

U. S. SENATE BOOKED FOR LIVELY BATTLE

Indications Are for a Strenuous Contest Over Sugar Schedule of the Tariff Bill to Be Reported by the Finance Committee.

While Beet and Cane Interests Will Fight for Protection, Free Traders Will Show That Where as the Refined Product Sells for \$2.70 a Hundred Pounds in Europe, the Price Here Is Almost Double That Figure— Philippine Problem a Factor.

Washington, April 8.—The indications point to a contest in the senate over the sugar schedule in the tariff bill, not only because of the proposed free admission of 300,000 tons annually from the Philippines, but because certain Democratic senators plan to open up the whole subject by introducing an amendment to remove the duty entirely from refined sugar.

As far as the report of the finance committee is concerned, the beet sugar producers have little to fear, as the whole sugar schedule has been referred to a sub-committee of Messrs. Burrows, Smoot and Flint, representing the sugar producing states of Michigan, Utah and California. The American producers fear most an attempt in the debate to bring the so-called sugar trust to the foreground, as the Democratic senators threaten to do. The Democratic ranks will be broken, however, as almost all the cane sugar states have lined up with the beet sugar states. It became known today that Mr. Clay, of Georgia, has prepared an amendment to the tariff bill that strikes out all differential duties, the effect of which is to admit refined sugar free. This amendment is said to have the endorsement of the minority members of the finance committee.

Philippine Proposal Alarms. Two sessions were held today by the sub-committee on sugar, at both of which senators from the beet sugar states were present. The matter which most alarms the American sugar producers is the proposition for the admission of 300,000 tons annually of free Philippine sugar. This is looked upon as an entering wedge, with a view to getting the amount increased at another time.

Resolutions of inquiry to elicit the facts in relation to the sugar industry were introduced today by Senators Benjamin of Colorado, Carter of Montana, and Smith of Michigan. All were adopted. The purpose is to procure information intended to show that the beet sugar industry needs further protection, and that in the end it means cheaper sugar to the consumers.

On the other hand, Mr. Clay is preparing to show that the selling price of sugar in Hamburg and London is \$2.70 per hundred, compared with \$4.96 in New York, and that much of the difference is due to the existing tariff of \$1.95 a hundred. The senators taking this position will make an effort to show that beet sugar producing has not been successful in this country.

CHAIRMAN PAYNE SUSTAINED. House Upholds the Committee on Ways and Means on All Points.

Washington, April 8.—Because of the numerous committee amendments to the Payne tariff bill, the house was compelled to sit until late in the evening today, in order to insure action on the various paragraphs coming within the scope of the special rule adopted last Monday, before the final vote is taken tomorrow afternoon. At one time the Republicans were caught napping, and an amendment by Mr. Clark, of Missouri, was adopted, fixing the rate of duty on iron or steel wire of No. 16 gauge at three-quarters of a cent per pound, but this was thrown out later. Feeling that he might not meet with such success again, Chairman Payne took his Republican colleagues to task for absenting themselves from the chamber and appealed to them to remain in their seats. This was done, with the result that in all the committee amendments he was sustained.

While occasionally there were outbreaks of bad temper, on the whole the session assumed a normal aspect and business proceeded with a reasonable degree of facility. With a number of committee amendments yet to be considered, the house at 6:58 p. m. adjourned.

CALL UPON SPEAKER CANNON. Women File Protest Against Increased Tariff on Wearing Apparel.

Washington, April 8.—Armed with the text of the petition of 250,000 persons in Chicago, four women, representing the women's clubs of Chicago, called upon Speaker Cannon today to protest against the proposed increase in the duty on women's wearing apparel. Representative Eess will present the petition to the house. The speaker chatted with the women for several minutes. He bespoke for the petition consideration, saying that it was the privilege of any member to present to the house any respectful petition.

ARE ILL AT WASHINGTON. Condition of Messrs. Hitchcock and Babcock Is Reported Unchanged.

Washington, April 8.—The condition of former Secretary of the Interior Hitchcock and former Representative Babcock, of Wisconsin, who have been seriously ill for several days in this city, was reported today to be unchanged.

NOT MUCH SPOILS GIVEN POLITICIANS

Bill Providing for Taking the Thirteenth and Subsequent Censuses Is Introduced in the Senate by Chairman La Follette.

Drawn to Meet the Views of ex-President Roosevelt, Who Had Vetted the Measure as Passed at the Preceding Session, It Enforces the Merit System Even More Strictly Than the Legislation as Last Put Through the Hopper in the House.

Washington, April 8.—The bill to provide for the enumeration of the thirteenth and subsequent censuses was today reported to the senate by Mr. La Follette, chairman of the committee on the census, who stated that he would ask the senate to consider it tomorrow. The measure provides that hereafter all applicants for places in the civil service of the government shall be examined in the state or territory in which such applicants reside, and that "no person shall be eligible for such examination unless he has been actually domiciled in the state or territory at least one year previous to his examination." Heretofore the applicants could take their examinations wherever they might be residing.

In the house the bill was drawn to practically meet the views of former President Roosevelt, who vetted the census bill as passed in the last session because it failed to meet his views regarding the examination of applicants for positions in the census work. As reported to the senate the bill is regarded as more strictly enforcing the merit system.

The director of the census may especially appoint temporary employes, but his power to appoint experts who have served in former censuses is limited to those who operate mechanical appliances. Confirmation by the senate is required in the case of the appointments by the president of the 300 supervisors, the house bill not requiring such confirmation.

The bill reduces the salaries of the chief officers of the census from the director down, the reductions being generally \$500 each. The subsistence allowance for special agents is reduced from \$4 to \$3 daily.

In the census taking the persons unemployed are required to state the number of months of such unemployment during the previous calendar year, and whether employed at the date of the enumeration. The occupants of farms are to state their activity. The report will show the acreage of woodland and the character of the timber on each farm.

The appointment of the administrative officers is placed directly under the director of the census, without supervisory control on the part of the secretary of commerce and labor, as provided in the house bill.

WILL CONTINUE IN POLITICS. Three Prominent Indiana Men Decline Important Federal Positions.

Washington, April 8.—It was stated today that the mission to China tendered by President Taft yesterday to former Senator Fulton, of Oregon, and taken under consideration by him had previously been offered to former Senator Hemmway, of Indiana. Former Representative Watson has declined four different places in the federal service offered him by the president; former Vice President Fairbanks has announced that he will not enter the federal service, and former Senator Hemmway, of Indiana, has also declined an office. All three of these gentlemen have announced that they will continue in politics in Indiana.

RAILROAD LOSES LANDS. Patent Involving 1,110,540 Acres Is Annulled by Helena (Mont.) Court.

Helena, Mont., April 8.—In the case of the United States against the Northern Pacific railway, Besky, Fork Coal company and Northwestern Improvement company, in which there is involved 1,110,540 acres of coal lands in Carbon county, Judge Hunt, of the United States circuit court decided today that the patent to the lands in question is null and void. The railroad is ordered to surrender the patent to the clerk of the court for cancellation, and to refrain from asserting any claim or right to the land.

WASHINGTON INVESTIGATING. Mutilation of Official Dispatches Is Charged Against Nicaragua.

Washington, April 8.—Nicaraguan mutilation of official dispatches to this government, and the continued grave conditions in Central America, are under earnest consideration by the Washington government. Investigations have convinced the officials here that cipher dispatches passing between John H. Gregory, the American charge at Managua, Nicaragua, and the state department at Washington were purposely mutilated during Nicaragua's unusual military activity.

RENO JUDGE'S DECISION CAUSES CONSTERNATION.

Holding That the Law Does Not Throw the Courts of Nevada Open to the World, It Falls Like a Bombshell in the Numerous Divorce Colony.

Reno, Nev., April 8.—The divorce colony here is much disturbed over the ruling today by Justice Orr that both parties to a divorce action must be bona fide residents. The decision was given in the case of Howland vs. Howland, in which the wife came here and caused papers to be served on her husband during a brief business visit. The court held that such action was illegal. He declared that the law did not throw the courts of Nevada open to the world so that people might come here, stay a day or so, file plaintiff's index and action and the defendant to come in and be served, and thus confer jurisdiction on the court.

"If such were the intention," he said, "then I may say that Dakota in her palmy days could not approach the mark Nevada will set for the divorce colony. The statute applies only in the case of a bona fide resident of the state served in whatever jurisdiction he may be found in the state."

There are at least fifty men and women here to get divorces to whom the decision will apply.

DEFEAT FOR GOVERNOR HUGHES. New York Assembly Gives Direct Nominations Its Death Blow.

Albany, N. Y., April 8.—Direct nominations as recommended by Governor Hughes received its death blow in the assembly today, at least so far as the present session of the legislature is concerned. By the vote of 112 to 28, after a debate lasting most of the day, the assembly decided to sustain the adverse report of the judiciary committee, which, with two dissenting votes out of twelve, had registered its disapproval of the measure.

LIABILITIES INCREASING. Creditors of Broker John Dickinson Are Likely to Get But Little.

Chicago, Ill.—Developments here today in the failure of John Dickinson & Co., brokers, indicate that the total liabilities are far above the \$300,000 estimated at first. The demands made upon the receiver have decreased "funds to a low point. Judge Landis issued an order today permitting the receiver to release the margin holders. About \$600,000 of these were found in a private safety deposit vault. The legitimate commissions due the company on these amounts to \$5,000. It has been ascertained that the available funds of the company in New York are \$3,500.

HUSBAND OF EMMA GOLDMAN. Government's Motion Granted, J. A. Kersner Loses Citizenship Papers.

Buffalo, April 8.—Judge Hazel, in the United States circuit court, today granted an order cancelling the citizenship papers of Jacob A. Kersner. Through this order all the rights of citizenship are also taken from Kersner's wife, Emma Goldman. The order was granted on the motion of Special United States Attorney Chambers of Pittsburgh, and the evidence upon which it was based was presented principally by Kersner's own father, Kersner, it appeared, secured his citizenship document in 1884, when he was only nineteen years old and had been in this country only two years instead of five years, as required by the law. Three years later he married Emma Goldman.

CLOSING PRICES LITTLE CHANGED. Early Advances in Stocks Are Subsequently Lost on Profit-Taking.

New York, April 8.—Today's stock market gave every evidence at an early stage of a disposition to retreat operations on the eve of the three days recess. The occasion was seized, however, by numerous pools to rush into prominence innumerable favorites and to push them upward by violent advances. The substantial body of the stock list was advanced, but was firm in tone. Such action in the low grade stocks is accepted usually as a sign of the degeneration of the speculation and a harbinger of the end of a movement. The market showed its recent disposition to ignore bad signs, however, and there was no urgent pressure to get out of stockholdings over the holiday interval. The stock market kept one eye on the wheat market and saw evidence there to confirm the belief that the crop report did not promise well for winter wheat crop.

The reassembling of the conference over the coal miners' wage scale was hopelessly regarded as promising settlement. The coalers continued to benefit from this view. The estimates of the current movement indicated that the money supplies would be increased by the time stock market operations are resumed Monday next. The receipts on the balance from the interior thus far this week are reported to have reached a large amount as the total from that source for all of last week. Money, therefore, continues exceedingly easy. A good deal of encouragement is felt over the marked improvement in the government finances, largely by reason of the expansion in the custom receipts. The United States treasury, in consequence, finds itself in such resources that an early issue of government bonds is considered to be an unlikely necessity. Profit-taking sales at the end of the day subtracted about as much from the prices of the principal stocks as had been added by the advance, leaving the only notable changes of the day in the class of stocks which were made in the feature of the day.

HAL CHASE IN PEST HOUSE. New York Americans' First Baseman Ill With Smallpox at Augusta.

Augusta, Ga., April 8.—Hal Chase, first baseman of the New York Americans, is at the detention hospital here, undergoing treatment for smallpox. It is said he has the mildest form of smallpox, and is responding to the treatment finely.

CASTRO CAN'T STAY IN FRENCH COLONY

On the Ground That His Presence Is Likely to Foment Trouble, He Is Ordered to Hide Himself from Martinique.

As the United States Will See That He Doesn't Make His Way to Venezuela on Some Sailing Vessel, the Only Course Left Open to Him Is to Take Refuge on One of the Danish West India Islands or Return to Europe.

Paris, April 8.—France decided today to expel former President Castro from the island of Martinique, on the ground that his presence there is likely to foment a revolution in Venezuela. It is presumed here that the United States will prevent him making his way to the mainland on a sailing vessel. This course will leave Castro the alternative of taking refuge on one of the Danish West India islands or returning to Europe.

He Becomes Violently Ill. Fort De France, April 8.—Ex-President Castro drove through Fort De France this morning, to see the town. The attitude of the people toward him is one of sympathy. Shortly after returning from his drive, Castro became suddenly ill. His condition is undoubtedly grave. When informed of the decision of France to expel him from Martinique, he appeared not to believe the news.

Doors Closed All About Him. Washington, April 8.—The efforts of the American government to keep former President Castro out of Venezuela and away from the nearby mainland and islands have every indication of being crowned with success. Most of the persons having possessions in that part of the world have indicated to the state department that Castro's presence is not wanted within their boundaries, and that they are willing to acquiesce in the desire of the United States that he be far removed from the scene of his former prestige.

Following Castro's deposition as president, he has still a great many warm adherents in his native country, and it is realized here that his return might be made the occasion of a demonstration resulting in the establishment of unsettled conditions. This government, therefore, has endeavored to be allowed to return to Venezuela or to be permitted to make his headquarters at any of the surrounding ports.

Mrs. Castro Bitterly Disappointed. Port of Spain, Trinidad, April 8.—The steamer Guadeloupe arrived here this morning. She was followed into port by the United States cruiser Montana, which was in attendance on her trip from Fort De France, where ex-President Castro landed yesterday. Immediately the Guadeloupe dropped anchor, a number of launches and other boats containing a strong armed guard, following the instructions issued by Lieutenant Commander Swain, commandant of the military department of Trinidad, proceeded to the steamer. Only the ship's agent, newspaper correspondents and relatives of Castro were permitted to board. During the time that the Guadeloupe remained in the harbor, guard boats were on duty, notwithstanding the fact that Castro was not on board. The Guadeloupe sailed for Venezuela this afternoon.

During an interview Mrs. Castro expressed great disappointment at the exclusion of her husband. She did not comment on the action of the British government in keeping with the usual hospitality extended by England to strangers. She said that it had been her husband's intention in taking up his temporary residence at Trinidad merely to rest and to look after his personal interests. Now that this privilege has been denied her, she did not know what his next move would be. She proposes to proceed to La Guayra, and if not permitted to land will continue the voyage as far as Colon.

Trinidad People Glad of the Exclusion. Public opinion here generally favors the exclusion of Castro. Although not in keeping with English traditions, it is recognized that this action was taken for the maintenance of peace and the good relations with the neighboring republics. During Castro's presidency Italian and Montenegrin availing themselves of the opportunity to trade and commerce between Trinidad and Venezuela were practically destroyed, and only recently have commercial relations been re-established. The police have taken strong measures looking to the prevention of any conspiracy here. The American warships North Carolina and Montana are availing themselves here, and probably will leave this port late tonight or early tomorrow morning.

Detached by Railroad Tunneling, Huge Mass Starts on Journey. Nice, April 8.—A mountain has begun to move bodily as a result of a railroad excavation in the Verdon valley. A large mass has become detached and is moving at the rate of sixty or seventy yards an hour.

HELEN MODJESKA IS DEAD. Famous Actress Passes from Life at the Age of Sixty-Five.

Los Angeles, Cal., April 8.—Helen Modjeska, the famous actress, died today of Bright's disease. She was aged sixty-five.

MESSINA, SICILY, EXPERIENCES ANOTHER VIOLENT EARTHQUAKE. Messina, April 8.—A violent earthquake, accompanied by subterranean rumblings, occurred here at 9:45 o'clock last evening.

ANIMAL TRAINER MEETS SHOCKING FATE.

Hurled High Into the Air and Then Trampled Under Foot, Charles Bellow Is Killed by an Elephant That Suddenly Runs Amuck at Des Moines, Ia.

Des Moines, Ia., April 8.—"Tom," an elephant in the winter quarters of a circus here, this evening suddenly ran amuck and, seizing his keeper, Charles Bellow, hurled him high into the air and then trampled him to death. The animal ran through the animal park, uprooting small trees, destroyed three circus wagons and demolished a bridge across the lagoon. The elephant was finally subdued.

MURDER OR SUICIDE. Prominent Physician of Fergus Falls Is Found Shot to Death.

Fergus Falls, Minn., April 8.—Dr. W. T. Duncan, one of the most widely known physicians of this locality, was found dead in his office here last night, with a bullet wound in his head. It is not yet known whether death was accidental or otherwise.

AGED WOMAN TIRES OF LIFE. Plunging from Height of Fifty Feet, She Sustains Fatal Injuries.

Oswego, Ia., April 8.—This evening Mrs. J. C. Pierce, aged seventy-five, plunged from the platform of a wind mill fifty feet to the ground, sustaining fatal injuries. She had been ill for several months.

BECOMING VIOLENT HE SETS OUT TO KILL. Armed With Pistols, Shotgun and Bombs, Illinois Man Embarks on Murderous Mission—Slays a Woman, Wounds Others, Ends His Own Career.

Aurora, Ill., April 8.—John Anderson, a plumber, became suddenly violent today and armed himself with two pistols, a shotgun and three bombs which he fastened to his person by means of a harness. He started out to kill the inhabitants of the block in which he said that malicious gossip concerning himself had been circulated. He killed Mrs. John McVicker, wounded her husband and Mrs. John Belford, and then committed suicide.

FAMILY QUARREL IS BLOODY. One Kentucky Man Is Dead and One Is Fatally Injured.

Olive Hill, Ky., April 8.—Louis Bellow was shot and killed; his brother, Curtis Bellow, was shot in the back and probably fatally injured, and John Atkins, a relative, was shot in the hip yesterday in a family quarrel with Charles Lee and his son, Walter Lee, at Curtis Bellow's home at Fulton. Curtis Bellow and his wife, who is Charles Lee's daughter, have separated and trouble arose over the division of their property. Charles Lee surrendered, but Walter Lee is still at large. News of the shooting reached here today.

FOOD HE BEGS IS FATAL. Death in a Police Station Is Attributed to Potomac Poisoning.

Pittsburg, Kansas, April 8.—That C. Davis, who died at a police station here today, was poisoned by ptomaines in food he had begged at a country home is the belief of the local police. Davis, who was a member of the cooks' union at Des Moines, Ia., arrived here penniless and according to his story told to the police became ill immediately after eating bread and jelly, given him by a woman in a farm house to whom he had applied for food.

SENDS WARSHIP TO THE SCENE. Italy Complains to Turkey Because of Ugly Affray in Africa.

Rome, April 8.—The Italian government is making representations to Turkey with reference to the recent violent demonstration against Italian at Bengazi and Cyrene, Turkish possessions in Africa. The population attacked an Italian captain and the consul, wounding several Italian sailors who endeavored to protect these officials. The Italian warship Francesco Ferruccio has been despatched to Bengazi.

MAY SPOIL ROOSEVELT'S HUNT. Somali Warriors Showing Signs of Unrest and Threatening Trouble.

Mombasa, April 8.—Reports received here are that the Somalis inhabiting the desert country north of the protectorate are showing signs of unrest and are massing on the northern boundary of Kenya province. It is said that the governor of the protectorate has been instructed to surround the Roosevelt party with every possible precaution for their safety.

MOUNTAIN IN MOTION. Detached by Railroad Tunneling, Huge Mass Starts on Journey.

Nice, April 8.—A mountain has begun to move bodily as a result of a railroad excavation in the Verdon valley. A large mass has become detached and is moving at the rate of sixty or seventy yards an hour.

HELEN MODJESKA IS DEAD. Famous Actress Passes from Life at the Age of Sixty-Five.

Los Angeles, Cal., April 8.—Helen Modjeska, the famous actress, died today of Bright's disease. She was aged sixty-five.

MESSINA, SICILY, EXPERIENCES ANOTHER VIOLENT EARTHQUAKE. Messina, April 8.—A violent earthquake, accompanied by subterranean rumblings, occurred here at 9:45 o'clock last evening.

MOVE AT LANSING TO CUT WORK SHORT

Real Statewide Legislation Will Have a Hard Time to Get Through if Present Plans Are Finally Carried Out.

House Passing a Resolution Providing for the Cessation of Business May 8, Only Twenty Days Will Remain Should the Senate Give Approval, and a Multipitude of Bills Will Be Tied Up—Speaker Upheld in Grave Fight Over the Rules.

Lansing, Mich., April 8.—[Special.]—The house spent the whole afternoon today debating whether to sustain Speaker Campbell on his ruling that Representative Bryant could not for the second time move to relieve the committee of his bill repealing the cash road tax law. The matter developed into a grave fight over the right of the house to ignore the provision in the constitution which says that the house shall pass no rule which will prevent the majority of the members from taking a bill from committee. This provision grew out of a long fight, culminating at the last session when Mr. Dust could not get his telephone tax bill passed because of the two-thirds rule which prevented its being taken from committee.

Presiding Officer Is Sustained. Speaker Campbell held that if the house wished, it could have ignored the constitution entirely and passed a rule requiring a two-thirds vote, saying that the house was the highest arbiter of its action. He took the floor to fight for his idea, this being the fourth time this session, a fact that considerably weakens his influence. The house finally stood with him, fifty-two to thirty-six, most of the upper peninsula men voting with him.

"I would call the attention of the house to the fact that never before in the history of the state has it been impossible, as it is now under this ruling, for sixty-seven men to take a bill from committee," said Mr. Baker. Representative Craun at once offered an amendment to the rules, providing that a motion to take a bill from committee could be renewed every day. He got fifty-two votes for it, but two-thirds were needed to amend the rules. The matter was finally referred to the rules committee, which is said to be under Speaker Campbell's domination.

Utter Motives Suspected. The fight has materially weakened Campbell's influence. There are some who see back of it an effort to aid the plans for killing the telephone and telegraph tax bill. Failure to take it from the committee would mean the death of that measure. An effort to reconsider the vote of yesterday, by which the house set May 8 as the date for the cessation of work and May 17 as the date for the final adjournment, failed, and the adjournment resolution has gone to the senate. There it will be referred to the committee on rules, composed of Senators Shields, Kline and White. If passed by the senate, the legislature will find its hands tied for every interest it takes in legislation yet to be passed. It seems a mistake to set the date of adjournment so far ahead.

Protest Comes from Warden Fuller. Warden Fuller's letter taking the pett off Representative Ogg came to hand today, and the clerk started to read it, but was held up by the speaker, who referred the matter to a special committee of five, with Messrs. Lodge, Maxcy, Rice, VanLaet and Yeo as the members.

No less than forty-eight bills were reported out by the various committees this afternoon, showing the effect of the threatened adjournment. Most of them are of little importance, the new railway commission bill being the only real important one. These forty-eight bills show that real statewide legislation will have hard work to get through.

SCANDAL IN IOWA. Legislative Committee Finds Insane Patients Treated Cruelly.

Des Moines, Ia., April 8.—The house today endorsed the special investigating committee's sensational report dealing with the alleged cruelty to the inmates of the state insane asylums, and denied the formal request of the state board of control to make a statement as to the facts. The report stated that women were huddled in a room, naked, while others were plunged into ice cold baths; one woman was assaulted by a negro attendant, and there were other charges of wanton cruelty.

COURT ISSUES AN INJUNCTION. Missouri Roads Forbidden to Put Into Effect the Three-Cent Fare.

St. Louis, April 8.—A temporary injunction restraining eighteen Missouri railroads from putting into effect on Saturdays the three-cent passenger fare was granted tonight by Judge Williams, of the circuit court here.

ANTI-LIQUOR BILL PASSES. Des Moines, Ia., April 8.—The house this afternoon passed the senate bill prohibiting the drinking of intoxicants on trains. This ends the sale of liquor in dining cars for consumption while on trains. Members of the train crew are given power to eject offenders and call upon the local officers to arrest them, but they may not make arrests.

MINERS SUBMIT A NEW PROPOSITION

What the Coal Operators Will Do About It Is Not Decided at the Close of a Second Conference Held at Philadelphia.

That an Amicable Settlement Will Be Reached, However, Is the Prevailing Opinion—Vessel Owners Announcing That They Stand Pat for the Open Shop, the Labor Leaders Meet for Consultation—They Deny a Strike Order Has Yet Been Issued.

Philadelphia, April 8.—At the conclusion of a two hours conference between the operators and the representatives of the anthracite coal miners, which terminated late this afternoon, both sides seem as far from the ultimate solution of the working conditions governing the hard coal fields as ever.

The miners' representatives presented a modified proposition. In this new proposal the men agree to the renewal of the recently expired wage agreements, with a few changes. These changes include the restoration of the wages of those miners that have been reduced; that the right to hire and discharge be vested exclusively in the mine manager or operator, and that there be no suspension of operations during the adjustment of the differences.

No statement was given out by the operators, and it is not known how they view the proposition of the miners, caring as it does recognition of the union in a different form than originally presented. Notwithstanding the fact that several officials of the mine workers assert that an agreement is not probable at the present time, the belief prevails that an amicable settlement will be reached.

Lake Carriers Stand Pat. Detroit, April 8.—We stand pat for the open shop and the principles involved therein, and any action taken by the different organizations of labor on the lakes will make no difference whatever to our position," declared President William Livingstone, of the Lake Carriers' association, when asked today for a statement on the strike of the lake engineers, firemen, oilers, waterenders and deckhands ordered last night, by Mr. Livingston declined to discuss what plans, if any, the lake carriers have toward securing men to operate their boats.

Labor Leaders in Conference. Buffalo, April 8.—The officers of the various Great Lakes labor unions assembled here today to discuss the strike which has been issued. There is a strong sentiment that the marine engineers should be backed up in their refusal to sign the contracts sent out by the Lake Carriers' association, which provide for the open-shop rule. The conference of the leaders was still in progress at midnight. It was said that the general situation was under discussion.

Increased Pay for Glass Blowers. Pittsburg, Pa., April 8.—Following a conference between representatives of the National Association of Manufacturers of Pressed and Blown Glassware and the American Flint Workers' union, an agreement was reached today whereby it is said that three-fourths of the chimney glass blowers will receive a 12 1/2 per cent increase in wages, starting tomorrow, and that after the usual summer shutdown, which will occur June 30, a further increase to make up the 25 decrease to which the men submitted three years ago will be granted.

RIGHT OF FATHERS UPHELD. That 17-Year-Old Girls May Be Spanked Is Detroit Court's Ruling.

Detroit, April 8.—In police court here today, Justice Jeffries upheld the right of a father to administer an old-fashioned spanking to his seventeen-year-old daughter, even if her dignity suffered. Margaret Grant, aged seventeen, had her father arrested for disturbing the peace, after a spanking. Grant told the judge that the punishment was part of an effort to keep his daughter away from the cheap theaters, and the justice decided that spanking young ladies of seventeen was permissible in moderation.

BIG THEATRICAL WAR OPENS. Quitting the Present Association, the Shuberts Fire the First Gun.

New York, April 8.—The announcement today by the Shuberts that they have withdrawn from the Theatrical Managers' association is the first gun, according to the Tribune, of what will undoubtedly be a big theatrical war. A new managers' association which will include David Belasco, Harrison Grey Fiske and the Shuberts will be formed, it is understood.

SIX HUNDRED PERSONS HOMELESS. Manchester, N. H., April 8.—A large portion of the tenement house district, just south of the business center of this city, was wiped out today by fire. It destroyed about fifty buildings. Six hundred men, women and children, mostly Greeks, were made homeless. The loss is estimated at \$150,000. The cause of the fire is unknown.

WEATHER FORECAST. Washington, April 8.—The following is the weather bureau's forecast for Upper Michigan: Partly cloudy, Friday; Saturday, fair and warmer.

Friday Morning, April 9, 1909.

Classified Want Directory

HELP WANTED

WANTED—Girl for housework. Call at 1025 North Front street.

WANTED—Two girls at the Queen City Hotel, corner Washington and Fourth streets. 4-6-17

WANTED—Railway mail clerks. Salary \$800 to \$1,000. No "layoffs." Examination in Marquette May 15th. Common education sufficient. Candidates prepared free. Write immediately for full particulars. Franklin Institute, Rochester N. Y. 4-6-17

have given assurances that he will not be allowed to carry on any machinations that will stir up future trouble for the powers. There can be more assurance that these matters will be carefully looked after when the lack of cordiality that attended Castro's reception in France several months ago is remembered. The French viewpoint in regard to Castro is the same as the British, American and Dutch viewpoint—he is regarded as an international nuisance and there is keen regret that there is not some means for effectually assuring that he will not again be able to kick up trouble in Venezuela. Meanwhile the powers are one in a desire to make his road back home as hard and disagreeable as one as possible.

The date for the opening of navigation is not far distant. There will be, however, no particular rush about getting the boats in commission. The iron men have little definite idea about the tonnage they will want moved during the season. It is generally accepted that there will be a larger amount of ore moved than went forward last year, but the movement will fall far below the record. The demand will not, judging by the present outlook, be as large as it was expected a few months ago to be. The general industrial situation, while it has improved steadily, has hardly advanced as rapidly as the more optimistic hoped it would. The necessity for cutting steel prices had a somewhat disquieting effect, and the expedient has not yet brought in the flood of looked for orders, though there is a good and steady demand. The uncertainty in regard to the tariff law is another thing that has had an unfavorable influence on the general situation, which will be appreciably improved when it is cleared up. The various lake ports will doubtless be busier the coming season of navigation than they were last year, but there will be nothing in them resembling feverish activity.

It is said that there is little likelihood that there will be any attempt made to secure expression in the state as a whole on the liquor question in Michigan. The Anti-Saloon forces are well satisfied with the progress they are making under the local option law. They do not judge it wise to hazard the ground they have gained by making prohibition a state wide issue. On the other hand the liquor interests are none too confident of what would happen if there was a state wide vote on the question, and they are not likely to demand such a thing. The result will be a continuance of the piecemeal agitation, and several counties will vote on prohibition next spring. Among them it is said that there will be two upper peninsula counties, Chippewa and Dickinson, and there may be more. The upper peninsula is not a particularly favorable field for prohibition workers. For one thing, the population of the upper peninsula is mostly urban. In large part it is found in cities and villages located at the mines, or depending in large measure on the mines for support. In the urban populations it is usually found that the majority of the voters cast their ballots for the saloons. Nevertheless local option campaigns in the upper peninsula counties would be tremendously expensive for the liquor interests. They would have to expend large amounts of money to combat the vigorous work of the prohibition forces. In the long run it will be cheaper for these interests to disarm the opposition by strictly observing the state laws for the regulation of the traffic.

ANOTHER ROYAL VISITOR COMING.

The people of the United States are to have the opportunity to entertain another royal visitor this summer, the expected guest being no less a personage than Prince Eitel Frederick, second son of the emperor of Germany. The date of his promised visit to this land is not definitely announced as yet, but the kaiser's consent has been given and there is not much probability the plan will be changed, especially as the young prince is said to be eager and enthusiastic over the prospect of a trip to this country, where he anticipates a fine time and a thoroughly enjoyable entertainment. The fact that the German emperor has consented to this program is taken as further evidence that the kaiser is earnestly desirous of cultivating the friendship and good will of the American people, and he doubtless recalls the excellent results along this line that were accomplished a few years ago by the visit of his brother, Prince Henry.

Young Prince Frederick is said to be a fine and manly chap, thoroughly human and likeable, and with good, red blood in his veins. Naturally the kaiser would not send such a distinguished envoy of good will were he not entirely worthy of honor and the delicate responsibilities of the mission. But there are several things about the coming visit that will cause the American people some anxiety. In the first place, the prince is said to be coming to Newport incognito. What sort of attentions are expected to be paid to a prince in disguise? Newport is puzzled, and even that exemplar of social procedure, Harry Lehr, is fairly stumped. A prince's coming is in itself a truly prostrating event to the society leaders, but when it is complicated with a blinding incognito they may be pardoned for making signals of distress. Our diamond-laden social set is willing—nay, exceedingly anxious—to show the prince a measure of hospitality that will certainly stop over, but what can it do for a prince incognito? It will be remembered that high so-

ciety went hysterical when Prince Henry came to see us. How that polished gentleman and traveler must have smiled in his sleeve at the antics of some of our people—and how he must have scowled at the conduct of others. The souvenir hunters, for instance, swarmed over his ship and carried away everything that could be lifted without the aid of a steam capstan. Rude American youngsters ran in front of him on the streets and bawled: "Hello, Hen, how's Bill!" Smirking dowagers, staggering under ropes of pearls, stepped on his feet in awkward attempts at rising to the social occasion.

It will be a fine thing to welcome the son of the kaiser. We should like to have him see our great cities, ride over our beautiful country and observe the real and genuine character of the American people. But it should be done rationally and in a modest and decent way. A quieter hospitality would be more to the prince's liking, no doubt, than the riot of receptions which staggered Prince Henry. We should get used to royal visitors and treat them as human beings whose bodily comfort and peace of mind must be considered. Prince Frederick should be welcomed, by all means, as a high-born German gentleman entitled to respect, but not deserving the bombastic adulation usually accorded royal visitors in this country.

WRITERS IN GOVERNMENT POSTS.

Chauser and Dryden Customs Officers—Lucky Posts and Novelists.

When Robert Burns was driven by the expense due to an increased family to apply for government post he thought himself fortunate in obtaining the billet of excise man. Not that he was blind to the disadvantages of the position.

"The worst circumstance," he wrote, "is that the excise division which I have got is so extensive—no less than ten parishes to ride over—and that it abounds, besides, with so much business that I can scarcely steal a spare moment." In return for the strenuous and almost unceasing toil involved in his official duties the reward was £50 a year.

From the very dawn of English literature the state has not been averse to show itself the patron of literary merit, and this apart from the laureateship, honorable but meanly paid. Causer held many offices about the court and under government, and was more actively engaged in public affairs than any poet of celebrity since his time. It is true that he started in a sufficiently lowly fashion. Appointed comptroller of the customs of London, he was obliged to keep the books and fill in commercial documents with his own hand. William Morris, in "The Earthly Paradise," tells of—

"The clear Thames, bordered by its gardens green.

While near the thronged wharf Geoffrey Chauser's pen Moves over bills of lading.

Better times were in store for the father of English literature. In due course he was promoted to be comptroller of petty customs and more than once took a distinguished share in embassies and other diplomatic missions.

Chauser's first great literary successor, Edmund Spenser, attained to an eminent position in the court of chancery. Milton rose still higher, when he secured his appointment to the post of foreign or Latin secretary to the council of state under the commonwealth. Even the lowly eyesight did not involve the loss of this position.

"I've always thought I'd like to be an actor, but it must cut in on one's evenings frightfully."

For three weeks there was no pay and it may be that after the four, six or eight weeks of unpaid work the production will fail in a week, fail perhaps if the manager is untrustworthy, without salaries for even that week.

This fate doesn't always affect only the actors of lesser class. One of the best known of American character actors a man who has had prominent parts in a number of successes, spent practically an entire winter in unpaid rehearsal some two or three years ago. He appeared in four successive productions, each elaborate, but each destined to a run of not more than two weeks. If his salary had been \$150 a week he could not have earned much more over \$600 or \$750 for that season's work—and there are fifty-two weeks of board to be paid.

Physicians call kidney trouble Nephritis. This means inflammation of the kidneys.

The old diuretics (kidney medicines) are kidney excitants. No wonder the kidney deaths have doubled.

Fulton's Renal Compound is the first successful kidney emollient, thus reducing kidney inflammation and controlling kidney troubles that have resisted all known treatment, as in the above Salt Lake case. Literature mailed free.

JOHN J. FULTON, Cal.

In fact an actor getting say \$50 a week, which seems a good salary to the clerk at \$25 a week, counts himself very lucky if he works forty weeks a year.

position, for with him was associated as colleague another well-known poet, Andrew Marvel.

At the restoration of Charles II. Milton remained true to his commonwealth ideals. Not so John Dryden. Only two years after his verses in praise of Cromwell Dryden welcomed Charles II. with the poem "Astraea Redux," and in due course, in recognition of his royalist writings, was granted the post of controller-general of estates, an almost identical office to that enjoyed by Chauser.

Asked to celebrate the Battle of Blenheim Joseph Addison was made commissioner of appeals in the excise and afterward, as reward for his resultant poem, "The Campaign," obtained the post of under secretary of state. He became successively secretary to the lords justices, who administered the government until the arrival of George I., a commissioner for trade and the colonies, and finally secretary of state.

Deioe, the author of "Robinson Crusoe" Sir Richard Steele, as an essayist second to none, and Fielding, whose "Tom Jones" still ranks among the best novels in our language, were all recipients of government posts, which in some cases proved to be of a very lucrative nature.

James Thompson, famous as the author of "The Seasons" and of the song "Rule Britannia," was made governor of the Leeward Islands. The sequel is curiously true. From time to time he worked and after paying him cleared \$300 a year from his governorship. As he was also in receipt of a pension he was able to spend the last years of his life in ease, in happy contrast to poor Robert, who weighed down by sickness, debt and disappointment, dying with a curse upon his lips.—Tit-Bits.

WOMEN WEAR TROUSERS.

Even Blushing Brides Wear Garments Usually Worn by Sterner Sex.

Among the curious communities of the world, that of Valais, a beautiful canton of Switzerland, certainly ranks as one of the most peculiar and interesting. It provides a delightful picture of topsyturvydom. From time to time the women have worn the trousers and performed the manual labor of the field, while their lords and masters lounge their days away in ease.

What is more, the women are quite content with this inverted order of things, and are perfectly satisfied if their husbands brew the herbs, fry the meat and look after the baby, while they wrestle with the sterner duties of field and stable.

And not only do the women of Valais work in the fields or tending the cattle, but also on Sundays and fete days. They have better looking ones for these occasions, I must confess, but they have no hankering for the trammels of skirts, even during their courting hours.

They are highly particular about the pretty girls sauntering along the picturesque trails with their sweethearts' arms around their waists, looking to the casual stranger for all the world like two young men gone "loony."

One can scarcely imagine a wedding party with the bride groom dressed in the same kind of garments, but I have seen one in the mountains, when the bride wore a white bodice, white trousers and a bunch of white violets in her hair. She was as pretty as a picture, and, despite the attire, and quite as blushing and shy as any bride out of a convent.

The working day trousers are of the "home-made" variety and by no means becoming. Often they are so long and baggy that they seem almost as cumbersome as skirts would be. The most amusing part about this working costume is that the upper part remains feminine, being the ordinary rough bodice of the peasant woman, often in bright colors of red or blue.

And, in spite of their familiarity with trousers, the women of Valais do not walk or sit in a masculine manner. Any one can see at a glance that they are women in men's clothes. They always sit sideways on horseback, and get over fences by first mounting to the top rail and sliding down, woman fashion, instead of striding over man fashion.

Another feminine absurdity is the wearing of a long sort of toga, which trails down their backs and gets in the way whenever they bend over or go through the tangles of the mountain woods.

"Why don't you wear a cap or small felt hat like the men?" I asked an old woman once.

"We have always covered our heads so," was her explanation—an explanation, in her opinion, that was all-sufficient; peasants from one generation to another do everything simply because their forefathers did the same.—Wide Magazine.

BAD SIDE OF THE ACTOR'S JOB.

In a newly imported musical comedy the chief comedian soliloquizes for a time on the advantages of a stage career and concludes:

"I've always thought I'd like to be an actor, but it must cut in on one's evenings frightfully."

FROM HERE Throughout the entire length, from end to end La Verdad Cigars are composed of long, choice Havana—the best grown. A cigar costing a dollar can not be any better. Vuelta Abajo tobacco and skilled Cuban or Spanish hands combine to make a cigar that is the La Verdad. The taste of every smoker can be satisfied with the La Verdad. They are made in 37 shapes and sizes ranging from 2 for \$20 to 500 each. The quality is the best possible at the price. Ask your dealer for LA VERDAD. Ron-Fernandez Cigar Co. Duluth and Tampa.

M. C. SCULLY, Agent, Marquette, Mich.

ciety went hysterical when Prince Henry came to see us. JOHN J. FULTON, Cal.

In fact an actor getting say \$50 a week, which seems a good salary to the clerk at \$25 a week, counts himself very lucky if he works forty weeks a year.

Plan for Summer Comfort Don't add the heat of a kitchen fire to the sufficient discomfort of hot weather. Use a New Perfection Wick Blue Flame Oil Cook-Stove and cook in comfort. With a "New Perfection" Oil Stove the preparation of daily meals, or the big weekly "baking," is done without raising the temperature perceptibly above that of any other room in the house. Another great advantage of the NEW PERFECTION Wick Blue Flame Oil Cook-Stove is its handsome CABINET TOP, which gives it every convenience of the modern steel range. Has an ample top shelf for warming plates and keeping cooked food hot, drop shelves for holding small cooking utensils, and is even fitted with racks for towels. Made in three sizes, and can be had with or without Cabinet Top. If not at your dealer's address our nearest agency. The Rayo Lamp gives perfect combustion whether high or low—is therefore free from disagreeable odor and cannot smoke. Safe, convenient, ornamental—the ideal light. If not at your dealer's address our nearest agency. STANDARD COMPANY (Incorporated)

Indeed if he works thirty he is well off; and the \$50 must spread over a year!

Clothes are another problem. The general custom of the business is that the manager shall provide only costumes; that is, anything that is not modern dress. Suppose a production calls, as is not uncommon, for a business suit, a frock coat and a suit of evening clothes. All or part of these may have to be purchased for shabbiness is a cardinal offense. In one musical play produced not long ago the juvenile is called on to appear in the first act in a suit of white flannels, useful garments for a somewhat needy actor. Nevertheless they're not a costume and he must buy them himself.

The women of the chorus are in even a worse fix, for their salaries are smaller to begin with—\$20 a week in New York and \$25 on the road being large. In fact, \$18 and \$20 is all that some of the most liberal of the managers give.

These young women, however, have to buy their shoes and stockings and often many other things. Wigs for example are an added expense in some houses. It is told of one famous Broadway theater that at the start of an all-season run each chorus girl was in debt to the manager \$20. In another case high boots at \$20 a pair were ordered for a particular long song and charged to the women singers. The song was dropped after one act. These are unusual examples, but it is not unusual for \$5 a week to be deducted from the \$20 pay for a period of three, four and even five weeks.

Women principals sometimes face startlingly heavy bills for their dresses, all of which, except costumes, they provide for themselves, and even a salary high in the three figures isn't available in a few weeks if the dressmaker's bills are to be paid.—New York Sun.

UNDERGROUND WATERS.

One night a professor of mathematics was at work in his little study looking over the lake at the University of Wisconsin. He was a theorist, whose main interest in life was the speculation as to what a particular sort of curve will do if it ever encounters another particular sort of curve on a dark night somewhere just this side of infinity.

And his name, not unknown among other such theorists, was Charles Emmet Slichter.

To him, thus studying the manners and customs of irrational curves, came another professor, from the agricultural department of the same university, one C. I. King. He, too, had his hobby and it was the study of academic particles of soil under the influence of academic particles of water. What King wanted to know from Slichter was the precise mathematical formula, for determining how much water would reach an acre of potatoes in the northwest forty, when one inch of rain fell on the 560 acres just north of your farm; and similar problems.

The first thing a bona fide, anti-Bardic theorist does when he is given a new problem is to find out what the Germans have done. Slichter looked up what the Germans had done and he was very much pained to find that they had done very little. He couldn't even agree with their estimate of the amount of water that was under the earth, in the first place. He corrected that amount until he brought it around to a neat 500,000,000,000,000 cubic yards—one-third the volume of all the waters in all the oceans on the surface of the earth.

But that was merely a spin up a silken thread. The real road was following led to an introduction and possible acquaintance with those millions of millions of cubic yards of water that had been hiding themselves in places like California, and Kansas, and Colorado, so successfully from man.

Of course he did not know it himself at that time. He did not guess it at all.

A CONDOR WITHOUT A MATE.

For the killing of a condor, one of the rarest birds now in existence in North America, Deputy Constable P. L. Wallis of Pasadena was halted before Justice Summerfield recently. To Game Warden W. B. Morgan Wallis said that he had shot the bird by mistake, thinking it a bald eagle. Eagles are also protected by law. "We are going to ask the court to impose a heavy fine," said Morgan. "The way people have been killing off these great birds is a disgrace. Six years ago there were seven condors in Satan's Crag. Today there is only one, the mate of the bird that Wallis shot. I saw it yesterday watching from a lonely night for the companion that is gone. People who have visited the canon since the female bird was shot say that the living bird flies low to the ground and swoops near to every person, so anxious is he to find his mate."—Los Angeles Times.

Can't Empty the Ocean

Andrew Larsen of Sorensen & Larsen, merchant tailors, of Salt Lake City, was so low with kidney disease that he was in bed and death was looked for almost daily.

The treatment was changed. He began to mend. His partner phoned the doctor he was slightly better. The doctor replied, "It makes no difference. It is impossible for him to recover as it is to empty the ocean."

The progress was so slow that the patient would get discouraged and read our book for a brace. He says he thinks he read it a hundred times. But the day he finished the third dozen he was back to business. Wonder what his physician thinks about emptying the ocean.

Physicians call kidney trouble Nephritis. This means inflammation of the kidneys.

The old diuretics (kidney medicines) are kidney excitants. No wonder the kidney deaths have doubled.

Fulton's Renal Compound is the first successful kidney emollient, thus reducing kidney inflammation and controlling kidney troubles that have resisted all known treatment, as in the above Salt Lake case. Literature mailed free.

JOHN J. FULTON, Cal.

In fact an actor getting say \$50 a week, which seems a good salary to the clerk at \$25 a week, counts himself very lucky if he works forty weeks a year.

When the blood becomes infected with the virus of Contagious Blood Poison, the symptoms are soon manifested. The mouth and throat ulcerate, copper-colored spots appear, a red rash breaks out, the hair begins to come out, and usually sores and ulcers show themselves on different parts of the body. At the first sign of the disease S. S. S. should be taken, for the trouble is too powerful and dangerous to trifle with. If allowed to run on the tendency is to work down and attack the bones and nerves, and sometimes it makes a complete physical wreck of the sufferer. The disease can make no such headway if S. S. S. is commenced and used according to direction; its progress can be stopped, the poison removed, and health preserved. S. S. S. goes into the blood and removes the insidious virus, cleanses the circulation and makes a complete and permanent cure by driving out the cause. S. S. S. quickly takes effect on the blood, and gradually the symptoms disappear, the health is improved, the skin cleared of all spots, sores and blemishes, and when S. S. S. has thoroughly purified the circulation no trace of the disease is left. S. S. S. is a purely vegetable remedy, cures Contagious Blood Poison because it is the greatest of all blood purifiers, tested and proven for more than forty years. Home treatment book and any medical advice

Copper Country

GOOD FRIDAY CELEBRATIONS.

Quincy and Trimountain Sons of St. George to Observe the Day.

The custom of observing Good Friday as a sort of civic holiday will be observed in the copper country today. The principal celebrations will be by the Sons of St. George at Quincy and Trimountain. In each place there will be a parade, a religious service and a social gathering in the evening.

The evangelical churches of Houghton and Hancock will unite this morning in a Good Friday service at the Hancock M. E. church. Rev. John M. Linn, pastor of the Houghton Presbyterian church, will preside.

Commencing yesterday the Catholic churches of the county are carrying on four days of important religious services, in accordance with the customs of holy week. Generally throughout the county the churches are recognizing Good Friday in some manner and are all planning special services for Easter Day.

A musical program will be given at the Centennial M. E. church tonight.

FIVE SALOONISTS ARRESTED.

Deputy Sheriffs Vivian and O'Connell Return from Kenton.

Deputy Sheriffs Vivian and O'Connell returned last night from Kenton, bringing with them five saloon keepers arrested on complaint of former Supervisor William Kroll. They are charged with selling liquor on election day. The men will be arraigned today before Justice Brand of Houghton.

Mr. Kroll declares that he will keep after the Kenton liquor dealers if they do not rigorously obey the saloon laws of the state. He will let no opportunity pass to make it interesting for them. The former supervisor is the head of the Sparrow-Kroll Lumber company at Kenton, and he says that the saloon there have cost him \$25,000 since the mill was established. This injury comes through mill hands getting drunk at night and being unable to do their work properly the next day. Such a condition will not be possible in Kenton in the future, as Mr. Kroll is going to insist on the enforcement of the 9 o'clock closing law of the state, such a law being applicable to townships.

ARRESTED AS EMBEZZLER.

Calumet Hotel Man Has Unpleasant Experience in Duluth.

To be arrested by an amateur detective as an embezzler and locked in jail was the unusual experience enjoyed by a man in the vicinity of the lumber town of Duluth, Evening Herald. Mr. Loch was in Duluth attending the initiation ceremonies held by the Knights of Pythias. He determined to visit Cleopatra, while he was in the vicinity of the lumber town, and look up an old friend. He registered at the Northern Hotel and last night noticed that a man was following him wherever he went. He gave the matter little thought, however. This morning as he left the hotel he noticed a man looking at him, he noticed the same man.

The stranger finally approached Mr. Loch and asked him if he would mind taking a walk down to the office, as he, the stranger, would like a word with him. Mr. Loch consented, as he was by this time interested, and wished to find out what the game was. When they reached the office, Mr. Loch discovered that he was on the inside of the police station. He rebelled when the stranger invited him inside, and made it plain that the place did not look at all good to him. The stranger insisted, however, and Mr. Loch was behind the bars.

It seems that the Cleopatra police were looking for an embezzler. There is a reward of \$500 for his arrest, and Mr. Loch was unfortunate enough to look like the chap with the money on his head. The right man and a mark on his arm, and as Mr. Loch had no such mark, he was soon allowed to go. The story was too good to keep, and his friends are today having no little fun with the Calumet man.

NEW CONSTITUTION SUGGESTED.

Houghton County Anti-Tuberculosis Society Plans Change.

A change is proposed in the manner of conducting the affairs of the Houghton County Anti-Tuberculosis society, and at the next regular meeting in May the question of adopting a new constitution and by-laws will come up. Dr. Hubbard, president of the society, has had printed a number of copies of the proposed laws and they are being distributed to the members.

The new laws will provide for one regular meeting per year, the annual meeting, so that the members may not consider they are obligated to attend such occasional meetings are called. The affairs of the society will be conducted by the officers and a board of directors, together with five committees and an advisory board. These officers and committees will administer the affairs of the society and keep the members advised of the progress of the work. It is proposed to have at least 3,000 members and it is manifestly impossible to bring out even a small proportion of these to regular monthly meetings, which is one reason for the change.

The society has placed on sale in the county one star stamps for the benefit of the state society.

PROPOSES WATER METERS.

Laurium Council Believes They Would Increase the Revenue.

The Laurium council is seriously considering the adoption of the meter system in its water works department. At present the village is selling water at a flat rate and the revenue is not commensurate with the cost. In common with other Calumet municipalities, Laurium secures its water supply from the Calumet & Hecla plant and pays that company approximately \$24,000 a year for water for all purposes.

On commission has figured it out that meters will increase the revenue about 40 per cent, based on the present wasteful use of water. Of course they would compel a more conservative use of the indispensable fluid, but they would undoubtedly bring in more money. And a saving in water consumption would be appreciated by the company, as its plant is now delivering water up to its full capacity.

CLEARING UP AFTER STORM.

Manager Forbes of the Telephone Company is Working Rapidly.

The forces of the Michigan State Telephone company were centered at Lake Linden yesterday, clearing up the damage after the storm of Tuesday night. Today an effort will be made to restore business telephones all over the county and residence telephones will be taken up later. The havoc caused by the storm to the telephone and telegraph companies was widespread, but the repair work is going forward rapidly. Manager Forbes yesterday made a tour of the county to survey the damage to the service resulting from the storm. He found the damage widespread, but says that it is not as bad as the effects of the storm of two years ago and that the service will be completely restored with reasonable speed.

There were four hundred telephones out of commission in Houghton and seventy-five in Calumet. Fifty poles were broken down between Hancock and Lake Linden, and Lake Linden was shut off entirely from telephone or telegraph communication. Poles were broken down at various places in all directions from Houghton, and the service was demoralized, though last night it was working order to an extent to greatly relieve the situation.

HOUGHTON-HANCOCK MERCHANTS.

Meeting Called for Next Tuesday Night on Closing Matter.

A meeting of the business men of Houghton and Hancock was called for next Tuesday night at the Hotel Scott, Hancock, for the purpose of discussing the petition recently addressed to them by their clerks and teamsters. The latter ask that the stores close at 6 o'clock three nights in the week throughout the year, offering as a reason their long hours of labor and the fact that they are the only class of workers who have to work nights. Some of the business men favor the plan while others look now as though the plan would be adopted.

At this meeting preliminary steps will be taken toward arranging for the merchants' annual picnic. This picnic was established as an annual institution three years ago and this far it has been given at Freda Park, but some change may be made this year for the sake of variety. W. B. Hoar of Houghton, who usually takes the initiative in matters affecting the merchants as a body, recently made an effort to change the Calumet excursion steamer Theodore Roggevelt for the purpose of giving the clerks an excursion, but could not make the arrangement. The steamer is chartered for two excursions early in the summer by a Lake Linden organization, one trip to Port Arthur and the other to Marquette, and it blocked the scheme of the Houghton and Hancock merchants, thinking it would affect the revenue it expects to derive.

APPLY FOR NATURALIZATION.

Eight Additional Aliens Petition for Hearing in Court.

County Clerk Richardson yesterday filed the petitions of eight applicants for full naturalization. The usual questions as to nativity, residence, date and port of arrival are answered in the following list: Edward James Waters, England; Calumet; New York, June 28, 1886; Edick, Johan Dahl, Sweden; Calumet; New York, July 13, 1888; Edward Bolifio Pengelly, England; Calumet; New York, July 29, 1900; Henry Lobb, England; Laurium; New York, May 14, 1889; Alfred Jane, England; Calumet; New York, June 18, 1883; William Toague, England; Calumet; New York, July 26, 1896; Onesiphore Bilodeau, Canada; Calumet; Port Huron, Nov. 3, 1885; Edwin John Williams, England; Calumet; New York, April 24, 1892.

FIREMEN'S ANNUAL ELECTION.

At the annual meeting of the Houghton fire company, held Tuesday evening, the following officers were elected: President, Theodore Siblsky, vice president, Frank Hannon, recording secretary, M. A. Kaiser; financial secretary, Frank Walter; treasurer, Nicholas Fink; chief, Charles Cosby; foreman, Theodore Siblsky; assistants, Charles Walter, John Rinn, Frank Walter, M. A. Kaiser, William Singerson; hook and ladder foreman, John Minzhger; fireman of engine, Frank Hannon and Nicholas Fink; steward and manager of hall, Clarence Walters; manager of park, Herman Staats.

Following the business meeting the company enjoyed refreshments and a social session at the steward's quarters.

In 1907 Great Britain furnished 30,000 bicycles to Japan, and in addition \$270,000 worth of parts, while the United States furnished 3,218 bicycles and \$178,000 worth of parts.

The transatlantic telephone takes any body's word, after the coin has dropped.

"What shall we have for breakfast?" "Why Cudahy's Peacock ham and eggs of course; they are always acceptable especially at this season of the year." (7-29-0)

GENUINE "BULL" DURHAM SMOKING TOBACCO

RULES ARE RIGID THIS YEAR.

What Uncle Sam Expects the Owners of Motor Boats to Do.

People who run launches in copper country waters and better be careful this summer for Uncle Sam is going to see to it that all the rules and regulations are obeyed. Here are the orders one must comply with in order to keep out of trouble with the government:

1. Whistle and Bell—All motor boats without regard to size or use, must be provided with an efficient whistle or siren, and an efficient bell. No size or style of bell is prescribed provided it is audible and sufficient for the use for which it is intended. The word "bell" must be taken in its ordinary sense considered with reference to the object intended by the provisions in which the word appears, namely, the production of certain signals. The power to operate the whistle is not prescribed, but the whistle is to be of such character as to be heard in ordinary weather at a distance of at least two miles.

2. Lights—When navigating between sunset and sunrise they must carry regulation lights, namely:

1. A bright white light in the fore-part of the vessel.

2. A green light on the starboard side, and a red light on the port side, provided with proper screens. The side lights may be so affixed to the cabin or to the sides of the deck house as to be properly screened, provided the lanterns be backed with metal. When the green and red side lights cannot be fixed they must be kept lighted and ready for use provided by Rule 8 of the act of February 8, 1895.

The law does not appear to permit the use of a three-color "combination" light. Copies of Rules—Such vessels are also required to have on board two printed copies of the rules which must be observed by them, which rules will be furnished by local inspectors of steam vessels on request.

Life Preservers—All such vessels under fifteen tons engaged in carrying passengers for hire, in addition to the equipment above stated, are required to carry one life preserver for each passenger carried and shall be operated only in charge of a person duly licensed by the local inspectors of steam vessels. Such vessels, when used only as private pleasure boats and not at any time engaged in the carriage of passengers for hire are not obliged to comply with the provisions of the law in regard to life preservers and licensed navigators. (The life preservers must be of the sort prescribed by the regulations of the board of supervising inspectors.) They must bear the United States inspectors' stamp.

Documents, Inspection, etc.—All motor boats of over five net tons engaged in the carriage of freight or passengers for hire must be documented, viz.: Licensed by the collector of customs. (Vessels under five net tons cannot be documented in any case). The license of the vessel obtained from the collector of customs (designated a document) is additional to and must not be confounded with the license required for the operator of a motor boat of less than fifteen tons carrying passengers for hire.

Motor vessels of over fifteen tons engaged in the carriage of freight or passengers for hire must also be inspected by the United States local inspectors of steam vessels.

Documented vessels must have name and home port on stem and name on each bow. Official measurement is necessary only in case of vessels requiring to be documented.

COPPERDOM BREVITIES.

A meeting for the formation of a Houghton and Keweenaw cricket league will be held in the Northwestern Hotel, Hancock tomorrow.

An aged inmate of the Houghton county infirmary on Wednesday attempted to convert a dynamite cap into a pipe ferret. He lost only a part of one finger, but his feelings were pretty badly hurt.

Hon. Jos. W. Folk, former governor of Missouri, will lecture at the Keweenaw theater tomorrow night on "The Era of Conscience." He comes as the closing number of the Grace M. E. church Y. eum course of Houghton.

The following officers have been elected for the coming year by the Ontonagon Yacht club of Houghton: Allan P. Rees, commodore, reelected; directors,

Deen L. Robinson, Norman W. Haire, John H. Rice, John C. Pryor, W. Corbin Douglass and S. J. Bowden.

Pat Huggins, the colored miner from Boston, is serving a ninety-day sentence in the county jail. He beat his wife and another woman and a man, stole a child, was drunk twice and was still belligerent on Wednesday, so Justice Oliver of Hancock threw him into the clank.

The senior class of the Michigan College of Mines has decided upon April 22 as the date of holding the annual class banquet. The commencement exercises will be held April 12 and were it possible to detain Itham G. Randolph of Chicago, the commencement orator for an extra day the banquet would be given the next day. But as Mr. Randolph must return to Chicago directly after the commencement exercises the seniors have chosen April 22, the eve of the spring vacation opening.

Mining News

GIROUX CONSOLIDATED.

In his annual report, President J. L. Giroux of the Giroux Consolidated Mines company reviews the growth of the company and the developments to date. He says: A bond issue of \$1,500,000 was authorized at the last annual meeting, which was to bring in the Steptoe waters to the mine and to put the property upon a productive basis. This issue was offered to the stockholders for subscription in March. Less than \$500,000 of the bonds were subscribed, making it necessary to seek elsewhere for the money. It was not until October that a part of the issue was successfully placed and the company enabled to proceed with its plans. Mill operations were commenced in November. The crushing machinery proved inadequate. Additional Chilean mills and rolls were ordered, which to bring the mill up to its full capacity. The Alpha shaft was continued to the 1200-foot level. The flow of water increased with depth. The waste was sunk on the ore body which will follow the ore, which proved irregular of this dip, but shows a width around 100 to 150 feet, maintaining its high-grade copper values for a distance of 140 feet. Early in January a crosscut, driven to intercept the waste of the ore body, penetrated a body of massive copper ore and was followed immediately by a large inflow of water, indicating that the ore body was close at hand.

At the close of the year a proposition was made to the directors to purchase the company's Nevada property for \$6,000,000, which offer was declined. This was followed by the purchase of a large tract of mineral lands, comprising the Sultana and the San Jose groups. The ores of the Sultana group are gold and copper, while those of the San Jose are strictly copper-bearing. We have derived more than \$500,000 from the upper or oxidized portions of the vein in ore shipments to the smelters at El Paso. We have expended about \$450,000 in the development and equipment of these properties. With sufficient capital these Mexican properties can be developed into great magnitude which will compare favorably with the company's Nevada property when conditions of transportation and equipment have been worked out.

TAMARACK.

Operations of the Tamarack Mining company for the year 1908 resulted in a total deficit for the twelve months of

\$235,006, which increased the floating debt to \$272,706. This floating debt does not take into account assets in the form of securities of other companies and certain number bonds amounting in all to \$730,000, which brings up the assets in excess of liabilities to \$477,336. In view of the facts that Tamarack has had a very hard time since the fire in 1905, its showing since that period has been fairly reasonable. During the four years the company has paid \$850,000, or \$14 a share in dividends. Manager Haire states in the report that the deficit from last year's operations was the result of forced changes in mining methods, and he said recently that the mine was now getting in a position where the copper in the lower levels can be taken out at a profit. That the mine is gradually getting back to a more profitable basis is shown by the increase in production. In 1906 the output of mineral fell off 10,000,000 pounds to 14,800,000 pounds. In 1907 it was increased to 11,078,004, and in 1908 added 2,000,000 more. Although the pounds of copper per ton of rock have fallen off in the same period 2.5 pounds—it was 19.6 pounds in 1908—the percentage of copper in the mineral has increased about 3 per cent to 66.93 per cent. Recovery of refined copper has gone up 3,000,000 pounds since 1906. A review of costs per pound shows that with the greater depth of the mine costs have gone up. In 1904 Tamarack's total cost per pound was less than thirteen cents, and the cost at the mine under eleven cents. In 1905 the cost moved upward, until in 1907, the total figure was close to seventeen cents. In 1908 the cost was reduced 1.22 cents to 15.24 cents per pound, the bulk of the reduction being in the cost at the mine. Mining and stamping per ton of rock stamped at \$2.57 was the lowest since 1905. Tamarack's small capitalization of 60,000 shares enables the company to pay a large dividend on a small surplus. At a fifteen-cent and a sixteen-cent copper market the earnings on 13,000,000 pounds of copper would equal nearly \$2 per share, and about \$2 added for every cent advance in the price of the metal. An asset which makes for the future development of Tamarack is the Cliff branch and the work done on this property last year at a cost of \$50,000 shows that the management has gone after its values.

GREENE CANANEA.

With an even 2,000 tons of bullion turned out in March, the Greene Cananea Copper company made a record production of copper for a single month—4,000,000 pounds, comparing with 3,848,000 pounds in January. The gold recovery amounted to 540 ounces, against 512 ounces in the preceding month, while the silver recovery was 90,000 ounces against 85,000 in February. The Colorado management has not yet had the Greene properties in continuous operation for a full year. Since the smelter was blown in last July a total of 30,000,000 pounds of copper has been produced at an average cost of approximately 10 1/2 cents after crediting gold and silver values to operating expenses. Although the company has spent many thousands of dollars upon the Greene Consolidated and Cananea Central properties, which comprises the main subsidiaries, the management has not yet completed its extensive program of improvements which has been under way ever since Messrs. Cole and Ryan took over control from Colonel Goetz. At the present time a considerable amount of work is being done at the property, a portion of which is charged to the cost of production and the balance to construction account. In all, it is estimated that the expense of the improvement work now going on is equal to one cent per pound of copper now being produced. Much of this construction work will be out of the way by the end of June, when the present cost of production will be still further reduced. The average cost per pound for the period ending with December 31 last was 10 1/2 cents, and this has been somewhat improved upon since the commencement of the new year.

UTAH CONSOLIDATED.

The annual report of President Urban H. Broughton of the Utah Consolidated Mining company states that development at the mine are satisfactory. The amount of sulphide ore in sight is 1,487,218 tons, or an increase of 254,284 tons over March, 1908. There were mined and shipped 248,213 tons of sul-

phide ore, the product of which was 10,788,473 pounds of bullion, which, when refined, yielded 1,048,240 pounds of silver and 25,440 ounces of fine gold. The low price of copper and silver, the penalties in connection with the smelting toll, the heavy expense during the period of non-production and two months' lack of production the report states, have seriously affected the company's earnings. The smelter and railway at Toole are now under construction, and will be ready to receive ore at the expiration of the company's contract with the Garfield Smelting company, in April, 1909. At the mine is in a position to output 1,000 tons a day it will do so when its ores can be shipped to Toole, which will give the company an increase in earnings by saving in its transportation and smelting charges of \$36,000 per annum as compared with costs under existing conditions. The net profits for the year of \$526,212 were equal to \$1.08 per share on the company's capital stock, out of which and the accumulated surplus \$600,000, or \$2 a share, was declared in dividends. The balance sheet shows cash at banks and on hand of \$16,886 and stocks of copper bullion and supplies on hand totaling \$1,071,214.

ENDS A BITTER STRUGGLE.

Dispensary Case Decision a Victory for South Carolina's Commission.

Washington, April 8.—As already reported in these dispatches, the famous South Carolina dispensary case, involving the disposition of about \$900,000 of dispensary funds held by the state dispensary commission, was decided by the supreme court of the United States in favor of the commission, the opinion being by Justice White. The decision brings to a conclusion a case which has involved a struggle in the state between the forces of corrupt politics and of reform. The dispensary was the pet scheme of Senator Tillman, and was fastened on the state while Mr. Tillman was governor in 1893. It has been constantly charged that the dispensary was the source of "graft" for the professional politicians of the state, but the facts in the case did not come out until 1907, when the institution was done away with. The books showed that the state paid from 25 to 75 per cent more for liquor than the catalogue prices. For example, ordinary whisky which costs \$8 a gallon in any grocery was billed to the state for \$12; St. Julian claret, worth \$4 a case, at \$6.75; Bass ale, usually sold for \$1.67 a dozen, was billed at \$2; bottled cocktails cost the people of South Carolina \$8.50, when they were advertised for \$9.49, and so on. In the settlement of accounts the dealer almost invariably submitted to a retention, and several of them frankly explained that the excess was required for commissions to politicians who secured them to the trade. The dispensary law was repealed in February, 1907, in the face of the strong opposition of Senator Tillman, and a new law was passed giving the several counties the right to choose between the alternative provisions set forth in the constitution. They can now either prohibit the sale of liquor entirely, or they can have county dispensaries purchase their own liquor and handle it on their own account through a board appointed by the governor.

NOTES OF COPPER NEWS.

Michigan is opening ground of exceptional richness in the so-called B workings at the east end of the mine. The drifting discloses stamp rock equalled by few mines in Ontonagon county, with the possible exception of the Lake mine. The lode is twelve feet wide and apparently of more than ordinary promise.

Good reports continue to come from the Colorado mine of the Davis-Daly Copper company, and the latest is to the effect that the crosscut west on the 1400-foot level has penetrated the Baltic vein a distance of about thirty feet, revealing fifteen feet of ore that will run about 4 per cent in copper and carry some silver values. The hanging wall has not yet been reached, but the vein filling continues to show good mineralization.

During March the two Ely copper producers, Nevada Consolidated and Cumberland-Ely, shipped 3,865,259 pounds of copper, or nearly 100,000 more than they had in February. Nevada Consolidated, 2,169,988 pounds; Cumberland-Ely, 1,695,271 pounds. It is apparent from the above figures of output that these Ely producers are now outputting copper at the rate of 45,000,000 pounds per annum and this output should steadily increase above this figure.

It is quite apparent that the directors of the Tennessee Copper company do not intend to declare a dividend covering the last six months' operations. The last dividend was \$1.25, paid in September last. Since June, 1906, the company has paid dividends semi-annually and by the establishment of this precedent a payment was expected last month. A director of the company says: "A dividend on Tennessee Copper is not necessarily due at this time; for we have never attached any designation to our former declarations of dividends, and it would be considered semi-annual disbursements." He adds the company has paid \$107.5 per share.

B. B. Thayer, of the Amalgamated Copper company, says: "We have heard much of the large increase in copper production, but with the many new sources of outlet, there is no danger that production will continue in excess of consumption for any great length of time. The railroads will constitute one of the great sources of future copper consumption. Plans under way for the electrification of railroad terminals will require hundreds of millions of pounds of copper. It will not be a great while before

City Brevities

Today's weather. Partly cloudy; stationary temperature.
Yesterday's temperatures: Seven a. m., 30 degrees; noon, 30; 7 p. m., 25. Maximum, 31 degrees; minimum, 24.

A son was born to Mr. and Mrs. C. A. Desjardins Monday.

L. L. Wright, of Ironwood, was in the city on business yesterday.

Mrs. Charles Richardson has returned to the city, after a visit with her sister in Duluth.

Fred Thoney and Timothy Foley leave today for West Baden, where they will spend a few weeks.

Dr. E. H. Flynn has returned after spending six weeks in Hot Springs, and other southern cities.

W. H. Schweitzer leaves today for Green Bay and Marinette in the interests of Payne, Wobler & Co.

The Ladies' Aid society of the Methodist church will meet with Mrs. Barry at the Normal dormitory, this afternoon at 2:30 o'clock.

The Ladies' Aid society of the Baptist church will meet with Mrs. Frank B. Spear, Jr., 230 East Ridge street, at 3 o'clock this afternoon.

The Woman's society of the Presbyterian church will meet with Mrs. Grace Hoyt Fraser, 314 East Michigan street, this afternoon at 3 o'clock.

A. O. Jolin and daughter, Miss Francis, will leave next Monday for New York, and will sail for England April 17, where they will visit relatives.

D. M. Philbin, general superintendent of the Great Northern, spent yesterday in Marquette as the guest of W. F. Fitch. Mr. Philbin was at one time general superintendent of the South Shore.

A birthday party was tendered C. C. Van Iderstine, the contractor, at his home on Spruce street Wednesday evening by sixteen of his friends. A picnic supper was served and the evening was pleasantly spent playing bridge and "500."

Frank and Daniel Keough returned from Guelph, Ont., yesterday, where they were called by the death of their father, who passed away April 1, at the age of eighty-five. His sons officiated as pall-bearers at the funeral last Sunday. The deceased had lived in Guelph all his life.

Kennedy Will Erect Stack—E. F. Kennedy will erect the steel stack which was blown down at the powder mill in Wednesday's storm. The new stack, forty-two inches in diameter and eighty feet high, will be in place by Monday.

Impending Couple Married—At the Methodist parsonage last night at 9 o'clock, George Ostlund and Hilda Engstrom, both of Ishpeming, were united in marriage by the Rev. Ames Maywood. The groom is engaged in diamond drill work.

Good Friday Services—This being Good Friday, pontifical services will be held at St. Peter's cathedral, beginning at 9 o'clock with adoration of the cross. At 7:30 in the evening devotional services with the stations of the cross will be observed.

Guild Hall Closed Today—As this is Good Friday, the Guild Hall will be closed all day. The three hours' meditations at St. Paul's cathedral will be conducted by Bishop Williams from 12 to 3 o'clock. Evening prayer will be said at 7:30.

Renewing Ligor Bonds—Marquette saloon keepers are beginning to think about renewing their bonds for another year, and a number already have them ready to submit to the council for approval. The present bonds expire May 1, and new bonds must be approved by the council prior to that time.

Pastor's Memory Honored—The Presbyterian church at Denison, Texas, has erected two tablets in loving remembrance of the late Dr. and Mrs. Henry S. Little, who many years ago resided in Marquette. Dr. Little having been pastor of the Presbyterian church. Dr. Little passed to his reward Aug. 25 last, and Mrs. Little preceded him in death by two years.

Modjeska Here Twice—Madame Modjeska, whose death is announced in another part of this paper, has appeared twice at the Marquette opera house. The first time she carried the title role in "Mary, Queen of Scots," and her second appearance was as Lady Macbeth, in the tragedy of "Macbeth." Her two performances in this city are favorably remembered by many residents.

Purchased Fine House—Francis Moffatt has purchased the residence on Prospect street, between High and Pine streets, which was built by John Robertson last fall. Mr. Moffatt has sold his Michigan street home to F. H. Beagle. The Robertson house, which is now the property of Mr. Moffatt, contains eight rooms and is modernly equipped in every way. It is finished in quartered sycamore oak, with hardwood floors, equipped with hot water heat, electric lights and gas, and is up-to-date in every respect.

Will Be Enjoyable—Bills are out for the grand ball to be given by the Marquette baseball club at Fraternity Hall Wednesday evening, April 14. The complete Peerless orchestra has been engaged and the boys are making extraordinary efforts to make the occasion a big success. Whatever is realized from the ball will be spent in purchasing new uniforms and equipment for the club, of which it is greatly in need. In the past, the team has shown itself worthy of support and now is every indication that it will do equally well the coming season. Tickets are being sold at seventy-five cents per couple, and may be obtained from the members of the club or at Willson's news depot and at Stafford's drug store.

Bible Class Organized—There were over sixty present at the Baptist church last night at the organization of a union Bible study class, among the lines laid down by Herbert Meninger, who conducted a conference at the Methodist church a short time ago. The matter of choosing a leader for the class was left in the hands of the pastors of the churches. Presbyterian and Methodist. The next meeting will be held a week from last night at the Methodist church, when the first lesson will be taken up. The class will meet every Thursday night, and will alternately take the place of the regular Thursday evening meeting in the three churches. Those joining the class were enthusiastic

Salvation Army Notes—The Salvation Army meeting tonight will be conducted by Captain J. Strothede, of Ishpeming, and a few of his soldiers. Captain Strothede is a musician and plays on several instruments. General Wm. Booth, the founder and present general of the army will be eighty years of age tomorrow, and the local corps will celebrate the occasion Sunday with a service at 11 o'clock, at which message from the aged general will be read on the subject of "Faith." In the evening at 8 o'clock Captain Barry will speak on "Our General and His Work." The relief store will be open today from 2 to 5 o'clock, under the direction of Mrs. Lehigh. The bath room will also be open, to use which tickets may be obtained at fifteen cents each. The relief department will gladly receive donations of discarded and second-hand clothing for distribution to the needy. A small charge is made those who obtain clothing from this department, provided they can afford to pay, but if it is found upon investigation that the applicants are destitute, clothing is provided free of cost.

INSURE WITH PETER WHITE & CO.

Upper Peninsula

Escanaba's New Council—The makeup of the new city council that will assume control of Escanaba's affairs as a result of the recent election will be as follows: James Powers, E. W. Wickert, Matt Priestler, J. P. McCall, Paul Jaeger, John Schmitt, E. M. St. Jacques, Dr. Frank T. Long, Cornelius Gallagher, Leonard Garrison, A. J. Valentine, W. D. Mooney and Carl J. Johnson. There are six new members on the list.

Olmsted Will Play Ball—Henry Olmsted, Escanaba's crack baseball pitcher, who was defeated in the election of Monday for the office of city clerk along with Mayor Perron, who was running for a fourth term, will leave within a few days for Denver to join the Western league team of that city. Owner Burke of the team has been bombarding Olmsted with telegrams to return, and the pitcher has wired his acceptance. Escanaba's new city clerk is M. J. Lyons.

Yeomen's State Conclave—The annual conclave of the Brotherhood of American Yeomen, which attracted delegates to Escanaba from all parts of the peninsula and some of the lower peninsula cities, was voted one of the most successful meetings ever held by the order in this state. Through the efforts of Roger M. Andrews, of Menominee, the next annual state conclave was secured for that city. Crystal Falls and Iron Mountain were in the race for the convention. At the election of officers F. A. Bruce of Menominee was chosen state foreman, Adolph D. Dupuis of Escanaba correspondent and Louis P. Allard of Menominee treasurer. The members of the executive board are: Joshua Thomas of Escanaba, John Thompson of Ironwood and W. J. Reynolds of Crystal Falls. F. W. Farmer of Menominee was chosen delegate-at-large to the supreme conclave to be held at Minneapolis June 8, and Roger M. Andrews of Menominee and Henry J. Todd of Escanaba were chosen supreme delegates. Resolutions were adopted indorsing Mr. Andrews as a member of the supreme directorate and his candidacy will be pushed at the Minneapolis meeting.

A stomach specialist recently said: "When the American people learn to drink buttermilk at or about mealtime they will have very much less stomach trouble and rheumatism." (3-15-1m)

The New Back

—You Must Have It to Be Really in Fashion

THE proper figure of today has the new *habit back* and follows the slender, girlish lines of beauty. The hipless effect is more the rage than ever before.

No matter what your figure is, you may further bring out its perfections and hide its small defects by wearing one of the new Gossard models.

No other corset produces the perfect *habit back*.

No other corset provides such a joy to the dressmaker in giving her a perfect figure to fit—such a satisfaction to the wearer in knowing that she is absolutely perfect in contour.

THE Gossard CORSETS
"They Face In Front"

are different from any other corset—because they face in front, and they produce a snug, sloping, unbroken line from hip to limb, without that unsightly cut at the bottom, common with back-lacing corsets.

Madam M. A. Shank who is this week exploiting Gossard Corsets at our store, will prove to you clearly just why Gossard's are different from any other—how they perfectly support the spine—leave plenty of freedom for the vital organs, and produce a correct figure without restricting at any point.

Better come in at once, and let her explain the Gossard to you.

J. H. FOSTER CO.

JACOB ROSE.

THE BOY OF TODAY.

The manly boy wants his clothes to look and fit "just like father's"—no made-overs nor past days' styles for him!

Our Boys' Suits are made "just like papa's"—the same dash and style, same careful tailoring, same dependable fabrics—\$5, \$6, \$7 and \$8—all exceptionally low priced.

Lower grades at \$3.00 to \$4.50.

YOU OWE IT TO YOURSELF

If you were to buy something on installment, of say \$1 or \$2 per week, you could meet your payments. You are able to pay what you owe others, but not what you owe yourself and family. Now, if you could take care of a debt in payments why not take care of a bank book in the same manner?

Start it this week with a dollar or two and figure that you must pay yourself that much each week for your bank account. You'll find that the hardest part of a bank account is in getting started.

We pay 3 per cent interest on savings balances.

MARKETS

NEW YORK STOCKS.

Paine, Webber & Co's correspondent at New York yesterday telegraphed as follows: "It was not expected that the list would display remarkable strength and activity noted during today's session, in view of the triple holiday, but advances were general, except in Amalgamated and a few inactive issues. Pools have been able to finance their operations without difficulty and are therefore quite active in advancing various specialties in an effort to attract outside participation. Wisconsin Central issues have been steadily absorbed on a good scale by investors closely identified with the Canadian Pacific, and the concerted buying movement today revealed small offerings and the very sharp advance was recorded. It is thought that Canadian Pacific control will mean a great deal for the Wisconsin Central in the matter of better management and larger traffic, which is argued will benefit the road to an extent that will make dividends on the common stock a probability in the course of several months. The action of the market is strongly indicative of good control, and barring any unfavorable developments over the holidays, higher prices will undoubtedly ensue next week."

Table listing closing prices for various stocks and commodities.

Writing from Boston yesterday, Paine, Webber & Co. had the following to say of the stock market: "While the Boston market was strong today, it did not show the activity which might be expected considering the length and activity displayed in the New York market, where short covering and manipulation for the rise seemed to be the main feature. Arizona Commercial, Parrot, Copper Range and the Telephone stocks were well bought and showed the best advances. There was also quite an accumulation of Greene-Canaan going on, and we look for higher prices in this stock within the next few weeks. The monthly statistics of the Copper Producers' association will be published Saturday or Monday, and it is expected to show a slight increase over last month, but late reports from the copper and brass mills are more encouraging and we do not expect this small increase in the surplus will have an unfavorable effect, and if the New York market should show a slight increase, the prediction made by the leading bull...

Chicago Grain Markets. Chicago, April 8.—The prices of wheat continued their record-breaking advance today, the May touching 126 1/2 and the July 112 1/2@112 3/4. In the early trading the market showed signs of a reaction from the extreme buoyancy of the past few days. The opening prices were lower. There was general selling and an absence of any substantial support. The bulk volume of business was in the July, which is now regarded by many as an old crop month. After the May had sold off to 124 1/2 and the July to 111 1/2, the sentiment suddenly became bullish. Within three minutes the July had advanced to 122 1/2@122 3/4 and the May to 120 1/2. The upturn was partly due to the prediction made by the leading bull...

Copper Metal Prices. New York, April 8.—Copper was a little lower in London today, with spot quoted at 457 and futures at 457, 13 1/2. Lead was 10 1/2@10 3/4 and tin 128 1/2@129. Electrolytic at 12.50@12.62 1/2 and casting at 12.37 1/2@12.50.

CHICAGO GRAIN MARKETS. Chicago, April 8.—The prices of wheat continued their record-breaking advance today, the May touching 126 1/2 and the July 112 1/2@112 3/4. that this country will not raise four hundred million bushels of winter wheat this season. The buying furor subsided quickly and the prices reacted on realizing. The close was irregular, 3/4 lower to 1 1/2 higher. The May opened at 125 to 125 1/4; highest, 126 1/2; lowest, 124 1/4; closing, 124 1/4.

Corn—Sharp declines occurred. There were heavy realizing sales, particularly in the July. One leading concern is said to have sold more than a million bushels of that option during the day. The price was higher, some extent by the bright outlook for the new crop. The close was weak, with the May 3/4 lower. The May opened at 66 1/2 to 67; highest, 67; lowest, 66 1/2; closing, 66 1/2.

Oats—There was free realizing by longs and more or less selling for short account. The crop news was again of bearish character. The close was weak, unchanged to 3/4 lower. The May opened at 55 1/2 to 56; highest, 55 1/4; lowest, 54 1/2; closing, 54 1/2.

HOME RULE MEASURE.

New Bill Contains Ideas of Michigan Cities—Power Is Limited. Lansing, April 8.—Senator Tuttle has introduced in the senate the latest home rule measure. The bill, as introduced by Corporation Counsel P. J. M. Hally of Detroit and representing the ideas of the Michigan League of Municipalities, doubtless will be the basis for all future home rule work by both houses.

Grand Rapids was the first city to send its delegation on the home rule question for a hearing on the Tuttle Hally bill. Other cities will be given hearings if they will give notice of their intention to appear. From now on the home rule work will be pressed forward at every opportunity. With the new bill, reflecting as it does the ideas of so many localities, as a basis, it is believed there will be no great difficulty getting through a measure that will be satisfactory.

With the bill Hally sent a brief and the two take only twelve pages, so that the bill may claim the merit of brevity. The bill starts with the home rule question for a hearing on the Tuttle Hally bill. Other cities will be given hearings if they will give notice of their intention to appear. From now on the home rule work will be pressed forward at every opportunity. With the new bill, reflecting as it does the ideas of so many localities, as a basis, it is believed there will be no great difficulty getting through a measure that will be satisfactory.

There is special significance in the fact that but one party is devoted to telling what cities must do, while nearly four pages are devoted to telling what they may do. The things they cannot do are put into two pages.

Following are some of the important things cities must do: Have an executive head, a clerk and a body vested with legislative and administrative powers. Elect city officers at distinct time from national elections. Have all sessions of legislative body and records of city open to public.

Help Sunday Baseball. Some of the important things a city may do are here summarized: Assess taxes not to exceed 5 per cent. Issue bonds not to exceed 10 per cent.

Collect rents, tolls and excises. Purchase franchises and property of companies in plank road, cemetery, hospital, almshouse, electric light, gas, heat, water, street, railroad, tramroad, power or telephone business.

If it has 25,000 people, to own and operate street railway ten miles beyond its limits. Provide initiative, referendum and recall. Allow Sunday theaters and baseball.

Use and control streams within its boundaries, but not to interfere with navigation. Provide different methods of taxation for municipal purposes than those used for state.

The things a city cannot do are summarized as follows: Raise rate of taxation or bond issue without consent of majority of electors. Submit charter amendments oftener than once in two years.

Call more than two special elections a year. Change salary or shorten or lengthen term of office of any public official except in case of recall.

Change or adopt charter, sell property worth \$50,000, sell any water front property, vacate street leading to water front, recall an officer, engage in business requiring investment in excess of 10 cents per capita or authorize bond issue unless approved by majority of electors voting thereon.

Make contract to give place to person who is in default of city or who has been convicted of bribery or misappropriating public funds. Issue bonds without sinking fund provision.

Repeal any debt. Submit franchise at special election unless person who wants franchise pays expense. Grant public utility franchise not subject to revocation at city's will unless it provides that in event of purchase or condemnation by city nothing shall be paid for franchise value.

By Non-Partisan Body. Under the head of new charters and charter amendments it is provided that a non-partisan body elected by the fashion of the Grand Rapids school board. Charter amendments may be proposed by the legislative body or by initiative from the people.

Municipalities may consolidate or cities may annex territory only on consent of both parties. Each city shall have one representative on the board of supervisors, but the matter of representation is left to a general law to be framed by the legislature. This is the rock on which the country and city members would split if any attempt were made to let cities increase their representation on the board of supervisors.

NOTICE SERVED AT WASHINGTON.

Federal Aid Sought in Effort to Prevent Damming of Desplaines River.

Washington, April 8.—The federal government, through Attorney General Wickersham, was asked today to become a party, with the states of Illinois and Wisconsin, in the efforts being made to prevent the Economy Light & Power company from building a dam in the Desplaines river, trondly county, Illinois. The matter is to be heard before the supreme court of Illinois April 16. Edward T. Cahill, an attorney of Chicago, who served notice today on the attorney general of his intention to present to the Illinois supreme court a bill of intervention to prevent the damming of the Desplaines river, stated that in case the department of justice fails to file a petition in the case "to protect the interests of the federal government" he will move the court for a rule to show cause why some other party should be appointed to act in the name of the government in the matter.

12-INCH GUNS ON NEW SHIPS.

Navy Board's Decision—14-Inch Rifle to Be Used Only for Coast Defense.

Washington, April 8.—The general board has decided that the battleships now building shall have batteries of twelve 12-inch guns, instead of the 14-inch guns. The board finds that every advantage in the problem of attack will be protected by an adherence to the 12-inch gun as the maximum, if not the exclusive, calibre for the main battery.

Two propositions were made some time ago, one containing a battery of 12-inch guns and the other a battery of ten 14-inch guns.

The army ordnance officers, however, are constructing five seacoast rifles of 14-inch calibre. In the coast defenses the experts are not troubled with the important question of weight, which is such a perplexing factor on board ship. These new army guns are being built at the government arsenal, one of the wire-wound type and the others of the jacketed type. Arrangements are now being made by the chief of ordnance for the manufacture of four additional 14-inch rifles, to be wire-wound. It is believed that all these guns on completion and after trial at Sandy Hook will be shipped to the new coast defenses in the Philippines, where they are to be in place early in the coming year.

Plan for Protecting the Canal. It is probable that in all coast defenses heretofore supplied with armament the 14-inch gun will be used. There has been some talk of using 16-inch guns in the fortification of the Panama canal.

Some ordnance officers believe that the 16-inch gun, which was built some years ago, too large for practical purposes. With 14-inch guns guarding the approaches to the canal, the ships of an enemy carrying only 12-inch guns can be kept at a respectful distance, especially if placed under the command of an expert. The plan for protecting the canal contemplates not only formidable batteries, but the use of mines and submarine torpedo boats. There has been some discussion of whether submarines should be placed under the command of the navy, but although they may never actually be transferred to the war department, they are destined in the protection of the canal to be operated by the coast artillery officers, commanding the defensive operations.

May Raise Benedict Arnold's Flagship. The hull of the Royal Savage, General Benedict Arnold's flagship in the first naval engagement of the Revolution, or possibly the old ship herself, rebuilt, remanned, and moving about under her own power, will be placed under the command of the three-hundredth anniversary of the discovery by Samuel De Champlain of the beautiful lake which bears his name, which is to occupy the entire week of July 4, if a request which the New York Lake Champlain Tercentennial commission has just made to the federal authorities is granted.

Senator Henry W. Hill of Buffalo, secretary of the commission, announces that that body has made application for permission to raise the hull of the Royal Savage, which has lain on the lake bottom for 133 years. Divers sent down by the commission, says Senator Hill, report that the hull, which lies deeply embedded in sand a little southwest of Valcour Island, in practically the exact location where the Royal Savage grounded and was abandoned by Arnold on the afternoon of Oct. 11, 1776, after a desperate encounter with a British fleet twice the size of his own, is in comparatively good condition, though the superstructure of the old vessel is of course entirely gone. The divers gave the commission the dimensions of the ship as forty-five feet over all and fifteen feet wide.

WOE FOR HOLLAND "WETS."

Michigan City Will Remain Dry in Spite of County Vote. Holland, April 8.—Holland citizens were startled owing to the reports which have been going the rounds of the state press that saloon keepers would be given a new lease of life because local option was handed such a decisive defeat in Ottawa county at the election. The newly elected alderman, as well as the hoodlums, were besieged with anxious inquiries as to the stand they took.

Mayor Brusse and all the aldermen stated most emphatically that Holland was dry and would remain so until the citizens would repeal the ordinance enacted a year ago by a referendum vote. Although Holland went against local option with a majority of 334 the anti-saloon sentiment was so strong that if a special election were called, the issue would be buried without the least possible show of resurrection.

Jackson Stays "Dry."

Jackson, April 8.—Corrected returns from county districts have brought the majority for local option in the county up to 133. It is said the "wets" have given up and have decided to submit to the inevitable. If they do contest the result the "drys" claim to have evidence of gross irregularities in several wards. Indications are that the county district has defeated the good roads proposition, but the city voted for it.

WOMEN'S HATS SAVE LEVEES.

"Women's hats are doing much to save the levees along the Mississippi River in Louisiana," said Henry B. Lewis in the Planktonist. "This statement sounds fantastic, but of the fashionable fur hats it is certainly true. Muskrats, which for years have cost the state no end of trouble and thousands of dollars through their depredations in the levees, are now most eagerly sought by the millinery trade throughout the country, and hunters in Louisiana are hunting them instead of their game. For years the muskrats...

THE HEAD OF THE FIRM.

The interested parties may not yet have heard about this furry in financial circles, says Success Magazine. It is stated that long ago Kuhn, Loeb & Co., the New York bankers, had occasion to send some bonds to J. Pierpont Morgan & Co., and to no other person.

By continued repetitions of these instructions to all who stood in his way, he finally broke into Mr. Morgan's presence, where several gentlemen were in session, and wiping big drops from his brow, blurted out, "I want to see Mr. Morgan at J. Pierpont Morgan & Co. Company."

Mr. Morgan arose and said, "Well, I am Mr. Morgan of J. Pierpont Morgan & Co. Who are you?" "Who—me?" said the porter. "Why, 'I'm de colon of Kuhn, Loeb & Co., and head de de deckymints I done bring ye."

DOGS ON THE STAGE.

In Some Plays Success or Failure Has Depended Upon Four-Legged Actors. Dogs, like human beings, have in their time played leading parts on the stage of life, and in none have many of them been so successful as in the roles of actors. Though it is known that dogs took part in theatrical performances in Shakespeare's time and even before that, there is unfortunately no reliable record of such performances, but it is known that these days "dog actors" were not considered of sufficient importance to merit the preservation of their names and deeds, for it is not until the beginning of the nineteenth century that we find a definite record of a dog's histrionic company.

In 1813 at the old Surrey theater a play was produced entitled "Llewellyn, Prince of Wales, and the Dog Gelert." The dog on this occasion was the "star," for the whole play centered around him—had there been no dog there could have been no play. As we are told the breed of this sagacious animal, but of his success there is not a shadow of doubt. From the appearance of Gelert in 1813 to that of Pingo, a diminutive Yorkshire terrier, in 1908, there has not been one dog on the stage who has not proved an ornament and an attraction. Indeed, in several cases a four-legged performer has made the greatest success in a play, drawing hundreds of people night after night by the magnetism of his inarticulate art.

Mr. Morgan arose and said, "Well, I am Mr. Morgan of J. Pierpont Morgan & Co. Who are you?" "Who—me?" said the porter. "Why, 'I'm de colon of Kuhn, Loeb & Co., and head de de deckymints I done bring ye."

Mr. Morgan arose and said, "Well, I am Mr. Morgan of J. Pierpont Morgan & Co. Who are you?" "Who—me?" said the porter. "Why, 'I'm de colon of Kuhn, Loeb & Co., and head de de deckymints I done bring ye."

DOGS ON THE STAGE.

In Some Plays Success or Failure Has Depended Upon Four-Legged Actors. Dogs, like human beings, have in their time played leading parts on the stage of life, and in none have many of them been so successful as in the roles of actors. Though it is known that dogs took part in theatrical performances in Shakespeare's time and even before that, there is unfortunately no reliable record of such performances, but it is known that these days "dog actors" were not considered of sufficient importance to merit the preservation of their names and deeds, for it is not until the beginning of the nineteenth century that we find a definite record of a dog's histrionic company.

In 1813 at the old Surrey theater a play was produced entitled "Llewellyn, Prince of Wales, and the Dog Gelert." The dog on this occasion was the "star," for the whole play centered around him—had there been no dog there could have been no play. As we are told the breed of this sagacious animal, but of his success there is not a shadow of doubt. From the appearance of Gelert in 1813 to that of Pingo, a diminutive Yorkshire terrier, in 1908, there has not been one dog on the stage who has not proved an ornament and an attraction. Indeed, in several cases a four-legged performer has made the greatest success in a play, drawing hundreds of people night after night by the magnetism of his inarticulate art.

In 1814 "The Dog of Montargis"—the play to which Genet refers—was produced at Covent Garden theater. It was written around a true incident in which a man was murdered in the forest of Bondy and the murderer tracked by means of his dog. One day this dog suddenly sprang at the throat of a man and almost killed him, whereupon the wretch, terrified, confessed that he was the murderer. This dramatic incident formed the basis of the play, and everything depended upon the cleverness of the dog. He was called Dragon, and his acting was so marvelous that the play achieved a remarkable success, running for thirty-nine performances.

In "Hans, the Boatman," this great dog was the attraction of the play; his master became blind and parted from his wife, and the dog was the means of reuniting them in a touching scene, which never failed to move the audience to tears. Lion used to stroll quietly to the wings every night and stand waiting for his cue. When the time came he always went on without a word from any one and played his part like a true artist. His utter dejection, when his master recovered his sight in the play, never failed to move the audience to tears. Lion used to stroll quietly to the wings every night and stand waiting for his cue. When the time came he always went on without a word from any one and played his part like a true artist.

In more recent years a clever little Yorkshire terrier appeared in "My Wife," at the Haymarket theater. This tiny creature was an unflinching source of delight to playgoers and players, his cunning wickedness being an everlasting joy. In the first act a dialogue (?) took place between one of the actors and the dog, who lay placidly on a table and appeared to understand everything that was said.

One of the cleverest dogs that ever fascinated an audience was Binkie, the fox terrier in "The Light That Failed." His master was Aubrey Smith, who was so admirable as Torpenbow in the play, and Mr. Smith, who has had dogs of his own for twenty-five years, says that Binkie was the most human, intelligent, plucky, affectionate dog he had ever known. He quickly learned to shut doors and fetch slippers, taught himself to extinguish a lighted match and was quite a professional at hide and seek, never failing to find the ball, even if it was forty-five feet over all and fifteen feet wide.

His first appearance was not an overwhelming success owing to an accident, for which he was not to blame. After rehearsing splendidly he made his entrance on the first night quite correctly, when Mr. Smith turned to speak to his body and accidentally hit Binkie on the nose with his stick. The dog naturally concluded he was wrong and made an abrupt exit. On another occasion he knew his mistress was behind the scene and made a hurried and unheeded departure through the first entrance.

Bobby's Beat is a clever sheepdog, who recently appeared at the Adelphi with Martin Harvey in "The Last Heir," making a great success. Bobby dearly loved his part and when "overture and beginning" were called each night and beginning took place to prevent his rushing on before his cue. The fascination of the foot lights is evidently as strong for dogs as for human beings, for when "The Last Heir" was withdrawn and Bobby had to be left behind at night he nearly howled the roof off in his bitter distress.

These are but a few of the many talented dogs who have won histrionic laurels. They may truly be said to belong to that happy band who are born great, for though in one sense they have had greatness thrust upon them, it is only by their innate genius that they have been able to grasp their opportunity and win their dramatic spurs.—Illustrated Kennel News.

THE SIMPLE MAIDEN.

It is a most quaint—and at this present it is worth discussing—whether it is the simple, demure little woman, who has a will of her own or the bold, dashing person who carries most before her.

In fiction and on the stage the "villainess" uses broad effects. She has flashing eyes, she laughs mockingly, her lips draw back from her white teeth when she is being baffled, she dresses for the part, she can never by any manner of means be taken for a quiet, domesticated person with a penchant for home-making, and an aspiration to become an ideal daughter-in-law. But in real life experience teaches us that this is by no means the kind of woman who succeeds fully in her aims. Man is a susceptible creature, and his gullibility is astounding. If a woman has a soft voice, if her dress is only a little out of the line of simplicity, if she knows how to look down and look up at the psychological moment, if she has only mastered the art of combining the wisdom of the serpent with the gentleness of the dove, she can outwit a dozen of the stereotyped broad actresses. She need not even be good looking, she can start with all manner of disadvantages, but she will win in the end.

Man likes to be purged round, he likes to think he is the tower of strength, he loves to be purged round, he likes to be certain that in her whom he calls the "nice, unassuming little woman" or the "gentle little girl," as the case may be, there can necessarily be no guile, gray or white and black and white gowns, a simple coiffure, wondering eyes, and an oratory, large library, extensive laboratories, good museum, and above all, high standards of scholarship. have burrowed in the levees, and in nearly every case where there has been a crevasse along the river front the cause has been traced to a muskrat hole. The state has tried several means to get rid of the pests, but without success. During the winter the millinery stores in New Orleans bought several hundred muskrat furs from hunters in the different parishes and placed them on exhibition. Ever since their rats have been popular, upon as well as in the pompadour of 'sycube.' Several of the more progressive hunters quickly realized that muskrats were marketable and gave up the pursuit of ducks and other game. One hunter alone in February killed 6,000. Other hunters have followed the lead of this mighty mired, and it begins to look as if the state will soon rid itself of the industrious rodents whose burrowings have for many years endangered the levees and levees along Louisiana's river front.—Milwaukee Sentinel.

A prison chaplain was asked what he thought about the possibility of a face being altered by development of character. "Certainly a man can change his face by changing his thoughts and habits," he said. "I have seen it especially among boys who came under the Borstal system. When they arrive they are languid or defiant hooligans, with evil manners, laziness and lack of character written in every feature. As the steady work and the regular hours and the wholesome feeding tell upon them they rapidly improve."

"They find for the first time that someone is taking an interest in them. They gain self-respect. Their eyes look straight at you; their jaw lines soften; I have even seen their noses change. (It is the nose that gives the face character, I think.) In many older men, too, I have noticed distinct alteration. Expression is mainly a matter of lines, and here is no doubt one can get rid of certain disfiguring lines by refusing to let the mind perpetuate them."

MEN'S FACES.

A physician with a large practice among men declares not only that he can tell at a glance when a man enters his consulting room whether he is a success or not, but what profession he is a success in. "Lawyers are easy. They have such firm, assertive mouths. Soldiers are easy; they are betrayed by their deep, thoughtful eyes and rounded, firm jaw lines. Musicians have beautifully molded lips, and usually their long hair gives them away."

"Men who succeed in commerce have alert faces, but no particular features. Clergymen who go up the ladder of preference have faces which tell of self-expression—tight lips, eyes which look straight ahead. Artists, on the other hand, have eyes which are all over the place and small, well-formed chin. Politicians who succeed by their influence over men have always prominent noses."

SNOW FORTY FEET DEEP.

The mogul engines which were stalled in the recent blizzard out West do not appear to be worthy successors of a certain Hercules engine which cut a noble figure in the English blizzard of 1836.

To appreciate the role played by the Hercules some idea must be given of the effect of the storm on other methods of travel. Fourteen mail coaches were abandoned on as many roads. Another was dug out of drifts five times between Exeter and London.

Another was buried so deep that it took 300 men, principally sappers and miners, several hours to make a passage to the coast and rescue the mails and passengers, while near Chatham the snow lay to a depth of thirty to forty feet, the military being turned out to the number of 600 to clear the way.

In London the drifts were ten feet deep and hundreds of men and carts were employed hauling snow out to the fields in the suburbs. The markets were in a bad way. One day only four stall holders were able to reach a main market. Greens which a few days before the storm were being sold for 3d a bunch at market now fetched from 1d to 1s, turnips, carrots and celery becoming equally rare; while 1d handfuls of parsley realized 2s 6d, and the happy possessor of a bunch which he had previously purchased for 9d realized for his prize no less a sum than £1 2s 3d.

Amid all this confusion the pioneer railways covered themselves with glory by running trains almost without interruption. There was a deep cutting on one line where the snow had drifted badly, and according to the queen, great numbers of people turned out to see how the Hercules engine would get along. They imagined, of course, that she would be stopped, but to their astonishment the engine dashed right into the drift, "clearing her way through apparently without the slightest difficulty, the snow at the same time flying over the top of the engine chimney like foam from the broken waves of a violent sea, and notwithstanding obstructions the train came down from Greenhead (twenty miles) in one hour and a quarter."

OLD COUNCIL HOLDS FINAL SESSIONS

REGULAR MONTHLY MEETING HELD WEDNESDAY EVENING AND VOTE CAST MONDAY WAS CANVASSED LAST NIGHT.

The principal business transacted by the council at its regular meeting Wednesday evening was the acceptance of the annual reports of the cemetery and library boards and the monthly report of the municipal court. All of the reports, the two former of which have already been published, were accepted, and ordered placed on file. In the absence of Mayor Keese and Alderman G. G. Barnett, president of the council, D. J. Slinn presided.

The receipts of the municipal court in March were \$195.81. Of this amount \$34 was paid to the county treasurer on account of fines collected, leaving a net balance of \$161.51. The sum received by the court on account of fines in criminal cases was \$34; cost of criminal cases, \$33.55; cost in civil cases, \$31. The officers' fees received from Marshal Trevor for February and March amounted to \$25.55, and the justice fees totaled \$52.01.

Alderman Olson, chairman of the committee on claims and accounts, presented a statement of the bills, also payrolls for March, and upon the committee's recommendation they were ordered paid. The bills and payrolls totaled \$6,821.48. The official payroll amounted to \$1,610.99; highway payroll, \$892.55; sewer, \$18.90; water, \$29.33. The bills payable were distributed among the following funds: Fire, \$153.00; general, \$1,147.70; cemetery, \$83.75; street lighting, \$818; police, \$880; highway, \$140.90; water, \$489.66; library, \$922.43 and sewer, \$5.35.

The vote in the municipal election was canvassed at a meeting of the council held last evening, but no other business was considered. It is expected that the various officers will begin taking their oaths tomorrow. It has not yet been decided when the new council will convene for the appointment of city officials, but it is likely that the meeting will be held some time next week. The meeting will be held subject to the call of the mayor.

"THE RED MILL"

Last Season's Biggest Musical Comedy Success Coming.

Of all the musical successes which were endorsed by New York, Boston, Chicago, Philadelphia and St. Louis, the past season none stood out more boldly than Charles Dillingham's production of the Henry Blossom and Victor Herbert musical story, "The Red Mill." The tone of refinement, the modest and picturesque costuming, the interesting story of two American tourists who have gone broke, and who, after many complicated situations find themselves assisting in an escape from the mill, make up an unusually attractive performance. It is made doubly entertaining by the introduction of some of the cleverest music ever composed by the author, Victor Herbert, who has fitted Henry Blossom's unique story and telling lyrics with melodies that will be hummed and sung and whistled for many years to come. Among the most successful musical numbers heard in "The Red Mill" are "Every Day Is Ladies' Day With Me," "You Never Can Tell About a Woman," "Go, While the Goin' Good," "The Streets of New York," "Because You're You," "The Isle of Our Dreams" and "I Want You to Marry Me."

Included in the cast are Joseph Whitehead as Con Kidder, Neil McNeil as Kid Connor, W. H. Brown, Harry Carter, Milton Davison, Frederick McGee, Maurice Lavigne, Charles Hopkins and the Misses Anna McNabb, Marguerite Fry, Sadie Kirby, Edna de Dreu and a

HONOR MISS SELLWOOD.

A series of brilliant social affairs is being planned in compliment to Miss LaRue Sellwood and Charles S. Mershon, whose wedding will take place April 21, says the Duluth Herald. Mr. and Mrs. John Canton issued invitations today for a cotillion at their home, Monday evening, April 19, in their honor. The affair promises to be one of the most beautiful of the year.

Mr. and Mrs. Richard Mathews Sellwood will be hosts at a dancing party Friday evening, April 16, in Miss Sellwood's honor, the affair to be given at the Northland Country club. Tuesday evening of next week Mr. and Mrs. William White will be hosts at dinner at their home, 1421 East Superior street.

This evening Mr. and Mrs. Lee Farmer will entertain informally at bridge, in honor of Miss Sellwood and Mr. Mershon.

CHARLES WILKINS LOSES SON.

Steve Simons received a telegram yesterday advising him of the death of his nephew, Clyde Wilkins, age nine years, youngest son of Charles Wilkins, formerly of this city and now living in the copper country. The boy visited his grandmother, Mrs. Bickle and uncle, in this city for some time prior to a month ago. He was taken down with the measles a week ago and pneumonia developed, causing his death Wednesday night. Clyde was a bright little chap and his many friends and playmates in this city will be grieved to learn of his sudden demise. The remains will be received here this evening and will be taken to Mr. Simons' home on Hig's street. Funeral arrangements have not yet been completed, but the obsequies will likely be held Sunday afternoon.

TESTING CANISTEO ORES.

The Oliver Iron Mining company's concentrating plant at Boyev, Minn., will be in readiness for operation by the 15th, when test washings of the Canisteco ores will commence and continue throughout the summer. It is reported that the plant has been extensively repaired and is in much better condition than ever before.

ISHPEMING THEATRE TONIGHT

ISHPEMING BAND'S ANNUAL CONCERT

SPLENDID PROGRAM. ADMISSION, 25c

ISHPEMING SIXTY PATIENTS AT WOODMEN'S SANITARIUM

MEMBERSHIP THROUGHOUT SOCIETY'S JURISDICTION MUCH INTERESTED IN INSTITUTION FOUNDED FOR CARE OF MEMBERS ILL WITH TUBERCULOSIS.

The illustrations accompanying this article give the reader a good idea of the surroundings of the Modern Woodmen's new tuberculosis sanitarium, near Colorado Springs, Colo., also the tents where the sufferers from the disease are cared for. Sixty tents, all constructed of the same material and of the same size, and equipped alike, have already been erected and are in use. The tents are as near sanitary as they can possibly be made. The large structure in the center

now about sixty applications from members suffering from tuberculosis for admission to the sanitarium. In order that these men shall receive treatment at a time when it is most needed the officers wish to provide additional tents to accommodate them as soon as possible.

Tract Large and Attractive.
The society owns 1,380 acres of land in one tract, where the sanitarium is located, eight miles north of Colorado Springs. As will be seen by the illustration showing the tent colonies, administration building and the grounds, the headquarters are close to the mountain range. The land cost the society \$17,500. The work of preparing the grounds for the buildings, water reservoirs in the mountains, and pipe lines, was commenced early last summer, when voluntary contributions were called for and the membership donated over \$65,000. The executive council is authorized, under a resolution adopted at the last head camp, to expend for the maintenance and development of the sanitarium ten cents per capita on the membership. As the membership now exceeds 1,000,000, over \$100,000 will be received annually for that purpose in addition to the sum expected to be received from other sources. In view of the great interest now shown in sanitarium matters it is thought that

is sufficient to meet the demands of the patients. The farm is also equipped with the necessary horses and implements and everything possible is being done for the comfort and enjoyment of the patients.
The executive board suggests, in view of the fact that the April assessment is to be skipped, that the members contribute the full amount, or at least part of it, to the sanitarium fund. The suggestion has also been offered that each member contribute \$1 in April toward the sanitarium, so that the facilities can be increased as speedily as possible, in order to take care of the members now awaiting admission. It is thought that before the end of this month the contributions from the members will amount to many thousands of dollars, as it is already certain that the institution is going to prove a fine acquisition for the society.

HIGH SCHOOL NOTES.
School will open Monday, April 18. Rev. C. G. Zeigler visited the high school Monday afternoon.
"Bob" Talcott and Martin Paulson spent Monday afternoon, visiting classes.
Clifford Finch was absent Tuesday; therefore baseball talk was slack in the halls.
The senior baseball team will be managed by John Kellow and captained by Will Keese.
Mr. Eckelberry gave an "exam" to his class in civics Tuesday which will be remembered for a long time to come.
The boys' debating club has decided to attend in a body the Upper Michigan oratorical contest, which is to be held at the Marquette Normal.

The weather makes the members of the newly organized baseball teams in the high school feel blue. For a time it looked as if we might play Saturday, but again we change our minds.
The girls' literary club gave the following French program Thursday afternoon: Song, "La Bonne Aventure," French students; essay, "Victor Hugo," Margaret Benedict; dialect, Florene Lore; poem, "A Quoi Bon Entendre," Marguerite Scribner; song, French students; poem, "Rhapsodie," Alice Moody; violin and piano duet, Pearl Kaku and Bessie Chapman.
The 1908 football team had a very nice group picture taken Saturday. It will appear in the Annual. The boys' debating club and the girls' literary society had their pictures taken Friday afternoon. The picture of the orchestra will have to be retaken. Thomas Collins was not in it. Just as the man showed the orchestra the "little bird" Tommie stood up on his high chair and leaning over too far and fell into Mr. Parrish's bass horn. Tommie will now be seated on the floor so as to prevent any more trouble. The girls' glee club will have its picture taken today at 2 p. m.

FROM MORGAN'S CURB LETTER.
"Telegraphic service is still impaired, but is greatly improved over yesterday's, and we are able to keep a fairly good line on quotations. The market opened strong and higher, Amalgamated again leading. The balance of the list showed fractional gains, and held them right up to the close. The action of the market is displaying no tendency to react on the eve of the three days' holiday demonstrated its wonderful strength. Some profit-taking was to be expected, but all offerings were readily taken at advancing prices. Cactus and Chief Consolidated were again the most active on the curb, each gaining a small fraction. We are told that Greene-Canaan is slated for much higher prices. The information comes from one unusually well informed, both as regards the property, and the copper situation generally. The market closed strong, and at the highest average level of this movement. We look for continuation of the advance. Net earnings of La Rose averaged \$75,000 for February and March, January earnings were \$80,000. This is all from new ground. The announcement yesterday by F. A. Heinze, president of the Davis group, of the definite striking of its ore bodies on the 1,400-foot level is the first official announcement ever given out that ore had been encountered by the Davis-Daly company. It is planned to sink to the 1,600-foot level immediately. Attention is directed to the exceptionally strong position of the standard copper producers, notwithstanding the big surplus. This large stock was acquired at low cost. It can be carried at very low money rates, and it is certain to be absorbed quickly when business revives, which cannot be long. The result will be a big harvest for the producers who sell later when the price may be two or three cents a pound higher. We understand that the annual report of the Butte Coalition Mining company to be issued in June, and covering the year ending Dec. 31, 1908, will show some increase in the cash assets over the \$3,500,000 on hand a year ago. The current year is expected to be the best in the company's history so far as the volume of copper output and the cost of making copper are concerned. The Framingham shaft with its immense area of virgin territory is depended upon in large degree to accomplish these results."

ISHPEMING IN BRIEF.
Mrs. H. S. Thompson of Beacon visited relatives in the city yesterday.
Jake Levine, a well known business man of Champion, was in the city yesterday.
The Ishpeming City indoor baseball team will meet the Manistique team at Manistique next Monday and Tuesday evenings.
A male quartet will sing tonight and tomorrow night at the Kids' Grand theater. There will be a complete change of songs and moving pictures this evening.
There will be no work in the mines of the city today, as it is customary for the men to take a holiday on Good Friday. All of the mercantile establishments will be closed all day and the barbers will close their shops at noon.
William Trobriek, who has the contract for the excavating, also for the building of the foundation under the Odd Fellows' block, corner Main and Pearl streets, will complete removing the soil the latter part of next week. Work on the foundation will be started today.
The Racine (Wis.) Times of recent date said of Edward C. Parmenter, one of the musicians with the Illinois Glee club to appear at Calvary Baptist church next Wednesday evening: "Edward C. Parmenter delighted everybody present with his beautiful saxophone solos. He certainly is an artist."
The Ishpeming band's second annual Good Friday concert at Ishpeming theater tonight will begin at 8 o'clock. The band is now in better condition than it has been at any time since its organization and the program to be given will be a musical treat. The admission will be twenty-five cents to all parts of the house.
N. E. Skud will arrive home tomorrow from Chicago where he has spent the greater part of the week purchasing additional lines of ladies and misses' suits, coats, etc., especially for the Easter business. Mr. Skud has one of the largest lines in the county and he endeavors to keep the department up-to-date. As will be seen by his announcement in this is-

Patients' Tent at Woodmen's Sanitarium Near Colorado Springs, Colorado.

is the administration building, where the patients receive special treatment when necessary, also where the physicians and their assistants make their headquarters.
James Ham of this city, a member of Hematite camp, is the first Michigan Woodman to be admitted to the sanitarium. Mr. Ham's application for admission was sent to the executive council about the time the local camp decided to provide a tent at a cost of \$250. As soon as the money was received the erection of the tent was started and it was ready for occupancy when Mr. Ham arrived at Colorado Springs last week. The officers of the local camp have been highly commended by the executive council upon the fact that it was the first camp in Michigan to provide a tent and the eighth in the society's jurisdiction to take this step.
The executive council makes an appeal to the various camps and individual members in the last issue of the Modern Woodman. It is predicted that the sanitarium will be the greatest achievement in the history of the society. The greatest need at this time in connection with the undertaking is money to construct more tent colonies and buildings, furnishing better facilities to meet the demands on the institution. There are

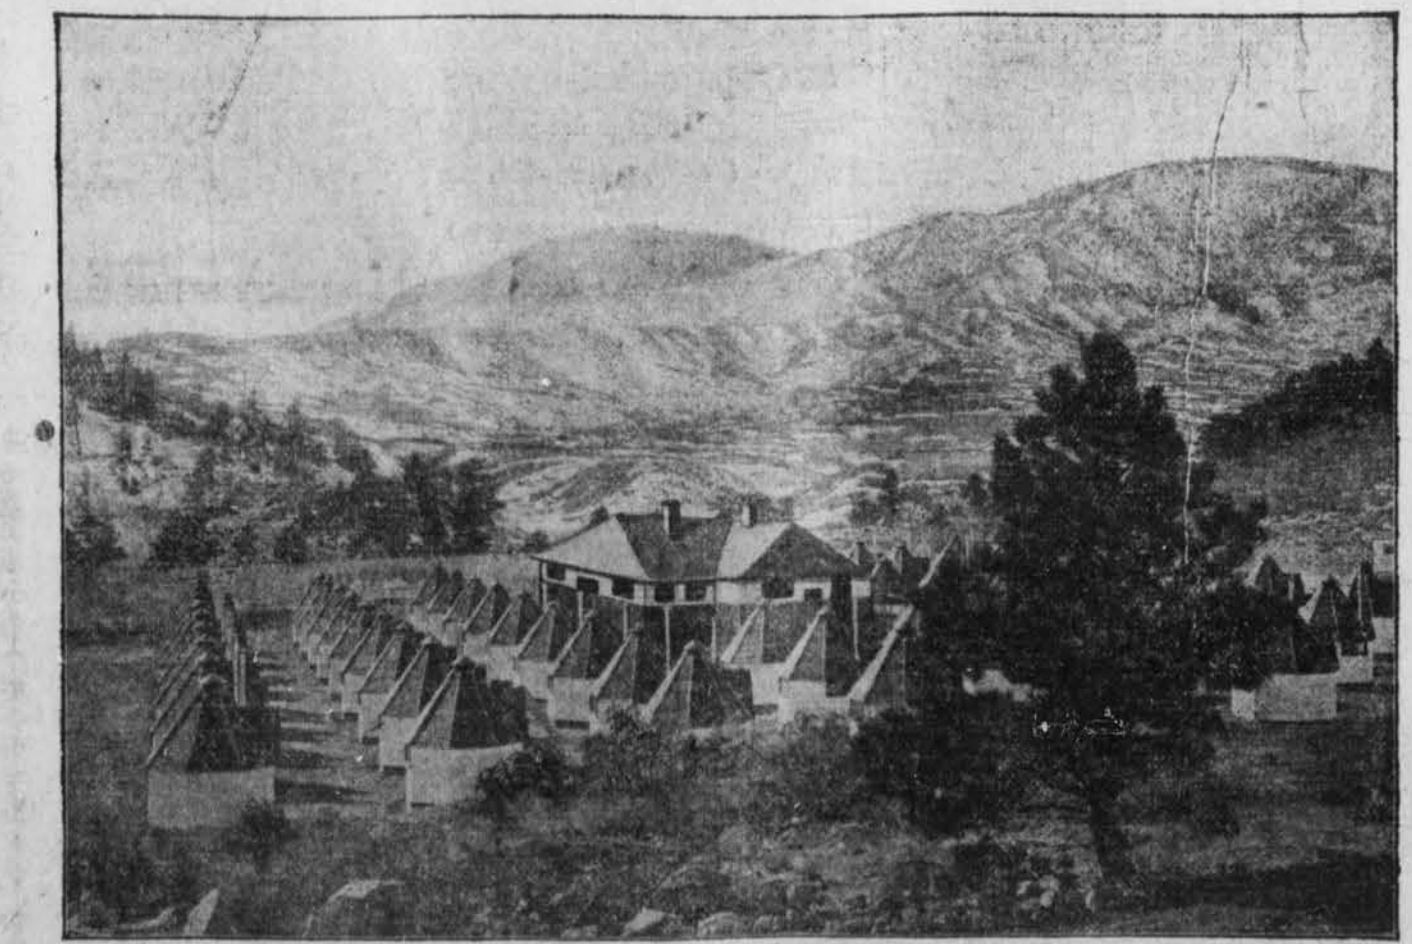

practically all of the tents to be erected in the future will be paid for by the camps or individual members, so that the ten cents per capita will be handled through the general fund will be ample to maintain the institution.
Director C. J. Byrns of this city, who is chairman of the sanitarium building committee, and who recently returned from the institution, states that many of the members accepted as patients early in January are improving and the results up to this time have been highly gratifying to the executive officers, as well as the physicians in charge. The construction work will be carried on with a large force of workmen during the summer months and it is anticipated that from seventy-five to 100 additional tents will be erected before the close of the year. The reservoirs are only partially built and it will require the expenditure of between \$3,000 and \$5,000 more to finish them. Heating and electric lighting plans are to be installed this summer.
The management figures that practically all of the fruits and vegetables, etc., needed will be raised on the farm. A half of twenty-four hot-bed-ten-coins was recently purchased, so that the supply of fresh milk, one of the most valuable and important foods in the treatment of tuber-

culosis, is sufficient to meet the demands of the patients. The farm is also equipped with the necessary horses and implements and everything possible is being done for the comfort and enjoyment of the patients.
The executive board suggests, in view of the fact that the April assessment is to be skipped, that the members contribute the full amount, or at least part of it, to the sanitarium fund. The suggestion has also been offered that each member contribute \$1 in April toward the sanitarium, so that the facilities can be increased as speedily as possible, in order to take care of the members now awaiting admission. It is thought that before the end of this month the contributions from the members will amount to many thousands of dollars, as it is already certain that the institution is going to prove a fine acquisition for the society.

HIGH SCHOOL NOTES.
School will open Monday, April 18. Rev. C. G. Zeigler visited the high school Monday afternoon.
"Bob" Talcott and Martin Paulson spent Monday afternoon, visiting classes.
Clifford Finch was absent Tuesday; therefore baseball talk was slack in the halls.
The senior baseball team will be managed by John Kellow and captained by Will Keese.
Mr. Eckelberry gave an "exam" to his class in civics Tuesday which will be remembered for a long time to come.
The boys' debating club has decided to attend in a body the Upper Michigan oratorical contest, which is to be held at the Marquette Normal.

The weather makes the members of the newly organized baseball teams in the high school feel blue. For a time it looked as if we might play Saturday, but again we change our minds.
The girls' literary club gave the following French program Thursday afternoon: Song, "La Bonne Aventure," French students; essay, "Victor Hugo," Margaret Benedict; dialect, Florene Lore; poem, "A Quoi Bon Entendre," Marguerite Scribner; song, French students; poem, "Rhapsodie," Alice Moody; violin and piano duet, Pearl Kaku and Bessie Chapman.

This large stock was acquired at low cost. It can be carried at very low money rates, and it is certain to be absorbed quickly when business revives, which cannot be long. The result will be a big harvest for the producers who sell later when the price may be two or three cents a pound higher. We understand that the annual report of the Butte Coalition Mining company to be issued in June, and covering the year ending Dec. 31, 1908, will show some increase in the cash assets over the \$3,500,000 on hand a year ago. The current year is expected to be the best in the company's history so far as the volume of copper output and the cost of making copper are concerned. The Framingham shaft with its immense area of virgin territory is depended upon in large degree to accomplish these results."

ISHPEMING IN BRIEF.
Mrs. H. S. Thompson of Beacon visited relatives in the city yesterday.
Jake Levine, a well known business man of Champion, was in the city yesterday.
The Ishpeming City indoor baseball team will meet the Manistique team at Manistique next Monday and Tuesday evenings.
A male quartet will sing tonight and tomorrow night at the Kids' Grand theater. There will be a complete change of songs and moving pictures this evening.
There will be no work in the mines of the city today, as it is customary for the men to take a holiday on Good Friday. All of the mercantile establishments will be closed all day and the barbers will close their shops at noon.
William Trobriek, who has the contract for the excavating, also for the building of the foundation under the Odd Fellows' block, corner Main and Pearl streets, will complete removing the soil the latter part of next week. Work on the foundation will be started today.
The Racine (Wis.) Times of recent date said of Edward C. Parmenter, one of the musicians with the Illinois Glee club to appear at Calvary Baptist church next Wednesday evening: "Edward C. Parmenter delighted everybody present with his beautiful saxophone solos. He certainly is an artist."
The Ishpeming band's second annual Good Friday concert at Ishpeming theater tonight will begin at 8 o'clock. The band is now in better condition than it has been at any time since its organization and the program to be given will be a musical treat. The admission will be twenty-five cents to all parts of the house.
N. E. Skud will arrive home tomorrow from Chicago where he has spent the greater part of the week purchasing additional lines of ladies and misses' suits, coats, etc., especially for the Easter business. Mr. Skud has one of the largest lines in the county and he endeavors to keep the department up-to-date. As will be seen by his announcement in this is-

is the administration building, where the patients receive special treatment when necessary, also where the physicians and their assistants make their headquarters.
James Ham of this city, a member of Hematite camp, is the first Michigan Woodman to be admitted to the sanitarium. Mr. Ham's application for admission was sent to the executive council about the time the local camp decided to provide a tent at a cost of \$250. As soon as the money was received the erection of the tent was started and it was ready for occupancy when Mr. Ham arrived at Colorado Springs last week. The officers of the local camp have been highly commended by the executive council upon the fact that it was the first camp in Michigan to provide a tent and the eighth in the society's jurisdiction to take this step.
The executive council makes an appeal to the various camps and individual members in the last issue of the Modern Woodman. It is predicted that the sanitarium will be the greatest achievement in the history of the society. The greatest need at this time in connection with the undertaking is money to construct more tent colonies and buildings, furnishing better facilities to meet the demands on the institution. There are

practically all of the tents to be erected in the future will be paid for by the camps or individual members, so that the ten cents per capita will be handled through the general fund will be ample to maintain the institution.
Director C. J. Byrns of this city, who is chairman of the sanitarium building committee, and who recently returned from the institution, states that many of the members accepted as patients early in January are improving and the results up to this time have been highly gratifying to the executive officers, as well as the physicians in charge. The construction work will be carried on with a large force of workmen during the summer months and it is anticipated that from seventy-five to 100 additional tents will be erected before the close of the year. The reservoirs are only partially built and it will require the expenditure of between \$3,000 and \$5,000 more to finish them. Heating and electric lighting plans are to be installed this summer.
The management figures that practically all of the fruits and vegetables, etc., needed will be raised on the farm. A half of twenty-four hot-bed-ten-coins was recently purchased, so that the supply of fresh milk, one of the most valuable and important foods in the treatment of tuber-

culosis, is sufficient to meet the demands of the patients. The farm is also equipped with the necessary horses and implements and everything possible is being done for the comfort and enjoyment of the patients.
The executive board suggests, in view of the fact that the April assessment is to be skipped, that the members contribute the full amount, or at least part of it, to the sanitarium fund. The suggestion has also been offered that each member contribute \$1 in April toward the sanitarium, so that the facilities can be increased as speedily as possible, in order to take care of the members now awaiting admission. It is thought that before the end of this month the contributions from the members will amount to many thousands of dollars, as it is already certain that the institution is going to prove a fine acquisition for the society.

Spring Exhibition

—AND—

EASTER OPENING

THE SAVINGS BANK

NEGAUNEE, MICH.

LEVINE BROS., Props.

Tomorrow, Saturday morning, this store will unfold Easter Fashions in apparel that is unequalled in Northern Michigan. For the past several weeks we have been preparing for this occasion. The smartest creations only, collected from far and wide, embraces this great Easter showing, which is eminently fitted for this store. The close price making will be found equally interesting. This great annual Spring sale will be continued until SATURDAY, APRIL 24th.

Easter Showing in Fine Waists

Net Waists, in white, ecru and brown and embroidery net, trimmed with Grecian bands, also plain tucked
\$4.50, \$6.50 and \$7.00

Messaline Waists in blue and brown striped.....**\$5.98**

Taffeta Waists in white, blue, brown and black.....**\$5.00 and \$8.50**

White Batiste Waists, long sleeves, at.....**\$2.89 and up to \$6.50**

Lingerie Waists, beautifully trimmed with fine lace and insertion
1.50 to 3.00

Special in Lawn Waists, excellent quality, worth up to \$1.39; sale price.....**79c**

EXCLUSIVE MILLINERY MODES FOR EASTER WEAR

Leghorn, chip and very rough straws in droop and rolled shapes, medium and large sizes, beautifully trimmed in the season's fashion with flowers, fruits and velvet ribbon. They are copies of the most expensive Parisian models, **\$3, \$4, \$5 and \$7.50**

Summer Dress Goods--Best Weaves

42-inch Gunard Blue Dress Goods, yard.....**\$1.00**

54-inch London Smoke.....**1.45**

45-inch Toupe and popular grays.....**1.24**

45-inch Satin finished materials in cedar tan, per yard.....**1.24**

36-inch Panamas, in all colors, yard.....**50c and 74c**

48-inch shadow striped Suiting and 36-inch satin Antoms at yard
50c and 74c

Storm Serges, yard.....**74c and 1.24**

42-inch black and white checked materials.....**24c and 35c**

English Chiffon Voiles, all colors...**1.29**

Women's Tailored Suits, Covert and Serge Coats

The showing embraces the best styles of the foremost manufacturers of this country. They are made of fine manish suiting materials, both striped and plain effects; beautifully finished with fine Peau de Cygne silk lining; colors, green, brown, grays and toupe; specially priced for this sale

\$15, \$18, \$22.50 and \$35

COVERT and SERGE COATS, in full length, three-quarters and short lengths,

Upper Peninsula

Closes His Logging Operations—

Andrew Bjorkman of Iron Mountain, the largest individual logger in the upper peninsula, has suspended operations for the season. Mr. Bjorkman says that the winter was not an extra good one for the logging business, particularly for the small operator, as the mild weather for the first part of the season, followed by lack of snow later, greatly interfered with operations. Few of the loggers made any money and some of them lost considerably. Mr. Bjorkman banked 6,000,000 feet of logs—mixed timber—the greater portion of which has been hauled to the mills at Marinette by rail. In addition to the timber, he cut 6,000 cords of pulpwood, 25,000 cord posts and 4,000 telegraph and telephone poles. In his several camps 250 men were employed for more than four months.

New Mayor for Norway—

One of the hottest fights that has been waged in a municipal election in that city in a long time took place at Norway last Monday, when Gordon Murray was elected mayor on the People's party ticket, receiving forty-seven more votes than Dr. E. P. Lockhart, the present mayor and the Citizens' party candidate. However, while the People's party succeeded in electing the head of the ticket, it was unsuccessful in electing Anton Belland supervisor in the First ward and William Novack alderman in the same ward, the Citizens' party capturing the other offices. The total vote polled was 860. Joseph Van Kerkhove was elected city clerk, and Peter Brackett city treasurer. The aldermen elected are: Wm. Novack, John C. Johnson and Camillo Pedrotti.

Will Establish New Camps—

The Sagola Lumber company, operating in Dickinson county, has finished its logging work for the season. From its camps at Kates, it has shipped over 3,000,000 feet of logs since last October, and during the past three and one-half years has shipped over 18,000,000 feet from the same place. The company has now cut all the timber of its holdings in that vicinity except about 4,000 cords of pulpwood, and the camps will be moved about seven miles west, into town 46, range 28, where there is from 10,000,000 to 12,000,000 feet of timber to cut. In order to handle this lot, the company will build a logging railroad eight miles long to connect with the St. Paul track. The company has logs enough at the mill now to last until the first of September and by that time will have camps again in operation.

Insane Woman Suspected—

Some days ago the attention of C. W. Reinwand of Manistique was called to the fact by Mr. Reinwand that a basket was secreted under the porch of the house he is occupying on Water street. He secured the basket and ascertained that it contained a pair of woman's stockings, filled with coarse black powder, nails, spikes and matches. He tested a little of the mixture and quickly ascertained its nature. Desiring to get rid of the find, he promptly threw it in the slip nearby. As Mr. Reinwand has no enemies he and his friends are at a loss to know why his house was singled out. The officers have ascertained that a Manistique woman who has been at the asylum at Newberry has endeavored to purchase powder at several places in the city, and has stated that she wanted to blow up a certain house which is located near the one occupied by Mr. Reinwand. It would seem that if the woman in question is the guilty party she should be taken in charge, for the house for which she has such a great antipathy is tenanted and there are eight small children in the family. Powder saturated with kerosene will not explode, and the fact that the powder was so prepared shows that the guilty party had but little knowledge along these lines.

New Departure in the Schools—

A new feature of the work in the public schools at Bessemer has been adopted by Superintendent M. J. Walsh. It provides for the examination of every child above the first grade to ascertain if the pupil has any defects of the eye, nose or throat. If any are found the parents will be notified on blanks which have been printed for this purpose. The following instructions have been given to the various teachers: "The early detection of disease renders it more probable. Recognized and neglected ailments have been the cause of many disabilities against educational requirements. The early recognition of disease, joined with intelligent medical interference, will minimize sickness, ignorance and crime. Correct sight and hearing are essential to the absorption of presented instruction. Children are frequently considered stupid who have eye or ear defects, and subsequently are proven to be bright and intelligent when such infirmities are corrected. Practically every case of mental weakness is due primarily to physical defects, many of which are easily curable if taken in time. It is highly desirable, therefore, that every teacher co-operate heartily and intelligently in every effort to minimize these physical defects. The examination of all children above the first grade should be made at the beginning of the school year. Each teacher should ex-

amine the children in his or her room and the examination must be made in private and with the least possible annoyance to the pupil. The presence of eye or ear defects, or diseases, can be easily discovered if the accompanying instructions are observed."

Small Log Drive This Year—

The Menominee River Boom company will this year drive a total of 56,000,000 feet of logs, cedar and pulpwood, according to figures submitted at the annual meeting of the company, when the log owners met in joint session with the directors of the driving concern. This is only 20,000,000 feet less than the drive of 1908, which totaled 76,000,000 feet. The drive is the smallest in the history of the Menominee River Boom company, the largest having been in 1889, when a total of 62,200,000 feet of logs were sawed and were cut up in mills of the twin cities. The drive this year will consist of 46,000,000 feet of logs and 10,000,000 feet of pulpwood. Of course this 56,000,000 feet does not represent the total timber cut of the Menominee river district by any means. The total for the district will be in the neighborhood of 120,000,000 feet. The difference is represented by the amount of timber hauled to the mills by the several railroad companies. As the timber is now located farther away from the streams, the shipment by rail will increase from year to year and the drive will decrease. Because of this the end of the Boom Co.'s operations is not far away. During the history of the Boom company, from 1868 to 1908, a period of forty years, a total of 10,551,000,000 feet of logs has been hauled. All of this timber has been cut by twin city mills and forms the basis of the wealth of the two cities today.

Menominee Democrats on Top—

By a majority of 270 votes and as the principal feature of an election that developed surprises galore and upset political calculations, Michael Sullivan, Democrat, was re-elected city treasurer of Menominee over Michael Seill, Republican, carrying five wards, losing one and tying in the third. The election proved a big victory for the Democratic party. But one Republican alderman was an easy victor and that was Martin Janovitch in the First ward, who had no opposition. In the Sixth Anton Dushak, the only other Republican alderman elected, was given the seat of his life, coming from H. J. Deters, a Democrat. Much excitement marked the counting and recounting of the votes in the Sixth ward and it is probable that Mr. Deters will ask for an official recount. Perhaps the biggest aldermanic surprise was the defeat of F. C. Novack in the Seventh ward. Frank Berger, the Democratic candidate, received 116 ballots while Mr. Novack totaled 113. Two new faces will be seen on the county board as far as the city is concerned. In the First ward A. F. McGillis, Democrat, lost to George Quimby, and in the Fourth T. C. Christopherson, Republican, was beaten by Fred Berger. The only real interest attached to the election of supervisors was in the Fourth ward, where the politicians predicted a close and fierce battle. Thomas Broen, Democrat, was elected justice of the peace. The winners in the various wards were: First Ward—Alderman, Martin Janovitch, Republican; supervisor, George Quimby, Republican. Second Ward—Alderman, Otto Grassl, Democrat; supervisor, Mat Botkoll, Democrat. Third Ward—Alderman, Wolfgang Stauber, Democrat; supervisor, Nels Christopherson, Republican. Fourth Ward—Alderman, George Damm, Democrat; supervisor, Fred Berger, Democrat. Fifth Ward—Alderman, John LaSalle, Democrat; supervisor, Wolfgang Reinold, Democrat. Sixth Ward—Alderman, Anton Bushen, Republican; supervisor, R. P. Sorenson, Democrat. Seventh Ward—Alderman, Frank Berger, Democrat; supervisor, Louis Kruezl, Democrat.

Hunting Club Will Appeal—

Judge Joseph H. Steere of the circuit court for Chippewa county having filed an opinion upholding the contention of the plaintiffs in the case of C. E. Ainsworth and Frank Trempe of Sault Ste. Marie vs. the Munoskong Hunting and Fishing club, the defendants will carry their case to the supreme court. The members are not satisfied with the decision, which holds that their hunting preserve, Munoskong bay, is part of the great lakes and that the public should have access thereto for the purpose of hunting and fishing. The history of the case is interesting. The complainants had been hunting in Munoskong bay for ducks during the open season. In the month of September, 1906, they were hunting from a rowboat in shallow water amongst some reeds in front of lands belonging to the Munoskong club, about a half mile distant. The club had caused notices to be posted in various places warning trespassers from that portion of the bay. Two of the club's gamekeepers, acting under instructions, rowed out to them and ordered them away. The hunters protested and insisted on their right to hunt. The gamekeepers, however, remained in view and rowed around amongst the decoys. An injunction was gotten out and the club filed a demurrer. This went to the state supreme court, which overruled the demurrer and sent the case back to the circuit court.

The complainants contended that

Munoskong bay was a part of Lake Huron, subject to the laws applicable to the great lakes, which give them the right to navigate and hunt on those waters off the shore and outside the meandered line of the defendants' possessions. The defendant contended that the bay was part of the lake and part of St. Mary's river, and was subject to the laws of rivers, under which the defendants, as shore owners, have exclusive control and right of hunting upon the waters in front of their lands. In upholding the contention of the plaintiffs, Judge Steere, in a long opinion, concludes as follows: "It is the testimony in this case and a well-known fact of which the court could almost take judicial notice that ice forms earliest, thickest and lasts the longest on Mud lake and down past Point au Frene, towards Lime Island. Navigation is often delayed latest there at the opening of navigation of any point on the lakes. The great fleets, starting from Lake Superior in the spring frequently are detained there by solid ice when St. Mary's river above and the great lakes with a strong current, constant current running through it those conditions could not exist. The rise and fall of water in Mud lake and Munoskong bay depends on the rise and fall of Lake Huron. This, with the relative position, size and general features of that body of water, gives its character as that of an arm or bay of Lake Huron, subject to the rules of law governing the great lakes."

POISON TOBACCO SMOKE.

That the element of nicotine in tobacco enters the blood of the smoker to any appreciable degree, physicians no longer charge. But by far the gravest charge yet made against the weed is by the London Lancet, that the smoke contains in large proportion the poisonous gas, carbon monoxide. Until recently by equally good authority the statement of the Lancet must be accepted that the fumes of an ounce of tobacco in cigarettes contain from one pint to one quart of this gas, while the same weight of tobacco smoked in a pipe gives forth two and one fourth to five pints. Of the toxicity of carbon monoxide no doubt exists. It is the chief constituent of illuminating gas, and is decidedly harmful in quantities far short of that needed to produce asphyxiation. Air with so small an admixture as fifteen hundredths of 1 per cent of the gas makes a "distinctly dangerous" inhalant, and the proportion alleged to be found in tobacco smoke would easily account for the dizziness, shortness of breath and palpitations experienced by excessive smokers.

If it is demonstrated that carbon monoxide should be feared by smokers, it ought to become profitable for the cigar manufacturers to make brands and device methods that will produce the gas in minimum quantity, while taking advantage of the mellow qualities of tobacco. Meanwhile the Lancet's comparison of pipe and cigarette is useful in showing that the cigarette would be less pernicious were it not that the cigarette user is more addicted to inhaling the smoke.—New York Times.

GRIP AND PNEUMONIA ON THE INCREASE.

The increase in the Deaths Resultant from Grip and Pneumonia is Most Alarming, and Physicians Everywhere Are Recommending Duffy's Malt Whiskey as a Reliable Cure and Sure Preventive.

Scientists and physicians have been appalled at the rapid increase in the death rate from acute respiratory diseases, especially in the large cities. Statistics from cities, large and small, showing a steady yearly increase in the prevalence and fatality of grip and pneumonia, have forced these diseases to the front as demanding an immediate and sure preventive which is found in Duffy's Pure Malt Whiskey.

Grip and pneumonia attack the system quickly and relentlessly. They are especially dangerous at this season of the year when exposure to sudden and severe changes of weather and atmospheric conditions is frequent. They are sure to attack the system run down from worry, overwork or exposure.

For more than fifty years Duffy's Pure Malt Whiskey has been recognized as the best cure and preventive of grip, pneumonia and all diseases of the respiratory organs. Physicians who studiously conform to the ethics of the profession publicly recommend it and are prescribing it for their patients. It is in use in leading hospitals throughout the country.

The secret of the marvellous success of Duffy's Pure Malt Whiskey in curing and preventing lung troubles lies in the fact that it's the greatest strengthener and health builder known to medicine. It not only checks the ravages of the disease itself, but replaces the weakened, destroyed tissues, helps the stomach to more perfectly digest and assimilate food in order that more, richer and purer blood may come from it, and regulates and governs the heart's action, so that the circulation will be strong and powerful, carrying health and vigor to every organ and part of the human body.

Negaunee Department

IRON STREET TO BE GREATLY IMPROVED

NEGAUNEE'S PRINCIPAL BUSINESS THOROUGHFARE TO BE MACADAMIZED WITH CRUSHED ROCK, SPREAD IN THREE LAYERS OF DIFFERENT SIZES.

"The improvements on Iron street will be the first work undertaken in the highway department this spring," said E. C. Anthony, chairman of the board of public works. "We intend to do a first-class job and will put the thoroughfare in much better condition than it has ever been before. Three layers of different sized crushed rock will be spread. The rock in the first layer will be about the size of a hen's egg, that in the second about the size of a pigeon's egg and the third will be about the size of a pea. In places it will be necessary to remove a considerable portion of the present surface material, in order to bring the street to the proper grade and to obtain a satisfactory finish. In some places we will have to take off at least a foot, but at other points it may not be necessary to remove more than six or seven inches of the gravel. With a new dressing of from six to twelve inches of crushed stone, solidly packed by the street roller, we expect to make a surface that will be almost as solid as pavement. This is a long and tedious job, but the teams will not have to pull them leads over the surface while the finishing work is being prosecuted. It is our intention to put in concrete gutters, two and one-half feet in width, on both sides of the street.

The problem how to best get rid of the telephone and electric light poles in the street has not yet been disposed of, but we will certainly have a number of the poles removed. As they now stand they disgrace the street and I believe that all the wires now on the several blocks will be removed on from 25 to 30 per cent fewer poles. There are from eighty to 100 poles in the two blocks of the street. At fifteen or twenty different places there are two poles within from one to four feet of each other. I am in favor of tub poles, which will be smaller and uniform in size, taking up less room and presenting a much better appearance than the timber poles. The large poles of the Bell company, most of which are eighteen inches at the base, will interfere with the construction of the gutters. If tub poles were used the bases would not be more than from six to eight inches.

Superintendent Willman, of the board of public works, thinks it would be a good idea if the several companies, excepting the street railway company, needed to be removed from the street were either compelled to remove them to Jackson street on the north and the alley on the south, or to erect tub poles of uniform height and thickness.

AGAINST TONNAGE TAX.

Former Negaunee Man Member of Protesting Delegation.

Christ M. Hansen, formerly of this city, is a member of a delegation of about 200 citizens of St. Louis county, Minn., who left Wednesday afternoon for St. Paul to appear before the senate committee on taxation and tax laws to register a protest against the tonnage tax which is to be levied on the house and is now before the senate.

LOCAL LACONICS.

R. H. Dudley of Hancock looked after business in the city yesterday.

William Maddiford, a former resident, was here from Princeton yesterday.

L. T. Chaussee received a carload of doors for the new high school building from Oshkosh yesterday.

George Williams, who a short time ago bought a driving horse in Oshkosh, received the animal yesterday.

D. B. McDonald, of the diamond drill contracting firm of Cole & McDonald, is here from the Mesaba range.

W. H. Israel, the photographer, has had plate glass placed in the windows of his studio on West Iron street.

Bishop G. Matt Williams will confirm a class at St. John's Episcopal church in this city a week from next Sunday afternoon.

Mrs. M. Joyce, who sustained a fracture of an arm and received other injuries Monday morning, is improving slowly.

U. R. Durrer, the tile contractor, was here from Milwaukee yesterday, looking over the work at the new high school building.

Levine Bros. of the Savings Bank, store announce their Easter opening for this year. Their advertisement will be found in this issue.

ISHPEMING TURNS THE TABLES.

Negaunee Loses the Second Ball Game of the Series by Score of 6 to 9.

It is "horse and horse" now between the Ishpeming and Negaunee baseball teams. Ishpeming having been defeated in the first of the series of five games for the championship of the iron country, the Hematite City players turned the tables last evening, taking the second game by the score of 9 to 6. The visitors won by heavy stickwork and snappy fielding. One of the very biggest crowds that ever thronged Adolph rink witnessed the contest, and there was excitement from start to finish. The score by innings was:

Ishpeming 0 2 0 0 3 0 1 3 0—9
 Negaunee 0 0 0 0 3 0 0 3 0—6

Batteries: Erickson and Nichols, for Ishpeming; Mitchell and Dunlavy, for Negaunee. Strike-outs, Erickson, 8; Mitchell, 8. Bases on balls, Erickson, 1; Mitchell, 2. Hits: Ishpeming, 12, Roberts, Peterson and Howser, each getting doubles, Devine and Roberts each two singles, and Peterson, Nichols, Erickson, Wall and Harrington, each one single; Negaunee, 3, these being a two-bagger by Dunlavy, a two-bagger by Messier and a single by Murphy.

Devine and LaFave were the umpires, as on the first occasion, and they again gave the best of satisfaction.

The next game of the series will be played at Ishpeming the evening of April 16.

EASTER SERVICES.

Program Will Be Given at St. Paul's Church Sunday Morning.

Rev. R. T. T. Hicks, rector of St. John's Episcopal church, has prepared a program for the Easter service, Sunday morning at 10:30 o'clock, as follows: Processional, Hymn 110..... Kyrie..... Prayer..... Epistle..... Gloria Tibi..... Nicene Creed, Hymn 112..... Sermon..... Offertory Anthem..... Christ Is Risen..... Williams Hymn 122..... Sustain Corda and Sanctus..... Prayer, The Humble Access..... Benedictus..... Qui Venit..... Consecration..... Agnes Dei..... Reception of Holy Communion..... Gloria in Excelsis..... Processional, Hymn 121..... Office of Holy Communion in key of "D" by Newman H. Athos..... At 7:30 there will be evening prayer.

VAUDEVILLE NEXT WEEK.

A. C. Crinnian, who recently bought out the Bijou theater, will run vaudeville, commencing next Monday night. The house is to be conducted under the name of the Wolverine Amusement company and J. C. Woodworth, who has been employed in Mr. Crinnian's Bijou theater in Ishpeming, will be the manager. The entertainments will be similar in many respects to those given at the Bijou at Ishpeming. The house there has proved a financial success up to this time and it is anticipated that the Negaunee house will also pay. A new Lufin machine, one of the best on the market, will be used for the moving pictures and high-class illustrated songs will be sung. Mr. Crinnian, who is located at Sault Ste. Marie, was in the city yesterday completing arrangements for the opening.

MANY ILLUSTRATIONS.

The Negaunee-ian, the annual publication of the senior class of the Negaunee high school, will contain more illustrations than usual this year. W. H. Israel, the photographer, has taken many pictures for it during the past few weeks and most of them have already been developed. Among the groups are the members of the freshmen, sophomore and junior classes, girls' and boys' gym clubs, boys' basketball and football teams, also the girls' basketball team. Individual pictures have been taken of the members of the senior class, numbering over thirty, the largest class ever graduated from the local school, also of the members of the faculty and school board, all of which will have a place in the annual.

RADIUM FOR THE MASSES.

A ray for every noble man will be the coming advertisement for curative agencies. The professed discovery of a form of radium that has all the merits and none of the demerits of the famous metal first brought to knowledge by Marie Curie and her distinguished husband, should quicken the pulse like an announcement of airships with every house to let. Radio-thor may be a real discovery. It may indeed be a sovereign balm for numerous ills. It may even be produced so cheaply as to permit every one to sustain radio activity at will. If it has the indestructible quality of the radium of which there is only an ounce or so in the world, then the possessor of a portion of the substance may will it in perpetual devolution to his heirs, provided that it is not so cheap as to be absolutely commonplace.

It has been hinted that when radium becomes easily obtainable it will be used as cigar lighters and at the same time will supersede the present forms of illumination for houses and streets. A coat of radium paint in America last, forever and give out a soft, beautiful glow. There are numerous other things enter into the substance of radium dreams.

In the meanwhile the skeptical world will await the development of the American rival to the radium now exclusively manufactured in Austria and be content to class the radium age as an innocent exaggerated anticipation—Baltimore American.

Mr. F. G. Fritts, Oneonta, N. Y., writes: "My little girl was greatly benefited by taking Foley's Orino Laxative and I think it the best remedy for constipation and liver trouble." Foley's Orino Laxative is best for women and children, as it is mild, pleasant and effective, and is a splendid spring medicine, as it cleanses the system and clears the complexion. Sold by all druggists.

Mrs. Jerry Reidy, an old and well-known resident, who has been critically ill for several days past, was reported considerably improved yesterday.

The business houses of the city will close today at noon, remaining closed the remainder of the day, in accordance with an agreement between the merchants and their employees.

Manager Sebern, of the Rooney Boys, of Chicago, was in the city Thursday endeavoring to secure a date for the con-

YOU PROVE IT!

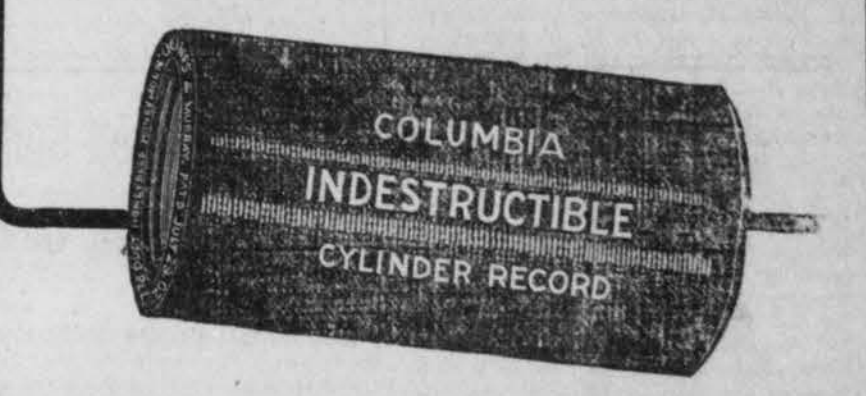

An invitation to all owners of cylinder machines—Columbia and others.

We could argue the quality of Columbia Indestructible Cylinder Records until a year from now—but what good would it do if you could not prove it for yourself by coming into our store and seeing and hearing it? We could print a whole newspaper every day about the special and original Columbia processes of manufacture—and get nowhere at all if the Records did not bear the evidence.

COLUMBIA INDESTRUCTIBLE CYLINDER RECORDS

won't break, no matter how roughly they are used, they won't wear out, no matter how often they are played. Moreover, their tone is far purer, clearer, more brilliant than that of any other cylinder record made. Don't merely take our word for it—come inside our store and listen.

J. J. WENTELA, Negaunee.

WANTED—A competent cook and housemaid. Good wages paid. Apply to Mrs. A. Maitland, Negaunee.

LOST—Man's ring, contains large red stone. Liberal reward. Return to J. M. Perkins' drug store.

The ladies of St. John's Episcopal church will conduct their weekly party sale tomorrow morning at J. W. Elliott's furniture store. Among the articles to be on sale will be bread, Easter eggs, candy, pies, cookies, etc. Parties desiring to place orders in advance are asked to call up Miss Lulu Cyr.

The council met last evening and canvassed the vote in Monday's election. The annual appointments to the municipal positions will be made by the council next Thursday. The election resulted in two changes on the board, J. E. Nelson, being the new alderman from the First ward, and Frank Larson from the Second.

English Oak lodge, Sons of St. George, has made extensive preparations for its annual entertainment and supper, to be given tonight. Supper will be served in Shea's hall and the entertainment will follow immediately after in McDonald's opera house. A three-act comedy will be produced and there will be specialties between the acts, also selections by the Negaunee band.

A ray for every noble man will be the coming advertisement for curative agencies. The professed discovery of a form of radium that has all the merits and none of the demerits of the famous metal first brought to knowledge by Marie Curie and her distinguished husband, should quicken the pulse like an announcement of airships with every house to let. Radio-thor may be a real discovery. It may indeed be a sovereign balm for numerous ills. It may even be produced so cheaply as to permit every one to sustain radio activity at will. If it has the indestructible quality of the radium of which there is only an ounce or so in the world, then the possessor of a portion of the substance may will it in perpetual devolution to his heirs, provided that it is not so cheap as to be absolutely commonplace.

DANIEL VAUGHAN NOW THE MAYOR

TOOK OATH OF OFFICE LAST NIGHT AND PRESIDED AT HIS FIRST COUNCIL MEETING.

RECOUNT IN THE THIRD WARD

Petition of Henry Patenaude, Who Claims That He Was Really Elected Alderman, Is Granted.

Daniel Vaughan took the oath of office and became legally the mayor of the city of Marquette at 8:30 o'clock last evening. As he took the mayor's chair in the council room a few moments later to preside at his first meeting, he was greeted by prolonged and enthusiastic applause by the aldermen and the large crowd that filled the gallery to overflowing. Although the meeting was very short and no difficult parliamentary situations were encountered, the new mayor showed that he was not a stranger to parliamentary law, discharging his duties without despatch and without apparent embarrassment.

Owing to the small amount of business to come before the council, the regular order of business was dispensed with and the following resolution, offered by Alderman Ekstrom and seconded by Alderman Donovan, was unanimously adopted:

"Resolved, That a vote of thanks is hereby tendered Hon. John Robertson for his uniform courtesy and fairness as presiding officer of the common council, for the past two years; and

"Resolved, That we recognize in Mr. Robertson one of our most enterprising citizens in the upbuilding of the city, and we extend to him our kind regards and good wishes for his continued success in life.

The liquor bonds of Timothy Foley and Fred W. Thoney for another year were presented and approved.

Preceding the meeting in the council room, the aldermen met in the recorder's office to canvass the vote cast at Monday's election, as shown by the books returned by the election officers of the five wards. In the absence of Mayor Robertson, Walter T. Ward presided at this meeting, and on motion of the council appointed Alderman Schaner, Peters and Donovan to canvass the vote. The report of this committee was to the effect that Daniel Vaughan had been elected mayor; Daniel S. Donovan, recorder; K. P. Byrne, treasurer; Peter Primeau, L. P. Cray and C. D. Blanchard, justices of the peace, and Jacob Dolf and John Bergh, constables, by the votes and majorities announced in these columns several days ago.

Recount in Third Ward.

A recount of the vote for alderman in the Third ward was granted on petition of Henry Patenaude, the defeated candidate. Although the returns of the election board, M. E. Asire received 189 votes and Mr. Patenaude 182, giving Mr. Asire a majority of seven. The petition charges that the election board made a mistake in tallying the votes cast; that they refused to count several ballots that were really intended for Mr. Patenaude; that ballots were counted for Mr. Asire that ought not to have been, one of which was not marked for either candidate, and that because of all the errors recounted the petitioner believes that a recount will show that he, and not Mr. Asire, received a majority of the votes cast in the Third ward. The members of the election board in this ward were Robert Peters, Herman Wagner and J. E. Sherman.

As Alderman Asire is absent from the city, the recount was postponed until Monday night at 7:30 o'clock. The next meeting of the council will be held Monday night, April 19, at which it is expected that the mayor will make a number of appointments.

NAVIGATION WILL BE SLOW.

Labor-Trouble Imminent and Lake Business Is Not Rushing.

"It looks to me as if navigation would be pretty slow, at least until the latter part of the season," said a well known marine man yesterday. "Present indications are that the trouble between the marine engineers and the vessel owners will not be settled, and I have heard that the firemen, cooks and stokers are willing to stand with the engineers in their determination to fight the 'open shop' policy. One of the officers of the engineers' association has proposed to the vessel owners, as a compromise, that the men go to work without any contracts at all, but I do not think the proposition has been accepted."

"I am of the opinion that the vessel owners do not care particularly whether they man their boats early in the season or not. I understand there is ore enough in the Pittsburg district to supply the furnaces for eight months or more, and there is plenty of coal at the head of the lakes to meet all demands for some time. The packet freighters will probably make effort to get out as soon as the weather permits, but the owners of the larger boats do not appear to be in any hurry to get their vessels in commission.

"Many of the engineers did not have regular work last season and so are on their 'uppers' now, which makes it an exceptionally favorable time for the owners to inaugurate the 'open shop' policy. However, the engineers do not seem disposed to give up without a fight and it looks very much as though there would be labor trouble with the opening of navigation."

MILLINERY ANNOUNCEMENT.

I have opened up my millinery stock at Mrs. J. M. Smith's, 327 High street, where I am showing all the new spring and summer styles. I would be pleased to have my customers call.

DEATH OF LEDA THORNTON.

Yalmar Girl, Well Known in This City, Passed Beyond.

Miss Leda Thornton, the seventeen-year-old daughter of Mr. and Mrs. William Thornton, of Yalmar, passed away at 6:30 Wednesday morning, following an illness of two years from tuberculosis. Until a few months ago, the deceased had been employed in this city and for a short time last month was a patient at St. Mary's hospital, but, at her request was taken home a few weeks before her demise. The funeral will be held this afternoon at 2 o'clock from the house and German Lutheran church near Cheongarden. Rev. Annes Maywood of this city officiating. Besides the sorrow-stricken parents, five sisters and two brothers are left to mourn her death: Mary, of this city; Edna, a teacher at Chococlay; Ethel a student at the Normal school, and two sisters and two brothers at home.

HOME RULE BILL LIKELY TO PASS

CHIEF FEATURES OF MEASURE FATHERED BY REPRESENTATIVE TUTTLE.

The Hally home rule bill was introduced in both senate and house Tuesday night, Senator Tuttle fathering it in the senate and Representative Monroe in the house. Copies of it are to be printed at once and it is to be the basis of the act which it is expected will be passed.

Among men familiar with municipal law and the government of cities it is considered an excellent bill. It provides in the first article that cities shall continue to have all present rights and powers together with those granted by the new constitution; in new charters there may be provision made for the collection of taxes of not to exceed 5 per cent of the assessed valuation of property; and to borrow not to exceed 10 per cent of the assessed valuation. In accordance with the constitution there are provisions for incorporating in charters provisions for municipal ownership under certain restrictions for the initiative, referendum and recall. There is an extensive article devoted to what cities may not do, among which is a prohibition of increasing the rate of taxation or the bonding limit as now fixed by law except by a vote of a majority of the electors and then not over 2 per cent in any one year, up to the limit fixed by the home rule act; no new charter nor amendments to existing charters may be proposed more often than once in two years, and then only after ninety days' notice; not more than two special elections may be held in any one year; nor the salary of any officer increased during his term; nor bonds issued except a sinking fund is provided to pay them; nor any franchise submitted to the electors at a special election except the cost shall be deposited with the city treasurer by the grantee named in the franchise; nor grant any franchise for public utilities which is not subject to revocation at the will of the city, unless it shall provide that in the event of purchase or condemnation by the city, no compensation shall be given for the value of the franchise.

Charter commissions shall consist of three members from each ward who are freeholders and residents of the city at least five years. The governor of the state is authorized to approve or veto any charter prepared by a commission and if he veto it he shall give his reasons and then it may only be submitted to the people upon a two-thirds vote of the commission.

Villages of over 2,500 population may incorporate as cities.

That municipal elections may not be held at the time of national elections is one of the significant features of the bill and it further avoids entirely the big question of what representation cities shall have on boards of supervisors.

That municipal elections may not be held at the time of national elections is one of the significant features of the bill and it further avoids entirely the big question of what representation cities shall have on boards of supervisors.

OPPOSED TO PRISON BILL.

Warden Russell and E. C. Anthony Pro- test Against Marquette Idea.

Warden Fuller, of Ionia, Warden Russell, of Marquette, and E. C. Anthony, of Negaunee, appeared before the committee on judiciary in Lansing Wednesday morning in opposition to the Marquette bill providing for the return of convicts to their respective counties after completing their sentence. The wardens want a state agent appointed whose work shall consist in furnishing first friends to convicts. It is their idea that the sheriff and county agent of the county shall act in a similar capacity and when they are unable to locate a first friend the case can be referred to the state agent. The prison officials say such a provision is absolutely necessary for the reason that the indeterminate sentence act would fill the prisons to overflowing in a brief period.

GUILD HALL NOTES.

The Guild Hall will be closed today, Good Friday.

P. B. Spear has been added to the Athletic committee, the other members being A. T. Roberts and A. E. Miller. This committee have charge of the gymnasium and plunge.

Director Burdette has been laid up for several days with la grippe, but is now on the mend and expects to resume his duties in a day or two.

The Hooney boys have been engaged to give one of their celebrated concerts at the Guild Hall on the evening of May 25.

At a meeting of the managing board yesterday it was decided hereafter to exclude boys and men from the Guild Hall up to noon each day so that the women members will have the exclusive use of all departments during the mornings.

The total membership has now reached 432, divided as follows: Sustaining, 24; men, 140; women, 84; boys, 117; girls, 67. Present indications are that the total will soon reach 600.

NOTICE.

All parties are forbidden dumping garbage at Champion street, near the L. S. Carriage works, or any other part of the city. All garbage must be taken to the city dumping grounds.

Z. VADNAIS,
Health Officer.

The regular Saturday night show will be held at Fraternity Hall tomorrow night. Music by the Peerless orchestra.
(4-9-2d)

COURTESY URGED UPON EMPLOYES

SOUTH SHORE ROAD ASKS ITS MEN IN CIRCULAR LETTER TO OBSERVE THE GOLDEN RULE.

The managers of the railway companies desire their employes to be always courteous to the public.

Some way the general impression exists that railway heads care but very little as to how trainmen, agents and others who may come in contact with their patrons, treat them, but this is not the case.

Once a year many of the companies send circular letters to their employes treating on the subject of "courtesy." The following is a copy of such a letter sent out by the general passenger department of the Duluth, South Shore & Atlantic railway. It is addressed to every employe of the company who in any way comes in contact with the public:

"The possession in marked degree of any worthy faculty should always be an incentive to develop that faculty. This company considers that its agents, conductors and other representatives, possess above the average, the faculty of being courteous to the public. To those who cultivate and exercise this faculty the company extends its congratulations and its thanks; to those who do not fully appreciate its importance, careful consideration of the following is suggested:

"The principle that underlies courteous treatment of others is simply that of doing unto others as you would they should do unto you.

"In a highly complex and technical business such as that of the railroad there are many things that you, with your training and daily experience, understand with perfect familiarity, but which the public do not understand; therefore do not assume that the public should comprehend them without asking questions, but when inquiry is made of you give the courtesy of a reply just as full and clear as you can make it, without any suggestion of superiority born of a greater knowledge.

"Words are only one means of expression and manner is quite as important; therefore remember that a kindly and gracious manner is not only the sign and mark of a self-respecting man, but is to your words what oil is to machinery in making them move effectively to their purpose.

"True courtesy is no respecter of persons. It remembers that a man's a man for all that, and gives the civil word and the helping hand quite as readily to the ill-dressed stranger as to an official of the company.

"Courtesy is not only something the public have a right to expect of you but it pays.

"It pays in the friends it makes you personally and as a representative of the company.

"It pays in minimizing the friction of your life, as well as that between the company and its patrons.

"It pays in raising your standing with the company.

"It pays in the personal satisfaction resulting from having done the right and kindly thing by your neighbors.

"It is the wish of the management of this company that all its representatives, whose work brings them into contact with the public, may appreciate and fully measure up to their duty and privileges in this respect."

WILLIAM A. MAGEE, Republican, Has
Taken the Oath of Office.

Pittsburg, April 8.—William Addison Magee, Republican, has been inaugurated first mayor of Greater Pittsburg, succeeding George W. Guthrie, Democrat. Mayor Magee's cabinet is made up from members of the regular Republican organizations. Mayor Magee was born in Pittsburg, Pa., on May 4, 1873, and was educated in his home city. Shortly after his appointment in 1898 as one of the indictment clerks to the district attorney of Allegheny county, Pa., he began to read law with Robert S. Frazer, now judge of the common pleas of Allegheny county. He was admitted to the bar in 1895, and early obtained such a reputation as a member of the junior bar that he was promoted, in 1897, to the position of assistant district attorney, which he held for a period of two years, but resigned in order to devote his professional attention wholly to his own practice. He accepted the nomination as a member of the common council of Pittsburg, to which he was elected in 1898 and again in 1900, though he resigned that post of honor in 1901, to fill a vacancy in the senate of Pennsylvania, caused by the death of his uncle, Christopher L. Magee. At the end of his senatorial term he declined a renomination for the state position, his purpose then being to retire from political activities and devote all his attention to his profession, a resolve he religiously kept for several years. But when the political pot began to boil so furiously in 1906 he was urged to accept the Republican nomination for mayor of Pittsburg. He was defeated, though he made a splendid run. Running again this last year he was elected. Mr. Magee is a member of the Duquesne Country, American, Tariff and Colonial clubs.

TAKE IT IN TIME.
