

CAR PLANT STRIKERS AWED AND GLOOMY

Appalled at the Extent of the Casualties Among Their Number in Sunday Night's Riot, They Attempt No Further Outbreak.

News That Additional State Police Are Enroute to Schoonville Also Has Effect in Cooling the Aggressiveness, and So Has the Smoke That Pours from the Chimneys at the Big Works—a Mute Signal That the Struggle of the Men Is Already Lost.

Pittsburg, Aug. 23.—Three columns of smoke floated lazily from the chimneys of the Pressed Steel Car company's plant in Schoonville tonight. These mute signals told better than official pronouncements that the striking employees of the big works had yet to wait long to win their fight against the car company officials, for the plant was still in operation despite the wild efforts of mobs to scare off the imported workmen during the past twenty-four hours.

Tonight the strikers realized for the first time that their jobs were no more, that the company would do without them and that they no longer were wanted within the gates of the plant. The women and children of the strikers grasped the situation as soon as the men, and the idea of starvation and eviction, with winter coming on, caused wails of anguish in many a striker's cottage.

Forty state police are on their way here tonight to augment the company of mounted constabulary now on duty at the car plant. Since last night's carnage, these fearless cavalrymen have evinced a desire to strike fear into the hearts of the men who took their comrades' lives.

The strikers realize that the mounted troops are more than a match for them. Yet all during the day, these troopers have been subjected to abuse from house windows and doors whenever they chanced to pass a strike sympathizer's home. In retaliation, not a striker or sympathizer left his doorstep today but that he was upbraided and searched. Because the searching the troopers insisted on examining the bodies of the strikers, and if they bore bruises or traces of being flogged, they were promptly arrested, as the troopers consider such evidence proof that the men had participated in last night's rioting.

At noon the bells of the Catholic cathedral in McKees Rocks began tolling. This was kept up for over two hours. Then the bells were ordered silenced by the state troopers, as it was pointed out that such demonstration at the present time only agitated the strikers.

The strikers seemed awed and gloomy tonight at the extent of last night's fatalities. The gloom over the title car company village is also attributed to the fact that tomorrow will occur the funerals of the strikers who were among the victims of last night's rioting.

The news that additional state constabulary were on their way from Wilkesbarre and would be in the strike zone before morning seemed to act as a quietus upon the strike sympathizers, who gathered in doorways during the evening and night to witness the funerals of the strikers.

A meeting of the striking employees of the car plant, scheduled for the late afternoon, was prevented by the constabulary.

Announcement was made late today that the United States government will lead the strike charge against the company, to the extent of making an investigation of the allegations made by Albert Vans, who on Saturday wore to the charges before United States Commissioner Lindsey, it was announced today.

The death list resulting from last night's rioting was swelled tonight, when Mike Desoki, one of the strikers, died at the hospital from gunshot wounds in the lungs and abdomen. This brings the death list up to seven. All of the seriously wounded are showing slight improvement.

CHICAGO DEBATE IS HEATED. Nevertheless It Is Believed a Street Car Strike Will Be Averted.

Chicago, Aug. 23.—Nothing was accomplished in the joint conference between the presidents of the street car companies and the union representatives today, and the meeting will continue tomorrow. Heated tilts between John M. Roach, president of the Chicago Railways company, and W. D. Mahon, president of the Amalgamated Association of Street & Electric Railway Employees, lent interest and vehemence to the debate on increased wages for the street car employees of this city. The clashes occurred over the proposed system of grading the employees advanced by the companies, and to which the union leader is vigorously opposed.

E. H. HARRIMAN WIRES HE IS FEELING FINELY.

Stock Market Is Depressed Until This Word Comes; Then It Has a Sharp Rebound and the Prices Go Up Well Above the Previous High Levels of the Day

New York, Aug. 23.—That his homeward voyage is benefiting E. H. Harriman was indicated by a wireless message received today from him by R. R. Lovett, vice president of the Union Pacific railroad. The message stated in substance that Mr. Harriman was feeling finely.

Still Looks Greatly Fatigued. On Board the Steamship Kaiser Wilhelm II. by wireless, via Halifax, N. S., Aug. 23.—After remaining in his suite practically all the time since leaving Cherbourg Aug. 18, E. H. Harriman appeared on deck this afternoon. He remained in the open air half an hour and conversed with several passengers. Mr. Harriman still looks greatly fatigued and in need of rest.

Stock Market Turns Strong. New York, Aug. 23.—From the irregular and reactionary course of prices today, it is very clear that the stock market is still in a highly sensitive state and is expected to be largely in the development of the next few days. Foremost among these is the health of E. H. Harriman, concerning which there were many conflicting rumors today. The traffic officials of the leading railway systems in the Middle West are virtually unanimous in the declarations that business is steadily mounting higher, in some instances beyond all expectations, with an especially large movement in merchandise. As an indication of the strength of the market, it is reported today that the railroads centering in Chicago have in mind an increase of two cents per hundred pounds in the freight terminal rates.

The operations in the stock market began active and strong. A vigorous selling of the Harriman issues wiped out all the advances and by noon the prices of Union and Southern Pacific were under last Saturday's lowest quotations, while strong pressure was being exerted upon Reading and United States Steel. Concurrent with the decline in the Harriman issues was the statement that no changes would occur in the dividends of the Union and Southern Pacific at the directors' meetings tomorrow. In sharp contrast to the other railway shares was the strength of the Great Lakes, Texas & Pacific, Washburn and Denver & Rio Grande all displaying firmness.

The prices rallied the last hour, when the "street" received word that Mr. Harriman had given assurances to his associates on the ship now bringing him to port of his "good condition." This brought sharp rebounds in Union and Southern Pacific and United States Steel which carried them well above the previous high prices of the day. Other stocks moved in sympathy, including Reading Rock Island, Northwestern and Chesapeake & Ohio. The rally was in progress when the market closed.

Slump in Wheat at Minneapolis. Minneapolis, Aug. 23.—Cash wheat here today closed at a bushel today. It was one of the greatest one-day declines on record. The decline resulted from the heavy receipts; 445 cars arriving during the day.

RAILROAD OFFICIALS CONFER. Western Lines Plan to Put a Stop to the Cutting of Passenger Rates.

Chicago, Aug. 23.—The officers of the leading western railroads are making another effort to stop the cutting of passenger rates for excursions and conventions and to establish a two-cent-a-mile minimum rate throughout the Western states that have passed laws reducing fares. It was officially stated today that no definite decision had been reached, as all the roads have not been represented, but the intentions are to secure an agreement so that reduced fares below the regular rate will be discontinued after the first of the year.

COURT DECISION RESENTED. Georgia Mayor Is Fatally Shot by the Brother of a Litigant.

Davidsboro, Ga., Aug. 23.—J. C. Godfrey, mayor of Davidsboro, lies at his home here, dangerously wounded, as the result of a quarrel which followed a decision made by Godfrey in the mayor's court in a case against Gordon Collins, a white man. M. M. Collins, a brother of the defendant, after court adjourned, quarreled with the mayor and shot him. Godfrey probably will die.

SHERIFF CALLS FOR TROOPS. Bloodshed Feared, Militiamen Are Sent to Meadville, Miss.

Meadville, Miss., Aug. 23.—Companies B and C, Third regiment of the state guard, arrived here tonight. Sheriff Jones called for the troops in anticipation of serious trouble tonight, arising from the attempted assassination of Chancery Clerk Ernest Newman last night. So far there has been no demonstration.

KILLED HIS CAPTAIN. Corporal Lisle Crabtree, U. S. A., on Trial at Omaha.

Omaha, Aug. 23.—The trial by general court-martial of Corporal Lisle Crabtree on the charge of killing his company commander, Captain John C. Raymond, at Fort Des Moines, June 19, began at Fort Crook today.

RULES FOR THE RAILROADS. West Virginia Jurist Holds the Two-Cent Fare Law Conscissatory.

Charleston, W. Va., Aug. 23.—Circuit Judge Burdette today issued an injunction restraining the state and county officials from enforcing the two-cent fare law against the Norfolk & Western railroad. The court holds the law unconstitutional and conscissatory.

Some women have as many different complexions as they have dresses.

PRESIDENT TAFT NOT TO KEEP MUM

If the Opponents of the Tariff Bill Expect Reluctance on His Part to Discuss Its Provisions They Are Due for Disappointment.

That in His Western Trip the Executive Will Be Prepared to Defend to the Last Ditch His Record on the Legislation, Is the Word from Beverly—Not Till Congress Meets Will There Be Diplomatic Changes—Standing Army Is Not to Be Cut Down.

Beverly, Mass., Aug. 23.—The most important news item of the day at Beverly was the announcement there would be no diplomatic changes until after congress convened, the expected arrival on Thursday of Senator Aldrich, to discuss the report of the monetary commission, and the intimation that the administration was prepared to defend to the last ditch its record on the recent tariff legislation.

Any report of immediate changes in some of the foreign embassies is discouraged, although Ambassador Reid will see the president Friday and probably will have a few words to say regarding the attitude of the British government towards this country at the present time and its wishes as to the next American representative to the court of St. James.

If the western opponents of the new tariff bill expect silence from the president or reluctance on his part to discuss its different provisions, they will be disappointed. The administration has burned its bridges and is ready and willing to debate any and all schedules.

The persistent report of a proposed reduction of the standing army was again brought to the president's attention today, and was once more emphatically denied. It was learned, however, that the full strength of the army is 88,000, it numbers 80,000 at the present time, a force which is deemed sufficient. Any formal order for the reduction must come from the commander-in-chief, and no such order has been issued or is contemplated.

SWALLOWED BY THE SEA? Clipperton Islands, in Mexico, Reported Destroyed by Earthquake.

Mexico City, Aug. 23.—Recent dispatches from Acapulco state that the Clipperton islands were swallowed up by the sea during the late earthquake. No word of any kind has come from the islands.

Claimed by Two Nations. Washington, Aug. 23.—Nature has settled a dispute between two great nations, if the report that the Clipperton islands were swallowed up by the sea during the recent Mexican earthquake is true. France claims the islands because they were discovered by a French captain two centuries ago, but Mexico also asserts ownership over them.

HIS REPORT MUCH DELAYED. Disaster May Have Befallen Sealing Agent in the Pribiloff Islands.

Washington, Aug. 23.—The officials of the department of commerce and labor feel considerable concern over the non-receipt of the report of Agent W. L. Lembecky, giving the number of seals taken on Pribiloff islands by the North American Commercial company, which leases the sealing rights from the government. The report should have been received by Aug. 19, but nothing has been heard from Lembecky. The fact that there were known to be a number of Japanese pelagic sealing expeditions in the vicinity of the islands is the chief cause for the alarm exhibited. If nothing is heard from Lembecky this week, it is likely that word will be dispatched to a revenue cutter to investigate.

MAKES REMARKABLE SPEED. Torpedo Boat Destroyer Fusser Does Better Than 31 Knots an Hour.

Washington, Aug. 23.—Remarkable high speed was made by the torpedo boat destroyer Fusser in her contractor's preliminary trial in the run on the Rockland course last week. The vessel scored 31.03 knots per hour, her contract requirements contemplating her twenty-eight. The officials say they believe this to be the fastest speed ever made by an American gun torpedo boat destroyer, the previous records being around thirty knots.

WILL CONTINUE THE SEIZURES. Government Denies the Petition of the Bleached Flour Manufacturers.

Washington, Aug. 23.—The requests of the manufacturers of bleached flour that no further seizures of bleached flour should be made until the test case should have been decided were refused today, following a conference between Wade Ellis, acting attorney general, and Dr. H. F. Dunlop of the pure food board of the agriculture department.

WILL RUN INDEPENDENTLY. District Attorney Wm. Travers Jerome a Candidate for Re-election.

New York, Aug. 23.—District Attorney Wm. Travers Jerome announced tonight that he will be a candidate for reelection this fall, running independently.

The girls with the most cheek don't do the most blushing.

THE WEATHER.

Washington, Aug. 23.—The following is the weather bureau's forecast for Upper Michigan: Showers, Tuesday; Wednesday, partly cloudy and cooler; moderate south shifting to north winds by Tuesday night.

BASEBALL.

STANDINGS OF THE TEAMS.

Table with columns for National League, American League, and American Association, listing teams and their records (W, L, P.C.).

SCHEDULE FOR TODAY.

Table listing baseball games for today, including National League, American League, and American Association matchups.

YESTERDAY'S GAMES.

Table listing results of baseball games from yesterday, including National League, American League, and American Association games.

MOTOR CAR WRECK IS FATAL TO TWO

Crossing the Tracks of the Big Four Road at Kankakee, Ill., an Automobile Is Run Down by a Locomotive and a Caboose.

A Train on a Siding Obstructing the View, the Danger Is Not Realized Until It Is Too Late to Avoid an Accident—Mrs. Geo. Granger and Miss Genevieve Rabig, the Latter of Chicago, Are Killed and Their Five Companions Are Seriously Injured.

Kankakee, Ill., Aug. 23.—Mrs. George Granger, wife of a retired Kankakee merchant, and Miss Genevieve Rabig, of Chicago, were killed and the five other occupants of the touring car were seriously injured when an automobile was run down this afternoon on the Hobble avenue crossing of the Big Four railroad in this city.

The party were on their way to Mount Grove cemetery at the time of the accident. An engine and a caboose were backing down the main line, and cars on a side track obstructed the view of the automobile driver. The train crew and the chauffeur saw the danger when fifteen feet apart, too late to stop the engine.

Miss Rabig was teacher of elocution at the St. Xavier academy, Chicago. The injured are: George Granger, husband of Mrs. Granger, who was killed; Jeanette, his daughter; Paul, his son; Miss Amelia Fortin, sister of Mrs. Granger, and Ira Deke, the chauffeur.

Jeanette Granger was between the bodies of her mother and Miss Rabig. She was rescued thirty minutes after the accident by jacking up the caboose.

Billy Sunday and Wife Are Injured. Laporte, Ind., Aug. 23.—In a collision between two automobiles near Yellow Creek lake today, "Billy Sunday, the evangelist, and his wife were injured. The car turned over and they were thrown into a ditch. Mrs. Sunday is in a serious condition, but her husband is only painfully bruised. Sunday was driving at high speed and struck another car in attempting to pass it.

Locomotive Engineer a Victim. St. Louis, Aug. 23.—Engineer Michael Healey of St. Louis was killed this afternoon when Missouri Pacific passenger train No. 5 was wrecked near New Haven, Mo.

ousting American Trainhands. National Railways of Mexico Responding to the Popular Political Cry.

Mexico City, Aug. 23.—The Mexicanizing of the several railways embraced in the government merger system and operated by the National Railways of Mexico, is being carried out as rapidly as the good of the service will permit, according to a communication on the subject made by President E. N. Brown to Jose Limantour, minister of finance. The fact that American conductors, engineers, dispatchers and station masters are employed upon the government-owned roads is one of the prime causes of the anti-American cry that is being made by the anti-electionist party in the present national political campaign.

The slogan of many of the political orators. The operation of the railroads in Mexico has been in the hands of Americans ever since the first line was built in this country. It is claimed by practical railroad men here that very few Mexicans are capable of being trained for conductors, engineers and other responsible positions in connection with the operation of a road, and that the present move on the part of the government to oust all Americans will result disastrously to the properties involved.

President Brown, of the National Railways of Mexico says, in his communication, after calling attention to the fact that Mexicans are already being trained for conductors and engineers upon several of the smaller branch lines of the system: "Special attention is being paid to train dispatchers and station masters, and the effort is being made to fill these posts with Mexicans. We have very few foreigners in service as station masters, those who remain being employees of many years' standing and whose work has been satisfactory. Recently we have augmented the force of dispatchers, putting in Mexican copy operators, selecting them with the copy object that they may learn to discharge the duties of dispatcher at the earliest possible moment."

CARP CALLED SALMON IN EAST. La Crosse, Wis., Aug. 23.—A remarkable industry has been revealed through a report just made by the Minnesota fish and game commission. It is the supplying of the eastern market with Mississippi river carp colored pink and labeled salmon. It takes only a little coloring matter and nice big label on the round tin can to turn the sluggish carp of the Mississippi to the salmon of the Columbia. The sealing of rough fish in the Mississippi and St. Croix rivers brings an annual revenue to the fishermen of \$750,000, more than ten times the value of the fish taken in the American waters of the Lake of the Woods, the whole Rainy lake and the north shore of Lake Superior combined. Of the total catch 70 per cent are carp. The balance being made up of buffalo, sheepshead, catfish, pickerel, sunfish and sturgeon.

MORE LANDS TO BE OPENED FOR SETTLEMENT.

Seven Thousand Quarter Sections in the Cheyenne River and Standing Rock Indian Reservations in South and North Dakota Will Be Allotted in October.

Chicago, Aug. 23.—The Cheyenne River and Standing Rock Indian reservations in South Dakota and North Dakota will be opened for settlement Oct. 4 to 25, inclusive, according to a telegram received here today from Acting Commissioner Prouditt, of the United States land office at Washington. The reservations contain about two million, eight hundred thousand acres. About seven thousand quarter sections will be allotted to settlers. The points of registration are Aberdeen, Lemmon and Mobridge, South Dakota.

WOMEN FIGHT OVER CHILD.

Courts to Determine Who Shall Have the World's Fair Incubator Baby. Kansas City, Mo., Aug. 23.—Another habeas corpus order in the case of Marian Bleakley, the incubator baby of St. Louis World's Fair fame, was issued today. Judge Porterfield ordered Chief of Police Snow to appear with the child in court Wednesday. At that time the court will decide who shall have the child—her mother, Mrs. J. J. Bleakley, of Topeka, Kas., or the woman who adopted her and now is being held on a charge of kidnaping, Mrs. James G. Barclay, of Buffalo, N. Y. The attorneys for Mrs. Barclay secured the order late today.

FUNERAL HELD UP.

Rival Undertakers in Indiana Go to Law Over a Man's Body. Goslen, Ind., Aug. 23.—When the funeral cortege of Charles Cray reached the cemetery today, it was met by C. B. Stiver, an undertaker, and his attorney and several policemen, who prevented the coffin being lowered into the grave, on the contention that Cray, six years ago, entered into a contract with Stiver to have his body cremated in Chicago. At Cray's death, at Dallas, Tex., his uncle and heir, Wesley Cray, had the body brought to this city and gave it in charge of the Smith-Clark Undertaking company, which today attempted to go forward with the funeral. The body will be held in the vault until the court decides the controversy. Cray's uncle alleges that he was not mentally responsible when the contract with Stiver was made.

GRAFT TRIALS LOSE FAVOR.

San Francisco Primary Declares for Candidates Who Oppose Prosecution. San Francisco, Aug. 23.—The first direct primary election under the new law passed by the legislature has resulted in a serious blow to the strongest advocates of a direct primary.

The only serious fight at the polls was for the Republican nominations for mayor and supervisors. W. L. Crocker, who was nominated by a committee of business men, defeated Byron Maury, the nominee of the Independent Republicans, by about 2,500 for mayor, while eleven of the eighteen candidates for supervisors on the Crocker ticket were chosen the other seven being Maury supporters.

MAURY'S CANDIDACY. Maury was the acknowledged candidate of those who favor continuing the trial of graft cases in spite of repeated failures to secure convictions, while Crocker's friends openly advocated abandonment of graft trials on the ground that it had been demonstrated that evidence to secure conviction cannot be obtained.

Francis J. Heney was not regularly nominated for district attorney, and made no campaign, but many of his friends urged his nomination to secure the continued prosecution of the graft trials. His name was written on the Republican, Democratic and Union Labor tickets. On the Republican and Union Labor tickets he was badly beaten, but secured a nomination on the Democratic ticket by a narrow margin, and in consequence is in a position to make an active and aggressive campaign at the polls, with a chance of election. His only opponent is Charles Fickert, a young lawyer of only a few years' experience.

TO ISSUE ONLY ABSTAINERS. New Life Company for Prohibitionists Is Chartered in Georgia.

Atlanta, Ga., Aug. 23.—A life insurance company that will accept risks on total abstainers only has been organized with Atlanta headquarters, under the name of "The Temperance Life Insurance company of America." The initial capital stock is \$200,000, with privilege of increasing this amount as the need arises. Leading prohibitionists throughout the country are said to be behind the company, with the intention of making it national. J. Pope Brown, state treasurer of Georgia, has been mentioned for the office of president. By insuring only total abstainers the promoters declare that the cost of insurance can be reduced.

CHECKS ARE FOUND BOGUS. Eight St. Joseph (Mo.) Banks Lose \$4,000 to Two Clever Crooks.

St. Joseph, Mo., Aug. 23.—Eight banks here were swindled out of \$4,000 today by two men who presented what purported to be certified checks on a St. Louis bank but which proved to be bogus. The alleged swindlers escaped. Their scheme was to deposit the bogus checks and draw part of the amount of their face value in cash.

GULF IS WARNED OF GALE. New Orleans, Aug. 23.—Storm warnings for the New Orleans and Galveston districts were issued this morning by the weather bureau. The disturbance is declared to be of marked intensity.

New Orleans, La., Aug. 23.—No serious damage as a result of the storm on the gulf today had been reported up to a late hour tonight.

G. H. CURTISS MAKES A THRILLING FLIGHT

Along With Paulham, the Contestant from the United States Wins the Honors of the Second Day of Rheims' Aviation Week.

While the Frenchman Enthuses the Crowd With a High Altitude Feat, the American Goes Him One Better by Setting a New Speed Record, and This After Bleriot Had Just Created Unbounded Jubilation by Exceeding All Former Achievements.

Rheims, France, Aug. 23.—Glenn H. Curtiss, the American aviator, and M. Paulham, representing France, divided the honors of the second day of "aviation week" the former with a thrilling flight just before dusk in which he lowered the speed record for the course—six and one-fifth miles—to eight minutes and thirty-five and two-fifths seconds, and the latter by making two impressive high altitude flights of forty-nine and fifty-six kilometers, respectively, in the endurance test for the Prix De Lachampagne.

Curtiss' performance began just as the time limit for the start of the Prix De Lachampagne was expiring, and when the American enthusiasts had abandoned hope of seeing their representative take the field. Amid the unbounded jubilation of the French spectators, Bleriot, only a few minutes before, had clipped sixteen seconds off of Lefebvre's record, made yesterday with his powerful eight-horsepower monoplane. Suddenly Curtiss appeared and, with a preliminary run along the ground of one hundred yards, his machine rose lightly and shot up the tribunes at a height of sixty feet. It was going at a terrific pace, with its wings as level as a plain. As Curtiss made the last turn, under a mistaken impression that the finish line was closer he descended so close to earth that many thought he had touched; but, perceiving his error, he mounted quickly and easily, crossing the line majestically. An instant later the signal was hoisted that he had made a record.

Clement's Balloon Falls Into the Seine. Paris, Aug. 23.—Bayard Clement's dirigible balloon, after making a flight here today, fell into the Seine. The aviators on board the airship were saved.

FIGHTING IN TURKEY. Refusing to Sue for Peace, Albanians Are Attacked by Troops.

Berlin, Aug. 23.—A dispatch from Cukub, European Turkey, says that the Albanians engaged in the revolutionary movement against the Turkish ministry have refused to enter into negotiations looking to peace. Orders therefore were issued early today for an advance by the Turkish troops from Verisowitch to clear the adjacent country of Albanians. The advance was carried out, but the losses are unknown. Railway traffic is suspended.

MOORS GET REINFORCEMENTS. Spanish Convoy Attacked, It Is Rescued Only After Severe Fighting.

Melilla, Aug. 23.—A Spanish convoy was attacked by Moors today at a point near Sidimusa. After severe fighting in which seven Spaniards were wounded, the convoy was extricated from its position. The Moors are receiving reinforcements in large numbers.

KILLS BIG BULL ELEPHANT. Colonel Theodore Roosevelt Now Hunting in the Kenya District.

Nairobi, British East Africa, Aug. 23.—Theodore Roosevelt, who is hunting in the Kenya district, killed a big bull elephant Saturday. Mr. Roosevelt is hunting without any companions just now.

GENERAL REYES NOT ARRESTED. Laredo, Tex., Aug. 23.—From a reliable source in Monterey it is denied that there has been any concentrated movement of federal troops, looking to the arrest of General Reyes, governor of Nuevo Leon. It is also stated that General Reyes is still visiting in the neighborhood of Galena.

CONFLAGRATION IN RUSSIA. Kremenchuk, Russia, Aug. 23.—A thousand families in this district have been rendered homeless by a fire that started yesterday in a local lumber mill and raged throughout the night. A large proportion of the dwellings of Kremenchuk were destroyed.

SHOCKING DISASTER ABROAD. Geneva, Switzerland, Aug. 23.—Five persons were killed and twelve were dangerously injured by an explosion in the city gas works today. The explosion occurred in a purifying chamber between the two principal gas meters.

BLOODY FEUD FIGHT. El Paso, Tex., Aug. 23.—In a feud fight Sunday between laborers employed on farms at Juriquilla and those of Santa Rosa, a nearby village, five men were killed and one was fatally and ten were seriously injured.

FIGHT TEN FAST ROUNDS. New York, Aug. 23.—Leach Cross of New York easily defeated Cy Smith of Jersey City tonight in ten fast rounds.

DAILY MINING JOURNAL
A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED).

Entered as mail matter at the second class in the postoffice at Marquette, Mich.

Double the truth about the Warner-Cramton law lies somewhere about midway between the two extreme views of it.

Of course Mr. Harriman's death would prove embarrassing in certain quarters, but then Mr. Harriman has got to die sometime.

Detroit Saturday Night does not appear entirely pleased with Judge Montgomery's address at the Tashmo Park picnic. We are surprised; in fact, we are shocked.

Judge Montgomery shows a disposition to put his back up against the "stand patters." Go easy, judge. Stand patters are to be met in strategic positions at every turn in Michigan.

The Marquette baseball team made a record Sunday. It went a little higher into the air in that fatal fourth inning than any other team in the league had succeeded in going to date this season.

There is an open debate as to what blew up the Marquette ball team in the first unpleasant Sunday, but there is complete agreement on the part of all those present that it really blew up.

One of the things that Walt Wellman seems to need is a different type of airship. Why doesn't he try a Zeppelin? Perhaps he doesn't know that a Zeppelin has made a successful flight of over 800 miles.

The board of trade at Holland, Mich., is considering the organization of a company for the manufacture of aeroplanes. Michigan must be kept in the van of progress, and Holland intends to do what she can to help keep it there.

Those Washington chaps assert that under State Game Warden Pierce the cost of convictions for violations of the game law has gone up from \$30, to nearly \$100. Mr. Pierce says that as a matter of fact the cost does not reach \$25. Evidently some of our Washington news is tainted.

"The agitator's stock complaint that there is one brand of justice for the poor man in this country, and another for the rich, has got to be disproved by signal examples to the contrary," says the Milwaukee Sentinel. "The sooner the tribe of Thaw realize that they are being worked to the queen's taste for lawyers' fees, and that their impudent and premature efforts are prejudicial to their relative's prospects, the better for him and for them."

That Ishpeming-College of Mines game was somewhat of a record breaker. The Ishpeming players got eleven hits for its two pitchers, who only allowed one safe single, while they were marking up sixteen strike-outs, and still Ishpeming was beaten by a score of three to two. Bases on balls at critical moments explain why Ishpeming lost a contest that otherwise it should have won several times over. The great American game is one of surprises and astounding developments.

We have no doubt that Superintendent Baker, of the Mattawan asylum, will be able to justify every step he has taken in regard to Harry Thaw. The superintendent is no fool. He realizes how closely his treatment of Thaw is being scanned and even if he were inclined to do anything but what was fair or just he would be restrained by the thought that any other course would bring a broadside of "statements" from the senior Mrs. Thaw. What Superintendent Baker is probably doing is treating Thaw as he would if he didn't have the family connections that he in fact has. What the Thaw family apparently wants is specially considerate conduct toward their erring member because they are who they are.

Louis C. Cramton, of Lapeer, one of the framers of the Warner-Cramton liquor law, which has been attacked as being full of faults and as probably unconstitutional in its most important provisions, comes to the defense of the statute in a statement (reprinted in another column) in which he gives as his opinion, and backs it up with citations

of law, that the statute will be found to stand the close scrutiny of the higher courts, when the time comes to interpret it. In conclusion Representative Cramton says: "The law was strictly a compromise between elements having widely divergent views and there are portions of it that will no doubt require judicial construction, but nothing is likely to endanger the validity of the act or any important feature of it. In my opinion, it was honestly built, although not always on the lines that our side of the house wanted."

State Game Warden Pierce is abundantly able to take care of himself, as the Lansing Republican intimates:

Game Warden Pierce is caustic regarding those federal chaps who persist in trying to annoy him and his department. Every time the pin pricks him he takes a wallop back that ought to make someone wince because of the vigor he displays. So far as accounts current in this state show, Mr. Pierce has made an efficient game, fish and forest warden. His deputies are enforcing the laws and he seems to be sticking by his theory that the best way in which a deputy can hold a job in his department is by displaying the ability to deliver the goods when violations are discovered or information regarding poaching is secured. If any federal man has any real criticism to make, let him come out in the open and fight fair. So far Mr. Pierce has had the best of the argument, both in regard to the amount of loss by forest fires in this state and the latter controversy as to the game and fish protection work. Just what is back of all this row is a matter which ought to be known.

Open betting at the Marquette-Neenah ball games Sunday appears to have aroused much adverse comment. In all the important leagues of the country betting is put rigorously under the ban, and if a person flashed his money on any grounds where a game was in progress he would speedily find himself studying the outside of the fence. Thousands of people who object to betting on grounds of conscience are patrons of ball games, and the managements wisely plan to invite their coming by making the conditions surrounding the game such as they cannot object to. Open betting would quickly cut down the attendance at the games in this country, and would bring the sport into disrepute. The managements should absolutely prohibit it and should instruct the policemen on duty to prevent the laying of wagers in a public manner during the progress of any game. Fans with betting propensities can easily arrange to place their money in private, without flaunting it, and their bets, in the faces of people who have conscientious scruples against the practice.

Walter Wellman's dreams of finding the north pole via the air route seem to be doomed to disappointment. His last reverse appears to be the most serious he has encountered, for his airship is a shattered wreck, and there is no possibility of his making another dash until next season. The primary cause of the disaster was the collapse of the leather guide rope. This rope was planned to trail down from the balloon, giving it stability and keeping it in low altitudes. It was hollow and was used for the storage of provisions. Apparently it was made too light to stand the strain, and broke when the airship was thirty-five miles on its polar journey. The ship instantly shot to high altitudes, and as it was deprived of one of the important aides to its successful navigation, and as necessary stores were lost, there was no alternative left to its navigators but to begin the return journey. Mr. Wellman now regrets that the airship accepted tow from the steamer Fram, which carries the expedition, and asserts his belief that an attempt to navigate the ship back to the shed under her own power would have been successful. However this might have been, the ship was badly wrecked when within thirty miles of the pole. Mr. Wellman intrepidly announces his purpose to continue his attempt next season. He first planned the trip under the auspices of the Chicago Record-Herald, and with that paper defraying all the expenses. Of late we have heard less of the Record-Herald in the connection, and it is suspected that the persistency in the expedition is largely due to Mr. Wellman's own person. The fortunate thing about the latest disaster is that it occurred where and at the time it did. Had the party reached a much farther north latitude an anxious and fearful world might be now wondering about its whereabouts, and presently would come to realize that another tragedy had been added to the long list enacted in the course of the never-ending search for the north pole.

THE DEADLY AUTOMOBILE. When the statistics of violent deaths for the year 1909 are compiled there exists little doubt that the record made by the deadly automobile will closely approach the loss of life in the most hazardous occupations that are carried on in the course of the industrial life of the nation. The difference will be that the deaths chargeable to the automobile will have occurred in the pursuit of speed or pleasure, and are, in the main, an unnecessary sacrifice, while the deaths in the industries are part of the world's great day's work, and, in most cases, at least, are unavoidable, despite the safeguards thrown about the lives of the workers.

The new Indianapolis track for automobile speeding was charged with a toll of seven lives last week. This is a bad showing for a track scientifically planned for safe racing, both for the men in the cars and the spectators. It is doubly bad in view of the fact that the Crown Point, Ind., races, earlier in the summer,

were held over twenty miles of country roads, not primarily planned for speeding, without accident. The Indianapolis track, it appears, was in no condition for the races held on it. The surface was soft and not properly prepared. The races should not have been sanctioned until it was in better condition.

But while professional speeding is taking its toll of death the fatalities chargeable to pleasure riding are much more numerous, and their aggregate number far overtops the other class of fatalities. Yesterday's press dispatches chronicled two of them. Near Waukesha, Wis., a touring car was struck by a train, and one life was blotted out. In the neighborhood of New Brunswick, N. J., the steering gear of a car traveling at the rate of forty miles an hour gave way, and in the resultant collision with a telegraph pole one person was killed and six others seriously injured.

The reader of papers hardly picks up an edition that does not contain the account of an automobile accident, usually attended by serious consequences, reported from some corner of the country, and no small part of them were preventable, if the proper precautions had been taken. Many tragedies are enacted on grade railroad crossings because the automobile party "takes a chance," and endeavors to cross without ascertaining whether a train is coming. "Taking a chance" is, indeed, the rule with most drivers of motor cars, and is a practice chargeable with no small part of the impressive toll of dead and injured.

The cars make considerable inroads on the non-riding population, but they are slight compared with the accidents in which the users of the cars themselves are the victims. And there is no particular reason to look for an improvement. There is something about high speeds that appears to be unsettling to everyday common sense.

UNHISTORICAL HISTORY. To The Mining Journal:—The address of E. Scribner of Ishpeming at the old settlers' picnic, these last week, was marked by some glaring inaccuracies that have gained some currency through the publication of its text and that have been reprinted by outside papers in at least one instance—namely, by the Soo Times.

Mr. Scribner said, for one thing: "We find in 1844 that the United States sent a civil engineer whose name was Jackson and whose home was at the present city of Jackson in the lower peninsula. He surveyed in the upper peninsula, reporting to the state geologists that there were mountains of iron ore up here, some sixteen miles from Marquette. These specimens which he secured in the course of his surveying were sent to Jackson and Lansing."

This is a wholly inaccurate statement of the discovery of iron ore in Marquette county, the only correct thing about it being the year given. The discovery was actually made by William A. Burt, a deputy surveyor under Dr. Douglas Houghton. On September 15, in 1844, Mr. Burt was running lines near the present location of Negaunee when he noticed that the magnetic needle of his solar compass showed great variations. On one particularly noticeable variation Mr. Burt said "Look around, boys, and see what you can find." He found fragments of iron ore, and carried away all the specimens that he could pick up. In June of the following year Dr. Houghton and Mr. Burt made a more particular examination of iron bearing lands near where Palmer is now located. Careful investigation is said to have disclosed other claims of earlier discoveries of ore by whom and by what name is now generally conceded to have made the first find.

No civil engineer Jackson by name has any connection with the early records of the exploration of the Lake Superior iron fields, and in the mind of the writer he is a mythical character entirely created by Mr. Scribner. The Jackson Iron company, organized in 1848, was so called because its members came from the city of Jackson. In this group of pioneer exploiters we find the names of P. M. Everett, James Gannon, S. T. Carr, E. S. Rockwell, F. W. Kirkland, W. H. Munroe, A. W. Ernst, Fairchild Farrand, Abram V. Barry, John Westgren and S. A. Hastings.

Again Mr. Scribner says: "About that time there came a man from Cleveland, by the name of Graveret, said to be a man of strong physical ability. He, with a party of five or six, started in April from Mackinac island and landed two months later in Marquette. They put their packs on their backs and started, following the trail in search of the iron mountain, which you old settlers know was nothing less than Jasper. At last they landed at the Soo and they entered a government claim under the old pioneer act."

The sin here is principally the mutilation of the name of one of the most respected of the early pioneers, Robert J. Graveret, who is designated as "Graveret" by Mr. Scribner. At the Soo in 1848 Graveret met Edward Clark of Worcester, Mass., and persuaded him to stop at the Carp, where the Jackson company had already begun operations. Clark was much impressed with what he saw and returned home, taking with him one of the blooms of iron. It gave excellent results in a wire factory, and the project of building a forge on Lake Superior, in company with Graveret, was conceived. Anos B. Harlow was also interested in the enterprise. It was on July 10, 1849, according to a paper written by the late Peter White, that the clearing of the site of Marquette was started by Harlow, Graveret, Mr. White himself and other members of the party. I write at this length because I regard it as important that if the younger generations are to read history of our pioneer days it is essential to give honor to whom honor is due, that they read real history, and not a counterfeit presentation. At least with regard to the points I indicate Mr. Scribner's address is wholly misleading and incorrect.

MARQUETTE COMMON COUNCIL PROCEEDINGS. (Official.) Marquette, Mich., Aug. 17th, 1909. An adjourned regular session of the common council was called to order at 8 o'clock p. m. by the mayor, the Hon. Daniel Vaughan.

Present—Aldermen Asire, Butler, Donovan, Downey, Ekstrom, Hennessy, Reichel and Ward—8. The record of the session of August 2nd, approved.

The mayor presented the following: Marquette, Mich., Aug. 17th, 1909. To the Honorable Common Council. Gentlemen—I hereby nominate and appoint, subject to your confirmation, Henry Bitters as a member of the Board of Fire and Water Commissioners to fill vacancy.

Respectfully, DANIEL VAUGHAN, Mayor. On motion of Alderman Hennessy, supported by Alderman Donovan, the appointment of Henry Bitters, as member of the Board of Fire and Water Commissioners, was confirmed by the following vote:

Yeas—Aldermen Asire, Butler, Donovan, Downey, Ekstrom, Hennessy, Reichel and Ward—8. Nays—None.

The following resolution, which had been unanimously adopted by the Light and Power Commission, on August 9th, 1909, was presented, and, on motion of Alderman Downey, supported by Alderman Asire, referred to the Park, Cemetery and Street Commission:

Resolved, That the dam in Dead river at Collinsville, built by the Valley Milling company, backs the river up on our water wheels at times of high water, flooding our dynamo room, endangering our large electric generator, rendering it necessary to remove said dam; and

Resolved, That the dam in Dead river at Collinsville, built by the Valley Milling company, backs the river up on our water wheels at times of high water, flooding our dynamo room, endangering our large electric generator, rendering it necessary to remove said dam; and

Resolved, That the dam in Dead river at Collinsville, built by the Valley Milling company, backs the river up on our water wheels at times of high water, flooding our dynamo room, endangering our large electric generator, rendering it necessary to remove said dam; and

Resolved, That the dam in Dead river at Collinsville, built by the Valley Milling company, backs the river up on our water wheels at times of high water, flooding our dynamo room, endangering our large electric generator, rendering it necessary to remove said dam; and

Resolved, That the dam in Dead river at Collinsville, built by the Valley Milling company, backs the river up on our water wheels at times of high water, flooding our dynamo room, endangering our large electric generator, rendering it necessary to remove said dam; and

Resolved, That the dam in Dead river at Collinsville, built by the Valley Milling company, backs the river up on our water wheels at times of high water, flooding our dynamo room, endangering our large electric generator, rendering it necessary to remove said dam; and

Resolved, That the dam in Dead river at Collinsville, built by the Valley Milling company, backs the river up on our water wheels at times of high water, flooding our dynamo room, endangering our large electric generator, rendering it necessary to remove said dam; and

There is only one grade of HUNT'S PERFECT Extracts and Baking Powder. It is the best that can be made—chemically tested and pure. All Grocers. GET A CAN AND A BOTTLE TODAY.

The Great Lakes Trip. A little journey on the inland sea is the most pleasant and economical vacation trip in America. The ever varying scenery of the shore line and the picturesque beauty of the islands add interest and delight to every mile of the trip. All the important ports on the Great Lakes are reached regularly by the excellent service of the D & C Lake Lines. The ten large steamers of this fleet have all the qualities of speed, safety and comfort. Every boat is of modern steel construction and is propelled by powerful engines. The Clark Wireless Telegraph Service is used aboard. Tickets reading via any rail line between Detroit and Buffalo, Detroit and Cleveland, in either direction, are available for transportation on D & C Line Steamers. The D & C Lake Lines operate daily trips between Buffalo and Detroit, Cleveland and Detroit, four trips weekly between Toledo, Detroit, Mackinac and waypoints, and two trips weekly between Detroit, Bay City, Saginaw and waypoints. A Cleveland to Mackinac special steamer will be operated from June 15th to September 10th, leaving Cleveland direct for Mackinac stopping at Detroit enroute every trip and at Gerdoh, Ont., every other trip. Special daylight trip between Detroit and Cleveland during July and August. Send 2 cent stamp for illustrated pamphlet and Great Lakes Map. Address: L. G. Lewis, G. P. A., Detroit, Mich. P. H. McMillan, President. A. A. Schantz, Gen. Mgr.

north line of Wabash street to south line of Norwood street, the full width thereof according to the grade heretofore established therefor.

Resolved, That the grading of Norwood street, from west line of Presque Isle avenue to east line of Longyear avenue, the full width thereof according to the grade heretofore established therefor.

Resolved, That the controller is hereby directed to have the following improvements made, to-wit: 1. The construction of a six-inch tile sewer in Arch street, from manhole in the trunk sewer in said street to a point 152 feet east of said manhole.

Resolved, That the controller is hereby directed to establish and define local assessment districts embracing all the lots and parcels of real estate deemed to be benefited by said improvements, respectively, and assessment rolls as provided by the charter of the city, assessing thereon the estimated cost of said improvements, and submit the same to the council.

The committee on railways and public conveyances presented for second and final adoption an ordinance entitled, "An ordinance to authorize certain persons to locate, construct, maintain and operate street railways, either by electricity or horse power, on certain streets and avenues of the city of Marquette," adopted July 14, 1890.

On motion of Alderman Donovan, supported by Alderman Asire, said ordinance was placed upon its second passage and adopted by the following vote: Yeas—Aldermen Asire, Butler, Donovan, Downey, Ekstrom, Hennessy, Reichel and Ward—8.

Nays—None. The council then, on motion, adjourned. DANIEL S. DONOVAN, Recorder.

THE CONSTIPATION EVIL. Is Responsible for Most Cases of Piles. Constipation paralyzes the blood vessels of the lower bowel, and often causes piles. Women, and all other indoor workers, are the most frequent sufferers. But curing constipation alone won't cure piles. A special medicine is needed—internal treatment. It loosens the stiff, flabby veins and starts pure blood circulating.

Dr. Leonard's Hem-Roid is the only internal pile cure. Sold under guarantee, 81 at The People's Drug Store, Marquette, Mich., City Drug Store, Ishpeming, or Dr. Leonard's Co., Station B, Buffalo, N. Y. Write for booklet.

DULUTH, SOUTH SHORE & ATLANTIC RAILROAD COMPANY. Notice is hereby given that the annual stockholders' meeting of the Duluth, South Shore & Atlantic Railway company for the election of directors and the transaction of any other lawful business, will be held at the office of the company in the Nester block, Marquette, Michigan, on September 16, 1909, at ten o'clock a. m. The transfer books will close on August 28, 1909, at 12 o'clock a. m. and re-open on September 17, 1909, at ten o'clock a. m. JAMES CLARKE, Secretary. (8-16-28)

## WHAT TO DO WITH THE DRUNK.

### Justice Croze Finds That Jail Is No Punishment for Regulars.

Justice L. L. Croze of Houghton had before him a number of drunks yesterday morning all of them regulars, men who are not deterred from drink by jail sentences. The worst case was William Martin, who evidently considered that being arrested was a joke. It was his third appearance and Justice Croze bound him over to the circuit court in the hope that he will be sentenced to Marquette prison.

The court expressed a few opinions regarding the habitual drunkards who appear regularly in his court. He said that if he sent these men to jail under hard labor sentences there would be no work at the jail for them to do, and they would be around during their terms and simply live easy and lazily and enjoy every minute of the time. He hopes that the board of supervisors will pass a resolution permitting the sheriff to put these men at work on village streets, and then the habitual drunk question may be solved as this class of men does not like work. Justice Croze said that ordering these fellows out of town does not have any effect. They simply return when the coast is clear and are glad to be arrested again. A rock pile is the only solution.

Two drunk and disorderly cases were before Justice Little at Houghton and one before Justice Finley in Hancock. Justice Brand had to deal with an unfortunate woman with a black eye. He sent her back to jail for a short term.

Justice Croze had five cases. Henry Logan was the first man arraigned, he being charged with being drunk and disorderly, having been found asleep on the back porch of Dapper's saloon Saturday evening.

"Are you any relation to John A. Logan?" asked the court, facetiously, and Henry astonished him by answering: "Yes; he was my father, but he is dead now."

Logan admitted that he had been drunk for two years, and that his nervous condition was due to the fact that he had not taken his morning's morning eye opener. One dollar and every other thirty days was his sentence, and he took the latter.

John Kinnen was sharing Logan's porch couch, and he was also arrested. He said he had taken only a little beer, and the court remarked that it was strange how "only a little beer" could make these fellows so drunk. Here Logan, from the wisdom of long experience, volunteered: "Beer'll make you drunk all right, if you take enough of it." Kinnen also took thirty days.

Sigle Juntunen had been helping a Chassell farmer and he came to town Saturday night and spent his earnings for booze. One and costs, John Saari was drunk Saturday noon on Sheldon street and yelled so loudly as to attract a large crowd. Three dollars or thirty days; he took the thirty.

## TO IMPROVE INFANTRYMEN.

### Captain Foley Has Gold Watch Contest to Promote Interest.

Captain Martin Foley, commanding the Houghton Light Infantry, has organized a plan for the promotion of interest in the company. It is a gold watch contest, the watch to be given to the enlisted man showing the greatest proficiency. The award will be made by General Wagner when he makes the annual inspection of the company next fall.

Captain Foley says that the members are now taking an interest such as will undoubtedly raise the standard of the company in a short time, and he wants to sustain that interest. The company made a gratifying showing at camp and he wants it to make a better showing next year. This can be attained only by hard work and study and he is willing that the men shall receive a more tangible reward than the mere honor of making good at camp. To this end he has purchased a fine gold watch. There are actually two watches, so the winner may make a choice of cases. The prize will be given to the man who will, at the time of the inspector general's visit, have the best record in five points of excellence: Attendance at drill, knowledge of tactics, rifle range records, knowledge of guard manual and deportment in the company. A meeting of the company will be held Thursday night, and at that time the relative value of these five points of excellence will be determined on a basis of 100. The contest will begin Thursday night.

In addition to the main contest, there will be monthly contests. A suitable prize will be offered at each monthly contest, a donation by some local merchant, the first of which will probably be a 25-caliber rifle. This monthly prize will be awarded at a social session to be held once each month in the armory. A school of the company will be conducted by the officers every two weeks and a report of this school will be made to Colonel Thielman and Major Heckel so they can determine the winner of the monthly prize. A complete record of the entire contest will be kept and submitted to General Wagner when he comes, so that he may be guided by it as well as his personal inspection in awarding the gold watch.

Captain Foley says there is room in the company for twenty-five recruits, and all of these will be eligible to the prizes. Their inexperience will not handicap them in working for the prizes, as the contest is one to determine progress in military knowledge rather than the knowledge of the company of course would be in favor of the older soldier.

Why Not Now?

## MESNARD MEMORIAL MEETING.

### Service Held in Honor of the Great Jesuit Missionary.

The 24th anniversary of the death of Father Rene Mesnard, the famous missionary explorer, was observed Saturday evening by members of the Mesnard club, Foresters of America. It was the first Mesnard memorial service ever conducted in Hancock.

The program was arranged for the evening by Dr. J. T. Sullivan, C. O. Olyiver and Attorney J. H. Olyiver of Marquette.

Dr. Sullivan, who is well versed in the story of Mesnard's last and fatal voyage, narrated the events of the present harbor of refuge at the annual. The expedition left Quebec in the summer of 1885 and events went along smoothly until the middle of August. Mesnard met his death either through an attack of fever, starvation or the treachery of some of the Indians who had been engaged to show the way across the portage to Portage Lake. The missionary's body was recovered and was given final interment in the neighborhood of the Lily pond.

A movement was launched at the Hancock meeting to have the canal named Rene Mesnard, in honor of the famous missionary explorer. It is planned to erect a monument to him, and this petition will be presented to the war department.

## ASSESS TELEPHONE COMPANIES.

### R. H. Shields of the state tax commission will leave Houghton today for Lansing to attend a meeting of the commission which is called primarily for the purpose of making the first ad valorem tax on telephone and telegraph companies ever made in Michigan.

There are about 1,000 telephone companies in the state to be assessed, and only those whose earnings are less than \$500 a year are exempt from the payment of the tax.

## WRESTLING TOURNAMENT.

All arrangements for the big wrestling tournament at Trimountain next Saturday have been completed. The best men in the country are expected to enter. It is not improbable that Ziehl of Calumet and Rowett of Bessemer will be two of the main attractions of the event. The Chapman brothers of Trimountain will take part in the tourney.

## AMALGAMATED.

### A Striking Anomaly—Conflict With the Guggenheims and Low-Cost Copper.

With copper at 13 1/2 cents, with the present dividend rate 82 per share, and with possible earnings on the present copper market of \$3.25 per share, Amalgamated, at 83 or thereabouts is an anomaly, declares the Boston News Bureau.

The explanation must lie in the head distribution which Amalgamated has as well as many other securities, has had since the price days of 1907 when the public secured some real bargains at prices which spelled the urgent necessities of the sellers.

The ownership of Amalgamated in the stocks of its constituent companies represents an equity in 100,000,000 pounds of copper at the present rate of annual output. On this copper there is a profit at the present time of about 2 1/2 cents per pound, or, in the aggregate, a sum equal to \$2,500,000. This was when a producing copper mine was supposed to sell for a 10 per cent investment, but modern finance declares this to be an old-fashioned theory, and proceeds to justify its declaration by causing Amalgamated to sell at a price which yields but 2 1/2 per cent on the investment, though at present no one has been able to figure out how this is accomplished. The situation becomes all the more complex, as the position of the company's highest-cost mines at a time when the country's output is in the midst of the largest expansion ever known, is not an enviable one. The low-cost copper, which the newer mines are beginning to put out, has already made itself felt in no uncertain way on the metal market. Utah Copper and Nevada Consolidated, for instance, are at the present time outputting at the rate of 128,000,000 pounds per annum at a net average cost of under 10 cents per pound, or, in the aggregate, it is costing Amalgamated at least 10 1/2 cents per pound to make its 100,000,000 pounds of annual product. The securities of Utah Copper and Nevada Consolidated combined are selling in the stock market for \$75,000,000. Amalgamated is selling for \$20,000,000—a comparison heavily in favor of the two so-called Guggenheim properties, especially when the cost prices of each are placed in contrast.

The entrance of the Guggenheims into the copper-producing industry has not been viewed cordially by the Amalgamated people, and they have retaliated by entering the smelting business, formerly monopolized by the Guggenheims, and have organized the International Smelting & Refining company "to fight the smelting trust." The real split between these two big interests happened early in 1907, and arose over a dispute concerning the settlements which the American Smelting & Refining company was making for silver, the selling of which was handed over to them by the Amalgamated people in return for the selling of the Smelting company's copper output. Soon after there followed the loss of the Utah Copper company's copper-selling contract by the United Metals Selling agency of the Guggenheims. The breach has been growing wider ever since.

To make still stronger their position, the Guggenheims have been paying out millions of dollars in the acquisition of the shares of promising low-grade copper cost copper mines. In Nevada Consolidated they are today the dominant factors; in Utah Copper they hold very large interest, and they are also very large stockholders in the First National Copper company, Ray Consolidated and the Gila Copper company. The Guggenheims are today selling yearly 250,000,000 pounds of copper, and are in position to put up a stiff argument in any trade controversy with the Amalgamated United Metals Selling interests.

The time has gone by when the predictions of low-costs by Nevada Consol-

## LOOK FOR THE FAIR IS GOOD IN EVERY DEPARTMENT.

### Both shafts. There is some talk of making shipments of rock to the Phoenix mill for treatment, but such plans have not been definitely decided upon. If shipments are made it will be to save rehandling from a stockpile and not with a view to steady production at this time.

There is every reason to look for a decided improvement from the stamp mill. Further doubts as to the value of Isle Royale have been raised because the Baltic lode shaft, now down about 500 feet, has not disclosed any copper bearing ground. The shaft is sinking in about the middle of what is considered the Baltic lode. Apparently the values have worked toward the hanging or footwalls. In this event crosscuts will disclose these results. In view of the very excellent showing so far attained at the Superior, there is no reason why Isle Royale, lying directly north, should not get a fair showing working the same lode as Superior. It is quite possible that Superior is rich on one of its shafts in a pocket of rich ground. In this event it would simply mean that Superior is not worth half its present selling price, or else Isle Royale was selling for about one-half its real value. Isle Royale is far better equipped than its neighbor to the south, and in addition has five shafts against Superior's two and a stampmill quite modern in every respect. Isle Royale is always a speculative favorite and in any kind of an active copper share market will be found well toward the front.

## FIRST NATIONAL COPPER.

### There is a suspicion that the rise in First National Copper company shares has been manipulated with a view to advancing the price to such a point as would facilitate a sale of \$1,000,000 convertible bonds to be issued to retire \$750,000 of Balaclava Consolidated company bonds, and to provide additional working capital. These bonds were authorized by the shareholders but not issued, as with the stock selling under \$5 per share, a bond convertible into stock at \$10, was not of ready sale, especially in view of certain "so-called" conditions, and the management was unable to secure the necessary underwriting. The company was, therefore, forced to borrow \$375,000 necessary to redeem \$750,000 bonds which fell July 1, and as soon as the stock reaches a price which should make attractive a 6 per cent convertible bond issue to stock at 10, an effort will be made to sell the bonds. The First National Copper company is now outputting copper at the rate of about 1,200,000 pounds per month, producing at a cost of 10 1/2 cents per pound. On 15-cent copper the company on this output could just about earn \$1 per share.

## NOTES OF COPPER NEWS.

Calumet & Arizona shafts "C" and "A" of the Irish Mag mine, will be closed until Sept. 1, to permit of retimbering. The electric hoist will be in commission when work is resumed.

The stockholders of the Ray Consolidated company will be given the right to subscribe to the new issue of 200,000 shares in the proportion of twenty-six new shares for each 100 shares standing in their name.

The home office of Superior & Globe is advised that the shaft has attained a depth of 400 feet and is sinking in diabase showing sulphides. The management has not yet decided whether to crosscut at the 500-foot level, but will go over themselves by conditions as found at this point. It may be necessary to go deeper to get into a zone where the ore body will be found and not entirely leached out. As far as getting the ore there is, considering that success will attend the efforts of the shaft, the Superior & Globe has money enough on hand to make it possible to continue operations for at least another year without calling on shareholders for additional funds.

Mass continues to direct a part of its activity towards the opening and development of the so-called new Mass lode, and expects soon to have this copper-bearing bed in shape for production. Some of this rock is now being shipped, mixed with rock from the Evergreen bed, without materially affecting the yield per ton of rock in the total tonnage milled. It is planned to mill this rock separately a little later when sufficient openings have been created to make possible the shipment of at least 400 tons daily to meet the capacity of one steam shaft. The company is at present securing a very fair grade of stamp rock from D shaft. The situation in a shaft remains unchanged.

## AMERICAN TRAINS IN MANCHURIA.

Consul Roger S. Greene of Dalny reports that the South Manchuria Railway company on Oct. 27 received 100 train cars when these likely properties are on a producing basis. The Courtland property is being opened up rapidly, and results to date have been very gratifying.

## BUTTE COALITION.

With the opening of the seventeenth level of the Butte Coalition in the Tramway and Mimie Italy mines the company will be in a position to mine fully 3,000 tons of ore per day. The output has been slowly but constantly increasing for a year and is now about 1,000 tons per day. No effort has yet been made to push production, but if the demand for copper ever justifies it, the company will be in a position to double its present production. No property in the Butte district, not even excepting the North Butte, has inspired so much faith and confidence in the copper world as has Butte Coalition, and that company has more stockholders in Butte than any other company operating in the district. They are looking forward to the coming of the time when the directors, as one of them has been quoted, will pay a substantial dividend and keep up the payments.

## ISLE ROYALE.

Alarmists have been making a great deal out of the falling off in the copper contents of Isle Royale as was reflected in the July production of the company, say Minnear & Co., of Laurium. The explanation given for the decreased contents was the absence of the normal amount of mass copper. This could easily have made a difference of from one to three pounds in the mineral returns per ton of rock stamped. It should be remembered when considering the present status of Isle Royale that the company is devoting its best efforts toward sinking and drifting rather than making any effort at a production record which would and could follow stopping. When the new shafts have attained greater depth

both shafts. There is some talk of making shipments of rock to the Phoenix mill for treatment, but such plans have not been definitely decided upon. If shipments are made it will be to save rehandling from a stockpile and not with a view to steady production at this time.

**SUPERIOR & PITTSBURG.**  
The July production for Superior & Pittsburg was 1,037 tons of blister copper. A slow but gradual increase in the output of the company is noted, and when metal conditions are more satisfactory as far as price is concerned Superior & Pittsburg will be able to show a material increase. The territory tributary to the Junction shaft is causing much favorable comment. The ore body being opened there is one of the biggest in the Bisbee camp and is of uniform richness. It is expected that before the close of the present year the big Briggs shaft will be again in commission. Sinking will be pushed vigorously at this point, and as there was every reason to look for substantial ore bodies in the territory commanded by this shaft the fruition of this hole will mean much to the company.

## FIRST NATIONAL COPPER.

There is a suspicion that the rise in First National Copper company shares has been manipulated with a view to advancing the price to such a point as would facilitate a sale of \$1,000,000 convertible bonds to be issued to retire \$750,000 of Balaclava Consolidated company bonds, and to provide additional working capital. These bonds were authorized by the shareholders but not issued, as with the stock selling under \$5 per share, a bond convertible into stock at \$10, was not of ready sale, especially in view of certain "so-called" conditions, and the management was unable to secure the necessary underwriting. The company was, therefore, forced to borrow \$375,000 necessary to redeem \$750,000 bonds which fell July 1, and as soon as the stock reaches a price which should make attractive a 6 per cent convertible bond issue to stock at 10, an effort will be made to sell the bonds. The First National Copper company is now outputting copper at the rate of about 1,200,000 pounds per month, producing at a cost of 10 1/2 cents per pound. On 15-cent copper the company on this output could just about earn \$1 per share.

## CALUMET & ARIZONA.

The announcement of a dividend of \$1 per share declared by the directors of the Calumet & Arizona Mining company was expected. There was a little talk of an increase at this time, but those who best knew the condition of affairs realized that the company was not in a position to be paid Sept. 29 to stockholders of record Sept. 3. The production for July was 1,095 tons of blister copper. Calumet & Arizona could increase its output should conditions warrant such a move, but at the present time the company is selling for less than fourteen cents, no material increase in the product is expected. Calumet & Arizona is earning now a little less than 86 per share, although it is spending a goodly sum on the development of its new properties. The production of the company is expected to be retained in the near future when these likely properties are on a producing basis. The Courtland property is being opened up rapidly, and results to date have been very gratifying.

## BUTTE COALITION.

With the opening of the seventeenth level of the Butte Coalition in the Tramway and Mimie Italy mines the company will be in a position to mine fully 3,000 tons of ore per day. The output has been slowly but constantly increasing for a year and is now about 1,000 tons per day. No effort has yet been made to push production, but if the demand for copper ever justifies it, the company will be in a position to double its present production. No property in the Butte district, not even excepting the North Butte, has inspired so much faith and confidence in the copper world as has Butte Coalition, and that company has more stockholders in Butte than any other company operating in the district. They are looking forward to the coming of the time when the directors, as one of them has been quoted, will pay a substantial dividend and keep up the payments.

## OJIBWAY.

Ojibway continues to secure further good showings with every additional foot of drifting down at the 800-foot level, and ground that apparently has the makings of a mine is being developed at that depth in both shafts. The No. 2 shaft has reached the 1100-foot level, at which depth it will probably remain temporarily bottomed during the period of increased activity in the horizontal openings. The No. 1 shaft has a few feet more to go to reach equal depth. The creation of lateral openings for the present is confined to the 800-foot level in

## CALUMET CLERKS' PICNIC.

### Annual Outing Marked by Closing of Stores—Festivities at Entry.

The first annual picnic of the Calumet clerks, which is an affair on the order of the annual outing of the merchants of Houghton and Hancock, will be given today at Portage Entry. All of the stores of Calumet will be closed. A special train will leave over the Copper Range railroad at 7:30 a. m., arriving at Houghton between 8:30 and 9 o'clock. From Houghton the excursionists will be taken to Portage Entry by boat and there will be dancing on board, both on the down and on the up-trip. There will also be dancing at the big pavilion at the Entry. Refreshments will be served on the boat and on the ground and everything else possible will be done for the convenience and comfort of the picnickers. At the grounds, a fine list of sports will be carried out. The big feature of the program will be the ladies' tug-of-war, which, it is believed, will develop pleurisy among the fair ones hereafter. The picnic will be a very successful one, and it is believed that the excursion will be the first ever held by the clerks and merchants of Calumet, but it should certainly be a great success. Everyone seems to be taking the greatest interest in the affair, which means that it will be well patronized. The funds raised over the expenses of the excursion and picnic will be devoted to a good cause.

## AN OLD COUNTRY CEREMONIAL.

### St. Mathias' Society of Baltic to Have Banner Blessed Sunday.

The St. Mathias society of Baltic will have its new lodge banner baptized at St. Mary's Catholic church in Atlantic next Sunday morning at 10 o'clock. The service will be of a religious nature and will be witnessed by members of four different lodges, besides the congregation. The Baltic society and three lodges from Trimountain will take part in the ceremonies of the day. The new banner is 10 feet 5 inches long and is the property of the saint after whom the lodge is named.

The Baltic lodge will march to South Range, where the three lodges from Trimountain will be met. These orders are St. Mary's, St. Joseph's and the Dannebrog. The four societies will parade to Baltic and then to Atlantic, arriving there in time for the service. After the church services and ceremony the men will march to South Range, where the remainder of the exercises will be held in the park. Joseph Lovrine of South Range will officiate as chairman. There will be plenty of enjoyment at the park in the afternoon and evening. Music will be furnished by two bands, and meals will be served by the Baltic lodge.

## GOT BIOLOGICAL SPECIMENS.

Professor G. H. Coons, instructor in the Hancock High school, and Ernest Kotila, a pupil, have returned from Lower Michigan, where they took part in biological expeditions conducted by the University of Michigan. Different plants were collected and classified. A number of scientists and assistants aided in the collection of the biological specimens. The party were quartered at Brown Lake.

## TAKE NOTICE.

All persons are recommended to take Foley's Kidney Remedy for backache, rheumatism, and kidney and bladder trouble. It will quickly correct urinary irregularities, which, if neglected, may develop into serious illness. It will restore health and strength. Do not neglect signs of kidney or bladder trouble and risk Bright's disease or diabetes. Sold by all Druggists.

## AN OLD, OLD RESIDENT HERE.

### James Phelan Lived in Copper Country Thirty-Five Years Ago.

James Phelan of Fort Dodge, Ia., uncle of Edward and John Dunn, the well-known Red Jacket liquor peddlers, is "lost" in Calumet. Mr. Phelan has good reason to be lost, too, for it is just thirty-five years since he last saw Calumet and he finds a great many changes. In the old days, Mr. Phelan knew the name of every man, woman and child in the copper country district. Now he finds but a few of the old residents. He finds that progress has torn the old district down and built up a new and wonderful community that is still growing and being torn down and rebuilt. Mr. Phelan was a resident of the Atlantic location thirty-five years ago and was well and favorably known among the old inhabitants. He was born in Ireland and he says, "raised in the copper country."

## PROFESSIONAL HOCKEY UNLIKELY.

### Manager McNamara Talks of Proposed League Organization.

It is unlikely that the copper country will ever see professional hockey again, according to Manager McNamara of the Amphidrome, who is just home from a conference with leading rink managers in Chicago. He made this statement in response to the proposed Chicago meeting for the formation of a new international hockey organization to control the game in a manner similar to the baseball club.

If this organization is formed it will mean a league of the big Canadian teams and teams in Pittsburgh, Chicago and Cleveland. The Houghton rink will join it unless a Houghton team is considered necessary to fill out the league. The Amphidrome management does not want professional hockey, but would put in a team if it would help out the league in any way.

## SCHOOL FLOWER SHOW.

### About One Hundred and Fifty Children Competing for Premiums.

The school garden flower show which is to be held in the Central school, tomorrow is one of the latest educational movements adopted in Houghton, and it is the desire of the Woman's club, which has it in charge, that there be a large attendance. The exhibition is free. About 150 children will show flowers in competition for the premiums offered. If the exhibition seems to meet with public approval it will tend to increase the interest of the children in flower and vegetable culture. The possibilities in this movement for home beautifying and actual commercial flower and vegetable culture are what the Woman's club desires to show. It is a school course which offers both pleasure and profit to the children as well as cultivating their taste.

## COPPER COUNTRY FAIR.

A meeting of the executive committee of the Copper Country Fair will be held Thursday night for the purpose of determining what attractions shall be booked for the annual big show. Secretary McNamara has just returned from Chicago, bringing with him a list of attractions which are available, one of which will be the greatest sensation ever brought to the upper peninsula, if the committee decided to engage it. The advertising campaign began yesterday, when Thad Robertson, chief promoter of publicity, started his advertising wagon out over the county with flaming posters. Secretary McNamara says that the

Yesterday's temperatures: Seven a. m., 38 degrees; noon, 73; 7 p. m., 70. Maximum, 76 degrees; minimum, 58. Today's Forecast: Showers; stationary temperature.

A son was born to Dr. and Mrs. H. T. Carriel at 2 o'clock this morning.

The Knights of Columbus will hold a regular meeting at their hall tonight.

Mrs. Charles Mark and Mrs. Ed. Mark, of Duluth, are visiting with their sister, Mrs. August Mellin.

The second team will practice tonight. All members are requested to be on hand at Sixth and Ridge streets.

William Davis, the ladies' tailor, returned Monday from a week's business trip to Chicago and the copper country.

Mrs. C. L. Johnson has returned to her home, 414 Michigan street, after a visit with her sister, Mrs. J. Sharaud, Hewitt avenue.

The Knights of the Maccabees of the World, tent No. 63, will initiate a class of ten candidates this evening in Fraternity Hall. Refreshments and cigars will be served.

Mr. and Mrs. Charles Stewart have returned to their home in Clinton, Ia., after visiting with Mrs. Stewart's parents, Mr. and Mrs. Henry Jackson.

The Chicago Bloomers, who come here Friday to play tennis, were in a tight defeat yesterday at the hands of the champion Session & Sewell team at Milwaukee, by a score of 13 to 15. The Bloomers made ten hits while their opponents made sixteen.

Is Not a Candidate—C. Beaudry, night yardmaster for the South Shore railroad, and who has been urged by numerous friends to be a candidate for school trustee, announces that he is not a candidate. He says he is entirely satisfied with the personnel of the present board.

With the Ore Carriers—At the South Shore docks, the Ireland and Chattanooga cleared for Cleveland yesterday. The Maton is loading and the Yale was due last night. At the L. S. & I. dock, the Peter White and Pioneer cleared for Cleveland. The Aurora is loaded and is waiting for her consort. The Brantford and Bradley are leaving. The Pontiac is unloading at the Pickands dock and the Augusta and Frontenac are waiting.

Many Tourists in City—Hotel men and keepers of rooming houses report that there are now many tourists in the city, and that Marquette seems to be as popular ever as a summer resort. It is now the hay fever season in the states farther south and many are coming here to escape that disagreeable affliction. Though the Lake Superior climate is almost a sure cure for hay fever patients from another climate, there is an occasional case of it here, among those who have been here and raised in this locality.

Increase in Wages—Beginning Sept. 1, the wages of the employees on the L. S. & I. and South Shore docks will be raised from \$2.40 to \$2.70 per day for day work, and from \$2.00 to \$2.30 for night work, with time and a half allowed for overtime and sundays. This is the second raise that has been made at the docks this season, and at the opening of navigation, the men were getting but \$1.75 per day. The increase in pay has come without any solicitation from the employees and are a striking indication of the return to prosperity in the iron trade.

Water Very Fair—The reports on the city water received from the state board of health this summer have so far been much better than those received a year ago. The state bacteriologist reported as follows on the sample taken Aug. 10: "The water at the present time gives very fair results, both chemically and bacteriologically. A small number of coliform bacilli, however, are present, indicating the presence of a small amount of sewage in the intake." The sample was taken after the wind had been blowing from the south for several days, which would be supposed to be an unfavorable test as could be made.

Not Until Dec. 1—The Western Union and Postal Telegraph companies have not until notice their various offices that the new rule, which will increase the cost of sending non-dictionary code messages, will not take effect until Dec. 1, instead of Sept. 1, as first announced. The postponement has been made in order to give the customers of the companies adequate time to change their codes to conform to the new rule. The ruling provides that combinations of letters not spelling any word shall be charged at the rate of a word for every five letters. The banks and the powder mills are the companies in this city that will be most affected by the ruling.

For Detention of Juveniles—In accordance with action taken at the last meeting of the county board of supervisors, two of the basement rooms in the court house are being fitted up for the detention of any juveniles that may be brought before Probate Judge Port at any time. The new law provides that all transgressors under seventeen years of age in the county shall be brought before the probate judge for reprimand or punishment, as the case may require. The law further states that such culprits must be confined in some place apart from the county jail while awaiting trial or transportation to a state institution, after sentence has been pronounced. To comply with this law, two rooms in the court house basement are being fitted out with toilet rooms, etc., in which sanitary cots will be placed for sleeping purposes. The idea is to make the place of confinement as little like a jail as possible, and so keep the children from the stigma of "having been in prison."

**W. C. T. U. LECTURE.**

Mrs. Emer Calkins, state president of the W. C. T. U., will speak at the Methodist church this evening. Mrs. Calkins is one of the gifted women orators of Michigan, and when in this city five years ago delivered a strong lecture on the temperance question. Those who heard her at that time are looking forward to a treat this evening. In addition to the lecture, a musical program has been arranged, which includes a violin solo by Mrs. Freeman, of Grand Rapids; formerly Miss Edith Barry, of this city, and piano selections by the Misses Berg and Hicks. In the afternoon at 3 o'clock, Mrs. Calkins will address a meeting of ladies at the church.

**WORK FOR TAX COMMISSION.**

Over 1,000 Telephone Companies Must Be Investigated in 1910.

Although it is not generally known there are upwards of 1,000 telephone companies engaged in active business in Michigan, and every one of these companies will have to be investigated and assessed this year.

The last legislature imposed upon the tax commission, in addition to its already numerous duties, the task of investigating and assessing the telephone and telegraph companies doing business in the state. The commission has ascertained there are more than 1,000 telephone companies alone, in addition to the several telegraph companies, and it is figured the greater portion of the summer will be occupied in securing the data necessary on which to base the assessment. Marquette county has but two telephone systems, but in some of the lower peninsula counties it is common to have a dozen or more.

Under the new law a telephone company whose earnings are not in excess of \$400 per annum is exempt from taxation, but it is figured there are few who will come under the exemption. In addition to assessing the telephone and telegraph companies the commission has a number of complaints to investigate during the coming few months.

The commission is also preparing for the state board of equalization which meets two years hence. The tax commission must make recommendations to the equalization board from which the county valuations will be determined. During the winter months the tax commission has the job of assessing the railroads. What with fixing the values of railroads, telephone and telegraph companies, in addition to investigating and hearing complaints all over the state, and preparing recommendations for the state board of equalization, it can be seen the state tax commission will have no leisure during the next ten or twelve months.

**F. A. HATCH.**  
A Former Student of the Ferguson Business College.

F. A. Hatch took a complete course at the Ferguson Business College. The college secured a position for him at Ironwood with the American Express Company. After filling this position successfully for a few months, he was offered a better one with the Lake Superior Iron & Chemical Co., of Marquette. It is needless to say that a position with this company is an enviable one and that Mr. Hatch has every opportunity for advancement.

There is no position in a business office that offers a young man as good a chance for advancement as that of a position as stenographer. He handles the vital part of the business and learns more in one year than a person without this knowledge can learn in five years.

The Ferguson Business College makes a specialty of training young men for stenographic positions and of placing them with good firms. The school does not lose sight of its worthy students as soon as it places them in positions but is ever ready to help them to advance.

The fall term at the Ferguson Business College opens Sept. 6, 1909. No ambitious young man should remain out of employment or work at an inferior position when a few months of good hard study at this college will make him independent for life.

WITH A SMALL INCOME

You have better chances for building up a strong bank balance in the form of a DIVIDEND EARNING Savings Account than the man whose income is so large he is scarce able to estimate it.

Marquette National Bank

MARKETS

NEW YORK STOCKS.

Paine, Webber & Co.'s correspondent at New York yesterday telegraphed as follows: The list was irregular the greater part of the session, but in the last two hours was stimulated by the action of the Harriman issues, which were favorably affected by the news to the effect that Mr. Harriman would consent to an interview upon his arrival, and it was intimated that something official in the way of future plans might be forthcoming.

The final quotations follow: Amalgamated... 85 1/2, Anaconda... 49 1/2, Am. Smelter... 100 1/4, C. & F. I... 45, C. O. Q... 26 1/2, Erie... 26 1/2, Kan. C. Sm... 22 1/2, Mo. Pacific... 7 1/2, M. K. & T... 22 1/2, Reading... 101 1/2, Steel... 77 1/2, St. Paul... 122, St. P. & N. E... 159, So. Pacific... 134 1/4, Union Pacific... 219, Wis. Cent... 27 1/2.

Boston Stock Quotations.

Writing from Boston yesterday, Paine, Webber & Co. had the following to say of the stock market: The Boston market was rather quiet during most of the session with no stock pressing for sale.

The Boston market was rather quiet during most of the session with no stock pressing for sale. North Butte was in demand all day, closing at 59 1/2, the highest price. Nevada Consolidated was again well bought today. We still believe that copper stocks will sell very much higher.

Closing prices were:

Copper Metal Prices.

New York, Aug. 23.—The market for standard copper was firm today, but no sales were reported on the New York exchange. The closing prices follow: Spot, August, September and October, 12.75 1/2; November, 12.80 1/2; December, 13.13 1/2. The London market was steady, at a moderate advance, with spot quoted at 150, 138, 6d and futures at 150, 128, 6d. Local dealers quoted Lake copper at 13.12 1/2 @ 13.37 1/2, electrolytic at 12.87 1/2 @ 13.12 1/2, and casting at 12.62 1/2 @ 12.87 1/2.

CHICAGO GRAIN MARKETS.

Chicago, Aug. 23.—The beginning in earnest of the movement of this year's record breaking crop of wheat in the

THINK PERFECT RAIL HAS COME AT LAST

Railroad Men Believe Dudley's Invention Forestalls Interstate Board's Investigation—Is Designed to Bear Any Traffic for Five Years.

New York, Aug. 23.—Some of the members of the interstate commerce commission profess to be apprehensive lest the offering of grain and food products for transportation this fall may be so heavy as to lead to a shortage of freight cars. But it is apparent that the railway managers believe that they have that contingency well in hand.

At the appeal some of the railroad managers are disposed to smile. They believe that they have now secured a perfect steel rail as it is possible to make, and that the standardizing of it will come as a matter of course. For this reason, many of the railroad managers placed with the steel manufacturers this fall and winter by the railway companies. The steel rail problem has been one of the most embarrassing and anxiety-breeding difficulties that practical operators of American railways have been compelled to grapple with.

Northwest had depressing effect on the market here today, the closing quotations showing net losses of 1/4 to 1/2. The market was subject to general selling from start to finish. The selling at the opening was inspired chiefly by lower cables, due partly to heavy shipments from Russia, but later in the session the unusually liberal movement of wheat in this country, particularly in the Northwest, was the principal weakening influence.

When Mr. Dudley perfected the 80-pound steel rail, various railway managers were invited to inspect it, not with any view of profit, but simply in the hope that the more important lines of the United States would adopt it, and thus facilitate and economize the work of the managers who took their heads.

It cost too much, they said, not understanding the deeper philosophy of railway management, namely, that high cost is justified if there be economical gain. But there came one railway manager of great intellect, Mr. Dudley George D. Roberts of the Pennsylvania railroad, who, having inspected these rails and studied them, at once determined to equip the entire Pennsylvania line with like rails, but five pounds heavier than the old.

NO POLITICS IN THE CENSUS.

Department Is Inclined to Enforce Strictly the President's Order.

Washington, Aug. 23.—The president's order to Secretary Nagel regarding the absolute elimination of politics from the enumeration of the census supervisors and enumerators has brought a flood of letters to the department of commerce and labor asking how strict interpretation of the president's position will be.

In one instance the chairman of a county committee in Ohio, which will be inactive during the field work of the census, has been appointed a supervisor, and he has written to find out whether he must resign his place. He points out that he will be absolutely cut off from politics while performing his duties as supervisor, and does not believe that he would come under the president's prohibition. Assistant Secretary McHarg is of the opinion that according to the strict terms of the president's letter the Ohio man must resign one place, although he will not make a definite statement until he has had further consultation with Secretary Nagel.

He declared that he wished to make this regulation as broad as possible. Mr. McHarg believes that the enforcement of this order will prohibit a man holding any political place whatsoever from participating in the census. If this view is taken by Secretary Nagel it will mean several resignations among supervisors.

GREAT CAPITALISTS HAVE NEW METHOD

Indications Are Seen That They Will Invest in Business Other Than Roads and Industrials—Program in View Better Than Beneficiary Plan.

New York, Aug. 23.—It is not the unexpected which is now happening in the market where securities are dealt in. Here for weeks and months even, the public has remained away from the market, not being willing or courageous enough to take advantage of the lower prices or to base judgment upon any confidence in an increase in prices.

Today is a safe enough time to invest, but he is a prudent man, if his purse is not heavy or long who refrains from entering the speculative market. Here are some of the reasons for that prudence. There is every appearance today that the men of great capital are now preparing to invest much of that capital in various business enterprises, seeing an opportunity for larger profits than the railroads or many of the industrials offer.

It may be worth while to report some of the opinions expressed by men whose experience is that of veterans and whose judgment respecting conditions is usually good. First of all are the reports hinting at something sensational in the financing of the Union Pacific and of the career of the subject of this column, the opinion that Mr. Harriman and his associates have decided to issue beneficiary certificates representing stockholders' interests in the various investment properties held by the Union Pacific.

But it is apparent that the effect of this plan would be simply and more easily handled. But there would be objections to that plan, partly political and partly financial. If the Union Pacific stockholders receive beneficiary certificates, which are in law no more than a statement that the stockholder has such and such a percentage of the investments, they doubtless will be able to market the certificates if they choose to, and these certificates will have undoubtedly more than their face value.

But there came one railway manager of great intellect, Mr. Dudley George D. Roberts of the Pennsylvania railroad, who, having inspected these rails and studied them, at once determined to equip the entire Pennsylvania line with like rails, but five pounds heavier than the old.

So, too, there were many purchasers of New York Central stock a year and a half ago, when it was quoted below par. In very few instances have these purchases been parted with. It is the impression of those who are usually well informed that something in addition to the beneficiary certificate plan is now under way, and it may be as sensational in its announcement as was the increase of dividend to 10 per cent, three years ago.

The public is not buying Union Pacific stock in any great amount, as the public does not like to buy a stock that is in excess of \$200 a share. And it is certain that the Wall Street "pikers" are not buying that stock. The figures are a little beyond their capacity. By this method of elimination it is the impression of those who are usually well informed that something in addition to the beneficiary certificate plan is now under way, and it may be as sensational in its announcement as was the increase of dividend to 10 per cent, three years ago.

LAWYERS GATHER AT DETROIT.

Detroit, Aug. 23.—One hundred and fifty of America's leading lawyers are in the city tonight to attend the annual meeting of the American Bar association, which will open tomorrow morning. The secretary's report shows a healthy growth of the organization, the membership now being more than 3,650.

RUSH FIRES SPREADING.

Spokane, Wash., Aug. 23.—Bush fires near the lower Pan D'Oreille river are spreading to the Idaho side, toward Priest Lake, covering a large territory and doing the damage to timber and crops. Men are fighting the flames tonight, but are making little headway.

BURGLAR-PROOF GLASS.

Consul William Barbel of Rheims reports that a new French plate glass has been brought out which is practically burglar-proof. While an ordinary plate glass, such as is usually put into jewelers' show windows, can be smashed by a single stroke of a metal-fenced mallet, it is not possible to break this new plate glass in this manner. In an experiment made a large piece of cast iron was thrown violently against the window, but the only effect on the glass was a small hole measuring one or two inches. Several shots of a revolver loaded with jacketed bullets were then fired at the

WERNER BROS. Marquette, Mich.

WOOD AND BUILDING MATERIAL

I ALSO HANDLE Artistic Monuments COST NO MORE THAN PLAIN ONES IN WHITE BRONZE

Martie is entirely out of date. Granite soon gets moss-grown, discolored, requires constant expense and care and eventually crumbles back to Mother Earth. Besides, it is very expensive. WHITE BRONZE is strictly everlasting. It cannot crumble with the action of frost. Moss growth is an impossibility. It is more artistic than any stone. They who do not investigate it. It has been adopted for over one hundred public monuments, and by thousands of delighted customers in all parts of the country. It has been on the market over 25 years and is an established success. Many granite dealers have bought White Bronze for their own burial plots. I have hundreds of beautiful designs of all grades of work, and want to have you see them if you are interested in a monument, headstone, marker or grave cover. On receipt of a postal card will be pleased to call with designs and samples of White Bronze.

### SOCIAL AMENITIES FOR THE SCHOOL GIRL.

In running around to see your girl friends, whether formally or informally, do not utterly disregard the hours for meals in their homes.

It is not good form when you have not been previously invited to the meal to linger on to the luncheon or dinner hour. If you do so you are likely to place your friend or her mother in an awkward position. Either she asks you to remain because she feels it courteous to do so, or she has the meal delayed waiting for you to take your departure. It is well to carefully avoid putting yourself in the position of allowing either of these alternatives to occur. No housekeeper likes her routine interfered with, and unexpected guests are not apt to be popular.

In all well regulated houses the table is as conventionally laid for luncheon as for dinner, and to rearrange it at the last moment necessitates considerable change, accompanied by special orders to the kitchen, all of which members avoid if possible, and therefore they do not encourage inviting the girl at the last moment to stay.

If you are really wanted you should understand that you will be asked during the early part of your call. Suppose you go about 11 to see a girl friend. If she wishes you to remain to luncheon she will slip away in a moment to consult her mother about it, and if her mother consents she will return and ask you immediately, while you, if you wish to stay, will accept without hesitation, remove your things and settle down for a nice long visit.

But if she does not ask you in this spontaneous way do not embarrass her by staying right up to the moment the meal is announced and forcing her either to ask you under protest or feeling uncomfortable because she does not invite you. Keep track of the time and start away a good half hour before the meal hour. And when you start to take your departure stand not upon the order of your going, but get off with discretion. Some girls take a most astonishing time to say good-bye. It would seem as if all the most important, exciting and interesting topics of conversation occurred to them at the last moment, and they will chatter on even after they have said good-bye, forgetting time or meals or the fact that others may be waiting for them.

All girls should wish to and strive to be popular with their elders, who are not only deserving of every consideration, but have it in their power to make things very delightful for the young people whom they like. And they do not like girls who delay their meals, either by loitering when they should go or by being unpunctual when house guests. So many of us would not forward intentionally offend in these matters, and do not always realize that we do offend in them. But thoughtlessness is easily remedied by setting a careful watch over ourselves and trying to see that our actions give pleasure rather than annoyance to those about us.—Denver Republican.

The Constitution gives to every man the right of free speech—unless he is boarding in a jail.

**CURED HAY FEVER AND SUMMTR COLD.**

A. S. Nussbaum, Batesville, Indiana, writes: "Last year I suffered for three months with a summer cold so distressing that it interfered with my business. I had many of the symptoms of hay fever, and a doctor's prescription did not reach my case, and I took several medicines which seemed only to aggravate it. Fortunately I insisted upon having Foley's Honey and Tar. It quickly cured me. My wife has since used Foley's Honey and Tar with the same success." Sold by all Druggists.

### SCHOOL BOARD ADOPTS SET OF NEW RULES

LABOR DAY PICNIC.

Ishpeming Mine Workers' Union Will Celebrate Fourteenth Anniversary.

Arrangements are being perfected for the annual picnic of the Ishpeming branch of the Mine Workers' union, to be held at Cleveland park on Labor Day, a week from next Monday, Sept. 6. The picnic will be in commemoration of the union's fourteenth anniversary.

During the forenoon, commencing at 10 o'clock, the Mine Workers' union, together with the English and Finnish in the city square on Main street. Former Mayor W. J. Roberts will speak in English and Frank Altanen in Finnish. The festivities at the grove will commence immediately after dinner and will continue until 11 or 12 o'clock. Besides an interesting program there will be dancing both afternoon and evening. Refreshments of various kinds will be served on the grounds and the net proceeds will go to the society's treasury. The Finnish band has been engaged for the day and will furnish music for the dancing.

**SOME BASEBALL "DOPE."**

Ishpeming Must Win Five Out of Eight Games to Be Sure of Pennant.

In order to be sure of capturing the Marquette-Alger county league pennant Ishpeming must take five out of the eight games still remaining to be played. Negaunee has six games to play and in the event Ishpeming loses three and Negaunee wins its six, the latter will take the pennant. Ishpeming still has three to play with Marquette, three with Munising, and two with Negaunee. In the event Ishpeming wins five and Negaunee wins six, Negaunee will have a tie for first place. The fans figure that Marquette is practically out of the race. They also believe that Ishpeming will likely win its three games from Marquette and by taking one from Marquette and one from Negaunee it will have first place practically cinched, as it is hardly probable that Negaunee will win all of its games.

In the matter of bringing in outside men it is not fair to charge Ishpeming with being in the lead in that respect, as the team has more home men in line-up than any other nine in the league. Nichols, catcher, was born and reared here; Liston, catcher, came here of his own accord to take a position some weeks before he applied for a place on the team. His ability as a ball player was unknown to the manager until he came here and has made good. Olson, first baseman, was born and reared in Ishpeming; Dr. Main, shortstop, is engaged in business in the county, with Ishpeming as his headquarters for the past two years; Tom, pitcher, located in the city two years ago, and intends to remain here indefinitely; Toman, pitcher, was born and reared here, but returned to the city last spring to remain permanently, after a four years' absence in the copper country; Simpson, center fielder, was born and reared here, but is a Republican boy by birth, has played with the team for two years; Burke is an outside man, who drifted in and will likely remain after the season is over.

McLaughlin, who recently left the team, was an outside man, having come down from the copper country. Chappin and Brand, who played in Saturday's game against the College of Mines team, are also copper country men. Both have refused offers here as they have good positions at home. Chappin will probably not be able to play for two or three weeks, as one of his fingers was injured Saturday.

"Sib" Larson, who was also born here, and who has been playing ball in other parts of the upper peninsula and Wisconsin the past few years, was yesterday offered a place on the team and he immediately accepted it and will arrive this morning from Hurley, Wis. He will be accompanied by a third baseman to take McLaughlin's place. "Sib," who has been playing first base since he left Ishpeming, advised Manager Knez that he can play any position on the team except base and he will likely hold down second base in tomorrow's game with Negaunee. Larson is not only a fast all around player, but he is also a good stickler and a first-class coach. The latter is something that the team has need of all season, as it is thought that he will be able to put considerable ginger in the players.

C. J. Stocking, secretary of the Ishpeming team, yesterday received a letter from Manager Fox of the Marquette nine advising him that he had practically decided to withdraw the protest that he had entered following the last game at Marquette with Ishpeming, on account of a decision made by Empire Schilling in the thirteenth inning. He said that he could find nothing in the rules that gives him a chance to receive favorable action for his team.

This week Al Schott will give his moving picture entertainment at Republic Tuesday and Saturday, and at Beacon Wednesday. The feature picture is entitled, "The Voice of the Violin."

The public schools of the city, which have been thoroughly renovated and otherwise improved during the summer vacation, will be in first-class condition when the fall term opens two weeks from today, Sept. 7. A force of men and boys have been employed two months past making the necessary interior improvements and every room in all of the buildings has received attention.

At the last meeting of the board two new teachers were engaged. They are A. R. Watson, who is to receive a salary of \$950, and Miss Ruby Brown, whose salary will be \$850.

With a view to attaining greater efficiency in the schools the board adopted rules that both the instructors and pupils will be obliged to observe. The rules, together with a statement from the board, giving reasons why they were prepared, and which were presented by President Charles Burt, are as follows:

To attain greater efficiency in the public schools is engrossing the minds of educators today more than any period in our history. The contrary influences, which confront the public school pupil, which in their intent distract the attention of the pupil from the real work of the school, were never as numerous. In order to make our children able to withstand such influences, every safeguard must be thrown around them in their studies and discipline which will prepare them for successful and well rounded lives in their professional or commercial careers.

It becomes us, as the board of education, who have over four thousand children to care for, to provide for and prepare for life's work, to take such steps, with the aid of our superintendent and principals, that will assure greater efficiency, in order that our teachers and children may keep abreast of the times, and be able to meet the demands of our commonwealth.

To this end, I would suggest for the consideration and adoption by this board the following rules:

- 1st. That the office hours of the superintendent of schools be from 8:30 a. m. to 9 o'clock a. m., and from 3:30 p. m. to 4:30 p. m., and during these office hours it shall be the privilege of the parents, guardians and teachers to consult with the superintendent of schools on matters pertaining to the education of the children, and the discipline of our schools.
- 2d. That the superintendent of schools shall visit each primary and grammar grade in the school district, at least once every month during the school year, for the purpose of reviewing the work in each grade room, assisting the teachers in bettering their methods of teaching, and help to cultivate in the pupils a more earnest and definite purpose of study for life's work.
- 3d. That there shall be held at least once every month during the school year, at least two teachers' meetings, to be classified as follows:
  - (a) Primary and kindergarten teachers' department.
  - (b) Grammar school teachers' department.
  - (c) High school teachers' department.
 at which meeting every teacher of his or her respective department shall attend.
- 4th. That there shall be held at least two general teachers' meetings in each semester, or four such meetings during the school year, when all teachers of the several departments shall be present. The object of all teachers' meetings shall be to discuss the general condition of the schools, and to suggest and adopt better means and methods for the education and discipline of the children in the school district.
- 5th. That the superintendent of schools shall preside at all meetings, and shall prepare an outline of the questions to be discussed at each meeting. This, however, shall not be construed to prevent any teacher from introducing any question for discussion that may be of interest to the schools.
- 6th. That a record of the proceedings of all meetings mentioned above shall be kept in a book provided for that purpose by the district, which book shall be kept in the vault of the school district.
- 7th. That the superintendent of schools shall present to the board of education, at their regular meeting each month, a written report in which he shall set forth the day and date of his school visitations, time spent in each room, merits and demerits of each teacher regarding his or her ability to teach, standard of discipline and the general condition of each and every room in schools in the district, which report shall be filed by the secretary of the board, with the business of the meeting.
- 8th. That any failure to observe and carry out these rules, except for satisfactory reasons, shall be considered a misdemeanor, and the same shall be dealt with accordingly with the board.
- 9th. That the board shall cause to be printed a sufficient number of these rules, a copy of which shall be given to each principal and teacher in the district.
- 10th. These rules shall take effect with the opening of the schools Sept. 7, 1909.

### SHOVEL AT AMERICAN MINE.

The operators of the American mine have purchased a steam shovel, which is going into commission this week. All of the ore being mined at the American is now passing through the crusher, recently installed. The management plans to increase the output, as the ore is in big demand, but as many men as are wanted are not available.

I have installed a new vulcanizer, and am now prepared to repair automobile tires from 2 1/2 to 3 1/2 inches in diameter. Bring your repairs to my shop.

### LEAD AND ZINC HIGH.

Market Conditions More Favorable Than at Any Time in Months.

Indications point to a season of unprecedented activity and prosperity in the Wisconsin lead and zinc fields. Both lead and zinc took an unexpected advance in price last week. Spelter remained firm last week at \$5.45 per 100 lbs. and it is reported that the mines are making record-breaking outputs. It is thought that 60 per cent zinc ore will sell for \$60 per ton before the first of January. In Joplin, Mo., the top price reached was \$52. The present sudden rise in prices of both lead and zinc is similar to the upward movement that occurred in 1907, when black jack, without any warning whatever, jumped from \$45 to \$55 per ton.

Competition among buyers in the Wisconsin field has been keen of late and some have compromised and are working together. Unlike many metals, zinc, when once used, has been used forever. It cannot be remelted and reused like other metals, hence the necessity of an ever new and unending supply of the ore to keep up the demand. Over 90 per cent of the spelter manufactured in the United States, which amounts annually to about 250,000 tons, is used for the galvanizing trades, and the remainder in the manufacturing of brass tubing and mounting, electrical supplies and the rubber trades. The expansion of the electrical industry has increased the demand for zinc in practically a new quarter.

The elimination of the Mexican ore will give the zinc miners of this country such markets as were never dreamed of before. Before the present tariff law went into effect low grade Mexican ore was shipped into this country at the rate of 25,000 tons annually. The tariff of one cent per pound on a graded unit of low grade ore will give ample protection. This duty means one cent per pound on all metallic contents in the ore on all ores over 25 per cent zinc. For lower grades the duty grade will be charged on the pound and one carrying less than 10 per cent in zinc is exempted free.

In Wisconsin last week lead ore of 50 per cent contained \$58 per ton, and the market is said to have been steady. The market for ordinary work also strong with \$25 per ton as the top price for the 40 per cent material. Highland is the only field in Wisconsin that is making a specialty of dolomite.

Zinc ore in July reached a high point of \$47.20, and on average of \$41.50 per ton for standard grade. For July last year the average was only \$21.25 per ton. In July, this year, the average price obtained for lead ore was \$55.10, while a year ago in July, the average was \$61.32.

### ORG BELLE MINES CO.

A small block of Org Belle Mines stock is now offered for sale at fifty cents per share. Professor A. E. Seaman of the Michigan College of Mines, vice president of the company, will be at the Nelson House, Tuesday evening with specimens of ore.

W. T. PELMEAR,  
Scales Agent.

(8-24-14)

### LECTURE TOMORROW EVENING.

The Commercial of Columbus City, Ind., said of Mrs. Emor L. Calkins, president of the Michigan Women's Christian Temperance union, who will deliver an address at the First Methodist Episcopal church tomorrow evening, commencing at 8 o'clock:

"This eloquent advocate of the great temperance reform has been heard three times in our city. Her Sunday evening lecture was 'Organized Womanhood.' She rapidly and graphically traced the development of the great liquor monopoly and then showed what the W. C. T. U. is doing to break his scepter and end his reign. The Methodist church was crowded last evening and well filled at her other lectures."

Dress goods at special prices all this week. Materials suitable for children's school dresses.

## Upper Peninsula

### Telephones to Supplant Whistles—

The Chicago & Northwestern road has placed an order for the necessary material for a telephone system to connect Iron Mountain station, Antone Junction and the Peavine mine. The plant will be installed for the purpose of avoiding the whistling signal, which has become a great growing nuisance and regarding which many complaints have been filed.

### Funds for Highway Work—

At a special meeting of the Alger county board of supervisors, held recently for the purpose of providing ways and means for carrying on highway improvements, a resolution was adopted whereby the Cleveland Mills company will receive and pay the vouchers issued by the county road commissioners until such time as the commission has funds, or to an approximate amount of \$25,000. The company will charge on the amount so advanced a reasonable interest rate.

### Shingle Mill Burns—

Sparks from the smokstack ignited the Marks shingle mill in North Menominee and resulted in its being totally destroyed by fire, the only thing left being the boiler and a tangled mass of machinery. The smokstack, the spark from which caused the blaze, was defective, the spark arrester having been burned out. There was no insurance on the mill, as none could be issued owing to its location. About 10,000 shingles, which were inside the mill, were destroyed.

### Newspaperman Plans Change—

W. E. Campbell, editor and publisher of the Manitowish Courier-Record for the past six months, was a business visitor at Stambaugh, Iron county, last week. Mr. Campbell has about closed a deal for the purchase of the Stambaugh Journal plant, with the intention of continuing the publication of that paper. He will probably take possession on or about Sept. 1. Mr. Campbell is highly recommended as a capable newspaper man, and the people interested in the Stambaugh Journal are fortunate in closing a deal with him, as it will give them a newspaper worthy of the town.

### Will Operate Three Camps—

Frank D. Ader, the Chicago lumberman who recently purchased the timber on several sections of land in the Randville district, Dickinson county, is now engaged in formulating plans for extensive logging operations. He plans to cut the timber—hardwood, cedar, pine, etc.—on a half section this fall and winter. Three camps will be operated and about 135 men and twenty-five teams will be employed. The timber and cordwood will be banked on the St. Paul road spur track to the Groveland mine. The haul is about five miles long, but the grade is easy and it will be possible to maintain ice roads at a comparatively small cost.

### Saved by Presentation—

Only a strange presentation of a threatened accident prevented T. W. McLean, editor of the Square Deal at Escanaba, from being seriously injured at his home at 1311 Hale street. Mr. McLean was at work in his study when an inexplicable feeling came over him that something was about to happen. Although he was in the midst of an article which he was writing, he left his work and walked outside to the porch. Scarcely had he reached the porch when the entire ceiling in the room in which he had been sitting gave way. Great pieces of plaster fell about the spot where he had been sitting and had not Mr. McLean received the peculiar warning he undoubtedly would have been hurt.

### Big Cannery Busy—

The operations of the Michigan Preserving & Refining company at Menominee are now at their height. Beans are being canned. A day and night shift of about 200 hands is busily engaged in putting them up. There are two varieties, the green and the wax beans. The former is the highest grade. It is estimated that nearly a million cans of beans alone will be put up. This includes many of the two-gallon size, which are sold to large jobbing houses which supply the hotel and restaurant trade. Following the beans, or rather coming in on top of them, will be the tomatoes. They are due in a week and the capacity of the big plant will be taxed to its utmost.

### Cramps Took Him Down—

Cramps took John Lovendeville down to his death in the waters of the bay at Escanaba. The appearance of the body proved the fact beyond a doubt. Able swimmer that he was, Lovendeville had no chance for his life when the excruciating pains bound his muscles. When the body was recovered it was found that the arms were held tightly against the breast, hands upward, in the position in which they had been when the pains numbed the muscles. Further proof lies in the fact that the unfortunate man sank from sight immediately and that his body failed to rise again after he disappeared for the first time. The effect of a water cramp upon a swimmer is the instant numbness of the muscles, respiration immediately ceases and the lungs receive water. The body immediately sinks and there being no air in the lungs,

### fails to rise to the surface, which is exactly the circumstances that surround the death of Lovendeville. The belief that Lovendeville had struggled desperately to kick off his shoes was dissipated when the body was brought to the surface, for neither shoe was missing and the boot with the slashed laces must of necessity have belonged to another person.

### Taught the Crows a Lesson—

George Jensen of Ford River township, Delta county, has solved the problem of disposing of crows which infest corn fields. For several years past Mr. Jensen sowed corn for fodder and the crows took it all. This year about the time the corn began to appear above the ground he soaked field peas in strychnine water and sowed the peas over the field. The next day the crows looked for results and found one dead crow and saw a number which appeared to be very sick. The crows had the reputation of being a very wise bird, and he evidently is, because the one lesson was all that was necessary. Mr. Jensen says that the crows do not come back after their first experience with the poisoned peas.

### Iron Rivers School Teachers—

The public schools of Iron River will open Monday morning August 30th, with the following list of teachers for the ensuing year: R. A. Grandt, superintendent; A. B. Carr, principal; Theodore Nelson, high school assistant; Harriet Arthur, high school assistant; Mable McGraw, music and drawing; Amelia Sablin, eighth grade; Esther Newell, seventh; Marion Koehler, sixth; Edna Reynolds, fifth; Meroy Modill, fourth; Alma Lindfield, third; Kate Conihain, second; Louise Jensen, first and second grades; Margaret Leino, first grade; Helen Morlette, kindergarten; Algic Karkket, kindergarten assistant; Mary Murphy, Benson school; Lena Meyers, Nash school; Nora Cleary, track school; Lona Myers, Andrea school; Alma Christenson, Raymond school.

### His Skull Was Crushed—

Thrown from a heavy wagon during a wild runaway at Alfred, Dickinson county, Frederick Springer, a ten-year-old boy, died on Monday morning on the wheels passed over his head, crushing his skull. Springer was engaged in hauling shingles from the mill and in crossing a railroad track two of the bunches fell from the load, striking the two horses. The team bolted, and although the driver made a desperate effort to control them he was unable to bring them to a stand still. Plunging from the road into a strip of cutover land the wagon struck a log and Springer was hurled forward. He fell beneath the wheels of the wagon and one of the heavy rims struck him at the back of his head, causing instant death. The accident was thirty-four years old.

### His Arm Torn Off—

Edward Marese, eight-year-old son of Joseph Marese, a single wheel worker employed at the Spies mill at Menominee, had his left arm torn off near the shoulder and his left leg broken at the hip by being caught in the belting and tossed around the shaft. He was taken to St. Joseph hospital, where he now lies in a critical condition. It is regarded by all who witnessed the accident as a miracle that the boy was not killed, as he was carried on the belting around the

## STONE IN KIDNEY

An interesting case was that of Mr. H. L. McDuffee, a member of the firm of H. C. De Wolfe & Co., of the Crocker Building, San Francisco.

The case was puzzling. There was pain in the kidney with a showing of blood. Examination by seven physicians proved that the blood was from the kidneys, and it was the opinion of all that there was a stone cutting the kidneys, as the least exercise caused a showing of blood.

Four X-ray pictures were taken, three of them showing a stone half an inch in diameter. To be certain that it was a stone that cut the shadow, a similar stone about the same size taken from a patient was put under him for comparison—both stones showing on the plate.

An operation was about decided upon when Fulton's Remed Compound was recommended to Mr. McDuffee. He feared the knife and gave it a trial.

Within ten weeks the blood and pain had ceased and in six months he considered himself well.

We also have a three-page letter from an old school physician, a lecturer in one of the San Francisco Medical Colleges, covering a similar case of stone in the kidney. An operation seemed inevitable. He prescribed Fulton's Remed Compound upon the theory that as it was getting results in Nephritis it ought to have some effect on the same inflammation and excessive uric acid that attends Calculus. He was so surprised to get a complete recovery that he thought a record ought to be made of it and gave us the letter above referred to.

Fulton's Remed Compound seems to have about the same percentage of efficiency in stone in the kidney that it has shown in Bright's Disease.

### where two times. The boy had gone to the mill with his father's dinner pail and had been playing there. At the time the accident occurred the boy was standing beside the small wheel of the belt drive, when the belt came off. So one noticed it except him, and he grasped it to shove it back into position. As the belt met the wheel the momentum carried the little fellow along over the big wheel, where his arm was caught. He was thrown around twice before the horror-stricken workmen could stop the machinery.

### Criminal Carelessness Charged—

The jury sitting in the inquest to investigate the cause of death of Gertha Yulasey and Christina Semenk, aged sixteen and thirteen years respectively, the two Iron Mountain girls who met death on the Menominee river bridge, has concluded its labors and returned a verdict in effect as follows: "That the victims came to their death by being struck by engine 747, owing to the criminal neglect of the engineer in not having the locomotive under control and proceeding at too high rate of speed over the bridge." The girls, it will be recalled, had started for the berry patches on the Wisconsin side of the river, and had ventured across the railroad bridge which spans the Menominee. When a short distance from the Wisconsin side the engine and caboose, of which Eddie Foster, of Green Bay, Wis., aged twenty-one years, was the engineer, bore down on them from the rear, and striking them with much force one was hurled to one side of the river embankment and the other to the other side. Death was almost instantaneous.

### Buyers More Standing Timber—

Warren J. Flanagan, a well-known logger of Iron Mountain, has concluded a deal with the Keweenaw association for the purchase of the timber on half a section of land in the Granite Bluff district, adjacent to the St. Paul road. The consideration was \$12,000. Mr. Flanagan says the land is heavily timbered with pine, cedar, basswood, spruce and hardwoods of merchantable size. He also owns the timber on the adjoining half section. It is his intention to start logging operations as soon as possible, but is not now in a position to give figures relative to his output. That it will be a large one, however, is evidenced by the fact that he expects to employ fully one hundred men in the vicinity of Granite Bluff during the fall and winter months.

### Lands Impotent Contest—

Contracts totalling nearly \$700,000 have been captured by John Marsch of Iron Mountain the past week. The most important one is with the United States government, who are to develop a lock pit excavation at Sault Ste. Marie, Colonel Townsend, who is in charge of the work, has notified Mr. Marsch that he had been awarded the contract, and the request is made that the work commence at once. Mr. Marsch expects to employ several steam shovels, a greater portion of his railway construction equipment in the work. Several hundred men will also be employed. The contract price is \$600,000. This important work has been delayed for some time due to the difficulty in securing possession of the necessary lands. It is impossible to reach an understanding with the owners. Upon the advice of the department of justice, the government has now filed declaration of its intention to take possession of the lands and commenced condemnation proceedings. This will permit Contractor Marsch to commence operations about the first of September. At Milwaukee, Mr. Marsch was the successful bidder for a \$100,000 excavating contract for a large runway to be erected by the Foster & Vogel company. Mr. Marsch's other contracts are for railroad construction work.

### Are Home from Europe—

Mr. and Mrs. John Hemes of Menominee have returned from an extended trip abroad. They were gone about nine months. During that time they traveled extensively, touring the holy lands and Europe. They sailed from New York the first part of last February for Madrid, and from there to Rome, Spain, Carthage and Savilla. They spent about three months in these places and visited Granada, Gibraltar, Algiers and Tangier. They spent a great deal of time in the holy lands. Mr. Hemes states that this was the most interesting portion of the journey. They also visited the famous temple of Balbec, accounted the most wonderful and beautiful of all Egyptian types of architecture. On their return from Algiers they stopped at Italy and Sicily, and viewed the ruins of Messina. In describing their trip, Mr. Hemes stated that one could have no idea of the damage done. It is not so noticeable from the sea as one approaches it by boat because the buildings along the shore line were not destroyed, but on the interior the scene is one of devastation. In describing their trip, Mr. Hemes stated that one could have no idea of the damage done. It is not so noticeable from the sea as one approaches it by boat because the buildings along the shore line were not destroyed, but on the interior the scene is one of devastation.

### BEWARE OF OINTMENTS FOR CATARRH THAT CONTAIN MERCURY.

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surface. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is tenfold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials.

### John Shea Surprised.

John Shea, with his family, is to leave Negaunee tomorrow for Los Angeles, Cal., where they plan to locate permanently. It was given a surprise Friday evening at the Negaunee club rooms by about twenty-five of his friends. They presented him with a pair of diamond cuff buttons. Mr. Shea has been a resident of Negaunee for nearly fifty-one years, having come here with his parents when he was a baby. Although he is leaving the Negaunee he still has interests and will visit the city occasionally.

In the baseball game between the Chicago Women's team and a Negaunee nine to be played Thursday afternoon at the Union park grounds, commencing at 2:30 o'clock, McCroy and Lafave will be the battery for the local team.

## Negaunee Department

### NEGAUNEE BALL FANS THOROUGHLY AROUSED

FANS HERE BELIEVE THAT LOCAL TEAM WOULD HAVE GOOD CHANCE OF WINNING SECOND GAME LAST SUNDAY IF UMPIRING HAD BEEN DIFFERENT.

Negaunee baseball fans have been loud in their expressions of disapproval of the umpiring in the Sunday game. Up to Sunday Forvilly's work has been fairly satisfactory to the Negaunee management and fans, but many of them yesterday expressed the opinion that his decisions on the bases in the second game, when Negaunee had a chance of scoring, were decidedly unrighteous. The fans kicked particularly on his decision in the fourth inning, when he retired McKey for not touching first base, after he had reached second safely on his double sack drive.

On reaching second McKey found it necessary to slide. It is claimed that Forvilly cautioned him to slide, but that he bated called him out for not touching first sack. According to the rules Forvilly had no right to call the runner out at first, even if he had noticed that the man had not touched the bag, unless the ball was returned to the baseman. The two Iron Mountain gents who acted as basemen, called for the return of the ball and then demanded a put-out from Forvilly, who claimed that McKey had missed the bag by about eighteen inches. The fans believe that Forvilly did not see the runner pass by the bag, but that he took Dumbay's word for it. In two close decisions, one on second and one on third, the fans also believe that Forvilly gave the Negaunee team the worst of it.

There have been many harsh things said this season about the umpires, but there has not been before such a storm of disapproval as there was following Sunday's game. In spite of this, the Negaunee fans gave the Marquette team great credit for winning the second game, after giving such a poor account of itself in the first exhibition. The fans are not to be considered as contented with the umpiring of Scholtus and they gave him the support, though the lion's share of the credit for the victory should go to the twirler. In the last inning when it seemed that Negaunee would surely score, Steimle opened the inning with a two base hit; Ray sacrificed to second base; McCroy came next and sent a grounder to Scholtus who started to throw it to first, but instead wheeled quickly and caught Steimle at the plate. McKey put a long drive between center and left that Larcum failed to hold. Swick sent a high fly into right that looked good for a hit, but it was caught.

Steimle, the pitcher, put up a wonderful game, and although he was touched freely in three innings of the second game he was effective most of the time. In the last inning he retired a high fly into right that looked good for the runners going out on infield hits and the third on a fly to McCroy in left. Some of the fans are inclined to criticize Steimle for not allowing Siebenhuth to work in the second game, but others believe that he was justified in remaining in the game at the county fair. The Marquette team seemed to have a majority of the supporters Sunday, as the Ispeping fans were with them. The receipts were the largest of the season, but the spectators were a larger number of people present on Decoration day, when the Negaunee and Ispeping teams played. Ladies were not admitted free.

### Should Stop Betting.

Many people here and at Ispeping, yesterday expressed disapproval of betting at the games. It was not surprising, in view of the intense excitement that prevailed, that some of the more enthusiastic fans were backing their teams with their cash, but there are many people who believe that betting on the grounds should be stopped. It is said that a number lost sums ranging from \$10 to \$50. The management would be justified in ejecting from the park all persons caught betting. Manager Gorkindale of the Marquette County Gas & Electric company, which has control of the park, threatened to have some parties who were betting Sunday removed if they did not quit it.

### CHEERY TEAM CHALLENGED.

Bob Watson has organized a team to play "guinea pig" and has challenged the Cherry street team, which has won every game it has played this season, the contest to take place at the Jackson location on Labor day, at 10 A. M.

The game will be for 500 and one up, all in. The Cherry street team is managed by composed of Ted Mallet, Thomas Abbott, Jr., Bob Watson and either Will Sharp or Thomas Abbott, Sr. Either Ted Mallet or Thomas Abbott, Jr., will be captain. The Cherry street team is made up of William and Tom Farrar and Jack and John Dixon.

### LOCAL LACONICS.

Mrs. J. B. Williamson of this city and Miss Elvira Sandberg of Ispeping have arrived home from a three months' visit in Europe.

Archie Orr has returned from LaPorte, Ind., where he was called a few weeks ago on account of the critical illness of his father, who died a week ago Saturday.

Inac Wage has departed for Battle Creek, where he is to accept a good position with the Grand Trunk Railway company. He had been employed at the Negaunee mine for some time past.

### LIGHTNING STRIKES HALL.

Flag Staff of Finnish Temperance Society's Building Splintered.

During the storm about 6 o'clock Sunday morning lightning struck the flag pole of the Finnish Temperance society's hall on Case street, almost completely demolishing it. The roof was also slightly damaged. The roof caught fire, but the blaze was soon extinguished by use of a garden hose.

A cow owned by Nestor Maki, residing on Rock street, was found dead in the barn yesterday morning. It is thought that it was killed by the lightning, though the structure was not injured.

The lightning was unusually sharp and it was surprising that there was not more damage done. Nearly all of the people in both Negaunee and Ispeping were aroused, and many were considerably frightened, as the lightning seemed to be unusually close to their places.

### WE'RE BASEBALL CRAZY.

English Paper Gives Interesting Opinion of America's National Game.

The Sunday Chronicle, published at Colechester, Eng., recently had a four-column article entitled "A Country Baseball Mad." The ridiculous statements in the article show that what the writer does not know about America's game would fill a large-sized volume. Some of the statements are amusing. The following extracts from the article are of particular interest:

"The Americans are a strangely neurotic kind of race. They are as ready to go into a paroxysm of excitement over a Teddy bear as they are over a presidential election. Baseball has nothing in it—nothing, that is, to the Englishman who regards cricket and football as types of real games—but the American regards it as the one heaven-sent form of sport on earth. Every season we have over there the spectacle of 50,000,000 people literally baseball mad."

"Already baseball has taken in various parts of the country its terrible toll. Under the eyes of 30,000 people a spectator the other day was carried dead off the baseball field. For just one moment there came a murmur of pity. Then came a frantic yell of delight as a popular favorite gave an exhibition of the art of 'sliding to base,' a roar as of 30,000 hungry wolves, and the dead man was forgotten."

"Bring Abraham Lincoln to life, place him on one side of Upper Broadway and Muggsy McGraw on the other, and the crowd shall as inevitably follow in the wake of Muggsy as steel follows the magnet."

"Go out in England, loving cricket as your national game, yet treating it so liberally as a pastime to be taken up in leisure hours and put aside and forgotten for the more serious duties of life, the spectacle of millions of people going stark, raving mad over a game distinctly lacking in every element of science or attractiveness is something to make nations wonder."

### WINNERS GET BIG SHARE.

The management of the Negaunee and Ispeping baseball teams yesterday afternoon agreed that the winning team in the contest tomorrow afternoon, to be given for the entertainment of the members of the Lake Superior Mining institute, shall take 75 per cent of the gross receipts, the losers 25.

Under this arrangement both teams will play for all they are worth and the game will be as hard fought as though it were a league contest. The arrangement committee for the sports, consisting of Mayor Winter and Captain J. H. Rough of this city and Mayor Kees of Ispeping, will be much pleased if the business houses closing during the afternoon. There is considerable sentiment for closing and the matter will be taken up today. The game will start at 2:30 o'clock and the usual admission will be charged.

### "MOLLY M" SOLD.

Robert Jackson, Jr., has purchased from Matt Aho, his pacer, "Molly M," giving in part payment his young horse, "Algebra Jr." Mr. Jackson intends to enter the pacer at the county fair. Mr. Aho plans to enter "Algebra Jr." in the races for county horses. It is thought that the colt can cover a mile in from 2:30 to 2:35, though it has never been on the track. He will take the horse down today, to begin training it.

### TO THE FARMERS.

I am prepared to do thrashing, also pressing, for farmers in Marquette county. Charges reasonable. Fred Roberts, Negaunee. (8-19-10)

### LOCAL LACONICS.

Mrs. J. B. Williamson of this city and Miss Elvira Sandberg of Ispeping have arrived home from a three months' visit in Europe.

Archie Orr has returned from LaPorte, Ind., where he was called a few weeks ago on account of the critical illness of his father, who died a week ago Saturday.

Inac Wage has departed for Battle Creek, where he is to accept a good position with the Grand Trunk Railway company. He had been employed at the Negaunee mine for some time past.

George D. Sherman, who has the contract to put in the abutments for the span on the Duluth, South Shore & Atlantic company's new track, near the Negaunee mine, is advertising for men.

Rhea Inuzzo, seven-year-old daughter of H. Inuzzo, entertained some twenty of her girl and boy friends in honor of her birthday Saturday. The party was a most enjoyable one, both for the guests and their little hostess.

In the baseball game between the Chicago Women's team and a Negaunee nine to be played Thursday afternoon at the Union park grounds, commencing at 2:30 o'clock, McCroy and Lafave will be the battery for the local team.

late Fred Zimmerman. Each officer will be given a week off before the first of the year.

In the Sons of St. George baseball game between teams composed of married and single men at the Union Park Saturday, the former won by a score of six to five. Seven innings were played. Captain William Allen and William Hatch were the umpires, both giving fine satisfaction.

Some of the Negaunee merchants are in favor of a half holiday tomorrow, in order to attend the baseball game between the Ispeping and Negaunee teams, also the Cornish wrestling, both of which are to be given for the entertainment of the members of the Lake Superior Mining Institute, who are to hold their fourteenth annual meeting on this range.

The baseball game between teams composed of members of the Negaunee and Ispeping lodges of the Fraternal Order of Elks, which was postponed a few weeks ago on account of rain, will take place next Saturday afternoon at the Union Park grounds, commencing at 2:30 o'clock. An admission of twenty-five cents will be charged the men, but ladies will be admitted free.

### HALLEY'S COMET IN 1910.

Astronomers At Lake Geneva Say It Will Come in April or May.

Lake Geneva, Wis., Aug. 23.—Halley's comet, visible from the earth every seventy-six years, will appear in April or May of 1910. This fact was included in a technical report on the study of comets made by a committee of the Astronomical and Astrophysical society of America in the Yerkes observatory at Williams Bay.

"Astronomers may sight the comet somewhat earlier than April, but it will not be visible to the naked eye before that time," explained Professor E. B. Frost. "We are looking forward to the advent of the comet with much interest. Astronomers the world over will doubtless make photographs and observations of it before it swings out of sight for another long period."

"How does it happen," the professor was asked, "that there have been so many reports that the comet will appear this fall instead of next spring?"

"When we say appear," answered the professor, "we mean that it will pass the perihelion, the nearest point to the sun—at that time. How soon before that it will be sighted by telescopes or the naked eye it is impossible to compute. All we know is that we tried to sight it last winter and got no trace of it on our photographs. There is no way of telling when it will first be glimpsed."

For indigestion and all stomach trouble take Foley's Orino Laxative, as it stimulates the stomach and liver and regulates the bowels and will positively cure habitual constipation. Sold by all Druggists.

### NOTICE TO CONTRACTORS.

Sealed proposals will be received by the city clerk of Negaunee, Michigan, for the building of a Fire Hall at Negaunee, Mich.

Proposals to be in the hands of the city clerk on or before 5 p. m. of August 30, 1909.

Plans, specifications and instructions are on file at the office of the city clerk in the City Hall, Negaunee, Mich., also in the offices of the architects, First National Bank building, Milwaukee, Wis., and Marquette, Mich.

The right to reject any and all bids is reserved.

CHARLTON & KUENZLI, (8-10-24) Architects.

### CHARITY BALL GAME FOR V. N. A. TODAY

CONTEST BETWEEN GROCERS AND BUTCHERS, AND CLOTHIERS AND DRY GOODS MEN.

### STORES WILL BE CLOSED

Business Will Be Suspended This Afternoon in Order That All May Witness the Unique Spectacle.

The charity baseball game between the grocers and butchers on one side and the clothiers and dry goods men on the other, the entire proceeds of which are to go to the Visiting Nurse association, will be played this afternoon, after all. This decision was reached yesterday afternoon, after some of the business men had talked to those who objected to closing this afternoon, and had persuaded them to change their minds. Accordingly, the stores of the city will be closed all afternoon today.

After this decision had been reached, the managers of the two teams got busy, had large bills printed and distributed about town, and there is every reason to believe that a large crowd will be in attendance. Adequate street car service to the fair grounds is promised and a general exodus of the people of the city to the ball grounds this afternoon is predicted.

The game promises to be the greatest laugh producer of the season, and those who witnessed the contest between the Fats and Leans last year, will not need to be urged to attend. Though there are no recognized ball players in the line-ups of the two teams, both managers believe that they have secured good men and predict that the game will be a surprisingly good one. At any rate, the public may be assured of getting their money's worth, when the two teams get into action. Besides, the purpose of the game is such a worthy one that many quarters will find their way into the treasury of the Visiting Nurse association, from people who ordinarily do not attend ball games.

It should be remembered that the idea of the game did not originate with the association, but with a number of the business men, who believed that it would be a fine way for the business men and the public to show their appreciation of the work the organization is doing. The game will be called at 2:30 o'clock and Clinton and Freese are slated to do the umpiring. Percy Dell is the captain and manager of the Grocers and Butchers' team, and Jack Bennett, of the Clothiers and Dry Goods Men's organization. Both teams have enlisted the services of all the physicians of the city and there will be at least two substitutes for every man in the first line-up, as it is expected that the carnage will be awful.

Our Boys' band will furnish music down town and at the fair grounds throughout the afternoon.

The line-up of the two teams, as given out by the managers, is as follows: Grocers and Butchers—Cliff Lafave, catcher; E. J. Miller, pitcher; Fred Marcotte, first base; Charles Dorais, second base; Will Salter, third base; Fred Murray, shortstop; William Westermeyer, right field; Frank Albonte, center field; Percy Dell, left field.

Clothiers and Dry Goods Men—Jack Bennett, catcher; Sam Rose, pitcher; Henry Johnson, first base; Fabian DuShane, shortstop; Fred Crawford, second base; Ed Lavigne, third base; New Bertrand, left field; Fred Anderson, center field; Ed Archambeau, right field.

NEARLY ALL IN LIBRARY.

Most of Dr. Eliot's Five Feet of Books Are to Be Had.

Dr. Charles Eliot's five feet of books, which have caused so much comment throughout America during the last few months, may, with seven exceptions, be had at the Peter White public library. The list is as follows: Autobiography of Benjamin Franklin, Journal of John Woodman, "Fruits of Solitude," by William Penn, Bacon's Essays and New Atlantis, Milton's "Areopagitica" and "Treatise on Education," Sir Thomas Browne's "Religio Medici," Plato's "Apology," "Phaedo" and "Crito," "Golden Sayings" of Epictetus, Meditations of Marcus Aurelius, Emerson's "Essays," Emerson's "English Traits," The complete poems of Milton, Johnson's "Volpone," Beaumont and Fletcher's "The Maid's Tragedy," Webster's "Duchess of Malfi," Middleton's "The Changelings," Dryden's "All for Love," Shelley's "Cenci," Browning's "Blot on the Scutcheon," Tennyson's "Becket," Goethe's "Faust," Marlowe's "Dr. Faustus," Adam Smith's "Wealth of Nations," Letters of Cicero and Pliny, Bunyan's "Pilgrim's Progress," Burn's "Tam o' Shanter," Walton's "Complete Angler" and "Lives of Donne and Herbert," Autobiography of St. Augustine, Plutarch's "Lives," Dryden's "Aeneid," "Canterbury Tales," "Imitation of Christ" by Thomas A. Kempis, Dante's "Divine Comedy," Darwin's "Origin of Species," Arabian Nights.

Those in the list not in the library are: William Penn's "Fruits of Solitude," "Golden Sayings" of Epictetus, Johnson's "Volpone," Webster's "Duchess of Malfi," Middleton's "The Changelings," Dryden's "All for Love," "Imitation of Christ," by Thomas A. Kempis.

We clean, sponge and press clothing on short notice. Straws hats cleaned, bleached and blocked. G. A. Van Camp, 327 W. Washington street. (8-24-11)

Chas. J. Anderson can furnish you with the best meats and poultry at lowest prices. Prompt delivery. 603 North Third street. Bell Phone 650, County Phone 77. (8-11-11)

### MEETING OF BAPTISTS. Churches of Upper Peninsula to Be Represented in Marquette.

The Marquette Baptist association, representing all the Baptist churches of the upper peninsula, opens a three-day meeting at the Baptist church in this city this evening. The introductory address this evening will be delivered by Rev. Ira Smith, of Sault Ste. Marie. His subject will be: "A Message to Twentieth Century Christians." Dr. Tupper will speak tomorrow evening on "Hopeful Aspects of Twentieth Century Christianity." Thursday night, Rev. Dr. Smith, of Kalamazoo, will deliver an address on the "Educational Needs of the Twentieth Century." Morning and afternoon sessions will also be held each day.

### HIGH TRIBUTE PAID MARQUETTE MARINER

CAPTAIN A. O. KRUGER HAS MANY FRIENDS IN THE COUNTRY, HIS FORMER HOME.

Captain Anton O. Kruger spent a few days in the copper country last week, and the Evening Copper Journal, of Hancock, has the following to say of his visit: "His many Houghton friends were delighted with a call from Captain A. O. Kruger, for twelve years a resident of Houghton, and now stationed at Marquette as harbor master. Captain Kruger is an old sea dog who has found the fresh water pretty good for quality of aquapara, and has cast the remainder of his days upon the shores of the world's greatest inland sea.

"Although he confesses to eighty, the octogenarian would press for a man of fifty. Straight as a pine, bright of eye and ruddy of cheek, he is the ideal type of old mariner, a man who has preserved the fire of eternal youth within himself. He is ruddy as the hearty, cheery good fellow whom almost three-quarters of a century spent upon the water has washed clean of the average infirmities, and his friends wish for him at least another quarter of a century of useful life.

"Captain Kruger shipped before the mast seventy years ago, when a merry boy hailing from Hamburg upon a German liner. He remained with the sea until he became master of his own boat, giving up a command upon the outbreak of the Civil war to offer his services to the United States secretary of war.

"He was at once given a commission as navigating officer upon the United States ship Peterhoff. Later he went to the United States Shokoken as navigating and executive officer, and then was made commander of the U. S. Anconia by Admiral Porter. In this capacity he served until the close of the war.

"After he found his services no longer needed in the navy, he returned to the merchant marine, and for years sailed as master of some of the Atlantic's finest craft. He came to the Great Lakes about fifteen years ago, settling in Houghton, and for a number of years ran the passenger tug "Estelle" out of this port. He has been stationed at Marquette as harbor master for several years, and it is evident that the list now carries with him. He came up yesterday as pilot for the Northern Dock & Dredging company's outfit, which has completed its work on the Marquette breakwater."

### THEATRICAL.

"A Royal Slave" was presented in the Marquette opera house last evening for the fourth time, to an audience of fair size. The company presenting the beautiful, though sad old Mexican story was, as a whole, adequate. The piece was exceptionally well staged, with a wealth of beautiful scenery, which worked naturally toward the effectiveness of the presentation.

Walter Hubbell made his first appearance in this city in the role of Aguirre, the royal slave in whose veins coursed the blood of the Montezumas, and made a fine impression by his interpretation of the part. He is athletically built, gifted with a powerful, resonant voice, and assumed the mannerisms of the old Indian with easy naturalness.

The leading company is Lester R. Galvin, who is cast as a United States newspaper man. He succeeded in producing much amusement, though he was inclined to overdo his part at times. His singing and dancing specialties were well received.

Misc. Irene Solomon, as the scheming and unattractive mother, and Lillian Wallace, as the heroine, were disappointing in that they failed to rise to the emotional demands of their respective roles. Alvin Snyder, as El Capitan, the bandit in disguise, and George Fitch, as Castello, the faithful lover of the heroine, were well cast.

Have you seen Werner's demonstration of Flavoring Extracts and Color Pastes? A trained demonstrator is on hand to give you advice you may desire in the preparation of your desserts. (8-24-26)

We ship goods to Milwaukee every Monday evening for Otto Pietsch's Dive Works. All kinds of dyeing and dry cleaning promptly and satisfactorily done. Send your goods to the agency, 327 W. Washington street, Marquette. G. A. VAN CAMP. (8-24-11)

### SPECIAL SALE ON OXFORDS AT "THE BEE HIVE."

We are selling all of our Men's, Women's and Children's Oxfords at cost. They will have to go in order to make room for our fall stock of shoes. We will also make a reduction of 10 per cent on all Men's shoes.

THE BEE HIVE. L. Getz, Prop. 220-222 S. Front St., Marquette, Mich. (5-19-11)

Order your milk, cream, butter and buttermilk of the Marquette City Dairy, Modern, sanitary and up-to-date. Equal to any practical dairy in the state. Try our special milk for babies. Bell telephone 223. F. H. Vandenberg, Prop. (8-2-11)

Now is the time to order your awnings. We make awnings of all descriptions, also anything in canvas work. 13-13-11 KELLY HARDWARE CO.

### SEES NO HOLES IN LIQUOR LAW

L. C. CRAMPTON, ONE OF ITS AUTHORITIES, REPLIES TO HENDERSON—SAYS DETROIT LAWYER IS MISTAKEN AS TO THE STATUTE AND THE FACTS.

Louis C. Crampton, one of the authors of the Warner-Cramton liquor law, which goes into effect Sept. 1, one of the strongest and most effective opponents of the liquor element in the legislature, has issued the following statement with reference to Edward Henderson's criticism of the Warner-Cramton law:

"In no instance is Mr. Henderson sustained by the law in his charges of unconstitutionality. His desire to enlighten the state may be the best, but his effort reveals a surprising lack of acquaintance with the facts and the law pertaining to the subject.

"He charges that Sec. 1 is invalid because it discriminates against the foreign wholesaler. It does not so discriminate. The law requires the importer to pay the same license fee as is provided in this section for resident proprietors, etc. The case cited by him, 216 U. S. 446, is not in point, as under the statute considered in that case no tax was imposed on a resident wholesaler.

"The further charges Section 1 is invalid because it interferes with interstate commerce which is only under the jurisdiction of the federal congress, citing 135 U. S. 161. He has not kept up with his statutes and cases of the past few years. The case cited, even if in point, has been nullified in effect by a federal statute, the Wilson act, 26 statute laws 313, Chapter 728. This provides, in brief, that all intoxicating liquors taken into a state shall, upon arrival, be subject to the police powers of that state to the same extent as though produced there. In 205 U. S. 84, this has been sustained and construed to protect a statute of South Dakota similar in purpose to ours, but harder upon the foreign brewer.

"The provision as to native wines and cider, so copiously attacked by him, has been in the law without change for twenty years or more and undisturbed by the courts.

Arrests Without Warrant. "The provisions as to arrest without warrant and closing of a saloon found open at unlawful times are said to be invalid, citing 68 Mich. 557. He overlooks People vs. Rohrer, 111 Mich. 31, which further construes this section, and also overlooks the fact that the law has not been changed on these points in the Warner-Cramton law, except to cut out the unconstitutional provision as to double punishment.

"He again cites 68 Mich. 557 as authority for his opinion that the revocation of license on second conviction of violation of the liquor laws is invalid.

"This charge, if true, would be the most serious of all. Happily, it is not true. In the case he cites, the dealer paid an annual tax, and it was held that to take away the business on which the tax had been paid would be unconstitutional. The most important feature of the amended liquor law, in my judgment, is in this connection. The money now paid by the dealer is paid as a fee for a license, and the authorities uniformly hold that a license can be revoked for cause. Furthermore, when a license is applied for, the application must contain an agreement that in the event of the issuance of a license to such applicant, upon such application such license shall be revocable as provided in this act. This is a reasonable agreement, and the laws, and revocation according to the agreement would certainly be valid.

"The authority given the county treasurer in Section 8 to determine the necessity for a new bond in certain specified cases is declared invalid, citing 85 Mich. 336. In this case, the court ordered no hearing was provided for. In the Warner-Cramton law the old statute is amended by adding this provision:

Provided, however, that no new bond shall be so required until the principal and sureties upon such bond shall have been served with a notice, fixing a time and place when and where the county treasurer will give such principal and sureties opportunity to be heard as to why such bond should not be cancelled.

"To sustain himself, Mr. Henderson quoted from 68 Mich. 556 but either he has not read the case or the printer was careless, for there was omitted, without any indication of it, this important sentence, which is the basis of the foregoing amendment and sustains its validity:

"The specified cases so far as they go are not illegally laid down, although the law is deficient in providing no method of getting at the facts by a hearing before any one.

"That method has now been provided. "Mr. Henderson criticizes the prohibition of a liquor dealer being a surety on another liquor dealer's bond. This provision is invalid, but it is not added by the Warner-Cramton law, having been in the statute many years. The only change made by the new law in this respect is to reduce the number of bonds on which one can be a surety from two to one. This is sustained by 70 Mich. 334.

"The requirement of real estate justification is assailed on authority of 65 Mich. 323. The new law continues this provision of the old statute, but requires that record of title be shown. There is no reason to believe this will not continue effective as it has been in the past. Mr. Henderson overlooks the fact that the case he cites in the 33rd of Michigan was decided in 1886, and at that time the law did not require sureties to justify in real estate, and the point of the case was that the appearing board must act fairly and not arbitrarily exclude personal property security. The law passed in 1887, a few months later, introduced the requirement of ownership of real property, and it has been in effect for twenty years, without having been disturbed by the courts.

"Whether the new law will be better enforced than the old one remains to be seen, but its enforcement will be retarded rather than aided by a widespread impression of its invalidity. From the foregoing there appears no cause for alarm as to 'holes' in the act, so far as the Henderson expose is concerned. The law was strictly a compromise between elements having widely divergent views and there are portions that will no doubt require judicial construction, but nothing is likely to endanger the validity of the act or any important feature of it. In my opinion, it was honestly built, although not always on the lines that our side of the house wanted."

### Closed This Afternoon

Our store closes at noon TODAY for the Clothiers, Dry Goods Men, Grocers and Butchers

### Base Ball Game

For benefit of the Visiting Nurses Fund. This is a worthy Charity, and of course you will go to it. But before you go, turn out and secure a few big bargains in summer clothing, Hats, Shoes, etc.

A lot of small sizes in Suits, worth \$15 to \$18, to close at \$10.00

Children's straight Pant Suits, mostly fall weights, good school Suits, at 1-2 price.

All our Men's and Boys' Oxford Shoes, a lot of fine light colored Hats, Straw Hats, Children's straight Knee Pants, will be cleared out at big bargains.

Don't fail to look at the double-breasted Suits - just the thing for fall wear--they go at cut rates that will surprise you.
