MARQUETTE, MICH., TUESDAY, AUGUST 10, 1909.

PRICE FIVE CENTS.

MURDER IS DONE IN A CEMETERY

Anna Schumacher, Seventeen Years Old, and Pretty, Is the Victim of a Foul Crime Committed at Rochester, New York.

Leaving Home to Place Flowers on the Grave of Her Father, and Failing to Return, a Search Is Instituted and Her Body Is Found Buried in a Lonely Spot—That She Had Fought Desperately to Save Her Honor and Her Life Is Indicated.

Rochester, N. Y., Aug. 9.—Leaving her home early Saturday afternoon to place flowers on the grave of her father, pretty Anna Schumacher, seventeen years old, who wore a hat with her mother in this city, was attacked by one or more unknown men and was criminally assaulted and murdered. Her body was dragged to a depression in a lonely spot and was covered with a thin layer of earth and leaves. There it was discovered this morning by constables of the town of Greece. It is the theory of the police that the girl was attacked by tramps or thieves.

Choked and Beaten to Death.

Rochester, N. Y., Aug. 9.—That Anna Schumacher, the seventeen-year-old girl whose body was found this morning in a shallow trench, was choked and beaten to death after being criminally assaulted is the coroner's conclusion, based on the autopsy, but the circumstances of the crime are unknown. For a time suspicion was directed toward an employee of St. Bernard's seminary until it was learned that he had been at home, ill. A broken spade was found near the lonely spot where the victim's body was hidden. It was taken from the pig pen at St. Bernard's seminary. Having dragged the body into the shallow trench, the murderer buried it in a shallow trench, covering it with earth and leaves.

The body was in a fitful condition—the head, face, chest, arms and hands were covered with bruises and scratches; the bones that supports the tongue were fractured by choking; the body was covered with blood, and the hair was full of dirt and leaves. Part of the clothing was removed. The girl had evidently struggled desperately to save her honor and her life. The inquest will be held tomorrow.

Miss Schumacher left home Saturday to place flowers on the family lot in the Catholic cemetery. When she failed to return at night, the search that was instituted ended today with the discovery of the body back of an old ice house in the cemetery property.

Negro Is Lynched in Kentucky.

Cadiz, Ky., Aug. 9.—An unknown negro has been taken to the woods east of town and presumably lynched for attempting to assault the ten-year-old daughter of Thomas Waddington, a farmer. The girl broke away and told her brothers, who, with neighbors, speedily captured the negro.

Detroit's Murder Mystery Unsolved.

Detroit, Aug. 9.—The authorities are tonight no nearer the solution of the mystery surrounding the murder of Mrs. Martha Calahan, whose body was found in a clump of bushes at Hamtramck yesterday, than they were when the corpse was discovered.

Mrs. Robt. Chambers Is Missing.

Groversville, N. Y., Aug. 9.—Mrs. Robert W. Chambers, wife of the author, went missing this evening and her horse returned riderless. Up to midnight, no trace of Mrs. Chambers had been found.

MORTALLY WOUND EACH OTHER.

Italian Couple in Chicago Resort to Revolvers and Stilettoes.

Chicago, Aug. 9.—Locking their two children in a bedroom, and fastening the doors of their flat so that neighbors could not hastily enter, Antonio Spizziri and his wife went into the darkened parlor today and tried to kill each other. The woman, shot twice and stabbed twice with a stiletto, died before the police arrived. Her husband was shot twice and probably will die. Two revolvers were found near the bodies. Spizziri turned on his side when the police broke in, and grabbed a letter from the floor and tore it to pieces. It is thought that Spizziri was jealous.

OFFERS REWARD FOR KIDNAPPERS

St. Louis, Aug. 9.—Acting Governor Gomech, of Missouri, today offered a reward of \$300 each for the capture of the kidnapers of Grace and Tommaso Viviano, who disappeared from their homes here a week ago. It is now thought the children were taken to Chicago by a woman.

PAINTER'S TRAGIC DEATH.

Winona, Minn., Aug. 9.—While painting a high bridge spanning the Mississippi river here, Ernest Lampe today came in contact with a live electric wire. He plunged into the river, 140 feet below. His body was not recovered.

MRS. CASTLE FREED ON BAIL.

New York, Aug. 9.—Mrs. Mary Scott Castle, who fired upon Wm. B. Craig at the Hotel Waldorf, was released from prison tonight, under \$3,000 bail, after six days' imprisonment.

CIVIL WAR VETERANS RALLY AT SALT LAKE.

Forty-third Encampment of the Grand Army Attracts 30,000 Visitors to the Utah Metropolis, With Prospects the Number Will Be Increased to 50,000.

Salt Lake, Aug. 9.—Thirty thousand veterans and other visitors are quartered here, at the forty-third encampment of the Grand Army of the Republic. The prospect is that the number will be increased to 50,000 by Wednesday. A reception to Commander-in-Chief Nevins and his staff was given by the Woman's Relief Corps tonight. Three thousand persons were present. Camp fires were addressed by Commander-in-Chief Nevins, Secretary of the Grand Army, Kent Hamilton, Past Commander Chiefs Charles G. Burton and E. H. Torrance, Mrs. Mary E. Gibban, national president of the Woman's Relief Corps, and Genevieve Longfield Lane, national president of the Ladies of the Grand Army.

The headquarters of the rival claimants for official honors have been opened. The fight of St. Louis and Atlantic City for the encampment of 1910 is being warmly contested. Denver is urging its advantages for the meeting of 1911. VanSant, of Minnesota, and Ketchum, of Indiana, continue the most active candidates for commander-in-chief. The friends of I. T. Dickerson, of Illinois, have urged him to seek the honor, but he has declined. A sentiment in his behalf for 1911 is developing.

Every state of the former Confederacy has a delegation here. There are fifty colored veterans present.

TAKES UP AERONAUTICS.

Theodore Roosevelt, Jr., to Apply for a Balloonist's License.

New York, Aug. 9.—Theodore Roosevelt, Jr., temporarily abandoning carpet manufacturing in Connecticut, came to New York today, to arrange for learning more about aeronautics. He intends to join the Aero Club of America and apply for a pilot's license, to qualify for which requires ten trips in a balloon. One he made alone at night. If successful, he may participate in the national race in the West this fall.

Ex-President Resumes His Hunting.

Nairobi, British East Africa, Aug. 9.—Colonel Roosevelt and his son Kermit, and the three other members of the Roosevelt expedition left here today for Nyero, a government station in the northwestern portion of Kenya province. The second consignment of specimens collected by the expedition will be shipped to the United States tonight.

Parish, Aug. 9.—Mrs. Roosevelt and Archie, Quentin and Ethel Roosevelt arrived this evening. They were met by attaches of the American embassy and were escorted to the apartments where they will reside during their stay here.

DEMAND HIGHER WAGES.

Canadian Pacific Freight Handlers Go on Strike at Fort William.

Fort William, Ont., Aug. 9.—Nearly a thousand freight handlers on the Canadian Pacific railway struck at noon today, and the freight movement here is at a standstill. The truckers demand an increase from seventeen and one-half cents an hour, with a one-cent bonus, to twenty-two and one-half cents an hour for a day's work, and an increase from twenty-one cents to twenty-five cents for night and Sunday work.

Coal Miners Vote to Quit.

Springhill, N. S., Aug. 9.—Two thousand employees of the Cumberland coal mines voted tonight to strike tomorrow. All are members of the United Mine Workers. The men demand higher wages and recognition of the union. It is expected that the mines will remain closed until fall, as neither side will yield.

CLOSE CALL FOR PASSENGERS.

Two Entire Trains Are Derailed, Yet Only Five Persons Are Injured.

Creston, O., Aug. 9.—Five persons were injured when an entire train on the Wheeling & Lake Erie railroad was derailed at Barboursburg today. The engine and baggage and mail cars were overturned, while a passenger coach containing 110 persons toppled into a ditch.

Leavenworth, Kas., Aug. 9.—A Missouri Pacific passenger train enroute from St. Louis to St. Joseph was derailed south of Leavenworth today. The engine was torn to pieces and all the cars left the track, but nobody was injured. The trucks of the tender broke down and the tender was torn from the locomotive. The baggage car was thrown upon its side towards the bluffs. If it had fallen toward the river, the entire train might have been thrown down the steep bank.

COMPANY'S OFFER REJECTED.

However It Is Believed Chicago Car Strike Will Be Averted.

Chicago, Aug. 9.—The street railway employees' representatives today rejected the offer of the railway officials, viz., a graded scale giving thirty cents an hour to men who have been in the service fifteen years. The men then proposed an increase of a cent an hour now and an increase of two cents an hour next year. This is being considered. It is believed a settlement will soon be reached.

NORFOLK BANK CLOSES ITS DOORS.

Norfolk, Va., Aug. 9.—The Trades & Truckers' bank, being a large banking business here among the "up-town" merchants and country truckers, closed its doors today, announcing that owing to its inability to realize upon its paper the institution had been forced into liquidation.

DIES IN DETROIT INFIRMARY.

Detroit, Aug. 9.—John M. Sharp, until recently a leading broker at Louisville, Ky., died today at St. Mary's infirmary. The suspension of Sharp's house was announced Saturday.

MOTHER'S LETTERS ARE READ IN COURT

Following a Heated Wrangle, the Board of Inquiry at Annapolis Decides Against the Contentions of Mrs. Sutton's Attorney.

Correspondence Proves Sensational—That Her Son Appeared to Her Subsequent to His Death Is the Declaration of the Writer—He Told Her of a Plot Against Him, and How He Was Slain, She Says, and She Asserts She Has Found His Story True.

Annapolis, Md., Aug. 9.—The reading of the record of last Saturday's secret session of the board of inquiry investigating the death of Lieutenant Sutton, and the cross-examination of Mrs. Sutton, mother of the dead officer, occupied practically all of today's hearing.

A heated wrangle ensued, Attorney Davis, counsel for Mrs. Sutton, argued against the necessity of making the letters known, inasmuch as they had no actual bearing on the evidence. He contended that to read them would be to reveal to the public an expression of the court's decision that these letters, which were written to a Marine Corps paymaster's clerk, should be read.

Mrs. Sutton dramatically declared in the letters that the companions of her son had conspired to beat the young lieutenant; that Lieutenant Utley was the prime mover in the plans; that he, Adams and Osterman attacked Sutton and beat him until almost dead, and that her son had shot to cover the alleged vicious attack upon him. The letters were described as an expression of the mother's fixed beliefs as to the events incident to her son's death, entirely aside from the question of adequacy of ground coverage. They contained little really new, showed her bitterness against the military officers of the Marine Corps and bristled with condemnations of Sutton's brother officers and the finding of the first inquest relative to Sutton's death. They showed, however, that Mrs. Sutton was very strong in her convictions.

Dead Son Appeared to Her.

"The love between Jimmie and myself," said the mother, in one of the letters, "is so great that I could exist between two persons, if Jimmie met with an accident, I felt it. The night those beasts were laying plans for Jimmie, an awful fear came over me and my daughters. The next day Mr. Sutton told me that Jimmie was reported killed."

"Oh, God, Mr. Swartz," the writer exclaimed, "if Jimmie had not spoken to me, I would have died. Then Jimmie came to me, and said, 'Mother, dear, I never killed myself. Adams killed me; they left me to die, and when Adams shot me to hide the crime.' He told me how they laid a trap for him, how he walked into it; how Utley grabbed him to pull him out of the automobile; how they held him, how his teeth were knocked out and a lump of wood was put under his jaw, and how when he was lying on the ground someone kicked him in the side and smashed his watch. He begged me to live and clear his name. Well, after three weeks I proved that some of the things he told me were true and after repeatedly demanding the evidence, I got it, and within the last month I have proved everything he told me."

"Nothing could separate Jimmie from me—not even death—and Adams Utley, Potts and Ostermann will never know a moment's rest on earth. Why should they?" Mrs. Sutton, on cross-examination, was asked on what she based the foregoing accusation. She replied that the testimony, to her mind, proved it together with a certain letter that she had in her possession. Mrs. Sutton said she had never given Swartz permission to part with these letters. It was brought out that Swartz is an enlisted man and might be required by his officers to give up the letters.

BOUND TO BANISH SALOONS.

Alabama Officers Who Fail to Enforce Prohibition Will Be Impeached.

Montgomery, Ala., Aug. 9.—Governor Comer this evening signed the Carmichael prohibition bill. The Fuller and Ballard bills, which also will be passed, prohibit liquor advertising and provide for the impeachment of officers who fail to put the prohibition laws into effect.

BATTLESHIPS GET SUPPLIES.

Norfolk, Aug. 9.—Preparing for a month's maneuvers among the coast waters, the two columns of drab battleships of the Atlantic fleet presented a busy scene today as barges loaded with coal warped alongside the sea fighters and scores of small craft darted back and forth with supplies. As each ship's supplies were replenished, she steamed seaward.

LAST GAP NOW TO BE CLOSED.

Chicago, Aug. 9.—It was announced today that the last gap on the Pacific coast extension of the St. Paul railway will be closed Aug. 15, when passenger service will be established between Butte, Mont., and Malden, Wash.

THE WEATHER.

Washington, Aug. 9.—The following is the weather bureau's forecast for Upper Michigan: Fair, Tuesday; Wednesday, unsettled; light to moderate variable winds, becoming southeast.

FIRE IN CINCINNATI IS FATAL.

Cincinnati, Aug. 9.—A man half-crazed and half-drowned, with his flesh burned to a crisp in places, running through the streets yelling with pain, was the unusual spectacle following a tenement house fire here early today. The suffering man, Michael Hoff, fell unconscious at the door of the city hospital and died soon afterwards. Women and children, panic-stricken, were rescued by the police and firemen.

BOB BURDETT IS BETTER.

Los Angeles, Aug. 9.—Dr. Robert J. Burdett, who is ill at his summer home at Chilton-by-the-Sea, is reported much better.

PRESIDENT TAFT FOND OF THE SEA

However He Wants the Decks of a Liner Under Him—He Lost Interest in Yachting After an Unfortunate Experience Long Ago.

Sitting on the Verandah Overlooking the Ocean, He Says That His Son Charlie, With a Little Sailing Dory, Will Attend to the Aquatic Part of the Summer for the Entire Family—He Plays Golf on the Essex Links and Is Defeated.

Beverly, Mass., Aug. 9.—Sitting on his verandah, overlooking Salem bay and the ocean beyond Marblehead, when scores of yachts were sailing, including those preparing for the German emperor's cup race, Mr. Taft was asked today if he was interested in yachting. The president replied that he had lost interest in yachting after an unfortunate experience long ago in handling a mainsail which had resulted in his letting the mainsheet get away, allowing the boom to swing violently about and damage the yacht's rigging. The president ever since has continued fond of the sea, but he wants the decks of a big liner beneath him.

Mr. Taft declared today that Charles, his youngest son, with a little sailing dory, would attend to the aquatic part of the summer for the entire family. Although the Sylph is lying in the bay, at the president's disposal, he does not intend to make particular use of her. The president played golf today at the Essex Country club. The day was exceedingly warm, and the course was strange, and Mr. Taft, with John Hays Hammond as partner, was three or four down to General Adelbert Ames and W. J. Boardman.

Secretary Carpenter today replied to many requests for additional steps on the president's Southern and Western trip, to the effect that the itinerary is closed and no additional visitations can possibly be considered. The president today sent the following to the Irrigation congress at Spokane:

"I greatly regret that I am unable to be present to hear the discussion and to give the benefit of your deliberations. I have the deepest sympathy with the general object of the National Irrigation congress, and you can count on my earnest endeavor to further the cause of reclamation by irrigation in every part of the country within the jurisdiction of the federal government."

TENNIS CHAMPIONS KEEP TITLE.

New York, Aug. 9.—Frederick P. Alexander and H. H. Hackett, the national doubles champions, won the final match of the special tennis tournament at White Plains today, defeating the Pacific coast pair, George James and Maurice McLaughlin, 6-1, 6-4.

New York, Aug. 9.—Noted tennis players from the North, South, East and West will begin at the Meadow club, Southampton, L. I., tomorrow a wedding tournament to decide who will compete in the national championship at Newport next week. Sixty-four players participated today in the draw for the tournament. There was no play today, on account of the playing of the final rounds of the special tournament at White Plains. The play beginning tomorrow will be the best two matches out of three; the finals, the best three out of five.

MILWAUKEE BANTAM WINS.

Memphis, Aug. 9.—Young Fitzgerald, of Milwaukee, gained the decision over the Mandot, of New Orleans, after eight rounds of hard fighting before the Phoenix Athletic club tonight. The bantams weighed 115 pounds and put up a grueling fight. Referee Jack Redmond's decision was popular.

Pittsburg, Aug. 9.—According to public opinion, the best to watch Patsy Branigan was entitled at the end of his six-round go here tonight with Charley Goldman, of Pittsburg, was a draw. The lads fought fast and cleverly.

WOMAN'S GOLF TOURNAMENT.

Chicago, Aug. 9.—Miss Sallie Ainsled led the qualifiers in the tournament for the women's golf championship of Chicago at the Exmoor club today. The following are the qualifiers: Miss Ainsled, Westwood, 92; Mrs. E. T. Perkins, Glenview, 92; Mrs. W. L. DeWitt, Okauchee, 92; Miss Myra Helmer, Midlothian, 93; Mrs. E. C. Balkup, Evanston, 94; Miss Vida Jewell, LaGrange, 94; Mrs. N. L. Brackett, LaGrange, 95; Mrs. W. F. Anderson, Hinsdale, 97.

NOTED COMMEDIENNE DYING.

Baltimore, Md., Aug. 9.—Mrs. James Gernon, aged seventy-eight, a comedienne known to three generations of theater goers and who appeared with all the great stars for sixty years, is believed to be dying at the home of her son here.

CATHOLICS IN SESSION.

Pittsburg, Aug. 9.—Two sessions of the American Federation of Catholic Societies were held today in Carnegie Music Hall the first to perfect organization and the second to hear the reports and addresses of the officers.

NEW TREATY WITH ARGENTINA.

Buenos Ayres, Aug. 9.—A treaty was signed today between the United States and Argentina, dealing with reciprocity and naturalization.

MANY SNUG BERTHS MAY BE VACATED.

Wave of "Efficiency Tests" Extends to the Treasury Department at Washington, and It Is Announced That the Proposed Reform Will Be Sweeping

Washington, Aug. 9.—The wave of efficiency tests started in the department of commerce and labor has struck the treasury department, where it is even more sweeping. Before leaving today for his summer home in New Hampshire, Secretary MacVeagh appointed three assistant secretaries as a commission to work out the reform. Cards were sent to every employe. Each chief of division must report concerning his employes, and each employe must report concerning himself or herself. The cards cover a host of subjects, including the quantity and quality of the work performed.

Many appointees have obtained their places through political influence. Promotions have been urged for them, greatly to the annoyance of the officials. When such instances arise the secretary now writes to the division chief as follows: "Please say to John Doe that I am confident he is not responsible for the large number of persons visiting the department in the interest of his promotion, because he doubtless is familiar with the executive order on that subject, of which I enclose a copy." The order, issued by former President Roosevelt, forbids employes to use outside influence to gain advancement.

CROP REPORT DISAPPOINTS.

Stocks Decline After the Favorites Have Attained New High Levels.

New York, Aug. 9.—United States Steel, 78 1/2; Union Pacific, 205; Reading, 163 1/2; Atchafalaya, 120 1/2; Great Northern, 86—these were today's record prices for the leading favorites in the stock market. The three first issues absorbed an overwhelming proportion of the day's dealings. The only particular influence bearing on these movements was the news that the remaining holdings in the Union Pacific treasury of Great Northern ore certificates and of Northern Pacific and Great Northern preferred had been marketed, thus adding to the enormous free cash in the hands of the Union Pacific. The inference drawn from this was that the block of Great Northern ore certificates that had been overhanging the market with threatening effect having been absorbed, the stock was entitled to a rise. The profit indicated to the Union Pacific helped that particular stock also.

The hope of benefit to the Texas cotton crop through Saturday's and Sunday's rains was reflected in the downward plunge of cotton, and the stocks of the railroads having large cotton traffic responded. The rise in the London price of copper led to benefit Amalgamated, but American Smelting and National Lead were among the early strong features. Expectations have been high of the favorable character of the government crop report, but the report was a disappointment, especially in the estimate of the condition of corn. The prospects of this crop have been called very brilliant in the trade, but the sharp decline in the condition figures reported by the agricultural department—84.4 on Aug. 1, compared with 80.3 on July 1—failed to bear out these predictions. Profit-taking sales, therefore, instead of meeting an increased demand, encountered competitive selling, and the prices broke sharply to below last night. Heavy short covering rallied the market, but the closing tone was irregular. July 1, the increase in the indicated yield of winter wheat helped to counteract the effect of the corn showing.

The outside demand for stocks coming into the market at the opening of the week, as well as the attractive strength shown last week, proved moderate and the prices reacted under the burden of the selling to realize. The recovery to the top prices in a limited number of stocks did not induce a very general response. Call loans were firm as a consequence of the considerable increase in the surplus reserves of the banks made by last week's decline in cash holdings. The rate was higher than touched since the second week in June.

Department of Agriculture Summary.

Washington, Aug. 9.—An indicated winter wheat yield of 432,920,000 bushels compared with 47,908,000 bushels as finally estimated last year. An average quantity of winter wheat of 90.3 per cent, against 90.1 a year ago; of corn, 84.4, against 82.5; of spring wheat, 91.6, against 80.7, and of oats, 85.5, against 76.8. This summarizes today's crop report of the department of agriculture.

HOT WEATHER IN THE EAST.

Mercury Climbs to 93 at New York, and to 98 at Philadelphia.

New York, Aug. 9.—The thermometer in the weather bureau, 150 feet above the street, registered ninety-three degrees at three this afternoon. It was the hottest day of the summer. Prostrations were continually reported, and four infants and one old man died from heat at the seashore. It was ninety-three at Coney Island also.

WESTERN HANDICAP SHOOT.

St. Paul, Aug. 9.—Many of the marksmen gathered here for the Western handicap shoot had practice shooting today. Sam Hamilton, with a score of ninety-nine out of a possible 100, was high man. W. H. Hess had 98, and F. G. Bills, S. A. Huntley, W. R. Crosby, R. D. Guthill, H. G. Taylor and J. L. D. Morrison each had 97.

PROMINENT SOUTHERN BANKER.

Louisville, Ky., Aug. 9.—Theodore Harris, president of the Louisville National Banking company, and one of the most prominent bankers of the South, died tonight.

CRETAN SITUATION STRAIGHTENED OUT

Greek Flag Which Was Hoisted the Day Following the Evacuation of the Island by International Troops Is Hauled Down.

Replying to the Ultimatum of the Sublime Porte, the Government at Athens Gives Assurance That It Is in No Way Implicated in the Annexationist Movement, and Declares Its Purpose to Maintain and Increase Its Friendly Relations With Turkey.

Crete, Island of Crete, Aug. 9.—The Greek flag, which was run over the fortress and the Cretan military barracks July 27, the day after the evacuation of the island by the international troops, was lowered today, as a result of the protests of the four protecting powers.

Athens, Aug. 9.—The Greek government today replied to Turkey's note, asking Greece to express disapproval of the annexation agitation in Crete, and formally declared that she had no ambitions regarding the island. The reply reaffirms Greece's intention of maintaining neutrality, but declares that it would be beyond her lawful capacity

Upper Peninsula Resuming Logging Operations—Ex-Mayor M. Perron of Escanaba is about to resume logging operations in a tract of timber owned by him near Per-

been laid for \$4.00. Catch basins are cleaned for \$1.12 each, compared with a former cost of \$1.40. The cost of sewer construction has been reduced from 13.2 cents per lineal foot to 9.9 cents.

A Detroit lawyer who has analyzed the new liquor law finds it full of weak spots. He insists that the provision which makes a second conviction for violation thereof work a revocation of the offender's license is unconstitutional, as it imposes a cruel and unusual punishment for the offense.

A New Grasshopper Tale—Reports of deprivations committed by grasshoppers have been coming in from various parts of the peninsula, but the story now being related by Poor Commissioner F. M. Olmsted, of Delta county, outflows the grasshopper tale that has yet come to light.

A Miniature Coney Island—Back of charges filed against Mrs. Alice Hill and her son, Ted, who were arraigned before Justice Rannels at the southern part of Chippewa county, is a miniature Coney Island. Mrs. Hill and son waived examination and were bound over to the circuit court on a charge of violating the liquor law.

Under the sweating summer sun he stood in the middle of the blistered street. "Gone!" he shouted, wildly. "Gone! Gone! Gone!" Ten strong men emerged from under a sheltering awning and offered their sympathy.

Business Opportunities INFORMATION WANTED—Regarding investment opportunity, where few thousand dollars can be profitably invested. Will sell for anyone having stock for sale in industrial or mining proposition. No liquor proposition considered. Address by mail, E. F. Kennedy, 571-1/2, 46 West Monroe St., Chicago, Ill. 8-10-09.

Another angle has been given to the Ironwood bank scandal by a suit brought by one Joshua Hetherington and other claimants against the defunct bank and several business men and firms, with the purpose of having the alleged beneficiaries of the bank's mismanagement held responsible for the full amount of the claims against it.

Has Heard Something. At last Walker, of Boston, has got it about straight in his "weekly copper letter" concerning Superior & Pittsburg's cost of production. In the one dated the 6th he gives this information relative to what the company is now doing:

Excitement at Alms House—By lighting a match, Julia Latondar started a little excitement in the Chippewa county poor house, which for a while looked as though it might result in a fire.

Copper Country

BIG WHALEBACKS ON ROCKS.

Steamer Pathfinder and the Sagamore Aground at Eagle River.

The steamer Pathfinder and consort Sagamore, two of the largest whaleback craft on the great lakes, went aground on a reef off Eagle River at 5 o'clock yesterday morning. The accident was due to fog, and Captain Alfred Nutting of the Pathfinder asserts that it would have been avoided had there been a fog whistle at Eagle River.

SERIOUS ASSAULT IN LAURIUM.

August Orth May Have to Face Charge of Attempt to Kill.

A Sunday evening riot on Lake Linden avenue, in Laurium, resulted in John Harrington being taken to the Calumet public hospital with a broken head and the arrest of August Orth on what may develop into a serious assault charge. Orth was charged with being drunk and disorderly, and was yesterday sent to the county jail for six days by Justice Smith, but on the result of Harrington's injury will depend the further action of the authorities against him. It is said that Orth and Harrington got into an altercation Sunday evening, while both were intoxicated, and that Orth knocked Harrington down and then hit him on the head with a rock. It was believed yesterday at the hospital that the man's skull was fractured.

KEWEENAW COURT JURY.

Petit Jurors for Next Term of Court in That County Selected.

Justice Chapman and his jury in Eagle River on Friday last and assisted in drawing the jury for the next term of the circuit court, which will convene on Monday, Aug. 23. Contrary to Keweenaw's usual custom there will be work for the jury, as there are civil and other cases which will take up attention. The following names have been drawn to serve at the coming term:

OSCEOLA MINERS' OULING.

Charity Fete Similar to the C. & H. Men's Picnic Is Planned.

Prompted by the success of the Calumet & Hecla miners' annual picnic and the pleasure arising from such a big gathering, the Osceola miners have decided to arrange for a similar annual event. Representatives of the men called the Osceola officials Saturday night with the suggestion of such a fete, and the officials were pleased to acquiesce. The Osceola miners have now appointed committees to confer with the men at the North and South Keweenaw properties, which will be held at the picnic. They will undoubtedly do so.

The Fountain Head of Life Is The Stomach

A man who has a weak and impaired stomach and who does not properly digest his food will soon find that his blood has become weak and impoverished, and that his whole body is improperly and insufficiently nourished.

Dr. PIERCE'S GOLDEN MEDICAL DISCOVERY makes the stomach strong, promotes the flow of digestive juices, restores the lost appetite, purifies and enriches the blood. It is a great blood-maker, flesh-builder and restorative nerve tonic. It makes men strong in body, active in mind and cool in judgment.

This "Discovery" is a pure, glyceric extract of American medical roots, absolutely free from alcohol and all injurious, habit-forming drugs. All its ingredients are printed on its wrappers. It has no relationship with secret nostrums. Its every ingredient is endorsed by the leaders in all the schools of medicine. Don't accept a secret nostrum as a substitute for this time-proven remedy or know your own good.

Y. M. C. A. TRACK MEET.

Athletes of Houghton and Keweenaw Counties Are Invited.

Announcement was made yesterday that the Calumet Y. M. C. A. will hold a big track and field meet at Athletic Park on Labor Day, Sept. 6. The events will be open to amateur organizations in Houghton and Keweenaw counties and will probably be participated in by the A. O. H. team and the other organizations which were concerned in the recent athletic meet at Hancock under the auspices of the Bibernians. In this meet the Calumet Y. M. C. A. was the victor, and the cup representing that honor now deposes that of the secretary's desk in the association building.

ATLANTIC.

The management of Atlantic Mining company proposes to drift from its lower levels in Section 16 towards the Superior boundary, in an effort to locate the Baltic lode.

The production of the outside Lake Superior mines controlled through stock ownership by Calumet & Hecla, now amounts to 60,000,000 pounds per annum, of this amount Osceola is contributing 27,000,000 and Alameda 13,000,000 pounds—the two biggest money earners. Of this 60,000,000 pounds, there accrues to the benefit of Calumet & Hecla 23,000,000 pounds, which, together with the 84,000,000 pounds produced by the parent company itself, brings the big company's total up to 110,000,000 pounds per annum, a figure quite surpassing all previous records. The monthly outputs now deposes that of the secretary's desk in the association building.

RESIGNATION IS ACCEPTED.

Pastor Linn Severs Connection With Presbyterian Church Sept. 1.

At a meeting of the congregation of the Houghton Presbyterian church Sunday day evening, the resignation of the pastor, Rev. John M. Linn, was presented and accepted. It will go into effect Sept. 1. The congregation has named a committee consisting of Hon. Norman W. Hayes, John J. Zealand and Charles H. Moss to get in connection with the Presbyterian church in selecting the new pastor. Mr. Linn has been in Houghton the past two years and his departure will be regretted.

OSCEOLA M. E. ANNIVERSARY.

The first anniversary of the reopening of the reworked Osceola M. E. church was celebrated Sunday with special services, which were largely attended. The services were held at 10 o'clock in a preliminary way. The offering taken up at the three services will be used in defraying the expense of constructing a concrete approach to the church. Rev. A. E. Healy, the pastor, was assisted by Rev. W. H. Wilson, who preached in the morning, and by Rev. Mr. Hewson of Painesdale who preached in the evening. The afternoon service was for the Sunday school. There was special music by an augmented choir at all services.

COPPER RANGE.

There is little to report concerning the operations of the Copper Range companies, and aside from a turn for the better noted in the Tribune several months ago, and which betterment continues to hold, nothing else materially affecting the properties has developed. A condition that is not exactly an improvement, though none the less important, is noted in drifts south from the main shaft in the Clifton which are in considerably over 1000 feet in first-class copper ground. The territory which these drifts are developing will eventually be tapped by a new shaft, timber for which is already on the ground for operations. The Baltic ore in time to produce average results and with an appreciable change from conditions noted in the past. Both Champion and Baltic are maintaining a steady output of rock and are milling between 67,000 and 70,000 tons monthly, the output of the Clifton which is from nineteen pounds to twenty-six pounds fine copper per ton of rock stamped and that from the latter holding between twenty-one pounds and twenty-five pounds per ton of rock stamped. Triniton is milling about 28,000 tons and securing an average yield of between sixteen and eighteen pounds fine copper per ton of rock. Though the improvement in Triniton is probably more marked in the territory commanded by the Nos. 2 and 3 shafts, the average obtaining in the northerly, or No. 4 shaft, and below the eleventh level is easily the best in this mine and compares most favorably with many of the best stretches of copper ground opened in either Baltic or Champion.

GRANBY CONSOLIDATED.

According to recent despatches from Phoenix, B. C., the Granby has commenced extensive development work looking to increasing the future possibilities of the property. Heretofore the ores from the Granby, which has already several millions of tons, have been taken from the workings in the Knob Hill, Old Innesides, Victoria, Gold Drop and Cudlow properties, which have been developed one after another until they are now practically one mine, with miles of tunnels, along which electric tram cars carry the copper rock to one or the other of the four big crushers or crushers. The Monarch claim, which lies in the south of the Gold Drop, is the newest property to be included in Granby's shipping area. It is one of a group of claims acquired some few years ago, and which, as the Granby has been linked to the Monarch, Bank of England and other adjoining claims. The Monarch has already been extensively diamond drilled.

COPPER CONSOLIDATION RUMORED.

Concerning reports that the Cole-Ryan interests are negotiating for extensive mining properties in Houghton, Utah, into the Utah Copper company, the Salt Lake Tribune says: It has been learned that the Cole-Ryan interests have even greater plans under consideration than the mere taking over of this one great property. Those operators are said to be considering the acquisition of the Massey tunnel, in addition to the Ohio Copper, and it is definitely understood that they have been negotiating also for the Boston Consolidated. This is taken to mean that if they succeed in taking over the Ohio Copper and

the Massey tunnel they will in all probability extend the tunnel into Boston Consolidated territory, and that they have carefully considered the advisability of combining the Ohio Copper and Boston Consolidated under one head. Samuel Newhouse, president of the Boston Consolidated, did not appear to know anything of the deal. He admitted that there had been a great deal of talk about the Utah Copper and the Boston Consolidated joining interests, but that so far as he knew in an official way, the matter had not been discussed. The immediate effect of the continuation of the Massey tunnel through the mineralized porphyry zone of the Utah Copper and Boston Consolidated should be that it would demonstrate the presence of millions of tons of ores, which have not yet been fully proved, and which would result in the assurance of many more years of active productive operations on these great properties.

DAVIS-DALY.

It is reported from Butte that the Davis-Daly company has developed five or six veins on the 1,400-foot level and that one of these is twenty-two feet wide and contains ore that makes it valuable. It is said to be open between 400 and 500 feet, and it should be opened on the next level within a month or six weeks. Reports circulated from the mine indicate that the managers of the property hope to find their best values in the lowest levels. There is talk about the cost of transportation and reduction of the ore of the company, and some people believe that a reduction in this could be effected. The company pays thirty-five cents a ton to haul the ore to the railroad and \$3 a ton to the smelter, which means a gold return when they fall lower than half a dollar a ton. It is suggested that better facilities could be provided and this expense lessened.

AZTEC.

The stockholders of the Aztec Copper company, of Michigan, at a meeting held yesterday afternoon voted to change the name of the company to the South Lake Mining company and to increase the share capital from 40,000 shares to 100,000. Of the 60,000 new shares, it is proposed to immediately issue 20,000 shares to the stockholders of record yesterday, in the proportion of one new share for each two shares then held. The subscriptions will be payable Sept. 15. With the \$40,000 secured from the sale of the new stock the company proposes to begin diamond drilling on the level of the present outstanding shares, there has been \$400 a share paid in.

NOTES OF COPPER NEWS.

All arrangements have been completed for the installation of electric power at the Boston & Cobden mines, and Manager Emerson says that the change will be finished by Sept. 15. The Anaconda company is mining copper glance from the 2800-foot level of the High Line mine, the deepest workings in Butte, and the report from the property is that the vein is opening big. The fire and smoke troubles in the Anaconda mine for the present are thoroughly controlled by bulk-bearing of openings. For months there has been no trouble and mine is likely until the ground shifts again and opens new cracks into the fire hole. The shaft of the Badger State, which is being sunk by Boston & Montana, is down 1,300 feet and sinking is still going on. The Badger State has the extension of the Jessie vein of North Butte and the workings of the latter vein will be connected with the Badger State.

OJIBWAY MINE PHYSICIAN.

Dr. J. R. W. Kirtton, of the Phoenix, has been appointed physician of the Ojibway Mining company. As soon as the doctor can secure a house he will remove to the mine, and he will attend to his other practice from there.

HUSBAND'S NOVEL PLEA.

Denver, Aug. 9.—O. C. Rogers offered a novel plea in answer to a charge of non-support made by his wife, Barbara B. Rogers, in court here. He said Mrs. Rogers had blood from a diseased man injected into his veins, which nearly caused his immediate death, and has caused him a cripple for life. This prevented from performing manual labor. He pleads that his wife cannot compel him to support her, because she is a young man, says that he was a mere boy, and when she was already the mother of five children by a former husband.

SAYS WIFE HAD OLD MAN'S BLOOD INJECTED INTO HIS VEINS.

Denver, Aug. 9.—O. C. Rogers offered a novel plea in answer to a charge of non-support made by his wife, Barbara B. Rogers, in court here. He said Mrs. Rogers had blood from a diseased man injected into his veins, which nearly caused his immediate death, and has caused him a cripple for life. This prevented from performing manual labor. He pleads that his wife cannot compel him to support her, because she is a young man, says that he was a mere boy, and when she was already the mother of five children by a former husband.

PLANT MOVED TO TEXAS.

W. H. Stark, a wealthy yellow pine manufacturer of Orange, had taken an interest in the experiments that were being conducted at the Mobile plant, and when it was finally shut down as impractical other lumber manufacturers of Eastern Texas in the project and they prevailed on the machinery of the plant, later removing it to Orange, where it was installed in new buildings erected for the exclusive use of the mill.

THE UTAH COPPER COMPANY IS OUTPUTTING ABOUT 50 PER CENT OF THE METAL COMING FROM THE MINE OF UTAH EACH MONTH.

The present workings have advanced to the point where the management figures the total cost of production at less than three cents a pound. At the present rate of production the company is believed to be making more than \$200,000 per month. Boston Consolidated has reduced its operating expenses at the mine within the past two months and is now said to be taking out its ore at the lowest cost since the company started on its career as a producer. It is asserted that the Boston Consolidated is now earning between \$40,000 and \$80,000 per month, its monthly earnings are expected to increase since \$20,000. A despatch from Butte, dated yesterday, says: The Butte stockholders of the Butte Coalition are wondering why the company has taken the position it has on the dividend question. From an official quarter it has been learned

THE CITIZENS NATIONAL BANK. CAPITAL \$50,000.00. You Obtain the Advantages of a thoroughly reliable banking service and perfected facilities by having an account with the Citizens National Bank, subject to check. Prompt attention and courteous treatment to all.

ESTABLISHED 1880. PAINE, WEBBER & CO. BANKERS AND BROKERS, BOSTON, MASS. Direct Private Wires to All Markets. Curb Stocks Given Special Attention. Marquette Office, W. H. Schweitzer, Resident Manager. We solicit your stock business. Our daily quotation sheet and market letter sent for the asking. Office open from 7:30 a. m. to 8 p. m.

that the directors have decided to pass the dividends indefinitely, although the treasury is able to pay a dividend and the mine has been earning profits for a year. It is said that the directors favor waiting until they can issue a large dividend but when that will be nobody knows.

The market has taken very little interest in the progress of actual improvement in the Old Dominion mine, but it is claimed that the conditions now show that the vein at the fourteenth level will rival in size and richness anything on the property. The water has been drained from the twelfth and thirteenth levels by pumps at the fourth level, and the opening of this level can now continue into the western portion of the mine. It is estimated that the vein which now comes from the yellow pine lumber mills is sufficient to keep more than 1,000 paper mills of the capacity of the Orange plant in constant operation. All present refuse goes to the burners and slab pits of the mill. At one place the refuse receives its supply of slabs, shavings and sawdust from the adjacent mills at very low cost. The lumber mills are so near at hand that the cost of transportation is insignificant.

PAPER BEING MADE FROM YELLOW PINE.

The utilization of what has heretofore been considered a waste product of the yellow pine lumber industry is of great importance. It is predicted that it will not be long until a number of other paper mills are established in the yellow pine timber region. Some of the large lumber manufacturers are considering the advisability of establishing their own plants in order to obtain the profit from the waste material that comes from their mills. The establishment of these mills will cause employment to be given to many skilled laborers. In the Orange region about sixty-five men are employed at the present time, the number will be more than doubled when the capacity is increased as proposed.

SECRET PROCESS ELIMINATES THE TURPENTINE FROM THE PULP.

The utilization of what has heretofore been considered a waste product of the yellow pine lumber industry is of great importance. It is predicted that it will not be long until a number of other paper mills are established in the yellow pine timber region. In the Orange region about sixty-five men are employed at the present time, the number will be more than doubled when the capacity is increased as proposed.

NEW INDUSTRY IN SOUTH.

Orange, Tex., Aug. 8.—The manufacture of paper from yellow pine has made a big success. The only paper mill of this kind in the world is situated at this place. It was only after constant experiments covering a period of twenty years that practical results were obtained in the manufacture of high-grade wrapping paper from the yellow pine pulp. The slabs, shavings and sawdust of the yellow pine lumber mills around Orange are used in the manufacture of this paper.

INDIAN CAMP MEETING.

Annual Encampment of Red Men Will Be Held at Pequaming This Month.

The annual encampment of the Indians of northern Minnesota, Wisconsin and the upper peninsula of Michigan will be held at Pequaming for ten days commencing Saturday, Aug. 21. Between 500 and 400 Indians are expected to be in attendance. The encampment will be held under the auspices of the Methodist Indian mission, Rev. C. H. Merrill, who is the pastor in charge at Pequaming, is now engaged in preparing the program, and a very successful encampment is predicted.

ALIENS HAVE UNTIL WEEKDAY IN WHICH TO ARRANGE TO BECOME CITIZENS.

Houghton county aliens have until Saturday afternoon of this week, Aug. 14, in which to file applications for admission as full-fledged United States citizens at the November term of circuit court. Up to noon yesterday there had been but thirteen applications posted for the November term, as against about seventy-five posted for the September term, which convenes the middle of next month. However, the court is always in full session during the naturalization business, because of the close proximity of the term to the September session of court. The final applications for admission in September were posted by County Clerk Louis H. Richardson in June, since which time additional applications have been posted for hearing in November.

Y. M. C. A. BOYS' CAMP.

Physical Director Sherwood of the Y. M. C. A. left yesterday morning to join the boys of the association in camp at Eagle Harbor. He will stay there until Friday, when the camp will be broken up and Secretary Westernman and the campers will return home. The camp has been in progress for more than a week. About forty boys are there. The youngsters have fishing, boating, swimming and hikes, good food and fresh air and will return braced and happy and probably tired. The Calumet Y. M. C. A. boys' camp will be a permanent institution.

COLLECTING VILLAGES TAXES.

Village Treasurer Andrew Weir of Houghton has collected towards \$20,000 in taxes for this year, out of a total roll of slightly over \$31,000. Mr. Weir has been collecting only since July 15, and as taxpayers have up to Oct. 1 in which to make payment it can be seen that the record this year is a good one.

OSCEOLA MINERS' OULING.

Charity Fete Similar to the C. & H. Men's Picnic Is Planned.

Prompted by the success of the Calumet & Hecla miners' annual picnic and the pleasure arising from such a big gathering, the Osceola miners have decided to arrange for a similar annual event. Representatives of the men called the Osceola officials Saturday night with the suggestion of such a fete, and the officials were pleased to acquiesce. The Osceola miners have now appointed committees to confer with the men at the North and South Keweenaw properties, which will be held at the picnic. They will undoubtedly do so.

FAT MEN'S ANNUAL BALL GAME.

Portage Lake Challenge Accepted by the Laurium Mastodons.

The doughty fat men of Houghton county will engage in their annual struggle for baseball supremacy in Calumet and Laurium this month. The frequent challenges and counter challenges have finally resulted in arrangements being made for a game to be played between the Portage Lake and the Laurium Mastodons, probably in the Laurium District. A definite date for the contest has not been determined. It is likely that the match will take place the last week of the month. As usual, the proceeds will be given to charity. There will be no charge when the two teams meet together. The Laurium fans, proud of their Calumet championships which adorn their belts, will do their utmost to maintain their prestige against the Portage Lake challengers. Jack Roehm has been retained as pitcher. Alex. Stinson, captain of the Portage Lake team, is collecting an aggregation of world beaters, and he anticipates no trouble in annihilating the opposing nine.

TREAT ROAD WITH OIL.

Township Highway in Mohawk One of the Finest in the State.

What is today one of the very finest roads in the state—that extending northward from Mohawk—is being made still better. The township authorities having given a contract to the Standard Oil company to apply to it a car-load of oil dressing. Work has been started at the lake corner at Mohawk, and about two miles of the highway will be treated this way. The oil dressing is a mixture of crude oil and asphalt, containing 20 per cent of the latter. It requires from one-third to one-half a gallon of the mixture per square yard, and it will take about four days to finish the job. The road is in the best of shape and is kept off to one side, and the mixture is swept applied by a hose attached to a tank wagon. The oil is spread evenly over the road with heavy brushes, after which the fine stuff is swept back again, the oil being allowed about a half day to settle. Without a top covering, the road will sustain a weight of five tons, may not break like tile culverts, and, being galvanized, will never rust. This is the first township in the copper country to adopt the improved metallic culverts to the exclusion of all others.

TAKE NOTICE.

All persons are recommended to take Foley's Kidney Remedy for backache, rheumatism, and kidney and bladder trouble. It will quickly correct urinary irregularities, which, if neglected, may develop into a serious illness. It will restore health and strength. Do not neglect signs of kidney or bladder trouble and risk Bright's disease or diabetes. Sold by All Druggists.

Mining News

COPPER SITUATION STRONG.

Despite the fact that the world's copper statistics show available supplies in excess of 300,000,000 pounds, the producers of large quantities of the metal repeat their long held views that the situation is sound and a fourteen-cent price is not far away. With the world's total stock in the surplus stocks of copper reported by the Copper Producers' association will be made known by today's statement is generally conceded, and the estimates of the largest producers run as high as 200,000,000 pounds, which would practically offset the increase in the visible supplies in Europe for the same period—the month of July. A 50,000,000-pound producer says that on the first of August his stocks on hand were materially less than on the first of the preceding month.

GRANBY CONSOLIDATED.

According to recent despatches from Phoenix, B. C., the Granby has commenced extensive development work looking to increasing the future possibilities of the property. Heretofore the ores from the Granby, which has already several millions of tons, have been taken from the workings in the Knob Hill, Old Innesides, Victoria, Gold Drop and Cudlow properties, which have been developed one after another until they are now practically one mine, with miles of tunnels, along which electric tram cars carry the copper rock to one or the other of the four big crushers or crushers. The Monarch claim, which lies in the south of the Gold Drop, is the newest property to be included in Granby's shipping area. It is one of a group of claims acquired some few years ago, and which, as the Granby has been linked to the Monarch, Bank of England and other adjoining claims. The Monarch has already been extensively diamond drilled.

COPPER CONSOLIDATION RUMORED.

Concerning reports that the Cole-Ryan interests are negotiating for extensive mining properties in Houghton, Utah, into the Utah Copper company, the Salt Lake Tribune says: It has been learned that the Cole-Ryan interests have even greater plans under consideration than the mere taking over of this one great property. Those operators are said to be considering the acquisition of the Massey tunnel, in addition to the Ohio Copper, and it is definitely understood that they have been negotiating also for the Boston Consolidated. This is taken to mean that if they succeed in taking over the Ohio Copper and

ALIENS HAVE UNTIL WEEKDAY IN WHICH TO ARRANGE TO BECOME CITIZENS.

Houghton county aliens have until Saturday afternoon of this week, Aug. 14, in which to file applications for admission as full-fledged United States citizens at the November term of circuit court. Up to noon yesterday there had been but thirteen applications posted for the November term, as against about seventy-five posted for the September term, which convenes the middle of next month. However, the court is always in full session during the naturalization business, because of the close proximity of the term to the September session of court. The final applications for admission in September were posted by County Clerk Louis H. Richardson in June, since which time additional applications have been posted for hearing in November.

Y. M. C. A. BOYS' CAMP.

Physical Director Sherwood of the Y. M. C. A. left yesterday morning to join the boys of the association in camp at Eagle Harbor. He will stay there until Friday, when the camp will be broken up and Secretary Westernman and the campers will return home. The camp has been in progress for more than a week. About forty boys are there. The youngsters have fishing, boating, swimming and hikes, good food and fresh air and will return braced and happy and probably tired. The Calumet Y. M. C. A. boys' camp will be a permanent institution.

City Brevities

Today's weather: Partly cloudy; stationary temperature.
Yesterday's temperature: Seven a. m., 64 degrees; noon, 71; 7 p. m., 72. Maximum, 73 degrees; minimum, 64.

Miss Gladys Bernard is visiting in Munising.

A. T. Roberts went to Houghton on the Japan last evening.

E. Meredith left last evening on a business trip to Duluth.

R. E. Mahaffey went to Chicago on business last evening.

A daughter was born to Mr. and Mrs. Frank LaBonte last Wednesday.

M. J. Griffin recently lost a valuable case between Marquette and Eagle Mills.

Miss Agnes Pelissier is visiting with her grandparents, Mr. and Mrs. A. J. Pelissier.

Miss Mae Richardson, of Duluth, is in the city spending a month or more with relatives.

Frank McNutt, who has been employed by W. J. Lupton, the barber, left yesterday for Detroit.

F. H. Begole will leave this morning for a business trip to Boston of a week or ten days' duration.

Tim Sullivan, of Detroit, who is well known as the associate of Tim Noster, was a Marquette visitor yesterday.

Joseph E. Courtney left last evening for a business trip to Chicago. He will be home the latter part of the week.

Mrs. Catherine Bennett and Mrs. B. S. Rice went to Chicago last Saturday for a visit with relatives and friends.

Mr. and Mrs. L. N. Wilson, of Erie, Pa., arrived on the Japan last night to visit with Mr. and Mrs. Wm. June and Mr. and Mrs. C. A. Carr.

Miss Carrie Eglolf, who recently resigned as chief operator for the Michigan State Telephone company at Lake Linden, is in the city and expects to make her home here.

Mrs. H. D. Pelton has returned to Milwaukee, after spending five weeks with friends in the city. Mr. Pelton will go to Superior to take a position, where his wife will join him later.

Mrs. Will Tucker, of Beloit, and her son Philip are visiting with Mr. Tucker's parents, Mr. and Mrs. George Tucker, on Arch street. Mrs. Tucker will be here until some time in September. She will be joined by her husband in about two weeks, who will spend his vacation in his home city.

Fined for Assault—Frank Crothers, of Yalmar, was fined \$5 and costs by Justice Byrne yesterday for assault and battery upon Edward Hanna. The assault occurred at Yalmar Sunday and is said to have grown out of trouble between the children of the two families.

Shipped to Buffalo—The remains of Frank Moore, who died at the county jail last week, were shipped to Buffalo last evening, at the request of the late man's niece, Mrs. Green, who resides in that city. Moore was a well-known character about town, and his death was due to the excessive use of alcoholic beverages.

V. N. A. Meeting—The August meeting of the Visiting Nurse association was held yesterday afternoon, but little business of interest was transacted. As Miss Bronson is out of the city on her vacation, the monthly report of the visiting nurse was omitted. The relief committee expended \$125.40 during the month of July.

With the Ore Boats—At the L. S. & I. dock, the Frontenac cleared for Toledo, the Crete for Cleveland and the W. S. Mack for Buffalo. The Western Star is loading and the Owen and Reese were due last night. At the South Shore dock, the Corona cleared for Cleveland and the Hayward is loading. The Warriner is unloading coal at the Pickands dock.

M. C. M. Team Coming—Manager Fox stated yesterday that there would be a Saturday game this week between the Marquette team and the regular Michigan College of Mines team. This team is considered a very strong one and is said to have been defeated by but one copper country team, the semi-professional Wolverines. Inasmuch as there is no Sunday game here this week, the Saturday game should draw a large crowd.

Grounded Off Whitefish—The captain of the steamer Japan stated while in port last evening that as he was coming around Whitefish point yesterday morning, he noticed a large 600-foot freighter aground near the beach. No distress signals were displayed and the Japan did not pass near enough to make out the name of the boat. It was very foggy at the Soo Sunday night, the captain said, which was probably the cause of the accident.

Stork Has Been Busy—Thirty-four births have been recorded with the city recorder for the month of July, which is thought to be the largest number recorded in any month since the records have been kept in their present form. The annual number of births in this city for the past two years has been a little less than 300, or an average of twenty-five a month. During July there were but nine deaths, which is considerably below the average.

German Aid Picnic Sunday—The members of the German Aid society and their friends will enjoy a basket picnic at Benninger's grove, at the western end of Fisher street, next Sunday afternoon. It is not intended to have a program of sports, nor any formal speech-making, but all present will be expected to make themselves at home and to join in the general merry-making. The festivities will begin at 1 o'clock. All friends of the German Aid are invited.

May Build Road Yet—Mr. Barber, who has held a franchise to build an inter-urban electric railway between Marquette and Ishpeming, was in the city yesterday with a Milwaukee capitalist, whom he is trying to interest in financing the proposed road. The two went over the proposed route yesterday, and talked with a number of local men regarding the traction situation. Mr. Barber's franchise expired last December, and under the new constitution, another cannot be granted except by vote of the people of the city at a regularly called election.

WEDDED AT LAKE GOGEBIC.

A very pretty home wedding occurred Saturday, Aug. 7, at Lake Gogebic, when Miss Marie Anderson became the bride of Edwin Borseth. The ceremony was performed under a canopy of ground pine and sweet peas by the Rev. H. E. Allen, D. D., of Washington, D. C. Lohengrin's wedding march was played by Miss Loe Harrgrave as the bridal couple entered the parlor, in which room the nuptial ceremony took place.

The bride wore a beautiful gown of crepe de chine, trimmed in Duchess lace, and carried a shower bouquet of white roses and sweet peas. She was attended by her sister, Anna, who was gowned in white silk and carried pink carnations, while her little sister Lillian, dressed in blue silk, acted as flower girl. The groom was attended by Henry Barthel of Bergland.

Ground pine and sweet peas were the floral decorations of the parlor, while carnations were used by the dining room, where about fifty guests partook of a splendid supper. The Bergland band rendered a delightful concert during the evening. The bride and groom left on the midnight train for Niagara Falls and other Eastern points. The wedding gifts were many and beautiful.

Among the out-of-town guests were Mrs. Gross Anderson, Mrs. T. M. Sorenson, Miss Mable Anderson, Ole Peterson and Herbert Johnson, of Marquette; Mrs. P. Peterson and three children and Andrew Grossen, of Houghton; Miss Ann and James Jacobson, of Republic; Miss Jennie Thompson and Miss Emma Anderson, of Michigan; Mr. and Mrs. W. Charlesworth and daughter, of Mountain Iron, Minn.; Mr. and Mrs. O. Borseth and son, Mr. and Mrs. P. A. Johnson and H. Scott, of Bergland.

Upper Peninsula

Sunstroke Kills in Menominee County—

John Dunn, a farmer just outside of Faithorn, Menominee county, was found dead in a field on his farm. Life had been extinct for several hours. Dunn resided alone, and outside of a sister, in Chicago, is not thought to have had any other relatives. He was a silent, taciturn man, about fifty years of age, and not much is known of his private life. The coroner states that death was caused by sunstroke.

Long Service Appreciated—

In recognition of fifteen years of continuous service as finance keeper for Escanaba hive of the Ladies of the Modern Macabees, Mrs. John Vassaw has been presented with a handsome gold handled silk umbrella by the members of that organization. Mrs. Vassaw will leave today with her husband and family to locate permanently in the West and on that account she gave up her post in the hive.

Soo Men to Make Whips—

Edgar J. Swart and A. E. Rummels are arranging to open a whip factory in the Soo. "It is true that we are contemplating the manufacture of whips," said Mr. Swart. "Our plans are not completed, but we expect to get under way here in a short time. I think there is a good opening for an industry of that kind in this part of the country." So far as known the only factory in Michigan that makes whips on an extensive scale is located at Belding. It is said to be a prosperous concern. The Soo concern will start in a small way and enlarge as the business demands.

Gold-Headed Cane for Judge Stone—

The members of the Menominee Bar association met in the offices of A. L. Sawyer for the purpose of determining upon some method of showing their respect and affection for Judge Stone at this year's session. A. L. Sawyer, on behalf of the Bar association, will present Judge Stone with a handsome gold-headed cane, as a token of appreciation of his services as judge of the district for so many years.

Fayette's Rehabilitation—

M. R. Horrocks of Escanaba has been awarded the contract for all shingling and painting work, included in the extensive improvement plans that are to be carried out at Fayette by the Cleveland-Chiefs Iron company. He started work yesterday and will push the operations to as hasty a completion as possible. All of the buildings at the location capable of being repaired are to be placed in excellent condition, and a large sum of money is to be expended in making Fayette the most attractive resort place in the district. Fully a half million shingles are to be used on the different buildings to be repaired and other work undertaken will be on the same scale. Nothing is to be left undone to restore Fayette to its former prestige.

Engines Raced for the Crossing—

George Smith, of Green Bay, a brakeman, was slightly injured, two engines and several freight cars were broken up and traffic was somewhat delayed by the collision of a St. Paul switch engine and a northbound Northwestern freight train. The tracks of the two railroads cross each other just above the old plant of the Diamond Match company. The two engines whistled for the right of way about the same time and slowed down so that they could be placed in excellent condition, and a large sum of money is to be expended in making Fayette the most attractive resort place in the district. Fully a half million shingles are to be used on the different buildings to be repaired and other work undertaken will be on the same scale. Nothing is to be left undone to restore Fayette to its former prestige.

Ends His Life With Poison—

Crazed, it is believed, by the intense heat while working in the woods, John Weidin took a quantity of arsenic at his home at Woodlawn, near Escanaba, and although rushed to the Delta county hospital as quickly as possible he died from the effects of the drug. According to relatives, he had been acting peculiarly several days. His family urged him to consult a physician, but he refused to do so. While his wife was absent from the house he secured a quantity of arsenic, which was kept in the house to be used in poisoning wolves, and before her return had swallowed a quantity of the drug. He became deathly sick and an attempt was made to secure a physician, but none was available and the patient was placed on a

train and rushed to Escanaba. He was twenty-one years of age and is survived by his wife and one small child. The couple had been married but slightly over a year.

Boy Shoots Himself Dead—

Lloyd Trim, sixteen-year-old son of Andrew Trim, who lives on Mimoskong bay, was accidentally shot and killed while near his home. He had secured a gun from the house and told his mother that he was going out in the boat. He had been gone but a few moments when his mother heard a shot. She ran to the boat, which was still on the beach, and found her son dead, with blood streaming from his left side. He had been shot directly through the heart and death was instantaneous. It is presumed that in climbing into the boat the youngster either stumbled or fell or the trigger caught on something as he placed the rifle in the boat.

Milk Ordinance Invalid?

Something of a stir was created at the Soo when it was discovered that the milk ordinance under which the health board has been acting and from which it has derived its power to inspect milk and refuse licenses, was unsigned by the mayor and mayor pro tem and consequently probably was invalid. An examination of the books shows that George O. Comb was acting mayor in the absence of Mayor Frank Perry. The words "pro tem" follow a space left for the proper signature. The signature of the recorder, Clyde W. Hecox, to which official all ordinances must be turned over before three days elapsed, is contained in the several required places. The only place where Mr. Comb's signature is to be found is at the end of the council proceedings for July 16, 1909, on which date the ordinance was passed. A well-known Soo lawyer has been retained as attorney by Walter Dennis, against whom the board of health has now trained its guns and who is threatened with prosecution because he refuses to take out a license.

Robert P. Hudson, secretary of the board of health, had not looked the matter up and was not prepared to make a statement as to the validity of the ordinance. "If the ordinance is invalid you can say that the health board will take immediate steps to have another one passed along the same lines, with, perhaps, some alterations which we have since found by experience are needless," said Mr. Hudson. "While this matter is being ground out the public should not lose sight of the protection afforded by the board in sanctioning the sale of milk by certain dealers. This is the time of year when danger from ptomaine poisoning is most serious and those who do not take heed and refuse to purchase milk from dealers whose milk has not been inspected are entitled to no sympathy in case disease develops. Mothers should pay particular attention to the milk they are feeding to their babies."

George O. Comb said that the ordinance had never been presented to him for his signature. "I remember distinctly now that the ordinance never reached my hands," said Mr. Comb. "I can't say why. I had no reason to avoid it and would have signed it."

WOOD AND BUILDING MATERIAL

I ALSO HANDLE Artistic Monuments COST NO MORE THAN PLAIN ONES IN WHITE BRONZE

Marble is entirely out of date. Granite soon gets moss-grown, discolored, requires constant expense and care, and eventually crumbles back to Mother Earth. Bronze is a very expensive. WHITE BRONZE is strictly everlasting. It cannot crumble with the action of frost. Moss growth is an impossibility. It is more artistic than any stone. There are several styles. It has been adopted for over one hundred public monuments, and by thousands of delighted customers in all parts of the country. It has been on the market over 25 years and is an established success. Many granite dealers have bought White Bronze for their own burial plots. Have hundreds of beautiful designs of all grades of work, and want to have you see them if you are interested in a monument, headstone, marker or grave cover. On receipt of a postal card will be pleased to call with designs and samples of White Bronze.

PELLAGRA'S SPREAD ALARMS SCIENTISTS

New Epidemic Is Rapidly Increasing in Southern States.

UNKNOWN BEFORE 1903.

Storm Center Is in South Carolina, Which Has One Thousand Cases.

Columbia, S. C., Aug. 9.—Pellagra is a new epidemic disease that has appeared in the United States and that is now engaging the earnest attention of the authorities of various states and the public health service of the United States government.

Gradually there have appeared articles in some Southern newspapers, and the attention of the medical profession has very recently been directed to pellagra in the medical journals. The alarming spread of the disease in the last year, especially during the last half year, is focalizing the attention of not only the medical profession, but of the people east of the Mississippi River, and it will soon become a topic for general discussion in the public press.

Pellagra is a disease, practically or entirely unknown as a malady in this country prior to 1903-04, but has been so rapidly on the increase, particularly in the South Atlantic states, as to cause agencies to be set at work to ascertain, if possible, its cause and appropriate methods of treatment. Inasmuch as the mortality from this disease runs very high, and as it is so frightful in its character that the victim of it endures a living death, and the symptoms are horribly repulsive, and because of the very rapid spread of the pellagrous disease, pellagra merits and is fast attracting public attention.

South Carolina Storm Center.

At this time South Carolina is the "storm center" of this dread disease. There are probably more cases in this state today than have been observed and reported in all other states combined. There are estimated to be more than 1,000 cases in South Carolina. There have been, and are, more than 200 cases at the South Carolina State hospital for the insane, and new cases are coming into it almost daily. The subject of pellagra is being discussed with great earnestness at the meetings of physicians at various points in the state, and the state board of health of South Carolina is now engaged in arranging for a pellagra conference to be held in the city of Columbia during the first week in November of this year. At this meeting it is expected there will be physicians not only from South Carolina, but from adjoining states and from Baltimore, Philadelphia, New York, Chicago and other cities in the North and West. This conference will meet at the state hospital for the insane, where hundreds of victims of the disease may be inspected.

A few weeks ago Dr. C. H. Lavinder of the public health service was sent to South Carolina by Surgeon General Wyman to make an exhaustive study of the disease. He has established a laboratory in one of the buildings of the state hospital, and has the assistance of Dr. J. W. Babcock, superintendent of the state hospital.

General Interest in Disease.

In 1907 Dr. Babcock submitted to the state board of health of South Carolina a paper relating to pellagra, which was given wide circulation and attracted widespread attention. Dr. Babcock was perhaps the first man in the United States to make a definite pronouncement relating to the disease, and to the wide circulation of his article is largely due the general interest which is now being manifested in regard to this disease.

On October 29, 1908, there was held in the city of Columbia a conference, which was attended by many physicians of the state, and the report of the papers read at that meeting is one of the few pieces of literature in the English language dealing with the disease. The demand for this report quickly became so great that the edition was soon exhausted. The report of the approaching conference will be more elaborate and comprehensive.

There is very little literature printed in English dealing with the subject of pellagra, but there is a considerable literature in Italian and in French. Among the literature on this subject in English, in addition to the report of the conference on pellagra held under the auspices of the state board of health of South Carolina already alluded to, is a monograph reprint from the New York Medical Journal for May, 1909, by Dr. J. J. Watson of Columbia, who, together with Dr. W. J. Babcock, went to Italy last year to study the manifestations of the disease in that country; the paper read by Dr. Babcock also heretofore alluded to, "Pellagra, a Preis," and No. 25 volume 24, of the government health reports, issued June 18, 1909, both written by Dr. C. H. Lavinder of the public health and more the hospital service of the United States.

Papers in Medical Journal.

Dr. Lavinder has just recently completed another paper, "The Etiology of Pellagra," which has been submitted to Surgeon General Wyman. Dr. Lavinder is probably accepted as the best authority on pellagra in the United States. A number of physicians in South Carolina in the last year have written pa-

pers, some of which have appeared in medical journals in this and in other states.

What is pellagra? The disease is only known by its symptoms. The initial symptoms as a rule are a sore mouth and indigestion, and the disease first manifests itself in the early spring. The gums and the tongue bleed, and there appear on the back of the hands and wrists and on the knees, ankles and feet discolorations which first leave the appearance of sunburn; then freckles develop, and, on the face, into inflammation of the skin like a rash. The skin becomes hard and rough. Finally the skin vesiculates and great patches of pus and of scales cover the parts. As the disease progresses the same symptoms appear on the face and forehead on the sides of the neck and even on the breast and chest. These phenomena are accompanied by extreme emaciation and by pronounced mental disturbances that develop into insanity.

Starts With Insomnia.

Usually the first thing a patient complains of is insomnia, pain in the back and neck of the neck, and there is general muscular weakness, stomaching, and marked depression. There is also inflammation about all the body orifices. About 64 per cent of the cases under observation have thus far proved fatal.

Pellagra was not recognized in the United States until within the last few years, and as early as 1903 medical authorities held that it did not exist in the United States.

In Southern Europe, and especially in Italy, this disease is widely spread, and the Italian government has been at great pains to combat it. The disease has its origin in Lombardy, and in France, is extensive in upper Egypt and has been reported from Asia Minor, Austria, Servia, Bulgaria and some other parts of Southern Europe, as well as occasionally from India, Africa, Canada, Australia, and in the last few years in the Southern states in this country and later in the Middle, Western and Northern states.

A peculiarity of pellagra is that it is not communicable from one person to another. No known remedy has been found to stay its ravages, and there has been found no specific micro-organism.

Existence Known Since 1745.

The existence of the disease has been known since 1745, in Spain; and in 1750 it first appeared in Italy. It takes its name from the Italian words "pelle," the skin, and "agra," rough. As early as 1784 pellagra had assumed so much importance in Italy that a hospital was established in the royal authority for the study of its nature.

As to the etiology of the disease, comparatively little is definitely known. There are a number of theories relating to its cause, having an apparent basis of authority, which the best of the leading states and from Baltimore, Philadelphia, New York, Chicago and other cities in the North and West. This conference will meet at the state hospital for the insane, where hundreds of victims of the disease may be inspected.

Fellows Course of Maize Culture.

The relation between Indian corn, otherwise called maize, and pellagra was noted early in the nineteenth century, and it is a coincidence worthy of note that the disease which proves a veritable scourge where it becomes prevalent, seems to have followed close upon the introduction of maize culture from America, first in Spain in 1790 and later in other parts of Europe.

Outgrew the Newspapers.

A member of a publishing house is telling a story which he says goes to show that the spread of the popular novel is constantly increasing. He was on his way from Pottsville, Pa., to East Attleboro, Mass., by trolley, and stopped off at the Little Village station at East Attleboro to get a nibble of crackers and cheese at noon. The usual rural characters were about the counter. He got into conversation with some of them and was interested to know how their political ideas ran. He sounded them along various lines and at last came to an old farmer who was sitting on a sugar barrel waiting for the mail.

CURED HAY FEVER AND SUMMTR COLD.

A. S. Nushbaum, Batesville, Indiana, writes: "Last year I suffered for three months with a summer cold so distressing that it interfered with my business. I had many of the symptoms of hay fever, and a doctor's prescription did not reach my case, and I took several medicines which seemed only to aggravate it. Fortunately I insisted upon having Foley's Honey and Tar. It quickly cured me. My wife has since used Foley's Honey and Tar with the same success." Sold by all Druggists.

Time waits for no man, but the musical conductor can beat it. If you are all run down Foley's Kidney Pills will help you. It strengthens the kidneys so they will eliminate the impurities from the blood that depress the nerves, and cause exhaustion, backache, rheumatism, and urinary irregularities, which sap the vitality. Do not delay. Foley's Kidney Remedy is at one. Sold by all Druggists.

Negaunee Department

NEGAUNEE LIKELY TO HAVE STATE BANK

MOVEMENT ON FOOT TO ORGANIZE UNDER THE LAWS OF MICHIGAN WITH A CAPITAL STOCK OF NOT TO EXCEED \$50,000.

The Mining Journal learns from a reliable source that a new bank will be organized here within a few days, under the laws of the state, which will likely be known as the "Negaunee State bank." It is planned to make it a strictly home institution, with a capital stock of not to exceed \$50,000. Those at the head of the movement are business men, who have been working on the proposition for some months—in fact for some time before Cleo Meilleur, of Ontonagon, and his associates, started soliciting for the sale of stock in a second national bank to be organized here. The applicants have been studying the situation thoroughly and believe that there is an opening here for a state bank, organized with Negaunee capital.

Mr. Meilleur is, according to a circular which he has mailed to a large number of Negaunee people, from whom solicitation for stock is solicited, working out his plans of organization. It is not known how much of the proposed capital stock of \$100,000 (exclusive of a 20 per cent premium) has been subscribed for by Negaunee people, but it is said that a few of the prominent business men are in the deal.

Mr. Meilleur's method of soliciting stock for the proposed institution has been criticized by some of the business men, all of whom are satisfied with the treatment they are receiving from the present bank. His circular is as follows:

Attacks Either Sex or Color.

While either sex is subject to the disease and it is no respecter of color, it is a noticeable phenomena in the South Atlantic states that 75 per cent of cases are among the negroes and that the great majority of those affected are negro women.

Sporadic cases of what are now believed to have been pellagra were observed in the United States about forty-five years ago. No case seems to have appeared thereafter, recognized as such, until 1902, when a number of cases were reported independently by the medical officers of Alabama and South Carolina asylums.

In 1908 the disease was identified by Dr. J. W. Babcock, physician and superintendent of the state hospital for the insane at Columbia, and in Virginia, North Carolina, Louisiana, Mississippi, Louisiana, Tennessee, Kansas and Illinois; and suspected cases have been reported from Texas and from Arkansas.

Recent dispatches from Nashville, Tenn., state that the disease has manifested itself in the Baptist Orphan Home in that city, and Dr. C. H. Lavinder was ordered about the middle of July to go there and make a report on what he found. Almost immediately thereafter he was directed by Surgeon General Wyman to proceed to Chicago, where the disease was reported to have appeared in the hospitals.

Cases in United States, 3,000.

Dr. C. F. Williams, secretary of the state board of health of South Carolina this spring wrote 164 letters of inquiry addressed to superintendents of state hospitals for the insane in the United States. To these letters 129 replies have been received showing that pellagra has appeared in Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Tennessee, Kansas and Illinois; and suspected cases have been reported from Texas and from Arkansas.

Present Bank's Record.

"While I am not a stockholder in Negaunee's present bank, I can say a few things in its favor," said a substantial business man yesterday. "It has been the city's leading business concern ever since it was organized, and has always been very extensively used as a clearing house for the exchange of interest on loans by the First National. I might also say that no business man, or other citizen, if he was at all worthy, has ever been refused accommodation, the management never having taken advantage of its patrons because there was no one else to turn to in the city."

"Mr. Meilleur's proposed bank may be made a success, but he will have an uphill job, particularly if a state bank is organized. No business man has ever been overlooked for exchange of interest on loans by the First National. I might also say that no business man, or other citizen, if he was at all worthy, has ever been refused accommodation, the management never having taken advantage of its patrons because there was no one else to turn to in the city."

"Without any personal feeling in the matter, I believe that there is a much better opening in Negaunee for a state bank, with a modest capital, than a National with a capital such as Mr. Meilleur proposes for his institution. The First National of Negaunee started with a modest capital and increases were made from time to time as the business warranted; the surplus was also increased, until today it is one of the strongest financial concerns in this region."

INDIAN CAUGHT BIG CATFISH.

When Noble Star, an Indian, was bathing in Cagle Creek yesterday, he saw something in the water following him around. He made a dive after it, and found that he had captured a big catfish. He struggled with it in the water some moments before he succeeded in landing it. It weighed nearly two hundred pounds, and was more than five feet long. The head alone weighed forty pounds, and measured fourteen inches around. Apache Correspondence Houston Post.

STRUCK BY TRAIN.

Negaunee Man Died from Injuries Sustained Last Tuesday Night.

John Halabac, who had been employed at the Mary Charlotte mine for about a month, since his return from a year's visit to his wife and child in Finland, died Sunday at the Negaunee hospital, as a result of injuries received a week ago tonight. He was walking along the Chicago & Northwestern main line and was struck by an ore train in the Jasper cut. It was not known at what time he was hit, or what train had struck him, but he was found lying alongside the track by men returning from work at 11 o'clock. He did not appear to be seriously hurt, as there were only a few bruises on his body, but his skull was fractured. He was taken to the hospital, where it was found that he was also severely but internally injured. The deceased was twenty-seven years of age and was well known among the Finnish people of the city. While his friends cannot account for how he happened to get in the way of the train, it is thought that he had been drinking. The train crew did not make a report of the accident, and it is assumed from this that neither the engineer or fireman saw the man on the track. Coroner Pritz empaneled a jury yesterday and an inquest will be held. The funeral will be held this afternoon.

TRUE, SOME BAD SPOTS.

Ispheming Publication Offers Suggestions to City Officials.

An article on Negaunee's attractive lawns and gardens in a recent issue of The Mining Journal furnished a subject for an editorial in last Saturday's issue of the Ispheming Iron Ore, in which the writer criticizes the local administration for allowing wagons, etc., to remain in and near the more important streets. Some of the evils complained of have been corrected through the efforts of Mayor Winter and the board of public works, but as the mayor said yesterday, it must be admitted that there is still room for improvement. Mr. Winter agreed that criticism might help in opening the eyes of people who are so careless as to place their unsightly property where it would be objectionable. The city officials, he declared, have been rather lenient in their respects, but there has been some improvement this summer.

HAD FOUR HITS.

The summary of the Negaunee-Ispheming game, played Sunday, failed to give Mike Keenan a hit on a ball he went down to first base, beating out Olson, who felled it, to the bag. Rains was charged with an error that should have been placed in Steinhilber's column the latter having fumbled Nichols' hit in the seventh. Sunday's game in high spirits. The team not only played almost perfect ball, but it was evident that the lineup is not only the strongest that Negaunee has had, but it will give a good account of itself in future games. The team now has more good hitting than at any previous time and several of the players are exceptionally fast on their positions. There should be better ball the remainder of the season than the fans have seen up to this time, as all the fine, fast strong and considered to be very evenly matched.

NOTICE TO CONTRACTORS.

Sealed proposals will be received by the city clerk of Negaunee, Michigan, for the building of a Fire Hall at Negaunee, Mich.

Proposals to be in the hands of the city clerk on or before 5 p. m. of the twenty-fourth day of August, 1909.

NOTICE TO CONTRACTORS.

Sealed proposals will be received by Henry Carlow, secretary of the board of education of Tilden township, National Mine, Mich., until 12 o'clock of noon Wednesday, Aug. 18, 1909, for the building and completion of an addition to the present school house. Plans and specifications can be seen at the secretary's office, also at the offices of the architects, Marquette, Mich., and Milwaukee, Wis., and Marquette, Mich.

CHARLTON & KUENZLI, Architects.

INDIAN CAUGHT BIG CATFISH.

When Noble Star, an Indian, was bathing in Cagle Creek yesterday, he saw something in the water following him around. He made a dive after it, and found that he had captured a big catfish. He struggled with it in the water some moments before he succeeded in landing it. It weighed nearly two hundred pounds, and was more than five feet long. The head alone weighed forty pounds, and measured fourteen inches around. Apache Correspondence Houston Post.

LOCAL LAONICS.

Mrs. William Boyd went to Sands yesterday on a visit to relatives.

Miss Gertrude Kruse is here from Chicago on a few weeks visit to relatives.

Clement Quian is down from Virginia on a visit to his father, M. C. Quian, and sister.

The employees of the Cleveland-Cliff Iron company in Negaunee will be paid next Friday for last month's work.

Miss Marion Bedford has returned from a six weeks' visit with relatives and friends in Detroit, Canada and Chicago.

The Sunday School society of St. John's church will hold a picnic Thursday at the Cleveland park. Street cars will be taken at the Breiting house at 10 o'clock. Relatives and friends of the children are invited to attend.

John Rice, a former resident, is here from Globe, Ariz., on a visit to relatives. He is a step-son of John Blackwell, a former well-known leader of the Negaunee City band. Mr. Blackwell speaks well of the Cardiova mine, where he worked for some time as a miner. Michael McCarthy, formerly of Negaunee, is general manager of the property.

Manager Platten of the Platten Produce company of Green Bay, was in the city yesterday. He reports that the drought of the past few weeks has greatly injured the potato crop in Wisconsin, and he expressed fear that it will be light. He said that the potatoes planted early are very small, but there is some hope for the ones that went in late, though rain must come soon to save them. The Wisconsin corn crop promises to be big, while there has also been a very large yield of hay.

The arrangement committee for the picnic to be held at the Cleveland park a week from next Saturday, the 21st, under auspices of English Oak Lodge, Sons of St. George, plans on making it a big event. Besides the many features to be introduced at the picnic grounds there will be baseball games between members of the Negaunee and Ishpeming lodges at the Union Park. All of the men and their families in the county have been invited, and a large attendance is certain of the weather is favorable.

WASHINGTON CHAT.

Ludicrous Nicknames Given by the President Amuse His Friends.

Washington, Aug. 9.—President Taft has a hearty jovial temperament which is winning friends for him every day. "Bluff King Hal" would suit him. He always has a frolicsome greeting for everyone with whom he is on friendly terms, and applies to them frequently ludicrous names of his own invention.

Representatives Hollingsworth of Ohio, who comes from one of the largest sheep-raising districts in the country, dropped up to see the executive the other day. The ante-room to which he was shown was crowded, but the president, spying him over the heads of the other callers, shouted out, "Hello, old Wool."

"That's nothing," remarked Fish Commissioner Bowers, in an aside to a senator who sat next to him, "I was up here the other day and the president greeted me with, 'Hello, old Whale.'"

Folks up around Beverly way are to become acquainted with Captain Avenue Butt. President Taft, on the other hand, who will grow into popular favor during the summer is over, and his hosts of friends here will be greatly disappointed. Like Taft, he is a big hearty fellow, not fat, but a sizable sort of a chap, solid and substantial, with a face which wins friends at the first meeting, and a personality which holds them through life. He is a former newspaper man who got into the army as a result of the Spanish war.

In '08, "Ardie" Butt was representing the Atlanta Constitution and the Louisville Times in Washington and he was as good a newspaper man as he afterwards proved to be an army officer. He couldn't stand journalism in times of national excitement, and through President McKinley obtained a commission in the army. He was attached to the quartermaster's department. Since then he has made a reputation throughout the army as a quartermaster. He mastered all the details of that branch of the service. For several years he was depot quartermaster in Washington, handling an enormous amount of government business, with great executive ability. When "Ardie" was a newspaper correspondent he was chairman of the house committee of the old National Press club. He ran things with a lavish hand. He had the club decorated in splendid taste, the silverware and glassware were of the finest quality and the club dinners, which he supervised, made the club famous. Unfortunately the club couldn't stand his lavish method of doing things, and went into the hands of the receivers, but it was great while it lasted.

Later as a captain Butt, so runs a story, he was in charge of a transport, taking a cargo of oats from San Francisco to Manila. On the way over the ship sprang a leak, and the hold, filling with water, caused things to happen down below in a manner entirely in accord with nature. When the vessel reached the Philippines, the oats had sprouted, they were growing out of every seam, the masts were festooned in green, and the boat looked like a floating pasture in full bloom. Captain Butt was responsible for the delivery of oats, and when he presented a whole oat crop, so runs the tale, it required three years of departmental red tape to straighten things out.

While a newspaper correspondent, Captain Butt was the clown of Alfred Henry Lewis, also at that time one of the newspaper crowd. It was Lewis who always called the captain, "Ardie-bald Walsingham DeGraffier Butt," and used to say that his name reminded him of a stove falling down a long flight of steps.

Captain Butt met President Roosevelt through Lewis, who is a friend of the ex-President, Captain Butt took the Roosevelt eye immediately, the two became mutual admirers and Captain Butt was soon one of the aides to the president. He is the fact that he is holding down that job with a new president speaks volumes for him.

LEAVES BIG BAY.

People with chronic bronchitis, asthma and lung trouble, will find great relief and comfort in Foley's Honey and Tar, and can avoid suffering by commencing to take it at once. Sold by all Druggists.

FIRE DEPARTMENT TO GO TO LAURIUM

COMPANY DECIDED TO ATTEND ANNUAL TOURNAMENT AT MEETING LAST NIGHT.

BIG TIME IS LOOKED FOR

Reports from Copper Country Indicate That This Year's Tourney Will Be the Best Yet.

At a meeting of the Marquette fire department held at the hose house last evening it was unanimously decided to attend the Upper Peninsula firemen's tournament at Laurium next week, and it seems probable that the Queen City will be represented in the copper country with a full company. T. J. Downs and Frank Hanley were elected delegates to the tournament and John Siegel and John Kinn, alternates.

There has been some talk of chartering a sleeper on which to go to Laurium and in which to sleep while there, but the South Shore road states that they may not be able to furnish a sleeping car for that purpose, and the idea has been given up. Accordingly, the members of the company will go to the copper country by train on the morning of the 18th, and arrangements will be made later for their board and lodging while there. At the last meeting of the fire and water board, it was voted to pay the traveling expenses and board of the firemen while attending the tournament.

As the Marquette company is small, no entries will be made in any of the contests and the members will devote their entire attention to watching the other companies perform and to having a good time.

The tournament this year promises to be one of the most successful in the history of the association, nineteen companies having already accepted the invitation extended by the Laurium committee, namely, Ishpeming, Negaunee, Marquette, Baraga, Iron River, Republic, Gladstone, Hurontown, South Range, Hubbell, Tamarack, Oseola, Red Jacket, Mohawk, Lake Linden and several of the Calumet & Hecla departments.

Elaborate Decorations Promised.

An expert decorator from Chicago is now busy putting the streets of Laurium in gala attire for the tournament. It is said that more attention will be paid to decorations than at any previous tournament. Five blocks are to be elaborately decorated, and the business section of town will be a maze of red, white and blue glory. Original ideas will prevail, and the decorations alone will be well worth a trip to the tournament city, according to copper country reports.

Electricians are also busy arranging the special lighting features of the tournament. The prizes offered in the contests have arrived and are on exhibition in one of the Laurium stores. One of the greatest attractions will be the Parker shows, which are said to be bigger and better than ever.

They have promised to bring to Laurium sixteen animal cages, containing in all thirty-six wild beasts, ranging from the coconut throwing ape from monkeyland to the most ferocious animals, the kind "Teddy" has been bagging in the wilds of Africa. Many of the acts performed in the animal show are thrilling in the extreme.

NEW PIERS FOR FLUME.

Light and Power Commission to Make Improvements at Plant.

At a meeting of the light and power commission held yesterday afternoon, it was practically decided to replace part of the wooden piers under the steel flume at the power plant with concrete this season. These wooden piers and the piling below them has been found to be badly rotted, especially where they are lying near the ground, and it has been decided best to replace them with concrete, thus making the improvement permanent.

Only those of the piers in the worst condition will be replaced this season, which in all amounts to about 700 feet of the flume. Next year it is likely that the remainder of the piers will be replaced, but where they stand high above the ground on piling, it is likely that wood will be used. The new concrete piers to be constructed this summer will be placed twelve feet apart, and the total cost of the improvement is estimated at from \$2,900 to \$2,500.

The matter of furnishing power for the operation of the street car system was not taken up at the meeting yesterday, and it may be some time before the commission makes its decision on this point. There would be a considerable amount of new machinery needed, if the request of the street car company should be granted, the cost of which must be investigated, and there are many other factors that enter into the problem that make its solution difficult, and no hasty decision will be made.

SPECIAL SALE ON OXFORDS AT "THE BEE HIVE."

We are selling all of our Men's, Women's and Children's Oxford's at cost. They will have to go in order to make room for our fall stock of shoes. We will also make a reduction of 10 per cent on all Men's shoes.

THE BEE HIVE.

DRAMATIC RECITAL.

To Be Given Aug. 27 for Benefit of St. Luke's Hospital.

Tickets are now being sold from house to house for a dramatic recital to be given by Horriett R. Labadie, of Philadelphia, at the opera house on the evening of Aug. 27, for the benefit of the St. Luke's hospital building fund. Miss Labadie has had twenty years experience in monologue and dramatic work and has frequently appeared before select audiences in Washington and all the centers of learning and social life in the East. She is also well known in the central West and she may be expected to give an artistic and wholly enjoyable entertainment in this city. Among the subjects of her readings may be mentioned "A Doll's House," by Ibsen; Browning's "Stories by the Wayside," and Shakespeare's "Henry the Eighth." She announces "The Servant in the House" as her subject in this city.

The fund for a new St. Luke's hospital building was started less than two years ago, by a grand ball at the opening of the Lake Shore Engine Works at Laurium. It has been added to by a "tag day" held about a year ago, and by the proceeds from last winter's lecture course.

ACCUSED OF PASSING WORTHLESS CHECKS

LOUIS PAGE IN THE COUNTY JAIL, CHARGED WITH HAVING OBTAINED MONEY ON FORGED CHECKS.

Louis Page, who several months ago was placed under arrest on suspicion of having robbed the postoffice at Birch, is again in trouble, this time being accused of forgery. He was released on the "tag day" held about a year ago, and by the proceeds from last winter's lecture course.

The first knowledge of Page's alleged forgeries, which consisted in passing worthless checks, came to the knowledge of the officers yesterday forenoon and at 6 o'clock yesterday afternoon he was found fast asleep on the huckleberry plains on the Sands road, where he had been seen by two boys that told the officer of his whereabouts. He is now a prisoner in the county jail, and will probably be given a preliminary hearing before a justice some time today.

At least four worthless checks have been passed in this city within the past week, for the passing of which Page is accused. The first was for \$25, signed by Claude Ingalls, of Birch, and endorsed by Page, which was accepted by Emil Morin, a West Washington street liquor dealer. The paper was drawn on the Marquette National bank, and that it was a forgery was learned when Mr. Morin presented it to the bank for payment.

Saturday evening Page bought a pair of shoes at the Union Clothing company and tendered in payment a \$25 check drawn by another resident of Birch in favor of Page, which Carl Whittler, the manager of the store, found to be a forgery yesterday morning. Monday forenoon Page drew a check for \$5 in favor of William Fennessy, and was paid the change, but Mr. Fennessy found a short time later that Page had no funds in the bank. A front street liquor dealer is said to have accepted another of Page's checks, the amount of which was about \$20.

On the four checks it is thought that Page obtained in the neighborhood of \$75 in cash, but when searched at the jail last night only \$2.16 was found on his person. He told friends yesterday forenoon that he was going to Birch, but was either bluffing or changed his mind, as he shortly afterward started on foot in the opposite direction.

ROOTED IN POLITICS.

Present Troubles in Sweden Laid to Activities of Socialists.

That the present labor difficulties in Sweden are the result of a political as well as an industrial movement was the opinion expressed by a prominent Swedish resident of this city yesterday.

"There is in Sweden," he said, "a strong socialistic tendency, the followers of that doctrine being divided into two classes, the Socialists proper and the so-called Young Socialists, the latter class being exceedingly rabid and profess to believe in neither government, God or anything else. It is this class of people, working upon a unionized working class, that are responsible for the recent outbreaks, the extent of which has been exaggerated, according to the Swedish papers.

U. of M. Man Will Succeed Lane as State Geologist.

The Mining Journal yesterday received a dispatch from L. L. Wright, state superintendent of instruction, informing it that the state geological board, of which Mr. Wright is a member, had elected R. C. Allen, a professor in the geological department of the University of Michigan, state geologist to succeed Mr. Lane, who recently submitted his resignation. A. H. Meuche, a copper country man, who was assistant to Mr. Lane, has been appointed Mr. Allen's assistant. Mr. Meuche was a candidate for the place of head of the department, and a spirited campaign has been waged between him and Professor Allen.

WOODPECKERS MAKE HOME IN CEDAR POLES

THEIR DEPREDATIONS CAUSING SOME CONCERN, AS THEIR HOLES WEAKEN THE WIRE LINES.

Considerable damage is being done to telephone, telegraph and electric light poles by members of the woodpecker family. These birds originally built their homes in the dead or dying trunks of limbs of trees, but for some reason known to themselves have come to the conclusion that the peeled pole offers better conditions for a home.

They have become so ravenous of late that their depredations are attracting considerable attention among those who are compelled to use quantities of wood-poles. Cedar poles seem to be the ones most frequently attacked. The birds bore into them at any height from the ground, and the holes which they make are often two or three inches in diameter and four or five inches deep. Such an amount of wood drilled from a stick of timber which is carrying a load of wires naturally weakens the strength of the line.

It would, of course, not be a difficult matter to exterminate these birds. However, this is not desirable, as they are among the most beneficial forms of bird life native to this country, because they destroy large numbers of insects which seriously damage forest and food crops. It seems, therefore, that methods should be undertaken to compel the birds to revert to their former habit of boring rather than to exterminate them.

Frequent inquiries have been made by the forest service in this connection, but the only information to date which the government has been able to obtain is that on a casual inspection of treated and untreated pole lines in Louisiana, in that region it was found that poles which had been impregnated with creosote oil were not attacked by the birds, whereas untreated poles under the same conditions were very severely injured.

Whether or not creosote will prevent such attack is not definitely known, but the service is investigating this problem, and should this oil prove a preventive, it will fulfill a long-looked-for purpose. It will protect the poles from decay, and destruction from animal life. In southern Indiana, some members of a traction company thought that they could prevent further destruction of their poles by filling the holes in the wood with stone, but the birds, being not deterred by the stones, made the conditions much worse. This apparently does not seem to be a means of preventing their depredations.

CONTAMINATED MILK.

Simple Method by Which It May Be Sterilized in the Home.

This is the season of the year when the summer complaints of infancy and other diseases due to contaminated milk may be expected to be most prevalent, and a word of caution at this time may be the means of preventing many cases of sickness and fatalities from these diseases.

It is, unfortunately, true that a considerable portion of the milk which is sold from house to house is not in a condition for consumption in its raw state, due, principally, to the lack of hygienic measures in the milking and handling of the milk; and, unless the purity of the milk is actually certified to by the vendor, it should be subjected to sterilization, particularly when it is to be fed to infants.

The following simple and inexpensive method of sterilization, recommended by Dr. M. L. Roth, the state bacteriologist, will fully answer the purpose:

"Set a quart bottle of milk with the stopper in it, just as it comes from the milkman, on two small flat sticks in the lower part of the bottle, and pour the milk into the bottle, leaving a space of one inch or two of the top of the bottle. Then place the bottle and contents over the fire, allowing it to remain until the water around the bottle begins to boil. Then take it off the fire without removing the bottle from the hot water.

"The water must not be allowed to boil for any length of time, or the milk inside the bottle will boil. Put it taken off at the moment the boiling point of 212 degrees is reached outside the bottle, will insure that the contents of the bottle have not boiled, although a temperature high enough to kill all known germs has been reached. After fifteen minutes the bottle of milk should be removed and set in the ice box or cellar to cool as rapidly as possible.

"The treatment will destroy all non-spore bearing bacteria, especially the pathogenic varieties, such as typhoid and tubercular bacilli. If careful attention is paid to these directions the milk will be practically free from the cooked taste and its nutritive and digestive qualities will not be impaired. Such a bottle of milk will, if kept in a cool place, remain sweet for about a week."

300 CANAL PASSAGES.

Boats Locked Through, Bound for Ports on Lake Superior.

Sault Ste. Marie, Mich., Aug. 9.—The boats whose names are here appended have passed the canals the last day. King Oscar, however, was a man of peace and made many concessions to the malcontents in order to avoid trouble. The new king is a young man and seems determined to maintain the supremacy of the government against socialist attacks, and I am of the opinion that he will succeed.

ALLEN APPOINTED.

U. of M. Man Will Succeed Lane as State Geologist.

The Mining Journal yesterday received a dispatch from L. L. Wright, state superintendent of instruction, informing it that the state geological board, of which Mr. Wright is a member, had elected R. C. Allen, a professor in the geological department of the University of Michigan, state geologist to succeed Mr. Lane, who recently submitted his resignation. A. H. Meuche, a copper country man, who was assistant to Mr. Lane, has been appointed Mr. Allen's assistant. Mr. Meuche was a candidate for the place of head of the department, and a spirited campaign has been waged between him and Professor Allen.

Midsummer Sale

Our great sale of Stein-Bloch and Kuppenheimer Clothing in Men's and Young Men's Suits, Spring Overcoats and Raincoats and the Nufangle Trousers, including all the up-to-date pegs, at 20 per cent discount, will continue this week. Don't miss it.

See the stock of Boys' Clothing—the swell Knickerbocker Suits at 20 per cent off. Straight Pants and Straight Pant Suits are being slaughtered.

You can afford to buy several pairs of Men's and Boys' Oxfords at the prices asked for them during this CASH SALE.

Don't neglect our Hat department during this sale.

ORMSBEE & ATKINS

Nester Block. Washington St.

All the Latest Copyrighted \$1.50 Books for \$1.25

Also other late Copyrighted Books for 50c

We are being furnished regularly with the latest editions. 200 NEW BOOKS RECEIVED. BIGELOW'S News and Stationery store.

BIJOU

(The House of Features)

THE MOONSTONE

A Melo-Drama of the Higher Order.
