PRICE FIVE CENTS.

PRESIDENT IS VICTOR IN TARIFF BATTLE

Sending an Ultimatum to the Conference Chamber, He Forces an Agreement in Accordance With His Views of Downward Revision.

THREATENED SERIOUS DEADLOCK AVERTED.

Yielding to a Mandate from the White House, the Republican Members of the Joint Committee Re-vise Their Rates on Gloves, Hosiery, Leather and Lumber—Completed Now, and Formally Signed by the Majority, the Measure Will Be Voted on by the House Tomorrow and Will Be Considered by the Senate Next Week.

Washington, July 29.—The Payne-Aldrich tariff bill tonight stands completed. An agreement on all the disputed points was reached this afternoon, and at 4:55 o'clock the conference report was signed by the Republican conferees. It will go to the house tomorrow and will be voted on by that body Saturday. The senate will begin the consideration of the measure Monday.

Halted by the mandate of President Taft, the tariff conferees were compelled to turn back and revise their rates on lumber and gloves. In a communication to Senator Aldrich and Mr. Payne the president demanded that the high rates on gloves as fixed by the house and the high rates on lumber as fixed by the senate should not be made part of the conference report.

After struggling over these questions throughout the entire day, the conferees surrendered to the president's view and signed the report through the house in one legislative day. Probably a week will be required to dispose of the report in the senate.

President's Letter a Vigorous Missive.

When the conferees fixed the rates on lumber and gloves yesterday by shading very slightly the higher rates on each, they were so certain that the president would consent to the arrangement that notices were sent to Democratic members of the conference committee to be present at 10 o'clock today to approve or disapprove the conference report. The president had other ideas of what the rates should be, however, and he expressed them very frankly in his letter. He said that lumber should not be more than \$125 a thousand for rough, with the differentials fixed by the senate on finished lumber. He declared also that the senate rates on gloves, which are the same as the Dingley rates and much less than the house rates, would have to be adopted in order to obtain his endorsement.

Not content with issuing an injunction against the high rates on these articles, the president specified that hides must go on the free list and the house rates on manufacturers of leather must be reduced. Hosiery, too, he thought, should be reduced below the house rates, which were advances over the Dingley duties.

Democrats Are Excluded Again.

It was not until after the Democratic members had assembled that the White House communication was received at the conference chamber. Senator Aldrich read the president's missive and called his Republican associates into the adjoining room. The contents of the letter were discussed at some length, and it was decided that the minority should be informed that the conference report had not been advanced to a state where it could be submitted to them for their judgment. The Democrats withdrew, but afterwards held a conference of their own. The Republicans were criticized, but Senator Bailey came to their defense by calling attention to the fact that if the Democrats were in power and were charged with the responsibility of making the tariff bill they would not want the Republicans to help them. The minority was further mollified by Champ Clark being called back to the chamber. Mr. Clark was given a copy of the bill as the conferees intended to report it, except for the schedule enclosed by the president in his letter. The Democrats then went into session.

Free Bagging Is Asked and Denied.

The minority were in the conference chamber less than an hour. At the outset, Mr. Griggs, speaking for his associates, said that they were not disposed to delay the proceedings. He suggested that if the Republicans would consent to put cotton bagging on the free list, they would show the utmost celerity in bringing the conference report to a vote. Many of the conferees were disposed to grant this request, but Mr. McCall, of Massachusetts, protested vigorously, on the ground that it would injure the manufactory in his state which turns out cotton bagging. So emphatic were his objections that it was seen the agreement would be delayed if such action were attempted.

The Republican members continued in session after the Democrats left the chamber. Late in the day Messrs. Fordney and Calderhead went to the White House, then to Speaker Cannon's office and back to the conference chamber, and afterwards they conferred with a number of Northwestern senators who were interested in the lumber question. Later Speaker Cannon entered the conference room. Mr. Cannon had been one of the chief supporters of the house rates on gloves. When the speaker concluded his visit, he hurried down the corridor without stopping. The speaker wore the unmistakable air of a man who had capitulated to superior force.

There was no opportunity to compro-

mise on gloves. The president said that the rates must not be advanced beyond the figures named in the senate bill. This resulted in the re-adoption of the Dingley schedule, except for the fact that schusschen gloves were reduced from \$17.75 to \$12.50 a dozen pairs.

On lumber, some concessions were made in spite of the fact that the president's instructions were complied with to the letter. Rough lumber was made dutiable at \$1.25 a thousand feet; finished on one side, \$1.75; two sides or one side planed and tongued and grooved, \$2.15; three sides, \$2.52½; four sides, \$2.90.

To conciliate Senators Piles and Jones, the conferees adopted the senate rate of fifty cents a thousand on shingles, instead of the house rate of thirty cents. In order to obtain the support of Senator Heyburn, the industries of whose state had been assailed through the reduction of the duty on hides, the reduction in the duty on lumber and the reduction in the differential on pig lead in bars, the latter schedule was reconsidered and the rate of 2½ cents a pound on pig lead in bars was restored.

Tallow Is Made Dutiable.

In view of the action in putting hides on the free list, a concession was made to the cattle industry today by taking tallow off the free list and making it dutiable at 1½ cents a pound.

The rates on hosiery were increased about 20 per cent in the grades valued at \$1, \$1.50 and \$2 a dozen pairs. This is an increase over the existing rates, but a material decrease from the advances made by the house. On all other values of hosiery the Dingley rates, which had been re-enacted by the senate, were retained. This action, the conferees believe, was in conformity with the spirit of the president's request.

The minority members of the conference were in session most of the afternoon. The committee made by their tariff experts, they say, show that the new bill provides for an increase of 1 to 3 per cent over the advances of the Dingley law. It is understood that in reaching this calculation the experts did not take into consideration the transfers of articles from the dutiable to the free list, which the Republican conferees said would reduce the average advances considerably below those of the existing law.

MR. BRYAN A FIXTURE THERE.

Democratic Leader Denies Rumor He Is Going to Leave Nebraska.

Chicago, July 29.—William Jennings Bryan arrived here today from Bellefontaine, Ohio, and immediately and emphatically denied the rumor that he is going to leave Nebraska and make his permanent home in Texas. He says that he may make his winter home in Texas, "I am a fixture in Nebraska," he said.

LIQUOR THE ISSUE IN VIRGINIA.

Republicans Go Squarely on Record as Favoring Local Option.

Richmond, Va., July 29.—Pleading themselves squarely on record as favoring local option, with counties and cities as a unit, the Virginia Republicans, in convention at Newport News today, accepted the liquor situation on the issue in the gubernatorial campaign. William P. Kent, present American consul general to Guatemala, was nominated for governor.

Newport News, Va., July 29.—William P. Kent was nominated by acclamation for governor of Virginia by the Republican convention here today. The prohibitionists gained a decided victory when they secured the adoption of an amendment to the liquor plank providing for the application of the mit rule in counties and cities on all elections on the liquor question.

Y. M. C. A. DELEGATES ENTHUSED

World's Conference Hears a Rosetate Report of the Progress in America.

Barmen-Elsfeld, Germany, July 29.—The world's conference of Young Men's Christian associations today "was devoted to reports from all nations. The president of the United States evoked the greatest enthusiasm. This report showed 1,939 organizations, 446,000 members and \$50,000,000 of Y. M. C. A. property in the country. The figures for the entire world were 7,825 organizations, 821,000 members and \$60,000,000 in property.

HAY DEALERS CHOOSE OFFICERS.

Sandusky, O., July 29.—The National Hay Dealers' associations today elected H. W. Robinson, of Green Springs, O., president; Smith Young, of Lansing, Mich., vice president; and J. W. Taylor, of Winchester, Ind., secretary.

MARITAL QUARREL HAS BLOODY CLIMAX

Charles Beasley of Hannibal, Mo., Kills His Wife, Baby and Himself—Bellevue, Ky., the Scene of a Double Tragedy When a Woman Murders a Man and Puts an End to Her Own Existence.

Hannibal, Mo., July 29.—A triple tragedy occurred here today when Charles Beasley shot and killed his baby, fatally wounded his wife and committed suicide. The first shot was directed against the baby. Mrs. Beasley fled, but her husband caught and forced her to return to the house. She slipped away the second time, and he fired at her as she ran. Then he stretched himself on the floor beside the dead child and killed himself. The shooting followed a quarrel between the husband and his wife.

Cincinnati, July 29.—Mrs. John Mul-larkey shot and killed Edward Axline in Bellevue, Ky., tonight. After shooting Axline the woman took carbolic acid and died after being removed to a hospital. The cause of the tragedy is unknown.

DROWNS WHILE SWIMMING.

James Doyle, Kalamazoo Banker, Meets Death in Klinger Lake.

Kalamazoo, Mich., July 29.—James Doyle, aged fifty-two, a prominent banker and capitalist of this city, was drowned in Klinger lake this afternoon, while swimming.

Three Die in Wisconsin River.

Merill, Wis., July 29.—Three men—Arthur Euland, John Ament and Henry Zebot-ski—who were raising sunken logs on the Wisconsin river were drowned near this place this afternoon.

MACHINE TURNS TURFLE.

Mrs. Parker Kerr of Chicago Is Killed in an Automobile Accident.

Chicago, July 29.—Mrs. Parker Winfield Kerr, of this city, wife of a salesman, was killed tonight in an automobile accident near Libertyville, Ill. W. S. Mills, who was driving the machine, was seriously injured. While turning a corner, the machine skidded and turned turtle.

ONLY ONCE DOES HARRY THAW LOSE HIS TEMPER

For Ten Hours He Undergoes District Attorney Jerome's Inquisition, Yet at All Times He Holds His Own and Today He Will Be in the Hands of Friends.

White Plains, N. Y., July 29.—District Attorney Jerome finished his inquisition of Harry K. Thaw in the supreme court here this evening. All told, yesterday and today, Thaw faced Jerome's lightning thrusts for ten hours; he exhibited his own at all times and tomorrow he will be in the hands of friends. Thaw's attorney expects to call him in the morning.

Thaw and his counsel are well satisfied with the day's work. Thaw showed even more composure than he exhibited during the first encounter; in fact, his self-satisfaction at one time almost cost him dear, this when he ventured into a heated passage at arms with the district attorney. But he checked himself when he realized that he had nothing to gain and everything to lose by a show of temper. Except for this squall, the exchange of questions and answers, with here and there an occasional sally of wit, progressed smoothly until adjournment.

HARRY C. PULLIAM IS DEAD.

Self-Inflicted Bullet Wound Proves Fatal to Prominent Baseball Man.

New York, July 29.—Harry C. Pulliam, president of the National League of Professional Baseball Clubs, died at 8:10 o'clock today, after shooting himself through the head last night. The bullet passed entirely through the head, severing both optic nerves and causing instant blindness. Mr. Pulliam became unconscious soon after the shooting was discovered and was unable to make any statement as to his reason for committing suicide, but it is generally attributed to ill health.

John A. Heydler, secretary and treasurer of the National league, will arrive in New York and assume charge of the business affairs of the league tomorrow. A telegram notifying Mr. Heydler of the tragic death of President Pulliam reached him near Montreal. Mr. Heydler will make arrangements for the election of the successor to President Pulliam. The belief seems to be general that Mr. Heydler will be chosen.

CARS COVER 200 MILES.

Glidden Automobile Tourists Have a Good Day's Run in Kansas.

Salina, Kas., July 29.—The pathfinder car in the Glidden tour arrived here this afternoon, having made the distance from Oakley, the last checking point, in eight and one-half hours. The contestants were not far behind. At 7:30 o'clock, eighteen cars had checked in. None reported any accidents during the day. Ten hours was the time scheduled for the tour between Oakley and Salina, 200 miles. The leading car, however, covered the distance in eight and one-half hours.

MORE TRUE BILLS VOTED.

Grand Jury at Chicago Indicts Twenty Keepers of Detention Resorts.

Chicago, July 29.—The grand jury, which already had indicted a police inspector, a detective sergeant and other persons in furtherance of State's Attorney Wayman's attack on the West side "tenderloin" today returned indictments against twenty keepers of alleged illegal establishments.

GEN. WORTHINGTON IS DEAD.

Washington, July 29.—General Henry C. Worthington, formerly a member of the California legislature, delegate in congress from Nevada, diplomat and jurist, is dead, aged eighty-one.

THE WEATHER.

Washington, July 29.—The following is the weather bureau's forecast for Upper Michigan: Fair, Friday and Saturday; light west winds, becoming variable.

YESTERDAY'S GAMES.

National League.
St. Louis, July 29.—Brown pitched great ball when under pressure, while Beebe was wild.
Score: R. H. E.
St. Louis 10 0 0 0 1 100—3 10 2
Chicago 3 0 2 0 0 1 100—6 8 1
Batteries—Beebe and Phelps; Brown and Archer.

Pittsburg, July 29.—Miller knocked the ball over the left field fence, the first time this has been done on Forbes field.
Score: R. H. E.
Pittsburg 0 0 0 1 0 0 3 0 0—4 9 2
Philadelphia 0 0 0 1 0 0 0 0—3 7 0
Batteries—Phillips, Brandon, Leever and Gibson; Moren, McQuinn and Deon.

American League.
New York, July 29.—Willett was knocked off the rubber in three innings, and Works, who succeeded him, was ineffective.
Score: R. H. E.
New York 2 0 3 4 1 1 0 0 0—11 10 2
Detroit 0 0 0 0 0 1 0 1—2 6 3
Batteries—Doyle and Sweeney; Willett, Works, Schmidt and Beckendorf.

Philadelphia, July 29.—Cleveland was defeated in both games of a double-header today.
Score: R. H. E.
Philadelphia 0 0 0 1 0 0 1 0 0—2 8 0
Cleveland 0 0 0 0 0 0 0 0 1—1 7 0
Batteries—Morgan and Thomas; Berger, Sinton and Bemis.
Second game: R. H. E.
Philadelphia 1 1 0 3 2 2 0 0 0—4 14 2
Cleveland 1 0 0 1 0 0 0 0 2—4 6 2
Batteries—Coombs and Thomas; Rhoades and Easterly.

Boston, July 29.—St. Louis scored a victory over Boston in a poorly played game.
Score: R. H. E.
St. Louis 0 0 0 0 1 1 1 0 0—3 7 1
Boston 2 1 2 0 0 0 0 1 0—6 11 4
Batteries—Wolter, Karger and Donohue; Bailey and Criger.

Washington, July 29.—Johnson's pitching was the feature in the first game, while a timely triple by White, scoring two runs, was the feature of the second.
Score: R. H. E.
Washington 0 0 1 0 1 0 0 0 1—3 10 2
Chicago 0 1 0 0 0 0 1 0—2 6 3
Batteries—Johnson and Street; Burns and Owens.

BOY'S BODY TURNS TO STONE.

Trenton, N. J., July 28.—The body of Jesse Mayes, a ten-year-old colored boy, is gradually turning to stone in an mortuary at St. Francis' hospital, where it is being kept until it can be sent to the boy's home, at Knoxville. The boy became ill during a visit here two months ago with a party of juvenile singers from the Anderson colored reform school of Knoxville. He was taken to the hospital and died there in a few days. The body was embalmed and word was received from the South that it should be kept here until sent for. Two weeks ago it was noticed that the body was becoming hard. A number of physicians who have examined the body say that it is a genuine case of petrification.

STORM BRINGS RELIEF TO SWELTERING CHICAGO

It Causes Two Fatalities, However, and Occasions Thousands of Dollars' Worth of Damage to Buildings in the City—Heat Victims Number Three, and There Are Many Prostrations.

Chicago, July 29.—A two days spell of torrid weather in this city was broken this afternoon by an electrical storm which brought temporary relief. Several deaths resulted either from the storm or from the great heat. Thousands of dollars' worth of damage was done to buildings in the city. A maximum temperature of ninety-two was reached. This swung down to seventy-seven at 2 o'clock in the afternoon, and back again to eighty-four by six. The wind reached a velocity of forty-two miles an hour during the storm.

Carl Hanson, a truck farmer, and Thomas Turner, a driver, were struck by lightning and killed. Thomas Malone, a butcher, fell dead on the sidewalk, and Joseph Belmont, of Winnetka, was prostrated by the heat while fishing from Kentworth pier. He rolled from the pier into the lake and was drowned. There were more than twenty prostrations, and several victims may die. Eliza C. Ware, widely known among real estate men, was found dead in his office here tonight. His death was a direct result of the great heat of the last two days.

Torrid Weather in Iowa.

Des Moines, Ia., July 29.—Today was the hottest day of the year. The government thermometer registered ninety-six and street thermometers 100. There were three prostrations.

Dubuque, Ia., July 29.—The temperature was 96.2 degrees here today, the hottest since 1901. The humidity has been very high for the last three days, but the cases of prostration have been few.

MME. NORDICA WEDS AGAIN.

Opera Singer the Bride of G. W. Young, a New York Banker.

London, July 29.—Mme. Lillian Nordica, the American opera singer, was married here today to George W. Young, a New York banker.

**HIGH HONOR FALLS TO
A CHICAGO WOMAN**

Mrs. Ella Young, a Teacher Since 1862, Is Chosen by the Newly Organized Board of Education as Superintendent of the City's Great School System.

Chicago, July 29.—The superintendent of Chicago's great school system has fallen into the hands of a woman for the first time in its history. Mrs. Ella Young, principal of the Chicago Normal school since 1905 and an educator of national reputation, was chosen tonight by the newly organized board of education to head the public schools. John D. Shoop, supervisor of the vacation schools, was named as assistant to the superintendent. Mrs. Young is sixty-four years old and has been engaged in teaching since 1862. She was district superintendent of schools for Chicago from 1887 to 1889, and professor of education at the University of Chicago from 1890 to 1905. She is the author of several books on educational subjects.

SEMI-FINALS TAKE PLACE TODAY.

Western Golf Championship Is Narrowed Down to Four Contenders.

Homewood Country Club, Flossmoor, Ill., July 29.—Kenneth P. Edwards, of Midlothian; Albert Seckel, of Riverside; Charles Evans, Jr., of Exmoor; and Patrick Hunter, of Midlothian, won their matches in the third round of the Western amateur golf championship tournament here today, and will meet in the semi-finals tomorrow. The summaries follow: Kenneth P. Edwards, Midlothian, defeated Robert A. Gardner, Hinsdale, 6 up, 5 to play; Albert Seckel, Riverside, defeated D. E. Sawyer, Wheaton, 4 up, 3 to play; Charles Evans, Jr., Exmoor, defeated Leo Maxwell, Hinsdale, 3 up, 2 to play; Paul Hunter, Midlothian, defeated Ralph Hoagland, Riverside, 3 up, 1 to play.

Tennis Champions Defeated.

Chicago, July 29.—The semi-finals in the men's singles and doubles were completed today in the Western championship tennis tournament. The most interesting feature today was the victory in the doubles of E. A. Holden, Jr., and Frax Emerson, both of Cincinnati, over Nat Emerson and L. Harry Waldner, of Chicago, the Western champions. The score was 6-4, 6-7, 7-5 and 7-6.

**VICTIMS OF ALLEGED FAKE SPORTING EVENTS
Seek Recovery of Money.**

Liban, Portugal, July 29.—Refugees who have arrived here from Barcelona say that that city is in a state of complete anarchy, the population being in open rebellion against the government's repression. They report that terrorists are using dynamite bombs freely, causing great destruction of property and loss of life. Most violent scenes occurred at meetings called to protest against the war in Morocco, and thousands of armed men, fortified behind heavy barricades, resisted the attacks of the troops in pitched battles. During the first few days of the fighting, the refugees declare, more than one hundred persons were killed and several hundred were wounded. All reports received here indicate that the hostile feeling against the Moroccan war is spreading throughout Spain.

WIND IS FOUND TOO BRISK.

Long Distance Flight of the Wright Aeroplane Is Postponed Again.

Washington, July 29.—The Wright aeroplane was taken out of its shed and wheeled across the field at 6:15 o'clock this evening. Scarcely any wind was perceptible, and the conditions seemed favorable for the proposed long distance and speed test, but at 7:19 o'clock reports of a heavy wind at Alexandria caused the abandonment of the flight.

SPANISH ARMY SUFFERS A DISASTROUS DEFEAT

With the Moorish Hordes Pressing the Fighting to the Very Walls of the City, Alfonso's Troops at Melilla Are in Desperate Straits.

THEIR LOSSES ARE ESTIMATED AT 3,000.

Meanwhile the Situation at Home Continues Decidedly Grave—Barcelona Is a Battleground in Which the Gutters Run With Blood, and Rioting and Incendiarism Are Rampant in Other Portions of the Catalan Region—That a Military Dictatorship Will Be Established Is a Persistent Rumor in Circulation at Madrid.

Madrid, July 29.—Official dispatches received here today admit that the battle between the Moors and the Spanish forces outside of Melilla July 27 was a disastrous defeat. The Moors cut off communication with the Spanish outposts and the main force of Spaniards was driven back to positions under the walls of the city, where fighting of desperate character continued. The Spanish killed and wounded numbered three thousand. Melilla is full of wounded men.

Spainards at Alhucemas Exhausted.

Melilla, July 29.—The battleship Numancia has been hastily despatched to Alhucemas, around which tribesmen are concentrating for an attack. The Moors outside this place have been reinforced by five thousand men. The Spanish forces, which have been fighting desperately, are well nigh exhausted but are hoping that aid soon will reach them.

The battle Tuesday was a shambles, and as a result the Moors abandoned their positions on the Spanish right flank and retreated to the other side of Mount Guruga. The greatest heroism was shown by the officers, who led the troops up the hillside. They were the first to fall from the Moorish bullets. General Pintos was slain at the moment he attained the summit, and a lieutenant colonel fell, pierced by a bullet, while in the act of offering his water gourd to a dying soldier. The Spanish dead were buried in the mining excavations leading to Mount Guruga.

Barcelona Gutters Run With Blood.

Paris, July 29.—Special despatches today say that the fighting yesterday in Barcelona was more sanguinary than previous despatches have indicated. Machine guns and grape were used against the rioters. Sidewalks and buildings were spattered with the blood of victims. Everywhere women and children are wandering in search of husbands and fathers. Incendiarism is rampant.

French Ships Going to Melilla.

Paris, July 29.—The French government has decided to despatch a cruiser and a chartered French line steamer to Melilla, to take off the French residents in case of danger.

Portugal Not to Take a Hand.

Lisbon, July 29.—Official denial is given to the statement that Portugal will send troops to the frontier if disorders occur in the neighboring Spanish province.

STOCK MARKET CLOSES STRONG.

Some Good Gains Are Scored—Usual Leaders Are Dormant, However.

New York, July 29.—Unusually active speculative stocks fell into neglect in the Wall street market today, but the diversion of the interest to less prominent quarters of the list rectified the dull appearance of the market and supplied points of strength that gave tone to the whole.

The news from Washington up to the time the market closed was regarded as offering ominous possibilities of a deadlock in the final stages of the tariff settlement which might negate the results of all the labor of recent months and leave the business of the country in a state of renewed uncertainty over the future. This fear, however, was proved to be unwarranted by later events. The decidedly firmer tone in the time money market was another dissuasive influence on speculative activity. Preliminary symptoms of the seasonal demand from the crop-moving regions are appearing in the banking world, and the possible consequences to speculative borrowers are beginning to be taken into account. Some Western banks are withdrawing loans placed on call in this center during the idle period of the home demands for funds.

The grain crop advices today were considered favorable. In railroad stocks, the managers were neglected, and the added to the almost unmovable course of Union Pacific and United States Steel compared with their recent aggressive leadership, was largely responsible for the lethargic appearance of the market.

New York Central continued to reflect the influence of the supposed growth of the Harriman influence and this, with a good advance in Southern Pacific, Reading and a number of less conspicuous specialties, was sufficient to keep up the tone of the whole market. The high prices at the end of the day were made in the period of the market's greatest activity, giving a very strong tone to the closing.

Troops Gave the Upper Hand.

Madrid, July 29.—It was officially announced tonight that the cavalry at Barcelona succeeded today in driving in to St. Martin's square the principal bands of revolutionists, against whom the artillery opened fire, causing great losses. The survivors surrendered. The Moors were neglected, and the added to the almost unmovable course of Union Pacific and United States Steel compared with their recent aggressive leadership, was largely responsible for the lethargic appearance of the market.

As soon as the revolutionists were

collected in St. Martin's square, the artillery opened fire, mowing down those who sought to escape, but who were met at every point with shot and shell. Those of the insurgents not killed or seriously wounded had down their arms and surrendered. The insurrection continues in the neighboring villages, whither troops are proceeding. The commanders of the soldiers are under orders to spare none who attempt to resist.

The governor of Barcelona today published a decree ordering the inhabitants of the city to return to their homes. After twenty-four hours, it was warned, anyone found in the streets would be liable to be shot on sight.

A Resume of the Situation.

Madrid, July 29.—Spain tonight is rent by two years—the fate of the army in Morocco and the situation in Catalonia. At the outskirts of Melilla the Spanish have suffered a serious check. Three thousand soldiers have either been slain or wounded, and the Moorish hordes are fighting at the very walls of the city.

The news from Barcelona, the center of the revolutionary outbreaks, is meagre and unsatisfactory. From Lisbon comes a report that the revolutionists are using bombs, and that one hundred persons were killed and two hundred were wounded during the earlier stages of the conflicts. Premier Maura's announcement that the situation in Barcelona showed a little improvement, and word from Melilla that the Moors were retreating from Mount Guruga, only slightly appeased the general uneasiness. The official judgment that 75,000 Spanish troops are needed to overcome the tribesmen would indicate that the Melilla army of Spain is in sore straits.

Insurrectionary outbreaks are reported from many points in Spain. The revolutionists are active at Llanos and Figueras, where the railroads have been dynamited. The financial institutions are sending their funds across the frontier. A report that a provisional government has been established at Barcelona, and that the government has been assassinated, is unconfirmed. Rumors are persistent that Premier Maura will resign, and that a military dictatorship will be set up in Madrid.

French Ships Going to Melilla.

Paris, July 29.—The French government has decided to despatch a cruiser and a chartered French line steamer to Melilla, to take off the French residents in case of danger.

Portugal Not to Take a Hand.

Lisbon, July 29.—Official denial is given to the statement that Portugal will send troops to the frontier if disorders occur in the neighboring Spanish province.

STOCK MARKET CLOSES STRONG.

Some Good Gains Are Scored—Usual Leaders Are Dormant, However.

New York, July 29.—Unusually active speculative stocks fell into neglect in the Wall street market today, but the diversion of the interest to less prominent quarters of the list rectified the dull appearance of the market and supplied points of strength that gave tone to the whole.

The news from Washington up to the time the market closed was regarded as offering ominous possibilities of a deadlock in the final stages of the tariff settlement which might negate the results of all the labor of recent months and leave the business of the country in a state of renewed uncertainty over the future. This fear, however, was proved to be unwarranted by later events. The decidedly firmer tone in the time money market was another dissuasive influence on speculative activity. Preliminary symptoms of the seasonal demand from the crop-moving regions are appearing in the banking world, and the possible consequences to speculative borrowers are beginning to be taken into account. Some Western banks are withdrawing loans placed on call in this center during the idle period of the home demands for funds.

The grain crop advices today were considered favorable. In railroad stocks, the managers were neglected, and the added to the almost unmovable course of Union Pacific and United States Steel compared with their recent aggressive leadership, was largely responsible for the lethargic appearance of the market.

New York Central continued to reflect the influence of the supposed growth of the Harriman influence and this, with a good advance in Southern Pacific, Reading and a number of less conspicuous specialties, was sufficient to keep up the tone of the whole market. The high prices at the end of the day were made in the period of the market's greatest activity, giving a very strong tone to the closing.

Troops Gave the Upper Hand.

Madrid, July 29.—It was officially announced tonight that the cavalry at Barcelona succeeded today in driving in to St. Martin's square the principal bands of revolutionists, against whom the artillery opened fire, causing great losses. The survivors surrendered. The Moors were neglected, and the added to the almost unmovable course of Union Pacific and United States Steel compared with their recent aggressive leadership, was largely responsible for the lethargic appearance of the market.

As soon as the revolutionists were

DAILY MINING JOURNAL

Per year, by mail, \$5.00

MARQUETTE, MICH., JULY 30.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

Spain is reported to be rebuilding her navy. The week's press reports convey the impression that it is her army that is principally in need of attention.

Menominee may have the first county agricultural school in the upper peninsula, but Marquette will beat it out on the county tuberculosis hospital proposition.

In considering the pending session of congress, and the occasional outbreaks of hostilities, it should be recalled that Washington was never intended to be a summer resort.

With the tariff rate on rough lumber at \$140 a thousand we should say that Representative Fordney had been fairly successful as a member of the conference committee.

The Chautauqua circuits may want Senator Aldrich, but it is a safe prediction that the senator will have no truck with them. He has an easier way of making his money.

His dismissal by the judge didn't entirely serve to placate Senator Stone. He has harrowing recollections of his ride through the streets of Baltimore in the official jag wagon.

There will be no quarrel with the supervisors for finally dispensing with the services of a county game warden. Take it all in all, it has been a more ornamental than useful office, a characteristic which it has shared to some extent with the office of state deputy.

If the board of supervisors finds any means of stopping speeding on the county road it should not delay an unnecessary minute about turning the secret over to the police officers in the cities of the county, where the problem of keeping the automobile drivers within reasonable bounds is still an unsolved one.

Justice Montgomery has made formal statement that he remains a candidate for governor, in refutation of a story to the effect that he had withdrawn from the race. He did learn from the original story here in the upper peninsula. Anyway we considered the justice's first announcement that he would be a candidate as conclusive.

The man who a short time ago said that the Hon. James Jeffries would never be found inside the ring with the Hon. Jack Johnson evidently spoke unadvisedly, for here comes the Hon. James and posts a forfeit of \$5,000 to meet the negro fighter. The Hon. Jack says he is willing to make the match, so the preliminaries can be proceeded with at once. And when the date is fixed the sporting world will have something definite, and of large interest, to look forward to.

J. W. Wells, of Menominee, one of the best known men in the southern part of the upper peninsula, has this week closed a deal by which he has transferred his extensive interests in the L. Stephenson company, the Lake Superior & Escanaba railway, the Mashek Iron & Chemical company and the Ford River company to H. A. J. Upham of Milwaukee. The consideration is said to have been \$750,000. The deal is one of the largest that has occurred in the upper peninsula in many months.

We note in some papers a disposition to belittle Orville Wright's achievement as an aviator to glorify M. Bleriot's channel-crossing feat. The latter was spectacular, to be sure, but was much the less significant of the two. As a matter of fact, there was little personal danger involved in M. Bleriot's trip from Calais to Dover. He was closely followed by speeding torpedo boats, with crews alert to pick him up any time he might be thrown into the water. His accomplishment was a noteworthy one, and deserves all the attention it has attracted, but, we repeat, it was much less significant than Orville Wright's achievement at Fort Meyer. The Americans still have the most glowing record of accomplishment to point to in twentieth century aviation.

The coming fall the Hudson-Eaton centennial will remind the civilized world that only a hundred years ago the steamer Clermont, plowing up the Hudson from New York to Albany, first con-

vinced the world of the commercial possibilities of the navigation of the earth's waters by means of steam. From the day of the first trip of the Clermont the development of marine navigation has been one of constant progress, with wonder-making achievement piled on wonder-making achievement. The year 1909 finds pioneer aviators doing wonderful things in the navigation of the thin air. Will the twentieth century witness the development of aerial navigation to anything like the extent that the past century has shown in marine navigation? This query opens up an interesting field for conjecture.

The board of supervisors have done well to take up the question of automobile speeding on the county road between Negaunee and Marquette. Some of the recent trips of which the drivers have boasted have made the legal maximum speed appear as slow as hand car locomotion. There are two principal reasons why the drivers should, if it is possible, be required to keep within reasonable limits. They are many dangerous places on the road and excessive speeds will sooner or later mean a serious accident. Then, again, the roadway built by the county at a large expense is deteriorating rapidly, largely because of the fast driving of automobiles. The damaging effect of automobile driving on macadam roads increases in ratio to the speed maintained. If the supervisors can do anything to reduce the average of speed on this highway it will do an excellent thing, but the task will be a difficult one. It is hard to keep track of what the automobiles are doing outside the limits of the towns, and experience has shown that no amount of threatening or warning avails much to pound sense into the speed merchants.

Inspector McCann, of the Chicago police force, relieved from duty pending his trial on ten or more graft indictments, is either a wholly vicious or a most abused man. One view shows him as a systematic booper, exacting heavy tribute from resort keepers and low scoundrels, for winking at violations of the law. Another picture him as a zealous official whose rule has borne so heavily on the denizens of the underworld in his district that they have framed up an elaborate conspiracy to discredit him and secure his removal, that he may be replaced by a more pliant and corruptible man. There is no lack of testimony to bear out this latter theory. Dive keepers and women assert that they were approached and bullied in an attempt to make them testify falsely against McCann. If the accused has been the model officer he is credited with having been by some, and if he is the prospective victim of a vice ring, there should be no difficulty about proving as much in open court, and about securing his complete vindication. In any event it is to be regretted that the trial cannot be held at once, instead of being postponed until late in the fall.

In a signed interview Secretary of Agriculture Wilson records his agreement with two prominent financiers who have lately commented on agricultural subjects. He agrees with Mr. Gates that the country can support a vastly larger population than it now has, but says it can only be done with improved and more scientific methods of farming. He also is of one mind with Mr. Hill in the latter's statement that the bill is not producing foodstuffs in proportion to its increase in population, and he says that the root of the trouble lies in the fact that the cities have been increasing in population at the expense of the country, with the result that the farms have not produced as abundantly as they would have had more people remained in the country to work them. The secretary laments this movement, and is apprehensive about its consequences. He is not, however, able to suggest any means by which it can be stayed, and apparently leaves to his readers the conclusion that it will continue until the enhanced prices of farm products constitute a lure back to the farms that will outweigh the lure of the cities that has been drawing so many farmers away from the soil.

A PROGRESSIVE COUNTY.
Marquette county is the first county in the upper peninsula, if not in the state, to take measures to fight the tuberculosis plague. The appropriation of \$15,000 for the erection of a tuberculosis hospital, and the plans which have been outlined therefor, are the fruit of an extended effort by Marquette physicians to bring about some action along this line. The first form the project took was the proposal to provide an upper peninsula hospital, to be built and maintained by the co-operation of several of the counties. The legal obstacle in the way of this plan was removed by a clause in the new constitution, but it has proved impossible to get a sufficient number of counties interested to warrant the carrying out of the co-operative plan. Therefore Marquette county has decided to move independently.

The proposed location of the hospital is a site near the county poor farm, where it is proposed to erect a modern building that will accommodate some twenty patients. The structure will be built on lines that will apply the best modern practice in sanitarium treatment of tubercular patients, and, it goes without saying, will be maintained in an adequate manner. Excellent professional skill will be available for the direction of its work, and there will be good nursing.

The board of supervisors have done well to take up the question of automobile speeding on the county road between Negaunee and Marquette. Some of the recent trips of which the drivers have boasted have made the legal maximum speed appear as slow as hand car locomotion. There are two principal reasons why the drivers should, if it is possible, be required to keep within reasonable limits. They are many dangerous places on the road and excessive speeds will sooner or later mean a serious accident. Then, again, the roadway built by the county at a large expense is deteriorating rapidly, largely because of the fast driving of automobiles. The damaging effect of automobile driving on macadam roads increases in ratio to the speed maintained. If the supervisors can do anything to reduce the average of speed on this highway it will do an excellent thing, but the task will be a difficult one. It is hard to keep track of what the automobiles are doing outside the limits of the towns, and experience has shown that no amount of threatening or warning avails much to pound sense into the speed merchants.

carefully looked after than the person in poor circumstances suffering from tuberculosis, and the only way to properly look after such a person is in a hospital planned for the isolation of these patients.

Tuberculosis is almost in a class by itself among diseases, because it is an acute infection. The public health demands that insofar as is possible advanced cases shall be isolated, and that incipient cases shall be checked, so that they cannot become a menace. Poor patients cannot be well placed on a county farm, where there is no adequate provision for isolation, for to do so would endanger the health of other inmates. Neither can they be refused care. The only satisfactory alternative is to provide institutions where they can be received and looked after.

In time all counties will have to follow the example of Marquette, for those that do not do so will be regarded as lacking in humanitarian instincts. The counties will have to build hospitals, either co-operatively or independently. The task of caring for tubercular patients who need assistance will prove to be a heavy one for the state. As the campaign of education against tuberculosis gains more and more ground, the necessity of caring not only for advanced sufferers, but of curing incipient cases will be generally recognized, and the sentiment that will lead to the general duplication of Marquette's pioneer effort will be built up.

FROM MR. YOUNG.

To the Editor of The Mining Journal, Marquette, Mich.
My Dear Sir: In your issue of July 22nd I notice that a Marquette clothier made the statement that the tariff bill, now in conference, had already added 22 per cent to the price of spring woolens for 1910 and that if enacted into law, the bill would increase the cost to the wearers of men's and boys' clothing in this country \$120,000,000 annually.

I hold no brief for the woolen schedule in the present tariff bill. It is not entirely satisfactory to me, but I would like to ask the Marquette clothier for information merely, how it could have caused an advance of 32 per cent in spring woolens and how this bill could cause an increase of \$120,000,000 annually in clothing from present prices when the woolen schedule is word for word like that of the present tariff bill? Has your informant been deceived or are the merchants in this country entering into a conspiracy to increase their profits by false representations in regard to the tariff bill?

What would Solomon do?
Magistrate Barlow attempted to settle a row between the Misses Fuller and Ward, who were quarrelling over a bull pup. He used the tactics of Solomon. "You stand on that side of the road, Miss Ward," said the magistrate. "And you on the other side, Miss Fuller. Officer Hanks, you hold the dog in the middle. Now, you ladies call the dog in."

AFTER FOUR YEARS OF MISERY
Cured by Lydia E. Pinkham's Vegetable Compound
Baltimore, Md.—"For four years my life was a misery to me. I suffered from irregularities, terrible dragging sensations, extreme nervousness, and that all gone feeling in my stomach. I had given up hope of ever being well when I began to take Lydia E. Pinkham's Vegetable Compound. Then I felt as though new life had been given me, and I am recommending it to all my friends."—Mrs. W. S. Ford, 1938 Lansdowne St., Baltimore, Md.

The most successful remedy in this country for the cure of all forms of female complaints is Lydia E. Pinkham's Vegetable Compound. It has stood the test of years and to-day is more widely and successfully used than any other female remedy. It has cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulence, indigestion, and nervous prostration, after all other means had failed. If you are suffering from any of these ailments, don't give up hope until you have given Lydia E. Pinkham's Vegetable Compound a trial. If you would like special advice write to Mrs. Pinkham, Lynn, Mass., for it. She has guided thousands to health, free of charge.

THE DAILY MINING JOURNAL.

MAKING A TARIFF BILL.

A Story of Promises, Off-Broken and Off-Forgotten.
Solons Suffer Many Disappointments—Some of the Things They Say About Taft Because He Interfered in the 'Program'—Chautauqua People Are After Aldrich, but the Senator Knows He Is No Orator and, Besides, He Doesn't Need the Money.

Washington, July 28.—Former Representative James E. Watson, who while a member of the house served on the ways and means committee, and who, as a private citizen, has been pretty close to the tariff making game that has been going on for nearly five months, has some views which he admits he might keep to himself if he were still a member of congress.

"It is simply one big game of grab," said he today. "The idea is to get all you can. The scramble we have witnessed here is simply disgraceful. Yes, it is immoral. We ought never to make another tariff bill under the conditions that have surrounded the making of this one. Why of course we ought to put a stop to this game of grab. The next bill should be made for the whole country by the experts. Information gathered by experts. We have got to stop trying to take care of everybody who is holding out his hand."

If the story of how the present bill was put together could be related in all its details the country would be shocked. Even the people who are interested in the house until it was referred to the committee of conference, and even after that, its support was based on promises to individual senators and representatives that they should have certain things which they most desired. Nature, for the sake of the country, would have taken care of the final stages in its course, charges of bad faith are made. It has been said, and never denied, that thirty-nine votes for the bill were obtained in the house by direct promises that the things which that number of members had demanded should be obtained, would be forthcoming when the bill reached the senate. Some of these promises were kept in the senate, others were disregarded or forgotten, while others were kept only to be broken after the bill went to conference.

"I have been lied to," is a common expression about the senate and house these days. The system has its embarrassing consequences. An industry in a particular congressional district wants a certain amount of protection. The vote of the member representing that district is needed to pass the bill. He knows that one certain senator will be permitted to back. Under such circumstances he can usually get all he asks, or get a promise that it shall be forthcoming later. When the bill was before the senate, sitting as a committee of the whole, the progressive Republicans, in the majority, would have taken charge of it at any stage of the game had not the chairman of the Finance committee admitted to his game of grab enough senators to control on any vote. The game was ruthlessly interfered with by the president when he demanded that one certain senator should give up free hides, another free ore, another free oil, another extortionate duties in citrus fruits, etc. The things that have been said behind the president's back because of his interference with the national game would probably make his ears burn if they should be repeated to him.

Talking Behind Taft's Back.
Speaking of the talk about the president that has gone on behind his back, there was a real flare up among the organization Republicans in the house after his address to the "immortal twenty-three" members who went over to the White House to protest against the tariff material programme. One member of the house in telling the story today said: "I have been in congress fifteen years, and I never saw such a flare up as there was among the house organization men that afternoon. Why the air about the speaker's room was blue. The old stand-patters went right up in the air. 'Why, Taft is a free trader!' they exclaimed. 'Oh, if we had only known that he intended to do anything like this fifteen months ago. Would he have been nominated for President. We guess not.'"

And then some of the stand-patters recalled that the tariff commission proposed to confer unlimited powers on the President—proposed to give him authority to employ ten, a hundred, a thousand experts, at any old salary to travel up and down the country exposing inequalities and inequities of the tariff.

"What confer any such power on a free-trade President?" exclaimed one of the old wheel horses in the high tariff party. "Well I guess not. Not in a thousand years. I don't know of any President that have any such unrestricted authority to monkey with our tariff."

S.S.S. REMOVES BLOOD HUMORS FOR SALE

Every pore and gland of the skin is employed in the necessary work of preserving its smooth, even texture, softening and cleansing it, and regulating the temperature of our bodies. This is done by an evaporation through each tiny outlet, which goes on continually day and night. When the blood becomes infected with humors and acids a certain percentage of these impurities also pass off with the natural evaporation, and their sour, fiery nature irritates and inflames the skin, and brings about skin affection, pimples, boils, pustules or some itching rash, or hard, scaly skin affliction. S.S.S. cures skin troubles of every kind by neutralizing the acids and removing the humors from the blood. S.S.S. cools the acid-heated circulation, builds it up to its normal strength and thickness, multiplies its nutritious, rest corpuscles, and enriches it in every way. Then the skin, purified and cleansed by the circulating acid matter, is nourished, soothed and softened by this cooling, healthy stream of blood. S.S.S., the greatest of blood purifiers, expels all foreign matter and surely cures Eczema, Acne, Tetter, Salt Rheum and all other diseases and affections of the skin. It removes pimples, blackheads, and other unsightly blemishes from the skin and assists in restoring a good complexion. Book on Skin Diseases and any medical advice desired free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

The Great Lakes Trip
A little journey on the inland sea is the most pleasant and economical vacation trip in America. The ever-varying scenery of the shore line and the picturesque beauty of the islands add interest and delight to every mile of the trip. All the important ports on the Great Lakes are reached regularly by the excellent service of the D & C Lake Lines. The ten large steamers of this fleet have all the qualities of speed, safety and comfort. Every boat is of modern steel construction and is propelled by powerful engines. The Clark Wireless Telegraph Service is used aboard.

Tickets reading via any rail line between Detroit and Buffalo, Detroit and Cleveland, in either direction, are available for transportation on D & C Line Steamers.

The D & C Lake Lines operate daily trips between Buffalo and Detroit, Cleveland and Detroit, four trips weekly between Toledo, Detroit, Mackinac and Sault Ste. Marie, and two trips weekly between Toledo, Detroit, Saginaw and Bay City. A Cleveland to Mackinac special steamer will operate from June 15th to September 10th, leaving Cleveland direct for Mackinac stopping at Detroit enroute every trip and at Goderich, Ont., every other trip. Special daylight trip between Detroit and Cleveland during July and August. Send 2 cent stamp for illustrated pamphlet and Great Lakes Map. Address: L. G. Lewis, G. P. A., Detroit, Mich.

P. H. McMillan, President
A. A. Schantz, Gen. Mgr.

WOMEN AS SOLDIERS.

They Were Once Reckoned a Fighting Strength—Mythical Amazons.

From the nature of things women soldiers can only be found as a class among barbarians—up to this time at any rate. The Dahomey Amazons made a poor show against the French, but Burton had been much impressed with them forty years earlier—and he was a judge. The discipline was terribly severe in his time; he did not doubt they were very formidable troops. Relaxation of discipline ruined them.

The mythical Amazons claim a world since Professor Sayce advanced such striking evidence to suggest that they were the warrior priestesses of Hitite invaders of the American Amazons it may be recalled that Hume said that the legend not impossible; and he had studied the original records. Very few who have written on the subject are thus qualified probably, but Mr. Alfred Wallace has shown us lately that Spruce, the great botanist, looked into the evidence carefully and formed a strong opinion that it was trustworthy.

Much more interesting are the shield maidens of the Vikings. Would that we knew more about them personally. The historical sagas allude to them, but always, so far as I remember, in a matter of fact way, as to their heroics. One of the very grandest poetic sagas is that of the Shield Maiden Hervor, but even this takes for granted nearly everything we particularly want to know. She dressed as a man and joined the Vikings. Presently she gained the command of her party—and the story opens, true in the main probably.

The circumstantial account of the battle of Bravoll between Sigurd of Denmark and Harald Hilditton of Norway mentions several shield maidens who commanded troops, and even bore Harald's standard, as if he fought his heroes, or demones, and I think all died on the field; but it seems that they were only women who rose to command by daring and military genius.—Pall Mall Gazette.

HE GOT HIS.

The whole car might have witnessed the incident had not nearly every one in the elevated been absorbed in the evening papers.

She was such a pretty, modest young thing—so far as one could see under the bushel basket of a hat that covered her head and left but a glimpse of bright hair and blue eyes. She sat placidly still, her baby stare directed tranquilly into space. At the State street station a man came in—sheek, bold and bull-necked. The baby face fascinated him and he began making violent efforts to draw it on himself. He stood directly before her and ogled her in what he thought was a killing way. Suddenly the jolting of the car gave him the excuse he wished for striking his knee against the girl. He offered his apologies with an ostentatious bow, to which she paid no attention. He repeated the offense once more at the next opportunity, but the lady state lost none of its guileless blankness. One of the young woman's hands was lifted carelessly to her big hat, she gave her back hair a few patts and toyed for a moment with her duck-like hairpins. Presently her hand dropped lightly to her lap and she began again the embodiment of girlish repose.

CONSERVATIVES IN ALARM AT GORELL AGITATION FOR REFORM.

The proposition in the house of lords to give British courts power to grant divorces is well calculated to alarm the conservatives. On its face, however, the movement is one simply to extend to people who cannot now afford it a privilege so largely enjoyed by the wealthy classes. For the divorce in Britain as it can be obtained under present conditions, only through the high court, is very much of a luxury. The agitation for the change proposed by lord Gorell is, it is thought, a concession to the American example of the increase in marital separations, have abundant food for their fears at home. A London Express writer calculated in 1905 that, considering the difference in population, the divorce and separation figures per 100 inhabitants were as great in England as in the United States. If restrictions of expense for proceedings shall be removed now, as suggested, the British example will be likely soon to displace the American.

But the fact which impresses itself in place of the divorce is a social issue. Divorce is chiefly a social issue. It increased from 1879, in 1884, to 16,224, in 1906. In Germany the increase is steady year by year, although most marked in most densely populated districts. Divorce is chiefly a social issue. It may be apparently restrained by arbitrary statutory provisions; but the evils at the base remain. Lord Gorell holds with reason that rigidity of law or unavailability of the courts breeds merely separation and covert immorality in place of the open forms of readjustment.

Artistic Monuments
COST NO MORE THAN
PLAIN ONES IN
WHITE BRONZE
Marble is entirely out of date. Granite
soon gets moss-grown, discolored, requires
constant expense and care, and eventually
crumbles back to Mother Earth. Besides,
it is very expensive. **WHITE BRONZE** is
strictly everlasting. It cannot crumble
with the action of frost. Moss growth is an impossibility. It is more artistic than any stone. Then
why not investigate it? It has been adopted for over one hundred public monuments, and by thou-
sands of delighted customers in all parts of the country. It has been on the market over 25 years and
is an established success. Many granite dealers have bought **White Bronze** for their own burial
plots. I have hundreds of beautiful designs of all grades of work, and want to have you see them if
you are interested in a monument, headstone, marker or grave cover. On receipt of a postal card will
be pleased to call with designs and samples of **White Bronze**.

City Brevities
Today's weather: Fair; moderate
westerly winds.
Yesterday's temperatures: Seven a.
m., 71 degrees; noon, 78; 7 p. m., 68;
maximum, 80; minimum, 67.
Miss Selma Rydholm has gone to Du-
luth to visit relatives.
Julian Case is here from Detroit, for
a weeks visit with friends.
Mrs. F. O. Brown has gone down the
lakes on the steamer Ishpeming.
Miss Margaret McCombs is spending
three or four weeks with friends in De-
troit.
The butcher shop of Anderson & Mc-
Lain will close at noon today for the rest
of the day.
C. E. Fairbanks, the contractor, left
for Milwaukee last evening, on a busi-
ness mission.
Mrs. S. L. Case, of Detroit, has arrived
for an extended visit at the home of her
son, Fred S. Case.
Mrs. George McCombs has returned
from a short visit with friends in St. Ig-
nace and Sault Ste. Marie.
The members of the Woman's Guild of
St. Paul's church are requested to meet
in the Guild Hall this afternoon at 3
o'clock.
Miss Mary Brown, of Chicago, former-
ly a teacher in this city, spent yesterday
with friends and is now visiting in Ne-
gaunee.
George Call, who is now traveling for
a Chicago bond house, is expected in the
city tomorrow to spend Saturday and
Sunday.
The Swedish Lutheran Sunday school
enjoyed a picnic at Presque Isle yester-
day, at which about 200 children and
others were present.
Dwight B. Waldo, president of the
state Normal school at Kalamazoo, is
spending a few days in the city. Pro-
fessor Waldo was formerly connected with
the Marquette Normal school.
Miss Hilma Eriksson arrived home this
morning from Chicago, where she has
been studying music for the last six
weeks at the Columbia School of Music.
Her teacher has been A. K. Virgil, of New
York city. Before leaving she passed
an examination for a teacher's certifi-
cate in the Virgil method.
Mellin Funeral Today—The funeral of
the late Ruth Mellin will be held this
afternoon, from the house, 720 North
Fourth street, at 2 o'clock, and from the
Swedish Lutheran church at 2:30. The
services will be in charge of Rev. Oscar
Sandahl.

The Ore Carriers—At the L. S. &
I. dock, the Ishpeming cleared for Bu-
falo and the City of Genoa for Cleveland;
the Niagara, Pontiac, Reis and Aurora
are at the dock. At the South Shore
dock, the Mellen cleared for Buffalo and
the Craig was due last night. The Mor-
ley is unloading at the Pickands coal
dock.
Building Cross Walk—In obedience to
the order of the council, the city street
department yesterday began the con-
struction of a cross walk beneath the
D. S. S. & A. bridge across Front street.
Mayor Vaughan objected strongly to this
cross walk being built, but was overruled
by the council, the mayor claiming that
its construction was unnecessary, as the
cross walk on the north side of the in-
tersection of Spring street is only a short
distance away.
Honored Judge Stone—The Delta
County Bar association honored Judge
Stone at Escanaba last evening by giving
an elaborate banquet. It was ex-
pected that all members of the associa-
tion would be present and a number of
prominent attorneys from surrounding
localities. Among those on the program
were: A. B. Eldredge, D. H. Ball and
M. J. Sherwood, of this city; R. C. Flan-
igan, of Norway; M. J. Doyle, of Me-
nonice; E. P. Boyce, F. D. Mead and
I. C. Jennings, of Escanaba.

Superintendent III—Mrs. G. M. Walker,
superintendent of Good Will farm, at
Houghton, is just recovering from a seri-
ous illness, which has made it impossible
to hold the annual meeting of the asso-
ciation and has also prevented her
making the usual collection tour of the
upper peninsula, as the result of which
the finances of the home are said to be
at low ebb. The institution has cared for
100 children the past year. There are
now thirty-two children at the home and
ten awaiting admission. Money is nec-
essary to properly care for these homeless
children and Mrs. Walker hopes that the
friends of the institution will remember it,
even if an agent does not call.
Lightning Did No Damage—Superin-
tendent Betaille was glad to learn yes-
terday morning that the thunder storm
of the night before had done no damage
to the city lighting plant. A few years
ago such storms usually did considerably
damage to the system and sometimes put
it out of commission entirely. The
last year or two, however, has brought
out many improvements in lightning ar-
resters and transformers, so that elec-
trical storms are largely short of their
terrors, as far as the electricians are con-
cerned. The elevated position of the cop-
per wires and poles makes the high ten-
sion lighting, and unless promptly ground-
ed, the system will be to a greater or
less extent damaged.

INSURE WITH PETER WHITE & CO.
The Madigan brothers have started a
wood yard in this city, located at the
corner of Lake and Genesee St., South
Marquette, and will from now on sell
wood at the following figures:
Maple and Birch 16-inch mill wood at
\$1.50 per cord.
Soft 16-inch mill wood at \$1.25 per
cord.
Block wood at \$2.00 per cord.
Split wood, 25 cents per cord in addi-
tion to regular price.
Carload orders at special prices.
Orders for wood may be left at the fol-
lowing places: Union Clothing, shoe,
Frog and Baraga, both phone no. John
Carlson's grocery store, Third street, both
phones. H. J. Koopp's residence, Cham-
pion street, Bell phone. M. Madigan's
residence, Bell phone. (7-30-11)

**JULY CLEARING SALE AT THE
BEE HIVE.**
We are now making big reductions on
everything, particularly our summer
goods, such as ladies' wash suits, shirt
waists, belts, oxfords, etc.
THE BEE HIVE.
104 S. Front St., Marquette, Mich.
220-222 S. Front St., Marquette, Mich.

Boys' Unique Vehicle—
Two sons of Knapp, the bicycle man
at Manistique, have constructed a unique
vehicle with which they do all manner of
things. They have taken two bicycles
and built a platform between them ca-
pable of carrying a considerable load and,
each mounting one of the machines, they
have a reliable and non-tip-over car that
is not only useful but convenient for
carrying packages and parcels.
Boy Drowns at Menominee—
John Winters, aged eighteen years
and whose home, it is thought, was in
Chicago was drowned while "wasting
logs" in the Menominee river at North
Menominee. His companion Otto Pot-
ter, aged sixteen, of Columbus, Ohio,
made an unsuccessful attempt to save
him, but the body was found down the
river. Several workmen, who were
crossing the bridge on their way to
work, saw the Potter boy in the water
and went to his rescue and then notified
the police department of the drowning.
Chief English and Fire Chief Collins left
at once for the scene of the fatal ac-
cident, and after nearly two hours of
work with grappling hooks the body was
recovered.
The victim of the drowning and the
Potter boy arrived in Menominee from
Appleton. As they were without money,
they slept in the shed near the railroad
tracks and in the morning started out
to look for work. They went to North
Menominee and when about 200 feet
south of the Frenchtown bridge the
Winters boy attempted to cross by walk-
ing on the logs. When only a short dis-
tance out he stumbled and fell into the
river. Potter, who was on the bank,
pulled off his coat and went to where
Winters was struggling in the water,
pushing him a log to catch hold of. The
unfortunate young man grabbed one end
of the log which whirled around, but for
some reason released his hold on the log
and threw his hands up over his head.
He sank twice, the body not coming up
for the third time.
Potter left his home in Columbus
about two months ago. Until last week
he worked on a farm at Vincennes, Ind.,
and about four days ago, while in Chi-
cago, he met Winters. They decided to
go north together and get work.
The deceased was an orphan and the only
relative he spoke of to the Potter boy
was a brother in Chicago. A card ad-
dressed to Louis Gutter, 1166 W. Iowa
street, Chicago, was found on the body,
and the Potter lad is of the opinion
that that is the name of the brother.
He was of Polish nationality, while the
Potter boy is German.
Dairyman Clash With Official—
A merry war is being waged at the
Soo between certain milk peddlers and
the board of health which gives fair
provision of selling milk in the county. The
milk vendors are stalling against re-
newing their licenses and the health
board says that if they don't warrants
will be sworn out and prosecutions surely
result. The trouble all arises over the
claim of the milk dealers that persons
owning single cows sell milk without li-
censes. The license for such persons is
only fifty cents. The board claims to
know of no such instances. The license
fee for milk sellers having more than
one cow is \$1.50. There are some per-
sons, the board acknowledges, who have
single cows for their own use and who
at times sell a little to neighbors as an
accommodation. These people cannot be
affected by the ordinance and the board
claims the milk men are entirely unrea-
sonable in their stand. It is alleged that
this stalling behavior has time approach-
ing for taking out the licenses and an agree-
ment was reached between the dairyman
and the health board that if the usual ap-
plication for a license is made within
May 1 passed and the licenses were not
taken out. Since then the health board
has been very busy and all but six
licenses have been brought to time. These
six are obsolete and propose to fight.
The health board is equally determined
and Saturday has been set as the last
day that licenses may be procured. Af-
ter that arrests will follow.

Educate That Boy

It's a long look ahead for the parents of the Boys in the "mud pie" age. But you have got to think about their education some day, and the sooner you do it the better.

Now the best way, yes the SAFE way, is to put aside a little each week or month for an 'EDUCATIONAL FUND. We have a number of these funds right in this bank. Only a couple of dollars a week deposited in our interest department will produce enough to just about take that curly-headed boy through college.

Start an account for this purpose. We will help your children to help themselves.

Marquette National Bank

Marquette, Mich.

MARKETS

NEW YORK STOCKS.

Paine, Webber & Co's correspondent at New York yesterday telegraphed as follows: "Outside confidence is undoubtedly being inspired in the stock market by the visible crop outlook, the ease of money and the report of betterment in the various industries...

Copper Metal Prices.

New York, July 29.—Copper was lower in London today, with spot quoted at 458. In and futures at 459, 75, 0d. Locally the market was dull and unchanged, with Lake quoted at 132.50 to 133.00, electrolytic at 127.50 to 132.00, and casting at 126.25 to 127.75.

CHICAGO GRAIN MARKETS.

Chicago, July 29.—Denials of the reported injury to the new crop in the Dakotas and Minnesota by black rust, together with cooler weather in the Northwest, prompted considerable selling of wheat at the opening of the market today, which resulted in initial declines of 1/4 to 5/8 %.

starch, and may be allowed in moderation in the form of butter and salad oil. The belief that the drinking of water makes fat is erroneous. If one eats juicy vegetables, and especially the less sweet fruits, such as apples and grapes, and abandons the use of sugar, there will be a natural reduction in the amount of water taken, but one should drink all that is needed to quench thirst.—Youth's Companion.

Upper Peninsula

Wireless Company's Proposition.—If the merchants of the city will pledge the officials of the United Wireless Company \$50 worth of business each month for the next year, the company will have an aerial tower erected and receiving messages within the space of a very few weeks...

Much Timber Still Left.—Although reports recently appearing in print are to the effect that a number of logging camps in the upper peninsula will be closed in a few weeks, it is said that lumbering operations in new districts within a short distance of the Soo will be carried on extensively...

Discovers High Lake.—Forest Reserve Supervisor Finds Sheet of Water 9,000 Feet up. Los Angeles, July 28.—At an elevation of 9,000 feet near the summit of Mt. San Jacinto, Supervisor Marshall of the Cleveland national forest reserve, has discovered an extensive lake. It is extremely hazardous of access, to the north and south of it there being unscalable spurs with no trails...

WASHINGTON CHAT.—"Irrigation Bill" Reeder Tells How Climatic Changes in Kansas. Washington, July 28.—Government scientists say the climate never changes anywhere. On that point, "Irrigation Bill" Reeder of Kansas, who walks the corridors of congress like the true farmer he is, takes sharp issue...

Brewers Advocate Saloon Regulation.—The following notice signed by Joseph E. Smith, Sheriff of Salt Lake County, Utah, has been circulated in the city of Salt Lake City. It is intended to warn the public against the sale of liquor to minors...

Full line of Automobile Supplies carried in stock.

along that same line by a couple with imagination! For instance, they might arrange to be out in the 'chard, where they could be stung by a bumblebee at the right moment, so they would make the answers good and emphatic.—Chicago News.

REST.

If all the skies were sunshine, Our faces would be faint, To feel none more upon them, The cooling splash of rain.

If life were always merry, Our souls would seek relief, And rest from weary laughter, In the quiet arms of grief.

THEY WERE CHANGED.

While serving as commandant of a district in India General Cragg had on one occasion presented the prizes at the garrison sports and was rather surprised when one of the prize winners—a private in an infantry regiment—approached him a few days later and begged to know if he would be allowed to change his prize for something more useful.

BEAVERS IN ORANGE COUNTY.

For some time the state forest, fish and game commission at Albany has had the idea that the beaver, which a score of years ago was plentiful in Orange and Sullivan counties, was extinct and they could only be found in the Adirondack region. It is true that for some years the beaver was unknown in this section, but two or three years ago they made their appearance on the Neversink River, near Huguenot, and a little later a colony was found on Bash's Kill, about five miles from the first colony. It is believed that there are fifteen or twenty in the colony. Recently John Wilkin of Middletown visited the beaver colonies and found that they had been making a dam, they had cut down a number of trees, some two feet in diameter. Mr. Wilkin secured two specimens of the beaver's work and sent one to Albany. This convinced the forest, fish and game commission—Newburgh Journal.

SENSATIONAL MATRIMONY.

Because they are getting married but once in their lives some people think they must act unaturally to secure full value out of the ceremony. For this reason we have weddings in balloons, in automobiles, in church steeple and in caves. However, a California couple got the farthest from sanity by being married in the middle of a river. This indeed was a faint groping for originality. Think, however, what might be done

simplicity an example of the beauty of elevated grace for the soul and heart. Cleanse these unguilty wardrobes. Rid them of these dresses which make the guardian angels of their wearers weep. Let your wives and daughters make their own clothes rather than wear dresses which grieve the Holy Spirit and the Father of Truth.—Observance Romano.

A BURGLAR'S ADVICE.

Tells Where to Keep a Revolver and How to Use It.

I take my pen in hand to write you an answer to the mug that signs his name "Victim" what says that a bolt on your bedroom door might will make you safe from burglars coming into the room and shooting your head off and to tell him the only way to be safe from him is to buy a revolver and carry it on your person. In the quiet arms of grief.

Well, Director Barrett has at last proved that nearly all official Washington can prize copies of the Bulletin and study its contents. First, he gave a complimentary copy to the organization. Alamy edited it is concluded to be; also nicely printed in Spanish and English for the information of the peoples of two continents and the intervening isthmus. But who in Washington can stop long enough to become interested in the Monthly Bulletin of the State Bureau of Hygiene, in spite of the fact that many of those articles are very well worth reading.

Well, Director Barrett has at last proved that nearly all official Washington can prize copies of the Bulletin and study its contents. First, he gave a complimentary copy to the organization. Alamy edited it is concluded to be; also nicely printed in Spanish and English for the information of the peoples of two continents and the intervening isthmus. But who in Washington can stop long enough to become interested in the Monthly Bulletin of the State Bureau of Hygiene, in spite of the fact that many of those articles are very well worth reading.

HOW ABOUT YOUR EYEBROWS?

People who have traits they want to hide are in more and more danger every day. Ways of reading character are multiplying alarmingly. Now appears a clever German who says the eyebrows are an unerring indication of a person's temperament and disposition. Lightly marked eyebrows, lying high above the nose, show a weak nature and an inclination to avoid work. Dark eyebrows indicate strength and patience as well, while light eyebrows are rarely seen in people whose minds are keen and sharp. Though the color of the eyebrow doesn't matter as much as the shape. That highly arched eyebrows denote a sensitive temperament has always been known, but the general belief that they are the sign of superior intelligence is not, says the German character reader, a true one. Thin eyebrows show lack of vitality, and bushy ones almost always go with great virility. If you see a woman with heavy eyebrows meeting over the nose, you may trust in her; such eyebrows in a woman, says the German, spell sincerity.

UNHOLY WARDROBES.

At the present day fashions are designed to excite the passions. It is the shipwreck of virtue. These fashions are prejudicial to beauty, when is a reflection of the bounty of God. Are not the Malouans in their

for Cato by making six such returns at one session.—New York Press.

HAL TRIED ALL KINDS.

A noted heavyweight pugilist, who for a time in the heyday of his fame occupied the chair of sporting editor of a certain journal, gloomily remarked to a friend one day: "Say, Jim, I don't mind standin' up in the ring an' givin' an' takin' a few hot punches in the ribs or wherever they happen to land, but this here pickin' up a pen an' slingin' off a column or so of literature every day or two is what makes me tired, I believe I'll never resign."

THE WRONG SPIRIT.

F. W. Aver, the well-known advertising agent, at the dinner in Philadelphia in honor of his firm's fortieth anniversary, said that to succeed in advertising required hard work. "The success in this business is stupendous," he said, "but some folks think they come easily. Some folks think that, working as Robottom of Camden worked, a man can build up a great advertising fortune. Robottom was a man with a roof. He was engaged on a Mickel street house. One day, as he was lurching, he was heard to give a yell of pain. "What's the matter, Robottom?" a carpenter asked. "I got a nail in my foot," the roofer answered. "Well, why don't you pull it out?" said the carpenter. "What! In my dinner hour?" yelled Robottom reproachfully.

MOUNTAINEERS' FURNITURE.

The mountains of Kentucky are filled with furniture of a kind which is beginning to have a vogue as "art." It is the old-fashioned split style, and it has followed in the wake of mission furniture and others of the type. The mountaineers furnish their homes almost altogether with chairs and tables of their own manufacture, and they are comfortable. The seats and backs of the chairs are made by weaving the tough bark of a tree together. It makes a strong and yielding seat.—Louisville Courier-Journal.

BETTER THAN LAXATIVES

Ordinary pills, cathartics and purgatives, cause griping, nausea, and distressing and injurious after-effects that are frequently life-lasting. You may have your money back for the mere asking if Rexall's Laxative does not overcome constipation and fully restore the intestines to regular activity and good health. They are eaten like candy, and can be taken day or night. They positively do not cause nausea, griping, or any discomfort whatever. Two sizes, 7c. and 25c. The Stafford Drug Co., the Rexall Store.

Closing prices were:

Table with columns for various commodities and their closing prices. Includes items like Adv., Apricot, and various types of flour.

Paine, Webber & Co's Wheat Summary.

Paine, Webber & Co's Chicago correspondent said yesterday concerning the wheat market: "There was no indication of any great activity in wheat during the morning and the trade spent the first hour selling out some of the wheat brought on the black list reports yesterday. The early selling of wheat was due to what looked like better weather for the spring crop. Few large interests in the local trade appeared to take the offerings, and gave the market a fair natural recovery before midday."

DIET FOR THE FAT.

Sugar and Starchy Food to Be Avoided.—Juicy Vegetables and Water. It is popularly believed that all fat persons are gross feeders, but this is not true. Indeed, the reverse is often the case. Obesity may be a disease, or rather a prominent symptom of one, the trouble being with the internal chemistry, as it is called. It is comparable to diabetes—nearly related to it, in fact. In this disease sugar is formed in excess in the system even when very little is taken with the food, and so in obesity there is a tendency to the formation of fat in the body, even if little fat-forming food is eaten. In most cases much can be done by a regulation of the diet.

The amount of meat should not be increased, but the quantity of sugar and starchy foods should be reduced, their place being taken by non-starchy vegetables, such as spinach, cauliflower and lettuce. The foods to be avoided or taken in great moderation are those which contain much starch, such as rice and potatoes and all sweets—pies, puddings and candy. Tea and coffee should be taken without sugar, if taken at all, and chocolate should be omitted entirely. Broad is fattening, but for most persons it seems an indispensable article of diet. Its amount can, however, be limited, and it should be toasted. Fats are less harmful than sugar and

TWO CONCRETE SHAFTS.

Foundation Co. to Sink Them for Pickands-Mather and Roger-Brown.

Among the concerns that have lately awarded contracts for concrete shafts to the Foundation company of New York, which a short time ago completed a shaft for the Cleveland-Cliffs Iron company at its North Lake property, west of Ishpeming, are the Pickands-Mather company and the Rogers-Brown (Ore) company. The Pickands-Mather company's shaft will be sunk at the Seranton mine at Hibbing, which it is expected will be developed into one of the largest underground mines on the Mesaba. It is likely that the crew which is completing a shaft at Hibbing for Todd, Stambaugh & Co. will do the work at the Seranton. The property was developed by the late John P. Morrow and his associates, and was known as the Elizabeth mine prior to the Pickands-Mather company obtaining control of it. The fee is owned by the state and the lease was turned over to the Pickands-Mather company for \$350,000. At that time the amount of ore shown up was estimated at 15,000,000 tons and it is reported that the present lease holders have proved up at least as much more.

Pickands-Mather & Co., which is one of the largest of the independent corporations operating on the Mesaba, has awarded a contract to McArthur Bros. for the stripping of the Hudson mine, near Aurora, and it is soon to give a contract for the stripping of the Virginia mine, located between Virginia and Evelet.

The Rogers-Brown company's concrete shaft will be sunk on the Cayana range, in section thirty, near the town of Deerwood. It will be the first concrete shaft on the new range and will be sunk at what is known as the Chescutawney property.

Ishpeming Department

ISHPEMING TALKS

SOME OF QUITTING

ARE NOT MARRIED.

Duluth Newspaper Man Slightly Mixed in His Information.

The Mesaba range newspaper man who sent the special to The Duluth Evening Herald of Tuesday, stating that Miss Debra St. Andre of Ishpeming and Emil Robischaud (not Rabischaud) had been married at Taconite, after a short acquaintance, was misinformed. Both young people arrived in Ishpeming Wednesday evening and they were much surprised yesterday morning to read the announcement, which was copied in The Mining Journal, of their alleged marriage. Both emphatically denied that there was anything to the story.

Mr. Robischaud will remain in the city visiting friends, until tomorrow, when he will go to his home in Florence, Wis., to visit his parents. He holds a position with the Oliver Iron Mining company at Taconite.

ISHPEMING IN BRIEF.

S. T. Harris of Houghton was an Ishpeming visitor yesterday.

John Cullen has accepted a position with the Swift Beef company.

Con Kehoe, a well-known Hancock business man, was in the city yesterday.

Miss Evelyn Tippet is spending a few weeks with relatives in Marquette.

Miss Kate Dougherty of Missoula, Mont., is in the city on a visit with relatives.

The Grace church Sunday school gave a picnic at Cleveland park yesterday. It was largely attended.

Mrs. William Dorrick and daughter, Miss Ethel, are here from Marquette, on a two weeks' visit with relatives.

Thomas Devine, a former resident, is here from Superior, Wis., on a visit to his sister, Mrs. Julius Johnson, and other relatives.

Miss Ella Johnson arrived home yesterday morning from Republic, where she spent the past week, visiting Miss Daghe-Peterson.

A party of more than thirty children and a few ladies were given a ride yesterday in the Consolidated Fuel & Lumber company's motor car.

The French ladies' club has chosen the name St. Agatha club. The members will meet this evening at the home of Miss Ella Jacobs on Lake street.

Ispeping people interested in the organization of a tennis club are requested to meet this evening at the Young Men's Christian association's block.

W. R. Ramsdell, president of the Consolidated Mines company, which has control of El Favor and Tenacadee properties, in Mexico, is in the city on a business mission.

Mrs. James H. Malloy and her daughters, Marie and Julia, arrived in the city yesterday from Gregory, S. D., where they spent the past several months on Mr. Malloy's homestead.

The Gately ball team, as on the lookout for games with teams averaging eighteen years of age. Teams in the county are asked to correspond with Walter Johnson, 218 Johnson street.

Mrs. J. T. Rother, mother of Mrs. Elbridge Anderson, arrived in the city yesterday from Murrethersboro, Tenn., on a visit to C. L. Anderson's family. Her husband will join her in a few days and they will spend several weeks here.

Concrete walks are to be laid in front of the city property, on First street, and the Nelson block, adjoining on the north, and the Carlson block on the south. The board walks were removed yesterday.

Mrs. Amanda Anderson, organist at the Swedish Lutheran church, will leave tomorrow for Marinette, Wis., and Minneapolis, on a three weeks' visit. In Marinette she will visit her sister, Mrs. Otto Leonardson.

Charles E. Mueller and C. S. Kevik of Milwaukee; K. J. Beemis of Racine and Mognan Jopling of Marquette attended a meeting of the directors of the Michigan Quartz Silica company, formerly of Ishpeming Gold Mines company, in this city Wednesday afternoon.

Mrs. Anna Carney, beneficiary of William Carney, deceased, has received her insurance of \$1,184 from the supreme lodge of the Ancient Order of United Workmen. Mrs. Annie Bray, beneficiary of her husband, the late James Bray, has received \$500 from the same order.

Mike Tasson, the pomonaer, has already impounded this month sixty cows and two horses, the fines on all of which have been paid him by the owners. He has one cow, two heifers and a steer that he announces will be sold at auction some day next week, if the owners do not call for them in the meantime.

Rev. and Mrs. G. Fleetwood, Miss Olga Grund and Arnt Hult will leave today for Calumet to attend the district meeting of the Young People's society of the Swedish Lutheran church. The sessions will continue for three days, until Monday evening. Rev. Fleetwood is to deliver an address at one of the meetings.

8-4 Bleached Sheet, a good quality sheeting. Sold at all times at 30c yard; on sale the balance of July at yard 24c. (7-30-24) JOSEPH SELLWOOD & CO.

A good story is better than solid facts—a literary point of view.

LUMBER

B. J. GOODMAN. Office, Robbins Blk.

FROM MORGAN'S CURB LETTER.

"Coppers opened strong with trading active, although for the most part transactions were in old lots. After the first few minutes trading the market became dull and dragged until well along into the second hour, when vigorous buying in Superior Copper advanced the price from 46 1/2 to 50. North Butte got into fine and rose 1/4, selling at 58. Copper Range was strong, also Butte Coalition and Lake Copper. Franklin made a new high record for this movement, touching 8. United States Mining & Smelting common rose to 22 1/2. On the curb, Curb Consolidated was again the feature, opening at 1 1/2, at which price several good-sized blocks changed hands. Later the price reacted to 1 1/4, but it is thought in this issue is due to reports of the cutting of a vein of 820 ore on the property. This strike was made 900 feet from any other line and practically insures an ore body of large dimensions. The stock should sell higher, on the 400-foot level of the Cactus property one of the drifts is cutting through the fault, and is now into one 17 feet containing sulphides averaging approximately 5 per cent copper. The new hoist is now installed in the Hamilton shaft, and is reported in excellent working order. Some recent development may be expected in this shaft, as well as on the Pinto property, where the hoist formerly in use at the Hamilton shaft is now being installed. Cactus appeals to us as an excellent purchase around 85. The Sullivan shaft on the Cerdosa property is now down a little over 250 feet. At this depth a thickness of 55 feet of mineralized ground has been developed, and the management is very confident that with further depth a large body of good commercial ore will be developed. Diamond drill work will be started within ten days or two weeks on the Oneco property, adjoining the New Ardenian and New Baltic. The June production of Calumet and Arizona was 1,157 tons, Superior & Pittsburg, 1,100 tons. The close was steady at top prices, and we look for increased activity and higher prices."

ISHPEMING'S BATTING AVERAGES.

The batting averages of the players in the Ishpeming league team are as follows:

Player	AB	R	P.C.
Laxstrom	47	18	383
Burke	48	15	313
McLaughlin	50	15	300
Olson	45	13	290
Heindel	43	3	231
Toman	22	5	227
Simon	45	10	222
Nichols	36	8	222
Gonlette	30	4	133
Main	8	0	000
Liston	5	0	000

FAST JUVENILE TEAM.

The Floaters' baseball team, composed of boys between the ages of nine and twelve years, challenge any team in the county of that age. The Floaters have been playing fast ball and out of sixteen games played have lost only one. Their line-up is as follows: Earl Trombly, first base; John Sangala, third base; Sam Harper, pitcher; Howard Hocking, right field; Arne Kettunen, second base; "Melt" Bettison, short stop; Rudolph Anderson, center field; Werner Micklow, left field; Harry Hampson, captain and catcher.

AMERICAN WORK IN SCIENCE IS PRAISED

Charles F. Cox, Delegate to the Congress at Cambridge, Reports Much Interest in the Construction of River Tubes—New Methods Used in Detroit's Tunnel.

New York, July 28.—Charles Finney Cox is sometimes thought to bear the same relation toward science, archeology and history which his distinguished brother, Jacob D. Cox, who was governor of Ohio and secretary of war in President Grant's cabinet, bore to politics and to the science of war. Mr. Cox was chosen a few weeks ago as the delegate to represent the New York Academy of Science, of which he is president, and the American Archeological society, of which he is also president, at the meeting of one of the larger scientific bodies of Great Britain at Cambridge. This meeting was held recently and Mr. Cox returned to the United States a day or two ago.

Great interest was expressed by men of science who met at Cambridge in some of the unusual and original work of science which has recently been done in the United States. The tubing of the Hudson river, and the entrance of the Pennsylvania railroad to Manhattan and Long Island, the rapid transit system of Boston, including the tunnel connecting Boston with East Boston, the great work under the Detroit river, and completed, and particularly the inverted siphon which is to be built under the Hudson river 1,000 feet below the surface, so that the water impounded in the reservoirs of the Catskill region may be brought to New York—all of these subjects were discussed and high praise was given to American engineers for their ability to solve some of the original problems those works created.

One of the interesting reports made to the men of science was of a discovery following the construction of the Hudson river tubes. The fact that the inverted siphon has been perfectly demonstrated; that is to say, the phenomenon is a regular and constantly maintained movement, hitherto unsuspected by any men of science. The discovery was made by Mr. Jacobs, who is the chief engineer of both the Pennsylvania and Hudson tunnel systems. Some mysterious rhythmic pulsation of the earth's surface has been demonstrated, and is every moment demonstrated by the movement of these tubes. It was discovered that the heat up and down is as regular and almost accurate in point of time as is the beating of the pulse of a healthy man. At first it was thought that this pulsation was due to the effect of the tides, and the nearness of the tubes to the ocean, but after many tests this hypothesis was abandoned. Mr. Jacobs professed himself unable to explain this rhythmic and periodic beating up and down, the dimension of which is not in excess of an inch. Other men of science are almost of the opinion, and are certainly of the strong suspicion, that this beating demonstrates some motion of the earth hitherto unsuspected. Science looks upon it as an important discovery. Many will be the attempts made to solve the mystery, and discover whether these pulsations are due to internal conditions or to those which are of the atmospheric or of celestial origin.

Mr. Cox was able to report that one of the largest and most important of American tunnels now under construction at Detroit is to be completed in the course of a few days, at least, so far as the river section is concerned. And the entire tunnel, approaches and

SACRAMENTO REPORTS A FINE CASE.

A fine example of a recovery in a case of kidney disease that was supposed to be incurable is reported from Sacramento, Mr. I. T. Gibson of 521 Ninth street, Sacramento, was in October last in a local hospital in the Capital City, swollen with the dropsy that often attends the serious and supposed incurable cases. As is usual in these cases the hospital treatment got no results, when he was advised to try Fulton's Renal Compound by a friend (Charles A. Newton, the yardmaster of the S. P. R. R. Company at Sacramento, who had himself been cured by the treatment). Dropsy began to subside and the renal inflammation gradually abated and Gibson was now back to his employment with the S. P. R. Co. after recovering from a disease that is rated as incurable the world over.

In a letter he has just written, he states, "I believe it has saved my life. It is the greatest remedy for kidney disease on earth."

No matter whether called "kidney trouble," "Nephritis," or "Bright's disease," the real difficulty is inflammation of the kidneys. Fulton's Renal Compound is the first emollient for inflamed kidneys that the world has ever seen. Send for literature.

JOHN J. FULTON CO., San Francisco, Cal.
The Stafford Drug Co. are our sole local agents. Ask for bi-monthly Bulletin of late recoveries.

all, the aggregate length of which is a little over two and a half miles, is to be ready for the operation of trains early in September. Passenger trains, however, will not be operated through this tunnel until tests lasting for six weeks have been made day and night.

Aside from the commercial importance of this public work, and the economic advantages that will follow its operation, the world of science is especially interested in the entirely original methods of construction. The same intellectual ability and authority which planned upon entirely original lines, the gigantic excavations and electrification for the railway approaches to the Grand Central station on Manhattan, worked out the problem at the Detroit river. Mr. Wilgus, for he was the engineer, decided that this tunnel could be constructed from the surface of the river, instead of by boring and tubing and submarine excavation of that kind. When the first announcement was made that the railway company had accepted Mr. Wilgus' plan, grave doubt was expressed by some engineers as to their feasibility.

Now that the tunnel is practically complete under the river, this public work has made a new contribution to science. The demonstration is perfect that Mr. Wilgus' conception was wholly justified. A solid wall or embankment of concrete was raised from the surface of the river, the inverted siphon principle to the top of the hill that stands upon the east bank of the Hudson. From that reservoir the water is to move by gravity to the distributing reservoir five miles away, at the boundaries of Manhattan and the Bronx.

Science looks upon this project as in some respects the most remarkable attempt of modern engineering to conquer great difficulties. The principle of the inverted siphon is not new. E. E. Orcutt and other American engineers adopted it successfully for aqueduct systems at the equator, in Colombia and in Venezuela, South America. But never before has it been proposed to carry water from a reservoir which is large enough to float the maves of the world by means of an inverted siphon and rock tunnel 1,000 feet beneath the surface of a river to a distributing reservoir.

OLD AGE PENSIONS IN SPAIN.

Government Inaugurates a National Insurance Scheme and Will Pay All Expenses of Administration—Madrid Moves to Stop Cruelty to Dumb Animals.

Madrid, July 28.—Spain has inaugurated a national insurance scheme for old age pensions, modeled upon the system of five centimos (less than one cent) daily from the age of ten to sixty-five and to postpone after maturity a guaranteed pension of one peseta (twenty cents) daily, increased deposits furnishing increased pensions. Besides, the pensioners are to share in any surpluses due to decreased mortality or increased profits from investments.

Madrid has determined to stop cruelty to animals and the mayor has issued a decree making every species of cruelty, including the lowing of calves, the killing of birds, punishable by a fine of \$10. With the exception of Portugal, dumb animals have been treated worse in Spain than in any other country in Europe. The step is in line with the other reform movements in Spain, and is believed to have taken her revenge for the bloody but fights which have been the feature of all popular tides for centuries.

The erection and improvement of houses has never been more general in any territory than this year, and Mr. Chubb, "I have prepared plans for many beautiful residences, and I observe that many other architects have also been busy on similar work. A number of the dwellings have been erected in the upper peninsula during the past year, while many more will be completed before the first of January."

Negaunee Department

CLARENCE IRVIN BEAUMONT

Clarence Irvin Beaumont of Detroit and Miss Ina Marie Sterling, eldest daughter of Walter M. Sterling of the city, were united in marriage yesterday afternoon at 4 o'clock at St. Paul's church parsonage. Rev. Charles Laguerre, the pastor, performing the ceremony. The bride and groom were unattended, and Catherine Sterling was flower girl. The bride wore a white satin empire gown, trimmed with rose point lace, and carried a shower bouquet of lilies of the valley.

The mystery surrounding the Albert Sleep episode has been cleared up. Sleep, it will be remembered, was found wandering on the streets of Negaunee in a badly battered condition, and partially clothed, one cold morning in April. Many theories were current at the time as to what caused his condition, and the opinion was generally held that he had been forested in his way across someone's home and there had been a terrible beating. After Sleep's reason was restored he told several conflicting stories, but Marshal Rough, who looked into the case thoroughly, took little stock in what he said. Others who talked with Sleep were also satisfied that he either did not know what had happened or that he was concealing the truth.

WAS IN AN ASYLUM.

"I live in Negaunee and I feel myself not worthy to mix up with the biggest drunkard going. I know it is awfully bad, but I can't help it. I am going to commit suicide. I don't think that I am worthy to mix up with people. I have joined lodges, and think after I know that I have been in an asylum that I am not good enough to mix up with people. Whoever finds this will know that I am gone. Everybody is to send me their love, I think this is the best. Farewell to all."

CO-OPERATE WITH FOREST SERVICE

United States Official Seeks the Aid of School Teachers.

Teachers throughout the country have been invited by United States Forester Gifford Pinchot to cooperate with the forest service in an effort to obtain a more definite knowledge of the characteristics of the most important forest trees of this country. To do this it will be necessary to obtain a large number of voluntary observers, who will collect material on time of leafing, blossoming and fruiting of the various types of forest trees. In his letter addressed to the teachers the forester says:

"Knowledge of this kind is greatly needed and will be of value from the standpoint both of education and of practical forestry. For educational purposes the results obtained for each species, averaged and presented graphically by means of colored charts, will be available to all who are interested in the subject, and particularly to schools. They will form virtual tree calendars, and will be valuable aids to natural study."

LOCAL LACONICS.

H. M. Buell of Menominee transferred business in Negaunee yesterday.

A regular meeting of the board of education will be held this evening.

D. B. McDonald, the diamond drill contractor, is here from the Mesaba range.

Harry Fenner and wife arrived in the city yesterday from Detroit and will spend some time here.

Clark Kirkpatrick and a friend came up from Escanaba yesterday to go fishing with Don South, south of Palmyra.

Rev. James Pascoe, district superintendent of the Methodist Episcopal church, was here yesterday from the copper country.

Leslie French, cashier of the First National bank at Escanaba, and a former resident of Negaunee, was here yesterday on business.

Negaunee farmers expect an unusually good potato crop. Judging from the present appearance the garraons and 'arms they will not be disappointed.

SLEEP MYSTERY IS CLEARED UP

NEGAUNEE MAN, THOUGHT TO HAVE BEEN ASSAULTED, ATTEMPTED SUICIDE BY THROWING HIMSELF OVER A CLIFF.

The mystery surrounding the Albert Sleep episode has been cleared up. Sleep, it will be remembered, was found wandering on the streets of Negaunee in a badly battered condition, and partially clothed, one cold morning in April. Many theories were current at the time as to what caused his condition, and the opinion was generally held that he had been forested in his way across someone's home and there had been a terrible beating. After Sleep's reason was restored he told several conflicting stories, but Marshal Rough, who looked into the case thoroughly, took little stock in what he said. Others who talked with Sleep were also satisfied that he either did not know what had happened or that he was concealing the truth.

It is now known that Sleep attempted to commit suicide by throwing himself over the rocky precipice of the south hill near his potato farm, about five miles and a half from the business district of the city. Fred Beaulieu, son of Poundmaster John Beaulieu, Wednesday afternoon found Sleep's overcoat, hat, undercoat and vest on the top of the bluff, where he was picking blueberries in white and red. The overcoat had committed suicide, and that the body was somewhere nearby. He went through the pockets and found nothing in them except a note, apparently written by Sleep just before his discovery to Marshal Rough. The handwriting was identified as having been written by Sleep. The handwriting in the note was also recognized as his. Its contents were as follows:

"I live in Negaunee and I feel myself not worthy to mix up with the biggest drunkard going. I know it is awfully bad, but I can't help it. I am going to commit suicide. I don't think that I am worthy to mix up with people. I have joined lodges, and think after I know that I have been in an asylum that I am not good enough to mix up with people. Whoever finds this will know that I am gone. Everybody is to send me their love, I think this is the best. Farewell to all."

Marshal Rough yesterday expressed surprise that Sleep did not meet instead death. His head and face were so badly battered that it was at first thought that some one had not only punished him but had also shot him in the head. The night he attempted to commit suicide he was last seen about 8 o'clock some distance from the bluff. The next morning he was seen wandering about in the Mesaba mine field. He was in his bare feet and had a cold shawl about his neck. Both of his eyes were blood-red and he was covered with blood. It was evident that he had been unconscious during the night. He did not come to his senses sufficiently to tell anything about his experience, but he told some of the things he had done since he had received medical treatment.

Sleep is now in the Cobalt district in Canada. About a week ago he wired A. P. Johnson, agent of the Chicago & Northwestern Railway company here, and told him he would like to let him the depot and which he failed to check in his haste to get away. It fell Negaunee about a week after his attempt at suicide and was then in fairly good condition. Sleep came to Negaunee from Canada a few months before he attempted to take his life. He is about twenty-seven years of age and single.

BIG YEAR IN PROSPECT.

Architect Says That Many New Public Buildings Will Be Erected.

John D. Chubb arrived in the city yesterday to aid the board of education in winding up the work in connection with the new school building. U. E. Dunner, the contractor, and W. S. Patterson, who installed the heating and ventilating plants, were also in the city.

Mr. Chubb says that many contracts for public buildings will be awarded during the coming year. There are not many big buildings in prospect in the upper peninsula, but a number of important cities and towns have been provided with new schools during the past few years, but a large number of public buildings will probably be erected in the lower peninsula towns, also in Wisconsin.

"The erection and improvement of houses has never been more general in any territory than this year," and Mr. Chubb, "I have prepared plans for many beautiful residences, and I observe that many other architects have also been busy on similar work. A number of the dwellings have been erected in the upper peninsula during the past year, while many more will be completed before the first of January."

MILK IN CHUNKS.

It is now proposed to deliver milk to customers frozen. This is really nothing new, as that is the way it is commonly handled in Siberia in winter. You buy milk here in chunks, frozen round a stick which serves as a handle. Mothers don't say to their children: "Take care and don't spill the milk," but: "Take care and don't break the milk," for a chunk of it dropped on the hard frozen ground will break into a thousand pieces.—Puffer.

TO THE G. A. R. ENCAMPMENT AT SALT LAKE CITY VIA CHICAGO, MILWAUKEE & ST. PAUL RY.

The 43rd National Encampment of the G. A. R. will be held at Salt Lake City, Utah, August 9 to 14, 1909. Are you going? Choice of routes via Omaha or Kansas if your ticket reads via the Chicago, Milwaukee & St. Paul railway. Low fare round trip tickets, good 30 days, on sale August 3 to 8, inclusive. Ask your local railroad agent for information as to railroad and sleeping car fare, routes and train service, or address F. A. Miller, General Passenger Agent, Chicago, 7-19-26-30

TO STUDY NATIONAL CANALS IN EUROPE

Congressional Commission Will See Workings of Government and Private Waterways and Railroad Competition—Ten Members Are to Sail Soon.

Washington, July 28.—The waterways commission of ten, whose members sail soon for a two-months' trip in Europe, have to bear the brunt of a vast deal of chaffing around the capitol. Like most senators and representatives about to depart on a commission junket, all are going rather reluctantly, wish the trip was done with and that sort of a thing. The wits jest with them about asserting the direct effect of the Rhine and river Rhone and investigating the shoals of the moonlight on the Rhine and so on ad infinitum.

Whether the government will ever get a quid pro quo for the money it disburses as expenses for these five senators and five representatives, or for as many of them as take the luxurious journey over Britain and the continent, may be open to question, and yet there is no doubt that some of the commissioners are earnestly studying important subjects in connection with waterways. Senator Burton of Ohio, for instance, is a serious-minded chairman of House committees on the navigation of the rivers and harbors, now that Mr. Burton has been promoted to the senate.

One inquiry a committee of the commission intends to make is the reason for the decline of river transportation of freight between points where there is no railroad competition. That is a very vital matter in connection with the great proposition for the improvement of waterways, especially in view of a recent statement by a big traffic man at Pittsburgh that if the Ohio river were improved at a cost of about \$30,000,000 to make a nine-foot channel to the Mississippi, the improvement could not be utilized because of the excessive wharf charges imposed upon steamers, both by private and municipal owners.

BRITAIN HAS SAME PROBLEM.

Similar conditions are found on other large American rivers, so that wharfage facilities become quite as essential as deep channels. Congress, if it is to legislate on recommendations made by this commission, can not ignore the probability of the government's proposed investment being nullified by such obnoxious local conditions. The doleful story of railroad-owned steamships driving old and established freight boats out of business.

England has had a commission studying these very problems for some time. Its members are now in session in London. If the commission goes, sail by the very end of July, its members expect to encounter the Englishmen in London and ascertain whether they have acquired any views about the situation which they did not feel like putting upon paper in their exhaustive reports. The transportation history of English rivers, and how they have been controlled, has been very like that of American rivers. Competition has been throttled on every hand by the railroads. The rivers have been allowed to fill with silt and sand obstructions, the canal system has gone to decay.

Quite the contrary has been true of Germany where the railroads are owned by the state. The Kaiser's country is said to have the best and commercially most efficient canals of any nation of the world and the rivers are utilized more extensively than elsewhere for carrying cargoes of the most varied kinds. In fact, it is said that a tree in leaf influences the growth it is able to make during the season. Knowledge of the time when seeds of each species ripen in various localities is of great value to those who are collecting seeds, since seed often deteriorates or is eaten by squirrels and birds if not gathered and stored as soon as ripe.

"Another result of this study will be an intimate knowledge of climate as manifested by plant growth, for differences in climate are shown by plant life as well as by the growth of trees. In preliminary idea can thus be gained as to whether a given region is suited to a valuable tree which it is desired to introduce. Many such examples could be given, but sufficient has been said to show that the results of these observations will be of real help to practical forestry, in addition to their general interest and educational value."

Rev. James Pascoe, district superintendent of the Methodist Episcopal church, was here yesterday from the copper country.

Leslie French, cashier of the First National bank at Escanaba, and a former resident of Negaunee, was here yesterday on business.

Negaunee farmers expect an unusually good potato crop. Judging from the present appearance the garraons and 'arms they will not be disappointed.

Rev. E. E. Menell, a former pastor of the Negaunee Swedish Lutheran church, will preach here next Sunday. Mr. Menell has been located in Iowa much of the time since he left this city.

Mrs. Louis Sorenson, who has occupied one of G. L. Kuhlman's dwellings on Pioneer avenue for the past ten or twelve years, will leave here about the first of the month for Iron to join her son, Henry, who is employed in the mail service between Ironwood and Escanaba. Mrs. Sorenson is one of the city's eldest residents.

Captain John Christopher, a former well-known resident, is here on a few days' business mission. He has been in the upper peninsula and on the Mesaba range since the death of his wife, a few months ago. Mr. Christopher is interested in the Spar mine, west of Michigamme, and is in the county on business connected with the property.

Washington, July 28.—The waterways commission of ten, whose members sail soon for a two-months' trip in Europe, have to bear the brunt of a vast deal of chaffing around the capitol. Like most senators and representatives about to depart on a commission junket, all are going rather reluctantly, wish the trip was done with and that sort of a thing. The wits jest with them about asserting the direct effect of the Rhine and river Rhone and investigating the shoals of the moonlight on the Rhine and so on ad infinitum.

Whether the government will ever get a quid pro quo for the money it disburses as expenses for these five senators and five representatives, or for as many of them as take the luxurious journey over Britain and the continent, may be open to question, and yet there is no doubt that some of the commissioners are earnestly studying important subjects in connection with waterways. Senator Burton of Ohio, for instance, is a serious-minded chairman of House committees on the navigation of the rivers and harbors, now that Mr. Burton has been promoted to the senate.

One inquiry a committee of the commission intends to make is the reason for the decline of river transportation of freight between points where there is no railroad competition. That is a very vital matter in connection with the great proposition for the improvement of waterways, especially in view of a recent statement by a big traffic man at Pittsburgh that if the Ohio river were improved at a cost of about \$30,000,000 to make a nine-foot channel to the Mississippi, the improvement could not be utilized because of the excessive wharf charges imposed upon steamers, both by private and municipal owners.

Similar conditions are found on other large American rivers, so that wharfage facilities become quite as essential as deep channels. Congress, if it is to legislate on recommendations made by this commission, can not ignore the probability of the government's proposed investment being nullified by such obnoxious local conditions. The doleful story of railroad-owned steamships driving old and established freight boats out of business.

Quite the contrary has been true of Germany where the railroads are owned by the state. The Kaiser's country is said to have the best and commercially most efficient canals of any nation of the world and the rivers are utilized more extensively than elsewhere for carrying cargoes of the most varied kinds. In fact, it is said that a tree in leaf influences the growth it is able to make during the season. Knowledge of the time when seeds of each species ripen in various localities is of great value to those who are collecting seeds, since seed often deteriorates or is eaten by squirrels and birds if not gathered and stored as soon as ripe.

"Another result of this study will be an intimate knowledge of climate as manifested by plant growth, for differences in climate are shown by plant life as well as by the growth of trees. In preliminary idea can thus be gained as to whether a given region is suited to a valuable tree which it is desired to introduce. Many such examples could be given, but sufficient has been said to show that the results of these observations will be of real help to practical forestry, in addition to their general interest and educational value."

WILL COVER MANY ROUTES.

The congressional travelers have a comprehensive itinerary, which will take them to most of the big rivers of Europe and to the best of the canal systems. They will explore the Rhine, the Rhone, the Danube, the Moselle, the Main, the Loire. They will take coal voyages on the water and ride by rail in traversing expanses between Berlin, Vienna, Budapest, Usovo, Belgrade, Strassburg and Rotterdam.

The senators' commissioners are Burton of Ohio, Gallinger of New Hampshire, Smith of Michigan, Lorimer of Illinois, Piles of Washington, Simmons of North Carolina and Clarke of Arkansas. Those from the house are Alexander of New York, Stevens of Minnesota, Wanger of Pennsylvania, Sparkman of Florida and Moon of Tennessee. Lorimer was originally named as a commissioner of the house, where he was then serving. He will not accompany his colleagues, but may join them in about a month. Clarke of Arkansas will not go at all. That leaves a party of ten.

They are not charged with formulating legislation, and except as individual members of their respective branches of congress, have no authority to propose bills for the improvement of waterways in compliance with ideas they gather while abroad. But it is expected that congress, in making up river and harbor appropriations hereafter, will be guided by their recommendations.

When you hear a girl speak of a young man as being a bear—well, you can draw your own conclusions.

A bachelor says matrimony is a sort of training school in which women learn the art of drawing alimony.

BEWARE OF OINTMENTS FOR CATARRH THAT CONTAIN MERCURY. As mercury will surely destroy the sense and small and completely derange the whole system when carried to the brain, those who are afflicted with this disease should never use any ointment containing mercury, but should use only that good you can possible derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine it is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials for sale by druggists. Price, 75c per bottle. Take Hall's Family Pills for constipation.

PROGRAM OF RACES FOR COUNTY FAIR

\$1,750 IN PURSES HAS BEEN OFFERED AND TWO NEW CLASSES ARE SCHEDULED.

IS ALL-DAY FAIR WANTED?

Suggestion Made That Baseball Games and Cornish Wrestling Take Place in Forenoon.

The committee on races of the Marquette County Agricultural society has arranged the racing program for the coming fair, which is unusually attractive one. Races will be held on all four days of the fair and the program includes some new features.

It has been suggested that it would be wise to have the baseball games and possibly the Cornish wrestling during the forenoon, so that the races would be the sole special attraction in the afternoon.

The complete program of races is as follows: Monday, Sept. 6—2:15 pace or trot, \$250; 3:00 pace or trot, \$200.

DEMAND FOR LABOR EQUALS THE SUPPLY

BUSINESS CONDITIONS IN THIS CITY HAVE BECOME DECIDEDLY BETTER DURING THE LAST TWO WEEKS OR MORE.

There has been a decided improvement in business conditions in Marquette during the last two weeks, according to merchants and business men.

For some reason industrial depressions do not reach Marquette until some time after the rest of the country has been affected and dull times continue in this vicinity until after other parts of the country have recovered from the slump.

At last, however, the dull times of the last year and a half seem to have been shaken off and everything indicates a busy and prosperous fall and winter season.

Employment agencies throughout the Northwest are beginning to find it difficult to find work for harvest hands to work in Minnesota and the Dakotas.

Business men report that business is constantly getting better and that it will soon regain its normal volume.

FACIAL TREATMENT.

Miss Hollie Oster, Werner block, removes superfluous hair, moles and warts by electric needle. Ladies' and gentlemen's manicuring. Bell phone 61. (7-16-11)

CAPTAIN BARRY WEDS.

Hallelujah Wedding at Salvation Army Barracks Largely Attended.

Captain George J. Barry, who is at the head of the Salvation Army workers in this city, last evening was united in marriage to Miss Alice Maynard, of Racine, Wis., who has just graduated from the Salvation Army school in Chicago.

The wedding was public, a small admission fee being charged, and a good crowd was in attendance. The marriage vows were exchanged on a raised platform in the front part of the hall.

SHERIFF MAKES ANNUAL REPORT

STATISTICS OF THE COUNTY JAIL FOR THE YEAR ENDING JUNE 30 COMPARED WITH THE PREVIOUS YEAR.

The annual report of Sheriff John Lehman, for the year ending June 30, has been filed with the county clerk. The report shows a remarkable similarity to the report of the year before, except that nearly three times as many insane patients have been confined in the jail within the past twelve months as the previous year.

Table with 4 columns: Item, 1909, 1908, and other statistics. Includes rows for prisoners in jail, total number received during year, number of males and females, and charges.

NO BOATS TO INSPECT.

Recently Created State Officer Likely to Have Little to Do.

A close view of the new water craft inspection and taxation law has revealed to State Labor Commissioner R. H. Fletcher a situation that may make it rather unattractive for the inspector under the law to know what to do.

The government provisions for inland lake and river boat inspection require the inspection of all boats used for commercial purposes above twenty-five feet in length. It develops also, according to Commissioner Fletcher, that the bill makes it necessary for the state labor commissioner to make an inspection of all power boats used for carrying passengers for hire.

Along with its provisions the statute requires the collection of a fee of 85 from the vessel owner and the same license fee from the captain in charge if he is adjudged competent by the inspector.

DESTRUCTIVE PEST CAN BE DESTROYED

HOW GRASSHOPPERS HAVE BEEN KILLED AT THE CHATHAM EXPERIMENT FARM.

PARASITES DO LITTLE GOOD

Insects Become Their Prey Only in Wet Weather and Do Not Affect Next Year's Hatch.

The Griddle mixture, so-called, for the wholesale destruction of grasshoppers, has been tested at and near the upper peninsula experiment station at Chatham, and the results, according to Superintendent Geismar's statement, are extremely gratifying.

The mixture consists of one pound of Paris Green and two pounds of salt, which are mixed with fifty pounds of horse manure, one or two pailfuls of water being added to facilitate the mixing.
