

Copper Country

MUCH HOCKEY YET.

Series of Post-Season Games With Outside Teams Are Likely.

With the approach of the end of the league hockey season there is talk of arranging a number of exhibition games to take place at the Laurium Palaestra and at the Houghton Amphitheatre and it is also contemplated to send the Red Jacket team on a tour.

MAY HAVE A CHAUTAUQUA.

Houghton county clergymen are just now seriously considering the project of making some point in the district a gathering place for an annual Chautauqua and the question will probably be one of the important matters of discussion at the next meeting of the Copper Country Ministerial association.

PROFESSOR TICE COMING.

Dr. R. B. Harkness of Houghton, a prominent member of the Houghton College Anti-Tuberculosis society and an active worker of the organization, has returned from Chicago, where he completed arrangements to bring a lecturer to the copper country.

BRAVE STORM TO HEAR SPEECH.

In the size of the assemblage that went to the Kerregode theater, in Hancock, Tuesday night a compliment was paid to Dr. Frank W. Gunsalus, who lectured there under the auspices of the Grace M. E. church, for the weather was probably the worst so far experienced in the copper country this season.

FUNERALS IN LAKE LINDEN.

The funerals of Henry Peiffer and Mrs. Mary Boudreau, both well-known residents of Lake Linden, will be held today. The Peiffer funeral will be held from the Holy Rosary church and Rev. Father Reis will officiate.

CIRCUIT COURT ADJOURNED.

Jurors Not to Report Until Next Tuesday—Naturalization Cases Monday. Hearings of cases that were to have come up in the Houghton circuit court yesterday morning were deferred until next week by reason of the fact that court was adjourned yesterday morning until next Monday morning.

COPPERDOM BREVITIES.

Mrs. Duncan Robinson of Winona is suffering an attack of illness. A daughter has been born to Mr. and Mrs. Edward Prisk of Calumet. Charles Chynoweth of Calumet has gone to Denver, Colo., on business.

UNUSUAL ACCIDENT.

Grave fears are entertained by reason of the condition of Mrs. M. Lyons, a prominent resident of West Houghton, who was the victim of an unusual accident at her home Monday night. In some unknown manner while working in her kitchen she slipped and fell on the floor. It was found that she had fractured her spine. Her condition yesterday was stated to be critical.

NEEDLESS COMPASS.

To avoid the trouble besetting compasses on steel ships, the metal of which deflects the needle, a German inventor has devised a needless one in the form of a gyroscope, the axis of which always adjusts itself parallel to the earth's axis.

WASHINGTON ONCE GAVE UP.

To three doctors: was kept in bed for five weeks. Blood poors out in a spider's bite caused large, deep sores to cover his leg. The doctors failed, then "Buckley's Arnica Salve" completely cured me. Write John Washington, of Bosqueville, Tex. For a cure, boils, burns and piles it's supreme. 25c at The Stafford Drug Co.

Food is more tasteful, healthful and nutritious when raised with BAKING POWDER. The only baking powder made from Royal Grape Cream of Tartar. Absolutely PURE.

MARKETS

NEW YORK STOCKS.

Paine, Webber & Co.'s correspondent at New York yesterday telegraphed as follows: "Amalgamated and Smelters, together with National Lead issues, were conspicuous today for their strength, and short covering was noticeable on reports to the effect that the merchant-able copper supply of January 1st was slightly over 122,000,000 pounds, which, together with January's production of 112,000,000 pounds, would seem to indicate that the visible supply is about 234,000,000 pounds, computing January's consumption at about 70,000,000 pounds. The above rumor, if verified, would change the aspect materially of the conditions surrounding the copper metal market, and a great many traders bought stocks actively. The rails responded in the late trading to the strength in the metal issues, and the close was near the best prices of the day. U. S. Steel stocks were inclined to lag on reports of heavy price cutting by independents, but good support was noted. From the close of the market at this close, it would seem that prices during the early trading tomorrow are likely to be higher."

Table with columns for stock names and prices. Includes items like Amal., Amc., Ana., etc.

Boston Stock Quotations.

Writing from Boston yesterday, Paine, Webber & Co. had the following to say of the stock market: "The two markets in coppers was extremely active today, showing great strength all through the list. It is clearly evident now that the Calumet & Hecla and Osceola interests are working to a satisfactory settlement. People closely situated with the activity today, Hecla were the principal buyers of Isle Royale today. Forty is the price mentioned to be paid for the property. Another straw, showing how the wind blows, is Seneca, which jumped 45 points on the curb today. East Butte closed again a leader in activity today, rallying a point further and closing at the top. Don't be afraid to buy and hold this stock. It certainly looks like a winner now. We feel very bullish on the outlook, and especially for the Lake coppers, and believe that the full recovery of the deal at given out will have a real boom in the Michigan stocks. The floating supply is very small, owing to the great amount which has been absorbed during the panic, and advances will be very sharp in most cases. The report of the Copper Producers' association today, showing the stock of unconsolidated copper in this country is only 142,000,000 pounds, is an extremely bullish factor on the metal market, and especially when one considers that probably a part of this stock of copper has already been sold and is only awaiting shipment to the consumers."

Closing prices were as follows:

Table with columns for stock names and closing prices. Includes items like Adv., Arc., Amal., etc.

The sales were as follows:

Seneca Sells at Record Price.

Laurium, Mich., Feb. 10.—J. A. Minnear & Co., brokers, say: "Seneca sold for a record breaking price of 105 per share today. The company has but 20,000 shares outstanding and one of the best located properties in the Lake district. It has a shaft of three compartments down 250 feet. At the 200-foot level a crosscut is being run which will intercept the Kearsarge lode within the next few days. From diamond drilling it has been ascertained that the lode at the point where Seneca's shaft is going down is very well mineralized. There will probably be a reorganization of the company shortly which will give present shareholders valuable subscription rights."

Copper Metal Prices.

New York, Feb. 10.—Copper advanced to \$59.15, 3d for spot and to \$59.18, 9d for futures in the London market today. The local market was dull and unchanged, with Lake quoted at 13.62 1/2 to 13.75, electrolytic at 13.12 1/2 to 13.37 1/2, and casting at 13 to 13.25.

CHICAGO GRAIN MARKETS.

Chicago, Feb. 10.—Rallying from a tame and easy opening, the wheat market today developed into an active and strong affair, the May advancing to 111 1/2—a high record for the season. The volume of business, however, was not extremely large, the trade being mainly confined to what are termed "professional" traders. Establishing the new high mark was chiefly the result of liberal purchases by a leading bull, who

NO CURRENCY BILLS. Monetary Commission to Suggest No Legislation at the Present Session of Congress.

Washington, Feb. 10.—Probably it is no news that the national monetary commission contemplates recommending no legislation at this session of congress. Six weeks ago the commission would gladly have received suggestions from the treasury department for amendments to the national banking laws, but they did not come, and now nothing will be done for a year or more. The commission framed up a series of questions to be answered by bankers all over the country, and early in the fall gave a hearing to treasury experts on the subject of the banking laws. It then developed that the treasury people were not quite sure themselves what they would like in the way of amendments, or at least deferred upon several questions, and the commission told them to go home and get together and send in a draft of a bill. That was away back in November, and up to the present time not a word has been heard from the fortress in Fifteenth street. It is too late now to consider the banking laws, for the statesmen have other troubles on hand.

Some interesting gossip relative to the commission is current in Washington. In view of the fact that the commission will make no report for a long time the idea is circulating that the several vacancies on the commission may be used for a time as a haven for some of the "lame ducks" who fell by the wayside in the course of the recent campaign. Three senatorial vacancies will exist, through the death of Senator Allison and the retirement of Senators Knox and Teller; and of the house members Burton will go to the senate and Overstreet of Indiana and Honnyge of Colorado have been defeated. Burton undoubtedly will remain on the commission as a senate member. He is a currency specialist, as is Overstreet, also. The commission could not lose either man without suffering. Senator Hopkins of Illinois is marked for defeat, and some have suggested that he might be fitted into a vacancy. This is unlikely, however. The understanding appears to be that the commission will undergo no change and that even Mr. Knox will retain his membership therein, after he has become secretary of state. This program would retain Knox, Overstreet, Burton, Honnyge and Teller, but the others are men of great ability and experience, particularly in fiscal matters.

The commission pays no salaries, but the authority under which it acts is so broad that Senator Aldrich could draw a warrant for \$10,000,000, if he chose to do so, and the government could be held to pay the bill. Of course, no one supposes that government money will be wasted by the commission or on the other hand, that men who are out of public life can reasonably be asked to give of their time and energy to the work of the commission without remuneration.

PNEUMONIA FOLLOWS LA GRIPPE.

Pneumonia often follows the grippe but never follows the flu of Foley's Honey and Tar, for the grippe coughs and deep seated colds. Reuse any but the genuine in the yellow package. Sold by all druggists.

PROSPECT LAKES FOR OIL.

Tampico, Mex., Feb. 10.—The Mexican government has granted S. Pearson & Son, Limited, who are waging a war of competition against the Standard Oil company in this country, a blanket concession, giving them the exclusive right to drill oil wells in all navigable streams and lakes of Mexico. Lake Tamiahua, which is very near the flowing oil wells at Dos Boques, will be thoroughly exploited by S. Pearson & Son under their concession. The crater of the great oil volcano at Dos-Boques, which is owned by this firm, is now nearly 4,000 feet across, and extends to within a few feet of the water of Lake Tamiahua.

HOARSE COUGHS AND STUFFY COLDS.

Hoarse coughs and stuffy colds that may develop into pneumonia over night are quickly cured by Foley's Honey and Tar, and it soothes inflamed membranes, heals the lungs, and expels the cold from the system. Sold by all druggists.

YOU CAN HAVE A Healthy Stomach WITH Kodol. In fact, it is easier than having an unhealthy one, without Kodol—for sometimes the stomach will keep healthy, if you take a little Kodol occasionally. And yet Kodol doesn't do anything but digest the food in a natural manner, and effectually assist the tired and overworked stomach to do its work properly. But by doing just this, Kodol at once relieves indigestion and all the aggravating symptoms—and prevents dyspepsia. It accomplishes this just as surely as the law of "cause and effect." Get a dollar bottle of Kodol. It is guaranteed to give you relief. Don't hesitate; any druggist will sell you Kodol on these terms. The Golden Rule comes 25 times as much as the 50c bottle. Kodol is prepared in the laboratories of E. C. De Witt & Co., Chicago.

FROM MORGAN'S CURB LETTER. ISHPEMING IN BRIEF.

"It is persistently rumored that the Calumet & Hecla-Oscoda settlement is very near at hand, and the action of this group of stocks tends to confirm this rumor. Oscoda and Tamarack gained five points each, Isle Royale three points, Centennial 1, Allouez 2, and Superior Copper 1. Atlantic advanced a fraction of a point, and in the event of the settlement referred to above, should sell close to 20. The buying today was of an excellent character, and the demand continues good. The following figures are issued by the Copper Producers' association. Stock of marketable copper of all kinds on hand at all points in the United States, Jan. 1, 1909, is 122,370,290 pounds. Production of marketable copper in the United States during January, 1909, is 112,135,200 pounds. Deliveries of marketable copper for consumption and export during January, 1909, were 90,262,421 pounds. Stock of marketable copper of all kinds on hand at all points in the United States Feb. 1st, 1909, was 114,130,045 pounds. This is undeniably a tremendous bill card for copper stocks. We note steady accumulation of the standard issues, and can see nothing but higher prices in the near future. Superior & Boston was the best performer among the cubs, selling at 16 1/2. Globe Consolidated advanced to 6, a gain of half a point. We would suggest purchases of such cubs as San Antonio, Ojibway, Giroux, Hancock, and Live Oak. The close was strong at top prices.

The day's prevailing prices were:

It is a reliable regulator and never-failing. If you have pains in the back, urinary, bladder or kidney trouble, use this pleasant union of aromatic herbs, roots and leaves. All druggists sell it, 50 cents, or address, The Mother Gray Co., Le Roy, N. Y.

Ishpeming Department

WAS SHIPWRECKED SEVERAL TIMES

TO LEAVE ISHPEMING.
Merchant Preparing to Move to Iron River, Menominee Range.

August Lundin, who conducts a clothing store and tailoring business in the Nolan block, corner Cleveland avenue and Second street, has decided to move to Iron River, on the Menominee range. He is to occupy the room to be erected within the next few days by the Iron River bank which is moving to a new building just been completed. The location is one of the best in the town and Mr. Lundin considers himself very fortunate in securing it, as there were a number of other applicants. The building is owned by Mrs. J. M. Crippen of Michigan. It had been occupied by the bank for a number of years.

Mr. Lundin, who has visited Iron River during the past few weeks, reports that the town is booming, and that a number of business men from other points would locate there if they were able to secure a room. There are only four stores in the town handling clothing, and only one tailoring establishment. He will be accompanied to the range by his son and one of his workmen. Mr. Lundin expects to leave within the next two or three weeks. His wife will remain in Ishpeming for the present, but he will move there to Iron River before the summer is far advanced. Mr. Lundin has been in business here for the past twenty years, having conducted an exclusive tailoring business for some years before engaging in the clothing and furnishings goods line. He has been a resident of Ishpeming twenty-seven years, having located here immediately after his arrival from the old country, where he learned the tailoring trade under his father.

WELLKNOWN ISHPEMING MAN HAD A SUFFICIENT NUMBER OF THRILLING EXPERIENCES ON THE OCEAN AND LAKES TO SATISFY MOST PEOPLE.

Captain John Watters, a pioneer resident of Ishpeming, who retired from mining work several years ago, has perhaps had more narrow escapes than any other person in the county. He was shipwrecked a number of times, and besides came through several bad storms. Mr. Watters' first experience in a shipwreck occurred fifty-four years ago, when he, together with his parents and five brothers, was on a voyage from England to America. They were passengers on an English boat known as "Rolling John" and they were wrecked at St. Nicholas mound. There were 400 people aboard, only forty of whom were saved. All of the Watters family, with the exception of the baby, fourteen months old, were rescued. They returned to England and some time later he was a passenger on the Nile going from Plymouth to Liverpool when it was driven ashore near a resort of Ishpeming. In that wreck all on board were saved.

Mr. Watters had his next thrilling experience on the ocean seven years later, while coming to America. He was a passenger on the "Great Eastern" which struck a rock near Cape Race. In spite of the fact that the boat leaked it arrived safely in New York, though when it reached the landing the water was nearly up to the fire doors in the boiler room. When the boat struck the rock it planned on top of it, turned partially around and started off again. C. H. Hall, 19 years agent of the Lake Superior Iron company here, then a mechanic in New York, helped to repair the damage.

Mr. Watters, who has been a resident of Ishpeming for many years, was on his arrival in America made the trip by boat from Detroit to Eagle Harbor. It was a rough voyage, out the errand made the trip without mishap. His next experience on the water was in a wreck between Eagle Harbor and Eagle River, about eight months or two years later. He and several others started for Rockland to see a Cornish wrestling match between Tom Karkeot and George Harvey. There was a rough sea, and they lost much time, the party arriving at Ontario on the day following the match. They were wrecked on the return trip and the boat was resting on a rock when another craft came to their rescue, taking aboard the passengers and crew.

TAKEN TO HOSPITAL.
Stranger in the City, Operated on Yesterday, in Serious Condition.

S. Kagan, a young man who arrived here about ten days ago from Pittsburgh to take the position of chemist at the Pluto Road company, has been taken to the hospital, where he is being operated on for appendicitis. He is a native of Russia, but has been in this country for some years. He is experienced in the powder business and his position with the Pluto company here is an important one. Several telegrams were received yesterday from relatives in the east inquiring for his condition. It is likely that some of his relatives will arrive here within a day or two.

Has Faith in American.
During the first few years he was in this country Captain Watters worked a number of the copper mines, including the Isle Royale, Mass and others. His first job at the Mass mine was a contract for digging a surface drain between two shafts. He and three other men took the job and they made \$800 in three days. Captain Watters came to Ishpeming thirty-eight years ago. He worked at the Lake Superior mine until 1888, when he took supervision of the American mine, then being operated by a company composed principally of Ishpeming and Appleton, Wis., men. The mine closed shortly after the panic, which started in 1894.

Captain Watters has always had great faith in the American, although up to the time work was suspended no extensive ore deposits had been developed. He was satisfied from the appearance of the formation that the ore bodies would be found larger as depth was attained. At the time the mine closed down, the vein in the lower level was twenty-five feet wide, while in the upper levels it was from eighteen to twenty feet. This property at that time was producing an ore that averaged between 65 and 63 per cent in iron and ran very low in phosphorus. Since operations have been resumed at the property it is generally known that Captain Watters' prediction as to the larger ore bodies below the last level have been verified, as the mine is now looking better than at any previous time in its history.

The former owners of the American mine closed the several veins and sold a purchaser for it, but the proposition was jealously turned down. Captain Watters was anxious to see some responsible party take hold of it and he was pleased when the M. A. Hanna interest resumed operations here. He has always maintained that the vein would develop in a few years into a fine producer.

EXPULSION FROM ASSOCIATION.

C. P. Larson of Baraboo, Wis., who bought up most of the reserved seat tickets at the theatre tournament in Eau Claire last Saturday, selling them at a premium, has been expelled from membership in the ski organization. He purchased all of the seats in four leading business places, where they were on sale, and sold them at double the price fixed upon by the club. He was restrained by the officers before all of the tickets were disposed of and was compelled to surrender those still unsold. That evening Larson was forcibly escorted from the banquet hall by three men. The fracas resulting by his presence there caused no little excitement.

THE SECRET OF LONG LIFE.

A French scientist has discovered one secret of long life. His method deals with the blood. But long ago millions of Americans had proved Electric Bitter's power to prolong life and makes it worth living. It purifies the arteries and vitalizes the blood, rebuilds wasted nerve cells, invigorates life and tone to the entire system. It's a godsend to weak, sick and debilitated people. "Kidney trouble had blighted my life for months," writes W. M. Sherman, of Cushing, Me., "but Electric Bitters cured my trouble." Only 50c. at The Stafford Drug Co.

HEXAMETHYLENETETRAMINE.

The above is the name of a German chemical, which is one of the most valuable ingredients of Foley's Kidney Remedy. Hexamethylenetetramine is recognized by medical text books and authorities as a uric acid solvent and antiseptic for the urine. Take Foley's Kidney Remedy as soon as you notice any irregularities, and avoid a serious malady. Sold by all druggists.

CONSOLIDATED FUEL & LUMBER CO.

TWO PRIMA DONNAS.

"Honeycomb Trail," Here Next Monday Evening, a Splendid Attraction.

Alma Youlin, the prima donna of the big musical comedy success, "Honeycomb Trail," which comes to the Ishpeming theatre next Monday evening, is said to possess a voice of remarkable sweetness, as well as a delightful personality. Her first engagement was with "The Storks," and since that time she has appeared in nearly all of Chicago's musical shows, until now she is recognized as one of the leading prima donnas in the musical comedy field.

Oliver Vail, who plays the part of Mrs. Tomperton Mason, is one of the prime favorites of the famous LaSalle theatre stock company. She has been with the company three seasons, playing prominent parts in "The Empire" and "The Time, the Place and the Girl," this being the first time she has left Chicago for a long road tour, and it was only after much coaxing on her part that Manager Mort H. Singer allowed her to play her original part on the road. It is not of an actor or actress wants to leave a large city for the uncertain comforts of a season of travel, but she was so infatuated with her role and songs that she could not bear to give them up. Her singing of "Whose Little Girlie Art You?" is delightful, and all those who hear it will hardly blame her for not wanting to give it up.

BANNER MONTH FOR LIBRARY.

The circulation of books for home reading at the Carnegie library last month was the largest in the history of the institution, 6,730 volumes having been given out. Last month also had the banner day, Saturday, the 23rd, when 476 books were passed over the counter. The following Saturday 418 were given out, in the year ending the first of this month, 63,231 books were circulated. This is nearly 13,000 more than were circulated during the fiscal year, ending the first of last April.

SOLDIER BALKS DEATH PILOT.

It seemed to J. A. Stone, a Civil war veteran, of Kemp, Tex., that a plot existed between a desperate lung trouble and the grave to cause his death. "I contracted a stubborn cold," he writes, "that developed a cough that stuck to me, in spite of all remedies, for years. My weight ran down to 130 pounds. Then I began to use Dr. King's New Discovery, which restored my health completely. I now weigh 178 pounds." For severe colds, obstinate coughs, hemorrhages, asthma, and to prevent pneumonia it's unrivaled. 50c. and \$1.00. Trial bottle free, guaranteed by The Stafford Drug Co., London, S. O.

EXPECT FINE GAMES.

The members of the Ishpeming City indoor baseball team have been putting in all their spare time the past few days practicing for the contests with the Hancock Elks' team on Friday and Saturday evenings at Braastad's Hall. The Ishpeming nine has lost only one game this season and it is undoubtedly one of the strongest in the state. The Hancock players will arrive on the 2 o'clock train tomorrow and will return home Sunday morning. The Ishpeming team will be made up of Nichols, catcher; Erickson or Wall, pitcher; Hooper, first base; Cox, second base; Deems, third base; Peterson and Roberts, short-stops; Harrington, left field; Olson or Collins, right field. The games will start at 8 o'clock sharp and there will be dancing both nights at the conclusion of the contests.

THE ANTIQUITY OF THE SAUSAGE.

The sausage dates back to the year 897. It has been asserted that the Greeks in the days of Homer manufactured sausages, but this prehistoric mixture had nothing in common with modern products. This ancient so-called sausage was composed of the same materials which enter into the makeup of the bouillon of the French market and the blood pudding of the French Canadian. The ancient sausage was evaporated in the stomachs of goats. Not until the tenth century did the sausage made of bashed pork become known. It was in or near the year 1500 that, thanks to the introduction into Germany of cinnamon and saffron, the sausages of Frankfurt and Strassburg acquired a universal reputation.—London, S. O.

COMMERCIAL FISH NEED PROTECTION

LOCAL FISHERMEN THINK THEIR INTERESTS ARE BEING OVERLOOKED BY LAWMAKERS.

WANT NET LAWS AMENDED

Bill Proposed Requiring Larger Mesh for Blue Fins, and That They May Be Caught Only in Deep Water.

The commercial fishermen of Marquette and vicinity are of the opinion that too little attention is being paid to commercial fish legislation in this state, in comparison with the prominence that is now being given the subject of game fishing laws.

Larger Mesh for Blue Fins. The first of the two principal recommendations made by the Marquette fishermen is that nothing less than a three and one-half inch stretched mesh net shall be used for catching blue fins, and that blue fin nets shall be used in no less than sixty fathoms of water.

Regarding Nets Now Owned. As the fishermen have many miles of nets on hand, some of which are nearly new, they ask that they may be allowed to use the nets they now have for two years to come, by which time they will be worn out, and the enactment of the new mesh law will not work a financial hardship on them.

Representative Huntley and Senator Collins, of the fish and fisheries committee of the legislature, visited the local fish houses on their visit to this city last week, and expressed themselves in sympathy with revision of the commercial fish laws along the lines suggested by the Marquette fishermen.

HOWE'S MOVING PICTURES.

The Seranton (Pa.) Republican of recent date gives the following flattering account of Lyman H. Howe's moving picture show, which will be seen at the Marquette Opera House Saturday afternoon and evening.

Lyman Howe's moving pictures gave a wonderful performance at the Lyceum theater last night, and the character of the entertainment at once stamps Mr. Howe as a postmaster in the American art of progressiveness. To secure pictures of ruined Sicily at a time when the world has not yet adequately recovered from the stunning blow, is surely an accomplishment that cannot be lightly considered.

Especially noteworthy are the pictures of Sicily before and after the earthquake. They are not only realistic, they are living experiences of the suffering, and the havoc caused by the shaking of the earth, by the rumbling of the unseen, unknown forces that eradicated in a few moments what had taken centuries to build.

More than 1,300 English tradesmen are this year entitled to use the royal arms over their shop fronts.

EXERCISES AT THE NORMAL.

Today Will Be Given Up to Observance of Lincoln's 100th Birthday.

Today, at the Normal school, will to a certain extent, be given up to exercises appropriate for the celebration of the one hundredth anniversary of the birth of Abraham Lincoln. The morning exercise, beginning at ten minutes before nine o'clock, will be in charge of the Normal department. The Rev. Bates G. Burt will deliver the address, and some special music has been prepared.

SUPERVISORS WANT A STATE HOSPITAL

FOR TUBERCULAR PATIENTS OF UPPER PENINSULA—OTHER BUSINESS TRANSACTED AT MEETING YESTERDAY.

At the meeting of the county supervisors held at the court house yesterday a resolution was adopted requesting the representative and senator from this district to use all honorable means to have a law enacted at the present session of the Michigan legislature for the establishment of a tuberculosis hospital in the upper peninsula.

Resolved, That the clerk of this board transmit a copy of this resolution to such senator and representative at once. On advice of prosecuting attorney Beh the claims for reimbursement of two men last summer while in the employ of the county road commission, were presented to the supervisors.

Reports were received from the county poor commissioners, the game warden and the county superintendent of schools. The meeting then adjourned to meet again March 24.

SPINAL MENINGITIS.

Caused Death of Big Bay Young Man at St. Mary's Hospital.

Isaac Coleman, a young man in the employ of the Brunswick-Balke-Collander company at Big Bay, died at St. Mary's hospital Monday night, after an illness of four days with spinal meningitis. The funeral was held in St. Peter's cathedral yesterday afternoon at 2 o'clock and the remains were interred in Holy Cross cemetery.

The deceased was born at Bayfield, Wis., in 1900, and he was eighteen years of age at death. For the last eight years, he has resided with his mother and stepfather, J. L. Bergen, the light-house keeper at Big Bay point.

WANTS SALE OF STATE TAX LANDS STOPPED

REPRESENTATIVE MAXEY DE-CLARES THAT SPECULATORS ARE SHAMELESSLY OVER-RUNNING THE CAPITOL.

Representative John O. Maxey of L'Anse is mixing war medicine and is going after the scalplock of Land Commissioner Huntley Russell, according to the Lansing correspondent of the Detroit Journal. He wants the sale of state tax lands stopped during the consideration by the legislature of land legislation and if he doesn't succeed in holding up further sales, he promises to go off the reservation entirely and put some one in an exceedingly awkward position.

"It is a downright shame the way the land speculators are overrunning the capitol," says Representative Maxey. "They are gobbling up the best state lands, demanding them of their timber and letting the rest revert to the state, practically valueless. And we are not getting enough out of the sale of lands to pay for the expense of handling them. The land commissioner reports that an appraiser has examined the lands and fixed a fair price on them. I'll tell you how that works."

"A few months ago I bought some cedar swamp land in the upper peninsula for \$28 per acre. I considered that I was getting a bargain, because I believe that the land is really worth \$100 an acre as a piece of timber property. But when I tried to get my abstract, I found that the man I bought from had purchased the property from the state two years before, for \$125 per acre. That is a fair sample of the way the lands are disposed of. This land could not have been fairly appraised, because no man could take a look at it and not see that it was worth at least \$25 per acre.

Simple Way to Get Rich.

"And this is going on all the time. Speculators buy the land around \$1 per acre, go out and cut the timber and let the land revert to the state. They clear from \$50 to \$100 per acre in the transaction. And even worse things take place. The report of the forestry investigation commission shows that men sold state lands as much as nine months before they bought them. Pretty simple way of getting rich that—if you're close enough to the office.

"All you have to do is to find a purchaser who will not insist on the immediate delivery of the deed. Then you can look over the list and buy land for one-tenth of what you have already sold it for.

"Now much of this went on in years by. But I know that the capitol is swarming with these same speculators. They are grabbing up all the lands they can before the legislature withdraws all state land franchises.

"As the thing stands now, we don't get enough money out of the sale of lands to begin to break even on what it costs to handle the lands. I know something about the matter, because I have taken at least \$5 per acre is not worth taking at all.

Reserve Mineral Rights.

"Also, mineral rights on all land sold should be reserved by the state. Minnesota pays a good share of her running expenses by the royalties received from iron lands owned by the state and Michigan should do the same.

"The Morrill bill, as it will finally be fixed up, I believe, take care of the situation, but while it is pending the sale of lands should be held up. And if Mr. Russell is not willing to aid in this matter I am going to know the reason why.

Water Power and Forestry.

It is plain that the water power question and the forestry issue are getting closer together and there is likely to be a combination of these two big interests. The special forestry commission of inquiry recommended a commission of public domain to take over all affairs of state government relating to its public domain. As the water power investigation proceeds the need of some governmental body to regulate and control and pass on questions between power and producer and consumer become more apparent. The committee is rather inclined to a widening of the forestry commission's field to take in water power matters. In short the whole matter seems to point toward a public utilities board to have charge of the power companies, railways, telegraph and telephone companies and such. The forestry issue is further along toward a concentration of state power along its special line, and in this regard the two big issues of the present before the legislature are similar.

SNOW VERY WELCOME.

Teamsters, Farmers and All Who Use the Streets and Roads Are Happy.

The snow storm of the last two days, which was the heaviest of the winter, was welcome to all classes of teamsters, and we suppose, to horses as well. It has been very difficult, both for teamsters and beasts, to transport heavy loads over the bare and icy roads during the last two weeks. In the country, the roads were so icy that almost no farmers have hauled wood to town, in consequence of which, some residents of this city have had to use coal, or go without fuel. In some sections, the logging roads had become worn bare, and teams can be more conveniently and profitably used in the woods from now on. Moreover, the belief is quite general that there is less sickness in the winter, when the ground is covered with snow, so nearly all classes are rejoicing in the storm of the last two days, which, in the opinion of Observer H. R. Patrick, is not yet over.

CARD OF THANKS.

We wish to express our heartfelt thanks to all who so kindly assisted and sympathized with us in the sickness and death of our son, and especially the managers and employees of the Brunswick-Balke-Collander Lumber company at Big Bay for their willingness to aid in every possible way. We also wish to thank Mrs. Pross Barman for her tender care during his last illness. MR. AND MRS. J. H. BERGEN. (1-22-1m) Drink Vandenboom's buttermilk. (1-22-1m)

Spring Shirts

Months ago we selected our fabrics and contracted with the best shirt makers to make our lines of Spring Shirts.

The new styles have now arrived and we are safe in saying they are an unusual collection of splendidly made, perfect fitting, handsome shirts.

If you have a weakness for choice shirts, come and see the new comers and make your selections.

Every good fabric in Shirts, cuff attached or detached, soft or stiff fronts; all sizes and sleeve lengths. \$1.00, \$1.25, \$1.50 to \$2.50.
