The Wisconsin legislature has passed on for his course. a bill excepting liquor debts from the operation of the garnishment law. It provides that no man's wages can be garnisheed for debts incurred over the bar. As a result the Wisconsin saloon man will doubtless be more chary than of his thirsty but impecunious customers.

Thirty-five thousand men employed in the iron and steel industry at Pittsburg are to have the 10 per cent taken from their wages early in the spring restored within a few weeks. Not much time will elapse before the wages in the entire industry are back on their old footing. And it won't be long, either, before the wages and general business of the entire country are also back to their normally properous condition,

is the luckier because Thaw is still lan- ported and exported.

The board of fire and water commissioners is this year asking for more money than in any recent year. The amount, \$22,500, will be a large one to take care of on the tax roll for the fiscal year. Of this amount \$15,000 appears as an item of bonds and interest, which the board says must be spread without delay. This is an emergency item, that has not been asked for in previous years, and if it is spread gone are the hopes of any lower tax rate for 1909. The rate should be about the same as it was last year. for the \$15,000 extra asked by the water board will be offset by the difference between the appropriation in 1908 and 1909 for the park, cemetery and street called attention to the fact that the rul- shovels get further away from the cap commission, which is asking \$18,000 as ing of the attorney general that the ping and into better ore. TO ASSIST RIFLE PRACTICE.

The sub-target rifle machine, donated by Chase S. Osborn of the Soo about a year ago for the use of the companies of the Third regiment, M. N. G., will arrive in Houghton for the use of the burglary. Houghton Light Infantry this week. It larceny. tain Foley is planning to give his men thorough course of target drill with

high enough so that when a rifle rests upon it the piece will be at the height naturally adapted for shooting. The marksman rests his rifle in the machine and its delicate mechanism transmits the position of the rifle, the windage and alignment to a registering target placed beneath the rifle. When the shot is fired at the range target the little target in the machine records exactly the point struck on the larger target. The machine assists marksmen in judging distance, elevation and windage and is considered the most efficient system of rifle

practice extant. The Houghton Light Infantry is preparing for a stiff course in target pracice. In addition to regular drills with the Osborn machine there will be outdoor practice, beginning with next Sun day. As the rifle range is not yet ready for use the first practice at Hurontown will be skirmish work. This consists of shooting at mannikins at varying distances by a moving skirmish line. The company will also shortly begin the state team and individual contest,

Mining News

North Lake has definitely located the northern extension of two of the three -called Adventure lodes by diamond illing and undoubtedly will locate the third lode by similar operations within another month. The No. 1 and No. 2 les, so-called, were disclosed in boring e No. 3 incline drill hole and were ached at a depth of 1,150 feet and 1,300 et respectively. Both lodes carry copin commercial quantities, the pay ot in each bed apparently being coned to the footwall portion of the lodes, No. I lode, from which a very wy core was taken, carries considere epidote, a not altogether desirable ture, and though possibly not as value as the No. 2 lode, apparently is a estelass stamp rock proposition. It is party feet wide and shows fully twelve et of fine shot copper. The No. 2 lods a strong amygdaloid formation forty eet in width, about ten feet carrying neavy shot copper in rather exceptional quantities. The No. 3 lode will be eached by the drill hole at a depth of bout 1,800 feet, as nearly as can be caldated from data available. A fourth de encountered in the No. 4 vertical rill hole at a depth of 254 feet yielded uall fragments of vein material carrynably is the Lake lode. The company s two diamond drill outfits in operaon and a third outfit on the ground, wo complete cross sections of the proprty will be made in which the strike nd dips of the several loces will be de-

SUPERIOR.

Superior's operations are confined to ening work, with no attempt being de toward production other than a rect shipment to the stamp mill of all ck taken out in the course of developent. The tennage thus secured amounts between 100 and 125 tons daily, the pper content of the rock varying greataccordingly as the several drifts open to poorer or richer ground, the average robably being around thirty pounds sineral per ton. The No. I shaft has eached the eleventh level, where crossting to the lode is now in progress. he No. 2 shaft, in watch operations ere suspended last fall, remains idle, leavier equipment is being installed at hat point, and work is expected to be esumed this summer. A showing of opper ground is yet to be made in ound tributary to this shaft. The diaft is about 250 feet deep, with about 100 feet of laterals,

ELY (NEV.) PRODUCERS.

"By August first, the Nevada Consolited will be producing copper at the ate of 60,000,000 pounds per annum at acnet cost sold of seven cents per pound," says a leading official of the company. Thus it appears that the two Ely proacers, Nevada Consolidated and Cumrland-Ely, are expected to be outputng copper at the rate of nearly 100, 00,000 pounds per annum before the se of this year. Both companies have dded materially to their respective ore serves. The former is said to have dded 10,000,000 tons of additional porphyry ore to its reserves as a result of the development of the past few nonths, while the Veteran ore body of be Cumberland Ely is materially exnding in size and value. The Nevadaonsolidated people say that the question of a still further expansion of teptoe reduction works will receive ariy consideration.

Spend less time in envying the sareess of your neighbor and a little more in trying to get there yourself.

I ALSO HANDLE Artistic Monuments COST NO MORE THAN PLAIN ONES IN

Marble is entirely out of date. Granite oun gets moss-grown, discolored, requires constant expense and care, and eventually grambles back to Mother Earth. Besides,

it is vere expensive. WHITE BRONZE is strictly everlasting. It cannot cumble with the action of frost. Mess growth is an impossibility. It is more artistic than any stone. Then why not investigate it? It has been adopted for over one hendred public monuments, and by thousands of delighted customers in all par s of the country. It has been on the market over 25 years and is an established success. Many granite dealers have bought White Bronze for their own burial plots. I have hundreds of beautiful designs of all grades of work, and want to have you see them if you are interested in a monument, headstone, marker or grave cover. On receipt of a postal card will be pleased to call with designs and samples of White Bronze

and blood diseases. A dollar buys a large bottle.

HOT SPRINGS BLOOD REMEDY PURIFIES THE BLOOD.

Do you feel worn out? Feel as though you could hardly go? These are symptoms of sluggish blood: blood that is not circulating right. Are you pale and anemie? This is caused by the blood not properly nourishing the cells of the body.

Have you pimples or boils? They are the result of the blood failing to do its duty of carrying away waste material from the cells. If you have any of the above complaints do not suffer. COME TO We will recommend to you a bottle of Nyal's Lot Springs Blood

We know what it will do. We have seen the results. If you suffer from eezema, tetter, scrofula or any other skin disease, take a course treatment (not less than six bottles) and we will be greatly surprised if you are not cured. It is not a specific, but it is the nearest specific we know of, for skin-

AMERICAN MONIES

Which Have Passed Out of Use.

- \$ STATE BANK NOTES were issued from the beginning of our constitutional government until 1862-3, when their use was discontinued by the imposition of a 10 per cent federal tax on their circulation. Paper money of the Bank of the United States, a government depository, was also employed during the period from
- FRACTIONAL PAPER CURRENCY in denominations of 3, 5, 10, 15, 25 and 50 cents was issued between 1862 and 1875. In the latter year provision was made for the coinage of subsidiary silver and fractional paper money soon became obsolete,
- \$ TREASURY NOTES AND CERTIFICATES have several times been circulated by the government during its trying periods. To meet expenses of the Civil War \$1,450,000,000 in Treasury Notes was issued. All but \$375,000 of this vast, sum has since been either redeemed or converted into government funds. As late as 1879 "Refunding Certificates" bearing interest at 4 per cent were issued in amounts of \$10 each, and sold to small investors for lowering the country's bonded indebtedness. Of the issue, which exceeded \$40,000,000, there remained unredeemed in 1895, \$56,480.00.

If an old sore existed simply because the flesh was diseased at that particular spot, it would be an easy matter to apply some remedy directly to the place that would kill the germs; or the diseased flesh might be removed by a surgical operation and a cure effected. But the very fact that old sores resist every form of local or external treatment, and even return after being cut away, shows that back of them is a morbid cause which must be removed before a cure can result. Just as long as the pollution continues in the blood, the ulcer remains an open cesspool for the deposit of impurities which the circulation throws off. S. S. S. cures Old Sores by purifying the blood. It removes every trace of impurity and taint from the circulation, and thus completely does away with the cause. S.S.S. has cleansed the blood, the sore begins to heal, and it is not a surface cure, but the healing process begins at the bottom; soon the discharge ceases, the inflammation leaves, and the place fills in with firm, healthy flesh. Under the purifying and tonic effects of S. S. S. the system is built up, and those whose health has been impaired by the drain and worry of an old sore will be doubly benefited by its use. Book on Sores

and Ulcers and any medical advice free to all who write. THE SWIFT SPECIFIC CO., ATLANTA, GA.

Coal producers, according to wholesalers and marine men, are up against an overproduction. At the end of the anthracite coal strike they had a large amount of coal above ground. It was figured that this would curtail further roduction, but instead the coal barons kept on digging. Now they are facing educed prices and a slow lake season, The reduction in price, it is said, has not induced any increased buying, and the narrow margin of profit has made i extremely difficult to get along in the pper lake territory. There is also some difficulty to get smaller boats for use in the shoal water ports, and that has added to the difficulty of lake shipments, especially as the smaller ports have been the principal sources from which demand has been coming so far this spring. The larger ports have much coal on dock.
