

PEARY DENOUNCES BROOKLYN RIVAL

Telegraphing to His Wife and to the Associated Press from Indian Harbor, Labrador, He Brands Dr. Cook as an Imposter

He Has Him "Nailed," He Asserts, and He Adds That the Two Natives Who Accompanied the Physician-Explorer Say He Went No Distance North and Not Out of Sight of Land; Also That Other Members of the Tribe Corroborate Their Story.

Portland, Me., Sept. 8.—Mrs. Robert E. Peary, wife of the famous Arctic explorer, today received a message from her husband, advising her not to worry about Dr. Cook's message follows: "Indian Harbor, Sept. 8.—Good morning. Delayed by fog. Don't let Cook story worry you. Have him nailed. (Signed) Bert."

Day's Developments Dramatic. New York, Sept. 8.—Commander Peary's despatch today from Indian Harbor to the Associated Press gives his first expression concerning the claim of Dr. Cook that he reached the pole almost a year prior to Peary, or on April 21, 1908.

Peary's Ship at Battle Harbor. Red Bay, Labrador, Sept. 8.—Commander Robert E. Peary arrived today at Battle Harbor, just above the opening to the Strait of Belle Isle, sixty miles above this point.

Expected at North Sydney Sunday. North Sydney, Cape Breton, Sept. 8.—It was learned by wireless tonight that Peary had arrived at Battle Harbor 175 miles south of Indian Harbor, this afternoon. A report that the Roosevelt had reached Blanc Sablon was circulated today, presumably as the result of an order which the explorer sent to St. Johns, with her exact itinerary thereabout.

WORD FROM PEARY SETS THE WORLD AGOG

The Lie Hurlled Concerning the Discovery of the North Pole, There Is Laid the Foundation for a Controversy Unparalleled in the History of the Globe.

New York, Sept. 8.—With today's developments concerning the discovery of the North pole, the foundation has been laid for a controversy unparalleled in history.

Commander Peary, who is making uncertain progress southward of the coast of Labrador, sent today a message challenging the veracity of Cook and his followers. The message, which all the world is discussing, Peary discredits Cook's claims, with the intimation that he (Peary) alone has planted the American flag at the pole and that Cook must substantiate his claim of having done the same.

Mrs. Peary Going to Sydney. Portland, Me., Sept. 8.—Mrs. Peary, with her children, came to Portland this evening from Eagle Island. She carried, besides her "good morning" wireless message, another message dated Battle Harbor, in which she would quote from Cook's announcement and the question of priority in reaching the pole.

Naval Service Wires Congratulations. Washington, Sept. 8.—Commander Peary's former associates in the corps of civil engineers in the navy today telegraphed the following to him at North Sydney: "Congratulations on your remarkable achievement. The service is proud of you."

Statements of Dr. Cook and His Financial Backer Do Not Agree. New York, Sept. 8.—John R. Bradley, who financed the Cook expedition, declined today to say anything reconciling the conflicting statements by him and Dr. Cook. Mr. Bradley said last Sunday that the plans had been carefully laid out and he anticipated the checks paid for the supplies to show that "we were doing something more than fitting out a fishing trip."

Another Cook Exploit in Doubt. Man Who Accompanied Him Hints He Did Not Climb Mt. McKinley. Seattle, Wash., Sept. 8.—S. P. Beecher, of Peshawar, Wash., who says that he accompanied Cook's Mt. McKinley expedition, said today: "Before Cook started for the summit, Miller, the photographer, and Printz were sent up the Ketchikan river while Delmore, Brown and I went up the Matanuska river to visit Cook's return. At Old Kink I met five men who had come down the Chitina in a rowboat. They reported that they had passed Cook, headed up the river in a launch. This was the time that Cook says he ascended to the summit. There was remarkably little time between the meeting of the five men and Cook and Cook's return with the report that he had reached the top."

DR. COOK PROMISES TO FURNISH PROOF

At the Proper Time, He Says, He Will Give to the World Convincing Evidence That He Has Reached the Boreal Center.

Not Only Does He Intend to Send for His Eskimos, but He Is Willing to Appear Before an International Tribunal—Either He Is an Absolutely Sincere, Simple Man, or He Is One of the Globe's Greatest Actors—This the Opinion at Copenhagen.

Copenhagen, Sept. 8.—"I have been to the North pole. As I said last night when I heard of Peary's success, if he says he has been to the pole, I believe him."

Brooklyn Man Undisturbed. Coming so quickly upon the other dramatic incidents of the week, Peary's denial that Cook has achieved the triumph for which he has been fettered and honored at Copenhagen has been a relief to the feelings of amazement and concern. Dr. Cook seems undisturbed. He was perfectly cool and apparently unmoved when confronted with telegrams saying that Peary had denounced him as an imposter. His demeanor has not changed in the slightest since he landed in Copenhagen.

Will Send Eskimos to America. It is settled that Dr. Cook will send a ship back to bring to America the two Eskimos who accompanied him on the last stage of his journey to the pole, also some of the party who were sent back when the last stage began.

Catch Worth \$12,000. "Plum Pudding" Whaling Voyage of Captain J. A. Cook Is Profitable. New Bedford, Sept. 8.—With every cask filled with sperm oil, the whaling schooner Valkyrie, Captain John A. Cook, has just returned to port from a "plum pudding" voyage on the Atlantic ocean.

THE WEATHER.

Washington, Sept. 8.—The following is the weather bureau's forecast for Upper Michigan: Showers Thursday and possibly Friday; light variable winds.

Danes Suspend Judgment. All day despatches from America regarding Peary is that, as poured into Copenhagen. The newspapers contain only one unpleasant reference. The Politiken says: "The Danes, remembering Peary's bad treatment of one of their own explorers, are not surprised at his attitude toward Cook."

BASEBALL. STANDINGS OF THE TEAMS. National League. W. L. P.C. SCHEDULE FOR TODAY. National League. Cincinnati at Pittsburgh. Philadelphia at Boston. Brooklyn at New York. American League. Cleveland at Detroit. New York at Philadelphia. Boston at Washington. Chicago at St. Louis. YESTERDAY'S GAMES. National League. Pittsburgh, Sept. 8.—Chicago's batting rally in the ninth, coupled with a costly error by Miller, gave the visitors the victory. Brilliantly marked the game. A catch by Schulte in the fifth, was truly wonderful. Running far out into right field, the player, with his back to the diamond, reached out and caught Miller's hit that would have gone for a home run. Gibson today tied the world's record for the number of consecutive games caught in a season, equalling the performance of Zimmer, who, while playing for Cleveland, in 1890 caught 111 games in succession.

Boston, Sept. 8.—The features were the batting of Doolan, in the first game, and Coveleskie's pitching, in the second. Pittsburgh, Sept. 8.—Chicago's batting rally in the ninth, coupled with a costly error by Miller, gave the visitors the victory. Brilliantly marked the game. A catch by Schulte in the fifth, was truly wonderful. Running far out into right field, the player, with his back to the diamond, reached out and caught Miller's hit that would have gone for a home run. Gibson today tied the world's record for the number of consecutive games caught in a season, equalling the performance of Zimmer, who, while playing for Cleveland, in 1890 caught 111 games in succession.

Washington, Sept. 8.—Boston halted

ROBERTSON WINS THE LOWELL TROPHY

Driving a Simplex, and Averaging 54.2 Miles an Hour, He Rides 318 Miles to Victory Over the Merrimack Valley Course.

Lowell, Mass., Sept. 8.—George H. Robertson drove his Simplex car 318 miles to victory today, over the Merrimack Valley circuit, and left trailing behind or out of commission sixteen other aspirants for the Lowell trophy.

BASEBALL. STANDINGS OF THE TEAMS. National League. W. L. P.C. AVIATORS' WORK DISAPPOINTS.

Aerial Regatta at Brescia Is Marred by Several Accidents.

LeFebvre's Skull Fractured. Javis-sur-Orge, France, Sept. 8.—The autopsy on the body of LeFebvre, the aviator who was killed by the falling of his aeroplane here yesterday, shows that death was the result of a fractured skull, the injury attributed to the breaking of the radiator.

TEXAS. Six years ago two adventurous cowboys, living on the life of a Texas range, decided to go to Africa. From South Africa they went to Australia. They enjoyed the herders' life on the big cattle ranges there, made some money, but finally decided to return to the country of their birth.

NEW YORK. Today's speculative trumpet continued to be extremely sensitive to news of E. H. Harriman's condition. The price fluctuations in stocks reflected nothing but the advice concerning the big railroad magnate. These advices were exceedingly meager, vague and sometimes contradictory. The price movement therefore was confused and sluggish, with subsidence to the point of stagnation. The limited transactions suggested that the large operators were keeping out. The day's dealings were largely minor professional transactions.

INSURANCE FIELD BROADENED. Albany, Sept. 8.—Miller's National Insurance company, of Chicago, was today authorized to do business in New York. This is the first applicant under the new law permitting foreign mutual fire insurance companies to carry on business in New York.

Washington, Sept. 8.—Boston halted

DAILY MINING JOURNAL
A MORNING PAPER PUBLISHED BY THE

Entered as second class...

It is authoritatively denied that Explorer Cook is going into vaudeville.
We are awaiting from Secretary Balinger details as to how is getting along with his snake killing.

The reputation of President Taft for good sense and discretion will be greatly enhanced by his refusal to umpire a baseball game.
We have no doubt that Wagner is an excellent pitcher. The best of them get bumped once in a while. Wagner was apparently due for a bumping Tuesday.

The confidence in the veracity of Peary is no less than the confidence felt in the truthfulness of Washington after that little incident of the hatchet and the cherry tree.
Pat O'Brien has been getting out a rattling good paper at Iron River and Mr. Campbell has been making a first class weekly at Marquette. When they join forces the result ought to be superlative.

If Dr. Cook and Peary, and their respective followings, get into the sort of a jangle many people are apprehensive of, the public will not unlikely come to regret that either of them got anywhere near the north pole.
Over 100,000 people entered the gates of the state fair at Detroit on Labor Day. The fair this year is surpassing all previous ones in its attraction for the public, and will be an unqualified success. The management has built up, in the course of a few years, a fine exhibition, and it has been shown that Detroit is the right place for the fair. Against the fact that Detroit is not as centrally located as it might be, is the other fact that in Detroit the fair is assured of a generous support that permits the management to go ahead with ambitious plans for improving its quality and adding to its drawing powers.

Announcement is made that the University of Chicago is now self-supporting. The income from the various sums with which Mr. Rockefeller has from time to time endowed it, and the various other income which the institution receives, is sufficient to defray the yearly expense without leaving any deficits to be met by its founders. This does not mean, however, that the University has no further need for Mr. Rockefeller's money. On the contrary, it wants many things in the way of buildings and permanent improvements. But from now on the institution will be able to pay its way, as far as the current expenses are concerned; and that's something.

The Battle Creek school election this week was memorable for the fact that two women candidates ran against two men. The result shows that there is no danger of the men losing control of practical politics even if the ballot is given to the women for all elections for the women candidates were defeated three votes to one by their opponents of the sterner sex. And if the truth could be known, doubtless the men polled the votes of many women who did not belong to the particular "set" in which the women candidates moved. Women play a big part in most school elections, under the Michigan law, but it is largely nullified when they endeavor to elect any of their own representatives to office.

That the first fatality in the history of French aviation has only now been reported shows that the aviators have been both skillful and fortunate in handling these cranky craft. Many aviators have ventured into the air in many different types of machines, some of them comparatively crude in construction and equipment, and that there have not been more fatalities indicates that the navigation of the air is not unduly dangerous. It appears to be at least as safe as hiking over grade crossings in automobiles. There is only one case of a fatality in aviation on record in this country, the death of Lieut. Lahm at Fort Meyer last year. Such

accidents as occur are due to defects in the mechanism of the aeroplanes, rather than lack of judgment on the part of the operators.
For the fifth time the Cleveland Democrats have decided to stake their chances of victory in the municipal election on Tom L. Johnson, and despite Johnson's reverse in the recent traction contest, when the people refused to vote confidence in the scheme of settlement which he favored, they believe that he will be re-elected. They base this belief largely on the fact that he has defeated the Republican candidates in so many previous battles, and that his strength was sufficient to overcome even such an exceptional candidate as Senator Burton. This line of reasoning ignores the facts that the opposition to Johnson has lost none of its bitterness, and that many of his followers are becoming dissatisfied with his apparent inability to get results. Johnson may pull through again, but if so he will probably have a pretty tight squeak of it. Certainly the Republicans will spare no effort to gain control of the city's affairs. They have a strong candidate in Herman C. Baehr, and plan a united fight to make him a victor.

Only seventy-one million silver dollars are now in circulation, the smallest number for many years; eleven million less than three years ago, and ten million less than in 1907, at which time the government ceased to pay exchange on them when they were returned to the treasury to be exchanged for small notes. This action has had no little influence in curtailing the circulation of the silver dollars; but the fact that two halves serve the purpose of a dollar, while at the same time more convenient in making change and to carry, as well as the abundant supply of small notes, has also tended greatly to the retirement of the heavy cumbersome coins, which have been almost wholly discarded in eastern commercial centers. It has long been an accepted axiom in coinage that paper notes of same value being plenty and equally secure—cumbersome coins will be driven out of circulation. The only way to keep up the silver dollar circulation, or to extend it, is to withdraw or reduce the dollar notes and restrict likewise any further considerable issue of halves, and possibly quarters.

The beautiful absurdity of blowing up the police for not stopping the violation of the speed regulations by automobile drivers appears on its face. Two officers of the attenuated force are on duty in the day time, during which automobiles are running here and there over many miles of city streets. Fifty officers would not avail to entirely stop speeding. It is presumed that the officers are acting in all cases of flagrant violations of the law that come under their observation, but the automobiles drivers are usually careful not to open up until they are in territory where there is little likelihood of their speed being observed by the police. They are not showing the proper respect for the rights of other users of the streets. Many parts of the town are made speedways. There is particular complaint about high speeds on Fourth street. Unless the owners of the cars see that they are run with more discretion the public will presently demand a crusade against high speeds that will be no joke when the violators of the ordinances are haled into court. Meanwhile the most effective way to respect respect for the law is for citizens to enter complaint when they observe cases of excessive speed. If the police department had the co-operation of all the faultfinders in a practical way it would be comparatively easy to get some kind of results.

THE SARATOGA CONFERENCE.
The advance notices of the Democratic conference to meet at Saratoga this week like the gathering to assemblies which took place thirty-five years ago—assemblages that resulted in the elevation of Samuel J. Tilden and a rehabilitation of the Democratic party that lasted for twenty years.
Is there similarity? Is it possible to trace a parallel and to predict equally important results? It is much to be feared that the thought is merely fathered with a wish. That the Democratic party is disorganized and in a low repute—this is about as far as the resemblance goes. In New York county, in Kings county, and up state the Democratic party is bossed by men who have the ideals and largely follow the methods of Tweed. Is there no serious purpose to revolt against and overthrow this kind of leadership? Is there any standard of old-fashioned honesty and to suppress commercial politicians? Is there the courage necessary for cutting loose?
It does not so appear. Many of the men who are to meet, although of personal respectability, have thought it no shame to accept nominations and offices at the hands of such as Murphy, McCarren, and Connors. It may be assumed that they would be willing, if not glad, to sit in conventions where in they would merely be rubber stamps, obedient to the command of men who consider politics a moneymaking business. There is no bite yet discernable to the meeting. It looks as if it is to be held, not for action, but for talk. And as there is no resolution as to a change of captains, so there is equally no resolution as to political principles. What attitude will be assumed toward direct nominations? What attitude will be assumed toward the big question of whether New York state is to accept or reject the income tax amendment? Judging from what has been said in the circular and letters preceding the conference the intention seems to be to dodge these and all other difficult issues. Political regenerators should be made of sterner and less amiable stuff. So

SAVED FROM AN OPERATION
By Lydia E. Pinkham's Vegetable Compound
Louisville, Ky.—"Lydia E. Pinkham's Vegetable Compound has certainly done me a world of good and I cannot praise it enough. I suffered from irregularities, dizziness, nervousness, and a severe headache which I could not get rid of until I used your Compound. I will never be without this medicine in the house."—Mrs. SAM'L LEE, 3523 Fourth St., Louisville, Ky.

Another Operation Avoided.
Adrian, Ga.—"I suffered untold misery from female troubles, and my doctor said an operation was my only chance, and I dreaded it almost as much as death. Lydia E. Pinkham's Vegetable Compound completely cured me without an operation."—LENA V. HENRY, R. F. D. 2.

Thirty years of unparalleled success confirm the power of Lydia E. Pinkham's Vegetable Compound to cure female diseases. The great volume of unsolicited testimony constantly pouring in proves conclusively that Lydia E. Pinkham's Vegetable Compound is a remarkable remedy for those distressing ailments from which so many women suffer.

small is the basis of belief that a beacon will be lighted at Saratoga that will illumine the state. There will be much talk of Tilden and Cleveland and of the desirability of reliving the ancient Democratic standard, but it is to be suspected that the profession of virtue will be general and discreetly avoid concrete application. Politeness toward the bosses and evasion of topics concerning which there is prominent difference of opinion—such is the programme. A soft and padded club seems the only one that it is proposed to brandish.—New York Globe.

KILLS 234,000 PRAIRIE DOGS.
J. W. Holman of Amarillo, Tex., Slaughters Pest by Wholesale.
THOUSANDS YET TO SLAY.
Campaign of Extirmination Will Be Renewed the Present Month—Poisoned Wheat Used.

Fort Worth, Tex., Sept. 8.—J. W. Holman of Amarillo is entitled to the title of "king-slayer of prairie dogs." He has killed 234,000 dogs during the first half of the present year, and has earned for that service \$3,500. His efforts for the most part have been confined to the Fryling Pan ranch, but some of the adjoining smaller ranches have received his attention. Some of the property was badly overgrown with weeds and brush, and he poisoned wheat, practically depopulated every town. In discussing his crusade against the curse of the Panhandle, Mr. Holman said:

My efforts have been entirely successful. To make sure that the poison treatment was effective I returned over the former routes, and where the least trace of dogs was found I treated the spot with carbon. The latter treatment is somewhat slower, but never fails in results. That is a plan I had adopted, never to let a property rest until the last dog had been exterminated. On one ranch near Amarillo I killed, perhaps a greater number of dogs and left them on the surface than was ever known before. The ground was literally covered with their bodies.

At this time I have enough work to last me and several forces of men more than twelve months. In the meantime I will organize a corps of Mexicans and keep up a constant campaign, beginning this month. This means that many miles of territory will be swept clean of the pest. I make up the poisoned wheat in two hundred pound bags, and one pound of the poison. Three or four spoonfuls in a little corn meal has been put to keep it from sticking does the work for each family of dogs. It is placed near but not on the holes and in the open ground. If it is put in the holes the dogs will not eat it. Then, if we used a greater quantity of the poison, it would be dangerous to live stock. In small quantities horses and cattle do not suffer from it.

The carbon treatment, which is a follow-up is the last resort. This is for dogs that in rare instances fail to get a dose of the poisoned grain, and it never leaves anything possessed of life in the holes. I am planning to make the campaign of next year run into the millions, and will doubtless be able to do so. Thousands of acres are traversed, and it will carry with it a saving of untold wealth to the owners of the property. The owners of the ranches are awakening to the worth of this movement, and gladly pay the trivial cost of extermination.
GO WITH A RUSH.
The demand for that wonderful Stomach, Liver and Kidney cure, Dr. King's New Life Pills—is astounding. The Stafford Drug Co., say they never saw the like. It became they never fail to cure Sour Stomach, Constipation, Indigestion, Biliousness, Jaundice, Sick Headache, Chills and Malaria. Only 25c.
HEALTH AND BEAUTY AID.
Cosmetics and lotions will not clear your complexion of pimples and blotches like Foley's Ointment, for indigestion, stomach and liver trouble and habitual constipation. Cleanses the system and is pleasant to take. Sold by all Druggists.

Upper Peninsula
Automobiles Tabled There—
Mackinac Island is one spot in this big, big world where automobiles are not allowed. Horses hold full sway.
Gladstone Axe at the Pole—
Farthest north! The Marble axe has gone to the end of the earth and chopped a blaze in the side of the frozen pole. Both the Cook and Perry expeditions were equipped with Marble axes, which are an upper peninsula product, made at Gladstone.
Takes Position in Tennessee—
Miss Edith Stetson, who has been supervisor of the domestic science school at Ironwood for several years, has returned from British Columbia, where she spent the vacation, and has departed for Knoxville, Tenn., to take charge of the domestic science department of a girls' boarding school located near that city.
Larger Jails Needed—
Here's one of the provisions of the state's new cigarette law: "No person under the age of twenty-one shall smoke or use cigarettes in any form in public highways, streets, parks or public places of business under a penalty of a fine of \$10 or imprisonment not to exceed five days." Several additions will have to be made to the jails if the new statute is enforced in upper Michigan.

About Transporting Corpses—
One of Michigan's new laws makes it unnecessary for a corpse to be accompanied by any one. Only a first-class ticket has to be purchased and the body may be sent by baggage or express. Neither the railroad nor the express company can charge more than the amount in a first-class ticket to the destination except that not less than \$2 must be paid.
Infested With Hoboes—
Recounting the death by accident of Charles Wilbur, a hobo, who was killed by being hit by a train at that place, Supervisor Smith of Trout Lake, Chippewa county, says that the junction town is overrun with tramps and cripples. It is no uncommon thing, he says, to see from three to five and six of these gentlemen of leisure in the village begging handouts or anything they can get.
Won Two Out of Three—
The Rapid River baseball team took two out of a series of three games from Sault Ste. Marie at the Lock City Saturday, Sunday and Monday. The classy Delta county aggregation lost Saturday's game, 6 to 7, but topped off the victory in the first-clas ticket contest. Monday the Rapid River players shut out the Soos 1 to 0 by gilt-edged playing while on Sunday the Delta county men won a fast 8 to 2 victory.

Sisters' Long Separation—
Mrs. William H. Myron, accompanied by her son, Louis F. Myron, both of the Soo, have gone to Duluth, where Mrs. Myron is visiting with two sisters whom she has not seen for forty-two years. After the conclusion of their visit at the head of the lakes they will go to Clayton, Jefferson county, New York, the birthplace and girlhood home of Mrs. Myron. "The latter is eighty-one years of age."
Has a Fine Orchard—
S. S. Nettleton of Grand Marais has one of the finest orchards in Alger county and gives the same great care and attention. His trees are now loaded down with fruit and many of them have to be stayed to keep the weight of the fruit from breaking the branches. On one branch can be counted 125 apples. The other orchards in the district all look good and everything indicates that the harvest of fruit this fall will be the most bountiful ever known there.

Plans to Cut Running Time—
The St. Paul road has several construction trains at work to the north of Iron Mountain, making track improvements. Tracks and bridges are receiving much attention. The company is preparing for an unusually heavy fall and winter business. It is learned, too, that the road proposes to reduce the time schedule of many of its trains. Five large new locomotives have been placed in commission on the Menominee range branch of the Northwestern road and are employed in hauling ore trains.
Township Boundaries Rearranged—
The most important piece of business transacted at the recent meeting of the Gogebic county board was the transferring of a geographical township from Bessemer to Marquette township. The piece thus transferred is described as township 46, range 44, six miles square, located at the extreme western end of Bessemer township, and in it is included the village of Dunham. The board was practically unanimous in its decision for the change, the vote standing fourteen to four. The people residing at Dunham had asked to be removed from Bessemer township and made a part of Marquette for the reason that it was impossible for them to go to Ramsay, where the only polling place in Bessemer township has always been located, in order to vote, without the loss of two days; also they claimed that Bessemer township had never built any roads whatever for their accommodation, nor

DR. D. JAYNE'S EXPECTORANT
A Remedy for Summer Colds
Many people make no effort to cure a Summer cold because they think it is not dangerous. In reality Summer colds are very weakening, and if allowed to hang on into the Fall, may bring on fatal pulmonary complications.
Dr. D. Jayne's Expectorant will be found very effective in relieving colds and coughs at any season of the year. This standard medicine has been successfully employed for three-quarters of a century. It is also a reliable remedy for coughs, croup, whooping cough, bronchitis, pleurisy and similar ailments.
Sold by All Druggists
In Three Size Bottles
\$1.00, 50c and 25c

Schmirler recently broke into limelight when he twirled a no-hit game against Hibbing, the fastest semi-professional ball team in the Northwest, and again when he twirled an eighteen-inning game for Duluth against Superior and won out. Tom Coates, who played with Ironwood two seasons, now with the Oshkosh team, has been drafted by the Philadelphia Athletics.
Horse Breaks Man's Leg—
Alderman J. W. Mullen of Ironwood accidentally broke one of his legs the other evening. He was returning from Ramsay, where he had been attending to some business matters, and at Powder Mill creek he got out to water the horse. While doing this he slipped in some way, and the horse struck him with one of its feet, the blow hitting the right leg near the ankle, breaking the large bone. Mr. Mullen managed to get into his rig and drive home, though the break was very painful. The accident is particularly serious, as the same leg was broken in nearly the same place about three years ago. The alderman will be confined to his home for several weeks.
One-Handing Records Broken—
A new record in the loading of ore with a steam shovel has been made by a crew at the Newport mine at Ironwood. By loading 115 fifty-ton cars in ten hours, the record for the Gogebic range was broken, and possibly the record for the whole Lake Superior country. The shovel used was a new Bucyrus machine; the runner was Dennis Harrington and the crane man Dominick Levy. Fred Smith was in charge of the train crew which "spotted" the cars and Peter Meagher was engineer. The best previous records for steam loading at the Ironwood mines were 109 cars loaded in one day at the Ashland mine by James O'Brien and 109 cars loaded at the Newport mine in one hour and ten minutes. Still another record made at the Newport recently was the hoisting of 4,005 tons of ore from "D" shaft during the course of two shifts. The shaft is very deep, and most of the ore came from below the seventeenth level.
The Road to Success.
Has many obstructions, but none so desperate as poor health. Success today demands health, but Electric Bitters is the greatest health builder the world has ever known. It compels perfect action of stomach, liver, kidneys, bowels, purifies and enriches the blood, and tones and invigorates the whole system. Vigorous body and keen brain follow their use. You can't afford to slight Electric Bitters if weak, run-down or sickly. Only 50c. Guaranteed by The Stafford Drug Co.
WARNING.
Do not be persuaded into taking anything but Foley's Honey and Tar for chronic coughs, bronchitis, hay fever, asthma, and lung trouble, as it stops the cough and heals the lungs. Sold by all Druggists.

NORTHERN STATE NORMAL SCHOOL
MARQUETTE
School Begins Monday, Sept. 27, '09.
The Northern State Normal School admits graduates of approved high schools to the two years' course leading to a life certificate and diploma. It offers courses leading to a three-year certificate, which is renewable for three years and valid in graded schools, and also a rural school certificate. Has excellent facilities for training teachers for special work in Kindergarten, Music, Drawing and Nature Study. It has an exceptionally fine corps of teachers who are specialists in their departments, and its training school gives a splendid opportunity for the training of teachers. There is a splendid dormitory in connection with the school, which is an ideal home for the student. The building is lighted with electricity and heated with steam; the living rooms are large and pleasant; the dining room has a seating capacity of one hundred and fifty persons. The expenses are moderate. Students of the Northern Normal School who finish the life certificate course are given fifty-six hours' credit at the University of Michigan. For information and catalogue write to
MISS ALMA A. OLSON, SECRETARY.
JAMES HAMILTON KAYE, PRESIDENT.

Copper Country

THREE MURDER CASES.

Criminal Calendar for the September Term of Houghton County Court.

Thirty-eight criminal cases constitute the criminal branch of the calendar which will come up for trial before Judge Streeter and the jury at the Houghton county court's September term, which opens next Monday morning.

The case of Matt Wuolle and John Makkinen, charged with uttering a forged instrument, is a most interesting one.

Arno Suhonen and Alex. Lintala are charged with obstructing an officer.

Ellis Karvako, murderer; Charles Murray, alias Charles Gillis, murderer; Luka Gorgie, assault with intent to murder; Emil Pukkinen and John Pekola, assault with intent to murder; Isaac Sivonien, assault with intent to murder; two charges; Arthur Carlson, assault; Peter Zurich, mayhem; Arnold Haverly, alias Arnold Xava, burglar; James Tanney, burglary; Matt Wuolle and John Makkinen, uttering forged instrument; Matt Mihel, forger; James Stanaway and Frank Mudge, murder; John Stefanic, statutory; Alfred Michelson, embezzlement, four charges; Peter Palak and Johannes Kolonen, adultery; Arno Suhonen and Alex. Lintala, obstructing an officer; William Loomis, maliciously killing animal; Elsie DeWolf, disorderly; Ella Clark alias Ella Foiles, disorderly; Henry Drittler, Ralph Ghabaterra, Michael McGinty, Charles Kekikila, violation of liquor law; open on Sunday; Frank Maki, open after hours; John Torrance, Herman Matson, non-payment of liquor tax; Elias Haanpaa, statutory; Oscar Riel, non-support, appeal; Henry Luokkonen, trespass, appeal.

NATIONAL CROATIAN MEETING.

Plans Being Made at Calumet for the Reception of the Delegates.

The Chicago, Milwaukee & St. Paul railway has made arrangements to convey to Calumet the larger body of the delegates to the Croations' national convention. The convention will meet at Calumet Sept. 20 and will continue in session until Oct. 3.

Attorney Anthony Lucas, who has returned to Calumet from points in the Central and Eastern states, met President Hajdic of the National Croations in Chicago a few days ago, and he was told of the arrangements made for this special train.

The National Croations is not a secret organization, but an amalgamation of benevolent societies that seeks to raise the standard of Croatian citizenship in this country and to help the membership in every way possible.

The headquarters of the society is at Allegheny, Pa. The board of directors consists of twelve members, elected at the triennial conventions, and all must be citizens of the United States.

NEW BUILDING AND LOAN.

Houghton County Investment Company Files Articles of Incorporation.

Articles of incorporation of the Houghton County Loan & Investment company were filed yesterday with Register of Deeds Mackenzie by J. H. Rice, N. W. Haire, James R. Dee, W. D. Calverley and Joseph Strobel.

The company is a building and loan association, pure and simple, incorporated under the Michigan laws governing such organizations, and the names of its incorporators show the character of the men who are behind it.

This company is organized because its promoters feel that there is a scarcity of money for real estate investment, and because associations of a like character in the county are over-taxed by the demands upon them.

MEDICAL DEFENSE LEAGUE.

Houghton County Medical Society Defers Action for Month.

The Houghton County Medical society, at its meeting Monday night, did not take any action on the Medical Defense League proposition.

At the meeting of the Red Jacket village council Tuesday evening the most interesting action taken was the decision to enforce the curfew ordinance.

DEER ARE DESTRUCTIVE.

Dave Lanctot, Jacobsville Farmer, Will Sue Some One.

Dave Lanctot, a Jacobsville farmer and garden truck grower, will make either Torch Lake township, Houghton county or the state of Michigan the defendant in a civil suit which he is going to bring to recover damages for crops destroyed.

Mr. Lanctot has had Game Warden Wilson on the ground to look over the damage and to show him the undoubted evidence that deer are responsible.

Centennially WASHBURN-CROSBY CO. Gold Medal Flour. Why Not Now?

ENTERS FOR CHAMPIONSHIP.

Harry Overy, Golf Professional, Will Play on Skokie Links.

Harry Overy, professional with the Portage Lake Golf club, will leave Monday for Chicago to play in the Western open championship match, which will be played on the links of the Skokie Country club Sept. 16 and 17.

MOHAWK HOCKEY MEETING.

Present Officers to Act Until Nov. 30—Plans for the Season.

A meeting of those directly interested in the Mohawk hockey team was held last night and preparations were made for the coming season.

OFFICIALS ARE ANNOUNCED.

Wellknown Men Will Be in Charge of Cornish Wrestling Tourney.

The officials for the Cornish wrestling tournament to be held at the Amphidrome, at Houghton, next Saturday afternoon and evening have been decided upon. They are as follows:

MAKING PAPER BOTTLES.

Alex. Stevenson, promoter of the Great Western Sanitary Cone Paper Milk Bottle company, expects to leave this week for Chicago and Indianapolis, where he and others interested will complete the organization and will lay out the plant for the work to be done.

CANNOT USE WIRELESS YET.

According to a statement made yesterday, the Calumet station of the United Wireless Telegraph company, located at Tamarack Junior, cannot be placed in operation for a few days yet.

COPPERDOM BREVITIES.

A match for the Tom Dee cup will be played on the Portage Lake golf links Sept. 16.

Thomas W. Lawson, chemist at the Michigan smelter, left yesterday on a two months' visit to Europe.

The outside walls for the large addition to the general offices of the Calumet & Hecla Mining company have been completed, and the steel roof beams are in place.

MINING NEWS.

LAKE COPPER GOSSIP.

The two new shafts of the Ahmeek, Nos. 3 and 4 are down close to 400 feet now and the work is now progressing at a rate which will permit of a sinking depth of 100 feet per month from now on.

Miss Mabel Sieger, daughter of Henry Sieger of Laurium town, Hecla, was united in marriage to Rouben G. Northy Tuesday evening.

Woods has been received in Calumet of the death of Hochstetler, province of Stuchty, Germany, of Captain Bernard Schaefer, formerly with the Calumet & Hecla Mining company. The demise occurred Aug. 17. The deceased was about sixty-five years of age.

Frank O. Gilbert, of Bay City, grand lecturer of the Michigan Masonic grand lodge, will conduct a lodge of instruction at Houghton next Thursday night, the Houghton lodge working the third degree. An exemplification of the third degree will also be given Monday night.

The Calumet township board has instructed Clerk C. E. L. Thomas to secure deeds for the rights-of-way of proposed new highways. One of these roads will extend from Centennial Heights to the county line at Ahmeek, and the other from Copper City to the Trap Rock River valley. The highways have been petitioned for by residents of the township during the past few years.

A meeting of the executive committee of the Portage Lake Businessmen's association was held in Hancock Tuesday evening, at which time Secretary Montgomery reported concerning his trip to Duluth, where he conferred with Secretary Walker of the Duluth association. The association has rented an office room on the second floor of the Kauff block on Quincy street. This will be the office of Secretary Montgomery, and it was opened yesterday morning.

J. W. Akron of Fair Play, Mo., will shortly make an appearance in Houghton, under the auspices of the Houghton Gun club. He will give an exhibition of rifle shooting. It is claimed that he is the world's champion rifle shot, his claim being based on the refusal of Colonel Kendrick, the best known claimant of the championship, to meet him. Mr. Akron has broken 1,659 nathies straight, thrown by himself, and also 15,800 clay pigeons, thrown by himself. The date of his appearance at Houghton is not announced.

MAN IN ISOLATION.

It is not an easy thing for a man to separate himself from the thought and activity and purpose of the community in which he lives, and to pursue an isolated, disconnected and selfish path. He can't do it, indeed; and if he tries it he will only reduce himself to a cipher or stumbling block.

There is considerable activity at the Mass property in opening the long-known No. 1 shaft of the Butte Copper mine. Formation will be in shape for extensive tonnage shipments in the near future. Some of the rock, such as is coming out in the course of the openings, is being shipped to the mill now along with the regular shipments from the Evergreen. It is not enough to make any difference in the net yield of copper per ton of rock. The management plans to make shipments of 400 tons daily, enough to operate one steam stamp, as soon as the openings are extensive enough to warrant the work.

A mining man who was underground in North Butte recently gives it as his opinion that the company is working in the iron zone on the new levels, a zone so common in the mines of Butte, and that North Butte is going through the experience that the Anaconda and other mines had some years ago when geologists and experts said the Butte mines were worked out and that no good ore would be found again in the old mines, writes the Butte correspondent of the Boston Commercial. It is a fact that the ore from the 2,000 and 2,200 foot levels of the North Butte carries an unusually high percentage of iron, and that there is more of it in the 2,200 than on the 2,000 level, indicating that the mine is just getting well into the iron deposits. If the iron zone theory is correct and applies to the North Butte then it would indicate that the Jessie vein, for which a cross-cut on the 2,200 foot level is being driven, would probably show up no better than has the Edith May on that level, and that the lean condition of the veins will continue for several hundred feet deeper, or until the so-called "second enrichment" is reached. In the Anaconda mine the poor condition of the vein continued for 400 or 500 feet and then the mine developed richer ore bodies than ever before. Captain James Heaton of Michigan, president of the North Butte, has been in the district and has made a thorough personal ex-

Butte Coalition. The Butte Coalition company contemplates a largely increased production as indicated by improvements being made at the surface plants of the Minnie Healy and Rarus mines where 300 additional lockers for miners are being built.

It appears from a statement issued by the Butte & Ely Copper company to its shareholders that the option on the Thomas F. Cole property was given to Thomas F. Cole personally, but it is presumed that he holds it for the Giroux Consolidated company, which is engaged in prospecting the Butte & Ely ground.

NOTICE TO CONTRACTORS.

Sealed proposals will be received for the erection of a two-story and basement High School building in the village of Baraga, county of Baraga, state of Michigan.

COLE-RYAN PLANS.

There is much talk of a consolidation of the Cole-Ryan properties, but nothing has developed to indicate that a consolidation is under way.

MINING NOTES FROM BUTTE.

A mining man who was underground in North Butte recently gives it as his opinion that the company is working in the iron zone on the new levels, a zone so common in the mines of Butte, and that North Butte is going through the experience that the Anaconda and other mines had some years ago when geologists and experts said the Butte mines were worked out and that no good ore would be found again in the old mines, writes the Butte correspondent of the Boston Commercial.

City Brevities

Today's weather: Unsettled, with probably showers; stationary temperature.
Yesterday's temperatures: Seven a. m., 62 degrees; noon, 74; 7 p. m., 59. Maximum, 75 degrees; minimum, 59.

James Molloney is up from Gwin, attending the fair.

A son was born to Mr. and Mrs. R. E. Mahaffey yesterday.

R. P. Bronson of Ishpeming was a Marquette visitor yesterday.

Russell Driver has returned home after spending his vacation in Indiana.

The members of the Ingeborg society will give a social Thursday night.

Mr. and Mrs. C. H. Moss, of Houghton, have spent the past few days in the city.

Dr. and Mrs. J. C. Anderson, of Grand Marais, are visiting with Marquette friends.

H. P. Stafford has been called to Omaha, Neb., on account of the serious illness of his brother.

Miss Josephine Finney will leave today for St. Paul, where she will visit Mr. and Mrs. G. A. Ashton.

Mrs. P. T. O'Brien, of Superior, returned to her home yesterday, after spending two weeks in Marquette.

Miss Eugenie Primeau returned yesterday from a visit in Duluth and a trip down the lakes on the steamer Sylvania.

The meeting of the Degree of Honor that was to have been held this afternoon has been postponed until tomorrow afternoon.

The meeting of the park, cemetery and street commission, which was to have been held yesterday afternoon, was postponed until Friday afternoon at 3:30.

A practice game of indoor baseball will be played at the Guild Hall this evening. A schedule game will be played with the Ishpeming Y. M. C. A. Friday, Sept. 17.

William Saunders, of Kearsarge, for many years a resident of Marquette, and remembered here as leader of a former Marquette band, has been visiting friends here this week.

Lovers of fine furs will be interested to know that Mrs. Isabel Riddell, with her showing of Albrecht furs will be at the Hotel Marquette on Sept. 10 and 11. Mrs. Riddell will be charmed to see all her old friends and as many new ones as possible on the dates mentioned.

Will Play Negaunee Elks—The Marquette Elks will play the Negaunee Elks at Union Park Saturday, instead of the Ishpeming Elks, as announced yesterday. The Negaunee Elks have already defeated their Ishpeming brethren and Saturday's game will be for the championship of Marquette county.

Would Be Great Race—Captain John Parker suggests an attraction for the county fair today that would certainly draw a crowd. He offers a prize of \$10 to the winner of a race between horses driven by Antoine Beaudry and Fred Babeck. Inasmuch as Beaudry's horse has a little the best of it, he suggests that he be handicapped fifty yards.

Made a Citizen—Thomas E. Collier, of Germfask, Schoolcraft county, was admitted to citizenship by Judge Knappen in federal court yesterday. Collier formerly lived in Ishpeming, where both of his witnesses reside, and the application for citizenship was made in federal court in order to obviate the necessity of the witnesses going to Schoolcraft county.

Died at Hospital—Mrs. Abia Smith, of Cleveland, died at St. Mary's hospital yesterday at the age of eighty-five. Mrs. Smith was a hay fever sufferer and had been coming to Marquette for many years during August, and last month was taken ill shortly after her arrival. Her daughter, Mrs. C. F. Shepard, of Chicago, was with her at the last, and accompanied the body to Cleveland last evening.

Argued Libel Case—F. L. Baldwin and A. H. Ryall of Escanaba were Marquette visitors yesterday. Mr. Ryall was up to argue the suit for damages for an alleged boycott brought by Mr. Baldwin, editor of the Escanaba Journal, against the Escanaba Saloon Men's association and a number of individual members, and appeared before Judge Stone for that purpose. Judge Stone will take the case under advisement.

Never Formally Presented—Speaking of the city lighting bill, which was a matter of controversy at the council meeting Tuesday night, Superintendent Retaille said yesterday that the light and power commission had never been formally notified of the resolution of the council, requesting that the charge be reduced from \$75 to \$60 per annum.

The resolution was inadvertently omitted in writing up the minutes of that council meeting, because of which the commission was never notified of its passage.

Free Baking School—Miss Louise Goggin, of Chicago, an exponent of the art of baking as taught by Mrs. Janet McKenzie Hill, of the Boston Cooking school, will give a course of lectures and serve appetizing dishes to the ladies of Marquette in the vacant store room in the opera house block Tuesday afternoon, Sept. 14, and each succeeding afternoon throughout the week. These lectures will be free and the lectures will be illustrated by a number of interesting baking tests. There will be no dread of baking day, says Miss Goggin, after seeing this expert work and receiving her helpful suggestions.

INSURE WITH PETER WHITE & CO.

A HURRY UP CALL

Quick! Mr. Druggist—Quick!—A box of Bucklen's Arnica Salve—Here's a quarter—For the love of Moses, hurry! Baby's burned himself, terribly—Johnnie cut his foot with the axe—Mamie's scalded—Pa can't walk from piles—Billie has boils—and my corns ache. She got it and soon cured all the family. It's the greatest healer on earth. Sold by The Stafford Drug Co.

**ANOTHER BIG DAY AT
THE COUNTY FAIR**

LARGE CROWD IN ATTENDANCE
YESTERDAY GOT MONEY'S
WORTH—MARQUETTE DAY
TODAY.

It is estimated that more than 3,000 people were on the fair grounds yesterday afternoon, which is a record third day attendance. While the baseball game was the attraction that drew the largest crowd, there was considerable interest in the racing and in the wrestling. The exhibits also were the subject of universal favorable comment. One of the big features today will be the stock parade, which will take place in front of the grandstand about 2:30. The premium tags will have been awarded by that time in all departments, and visitors to the fair today will have an opportunity to see who are the prize winners.

The 2:40 race yesterday proved the best of the fair, and six heats were necessary to decide the winner. After the third heat, Matt Aho, who was driving Molly M., was derailed by the judges for driving in front of the pole horse, which nearly caused an accident. The race was finally won by My Lady Dainty, Dr. Kaulhaus' mare, with Molly M., a good second.

Arto Letta, Lady Arkwood and Sam Treger entered in the special race, which took the place of the 2:20 race on the program. The race was won by Arto Letta, who won three out of four heats. The third heat was won by Lady Arkwood, who went right for the first time this week.

The summaries:
2:40 class—
My Lady Dainty, owner and driver Dr. Kaulhaus 3 1 3 1 3 1
Molly M., owner, Jack Jackson 1 2 2 3 1 3
Reuben G., owner and driver, Jeffrey 2 3 1 2 2 2
Special race—
Arto Letta, owner and driver, Jeffrey 1 1 2 1
Lady Arkwood, owner and driver, Huggen 3 3 1 3
Sam Treger, owner and driver, Payne 2 2 3 2

The races scheduled for today, which will start promptly at 1 o'clock, are the free-for-all, in which four horses are entered, and a special race, which will be trotted for the purse and side bet between the owners of several of the horses entering. This should insure some trotting that is square and above board. There will also be a running race.

The Cornish wrestling was finished yesterday and Win Penberthy was declared the winner, the final bout being between him and Sid Chapman.

The largest crowd of the week is expected at the fair grounds this afternoon, which will be Marquette Day. Practically all of the business places will be closed; also the L. S. & I. shops, the postoffice, the county offices and the public library. A baseball game between Ishpeming and Negaunee will be one of the great attractions.

TURKISH BATHS AND CHIROPODY
Frank Kough, 123 W. Ridge St., Marquette.

WRESTLERS DISSATISFIED.

Chapman Brothers Claim They Did Not Get a Square Deal.

The four Chapman brothers, none of whom got in on the big money in the Cornish wrestling at the county fair, declared last evening that they had not received a square deal from the referees, one of whom was Deputy Game Warden W. H. Harrington. They further stated that they are willing to back the claim of unfairness with a wager of \$200 that they will out-wrestle any other four contestants for the fair prizes at any time or place. In addition to this challenge, Jim Triggs, of Marquette, is willing to bet \$100 that Sid Chapman can throw Win Penberthy, who was declared the winner of the fair wrestling tournament.

The copper country wrestlers maintain that the judges showed favoritism to the Negaunee and Ishpeming wrestlers in every way possible. It was especially shown, they allege, in the awarding of falls. Several of the men thrown by the Chapman brothers, so they say, were not counted as falls by the judges, though their opponents were fairly and squarely downed.

In the final round between Penberthy and Sid Chapman, they declare that Chapman only touched the ground with his head and toes and that he was spinning all the time, yet it was declared a fall for Penberthy. The copper country wrestlers further declare that they will not again compete in a fair tournament until they are assured of fair play.

In case either of the challenges mentioned is accepted by the in-the-road wrestlers, the bout would doubtless be one that would attract great interest all over the peninsula.

THEATRICAL.

"The Blockhead"

W. B. Patton, who is starring in "The Blockhead" this year, delighted and amused a large audience at the opera house last evening. Mr. Patton has gathered about him a number of remarkably clever comedians and the female parts are also strong. Mr. Patton is a comedian of a peculiar type and his role this year affords him ample opportunity to display his rare talent. G. W. Solten, as the Yankee farmer, and Billy Champ, in the role of the Jew who had "a mighty fine father," never failed to produce a hearty laugh from the audience. Charles T. DeVecchio, as Captain Barnes, was strong. Lucile Gardner, as the captain's wife, and Phyllis JekKay, as his daughter, had many of the best parts, as it is about them that the plot is woven, but they acquitted themselves to advantage. Elizabeth Brewer, in the semi-comedy role of the Puritan survivor of three husbands, entirely willing to take on a fourth, was exceptionally good.

Breton Port and Brandy and Chase's Kentucky Whiskey are pure goods, and sold always by The Stafford Drug Co. (5-7-tf)

The cattle at Vandenberg's dairy are now being fed on green-corn in addition to other nutritious foods. All milk is aerated, cooled, bottled and delivered packed in ice. This accounts for the excellent quality and delicious flavor of the goods. (8-27-1mo)

THE STORE OF QUALITY
"The Kensington"—something new in Hats, made by Ward & Co., London, will certainly please you.

**Your Shirts
Laundered
Perfectly.**

If you wear negligee shirts—let us show you how well those garments can be laundered.

We wash the shirt, if colored, without fading it. We starch the garment in just the right places, and to the right stiffness.

We iron the shirt front straight and even, with each plait in place, smooth and nicely finished. We iron the cuffs so they are firm and stiff, shape them to fit your wrist, and smooth the edges.

You'll enjoy wearing the shirts we launder—they'll look and feel so much better.

For Folks Who Save

There will be a pleasing distribution of dividends on September 1st. These dividends take the form of accrued interest on savings deposits and are paid by all savings banks—on the basis of three per cent per annum. This bank will itself pay out to its savings depositors a number of thousand dollars in interest and we hope that you, reader, will enjoy your share in the distribution. If you don't, will the fault be yours or ours? On every dollar which you deposit in our Savings Department we will allow you compound interest at 3 per cent—payable September and March 1st. You ought to save at least 10 per cent of your earnings.

If you make a deposit now, or before September 5th, and leave it in the bank until March 1st, it will be entitled to six months' interest at that time. Deposit by mail, if more convenient.

FREE BAKING SCHOOL.

Noted Chicago Woman Coming Here to Explain It in Detail.

Miss Louise Goggin Will Lecture on Domestic Economy and Serve Appetizing Dishes in Vacant Store Opera House Block, Tuesday, Sept. 14.

To the ladies of Marquette is extended a cordial invitation to meet Miss Louise Goggin of Chicago and listen to her lectures on the "Science of Domestic Economy." Miss Louise Goggin illustrates her lectures with interesting baking tests which are certain to interest and instruct you. There will be no dread of lake day after seeing this expert work and receive her helpful suggestions. Miss Goggin is an exponent of the art of baking as taught by Mrs. Janet McKenzie Hill of the widely famed Boston cooking school and has many new and practical ideas that you are sure to find helpful. These lectures are free, there is no charge whatever. Factors of hotel house baking will be served to all who attend but from the oven, while you wait. Chans will be

placed so you may sit in comfort during these talks and demonstrations. Classes begin promptly at 2 p. m. Tuesday, Sept. 14th, and on each succeeding afternoon throughout the week. Miss Goggin uses the well-known K. C. Baking Powder in her work. She thinks it superior to others for reasons she will explain. The following dainties will be baked and served at Tuesday's class: Ribbon cake, date muffins, tea cakes and peanut cookies. Don't miss attending the free baking school. Representatives of the K. C. Baking Powder will call at your home and tell you of its great merit. Ask them to show you the Janet McKenzie Hill "Cook Book." It contains the finest collections of choice recipes ever compiled. It is beautifully illustrated.

GOLD MEDAL FLOUR

NEGAUNEE WON BY OUTPLAYING RIVALS

MARQUETTE YAS UNABLE TO HIT STEINLE, AND THE IRON CITY TEAM WON, TWO TO ONE.

Negaunee played better ball than Marquette in the second game of the fair series yesterday. Marquette had hopes of taking the big end of the \$400 purse by defeating it by a score of 2 to 1. There can be no quarrel about Negaunee's victory, for Steinle outpitched Scholtus, the Negaunee team out-hit the home players and Negaunee also played a better fielding game than their opponents.

In the early part of the game Scholtus, who perhaps was suffering from lameness because of having been compelled to finish against Ishpeming Tuesday, was hit easily by the visitors, who got eight singles, one a two-bagger, in five innings. Marquette was not entirely out of luck, or they would have scored more than two runs on such free hitting. After the fifth Scholtus began to get into his true form, and the Negaunee batters were retired in one, two, three or four.

Steinle, for Negaunee, pitched an excellent game, being steady throughout and being particularly effective when Marquette threatened trouble, as it did on at least three occasions.

Young was injured.

Marquette had the little end of the luck of the game throughout, and things began breaking against it in the first inning. Young waited on Steinle, who had trouble locating the plate, and finally walked the latter. Weiser dropped a little hit to Steinle, who clipped the ball to first, while Young was beating it to second. He made the base safely enough, but a foul ball hit his ankle in the bad footing around the base, and he was out of the sack, comparatively helpless, to be put out. Not only did this accident prevent Marquette from having a man at second with no one out, but it prevented Young from playing his usual game and making a shake-up of the team in the fifth inning. Had Young not sustained this injury the outcome of the game might have been different, for he has been hitting consistently of late.

Negaunee did all her scoring in the second inning. Swick started the attack with a clean two-base hit into left field. Loel reached first on an error by Maek. McCroy sacrificed with a hit that was fielded by Dunlavey to Scholtus at first. Cullis hit Maek who, in keeping an eye on Swick, who was headed for home, failed to throw the ball cleanly enough to catch him at the plate, and had to be content with putting Cullis out. Loel was scored by a clean hit by Roberts.

Negaunee looked dangerous again in the fourth, when, with two men gone, Roberts and Steinle got hits, but Scholtus fanned Fodder, in the fifth Rambo struck out. Messier got a hit, but was at once caught leading off first by Scholtus. Swick and Loel followed with hits, but again Scholtus proved equal to the emergency by striking out McCroy. After that Negaunee struck three men to an inning, the only other hit of Scholtus being garnered by Roberts in the ninth, only to fall into a double play by Weiser and Dunlavey.

MEETING OF SUPERVISORS.

Highways and Bridge Matters Chief Business of Session.

Nothing of particular general importance came up at the meeting of the city board yesterday, but several small amounts were voted to townships for bridge purposes. At the previous meeting, citizens of Powell township asked that the county pay half of the cost of building a bridge across the Yellow Dog river, on the Marquette-Big Bay road now being constructed. The supervisors voted \$800 for that purpose. The petition of citizens of Richmond township was disposed of by allowing \$100 for the improvement of the Princeton road. The supervisors also agreed to spend all of last year's \$30,000 appropriation for highways on the Harvey-Green Garden and Humboldt-Republic roads. The petition from Forsyth township asking for \$1,000 to build a bridge across the Escanaba river on the Pinecon-Gwin road, was referred to the committee on highways and bridges for a report at the next meeting.

A petition was received from residents of Spring street, Marquette, asking that the thoroughfare be widened to the lot between Third and Fourth streets, north of the court house. The petition stated that both convenience and appearances demanded a wider street. This petition was referred to the committee on highways and bridges.

The annual meeting of the board, at which the rate will be fixed, will be held the second Monday in October and it was decided to come together at 9 o'clock that morning in order to get the business done before the departure of the afternoon trains.

MARKETS.

NEW YORK STOCKS.

Paine, Webber & Co.'s correspondent at New York yesterday telegraphed as follows:

"The market continued under the influence of the Harriman issues, which, however, are not so strong as they were. The reports circulating regarding the Eastern situation, and the fact that the market is not so strong as it was, have resulted in a fair degree of strength the greater part of the session. The government report was made public fifteen minutes before the market closed. It brought out a general demand and caused a fair advance in all the deliveries. The market closed strong, almost at the top. The December opened at 94 1/2@94 3/4; highest, 95 1/2; lowest, 94 1/2@94 3/4; closing, 95@95 1/2.

Corn—The expectation of a bullish showing by the government report on the new crop of corn caused a rise early, but later a weak tone developed, owing to the slump in cash prices, due to the greatly increased receipts and the slackening Eastern demand. Following the publication of the government report the market advanced more than one cent in all deliveries. The close was strong and only a trifle below the best figures of the day. The December opened at 77 1/2@77 3/4; highest, 78 1/2; lowest, 77 1/2@77 3/4; closing, 78 1/2@78 3/4.

Oats—The trade was exceedingly dull. The prices were inclined to follow the trend of wheat and corn. The government report was entirely disregarded. The market was quiet and the wheat crop would be one of the largest ever harvested. The close was firm, 1/2 to 3/4 higher. The December opened at 37 1/2@37 3/4; highest, 38 1/2@38 3/4; lowest, 37 1/2@37 3/4; closing, 38 1/2@38 3/4.

CHICAGO GRAIN MARKETS.

Chicago, Sept. 8.—The government report had little effect on wheat today, and the prices at the close showed gains of 3/4 to 1/2. It was expected that the government report would be extremely bullish on corn and would show a slight deterioration in the condition of spring wheat. This tended to create some anxiety among general demand and caused a fair advance in all the deliveries. The market closed strong, almost at the top. The December opened at 94 1/2@94 3/4; highest, 95 1/2; lowest, 94 1/2@94 3/4; closing, 95@95 1/2.

PAINE, WEBBER & CO.'S WHEAT SUMMARY.

Paine, Webber & Co.'s Chicago correspondent said yesterday concerning the wheat market:

"As usual, the Washington crop report demoralized all the grain markets just at the close. The figures were a surprise to the trade in both wheat and corn. The lowering of the spring wheat condition has retarded time and the phenomenal strength in corn gave the market a sharp upward turn in a few minutes time. December was advanced about one cent from the low price of the day. The trade for the greater part of the session was dull. The wheat market was the cash premiums at Minneapolis. This was offset by reports from the Northwest that the farmers are following Jim Hill's advice and holding their wheat. The influences are conflicting, but the official reduction in the spring crop at harvest will naturally have a bullish effect."

NARES CENSURES COOK.

Assets That He Used Eskimos Which Peary Had Trained for Himself.

London, Sept. 8.—Admiral Sir George Nares, who, though it has been more than thirty years since he commanded the expedition which won for him the founders medal of the Royal Geographical society, has kept thoroughly acquainted with later polar exploration, says in a special interview accorded to the Daily Mail correspondent:

"There are a great many things which require explanation in the story of the discovery of the North pole told by Dr. Cook. As the story stands it tells us nothing except that he went on to the pole. He says nothing about his health. As suggested, have turned back at once and imagined the rest of the journey. Such a thing has been done before in Arctic exploration. When we went up we proved that many statements made by a previous explorer were untrue.

"This is so much that Dr. Cook might have told us and has not. Beyond a certain point there is nothing in his message which might not have been cooked up. He should certainly have given the world more details about the ice at the pole, its surface and character. He says nothing about his health. As we to assume that he was in perfect health all the time? If he was not he could not have made the journey in the time he gives. If he was, he had exceptional luck, especially in view of the temperatures he encountered. Poor Peary lost toes by frost, you will remember."

"The rate at which Dr. Cook says he travelled is the weakest point in the

U. S. FORESTRY BUREAU DOING VALUABLE WORK.

Trained Men Now Looking After 200,000,000 Acres of National Timber Lands.

THIS SUPERVISION TIMELY.

Forests of the Country Are Being Cut Three Times Faster Than They Are Growing. It Is Estimated—Contrast With Ratio Abroad Is Striking—What Is Being Done in Germany.

Washington, Sept. 6.—Officials of the forestry service, while regretting the controversy between Secretary Ballinger of the interior department and Gifford Pinchot, chief forester, over the question of conservation, say that the controversy will not be without good results. It will rivet public attention on the great work the service has done, and is doing, in preventing the wanton waste of the great forests of the west, and in preserving them for generations to come. The work of conserving the national forests was only begun a few years ago, and it was brought about, it is said, by a report from Germany showing that that country was doing to preserve her forests, which had suffered through neglect. This report attracted the attention of Secretary Wilson of the agricultural department, who took up the subject with President Roosevelt, with the result that the president became enthusiastic, and at once added forest conservation to his list of policies. It appeared with much force to the people, and the next in particular.

Our Forestry Area.

Since the outbreak of the Ballinger-Pinchot dispute the correspondence of the agricultural department has more than tripled, nearly a third of the correspondence relating to information relating to the national forests. It is stated that the total yearly drain upon the forests, not counting losses from fires, storms and insects, is some twenty billion cubic feet. The present forest area of 530,000,000 acres may be roughly estimated to consist of 200,000,000 acres of mature forests, in which the annual growth is balanced by death and decay; 250,000,000 acres partially cut or burned over, on which, with reasonable care, there is sufficient young growth to produce in the course of time a merchantable, but not a full crop of timber; and 100,000,000 acres or more severely cut and burned over forests, on which there is not sufficient young growth to produce another crop of much value. Taken

as a whole, the annual growth of the forests under these conditions does not exceed twelve cubic feet per acre, a total of less than 7,000,000,000 cubic feet.

R. S. Kellogg, assistant forester, in charge of the office of forest statistics, speaking on the subject said today:

Three Times as Fast as They Grow.

"We are cutting our forests three times as fast as they are growing. There is menace in the continuance of such conditions. While we might never reach absolute timber exhaustion, the unrestricted exploitation of our forests in the past has already had serious effects, and it will have much more if it is allowed to continue unchecked."

Mr. Kellogg called attention to white pine, which, he said, once considered inexhaustible, had fallen off 70 per cent in cuts since 1890, and more than 45 per cent since 1900. The cut of oak, he said, which produced our most valuable hardwood lumber had decreased 1 per cent since 1900, and that of yellow poplar 22 per cent. The same story, he added would be told of other woods if they were not conserved.

"The fact that timber has been cheap and abundant," said Mr. Kellogg, "has made us careless of its production and reckless in its use. We take 250 cubic feet of wood per capita annually from our forests, while Germany uses only thirty-seven cubic feet, and France but twenty-five. Germany, having learned her lesson, makes her state forests produce an average of forty-eight cubic feet of wood per acre. We have as fast growing species as Germany, or faster, and as good, or better, forest soil if we protect it."

"The necessity for more forest land may eventually reduce our total forest area to 100,000,000 acres less than it is at present. It is entirely possible, however, to produce on 450,000,000 acres as much wood as a population much greater than we have now will need if all the forest land is brought to its highest producing capacity, and if the product is economically and completely utilized. But to reach the necessary equilibrium between timber production and consumption, it will take many years of vigorous effort by individual forest owners, by the states, and by the national government. All must work together."

Work the Bureau Is Doing.

No bureau of the government has developed so rapidly as that of forestry. From an appropriation of \$25,000 annually, it has grown to such proportions that it now requires \$6,000,000 a year to pay its expenses. And the friends and advocates of forest conservation say it is worth every cent expended. To give an idea of the work of the forestry bureau, it may be said that trained foresters are employed to look after 194,500,000 acres

of national forest land, and this vast territory is in charge of a forest supervisor. These forests are in the western country, which is divided into six forest districts, each in charge of a district forester. Every employe connected with the forestry service is experienced in raising and caring for young trees. The lumbermen who estimate timber helps to plan logging operations, and sees that the scaling is correctly done, and that the rules of logging are properly observed, is an experienced and capable woodsman.

Another important employe is the forest ranger. His duties require a careful patrol of the forest to see that fire and trespass are prevented; that the range is not overgrazed; that logging regulations are enforced, and that privileges granted by permit for the use of the various forest resources are not abused. He is generally a hard-headed, practical, thoroughly honest and an able-bodied citizen of the west, with plenty of experience in all the problems with which he may have to deal.

YOUR PICTURE WITH TAFT'S

If you want your picture taken with President Taft come to Washington. It's a sure thing proposition. Whether the biggest man of the nation is at Beverly or Italy, it's all the same thing. For the nominal price of half a dollar or a bagatelle of that sort you can go thundering down to posterity on a piece of pasted-on clasp hands with the king of America or locking arms with his far as the President goes, it is absent treatment, pictorially speaking. All you've got to be particular about is to be on hand your own self. Way down "the Avenue" close to the Capitol, an obscure little photographer's shop floats on its front a drapery of white cloth bearing blantly the black legend: "Come in and have your picture taken with President Taft." The trick is turned of course by the simple method of imposing the customer's figure beside the stock plates of President Taft with outstretched hand, as if in greeting, or in a friendly arm and arm pose. The illusion, however, is very good, and the perpetrator has been making money ever since the inauguration, when post-card fakers filled the streets with similar enticements. The Capitol or White House looms convincingly in the background, and in the forefront there you are in the presidential grip and under the radiance of the presidential smile. Of course your friends in Wayback believe they have a real demonstration that you are the whole show when you come to Washington!

The sneeze is a sign of good health. Consumptives, paralytics and cardiac sufferers never sneeze.

Negaunee Department

LOADS 126 CARS OF ORE IN TEN HOURS

CREW EMPLOYED AT HARTFORD MINE DID AN EXCEPTIONALLY BIG DAY'S WORK MONDAY, WITH ONE OF THE OLD MODEL STEAM SHOVELS.

Ted Gaffney, operator of the Oliver Iron Mining company's steam shovel at the Hartford mine, made a fine record Monday, when he loaded eighty-three of the Chicago & Northwestern Railway company's large cars and forty-three of the smaller cars. The large cars have a capacity of about forty tons, the others thirty. Over 4,000 tons were loaded in ten hours. The number of cars of the sizes mentioned this is a new record here for a single day's work. If Mr. Gaffney had been loading sixty-ton cars it is possible that he would have made a record in the tonnage loaded, as his shovel was working finely. The shovel is one of the oldest on the range. In view of the fact his record is a new remarkable.

The ore movement continues at a lively rate, and it is believed a new record for this range will be established this month. One of the railway yard superintendents yesterday said that at no previous time during the many years he has been employed on his present job he has never seen the ore move at such a rapid rate. All of the railway management are exerting themselves to keep the mines supplied with cars and some are actually loaning cars to the mine. From 800 to 1,000 cars of ore are being received daily from the Marquette and Menominee ranges at the Escanaba docks. This, the railroad man declared, represents the largest daily tonnage that has ever been received at that port. The boats are coming in rapidly, and, as a rule, are loaded and ready to pull out again a very short time after their arrival.

The mining companies are not making any complaints at this time on account of the shortage of cars. The cars are being as evenly distributed as possible. Nearly twice as many cars as are now available could be used to advantage, but the shortage is not delaying the boats to any extent. There has not been a time in the past two months when the docks have been crowded to the extent that the car movement was retarded.

There will be very little ore remaining in stock at the close of the shipping season, as the shovels are making rapid inroads into all of the larger piles. Practically all of the ore being hoisted from the mines is going out as fast as it is raised to surface.

Foreigners Said to Be Killing Fish in Bass Lake, South of Here.

The Mining Journal was informed yesterday by a resident of the Little Lake district that foreigners in that region are blasting the fish in Bass Lake. He said that while in that vicinity Monday he heard two explosions of dynamite and saw three foreigners making off to the woods after the blast was fired. He assumes that they ran away to hide and that they later gathered in the fish. Some of the homesteaders and others in the vicinity have been stocking Bass lake, Little Lake and Meno lake for the past six or seven years and there is now good fishing in all of them. The bass that were planted there five or six years ago are now from two to four pounds in weight and are plentiful enough to provide excellent fishing.

FALL EXCURSIONS.

The South Shore management has announced its fourth annual fall excursion on Monday with the Detroit & Cleveland Navigation company's steamers, the Cheboygan, Alpena, Harbor Beach, Port Huron, Detroit, Toledo, Cleveland and Buffalo. The steamers will sail from S. Ignace on Thursday, the 16th; Saturday, the 18th; Monday, the 20th, and Tuesday, the 22d. The round trip rate from Negaunee and Ishpeming will be \$7.50 and from Marquette, \$7. To Toledo an extra fifty cents will be charged, and to Cleveland the rate from here will be \$10. Tickets will be on sale for the early morning trains on Sept. 16, 18, 20 and 22.

MAKING A GOOD RECORD.

The Buffalo baseball team of Negaunee has won many games this season. The nine is composed of fast players, some of whom may next season be considered fast enough for places on the league team. The nine has defeated the principal amateur teams in the three cities. Last Sunday they took the Cherry Street nine of this city into camp, by a score of 7 to 2, and on Monday morning they defeated the Ishpeming Seters, 5 to 2.

GOOD ATTRACTION TONIGHT.

W. B. Patton, who will be seen at McDonald's opera house tonight in "The Blockhead," is an actor of more than ordinary ability. It is said that he does exceptionally pleasing work in "The Blockhead." The play is a high-class one and the management has provided some beautiful scenic effects for it. Mr. Patton will be seen in the role of "Professor Theodore Blockson Hedington," an original creation.

The Negaunee Greenhouses have for sale fine sweet corn, tomatoes, crab apples, also cooking apples. To be sold at reasonable prices. Orders should be placed at the Greenhouses. 9-9-11

THE SOUTH SHORE ROAD.

Have announced low excursion rates to Marquette for the County Fair, Sept. 6th to 9th. Apply to station agents for particulars. (9-2-6)

BOTH BOYS SAVED.

Louis Boon, a leading merchant of Norway, Mich., writes: "Three bottles of Foley's Honey and Tar absolutely cured my boy of a severe cough, and a neighbor's boy, who was so ill with a cold that the doctors gave him up, was cured by taking Foley's Honey and Tar. Nothing else is as safe and certain in results. Sold by all Druggists."

BERRIES STILL GOOD.

Shipments From Points Along South Shore Line Are Fairly Heavy.

The heavy frosts during the past week did not injure the blueberries on the lake shore, east of Marquette, and shipments from there are now almost as heavy as they were two or three weeks ago. The berries are of excellent quality, being large and firm, and it is expected that the pickers will find the work profitable for at least two or three weeks yet. Tuesday 240 cases were transferred here, and the average daily shipments during the past week have been between 200 and 250 cases. The frost has affected the crop considerably on the plains south of here, along the Chicago & Northwestern line, and there are not as many pickers there now as there were ten days ago. The berries are being gathered some distance from the track, in the heavy timbered country. A picker up from there this week said that there would be berries in that region for nearly a month yet, provided they are not killed by the frost, as there are many green ones in sight. Most of the pickers in that district have made good money this year, as the berries have been plentiful, and the price has held up fairly well. At the present time they are receiving from \$2 to \$2.50 per bushel, according to quality, and it is said that a good picker has no trouble gathering more than a bushel a day.

The pickers are still at work north of Ishpeming also in the Sibley and Birch districts. Practically all of the berries gathered at these three points are being bought by J. Ewald, whose headquarters are at Ishpeming.

LOCAL LACONICS.

Janus Jacobson is spending a week of ten days in Chicago.

S. R. Elliot and Carl Brewer arrived home Tuesday, after an outing.

A bush fire in the woods northeast of Gwin is causing some alarm in that vicinity.

The employees of the Negaunee, Maas and Jackson mines will be paid next Wednesday for last month's work.

Miss Margaret Holland and Ward McCutcheon have returned to Chicago, after a visit with A. H. Knight and family.

Michael Curley, who holds a responsible position with the Oliver Iron Mining company at Coleraine, is here on a visit to his folks.

Mr. and Mrs. William Webb, who accompanied the remains of her father, the late Patrick Webb, to the Mesaba range, departed for their home at Marquette Tuesday night.

Henry Lavigne, who is employed in steam shovel work on the Mesaba range is here for a visit to his parents. He is suffering from an injury to his hand, and was obliged to lay off.

Tefer Barasa has the contract for the plumbing of the superintendent's dwelling, being erected by the Cleveland, Cliff Iron company at its North Lake property. L. E. Chaussee is erecting the dwelling.

Loell who has been catching this season for the Escanaba team, joined the Negaunee mine here yesterday. He and Sibley will probably be the batters in the game with Ishpeming today at the county fair.

A. C. Seass and family are up from their homestead, near Little Lake. Mrs. Seass and children will remain in the city, but Mr. Seass expects to spend considerable time at the homestead during the next two or three months.

Negaunee was largely represented at the county fair yesterday. About 200 went down by train, and a large number made the trip in automobiles and carriages. Ishpeming was represented yesterday by about 300, but it is expected that larger crowds will turn out from both cities today.

The funeral of the late Mrs. Patrick Langan, who died Sunday night at Marquette, will be held this morning from St. Paul's church. Matthew Maloney, a brother of the deceased, who has been assisting his sons and daughters on the Mesaba range the last two or three weeks, arrived home yesterday.

Mrs. C. B. Skiff and son arrived here today to join her husband, who is the moving picture machine operator at the Bijou Theater. About a week ago their home at Reed City, Mich., was burned out, and they lost all of their household goods as well as the greater part of their clothing.

A COUNTY OF A THOUSAND KEYS

Monroe county is the most unique county in the state, if not in the United States. The larger portion of the county is made up of a group of islands, or as they are called, keys, both on the east and west coasts. The only part of Monroe county on the mainland is the Cape Sable county, the extreme south end of the United States on the mainland. The larger portion of this land is what is known as the Everglades, and but a limited number of acres are now under cultivation. What effect the proposed drainage of the Everglades will have in Monroe county is not known, but it is doubtful if any large areas will be drained because of the flatness of the country and being so near sea level. In the vicinity of Cape Sable there are large bodies of rich alluvial land and a considerable quantity has been under cultivation for several years past. All kinds of tropical and semi-tropical fruit trees grow luxuriantly on the keys and bear full crops of fruit each year. Every key is surrounded with water and the great portion of them have clean white sand beaches with hills, varying in height above high water mark. All of these building sites are in full view of either the ocean, gulf or bays.—Jacksonville Times-Union.

GET WITHIN

Piles Can't Be Cured From the Outside. External treatment won't cure piles. Nor will surgical operations. The cause is internal—bad circulation. To cure piles you must free the circulation of blood in the lower bowel.

Dr. Leonard's Hem-Roid is the only internal tablet remedy for piles. It relieves the cause. \$1 at The People's Pharmacy, Marquette, Mich. City Drug Store, Ishpeming, Mich. Guaranteed to cure any case. Dr. Leonard Co., Station B, Buffalo, N. Y., proprietors. Write for booklet.

Negaunee State Bank

will soon be READY FOR BUSINESS

IN THE Old Bank Building

CENTRAL BANK OPPOSED.

The West Is Said to Want No Such Institution.

Washington, Sept. 8.—An interesting light on the opposition from the West which will confront the monetary commission's central bank plan is shed here in an interview by Charles Helm, a prominent citizen and business man of Topeka, Kas. "When the monetary commission makes its report to the next congress, if it contains any scheme for a central bank of issue which would do away with the present system of bond-secured currency, it will be bitterly fought by the West," declared Mr. Helm. "The West wants no such financial institution. Kansas banks are opposed to any such scheme. During the last panic banks in the West could not get their deposits on demand from Eastern financial institutions, where they had billions on deposit and which they needed badly when the panic pinched tightest. The 1907 panic will have a great deal to do with the opposition to a central bank, such as is said to be contemplated by the monetary commission. The Western bankers are going to contend that if a big central bank is established it will be sure to be controlled by a few of the great and powerful New York institutions, and that smaller banks, especially those in the West, will consequently be at a disadvantage. "There is another objection to such a central bank. If the institution, which would be a bank of issue, has unlimited power to issue notes on the bonds of the United States in the West are convinced that this also would be an evil. There are now more than \$700,000,000 of two per cent United States bonds outstanding. If these bonds were made not available for circulation their value would at once become depreciated. There has been talk of an extra session of congress being called to consider the money question, but in the West we hope that President Taft will not call it. Let money reform, if we have to have it, be taken up at the regular session."

Dr. Abernethy, the great English physician, said, "Watch your kidneys. When they are affected, life is in danger."

Foley's Kidney Remedy makes healthy kidneys, corrects urinary irregularities, and tones up the whole system. Sold by all Druggists.

REMARKABLE EXHIBITION

Don't Neglect Visiting Shea's Hall Where the Free Baking School Is in Session from 2 to 5 Each Afternoon.

The most remarkable exhibition of baking continues at the free baking school. Hundreds of women have experienced the greater delight at witnessing the illustrations by Miss Goggin in her instruction on easy and successful baking. There will be no fatigue on bake day if you apply the methods taught by this truly clever woman. The Janet McKenzie Hill "Cook's Book" contains many suggestions on how you will find of help to you in securing results, in baking so superior that you will value it more than you now think possible. Miss Goggin shows in her work its great practical value and if you have it with you when you attend the baking school and follow in the work as it is illustrated by this expert, you will appreciate its worth to you by bringing the certificate from the 25¢ can of K. C. Baking Powder and get the "Cook's Book" and find from it how the most delicious and appetizing dainties are made. At Thursday's class there will be made and served the following goodies. They will delight you: Pineapple cake, beet roll, baking powder white bread, and tarts-muffins. Ladies requested to bring their forks for sampling beet roll. K. C. Baking Powder will convince you of its superiority if you try it. It is guaranteed under all Pure Food Laws, both state and national, and if you don't like it better than any you have ever tried, your money will be refunded.

Make Your Advertising Agent Win His Way

Each of the two dominant men in our agency started in here at \$10 per week. The chief of our Copy Staff started in advertising at \$40 per month. His salary is now \$1,000 per week. All our highly-paid men have won their way here, against all competition, by the sheer force of results. Each has advanced over hundreds of others by proving his power to outsell them. We make no contracts with men. Each must yield his place the moment a better man shows up. Nor do we set any limits to what men can earn. That depends on their power to sell goods. Thus we keep men on their mettle. Thus we give them incentive. Thus we lead them to fear defeat. To this sink-or-swim policy is due our success, and the success of our hundreds of clients. The doctrine we practice is the doctrine we preach. Make your helpers win their way. Give to no agent a cinch on your advertising. Sign no long-time contract. Commit yourself to no certain expenditure. Let the results decide that. Give your advertising to the agent who proves his power to outsell all the rest.

LORD & THOMAS NEWSPAPER, MAGAZINE AND OUTDOOR ADVERTISING CHICAGO TRADE BUILDING 47 WABASH AVE. Address either office. They are equally equipped

HIGGINS ON TRIAL FOR EMBEZZLEMENT

GOVERNMENT CALLED BUT THREE WITNESSES, BUT DEFENSE HAS TWENTY OR MORE.

WERE WOUNDS SELF-INFLICTED?

From the Evidence Adduced Thus Far, the Jury's Answer to This Question Will Decide Defendant's Fate.

The trial of Frank L. Higgins, charged with embezzlement of postoffice funds at Sault Ste. Marie, amounting to between \$2,400 and \$2,500, was on in federal court yesterday and will in all probability not go to the jury before late this afternoon at the earliest.

The government put but three witnesses on the stand and then closed their case, and the defense opened early yesterday forenoon. The witnesses called by the government were Postmaster C. H. Scott, Postoffice Inspector Walter Cookson and C. H. Clawson, a clerk in the Soo postoffice. Through these witnesses the government simply tried to prove that Assistant Postmaster Higgins was short in his accounts and that the funds had not been deposited in a national bank, as is required by law.

Attorney H. M. Orrin, of the Soo, in opening the case for the defense, made a lengthy statement of their side of the case, which briefly summarized was as follows: Higgins was attacked and rendered unconscious by two robbers on the night of Dec. 13, which was Sunday, who gained access to the postoffice by slaking the rear door (as was the custom of employees) and then asking for their mail, stating that they were going away early in the morning. One of the robbers used the name of Robinson and three letters were handed them by Mr. Higgins through the wire door. They said the letters were not theirs and then broke through the door and overpowered Mr. Higgins. This was about 8 o'clock in the evening and the robbers fled about 10:30. He started out into the street but fell on the sidewalk, where he was found by a patrolman. He was taken back to the postoffice in a condition of stupor and later taken to the hospital, where he remained about a week. Upon the arrival of the robbers at the postoffice, the safe was found open and its contents rifled. Higgins could give no account of what had happened until 4 o'clock in the morning. Persons on the street saw two men watching Higgins through the postoffice window early in the evening and others later saw persons running away from the building. To have a large amount of cash on hand Saturday night and Sunday was nothing unusual, said Mr. Orrin, as the bank was closed in the afternoon.

Postmaster the First Witness.

The first witness called by Mr. Orrin, who is being assisted in the trial by John M. Shine, was Postmaster Scott. Mr. Scott related that he had been called to the postoffice by telephone about 11 o'clock on the night of the 13th, and found the money boxes, pay envelopes, etc., in the money order department lying about in disorder and the safe open. Higgins was sitting bent over in a chair, but would not answer questions put to him. During the night he visited Higgins three times at the hospital, but not until the third visit did Higgins give an account of what had happened. When Mr. Orrin outlined the defense, he said that Marcus Hazen, who was in charge of the canal sub-station, was in the habit of calling at the postoffice for mail in the evening during the navigation season, and that that Higgins thought it was Hazen who was rapping and shaking the door. The witness stated that Hazen was in charge of the canal station, but that he did not go to the postoffice Sunday nights to his knowledge. Mr. Scott testified that Dr. Dickinson said to him at the postoffice that night before Higgins had been taken to the hospital, "Do you have any reason to suspect this man?" Mr. Scott's reply was "No."

Police Officers Testify.

The next witnesses called were Patrolman Roberts and Bryce and Police Captain Coulter, all of whom were at the postoffice shortly after the alleged robbery. Officer Roberts said he heard a door slam about 8 o'clock that night and saw three men step out from near the postoffice door, but thought they came from the club rooms on the second floor of the building. At 10:35 he saw a man come out of the postoffice coatless and hatless, who fell to the sidewalk after staggering for twenty feet. He found it to be Higgins and he had a shade over his eyes. He put Higgins on a chair in the postoffice, but he went forward on the floor, and the only words that he said in the witness' hearing were "They hit me on the head." He saw no blood on Higgins but there was some on the floor of the postoffice, just inside the wire door. He was able to walk to the ambulance, assisted by a man on each side of him.

TWO "TRUSTIES" ESCAPED.

Two prisoners escaped from the branch prison yesterday afternoon, while at work handling lumber outside the prison walls. It is considered quite remarkable that either of them should try to escape, as one of them, George E. Conklin, would have served his full term and been released today, and the other, Earl Brownell, would have been a free man Nov. 1. Conklin knew that his time would be up today.

Grand Jury Not in Session.

The grand jury adjourned early yesterday for some reason or other but will convene again this morning. No report has yet been made on the Ironwood bank cases, and it is rumored that the absence of certain of the bank's books was the reason for adjournment yesterday.

Took French Leave While Working Outside Prison Walls.

Two prisoners escaped from the branch prison yesterday afternoon, while at work handling lumber outside the prison walls. It is considered quite remarkable that either of them should try to escape, as one of them, George E. Conklin, would have served his full term and been released today, and the other, Earl Brownell, would have been a free man Nov. 1. Conklin knew that his time would be up today.

Conklin is Thirty-nine Years of Age.

Conklin is thirty-nine years of age, five feet, seven inches tall, weighs 142 pounds, has blue eyes and chestnut hair, a deformed nail on the third finger of his left hand, is badly pitted with smallpox and wears a light mustache. He had been sent to the prison from Delta county.

Brownell, alias C. E. Morris, is thirty-nine years of age, six feet and one-fourth inch tall, round shouldered, weighs 152 pounds, has greenish blue eyes, a very large nose, pointed chin, and his left index finger has been amputated at the third joint. He came to the prison from Benton Harbor. A reward of \$25 will be paid for the apprehension of either of these men.

NOTICE.

This is to notify the public that I will not be responsible for debts contracted by my wife, she having left my bed and board.

JOSEPH THONEY. (9-9-09)

DRY HARDWOOD.

Two dollars per cord in two-cord lots (2-13-14) F. B. SPEAR & SONS.

SAW MEN NEAR POSTOFFICE.

Agnes Muron, a cook in the employ of a Soo man, testified that she was walking with her cousin, Adie, LeBlanc, on the evening of the alleged robbery and had seen Higgins go to the postoffice about 7:15 p. m. Twenty minutes later she and her cousin returned to the postoffice corner, where they stayed for about twenty minutes. They saw two men in front of the postoffice, one of whom went in and out of the storm door three times and the other remained outside watching Higgins through the window, where he had money on the desk. They went over and stood beside the man in front of the office, whom the witness said was short and heavy set, while the man in the storm door was tall and dark. The tall man wore a large slouch hat, a heavy jacket and heavy shoes or boots. The other was rather fair, had a pug nose and she noticed he wore a gray overcoat. Both looked like lumberjacks. She had seen the shorter one in front of the postoffice the previous night.

District Attorney Covell put Miss Muron through a grilling cross-examination, but did not materially shake her direct testimony. She said that she first told the Kempt about the men in front of the postoffice, whom she said, talked to the description of Mr. Higgins' assailants, as given by the newspapers. She said that she looked about the postoffice corner nearly every Sunday night and that she did not talk with Higgins until the night before his arrest.

Higgins at the Hospital.

Miss Rose Thomas and Miss Ethel Howell, nurses at the hospital to which Higgins was taken, were next called. The line of questioning adopted by Mr. Orrin indicated an endeavor to prove that Higgins' injuries were real and not feigned and District Attorney sought to belittle them in cross-examination. Miss Thomas, the head nurse, noticed a small abrasion on top of Higgins' head and another bruise, and a slight mark near the mouth. The day following his arrival at the hospital Higgins complained of pains in his back, and an examination revealed three small punctures in the skin. The vest and shirt which Higgins wore had holes corresponding to the wounds in his back and were offered in evidence. Miss Howell, the nurse in charge of Higgins, said that his temperature was not far from normal during his stay in the hospital and the temperature and pulse chart kept by her was admitted as evidence.

Mrs. Higgins, the defendant's wife, visited the hospital shortly after her husband arrived there and stated she did not appear to recognize her and would not speak. She said Dr. Dickinson pointed out a large swelling back of the ear and described the other bruises and wounds as more serious than any of the preceding witnesses. She said that Dr. Dickinson said that the wounds looked as if they had been made by some blunt instrument, perhaps a lead pipe or sand bag. Fred Roach, a brother-in-law of Higgins, told about the same story regarding Higgins' condition at the hospital.

Dr. Alexander McDonald testified that at Higgins' urgent request he had examined the defendant on the Tuesday or Wednesday following the postoffice affair and had found him pale with a pulse of but sixty-two. Though he did not take his temperature, the witness was certain it was sub-normal. He told of a lump on the back of his head, a smaller one on the side of his head, the abrasion on top, his back being discolored near the three punctures and his feet and legs being cold and clammy. In cross-examination, Mr. Covell tried to show that Dr. McDonald's testimony did not coincide with the nurse's chart offered in evidence. The physician testified that the cold and clammy condition could not result from nervousness alone, and was a sign of convalescence from an injury, a fever or a hemorrhage. Miss Katharine McDonald, a clerk in the postoffice, was the last witness called yesterday but her testimony added nothing material to the case.

The defense will continue the examination of its witnesses today, of whom there are quite a number yet to be heard. At the conclusion of the defense, the government will introduce rebuttal testimony, of which there is likely to be considerable, owing to the nature of the defense.

When the Higgins case goes to the jury, the Gibson murder case will be taken up, as it is understood that the motion for a continuance will be overruled by the court.

Grand Jury Not in Session.

The grand jury adjourned early yesterday for some reason or other but will convene again this morning. No report has yet been made on the Ironwood bank cases, and it is rumored that the absence of certain of the bank's books was the reason for adjournment yesterday.

TWO "TRUSTIES" ESCAPED.

Two prisoners escaped from the branch prison yesterday afternoon, while at work handling lumber outside the prison walls. It is considered quite remarkable that either of them should try to escape, as one of them, George E. Conklin, would have served his full term and been released today, and the other, Earl Brownell, would have been a free man Nov. 1. Conklin knew that his time would be up today.

Conklin is Thirty-nine Years of Age.

Conklin is thirty-nine years of age, five feet, seven inches tall, weighs 142 pounds, has blue eyes and chestnut hair, a deformed nail on the third finger of his left hand, is badly pitted with smallpox and wears a light mustache. He had been sent to the prison from Delta county.

Brownell, alias C. E. Morris, is thirty-nine years of age, six feet and one-fourth inch tall, round shouldered, weighs 152 pounds, has greenish blue eyes, a very large nose, pointed chin, and his left index finger has been amputated at the third joint. He came to the prison from Benton Harbor. A reward of \$25 will be paid for the apprehension of either of these men.

MORE LOCOMOTIVES HAVE BEEN ORDERED

AMERICAN LOCOMOTIVE CO. WILL BUILD EIGHT FOR L. S. & I. AND M. & S. E. RAILWAYS.

WILL WEIGH 170,000 POUNDS

Seven Will Replace Smaller Engines, Which the Management Plans to Sell—Preparing for Increased Business.

General Manager H. R. Harris has this week closed a contract with the American Locomotive company of New York for an important addition to the motive power of the Marquette & Southeastern and Lake Superior & Ishpeming railways. It calls for the delivery of eight powerful locomotives, seven of which will replace smaller locomotives now in service, and one of which will be an addition to the present number, giving the roads twenty-seven.

Five of the locomotives are being purchased for the Lake Superior & Ishpeming and three for the Marquette & Southeastern. They will be built for the freight traffic, and will be uniform, duplicates of locomotives Nos. 36 and 37, built in 1907 for the same company by the Baldwin Locomotive works. They will be of the consolidation type, eight drivers, and will weigh 170,000 pounds on the truck, and 151,000 pounds on the drivers, a total of 170,000 pounds. The tender will have a capacity of 6,000 gallons of water and twelve tons of coal and will weigh 124,000 pounds in working order. The locomotives will not be the largest in use on the railways, for there are some 205,000 pound engines already in service, but they will be very powerful.

The boilers will carry 200 pounds of steam, and the locomotives are rated at 34,000 pounds tractive power. They will be equipped with the Baker-Pilliod valve gear, instead of the old standard Stephenson link valve gear.

Big Gain in Motive Power. Although seven of the locomotives will replace locomotives now in use, which are to be sold, they will mean a big gain in motive power for the railroads, as the ones to be sold are much less powerful than the new stock will be. They include four compounds and three four-wheel switch engines.

Delivery has been promised for December 1, but it is optional with the company to take four locomotives on that date and four on March 1, and they may be received in two shipments. The purchase has been made in order to better equip the Marquette & Southeastern and Lake Superior & Ishpeming roads to handle their business, and in preparation for what is looked forward to as a period of great activity.

The traffic on both roads has been showing a gratifying gain of late months. The movement of ore is now the heaviest it has been at any time during the past few seasons. While there is no way of knowing exactly what the demands for ore will be next year, it is generally expected that they will be great and that the movement will, perhaps, be the largest recorded in any single year. In that event the Lake Superior & Ishpeming and Marquette & Southeastern roads would be called upon to handle the heaviest traffic in their history, and it is desired to be prepared to handle the business in an economical and satisfactory manner.

NOTICE.

To the property owners, taxpayers and other persons interested in the following proposed improvements, to-wit: For the grading of Fitch avenue and Norwood street. Notice is hereby given that the specifications for grading Fitch avenue, from north line of Waldo street to south line of Norwood street, together with estimate of the expense of making said improvement and profile of the work to be done and district to be improved and assessed to pay the cost thereof, are now in the office of the city controller for public examination.

The district to be assessed to pay for the said improvement comprises all the property abutting on said portion of Fitch avenue on both sides thereof.

Notice is hereby given that the specifications for grading Norwood street, from west line of Presque Isle avenue to east line of Longway avenue, together with estimate of the expense of making said improvement and profile of the work to be done and district to be improved and assessed to pay the cost thereof, are now in the office of the city controller for public examination.

The district to be assessed to pay for the said improvement comprises all the property abutting on said portion of Norwood street on both sides thereof.

The common council of the city of Marquette will meet on Tuesday, the 21st day of September, 1909, at 8 o'clock p. m., at the council chamber in the city hall, and consider any objections to said proposed improvements, and the district assessment rolls prepared therefor, and for the confirmation of said rolls.

Dated, Marquette, Mich., September 8th, 1909. DANIEL S. DOXOVAN, Recorder of the City of Marquette. (9-9-11)
