, affording them prompt, obliging service and every courtesy.

# It's Foolish to Hoard Your Money

Why? Well, there are many good reasons why you should not carry your savings about with you, or tuck them away in some private place of fancied security.

You take big chances with money so disposed of. It may be stolen, burned, lost or foolishly spent. You may be tempted by some reckless "gamble" or speculative "investment" which would not appeal to you if your savings were safe in the bank.

And, above all, hoarded money earns nothing for you. We not only give you absolute safety and protection, without charge, but we pay you 3 per cent (compounded semi-annually) for the privilege of serving your interests.

Let us explain fully other advantages of a saving account. Get one of our little Recording Banks and we will help you get the right start.

Special attention to Banking by Mail. Send a postal for booklet.
