

PETROLEUM "JOKER" WILL BE CORRECTED

With That as the Purpose, the House Calls Upon the Senate to Return the Payne Bill at Its Next Sitting.

Washington, April 12.—The house was in session for two hours and fifteen minutes today. The first action taken was the adoption of a resolution calling upon the senate for the return of the Payne tariff bill next Thursday.

Two Resolutions Provoke Opposition. There was much opposition to two resolutions, one to appoint several janitors and the other to appropriate for the expenses of the house incident to the extra session.

Not Restricted to Tariff Legislation. That the present session of the house called to enact tariff legislation, is not restricted to that subject, was the decision of Speaker Cannon during the course of the day.

WIFE IS EXILED ALSO. Not Permitted to Land in Venezuela, Mrs. Castro Is Forced to "Move On."

Washington, April 12.—Mrs. Castro, wife of the former president of Venezuela, also is being kept out of that country. Dispatches from the American diplomatic representative in Venezuela announce that Mrs. Castro, with the party accompanying her on the steamship Guadeloupe, from which the former president was deported at Fort De France, arrived at La Guaira Saturday.

HASKELL CASE DROPPED. Dictated from Washington, Prosecution of the Governor Is Abandoned.

Muskogee, Okla., April 12.—The statement was given out from the United States district attorney's office here today that it has been decided to abandon any further prosecution of Governor Haskell and the six other prominent Oklahomans recently involved in the Muskogee town lot case.

U. S. SCOUT CRUISERS RACING; THE CHESTER IN THE LEAD. Newport, R. I., April 12.—The Chester had a lead of nearly eight miles at the end of the first half of the twenty-four hours race of the scout cruisers, and apparently was a sure winner of the contest, according to a wireless dispatch received here just before midnight.

By restoring the Dingley rates to barley and barley malt and by reducing the taxation on the breakfast table by cutting down the duties on coffee substitutes and placing cocoa on the free list, the senate amendments to the Payne bill bid for popular favor.

TARIFF ON IRON ORE IS PUT AT 25 CENTS

Amended by the Finance Committee, the Payne Bill Is Reported to the Senate, and Its Consideration Will Begin Thursday.

Washington, April 12.—The amended tariff bill is now on the senate calendar, and by agreement reached on the floor the consideration of the measure will begin on Thursday. The bill was laid before the finance committee, with the Democratic members present, at 10 o'clock this morning.

Many Rates Yet to Be Fixed. As reported, the bill does not contain all the changes in rates which the finance committee proposed to make. Although several important amendments, such as the restoration of the Dingley rates on women's gloves and hosiery, the placing of works of art on the free list and the assessment of a duty on iron ore, have been made, the revenue producing possibilities of the bill are little changed.

Insists Income Will Be Adequate. In discussing the revenue features of the bill, Mr. Aldrich insisted that as it will be amended by the senate the Payne bill will provide sufficient funds to meet the expenses of the government without resorting to an extra session.

Philippine Provision Rewritten. Besides the dutiable and free lists, the only additional provision of the Payne bill reported today is the Philippine free trade provision.

EX-CONGRESSMAN BABCOCK IS REPORTED MUCH BETTER; GOVERNOR LILLEY, TOO.

Washington, April 12.—Former Representative Babcock, of Wisconsin, who has been seriously ill at his home in this city, is steadily improving.

Mercury at Cripple Creek Drops to Six Below Zero.

Mercury at Cripple Creek, Colo., April 12.—Thermometers in the Cripple Creek district registered six degrees below zero tonight.

First Cousin of Lincoln.

Bloomington, Ill., April 12.—Thos. J. Hanks, first cousin of Abraham Lincoln, died here today, aged eighty-eight.

THE WEATHER.

Washington, April 12.—The following is the weather bureau's forecast for Upper Michigan: Snow, Tuesday, colder in the southeast; Wednesday, partly cloudy; moderate west winds.

BODY OF PETROSINO IS GIVEN SEPULCHRE.

All New York Pays a Tribute of Grief and Respect to the Memory of the Famous Detective Whom Assassins Killed in Italy Some Weeks Ago.

New York, April 12.—All New York paid a tribute of grief and respect today to the memory of Lieutenant Joseph Petrosino, of the New York police department, who was assassinated recently while engaged in secret service work in Italy.

DECIDES CASE BROUGHT AGAINST WRONG MEN.

Court Frees Publishers Notwithstanding It Is Held That the Article of Which J. D. Rockefeller, Jr., Complained Is a Gross and Vicious Libel.

Washington, April 12.—The writ of habeas corpus issued in behalf of S. Carvalho, Bradford Merrill and Edward H. Clark, editors of the Star, and publishers of the New York American and Evening Journal, in the action brought against them for criminal libel on complaint of John D. Rockefeller, Jr., was upheld by Justice Gerard in the supreme court today.

WASHINGTON ASKS ABOUT IT. Iowa Boy Told He Must Join the Navy or Go to Reform School.

Des Moines, Ia., April 12.—Secretary of the Navy Meyer, in a letter received by Judge Brennan of the district court today, takes official cognizance of the present court order that John Flood, seventeen years old, indicted on two forgery charges, must either join the navy or go to the reform school.

MR. TAFT PRESSES THE BUTTON. Has the Honor of Opening the Southern Electrical and Industrial Exposition.

Louisville, April 12.—The Southern Electrical and Industrial exposition was officially opened today, when President Taft pressed a connecting button in the White House, thereby setting all the machinery in motion.

SULLIVAN TO LEAD THE WHITE SOX. Chicago, April 12.—William J. Sullivan will command the Chicago White Sox baseball team of the American league, succeeding Fielder Jones, Charles A. Comiskey, the owner of the club, made official announcement of Sullivan's appointment today.

PERU'S METROPOLIS SHAKEN. Lima, April 12.—A severe earthquake was experienced here early today. No casualties have resulted.

COURT APPOINTMENTS RECEIVERS. Syracuse, N. Y., April 12.—Judge George W. Ray, in the United States court here today, appointed receivers for the Outing Publishing company of Deposit, publishers of the Outing, Bohemian, Green Goose and Brain's magazines, for Knapp Bros., Lankers Deposit and Callison. The Outing receivers were authorized to continue the business of the company for thirty days.

TREASURY RECEIPTS GAINING.

Washington, April 12.—Assistant Treasurer Coolidge, speaking today of the customs, internal revenue and other treasury receipts, said of the expenditures this year, said that the daily deficit is steadily diminishing. He said: "The daily average receipts from customs, Jan. 1 to April 10, were \$1,071,861. This is nearly up to the average for the corresponding period of 1907, which was \$1,144,637. The average for the corresponding period of 1908 was only \$890,072. The returns from the internal revenue have not been so favorable. The average daily receipts since Jan. 1 have been \$750,223, against \$773,078 for the corresponding period of 1908 and \$853,320 for the corresponding period of 1907.

BASEBALL.

STANDINGS OF THE TEAMS. American League. Washington 10 1000 Philadelphia 1 0 1000 Detroit 0 0 000 Chicago 0 0 000 Cleveland 0 0 000 St. Louis 0 0 000 New York 0 1 000 Boston 0 1 000

AMERICAN SEASON OPENS.

Record-Breaking Crowds Witness Games at Washington and Philadelphia.

Washington, April 12.—The American baseball season here opened today in a game between the Washington and New York clubs before what was said to be the largest crowd that has ever turned out in this city, there being about 15,000 paid admissions.

Philadelphia, April 12.—With the largest crowd present that ever witnessed a baseball game in this city, the American league season here opened this afternoon with a record of 30,162 paid admissions while nearly 1,000 persons were present as guests of the clubs.

Philadelphia 10 20 1 0 13 5 8 13 2 Boston 0 0 0 0 0 1 0 0 2 Batteries: Plank and Powers; Arnlans and Carrigan.

BAR ASSOCIATION TAKES ACTION. Proceeds Against Attorneys Who Caused Dismantling of Jurist's Home.

Atlanta, Ga., April 12.—The grievance committee of the Atlanta bar association has notified Attorneys Charles J. and Jesse L. Moore that charges have been filed against them. They were the attorneys who sued out a writ of attachment in justice court and then dismantled the home of United States Circuit Judge W. J. Sheppard.

MOUNT ETNA IN ERUPTION. ASHES ARE FALLING THICKLY AND MUCH FEEL IS FELT.

Naples, April 12.—Mount Etna is in eruption. Ashes are falling thick on the surrounding country. Considerable apprehension is felt.

SOUTHERN PITCHER'S REMARKABLE RECORD. Macon, Ga., April 12.—The Macon team of the South Atlantic league defeated Mercer University today, 1 to 0, in a ball game featured by the remarkable pitching of Sam Weems.

ST. LOUIS UNIVERSITY PASSES FROM CONTROL OF THE JESUITS. St. Louis, April 12.—Control of St. Louis University, an institution with 1,900 students, which for ninety years has been in the hands of the Jesuits, was transferred to an advisory board of laymen, many of whom are non-Catholics.

GOVERNOR WARNER TAKES A HAND

As a Result of His Activity, the Advalem Bill Comes Out of the House Committee, and With a Favorable Report.

Already Having Passed the Senate, It Is Expected That It Will Now Be Put Through the Lower Branch of the Legislature—Assessing Their Property at Cash Value, It Very Considerably Increases the Taxes of the Wire Service Companies.

WALL STREET MARKET IS STRONG AND ACTIVE.

Renewed With Fresh Confidence, the Speculative Operations for an Advance Carry the Prices Comprehensively Upward on a Large Volume of Business.

New York, April 12.—The speculative operations for an advance in values were renewed with fresh confidence today in the stock market, and the prices were carried comprehensively upward on a large and varied volume of business.

VALUABLE LANDS AT STAKE.

Frank Charged by the Government in Suit to Cancel Idaho Patents.

St. Paul, Minn., April 12.—Forty thousand acres of timber land, worth \$1,000,000 to \$3,000,000, are at stake in a case in which testimony was taken today by Attorney Payton Gordon, of Washington, special assistant to the attorney general of the United States.

FEES OF \$30,000 IN DISPUTE. Hamilton County, Ohio, Brings Suit Against Former Auditor Lewis.

Cincinnati, O., April 12.—Suit to recover fees of the approximate amount of \$30,000 was filed against former County Auditor Eugene Lewis by County Prosecutor Hunt on behalf of Hamilton county today.

DEPOSITORS BRING SUIT. Grave Charges Made Against Officials of Defunct Napoleon (O.) Bank.

Napoleon, O., April 12.—Charges of mismanagement, negligence and malfeasance are made in a civil action for an accounting of transactions involving \$200,000, begun in the common pleas court here today, against the directors and other officials of the defunct Citizens' State bank by depositors of the institution.

Pursued for Two Years. Peoria, Ill., April 12.—The arrest of Louis Allard on his arrival in New Orleans from Cuba, Panama, today, ended a chase extending over a period of two years. He was followed to Chicago, then to New Orleans, where it was learned that he had sailed for Cuba. The authorities at the latter place were requested to arrest him, which they did on his arrival there. Later he was released, for reasons unknown here.

HUSBAND KILLED BY AUTO. SHE GETS DAMAGES OF \$25,000. San Francisco, April 12.—Mrs. Mary Kingsford was awarded \$25,000 damages by a jury today for the death of her husband, Albert Kingsford, who was run down and killed in 1907 by an automobile belonging to the Levi Strauss company. She had asked for \$50,000.

PRIEST'S BUSINESS AFFAIRS. PUT IN TRUSTEE'S HANDS. Cleveland, April 12.—William M. Reynolds today was chosen trustee of the business affairs of Rev. Father William McMahon, who filed a petition in bankruptcy last week, giving his connection with the P. J. Kiernan enterprises as the reason for his failure.

STEAMER MOORE OPENS NAVIGATION ON LAKE SUPERIOR. Fort Arthur, Ont., April 12.—Navigation opened on Lake Superior today when the steamer Moore, from Duluth, arrived in Thunder bay at noon.

DEED IS CHARGED TO THE BLACK HAND

Joseph Fillipoli, Part Owner of a Thriving Grocery Business in Chicago, Is the Victim of a Particularly Atrocious Murder.

Following the Receipt of Letters Demanding Money, He Is Engaged in Locking the Store for the Night, With His Baby in His Arms and His Wife by His Side, When He Is Shot by an Italian, Who Is Run Down and Captured.

Chicago, April 12.—Another murder of peculiarly desperate character, attributed by the police to the "Black Hand" society, occurred here tonight. Joseph Fillipoli, a grocer, was shot in front of his store by an Italian who was caught and identified later as having left a letter demanding \$1,000 on a saloon keeper's bar in the neighborhood a few weeks ago.

Fruit Dealer Escapes Bullet. Chicago, April 12.—While in his home today, James Arrigo, a fruit dealer, had received and ignored two letters signed by the "Black Hand" society recently, was shot at, but was not injured. He is preparing against another attack.

MURDER AT FARGO, N. D. Just Released from Jail, Negro Kills Man Who Betrayed Him.

Fargo, N. D., April 12.—Released from jail at 3:30 o'clock p. m. today, Edward Simpson, colored, got into an altercation with Charles Clarke, a colored restaurant keeper, which resulted in the killing of the latter at 9:30 p. m. Simpson, formerly belonging to a gang of safecrackers which he helped to break up, turning state's witness. He was greeted as a traitor by his former companion, and he resented the reception with bullets. Seven shots were fired. Simpson made no attempt to escape, and at the police station, it is said, he made a full confession.

ELECTRIC CARS COLLIDE. Wreck Two Miles West of Gary, Ind., Results in the Injury of Thirty Persons.

Gary, Ind., April 12.—Ten men were severely injured and a score were badly hurt in a head-on collision on the Chicago & South Bend interurban line two miles west of Gary this afternoon. But one passenger on the eastbound car, which contained twenty persons, who had boarded it at Hammond, escaped without injury of some kind.

ALLEGED SWINDLER ARRESTED. New Orleans, La., April 12.—Louis P. Allard was arrested here tonight, upon landing from the steamer Parisiana, from London. It is charged that he defrauded merchants of Peoria, Ill., of about \$300,000 on bogus checks and drafts. He is said to have been formerly the manager of an automobile company at Peoria.

ST. LOUIS UNIVERSITY PASSES FROM CONTROL OF THE JESUITS. St. Louis, April 12.—Control of St. Louis University, an institution with 1,900 students, which for ninety years has been in the hands of the Jesuits, was transferred to an advisory board of laymen, many of whom are non-Catholics.

STEAMER MOORE OPENS NAVIGATION ON LAKE SUPERIOR. Fort Arthur, Ont., April 12.—Navigation opened on Lake Superior today when the steamer Moore, from Duluth, arrived in Thunder bay at noon.

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED.)

Issued daily except on Sundays. Contains Associated Press dispatches and is especially devoted to the Upper Peninsula interests.

SUBSCRIPTION RATES: Per month, by carrier, \$1.00; Per year, by mail, \$10.00.

MARQUETTE, MICH., APRIL 13.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

The Third ward recount has gone the way of most recounts.

This is the week that the major league ball teams start off in a bunch.

The great question for the Michigan fans this season is, "Will the Tigers be three time pennant winners?"

A little judicious publicity seems to have sufficed to put the Crystal Falls "bouncing committee" out of business.

Speaker Campbell has been dubbed "czar," and, forsooth, his rulings are arbitrary enough to have earned the title for him.

How can anyone be expected to know where the legislature is at, when it is so plainly to be seen that the legislature itself doesn't know?

The teams of the Marquette-Alger county baseball league are lying low, but are doubtless saving wood, i. e., reaching out for all the loose talent that may chance to be in their neighborhoods.

The "ultimate consumer" will be pleased to learn that Senator Aldrich has provided for a more liberal provision of downward revision than is found in the draft of the Payne tariff bill that has been approved by the house.

At Lansing pretty much every legislator is riding his pet hobby, and there aren't a sufficient number of members on any one hobby to make it likely that there will be any large measure of results.

A Kansas statute, newly passed, provides for the daylight saloon, i. e., a saloon that opens no earlier than 7 a. m. and closes at 8 p. m. That is about as near an approach as a state can have to prohibition without providing the real article.

It will be a very interesting development, won't it, if Senator Aldrich, who has been pointed to as the very prince of "stand pat" congressmen, shall turn out to be one of the most thoroughgoing downward revisionists in the whole body?

State Treasurer Sleeper continues to once a month take the public into his confidence as to the condition of the treasury. It is not his fault if his monthly statements show a most unsatisfactory state of the state's financial affairs.

It is reported that the majority of the house committee that has the bill for the ad valorem taxation of telephone and telegraph companies favor reporting out that measure. It appears that they would hasten to report it out they would save the legislature much mental wear and tear.

One time President Castro will have a hard time, too, persuading the world that he has been misused. The popular idea is that he has been getting just what was coming to him. A man can't make an international nuisance of himself without finally reaping the harvest of his bad conduct.

Senator Aldrich's theory that the luxuries of life, rather than the necessities, should bear the greater part of the burden of providing revenue for the government is a sound one. It proposes to put the greater part of this burden on the shoulders of the people who can best stand it, and there's where it belongs.

The senate passed the bill for the selection of the force of census takers on a civil service basis, this despite the eloquent criticisms by numerous influential senators. The bill that will finally become a law will be just the kind that former President Roosevelt asked for when he vetoed the measure that represented the views of congress.

Former President Roosevelt repudiates the alleged interviews with him published in the Paris newspapers. The Paris journalists come back with an assertion that Mr. Roosevelt talked in the vein in which he is quoted. The great mass of people will credit Mr. Roosevelt rather than the Parisian newspaper men, for they have every confidence that Mr. Roosevelt would not, and could not, utter the silly twaddle that the newspapers of the French capital put into his mouth. If the latter wanted to get away

with their fakes they should have studied the Roosevelt style more closely and printed stuff that sounded more like what the alleged author of their utterances would be likely to say.

A telegram received from Representative Young yesterday related that the senate committee which has been considering the Payne tariff bill, co-incident with the discussion of that measure in the house, had decided to place a duty of twenty-five cents per ton on foreign iron ores imported into this country. This is five cents better than the duty it was reported last week that Senator Burrows and Smith had persuaded the committee to agree to, and furnishes a measure of protection that will be satisfactory to the interests dependent on the industry of iron mining on the Michigan and Minnesota ranges. That the duty agreed on by the senate committee will be found in the tariff bill that will finally be signed by the president is practically certain, for the senators and congressmen who have been opposing free iron ore have made out a strong case, and have brought many members who in the first instance favored removing the duty entirely around to their way of thinking. Representative Young, along with the Michigan senators, has done excellent work along these lines, and it is a matter of satisfaction to the people of the Lake Superior district that this work has borne such good fruit.

WHEAT AND THE COST OF LIVING.

It is not so much the high price reached by wheat as the maintenance of a big price over a long period that will disturb the consumer. In the same way it is not skyrocketing but price stability that impresses the farmer. If things continue as they are much longer he will become convinced that they mean money in his pocket. Up to a certain point the consumer's loss is his gain.

Ordinarily it is said, and it is probably true, that the farmer reaps little or no benefit from the speculative manipulations which send wheat prices soaring. Perhaps he loses by them oftener than he gains. In the winter of 1895 cash No. 2 wheat sold in Chicago at 48 1/2 cents per bushel. In May, 1898 the Leiter speculation drove the price of the same grade to \$1.85 a bushel, but by October it was down to 62 cents. Wheat sold as low as 66 1/2 cents in 1887; in September, 1888, it went up to \$2, but the following year saw it down to 75 1/2 cents. Fluctuations such as these are of only temporary significance, if any, to producer or consumer. They mean most to the trader.

But when wheat prices remain generally high for almost a year at a time, when there is an acknowledged shortage and no sign of material change—except such as may be afforded by the probability of an increased spring sowing—the consumer and farmer reasonably begin to fear and hope, respectively, that the situation is of pronounced personal significance. It does the consumer no good to be told that, on the basis of an extension of acreage and an improvement in methods of cultivation, there is no extravagance in predicting that the world's wheat crop will reach 10,000,000,000 bushels at a not distant time. He will be satisfied if it is only a little over 5,000,000,000 bushels at the present time.

Yet if bread goes up may not other things come down? Builders assert that the cost of building construction has decreased from 20 to 25 per cent in a year. If that remains a fairly permanent condition the reduction should gradually work itself into rents. And if rents come down, if the butcher greener, and baker have to pay less, they can afford to sell for less—and competition will take care of the rest. This is not the only factor that may contribute to the reduction of prices—that may even contribute to the neutralization of an advancing tendency in bread. It is believed that the cost of living is working lower. Should that prove true our consideration for the consumer may shortly be changed to an attitude of congratulation. Wheat may scar, but let us not count our troubles before they are hatched.

INSISTED ON SHAVING HIMSELF.

Patron of City Shop Who Wanted to Be His Own Barber.

Two barbers were disengaged when the customer came in. Both got their chairs ready, but the newcomer dodged them.

"I need a shave all right," he said to the proprietor, "but I want to shave myself. Can you accommodate me here?"

"Certainly," said the proprietor, "but I'll charge you the same as if one of my men shaved you."

"That's all right," said the man. "I'm not kicking about the price. All I want is a chance to do my own barbering."

A tonsorial outfit was speedily produced and the self-sufficient individual went to work, and apparently he knew his own business.

"Isn't that a new wrinkle?" asked another man, who had been an interested observer of the proceedings, and who had been through the barber's hands.

"Not at all," returned the proprietor. "Every once in awhile we run up against a fellow who prefers to shave himself, but hasn't the apparatus handy. We keep a lot of razors in stock for the accommodation of just such independent customers."

FIVE HUNDRED DOLLARS.

"Wouldn't Pay Me for the Relief I Got from Piles."

"For 12 years I suffered with piles, brought on by strain or hard work. Since using Hem-Roid eight months ago, I have not had an attack, can do any labor and eat what I wish without ill effect. I would not be in my former condition for \$500."

(Signed) Wm. McAdams, Cook's Falls, N. Y.

Sworn to before notary March 23, 1908. Dr. Leonhardt's Hem-Roid, an internal tablet cure for piles, is sold for \$1 by the People's Drug Store, Marquette, Mich., City Drug Store, Ishpeming.

REPORT OF Prof. Henry E. Kuphal

Mining Engineer

On the Property of the Triangle Mining & Development Company Re-Organized and now known as Montana-Clinton Copper Company of Clinton, Montana.

Missoula, Montana, March 29th, 1909.

MR. M. E. O'BRIEN, Laurium, Michigan

DEAR SIR:—

Complying with your request, I again visited the Triangle Group of Claims, on March 23rd, 1909, going over the ground carefully, and also made an examination of the upper workings of the Hidden Treasure Lode, upon which the Triangle Company has a perpetual lease. On March 27th, I, accompanied by Mr. Gephart and Mr. Hughes, located a water-right of 8,000 inches, made a preliminary survey of Rock Creek, relative to the establishment of a power plant.

LOCATION

The Triangle Company's property is located in the Wallace (unorganized) Mining District, in Woodville Gulch, Missoula County, Montana, about two and one-half miles northeasterly from the town of Clinton, on the main line of the Northern Pacific and the main line of the Chicago, Milwaukee & St. Paul Railways.

GEOLOGY

The formation of this district consists of a granite batholith, which is a large mass of volcanic material, injected between the older sedimentary strata, there cooling and solidifying and naturally changing or metamorphosing the structure of the adjacent sedimentary formation into quartzites, schists and gneisses. But, as these large masses take a great many years to cool, due to their immense size, they furnish an abundance of heat to the percolating waters, thereby enabling them to take up and carry the minerals which they later deposit at a place where they lose their heat and pressure, such as would be furnished by a fault, or fissure in the mother rock.

All the veins in these claims lie near the contact of this granite and the metamorphic series. The Triangle, Grass Widow, Morning, Big Dipper, Blue Monday and First Day are in the granite, while the Hidden Treasure, Tip-Top, Red Rock, Timber Line, Cold Spring and San-Toy veins are in the Quartzite.

They are all true fissure veins, having been formed by a rupture of the mother rock and subsequently mineralized by infiltration of the richer sulphides of copper and iron.

The minerals containing the values are chalcopyrite (copper pyrites) bornite (peacock copper) and chalcocite (copper glance) with occasional malachite and azurite, the carbonates of copper, near the surface.

The accompanying gangues are hematite, siderite, quartz and decomposed, or rather, shattered granite. In the Hidden Treasure lode the gangue consists almost entirely of quartz.

The hematite (black specular iron) in the Triangle vein, which I mentioned in a previous report, is steadily diminishing, as added depth is being attained, and at present is almost entirely absent.

CLAIMS

In this group are eleven (11) claims: The Triangle, Grass Widow, Morning, Big Dipper, Blue Monday, Red Rock, Cold Spring, San-Toy, Tip Top, Timber Line and First Day, Lode Mining Claims.

In addition to the above claims is a townsite, described as follows, viz: All odd-numbered blocks, except Block numbered 33 and lots numbered 1, 2 and 7 in Block numbered 3 and Lot numbered 7 of Block numbered 1, Townsite of East Clinton; also an undivided one-half interest in and to all that part of the S. E. 1/4 of Sec. 27, Township 17, North of Range 12 West, not included in townsite of East Clinton, except the rights of way of the Northern Pacific and the Chicago, Milwaukee & St. Paul Railways.

TRIANGLE CLAIM.

There are three (3) veins on the Triangle claim, opened up by surface cuts and drifts. The main vein having a drift run in about 540 feet, which would represent a depth of about 450 feet below the apex of the vein directly above. This vein in the present face of the tunnel is about 14 feet wide and continues to widen out as the drift progresses. Samples taken from the face resulted as follows: Two per cent copper, .5 ounces silver and .02 in gold value—\$5.80. An 8 inch seam on the foot wall assayed 15.4 per cent copper, .24 ounces gold and 3.20 ounces silver. A 4-foot seam of ore on the hanging wall assayed 4.65 per cent copper, 1.20 ounces silver, and .04 ounces gold. The ore in this vein comes in seams, with poor ore and waste between. It could easily be mined by stripping the waste from the ore, and then shooting down the clean ore for the mill.

GRASS WIDOW CLAIM

The Grass Widow claim is opened up by two small drifts, one, fifty and the other seventy-five feet in length. A vein is exposed here, five to eight feet in width, thoroughly impregnated with chalcopyrite, azurite and malachite. Assays therefrom resulted as high as 26.32 per cent copper, 3.40 ounces silver and 40c. gold. This vein could be worked profitably from the surface, but the topography of the immediate vicinity is too inaccessible to permit this without the assistance of a separate tramway, and a far better way presents itself. The Grass Widow vein is parallel to, and about 400 feet from the Triangle vein. By cross-cutting from the Triangle tunnel to a point below the chute exposed above on the Grass Widow claim, abundant stoping ground will be obtained, as a depth of 500 feet will be reached immediately below the chute, and by continuing the drift along the vein, as much as 900 feet in depth can be reached.

HIDDEN TREASURE

The vein in the Hidden Treasure claim has an average width of about 21 feet, opened up for about 350 feet. A slope has been opened for about 100 feet, where the shipping ore is exposed, extending from 100 to 20 feet in height, and about 30 inches in width. Assays of this resulted in 8.51 per cent copper, 46.8 ounces silver and .34 ounces gold.

Samples across the entire 21 feet of concentrating ore, exclusive of the shipping ore, assayed 1.91 per cent copper, 2.8 ounces silver and 0.6 ounces gold, value \$7.15 per ton.

This ore could be all broken together, increasing the value of concentrating ore, and milled together, eliminating the cost of narrow stopes and sorting the ore. The stopes could be continued to the surface, for a distance of about 300 feet, on an average of the 350 feet exposed in the tunnel. This would mean about 140,000 tons of ore above the present tunnel, which would represent a value of about \$980,000, figuring all the ore at \$7 per ton.

OTHER CLAIMS

The remaining claims of the Triangle group all show well-defined veins, but as they are still in the prospective stage, being merely opened up by shallow cuts, much cannot be said about them. But, by comparing the surface indications with like conditions in this district, they can all be relied upon as prospects worthy of further development.

TIMBER

All of these claims are covered with an abundant growth of Tamarack, Pine and Fir timber, which could be easily cut and hauled down to the Triangle claims, where it could be cut up into lumber and mining timber. A site has been located near the Triangle tunnel, where a mill can be erected convenient for receiving the logs from the slopes above and also on the wagon road to the town below.

POWER

Measurements of the water on Rock Creek showed a flow of about 15,530 miner's inches, or 378 cubic feet per second. The fall of the creek at this place is about 100 feet per mile. At this time of the year the water is almost at its lowest point, so that 8,000 miner's inches, which has been taken up, could be had at any time of the year. By carrying a flume with 5,000 inches of water for about a mile, sufficient fall would be obtained to furnish over 1,000 H. P., and also ample head room left for the tail-race. A pole line of 3 1/2 miles will transmit the power to the mill-site at Clinton, and from thence a smaller line could be carried to these mines, to run Compressor, Sawmill, etc.

MILL-SITE

The company is in possession of a good gravity Mill-Site, at Clinton, close to both railroads, where the water could be flumed from the Helgate river, and ample room could be obtained to dump the tailings. A spur could be built by either railroad from here to within about 3,000 feet of the mouth of the Triangle tunnel.

I understand that the Chicago, Milwaukee & St. Paul road, has promised to build this spur as soon as sufficient ore could be produced to warrant it. From this point a tramway could be built to carry the ore by gravity from the ore bin to the railroad below, eliminating all delays in hauling, on account of bad roads, washouts, etc.

COMPRESSOR

The ground has been broken, near the mouth of the Triangle for the Compressor, which could be put into operation as soon as the power plant is established.

REMARKS

The first efforts of the Company should be directed towards opening up the Grass Widow from the Triangle tunnel. This can only be profitably accomplished by means of a Compressor and air-drills, as the ground is very hard and hand-work too slow and expensive. So the erection of the power plant on Rock Creek should be gone ahead with as soon as possible, and as there can be no interference from high water this can be commenced at any convenient time.

As there is sufficient ore in the present Triangle tunnel and more being continuously opened up as the drift progresses, including the ore already on the dump, with the large body of ore exposed and blocked out in the Hidden Treasure lease, the property, at the present time is in prime condition to warrant the erection of a 100-ton Concentrator. So this work should also be pushed so as to have the plant ready for operation as soon as the power-plant is completed.

There is ample timber conveniently located to warrant the erection of a mill capable of cutting 25,000 feet of lumber per day, which could be readily sold for from \$15.00 to \$25.00 per thousand feet. This alone would be an item quite worthy of consideration.

I would advise the erection of a compressor immediately. This could be run at present by a steam boiler, which could also be used to operate a preliminary saw mill, where the lumber of the flumes, power plant, mill, etc., could be cut, thereby saving a great deal on lumber, haulage, etc.

THIS PROPERTY, IN MY ESTIMATION, IS AT THE PRESENT TIME, BEYOND THE PROSPECTIVE STAGE. The Triangle tunnel has proved that the veins are true fissures, and continue to improve rather than diminish in depth, not only in values, but also in width, so that any new work, such as the cross-cut to the Grass Widow and the advancement of the Triangle tunnel can have no other result than that of improving the present conditions.

HENRY E. KUPHAL, Mining Engineer.

POST-LENTEN SOCIAL SEASON.

Big Masonic Party—Knights of Pythias Entertain Tonight.

Mr. and Mrs. P. H. O'Brien and Mr. and Mrs. M. E. O'Brien of Laurium entertained last night with a dancing party at the First National bank hall, Laurium, the party being the society opening of the post-Lenten social season in the Portage lake cities will open this evening, when Columbia lodge, No. 144, Knights of Pythias, of Houghton, will give one of its popular informal dancing parties in the Citizens' bank hall. There will be dancing from 9 to 2 o'clock, and supper will be served at midnight.

DEATH OF JOSEPH KERREDGE.

Aged Hancock Resident Passed Away Suddenly Sunday Afternoon.

Joseph Kerredge, father of William Kerredge, owner of the Kerredge theater and a prominent Hancock hardware dealer, died Sunday afternoon at his son's home in West Hancock. He was lying on a lounge after dinner, apparently in the best of health, but between the time of his request for a glass of water and its being brought to him he passed away. His end was very peaceful.

Mr. Kerredge was born in England, at Suffolk, several years ago. He emigrated to Canada fifty-two years ago and for some three years managed a farm for his English owner. Then he came to the copper country and entered the employ of the Peewabic Mining company. Mr. Kerredge later devoted his time to farming, contracting, then to the lumber business and some years ago was engaged in a general merchandise business at L'Anse. He and his son founded the business now conducted by William Kerredge at Hancock and ten years ago he retired. His son and a daughter, Mrs. C. E. Scott of Pittsburg, are his surviving children. Mrs. Kerredge died two years ago.

ROYAL Baking Powder. Absolutely PURE. The only Baking Powder made from Royal Grape Cream of Tartar. Makes the finest, most delicious biscuit, cake and pastry; conveys to food the most healthful of fruit properties.

COPPERDOM BREVITIES.

The Hancock aerie of Eagles will give a dance tomorrow night in Germania Hall.

Patrick Moran, the sweet singer of Duluth, arrived in Houghton yesterday, on a visit.

L. J. Bowen of Washington, D. C., has arrived in Hancock to take a position with Architect H. T. Liebert.

The Independent, a new weekly paper, is announced to make its initial appearance in Hancock next Friday.

J. J. Zealand won the Sunday shoot of the Houghton Gun club, with a score of sixty out of a possible seventy-five.

Captain Johnson Vivian of East Houghton continues to improve in health and hopes for his complete recovery at once.

Rev. Fr. LaForrest, a former resident of the copper country, has been returned to Calumet.

W. Frank James, the new mayor of Hancock, has taken the oath of office and will preside at the first meeting of the council next Monday night.

Miss Valerie Croze, who is attending the University of Michigan, is home for the Easter vacation with her parents, Mr. and Mrs. Joseph Croze of Houghton.

The Frank E. Long Stock company, one of the oldest and most popular organizations making this territory, opened a week's engagement at the Kerredge theater last night.

The annual parish meeting of Trinity church, Houghton, was held yesterday morning. The following vestrymen were elected for three years: Fred L. Newsham, W. B. Houff and Dr. W. P. Scott.

Ben Getteman, manager of the Hancock Savoy theater, has tendered his resignation to Hancock lodge, Knights of Pythias, for a benefit performance next Friday night, and the lodge has accepted.

The annual meeting of the Calumet & Arizona Mining company was held at Houghton yesterday. None of the copper country directors were present, the meeting being a formal matter and making no change in the directorate.

Charles Mills of Houghton, who was operated for appendicitis in Chicago, several weeks ago, is expected home tomorrow. Mr. Mills was near death for a time, the operation having been a particularly delicate one, but he is now virtually restored to health.

The Hancock police are looking for burglars who broke into the residence of Miss Mary Dunn and the offices of A. Green and J. A. O'Neill during the past week. Nothing of great value was taken, but considerable damage was done by the visitor by the breaking of the police believe the jobs were all done by mischievous youths.

UNION LABOR SOCIAL AFFAIR.

Joint Meeting Called to Arrange for Big Gathering.

Committees from all the labor unions of Houghton and Hancock have been appointed to meet in Hancock April 19 for the purpose of arranging for a big dancing copper country party. The following are the union committees:

Miners—J. Champion, W. Saunders and Mr. Bonleau.

Smelters—Messrs. Schneider, Nagel and Lagunes.

Painters—Messrs. Stuart, Silverson and Isman.

Carpenters—Messrs. Stralow, Wallace and Amundson.

Barbers—Messrs. Warshaw, Tryball, Printers—Messrs. Maki, Thompson and Rodda.

Gigar Makers—Messrs. MacGuire, McColl and Zimmerman.

This is the first big dancing party ever arranged by the labor unions of the copper country. The date for the party has not yet been selected.

COMPLAIN TO TAX COMMISSIONER.

President R. H. Shields Will Have Appraisal of Timber Lands.

The Michigan state tax commission, of which Robert H. Shields of Houghton is president, has received complaints of undervaluation of timber lands in Baraga, Houghton and Ontonagon counties. The complaint is that there is such a great difference between the assessed valuation and the price asked by the land owners that there must be some irregularity.

The commission will at once send two experts into these counties to inspect these lands and the local conditions to determine the justice of the complaint. It is not unlikely that the investigation will extend to all counties in the state in which timber lands are located.

HOUGHTON COUNTY BOARD.

Meeting This Morning Will Consider the Sanitarium Plan.

The regular April meeting of the Houghton county board of supervisors will be held this morning. The board will organize, this being the first meeting of the new body, and the chairman, A. A. D. Edwards will be re-elected to that position, which he has now held for five years.

The most important business will be the consideration of a scheme to build a county sanitarium for the treatment of tuberculosis. It has met with favor by the board and is advocated by the medical and anti-tuberculosis societies. They estimate it will cost \$25,000.

DARANTELLA

10c Havana Cigars, 10c

report of that company for the year 1908, comments the Boston News Bureau. In the negotiations the Bigelow people insisted that their Tamarack holdings must be included with the rest of their shares, or there would be no trade, so the Calumet interests reluctantly acquiesced, after insisting that the Tamarack floating debt of \$700,000 be put in such shape as would make further financing unnecessary for a long time. While Tamarack shows an apparent "surplus of assets" of \$477,336 Dec. 31, last, there is an actual deficit in cash assets of \$660,000, which figure must have been considerably increased since the first of the year.

The one item in the recent report which stands out conspicuously is the drop in the copper contents of the rock to 19.3 pounds per ton, the lowest in the history of the mine. While some saving was made in the 1908 costs per pound of copper, as compared with the previous year, the cost last year was still very high, or 15.24 cents, which makes it very evident that on the present copper market the mine is producing its copper at a loss of fully two cents per pound. It is of interest to glance at the company's operating statistics over a series of years. In such a comparison the extremities of Tamarack on a low metal market are made painfully apparent. It is clearly to be seen that there is no profit to the company on anything less than a 15-cent copper market, so long as the rock mining yields less than 1 per cent copper. The company's Cliff property would seem to hold out the only promise of a new era for Tamarack shareholders.

The figures clearly testify to the declining copper value and the Calumet conglomerate vein at great depth, but show that in the operating department, commendable progress has been made by Tamarack in reducing costs, at least at the stamp mill. The declining mineral contents have naturally been reflected in increased costs per pound of copper product. Below are shown the costs for a series of years, including and excluding construction as an operating charge. In this table are also shown the dividends paid per share:

Table with columns: Year, Dividends, Bl. ex. cons., Bl. inc. cons., Bl. cons. per share. Data for years 1904-1908.

Tamarack has 60,000 shares. The company began dividend payments in 1888 and has since then paid forty-three dividends, aggregating \$9,420,000. It will be interesting to watch developments under Calumet & Hecla control.

KEWEENAW.

Keeweenaw's mill test has been terminated and the stamp mill is now shut down. The results of the test, though demonstrating the unproductiveness of much of the lode material milled, by no means prove the Mesora mine worthless. A fair proportion of rock is well mineralized, and with the creation of openings sufficient to permit a proper selection, can be made to return a profit. Mining operations will continue without interruption. On the fifteen level a drift is being run to the west fissure in which some exceptionally fine ground has already been opened up. What the drift will disclose at this point is problematical.

The best showing in the mine to date is had on the eleventh level at the intersection of the drift with the west fissure. On the thirteenth level the showing is rather indifferent and an upraise will be made to locate the rich ground opened above. In the north lode, opened by a crosscut on the seventh level, about 150 feet of drifts reveal fairly well-mineralized ground. The drift is approaching the seventeenth level. Conditions generally, however, are not encouraging. The Keearsage lode, which traverses the lands of the company for ten miles, will be exploited early this summer. The company owns a very complete railroad which it values at \$800,000. Standing timber it values at \$400,000, to say nothing of 20,000 acres of mineral lands, and cash and supplies of \$200,000.

NOTES OF COPPER NEWS.

It is asserted that the Greene-Canaan is in a position now to place its copper on the market at a cost of something near ten cents per pound, and that the costs are being made on an average of 15 cents per pound. With a larger production of the same grade of ore, of which there is a great supply available, the costs should be reduced still further, and the profits increase both in the gross and per ton.

The annual report of the Groux Consolidated showed the company's treasury to be well supplied with cash. The development of the property will be conducted on a large scale, but the value of the ore deposits of the Groux have been known for a long time, and all the company needed was a supply of cash and efficient management. This it now has, with the Cole-Ryan interests in charge, and the future of the property is therefore assured.

Measured solely by the price of copper and the operating profits possible thereunder, copper shares in general are selling relatively high, says the Boston News Bureau. Copper shareholders are well aware of this fact and have full knowledge that in respect to some companies, at least, the current rate of dividends is not being earned. Nevertheless, such has been the distribution of copper shares since the panic of 1907, and so confident are shareholders that the present depression in copper will be of brief duration that there is absolutely no pressure to sell. On the other hand, there are periods when there is apparently a shortage in the floating supply of stock, making it easily possible, on the appearance of any substantial buying, to create quite a buoyant sentiment.

THE ONLY WAY.

Millionaire (to attorney)—It is my desire to leave all of my property to the United States government. How can I do so and be sure a lot of relatives won't get it after I'm gone?

Attorney—Turn all your holdings into United States bonds and notes, and burn them on your death-bed.—Judge.

THOSE SERVANTS.

Lady of the House—So it was an unexpected circumstance that the servant of my friend was at the shop at the same time you pawned my watch? Of course you said it was yours?

Servant Girl—Naturally; she said the same thing. Then how we both laughed!—Mogendorfer Blatter.

Schweitzer, Resident Manager. We solicit your stock business. Our daily quotation sheet and market letter sent for the asking. Office open from 7:30 a. m. to 8 p. m.

Upper Peninsula

Is Youngest Lake Captain—Word has been received of the promotion of Benjamin J. Gallagher, an Escanaba man, to the command of the big new carrier, the H. B. Beecham, which was launched last season and which carries the mail across the Transportation company. Captain Gallagher will be twenty-six years of age next June. He has been sailing the lakes since he was twenty. Last season he had command of one of the old wooden boats and gave such satisfaction that he has now been given the command of one of the largest carriers on the lakes. He expects to be in Escanaba with his boat after a cargo of ore as soon as navigation opens.

Bridge Construction Enjoined—Judge Steere of the Chippewa circuit court has issued a temporary injunction restraining Whitefish township from constructing a solid bridge across Tahquamenon river at a point near the mouth of that stream. The plaintiff is the Chesbrough Lumber company. It is alleged that if a solid bridge is constructed navigation will be blocked. At the point where the bridge is projected the river is about 200 feet across. It has been deep for the past twenty-five years the stream has been navigable to schooners and tugs for a distance of about eighteen miles. The Chesbrough company has used the river for many years and the stream has been an important artery of trade. Heretofore the Tahquamenon has been spanned by what is known as a jockknife bridge, with a "bit" to allow vessels to pass. Recently the township closed a contract with the John Bridge & Iron company for a solid bridge and work on the piers has been under way this spring.

Hot Contest at Munising—It is too weak a word to describe the Munising township spring political campaign, says the Munising News. Even "sizzling" scarcely fully describes the character of war was probably the most interesting and eventful campaign in the history of this township. Both factions hustled out every man they could get and the result was a larger vote than is usually cast. The contest was so close in Precinct No. 1 that the ballots had to be very carefully counted and it was not until almost breakfast time Tuesday morning that the canvassing board could give out anything definite. Eleven ballots out of over 550—only a very large proportion—were declared "spoiled," on account of distinguishing marks, and were thrown out by the election board. The official count of the election board, as it now stands—is as follows: Supervisors, Marcus A. Doty, 329; Ezra J. Bonch, 226; Clerk, Edwin Niess, 317; Walter Featherly, 315; Treasurer, Eugene Cotey, 327; Chas. A. Olson, 507; Highway commissioner, A. E. Bannan, 315; Ed Davis, 280; Justice, W. Boneruan, 302; G. S. Meeker, 320; School inspector, D. W. McDougal, 341; John Wacker, 300; School trustee, George J. Prolet, 285; Andy Symon, 345.

Presert Presented Popular Pastor—At a congregational meeting at the First Presbyterian church at Escanaba, Rev. P. B. Ferris, the pastor, was presented with a purse of \$125. Mr. Ferris will leave June 14 for New York city, and June 19 will sail on the steamship liner Koenig Albert for a three months' tour of Europe, the purse presented him being raised to help defray the expenses of the trip. As Mr. Ferris has received the hint of the intention of his people, his surprise at being so kindly remembered was genuine. It was a substantial token of the high esteem in which the members of the church hold the popular young pastor. The itinerary of the trip Mr. Ferris contemplates includes nearly every country of Europe and the northern part of Africa. He expects to teach first at Gibraltar and then visit Algiers and Tunis. Among the European countries to be visited Italy will con-

sume about twenty-six days of the time, as stops will be made at Naples, Pompeii, Florence, Rome, Capri and Vestivins. After visiting the lakes of northern Italy Mr. Ferris will leave for Switzerland, Belgium, Holland, France, Germany and the British Isles. Mr. Ferris expects to sail from Ogdontown on the steamer Lusitania Sept. 15 for the United States.

Electric Results at Bessemer—The city election at Bessemer was one of the most interesting held for many a year. No organized partisan politics entered into the contest, but the main issue was "equal taxation" between the different classes of property. The issue was represented by two tickets, the Citizens', supposed to represent the local property holders, and the Fusion, representing the mining interests. Of course "political and personal side issues" entered into the contest to a greater or less extent and made it exceedingly difficult to win the result in the case of individual candidates. Andy Byrne, candidate for mayor on the Citizens' ticket, was elected by a good majority over John Holland, the "Fusion" candidate, but the result as a whole was mixed. W. L. Gayer, candidate for city clerk on the "Fusion" ticket, was elected to succeed himself, defeating Torston Egan, who was the "Citizens" candidate. D. P. Green, "Citizens" candidate for city treasurer, pulled a victory from J. D. Shea, his opponent on the "Fusion" program. For justice of the peace W. Haggerson was the "Fusion" candidate and he received votes enough to defeat John P. Mueller, the "Citizens" candidate. Of the aldermen three "Citizens" and two "Fusionists" were elected. E. W. Yelling was successful in the First ward, Frank C. Davis in the Second, Nick Gladziak in the Third, R. Gorceo in the Fourth, Stephen McDonald in the Fifth. Of the supervisors, three "Fusionists" and two "Citizens" were elected. Axel Kristianson was victorious in the First ward, William McMill in the Second, Ed. Johnson in the Third, Wm. C. Rows in the Fourth and Andrew Forslund in the Fifth.

Republicans Snowed Under—Monday's election in McMillan township (Newberry) resulted in an overwhelming defeat for the Republicans, their entire ticket being snowed under with minorities ranging from thirty to one hundred. The result was a complete surprise, both to the victors and defeated candidates, the Republicans having generally been conceded to have the pole in the race. The Newberry News thus explains it: "The defeat of the Republicans was due to two causes—over-confidence and the disaffection of the Swedish and Finnish voters. At the Republican caucus, John Gronberg, the candidate of the Swedes for highway commissioner, was defeated for the nomination and his followers went out of the caucus without a vote. To make the job complete and be sure of landing their men they voted the ticket entirely, voting the 'Citizens' ticket straight from top to bottom. It was a beautiful and artistic job, but one that will probably act as a boomerang when ever a candidate in the field at some future election. On the state ticket the Republicans relied up a majority of seventy-five over the Democrats." F. J. Paik was elected supervisor, F. S. Seymour, clerk, N. Pelletier treasurer, Wm. Green, Jr., highway commissioner, C. W. Metcalf justice of the peace, and Ed. Johnson member of the board of review. In Columbus township the Republican ticket was defeated by the Citizens by a narrow margin. George Koontz being the only candidate on the Republican ticket to pull through. B. A. Hoidrich will succeed Albert Patrick as member from that township on the county board. In Lakeland township the Republicans were successful over the Citizens, electing their entire ticket with the exception of clerk, John Teed defeating F. W. Greenfield for this office. Robert Byers will succeed Mr. Smathers on the county board.

Dividing the moon's surface into 125 parts, 72 of them are visible from the earth.

Despair and Despondency

No one but a woman can tell the story of the suffering, the despair, and the despondency endured by women who carry a daily burden of ill-health and pain because of disorders and derangements of the delicate and important organs that are distinctly feminine. The tortures so bravely endured completely upset the nerves if long continued. Dr. Pierce's Favorite Prescription is a positive cure for weakness and disease of the feminine organism.

IT MAKES WEAK WOMEN STRONG, SICK WOMEN WELL.

It allays inflammation, heals ulceration and soothes pain. It tones and builds up the nerves. It fits for wifehood and motherhood. Honest medicine dealers will sell it, and have nothing to urge upon you as "just as good." It is non-secret, non-alcoholic and has a record of forty years of cures. Ask Your Neighbors. They probably know of some of its many cures. If you want a book that tells all about woman's diseases, and how to cure them at home, send 21 one-cent stamps to Dr. Pierce to pay cost of mailing card, and he will send you a free copy of his great thousand-page Illustrated Common Sense Medical Adviser—revised, up-to-date edition, in paper covers, in handsome cloth-binding, 31 stamps. Address Dr. R. V. Pierce, Buffalo, N.Y.

City Brevities

Today's weather: Threatening with snow; stationary temperature.
Yesterday's temperatures: Seven a. m., 33 degrees; noon, 38; 7 p. m., 34. Maximum, 38 degrees; minimum, 33.

Judge Stone and daughters went to Chicago last evening.
H. W. de Berg, of Detroit, is visiting at the home of M. H. Egan.
The brotherhood of American Yeomen will give a card party Wednesday night, to which the public is invited.
John Downing has accepted a position with the Union Clothing company, and will begin work Monday.
Mr. and Mrs. N. D. Forgostein left yesterday to visit friends at Bueyres, O. and Marie L. Durand, of Marquette.
Mr. and Mrs. A. M. Bigelow left last evening for Henseley, West Virginia, where they will spend some time with relatives.
Gad Smith left last night for Duluth, Hibbing, Winnipeg and other points in the Canadian Northwest. He will be absent from the city several months.
Marriage licenses were issued by the county clerk yesterday to Ombene Fendi and Cecilia Terzaghi, both of Princeton, and to Will Provost, of Little Lake.
Miss Laughlin returned from Chicago yesterday, where she attended the funeral of her sister. She expects to close out her business in this city and later go to Chicago to live.
Tax Sale May 4—The sale of lands for delinquent taxes of 1900 and 1901 years will be made at the county treasurer's office May 4. Payment or redemption may be made at any time prior to the sale.
Three to Jail—John Dapani, Charles Nansikka and Victor Aho, all of Michigamme, were brought to the county jail yesterday to serve out short sentences for drunkenness and disorder, the result of too much Easter.
Car of Lake Fish—Captain John Parker has received a letter from the United States fish hatchery at Duluth, stating that a car of fish will be sent to Marquette April 16 for distribution in this part of Lake Superior.
Don't Be Imposed Upon—In view of the fact that a number of persons are collecting funds for the Salvation Army in the city, Captain George J. Barry desires to state that all authorized collectors have credentials signed by him, and requests that nothing be given collectors who cannot show such credentials.
Fawn for Prison—A male fawn, about a year old, was received at the Marquette prison yesterday afternoon, having been consigned from Champion by Deputy Game Warden Harrington. The fawn was driven into Champion by dogs, where it was easily caught. The new specimen will be added to the prison herd.
Work Progressing Rapidly—The first brick for the superstructure of the Donkers block on Washington street was laid yesterday, and it is the hope of the contractor in charge, James Sinclair, to have the walls up within three weeks. Excavation for the Hager block on the opposite side of the street is well under way, and it is expected to begin the construction of the concrete foundation today.
Normal vs. Negaunee High—The last game of the season for the Normal basketball five will be played at the Normal gymnasium Friday night, with the quintet from the Negaunee high school as the opponents. When these teams met on a former occasion, the Negaunees won 25 to 16, and the Normals are out for revenge Friday night. The game will be called at 8:15. An orchestra has been engaged and the usual good time will follow the game.
Commercial Club Meeting—A meeting of the Queen City Commercial club was held at the city hall last night, at which the entertainment and publicity committee was instructed to do something toward advertising the advantages of Marquette by asking the rail and water transportation companies entering this city to give Marquette favorable mention in their tourist and other advertising literature. Dues for 1902 are now payable and may be paid to the secretary, C. A. Carlson, either in person or by check.
Four Sent to Jail—As the result of an Easter celebration on Seventh street Sunday night at which too much liquid conviviality was consumed, six of the participants were rounded up by the police department and consigned to the lock-up for the rest of the night to prevent them from continuing their quarrel and perhaps seriously injuring one another. They were given a hearing before Justice Cray yesterday morning, and four of them were given small fines, while two were released. It is charged that at least one knife was drawn in the course of the melee, but as no two of those present tell the same story the facts will have to be guessed at to a large extent. After all, it was merely a "social" scrap, anyway.
Will Plant Trout Fry—It is expected that the state fish commission's car will be through this county within the next few weeks and plant the usual number of trout fry. Trout are also being propagated at the Cleveland City hatchery at Munising and several hundred thousand will be distributed along the company's railway lines in May and June. It is said that the steel head salmon planted in the Au Train river several years ago have grown to two and three pounds, and fishermen are expecting great sport with them this season. They are said to be more gaudy than trout of the same size. Steel heads have also been planted in the Yellow Dog river, between Birch and Big Bay, but they are still too small to catch.
Camp Breaker Jailed—Victor Verland was sentenced to spend ninety days in jail by Justice Cray yesterday, having been arrested for breaking into Martin Rustenhoven's camp, two miles north of Birch. Verland and three companions were in the camp at the time the arrest was made, but as Verland had told the others that he had obtained permission to use the camp and had backed up his statement by a forged note from Mr. Rustenhoven, they were released. Many owners of camps in this vicinity have been annoyed for some time by having them broken into, and often things were stolen or destroyed. For this reason, the arrest of Verland is highly satisfactory to camp owners, as it is believed that his experience will deter others from similar actions.

Upper Peninsula

A Peculiar Coincidence—
W. D. Chambers became mayor of the city of Mackinac Island on his birthday, April 5. It is strange coincidence that D. W. Murray, the retiring mayor, was also elected to the same office (a year ago) on his birthday, April 6.
Lumber Company to Expand—
The Stegath Lumber company, one of Escanaba's most progressive business concerns, has decided upon a policy of expansion, and in addition to dealing in lumber will soon be manufacturers. O. C. Stegath, the manager, reports that he has closed a contract for a full equipment of the most modern planing mill machinery and expects to have a mill in full operation early in June. The company has leased the building formerly occupied by the Lira Manufacturing company, on upper Ludington street, and this will be converted into the planing mill. Mr. Stegath says that in addition to general mill work the company will manufacture a complete line of casings, moldings, etc.
Accept Old Scale of Wages—
Trouble which has existed since the first of the month between the three big coal dealers along the river front at the Soo and their der-rick engineers has soon to an end. The men have agreed to go back to work at the same scale of wages which existed last year. The trouble was due to the fact that the engineers wanted \$100 per month instead of the previous scale, which was \$80. Numerous stories were rife prior to the settlement concerning a sympathetic movement by the longshoremen if the fight was carried into the navigation season. No further difficulty is expected among the marine unions, at the Soo, as all have practically agreed upon terms for the coming season.
Escanaba's Ball Prospects Poor—
According to present indications Escanaba will not have a regular city baseball team in the field the coming season. The signing of players with outside teams and the announcement that others of last season's lineup are planning on going to neighboring cities have served to discourage the greater portion of the directors and some have announced that they will make no further effort to organize a team. The fact that neither Loel nor Welch will return to Escanaba this summer and will probably play ball in other cities has proved an additional blow, and unless the baseball atmosphere brightens markedly within a short time the city will be completely out of this running. The members of last season's team who are still in the city are: Jack McDonald, pitcher; Billy Matt, catcher; Nick Walsh, left field; Chris Buckley, center field, and "Slim" Plath, right field. The players that will be missing from the lineup are: Mike Walsh, pitcher; John Walsh, catcher and left field; John Loel, second base; Gully Lentz, short stop, and Herman Aronson, third base. It will thus be seen that the infield has been completely denuded and to build up another team it will be necessary to fill every infield position in addition to securing another pitcher to work with McDonald.

Cigar Store

Harlow Block, Front St.
is the place to buy
SMOKERS' ARTICLES
and Fine Cigars.

We keep our cigars as they should be kept, thus assuring the smoker the best value for his money. If you buy your cigars by the box we can give you the best on the market—either domestic or imported brands. We would like to have your trade and are doing our best to merit it.

Bell phone 184. Marquette, Mich.

Some Men Are Just Prejudiced

THEY DON'T know what the ready-made clothiers are accomplishing. They simply have followed that old time belief that a custom tailor does things differently.

It will just take about two seconds for a try-on of one of "Our Own Shop Made Suits," to prove that a custom tailor is an expensive luxury. There can be no better tailoring than is put into "Our Clothes," the style couldn't be improved, the fit is all that any exacting customer could demand, cloths and patterns are exclusive and the prices are about half.

\$15 to \$30

Of all sad words of tongue or pen, The saddest are these: It might have been.

The ability to save is born to some, but to the most of us it is a matter of experience.

FATHERS and MOTHERS, how often do you think, "If I had only known years ago what I know now, I would be a great deal better off today."

That is just the point, you can't try it over, but you can teach your children what it took you years to learn.

The SAVING and SPENDING should be as much a part of their education as any study they now receive at school.

We are ready to do our part.

Marquette National Bank Marquette, Mich.

KID FARMER WINS ON A FOUL.

New Orleans, April 12.—Kid Farmer, of Peoria, Ill., was awarded the decision on a foul in the seventh round of a scheduled ten-round bout with Walter Little, of Chicago, here tonight.

Schmetzle, N. Y., April 12.—Bert Keyes, of New York, had a trifle the better of "Cy" Smith, of Jersey City, in a ten-round bout here tonight. Smith did most of the leading, but Keyes landed the hardest blows.

MARKETS

NEW YORK STOCKS.

Paine, Webber & Co.'s correspondent at New York yesterday telegraphed as follows: "The metal issues were the feature today. There was no London market, but the list opened fractionally higher and after some hesitancy resumed its upward course, with Steel common and a few other specialties in the lead. The public interest has increased materially, and there are some signs of a broadening in the trade, but still professional operations dominate. It is thought that the tariff bill will be ready for the president's signature at an earlier date than at first expected, and as the bill in its present form is not thought to greatly hinder enlarged activity in industrial circles, there will undoubtedly be a concerted effort on the part of the holders of large blocks of securities to create enthusiasm on the part of the public, so when tariff agitation ceases to be a factor securities which have been accumulated on declines can be distributed to better advantage."

Table of closing prices for various stocks including Amal. Cop., Anaconda, Bethlehem, etc.

Boston Stock Quotations.

Writing from Boston yesterday, Paine, Webber & Co. had the following to say of the stock market: "The coppers made a poor showing today, considering the bullish action of the New York market and the more favorable general news. Butte, Coalition and North Butte were weak on comparatively steady transactions, while Greene and Mass were stronger than for some time. The reports from the latter are very encouraging and higher prices are predicted. The Copper Producers' association reported an increase in the surplus of about nine million pounds, which was considered small, compared with January and February, and we understand the April report will show a decrease on account of heavy sales made since the March report was made up. If there is any sound basis for this strength and activity in the New York market, excepting the short interest covering, coppers should certainly do better within the next few days, but we believe we are due for a fair-sized reaction in the

big market and would not get too bullish at this level."

Table of final quotations for various commodities and stocks including Adv., Amal., Anaconda, etc.

The number of shares sold during the day were as follows:

Table of share sales for various companies including Amal. Cop., Anaconda, Bethlehem, etc.

Copper Range.

Boston, April 12.—The Boston News Bureau says today that the Copper Range plans to do considerable test pitting this summer, in connection with the diamond drill exploratory operations in progress on the Canal lands west of the Atlantic mine, which lands are held under option by the company. The drill outfits have succeeded in obtaining several cores of vein matter fairly well charged with copper, though not to a degree that would warrant shaft sinking at this time. Three diamond drill outfits are in service, engaged in taking a complete cross section of the property.

It is also stated that the Oneco is planning to make a thorough exploration of its mineral lands north of the Arcadian. The company expects to locate the Baltic lode recently disclosed on the New Baltic Exploration company's property, next south. The work will begin as soon as the weather moderates. The New Baltic company has erected a diamond drill stand and is awaiting the receipt of the machine. The company expects to have two diamond drills in operation shortly. Trenching has temporarily ceased, owing to spring freshets and the attendant difficulties in keeping the surface workings free of water.

Little Copper in Storage. Houghton, April 12.—With the opening of navigation but two weeks away,

shipments of copper by rail continue at a rate fully equal to that of the past several months. There is no apparent disposition on the part of the companies to hold their product until the cheaper transportation is possible and as a result the stocks of metal at the several smelters have not grown to the usual proportions noted in other years. The Calumet & Hecla docks are quite bare of the metal, but the storage bins contain the usual quantity of unsmelted mineral for transportation to the Black Rock smelter. At the Quincy smelter a large portion of the metal is Franklin stock, the accumulation of several months. There is little more than 20,000,000 pounds of fine copper available in the district at the present time.

North Butte.

Butte, Mont., April 12.—The showing in the lower levels of the North Butte is such that indications favor even a richer ore body than on the higher levels when the strike was first made. This disproves any report that the selling of the stock recently was on account of the showing at the mine and proves the statement that the cause of the selling was personal and probably in connection with requirements for financing subsequent to the stock of the new smelting company. The writer is assured that the North Butte could maintain its present production for five years on its present reserves, to which it is constantly adding; but with the prospects on the lower level the future is much brighter than would be indicated by such statement. The costs are now in the neighborhood of eight and one-half cents and the company is earning a surplus over the \$4 dividend.

Calumet & Hecla.

Boston, April 12.—The Financial News says in its issue of today: "Although the transfer of stocks to the Calumet & Hecla was completed several weeks ago, the new management has not as yet straightened all the details connected with the taking over of the new properties. There was a greater number of small affairs to be attended to than was at first supposed. A copper interest who is familiar with the Lake situation says that when the Calumet & Hecla management gets around to it, they will probably buy all the leading copper mines at the lake. Right in the midst of Calumet mines are situated the Mohawk and Wolverine and further south is the Quincy, Franklin and the Copper Range group. Estimating the production of the Franklin at 7,000,000 pounds of copper, the above mines have a total production of approximately 90,000,000 pounds."

Mass Consolidated.

Boston, April 12.—The officials of the Mass Mining company are in receipt of a letter this morning from General Manager Wilcox, in which he states that the showing on the seventh level, in the new lode, is better than expected and better than where first opened. He states this is the best stamp rock he has seen in the mine. From the center of the crosscut the openings on the lode have been extended eighteen feet each way, making thirty-six feet of drifting on the vein. The vein continues to be about twelve feet wide, of which eight feet is the same kind of rock as the samples sent to Boston.

Ile Royale.

Houghton, April 12.—Ile Royale's activity is evidenced by an increasing rock production. On the present basis this is 1,000 tons daily, comparing with 700 tons daily a year ago. Production is now being had regularly through four shafts. At the No. 6 shaft the new hoist has been turned over and is expected to go into commission this week. The shaft is sinking steadily below the seventh level and opening copper ground at all points of attack.

Goldfield Consolidated.

Boston, April 12.—Goldfield Consolidated has made another important strike in its Lucky Boy claim. Wire advices from Goldfield this morning say that the ore body is ten feet wide and has been exposed for twenty feet. It is stated that the average value is \$100 per ton.

Copper Metal Prices.

New York, April 12.—Copper remained quiet today, with Lake quoted at 12.87 1/2 @ 13, electrolytic at 12.50 @ 12.62 1/2 and casting at 12.37 1/2 @ 12.50.

CHICAGO GRAIN MARKETS.

Chicago, April 12.—In the wheat pit today, all the deferred futures advanced to new high marks for the season, while the May equalled its previous best mark. There was a fierce speculative market the greater part of the day, and the prices moved over a range of 1 1/2 to 2 1/2 higher. The market opened 1/2 higher to 3/4 lower. There was considerable selling, based on wet weather in the winter wheat territory. On buying by leading bulls the prices advanced rapidly. The interest covered around the deferred futures. There was also a big investment demand from outsiders. The market was bullishly affected by the active demand for cash grain, the local sales aggregating 215,000 bushels. In the final half-hour the prices reacted materially on realizing. The close was rather tame, but firm, 3/4 to 1/2 @ 12 1/2 higher. The May opened at 12 1/2 @ 12 1/2, highest, 12 1/2 @ 12 1/2; lowest, 12 1/2 @ 12 1/2; closing, 12 1/2.

Corn.—The trade was dull and the sentiment was quite heavy at times, although the close was firm, 1/4 @ 1/2 higher. The bulge in wheat had bullish effect. The May opened at 66 1/2 @ 66 1/2, highest, 66 1/2 @ 66 1/2; lowest, 66 1/2 @ 66 1/2; closing, 66 1/2.

Oats.—The feature was heavy selling of the May by commission houses. The new crop months were in fairly good demand by shorts and country traders. The close was irregular, the May being easy while the new crop months were firm. The May opened at 54 1/2 @ 54 1/2, highest, 54 1/2 @ 54 1/2; lowest, 54 1/2 @ 54 1/2; closing, 54 1/2.

Paine, Webber & Co.'s Wheat Summary.

Paine, Webber & Co.'s Chicago correspondent said yesterday concerning the wheat market: "There was a great exhibition of strength in this wheat trade, both early and late. The only dip under the closing figures of Saturday was made on the early trades, when the absence of the cables, rains over the southwest, and a desire to take profits caused the July to run off to 11 1/4. This was the level from which a big broad bull market started. Inside of an hour the July was over 11 1/2, September 10 1/2 and December 10 1/2. It was claimed by the pit brok-

ers that the bull leaders were fairly liberal sellers of both May and July wheat on the part of the Kansas crop. Taking this into consideration, the close was remarkably strong. Everybody in the trade expects a decided upturn in the foreign markets when the cables come in the morning. Kansas City decreased its stock nearly 400,000 bushels and Buffalo, of the west, nearly 800,000. The world's shipments were 3,060,000 under a year ago and the wheat float decreased nearly 3,300,000 bushels. One crop expert put the Ohio condition as low as 57 today. The best observers claim that a portion of the Kansas crop is not yet advanced nor that it was at the corresponding date in March last year. Nearly all the reports from the outside indicate that the plowing up of winter wheat will be extensive the balance of this month. We believe in conservative operations in a market of this kind, but everything points to buying on fair reactions as a safe proposition."

"OUR COUNTRY" HIS TOPIC.

Vice President Sherman the Chief Speaker at Utica Chamber of Commerce Banquet.

Utica, N. Y., April 12.—"Our Country" was the subject of a stirring patriotic address by Vice President James S. Sherman at the annual banquet of the chamber of commerce tonight. The gathering represented the business and professional men of Utica, and the reception given to Mr. Sherman and other speakers was extremely cordial. Senator Carter of Montana spoke upon the desirability of postal savings banks as a means of fostering thrift among the conservative operations in a market of this kind, but everything points to buying on fair reactions as a safe proposition."

In responding to the toast "Our Country," Mr. Sherman recounted the elements of strength possessed by the United States both in its actual material resources and in its possibilities for development and the moral force it is enabled to exert over the destinies of the world. Recounting the wars in which the country had been involved, every one of which he declared had behind it some of the noblest motives of the human mind, he said that the nation should have confidence in it. The growth of the United States had been so enormous that it could no longer be demonstrated by comparing its industries, wealth and national strength with any other leading country in the world, nor even with the group of other countries which it was necessary to compare it with the remainder of the world. "We have but 5 per cent of the population of the earth," said Mr. Sherman. "Our nation possesses but 7 per cent of the area of the earth and yet industrial production is equal to one-half of the balance of mankind."

Mr. Sherman recounted the proportion of the great staples that are raised in the United States in comparison with all other portions of the world. "We have," he said, "more than twice as much life insurance as the rest of the world and one-half as much money on deposit in our savings banks as all the rest of the world. Our expenditure for education is two-thirds as much as is spent by all the rest of the world. One out of every 100 of our children is sent to school, while our debt is but one-thirtieth of the debts of the world. We have enrolled in our schools, 20,000,000 students, 1,600,000 being in our public schools alone, for which we pay annually \$200,000,000. Our expenditure for education is more than that of any other country of Europe, including Great Britain. The country, he declared, is not retrograding. Ambition as well as patriotism is indigenous to our soil.

"Ambition," he added, "is inspired by opportunity. Ambition and opportunity have inspired and developed genius. Genius has produced invention. Invention has enlarged opportunity and increased by bounds American production, American wealth and American power."

Advantages of Postal Savings.

The advantages of postal savings banks were told by Senator Carter in a most attractive manner. A sound business relation, he said, never can be maintained with reckless or improvident people. He who spends all he has, and saves nothing, betrays himself and those dependent upon him from the beginning, and in the end he will cheat some body and blame everybody.

"The combined powers of the world would perish," said Mr. Carter, "in an attempt to conquer the American people and to possess this country. Our power to resist outside pressure is invincible. But who can forecast the result of the event should a troublesome percentage of the governed require an increase of our standing army to the relative proportion of the average European war establishment. You gentlemen of affairs are deeply concerned in having a prudent and well-considered policy in nursing the affection, devotion and interest of the people in its well being."

GENERAL BOOTH'S MESSAGE.

American People Urged to Join in the Work of Saving Souls.

New York, April 12.—A message from General William Booth, founder and commander of the Salvation Army, was read tonight at the celebration in Carnegie Hall in honor of his eightieth birthday anniversary. Miss Eva Booth, the general's daughter, and commander of the Salvation Army in America, read the message. It was an earnest appeal to the American people to use their great opportunities and resources for the saving of their fellowman. The messages called by various governors and mayors of this country to General Booth, in England, congratulating him on his birthday anniversary and paying tribute to his work, were read from the stage.

ENGINEERS HAVE GRIEVANCE.

Employees of the Great Western Road Complain to Federal Court. Council Bluffs, April 12.—Federal Judge Sanborn, of St. Paul, today told the attorneys representing the locomotive engineers of the Omaha division of the Great Western road that the ownership of that road would terminate within the next three or four months. He said that there were several ways in which the road could again be put on its feet, but that it had not been decided just how the reorganization would be effected. Judge Sanborn intended to the

Advertisement for Washburn-Crosby's Gold Medal Flour, featuring an illustration of a woman with a flour sack and the text: 'If You Were A Miller Would you bother to wash the wheat and scour it? That's what WASHBURN-CROSBY CO do in milling GOLD MEDAL FLOUR. It's pure and cleanly.'

Advertisement for Hager Bros. Co., Ltd. featuring an illustration of a rug and the text: 'RUGS! RUGS! RUGS! We have on exhibition our spring line of Rugs Direct from the mills. Bagdad, Wiltons, Body Brussels, French Wiltons, Tapestry Brussels, Syrians and Alamos. Our stock is large and complete. An inspection solicited. HAGER BROS. CO., LTD.'

complaint of the engineers, who said that engineers from other divisions had been brought here and given the best runs, reducing the engineers already on this division to freight trains and switch engines, in an alleged violation of contract. Judge Sanborn took the matter under advisement, and indicated that it might be adjusted if the old engineers waived the right to bring damage suits for the salary they might have received had they not been reduced.

MR. FAIRBANKS LEADS FOR THE LONDON POST.

Former Vice President's Name Under Earnest Consideration for the Ambassadorship—President Eliot's Position a Puzzle.

Washington, April 12.—It is said on good authority here that former Vice President Fairbanks will very probably be the next ambassador to London. The man who made the statement is entirely familiar with the rather remarkable situation in regard to President Charles W. Eliot of Harvard. Although Mr. Fairbanks is on the Pacific coast, and is expected to sail for a trip around the world May 16, it is plain that exchanges on the subject of his nomination are under way. It is also plain that some very important friends are working in Mr. Fairbanks' behalf.

Dr. Eliot's Case a Puzzle.

The information is so meager, except for the rather positive assertion, just mentioned, about Mr. Fairbanks probably being the next ambassador, that there is little light on the question as to how Dr. Eliot will be disposed of. The efforts under way proceed on the theory that he is as good as declined. The making of inquiries as to whether Mr. Fairbanks would accept.

GENERAL BOOTH'S MESSAGE.

American People Urged to Join in the Work of Saving Souls. New York, April 12.—A message from General William Booth, founder and commander of the Salvation Army, was read tonight at the celebration in Carnegie Hall in honor of his eightieth birthday anniversary. Miss Eva Booth, the general's daughter, and commander of the Salvation Army in America, read the message. It was an earnest appeal to the American people to use their great opportunities and resources for the saving of their fellowman. The messages called by various governors and mayors of this country to General Booth, in England, congratulating him on his birthday anniversary and paying tribute to his work, were read from the stage.

ENGINEERS HAVE GRIEVANCE.

Employees of the Great Western Road Complain to Federal Court. Council Bluffs, April 12.—Federal Judge Sanborn, of St. Paul, today told the attorneys representing the locomotive engineers of the Omaha division of the Great Western road that the ownership of that road would terminate within the next three or four months. He said that there were several ways in which the road could again be put on its feet, but that it had not been decided just how the reorganization would be effected. Judge Sanborn intended to the

FUNERAL OF MR. HITCHCOCK.

St. Louis, April 12.—A large assembly gathered in the Second Presbyterian church here today to attend the funeral of Ethan Allen Hitchcock, former secretary of the interior. The service was in charge of Rev. Mr. Nicolls, the pastor of the church.

BALL A BIG SUCCESS.

Second Annual Event of Company I Largely Attended Last Night.

The second annual ball of Company I, Third Infantry, Michigan National Guard, held last night at the armory in the Braasstad block was one of the most successful social events of the year. The attendance was unusually large and it was long after midnight before the dancers retired. Prior to the intermission the military company gave an exhibition drill and there was a terrific grand march, in which the uniformed members of the militia, Knights of Pythias and Modern Woodmen participated. Lunch was served at midnight by the ladies of Grace Episcopal church at the Guild Hall.

The members of the company were highly complimented by their guests on the manner in which the ball was de-

Desirous of Curing the Drink Habit

We are honestly desirous of curing all who are addicted to drink, and if you are interested in any one needing Orinone we invite you to write us. Our correspondence is confidential and our replies are sent in plain sealed envelopes. Orinone No. 1 is the secret treatment and No. 2, for those who wish the voluntary treatment. \$1 per box. E. F. BRADT MASTER OF MINING PROBLEM

FORMER WELLKNOWN ISHPEMING MAN EXPECTS TO SOON COMPLETE SHAFT AT SALT MINE NEAR DETROIT, STARTED SOME ELEVEN YEARS AGO.

Eugene F. Bradt, former chief engineer of the Pittsburgh & Lake Argonne Iron company, with headquarters in this city, who has been laboring for eleven years past in an effort to sink a shaft at a salt mine near Detroit, expects to complete the job before the close of this year. The methods employed by Mr. Bradt in what has proved to be one of the most difficult shaft sinking jobs ever attempted are interestingly described in the following article from a recent issue of The Mining World:

"Early in 1898, J. M. Mulkey and A. E. Jennings, of Detroit, with E. F. Bradt, M. E., of Ishpeming, began sinking a 1,000-foot shaft to a bed of salt crystal, no less than 200 or 240 feet in thickness, apparently underlying hundreds of acres of territory. They secured mining rights on 300 acres, with sufficient surface holdings to permit the erection of a power plant and all necessary buildings, just west of Detroit, and in the hamlet of Oakwood. There didn't seem to be anything very formidable about the task, and a contractor, who had years of experience, and who was then completing the wheel pits for the giant power plant at Niagara Falls, eagerly accepted the contract.

"In the contract it was stipulated that the promoters of the scheme should drill a test well, equal in depth to the proposed shaft, so that a record of the formations might be kept. A six-inch bit was used and everything progressed favorably until, at a depth of 155 feet, a heavy flow of sulphur water was encountered. The test well rapidly filled, but the men were undismayed and continued their borings. But when they had gone forty feet further another sulphurous flow was struck. This latter not only filled the well within a short time, but also sent a stream spouting fifteen feet into the air. The contractor threw up the job.

"A second and third attempt to reach solid ground below the sulphur streams were made, but there seemed to be an insuperable supply of the water. If nothing else the problem presented alluring engineering possibilities to Engineer Bradt. The seemingly insurmountable task before him was to shut off the flow of water. He spent weeks of study on the problem and finally decided to experiment with a plug of exceptional strength, and which had been filled with limestone particles secured from the sulphurous flood, the conditions at the bottom of the well being duplicated as closely as possible. Into one end of the keg he introduced a pipe from a high pressure water main, after inserting for a short space in the tube a heavy glass bulb by which could be told what was going on inside the barrel. A second section of pipe, connected with a high pressure plumb line, was then inserted in the other end of the keg, and everything was ready for the experiment. With the pump a thin solution of Portland cement was forced into the barrel, combatting with the flood of water which poured through the limestone. First the water immediately took on a slightly clouded appearance, then it became milky, and finally opaque. The cement was penetrating the limestone pores and was forcing the water back into the mains in spite of the heavy pressure. After a short time the water was turned off, the connections were removed and the steel bands about the keg severed. As the staves fell apart, what was formerly porous limestone was found to be a hard, impenetrable mass. The experiment was a success.

"The possibility of thus shutting off water through any rock that might be encountered in the sinking of the shaft was satisfactorily demonstrated, and the process was immediately patented.

"Interest in the mine was again revived, and Mr. Bradt was awarded the contract for sinking a shaft six by sixteen feet, and 1,000 feet in depth. Work was again begun on the arrangement that Mr. Bradt's new method should be used in the crevice regions.

"This was six years after the first operations were started. But hardly had work begun when large quantities of silt were encountered. To say the least it was a hard and laborious task to bring it to the surface, and there was also the constantly increasing danger of the enormous pressure from fresh supplies

QUIT SALOON BUSINESS.

Charles Gustafson and Peter Gummerson to Dissolve Partnership.

Charles Gustafson, one of the best known Scandinavians in Ishpeming, who has been associated the past year with Peter Gummerson in the saloon business in the Swedish Home society's block on Cleveland avenue, has sold out his interest to Mr. Gummerson and will retire from the business on the first of the month. He said yesterday that he had about made up his mind to quit the saloon business entirely, though he has not yet decided what he will do. He and Mr. Gummerson are now busy making their collections preparatory to winding up their affairs, and the latter will conduct the business at the old stand.

It is expected that there will be changes in the management of several other saloons. A number of the dealers have not had a very successful year and a few of them contemplate quitting. Mr. Gustafson said that there are about twice as many saloons in Ishpeming as can be supported properly. William Racine is to engage in the business on the first of May in the Simons block, at the corner of Main and Division streets. Carpenters are now making some changes in the interior, preparatory to putting in a plate glass front.

APPLICATIONS FOR POLICEMAN.

One of the aldermen yesterday said that judging from the number of men who had been to see him soliciting his support for a place on the police force, there will be many applications presented to the council when it meets for the appointments. He said that so far as he knew there would be no change on the force, so that those who are seeking positions will probably be disappointed. He also said that there will be very few, if any, changes in other departments.

The railroad shops of this country employ 350,000 men, earning \$200,000,000 per year.

CHILDREN WHO ARE SICKLY

ISHPEMING

SINKING SECOND SHAFT.

Rogers-Brown Ore Co. Pushing Operations on the New Cuyuna Range.

The Rogers-Brown Ore company, whose mining operations on the new Cuyuna range near Deerwood, Minn., are being directed by former Marquette county men, has commenced work on the second shaft at the Rabbit Lake mine. Henry Kruse, for a number of years at the Champion mine, has general supervision of the Rogers-Brown company's work. Will Walters, youngest son of Captain Thomas Walters of this city, and Captain C. A. Anderson, formerly of the Negaunee mine, are also employed there. Captain Anderson is directing exploratory work in the district and Mr. Walters is looking after some drill work. The new shaft will be four compartments, with two openings for skips, and will be located a short distance north-west of the present shaft. It is the intention of the management to hoist most of the ore through the new shaft.

It is reported from the range that the company has drifted about fifty feet in one of the levels in the old shaft and that Superintendent Kruse is much displeased with the result. The company has five diamond drills at work at a point some distance from the Rabbit Lake mine. Ore has been found and a location for a shaft will soon be decided on. A shaft started some time ago has been abandoned. It was located near a small lake, the water from which caused much trouble. The company's new office building is nearing completion. It is said to be a handsome structure, built more on the lines of a residence than an office. There is a handsome colonial porch in front and there are four office rooms, a blue room, a vault on the first floor, and four bed rooms and a library on the second. There is a large basement, with vault, and the building is to be heated by steam.

FROM MORGAN'S CURB LETTER.

"The markets opened strong and high, and for the greater part the advance was continued throughout the day. Amalgamated, as usual, was the leader in the copper list, but the tone was strong throughout. Greene Cananea sold at 10 1/2, and looks like going higher; Mass crossed 9. Cactus and Chief Consolidated were the features of the curb trading. Chief Consolidated ruled at about the same as the closing price of last week, but was in good request around 1 1/2. Cactus, which closed at 2 1/4 bid on Thursday, sold at 3 1/4 today, with good sized lines still wanted at 83. Developments at the Cactus mine are gratifying; the shaft is down 350 feet, and is in ore running as high as 7 per cent copper. Ore veins have been steadily increasing since they left the 330 foot level. Crosscuts have been started at the 300 foot level, and last week a second shaft was started. It is predicted for the stock on this movement. We wish to call particular attention to the Montana-Clinton Copper company, a new flotation at Clinton, Mont., literature descriptive of which will be distributed to-

tomorrow. The company has eleven full claims, embracing the Triangle Milling company, and a perpetual lease of the Bidden Treasure claims. There will be 300,000 shares, par \$5; 100,000 shares full paid to be given for the property, 75,000 remain in the treasury, and 125,000 to be offered for public subscription at \$1, 50,000 shares of which have already been taken. Subscription books open Thursday next and close on the Saturday following. A heavy over-subscription is likely. Stocks of copper on hand April 1st as reported by Copper Producers' association show an increase for March of about 9,000,000 pounds. This is smaller than expected. The total output of the Tonopah mines for the week ended April 1st was 5,490 tons, valued at \$341,250. The regular monthly dividend of fifty cents was declared on Homestake. The Goldfield Consolidated has made another important strike in its Lucky Boy claim. Wire advises this morning say that the ore body is ten feet wide, and has been exposed for twenty feet, of an average value of \$100 a ton.

Yesterday's prevailing prices were:

PLEWING OUT ROADS.

It is some years since it has been necessary to plow out the roads in this city at such a late date. The big plow, drawn by two teams, and followed by a half dozen or more men, worked yesterday on some of the roads leading to the outlying locations. The roads have not

Negaunee Department

NEGAUNEE'S FIRST TELEGRAPH OPERATOR

ONE OF THE CITY'S EARLY SETTLERS, NOW LIVING ON THE MESABA RANGE, RELATES INTERESTING TALES OF HAPPENINGS PRIOR TO 1870.

D. F. Wadsworth, a former well-known resident of Ishpeming, now located at Hibbing, on the Mesaba range, was a Negaunee visitor Saturday. There is perhaps no man in Marquette county who has a better recollection of the early days in Negaunee than Mr. Wadsworth. He remembers names, dates and incidents. He was the first telegraph operator employed here. He had been working for the Chicago & Northwestern Railway company as a telegrapher at Dixon, Ill., and soon after the Northwestern line was completed from Escanaba to this city he was sent here. A station had been established a few weeks before his arrival, but H. E. Hand, the agent, was not an operator and he had much difficulty on that account. Mr. Wadsworth arrived Nov. 7, 1865. His pay was \$110 a month, which was the going wages for first-class operators at that time. The Northwestern's first depot, which consisted of a few boards loosely thrown together, was located on the site of the present union depot. Mr. Wadsworth remained here for five years. Some time before his departure the company's press-depot was erected.

The Northwestern line between Escanaba and Negaunee was in operation some time before the line from Green Bay to Escanaba was finished. In making the trip north, Mr. Wadsworth traveled from Green Bay to Escanaba by boat. Samuel Tilden was president of the road at that time and was also interested in the Tilden mine at the Iron Cliffs location. A branch of the road was extended to the Tilden before the main line was completed to Ishpeming. Major Brooks, who is remembered by the older residents for his charge of the Tilden mine, is also the Pioneer furnace in this city. V. Case was superintendent of the furnace and J. T. Downing, janitor at the city building, was the foundryman.

"I shall never forget the five years I spent in Negaunee," said Mr. Wadsworth. "There were many times during that period, especially between 1866 and 1868, when free-for-all fights were numerous. There were no saloons in Ishpeming for a year or more after I arrived here and the men employed at the coal plant in the Mesaba range used to come over to Negaunee every Sunday. As a rule, a large majority of them got drunk and before they left for home they got into fights with the men employed at the Jackson mine and Pioneer furnace. Many and many a desperate encounter took place in the streets. The men used the 'sand heap,' where the Winter & Sussel block is now located. The fight was before Iron street was laid out. There was a saloon not far from the 'sand heap' and the Ishpeming men usually got full there. At that time the late Robert Nelson was conducting a big boarding house at Ishpeming and practically all of the Lake Superior workmen boarded with him. Many of the fights caused Negaunee people to take to the woods. I shall never forget a man who was known as 'Neatness' to the coke supply. As coke is light it is comparatively cheap to ship. The Gary plants are provided with every facility for utilizing the gas and selling such by-products as it may not use. The Gary mills dispense with the double handling of the ore and the coke transportation charge is a small item, comparatively, especially when the difference in freight rates on finished products is taken into consideration.

THE OLD THEORY OF LOCATING FURNACES near the place where coke is found is no longer followed out. Neatness to the ore supply is now considered more important than neatness to the coke supply. MAY REPEAT DRAMA.

Negaunee Talent Pleased by Production of "Diamonds and Hearts."

The members of English Oak lodge, Sons of St. George, and their friends, who witnessed the production of the comedy, "Diamonds and Hearts," at McDonald's opera house last Friday evening, on the occasion of the society's annual entertainment, were so well pleased with it that they desire to have it repeated. The young people taking part in the play acquitted themselves admirably and their work was a surprise to their friends. The play is a laugh producer and every character in the cast was well handled. It was given under direction of Isaac Wedge, who was highly commended by the members of the society for their work.

Other features of the entertainment that pleased the audience were the specialties by Rice and Thomas and Joseph Roberts. The latter entertained with ventriloquism, also banjo solos, while Rice and Thomas had a good talking and singing act. The selections by the Negaunee band were also much appreciated. All things considered, the entertainment was perhaps the best that has ever been given on the occasion of the society's annual celebration.

WILL BE STEEL CENTER.

United States Steel Corporation's New Town Growing Rapidly.

Recent developments in the iron and steel industry have been the means of directly attention among iron mining and steel men to Gary, Ind., the United States Steel corporation's new town. It is predicted that Gary will make Chicago the steel price basic point for the west.

There are now over 5,000 men employed in the Steel corporation's works and orders for steel rails are being filed. It is expected that the new plant will effect a saving in the cost equal to \$2.25 a ton on the finished product, as against the average cost in the Pittsburgh district. It will have an additional advantage in the western market of lower freight rates. This advantage will be \$3.60 a ton on the freight rate from Pittsburgh to Chicago, if the latter city were made the basing point for prices to the same extent as Pittsburgh has been heretofore. No definite announcement on this point has been made yet, but it is said that the Steel corporation will have an advantage of \$4 to \$5 a ton over eastern competitors on the steel rails manufactured at the Gary plant.

It is certain that practically all of the ore to be consumed at the Gary mills will come from Northern Michigan and Minnesota, in both of which districts the Steel corporation is a large producer. If coal railroads will haul the greater part of its Minnesota ore to Lake Superior by its own fleet. Its control of certain Chicago railway terminals facilities is an important factor and will result in further reducing transportation charges. Other factors that minimize manufacturing costs are the size of the new plants, the modern machinery through-out and the close proximity to most of the country's largest systems of trunk lines.

ASIRE GAINED TWO BY THE RECOUNT

CONVANSING COMMITTEE FOUND THAT H. PATENAUE WAS DEFEATED BY NINE VOTES.

MUCH INTEREST MANIFEST

Large Crowd Gathered at the City Hall and Remained Until the Result Was Announced.

The common council met as a board of canvassers in the recorder's office last night to recount the vote cast for alderman in the Third ward on April 5, with the result that Merwin E. Asire was declared to have been elected by a majority of nine, instead of seven as returned by the election board in that ward. The vote as determined by the canvassing board was: Asire, 191; Patenaue, 182. The returns of the ward election officers gave Asire 189, Patenaue 182.

That the recount was a matter of unusual interest to many of the citizens was evidenced by the large crowd that gathered early at the city hall and remained until the result had been announced.

The council was called to order shortly before 8 o'clock and Alderman Donovan was unanimously elected the representative of the council to act on the special canvassing board. Henry Patenaue, the defeated candidate, who had petitioned for the recount, chose Walter T. Ward as the second member of the committee and Mr. Asire named Alderman Peters for the third member. Mr. Patenaue was represented by Attorney C. F. Button, and Mr. Asire by Attorney M. J. Sherwood and W. S. Hill.

Recount in Mayor's Office. The council then adjourned for an hour and the canvassing committee retired to the mayor's room with the three attorneys, where the recount was made behind closed doors. The committee was closed for an hour and a half, while outside there was much speculation as to the result, the statement being repeatedly made that Mr. Asire would gain by the recount, as many of those who had witnessed the count at the election booth believed that at least one of the votes counted for Mr. Patenaue would be thrown out by the committee.

At 9:30 the committee had finished the recount and returned to the recorder's office, where the council was again called to order by Mayor Vaughan. Alderman Donovan reported the result of the recount and subsequently offered a resolution declaring the election of Alderman Asire in the Third, which was unanimously adopted.

No further business was brought up at the meeting and adjournment was taken until next Monday night, when it is expected that Mayor Vaughan will be an unusual number of office seekers this spring and the mayor will undoubtedly be a much sought after man during the coming week. There is much speculation as to who the mayor's appointees will probably be and the interest of the public is heightened by the policy adopted by Mayor Vaughan, which is to keep his own counsel and let others do the talking. For this reason it is expected that there will be a record-breaking crowd in the gallery, when the council convenes next Monday night.

EASTER MONDAY BALL.

Large Crowd Tripped the Light Fantastic Until Early This Morning.

The annual Easter Monday ball, given by division No. 4, A. O. H., at Fraternity Hall last night was fully as successful as those of former years and was largely attended, over 100 couples being present. Delightful music was furnished by Trombly's complete orchestra and all present enjoyed the occasion in the great possible measure.

The hall was tastefully decorated in red, white and blue and green. As was to be expected, green was the predominant color, a large Irish flag suspended from the ceiling in the center of the hall being the most noticeable feature. Red, white and blue bunting was draped diagonally across the ceiling, the corners, and also around the side walls. The unique features of the wall decorations were red, white and blue shields, above which were crossed two Irish flags.

The dance was quite informal, no programs having been provided, and the usual grand march was dispensed with. Intermittent was taken about midnight and most of those attending went to the Colonial Inn for supper.

COMMUNICATED.

Editor Mining Journal: During the past few days nearly every newspaper in the upper peninsula has published the statement that I have "been arrested for libel and that \$10,000 damages are asked." I am getting so many inquiries concerning the matter that I would be pleased if you will permit me to say, through the medium of The Mining Journal, that there is no truth in the report. It is true that notice was served upon me four weeks ago to publish a retraction of a "farce comedy" which I wrote and published in my newspaper, this demand being a preliminary step, apparently, for instituting suit for libel. I have heard nothing about the matter since, but am ready for whatever may come. I incline to the opinion that the gentlemen who thought their dignity had suffered seriously as a result of the publication of the farce-comedy, have learned that libel suits have a beneficial effect upon my avocations, and that when it comes to a trial I hold so many trumps that it never is necessary to look for cost to settle judgments.

If my friends worry no more over the threatened suit than I do they will sleep soundly and continue to be happy. F. L. BALDWIN, Escanaba, April 12, 1909.

The demand for Vandenberg's dairy products is increasing every day; because the public recognizes the importance of clean goods from sound cows. (4-10-14)

TWENTY-FIVE CENTS ON ORE.

Congressman H. O. Young sent the following telegram to The Mining Journal yesterday: "Washington, D. C., April 12. "The senate committee has placed a duty of twenty-five cents a ton on iron ore. "H. O. YOUNG."

This is an increase of five cents per ton on the schedule fixed by the house last week, and only fifteen cents per ton less than the present tariff on that commodity.

BASEBALL DANCE.

Everything Points to Large Crowd and Enjoyable Time Tomorrow Night.

The members of the baseball team are making every effort for the success of their grand ball, which is to be held at Fraternity Hall tomorrow night, and indications are that their labors will be attended with great success. Most of the decorations used at the A. O. H. ball last night will be left in place and others appropriate to baseball enthusiasts will be added. The Peerless orchestra will furnish the music, and the proceeds from the party will be used to purchase new uniforms and other regalia for the club.

The following unique program has been prepared:

1. Waltz—Play ball.
2. Two-Step—Safe on first.
3. Waltz—Slide, Kelly slide.
4. Two-Step—To our manager.
5. Three-Step—Oh; goody.
6. Waltz—To the fans.
7. Two-Step—What's that?
8. Barn Dance—To the infield.
9. Rye Waltz—Strike two.
10. Waltz—Side out.
11. Intermision.
12. Two-Step—To the girl rooters.
13. Three-Step—Lead off.
14. Waltz—To the outfield.
15. Two-Step—Out.
16. Waltz—To the captain.
17. Two-Step—Fire the umpire.
18. Barn Dance—To our team.
19. Rye Waltz—Batter up.
20. Two-Step—Last of the ninth.
21. Waltz—Home run.

MAPLE SYRUP BEING MADE.

Yield in Chocoley Township Will Be Light This Year.

The sugar making season in this locality has begun, and a number of the farmers in the Harvey district have made small quantities of maple syrup within the last few days. The weather up to this time, however, has not been favorable "sap weather," as it has wither been too cold days or not cold enough nights. Warm, sunny days and frosty nights result in the largest flow of sap from maple trees. As there is considerable snow left in the woods, larger runs of sap are expected within the next few weeks, and the season will not close until the snow is nearly gone—that is, until the buds start on the trees, which spoils the flavor of the syrup.

It is probable that much less syrup will be made in the Harvey district this spring than in years past, as the North-western road has forbidden farmers to tap maple trees on any of its lands. Some of the best maple forests in south Chocoley township and north West Branch are owned by the Northwestern, and many farmers who have had sugar camps in that locality in past years, will not make any syrup this season.

FISHING TACKLE ON SALE.

Rods at Low Prices but Baskets Are High—A New Telescope Rod.

Fishing tackle is now being given a prominent place in the stores that deal in such things. Although the season will not open until Thursday and the chances are that there will be no good fishing in this locality for several weeks, many of the anglers have overhauled their last year's outfit and are making arrangements to replace whatever is needed. Jointed steel rods will be put on the market this season at lower prices than ever before, there being one kind that will sell at \$1.25. The cheaper rods are mostly new makes and their efficiency is yet to be tested. The standard Bristol will sell at the same price as in former years. Reels, lines, flies, nets, etc., are now on sale in great variety at about the same prices as has been charged for the same articles in past years. Imported baskets are considerably higher in price than formerly, owing to the demand for the material used for making automobile baskets. Baskets that formerly sold for \$1.50 will now sell for about \$2 and other grades and sizes in proportion. An American made basket has been put on the market at about the price charged for the imported baskets in former years, but it is not thought by sportsmen that they will hold their shape as well as those manufactured abroad.

A new telescopic steel rod is being advertised in the sporting catalogs. Heretofore the telescopic rod has not been especially popular, as it had its faults, but the new rod is claimed to have overcome all imperfections. This rod may be used at any length from twenty-eight inches to ten feet, and it is just as firm and strong at six feet as it is at two and one-third. The sections are joined with a spring, which permits of their being extended or telescoped with little exertion. The rod may be adjusted at any length by one simple movement, and, once adjusted, it will remain there. The line is carried through a lead of the outside of the pole in the old poles. This method of stowing away the line was one of the defects of the old pole, as the wet tackle in time rusted and exposed parts of the pole, and prevented the sections from slipping smoothly. The new pole has a reversible grip, and may be used with a reel in casting, or with bait in still fishing.

There will be a regular meeting of Marquette council, No. 689, Knights of Columbus, this evening at 8 o'clock at Keough's Hall. (4-13-11)

ROCKER WOOD

At \$5.00 per load. Nothing better for the cook. Consolidated Fuel & Lumber Co. (6-6-11)

A stomach specialist recently said: "When the American people learn to drink buttermilk at about mealtime they will have very much less stomach trouble and rheumatism." (3-15-11)

Now is the time to order your awnings. We make awnings of all descriptions, also anything in canvas work. KILLY HARDWARE CO. (4-10-14)

GRADUATING CLASS TENDERS RECEPTION

TWO HUNDRED ALUMNI AND FRIENDS ARE GUESTS OF SENIORS OF BARAGA HIGH SCHOOL.

The graduating class of the Baraga High school, eight in number, tendered a reception to the alumni of that institution and other friends at the auditorium last evening from 5 to 8 o'clock. There were about 200 guests present and the affair was most auspicious and successful. The members of the graduating class are: Lydia Kinber, Mary Dillon, Josephine Denckers, Margaret Dwyer, Janet Grieninger, Louise Hogan, Rose Van Linden and Elsie Constance.

The affair was more elaborate than those of former years, and after the banquet and musical program, an alumni association was formed with the following officers: President, Margaret Haley; secretary, Kitty O'Neill; treasurer, Hannah Bennett.

The hall was beautifully decorated for the occasion and the tables were resplendent with cut flowers and lighted candles. The following toasts were responded to while the banquet was being served, Rev. Father Moriarty acting as toastmaster:

- Our Bishop—Rose VanLinden.
- Our Clergymen—Mary Dillon.
- Our Parents—Lydia Kinber.
- Our Teachers—Jeanette Grieninger.
- Our Alumni—Josephine Denckers.
- Our School—Margaret Dwyer.
- Our Class—Louise Hogan.

In the course of the evening the following musical program was delightfully rendered: "Come Where the Lillies Bloom"..... Glee Club. Bizzarin..... Misses M. Mack, I. Bush and M. Siegel. "Silver Threads Among the Gold"..... Glee Club. Meditation..... Misses M. Sully and I. Bush. "Glow Worm"..... Glee Club. "The Charge of the Uhlans"..... Miss I. Bush. "Life's Dream"..... Misses M. Griffin, Katharine Carpenter, M. Siegel, J. Lefebre. Meditation and Passion..... Miss M. Mack.

Tarentella..... Misses I. Bush and H. McGuire. "I'll Take You Home Again"..... Glee Club. "Robins Are Singing Again"..... Miss J. Lefebre and S. Gillan. National Airs..... Misses H. Mulvey and M. Siegel. Voice of Spring..... Miss H. Mulvey. Christobelle..... Miss I. Wischel. "Some Day I'll Wander Back Again"..... Glee Club.

Upper Peninsula

Council Is Against the Mayor

Escanaba gave Solomon Greenhoot, on the Citizens' ticket, 203 majority over Maniap Perron, candidate on the Taxpayers' ticket, and Michel J. Lavan 100 over Henry Glandorf for clerk. Thos. J. Burke, Taxpayer, had eleven votes over Richard Boyler for treasurer. The Taxpayers carried the First, Third, Fourth and Fifth wards for alderman and supervisor, and have a majority in the council against Mr. Greenhoot.

Prize Fighters Matched

Negotiations have been closed for a boxing match between Kid Jackson of Escanaba and Spider Kelley of Iron River, to be pulled off at the latter place April 21. The go is to be a ten-round affair and the men are to meet at catch weights. The mill will be for the featherweight championship of Michigan. It is announced, and it is asserted that it will bring together two of the fastest boxers of their class in this part of the state. Both are called shifty and game fighters and it is expected they will put up a battle that will be fast from start to finish—if the sheriff permits it.

Party Name Not a Winner

The statement so often made by intelligent observers, that there is no good in attempting to carry the Republican party organization into city politics, was indisputably proved Monday night, says the Gladstone Delta. More than half the electors of the city voted a straight Republican state ballot, yet only one in seven voted the local Republican ticket straight. The claim that the name "Republican" will win votes is exploded. And, if it should be pleaded that any title of classification would repel non-residents or non-taxpayers, a third party might call itself the "Voters," and bar nobody. There are none so blind as not to see the meaning of Monday's election. It is necessary that there be a change; and if the signs of public sentiment do not alter within a year, Gladstone will follow the example of the other municipalities of the upper peninsula and the word Republican will drop out of city and ward politics.

Democrats on Top There

The results of the city election at St. Lawrence may be briefly stated: P. J. Murray re-elected mayor for a third term without opposition; Alfred J. Genell re-elected city clerk, and Ed. Jones re-elected city treasurer. All three are Democrats. In the ward contests, the Republicans gained an alderman by the election of Victor Matson in the First ward making two members of that party on the city council. Neil Docherty is a new alderman in the Fourth and George Litchard in the Third, but these make no changes in the standing of the parties in the council, the Democrats controlling. The supervisors—all four of whom are Democrats—remain unchanged. Mr. Genell's majority was thirty-two, and Ed. Jones' sixty-six. Mr. Jones is the editor of the Enterprise. On the state ticket, the vote was: Republican, 213; Democrat, 191; Prohibition, 22; Socialist, 12.

DRY HARDWOOD.

Two dollars per cord in two-cord lots. (2-13-11) F. B. SPEAR & SONS.

Drink Vandenberg's buttermilk—it aids digestion and prevents disease. (3-16-11)

DRY BLOCK WOOD

At \$6.00 per load, \$3.25 per half load, delivered to any part of city. Consolidated Fuel & Lumber Co. (9-23-11)

H. S. Peter's Brotherhood Overalls

Peter's Mogul Coat, with the special inside pocket for time cards, in high favor with trainmen, yardmen, etc., in blue, Denim and Wabash stripes. Also the Mogul Apron Overalls to match the Coats, with the Peter's safety watch pocket and police style suspenders.

Sold in Marquette by

ORMSBEE & ATKINS

Nester Block, Washington St.

See our line of **DINNER SETS** and other table wares. We are continually adding to this department and would be glad to have you see what we have.

BIGELOW

Washington Street. 4-3-11

Announcement

I shall place on sale, at cost, Wednesday morning, my entire stock of imported Trimmings and Laces. These Trimmings are not the ordinary bargain counter goods, but carefully selected advance styles from the leading importing houses in New York. Will close out my stock of Gosard Corsets at cost.

MISS L. LAUGHLIN

Opera House Block. 4-18-09

BIJOU Family Theatre

(The House of Features)

TODAY'S FEATURE:

Marquette County Savings Bank

SAVINGS BANK BUILDING, MARQUETTE.

Don't carry much money in your pocket. If you haven't a bank account and want to make a temporary deposit, or have a special fund which you don't want to put in your regular bank account, get a **CERTIFICATE OF DEPOSIT**. They are payable on demand and if left three months draw interest at 3 per cent.

Special attention to **BANKING BY MAIL**. Send a postal for booklet.

FULTON Folding Go-Cart

THE WORLD'S STANDARD

The best ought to be none too good for your children. A good reason why discriminating parents insist on having a Fulton Folding Go-Cart. Although acknowledged as being the best go-cart on the market, it is also known as the most economical because of its unequalled wearing qualities. See it before buying.

Your Baby Would Enjoy the Fulton Folding Go-Cart better than any other go-cart because it is the only go-cart in which baby can recline in a perfectly comfortable position. Our patented coil spring attachment absorbs all jar and makes comfortable, delightful riding.

The Fulton Folding Go-Cart is the best cart for parent and baby. It is the strongest, lightest weight, most comfortable and convenient cart made. It can be easily folded with one hand to space of 27 ins., long 15 ins. wide, 4 1/2 ins. high (see illustration) and taken anywhere—on conveyances or fits suit case. We have an attractive display of Fulton Folding Go-Carts. Come in and look them over. It will pay you.

THAT WEARY FEELING

is bound to come. It can't be warded off by a system weakened with impure blood. Desjardins' Sarsaparilla with Iodide of Potassium and Iron removes every vestige of humor from the blood and gives to all the organs that new life and strength that is so necessary. It's merit has been proven time after time in scores of cases. We know it will give you new vigor. We refund the price if it fails to give satisfaction.

Price, \$1.00.

Desjardins Pharmacy, 417 North 3rd Street.
