

EYES ARE TURNED TOWARD PITTSBURG

Opening Game of the Series Which Will Decide the Baseball Championship of the World Will Be Played This Afternoon.

Good Weather Is Promised, and That a Record-Breaking Crowd Will Witness the Contest Is Certain—Two Thousand People Go from Detroit—The Prevailing Betting Odds Are Two to One in Favor of the Pirates, With Very Little Tiger Money in Sight

OUTCOME OF FORMER SERIES FOR THE WORLD'S TITLE.

Table with columns for National League, American Ass'n, W.L., and various years (1884-1908) with corresponding wins and losses.

Big Crowd Goes from Detroit. Detroit, Oct. 7.—Sixteen hundred people started to Pittsburgh tonight on special trains to see tomorrow's championship game.

Good Weather Is Indicated. Pittsburgh, Oct. 7.—Detroit and Pittsburgh, winners of the pennants in their respective leagues, will meet here tomorrow in the opening game of the series which will decide the baseball championship of the world.

Pittsburgh's third consecutive attempt to win the greatest honors in baseball is the American league champions were defeated by the Chicago Nationals in the last two world's series. Pittsburgh has not had an opportunity to contest for the world's championship since 1890.

Good weather is promised, and a record-breaking crowd is certain. Every reserved seat of the grandstands is expected to be filled for the other games in the immense amphitheater.

Jennings Confident This Time. Boston, Mass., Oct. 7.—A big delegation of New England fans is expected to come to Pittsburgh to see the two opening games of the world's championship series.

As far as the American league races in the last three years are concerned, no one can doubt the Tigers' chances. But their showing against the Cubs on two occasions was, in the opinion of even Chicago adherents, not exactly their best baseball.

Catcher Gibson a Tower of Strength. Pittsburgh will go into the series as a strong favorite in most quarters. There is the very efficient pitching staff which, in working condition, looks a bit better than the demerits twirlers at their best.

Illinois State Fair Races. Springfield, Ills., Oct. 7.—Fifty thousand spectators saw Uncle William win the free-for-all trot at the state fair this afternoon, in three straight heats.

Detroit will rely mainly upon Cobb, Crawford and Bush to bear the brunt of attacking opposition and in this trio has a combination that even Pittsburgh will have a hard time beating.

Killian Willett and Donovan especially, apparently at the top of their season's form, but as compared with their opponents, the Tigers are weak behind the bat.

National League Season Closes.

New York, Oct. 7.—The National league baseball season ended today, Boston and Brooklyn won the final victories, defeating Philadelphia and New York. Pittsburgh's winning of the league pennant had been widely predicted since May 5 when the team assumed an aggressive lead.

Table with columns for W., L., P.C. and various teams (Pittsburgh, New York, Cincinnati, Philadelphia, Brooklyn, St. Louis, Boston).

President Murphy Gets a Reheating. Cincinnati, O., Oct. 7.—According to Chairman Herrmann of the national baseball commission, the case wherein President Murphy, of the Chicago Nationals, was fined \$500 for alleged tampering with pitcher Pfeiffer, of the Toronto club, will be reopened at Pittsburgh tomorrow.

AMERICAN GOLF TITLE IN SERIOUS JEOPARDY.

Along With Two Philadelphians and One Bostonian, Miss Campbell, the Scottish Star, Remains a Contender at the National Tournament and With an Excellent Chance of Winning Out.

Philadelphia, Oct. 7.—The last of the New York and Chicago players were defeated today in the third round of the match play at the women's national golf championship tournament.

Philadelphia, Oct. 7.—The last of the New York and Chicago players were defeated today in the third round of the match play at the women's national golf championship tournament.

AERIAL VOYAGE IS THRILLING ONE

Edgar Mix's Account of His Journey Shows That Winner of the International Balloon Race Narrowly Escaped Disaster.

Swooping Down a Mountainside With Frightful Velocity, and Plunging Into an Apparently Bottomless Chasm—for All the World as If the Earth Had Opened to Swallow the Aeronauts—this Was One of a Number of Exciting Incidents.

Paris, Oct. 7.—Edgar Mix of Columbus, O., winner of the international balloon race, today telegraphed an account of his voyage to the Associated Press from Warsaw. He said: "Sunday night, in a drenching rain, the balloon sometimes seemed to stand still. We ascended and descended in a search for better currents of air, without any appreciable results. By 4 o'clock in the morning, half of our ballast had been used."

The passage of the Bavarian Alps through the rain and clouds was thrilling. Once we swooped down a mountainside with frightful velocity, plunging into a chasm of fog which seemed bottomless. It was as if the earth had opened to swallow us.

After two hours we emerged from the valley and got a northeasterly slant of wind. When clear of the mountains, we moved lively. The guide rope dragged out the expenditure of ballast, glass and chimneys. The passengers rushed outside, crying imprecations.

After passing over Konigsstadt, we rose to an altitude of 15,000 feet. Later we began to descend, emerging from the clouds above the town of Waldenburg, and were obliged to jettison eleven sacks of ballast and half of our provisions, to keep clear of the roofs.

Philadelphia, Oct. 7.—The last of the New York and Chicago players were defeated today in the third round of the match play at the women's national golf championship tournament.

Philadelphia, Oct. 7.—The last of the New York and Chicago players were defeated today in the third round of the match play at the women's national golf championship tournament.

Philadelphia, Oct. 7.—The last of the New York and Chicago players were defeated today in the third round of the match play at the women's national golf championship tournament.

THE WEATHER.

Washington, Oct. 7.—The following is the weather bureau's forecast for Upper Michigan: Increasing cloudiness, with showers, Saturday, and in the west Friday, brisk and possibly high south-wind winds.

NEW YORK PEOPLE GET A BAD SCARE.

Sewer Gas Igniting, a Series of Explosions Shake Nearly a Square Mile of the Middle West Side of the City, Injuring a Number of Persons and Causing Much Damage to Property.

New York, Oct. 7.—Nearly a square mile of the middle West side was shaken this afternoon by a series of sewer explosions which blew manhole covers into the air in crowded thoroughfares, injured several persons, and caused damage to property and caused a momentary panic.

St. Louis, Oct. 7.—Glen Curtiss, winner of the international honors at Rheims, France, made three flights in his biplane here today. The longest one was more than a quarter of a mile, and the shortest one 220 yards.

SUPPLY OF MONEY DWINDLES STEADILY.

Stiffening Rate for Call Loans Annihilates Wall Street Traders, With the Result the Prices of Stocks Lose Their Gains of Earlier in the Day and the Closing of the Market Is Weak.

New York, Oct. 7.—The stock market gave evidence today that the liquidating pressure on United States Steel had subsided, and the tone of the whole speculation was shaped accordingly.

Philadelphia, Oct. 7.—The leading banks of this city will advance their rate on call loans tomorrow to 5 per cent, on account of the sharp rise in interest rates at New York and the increasing demand for money.

Philadelphia, Oct. 7.—The leading banks of this city will advance their rate on call loans tomorrow to 5 per cent, on account of the sharp rise in interest rates at New York and the increasing demand for money.

MR. TAFT IS HAVING TIME OF HIS LIFE

Far from the Crowds and the Necessity of Speech-Making, He Spends an Enjoyable Day in the Heart of the Sierras.

Traveling Thirty-Four Miles by Stage Over Mountain Roads, and Catching Glimpses of the Yosemite Valley and the Tumbling Waters of the Merced River, He Arrives at the Edge of the Famous Mariposa Grove, Which He Will Enter This Morning.

El Portal, Cal., Oct. 7.—In the wilderness of the western slope of the Sierras, away from the crowds and the necessity of speech-making, President Taft is traveling by stage coach today toward the Mariposa grove of big trees. Altogether the president has eight hours' stage riding ahead of him before he reaches Mariposa, where he will spend the night at a tavern on the outskirts of the Yosemite valley before starting Friday morning to penetrate the Mariposa grove.

Washington, Oct. 7.—A stage ride of thirty-four miles over mountain roads brought President Taft tonight to this little Sierra retreat, eight miles from the entrance to the Mariposa grove of big trees, whether the president starts tomorrow or not. The day's ride included glimpses of the Yosemite valley and the tumbling waters of the Merced river and a winding climb to a height of seven thousand feet, at the crest of the mountains which enclose the Yosemite valley.

MARQUETTE, MICH., OCT. 8.

Entered as mail matter of the second class
in the postoffice at Marquette, Mich.

Play ball!

Our American aviators and balloonists
appear to be in a class by themselves.

The Hon. Mr. Mullin will, it is said,
officially at the hurling end for the Tig-
ers.

It wouldn't be fair, Mr. Hearst. You
were not taken into Charley Murphy's
calculations.

Mr. Parsons is standing pat, Speaker
Cannon is standing pat; in fact, every-
body concerned is standing pat.

It is informally reported that Mr. Kerr
of the copper country is not to be a
candidate for congress, after all.

The world's championship series tick-
ets are selling at a premium. The scal-
pers can usually be depended on to look
after that little detail.

Let us hope that our "all star" base-
ball team will spare us the humiliation
of having the flower of the county taken
into camp by Escanaba.

Life would be much sweeter and pleas-
anter for our honorable members of con-
gress if they didn't have these bother-
some questions of patronage to dispose
of every once in a while.

Cassius Glasgow, chairman of the
state railroad commission, admits that
he may be a candidate for lieutenant
governor. There are going to be enough
candidates for this office to match all the
candidates for governor, and a few left
over.

It is currently reported that if Chair-
man Parsons should list the up-state
Republicans who, he charges, dickered
with Tammany, the first name he would
put down would be that of former Repre-
sentative Littauer, maker of gloves at
Gloversville.

This being a "wet" preacher in these
days of "dry" crusades is no sinecure.
Rev. Highy, pastor of an Episcopal church,
has been expelled from the Star-
ky County (D.) Ministerial association
because he wasn't active against the
liquor forces in a recent local option
election.

Anyone who thinks that being a sena-
tor is an ideal existence can, for true
information, frame a mental picture of
Senator Smith with both Montgomery
and Musselman on his hands in Grand
Rapids, Burrows and Townsend to be
pleated in the senatorial race, the Mar-
quette collectorship to dispose of and other
things for incidental annoyances. If
that isn't sufficient, conjure up a picture
of the way Senator Burrows has to busy
himself to assure that his "next
term" doesn't go astray. Truly he who
is really happy is he who has not yet
been honored by the sovereign voter.

The Escanaba county has appointed a
city chemist whose duty it should be to
make war on germs, both in water and in
milk. The step paves the way for milk
inspection in that city, as it is planned
to sample the supply being furnished
consumers at various times and to insist
on a high standard of cleanliness and
the usual standard of butter fat. Dr.
Breitenbach, who received the appoint-
ment to the new office, says Escanaba's
milk supply offers much room for im-
provement. But it is doubtful if con-
ditions at Escanaba are any worse than
they are in other upper peninsula cities.
As a rule, the dairymen in this region
have been allowed to run their business
without supervision, and in consequence
many of them have run it with no regard
to the public health. We are only now
seeing the beginning of agitation for a
fair measure of control in the interest
of the public.

The Globe Knitting works at Grand
Rapids proposes to test the validity of
the law enacted by the last legislature
restricting to fifty-four the number of
hours that female employees may work
each week, with not to exceed ten hours
in any one day. The management plans
to ignore the law, with the idea of in-
viting prosecution and then carrying the
case through to the supreme court. It
will have the support, it is said, of other

Grand Rapids concerns employing fe-
male labor. It is contended that where-
as this class of labor is satisfied with
the present working conditions the op-
eration of the new law would seriously
interfere with the organization of the
companies' operatives and entail a loss
not only to the concerns but to the peo-
ple in their employ. It is the opinion
of corporation lawyers that the statu-
te is unconstitutional because it unrea-
sonably restricts the right of contract of
women workers. This may be true, but
fifty-four hours a week, nine hours a
day, for women operatives is a fairly
heavy stint of work. In the popular
opinion the law that enforces these con-
ditions of employment for them will
hardly be held to be very far out of the
way.

Yesterday we had something to say
about the issue between Tammany and
the Fusionists being clearly drawn, and
commented on the fact that the voters
in New York would have a direct choice
between Mr. Barnard and Justice Gay-
nor. This, it appears, may not be the
case, after all. Politics in New York is
subject to kaleidoscopic changes. Wil-
liam Randolph Hearst was put in nomi-
nation by a mass meeting of 4,000 howl-
ing adherents Wednesday night. He has
been quoted as being opposed to making
a campaign this year, but may possibly
accede to the demand that has been
made on him, and enter the race. Such
a result could not fail but seriously
impair Tammany's chances, for Mr.
Hearst has indicated that between the
Fusionist and Tammany tickets he is
prepared to support the latter. If he
himself becomes a candidate he will draw
many more votes from Tammany than
he will from the Fusionists. An inter-
esting feature of the Cooper Union meet-
ing where he was nominated was the ad-
dress, in endorsement of Hearst, by Wil-
liam M. Ivis, the Republican candidate
four years ago, when Hearst was
labeled noosed out by McClellan. Many
people who believe that the most favor-
able result of the New York election
would be the election of the Fusion ticket
will still agree with Mr. Ivis that
Hearst is infinitely to be preferred to the
Tammany-Murphy-Gaynor combination.
The New York campaign promises to be
much more interesting and exciting than
could be foreseen a few weeks ago would
be the case.

It is predicted in well informed quar-
ters that the withdrawal of District At-
torney Jerome as an independent candi-
date for district attorney in New York
county is likely to be announced at any
time. Mr. Jerome was elected as an
independent four years ago, but the con-
ditions existing this year are so different
that it is doubtful whether he could
duplicate that success even if his popu-
larity had not, to some extent, suffered
in the intervening time. Then there were
three candidates. The Republican, the
Hearst and the Tammany men, besides
Mr. Jerome himself. The tremendous
strength developed by the Hearst move-
ment led to serious inroads being made
on the Tammany vote, not only on the
city, but on the county ticket as well,
and this, more than any other one thing,
contributed to elect Mr. Jerome. This
year, however, there are three, in-
stead of four, candidates, and there will
be no such great defection of Tammany
voters from the Democratic county ticket
as there was four years ago. Besides,
Mr. Jerome himself has lost ground
through his last term. He has been
grilled for many alleged sins of commis-
sion and omission, and has been charged
with unduly favoring many wealthy of-
fenders. It may well be believed that
there has been little ground for many of
the attacks directed against him, but
they have impressed many of the fore-
ign born voters who were among Mr.
Jerome's loyalist supporters four years
ago, and they have turned on him.
There is so little chance that he can be
elected, or even make a strong run, that
the obviously wise thing for him to do
is to withdraw. And he is probably
politician enough to see it.

AN INTERESTING CONTEST.

As noted in The Mining Journal yester-
day, the contest for the office of col-
lector of customs promises to be one of
unusual interest, and it will not be
strange if the eyes of all the practical
politicians in the state are fixed on it
before it is disposed of. C. J. Byrns,
of Ishpeming, is one of the candidates,
and the assumption that he has been
pledged the unqualified support of Sena-
tor Smith is probably not far out of the
way. The relations in the past between
Byrns and Senator Smith have been such
that even if the senator questioned the
expediency of Byrns' candidacy at this
time he could not well do ought but to
use his best endeavors to bring it to a suc-
cessful conclusion. Byrns gave Senator
Smith a vote and valuable service when
he was elected to his present high office
by the legislature of 1907. Byrns worked
hand in glove with the men who made
Smith senator, and is still in close touch
with them. He will have their approval
and active support in his candidacy, and
this cannot help but strengthen Smith's
reported resolution to "see him through."
But very few of these major prizes
of politics are awarded by unanimous
consent. There will be dissent and op-
position to Byrns' selection to the post,
as there is inevitably in the case of prac-
tically all candidates. Other men have
been mentioned in connection with the
appointment, particularly Daniel W.
Powell, of Marquette, who is avowedly
seeking it. Mr. Powell's candidacy is fa-
vored by many people and has support

in influential quarters. It is said to be
probable that it will meet with favor
from Senator Burrows.

Our Michigan senators have gotten
along fairly well together, as far as all
outward signs go, but it is an open se-
cret that, as a matter of fact, they have
very little in common and neither holds
the other in particularly high regard.
So far they have managed to avoid seri-
ous clashes over questions of patronage,
or any other questions, but it is not
without the bounds of possibility that
the time has come when they are to lock
horns, and that the prize of the battle
between them will be the collectorship
for the district of Superior. If this came
to pass the issue would show which of
our senators draws the most water at
Washington.

Among the possibilities is the one that
President Taft may insist, in the case
of any deadlock between them over the
Marquette county candidates, on their
agreement on some other candidate who
should be brought forth to harmonize
matters. This might result in bringing
in some outside man to take the office.
Besides the veiled hostility between the
senators there enter in various consid-
erations of local and district politics to
complicate the situation, the whole mak-
ing one of the most involved political
lineups that has developed in this re-
gion in many a day.

Do You Want to Know How
to prepare, easily and economically,
thirty-six delicious, tempting delicias?
Then write for the

FREE RECIPE BOOK
which we send for the asking. Every
recipe in it has been carefully tested.
Each is the favorite dainty of certain
exacting housewives. Give your gro-
cer's name.

This free book tells you all about

BURNETT'S VANILLA
the most delicious Vanilla Extract that
is made. Your grocer will supply you
with Burnett's Vanilla.

JOSEPH BURNETT COMPANY, 76 India St., Boston

At this week's session of the Menom-
inee common council there was passed
an ordinance which limits the number
of saloons to be granted to the num-
ber that were in operation in April,
1909. This ordinance was introduced
by Alderman Er-Litz and is in conformity
with the new state law. It states that
when a new license is to be granted,
the one who has previously been en-
gaged in the liquor traffic and has con-
ducted an orderly place shall be favored.
All applicants must have their applica-
tions signed by at least twelve citizens
of good repute.

Kills Partridge in Store—
J. L. Nolden, one of the employees of
the Delta Hardware company at Escanaba,
Michigan, has been granted the right to
the establishment. While working in the
iron room Nolden heard the whirring
of wings and looked about just in time
to see a partridge fly in through the door
and light upon a projection. Hurrying
to the door he fired a shot with a
22-rifle, loaded it and went back to
hunt the partridge. The bird had not
moved, and Nolden dropped it with a
well-directed shot.

Menominee Limits Saloons—
At this week's session of the Menom-
inee common council there was passed
an ordinance which limits the number
of saloons to be granted to the num-
ber that were in operation in April,
1909. This ordinance was introduced
by Alderman Er-Litz and is in conformity
with the new state law. It states that
when a new license is to be granted,
the one who has previously been en-
gaged in the liquor traffic and has con-
ducted an orderly place shall be favored.
All applicants must have their applica-
tions signed by at least twelve citizens
of good repute.

Building Boom at Ewen—
At Ewen, ground has been broken for
a bank building a brick-veneered struc-
ture. August Wallen has resided here
for 30 years and has been granted the
right to the establishment. The Albert
Lundreth company of Manitowish, Wis., is erecting a fine new
residence and barn. It is estimated that
the cost will be about \$10,000. Thomas
Zurke has completed his new \$6,000
millinery store, and the ground for the
ground opening will be held Oct. 10.
Ground has been broken for an I. O. O.
E. block. The upstairs will be used for
a lodge hall and the ground floor for
business purposes. The building will
cost about \$25,000. M. E. Leach has com-
pleted his planing mill and has started
building a saw mill. This will require
an outlay of about \$25,000. He is also
building a modern residence opposite the
M. E. church.

Much Ice Cream Consumed There—
A conservative estimate places the
total amount of ice cream consumed in
Calumet during the past summer at
30,000 gallons, and in Marquette at
20,000 gallons. The city of Marquette
is familiar with the business, believe that
it exceeds rather than falls short of this
enormous quantity. One dealer alone
claims to have marketed no less than
10,000 gallons of this frigid delicacy.
In Marquette, it is estimated that the
total amount of ice cream consumed
amounts to \$125,000. This will require
an outlay of about \$25,000. He is also
building a modern residence opposite the
M. E. church.

Soldier's Tragic Death—
Sergeant Charles C. Mauck, of the
Twenty-sixth Infantry, lies dead at Fort
Dickinson, S. D. Mauck was struck by
a bullet in the chest while on duty at
the fort. The bullet entered the chest
between the shoulder blades and passed
through the heart. The sharp point of
the bullet entered the heart. The acci-
dent occurred while the Fort Brady
battalion was encamped near Beaver
Park, Mauck and thirteen other soldiers
were on duty at the fort. The engine
had been slowed down to enter the
beat house when it was seen that the
craft was not headed right and that
she was about to bump hard. Private
Mauck, who was sitting in the front
seat and looking forward, saw the
engine and from the quarter bow braced
it against the boat house to keep the boat
off. The boat continued to move the
pole got a strong leverage on a stan-
chion. In a second it snapped in the
middle. Mauck was sitting in the front
seat and looking forward, saw the
engine and from the quarter bow braced
it against the boat house to keep the boat
off. The boat continued to move the
pole got a strong leverage on a stan-
chion. In a second it snapped in the
middle. Mauck was sitting in the front
seat and looking forward, saw the
engine and from the quarter bow braced
it against the boat house to keep the boat
off. The boat continued to move the
pole got a strong leverage on a stan-
chion. In a second it snapped in the
middle. Mauck was sitting in the front
seat and looking forward, saw the
engine and from the quarter bow braced
it against the boat house to keep the boat
off. The boat continued to move the
pole got a strong leverage on a stan-
chion. In a second it snapped in the
middle. Mauck was sitting in the front
seat and looking forward, saw the
engine and from the quarter bow braced
it against the boat house to keep the boat
off. The boat continued to move the
pole got a strong leverage on a stan-
chion. In a second it snapped in the
middle. Mauck was sitting in the front
seat and looking forward, saw the
engine and from the quarter bow braced
it against the boat house to keep the boat
off. The boat continued to move the
pole got a strong leverage on a stan-
chion. In a second it snapped in the
middle. Mauck was sitting in the front
seat and looking forward, saw the
engine and from the quarter bow braced

Copper Country

TAKES FROM THE JURY.

Judge Streeter Orders Verdict for Street Railway Company.

The Sausinsky case against the Houghton County Street Railway company was taken from the jury Wednesday afternoon by Judge Streeter, who ordered a verdict for the defendant.

WILL NOT KEEP THE LIGHTS.

Red Jacket Will Hereafter Be One of Darkest Towns in County.

Red jacket's streets will hereafter be dark, very dark, and the village, although it has the best pavements and the finest sewerage and sidewalk systems in northern Michigan, will be about the darkest town in the entire copper country.

Mining News

NORTH BUTTE.

Zone of Secondary Enrichment Likely to Be Encountered at Greater Depth.

While complete silence seems to be the policy of the North Butte company regarding operations on the 2200 and 2200-foot levels, and while this silence gives rise to considerable doubt as to the ore values of the property at depth, these facts should not be taken as a basis for condemning the property and for declaring that the North Butte has seen its best producing days.

RIPLEY FERRY A SUCCESS.

Houghton Business Men's Transportation Scheme Proves a Winner.

William Tregeon, operating the Houghton-Ripley ferry "Banker Hill" for the business men of Houghton, has made his first monthly report to Ed. Haas, who has charge of the fund for maintenance. His report shows that the ferry has done a satisfactory business during the month and that its patronage is growing.

TEACHERS' INSTITUTE.

Gathering of Schoolmams of Two Counties in Calumet Today.

The inspiration institute for the public school teachers of Houghton and Keweenaw counties will be held at the Calumet High school today and Saturday. It will be attended by all of 250 to 300 teachers and instructors.

Professor E. A. Baylour of Ypsilanti will conduct the institute, and L. D. Harvey of Menominee, Wis., and Dr. Charles McMurtry of Okakab, Ill., will be instructors.

LIBRARIAN ENGAGED.

Miss Where of Wisconsin Will Have Charge of Houghton Institution.

The board of education announces the engagement of Miss Grace A. Where of Madison, Wis., as librarian of the Houghton Public Library. Her contract provides that she will come to Houghton and begin preparations to place the books in the library and get ready for the opening.

HANCOCK M. E. ANNIVERSARY.

Church Will Celebrate Its Sixth Birthday Very Shortly.

The Hancock M. E. church, the finest edifice of that denomination in the copper country, is approaching its sixth birthday. The house of worship was dedicated in November, 1903. It has been the custom to observe the anniversary of the dedication, and preparations will be made soon for an appropriate observance.

WINEMAKERS GETTING BUSY.

Scores of Carloads of Grapes Have Already Arrived in Calumet.

The wine-makers of Calumet are busy at the present time, and they will be kept on the jump the next three weeks. Grapes are being received in large quantities from the east, and it is said that more will be used than during any previous year.

WERE SHOOTING SQUIRRELS.

Deputy Game Warden Wilson Make Complaint Against Men.

Officer James Mahar of Huron town took Deputy Game Warden St. Clair Wilson of Hancock to the mine while shooting squirrels at Superior City. The deputy went to Superior City, saw the squirrels and swore out a warrant for the arrest of the hunters.

OSCEOLA.

Next Dividend May Be \$5, Making Twelve Dollars for the Year.

It is said of Osceola that in all probability the next dividend will be \$5 per share, thus making a total of \$12 for the twelve months to end next December. It is stated that the intention of the management to declare \$5 per share because the mine will have earned it and as the surplus is about \$1,500,000 the company will be strong in cash even though \$12 is paid for the year.

REV. MR. HOARD DEPARTS.

Goes to Menominee to Become Pastor of M. E. Church There.

Rev. Guy V. Hoard has shipped his household furniture and other effects to Menominee, where he will be pastor of the M. E. church the coming year. Mr. Hoard returned from his vacation the fore part of this week and at once made preparations for the removal of his goods.

PAYING THE PRIZE WINNERS.

Secretary McNamara has mailed to the premium winners of the Copper Country Fair checks covering the awards.

A meeting of the Sunday school superintendents, teachers, workers and all others interested in the work is being called for next Monday night at the rooms of the Y. M. C. A. in Calumet. The call is issued by Rev. Jesse Boyce and Luke Anderson, president, and George Wimbester of Houghton, secretary.

J.A. Mearns & Co. BROKERS. Offices at Calumet and Laurium.

Direct private wire service to all markets. If you want the best service on your orders and cannot favor us direct, instruct your banker to have us execute the order. Buy and Sell Boston Coppers, Railroads and Curb for cash or on margin.

FIGHT ARTICLES ARE SIGNED.

Manager Gene Ferguson, the pugilistic promoter, yesterday received the articles for the Shreeck-Ross bout Oct. 18. They are signed by Jimmie Dime for Ross and Billy Hogan for Shreeck. The men will arrive in a day or two to do their final training.

WAREHAM ELECTED DELEGATE.

Joseph C. Wareham of Hancock has been elected a delegate to the national convention of the American Federation

Calumet Baking Powder. The only high-class Baking Powder sold at a moderate price.

8 cents per pound. The old management, besides laying aside \$3,000 per month as a contingent fund, charged two cents per pound for development work, and when the property was turned over to the Calumet & Hecla it was thoroughly opened for a ten-year production and the amount of copper that can be taken out depends upon the will of the management.

AMALGAMATED.

Ben Thayer, assistant to the president of the Amalgamated Copper company, is in Butte, making an inspection of the properties of the company. He finds the mines in exceptionally good condition in all the history they have ever been in better condition for good, rapid and economical mining. They are now able to yield the biggest tonnage in the history of operations, but the production is not being pushed, though it is being maintained at about the normal.

ARIZONA COMMERCIAL.

The management of Arizona Commercial has authorized the installation of a 700-horse power pump, the installation of which will prevent any further delay in development. The 700-foot level will have the capacity to quickly raise the water in the mine, because in cutting the station rich ore was encountered and because the 900-level showed a marked improvement over the fourth and fifth levels.

NOTES OF COPPER NEWS.

Phelps, Dodge & Co. have purchased from Nathan Leopold of Chicago all the latter's copper mining properties in the Burro Mountain district in Mexico. These properties consist of the Burro Mountain mine and many mining claims, having a total acreage of about 1,000. The properties have been extensively developed and rich bodies of copper ore have been discovered.

HYGIENIC DRESS FOR WOMEN.

On the subject of hygienic attire for women there has always been a great deal of honest earnest talk and much misapprehension taken for the reason that a great number of people have the type of mind that irresistibly associates the ugly with the healthy and the handsome with the wholesome.

THE LATEST COTTON-PLANT PEST.

Among the new enemies of the cotton crop in some sections of this state is a striped bug about half an inch long and which is believed to belong to the light-colored group. By some he is called the "cherry" or "red" bug. It is a very great pest, and the effects of which the boll withers and dies in three or four days. Samples of this bug have been sent here for identification, but nobody ever saw one before and no one is anxious to know more about it.

ENGLISH FOLK-DANCES.

What Folklore Experts Are Restoring to the Land.

There can be no doubt whatever that the revival of English folk-songs and folk-dances is a great success, and the nature of the musical treasure-trove brought to the light of today by a number of enthusiastic workers is such as to clear England of the charge of being an unmusical or at any rate a non-musical country.

and observe the freedom, the individuality, the graceful ease which for the moment the woman of today permits herself and is permitted by modern sanctions. Indeed it is not necessary to contrast her with the women of the middle ages. She is so much more comfortable and sensible in her dress than was her grandmother or even her mother.

UNHAPPY MARRIAGES OF FAMOUS MEN.

No sun warmed my roof-tree; the marriage was a blunder; she was nineteen my senior. Seldom did the last of the great Victorian novelists, George Meredith, refer to his first marriage, in 1849, with Mary Ellen Nicholls, widow of Lieutenant Nicholls and daughter of Thomas Lucy Peacock.

INSCTS DEVOUR FORTUNES.

Between the first of last January and the thirty-first of next December the farmers of the United States will have lost \$750,000,000. There is a loss of \$200,000,000 in cereals, \$53,000,000 in tobacco and \$53,000,000 in truck crops. Sugar losses \$5,000,000 and the rest of the vast loss is about evenly distributed among the other products of the farm.

In Establishing Credit one of the most important things is to have a Bank Account. THE CITIZENS NATIONAL BANK. CAPITAL \$50,000.00

ESTABLISHED 1880. PAINE, WEBBER & CO. BANKERS AND BROKERS, BOSTON, MASS. Marquette Office, W. H. Schweitzer, Resident Manager

GERMANY'S MERCHANT MARINE. She Needed It, She Wanted It, and by Hard Work She Got It. Not less remarkable than the rise of the German military and naval power within the last century has been the growth of her merchant marine.

Several other men of genius contemplated to regret the matrimonial yoke, says a London writer. John Ruskin, for instance, after falling in love as a boy with a beautiful French girl, whom he wooed with poems, romances, dramas and mute worship, receiving nothing in reply but cold indifference and lively ridicule, married at the age of twenty-nine a lady of great beauty, Euphemia, the daughter of a family long intimate with the Ruskins. Ruskin was in love with his studies and projects, while his wife was devoted to society, and six years after the marriage she left him, and ultimately became the wife of John Everett Millais.

There was George Frederik Watts, the famous Royal Academician who, when he was forty years of age, married Miss Ellen Terry, who was not then out of her teens. As might have been anticipated, the two were not artists, and of whom was permitted to pursue his art, was tempting disaster and after a short time the marriage was dissolved. Subsequently Watts married a Scotch woman with whom he lived in the ante-lunatic literature, however, it would be difficult to find, even in fiction, a more amazing example of enmity between husband and wife than that which existed between Lord Lytton and Thina Wheeler, a beautiful Irish girl, whom he married in 1827, despite the protests of his mother. It was a most unhappy marriage, and even after the separation, in 1836, they referred to one another in the most embittered tones.

Far better, however, is the record of the cotton leaf worm which, though it is less troublesome than the caterpillar that you may mark birds—still exacts a yearly tribute of from \$5,000,000 to \$10,000,000. This and other insects make the cotton losses aggregate \$60,000,000 and make you, madam, pay more than five times as much for your cotton as you do for your wheat. Insects which the other hand, insect eggs which the birds upon your hat would ordinarily destroy, are, when deposited in grains, hatch it among the stored products and cost us \$100,000,000 a year.—Hampton's Magazine.

WHITE BRONZE
Marble is entirely out of date. Granite soon gets moss-grown, discolored, requires constant expense and care, and eventually crumbles back to Mother Earth. Besides, it is very expensive. **WHITE BRONZE** is strictly everlasting. It cannot crumble with the action of frost. Moss growth is an impossibility. It is more artistic than any stone. Thousands of delighted customers in all parts of the country. It has been on the market over 25 years and is an established success. Many granite dealers have bought White Bronze for their own burial plots. I have hundreds of beautiful designs of all grades of work, and want to have you see them if you are interested in a monument, headstone, marker or grave cover. On receipt of a postcard will be pleased to call with designs and samples of White Bronze.

City Brevities
Today's weather: Increasing cloudiness with rain. Stationary temperature. Yesterday's temperature: Seven a. m., 55 degrees; noon, 77; 7 p. m., 97. Maximum 81 degrees; minimum, 55.

Ben C. Hughes, of the Michigan Catholic, is in the city.
Charles Meeske left for Duluth on business last evening.
Dr. and Mrs. O. G. Youngquist are expected to return home from Chicago this morning.

St. Mary's guild will meet this afternoon at 2 o'clock with Mrs. George McKeegan.
The Young Woman's guild of St. Paul's church will meet at the Guild Hall this afternoon at 2:30.

Antoine DeLoria, of Garden, a well-known pioneer of this county, visited Marquette friends yesterday.
M. Klar, of Germany, is in the city on business connected with the chemical department of the Pioneer furnace.

The North End Juniors and the Rivals will meet in a game of football at the new fair grounds Sunday afternoon at 2:30.
The Ladies' Aid society of the Presbyterian church will meet this afternoon at 2 o'clock with Mrs. Grace Hoyt Frasier, E. Michigan street.

Clarence Ely, a trap drummer from lower Michigan, arrived in Marquette Wednesday to take a position with Chery's orchestra.
The Ladies' Aid society of the Methodist church will meet this afternoon with Mrs. D. W. Powell, corner of Pine and Michigan streets, at 3 o'clock.

Captain John Christopher, of the state of Washington, formerly a resident of this county, was in the city yesterday, calling on old friends and acquaintances.
Edward Delano, night ticket agent at the South Shore passenger station, left for New York last evening to visit his father, who is ill. He expects to be absent from the city a week or ten days. W. C. Smith will assume his duties during his absence.

A social event much enjoyed by all those who attended it was a birthday surprise party held last evening at the home of Wm. Wiseman, 308 Division street, in honor of Mrs. Wiseman. Cards were played and refreshments were served. A company of twenty persons were present.
Moving to Munising—Philip Anglehart, who has been the landlord at the American House, on Spring street, for some time, has given up the management of that house to the charge of the Clark hotel at Munising. William Janzen, the owner of the building and a former landlord, will again run the American House.

Lecture on "Victor Hugo"—The second of three lectures by Professor J. G. Carter Troop in the high school auditorium will be given this evening. His subject tonight will be "Victor Hugo." Professor Troop delivered a lecture on the "Development of the Novel" at the high school last Friday night, which proved intensely interesting.

Dr. Deadman Had High Score—Dr. Deadman, of this city, made the highest score in the rifle contest at the Munising tournament Wednesday. The contest was participated in by two teams, Deadman of Marquette and Ludington of Ishpeming, and Patterson and Hewitt of the Soo. The range was 200 yards with an eight-inch bull's eye. Dr. Deadman's score was ninety-five out of a possible 100 points; Ludington's, ninety-three; Patterson's, ninety-three; and Hewitt's, eighty-six. An unsteady wind blew squarely across the range, which made it very hard to shoot accurately.

New Soda Fountain—A new soda fountain is being installed at Stafford's drug store and will be ready for use tomorrow. The fountain is known as the Becker iceless fountain, and will be of about twice the capacity of the one that has been used this summer. The exterior is of Italian and verde antique marble with onyx trimmings, and when installed will present a handsome appearance. The interior parts of the fountain are of German silver, which is both sanitary and durable. The new fountain will greatly facilitate the serving of ices and feed drinks at the Stafford store, and has been purchased in order to take care of the steadily increasing trade.

Fire on Front Street—Fire broke out in H. Hanson's tailor shop above E. J. Sink's plumbing establishment on Front street about 10 o'clock yesterday, and considerable damage was done before the blaze was extinguished by the fire department. The fire started when a match was dropped into a cuspidor which contained gasoline, and as it was being carried out of the room by Mr. Hanson, an explosion took place. The room was burned about the face and arms. A fierce blaze quickly started in the room and the fire department was sent for. When they arrived the room was filled with fire and smoke but effective work with the chemical engine smothered the blaze in a short time. Those who first arrived on the scene thought a fight was in progress, as men were trying to restrain Mr. Hanson from returning up the stairs to the burning room and at the same time trying to put out the fire in his clothing.

Upper Peninsula
Will Cut Pulpwood—The Michigan Pulpwood company will operate a set of camps east of Newberry this winter. It is shipping in supplies this week and will start operations at once.

Is Student at Torpedo School—Announcement has been received in Escanaba that George S. Young, son of Mrs. George Young of that city, has entered the Newport torpedo station naval school. Last spring the young man completed a three years' term in the navy during which he enjoyed a trip around the world, and subsequently he re-enlisted. Prior to his appointment to a scholarship in the naval school he was stationed aboard the yacht Restless at Norfolk.

Installing New Plant—R. F. Gibbs & Son of Iron River have already found their sawmill plant, which has been in operation for a number of months, too small to properly take care of their increasing business. The firm is now enlarging the plant and when the work is completed the mill will be capable of sawing 30,000 feet of lumber per day. The plant will consist of a new 150 horsepower boiler, 100 horsepower engine, a re-saw, new log slide, planer, edger, etc., and will give employment to twenty-five or thirty men, besides those in the woods.

Gogebic County Town Thriving—Walter Magoon, superintendent for the Gogebic Lumber company, the man who is putting Marquette on the map, reports that the new telephone line, which has been built by the Marquette Telephone company, is completed and the village now has telephone communication with the outside world. The lumber company proposes to put in a large dynamo and furnish electric light to the residents. Mr. Magoon says that they have been promised a new depot and an operator next spring, that cement walks have been laid, roads improved and many new buildings built.

New Business Block—A new and up-to-date business block is to be constructed at Sault Ste. Marie next year to take the place of the structure occupied by the Soo Hardware company at the corner of Ashmun and Ridge streets. The property is owned by W. O. Gage and takes in the smaller buildings occupied by Otto Suppe, jeweler, and Clarence Tucker's barber shop, both of which will be razed to make room for the proposed improvements. Mr. Gage expects to begin work on the building next May and will have it completed in the fall. It will have a depth of 101 feet 6 inches, with a frontage of 84 feet 6 inches on Ashmun street, two stories in height.

Local Option Petitions Filed—The local option petitions for the several townships of Luce county have been posted in the respective precincts. In all there are two hundred signatures, or about thirty more than required. Lakefield township leads the list with 75 signatures, McMillan furnished 56, Pentland 37 and Columbus 32. The petitions have been filed with the county clerk, and it is now up to the board of supervisors to determine the validity of the petitioners at the annual meeting to be held the week beginning Oct. 10. If the board finds that the petitions have been signed by one-third of the legally qualified voters of the county, it is forced to submit the question.

City vs. Property Owners—The Escanaba council intends to find out if the present method of making special assessments there is illegal, and with this end in view City Attorney Jennings has been directed to use every effort to have dissolved the temporary injunction granted by Judge Stone to restrain the collecting of the special assessments for the Langley street improvements. The injunction was secured by Attorney A. B. Ryall, representing about fifty property owners, who have been objecting at every step against the assessment. The property owners want the street improved, but they insist that the expense should be paid by owners of abutting property and not by owners of property on side streets. The city authorities believe that the system is all right, fair and equitable and that it will stand the test of the courts. The outcome of the fight is awaited with much interest at Escanaba.

Believed to Have Drowned—The police of Menominee are dragging the river in the vicinity of the middle bridge for the body of Albert Poppette, a barber who disappeared Tuesday, Sept. 21. The incidents surrounding his disappearance were so strange that the authorities have come to the conclusion that he is drowned, whether by accident or intent they do not know. Poppette, who was employed by Julius Bohan on Grand avenue, had obtained a half holiday and he has not been seen since that day. Some time during the afternoon he was seen in a Marquette barroom, and it was reported that he was slightly intoxicated. Later it was reported that an acquaintance had seen him going toward the middle bridge on his way to Menominee about midnight of the same day. He did not return home, however. At the time he left it is known that he did not have above a few dollars, and most of that was spent in Marquette. His home relations had always been ideal and his brief-stricken wife can think of no other reason for his continued absence than that he has met with an accident or foul play.

SOO CANAL PASSAGES.

This Should Interest You

It is told that a merchant in New York city advertised for a young man to fill a certain position. The next morning he found six applicants in waiting. The merchant asked:

"How many of you young men have savings bank accounts?" Only one replied that he had. "I'll take you," said the merchant.

His bank account was a recommendation. It suggested at once to the merchant, the possession of qualifications he desired in his service.

You can start an account with this bank with \$1.00, \$5.00 or any other amount. We allow 3 per cent interest on deposits in our savings department.

Marquette National Bank

MARYLAND'S LAST CHANCE.

Defeat at This Time Would Check Negro Disfranchisement.

With the Campaign One of the Most Spirited Ever Conducted in the State, the Indications Are That the Proposed Amendment Will Be Lost—President Taft Firmly Supports the Republicans in Their Contest.

Washington, Oct. 7.—The probabilities are that Maryland is witnessing the last attempt of the Democratic organization of that state to fasten a disfranchising amendment upon its colored voters. The campaign now on over this amendment is one of the most spirited and rancorous in the history of the commonwealth. The election is just a month away and there is activity all the way from Baltimore to the mining regions of western Maryland.

Defeat of the disfranchising amendment at this time, following on the heels of the defeat of the Poe amendment four years ago, would doubtless end the efforts of the Democratic leaders to exclude from the ballot by law a large part of the negro voters. In Washington, interest attaches to the situation not alone because of the importance of the disfranchising amendment on its own account, but because of the fact that the amendment is developing a strong sentiment against the amendment. The Republicans are receiving strong support from the independent Democrats. An association of independents has been formed, known as the Democratic Association, opposed to the disfranchising amendment. It consists in large part of representative Democrats who are against the amendment. The foreign-born voters are suspicious of the amendment and are quite generally against it. In the counties outside of Baltimore the situation is close, though it is expected the amendment will carry there. But the tide is running against it so heavily in Baltimore that the majority against the measure there will probably be more than will be necessary to overcome any majority it may have in the country districts.

President Taft has come out flatly against the amendment and has given much encouragement to the Republican leaders and the opponents of the amendment generally. The Democrats have gained the support of former Governor Warfield, who four years ago fought the Poe amendment. Now, the Republicans say that the fact that Warfield has taken up with the amendment has completely ruined his influence with them and that the change of front of the former governor will not cost them any votes. It is more likely to cause the political downfall of Warfield. It is charged that he was induced to support the amendment by promises from the Democratic organization of another term as governor. Senator Rayner, who is looking for another term in the senate, and who will get one, is supporting the amendment, but there are indications that he is not entering into the fight with any high degree of spirit.

Government Records Show Marked Decrease; Many Leaving for Home.

Washington, Oct. 7.—When a year or two ago the people of the Pacific slope, notably in San Francisco, grew restless over the Japanese question and uneasy over the proposed and increasing immigration from the yellow islands they voiced a strong protest to the authorities at Washington. The government promised to see that such provision was made as would be satisfactory. There were negotiations and counter proposals between the executive departments of the two nations, with the result that an arrangement was finally struck upon satisfactory to all concerned. Under the agree-

ment reached no passports were to be issued to Japanese laborers, skilled or unskilled, except to settled agriculturists, to those having a previous domicile in the United States or the immediate blood kin of those having such domicile. It was also understood that American consuls in Japanese ports should guard closely against the issuance of passports to any Japanese liable to become a laborer after arrival in American territory. The favorable results of this agreement are evidenced by latest reports just received from the department of commerce and labor. The immigration from the Japanese islands has decreased more than 60 per cent since the agreement was entered into between the two governments. While 16,536 Japanese were admitted into the continental United States and 10,916 into the Hawaiian Islands during the twelve months ending April 30, only 3,074 were admitted to the mainland and 2,263 to the Hawaiian Islands during the year ending April 30, 1909.

Furthermore, the records of the immigration bureau show that during the year ending April 30, 1909, the Japanese population in the continental United States had decreased by 1853. During the month of April, 1909, the latest period for which statistics are available, 242 Japanese were admitted to the mainland and 42 to Hawaii, a falling off of more than 300 per cent from the record of two years ago. But even these arrivals are mostly those that depart from the former homes. From the United States there sailed for Japan during that month 253; from the Hawaiian Islands 263.

That there is going to be a very light fur catch all through the north this year seems a certainty, according to advice just received. White, black and red foxes are very much scarcer than ever before. The beautiful silver fox is entirely missing this year. The richly dyed red fox of the Arctic is also very scarce, as is also the snowy white fox which was formerly abundant. No good lynx skins seem to have been taken this year. Only a few poor summer skins of this animal will be sent to market from here this year. A trader who deals exclusively in fox, lynx and ermine skins has just received a shipment from the Kotzebue country. In this trip of over 300 miles through what was once the richest fur-producing region of the Arctic he was able to buy only fox skins and very few ermine skins. He visited every Eskimo village and every detached igloo on his way, offering good prices. Not only are the finer furs very scarce, but the trade in polar bear skins, which has until now been extensive, is also affected. Even when plentiful, large polar bear skins properly dressed and tanned, fetch \$500 in several of the great cities, but these large skins, which sometimes exceed eleven feet in length, are not to be seen in the Arctic this year. Nothing is known at present concerning the fur situation on the Siberian side, but the catch in Arctic Alaska will be less than half of last year—Ottawa Citizen.

FEWER PELTS THIS YEAR.

NEEDFUL KNOWLEDGE. Marquette People Should Learn to Detect the Approach of Kidney Disease. The symptoms of kidney trouble are so unmistakable that they leave no ground for doubt. Sick kidneys excrete a thick, cloudy, offensive urine, full of sediment, irregular of passage or attended by a sensation of stinging. The back aches constantly, headaches and dizzy spells may occur and the victim is often weighed down by a feeling of languor and fatigue. Neglect these warnings and there is danger of dropsy, Bright's Disease, or diabetes. Any one of these symptoms is warning enough to begin treating the kidneys at once. Delay often proves fatal. You can use no better remedy than Doan's Kidney Pills. Here's Marquette proof: Mrs. C. Carlton, 340 Alger Street, Marquette, Mich., says: "For the past year my kidneys have given me trouble and I have had attacks of backache. Hearing good reports of Doan's Kidney Pills, I decided to try them and sent to the Stafford Drug Co. for a box. In a short time I felt better and am now in good health. I also know of others who have used this remedy and the results have always been of the best. You are welcome to use my name as one who endorses Doan's Kidney Pills very highly." For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

MARKETS

NEW YORK STOCKS.

Paine, Webber & Co.'s correspondent at New York yesterday telegraphed as follows: "Despite the advance in the Bank of England rate of discount and the relatively poor statement of that institution, which seemed to reduce the probability of getting gold from London, the stock market was decidedly firm up to the early afternoon, after which time, pressure developed in Unsmelted Copper and Steel, which unsettled the list and caused a weak undertone to prevail at the close. The recovery was mostly due to the expense of shorts, and was aided by the tendering of support during the late trading yesterday, but the feeling is still general that the money market will bear watching for some time, and we therefore feel that purchases should be confined to declines and moderate profits taken on the rallies."

COTTON MARKET.

Paine, Webber & Co. said of the cotton market: "The speculative interests have demonstrated their ability to care for the market and absorb the offerings and they manage to induce enough fresh buying each day to provide for the daily excess of offerings over the buyers' needs, so that they have been pushing any temporary advantage to a definite conclusion and the bulls have been successful in trading today up to the point where the market is in a state of indecision. The shorts are selling at times today. There is prospect of a good active trading market in wheat, in which the longs are likely to be as ready as the shorts to take profits on the first favorable turn."

CHINESE MURDERERS MUST DIE NEXT WEEK.

Five Members of the Hep Sing Tong to Pay the Extreme Penalty for Killing at Boston.

Boston, Oct. 7.—This week Min Sing, Leong and Hom Woon, members of the Hep Sing Tong Chinese secret society, sentenced to die in the electric chair at the state prison in Charlestown during the week beginning Sunday, Oct. 10, for the murder of four members of their race in Oxford place on the evening of Aug. 2, 1907, will be removed from the Charles street jail to the state prison, where they will occupy the three cells in the execution chamber until they are summoned to pay the penalty of the law. After their execution, Joe Guay and Warry Charles, under similar sentence that will be executed during the week beginning Sunday, Oct. 17, also at the jail, will be taken to the prison. The cells in the execution chamber are without twenty-five or thirty feet of the electric chair. American educated, Warry Charles is one of the best known Chinamen in this country. For years he was employed as a government interpreter in the courts of Boston and New York. The government charged him with being the brains of the conspiracy which resulted in the murders of Oxford place.

WHEAT MARKET.

Paine, Webber & Co. said of the wheat market: "The speculative interests have demonstrated their ability to care for the market and absorb the offerings and they manage to induce enough fresh buying each day to provide for the daily excess of offerings over the buyers' needs, so that they have been pushing any temporary advantage to a definite conclusion and the bulls have been successful in trading today up to the point where the market is in a state of indecision. The shorts are selling at times today. There is prospect of a good active trading market in wheat, in which the longs are likely to be as ready as the shorts to take profits on the first favorable turn."

MODERN DENTISTRY.

How Gold Inlays Are Made and Put Into the Teeth.

The modern dentist now makes gold inlays as well as inlays of porcelain. In making an ordinary gold filling the cavity in the tooth is made larger within than at its opening, the walls thus contracting helping to hold the filling in. The cavity for a gold inlay must be of course be at least as large at the opening as at an interior point, for the inlay is in a solid block. There may be various reasons for putting into a tooth a gold inlay instead of a filling malleted in. For one reason it may be that the walls of the tooth are too frail to stand the malleting without danger of breaking, or it may be that the gold inlay is to go into a back grinding tooth, where a malleted filling would not serve the purpose. An ordinary gold filling such as is malleted in is made of pure gold; if it were otherwise it could not be worked; a gold can be alloyed to make it of a degree of hardness sufficient to withstand use.

MARINES TIRED OF NAVY.

Merely Tolerated Now, They Think They May Seek to Join the Army.

Washington, Oct. 7.—The transfer of the marine corps to the navy to the approaching session of congress, officers of the marine corps are much distressed over the conditions which prevail on board ship, which they believe, show an unduly spirit toward that branch of the service on the part of many of the navy. The marine officers insist they have been humiliated, and that under the most favorable conditions they feel they are tolerated merely because they must. This has caused a great deal of discontent among the marine corps, and those who have been watching the development of the sentiment in the navy against the marine are now saying that it has been deliberately brought about for the purpose of creating among the officers a desire to be detached from duty with ships of war. Some weeks ago Rear Admiral Seaton Schroeder, commander in chief of the Atlantic fleet, promulgated regulations which divided between marines and blue-jackets the work of performing guard duty. Under no circumstances were the marines to be employed in that way for more than half of the period. This led to a protest on the part of the marine corps officers, who desire to have the regulations revoked. They regard it as a degradation to be subjected to a subordinate and to subordinate them. They recognize in it also a realization of the remark of Mr. Newberry when he was secretary of the navy. He said that congress would enact a law which would compel the navy to employ the marines on board ship, and he was quoted as saying that the marines would go back to the ships, but "they would have nothing more exciting or important to do in the way of duty than looking over the sides of the ships into the sea."

CHICAGO GRAIN MARKETS.

Chicago, Oct. 7.—Increased receipts in the Southwest, coupled with the official forecast of rain in portions of the exchange today, closed at 12.25 1/2 for spot, October and November and at 12.30 1/2 for the December and January. There were no sales. London was unchanged at 258, for spot and 262 1/2 higher, at 259, for futures. The sales of spot were 800 tons, and of futures 500 tons, in that market. Local dealers in copper reported an easier tendency, with Lake quoted at 13 1/2 1/2, electrolytic at 12 1/2 1/2 and casting at 12.50 to 12.75.

A GREAT STEEL TANK.

The reservoir under construction for the water supply of Calcutta, India, is really a great steel tank, with a capacity of 9,000,000 imperial gallons. It is 321 feet square, sixteen feet deep, and its flat bottom is approximately ninety-four feet above ground. It is supported on eighty-one steel towers, each approximately twenty feet square, consisting of four vertical columns, properly braced. The tank will be divided into four equal compartments, any of which may be emptied independently of the others. The roof will be of slate laid on I-beams, and covered with a water-proofing membrane and then with concrete. The foundation is a concrete slab 2 1/2 feet thick, covering the entire area and reinforced with bars and I-beams beneath the columns.

OLD HUTS PASSING.

Primitive Dwellings of Mexican Indians Being Abandoned.

The Mexican Indian huts in the villages and upon the ranches of the lower Rio Grande border region of Texas have a style of architecture and construction that is distinctly their own. This type of primitive buildings is rapidly passing out of existence, says a correspondent at Hidalgo, Tex. Modern structures are taking the place of many places on the border families of Mexicans have abandoned their juales and moved into more pretentious homes. One thing that recommended the old style of residence to the poorer Mexicans was its cheapness of construction. No money outlay is necessary in erecting the picturesque structures. A knowledge of carpentry is also not needed. A double row of upright poles, firmly set or driven into the ground, form the framework for the walls. Between these two rows of poles are placed other poles or sticks of shorter length, forming a thick and compact wall. At each of the four corners of the building posts are set, reaching to the height of eight feet. Roughly hewn stringers are laid from one post to another, and these stringers are tied to other poles that form the framework of the walls. The strong fiber from the maguey plant or strips of buckskin are used to tie the poles into position. The rafters are tied to the ridgepole and stringers in the same manner. At one end of the building is built the opening through which the smoke of the inside fire may ascend. Stoves are unknown among these Mexicans and the cooking is all done upon the ground. When the rafters are in position the thatched roof is put on. Palm leaves form the most satisfactory roof, both for durability and effectiveness in shedding the rain, but owing to the scarcity of this material on the Texas side of the international boundary stream grasses and the leaves of fiber plants are used for the purpose. The roofing material is tied to the rafters in layers. Some of the Mexican house builders exercise great ingenuity in putting on the thatched roofs. The only opening in most of these Mexican huts is the door, which extends from the ground to the roof. The floor is the bare earth. The ventilation is obtained through the crude chimney opening. The door itself is seldom closed.

THE WAYS OF GENIUS.

A Letter from Swinburne to Edmund Clarence Stedman.—The Open-Hearted Candor of the Man.

We are apt to think of men of genius, and particularly of great poets, as different in all things from the ordinary run of mankind, as always possessed and absorbed by their genius, as self-blame and careless of the praise or blame, the favor or neglect of the world. There is no poet about whose art should be more ready to think, thus than that of Swinburne. He seems from his writings to have been more of a specialist than any of our poets. Often when he was writing prose he could scarcely refrain from falling off, or rising, into poetry. The ideas which he expresses are all literary or connected with literature. His very politics seem to be simplified and refined, so that they may be fit material for poetry. We think of him, too, as living always like a poet, in a proud seclusion from the ordinary life of men. Yet a long and interesting letter which we published in our literary supplement conveys a very different impression of him. It was written to Mr. Stedman, the American critic and poet, who has asked him for some account of his birth and career.

SOME FISHERMEN'S LUCK.

Several instances are reported of late where fish which have broken away have been rehooked and caught, one being a trout which had the old fly and cast in its mouth. The other day a sea angler at Newhaven hooked the same conger twice and twice had his tackle carried away. On safely landing the conger he found the hook and part of one of his broken lines attached to its tongue. Quite a number of swallows have this reason been unintentionally

AMERICAN IN THE YEAR 2009.

What will be the destiny of the United States? The answer to this can be supplied immediately by a comparison with the Roman Empire. The establishment of Constantinople as the capital of the East and the Eastern empire's separation from Rome, are paralleled in the story of the American Revolution. We may look then, for a progressive decline in the strength of England, in inverse ratio to our own increasing power. Australia, already American in her political organization, will gravitate, with Canada, into the Union; finally the English-speaking peoples will be reunited under American auspices. That is as far as we can look forward, legitimately. America will be absorbed in the solution of her social problems. Democracy, which has never really existed, will be coming into its own; and with its advent will disappear the comedy of representative government, which tried out through several centuries in the classical world and found wanting, is destined to receive its coup de grace upon American soil. The battle of socialism will be fought, not to be solved, probably after some considerable bloodshed, by a sudden illumination of common sense. It will be realized that this insatiable specter is of the sheet and turning variety, and about as important as those dogmatic contentions that plunged all Europe into centuries of religious strife. For while the Marxian Utopia, that ever-inminent thunder cloud that ever-inminent disaster, will be dispelled, discarded by the failure of its author's own prophecies, the loose, haphazard productive methods of today, and our costly and faulty manner of distribution, will have to be organized to prevent their complete dissipation. The solution of this tremendous problem, which will be precipitated by the sudden failure of foreign markets when manufacturing and prohibitory tariffs are universal in all countries, will occupy attention for at least a century to come. —Harper's Weekly.

ANCIENT EGYPTIAN INCUBATOR.

System of Hatching Eggs by Artificial Heat Not New.

There has been in Egypt a system of hatching eggs by artificial heat from time immemorial. One establishment was wholly constructed of sun dried bricks, mortar and earth. It was provided with twelve compartments or incubators, each capable of hatching 7,500 eggs, or altogether 90,000 at one time. The season begins in March and lasts until May, and three batches of eggs are hatched in this time, each taking an average of three weeks. The number of eggs treated at this establishment in a single season was 270,000. The eggs cost 48,000 cents, are usually obtained, the price of eggs is twopenny-half penny per dozen, and chickens just hatched are sold at seven-pence-half penny per dozen. The number of chickens hatched in this manner yearly throughout Egypt is estimated at 75,000,000, and would under ordinary circumstances require 1,600,000 mothers.

DEATH OF OLD RESIDENT.

Amund Lund, an old and well known resident of Ishpeming, died yesterday morning at 6 o'clock, after an illness extending over a period of two years. Death was not unexpected, as his condition had been precarious for some days. The deceased was one of the city's oldest Norwegian residents, he having located here over thirty years ago. For a number of years he conducted a paper business on Pearl street, in the building now occupied by Antoine Dobbs, and later worked at his trade as carpenter. He is survived by his wife and eight children. The latter are Miss Anna, in the employ of Braastad & Co.; Miss Marie, teaching school at Saint Ste. Marie, and Ben, Bessie, Andrew, Norman, Clara and Ovid, at home. The funeral will be held Sunday afternoon at 2 o'clock from the Norwegian Lutheran church on Ridge street. The family home is at 512 East Ridge street.

New Billy Possum coat for children. (10-8-2d) JOS. SELLWOOD & CO.

The great assortment of five and ten cent goods in our new department will surprise you. Call and see them. (10-8-4d) F. BRAASTAD & CO.

SUNDAY SCHOOL RALLY DAY.

Rally day in the interests of the Sunday school of the First Methodist Episcopal church will be observed next Sunday, Oct. 10, at 2 p. m., the hour of the regular session. A special program will be rendered by the children and young people. In the evening the pastor will give an address upon seven phases of Sunday school work. A cordial invitation is extended to all, and especially to parents, to attend both these services.

See the Printz coats—we are sole agents for same. (10-8-2d) JOS. SELLWOOD & CO.

Our five and ten-cent department, just opened, is a revelation. Bargains galore. (10-8-4d) F. BRAASTAD & CO.

Ladies' and children's gun metal shoes, both high and low tops. (10-8-2d) JOS. SELLWOOD & CO.

SEWER FOR WEST JOHNSTON STREET

COUNCIL INSTRUCTS COMMITTEE TO PREPARE DIAGRAMS AND AN ESTIMATE OF COST OF WORK FROM LAKE STREET WEST.

The council decided Wednesday evening to extend the sewer to the western end of Johnston street, from the intersection of Lake street. The committee on sewerage, in conjunction with the board of public works, was instructed to prepare diagrams and make an estimate of the cost of the work, reporting at the next meeting.

The pay rolls and bills for last month are heavier than usual, the total being \$14,537.39. The pay roll accounts are as follows: Official, \$1,900.00; highway, \$3,278.82; water, \$1,138.82; sewerage, \$1,170.00. The total bills charged to the several funds were: General, \$598.33; street lighting, \$837; fire, \$261.72; cemetery, \$54; police, \$2,111; library, \$301.97; sewerage, \$1,822.32; highway, \$2,282.54; water, \$3,278.84.

Charles Ayotte and seven other residents of Washington street, in the so-called Junction location, asked for an extension of the water main to that locality. The wells in use there have been condemned by the health officer. The petition was referred to the committee on water works.

Alderman Sliney, for the committee on finance and taxation, reported that he had examined the trial balance sheets of the treasurer and recorder and found that they agreed, outstanding checks considered, and that there was in the city treasury Oct. 5 the sum of \$29,727.11.

On recommendation of the committee on streets and alleys, the Swedish Lutheran church society was granted a rebate of \$12.32, representing 20 per cent of the cost of putting in 555 square feet of concrete walk.

On recommendation of the committee on street lighting, arc lamps will be placed on the corner of Wabash and Third streets, on Park street between North Fifth and North Seventh streets; on West Division street, at the corner of Division and First streets. The recommendation was in response to requests from residents on various streets where the lamps are to be placed.

On recommendation of Aldermen Barnett and Gill, members of the committee on water works, the petition of John Peterson, 603 Vine street, asking for tree water, was denied. Mrs. Rosa Fornell, 167 Excelsior street, will be exempted from the payment of water tax until the first of next July, on recommendation of the water works committee.

The committee on sewerage recommended that August Gothe be given the privilege of paying for his sewer assessment on lot No. 9, in the Curry addition, in five annual installments, with interest on deferred payments at the rate of 7 per cent per annum. The recommendation was concurred in.

Alderman Ayotte, for the committee of police, presented the September reports of the municipal judge and poundmaster. The total amount collected was \$206.43. Of this sum \$37 was paid the county treasurer on account of fines, leaving a balance of \$169.43. The poundmaster reported that he had impounded twenty-four animals, collecting \$16.

Ladies' and men's new neckwear in abundance. (10-8-2d) JOS. SELLWOOD & CO.

We have opened a big five and ten-cent department on our first floor, formerly crockery department. (10-8-4d) F. BRAASTAD & CO.

CARD OF THANKS.

To the many friends who expressed sympathy and in other ways aided and comforted us during our recent bereavement, we wish to return our sincere thanks. We feel under obligations to all who aided us, and we feel particularly grateful to neighbors, and to friends for floral offerings.

LOUIS ERICKSON, and Family.

MANY HOMES MADE HAPPY

Only two more classes at the free baking school.

Butterly baking is what you become accomplished in when you secure the help and information imparted by Miss Goggin at the free baking school in the vacant store at 102 Main street, baking that is light and airy as the crest of the wave—sparkling in crispness—delicious in flavor—every mouthful nourishing. Such baking, such delight is attainable every time if you secure the helpful suggestions given by Miss Goggin and use K. C. Baking Powder as she directs. It's great economy, efficiency and all around excellence are sure to commend themselves to your favor. Don't pass lightly the recommendations of your friends who are saying such nice things about K. C. but do as they did—get a 25c can and try it—bring the certificate to the baking school and get your "Cook's Book." You will say as they do: "I was surprised"—and am so pleased that I tried K. C. There are no words of praise adequate to express all the pleasure its use entails. Don't neglect taking advantage of the opportunity as is imparted at the baking school and learning all that K. C. Baking Powder really means to you. The "Cook's Book" can also be recommended to you. It is safe to claim that its equal has never been offered to anyone before, and its possessor will gladden the heart of any housewife. Every recipe in it is a gem, and the changes, from the old dishes you have been using, that these receipts make possible is sure to be appreciated by you.

Don't neglect being present at Friday's class, when Miss Goggin makes the following dishes for your delectation: Nut cake, date muffins, nut bread, cream coconut cookies.

Please bring in your certificates as soon as possible.

K. C. is an honest taking powder, sold at an honest price; it wins you when you try it.

CURBING TO BE PAID FOR WITH TAXES

NUMBER OF FEET OF CURBING BUILT AND AMOUNTS TO BE ASSESSED AGAINST PROPERTY OWNERS REPORTED TO THE COUNCIL LAST NIGHT.

In addition to building several thousand lineal feet of concrete walk the last two months, William Treblecock, the contractor, also put in a large amount of curbing, the work being done principally on East Ridge, West Euclid, North Third and Ely streets. Under the contract awarded by the council a few months ago, Mr. Treblecock will be paid twenty-five cents per lineal foot for this work. Of the total sum, two-fifths will be paid by the city, and three-fifths by the property owners. It is optional with the property owner whether they pay Mr. Treblecock the full amount due for the work, then receiving a rebate of two-fifths from the city, or pay the three-fifths in December when the taxes are collected in December. No money expressed a desire to have the cost of the curbing charged to their tax account that the board of public works prepared a statement, which was presented to the council at its regular meeting last evening, showing the number of feet of curb built, the total cost of the same, the rebate allowed by the city and the sum to be charged to the property owners, and recommended that the latter be collected with the taxes. The property owners coming under this head, together with the number of feet of curb built, its total cost, and the amount to be collected are as follows:

Table with columns: Name, No. of Feet, Total Amount, and Paid by City. Lists property owners and their respective curbing amounts and costs.

The report of the board of public works was not approved last evening, for the reason that two-thirds of the aldermen-elect were not present, a two-thirds vote being required, according to the city charter. The matter will be taken up at the next meeting.

Pay an early visit to our new five and ten-cent department. You will find articles there that you may times paid from fifteen to thirty cents for. (10-8-14) F. BRAASTAD & CO.

ISHPEMING IN BRIEF.

A. W. Myers, who spent the greater part of the past month in the city, has returned to Milwaukee.

Mrs. F. P. Tilton entertained the members of the Luncheon club Wednesday afternoon at her home on Barnum street.

Mrs. W. W. Graff entertained Ishpeiming and Neguinee friends yesterday afternoon with cards. She will entertain again this afternoon.

Albert Terrill of this city was injured Monday at the Mary Charlotte mine in Neguinee. He was caught between a car and some timber, sustaining fractures of two ribs, also several bad bruises.

John Meaban, oldest son of Mrs. M. Meaban of Greenwood street, submitted to an operation for appendicitis Tuesday at St. Mary's hospital at Marquette. He is reported as getting along very well.

The Dougherty Stock company, playing this week at the Ishpeiming theater, will produce "La Belle Marie" tonight. The management considers that this is the strongest play in its repertoire, and special scenery is carried for it. The company will close its engagement tomorrow night.

The employees of the Cleveland-Cliffs Iron company will be held this month in Cleveland, Cleveland Lake and Hard Ore, Wednesday, the 13th; Cliffs Shaft and Salisbury, Thursday, 14; Maas, Neguinee, Jackson and North Lake, Friday, 15; Swanzy district, Saturday, 16, and the Imperial, Monday, 18.

The Ishpeiming branch of the Nelson Morris company will be closed today in honor of the funeral of the late Mrs. Nelson Morris, which is to be held in Chicago, Mrs. Morris died about three weeks ago in Paris as a result of injuries received in an automobile accident. All branches of the great packing concern will suspend business in respect to her memory. The husband of the deceased died about a year ago.

Mr. and Mrs. Samuel Reynolds, who have visited relatives in the copper country and here the past three or four weeks, will leave this morning for their home at Plymouth, Pa. Mrs. Reynolds is a sister of Mrs. G. Eickel of High street. Mr. Reynolds resided in Ishpeiming prior to forty years ago, and had not been back here since then. He worked at the Late Superior mine during the greater part of the time he was a resident of the city.

Dominick Umbrello, a resident of the Salisbury location, secured a phenomenal yield of potatoes in his garden on the hill near the Salisbury engine house. He planted a bushel and a peck, and took out sixty-three bushel. He did not expect to secure more than twelve or fifteen bushel, which has been about the average yield to each bushel of seed that he and others planted in that territory the past few years. It is thought that this is the biggest yield of potatoes that has ever been secured in this city.

"Woolnap" blankets, crib blankets, cotton blankets, strictly all-wool blankets and comforters in a better assortment than ever. (10-8-24) JOS. SELLWOOD & CO.

JOB'S AFFLICTIONS PALED.

Leonora O'Reilly, the vice president of the Women's Trade League, was praising this organization's work in "New York."

"And it has a great future before it," she said. "I have no doubt that a century hence the members of the league will regard the woman of to-day as we now regard the farmer's wife of the early 40s."

"A Maine deacon of the early 40s, was talking to the minister. He snuffed and whined:

"Oh, yes, Job suffered some. I ain't denyin' that, parson. But Job never knowed what it was to have his team run off and kill his best right in the midst of the harvest season, with hired girls wantin' \$2.50 a week!"

An indication of Gaynor's independence that he will have no campaign manager, but will conduct his own campaign from his home. That is hardly Tammany's way of doing things, and will not lend itself very well to any plans that Murphy may have of tying his candidate up with the organization during the campaign so that he may find it difficult to break away after the campaign is over. The result is that people are not thinking so much as to what Tammany might do from the mayor's office if its ticket is elected as what Gaynor might do. There is no doubt of his ability and courage to kick Murphy, metaphorically, down his front door steps, and to make this his plea before the people with respect to the next office that he may desire. He could not even be charged with ingratitude in so doing, as McCellan was when he quarrelled with the boss for Gaynor by his assumption of independence and his original nomination by outside organizations can always claim that he accepted the Tammany nomination free to do as he liked for the people of the city. He has, indeed, already made such an assertion.

So the contest, so far as the majority is concerned, is between the personality of Bannard and that of Gaynor. It is this fact which makes one regret the more that the contest and one did not find itself at some date prior to the Republican city convention, so

GAYNOR IS FOR GAYNOR.

New York Nominee's Own Interests His First Consideration.

He Is Not Likely to Obey the Tammany Organization—Hopes by Independence to Be Governor—Murphy, However, May Control the Other Candidates.

New York, Oct. 7.—Now that the tickets are nominated and people have had an opportunity to think about the candidates offered for the city offices, the impression strengthens that Tammany will have a hard fight on its hands to keep the reins of government for another four years. The nomination of Otto T. Bannard for mayor by the Republican convention gave an entirely new turn to things, and although Murphy was known to be inclined to Judge Gaynor as the head of the Tammany ticket long before Bannard's name was considered a serious possibility, the naming of Bannard made Gaynor's nomination inevitable. It would not do to go into the fight with any such organization candidate as Justice Dowling. That would have meant a Tammany defeat, the proof of which fact came in the taut of the far-seeing McCarren in the Carnegie Hall convention. He declared openly from the floor that Tammany was forced to name Gaynor out of desperation.

Of course Mr. McCarren was not happy at the moment. In Gaynor he was about to have a candidate whom he must go through the form of supporting, knowing perfectly well that Tammany elected, would do everything in his power to make himself and not McCarren, the boss of Brooklyn. McCarren was also seeing the controlship leave Brooklyn, in the retirement of Herman Metz in favor of H. C. Moore. But McCarren had already declared for Gaynor in order to save his face when convention time arrived and Gaynor's name was presented by Edward M. Shepard, one of the Brooklyn delegation. So that his remark was made as a Gannor man and may not be taken as expressing his belief.

A glance at the situation in which Mr. Murphy finds himself after the Gaynor nomination will add conviction to this idea. Murphy, as a matter of fact, does not like Gaynor, and he would rather carry his lim. He knows perfectly well that the Brooklyn jurist is for Gaynor all the time and with well defined gubernatorial ambitions (they are several years old) he is not at all likely to take orders, or even suggestions, from Fourteenth street. In this, in a great measure, lies the strength of Gaynor as a candidate. Those who vote for him outside of Tammany ranks, are likely to do so for one or two reasons; either because they believe he is a progressive reformer who welcomes the opportunity to force Tammany Hall to elect a good man to office, or else because they think that Gaynor's ambition for higher honors will keep him straight and independent. The former are banking upon his public spirit and the latter upon his intelligence.

Mayor McCellan had that opportunity and lived up to it to the extent of getting into several promising rows with Murphy. But nothing ever came of any of them. The voters who supported McCellan in the belief that his ambition would keep him free from the influences of the wigwag were disappointed in not finding him a big enough man to play the game for all there was in it. When McCellan has not been quarrelling with Murphy he has been dictating with the whip and that sort of thing kills confidence among voters quicker than anything else. With Gaynor there is reason to believe no such vacillating policy will be followed, for Gaynor is a far broader man than McCellan and one who has showed himself a keen judge of public opinion.

An indication of Gaynor's independence that he will have no campaign manager, but will conduct his own campaign from his home. That is hardly Tammany's way of doing things, and will not lend itself very well to any plans that Murphy may have of tying his candidate up with the organization during the campaign so that he may find it difficult to break away after the campaign is over. The result is that people are not thinking so much as to what Tammany might do from the mayor's office if its ticket is elected as what Gaynor might do. There is no doubt of his ability and courage to kick Murphy, metaphorically, down his front door steps, and to make this his plea before the people with respect to the next office that he may desire. He could not even be charged with ingratitude in so doing, as McCellan was when he quarrelled with the boss for Gaynor by his assumption of independence and his original nomination by outside organizations can always claim that he accepted the Tammany nomination free to do as he liked for the people of the city. He has, indeed, already made such an assertion.

So the contest, so far as the majority is concerned, is between the personality of Bannard and that of Gaynor. It is this fact which makes one regret the more that the contest and one did not find itself at some date prior to the Republican city convention, so

Chi-Namel Demonstration

Commencing Thursday, Oct. 7

We have arranged with the manufacturers of Chi-Namel, who are also patentees of the Chi-Namel Graining, Staining and Varnishing Process, to have one of their expert demonstrators spend a few days with us for the special purpose of teaching our trade to use the little tool and furnish our patrons free of cost, expert instruction in the treatment of interior wood work.

This will be a rare opportunity for the ladies to learn how to grain and varnish their own floors and wood work. Chi-Namel graining will outwear the ordinary floor varnish many times over.

BOY BEATS WAY FROM EGYPT TO NEW YORK

Youngster, Aged Fifteen, Dead-Headed a Trip Half Around World.

Philadelphia, Oct. 7.—Animated by an intense desire to see the place of his birth, Michael Ellis, fifteen years old, has just completed a journey of thousands of miles. He achieved his object solely through his boyish ingenuity, and now that his wish has been realized, he is willing to return to his parents. He left his parents in Cairo, Egypt, last January, determined to reach New York city, where he was born. Last night, tired, dirty and hungry, he was picked up by the police in this city, shortly after he had landed here on a freight train. This morning he will be taken to the British consulate and will probably be sent back to London, where he has relatives. He does not know where his parents are, and says they must have given him up for dead long ago.

"My father was a newspaper man in New York city from 1882 to 1894, although he was born in England," said Ellis. "I was born in New York. When my father went back to London he was appointed a secret service officer and assigned to Cairo, Egypt. I always wanted to see New York, and last January, when I heard the American fleet was in the Suez canal, I left home, went there and tried to enlist. I did not tell my parents where I was going. I was refused on account of my age. When I jumped on a freight train I found that my father had been transferred to a point 600 miles away, so I returned to the Suez canal."

AUTO GAVE OWNER HAIR CUT.

His Wife Starts Machinery While Hubby Is Fixing a Wheel.

South Norwalk, Conn., Oct. 7.—Robert A. Mathewson spent an exciting half hour on the floor of his home when the rear wheel of his automobile revolved rapidly against his neck and the lower part of his head, snapping off his hair and digging a furrow into his flesh. He escaped serious injury because his head was on one side of the wheel and his shoulders on the other.

Mrs. Mathewson had brought about this unpleasant predicament for her husband by fooling with the mechanism of the machine. She finally threw in the reverse clutch and the machine gave a leap backward, knocking down Mr. Mathewson and pinning his throat against the floor and the wall.

While he was struggling with his wife to pull out the spark plug, but she was past adding him. As soon as she realized what she had done she fell in a faint. Mathewson yelled and struggled in vain. His foot on his head cut the side of his head for fear of breaking his hand and he could not reach any of the rigid parts of the automobile with hand or foot to roll it far enough away to escape. He was unable to get the spark plug out, and he could not get the side of his head out of the way. He did manage to get the spark plug out, but he was unable to get the side of his head out of the way.

The automobile mechanism never worked more perfectly since he bought it. Mathewson was sitting in the driver's seat of the car when the accident occurred. The car was moving at a high speed, jumping sideways a little now and then and grinding down its front end until he could move no part of the car. The side of his head was pinned against the hub and gave the machine a push, but he was back on his neck like a flash.

The automobile mechanism never worked more perfectly since he bought it. Mathewson was sitting in the driver's seat of the car when the accident occurred. The car was moving at a high speed, jumping sideways a little now and then and grinding down its front end until he could move no part of the car. Laugh and the world laughs with you, unless you are laughing at the world.

PRITTS PUTS PANTS ON AD.

Irish Churchman Saves City from the "Viciousness of Infantile Nudity."

London, Oct. 7.—A pope in Rome once (crossed) Michael Angelo's nudes. A parish priest in Ireland now has trousersed a nude baby boy in a soap firm's advertising posters.

The poster represents a chubby little baby boy throwing over his shoulder a smiling look of triumph and satisfaction as with a cake of soap in hand he stands up against a chair upon which a washing bowl is placed.

Bill Posters Tell Story.

The minutes of the recent meeting of the association of Drogheda Bill Posters tell a story of how the city was saved from the vicious influences of infantile nudity. An urgent meeting of bill posters was held one evening at the Rev. Father John Curie called upon the clerk of the association in reference to the poster, stating that he and the bishop considered it indecent, and urged the immediate covering up of its nudity.

In Drogheda the authority of the parish priest, backed by the bishop, is something that even the strongest organization of billstickers has to consider.

Deny Damage to Morals.

Replies were received from Dublin, Belfast, London, and Cardiff to the effect that the morals of those cities had not suffered by the display of posters. At a subsequent meeting, however, it was reported that Rev. Father Curie was implacable. He insisted on the posters being either withdrawn or rendered unobjectionable, and he gave the association twenty-four hours in which to do this, otherwise he threatened to order the men to pour paraffin over the billboards and burn them.

WANTED!

A CASE OF ECZEMA. Scrofula, Salt Rheum, Foriasis or Ulcers that has baffled all doctors or failed under other remedies. Dr. Taylor's Eczema Remedy will positively cure it—the worst kind of a case—or no pay.

Test and Testimony.

Dear Sirs:—I have purchased your Eczema Remedy of the Miller Drug Co. in Trenton, since last summer, and do not hesitate to say I have found it the best thing I have ever tried. My leg was a mass of sores from the knee to the instep, and on my feet when I began using your remedy. Now it is entirely healed. I shall always recommend your medicine whenever I hear of one who is afflicted with Eczema. Respectfully yours, Wilson L. Cadwallader.

CURE GUARANTEED.

IRONWORKERS STAND FIRM.

Amalgamated Men Feel They Are Winning Big Strike.

They Will Suffer No Hardships This Winter—Many Contributions to the Defense Fund—Move to Unionize the Whole Industry Is Now Under Way.

Pittsburg, Pa., Oct. 7.—After being on strike for three months against the open shop program of the American Sheet & Tin Plate company, the Amalgamated Association of Iron, Steel and Tin Workers are as firm and resolute as when they were on July 1 last, when they deserted the sheet and tin mills. Not only are they determined not to yield an iota so far as the open shop is concerned, but they are now prepared to carry the battle still further. In other words, the work of unionizing the hitherto non-union mills of the United States Steel corporation is under way. This week President P. J. McArdle issued a circular letter which is now being sent to every employe of the steel corporation. The letter in part says:

"Beginning with the blast furnace industry and running through all the departments of the steel industry, including tube, structural, rail, bar and other departments, there is a condition of absolute helplessness on the part of the workers that makes the application of the law of self-preservation an impossibility. This condition of helplessness is the natural effect of a cause. And the cause is disorganization among the workers. Believing that the men of the steel and iron industry realize the crying need of organization, the Amalgamated Association of Iron, Steel and Tin Workers is extending an invitation to all blast furnace, tube works and steel mill employes to join in the work of cementing all the workers of this great industry in a powerful organization for their mutual protection and welfare. It is hardly necessary to point out the wisdom and necessity of such action on the part of the workers at this time when the powerful capitalized corporations, headed by the billion dollar Steel Trust, are reaping such rich rewards from the toil of the workers.

"These profits are possible only because the trust is complete master over its thousands of employes, and dictates absolutely the wage rates and conditions of employment. The trust can do this only because its employes are unorganized and can therefore offer no resistance. To prove this we have but to call attention to the relative wages paid in the mining industry of Allegheny county, Pa., and the wages paid in the steel industry of that county. Mine laborers receive \$2.36 for eight hours work, while the steel mill laborers receive only \$1.75 for twelve hours work. The skilled labor is paid relatively better in the mines than in the steel industry. The reason for this is that the men in the mining industry have a strong organization embracing all the men around the mines, while the men in the blast furnaces and steel plants act as individuals and are helpless against an oppressive corporation. There is but one way to relieve this situation for the men in the iron and steel industry. That way is to organize them into one powerful organization, embracing all branches of the steel and iron industry, beginning with the blast furnace workers. Forget that you are English, Irish, Welsh, Slavish, Polish, German, Croatian, Italian or Hungarian. Remember always that you are a working man, with interests in common with, and inseparable from, those of all other workmen. Let your motto be—An injury to one is the concern of all."

"John Williams, secretary-treasurer of the Amalgamated association, said today: "Never has the Amalgamated association been in a better position to maintain the strike that we are engaged in. We have received financial aid from scores of unions throughout the country. We are in this battle to win, and never have our chances of victory been so rosy. I want to say emphatically that every member of our union who is on strike will be cared for this winter, and this applies also to those who are dependent on our members. We mean by this to say that no Amalgamated man who is on strike or any of his dependents will need to suffer this winter. All over the country organized labor is rallying to our defence, as they realize full well that if we are beaten by the steel corporation it means the setback of organized labor for years to come. A most satisfactory condition is reported to our office from New Castle, Pa., where 2,800 men went out on June 30 last. Up to the present date only seven men accepted the overtures of the company and went back to the mills. It is told us on reliable authority that the tin and sheet turned out by the American company by non-union men is not up to the standard, and that many shipments are returned to the plants as unsatisfactory. The independent sheet and tin mill companies who signed our seals are reaping the benefit, as they are operating their mills day and night in order to supply the urgent demand."

"Between nine and ten thousand sheet and tin mill workers are affected by the strike.

ONE FINDS PLEASURE IN STUDY OF FACTS. A more than profitable way of entertaining one's self while riding downtown of a morning is to scan the faces of the women passengers on the other side of the car.

At least one-half of them have that tired, worried look. Watch them intently for a minute or so, and it will get on your nerves. Then glance at the other women whose expressions are pleasant. Isn't it a relief? Just because these pleasant-looking women are pleasant looking is not an assurance that they ought to look pleasant.

For all you know, the woman at the end of the car with the most serene of expressions, is worrying about a thing a thousand times more vital than that which troubles the sour-faced woman across from you. One woman has acquired the art of looking pleasant and the other has not. If the woman only knew it, one of her chief charms is a placid, pleasing expression when her face is in repose. The average woman finds it easy to look pleasant when her shoes pinch or an unreasonable pin is making its presence felt; but she gives up in despair if the cause of her unpleasant expression be mental worry. If one gives up to the minor worries that can be helped a picture by

Try This in November.

Thousands upon thousands of families who have not been regular eaters of Quaker Oats will begin on the first of November and eat Quaker Oats once or twice every day for thirty days of this month; the result in good health and more strength and vigor will mean that every other month in the year will find them doing the same thing.

Try It! Serve Quaker Oats plentifully and frequently for the thirty days of November and leave off a corresponding amount of meat and greasy foods. You'll get more health, more vigor and strength than you ever got in thirty days of any other kind of eating.

While you are trying this see that the children get a full share. Quaker Oats is packed in regular size packages and large size family packages.

worry, her features become set in unpleasant lines. Look your troubles squarely in the face and resolve firmly not to let them worry you sufficiently to stamp their lines of displeasure upon your face. A course of prevention of this sort is worth several pounds of beauty cures.

EXPENSIVE MOSQUITOES.

They Keep One of the Most Fertile Regions of the Earth from Cultivation.

The richest soil in the United States, excelled only by the productivity of the Nile Valley, is the Delta region in Mississippi. Some day, says Professor Glenn W. Herrick, it will be the richest and most populous region in the Union. It lies along the western part of the Yazoo river north nearly to the Tennessee line, and outside of Egypt it has no agricultural rival in the whole world. Yet rich as it is and great as are its possibilities, the scourge of malaria has kept much of it in its primitive wild forest, barred out immigration and lowered the price of the land down to a mere fraction of its intrinsic value. Land hungry as the average American has been for generations and still is, yet he cannot successfully face the peril of malaria, with its toll of shortened life, lessened efficiency and ultimate death. It is a matter of record that the thousands of people who would hasten to aid in making this region the most productive in America are kept away by the malaria mosquito.

It is the reason why thousands of acres of the most fertile land on the continent, easy of access and close to good markets, are today the haunt of deer and bear. It is the reason why the enormous toll the South pays to malaria. No one other thing has done so much to retard its progress. Professor Herrick, formerly connected with the College of Agriculture of Mississippi, says:

"We must now consider briefly what 635,000 or 1,000,000 cases of chills and fever in one year means. For laboring men it means an immense loss of their time, together with the doctors' fees in many instances. If members of their families other than themselves are affected it may also mean a loss of time, together with the doctors' fees. For the employer it means the loss of labor at a time perhaps when it would be of greatest value. If it does not mean the actual loss of labor it means a loss in the efficiency of the labor. To the farmers it may mean the loss of their crops by want of cultivation. It will always mean the non-cultivation or imperfect cultivation of thousands of acres of valuable land. It means a listless activity in the world's work that counts mightily against the wealth-producing power of the people.

IN A SENATOR'S SEAT.

When a Tailor Walked Into August Chamber and Occupied a Desk.

The American people once elected a tailor to the presidency, and doubtless many manipulators of the shears and goose have sat in the seats of the mighty by election, but only once, according to reminiscences and anecdote, did a tailor make himself at home on the floor of the United States Senate when he had no constituency to represent.

The tailor was Hermann Moritz Riedel of Philadelphia, who came to Washington in April, 1868, to attend the exciting scenes during the impeachment proceedings against Andrew Johnson, a fellow craftsman. And this is the account of how he witnessed these proceedings as published in the Washington Republican of that day:

"A good looking Teutonic friend of ours a day or two since made an earnest appeal to our Muggins for a ticket to the Senate to listen to what was going forward at the impeachment trial. Muggins, as is his wont, in the kindness of his soul, consented to furnish Teuton with the talismanic pasteboard which effects the open sesame to the senate chamber, and also assured our friend that he would accompany him to the gallery and find him an eligible seat. Muggins and Teuton started to work their way in, but Muggins was detained outside of the door for a few moments and our German friend went on and passed the vigilant sentinels at the outer door and went directly to the entrance of the senate chamber and was admitted by the gentlemanly ushers under the belief, probably, that he was a member of congress, and passed through the vestibule and took his seat in the first vacant chair, and there remained during the entire session in the confident belief that he was entitled to the seat."

The descendants of Hermann Riedel are living in Washington now. The tailor, who was a "topnotcher" at his trade, according to all accounts, died in 1877, having declined a pension after faithful service as a major during the Civil War.—Washington Post.

SNAPS PICTURES OF BITTER DUEL.

Parisian Photographer Obtains Views While Concealed in Ferris Wheel.

Paris, Oct. 7.—One of the fiercest duels witnessed in Paris in many years was fought in the shadow of the Grande Roue, as the Ferris wheel is called, between Captain Ange and Captain Gerard, both of the Fiftieth regiment of the line and known as the most expert swordsmen in the French army.

A novel feature of the contest was the presence of a photographer, who was unsuspected by the combatants or the seconds. He smuggled himself into one of the cars of the big wheel, from which unseen he took numerous pictures as the encounter was caused by no romantic misadventure. Differences of opinion on political subjects, out of which sprang recrimination and insults, were the sole cause of the spectacular meeting on the field of honor. Captain Ange accused Captain Gerard of adhering to socialism so strongly that he had addressed a meeting of workmen. "You lie," answered Gerard calmly, whereupon Captain Ange slapped his face.

In order to wipe out this insult in blood the officers met at an early morning hour on the sanded field under the great wheel which has become a favorite meeting place for duelists. The conditions of the duel were rounds of three minutes each, with an interval of rest. The men attacked each other here. Several other spectators, each men were wounded, but refused to stop until the beginning of the eighth round, when Captain Gerard made a sudden leap forward.

Captain Ange tried to catch his opponent's sword on his blade, but it was too late for the point passed neatly through his wrist. The wound placed him in such an evident state of inferiority that the seconds stopped the combat. The duelists left the ground without speaking.

One of the spectators was Professor Thonaguess, the champion professional swordsmen. He said afterward: "Never in my long experience have I ever seen two men display more magnificent skill with swords. They were evenly matched and both of equal courage and determination. Of all the duels I have seen none can compare with this one."

WONDERFUL LEAPS OF SALMON.

Jumps 20 Feet Sometimes in Scaling Water Falls and Cascades.

Portland, Ore., Oct. 7.—Of all the fish that swim in the waters of the earth, none is more wonderful than the salmon. Like the silkworm, the salmon goes through several changes before it becomes full grown, ready to sport in the briny deeps, as gaily as the butterfly flits in the balmy summer air.

Salmon choose mates just as birds do, and, like the birds, they seek out a safe place to build their nests. When a pair of salmon have found a suitable sheltered nook, they set to work together to dig in the sand a nest eight to nine inches deep. When it is finished the mother salmon lays the eggs in it, and the father salmon covers them over with sand to protect them. Then they swim back to the sea, for they know that the warm sun of spring will hatch out the eggs without further care. Salmon always choose their nesting-place up a river, although they themselves love the deep ocean best. They know that baby salmon cannot live in strong salt water.

When the salmon go up the rivers to seek their spawning places they let no obstacle stay them, not even a waterfall as high as 20 feet. There is such a one at Leixlip, near Dublin, Ireland, and the country people make a holiday in order to see the salmon leap this great height by their wonderful leap they seek the upland waters.

THE COST OF LIVING.

But Most Trust Prices Are Said to Be Left Far Behind.

The cost of living, which has been increasing so rapidly for most of the last thirteen years is again advancing but the slightly lower levels brought by the depression of 1908. All through the past summer the prices of the necessities of life have been slowly advancing, reaching on August 1 the highest figure reported for that date since 1907.

The average cost of the supplies practically every household must buy has increased over forty-nine per cent since 1896, but the Review of Reviews remarks that it is "rather interesting" to note in the Bradstreet statistics that the commodities controlled by the trusts have generally shown a smaller increase in price than the average.

Thus refined petroleum sold in 1896 for 7.8 cents a gallon and the wholesale price now is 8 1/2 cents. Sugar cost in 1896 4 1/2 cents a bushel and now 4.85 cents. Anthracite coal in 1896 cost \$4.25 a ton and is now \$4.90. The Bradstreet agency has selected 106 articles of domestic consumption and has kept a careful record of their prices month by month for seventeen years. The highest point ever reached was in March, 1907, after which came the moderate slump caused by the financial disturbances of that year. We are now marching steadily back toward this high record and the August figures are only 0.8 per cent below it.

Some of the individual cases of increased costs are much more impressive than the average. Rubber has advanced from 81 cents a pound in 1896 to \$1.98 a pound now; pork from 88 to a barrel to \$217.50; eggs from 12 1/2 cents a dozen to 28 cents; mutton from 3 1/2 cents a pound to 11 cents; corn from 34 cents a bushel to 80 cents; wheat from 64 cents a bushel to \$1.20, and so forth. The figures given are wholesale prices, and as a rule the advance to the ultimate consumer has been decidedly greater.

NEGAUNEE

DEER LICENSES READY.

Negaunee Sportsmen Will Soon Begin Preparing Their Camps.

The Negaunee men who will handle deer licenses this fall are already taking orders, and it is expected that about the usual number will be issued. The Negaunee sportsmen will be able to secure licenses from either William Beran, W. H. Mitchell or Irving Argall. Mr. Beran said yesterday that he had already received a number of applications, in spite of the fact that the season will not open for over a month yet.

A number of Negaunee men have the woods during the past few weeks. Those who hunt deer will have to go out a long distance for them. Some of the sportsmen plan on making their headquarters from five to ten miles farther back in the woods than last year. Several Negaunee men have very comfortable camps within a reasonable distance of the city that they have occupied during the hunting season for some years past, but the deer are now so scarce nearby that several of them plan on hunting in new places. Some of them will build temporary shacks in the more remote sections.

In view of the encouraging reports received from the Flatrock district southwest of here, a number will hunt here. Several other Negaunee parties plan on hunting between Clovery and Huron Bay, and others will visit to the region south of Swaney.

No false pretense has marked the career of Ely Cream Balm. Being entirely harmless, it is not responsible like the catarrh snuffs and powders, for minds shattered by cocaine. The great virtue of Ely's Cream Balm is that it speedily and completely overcomes nasal catarrh and hay fever. Back of this statement is the testimony of thousands and a reputation of many years' success. All druggists, 50c, or mailed by Ely Bros., 50 Warren street, New York.

The averages weight of the heart is from nine to 11 ounces.

STILL SHIPPING BERRIES.

About Five Cases a Day Now Being Transferred Here.

So far as the agents of the express companies here can ascertain, Grand Marais is now the only point in the upper peninsula from which blue berries are still being shipped. The frost has killed off the berries at practically all other points and it is also reported that the shipments have ceased in both Wisconsin and Minnesota. Only a few cases are now being transferred daily from the South Shore to the Northwestern railroad here. Three weeks ago the daily shipments exceeded 100 cases.

The season opened ten days later than usual this year and it has now run about ten days beyond the usual time for closing it. As a rule the blueberry season closes the latter part of September, but occasionally it runs a week or more into October. J. Ewald, who had several buyers in this field this season, and who manufactured crates and boxes at Ishpeming, made his final shipment of berries from there about two weeks ago, when he left for his home in Minneapolis.

From several points the season was reported to have been the best that they have ever had, but the total output from the upper peninsula, district fell several thousand bushels short of three years ago, which was the banner year. The early crop in the district north of Ishpeming was completely destroyed by frost the latter part of August and the berries along the line of the Northwestern road, south of here, were also damaged at that time, though many of the berries remained to gather the second crop, which ripened the latter part of the month, but which was destroyed by the frosts in September. It is reported that over 7,000 cases have been shipped this season from Grand Marais.

It is in time of sudden mishap or accident that Chamberlain's Liniment can be relied upon to take the place of the family doctor, who cannot always be found at the moment. Then it is that Chamberlain's Liniment is never found wanting. In cases of sprains, cuts, wounds and bruises Chamberlain's Liniment takes out the soreness and drives away the pain. Sold by The People's Drug Store.

The Chinese pupil reciting the lesson turns his back to the teacher.

LOCAL LAGONICS.

O. A. Riley and wife of Nondak, Ct., were Negaunee visitors yesterday.

The members of St. John's church choir are requested to meet this afternoon at 1:30 sharp in the Guild hall.

George Metherell, wife and child, left Wednesday night for Detroit and Cleveland, to be absent three or four weeks.

Sid Lester, representing Albert Pick & Co., dealers in hotel and buffet china and glassware, was in the city yesterday.

The employes of the Cleveland-Cliffs iron company at the Maas, Negaunee and Jackson mines, will be paid a week from today, the 15th.

Mayor J. H. Winter is expected home today or tomorrow from Canada, where he spent a week or so hunting moose in company with some Chicago friends.

Will Maas arrived home yesterday after an absence of a week. He was accompanied by his brother, Dr. R. J. Maas of Hancock, who spent the day here visiting relatives.

D. S. Coomstock and wife were called to Forestville, Mich., yesterday on account of the death of her father, Ferdinand Hauch. The deceased was seventy-four years of age.

Judge Irving Argall and family moved yesterday from the Thuron dwelling on Jackson street to rooms in the second story of the brick building, immediately east of the Cyr block, on West Iron street.

Albert Terrill of Ishpeming, who is employed at the Mary Charlotte mine, was caught between a car and some timbers Monday, sustaining fractures of two ribs, also severe bruises about the chest and side.

The one story school building being erected in the Mary Charlotte district will be enclosed within the next two or three days. Members of the board of education expect to go down today, to inspect the work.

The bricklayers are making good progress at the new fire hall building. The window frames on the first floor were put in position yesterday, and it will not be many days before the walls will be up to the top of the first story.

Levine Bros. announce their fall coat and suit opening for Monday, Oct. 11. Gustave A. Keller, a representative of the firm of Landesman-Hirschheimer

company, of Cleveland, the well-known cloak designers, will exhibit a complete line on that day.

Bernard Barasa, formerly of this city, who has an extensive law practice in Chicago, is this week defending an Italian, who is accused of murder, in the circuit court at Crystal Falls. The case has attracted much attention on the Menominee range.

The funeral of the late Mrs. Max Croff who died Wednesday at the home of D. D. Smith at Palmer, will be held this afternoon at 2 o'clock from St. John's Episcopal church. The cortege will leave Palmer at 1 o'clock. The services at the church will be conducted by Rev. R. T. T. Hicks, the rector.

The Negaunee Tigers football team, which was recently reorganized will play the Marquette North Ends at the Marquette fair grounds Sunday afternoon. The Negaunee team has been together for six years, and it has won most of the games played. The Negaunee High school team will not have a game tomorrow. The Ishpeming and Marquette eleven will meet tomorrow afternoon at 2:30 o'clock at the Union Park grounds.

A ZERO COURTSHIP.

The Practical Young Man and the Girl from Boston had known each other for nearly two weeks, and two weeks is a long time when there are moonlight nights and a stretch of sheltered beach with an old wrecked schooner smuggling down comfortably in its sandy grave. It seemed as though they had known each other for years and years. The practical young man said so, and the girl from Boston, knowing him to be practical, agreed with him. One night, when a fleecy cloud passed accommodatingly across the moon, and the sheltered beach seemed even more sheltered than usual, and the old wreck was actually

resolvent of romance instead of far, on that night the practical young man so far forgot himself as to ask the girl from Boston if he might kiss her. "The girl from Boston shivered.

"Oh! Sir," she cried. "I have never been kissed in all my life."

"That's all right," said the practical young man. "Don't let that worry you. I suppose somebody has got to break the ice."—New York Times.

The electric railway up Mont Blanc is now open to the public as far as the Col de Voza, 5,495 feet high.

THE SAVINGS BANK

LEVINE BROS., Props., Negaunee, Mich.

Grand Fall Coat and Suit Opening

MONDAY

The ladies of Negaunee and the county are cordially invited.

We announce the presence of Mr. Gustave A. Keller with Landesman-Hirschheimer Co., Cleveland's foremost cloak designers, on Monday, Oct. 11th. We are advised by Mr. Keller that his showing depicts the grandest array of fall fashion this season portrays. His showing in Ladies' Coats and Opera Capes are decidedly beautiful.

FIRST NATIONAL BANK

NEGAUNEE, MICH.

UNITED STATES DEPOSITARY

Capital and Surplus . . . \$ 170,000.00
Total Resources . . . 1,392,948.68

If you are not a depositor wouldn't it be well to start now? When your money is in such a bank as this, you can always feel contented as to its safety. Such assurance is worth much and, again, it's quite a convenience as it acts as a record when you pay your bills by check.

Our safety deposit boxes are a source of great satisfaction to those using them for the protection of their valuable papers and jewelry.

Our savings department pays you 3 per cent interest. Our "Banking by Mail" booklet explains the advantages of the department.

OFFICERS:

A. Maitland, President. Geo. J. Maas, Vice Pres.

GERMAN RAILWAYS.

Their Defects Due to Their Military Character and the Empire's Poverty.

Three things must constantly be kept in mind in order to obtain a proper understanding of the German railway system. The first is that German railways are part of the scheme of national defense and aggression and an arm of the military power, dominated and controlled by the general staff as much as any other part of the German military machine.

Since 1870-71 considerable mileage has been constructed throughout the territory of the empire, but especially along the western frontier, solely from military considerations, with almost no regard to the probability of a successful exploitation from a commercial point of view.

Great and costly passenger stations have also been constructed at various junction points in the west, like Strasbourg, Frankfurt and Metz, out of all proportion to the size and traffic requirements of the cities which they serve, with trainsheds and platforms inordinately long and broad, for the quick mobilization of the army.

The second thing to remark is the continuously necessitous condition of the imperial exchequer. The empire practically never has much money. Accordingly, practically from the inception of their present imperial undertaking the Germans began to milk their railways and to absorb the earnings of the prospective lines for the benefit of the federal treasury.

The results of such financial tactics are obvious. In the first place, the property as a whole is not properly maintained; money that should be spent on betterments, reconstruction and rolling stock is diverted to the state treasury or expended too generously on the strategic lines. In the next place the service is generally poor throughout the country, taken as a whole, except as to a few of the great lines.

Necessarily the lines connecting the large towns must be decently maintained and are fairly well operated. But aside from this the lines are poor, the equipment meager and the service slow, irregular and inefficient.

A third result is that the rates are high, except as between certain great commercial centres and on through and export traffic. These rates are very low and inasmuch as the German lines make an enormous through traffic, that makes the reported average rates of the entire system seem low.

Operating expenses on German railways are generally high. About 1900

the figures for the different states ranged from 60 per cent to 78 per cent. One reason why the cost of operation is so large is that the number of employees is exaggerated.

This is inevitable under the administration by the state, because as a matter of politics everybody must be taken care of by the state and as many as possible must have employment on the railroads. Certain non-commissioned officers in the army when their term of service has expired have a right to employment in the railway service and must therefore have places found for them.

As far as passenger traffic is concerned it may be said that in general in the first and second classes one travels along the main lines very comfortably in Germany. Of the third and fourth classes it is not possible to say much by way of commendation. In the higher classes the carriages are almost always clean and the service and the servants satisfactory.

The express trains make a fair but not exceptional rate of speed. The best trains running on the line from Berlin to Hamburg, which is probably the most representative line in Germany, make the run of 286 kilometers, including three stops, in three hours and twenty-two minutes, which works out about eighty-five kilometers per hour. This is a straight line over a flat, level country.

To an American there is a certain amount of militarism in the operation. In addition to the regular fare one is called on to pay a small extra fee for his seat; this is collected after the passenger enters the train, for which he is given a seat with a number. Here he is expected to remain during the journey in a way very much like a dog in a kennel.

Whatever criticism may properly be made of German railway operation it is not too much to say that the defects of it are defects of the scheme, which is a bad one, and not of the personnel, which is a good one. Nowhere is there to be found a more competent or a more accomplished general railway staff than in Germany.—Stood's Magazine.

A LAVENDER TOWN.

One of the minor harvests that promise well is that of the lavender fields. I have seen some flourishing crops in the Hitchin neighborhood today. Comparatively few know of this quaint Hertfordshire town as an important lavender growing center, yet it has grown the sweet old herb (which the Romans called *lavandula* when they used it to scent their baths), has distilled the flowers and sent their extract into all parts of the world for more than a century. The Hitchin district had less rain and more sunshine than the London area during the month which has just closed, and consequently the long, trim rows of lavender plants in their dusky green look strong and healthy. They are beginning to show their flower buds, and there is every likelihood of an abundant yield at cutting time, which will be from three to four weeks hence. At cutting time people come in from miles around to inhale the sweetness of the fields, and when the distilling begins the fragrance of lavender is borne on the wind two miles or more from the town. The flowers are put into the still with the fresh bloom of their maturity on them, and from six pounds of such flowers about half an ounce of oil is extracted.—London Daily Mail.

Hoarseness in a child subject to croup is a sure indication of the approach of the disease. If Chamberlain's Cough Remedy is given at once or even after the croupy cough has appeared, it will prevent the attack. Contains no poison, Sold by The People's Drug Store.

Negaunee Department

PICKED BALL NINE GOING TO ESCANABA

ALL-STAR TEAM, COMPOSED OF FOUR NEGAUNEE, ONE MARQUETTE AND FIVE ISHPEMING MEN, TO PLAY SUNDAY AND MONDAY.

The baseball fans will be disappointed to learn that no post-season game will be played between the Ishpeiming and Negaunee teams Sunday. The players met Wednesday evening and selected what may be termed an "all-star" team from the three nines of the county, to play at Escanaba Sunday and Monday. In the line-up there will be four Negaunee men, one from Marquette and five from Ishpeiming. Scholtus of Marquette and Goulette of Ishpeiming will be the pitchers. Negaunee will be represented by McKay, catcher; Swick, second base; Fiedler, short stop, and Collis, third base. The only Marquette player will be Scholtus. The Ishpeiming men besides Goulette will be Larson as first, Simpson in center field, Burke in left and Gorman in right field.

"I think the ball players showed poor judgment in not arranging a final game for Sunday," said one of the supporters of the Negaunee team yesterday. "We wanted to see the Ishpeiming and Negaunee teams play another game, and I am surprised that the Escanaba management, successful in inducing them to go there. The players would have made more money by playing here Sunday than they will in their two games at Escanaba. We are entitled to a post-season game."

Another man, discussing the "all star" team, said that it is, with one or two exceptions, just the line-up he would select as being the strongest nine that could be selected from the teams of the Marquette-Alber county league. He said that he would be undecided whether to select Steinko or Scholtus as the "all star" pitcher, and he would give Young of Marquette the preference over Fiedler at short, not because he thinks Young plays any better game at short than either Fiedler or Swick, but because the Marquette player is the better hitter. The players who made the arrange-

ments with the Escanaba nine expect to bring the Sandy City team here for one or two return games, a week later. For the Escanaba series the Marquette county team is guaranteed its expenses, and the winners will take 60 per cent of the gate receipts and the losers 40. The manager of the Escanaba nine, who was in Ishpeiming Wednesday evening, expressed the opinion that the attendance at Sunday's game will be the largest of the year.

COLE IS PRESIDENT.
Former Negaunee Man at Head of Giroux Consolidated Mines Co.

At a meeting of the directors of the Giroux Consolidated Mines company held Wednesday, Thomas F. Cole, formerly of this city, now residing in Duluth, was elected president. This action followed the resignation of Joseph L. Giroux of Los Angeles, Cal., who was the president at the time the Giroux company came under control of the Cole-Ryan interests. Ill-health and a press of other business were given by Mr. Giroux as reasons for his retirement. The officers, which have been in Duluth ever since the Cole-Ryan interests obtained control of the company, are to remain in that city.

If your piano needs tuning, William Lehniger will take your order, and M. J. Olson will do the work. (6-28-11)

All five and ten-cent toys, books, etc., can now be found in our new five and ten-cent department. (10-8-11) F. BRAASTAD & CO.

MANY GOING TO THE WOODS.

Many Negaunee people are taking advantage of the fine weather and are spending their leisure time in the woods. The foliage near Negaunee, and particularly along the main highway between here and Marquette, is beautiful. The birds and birds are perfectly dry and there are no flies. Since the partridge season opened many men and boys visiting the woods take their guns along and a number of them have shot birds within a short distance of the city. The temperature was higher yesterday morning than at any previous time in nearly a month. Thermometers in the city registered from 55 to 58 degrees above zero at 6 o'clock.

A single invitation to smile generally causes a double one.

LULL IN SHIPMENTS.

The movement of ore from the mines of this range is not as heavy now as it has been for several weeks past, but the shipments are still active. Some of the mines are rushing out the ore at as rapid a rate as at any previous time during the season. The present slackening off is due to the fact that there are not as many boats coming into the ports as

WANTED—Agent to solicit business in Negaunee.

Apply at 323 W. Washington street, Marquette. 9-29-11
During the past two months, many of the mines are still unable to secure the number of cars they desire.
Nearly a carload of new five and ten-cent goods many of them great bargains, have been placed in our new department. (10-8-11) F. BRAASTAD & CO.

Our salespeople stand ready to show you everything, whether you care to buy or merely to see the new things.

Respectfully,

Rosen Bros & Klein

SPECULATORS ARE TRADING IN COTTON

UPPER PENINSULA TRADERS TAKING UNPRECEDENTED INTEREST IN THE MARKET.

PLENTY OF QUICK ACTION

Opportunities to Win and Lose Even Greater Than in Wheat—Bulls Are Making Money.

During the last few weeks upper peninsula speculators have been doing an unprecedented amount of trading in the cotton market. Two years ago cotton traders were practically unknown to north country brokers, but since last January there has been a continually increasing interest in the cotton market, and now it has largely taken the place of wheat speculation.

This condition is due to a number of causes, according to W. J. Schweitzer, local manager for Paine, Weber & Co., chief among which is the fact that wheat, the erstwhile Chicago wheat king, has switched over to the cotton market. Patten has never made any secret of his speculations and so far has informed the public just what he was doing and why he was doing it. In consequence, there is a large number of speculators who are following his leads. Patten has been bullish on cotton for several months and is still strongly on the bull side of the market. Meantime, cotton has steadily gone up in price and, according to Patten, it will continue to rise during the winter.

Those who have banked on a bull market during the last few months have made money, some of them big money, as the result of which there is now quite a scramble all over the northwest to buy cotton in expectation of a further rise. This is true to a degree all over the country, but especially in the north and central west, where wheat has always been the great commodity for speculation. The fact that speculation in cotton has been forbidden in several of the southern states is ascribed as another reason why the volume of trading in the north has become so much greater.

Appeals to Speculators.

Again, there are some things about the cotton market that especially appeal to the speculator. One is that there is plenty of quick action. The chance to win and lose large amounts in a short time is even greater than in the wheat market. Cotton is traded in lots of 100 bales or multiples thereof. A bale contains 500 pounds and 100 bales 50,000 pounds. Prices are expressed in cents and decimals of a cent per pound, as for example, 9.45 means nine and forty-five hundredths of a cent per pound, at which figure a single bale would cost \$47.25, and 100 bales \$4,725.

Fluctuations are in one hundredth cent per pound, which are known as points. Hence \$200 (the customary margin on which cotton is bought) represents a fluctuation of forty points on 100 bales, \$200 represents sixty points fluctuation and \$500 a fluctuation of 100 points, or one cent per pound. With the daily fluctuations of the market running from one-fourth to one-half a cent or more, as they have during the last few weeks, fortunes can be made or lost within a few hours.

December cotton closed yesterday 13.31 cents, which is at least two cents higher than it was a month ago. Patten declares that the present cotton crop will sell above seventeen cents, basing his conclusion on crop conditions and the increased consumption of the staple. Last Friday he said: "I am a bull on cotton now as I was on wheat a year ago, on a demand and supply basis. I believe there will be a great scarcity of cotton before another crop is produced. I am long a line of cotton on this theory. If I am wrong, it will cost me big money, but I think I am right."

"It is my opinion that cotton is going to go higher, though I don't know that it will go to seventeen cents," said Mr. Schweitzer yesterday. "Thus far everyone of my customers on the bull side of the market has made money, but how long it will continue, I can't say, and when the drop comes somebody is going to get bit. From all I can learn, the cotton crop in the South this year is poor, while the demand is probably greater than ever before. The fact that merchants are receiving notices of an advance in the price of cotton, cloth bears out this contention. Besides, I have a good deal of faith in Patten. He has always been open and above board, and those who have followed his 'tips' have not been sorry."

MARQUETTE GOLF CLUB.

The members of the Marquette Golf club will sit down to the first club dinner at 6:30 this evening at the new clubhouse, which, by the way, is the equal of any in the state, and one Marquette may well be proud of. The club has invited over one hundred guests to a smoker and lunch from eight to eleven. There will be music and Marquette men will be reminded of the good-fellowship days of the old Marquette Snowshoe club. Pioneer motor cars will leave Stafford's every few minutes from eight to nine o'clock, and returning, from ten to eleven.

The regular Saturday night hop will be held at Fraternal Hall tomorrow night. Music by the Peerless orchestra. 10-8-2d

Special matinee at the Grand Saturday afternoon, for ladies and children only. Four splendid prizes for the children—two for the boys and two for the girls. Remember we are showing four fun reels (a double show). Only one performance, starting at 3 o'clock. Doors open at 2:30. Come early. General admission 5c. (10-6-4)

Genuine C. C. B. Pochontas Smokeless. Call up F. B. Spear & Sons. 9-6-4f

Order your stove repairs early from Kelly Hardware Co. (9-18-4f)

Mrs. A. M. Adams is receiving her fall and winter millinery. 14's on display now. All are invited. 219 Blaker St. 10-1-6w

STATIONS AT GWINN.

Passenger and Freight Depots to Be Built by Lipssett & Sinclair.

Arrangements were completed yesterday whereby Lipssett & Sinclair, of this city, are to put up two stations, one for passenger and the other for freight business, at Gwinn, on the Marquette & Southeastern railway. Both buildings will be of wood construction, and the passenger station will have a concrete foundation and platform. The stations will be located on the north side of the track, near the location of the passenger coach, now used as a station. The passenger station will be 75x24 feet with two waiting rooms, a baggage room and ticket office. It will be surmounted by a tower, which will give it a more artistic appearance than the ordinary railroad depot. The dimensions of the freight station, which will be 280 feet distant from the passenger depot, will be 32x80.

Lipssett & Sinclair will begin work on the buildings at once and it is hoped to have them ready for use by the first of the year.

NEARLY EQUAL TO 1907.

Total Ore Shipments to Oct. 1 Aggregated 29,639,533 Tons.

The total ore shipments to Oct. 1 were 29,639,533 tons, which is only 919,673 tons short of the same period in 1907, when the season's shipments to Oct. 1 were 30,559,206 tons. In that year the shipments started heavier than this year, but for the past two or three months the ore carriers have been breaking all the 1907 records and with the same ratio of increase for the balance of the season, this year will equal if not over-reach the shipments of two years ago.

The ore movement this month is starting out very strong and it is probable that shipments will nearly reach those of September. Bad weather will be the only thing that will prevent it.

There has been no change in the freight situation and it is probable that the grain rates will hold about the same for at least a greater part of this month. The package freighters are not bidding for grain to any extent as they are carrying all of the flour that they can easily handle and they would rather trade in flour as long as they can get full cargoes in that commodity.

The passenger boats are getting scarcer all the time as this is about the time of the year that the passenger and tour chartered boats begin to drop the passenger part of their traffic and devote their ships entirely to freight. The reason for this is that when cold weather begins to set in the passenger business begins to drop off to such an extent that there is no money in that part of the trade and the steamship companies do not care to be bothered with it.

COLUMBUS DAY A HOLIDAY.

Legally Declared Such at Last Session of the Legislature.

Under a law passed by the last legislature, Oct. 12, the anniversary of the discovery of America by Christopher Columbus, is a legal holiday in the state of Michigan and shall be classed as any other state holiday. The act reads as follows: "The twelfth day of October of the year nineteen hundred and nine, and the twelfth day of October of each year thereafter is hereby declared a public holiday to be known as 'Columbus Day' and the same shall be recognized, classed and treated as other holidays under the laws of this state. Provided, that this shall not be construed to affect commercial paper, the making or execution of agreements or instruments in writing, or interfere with judicial proceedings."

NOTICE TO CONTRACTORS.

Office of Park, Cemetery and Street Commission, Marquette, Mich., Oct. 7, 1909.

Pursuant to resolution of the common council of the city of Marquette, notice is hereby given that separate sealed proposals will be received at the office of this commission until 5 o'clock p. m., Oct. 20th, 1909, for furnishing all labor and material required to make the following street improvements, in accordance with the profiles and specifications therefor on file in this office, viz:

- (1) The grading of Fitch avenue, from north line of Wabash street to south line of Norwood street, the full width thereof according to the grade heretofore established therefor.
- (2) The grading of Norwood street, from west line of Presque Isle avenue to east line of Longview avenue, the full width thereof according to the grade heretofore established therefor.

Proposals for each of said improvements must be in separate sealed envelopes, marked so as to designate which improvement is referred to, and must be accompanied by a contractor's bond with two good sureties in a sum at least twice the amount of the bid; conditioned for performance of contract, payment for labor and materials, etc., in accordance with form on file in this office. The commission reserves the right to reject any or all bids.

JOSEPH F. ANDERSON, Secretary. (10-8-2d)

DISSOLUTION NOTICE.

Notice is hereby given that the partnership heretofore existing between A. J. Davis and A. J. Pleyte of Marquette, Mich., under the firm name of The Decorating company, is this 8th day of October, 1909, dissolved by mutual consent. The business will be continued at Marquette by A. J. Pleyte, who is authorized to collect all outstanding accounts and settle the affairs of the said firm. A. J. DAVIS, A. J. PLEYTE, Marquette, Mich., Oct. 6th, 1909. (10-7-3f)

Place your orders for genuine C. C. B. Pochontas Smokeless coal.

F. B. SPEAR & SONS, (7-16-4f)

SPEAR SUES PENDILL FOR \$20,000 DAMAGES

COMPLAINANT ALLEGES HE HAS BEEN LIBELLED TO THAT AMOUNT BY THE DEFENDANT.

John W. Spear has started an action in circuit court for \$20,000 damages for libel against James Pendill, and a capias warrant is now in the hands of Marshal Manning, which will be served on Mr. Pendill today. The bill of complaint makes numerous charges against Mr. Pendill, generally speaking, it being alleged that Pendill has been largely responsible for Spear's troubles during the last two years.

Among other things that Mr. Spear alleges that Mr. Pendill has done which willful and malicious intent to injure him was to publish the book entitled "Facts," which was generally distributed about the county. The book treated of Mr. Spear's brokerage business, its evident purpose being to show that Mr. Spear had been conducting a fraudulent business, with intent to "freeze" his customers. Mr. Spear declares he has a letter from a United States attorney, in which the writer declares "Facts" to have been a "libelous and scurrilous" publication.

Other charges made by Mr. Spear against Mr. Pendill are that Pendill has attempted to stir up dissatisfaction with Spear among his customers, and to push both civil and criminal actions against him. Spear alleges that Pendill has attempted to dissuade a certain man from going on his bail bond, and has done divers other things with malicious intent to injure him. It is also alleged that Pendill declared that he would send Spear to prison.

Mr. Pendill was one of those who lost in his transactions with Mr. Spear, while the latter was engaged in the brokerage business, and now has a suit in circuit court for the recovery of the money so lost.

Pendill was one of the chief witnesses for the prosecution in the trials of Spear in circuit court and later in federal court, and the outcome of the latest trial that has come up in the difficulty between these two prominent Marquette men will be watched with widespread interest.

THEATRICAL.

"The Girl from U. S. A."

A new musical comedy drama of unusual bond and interest is "The Girl from U. S. A.," which comes to the opera house Wednesday night, Oct. 13. The unravelment of the plot creates a series of mental wave sensations that reach high water mark at the close of the second act. The climax comes when the fearless American heroine in a bold attempt to rescue her French girl friend from the clutches of a high Turkish official, finds herself entrapped in the seraglio of that dignitary. When life itself seems hopeless, the drums and other martial notes of Yankee Doodle are heard outside her gloomy prison and the steady tramp of a company of American Jackies is heard in the corridor, preceded by the crashing of the ponderous gates. Then a glimpse of glory is caught as the drums and their ringing master cover in dismay. Not for many a day, it is said, has a scene of such stirring and blood-firing interest been revealed on the stage. The singing and acting talent of the company is said to be exceptionally strong and the chorus of brilliant singing voices appears in a lavish display of varied and exquisite costumes.

NATURAL GAS.

MARQUETTE HOMES TO BE HEATED BY NEW PROCESS.

INVENTION WHICH PROMISES TO REVOLUTIONIZE MODERN METHODS OF HEATING.

Everybody Will Soon Be Using the Gem Oil Burner.

The writer yesterday saw a new invention which, when introduced, cannot help but revolutionize the methods of heating, cook and other stoves. It is the Gem Oil Burner, exhibited by Mr. Barnhisel of the Willoughby company, and what it will do is surprising. The principle of this burner is that common kerosene or coal oil is converted into gas, which mixes with 90 per cent of air and 10 per cent of carbon gas, passing through the burner and producing a long, super-heated blue flame of intense heat, free from smoke and odor, as well as free from dust and ashes arising from the use of wood or coal.

Mr. Barnhisel is located in Hager's old furniture store, South Front street, for a few days, representing the Gem Oil Burner company of Willoughby, O., where he will be glad to exhibit the invention to anyone. It may be put in any stove without changing or damaging the latter in the least, and after it is in it will heat the largest cook stove or range sufficiently for family cooking for \$1.50 per month. It has a decided advantage over wood, coal or illuminating gas, especially the great advantage of economy, with none of the disadvantages of wood or coal, and is just what is needed for comfort and efficiency, especially for the fall and winter months. The company is soon to put these burners in the hands of agents who will retail them at about \$12 apiece. To get them started in this vicinity one may buy direct from the manufacturer, free on board cars at Willoughby for half that sum for the next few days, during which time an agent will be appointed. Whether one wishes to buy or not, it is worth one's while to visit the store to see this ingenious invention.

All wheat starch isn't good—neither is all corn starch. The first gives a "starchy" effect. The second gives a "paste-board" effect. We give you the right combination.
