

ALDRICH HOLDS HIS CHARGES JUSTIFIED

He Has Evidence That He Thinks Will Vindicate His Assertion the Germans Have Been "Impertinent" in Invading Congress

That They Have Attempted to Influence Tariff Legislation in Their Behalf He Considers Ample Borne Out by the Memorials of Commercial Bodies and Industrial Establishments, and These Memorials Will Be Submitted to the Senate at Once

Washington, June 4.—A summary of the contents of the various memorials of the German chambers of commerce and industrial establishments, criticizing the statements made by American manufacturers who appeared before the ways and means committee of the house, will be presented to the senate tomorrow by Chairman Aldrich of the senate finance committee. Mr. Aldrich considers it sufficient vindication of his action in charging that the German manufacturers had been "impertinent" in their invasion of American legislative halls for the purpose of influencing congress in their behalf while the tariff bill was under consideration.

Names of Critics Withheld. Without exception the names of the individuals who supplied the information to the German chambers of commerce were withheld from the report, and as far as the senate finance committee is concerned all the statements are anonymous. Witnesses before the house committee are criticized by the German manufacturers, and their statements in immediate instances are declared to be incorrect and misleading, and, in one case, it is asserted that the data presented was false.

Health Conference Proposes the Erection of a \$5,000,000 Federal Sanitarium. Washington, June 4.—At a conference here today of state and provincial boards of health of North America, one of the chief matters taken up was the plan to tax congress appropriation of a million dollars for a national leprosy hospital, where all the known lepers in the country may be taken care of by the government.

SENATE CONSIDERS COTTON SCHEDULE

Through Forenoon, Afternoon and Evening Sessions, It Devotes Its Attention to That Portion of the Pending Tariff Bill.

Mr. LaFollette Completes His Long Speech Attacking the Proposed Changes in the Dingley Rates, and in an Extended Statement, Defending the Amendments Recommended, Chairman Aldrich Makes Out a Strong Case for the Committee

Washington, June 4.—Through forenoon, afternoon and evening sessions, the senate today labored on the cotton schedule. Mr. LaFollette, of Wisconsin, completed his long speech, attacking the changes in the Dingley rates which were recommended by the senate finance committee, and replying to Senator Penrose's charge of last night that he was shunning sickness as an excuse for his absence from the night session.

Little of the Schedule Affected. "The amendments which have been suggested apply but to a very small proportion of the cotton schedule," said Mr. Aldrich. "If one would have listened to the debate one would suppose that the amendments applied to the whole cotton schedule, and that three-fourths of the rates of the Dingley law would have been increased by these amendments. But only one-tenth of the cotton schedule is affected, the remainder being unaffected with the exception of a few classes of carded wares."

Reviewing various court decisions in reference to the cotton schedule, Mr. Aldrich declared that the government has paid out as much as \$5,000,000 a year as rebates of duties on account of the various court decisions. He stated that the suggested changes apply to a very small proportion of the cotton schedule.

Washington, June 4.—The board of directors of the fraternal society, Daughters of the American Revolution, at its meeting today, attended by delegates from Iowa, Illinois, Indiana, Michigan and other states, adopted a resolution endorsing the president general's recommendation that the organization be reorganized.

LUNCHEON GIVEN ROOSEVELT.

Ex-President the Guest of the American Missionaries at Kijabe. Kijabe, British East Africa, June 4.—On arriving at the mission today, former President Roosevelt made a thorough inspection of the institution and afterwards had luncheon with forty of the missionaries and their wives and children in the country. Rev. Mr. Hurlburt, in a speech, welcomed Mr. Roosevelt to the mission. Replying, the former president expressed pleasure at being able to see the African inland mission and recalled the fact that his visit of today was the fulfillment of a promise made to Mr. Hurlburt at Washington some time ago, when the missionary was introducing to Mr. Roosevelt at the White House the delegates of a Christian organization.

KEEN INTEREST IN EUROPE.

American Legislation Watched With Eagerness, Reports Jacob H. Schiff. New York, June 4.—Marked interest abroad in the currency problem of the United States was noted by Jacob H. Schiff, the banker, who returned today from a six weeks' trip in Europe. Mr. Schiff said that everywhere he also encountered keen interest in the tariff legislation, the final settlement of which was eagerly awaited, not only in the belief it would signalize a revival of commercial and industrial activity, but would have an effect on the settlement of the currency problem.

PROPOSED WEDDING DOES NOT TAKE PLACE

Machinery of the State Department Is Used to Prevent a New York Woman's Marriage to an Alleged Bogus Count. Paris, June 4.—The heroine of a proposed marriage which the machinery of the state department at Washington was put in motion to prevent, Miss Isabel Garwood, a white-haired woman who gives New York as her place of residence, is now a guest at the Continental Hotel here. The prospective bridegroom is Count Belding de Moine Padua, once a resident of New York, whom Miss Garwood met in Egypt.

"Count" Noted as a Physician. New York, June 4.—Those Italian families in New York in which George Bettino Di Moise won favor knew him as "doctor," and not as "count." By his creditable work as a physician, he became a director of the Italian hospital, bacteriologist for the Medio-Legal society, special commissioner for the board of health to investigate the sanitary condition of Mulberry Bend, in the heart of the Italian quarter, and the founder of a private hospital. His wife was Miss Hattie Burchell, of this city, and their son is now a third-year student in the Columbia law school. Her brother said today that he did not believe the doctor has ever been divorced from his sister.

GUNBOAT GOES THITHER.

Ceiba, Honduras, the Scene of Serious Revolutionary Troubles. Washington, June 4.—Telegrams from American Consul Brickwood, at Porto Cortez, informed the state department today of reported revolutionary troubles in Ceiba, Honduras. So serious is the situation believed to be that the American gunboat Paducah sailed yesterday from Porto Cortez for Ceiba, in response to a request for the protection of foreign life and property.

SINGAPORE IS SHAKEN.

Double Earthquake Is Experienced, but No Damage Is Done. Singapore, June 4.—A double earthquake this morning here early today. No damage was done. Shocks Recorded at Manila. Manila, June 4.—Between 2:45 and 5 o'clock this morning the seismographs registered an intense earthquake, estimated at 1,500 to 2,000 miles away.

YOUNG CORBETT IS VICTOR.

New York, June 4.—Young Corbett of Denver, after going the full ten-round limit, won by a small margin a bout tonight with Sammy Smith, formerly of Philadelphia. The former lightweight champion showed many marks of the battle when the final gong sounded.

WASHOUTS TIE UP CANADIAN PACIFIC

Because of Floods Due to Melting Snow No Trains Can Get Through the Rocky Mountains Till the Middle of Next Week. Streams in Wyoming Are Out of Their Banks, Much Damage Resulting; Elkhart River Overflows at Goshen, Ind., Closing Manufacturing, and in Michigan Railroad Tracks Are Killed, Two Men Being Undermined, When Locomotive Topples Over.

Douglas, Wyo., June 4.—One life has been lost and heavy property damage has been caused by floods in the valleys of the North Platte river and tributaries. Saginaw, Mich., June 4.—Engineer John Smith and Fireman Reynolds were killed today when a Pere Marquette railway engine ran into a washout and tipped over, burying them underneath the locomotive. The accident happened two miles west of Freeland.

Winnipeg, Man., June 4.—Two had washouts have tied up the main line of the Canadian Pacific railroad in the Rocky mountains, and there will be no through trains from the Pacific coast until the middle of next week. The washouts at Devilskoke and Glacier are very serious and it is impossible to transfer passengers either way. The floods were caused by melting snow.

Goshen, Ind., June 4.—The Elkhart river today reached such a high stage that the flood conditions of March, 1907, when the residents of Elkhart were submerged, are feared. Men are patrolling the dykes. The water plant and several factories here are flooded and unable to operate. Big Four trains on the Michigan division are being detained from Elkhart to Goshen over the Lake Shore lines. The water is still rising.

BASEBALL.

Table with columns: National League, American League, American Association. Rows include teams like Pittsburgh, Chicago, New York, Philadelphia, Boston, etc.

Table with columns: National League, American League. Rows include teams like Detroit, Philadelphia, New York, Boston, St. Louis, Cleveland, Chicago, Washington.

SCHEDULE FOR TODAY.

National League. Brooklyn at Cincinnati. Boston at Pittsburgh. Philadelphia at Chicago. New York at St. Louis.

YESTERDAY'S GAMES.

National League. Chicago, June 4.—All the National league games scheduled for today were postponed on account of rain.

American League. Boston, June 4.—Mullin pitched his tenth straight victory. Score: Boston, 9; Detroit, 0. Batteries—Morgan, Burchell and Donahue; Mullin and Schmidt.

THE WEATHER.

Washington, June 4.—The following is the weather bureau's forecast for Upper Michigan: Fair, Saturday; cooler in east and south; Sunday, fair; light southerly winds.

SAYS DEAD BOY HAD "TALKED ABOUT HIM"

Calling 16-Year-Old Edgar Serber from His Home at Nashville, Tenn., Jesse McPherson, Aged 15, Shoots and Kills Him. Nashville, Tenn., June 4.—Tonight sixteen-year-old Edgar Serber was called from his home in West Nashville and killed in the street by fifteen-year-old Jesse McPherson. The slayer fired twice, blowing off the top of his victim's head. McPherson was arrested. He admitted that he went to Serber's home to kill him, saying that Serber had talked about him. Ill-feeling had existed between the boys for some weeks.

DASTARDLY PLOT FAILS.

New Mexican Bandits Attempt to Wreck the Golden State Limited. El Paso, Tex., June 4.—An attempt was made yesterday to wreck and rob the westbound Rock Island Golden State limited near Duran, New Mexico. Ties and rails were piled upon the track at a curve, but a freight train hit the obstruction first. The wreckers fired several shots at the freight crew and then mounted horses and rode into the foothills.

MISSING OMAHA OUTLAW JAILED AT DENVER.

Denver, June 4.—Jack Shelton, suspect of being one of the robbers of the Overland limited, admitted to Chief of Police Armstrong today in the presence of witnesses that he is the fourth man in the postcard photograph of the suspects held at Omaha. The police have found that Shelton had prepared an alibi to be used in case of his arrest.

SWEATBOX TOO MUCH FOR HIM.

Due to His Severe Grilling, Dr. Clemons Is Seriously Ill. Chicago, June 4.—Dr. Haldane Clemons, who is being held by the police on the charge of murdering his wife, was transferred from the Sheffield avenue police station to the county jail today, and soon after his removal he became seriously ill and was placed in the jail hospital. It was reported tonight that he is on the verge of nervous collapse. Dr. McNamara, the jail physician, said he believed that the prisoner's condition was due to the severe grill he has been put through by the police during the past week.

MURDERED FOR HER MONEY.

Mrs. Catherine Teal Slain in Brutal Manner at St. Louis, Mo. St. Louis, June 4.—Mrs. Catherine Teal was found dead in her home here tonight, with her face lacerated almost beyond recognition, her skull fractured by a blow from a sharp instrument, finger marks and knife wounds on her throat, and what is believed to be a bullet wound in her right side. It is thought that the woman was killed for her money.

THAW'S APPLICATION DENIED.

Supreme Court Refuses to Free Him from Mattewan Insane Asylum. New York, June 4.—Harry K. Thaw must remain in the state asylum for the criminal insane at Mattewan, under a decision rendered today by the supreme court, sustaining the lower court's dismissal of Thaw's application for a writ of habeas corpus.

ACCUSED OF KILLING SON.

Mrs. Kaufman, Wealthy Brewer's Wife, on Trial for the Second Time. Flandreau, S. D., June 4.—A jury was seen today in the case of Mrs. Emma Kaufman, wife of a wealthy Sioux Falls brewer, who is being tried for her second time on the charge of murdering her son. The state will begin its case on Monday.

MUST STAY IN SING SING.

Murderer Patrick's Petition Is Denied by the Supreme Court. New York, June 4.—Albert T. Patrick's application for a writ of habeas corpus releasing him from Sing Sing prison, where he is under life sentence for the murder of Wm. Marsh Rice, was denied by the appellate division of the supreme court today.

AUTOMOBILE KILLED A BOY.

Chauffeur Dragg to Serve Seven to Twenty Years in Prison. New York, June 4.—An indeterminate sentence of seven to twenty years in prison was imposed today upon William Barragh, the chauffeur whose automobile ran down and killed Ingarhard Trimble aged thirteen, on March 27.

CREW ESCAPE IN SMALL BOATS.

Steamer Iron Age Burns to the Water's Edge in Lake Erie. Detroit, June 4.—The steamer Iron Age of Huron, Ohio, burned to the water's edge off Bar port, in Lake Erie, today. Captain Willoughby and crew of nine men escaped in small boats.

VETERAN DENTIST EXPIRES.

Dr. D. S. Chase, Inventor of the Process of Making Gold Foil.

ARBITERS SETTLE TRACTION STRIKE

After Most Complete Tie-Up of the Kind Ever Experienced There, Street Car Service Will Be Resumed at Philadelphia. Ten Hours Will Constitute a Day's Work and the Men Will Receive 22 Cents an Hour, With a Further Advance if Investigation Conducted by the City Controller Shows That More Can Be Paid Without Crippling the Finances of the Company.

Philadelphia, June 4.—The traction strike has been settled. The men will receive twenty-two cents an hour, beginning tomorrow morning, and ten hours will constitute a day's work. This statement, emanating from C. O. Pratt, leader of the striking motormen and conductors, and followed by the deportation of some 450 strike breakers who came here from New York, ends the strike of the employees of the Philadelphia Rapid Transit company.

Under the terms of the settlement the men will receive twenty-two cents an hour; the old "swing system" is abolished; ten hours will constitute a day's work; all the employees will be permitted to purchase their uniforms in the open market; all future differences will be adjusted between the company and a grievance committee chosen by the employees.

McCloud, Cal., Is Lost. The striking lumber mill men today reduced their demand for an increase of fifty cents a day, to twenty-five cents. The men refused to accept the proposition, and it was declared that rather than yield the company would close its plant indefinitely. Convinced that the strike was lost, many workmen are preparing to leave. The militia is still here, but no disorder has occurred.

BUSINESS BEGINNING TO BOOM.

Progress in the Iron and Steel Industry Declared Extraordinary. New York, June 4.—R. G. Dun & Co.'s Trade Review tomorrow will say: Every test by which trade conditions are determined reveals improvement. In the iron and steel trade, the progress made is, indeed, extraordinary, and again does this branch of industry give a signal proof of its power to rise out of the depths of depression with wonderful rapidity. Increased orders, expanding production, higher prices and wages and, in some lines, records approaching even the high figures before the panic—such are the reports that now come from the trade every week.

Notre Dame Man Disgraced. Indianapolis, June 4.—Ignatius McNamara, of Notre Dame University, the orator who was disqualified in the interstate oratorical contest at Appleton, Wis., for plagiarism, was also disqualified today. Miss Janet Fennimore, of Earlham college, Richmond, Ind., was awarded first place in the state oratorical contest, which had previously been awarded to McNamara. The actual today is said to have resulted from the charge against McNamara in the interstate contest.

ACCUSED OF HORSE STEALING.

Montana Federal Commissioner Is Summoned to Court Today. Helena, Mont., June 4.—In the federal court today Judge Hunt summarily removed from office James S. Goodwin, United States commissioner at Custer, Yellowstone county. Goodwin is now under arrest on the charge of horse stealing.

WATERWAY SCHEME GETS A BLACK EYE

Prominent Army Officials Take a Strong Stand in Opposition to the Proposed Deepening of the Lower Mississippi River. A Formal Report Has Not Yet Been Made, but from Intimations Given Out It Is Gathered That the Board of Engineers Is Unanimous in the View the Case Do Not Warrant the Vast Expenditures Contemplated.

Washington, June 4.—From the known attitude of some prominent army officials, the impression has been gained that the unanimous report of the board of engineers on the proposed Mississippi deep waterway project from St. Louis to the gulf, which probably will be laid before congress before the end of next week, takes the general ground that the commercial interests of the case do not warrant the expenditure of the vast sums which would be required to construct and maintain the proposed waterway.

This matter is of much interest to the middle section of the United States, and the conclusions of the board have been awaited with a great deal of impatience, especially in congress, where two weeks ago there was an extended debate over the question of calling upon the secretary of war to transmit forthwith a report on the subject. According to law, the board was authorized to pass on the data collected by the special board created by congress to examine the Mississippi river below St. Louis for the purpose of collecting data to enable the army engineers to reach a conclusion with a view of recommending the action thereon.

The proposed deep waterway from St. Louis to the gulf is part of the project to connect the Great Lakes with the gulf by a channel sufficient to accommodate large craft throughout the year. According to the legislation adopted by congress when it authorized the survey of the Mississippi, the engineers were to collect data on the construction of a channel fourteen feet deep.

STOCK MARKET VERY ACTIVE.

Powerful Forces Are at Work and the Tone Is Strong Throughout. New York, June 4.—Powerful forces obviously were at work in the speculation in stocks today, the volume of the transactions and the size of the individual operations showing the use of the most abundant resources, such as are commanded only by speculative capital of the first magnitude. The example yesterday of what could be done in the case of Southern Pacific brought the speculative element to Wall street in troops today. Their first efforts were directed to stocks mostly directly interested by the Southern Pacific movement yesterday, but they ranged up and down the list at will during the day.

It was significant of the enthusiasm of the speculative sentiment that no depressing effect was produced by the weak tone of United States Steel, which sold below yesterday's closing price throughout the session. The recent continuous advance in United States Steel has been the backbone of the whole market, and its reaction today was even made a favorable argument for the advantage of the general market situation. The reaction was ascribed to the political purpose of the syndicate which has been accumulating stock for the Paris introduction, to allow the shorts to cover at the existing levels and not to push the punishment of the uncovered bears to a point that would threaten financial damage that might hurt the whole market.

PULLIAM TO KEEP HIS OFFICE.

Majority of the National League Directors Stand by Him. Cincinnati, Saturday, June 5.—After being in session practically all of the afternoon and until past midnight this morning, the directors of the National Baseball league deferred until some future meeting action regarding President Harry C. Pulliam, of the league, who is at present on an indefinite leave of absence. The statement was made that Mr. Pulliam had a sufficient number of votes among the directors to assure his return to the presidency in an active sense if it can be shown that he has recovered from the illness from which he was suffering when given leave of absence.

MARQUETTE, MICH., JUNE 5.

Hot days and ragged tempers travel hand in hand in Washington, D. C.

The Marquette baseball team is somewhat crippled by accidents, but hopes to be very much in the ring tomorrow.

Senator Penrose is sneering at Senator La Follette again. It's a case of a machine maker sneering at a machine breaker.

It is now settled beyond a peradventure of doubt that General Bates will have to trust to the mercies of a court-martial unless he gets out from under by a resignation before the military tribunal is convened.

The Negaunee Iron Herald yesterday published an admirable special section largely devoted to the new high school building, to be dedicated next week. It was attractively illustrated and was replete with articles of interest in connection with the Negaunee school system.

An echo of the Cameron Currie & Co. smashup is the indictment at Detroit of Louis H. Case, Cameron Currie's partner, and six of the firm's minor employees, for conspiracy. Case is charged with illegally appropriating the firm's funds to his own uses, and the indicted employees are alleged to have connived to allow him to do this. Mr. Currie has escaped the charge of wrongdoing, and the developments of the case put him in the light of a man who was deceived by his business associate and the men on his payroll.

The Lansing Journal says there has been a persistent rumor that Chase S. Osborn of the Soo will presently take himself out of the gubernatorial race. Put it down, Mr. Journal man, it's only a rumor. Justice Montgomery is the latest possibility about whom gubernatorial gossip centers. Detroit Saturday Night recently suggested him as a good type of man for the office, and of course the suggestion has to be talked over. But it is among the greatest improbabilities that Justice Montgomery would seriously think of forsaking his snug seat on the supreme bench to enter the hurly-burly of a primary contest for an office no richer in opportunities for distinction and service than the one he now holds.

The Houghton Gazette says: "We expect to see Warner enter the senatorial fight in an endeavor to get Senator Burrows' position in the upper house at Washington." And what the Gazette has to say further indicates that if the governor seeks this additional honor it will be among the missing when the list of his supporters is checked over. Now we don't share the Gazette's expectations on this point. There has been nothing in the developments of the past few months that would indicate that Governor Warner has any design of seeking to conquer new worlds, and we incline to the belief that he will not be an entry in the senatorial free-for-all. Senator Burrows will sit in, and Charley Townsend, and perhaps another candidate or two, but we believe the senatorial contest will be one which Governor Warner will witness from the sidelines.

Mayor Vaughan's action in notifying the Gas company that no more streets can be dug up without permits from the council was a proper and commendable one. Neither the mayor nor anyone else has any desire to harass the gas company, though its franchiseless position in the city appears to be an anomalous one, and it will doubtless be permitted to make whatever excavations it may from time to time find necessary. But no company or person should be allowed to excavate in the streets without being duly granted a permit. If a permit is sought it is given conditional on the street being restored to its original condition. The fact that it is granted gives a record that the proposed work is being planned, and thus insures that the proper official will oversee it, and make note of whether the street is left in good condition. There is a right and a wrong way of doing almost everything connected with the city government. Mayor Vaughan is following the proper course in insisting, as far as ties in his power,

on the right procedure being followed. The various boards and officials should carefully heed the restrictions placed on them by the law under which they are operating, and the individual citizen, or company, should be careful not to try to arrogate to himself any privileges denied by the ordinances.

Following the action of Judge Steere at the Soo this week in giving two saloon men jail sentences for violations of the liquor law there was held a meeting of the city and county officials and saloon men, at which it was agreed that the letter of the law should be observed. There were present at this conference Mayor Sullivan, City Attorney Handy, Prosecuting Attorney Wiley, members of the police commission and many of the saloon men. A dozen or more of those in attendance spoke, and the consensus of opinion was that the law must be observed. Prosecuting Attorney Wiley said that he considered it his duty to push all liquor cases called to his attention with the same vigor he pushes other criminal cases, and said that he believed in a fair and equal enforcement of the law, in which no favorites are played. City Attorney Handy spoke along the same lines. John F. Moloney was called on as a representative of the liquor interests, and said: "There is no doubt that the sentiment of the country demands that the laws be obeyed. It is this demand that is resulting in the local option campaigns throughout the country. I do not believe that local option would be a good thing for this city, but I am aware that if the law is disregarded it will help the local option element and make the submission of the question to the people of Chippewa county next spring more likely. Whether a strict enforcement of the law from now on will check this movement I would not attempt to say, for we may have an election anyway, but it would at least have a tendency in that direction. You saloon men should understand that if the local option forces invade this country they will have plenty of money to carry on the fight, and it will cost each one of you at least \$300 to carry on the campaign. I think all the dealers should sign this agreement. I'll be the first one to do it." The result of this feast of reason at the Soo will be an airtight lid in that city. The saloons will be closed promptly at 11 p. m. and will be closed on all Sundays and holidays. The prosecuting officials, police commissioners, mayor and saloon men are all committed to this proposed arrangement. Under such circumstances it should be some little time before the lid is tilted.

A FINE STRUCTURE.

In this issue The Mining Journal presents a number of illustrations that, together with the descriptive matter, show how well the school board of Negaunee has builded in providing their city with a new high school structure.

The building is as fine as any in the Northwest. It is of substantial construction, slowburning, fireproof, of ample size for many years in the future and planned to incorporate the most advanced ideas in school construction.

It has all the features that should be found in a high school building in a modern city, and houses not only a spacious assembly room, seating nearly 500 students, and the class rooms necessary to care for such an enrollment, but quarters for manual training and domestic science departments, a fine gymnasium, with accompanying baths, model laboratories and many other features.

The people of Negaunee cannot give too much credit to the board of trustees for the excellent result attained. These men gave to the project the same careful study and consideration that they would have given to one in which they were financially interested. They determined to make the best possible use of the money provided so generously by the people of Negaunee. Had they been less conscientious about their duty, had they not given so much personal attention and study to the project, but left this tiresome detail to others, the result might have been fairly good, but it could not have been so excellent.

EXPRESS RATES NEED REVISION.

Business men everywhere, as well as many individuals who have more or less dealing with the express companies, will be interested in a movement which has been started to secure a reduction of express rates by the corporations which conduct this particular branch of the transportation business of this country. The interstate commerce commission is now investigating the matter, as the result of complaints which have been made to it by certain shippers, who maintain that express charges are too high and that there should be a revision of the express tariffs. What the result may be is of course entirely conjectural, but there seems to be good ground for the belief that in many instances the express companies are keeping up their rates at exorbitant figures, which enable them to earn and pay dividends in excess of what they are justified in doing, considering their investments and the nature of the service performed.

As is generally known, a large part of the carrying business on the railroads is conducted by express companies and is not managed directly by the railroads themselves. It is the prevailing impression that the arrangements between the express companies and the railroads permit the former, under existing rates, to make excessive profits. The affairs of the express companies are shrouded in such secrecy that the general public knows little about them. The United

F. Mayer Boot & Shoe Co. MILWAUKEE, WIS.

States Express company, of which Thos. C. Platt is president, has not held a stockholders' meeting in forty-seven years.

"Certainly no corporation is organized for the purpose of holding meetings of stockholders. Provided the corporation is properly administered the annual meeting, if it is a real annual meeting, is amply sufficient for all practical purposes. This, however, is not what Mr. Platt meant. The company has a charter from the state of New York broader than any corporation would dare ask for now and one of the provisions of that charter quoted by Mr. Platt is manifestly against public policy.

If this is true of minority stockholders, how much worse is likely to be the case of the general public, which supplies the patrons of the company! The Adams Express company for years has paid 8 per cent dividends, with the exception of two years, when the rate was 4 per cent. At times there have been extra dividends, making the rate considerably more than 8 per cent. In 1898 this company issued to its stockholders as a bonus \$12,000,000 in bonds and in June, 1907, there was another large division of surplus profits amounting to \$24,000,000, or 200 per cent on the stock! When such enormous profits are made one must think that there is room for material reductions in charges to shippers.

A THRILLING RESCUE.

How Bert R. Lean, of Cheney, Wash., was saved from a frightful death is a story to thrill the world. "A hard cold," he writes, "brought on a desperate lung trouble that baffled an expert doctor here. Then I paid \$10 to \$15 a visit to a lung specialist in Spokane, who did not help me. Then I went to California, but without benefit. At last I used Dr. King's New Discovery, which completely cured me and now I am as well as ever."

YOUNG MEN WANTED.

Traveling Salesmen Earn from \$2,000 to \$10,000 a Year, and Expenses—Thousands Now Needed.

There is a man in Rochester, N. Y., who has successfully trained by mail thousands of inexperienced young men to become traveling salesmen, and secured them good positions. His method is so simple that any young man with ordinary education can master the subject in six weeks.

# City Brevities

Today's weather: Generally fair; stationary temperature. Yesterday's temperatures: Seven a. m., 66 degrees; noon, 73; 7 p. m., 59; maximum, 74; minimum, 59.

Miss Nellie Frieberg will leave Sunday to spend three weeks in Chicago and St. Louis.

A meeting of the Queen City Commercial club will be held at the city hall Monday evening.

Mr. and Mrs. John Schneider, of Saginaw, have arrived in the city with their daughter, Mrs. Robert Blemhuber.

Thomas M. Miller, of Pittsburg, a friend of Andrew Carnegie, was in the city yesterday, on business concerning the Klonan mine.

For the next three months the Peter White Public Library will close evenings at 8 o'clock and will not be open at intervals on Sunday.

The Mary McGregor and tow Allghany, which have been at Spear's dock for several days, unloading coal, have gone to Bayfield and Duluth to load lumber.

Rev. Oscar Sandahl will leave today for Red Wing, Minn., to attend a convention of the Swedish Lutheran church, after which he will take his annual vacation. During the absence of his pastor, David Knock, a university student.

Dr. and Mrs. E. J. Hudson will leave this evening for New York and will sail for Europe on June 8. The trip is being made especially in the interests of the Pioneer Iron company, and England, France and Germany will be visited. It is uncertain just when they will return.

The Bijou photographic staff will take a number of pictures in Marquette and vicinity today to be used in illustrating "Old Marquette," a song written by a former Marquette boy. It will be sung by Ryan and Cruster commencing Monday. "Late Hours," which has attracted crowds to the Bijou the past week, will be the song feature for this afternoon and evening.

Second Team to Michigan—The Marquette second baseball team will leave at 6:45 tomorrow morning for Michigan to play ball with the team representing that town Sunday afternoon.

City Hall Closed—In accordance with a resolution passed at the last meeting of the council, all the offices in the city hall will be closed tomorrow afternoon and every Saturday afternoon until Sept. 1.

Band Concert Sunday—The street railway company has engaged the Harvey Stock company band of twelve pieces to give the first concert of the season at the island next Sunday afternoon. The program will consist of varied selections, both standard and popular, and will begin at 3 o'clock.

Change of Time—The summer schedule will go into effect on the South Shore road tomorrow. The only changes will be an additional train leaving Marquette for Ishpeming at 10 p. m. daily, which will return to this city at 4:25 p. m., and a Sunday train from Michigan, arriving here at 2:05 p. m., returning at 10 p. m.

Protective Association—A movement is on foot to organize a Camp Owners Protective association, the purpose of which will be to provide a fund to compensate persons who break into camps owned by residents of the city. Each member of the association will be expected to pay a small annual assessment, and the fund thus obtained will be used to capture and put out of business anyone who breaks into hunting or summer camps or destroys property in or about the premises.

Will Ice Entire Product—Beginning this morning, the entire product of the Vandenberg dairy will be delivered to customers packed in ice in the wagons. For several days this method has been adopted with milk for babies, but it has now been decided to deliver the entire product in this manner, at no increase in price. An article with which extra care is taken, for babies' use, may be obtained at an additional cost of two cents per quart. By keeping milk cold in this manner from the time it leaves the cow until delivered to the customer, it is expected that the necessity of more than one delivery per day will be obviated.

Hamilton Has Gone—The management of the Marquette baseball team seems to be in a hard luck. Hamilton, who has held down the second sack so creditably in the last two games, has been forced to return to his home in Newberry, and will be seen no more in a Marquette uniform. Gregg was injured early in the week and will probably not play in tomorrow's game at Ishpeming. Shields, now in the employ of E. R. Tauch, will probably take Hamilton's place at second and either Woodman or Weiser will be brought in to third. In that case, either Johnson or Scholtz will play in the outfield.

Motor Cars Here—The four sight-seeing passenger cars to be put in service by the Pioneer Motor company between Marquette, Negaunee and Ishpeming and nearby points of interest, arrived over the South Shore road last night, and will be tried out today. It is possible that the cars will be placed in passenger service Sunday. Two of the cars will be used on the Marquette-Ishpeming run, and two will be used about this city. The machines were shipped on two flat cars and are set up all ready to run.

Fingers of Iron Man—A. W. Orr, of Brimley, Mich., is in the city. Orr has the fingers of an iron man, and the feats that he accomplished with his powerful digits are wonderful. He can bend a sixty penny wire spike double, and then do the same trick for a 125 penny spike. Three-eighths inch bolts receive the same hard treatment at his hands, and he bends three-fourths inch iron bars with the aid of his teeth. A No. 2 horse shoe he twists every way, and he tears a deck of cards with one rip. Mr. Orr is a cripple, having lost both legs in a railroad accident. He was formerly located in Marquette for a time.

INSURE WITH PETER WHITE & CO. The regular Saturday night hop will be held at Fraternity Hall tonight. Music by the Peerless orchestra. (6-4-21)

# Northern Normal Notes.

Superintendent E. E. Scribner of Ishpeming paid a flying visit at the Normal on Thursday.

President James Kaye goes to Menominee on Friday next, to deliver the commencement address.

The new year book is nearly ready for publication. A few changes will be made in the course of study.

The Hon. L. L. Wright, state superintendent of public instruction, spent Thursday afternoon on a visit at the school.

Miss Margaret Fitzsimmons, who was called home last week on account of the death of her father, returned to school on Tuesday.

Instead of the usual Assembly exercises on Tuesday morning, the half hour was devoted to chorus practice for the concert to be given in the evening.

The Reverend Bates G. Burt of this city, rector of the Episcopal church, will deliver the commencement address Sunday, June 20, at the Normal Assembly hall.

Miss Edith O'Meara, who was obliged to leave school at the end of the winter quarter on account of illness, visited the school on Thursday and Friday. She will return to graduate next year.

The firm of Schock & Hallam has recently received a variety of new Normal pens. The most elaborate one has a very good representation of the Normal seal at the left or widest side.

Clarence Brown of this city, graduate of the Normal in '04, has recently taken a fine position in Fostoria, Ohio, with a firm manufacturing torpedo signals. The head of the firm is the inventor of the torpedo, and is an uncle of Mr. Brown.

Wednesday afternoon, next, Orlis Literary society will entertain, with a picnic at Presque Isle, the society of Ygrasil and the members of the faculty. This will be the second time Orlis has undertaken such a picnic. The event last year was a most delightful affair.

Last evening President James H. Kaye made the address before the Menominee of the Baptist church. The subject was "Science and Religion." The members of the league very kindly opened the meeting to the ladies and Dr. Tupper, the pastor of the church, extended the invitation to the students of the Normal school.

Mrs. Eulie Gay Rushmore yesterday made the address before the Menominee of the Baptist church. The subject was "Science and Religion." The members of the league very kindly opened the meeting to the ladies and Dr. Tupper, the pastor of the church, extended the invitation to the students of the Normal school.

President James H. Kaye and the faculty of the Normal school are in receipt of a handsomely engraved invitation from Superintendent Orr Schurtz and the board of education of Negaunee, to attend the dedicatory exercises of the new high school of that place June 19. The exercises occur in the evening and a considerable number of the faculty are discussing a plan for an automobile party for the event.

Thursday morning, Assembly was in charge of Orlis Literary society. Miss Marie Deasy, the president, announced the following program: "Michigan, My Michigan," sung by the school; a piano solo, "The Swan Song," by Wagner, played by Miss Alphid Carlson; a reading, "The Whistling Regiment," by Miss Grace Mackay; Mrs. Mackay was forced to respond with an encore and gave "Deacon Brown," a humorous account of the deacon's courtship.

Miss Ida J. D'Ooge of Ypsilanti, daughter of Professor D'Ooge of the Normal college, has been engaged to take the place for next year, of Professor J. E. Lautner, head of the department of modern languages in the Northern Normal, who has been granted a year's leave of absence. Miss D'Ooge has recently spent two years and a half in Germany and one in Paris. She speaks both German and French fluently.

The campus has undergone a complete transformation in the past five days. The lawn is in perfect shape, the grass having been cut once, and the shrubbery is a mass of green, with here and there a bush in full flower. The children's gardens are planted and in better shape than ever before. This is the third year of cultivation of the ground. The tennis court is in order, and no doubt will be in constant use from now until the close of the summer quarter.

Two articles have recently been published by Dr. E. R. Downing in the Biological Bulletin. This is a monthly periodical devoted to research work on the problems in the science of biology. The articles are technical, and one of them is fully illustrated from drawings and photographs by the author. The two papers are entitled "The Orogenesis of the Upper Cambrian," and "The Connections of the Goniatid Blood Vessels and the Form of the Nephridia in the Arthropoda."

The concert given at the Normal on Tuesday was well attended and very pleasing to the audience. The following program was offered:

Oral Chorus from "The Blue Maiden"  
Lol. Der. Dornen  
Friedrich Glaube  
Harriet B. Otman  
La. Scellane, piano duet  
Misses Hicks and Brown  
Delight Waltz  
Harriet B. Otman  
Ballet Music, from "King Manfred"  
Cari Reinke  
Mesdames H. H. Williams, H. D. Davis, E. Boyer, W. S. Hill

"The Legend of Granada" Henry Hadley Normal chorus, assisted by Agnes Berg, as Fatima, the magic queen, and Ernest Roberts, as Hernandez, a leader.

Miss Marguerite Barnes was the accompanist.

Vandenberg's special milk for infants, which is now placed on the market at 10 cents per quart, is equal to the certified milk of Chicago, Boston and New York, which is now selling at 14 cents per quart. (6-1-1w)

### SCHOOL EXERCISES WEEK AFTER NEXT

**PUBLIC RECEPTION.**

Citizens of Ishpeming Invited to Inspect Y. M. C. A. Structure.

The dedication of the Young Men's Christian association's building will occur tomorrow, Sunday, June 13, beginning at 3:30 o'clock. There will be an extensive program of music and speeches. Among the speakers will be Messrs. Jas. S. Smart and A. L. Parker, of Detroit; W. G. Mather, president of the Cleveland-Cliffs Iron company; G. D. McDill, of the international committee of the Y. M. C. A. John L. Bradford will preside at the meeting, and Charles Burt, president of the association, will give an address of welcome.

A public reception will be held on Friday, the 11th, from 2 to 9 p. m., when the board of directors, assisted by their ladies, will receive the people of Ishpeming and give all an opportunity to inspect the building.

Plans are also being made to have the board of directors and the trustees of the Ishpeming association meet Saturday night, the 12th, for a conference and luncheon with the visiting association men.

The association has been open since Tuesday and members are rapidly joining. A number of gymnasium classes have started.

### CLASS DAY PROGRAM WILL BE HELD IN THE AUDITORIUM OF HIGH SCHOOL—COMMENCEMENT AT ISHPEMING THEATRE.

The Ishpeming public schools will close the week after next for the summer vacation. There will be exercises three evenings, Tuesday, Wednesday and Thursday, the 15th, 16th and 17th. Tuesday evening Rev. C. G. Ziegler, rector of Grace Episcopal church, will preach the laudatory sermon in the auditorium of the high school. The class day exercises will be held the following evening, also in the auditorium, and on Thursday evening the commencement exercises will be held at Ishpeming theatre.

**Class Day Program.**

The program for the class day exercises is as follows:

Music: Anvil Chorus from "Il Trovatore"—High School Orchestra.  
High school song.  
President's address—Walter Sterne.  
Class history—George Tucker.  
Ivy oration—Minnie Hegdahl.  
Music: Bell chorus from "Chimes of Normandy"—High School Glee Clubs.  
Statistics—Albert Brown.  
Roll call—Angela Schumacher.  
Class poem—Lorraine Barnaby.  
Piano duet, selected—Alice Moody and Dorothy Eger.  
Faculty notes—Alice Shea.  
Class will—Mayme Brown.  
Junior response—Ray Yungbluth.  
Vocal solo, selected—Ethel Collick.  
Class prophecy—Gyda Olson, Huldah Flack, Sadie Nolan, Agnes Bergman, Hilmer Gellein, Booth Goodman, Clifford Jastiecki, Lena Olson.  
Class song—Words by Marjery Barney and Myrtle Bigger.  
Presentation of memorial—Jane Drew.  
**Program for Commencement.**

The commencement exercises will take the form of a "United States Senate," the subject under consideration being the Payne tariff bill.

President Pro Tem—Herman Allen.  
Music, selection from "The Grand Mogul"—High School Orchestra.  
Invocation.  
Salutatory—Lola Nesbitt.  
(Senate called to order).  
General discussion on tariff bill—Edgerton Cooley.  
Speech on hosiery and gloves—Irma Altshwager.  
Speech on lumber—Charles Carlyon.  
Speech on petroleum—Lida Larson.  
Speech on iron—Larue Verran.  
Speech on income tax—Emily Smith, Rose Werner.  
Speech on hides—Will Quinlan, (Adjournment of senate).  
Valedictory—Selma Hoyeth.  
Presentation of diplomas.  
Music, "Daughter of Error"—Angela Schumacher and Glee Clubs.  
The senate will be adjourned twice during the session for music by the High School Glee clubs.

**Senior Class Roll.**

The senior class motto is "Diligentia Omnia Vincit"; the flower, yellow rose, and the colors, gold and white. The class roll is as follows:

Walter Clayton Sterne, president; Mayme Pauline Brown, vice president; Thomas Marriott Bargh, treasurer; Gyda Josephine Olson, secretary; Herman Allen, Irma Altshwager, Lorraine Barnaby, Marjery Barney, Agnes Bergman, Myrtle Bigger, Jane Brewer, Albert Brown, Loretta Carlson, Charles Carlyon, Lily Carlyon, Ethel Collick, Will Cooley, Edgerton Cooley, Emily Cox, Catherine Devan, Herbert Devine, Jane Drew, Dorothy Eger, Ida Eggan, Huldah Flack, Lydia Gill, Hilmer Gellein, Booth Goodman, Gerda Heistrom, Gladys Hegdahl, Selma Hoyeth, Lena Olson, Sophie Olson, Lillian Pearce, Loretta Power, Isabella Pryor, Will Quinlan, Angela Schumacher, Alice Shea, Emily Smith, August Sloglund, Jennie Sodergren, Harvey Tompsett, William Trebilcock, George Tucker, Lars Verran, Ethel Wamberg, Lulu Weber, Rose Werner, Emily Wood, and others.

The production on the whole is one of the most satisfying of its kind ever seen at the Ishpeming playhouses. The stage settings are a strong feature. As the company comes direct from the Lyceum theatre, Duluth, arriving here at 6:35 p. m., the curtain will not ring up until 8:30.

### SOCIETY PLAY.

#### Students of High School Will Give Entertainment Friday Evening.

An entertainment will be given next Friday evening, the 11th, in the auditorium of the high school, by girl members of the senior class. The play, "The Mouse Trap," a comedy by Howells, will be given. An admission of ten cents will be charged and the entertainment will start at 8 o'clock. In addition to the play, there will be musical numbers, recitations, etc. The cast of characters for "The Mouse Trap" will be as follows:

Mr. Campbell... Clara Steinbracker, 70  
Mrs. Somers... Florence Lioret, 70  
Jane... Marguerite Scribner, 70  
Mrs. Miller... Ethel Bergdahl, 70  
Mrs. Bent... Martha Anderson, 70  
Mrs. Curven... Angela Schumacher, 90  
Mrs. Roberts... Mayme Brown, 90

**RIFLE PRACTICE.**

Members of Company I, Michigan National Guard, will begin their outdoor rifle practice tomorrow morning on the range west of the cemetery. The targets will be placed at 200, 300 and 500 yards and held in place by the members of the company. Those who plan to participate are requested to meet at the armory in the Braastad block at 8:30 sharp.

Dirt for lot filling cheap. Henry Lukkarainen, at Finnish Lutheran church parsonage, North Maple street. 4-11-11

### FROM MORGAN'S CURB LETTER.

"All the markets were somewhat reactionary today, especially those stocks which are held by the leaders in the market. Declines were only nominal, and some slight reaction is natural at this time, but no decline of consequence is expected at present, even in the high priced rails. The 500 stock market index held well above 56. Mass Consolidated was still subjected to liquidating sales. There was scattered buying of Amalgamated on the advance of electrolytic copper by the United Metals Selling company to 125. Sales were acted in the price of the shorts. Trading on the curb was slightly less active, and price changes were unimportant. Chief Consolidated was in good request around 15, with several large transactions at 1 1/16. We are advised that this issue is being sold for a substantial upward movement. Ohio Copper and Davis Daly were each 3/4 higher. Copper shares as a whole, show a very strong undertone, and we look to see the market broaden gradually. Doubtless the price of copper is not yet large, but the time is approaching when speculative attention will be diverted from the rails and industrials to these issues. We continue to advise purchases on every decline. It might well be said that 'Wealth is in copper, its profits and runs away will be back in the market for many a day.'"

Yesterday's prevailing prices were:

### FASCINATING MUSIC.

Strong Musical Production to Be Seen Here Monday Evening.

"The Gingerbread Man," which will be seen at Ishpeming theatre Monday evening, contains several catchy musical numbers and is beautifully staged. All of the clever people seen in the show when it was here two seasons ago are still in the cast. They include Fred J. Nico, who portrays the character of the "Gingerbread Man"; Garrick Major, Ross Snow, Maurice Hilden, Fred Holmes, May Henton, Rose Murray, Jane Edwards, and others.

The production on the whole is one of the most satisfying of its kind ever seen at the Ishpeming playhouses. The stage settings are a strong feature. As the company comes direct from the Lyceum theatre, Duluth, arriving here at 6:35 p. m., the curtain will not ring up until 8:30.

## SHAKE INTO YOUR SHOES

Allen's Foot-Powder, a powder. Relieves painful, smarting, nervous feet and improving nails, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. ### ISHPEMING IN BRIEF.

W. S. Fellows of Mononimie was a visitor in the city yesterday. J. Wahlman & Son are putting a plate glass front in the Pengase block on Main street.

Arthur Hendra and Carl Pearlstrom will leave tomorrow evening for Rockford, Ill., where they expect to remain permanently.

The ladies of Calvary Baptist church have postponed their sale of work. Notice of the date will be announced in a few days.

Tomorrow evening at Calvary Baptist church the pastor will speak upon the theme, "The Young Man Who Falls Asleep in Church."

Two fresh deer heads, also hides, were recently found near the nuisance grounds. The animals had apparently been killed but a short time.

The members of the Ishpeming fire department will attend services in a body tomorrow morning at 10 o'clock at St. John's church. Rev. J. A. Kent, the pastor, will deliver a specially prepared address.

Mrs. Will Bradley, a former resident, who has been here the past week, visiting Mrs. V. S. Hillier, left last night for her home in New York. She and her daughter, Miss Phern, will sail for Europe in two weeks.

Dr. E. R. Downing of the Northern Normal will deliver a stenographic lecture on "The Work for the Neglected City Boy" at the Presbyterian church tomorrow evening, under auspices of the Men's Sunday Evening club.

The Business Men's team will play its first game of the season Monday afternoon, having as opponents the Brokers' and Bankers' nine of the two cities. The game will be called at 4 o'clock at the Union Park grounds.

The state board of barbers examiners met here yesterday, when several applicants for licenses were examined. It will meet Tuesday at Hancock and Wednesday at Ironwood, concluding the upper peninsula trip at the latter place.

There will be confirmation exercises tomorrow at the Mission church, when a class of thirty-four boys and girls will be confirmed. There will be exercises appropriate to the confirmation at both the morning and evening services.

John Farm arrived in the city yesterday, after an absence of several weeks in New York and Pennsylvania. He is now in the employ of Calkins & Augsburger of Byron, Mich., dealers in high bred horses. Mr. Farm expects to spend the next month or more at home.

The Ishpeming baseball team will meet the Marquette nine at the Union Park grounds tomorrow afternoon, the contest starting at 2:30. Tomam and Nichols will probably be the battery. Ladies will be admitted free, but will be charged ten cents for seats in the grandstand.

Martin Claven will give any member of the Ishpeming ball team making a

### ART NEEDLEWORK DISPLAY.

Doyle-Anderson of Chicago have opened a display of their work in the Dundon block, in rooms formerly occupied by Kennedy Millinery Co. The ladies are invited to visit the display. A specialty is made this year of the lingerie waists in colors. Instructions given. Standing time. (6-2-11)

### Upper Peninsula

#### Scaman's Locker Found—

Keeper Barkley of the Grand Marais range lights picked up a seaman's locker containing a shaving outfit and other trinkets on the beach at that place, the same presumably having come from the foundered steamer Adelia shores. The contents of the locker were intact, notwithstanding the buffeting received by the sea of Lake Superior. Bottles of free lotion were unbroken and the entire contents of the locker bore all evidence of the deceased owner's preparation for the final voyage.

#### Making Good With Pittsburgh—

The New York Times has this mention of a former Upper Michigan ball player, now a member of the Pittsburgh National league team: "No Pirate player, bearing the 'young fellow' who plays short, has played better ball around New York than Jay Barbeau, who is filling the space left vacant at third by the playing of Tommy Leach in center. From pressing indications the former Cleveland-plays ball according to the company, he is traveling with, and with the speed shown by the Pirates this season, Barbeau, who always could hit, has developed into a three-bagger equal to any man playing that position in either league. At least this is the opinion of fans who have watched his work here and in Brooklyn.

#### Automobile Speeders Fined—

The third arrest at Mononimie for violation of the ordinance relating to automobiles took place when Frank Lloyd was arrested by the police, charged with breaking the law governing the speed at which the cars may be run. He was arraigned in municipal court and paid his fine of one dollar and costs of two dollars. The police have been instructed to arrest all violators of the speed ordinance regardless of who they are. At Iron Mountain, Douglas Bell, a Detroit autoist, was arrested for violating the automobile ordinance. Douglas was over-speeding when he was espied by Chief Larkin. Taken into justice he paid a fine. Bell said that he had run his automobile at the rate of twenty miles per hour all the way from Detroit, and that nothing was said to him enroute about over-speeding.

### BIDS WANTED.

Sealed bids will be received by the Board of Public Works, of the City of Norway, Michigan, up to 2 o'clock p. m. Tuesday, June 8th, 1909, at the City Hall, in said city, for furnishing certain materials and constructing certain additions to the water works, necessary to use the Lake Fume supply.

The work to be done includes the laying of about five (5) miles of 12-inch iron water pipe, about 5 per cent of which is from 10 to 20 feet cut; also a water inlet, screening chamber, valves, valve boxes, air valves, water meter and other appurtenances to the pipe line.

It is also intended to construct a water tank, 35 feet in diameter by 41 feet high; all above ground. Bids will be received upon reinforced concrete for this purpose, and also upon a tank constructed of steel plates. Bids will be received on the whole or any part of said work.

The board reserves unto itself the right to accept or reject any particular bid.

Plans may be examined on or after the 24th day of May, at the City Hall in said City of Norway, Michigan, or at the office of John W. Alvord & Chas. R. Burdick, 1212 Hartford Bldg., Chicago, Ill.

JOS. VAN KERCKHOVE,  
City Clerk.  
(5-17-6-7)

LOST—Gold chain necklace, set with coral. Sunday, between Rich street and St. John's church. Reward. Return to Mining Journal. 6-3-11

## TAFT TURNING OUT THE ROOSEVELT MEN

By the Time the ex-President Returns Few Will Be Left, It Is Expected—Hitchcock's Influence Seems to Be Growing.

Washington, June 4.—The distinct Rooseveltians in office are rapidly dispersing to private life. There is panic among them accordingly. They are seeing the handwriting on the wall at last. And yet such a change is nothing more than was reasonably to be expected. President Roosevelt gradually eliminated the distinguished McKinleyites.

As a matter of fact, there is little difference in the practices of Presidents about putting men of their own type and following into office. While a President is the leader of his party he stands forth almost invariably as the representative of some particular faction of that party. He wants men of his own faith at the helm. A Democratic President puts in Democrats, a Republican President Republicans. But the change in tenure is almost as certain when a Republican President succeeds a Republican President.

Roosevelt was not abrupt in displacing the McKinleyites. Of course he came in as President for the term for which McKinley had been elected, and did not feel like asserting himself about appointments, as does one who had been elected in his own right. Taft came in in his own right, and therefore has been at liberty to make his own selections.

He has not hastened about displacing Rooseveltians, but he has proceeded so steadily and unerringly that incumbents are no longer cherishing illusions about what is in store for them.

**Two of Old Cabinet Hold.**

Natural as such a development is, it is significant of Taft's intention to be President himself. A President must have a large body of loyal men throughout the country. Some choose to call it a machine. Roosevelt had his, and after the old Hanna-McKinley appointees had been eliminated, a most loyal machine it was. Roosevelt knew how to build up an organization and how to maintain it.

President Taft started upon a distinctive policy in the choice of his cabinet. Only two of the men who have ever sat with him in the Roosevelt cabinets are around his own cabinet table. One of them is Secretary of Agriculture Wilson, who came over from the McKinley administration. The other is Secretary of the Navy Meyer, who has been placed in the most difficult cabinet positions, and is believed in Washington to be making good.

Ex-Postmaster-General R. J. Wynne, distinctly identified with the Roosevelt administration, was dropped out the other day as consul-general at London. Assistant secretaries in the departments have been gradually displaced, and the axe is hanging over the heads of others. This is not necessarily a reflection upon the retiring officials. Most of them have been fairly efficient. A few have not been. But there were other men more closely identified with the Taft cam-

paigns for nomination and election **Helps Original Taft Men.**

True, President Roosevelt was the great forerunner that campaign and his lieutenants were on the watchtowers for Taft. But the new President had his own workers in nearly every state. Recognition of them has been coming slowly, but none the less surely. The original Taft men are coming into their own. Before Theodore Roosevelt returns to America the administration organization will be manned by officials whose first political allegiance has been and is to Taft, not to Roosevelt.

A great stride in that direction has been effected by the resignation of the director of the census, S. N. D. North. It apparently was not sought for political purposes, as far as the President is concerned. But it was cordially welcomed politically by some of the President's lieutenants. They will be in command over numerous census activities, which does not necessarily mean to the detriment of the service. There will be supervisors of census in every state of the Union.

While the enumeration of population will occupy only a month at the outside, the supervisors will hold office for about a year. Much of the time they will have little to do, except to correct errors in accounts and hasten belated returns. Their service will extend over the period of the next congressional election. There will be numerous little ways in which they can be helpful politically.

**Pleading to Congress.**

The veering out of Rooseveltians in the high department places and the nominations of distinctly Taft men in their stead and for good berths elsewhere, on the whole, pleasing to Congress. The leaders hail such evidence as proof of a distinctive Taft administration. They did not like it when Roosevelt proceeded to oust Republicans of the McKinley-Hanna brand. The McKinley-Hanna "outs" are by no means being taken care of now and that does not affect the rejoicing in congress one way or the other. The cordial dislike of Roosevelt has not abated on the hill a jot. It is the passing of Roosevelt's brand of followers from the nomination rosters that pleases. The new men getting into office are not so much anti-Roosevelt as they are pro-Taft, which, after all, is quite a difference.

Incidentally, the political power of Postmaster-General Hitchcock appears to be growing. How much positive influence he has with the President may yet be open to question. It has yet to be proved. But his influence in preventing seems to be very strong. He is credited with having kept an old-time opponent—Elmer Dower of Ohio and New York—from getting that fat national bank examiner'ship in New York at \$12,000. Since that episode the men in Washington who make a business of politics have been taking some notice of Hitchcock. They had been disposed to ignore him.

The United States annually produces more wheat than any other country in the world—434,000,000 bushels of 3,168,000,000 bushels.

Everyone would be benefited by taking Foley's Urine Laxative for constipation, stomach and liver trouble, as it sweetens the stomach and breath, gently stimulates the liver and regulates the bowels and is much superior to pills and ordinary laxatives. Why not try Foley's Urine Laxative today? Sold by all Druggists.

## Negaunee Department

### COUNCIL HOLDS ITS MONTHLY SESSION

FIRE COMMITTEE REPORTS THAT PLANS FOR NEW FIRE HALL, BEING PREPARED BY CHARLTON & KUENZLI, WILL BE COMPLETED IN A FEW DAYS.

Alderman C. B. Driscoll, chairman of the fire committee, advised the council at its meeting Thursday evening, that the plans for the new fire hall, being prepared by Charlton & Kuenzli, will be completed within a few days. If they are satisfactory to the committee it is possible that the excavating will be started before the next regular meeting. The fire department is to be provided with new harnesses at the horses at No. 2 horse house and the purchasing committee was instructed to procure them.

### Plowed Snow in May.

In the monthly report of the highway committee an unusual item of expense, that of plowing and shoveling snow from the sidewalks in May, was included. The cost for this service, following the storm of the month, was \$12.90, and it cost the city \$83 to open up the catch basins, many of which were blocked with ice.

The expenditures in the highway department in May amounted to \$1,342.41. The principal item was the clearing of streets and alleys, the cost being \$1,020.50. The raking and repairing of the roads leading to the outskirts cost \$78.70; surveying, \$24; hauling sidewalk filling, \$20, and opening out at the rock crusher, \$92.41.

### Light and Water Reports.

The receipts of the municipal lighting plant in April, as reported by Clerk Mitchell, were \$1,871.08, compared with \$1,828.07 in the corresponding month last year. Thirty-four incandescent lights were added in May, bringing the total on the circuit up to 6,482. On the gas circuit there are sixty-four street lights and eleven commercial arcs.

The coal consumed in May in the operation of the lighting plant—138 tons, 1,645 pounds—cost \$355.29. Other operating expenses brought the total to \$567.82. A total of 18,700 kilowatts were generated for the incandescent circuit and 5,779 for the gas circuit. The number of kilowatts generated for the incandescent circuit in May last year was 11,700, and over ninety-seven tons of coal were consumed.

### Anthony and Rough Re-elected.

F. C. Anthony and James H. Rough, whose terms as members of the board of public works had expired, were re-elected for another term, without opposition.

The board recommended that the country road leading to Ishpeming be repaired from the South Shore depot to the city line, also that the Palmer road, leading to the Consolidated Fuel & Lumber company's office, extending to the city limits, be improved. The work is to be started soon.

### Several Petitions.

Charles Vincent, William Waters and John Martin, who were employed as sewer cutters on the sewer system, near the Mary Charlotte mine, in his condition, but that the Mary Charlotte Mining company has to repair it.

The recorder was instructed to present a report at the next meeting of property owners who have not paid for concrete walks built last year.

The board of public works was instructed to have the drinking fountain moved. As the council ordered the fountain removed from the city building property it is possible that the fountain will be placed on or near the front lawn.

The council denied the request of Frank Riesing for the extension of the committee on water works.

### WOMEN WHO ARE ENVIED.

Those attractive women who are lovely in face, form and temper are the envy of many, who might be like them. A weak, sickly woman will be nervous and irritable. Constipation or kidney troubles show in pimples, blotches, skin eruptions and a wretched complexion. For all such, Electric Bitters work wonders. They regulate Stomach, Liver and Kidneys, purify the blood; give strong nerves, bright eyes, pure breath, smooth, velvety skin, lovely complexion. Many charming women owe their health and beauty to them. 50c at The Stafford Drug Co.'s store.

### TO DETROIT AND RETURN, \$7.00

Via the South Shore in connection with steamers of the Detroit & Cleveland Navigation Co., leaving Marquette June 9, 12, 17, 19; Toledo, \$7.50; Cleveland, \$8.50; Buffalo, \$9.00. Return limit about three weeks. Apply early for reservation. (5-24-124)

To avoid serious results take Foley's Kidney Remedy at the first sign of kidney or bladder disorder such as backache, urinary irregularities, exhaustion, and you will soon be well. Commence taking Foley's Kidney Remedy today. Sold by all druggists.

### ALUMNI RECEPTION.

Officers Elected and Committees Named at Annual Meeting Thursday.

The Negaunee High School Alumni association held its annual meeting Thursday evening, when officers to serve for the ensuing year were elected and plans perfected for the annual reception to the seniors. The reception and hop will take place a week from last night in the basement of the new high school building. The officers chosen for the ensuing year are:

President—Charles Yates.  
 Vice President—F. M. Curran.  
 Treasurer—Walter Hanson.  
 Secretaries—Katherine Sullivan, Miss Marguerite Sues.  
 Miss Lydia Steele is chairman of the committee on tickets and dues and Mildred Yates will direct the committee on decorating. The chairman of the committees will have the privilege of selecting the other members.

### MERTEN IS BUSY.

F. J. Merten, the plumber, is having a busy spring season. He sent two plumbers and a helper to Grand Island this week, to look after the job of installing five bath rooms at the addition to the Hotel Williams at that resort. The material is all on the ground and the work will be rushed to completion.

The Kewaunee system, which will keep a uniform pressure of seventy-five pounds, will be used at the hotel. Mr. Merten is also putting in bathtubs at the home of the city marshal, Captain John Deacon, Thomas Connors, C. L. Spurler and Mrs. Isaac Johnson. He has a number of other important jobs, and has had to put on two additional skilled plumbers.

### HORSES FOR GRAND ISLAND.

Charles McCann, who conducts a livery business at Munising, was in the city yesterday looking for horses to be used in his stables on Grand Island. Mr. McCann is doing the team work on the island for the Cleveland-Cliffs Iron company, and he is also to have the "lute" privileges. The company expects to have the addition to Hotel Williams finished by the first of next month. The resorters have started to come in and Mr. McCann expects to do a good business with his busses and carriages. The distance from Williams' point to Light point, the principal drive, is about twelve miles.

### LOCAL LACONICS.

Miss Mamie Thibeault has been critically ill the past few days.

The Misses Maitland and Quinn will serve tea at the golf grounds this afternoon.

Hugo Muck left Thursday night for Duluth, to be absent a few days on business.

Mrs. Werner of Lake Linden is in the city visiting her daughter, Mrs. G. M. Bullman.

"A Wyoming Girl" opera will appear at McDonald's Opera House next Wednesday evening, the 9th.

Dr. J. Larson has returned from the lower peninsula. He spent three weeks or more in Ann Arbor, Detroit and other cities.

Extra copies of today's issue of The Mining Journal can be obtained at Hogan's news stand, also at Perkins' drug store.

T. D. Sullivan is here from Virginia, Minn., having been called home on account of the serious illness of his mother, Mrs. D. Sullivan.

The Bankers and Brokers baseball team, composed of Negaunee and Ishpeming men, will meet the Ishpeming business men's team Monday afternoon at 4 o'clock at the Union park grounds.

The Negaunee baseball team will be accompanied to Munising tomorrow by a number of fans. The fare for the round trip will be \$1.25. The boys expect a hard game, as it is understood that Baker, Munising's new tricolor, is to be in the box.

Peter Tollman, who has been employed as flagman at the diamond crossing near the Jackson, will leave Monday morning for his old home in Finland, where he will spend the remainder of his days. He came to this country eighteen years ago, but went home to visit his family four years ago.

The members of the Negaunee fire department will attend services at St. John's Episcopal church tomorrow morning at 10:30 o'clock. Relatives and friends of the deceased members of the department donating flowers are requested to send them to the department's headquarters before 10 o'clock. Immediately following the service the graves will be decorated.

Never judge what a woman thinks by what she says.

### HOUSES AN UNUSUALLY COMPLETE PLANT

### Provision Is Made for Manual Training and Domestic Science Departments—Gymnasium a Spacious Room With Running Track—Assembly Room to Seat Nearly Five Hundred Students—Material and Construction of Highest Class.

Negaunee's new high school building, which is to be dedicated next Thursday evening, when the commencement exercises will be held in the auditorium, is one of the most attractive and best equipped schools in the Northwest, and a credit to the members of the board of education.

The school is centrally located, on the north half of the block bounded by Case and Peck streets on the north and south, respectively, and Pioneer and Teal Lake avenues, on the east and west. The building faces Peck street on the north. The building has 197 feet frontage and a depth of 113 feet. It is arranged

rooms at the Pioneer avenue entrance, with mechanical drafting and woodworking rooms adjoining on the Peck street side. A large kitchen, dining room, and sewing room, comprising the domestic science department, with a spare class room, are located on the Teal Lake avenue end of this floor.

#### A Fine Gymnasium.

The gymnasium, which is one of the finest in the upper peninsula, is located in the rear central wing, directly beneath the main auditorium, and is easily accessible from the ground floor corridor through the vestibules under the main staircases, also from the ground floor corridor onto the running track. The

divided into recitation rooms for high school work.

#### Handsome Auditorium.

The main auditorium, with a seating capacity of 450, opens off the second floor corridor, and has two sets of double doors. It is located in the central south end and is sixty-four by ninety-one feet. It will seat 800 on the main floor for entertainments. It extends east and west and has a slanting floor, so that all pupils have a good view of the stage and teacher's platform. The stage, twenty by sixty-four feet in size, is located at the west end of this room. It has a proscenium opening thirty-two feet wide by sixteen feet high, with

The laboratories are provided with suitable work tables, cupboards, drawers, etc. The floor of the chemical laboratory is reinforced concrete and cement finish.

#### Ample Fire Protection.

There are janitors' closets with slop sinks opening direct from the corridor of each floor. There are also stand pipes, with two hose reels, in each corridor. The stand pipes extend from the basement to the attic at each end of the main corridor.

Each of the several class rooms, recitation rooms, laboratories and offices, have teacher's wardrobes, and all rooms have sanitary cove wood shales at the baseboard and sanitary plastered coves in all angles of the plastered ceilings, also picture moulds. All main corridors have picture shelves on all sides six feet above the floor. Besides the principal toilets for the pupils, there are separate toilets for teachers, and a toilet in connection with the girls' rest room on the second floor, and a janitors' toilet in the basement next to the fan room.

On each of the principal stair landings there are wicker seats with paneled backs, ends and fronts; and all class rooms, recitation rooms and laboratories are provided with suitable slate blackboards; the dining room has a large sideboard across the end opposite the windows and a plate shelf on all sides.

The building is connected by means of a tunnel, six feet eight inches high, to the power house, which is built in connection with the present old high school. This tunnel carries all the steam mains and returns, water supply pipes, light and other electrical wires, and will also provide means whereby the janitor can reach the boiler house from the main building without going out doors.

#### Handsome Exterior.

The building is well constructed throughout and the finest materials have been used. All footings are concrete, the basement walls rubble stone laid in cement mortar; the ground floor stonework is faced with hard dark blue Bedford stone, with neatly moulded and carded architraves at the three principal entrances, and deep recessed entrances. The stone facing is prettily moulded, has heavy projections, and is backed up solidly with common brick work, laid in cement mortar.

The entire second and third stories have stone facing and the assembly room wing above the lobby is facing with dark red vitrified pressed brick, laid in colored mortar, with Bedford stone trimmings.

The roof is built up of tar and gravel and is constructed in the form of two large hoppers with large iron downspouts leading through the building on the inside of the walls and connected with the main sewer.

All of the walls around the corridors, staircases, flues, fresh air shafts, gymnasium and the principal walls between the stage and lobby are finished with common brick. All minor partitions are constructed of fireproof hollow tile, carried on steel girders.

The ceiling of the assembly room is carried on large steel trusses, as is also the roof over the same. The floors in range corridors, together with the principal staircases, are built of reinforced concrete throughout, making them absolutely fireproof. The staircases are finished with iron balustrades and iron newel posts. All treads on staircases are finished with marble slabs, and the floors in all corridors on the stair landings, the principal wardrobes and toilets, are finished with vitrified ceramic tile, based on all sides against the walls.

The three principal entrances, also the two principal toilet rooms, stairs and partitions, are finished with Italian marble to a height of seven feet on all sides, with moulded cap and base.

The side walls and ceilings of the principal entrances are finished with ornamental plaster work, and the undersides of all beams at staircases have ornamental plaster brackets. The floors in the class rooms, except the chemical laboratory, forge and machine rooms, are finished with heavy wood joists, rough floor lining, first class denaturing furring strips on top of same and finished marble flooring. The forge and machine rooms, also dressing, toilet and basement rooms, have cement floors laid direct on the ground. All ceilings are covered with expanded metal lath on the under side of wood joists.

The entire building, except the gymnasium and the dressing rooms opening off the same, is finished with the best grade of red oak. All doors at exits and from large rooms into corridors, open outward, and all single doors from recitation rooms, etc., to corridors, are equipped with double acting springs. All doors to class rooms have clear glass panels.

The building is well lighted throughout. The windows in all rooms are arranged in groups; all windows on the three principal floors have double sash, to answer for storm windows and to avoid the necessity of handling storm sash every fall and spring.

#### Fire Lighting System.

The building is wired for electric lights, the wires being run in conduit steel tubing. There are three main switchboards. The one in the general office, on the second floor, controls all lights in the gymnasium, in all vestibules is of solid brass, with ball bearing solid bronze butts. The remainder of the hardware is of Bowers' (dull black) finish. All doors to entrances and from assembly room and room toilets, etc., have checks and springs, and open outward.

Desks Are Sanitary.

All teacher's and office desks, which set up from the floor about ten inches and have swivel chairs, are sanitary. The balcony is equipped with opera chairs.

Bulletin boards are placed at each end of the assembly room also in the corridor near the general office, and there is a keyboard for teachers' keys to all class rooms in the general office.

All entrances are finished with cement steps and platforms. Dust outlets for janitors' use are provided in the corridor of each floor. Arrangements have also been made for the installation of a vacuum system for cleaning the building.

Economical Heating System.

The building is heated by means of a combination direct and indirect system of steam heat. There are two separate systems of direct heating. The gymnasium, assembly room and all toilets, corridors, offices and commercial departments, have the full amount of direct radiation required to thoroughly heat these portions of the building at all times when the fan is not in use. The remainder of the rooms are supplied with about 60 per cent of the actual amount of direct radiation required to heat the rooms without warm air from the fan, the idea being that the warm fresh air delivered to all rooms by the fan will be sufficient to heat all rooms to 70 degrees, except in exceedingly cold weather, when the additional direct radiation in each room may be used.

All class rooms, assembly room, and gymnasium, are supplied with an abundance of fresh air by means of the fan, which is ten feet in diameter. Its speed is 130 revolutions per minute and it will deliver throughout the building 65,000 cubic feet of air every sixty seconds.

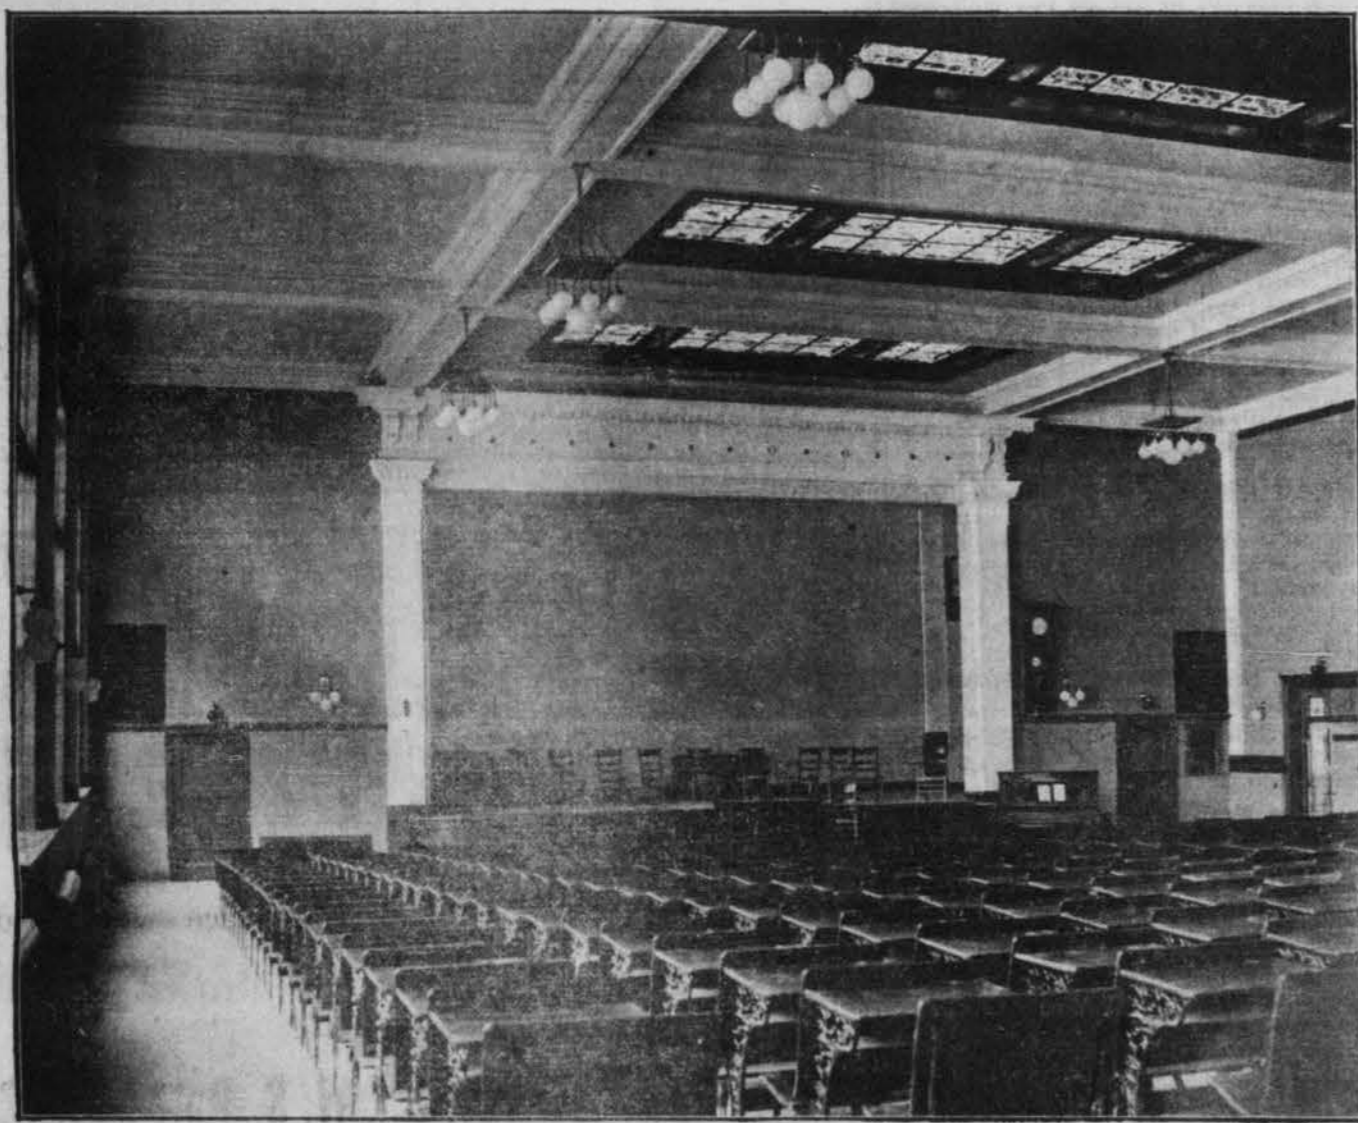

This fresh air is taken from a point about eight feet above the highest point of the roof and is drawn down into the fan room through two fresh air shafts and is delivered from the fan into two plenum chambers after first passing through two stacks of tempering and reheating steam coils. From the plenum room the air is delivered by means of separate ducts and brick flues into each room at a temperature of about 70 degrees. The foul air passes out at the door and is forced into the attic by means of the pressure of the fresh air coming from the fan.

The foul air from all wardrobes, toilets, and chemical laboratory, is drawn up into the attic by means of an exhaust fan, which delivers it direct to the outer atmosphere. The temperature is regulated by means of thermometers of the Johnson Service system of Milwaukee, so as to maintain a uniform degree of heat at all times, and all direct and indirect radiation is equipped with the Consolidated Engineering Co.'s vacuum system, which permits of no condensation of the steam remaining in any of the mains or radiators, and allows a free circulation of steam at all times.

The boilers and all pumps for the vacuum system and for the temperature control, as well as all the other appliances, are in a new boiler house located

Negaunee's New High School Building.

VIEW OF ASSEMBLY ROOM. Showing Proscenium and Stage.

with one main central portion facing Peck street, with a wing at each end, also a main central wing on the south side. The wings are planned so as to permit of future additions on the south, as the school population grows, without interfering with the general plan or arrangement of the structure.

#### Three Story Structure.

The building is practically three stories in height, with a basement under the main central portion, but is not excavated underneath the two end wings. The ground floor is practically level with the grade line, being only two steps above the grade. The height of the ceilings of the class rooms on the first, second and third floors is twelve feet in the clear. The main auditorium is about twenty-five feet high at the stage end and twenty-two feet at rear, or balcony, end. There is a main corridor extending east and west lengthwise of the building, with an entrance at each end, also a central entrance leading to the corridor from the north, or Peck street, front.

There are similar corridors on the second and third stories, and the building is provided with two staircases, one on either end, each seven feet six inches wide in the clear. There are two other exits, with vestibules, underneath the staircases, making a total of five exits, with double doors and vestibules, on the ground floor. The central entrance on Peck street has two sets of double doors. There are two exits on the alley, leading from the gymnasium and running track, dressing rooms and wardrobes. The central front portion of the basement is excavated and the portion beneath the ground floor corridor is used for the fan, heating coils and plenum chamber.

The general arrangement of the first floor provides for forge and machine

gymnasium is sixty-two by seventy-five feet, with a twenty-foot ceiling. The running track is twenty-one laps to the mile.

Off the main floor of the gymnasium at the west end is the boys' dressing department, with locker, shower rooms, tub baths and toilets. At the east end are the girls' dressing quarters, with dressing booths, shower stalls, tub baths and toilets, the whole being so arranged that the gymnasium can be used either by the boys or girls with equal advantage; it can also be used before or after regular school hours without the pupils having access to the remainder of the building. There are entrances to the gymnasium from the alley, also through the vestibules under the main staircases. It is also arranged so that the girls can have full use of their baths and other conveniences when the boys are using the gymnasium, and vice versa.

There are no columns or other obstructions in the gymnasium. The ceiling forms the floor of the assembly room, and is carried on three large steel plate girders. The running track is suspended from the girders.

#### Second Story Convenient.

The entire second story is arranged in the most convenient manner for school purposes. The superintendent's office is located over the Pioneer avenue entrance, with the general office to the south. The latter is provided with a large fireproof vault, also a lost and found cabinet, with plate glass front facing into the main corridor. The principal's office is located over the Teal Lake avenue entrance; the teacher's retiring room is located to the north and a rest room for girls to the south of the principal's office. The large commercial room, with typewriting room connected, is located on this floor, and faces Peck street; the remainder of the main portion of this floor is divided into recitation rooms for high school work.

heavy draped curtains, and is also provided with footlights and fly galleries. Double doors lead to the second floor corridor and an exit leads to the alley entrance of the gymnasium. A teacher's platform is provided in front of the stage, with a balcony containing a seating capacity of 225 is located across the east end of the room, directly opposite the stage, and is accessible by means of double doors from the third floor corridor. There are no columns or other obstructions in the auditorium and the side walls are finished with broad pilasters, with ornamental plaster caps; the ceiling is paneled with ornamental plaster beams. The four principal panels of the ceiling are finished with artistic designs of colored art glass, over each of which there is a skylight in the roof.

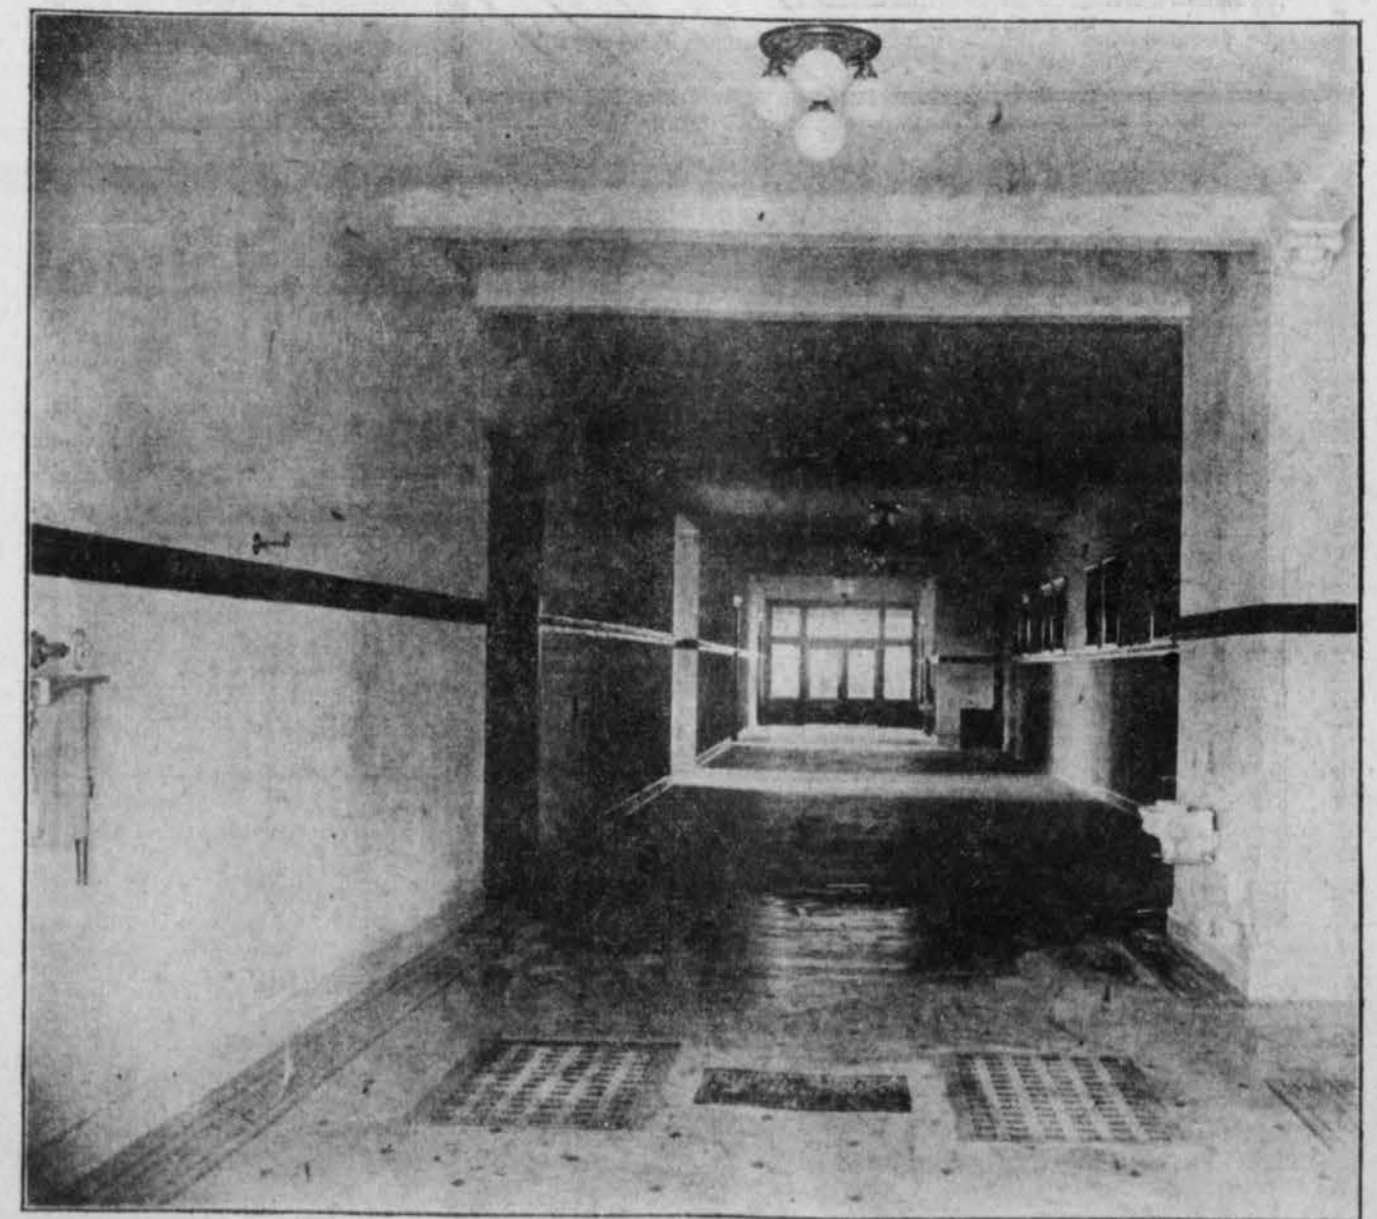

The south side of the room has large windows that will provide ample light. The windows at the rear of assembly room, under the balcony, are raised from the floor to permit of book cases being placed below them.

The main wardrobes, with toilets, are located on the ground floor, and open direct from the corridor; they are situated at the east and west ends of the upper portion of the gymnasium, directly over the boys' and girls' dressing rooms and toilets, connecting with the gymnasium below. Back of the boys' and girls' main toilets, and wardrobes are bicycle rooms, entered from the alley.

#### Third Floor Arrangements.

On the third floor, in the main front portion of the building, are located four recitation rooms on the Pioneer avenue end, with a music and drawing room, recitation rooms, a physical laboratory, with dark and apparatus rooms, also small lecture room, facing Peck street. At the northeast corner of this floor is the chemical laboratory. There is a small lecture room, facing Peck street. At the northeast corner of this floor is a small lecture room with raised platform, table arm chairs, fitted out for stereoscopic lectures and demonstrating work, between the chemical and physical laboratories, with doors opening into each.

The biological laboratory is located in the southeast corner of this floor, and has a growing room in the form of a large bay window, occupying the entire south end, and separated from the laboratory by a solid glass partition; it also has lead lined troughs, for growing boxes, and a plate glass aquarium. The chemical and biological laboratories each have a dark room and apparatus room, situated between the two laboratories. All dark rooms are provided with deep lead lined sinks. The chemical laboratory has a modern demonstrating hood, which is ventilated through the roof by the means of an exhaust fan in the attic.

VIEW OF MAIN CORRIDOR. Looking from the West Toward the East.

seventy feet distant from the building. The heating plant is provided with all the devices which would tend to reduce the cost of operating. The apparatus in the boiler house is of sufficient size to provide for the new heating and ventilating system recently installed in the Case street school, adjoining. All fans in both the new and old high schools are operated by electric motors, power for the same, as well as for the lighting, being furnished by the municipal power plant.

In comparison with other schools recently built in this vicinity, the Negaunee building has a floor area for school work of about 52,500 square feet, and will cost, when completed, not to exceed twelve and one-half cents per cubic foot. There is about 45,000 square feet of floor area in the new high school at Ishpeming, which cost, complete, about twelve and one-fourth cents per cubic foot. The new high school at Escanaba has a floor area for school purposes of about 47,000 square feet, and cost about thirteen cents per cubic foot.

#### Contractors and Material Dealers.

The general contractor for the building is L. E. Chausse of Negaunee, who, being the lowest bidder, was awarded the contract Sept. 6, 1907, in competition with several of the leading contractors in this section, Milwaukee, Chicago, and other points. Owing to the early winter in the fall of 1907 very little work was done on the work until the spring of 1908.

The masonry work on the building was done by H. A. Floodstrand of Menominee, under a separate contract. Mr. Chausse has been ably assisted with the general construction and finishing work by Ernest Johnson of Escanaba, his general foreman. The following parties furnished material or worked as sub-contractors under Mr. Chausse:

The Consolidated Fuel & Lumber company, furnished all rough and dressed lumber, common brick, marble flooring, cement for walls, floors, etc., also stucco plaster.

The cut stone was furnished by E. Pelchraier of Chicago and the brown stone grade course came from the Marquette quarries.

The metal work, including all cornices, skylights, etc., was furnished and put in place by the Scheffer Co. of Chicago.

The roofing was done by the Valley Concrete & Slate company of Saginaw, Mich.

All steel and iron work was done by the United Foundry works of Chicago.

All electric wiring was done by the Negaunee municipal lighting plant, under the direction of Al. E. Willman, superintendent of the board of public works.

All millwork and interior finish was furnished by Morgan & Co. of Oskosh, Wis.

The finishing hardware was furnished by P. & F. Corbin of Chicago.

The painting and decorating was done by John W. Elliott of Negaunee.

The labor and plain plastering was done by Skeeland & Kropp of Ishpeming. Wood floor plaster was used. All ornamental plastering was done by the Dumlauer & Decorators Supply company of Chicago.

The reinforced metal for reinforced concrete is the Kalam system, furnished through the Trassced Concrete Steel company of Chicago.

The pressed brick was furnished by Drexton and Schwartz of Milwaukee.

The marble work was furnished and set in place by the Drake Marble and Tile company, of St. Paul, Minn.

The contract for all plumbing, heating and ventilating, was executed under a separate contract from the lead by the W. S. Patterson Co. of Appleton, Wis.

All of the plumbing fixtures were furnished by J. B. Clow & Son of Chicago and all fans and indirect stack of heaters were furnished by B. F. Stirtewant & Co. of Chicago.

Other separate contracts let direct by the school board were:

The floors and marble troughs on staircases to U. F. Dunner, Milwaukee.

Lighting fixtures to Chas. Polackek & Co. Milwaukee.

Electric program clocks and bells to W. R. Fairbridge, Chicago.

Stage curtain in assembly room to Daniel Seute studio, Chicago.

Art glass to Schuler & Mueller, Chicago.

Large smoke stack of boiler house to Heine Chalmers Co., Chicago.

Furniture, such as desks, chairs, etc., to A. B. Andrews Co., Chicago.

Work matting to Carson, Pirie, Scott Co., Chicago.

The architect and general superintendent, J. D. Chubb, of Chicago, was ably assisted by Andrew Lindquist of Negaunee as his local superintendent, throughout the entire construction of the building.

ABLE MEN GIVE VALUABLE SERVICES TO THE PEOPLE

Board in Charge of City's Educational Affairs Characterized by a Devoted and Business-Like Attention to Duty.

INCLUDES THREE VETERAN MEMBERS

Cyrille Houle, Robert G. Jackson and Nicholas Laughlin Have Served Twenty Years or More—Trustees Have Done Unusually Effective Work in Planning and Carrying Out the Building Project Now Completed, and They Deserve Much Credit.

It is safe to say that a better, more competent, broader minded, or more progressive board of education cannot be found in the upper peninsula...

Three members of the board have had long and continuous service, and have remained in office because the people have insisted on their reelection...

Dr. J. H. Andrus, at present, and for the past two years, president of the board of education, was born in southern Ohio...

Robert G. Jackson, a member of the board twenty-three consecutive years, and has one year yet to serve on his present term...

Cyrille Houle, at present secretary of the board, was elected for the first time in 1888, and has since served continuously...

Nicholas Laughlin's connection with the board dates back further than that of any other member...

Service, and it would be difficult to give an estimate of what he has, in his quiet way, been worth to the city...

Robert G. Jackson, a member of the board twenty-three consecutive years, and has one year yet to serve on his present term...

Cyrille Houle, at present secretary of the board, was elected for the first time in 1888, and has since served continuously...

### FINE PROGRESS UNDER SCHURTZ

**SUPERINTENDENT OF SCHOOL SYSTEM HAS BROUGHT IT TO A HIGH EFFICIENCY.**

### HIGH SCHOOL RANKS HIGH

**Graduates Are Admitted to All the Leading Universities—Superintendent Has Wrought Many Changes.**

Eight years ago the Negaunee board of education elected as superintendent a man whose recommendations, as one of the board at the time remarked, "were the highest of all submitted by the candidates." Results have approved the judgment of the board, for Orr Schurtz has shown unusual ability as an organizer, administrator and disciplinarian.

Work in the high schools of Kalamazoo and Ann Arbor laid the foundation for the four years hard study that earned from the University of Michigan his degree of B. A. Practical knowledge of educational supervision came from a six years' term as superintendent of the Eaton Rapids schools, four years as school commissioner of Eaton county, and six as principal of the West Side High school, Grand Rapids.

When Mr. Schurtz took charge of the schools in Negaunee, plans had already been formed for the introduction of manual training, but had been delayed

London, by firmly enforcing discipline, business practically the ideal.

The fact that the Negaunee high school is not only on the accredited list of the University of Michigan, but that of the North Central Association of Colleges and Secondary Schools, also its graduates thus being admitted without examination to all the great universities, is ample proof that its scholarship and its teaching force rank among the best. When it is understood that this has been brought about largely during the administration of the present superintendent, that the commercial department has been made one of the best in the state, that the number of kindergarten teachers has grown from one to three, that music and drawing departments have been built up up as good as can be found in the upper peninsula, that every feature of the grade work has been brought into touch with the best educational methods of the day, that next September will witness the introduction of manual training and domestic science departments, when all this is called to mind it must be acknowledged that the record is one in which both Mr. Schurtz and Negaunee may take just pride.

### ARTISTIC PHOTOGRAPHY.

The arts appearing in The Mining Journal's special school edition were made from photographs taken by W. H. Israel. During the year of more Mr. Israel has been engaged in business in Negaunee. His work is high class, and his patrons include people who can appreciate art in his line. Last summer Mr. Israel secured many fine views of Negaunee scenes which have been reproduced on postal cards, and are being used to excellent advantage in advertising the city. His business has grown so rapidly that it will be a question of but a short time when he will be obliged to secure larger quarters.

The total number of immigrants coming into the United States since 1820, the year of earliest record exceeds 20,000,000.

### WASHINGTON CHAT.

#### Speaker Cannon Takes Long Joy Rides While Waiting for the Senate.

Washington, June 4.—"Uncle Joe" Cannon is having the time of his life while the Senate dabbles on tariff. He has wanted of sitting around most of the day in his corner office and gossiping with visitors, and has fastened to joy rides and other forms of entertainment out in the adjoining country.

He has explored terra incognita in the adjacent state of Virginia, where he motored for two or three days with a cognate company in an automobile, he has been over into Maryland, up into West Virginia, and two or three days ago started on an automobile trip through Pennsylvania, where comes in the Keystone state delegation gave him an exceptionally good time.

Wherever the party stops overnight, when the speaker is out on these jaunts, there is sure to be a little American game, of which the speaker never tires. He does not require that the limit be high—only enough to sustain the interest. The outdoor life agrees with him; he is growing younger every day, he says. When the editor of a longevity publication sought him in his office recently the speaker waived the visitor aside with the observation that he knew nothing whatever about old age or about ways of "staving off the hour when one should meet the Lord."

It has remained for Senator McHenry of Louisiana, an old-line Democrat, to make the most vigorous protection speech that has been heard in congress during the present tariff debate. The statesman from the gulf, who is one of the most learned men in the senate, presented in his recent address some historical facts which proved of much interest and threw new light on the politics of some of the founders of the government. He claimed that George Washington himself, as far back

### JOHN D. CHUBB IS AN ABLE ARCHITECT

**DESIGNER OF NEGAUNEE'S NEW SCHOOL HAS SUCCESSFUL CAREER TO POINT TO.**

### REGARDS MARQUETTE AS HOME

**However, He Carries on Work in Several States, and Has Planned Many Large and Important Structures.**

John D. Chubb, the architect who prepared the plans and specifications for Negaunee's new high school building, was born at Plymouth, Eng., and came to the United States when three years of age with his mother and one brother, going direct to Marquette, where his father had preceded the family a short time. He remained there, attending the public schools, until after he had passed through the eighth grade, when he returned to England, and remained five years, finishing his education and study-

JOHN D. CHUBB, Chicago-Marquette Architect, Who Designed New High School Building.

ing his present profession. After completing his studies in England Mr. Chubb again returned to Marquette, in 1881, and for several years was employed in the offices of H. Gregory and J. B. Swett. While serving these architects he prepared plans for several important buildings erected in the upper peninsula during the period until 1889. Among the plans that Mr. Chubb worked on were those for the present Case street high school in this city, which were furnished by J. B. Swett in 1887.

In the spring of 1889, Mr. Chubb left Marquette and for a year was engaged in the office of Johnston & Johnston at the 800, working on several of the large buildings erected there during the building boom of that period. In 1890 Johnston & Johnston established an office at Muskegon, Mich., and Mr. Chubb was transferred to that city to take charge of it. He remained there until the summer of 1892 and assisted in the planning of several of the largest public and private buildings erected in that part of the state.

Still anxious for wider fields, Mr. Chubb in 1892 left Muskegon to locate in Chicago, where he served in the office of M. E. Bell, exercising supervising architect for the government, and also had charge of the office of W. K. Johnston until the fall of 1895. During that period he was engaged on plans for all classes of public buildings, including court houses, city halls, schools and libraries. Mr. Johnston made a specialty of planning public buildings. He was the publisher of Johnston's Modern Homes during the period Mr. Chubb had charge of his office. For a year, until the fall of 1896, Mr. Chubb was engaged by a prominent firm of architects at Fort Wayne, Ind., and during his engagement there assisted in the planning of several court houses, schools, churches and hospitals.

In the fall of 1896 Mr. Chubb returned to Chicago and engaged in business on his own account, locating in the Chicago Opera House building, where he still has his office. His business has gradually increased and at the present time he is engaged on important work of various kinds in Michigan, Wisconsin, Illinois and Indiana.

The first building in the upper peninsula planned by Mr. Chubb after starting in business for himself was the Duluth, South Shore & Atlantic Railway company's present passenger station at Marquette. Among the schools and other public buildings recently erected which were designed by him are the high schools at Escanaba, Ishpeming, Gladstone, Rapid River and Kalamazoo; the parochial school and St. John's church at Marquette; the Carnegie Public library at Ishpeming and city hall at Norway, besides numerous other buildings and residences.

Three years ago Mr. Chubb was married to Miss McElhan of Fort Wayne, Ind., and resides in Chicago. He, however, considers Marquette as his home town, as the remains of his father, mother and two sisters are interred in Park cemetery, and one brother lives there. Another brother resides at Calumet, and another lives in England.

Mr. Chubb's success in his profession is principally due to the personal attention which he has given to all work entrusted to him.

### A BLESSING NOT WANTED.

Like most minister's families, they were not a tenuous blessing with this world's goods. She, however, was the youngest of ten children, until her father explained to her of the baby sister that had come in the night.

"Well," she said, after due thought, "I s'pose it's all right, papa, but there's many a thing we needed worse."—Short Stories.

### WASHINGTON CHAT.

#### Two Senators Are Still Taking Snuff and They Are Provided With Official Snuff Boxes.

Washington, June 4.—There are two snuff-takers in the United States Senate. Mr. Overman of North Carolina and Mr. Carter of Missouri. They are the only ones of these two men the senate still maintains the official snuff-boxes, which are kept filled with French snuff. They are snuffing snuff-boxes. These boxes are little quebecque affairs about four inches long, two and a half inches wide and an inch deep, and are fastened by screws to the top of the projecting base, as on each side of the Vice President's desk. The snuff is purchased in five-pound quantities at arms in four eight-pound jars, at a cost of seventy-five cents a pound, and it takes an average of about five pounds a year to replenish the boxes twice a week during the sessions.

The work of refilling the boxes was for years one of the duties ceremoniously performed by the late Captain Bassett, the venerable assistant doorkeeper of the senate and inveterate user of the powdered weed; but since his death, five years ago, the task has fallen to the lot of one of the pages who, naturally, does not bestow upon it the loving care of his aged predecessor.

Captain Bassett when he died had completed nearly sixty years of continuous service in the senate and was almost the sole relic of the days when the use of snuff was general in that body. For many years before his death he had a dignified, almost ceremonious, manner of indulging in the habit excited the wonder and awe of the modern page. He was very proud of a gold snuff-box presented to him by the senators upon the fortieth anniversary of his entry into their service, and he kept it filled with a choice brand of the powder. He carried it in a tail pocket of the frock coat in which he always appeared, and the force of his habit of reaching for it once caused a laugh at his expense.

It was Hayes-Tilden contest, and it was thought best that Captain Bassett, as custodian of one of the boxes containing the disputed electoral votes, should be armed. He was accordingly provided with a revolver, which he carried in the pocket of the empty coattail. As the procession was about to start on the march from the senate to the house, Captain Bassett, who had his revolver with him, "Yes," he replied, "here it is," and, diving into the wrong pocket, he produced, not the revolver, but his cherished gold snuff-box. There had been threats of attacking the procession on the way to the house, and the members of the party were in rather a sober frame of mind, but the tension was relaxed for the moment by the laughter which was caused by the mistake.

Perhaps the most noted of the senators who were addicted to snuff within the memories of the older employees was the late Allen G. Thurman of Ohio. Mr. Thurman was a frequent visitor of the official snuff-box on the Democratic side. After helping himself to a liberal pinch he would return to his desk and bring forth his huge red banganna, which afterward became a sort of known political emblem in his campaign for the vice-presidency. Then, after sneezing several times, he would blow a tremendous blast. Vice President Wilson, who died in his room at the Capitol, was another noted patron of the senate snuff-box, and so was Senator Edmunds of Vermont. In later days Senator Carter of Montana and Senator Turner of Washington were the sole representatives of the old regime of habitual snuff users.

### Lawrence's Joke On Lodge.

Representative Lawrence of Massachusetts says that the election of Representative Lorimer to a seat in the senate calls to mind how the rivers and harbors committee of the house was depleted of its membership in the sending of men to the upper branch. It is said that in the last few years seven members of that committee have been elected to membership in the senate, thereby leaving vacancies on the rivers and harbors committee to fill. Three of this number have been elevated in the last year, viz., Representative Burton, Jones and Lorimer. No other committee in the house of representatives has lost so many men recently by their elevation to the senate and other members of this famous committee have begun to sit up and take notice, rather expecting that political lightning might come their way one of these days.

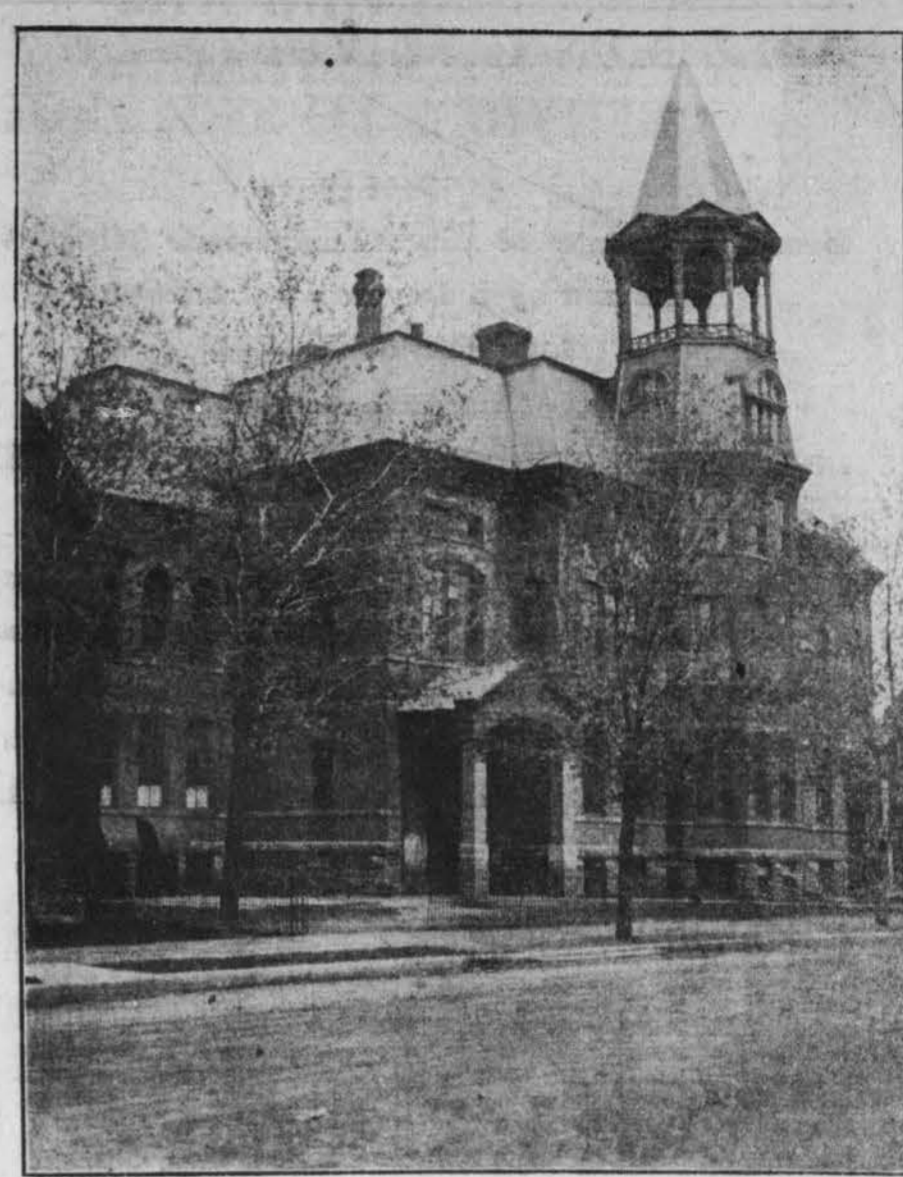

Mr. Lawrence is himself a member of the rivers and harbors committee and yesterday he hunted up Senator Lodge and pointed out the above facts to him in his joking way, showing the senior senator of Massachusetts that it would soon be his own turn to leave the rivers and harbors committee as he is almost at the top of the group of that committee. Senator Lodge was quick to see the point and assured the man from North Adams that he came from the wrong part of the state to give serious trouble. Senator Lodge was sure that Lawrence had his dates mixed and told him that Senator Crane was the man he would have to displace. Lodge, in fact, was perfectly willing that Lawrence should be a candidate against Crane.

Before the pleasantry was concluded, Lawrence assured Mr. Lodge that he was going to have Butler Ames placed on the rivers and harbors committee and that then the jig would be up. Whereupon the senior senator scratched his whiskers and grinned.

Oscar P. Austin, chief of the Bureau of Statistics, knew nothing of any language but English when he was appointed in 1898. He now reads and speaks French fluently, and "gets along" with the documents that come to his desk in Italian, Spanish and Portuguese. Mr. Austin occasionally amuses his German clerks with the remark that sometime he will "take a week off and learn German."

Senator Knute Nelson, the blunt old Norwegian from Minnesota, carries to Washington the rigorous habit of his boyhood. He is at his desk in the Capitol at 7:30 in the morning and compels his clerks to be there also. Nelson studies the subjects on which he speaks exhaustively, and were he not a man of few words, and these few keen as a rapier, he could give instructive lectures on almost every paragraph of the Al-Crich bill.

President Taft is a great joy rider. Nothing suits him better when the day's work is done than to get into his automobile and to tell his chauffeur to "let her go" at full speed. President Grant

CASE STREET SCHOOL BUILDING. Becomes Chief Grades Building. Now That High School Has New Quarters.

used to love fast riding dearly, but that was before the days of the automobile. He indulged in the luxury of a span of the fastest steppers among all the equine population of Washington during his administration. One of the stock anecdotes of the oldest inhabitants has to do with the arrest of President Grant by a local policeman for fast driving.

"There is always around the White House a coterie of persons who do the 'choof' of the worrying for a President's safety. Just now their thoughts are centered on one of the President's chauffeurs who monopolize the worrying red describe, under their breath, as a 'very reckless mechanic'."

A Chinaman was called as a witness in the case of a driver who had run over a dog.

"What time was it when you saw this man go over the dog?" asked the judge.

"No time," replied the witness.

"I say," repeated the judge, "what time was it when you saw this man run over the dog?"

"No time," replied the witness.

"We shall have to have an interpreter," commented his honor, as he realized that the witness did not understand English and accordingly another Chinaman was haled into court to act as interpreter. "Ask the witness," commanded the judge, "when he saw this man run over the dog."

The interpreter turned to his fellow-countryman and said: "We chimng so ho in chow lung wook-ho ma an chow meo, ho loo kow se-loo ong ong long yit ben."

"To which the witness replied: "Wong in lee, wo heo, wing chow lung yue lee, in sing, choy yoke choy ying lung dung wan, sling suey way san yick lung toy ting choy how tung, pa tong po gon hung, how kin quong yuen lee chow yo loo tung."

The interpreter then turned to the judge and said: "Him say 'Two o'clock,' Lippincott's."

ORR SCHURTZ, Superintendent of the Negaunee Public Schools.

by the untimely death of Mr. Kroghman. The present superintendent is slow to make any but well considered changes and he has quietly cooperated with the board in the development of projects that have resulted in the increase and enlargement of the school buildings, the increase of the teaching force, additional equipment, improvements in the lighting, heating and ventilation of the buildings, and finally in the incomparable new high school, soon to be dedicated.

The present status of the schools is a tribute to the superintendent's administrative and supervisory powers. Among many instances of excellent arrangement brought about by Mr. Schurtz is the fact that the assembly room of the present high, or Case street school, formerly used both as a session and recitation room, is now used for purposes of study only, all reciting being done in class rooms. The advantages of this arrangement are clearly very great.

Visitors to the schools of Negaunee offer remark on the fine discipline that prevails, and admire the absence of any showing of force, or harshness, in maintaining it. This condition, above all others, marks the real superintendent; for only those who have taught under supervision of young men fresh from the university, who place disastrous confidence in the self-restraining power of American pupils of high school age, can appreciate that the real super-

### HE THOUGHT HE HAD HIM.

The composing room was having lunch and typewriters sat around on chairs and desks and forms and cold stories. This was one of them.

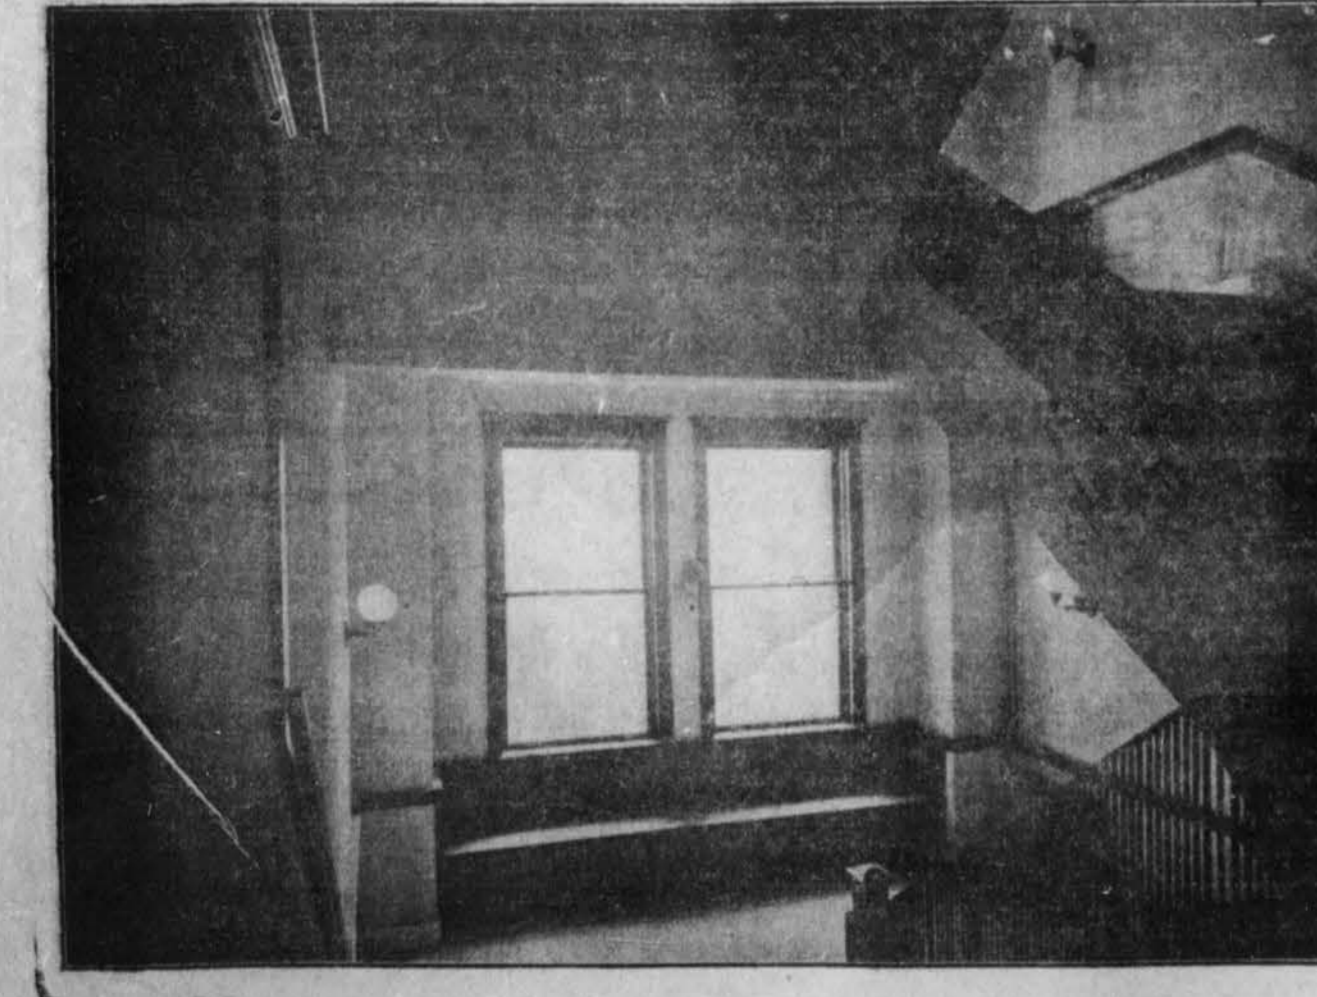

"Patrick J. Murphy and Michael O'Hooligan were two had carriers working on a six story building. During the noon hour while eating their dinner together they got into an argument as to which could carry the most bricks to the top of the building. As proof of his ability Patrick said to Michael, "Faith an oi, euil carry yourself up to the sixth floor in me hoil." "You're on," said Mike, or words to that effect and a five dollar bet was made.

"Patrick shouldered the hot, Michael climbed aboard and away they went up the ladder. All went well for three stories, but in mounting to the fourth Patrick's foot slipped, the load jerked, and Mike wavered uncertainly above three stories of space with no means of saving himself if Pat dropped the load. This, however, Pat did not do. He made a desperate struggle and finally regained his balance and proceeded to the top of the building depositing Mike safe and sound on the mason's platform.

"Well, Pat, said Mike when his feet touched the solid planking, 'You've won me money, but when y'er foot slipped or th' third floor of thought of had yez.'"

# FIRST SCHOOL BUILDING WAS ERECTED IN THE YEAR 1866

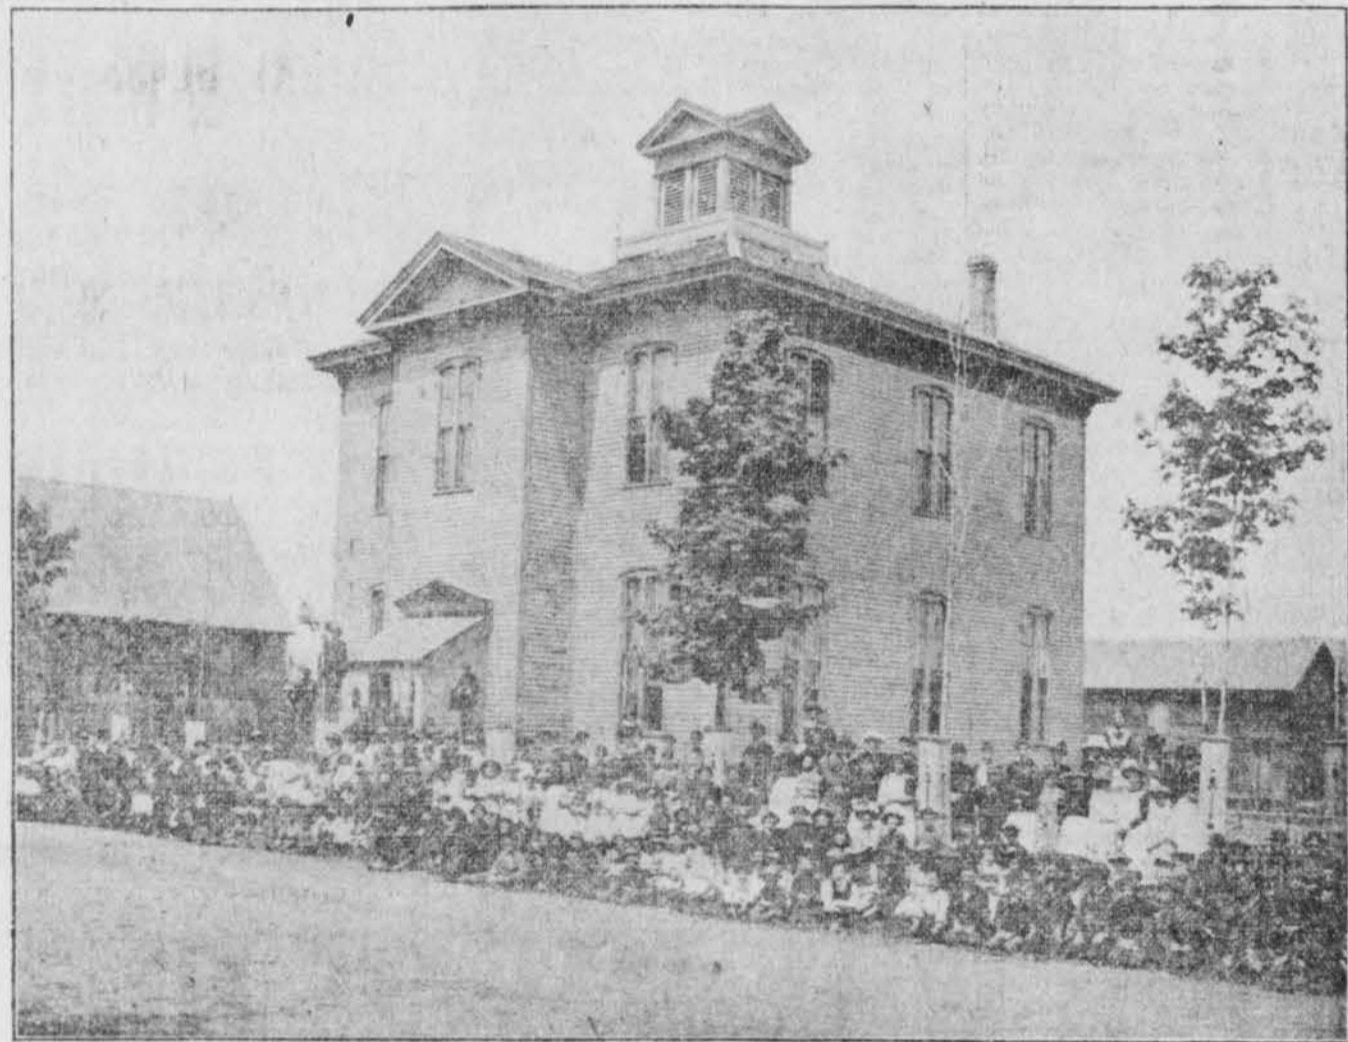

### In Its Construction \$8,000 Was Expended, and It Was Used for a Full Twenty Years Before Being Replaced.

## CASE STREET BUILDING THEN PUT UP

### Review of the Men Who Had Charge of Development of City's School System—V. B. Cochran Did Major Pioneer Service—F. D. Davis, Now of Escanaba, Served Many Years—Superintendent Schurtz Has Obtained Excellent Results.

But few residents of Negaunee who lived here prior to 1865 have any definite recollection of the city's school facilities up to that time. In common with all other new mining towns Negaunee paid but scant attention to educational matters and for some years there were only one or two teachers employed. Only a small number of the first settlers, who came to work at the Jackson mine, were men of families, and most of those having families did not bring them here until some time after actual mining operations were begun.

In 1866, one year after Negaunee village was incorporated, the first school building was erected. It cost \$8,000. As no actual high school work was done in the building until some thirteen years later, the structure could hardly have been termed a high school during the first years of its existence.

THE OLD HIGH SCHOOL. Removed to Eastern Part of Town to Make Way for Case Street Building and Now Used as Finnish Church.

There had been no particular attempt until 1865 to lay out streets in the village and the houses that were erected prior to that time were scattered about promiscuously in a small area. As the village grew and showed signs of permanency, the citizens began to give educational matters serious attention. As the school population increased new subjects were added to those already taught, and when the first class was graduated from the high school general satisfaction was expressed.

**First Class in 1879.**  
Eugene V. Ketchum was the first principal of the Negaunee public schools. He was succeeded by J. F. Healy, and S. H. McIntyre took charge following Mr. Healy's resignation. It was under the supervision of V. B. Cochran, who succeeded Mr. McIntyre, that the first class was graduated, in 1879. The title of principal was of greater significance than it is now, as the incumbent of the office performed all the duties of superintendent. Inasmuch as the graduates of 1879 took a four-year course, the high school work must have begun in 1875. The school board at that time was composed of T. J. Houston, J. B. Maas, W. C. McComber, John McKeena, Timothy Donahoe and Nicholas Laughlin. The latter is a member of the present board. There were but two courses, English and Latin, in the high school, and the students had practically no advantages in the way of apparatus for

demonstrating their work. The faculty consisted of two teachers, in addition to the principal.

Mr. Cochran resigned the principalship in June, 1881, to accept the position of superintendent of public instruction of the state. His work was most satisfactory and it was largely through his efforts that the schools were placed on a secure footing. There was a big improvement in the high school work during the two years following the graduation of the first class. The class of 1881 consisted of only seven students, and Miss Lydia Steele, the present principal of the high school, was one of them. She had an average of 98 percent in all her studies. The average of the six others was 93.47 percent.

Mr. Cochran was succeeded by M. J. Wiltrout, who had charge of the schools until 1884, when E. D. Davis, now superintendent of the Escanaba schools, was given in charge. The high school, which was then known as the Case street building, was a frame structure, containing a high school room, with a seating capacity of sixty, two small recitation rooms, about twelve by fourteen feet in size, and two rooms and a small office on the first floor. Other buildings used for school purposes were the old town hall, near the Catholic church, on Case street, with one small class room on the first floor, and another on the second, the present Jackson street building, containing four class rooms, and the Rolling Mill school, with one room. There were about a dozen teachers. In the high school room there were seated all of the pupils in that part of the city, from the fifth grade to the ninth. There were only four pupils in the high school, all in the ninth grade, during the years 1883-4, and the most advanced work done was Latin, algebra, higher arithmetic and English. Owing to a complete change in system, another class was not graduated until three years later, 1886, and it consisted only of three members, Bertha Koster Miller, Lillian E. Kirkwood Dow and Jennie Neely, all in the English course.

During the fifteen years of Mr. Davis' superintendency, twelve classes were graduated. The number in each of these classes was small compared with the classes of today, but large in comparison with other schools in the upper peninsula during those years. The personnel of the graduates was of such a character that an unusually large number have gone out into the world and made good in the various lines of work to which they have devoted their attention.

**Hard Fight For New School.**  
In the fall of 1886, in which year Robert G. Jackson became a member of the school board—he has served continuously in that capacity ever since—there was much sentiment for the erection of a new high school. The rooms in all of the buildings, none of which were properly heated or ventilated, were overcrowded. The first consideration was the question of a suitable site. The project of bonding the city for \$300,000, to be used for school purposes, was defeated by a large majority at a meeting called by the board. In March, 1887, eighty-two voters petitioned the board for a new

school. The date for voting was fixed for April 25, but the proposition was again defeated. Still persevering, fifty voters sent a second petition to the board. The proposition was again submitted and this time carried.

The board called for plans for a new building and Architect J. B. Stewart of Marquette was awarded the contract. Wahlman & Grip of Ishpeming erected the building, which is the high school soon to be abandoned. The I. E. Swift company installed the heating plant. The old building was sold at auction to the Finnish Lutheran church congregation and the erection of the new structure was immediately begun. In the spring of 1888 the building was ready for occupancy, having cost, with its equipment, about \$40,000.

**Changed Name To Superintendent.**  
Upon the opening of the new high school the instructor in charge was given the title of superintendent. It was in that year that Cyrille Houle, secretary of the present board of education, was elected to membership. New courses were added and there was hardly a year from then on when one or more additional teachers were not necessary to meet the demands of the school.

**General Work Expanded.**  
In the winter of 1904-05, the eighth grade, which had been a part of the high school, was dropped out of the commencement exercises, owing to the increase in the size of the senior classes. Music, which was taught in a very limited and incomplete manner, was discontinued in 1892, but soon after the board was petitioned to restore it. At first the pupils received instructions at their own expense. About that time the vertical writing craze swept the country and found lodgment in the schools of Negaunee. Inasmuch as the style did not meet with general favor, slant writing soon displaced it here.

The closing years of the nineties were accompanied by important changes, debating clubs were formed and much interest was shown in oratorical contests. In a number of these, in which students from the leading upper peninsula high schools participated, the Negaunee representatives acquitted themselves with much credit. Miss Helen Beidy, now a teacher in the Negaunee schools, carried off first prize in 1897 and two years later Miss Julia McAuliffe, also a Negaunee teacher, won third prize.

In that year there was much discussion as to the advisability of granting free text books, and the people finally voted in favor of adopting that system. General instruction in music was introduced in the fall of 1900 and with it came the introduction of shorthand and typewriting. Since then, both have been important features of the high school work. The commercial course was introduced in 1893, though bookkeeping had been taught for some years previous. At that time it required two years to complete the commercial course. Three years ago the course was lengthened to four years.

**Over 200 Graduates.**  
Orr Schurtz, present superintendent, accepted the position at the close of the latter term, succeeding Mr. Greening, who acted as temporary superintendent following the death of Mr. Krogman. Prior to Mr. Schurtz's incumbency 232 young men and women had been graduated from the school. It is doubtful if here is a school in the upper peninsula that has as high a percentage of men and women graduates holding responsible positions in the business and industrial world as has the Negaunee school. A large number of the graduates have met with success as business men, and others have developed into first-class engineering men, or are successful in some other line of occupation.

Superintendent Schurtz is responsible for many important changes and improvements in schools. While the high school has been at a disadvantage for a few years, on account of its limited equipment and cramped quarters, the high standard of the work has been maintained to a remarkable degree. For two or three years past many of the rooms have been inadequate and the teachers and pupils have labored under great disadvantages.

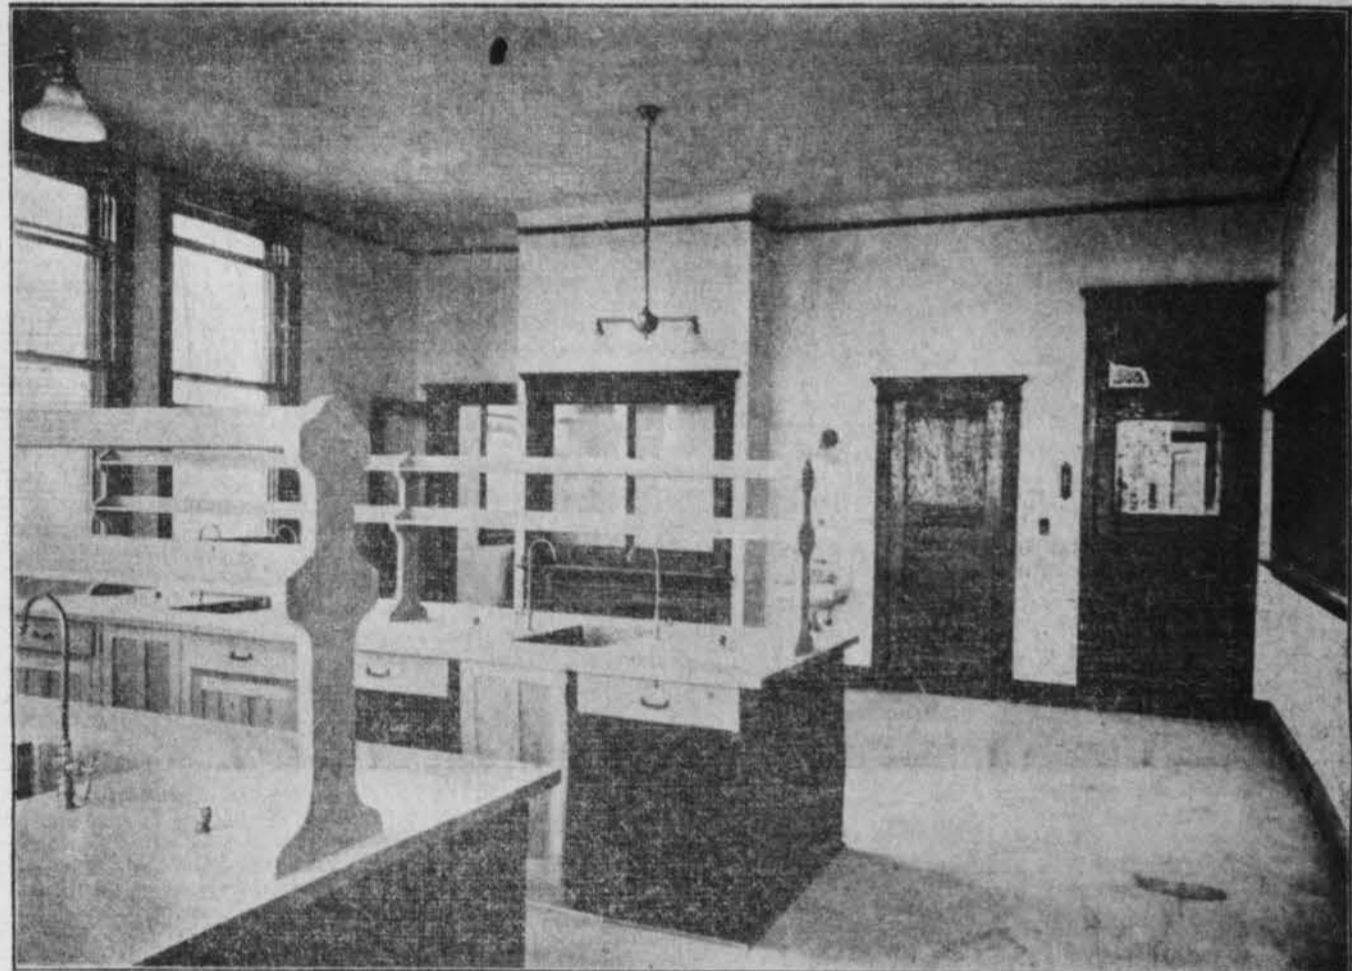

Last year the board introduced a night school, having for its nucleus commercial studies, and the department was conducted with great success for four months. It is likely that this department will be established again next fall, as there are many young men and women here who would like to avail themselves of its opportunities.

**More New Departments.**  
With the opening of the new school next fall, manual training and domestic science will be included among the studies. The modern high schools are paying more and more attention to those subjects. The Negaunee school authorities have had a desire for some time past to introduce both in the high school, but were unable to do so, on account of the lack of room in the Case street building.

The members of the board of education and superintendent feel that the taxpayers and citizens were heart and soul with them in providing the city with its fine new building. This sentiment was shown in the election held in January, 1907, to decide on issuing bonds to raise funds to provide the school. The first obstacle was to secure the site. Some of the property owners asked exorbitant prices, and matters were only adjusted by means of court proceedings. When the site was secured the board lost no time in securing plans. And three months after the election, Architect John D. Chubb had submitted plans that were accepted by the board. Bids were called for and L. E. Chaussee of this city was the successful bidder, in competition with a dozen or more big contractors. The footings for the foundation were put in before winter came on, but all work was then suspended until a year ago.

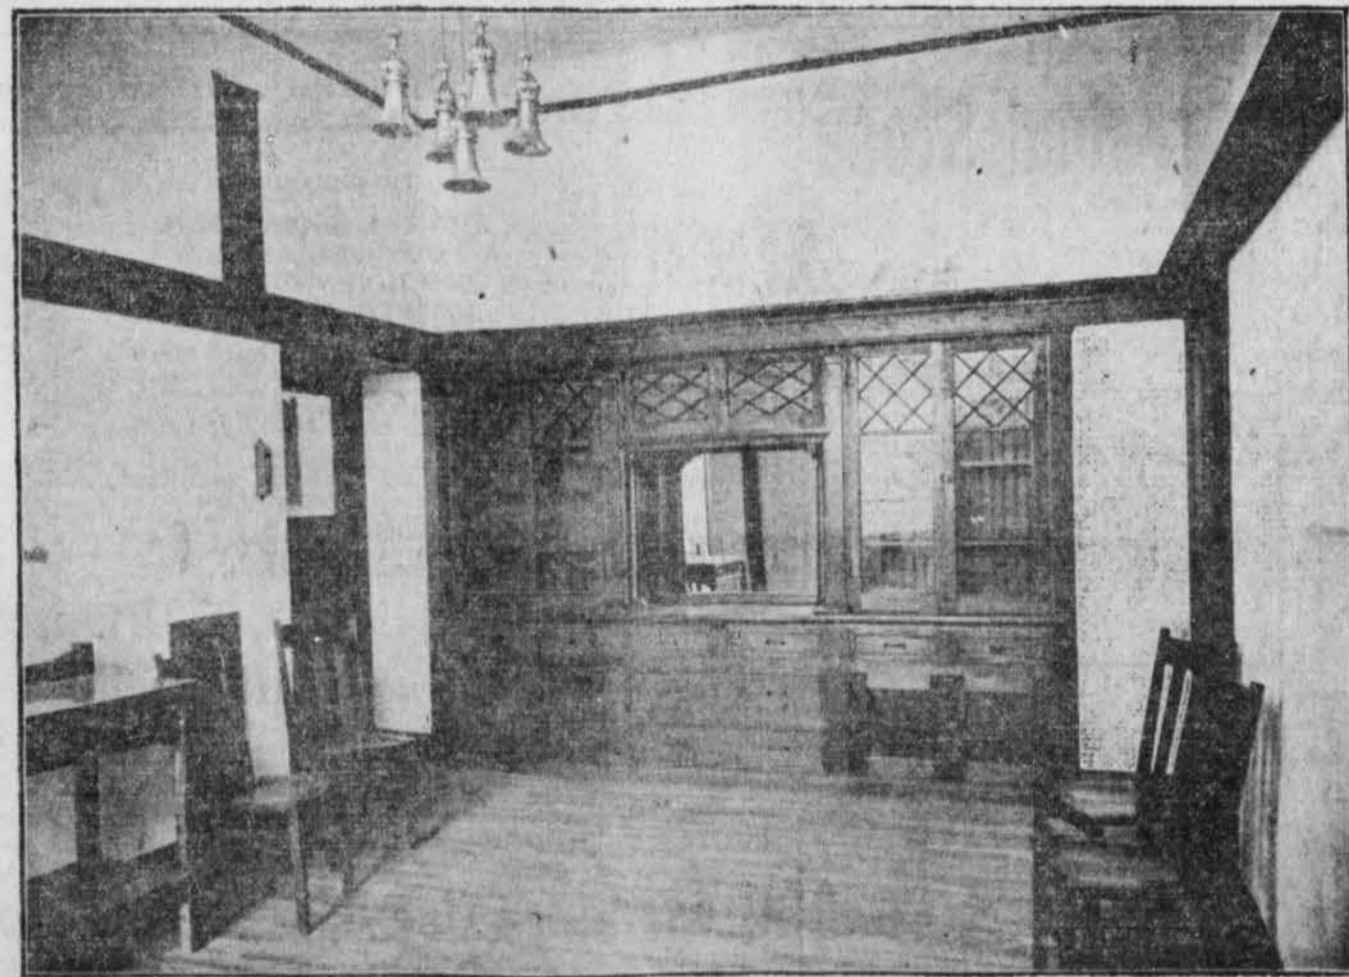

Foley's Honey and Tar is especially recommended for chronic throat and lung troubles and many sufferers from bronchitis, asthma and consumption have found comfort and relief by using Foley's Honey and Tar Sold by all Druggists.

# KLOMAN MINE CASE SETTLED AT LAST

AMICABLE AGREEMENT REACHED IN STOCK OWNERSHIP CONTEST OF YEARS' DURATION.

## FORMAL DECREE OF OWNERSHIP

At Hearing Before Judge Stone Yesterday, Parties Interested Asked That Court Give Formal Sanction to the Settlement.

The case of Joseph H. Primeau against Egbert J. Mapes, et al, involving the ownership of the Klonan mine near Republic, which has been in litigation for a number of years, was on trial before Judge Stone in circuit court yesterday. The chief point at issue in yesterday's hearing was to determine who are the stockholders of the Klonan Mining company, in order that its affairs may be closed up. As the Cleveland Iron company now has an option on the property, giving them the right to explore for one year, it is necessary that the title be clear in case the Cleveland Irons people should decide to purchase the mine.

It is understood that at last all disputes as to ownership of the stock of the Klonan Mining company have been amicably settled, and that the purpose of yesterday's hearing was simply to obtain a formal decree of ownership from the court, to make the title clear beyond all question.

The last of the several ownership contests to be settled was that involving the one-fourth interest in the original company, held by Jacob Houghton and Thomas B. Brooks, from whom the property was purchased. Before the settlement about a year ago, the heirs of the late Egbert J. Mapes claimed to hold an assignment from the heirs of Mr. Houghton and Mr. Brooks of their interest in the property but the Andrew Carnegie interests, of Pittsburg, contested this assignment, maintaining that Mr. Houghton and Mr. Brooks sold their interest in the Klonan mine to them as early as 1875, and that therefore, the heirs of Messrs. Houghton and Brooks had nothing to assign.

History of the Mine.  
The Klonan Mining company was organized in 1872 or 1873 to operate what is known as the Klonan mine, adjoining the present Republic mine, the stockholders of the company being largely residents of Pennsylvania. The property was explored for about two years, and no ore was found in paying quantities at a depth at which mining was practicable in those days, the mine was abandoned and the property remained idle until about 1900. Meantime, it had been delinquent for taxes and had been sold for taxes several times, the late Peter White, among others, obtaining an interest in the property in that manner.

In 1901, Joseph H. Primeau, of this city, and John Voegtlin, of Republic, determined to acquire the abandoned property from the defunct Klonan Mining company and consulted Egbert J. Mapes, a Marquette attorney, as to the best method by which its acquisition could be accomplished. According to Mr. Primeau and Voegtlin, Mr. Mapes had taken into the proposition on an equal basis with themselves, and the three set out to acquire the stock.

In order to accomplish this, the three secured the services of David M. Alston, of Pittsburg, to buy up the stock held in Pennsylvania, in return for which service he was to obtain an interest in the mining property. Mr. Alston succeeded in purchasing practically all the stock of the company held in Pennsylvania and Mr. Mapes secured an assignment of the one-fourth interest, supposed to be held in the name of Messrs. Houghton and Brooks, as heretofore stated.

Sold to Flagler Interests.  
About this time, according to Messrs. Primeau and Voegtlin, they began to have trouble with Messrs. Mapes and Alston, because the latter would not furnish them with a detailed statement of the stockholders and affairs of the company. However, the property was placed on the market for sale in January, 1902, and in the latter part of 1904, an agreement was reached with the Flagler Iron and Steel company, of Boston, who were to purchase the property for \$125,000, and had been very satisfactory to them after pumping out the water.

The Flagler Iron and Steel company eventually decided to take the property and at once got out a rosate prospectus and began a campaign of exploitation through the newspapers and in other ways, claiming that investors would be sure to make wonderful returns on any money invested in the stock of the company.

The method of exploitation was a new one to the mining interests of the upper peninsula, who did not take kindly to it, and the company and its prospects were given a "black eye" by the shipping iron ore and other papers and mining men of northern Michigan. The result was that the Flagler company went to the wall but not until the first payment of \$10,000 had been made to Messrs. Mapes, Alston, Primeau and Voegtlin.

Bad Faith Charged.  
Messrs. Primeau and Voegtlin claimed to have never received their just share of this payment and declared that \$8,000 of the amount was paid to Mr. Alston for services rendered, without any authority from the company, and, furthermore, alleged that Mr. Mapes worked in collusion with Mr. Alston in this matter, against the interests of the other two members of the company. However, this disagreement has been amicably settled by the parties concerned.

At the January term of circuit court, Judge Cooper gave the Klonan Mining company permission to lease or sell the property, and a short time later an option was given the Cleveland-Cliffs Iron company, with the privilege of purchasing the mine for \$125,000 at the end of a year, if so desired after explorations had been made.

May Be Valuable Mine.  
There are many mining men who firmly believe that the Klonan prop-

erty will turn out to be a valuable mine. It lies in the direction of the Republic vein, and it is thought by many that the vein extends across the Klonan property, at a greater depth than the drills have yet gone. The fact that all parties who have any claim to ownership in the property are buying themselves to protect their interests is further indication that the mine at some time may become a paying producer.

At the hearing yesterday, Mr. Primeau was represented by Wm. P. Belden, Maps and Voegtlin by S. S. Hill, the Brooks and Houghton interests by Ball & Ball, the Carnegie interests by A. B. Eldredge, and the Flagler Iron and Steel company by C. E. Burton. Judge Stone has taken the evidence submitted under advisement and is expected to hand down a decree within a short time, which will be substantially in accord with the agreements already made.

## THEATRICAL

"Lillian Russell" Tonight.

Lillian Russell in her new racing comedy, "Wildfire," will be seen at the opera house this evening. The tour is under the direction of Joseph Brooks, who selected the Broadhurst and Hobart play for Miss Russell's use this season. She has made a great hit in it in New York and comes almost direct from her long engagement at the Liberty theater.

"Wildfire" is in three acts and concerns the efforts of the heroine, a widow who has a racing stable, left by her late husband. He had conducted it secretly, and the widow continues the game until such time as she can dispose of her holdings to the best advantage. There is an effort to have her mare, "Wildfire," pulled in the big race that means the turn of the widow's fortune, and how she fights against the crooks of the course and comes out all right is the impelling motive of the comedy.

Miss Russell is seen as the widow, Mrs. Barrington. She is all that it calls for in radiant beauty and stunning dressing of the three scenes, and her performance is one of the really big things of the season. Her support is adequate and includes Frank Sheridan, Will Archie, Franklyn Roberts, Ernest Truex, J. Hayes Hunter, Ellen Mortimer, Mary Elizabeth Forbes and Annie Buckley.

## PROGRAM ARRANGED FOR C. O. F. MEETING

STATE CONVENTION TO BE HELD HERE NEXT WEEK PROMISES MUCH OF INTEREST TO THE MEMBERS OF THE ORDER

The annual convention of Michigan state court, Catholic Order of Foresters, to be held at Baraga auditorium next Tuesday and Wednesday promises to be of great interest and enjoyment to the members of the order. The arrangements and entertainment of the visiting members fall upon the members of Bishop Verlin court, of this city, and the committees appointed for that purpose have left no stone unturned to make the meeting a success. The program arranged for the convention is as follows:

Tuesday, June 8—  
8:30 a. m.—Mass at St. Peter's cathedral.  
9:30 a. m.—Opening of Convention.  
1:10 p. m.—Business session.  
4:00 p. m.—Trolley ride to Presque Isle.  
8:00 p. m.—Banquet at Baraga auditorium.

Program of Banquet.

Use Japalae for decorating and replenishing woodwork and furniture, etc. Any size and color can be obtained from Kelly Hardware Co. Phone 503. (5-17-17)

## FOREST SERVICE ASKS TEACHERS TO ASSIST

SEEKS TO OBTAIN DEFINITE KNOWLEDGE OF CHARACTERISTICS OF MOST IMPORTANT TREES.

Teachers throughout the country have been invited by the United States forest service in an effort to obtain more definite knowledge of the characteristics of the most important forest trees of the United States. To do this it will be necessary to obtain a large number of volunteer observers who will collect material on the time of leafing, blossoming, and fruiting of the various kinds of forest trees. In his letter inviting the cooperation of the teachers, Forester Pinchot says:

"Knowledge of this kind is greatly needed and will be of value from the standpoint both of education and of practical forestry. For educational purposes the results obtained for each species, averaged and presented graphically by means of colored charts, will be available to all who are interested in the subject, and particularly to schools. They will form virtual tree calendars, and will be valuable aids to nature study.

"Children can readily be interested in the actual work of obtaining records. This should form an attractive outdoor feature of the school work that should serve to develop the faculty of accurate observation, and at the same time to promote an interest in forestry which may lead to a better appreciation of its aims and methods. It may also prove to be a profitable addition to botanical courses of older students.

"A study of this kind will be of great value to practical forestry, since the proper treatment of forests depends partly upon a knowledge of these characteristics of trees. For example, the time of year when a tree buds out and blossoms is one of the indications as to whether or not it is frost-hardy in a given region, and the length of time that a tree is in leaf influences the growth it is able to make during the season. Knowledge of the time when seeds of each species ripen in various localities is of great value to those who are collecting seed, since seed often deteriorates or is eaten by squirrels and birds if not gathered and stored as soon as ripe.

"Another result of this study will be a more intimate knowledge of climate as manifested by plant growth, for differences in climate are shown by plant life as well as by instruments, and a preliminary idea can thus be gained as to whether a given region is suited to a valuable tree which it is desired to introduce there. Many such examples could be given, but sufficient has been said to show that the results of these observations will be a real help to practical forestry, in addition to their general interest and educational value."

## PETER WHITE EULOGIZED.

Memorial to "Grand Old Man of Marquette" Read at Pioneer Meeting.

At the meeting of the Michigan State Pioneer and Historical society, held in Lansing this week, Levi L. Barbour, of Detroit, read a paper, a memorial to Peter Quintard White, who was born in Rome, N. Y., Oct. 21, 1838, and died suddenly in Detroit, June 6, 1908. After giving an extensive sketch of Mr. White's private and personal life, his victories and disappointments and his social and political career, Mr. Barbour closed by saying: "If you inquire: 'What did he do to be gratefully remembered?' the best answer would be, 'Is there anything he did not do?' All came because he regarded the child, the companion, the associate, the school, the church, the state and country with loving interest. When a man's life is catalogued it can usually be made brief, but when Peter White's life is recorded a record must be given of the founding of an enormous industry, the development and embellishment of a model city, the foundation of a parish and diocese, the organization of a library and hospital, the perfecting of an educational system, legislation of far-reaching importance, a life time of gratuitous public service, and with all this and small early advantage the attainment of a high degree of literary culture, success in four professions—banker, lawyer, merchant, publicist." Mr. Barbour presented to the society a picture of Mr. White.

## Jacob Rose

Ever hear of the vitals of a Suit? Buying a suit of clothes is like buying a melon. If the inside is not good you lose. Be sure quality is more than skin deep. Don't gamble on the looks alone.

OUR OWN MAKE will stand the probe, cut them up, dissect them, analyze them and you will find conscience and capacity and extreme care in every thread. That is why we sell them—because we can give a clean bill of health for their "inwards" as well as their "outwards."

Stock made in our own shop, \$15 to \$25. Custom made in our own shop, \$25 to \$35.

The Store of Quality.

## What About Your Valuables?

Have you placed them where they are Secure against Fire and Burglars? Prudence is steadily pointing to the Fire and Burglar-Proof Vault of the First National Bank of Marquette, where you can Rent a Safe Deposit Box for a very reasonable charge.

Safe Deposit Boxes to Rent. \$3, \$5 and \$8 per year.

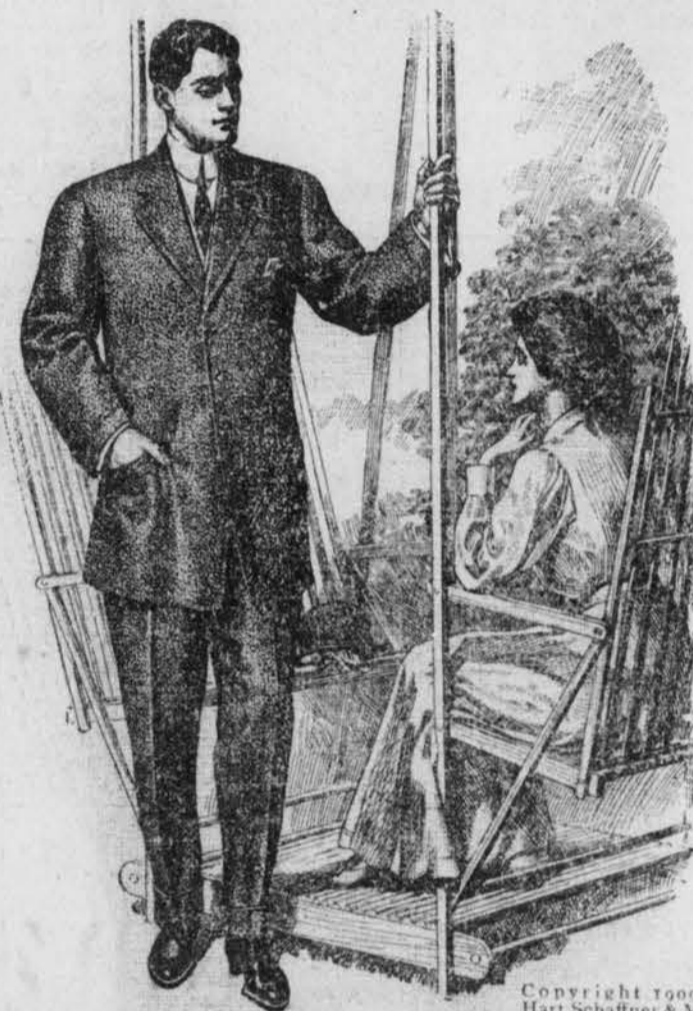

THE FIRST NATIONAL BANK MARQUETTE, MICH.

## WOOD AND BUILDING MATERIAL

I ALSO HANDLE Artistic Monuments COST NO MORE THAN PLAIN ONES IN WHITE BRONZE

Marble is entirely out of date. Granite is no longer grown, discolored, requires constant expense and care, and eventually crumbles back to Mother Earth. Bronze is very expensive. WHITE BRONZE is strictly everlasting. It cannot crumble.

Mass growth is an impossibility. It is more artistic than any stone. Thousands of delighted customers in all parts of the country. It has been on the market over 25 years and is an established success. Many granite dealers have bought White Bronze for their own burial plots. I have hundreds of beautiful designs of all grades of work, and want to have you see them if you are interested in a monument, headstone, marker or grave cover. On receipt of a postal card will be pleased to call with designs and samples of White Bronze.

Geo. E. French, MARQUETTE, MICH.

Agent for the Monumental Bronze Co., of Bridgeport, Conn. GENERAL TEAM WORK.
