MARQUETTE, MICH., JULY 9.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

The day when President Taft will deliver himself of his opinions regarding the tariff revision accomplished is being awaited with much interest.

Where's our Colonel Roosevelt these past few days? Has he gotten away from the telegraph lines, or has he finally succeeded in banishing the newspaper correspondents?

If the Detroit News wants reliable information about the Twelfth district we suggest that it get in touch with a reliable correspondent. And particularly let it beware of all information coming to it under a Bessemer date line.

Baiting Bishop Williams is a frequent diversion of the Detroit newspapers, and it is more than usually popular in the dog days of summer, when things generally are dull. They are giving the good bishop the time of his life just now.

Bay City has been enjoying a "home coming" week that has been one of the most successful affairs of the kind ever held in the state. Thousands of former residents and other visitors have journeyed to the city, and the way they have been received and entertained has made them glad that they made the trip.

But even if it is considered inexpedient to run former Commissioner Bingham for mayor of New York, he will be on hand to help the candidate put forward by the fusionists. He asserts that he is in possession of some highly interesting information which he will give to the public at the psychological moment.

Senator Aldrich and his assistants have now finished their consideration of the Aldrich bill, and it will go to the conference committee, along with the Payne bill, for adjustment on the points of difference. At this writing it is the general opinion that the best that the conference committee can do will fall far short of what the public has learned to expect from the Taft administration.

Tom Taggart, one time Democratic national chairman, may not be the nicest man in the world, but we question whether anyone will credit that he has been the receiving end of a "white slave" machine. The introduction of his name in the Gingle girl's testimony does a good deal to persuade that it is what the prosecutor alleges—part absolute fiction and part the product of an hysterical imagination.

Senator Cullom of Illinois is going to serve as one of the senate conferees on the tariff bill. He would prefer not to, as personal matters demand much of his time, but he is fifth on the senate committee on finance, and Lodge, of Massachusetts, is sixth. Senator Aldrich would like to pass Lodge and take some westerner, Smoot of Utah for instance, but Lodge insists that if Cullom doesn't serve he wants the privilege properly his by priority. Thus Cullom is to be pressed into service to keep Lodge out of the conference, it being Senator Aldrich's idea that too much east in the conference would be likely to increase the dissatisfaction of the country with a tariff bill which is already held to have too much east in it, from first paragraph to last.

The completion of the figures on the operation of the binder twine plant at the Jackson prison shows that the returns have been very satisfactory, and would seem to prove the wisdom of its establishment and to suggest that it may well be expanded so as to enable it to do a larger business. The output for the year ending July 1 was 2,145,850 pounds of twine, and the gross profits

5% DEBENTURES Running one to five years secured by first mortgages on improved real estate worth more than double outstanding debentures. Superior Trust Company HANCOCK, MICH. Capital and Surplus, \$200,000.00 DIRECTORS: Jas. Chynoweth, Jacob Baer, G. R. Campbell, H. L. Baer, Jno. D. Cuddihy, Joseph Bosch, Lessing Karger, Chas. Briggs, Norman W. Haire, James Mercer, L. H. Richardson, Allen F. Rees, Chas. L. Lawton, Geo. Ruppe, S. L. Lawton, Thos. Whittle, C. A. Wright, Ferd. Wieber

were \$42,102. From this sum the board of control will deduct \$12,857.50, as a charge for the convict labor, transferring it to the current expense fund, and there will be a further reduction of 10 per cent for depreciation, which will leave the net profits of the year at the figure \$26,515. The saving to the farmers of the state has amounted to many thousands of dollars, because of the lower quotations made on twine. The revolving fund to the credit of the plant, which is used to purchase the raw sisal and to carry the product until it can be marketed, is now \$164,165.

An "upper peninsula correspondent," quoted by the Detroit News on the situation in the Twelfth congressional district, relates that there is a probability that R. M. Andrews of Menominee county and Bob Shields of Houghton will be candidates for representative. He fails to note that Angus Kerr of Houghton county is already a candidate, and thus misses an opportunity to mingle one fact with the improbabilities he sets forth. Mr. Shields, it may be stated, has no remote idea of getting into the congressional race, nor is Roger M. Andrews of Menominee giving any thought to entering the arena of district politics. The combination which, as the News' correspondent remarks, "would confine Young's strength to his immediate home district, the Marquette range," exists solely in the figments of said correspondent's imagination.

"Gogebic," writing from Bessemer, furnishes the Detroit News with a line of comment on the Ironwood bank failure that reminds us of communications we have received in the past from our old friend K. S. Markstrum. "Gogebic" relates that the Ironwood bank was one of the instruments by which the collar of oppression has been fastened on free-born citizens by the iniquitous "machine." He works in a reference to the steel trust officials that suggests that these men invigiled their employes into using the bank as a place of deposit only to give the derelict officials an opportunity to fatten off illicit gains. "Gogebic" intimates that the federal bank examiner was either incompetent or dishonestly failed to close the bank two weeks earlier, when he learned its condition, and he also makes the allegation that favored depositors were allowed to draw their money after it was seen that the crash was inevitable. Larson, the cashier, he would make out to be the least culpable of the derelict officials. In short "Gogebic" puts the worse face on the matter and on everybody connected with it, and raises a cloud of suspicion by imputing that in most cases palpably unjust. There is a constant succession of these anonymous communications from Bessemer and they have the common characteristic of misrepresentation to the limit of the truth.

Commenting on E. G. Cooley's assertion that the public schools are training 2,000,000 of our youth for the presidency and 30,000,000 for nothing the New York Globe says: We think that things are not quite that bad. Nothing should be done to impede the progress that the movement for industrial education is making, and Mr. Cooley is certainly one of those who would hinder it. But the old-fashioned idea that the boy should be taught to understand the institutions of free government—of which the presidency is one of the most important—is as essential today as it ever was. The industrial education movement in its entirety would better be allowed to go by the board than that this old-fashioned idea should be discarded.

We cannot get along with eldads as citizens. And the first duty of the public schools is to conserve the public interests, the political ideas and ideals of the country in all their integrity. The training of the eye and the hand is important, but the first obligation of the school is to train the moral and political consciousness. The man will not be even a good machine unless, at the beginning, he is trained to be much more than that. We should go on educating every mother's son of us to understand what the presidency stands for and to get it if we can.

MONEY IN CREAMERIES. The returns from such creameries as have been established in the upper peninsula would indicate that the Skandia and West Branch farmers have taken a well advised step in organizing a company for the operation of a plant in this county. The Baraga creamery, a new plant, is now paying out to farmers \$500 for cream delivered in the month of June, and it is further reported that the Manistique creamery, which is supported by the farmers of Schoolcraft county, has received a cent a pound over the market price for a shipment of 1,000 pounds of butter to New York, and has been advised that the market will take all the product that can be furnished.

Conditions in the upper peninsula are ideal for dairying operations during the season when the cattle can be pastured. The glass is tender and abundant, the water pure and sweet and the temperature comparatively cool, so that the cattle do not suffer from the heat. Wellbred stock yields milk abundantly, and milk that carries a high percentage of cream. Creameries make feasible the building up of large herds of cattle, for the cost of handling the product is reasonable once the problem of working it up on the farm is done away with.

Another advantage of keeping large herds of cattle is found in the fact that they are a source of fertilizer supply that permits of keeping up the strength of the soil without the expense of purchasing artificial fertilizers. In a region like the greater part of the upper peninsula, where even the tillable soils are none

too rich, this is an important consideration for the farmer and one that probably is not yet appreciated at its full value. As for markets, the home market is amply large enough to take the product of dozens of creameries, and even if it were not there is no product that is in better demand the country over, at consistently high prices, than butter. There is much cause for pleasure at the favorable reports from the upper peninsula creameries already established, and it is to be hoped that they form a development of the dairying industry to an extent that will make it an additional incentive for settling up the land in this region.

From "Charlie" Howell

New York City, July 6th, 1909. Editor The Mining Journal, Marquette, Michigan. Dear Sir: It is nearly fifteen years since I left the upper peninsula of Michigan to locate permanently elsewhere. It is about twenty-four years since, as a young man, I occupied for a short time the position of associate editor of the Daily Mining Journal. The call of the Gogebic, then on the eve of one of the greatest iron mining booms this country ever has experienced, irresistibly drew me along with the general rush to that promising new district. Notwithstanding this lapse of time, I always anticipate with pleasure the arrival of the weekly edition of the Mining Journal and I never fail to find in its columns an abundance of interesting reading.

Late, the accounts of two notable incidents have been of unusual interest. One was the story of the Daily Mining Journal's recent twenty-fifth anniversary. I am not at all surprised that the narrative spells success, and that, too, with every letter a capital. To know "Jim" Russell in those early days at the head editorially and Horstein as business manager, and especially to be associated with them even for a short period, was to be qualified to predict, barring the premature taking off of either, the full measure of success which the intervening strenuous years have brought.

This anniversary also served vividly to recall the banquet, provided by the citizens of Marquette and vicinity, and tendered to Mr. Swineford at the time that he retired from the editorship of the Mining Journal. The banquet and responsibilities as the newly-appointed governor of Alaska. In that notable affair it was my privilege to participate. Alaska then seemed to be much further away from everywhere than it seems to be now. It is probable that no one present imagined that the banquet, which marked the transition of a distinguished citizen of the upper peninsula of Michigan to what then vaguely seemed like a sort of an upper peninsula of the universe, was to signalize the beginning of Governor Swineford's permanent residence in that far-off territory, but such has proved to be the case.

The other subject of special but unpleasant interest is the incredible and dispiriting attack which that legislative committee made on Warden Russell. Of course, to those of us who know the real "Jim" Russell "proof" strong as he truly would be necessary to arouse even a suspicion that he ever would be lacking in either ability or integrity in such a position. Inevitably, so soon as the malicious report became public, the fight was on and the victim was in the line of the pushing. Evidently, Whalen and Ogg were not acquainted with the tempered steel of Editor-Warden Russell's intellectual rapier. Otherwise, they would not have invited its ready leap from the scabbard and the deep and cutting wounds it has left in their reputations. "Thrice is he armed who hath his quarrel just," and "He that flies from me my good name robs me of that which no man can ever give me back," indeed, are words which ring as true in this day of ready slander, libel and petty politics as when they were penned by Shakespeare.

As much as or little, if any part at all, of this communication as you may care to publish is yours for publication. Respectfully yours, CHAS. M. HOWELL.

AFTER SUFFERING ONE YEAR Cured by Lydia E. Pinkham's Vegetable Compound. Milwaukee, Wis.—"Lydia E. Pinkham's Vegetable Compound has made me a well woman, and I would like to tell the whole world of it. I suffered from female trouble and fearful pains in my back. I had the best doctors and they all decided that I had a tumor in addition to my female trouble, and advised an operation. Lydia E. Pinkham's Vegetable Compound made me a well woman and I have no more backache. I hope it can help others by telling them what Lydia E. Pinkham's Vegetable Compound has done for me."—MRS. EMMA IMSE, 838 First St., Milwaukee, Wis.

The above is only one of the thousands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass., which prove beyond a doubt that Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, actually does cure these obstinate diseases of women after all other means have failed, and that every suffering woman owes it to herself to at least give Lydia E. Pinkham's Vegetable Compound a trial before submitting to an operation, or giving up hope of recovery. Mrs. Pinkham, of Lynn, Mass., invites all sick women to write her for advice. She has guided thousands to health and her advice is free.

THE SIXTEENTH AMENDMENT.

While the remainder of the country was before fireworks, picnicking, and cheering the efforts of athletes the senate "celebrated" by unanimously passing a resolution to amend the constitution so as to permit the levy of an income tax not based on population. To Senator Brown of Nebraska was given the honor of fostering the resolution, although it was written by Senator Root of New York. The unanimous vote was the result of a compromise arrangement under which the corporation tax and the amendment should go through together. It is an open secret that many senators, perhaps an actual majority, are opposed to an income tax and to conferring on the national government the right to levy one, yet they were committed to yielding their personal views. Little doubt is to be entertained of the passage of the resolution by the house of representatives, and then the amendment will go before the state legislatures, and to become part of the organic law it must be ratified by three-fourths.

Will the necessary number ratify? It is the notion of many at Washington that the amendment will fail—prediction to this effect having freely been made by both revenue taxers and anti-income taxers. Each of the forty-six states has a legislature of two houses—ninety-two bodies in all—before which the amendment is to come. If twelve of the ninety-two reject or do not affirmatively approve there will not be ratification by the thirty-five states which must give approval. The negative has obviously a great advantage. Most cumbersome machinery must grind concurrently, and it is assumed that this is practically impossible—that even though a great majority of the country favors the amendment at least twelve legislatures will be found either in opposition or indifferent.

Nevertheless, despite the opinion that prevails at Washington, Senator Root last week told his colleagues that if the amendment was submitted he would vote for it. He is not alone in this. Two great arguments are set loose to work. In the first place, the argument as upheld by Senator Root, who said that although opposed to an income tax with conditions as they now exist in this country, he believed that our national government should have a power possessed by every other civilized government—that a crisis might arise when the exercise of that power would be indispensable. In the second place, arguments are made by the professors of political economy and by the great army of politicians, that an income tax is a just tax, one that the national government should not only have the power to levy, but should levy it at once. With the belief general that the people want the income tax it is not improbable that there are no one present imagined that the banquet, which marked the transition of a distinguished citizen of the upper peninsula of Michigan to what then vaguely seemed like a sort of an upper peninsula of the universe, was to signalize the beginning of Governor Swineford's permanent residence in that far-off territory, but such has proved to be the case.

Looking over the country, it is difficult to discover twelve states that are reasonably certain to reject the amendment. The political party dominant in the south has expressly declared in favor of the amendment. The states of the extreme west and the middle west have repeatedly memorialized Congress to submit the amendment. Will any one familiar with New York say that there is any certainty or even likelihood of rejection here? Some of the New England states may vote "no," but there is Maine, for example, that has taken the initiative and referendum on the subject. Doubtless, there will be a pronounced struggle, but in the end it is not improbable that the income taxers, temporarily defeated at this session and greatly chagrined, will discover that they have won after all. If the states were to vote on income taxes, the agricultural inheritance taxes influence could be relied, especially in the south, against extending the power of the national government at the expense of the states, but the states have not exercised their power to levy income taxes, and the national government would be uniform throughout the country.—New York Globe.

Put This Stove in Your Kitchen

It is wonderfully convenient to do kitchen work on a stove that's ready at the instant wanted, and out of the way the moment you're done. Such a stove is the New Perfection Wick Blue Flame Oil Cook-Stove. By using it you avoid the continuous overpowering heat of a coal fire and cook with comfort, even in dog-days The

NEW PERFECTION Wick Blue Flame Oil Cook-Stove

is so constructed that it does not add perceptibly to the heat of a room. It differs from all other oil stoves in its substantial CABINET TOP, with shelf for warming plates and keeping cooked food hot, and drop shelves for holding small cooking utensils. Has every convenience, even to bars for towels. Threesizes. With or without Cabinet Top. If not with your dealer, write our nearest agency.

He Knew. A member of the Nebraska legislature was making a speech on some momentous question, and in concluding said: "In the words of Daniel Webster, who wrote the dictionary, 'Give me liberty or give me death.'"

Faint Praise. A little girl taking her first ocean trip was awakened from a sound sleep one morning when the steamer was close to a strip of coast where the mountains tower sheer from the water's edge to a height of thousands of feet, presenting a majestic aspect not to be equalled in any other place. The little girl's father, carrying her to the deck, pointed to the great line of mountains, and asked her:

"Well—what do you think of that?" "Exceeding," was natural, that she would be quite overwhelmed at the sight. "Indeed she just rubbed her sleepy eyes."

Severely Reprimanded. General Staves was a martinet, a stickler for etiquette, a man with a prodigious sense of his own dignity, and when Private S. Weigh, the bugler, one day failed to honor him in passing with the customary salute he flew—internally—into a towering rage.

"Knew," he said that afternoon to the colonel, "Private Weigh failed to salute me this morning. A breach of etiquette, sir! A piece of impertinence—my dignity—'hav'! See that the man is severely reprimanded."

Mrs. Stuyvesant Fish. Mrs. Stuyvesant Fish is an anti-suffragette. She has joined the anti-suffragette organization, the National League for the Civic Education of Women. At a luncheon the other day she said:

"It isn't possible for women to do it, the same work as men, day in and day out, in good weather and in foul. For instance, what woman could be a postman, out in all kinds of weather, and at all hours, walking miles daily?"

TAKE IT IN TIME. Just as Scores of Marquette People Have. Waiting doesn't pay. If you neglect the aching back, Urinary troubles, diabetes, surely follow.

Don't's Kidney Pills relieve backache, cure every kidney ail. Many people in this locality recommend Don't's Kidney Pills. Here's one case: J. H. Carroll, 207 S. Jennie street, Escanaba, Mich., says: "My kidneys became disordered about two years ago and I was unable to do my work. I suffered from the secretions. I also had dull pains in the small of my back and at times felt very weak. When I heard of Don't's Kidney Pills, I made up my mind to try them, and procured a box. I steadily improved and am now entirely free from kidney complaint. I give Don't's Kidney Pills my endorsement in the hope that other kidney sufferers will be led to try them."

Ex-President Eliot of Harvard. President Eliot of Harvard recently electrified Atlanta by telling the school boys that a three-foot shelf of books read ten minutes a day, would give a man a liberal education. President Eliot still adheres to this dictum, but to thousands of inquirers he has been obliged to reply that he has not yet had time to think up the books that should occupy his wondrous shelf. "It isn't," said the vice-scholar the other day, "a difficult problem, you know. A yard of shelf and the world's best thought crowded on to that yard! Yes, it is a difficult problem."

And its solution demands a profound knowledge of literature—of the whole world's literature. I know I possess some slight literary knowledge, but I fore this self-appointed problem I fear

DEE TALKS ON THE OUTLOOK.

Member of Paine, Webber & Co. in Houghton on a Visit. The estimate of one man on future business conditions is probably as good as another's unless he is in a position to observe closely the causes which may affect these conditions.

STORY OF A PRONY CHECK.

How Sam Antilla Missed Prison and How Others Face It. Andrew Heikkinen of Calumet paid a friendly call upon August Makkinen of Calumet at the county jail Wednesday afternoon and as a result shares equally with Makkinen the hospitality of the county, this because Makkinen immediately charged Heikkinen with being an accessory to the crime with which he is himself charged.

Tangled Web of Crime.

The business in which Makkinen and Heikkinen are concerned offers one of the most tangled webs ever woven in the criminal annals of Houghton county. Some three months ago two men passed in a store in a saloon in Calumet a check or a draft such as are used in a business college for banking practice.

Railroad Electrification.

In common with many other leading men in the copper world, Mr. Dee believes that the future great outlet of copper is in the electrification of railroads. He observes that every day this is becoming more and more a necessity at the great terminals such as New York, Chicago, Boston and other large centers.

Escapes and Is Recaptured.

It was the night of the day that was celebrated as the Fourth of July that Sheriff Jackson of Keweenaw county telephoned to Sheriff Byers of Houghton county that Matt Wuolle had broken jail at Eagle River and might be headed this way. The lost was found, to an extent, Matt Wuolle, wanted in Houghton county, had been serving a sentence in Keweenaw county. This complicated matters for Matt. He was afraid to come into Houghton county, as he would encounter waiting arms.

Another Prescription. The middle-aged man who was giving himself a half-hour's walk before breakfast had taken his ten-year-old boy along. "Papa," asked the lad, "do you like such a long walk as this?"

Heeding the warning, they stepped out of the way of a huge touring car, which whizzed past them at the rate of thirty miles an hour. The man who was steering it waved his hand in greeting, and the middle-aged man responded rather stiffly.

"Why, he knows you, doesn't he, papa?" asked the boy. "Yes," "Who is he?" "Dr. Ringgold."—Youth's Companion.

S.S.S. REMOVES BLOOD HUMORS

Every pore and gland of the skin is employed in the necessary work of preserving its smooth, even texture, softening and cleansing it, and regulating the temperature of our bodies. This is done by an evaporation through which they are cooled, which goes on continually day and night. When the blood becomes infected with humors and acids a certain percentage of these impurities also pass off with the natural evaporation, and their sour, fiery nature irritates and inflames the skin, and dries up its natural oils, causing pimples, boils, pustules or some itching rash, or hard, scaly skin affection. S.S.S. the greatest of blood purifiers, expels all foreign matter and surely removes the humors from the blood. S.S.S. cools the acid-heated circulation, builds it up to its normal strength and thickness, multiplies its nutritious, red corpuscles, and enriches it in every way. Then the skin, instead of being irritated and diseased by the exuding acid matter, is nourished, soothed and softened by this cooling, healthy stream of blood. CITY TO BUILD TWO IMPORTANT WALKS

CONCRETE WILL BE LAID ON PINE STREET, SOUTH FROM THE OLIVER OFFICE, AND WEST ON DIVISION TO GRAHAM STREET.

Two concrete walks of considerable length are to be constructed by the city and paid for out of the general fund. One will extend from the Oliver Iron Mining company's office south to the intersection of South Pine with Angeline streets, a distance of about a half mile, and the other will be on the north side of West Division street, from its intersection with the Duluth, South Shore & Atlantic railway tracks, westerly to Graham street, a distance of about two blocks. The board of public works has been instructed by the council to advertise for bids for the work and to let and enter into a contract with the party submitting the lowest figures. The resolution authorizing the work to be done was voted against by Aldermen Northey, Bergstrom, Roberts and Locher.

Alderman Burke, chairman of the street and highway committee, called the council's attention to the fact that certain streets were being damaged because they were not sprinkled enough. He referred particularly to Division street, which leads to the Negaunee city line, saying that this thoroughfare will have to be given another overhauling before the close of the summer if it is not sprinkled.

MUST MAKE LATERAL SEWER CONNECTIONS

NORTH THIRD STREET, FROM EMPIRE TO PARK, AND SECOND, FROM EMPIRE TO MICHIGAN, WILL NOT BE MACADAMIZED FOR THE PRESENT.

Property owners on North Third street, who wish to see a start made on the macadamizing of the thoroughfares west from Empire to Park street, will be disappointed to learn that the work will not be started until all of the lot owners in the territory between Empire and Park streets make provision to connect their places with the lateral sewer. The property owners on Michigan, from Empire to Park street, who are also to be macadamized, will likewise be required to connect their properties with the sewer. A resolution to this effect was adopted by the council Wednesday evening.

WANT STREET IMPROVED.

Howard A. Heyn, George Thoney, John T. Nichols, John Thomas, George Wanek and Sven Johnson petitioned the council to grade and macadamize Empire street for a distance of 200 feet west of First street, thereby extending the improvement now being made on the latter thoroughfare. The petitioners asked that the council give them the same consideration and improvements already given the residents of the other part of the street, stating that they are willing to build sidewalks and make along the petition of the thoroughfare. The petition was referred to the committee on streets and alleys and the board of public works.

FRANCHISE GRANTED.

The council granted the Cleveland-Cliffs Iron company a franchise, in an ordinance that was adopted by a unanimous vote, carrying the privilege of constructing an electric transmission line within the city limits. It was explained to the council that the company is to erect a water power plant on Carp river, northeast of Negaunee, with a view to furnishing power to operate the machinery at all of its mines on the range. As the work is to be started soon an immediate passage of the ordinance was wished.

COURT HAD GOOD MONTH.

The report of the municipal court for June was presented by Alderman Cronin, chairman of the committee on police. The receipts for the month were \$220.89. This included \$75.69 received from the county for justice fees for April and May. The county received from the court \$21, collected as fines in June, leaving a credit balance of \$90.89.

RAPID RIVER COMING.

The management of the Ishpeming baseball team yesterday secured the Rapid River nine for a game to be played tomorrow afternoon at the Union Park grounds, commencing at 2:30 o'clock. This should be fully as interesting a contest as any of the league games, as the Rapid River nine is said to be a strong aggregation. It has won nearly every game it has played this year.

OBJECTS TO RESERVED SEATS.

In The Mining Journal: In yesterday's issue of The Mining Journal I noticed an item regarding reserved seats sold in some downtown stores at the rate of twenty-five cents, in order to accommodate (as I presumed) some of the prominent fans. Now, don't think in general that they are paying enough at the rate of twenty-five cents to enter the grounds, and ten cents to sit in that upholstered grand stand? Remember, we are not getting a National league brand of ball. The fans are well pleased with the article in baseball that we are getting and, I think, that the management ought to be satisfied with the way the fans of this city have supported them, and now in turn they wish to "seek" the fans in general on account of a few prominent ones. They claim they can not get away early enough from their Sunday dinner to get there in time enough for a seat. Real "live" fans will go without dinner in order to see a good ball game, but they will not give up their extra

DECISIONS UPHELD BY SUPREME COURT

FINAL DECREES HANDED DOWN IN TWO MARQUETTE CIVIL CASES OF INTEREST.

JUDGE STONE IN THE RIGHT

Opinion of Circuit Court Affirmed in Both Instances—Brief Statement of Differences.

The decisions of the Marquette county circuit court in two cases of interest have recently been affirmed by the state supreme court.

The Duntley-McCarthy case first came up in justice court in April or March a year ago.

The case came up in circuit court last September, where it was argued at length, W. S. Hill, Mr. Duntley's attorney, contending that the law permitting a city to be garnished gave the right to garnish the salary of any city officer.

The Spear-Hanson case came up in justice court last winter, and in circuit court at the February term.

Repeated attempts were made to effect a settlement, but the two parties could not get together and the case finally went to the circuit court.

OUTLOOK NOT GOOD.

"Besides, great damage is now being done by the myriads of grasshoppers that are being complained of everywhere.

BROWN AGAIN IN CITY.

Feed Water Heater Man Expects to Begin Litigation.

W. H. Brown and John W. Currie, the rival feed water heater men, are now in town at one and the same time.

Mr. Currie yesterday called on W. E. Fitch, president of the South Shore, which road is now giving a test to a feed water heater placed on one of its locomotives.

On his present trip Mr. Brown is armed with affidavits setting forth that Mr. Currie took measurements of the Brown heater on two locomotives.

Mr. Currie, in turn, has also shown his letter of patent covering his invention, which he claims that the Currie heater infringes.

OPPOSITION WITHDRAWN.

Alderman Asire Denies Having Broken Faith at Any Time.

The differences relative to the macadamizing and curbing of Ohio street have been settled, Asire & Palmer having withdrawn all opposition to the improvement of the street between Spruce and Cedar streets.

Mr. Asire denied any intention of suppressing action on the matter at the last council meeting, and stated that the request not to read the log offered was made because the bid was not properly executed.

BISHOP WILLIAMS TELLS GOOD STORY

RELATES HOW A MISSION CHURCH IN THE FAR NORTH LITERALLY "WENT TO THE DOGS."

On a South Shore train, recently, R. Rev. G. Mott Williams, bishop of the Episcopal diocese of Marquette, told the following story, says the Duluth News-Tribune.

"Some years ago I attended a meeting of Episcopal clergymen at Winnipeg, which was attended by ministers and missionaries from all over the country.

"Our church," he said, "has gone to the dogs," and there was a sorrowful silence all over the auditorium.

"Our church," he concluded, "you see, has literally gone to the dogs."

DIAMOND DRILLING BEGUN.

Harlow Mine, West of the City, to Be Re-Explored.

That the property known as the old Harlow mine, on the south side of Washington street, near E. H. Vandenberg's dairy farm, is to be re-explored is the statement made by a diamond drill man, who now has a pump in operation at the old shaft.

This property was explored again and again many years ago, but it is believed that nothing has been done in that direction since about 1873.

So far as is known, no diamond drilling has ever been done on the property, and it is believed to be the intention of the Youngs company to go down to a depth of 1000 feet, if need be, and to determine for a certainty the extent of the ore deposit on the Harlow land.

COMMUNICATED.

To The Mining Journal: Referring to the article in The Mining Journal about Birch affairs on the Fourth of July, I wish to state that I conduct the Northern Hotel and the hotel only.

On his present trip Mr. Brown is armed with affidavits setting forth that Mr. Currie took measurements of the Brown heater on two locomotives.

We wish to extend our sincere thanks to the E. L. F. and E. Lodge No. 651, of Eveleth, Minn., and the employees of the Marquette power mill, also our many friends, for their kindness to us in our bereavement in the death of Mrs. Wise, and the floral tributes sent.

NEW PENNIES TO BE SENT OUT NEXT WEEK

INDIAN HEAD DESIGN WILL BE SUPPLANTED BY LIKENESS OF ABRAHAM LINCOLN.

Local bankers are preparing to take care of the Lincoln pennies next week, when they will be issued from the mint to all parts of the country.

At any rate the new penny will bear the likeness of Abraham Lincoln on the side now occupied by the profile of the young woman.

That time limit has expired for the old penny, hence the new design. The next coin to be tackled is to be the nickel, the design of which is now more than twenty-five years old.

It is reported from the mint that the twenty dollar gold piece of the famous Roosevelt design is selling at a high premium.

The accident to the Canadian locks at the Soo, when the steamer Perry, U. S. Walker bumped into the lower gates, causing sad havoc to the shipping interests for several days, was not caused by a mistake in signals, as was reported at the time of the accident.

This is according to a statement made by Supervising Inspector Westcott, of Detroit, and is the first public utterance of the inspection officials since the accident.

"The accident at the Soo was not due to mistaken signals, as many have claimed. The chief engineer, in leaving the engine room, turned off the steam for the reversing gear.

"Every time an accident occurs on the lakes, the Engineers' association, engaged in a controversy with the Lake Carriers' association, charges that it was due to incompetency. This is an injustice to the inspection service.

"In the case of the accident at the Canadian Soo, the engineers on the steamer, were both in the employ of the line for some years, and yet the Engineers' association charged them with incompetency."

Discussing the strike situation recently, an officer of the Marine Engineers' Beneficial association said he would not venture an assertion as to the outcome of the present strike on the lakes, but he believes that which ever way it terminates the good men will get their jobs back.
