

FOOTBALL CONTEST HAS TRAGIC SEQUEL

A Sacrifice to the Gridiron Sport, Cadet Eugene A. Byrne Is Dead at the United States Military Academy.

Buried Beneath a Mass of Players, His Neck Is Broken, and With His Aged Father at the Beside, He Passes Away Despite Heroic Efforts to Save Him—Game Believed Doomed Now, Both at the West Point and Annapolis Institutions.

West Point, N. Y., Oct. 31.—Cadet Eugene A. Byrne, of Buffalo, N. Y., a fourth year man at the United States Military academy, died in the cadet hospital this morning, a sacrifice to football. This tragedy of the gridiron has brought such grief to officers and cadets alike that the end of football at West Point and Annapolis is predicted by many.

Neck Broken and Twisted. His grief-stricken father—John Byrne, a Civil war veteran—was at his bedside. Buried beneath a mass of struggling players in the Harvard-Army game yesterday, his neck was twisted and broken and he was picked up paralyzed. The immediate resort to artificial respiration was all that kept the boy from almost instant death, for he did not draw a natural breath after receiving the fatal shock.

The surgeons were unable to make a complete examination last night, on account of the critical condition of the patient, and on this morning a blow on the spine or on the solar plexus caused the paralysis. But an X-Ray photograph taken after death revealed a dislocation between the first and second cervical vertebrae which caused the vertebrae to be pressed forward, resulting in a lesion in those nerve centers of the medulla oblongata which govern the respiratory muscles.

Fearful Blow to the Parents. Byrne's father bore the shock of the fatality with fortitude, but was plainly laboring under great mental anguish this afternoon when he came to the little railroad station at the foot of the hill to meet Mrs. Byrne, the mother of the victim.

The funeral services will be held tomorrow in the Catholic chapel at the post, where the body was taken this afternoon. A cadet guard has been posted at the chapel and details of young soldiers will watch over the body until after the services tomorrow. The funeral will be conducted with full military honors.

The injured boy being taken to the cadet hospital, skilled surgeons, working with relays of capable attendants, labored over Byrne throughout the night. Consistent times, he realized the seriousness of his condition as the physicians and nurses kept at their task, and with a smile and an occasional cheering word he encouraged them in their labors. He faced death unflinchingly and was thoughtful only for his aged father, who was with him when the end came.

Acting Captain of the Team. Young Byrne was only twenty-one years old, but was a veteran of the army football team and popular with his classmates and officers. He was acting as captain of the team yesterday, and he gave his life, struggling on the field for the honor of the army.

Byrne was injured in a mass play on tactic. Standing valiantly as he tackled for the army, Byrne was forced under a rush of Harvard players, and on falling must have had his head twisted into a position where the weight of the men piling upon him was greater than the strong ligaments of the vertebral column could stand.

Following the accident to Byrne the cadet corps grasped with apprehensive agitation the similarity between the mishap to Byrne and the recent injury to Earl Wilson at Annapolis. "If Byrne dies, it will kill football for both West Point and Annapolis," was the frequent remark heard on the grounds last night.

Three Other Gridiron Casualties. Omaha, Oct. 31.—Coe Cody, a student of Creighton college, broke his collar bone during a football game here today.

Philadelphia, Oct. 31.—Michael Burke, aged twenty-one, of Shonandoah, Pa., died here today from injuries received in a football game yesterday.

Kokomo, Ind., Oct. 31.—In a football game between Kokomo and Noblesville today, Ogle Seagraves, of Kokomo, was probably fatally injured by a kick on the back of the head which induced convulsions.

GAME IS TABOOED NOW. No More Football Will Be Played by West Point This Year.

West Point, N. Y., Oct. 31.—Because of the death of Cadet Eugene A. Byrne, of the United States Military academy football eleven, no more football will be played by West Point this year. This statement was made by Superintendent Scott, of the academy, late tonight, after a consultation with the athletic authorities of the academy on the death of Byrne. This means the cancellation of the annual struggle between the army and the navy which was to have taken place at Philadelphia, Nov. 27.

Colonel Scott would not discuss the matter at first, but tonight said: "This is the first serious accident West Point has had during the many years that

football has been played here. It is considered that football bestirs those manly virtues especially needed in war; and we know of no manly game in which accidents do not occur."

Injured Midshipman Cannot Live. Annapolis, Md., Oct. 31.—When informed of the death of Cadet Eugene A. Byrne, of West Point, Superintendent Boyer, of the naval academy, said: "I have not arrived at a conclusion adverse to the continuance of football at the naval academy."

The condition of Midshipman Wilson, who was paralyzed from injuries similar to those that resulted in the death of Cadet Byrne, is about the same tonight as it has been for two weeks. The surgeons expect that his injury will result in death.

New Orleans, La., Oct. 31.—Secretary of War Dickinson expressed deep regret here tonight at the death of Cadet Eugene A. Byrne, but declined to make a statement concerning the possible effect of the cadet's death on football at the military academy.

OTHER SPORTS MORE DANGEROUS. That the Opinion of Prof. Patterson of the University of Michigan.

Ann Arbor, Mich., Oct. 31.—"In my opinion canoeing and rowing are more dangerous than football," said Professor Geo. W. Patterson, of the University of Michigan, tonight when asked what the effect of yesterday's football accident at West Point would probably be. Dr. Patterson is chairman of the board of control of athletics at the university. "In the twenty years I have been watching football at Ann Arbor," said Professor Patterson, "there has never been a death caused by football. But we have been having fatalities every year."

Big Colleges Will Retain the Game. New York, Oct. 31.—As to the future of football in Princeton, Yale, Harvard and other big colleges, opinions that have reached here are that the death of Cadet Byrne will not affect the game.

Chicago, Oct. 31.—President Judson, of the University of Chicago, expressed great regret at the death of Eugene Byrne, of the West Point football team, today and said: "At Chicago, we have never had any fatal accidents and only a few serious injuries." Dr. Judson would not make an extended statement at present.

POISON THEY TAKE PROVES INSUFFICIENT After Weeks of a Fruitless Search for Employment, a Man and His Wife Drink Carbolic Acid in a Chicago Hotel—Both Will Live, However.

Chicago, Oct. 31.—John Hollis, aged twenty-two, and his wife, aged seventeen, who came here two months ago from New York, attempted to kill themselves here today, because they had no work and only had forty-five cents left. They drank carbolic acid in their room at a hotel, but the death potion proved insufficient and both are recovering at St. Luke's hospital. Hollis and his wife agreed to end their lives after weeks of fruitless search for employment.

Birth Follows Mother's Suicide. Philadelphia, Oct. 31.—After Mrs. May Schneider, aged eighteen, had committed suicide today with carbolic acid, her baby, a healthy girl, was born in the hospital where the woman had been taken. The physicians performed a cesarian operation.

Brother Kills Brother. McLeansboro, Ill., Oct. 31.—Following a trivial quarrel, Cleveland Riley shot and killed his brother, Weaver Riley, and wounded another brother, Frank Riley, today. Cleveland was arrested.

CHICAGO WOMAN ARRESTED. Mrs. J. W. Frank Accused of Selling Girl Into "White Slavery" for \$50.

Chicago, Oct. 31.—Charged with selling a girl into "white slavery" for \$50, Mrs. J. W. Frank has been arrested here. The formal charge is pandering. Representatives of a South side neighborhood improvement organization contracted to buy the girl and the woman took the money and delivered the girl, it is alleged.

KING MENELIK VERY ILL. Ruler of Abyssinia in Critical State from Stroke of Apoplexy.

Addis Ababa, Abyssinia, Oct. 31.—King Menelik is stricken with apoplexy tonight. His condition is precarious. The king's death is considered probable. The patriarch has appointed Prince Lidj Jeassu, grandson of the king and heir apparent, in order to be prepared for any contingency. Ras Tessaema, viceroys, has been appointed guardian of the prince and regent.

FOOTBALL SCORES. Chicago, Oct. 31.—Football games played yesterday resulted as follows: Minnesota, 20; Northwester, 11. Illinois, 24; Purdue, 6. Indiana, 30; St. Louis, 0. Michigan, 43; Syracuse, 0. Notre Dame, 6; Pittsburg, 0. Missouri, 13; Iowa, 12. Ryeon, 11; Beloit, 5. Kansas, 17; Washburn, 0. Nebraska, 12; Doane, 0. Ohio State, 21; Denison, 0. Case, 32; Kenyon, 11. Yale, 34; Amherst, 0. Harvard, 9; Army, 0. Princeton, 5; Navy, 0. Pennsylvania, 29; Carle, 6. Williams, 3; Cornell, 0. Dartmouth, 12; Holy Cross, 0. Yale Freshman, 56; Phillips-Andover, 5. Brown, 12; Massachusetts Agric., 3. University of Maine, 15; Bates, 5. Washington and Jefferson, 46; Waynesburg, 0.

GOTCH AND ROLLER MATCHED. Chicago, Oct. 31.—Frank Gotch, champion of the world, and Dr. Roller of Seattle have been matched to wrestle at Kansas City Nov. 15 to a finish, best two in three falls, catch-as-catch-can style.

BALLOTS TO WAGE BATTLE TOMORROW

Elections of Greater or Lesser Importance Will Take Place Tuesday in Many States and Cities Throughout the Union.

While Massachusetts, Rhode Island and Virginia Will Choose Governors, Interest Centers in the Municipal Contests in New York, Philadelphia and San Francisco and in the Struggle in Maryland to Eliminate the Negro as a Political Factor.

New York, Oct. 31.—Elections will be held next Tuesday in many states and cities throughout the country. Three states will elect governors and full state tickets—Massachusetts, Rhode Island and Virginia.

In point of interest, the municipal campaigns in the great metropolitan cities of New York, Philadelphia and San Francisco exceed the three state contests. In each of these municipal contests reform is the dominant issue.

New York Campaign Bitter. The municipal campaign in New York City has been one of the bitterest ever held. Three majority candidates are in the field—Justice Wm. J. Gayner, the Democratic and Tammany nominee; Otto T. Hammond, Republican, and Wm. B. Hearst, Civic Alliance. The issues are the overthrow of Tammany Hall, and the effort of the Republican and Civic Alliance forces to capture control of the board of estimate and apportionment, which will have control of the vast outlays of money for the subways and all the other large municipal undertakings.

In Philadelphia, the reform element is endeavoring to break the power of the local Republican organization. The reformers, under the title of "The William Penn party," have placed D. Clarence Gibbons, head of the Philadelphia Law & Order society, in the field for district attorney against Samuel P. Roman, Republican, renominated Gibbons also in the Democratic ticket.

In San Francisco, the interests here largely are of the district attorneyship. There are two nominees—Francis J. Heney, Democrat, and Charles Fickert, the Republican and Union Labor nominee. The majority fight is between Wm. Crocker, Republican; P. M. McCarthy, Union Labor, and Dr. T. B. Leland, Democrat.

Negro Issue in Maryland. The paramount issue in Maryland is the so-called disfranchising amendment to the state constitution, admittedly designed to eliminate the negro as a political factor in the Democratic ticket. In Cleveland, O., Mayor Tom L. Johnson is a candidate for a fifth term on the Democratic ticket. His opponent is Herman C. Baehr, Republican.

The temperance question is prominent in the municipal campaigns held in Indiana, and is the leading issue in Indianapolis, where the Republicans charge that the brewers are backing C. A. Gauss, the Democratic candidate for mayor. The Republican candidate is S. J. Shank.

CLEVELAND CAMPAIGN TAME. Little Interest Displayed—Johnson the Favorite in the Betting.

Cleveland, Oct. 31.—Less noise, fewer issues and more apathy characterized the municipal campaign which came to a close tonight than any campaign in this city in recent years. Mayor Tom L. Johnson is the favorite to succeed himself, for a fifth consecutive term. He is opposed by County Recorder Herman C. Baehr, the Republican candidate.

Mayor Johnson insisted that the street railway question was settled. Mr. Baehr maintained that it was not. The mayor ignored the car question, and talked fair taxation. Only the past week have the opposing sides warmed up to any extent. At first Baehr was a betting favorite. Later it became an even bet. Now there are slight odds on Johnson. Only a few more than 80,000 electors are registered.

Hearst Given a Big Demonstration. New York, Oct. 31.—Justice Gaynor and Mr. Barnard, the Democratic and Republican candidates for mayor, respectively, rested tonight. W. R. Hearst, running for the second time independently, closed his campaign at Madison Square Garden, where he was cheered for thirty-two minutes by a great crowd. Women threw their shawls from the balconies, men tossed their hats and every inch of bunting in the hall was fluttering.

In his speech, Mr. Hearst, refraining from criticism of his rivals, said in closing: "We are endeavoring to root out the corrupt machines and the criminal compact between the corrupt and the rich. If the people are to accomplish results in the war against the machines, they must abandon party ties and vote not for what is 'regular' but for what is right."

GREECE TRANQUIL AGAIN. Leader of Rebellion Is at Large but Insurrection Is Suppressed.

Athens, Oct. 31.—Lieutenant Thaidos' rebellion has been suppressed, according to a government announcement today. The mutinous lieutenant is still at large. The torpedo boat destroyer Velos returned to the arsenal last evening and her commander was immediately arrested. Lieutenant Thaidos is believed to be in the vicinity of Mount Parnes, where the police are keeping a strict watch.

THE WEATHER.

Washington, Oct. 31.—The following is the weather bureau's forecast for Upper Michigan: Rain, Monday and Tuesday; colder Tuesday; variable winds.

BLOODSHED FEARED, TROOPS ARE CALLED OUT

Because of a Heated Contest Growing Out of a Bitter Campaign Waged for Public Office, Soldiers Are on Guard in Breathitt County, Kentucky.

Jackson, Ky., Oct. 31.—State troops will be on guard in Breathitt county tomorrow and Tuesday during the hours of the election, and as long thereafter as there is a probability of bloodshed as a result of the heated contest which has grown out of the bitter campaign being waged over county and district offices.

A request for troops was today telegraphed to Acting Governor Cox, at Frankfort, as Governor Wilson is in New Orleans tonight. The Lexington company of the state guard was ordered to Breathitt county. Judge Adams, on whose application the troops were ordered out, is the Republican nominee for re-election as circuit judge. His opponent is Judge D. B. Redwine, of Jackson, one of the county's friends in the numerous criminal and civil prosecutions against the late Judge James Hargis.

The calling out of the troops tonight followed a reign of terror here Friday and Saturday of last week. An armed body of men, alleging that they feared fraud in the election, forcibly seized the official ballots Friday and carried them to a remote part of the county, where they defied arrest for some time. Yesterday, following a raid in which hundreds of armed men supporting the Federal or Democratic ticket took possession of the court house and threatened serious trouble over the possession of the ballots, a truce was entered into which it was thought would end the hostilities. It appears, however, that both sides were suspicious of each other and the truce was broken. The president stopped several minutes. The president later was taken to the New Orleans naval station, where he made a casual inspection. He then visited the Jackson barracks, where he reviewed the troops of the cavalry and the infantry.

Although Better Than a Mile a Minute, the Time Is Slower Than Expected, and the Management Is Poor—However, There Are No Casualties.

New York, Oct. 31.—The fifth Vanderbilt cup race was won by Harry F. Grant, driving a sixty-horsepower Alcazar, the only six-cylinder machine in the contest. His time for the 278.08 miles was 4 hours, 25 minutes, and 42 seconds, an average speed of 62.2 miles per hour. Hearty driving of a forty-five-horsepower Fiat, finished second, five minutes and fifteen seconds behind Grant. William Knipper, driving a forty-horsepower Chalmers-Detroit, was third. Two other cars—the Mercedes, driven by Wishart, an amateur, and the Adams, driven by Knox—were the only remaining machines among fifteen entrants for the trophy which were still on the course when the race was declared ended. The contest, reduced to the level of an ordinary stock car event, was spirited. The winner's average speed was 62.2 miles per hour, a disappointment to many who expected that the mark made by Robertson in a Locomobile last year, 64.3 miles per hour, would be exceeded.

Although accidents to cars were numerous and machine after machine retired because of mechanical failure, no machinery or distress at turns, nobody was seriously injured. The crowd was much smaller than expected. Poor management marred the race. One of the worst incidents occurred just before the finish, when it was discovered that the times had omitted to credit Grant with the twentieth lap. After a stormy meeting at Garden City between Mr. Vanderbilt and the officials, Grant was finally confirmed the winner. The early part of the race was badly muddled by the simultaneous running of the two contests for cars of moderate power. The smaller cars remained on the course ten and fifteen laps, respectively, making the times' task a puzzle. In the shorter of these races, Joe Matson, driving a twenty-five-horsepower Chalmers-Detroit, finished first, covering 128.47 miles in 2:32:25. The fifteen-lap race was won by R. W. Harris, driving a thirty-two-horsepower Marmon car.

Strang, piloting a Fiat, and Chevrolet, driving a Buick, were among the first to be put out of the Vanderbilt cup race by accidents. Strang smashed a radiator and Chevrolet broke a cylinder.

WILL ASSIST TOURISTS. French Government to Encourage Visitors to Spend More Money.

Paris, Oct. 31.—The French government, realizing how large a share of prosperity is due to the great traveling public, especially Americans, who have millions annually in French pockets and shop tills, has decided to establish a tourists department at the ministry of public works.

The plan is that of persuading tourists in larger numbers to visit cities and picturesque places of France, many of which are virtually unknown, owing to insufficient means of transportation. "Everyone goes down the Rhine," Minister Millerand said, "but how few travelers have descended the far more lovely stream from Lyons to Avignon! The chief reason for this neglect is bad hotel service, which I hope the new travel bureau will do much to improve."

BIG STEAMSHIP IS SAFE. Captain of Steamer Kronprinzessin Cecilia Says "All Is Well."

New York, Oct. 31.—A wireless message received by the Associated Press from the captain of the steamship Kronprinzessin Cecilia disproves the reports regarding a possible mishap to that vessel. The message reports, "All is well."

MR. TAFT RETIRES THOROUGHLY TIRED

In the Hands of an Energetic Committee at New Orleans the President Is Kept on the Jump Nearly All Day.

He Makes Two Speeches, Visits the Naval Station and the Military Barracks, Rides Through the Interesting Old French Quarter and Attends a Sacred Concert on the Tulane University Campus—Today Will Be Spent at Jackson, Mississippi.

New Orleans, Oct. 31.—President Taft went to bed on his train tonight, thoroughly tired. His New Orleans friends kept him on the go nearly all day. He made two speeches this afternoon, visited the naval station and Jackson barracks, rode through the interesting old French quarter of the city and attended a sacred concert on the campus of Tulane University. This busy day brought the president's stay in New Orleans to a close. He will spend all tomorrow at Jackson, Miss.

The drive through the old French section of the city was immensely interesting to the president. The buildings which indicated the transition from the old Spanish days to the French period of New Orleans' history were pointed out. At the house which was the home of General Beauregard, the president stopped several minutes. The president later was taken to the New Orleans naval station, where he made a casual inspection. He then visited the Jackson barracks, where he reviewed the troops of the cavalry and the infantry.

GLIDES SAFELY TO EARTH. Aeroplane Carrying Army Officers Stops in Midair and Descends Suddenly.

College Park, Md., Oct. 31.—After being in the air ten minutes, the Wright aeroplane was brought to the earth very suddenly yesterday. A cog in the gear wheel of the magnet broke and stopped the engine. Lieutenants Humphreys and Foulkes drove the aeroplane at the time, but both landed safely.

LEAVES MANY MILLIONS. John S. Kennedy, Aged Financier, Dies from Whooping Cough.

New York, Oct. 31.—John Stewart Kennedy, aged nearly eighty, a lawyer, financier and philanthropist, died at his home here tonight of whooping cough. Mr. Kennedy was a director of many large corporations. He leaves a large estate, including ten millions in North Carolina stock and seven millions in Great Northern. These and other holdings made him a leading figure in the railway world.

DEATH CHEATED OF VICTIM. Painter Who Falls is Saved by Clothing Catching on Hook.

New York, Oct. 31.—Checked in a fall through the air from a scaffolding from which a fellow worker had just pitched Williamsburg bridge. The painter, James Donohue, a painter, in the sight of thousands hung suspended from a grappling hook at the end of a long rope, which had caught in his clothing as he fell. Head downward, Donohue hung in mid-air for what seemed like hours to the gasping spectators who expected every moment to see the frail hold of the iron in his clothing give way. Finally rescuers on the bridge structure above swung another rope to him. He grasped it, pulled himself head upward and then was drawn up to safety.

JUDGE REBUKED FOR TALKING. Case in Which He Called Defendant Crazy or Guilty Is Demanded.

St. Louis, Mo., Oct. 31.—Because of remarks made to a jury by Judge Smith McPherson of the United States district court at Kansas City, the United States court of appeals in St. Louis has reversed and remanded the case of John F. Ruid, who had been convicted of conducting a scheme to defraud.

Ruid was accused of using the mails in an effort to sell a patent pump operated by a pendulum and a spring lever. "This man either is guilty of a criminal act, or he is an idiot, insane and foolish," the defendant claims to believe in his machine. If he does, he is an idiot, crazy. If he does not, he is guilty," is what the judge said to the jury.

The decision of the court of appeals says: "It is the province of a court to comment on facts and evidence, but his comments should be dispassionate and guarded, in order that the jurors may be left free to exercise their independent judgment."

TRAIN KILLS TWO IN INDIANA. Laporte, Ind., Oct. 31.—Mr. and Mrs. D. K. Northam, an aged couple, drove upon the track at Kingsbury in front of a Grand Trunk train, and both were killed.

PACIFIC FLEET AHEAD OF TIME. Manila, Oct. 31.—The United States Pacific fleet, Rear Admiral Sabree commanding, entered Manila bay at 5 o'clock yesterday afternoon, two days ahead of its schedule. The voyage from Honolulu was uneventful.

GOTHAM MILK NINE CENTS. New York, Oct. 31.—This city will have to pay high record prices for milk after Monday. It is announced that the price will be raised from eight to nine cents a quart. The reason given is the high price of feed.

WARNED IN A DREAM, HUSBAND SAVES WIFE

Mrs. Hiram S. Waters of Chicago Rescued in the Nick of Time as a Gigantic Wave Is Washing Her from the Deck of an Ocean Liner.

Chicago, Oct. 31.—Two days before they left London for America Mr. and Mrs. Hiram Saunders Waters, 734 Lexington avenue, were warned in a dream of an accident which in reality nearly cost Mrs. Waters' life. Her husband saved her as she was being washed from the deck of an ocean liner by a giant wave.

As a result of her experience Mrs. Waters has reached her home severely bruised and with nerves badly shaken. A physician is attending her.

"The night in London just before we sailed my husband was suddenly with an exclamation of terror," said Mrs. Waters. "Premonition of Disaster. 'I asked him what the matter was, and he explained that he dreamed I had been washed overboard at sea. Dreams like that have usually meant trouble for me. Somehow I always seem to get some sort of premonition of coming disaster.'"

"On the first day of the voyage my husband and I were on the upper deck of the Teutonic, watching the big waves, for the sea was rolling terribly. My husband suggested that we would better return to our rooms."

"He started to walk away. Suddenly the steamer plunged deep into a trough between two billows. I heard a woman scream, and then a monster wave broke over the bow of the ship."

Swept Across the Decks. "Before I could get to shelter the wave caught me. I was knocked senseless and swept across the deck. My husband leaped the other woman scream, and turned in time to see the wave washing me toward the rail. He caught me in his arms before I went overboard."

Officers of the Teutonic are reported as declaring that on the day of the accident to Mrs. Waters the sea was rougher than they have seen it in twenty years.

"I am not extraordinarily superstitious," said Mrs. Waters, "but I have had dreams before which presaged disaster, and when my husband told me of his strange dream I feared it was a premonition of a coming accident."

Mr. Waters is manager of the Postal Telegraph company in the Board of Trade building.

MINE EXPLOSION IN PENNSYLVANIA KILLS ALL BUT THREE OF FIFTEEN WORKERS.

Johnstown, Pa., Oct. 31.—Fifteen men were killed in the Cambria Steel company's coal mine two miles from here tonight by an explosion. All were foreigners. Three men escaped with their lives by a perilous climb of life ladders through poisonous mine gas and falling slate up the steep walls of the main shaft. At the time of the explosion, only fifteen workmen, all track layers, were in the mine. A force of men, working in shifts, soon began clearing the debris and falling slate in the lower levels, where the explosion occurred, but it was hours before they gained perceptible headway. When the final barrier of rocks was passed, the rescue party found twelve huddled forms close together, the bodies indicating that the men had died of suffocation. The mine officials refused definite information as to the cause of the explosion.

MEXICANS ENGAGE IN WORK—RANCHMEN Sell Nuts on Trees to Brokers.

Fort Worth, Tex., Oct. 31.—Several slight traces of early frost for the past ten days have put the pecans in condition to be gathered. Some pecan experts say the crop will be very light this year, while others persistently contend the crop will be heavy. As this is as yet, many there are some pecans on the trees along the rivers to be gathered and crews of pecan pickers are going to the groves and starting picking the nuts.

Each year there are whole families who make a business of gathering pecans. They go into a large pasture along one of the rivers and spend several months, living in tents and wagons, gathering nuts. They use large wagon sheets to catch the nuts as they are knocked from the trees. Sometimes the trees grow so close together that the nuts would fall in the stream were it not for some precautionary measures. Then it is that the expert gatherers show their hands. They cleverly stretch a piece of canvas so the nuts are caught in it instead of falling into the stream.

Many Mexicans gather pecans at this season of the year. They work under contract at so much per hundred pounds for the shelled nuts they deliver. The whole family is employed in the work, from the little children to the old grandparents. Many ranchmen who own large pastures along the rivers make a handsome profit each year of pecans. The crop is sold by them to a broker who puts his crews at work as soon as the proper time arrives. The ranchman instructs this broker to see that none of the trees are broken, that the nuts are kept under control and that there is no promiscuous shooting so stock can be injured. Then the broker engages Mexicans to gather the nuts and the latter get their families busy at once.

TWO HALLOWEEN DEATHS. Kansas City, Oct. 31.—Amidst smiling lack of lanterns during a Halloween entertainment at Letzette academy, a Catholic boarding school for girls, here last night, Virginia Owen and Mamie Tiernan, student actors, were so severely burned that they died today. Miss Mary Miley was severely burned while endeavoring to save her schoolmates. The girl actors wore light Eskimo costumes.

DAILY MINING JOURNAL

Published daily except on Sundays. Contains Associated Press dispatches and is especially devoted to the Upper Peninsula interests.

Subscription Rates: Per month, by carrier, \$1.00; Per year, by mail, \$10.00.

MAQUETTE, MICH., NOV. 1.

Entered as second class matter of the second class in the postoffice at Marquette, Mich.

In its last phases that stately progress down the old Mississippi became a wild scramble for position.

The question that appears to be gradually taking form is whether Uncle Joe will "get" the insurgents, or the insurgents will "get" Uncle Joe.

Today the grand three cornered contest in New York is on its closing lap. The results tomorrow will give us an opportunity to see how far the election forecasters have been out of the way.

The mud batteries in the New York majority campaign have been primed and fired for the last time. Small town elections frequently are conducted on a low plane. Here in Marquette we have seen some that nobody was proud of.

John C. Shaw, a well known Detroit attorney, has addressed an open letter to Detroit Saturday Night, which has been advocating the nomination of Justice Montgomery for governor, in which he urges on that paper the advisability of supporting Mr. Osborn, instead, Mr. Shaw pays full tribute to Justice Montgomery's equipment for the office, but expresses the belief that in view of the candidacy of Mr. Muselman there is a conflict of interests in the part of the state where either would ordinarily expect a larger and fairly unanimous vote that will seriously militate against their chances.

It will be noted with interest that the report of the interstate commerce commission for the year ending June 30 last shows that travel during the twelve months period was appreciably safer than during the preceding one. There was a decrease in the number of persons killed of nearly 1,000, the figures being 2,871 as against 3,764.

The football results Saturday were cheering to those enthusiasts who are waiting for Michigan to come into its own again. For one thing, the Syracuseans were toyed with and their sentiment after the game must have been one of surprise that they managed to beat Michigan last season. For another, Minnesota's decisive defeat of Chicago makes the coming Michigan-Minnesota game the most important that will be played in the west this fall and gives Michigan an opportunity to win a clearly established championship.

Running one to five years secured by first mortgages on improved real estate worth more than double outstanding debentures. Superior Trust Company HANCOCK, MICH. Capital and Surplus \$200,000.00

5% DEBENTURES. Running one to five years secured by first mortgages on improved real estate worth more than double outstanding debentures. Superior Trust Company HANCOCK, MICH. Capital and Surplus \$200,000.00

the big end of the score, and the admirable form it showed against Chicago indicates that its eleven is a highly organized machine, skilled in all the niceties of the new game.

No one, except those people who don't believe in prize fighting on any terms, can have any fault to find with the arrangements entered into by Jeffries and the big smoke.

The responsible organization making the best bid will be given the attraction. There was no particular trouble about arriving at terms, and the principals conducted themselves very well, indeed, at their preliminary meeting.

Of course Mr. Crane's business associates in Chicago have confidence in him. Nothing that has happened could well disturb such confidence as Mr. Crane has commanded all his life. Just because a man musses the cards in the diplomatic game does not make him either a dangerous or undesirable citizen.

In the four upper peninsula counties where the boards of supervisors have been called on to pass on local option petitions the "wets" and the "drys" have broken even. The petitions were rejected as insufficient in Schoolcraft and Mackinac and were accepted and elections ordered for next spring in Chippewa and Luce.

It is reported from New York that the United States courts in that city will, for some months to come, find their time largely occupied by cases instituted by Collector of Customs Loeb in an effort to secure restitution to the government and the punishment of both the officials in the department and the importers who have participated in the frauds.

The young man from the country took his green necktie and his best gray suit to a restaurant, and like some other young men, he was disposed to be facetious at the waiter's expense.

It is reported from New York that the United States courts in that city will, for some months to come, find their time largely occupied by cases instituted by Collector of Customs Loeb in an effort to secure restitution to the government and the punishment of both the officials in the department and the importers who have participated in the frauds.

It is reported from New York that the United States courts in that city will, for some months to come, find their time largely occupied by cases instituted by Collector of Customs Loeb in an effort to secure restitution to the government and the punishment of both the officials in the department and the importers who have participated in the frauds.

Will You Do This?

Make this comparison: Take your favorite dessert recipe requiring the use of Vanilla. Use

BURNETT'S VANILLA

instead of the ordinary kind you have grown accustomed to using through habit. Then notice the wonderful difference in the flavor of your dessert when it is finished.

Just one trial like this will convince you of the remarkable superiority, both in rich strength and delicate flavor of Burnett's Vanilla

You will always insist on getting it when you try it once.

THE BATTLESHIP GAME.

The contest between a few of the leading nations to see which shall possess the largest battleships seems almost like a competitive game. The recent official test of the North Dakota, and the record breaking achievements of the Delaware, two of the newer and larger battleships constructed by this government, led some writers to observe that we are keeping pace with others in the development of floating fortresses.

This latest battleship type planned by the British naval authorities is to be a monster in size and power, carrying at least ten and probably twelve guns of 13.5 inches calibre, with a range of effectiveness exceeding that of any others in the world.

It is reported from New York that the United States courts in that city will, for some months to come, find their time largely occupied by cases instituted by Collector of Customs Loeb in an effort to secure restitution to the government and the punishment of both the officials in the department and the importers who have participated in the frauds.

HERE IS THE PROOF

That the best body-building and strengthening tonic for

Delicate Children

is Vinol

"My 9 year old daughter was weak, pale, and had no appetite. I gave her Vinol, and she began to thrive at once. She gained rapidly in weight, color and strength." Mrs. W. H. GILMORE, Durand, Mich.

"My two children, who were puny and ailing, rapidly gained flesh and strength when I began to give them Vinol. I proved that Vinol is a splendid tonic for delicate children." Mrs. C. ALLEN, New Bedford, Mass.

Vinol builds up healthy flesh and makes thin little limbs round and plump. Children love to take it.

We return people's money without question if Vinol does not accomplish all we claim for it. Try it, please.

THE STAFFORD DRUG CO., Marquette, also Fred P. Tillson, Ishpeming; J. E. O'Donoghue, Negaunee.

A LAUGH OR TWO

Railroad Economy. The economy practiced upon the Great Northern railroad is well known among railroad men, one of the staunchest believers in the old saying that "Economy is the road to wealth."

Not to Be Shaken Off. Many writers have declared that an Irish gentleman's hospitality is unlimited, but this is a slight exaggeration, as is shown by a story borrowed from the case of Irish men.

The Money Factory. The system of checks employed to prevent irregularities in Uncle Sam's money factory, otherwise known as the bureau of engraving and printing, is as complete as human ingenuity can devise.

A TOUR ROUND ETNA. The tour which the king and queen made round Etna is one of the most beautiful and interesting, as well as the best known, in Sicily.

Parisian Politeness. "That the French are the politest people on earth," says a New Yorker, who spends a bit of his time in Paris.

Pay in Advance. The young man from the country took his green necktie and his best gray suit to a restaurant, and like some other young men, he was disposed to be facetious at the waiter's expense.

Will Be No Let Up. It is reported from New York that the United States courts in that city will, for some months to come, find their time largely occupied by cases instituted by Collector of Customs Loeb in an effort to secure restitution to the government and the punishment of both the officials in the department and the importers who have participated in the frauds.

FRENCH WRITERS' EARNINGS. Of the serial story as a newspaper feature in France, Robert Sheard writes

# Copper Country

## BARAGA'S COSTLY FIRE.

Stock of Wm. Kitz & Co. Damaged by Smoke and Water.

An alarm of fire was sounded at Baraga Tuesday and the citizens were again called upon to suppress a fire, this time in the Wm. Kitz & Co.'s dry goods and clothing store. How the fire originated is unknown, but it was discovered by Herbert Greenblatt, manager of the store, and at the same time by a brakeman of the South Shore railroad. The Baraga hose company quickly extinguished the flames with several streams of water.

## HANCOCK'S FACTORY CHANCE.

President Baer of Businessmen's Association Receives Offer.

There is an opportunity for Hancock to secure a manufactory on a small piece of property on the corner of Harrison street and Michigan. Henry L. Baer, president of what was the Businessmen's association, is in receipt of a communication from a concern which wants to locate there. This concern says it proposes to put up a factory which would employ not less than six hundred men and boys, and even more. There are conditions, however, and these conditions will be discussed at a meeting of the businessmen in the city. The matter is now being considered.

## CHEMICAL FIRE ENGINE.

Demonstration of New Equipment at Hancock This Afternoon.

A demonstration of the new chemical fire engine of the Hancock fire department will be made this afternoon. Chief Mitchell in the presence of representatives of other copper country departments. The engine arrived Saturday. It is the first piece of apparatus of the kind to be brought to the copper country. A representative of the manufacturer is here to give instructions in operating the machine. The engine, as it is called, is set on a wagon equipped with all the necessities. It consists of two large copper cylinders, with ends of hollow copper, capable of resisting high pressure. These cylinders contain chemicals which feed the chemical extinguisher when it is played on the flames. The engine is equipped with 200 feet of hose and the necessary chemical preparations and is all ready to use.

## NOVEMBER TERM CALENDAR.

Civil List for Circuit Court is Brief-Crime is Also Scarce.

County Clerk Richardson on Saturday gave out for publication the civil calendar for the November term of the Houghton county circuit court. It will open one week from today. The criminal calendar will probably not come from Presenting Attorney MacDonald's office until some time during the week. It will be light, the only interesting case being that of Charles Lemmen, charged with murder. He is accused of being the accomplice of Elis Karvakkia, who pleaded guilty to the manslaughter of Herman Maitson in Calumet Aug. 23, this year. The civil calendar follows:

## ANTI-TUBERCULOSIS SOCIETY.

New Plan of Conducting the Work—Miss Hubbard Secretary.

The Houghton County Anti-Tuberculosis society has decided upon a new system for conducting business. Miss Hubbard is named as corresponding secretary, with general supervision of the work of the society and its office in the Murphy building. The office hours will be from 9 to 10 a. m. and from 4 to 5 p. m., and all persons interested in the white plague campaign are requested to call at these hours for any information.

## SEASON OPENS TUESDAY.

Indoor Baseball Teams at Hancock Ready for the Permanent Struggle.

The indoor baseball season in Hancock will open at Germania Hall tomorrow evening, when the Hibernians play the Knights of Columbus and the naval reserve play the militia. The Knights of Columbus will line up as follows: Catch, Finley; pitcher, Mader; first base, Delaney; second base, Golligan; left short stop, Cody; right field, Sullivan; left field, Wivell.

## SCHOOL OFFICERS' MEETING.

Hon. Luther L. Wright of Ironwood, state superintendent of public instruction, and Fred L. Keeler of Lansing, his deputy, will be in Houghton Wednesday for the purpose of holding a school officers' meeting. The school officers of Houghton and Baraga counties are instructed to attend. Mr. Wright will talk on school hygiene and the township unit system, and Mr. Keeler will talk on new school legislation.

## DIED FROM HEART DISEASE.

Henry Myers, while shingling the depot at Alton last Thursday, was taken upon an attack of heart disease and died before medical assistance could be procured. Mr. Myers was a former employe of the Mineral Range. The remains were sent to Mills, Houghton county, where the funeral took place yesterday.

## STEIN PARTY ON NOV. 20.

The Calumet Social club of Laurium has decided to hold its annual reunion and Stein party Saturday evening, Nov. 20. Plans for the event are now being arranged by the directors. There will be a unique and excellent program. As the Stein party and reunion was held last year, it is expected that the gathering this year will be a large and jolly one and that the entertainment will be unusual and amusing.

## FEATS OF CLEVER CHEMISTS.

Two remarkable instances in which the chemist's laboratory has supplanted the farmer and the field are worth mentioning. There was a time when India produced large quantities of indigo, and the chemists of Germany were at work making indigo, but they only laughed. Then the announcement came that synthetic indigo, made in the laboratory, was a commercial success. It was absolutely the same as the natural indigo, only, anything, a little bit purer. Now India no longer supplies the world with indigo. A German laboratory makes the whole supply, and even India buys in Germany. There was a time when large areas in France were devoted to the cultivation of madder root, from which the red dye alizarine was made. Agac, a German chemist, proved upon nature and made artificial alizarine at a cost of less than one-third that of the natural produce. It wasn't an inferior imitation; it was the real thing. Now Germany supplies the world with alizarine, the only red dye made. Agac, a German chemist, proved upon nature and made artificial alizarine at a cost of less than one-third that of the natural produce. It wasn't an inferior imitation; it was the real thing. Now Germany supplies the world with alizarine, the only red dye made.

## ASSOCIATED CHARITIES.

The first annual meeting of the Calumet Associated Charities will be held this evening at the Calumet Y. M. C. A. building. Miss Winifred Salisbury will present a complete and detailed report of the operations of the bureau since its organization. Without the systematic work of the past several months the suffering of the poor would undoubtedly have been much greater. Children have been enabled to go to school because of food and clothing provided through the bureau by kind-hearted people and work has been secured for many people who had been unable to find employment and to provide the necessities of life for themselves.

## RHEUMATIC PAINS.

Are You Sure Your Kidneys Are Well?

Many rheumatic attacks are due to uric acid in the blood. But the duty of the kidneys is to remove all uric acid from the blood. Its presence there shows the kidneys are inactive. Don't dally with "uric acid solvents." You might go on until demerol day, but until you cure the kidneys you will never get well. Doan's Kidney Pills not only remove uric acid, but cure the kidneys, when they are all wrong from uric acid. Here is Marquette testimony to prove it.

## RESERVED BY LANSING.

Delore Chaput on the Roster of Southern Michigan League Nine.

The list of players reserved by the teams of the Southern Michigan Professional baseball league has been made public and on the roster of the Lansing nine is the name of Delore Chaput of Marquette. It is not known whether Chaput will go to Lansing next year to play ball. He is a smaller offer from the same aggregation at the beginning of this year to break into professional ball, but instead twirled for the Marquette team of the Copper Country Amateur league for a time and later in the season was with the Ishpeming nine in the iron country. Chaput is a pitcher of no mean skill and ability and has received a number of offers to go with professional nine.

A number of other players well known in the copper country are on the rosters of the Southern Michigan league, and former winners of the league have signed up with Bay City. Among them are Pitcher Ed Gieseke, Pitcher R. W. (Terrible) Terry, Second Baseman Pete King, Outfielder G. C. Henderson and Short-stop Seneca, Roy Newcomb, a former Lake Linden pitcher, is also on the list of players reserved by this team. Newcomb, since leaving the copper country, has been catching and not pitching as he did in the copper country. George Thomas, once with Lake Linden as catcher and second baseman, is on the roster of Saginaw, which was the champion of the past season.

The Southern Michigan league is composed of nine from eight cities, Adrian, Flint, Kalamazoo, Lansing, Battle Creek, Bay City, Saginaw and Jackson.

## SOUTH RANGE TOWN HALL.

South Range, the youngest village in the copper country, is growing so rapidly that it finds the need of a town hall, and architects are preparing plans for a building. It is a question, though, whether the municipality will be able to see its way clear towards investing the sum necessary to construct such a hall. A wooden structure, according to the plans, would cost in the neighborhood of \$8,000, and a stone building of the same design would cost double that amount. The hall would be a two-story building, with rooms on the first floor for the village council, private apartments for the president and ample room for the fire-digital equipment on the second floor would be an auditorium with a seating capacity of 400, a balcony which would seat 150 more and a large stage with dressing rooms on either side. The hall would be located in the basement. The council will meet Thursday evening, when the village hall proposition will be looked into.

## DEATH OF MRS. BERTHA SAMSON.

Mrs. Bertha M. Samson, eldest daughter of the late Edward L. Siller, died at 2:30 o'clock Saturday morning at her home on College avenue, Houghton, after a lingering illness with a complication of diseases. Mrs. Samson was born in Houghton Dec. 31, 1860, and spent her entire life there. She is survived by one son, Walter R. of Houghton. The sisters are Mrs. Mills, Mrs. Trexvahan and Miss Belle Siller, and the brothers, Edward F. and Robert of Painesdale; Frank J. of Houghton, Alex. and Walter of Tah and Claude of Jackson.

And the School-boy with his Bread and Butter

After all—there's nothing quite so good as bread and butter. It is food. Food for the brain and food for the body. And the better the butter the healthier will be the person who eats it.

### Silver Creek Creamery

#### Pasteurized Butter

has that smooth, delicious taste. Remember how we wanted butter when we came from school? Spread on thick. Now even grown folks want butter spread on thick—but it must be Silver Creek Creamery Pasteurized Butter—the healthful butter. Sold by all grocers in one pound prints wrapped in parchment paper. Your grocer can get it for you if he hasn't it now.

## SPREAD CONSERVATION IDEA

That the Purpose of the National Association.

Dr. Eliot Is the Acting President—Efforts Will be Made to Extend the Work Through Congress and Legislatures, and Every Citizen Is Expected to Support the Movement.

Washington, Oct. 31.—Thomas R. Shipp of Indianapolis, secretary of the National Conservation commission, appointed by President Roosevelt, has been elected general secretary of the National Conservation association, of which Dr. Charles W. Eliot, the acting head. In view of the increased importance of his new office, Mr. Shipp has tendered his resignation to the United States Forest service, in which he has held a position of responsibility for the last two years. As secretary of the new association, he will have offices both in Washington and New York city, although practically his entire time will be spent in Washington. He has just returned from New York, where he established headquarters in the Fifth avenue building. He will soon open offices here.

President Eliot has taken active charge of the work of the association and the membership is expected to reach into the hundreds of thousands of individuals. The object of the new organization is the practical application of conservation principles by the states and by the national government, both through legislative and administrative measures. Thus the field occupied by the association is a broad one, embracing such subjects as national importance as the preservation of forests, reclamation of lands, both by irrigation and by drainage, and the prevention of monopolistic control of water power.

## Upper Peninsula

Cows Run 10,000 Trees—T. B. Wyman, chief forester of Michigan, reports that ten thousand young spruce trees planted by him for the Cleveland-Cliffs Iron company on a burned over hill near the western confines of the village have been practically destroyed by cows grazing on them. This has entailed a large monetary loss besides robbing the bill of the picturesque beauty with which these trees in a few years would have clothed it. Village President Scholtes says the council would prefer a drastic solution to this winter and that as long as he is chief executive officer the ordinance will be strictly enforced.

## So's Coal Supply Short

A. P. Kemp of the Soo says the supply of anthracite in that city is short and that it is also impossible to get any more coal from the mines. We have been trying for over a month to get our usual supply of hard coal," said Mr. Kemp. "but have not been able to do so. We have enough to supply all present orders, but our stock will not last to exceed a month. Of course we expect to receive more before the close of navigation, but this is no sure thing. The weather for the past month has been such as to keep many of the smaller coal carriers out of commission, which is the real reason for the shortage of stock. If it is possible to get in the coal before the close of navigation, it will mean that the dealers will have to work for nothing during the winter, while the public will be compelled to pay the heavy railroad charges. We shall endeavor to get enough by boat to supply all of our customers, and we are keeping the wires hot all the time in our efforts to do this."

## FISH LIVES IN DRIED MUD.

A fine specimen of a remarkable West African dried mud fish was sent to me by a friend. The creature is known as the mud fish, and as its name implies, lives in the mud at the bottom of the rivers. It looks very much like an ordinary fish, except for its long, curious fins. It was enclosed in a thin coat of dried mud lined with mucus from its body, and perforated with a small aperture, to admit of breathing. This "cocoon," as it is called, dissolved when the fish was placed in warm water. The fish at the bottom of the river, is the most wonderful provision of nature for the exigencies of the climate. The river which it inhabits is liable to periodic droughts, and such a drought is important to the fish, as it is able to dig a pit, in which it lies covering itself over with a thick layer of mud. It can thus await quiescently the coming of the rains. But the most interesting fact about it is that it breathes air during its imprisonment through a hole in the "cocoon" by means of the lungs just like a land animal. When the returning rains dissolve the mud, out comes the fish, breathing through the gills, like the rest of the bony tribe.

## Prominent Men Interested.

The executive committee of the new association includes the name of such men as James R. Gardiner, former secretary of the interior; Walter L. Fisher, the lawyer who successfully conducted the Chicago traction fight; Bernard N. Baker, of Baltimore, who for twenty-five years was the head and owner of the Atlantic Transport Line; Charles L. Pack of Lakewood, N. J.; John F. Bates, the war correspondent; and Joseph N. Teal of Portland, Ore., one of the leading lawyers of the Pacific coast. The association says:

"We therefore form this association to advocate and support the adoption by the people themselves, and by their representatives of definite and practical measures to carry the principles for which we stand into effect and to oppose in all appropriate ways all action which is in conflict with these principles, where such action is attempted by individual citizens, members

## BREAKFAST FOOD AND MEAT.

Vast Consumption of the Former Raising the Cost of the Latter.

Meat will continue to be high in price, so the packers say. Probably the price will continue to rise. In the nature of things there is no standstill. If prices are not going to fall the price of meat is going to rise. Why is meat high? Because grain is high; that is one principal reason. The packers assert and admit it. Apparently it is gospel truth. But why is grain high? Eliminating Mr. Tatten from the conjecture, there he and his kind are the only temporary phenomena, there is a reason, of course. It is easy to cite the law of supply and demand; but what explains the proportion between supply and demand? There will be several answers to that. Perhaps all of them together would make the right answer. For example, the head might be incapable of taking it in without involving a ton great risk of an attack of vertigo to make the effort worth while. It is generally understood that the whole science of domestic and political economy and much else sooner or later comes to rest on the price of grain. Charles Dickens once remarked plaintively that if he permitted himself to be drawn into an agreeable controversy an almost any topic, his antagonist was pretty sure to land him up against the wheat supply; whereupon he became stumped and could think of nothing further to say.

## QUAINT SCHOOL CUSTOMS.

Long Ordeal for the New Boy at Rugby—The "Kish" at Marlborough.

J. L. Patten, headmaster of the Marlborough grammar school, in a speech at Exeter, referred to a boy who had spent three years standing in a school, now when efforts are being made to collect full crews that a very large proportion of these younger men have found congenial and remunerative employment as chauffeurs of automobiles. The majority seem lost forever as a part of the labor constituency of the machinery industry.—Iron Age.

The custom is only a minor instance of the quaint practices that exist at all the great public schools, and are maintained with religious exactness in school time, and in addition to the ordinary functions of a cushion is employed to carry books from one form room to another.

At Shrewsbury school at the beginning of each term "ball elections" are held for the posts of ball erector, ball constable, ball postman, and ball scavengers. The brutal brutality of youth often selects for the position of ball erector the most mercenary boy in the school or one who is ambitious to attain a station.

## A STRIKING CHANGE.

The usual to strike his fancy in the days of long ago, as homework from the schoolhouse they strolled in the afternoon; he courted her and wooed her, but they weren't newly paired, and things that later happened, well they couldn't be aired. As maiden she was quite full of common sense and grace; she used to strike his fancy now, alas! it is his face.—Boston Herald.

## HAPPY ESKIMOS.

Eskimos are all children, contended, peaceable, honest and hospitable, without rubbers and without ambition, for fame or power. They live almost entirely on raw animal food, and this explains the absence of a number of diseases which are common to civilization. Salt water contains iodine, and all sea animals, as well as all who eat them, unaccountably absorb more or less of this fickle substance.

The Eskimos have no physicians; indeed, have no name for drugs or doctors. Nature here acts the good sanitarian and shuts the door against all disease germs and blends in their food iodine, the most powerful and least harmful of all antiseptics. The use of remedies either inside or out is unknown. Wounds heal up at once without mattering. All tumors, warts and cancers are unknown.

## LUCKY ESKIMOS.

The large number of manufacturers who have been planning to produce automobile parts promises to be materially increased by the announcement of the automobile builders that they are unable to secure enough parts to make the output planned for 1910.

Today the movement is taking in many manufacturers whose previous training has been in other directions, and the departure may be too radical to be wise. Enthusiasm for the new product may mean the neglect and serious injury of the old.

At the present time the successful automobile part brings the handsome profit which a specialty usually commands, but as with every other business, the time must come when competition will

## S.S.S. THE ONLY REMEDY FOR BLOOD POISON

The first symptom of Contagious Blood Poison is usually a little sore or ulcer, so insignificant that often no attention is given to it. But when the blood becomes more fully infected with the virus the mouth and throat get sore, glands in the neck and groin swell, and sometimes ulcerate, forming sores and ulcers, the hair comes out, copper colored spots appear on the body, and where the disease is allowed to remain in the system the poison frequently penetrates deeper and attacks the bones. S.S.S. is the true antidote for Contagious Blood Poison—the only remedy that is able to get to the very root of the trouble and remove every particle of the virus from the circulation; at the same time S.S.S. acts with upbuilding and tonic effect on every portion of the system. As soon as the system gets under the influence of S.S.S. the symptoms begin to disappear and soon a perfect cure is made. S.S.S. can be used in the privacy of one's own home and a home we have prepared a special Home Treatment book which contains much valuable information to Contagious Blood Poison Sufferers. With the aid of this book and the use of S.S.S. a cure can be effected in every case. We will send this book, and also any medical advice free to all who write.

Yesterday's temperatures: Seven a. m., 41 degrees; noon, 46; 7 p. m., 42. Maximum, 48 degrees; minimum, 41.

Mr. and Mrs. L. G. Kaufman went to Chicago Saturday evening.

The regular November meeting of the city council will be held this evening.

J. R. Gillard left last evening to spend a few days in Detroit and Ann Arbor.

Mrs. E. M. E. Delf has returned from a visit with her son and his family in Calumet.

Miss Borgheld Braastad and Bernadette Butler of Ishpeming spent over Sunday with Miss Margaret Scully.

Mr. and Mrs. Karpenky and Miss Elizabeth Blok of Michigan went in the city yesterday, visiting Miss Elizabeth Friel.

It was Trombly's orchestra instead of the Peerless orchestra that furnished the music for the K. O. T. M. O. W. ball at Tratenity Hall Friday evening.

Mrs. J. M. Meyers and daughter and Misses Adams and Hanson, of the J. H. Foster store, left for Chicago last evening on a combined business and pleasure trip.

Miss Mabel Mason and Miss Lulu Laesmer, members of the Ishpeming High school faculty, spent Saturday and Sunday in Marquette, the guests of Miss Russell.

As the Negaunee Settlers did not appear, the North End football team took on the Marquette Rivals at the fair grounds yesterday afternoon and defeated them 6 to 0.

The funeral of the late Ruth Cameron will be held from the family residence, 128 West Ohio street, at 2:30 this afternoon, conducted by Dr. Tupper, with interment at Park cemetery.

Robert J. Wynn of the Soo, Stacy H. Hill of Houghton, E. B. Wallace of Republic and Otto L. Arnold of Iron Mountain were among the upper peninsula visitors in Marquette yesterday.

The Normal football team is planning a trip the latter part of this week. Unless the unforeseen happens the team will play the Newberry high school team at Newberry Friday afternoon and the Soo high school at the Soo Saturday afternoon. It is possible that the team will play at Manistique Thursday afternoon.

Timothy Griffin's funeral—the funeral of the late Timothy Griffin will be held tomorrow morning, and not this morning as was first arranged. The services will be at St. Peter's at 9 o'clock.

Pleasantly Surprised—Lillian Stenglein, daughter of Mr. and Mrs. John Stenglein, East Hewitt avenue, was pleasantly surprised Saturday evening by about thirty of her friends. The evening was enjoyably spent in playthings and other Halloween amusements, following which refreshments were served.

Returned to Watson—George Wansky, who is accused of having robbed a saloon at Watson last week and was arrested the next day in Escanaba, was to have had a hearing before a Wells township justice Saturday, on the charge of having been brought to the county jail and it is not known here what disposition was made of the case.

Services at St. Peter's—Today—All Saints' Day—being a day of holy obligation, there will be masses at St. Peter's cathedral at 5:30, 7 and 9 o'clock a. m., with vespers at 7:30 o'clock in the evening. A service at 2 o'clock will be a pontifical high mass. Tuesday will be All Souls' Day, in observance of which low mass will be sung at 6:30 o'clock and pontifical requiem mass at 8 o'clock.

Insane Man Captured—Frank Lesque, the insane man who escaped from the officers by jumping through the car window at a moving South Shore train, while being taken from Menominee county to the Newberry asylum, is reported to have been captured near Creighton Saturday, and the Menominee county officers have been notified to take him in charge.

Halloween Party—Some thirty well known young ladies of the city enjoyed a Halloween party at the Bijou Saturday evening from which the other sex was vigorously excluded. During the evening cider, apples, pop corn and other Halloween refreshments were served. The party went off so successfully that another to be given within a few weeks is planned. The invitation list will be extended to include some of the married friends of the guests of Saturday night, but men barring the orchestra, will be continued under the ban.

Peary at the Bijou—Commander Peary, the Arctic explorer and the man who has gained considerable notoriety on account of his controversy with Dr. Cook over the discovery of the pole, will appear in moving pictures at the Bijou today. Everybody is more or less interested in the polar dispute and no doubt many will take advantage of the opportunity to see the commander and his family at home. The concert and moving picture exhibition at the Bijou last evening was very largely attended. A program was started for the Boys' band, under the auspices of which the entertainment was given.

Changes in Schedule—Beginning today, several changes will take place in the street car schedule. The first car will leave Front street and Baraga avenue at 5:40 a. m. instead of 5:30, and on Sundays the first car will leave at 6:30 instead of 5:30. The car on the fair grounds branch will not run on Wednesdays and Sundays during the winter months, beginning this week. This afternoon and tomorrow a car will be run on the fair grounds branch, connecting with the car leaving Front and Baraga at 1 o'clock and every half hour until 4:30 p. m.

tators would doubtless like to have seen the Marquette team win yesterday.

Brick Throwing Costly—John Bloom of Saxon entered Marquette Saturday looking for trouble. He got it and will spend the next thirty days in the county jail. Bloom had been working for the railroad, but had quit and had come to Marquette to get his money.

Upon being taken to the office of the company that his time had not yet been sent in, he became abusive. Leaving the office in an ugly mood, he went down on the station platform, picked up a brick and deliberately threw it through the plate glass in one of the doors. He was promptly arrested and taken before Justice Byrne, who imposed a sentence of thirty days in jail.

New Time Card Today—A new time card goes into effect today on the Marquette & Southeastern and allied lines of the Cleveland Cliffs iron company's railroad system. All trains will be run daily except Sunday. The train for Birch and Princeton will leave at 7 o'clock a. m. and 5:15 o'clock p. m. and will arrive from those points at 9:20 a. m. and 7:15 p. m. The train to Ishpeming will leave here at 3:50 a. m. and will return at 5:55 p. m. that to Birch and Big Bay will leave 9:25 a. m. and return at 1:55 p. m. No provision is made for Sunday trains, although trains will be run on that day during the deer hunting season.

Back to Jail Again—After attempting to break down the door of his room at St. Mary's hospital and creating other serious disturbances, the peculiar stranger who was picked up by the local police a few weeks ago, was returned to the county jail yesterday afternoon. When first arrested, the fellow babbled continuously in some unknown tongue. He was sent to jail, but there he refused to eat or drink and was irritated most of the time. About a week ago he was taken to St. Mary's hospital. Now he is in jail again and the authorities are undecided what to do with him. During all this time he has not given anyone a clue as to his identity.

INSURE WITH PETER WHITE & CO.  
**Upper Peninsula**

Accused of Selling Liquor Illegally—Because it is alleged he sold liquor without a license, Robert Taylor, colored, was taken before Judge Rannels in justice court at the Soo. The case was not finished, an adjournment being taken until this morning.

It is alleged that Taylor was running what was called the "North West club" on Ridge street, in the west end of the city. The "club" was for colored people.

Shoots and Kills Himself—William O'Donnell, of the firm of O'Donnell & Little, general merchants of Stephenson, Menominee county, was accidentally killed late last week while cleaning a rifle preparatory to going on a hunting trip. The bullet entered the right side of his head. The fatal accident occurred at the home of the young man's mother. He is supposed to have been thirty-five years old and single. He is buried with his mother and two sisters. Previous to engaging in business with his partner, Mr. Little, he had charge of the store of Crawford & Sons at Cedar River for several years.

Played Ball at Iron Mountain—The announcement of the death of Charles F. Spalding, lumberman and banker, at his home in Chicago was a great surprise to his many friends in Iron Mountain. Mr. Spalding, in his college days, spent considerable time at Iron Mountain and vicinity. He was a great lover of baseball and was one of the best amateur players in the country. During the vacation season, he affiliated with one of the Menominee range teams. Mr. Spalding succeeded his father, the late Jesse Spalding, as a director of the Commercial bank of Iron Mountain and held that position until a year ago.

Curfew for Escanaba Children—Curfew regulations are now being enforced at Escanaba. Steam whistles are blown every evening from now on the curfew will be sounded at 8 o'clock and children found on the streets after that hour, unless attended by their parents, are to be arrested and dealt with legally.

The deplorable criminal cases heard in circuit court during the past week last stirred the chief magistrates to definite action. Young women just budding out of tender girlhood and youths still young in the ways of the world can no longer roam the streets of Escanaba after dark.

Local Option Petitions Denied—The proposition of closing the saloons will not be submitted to the people of Mackinac county. The local option petitions have been denied by the board of supervisors. The vote was ten to five. The petitions were signed by 237 persons, or sixty-four more than the required one-third of the electorate.

But when investigated by a special committee they failed to muster in many respects, with the result they were declared insufficient by a wide margin. The matter was hard fought before the board, both sides being represented by attorneys.

Damage Suit Is Dropped—The \$5,000 damage suit for alleged malicious prosecution which Attorney Johnson of North Escanaba brought against the Rev. C. A. Lund over a year ago has been discontinued by the plaintiff, who pays all the costs incurred. This case grew out of the arrest of Johnson on a charge of violating the liquor law, the complainant being the clergyman. The liquor dealer was discharged upon his examination, and the damage suit followed. The case was followed up by friends of Mr. Lund and they are said to have succeeded in getting several witnesses in addition to those produced at the examination of Johnson, who were ready to swear that they were in the saloon the same Sunday as charged.

Bereaved Mother Loses Suit—After battling for three hours the circuit court jury trying the \$5,000 damage suit brought at Escanaba by the administratrix of the late John Baenen against Frank Loefler returned a verdict of no cause of action. The case was bitterly contested. On the first ballot eight jurors voted in favor of the defendant. The suit was started against Loefler by Mrs. Anna Mullen, widow of John Baenen, deceased, in 1907 and the first case resulted in a disagreement. On the fourth day of September, 1904, Loefler accidentally shot and killed the boy in the woods through and over the miles from the town of Harris, Menominee county. The two women, according to the undisputed evidence—Baenen was employed by the de-

pendant—went into the woods on business. A short time afterwards while walking through the brush searching for partridge, Loefler spied a brown object in the bushes and fired. The bullet crashed through the unfortunate youth's head, entering to the left of the left eye. Loefler attempted to secure a doctor, but before medical aid arrived the boy had passed into eternity.

Railroad Fights Assessment—E. S. B. Sutton, attorney for the Soo Line, has filed a bill of complaint in the office of the county clerk at Saint Ste. Marie praying that an injunction be issued to prevent the city from collecting the special taxes levied against the railroad company for the construction of the Meridian street sewer. Twenty-six reasons are given why the assessment should not be levied, among which are the following: Only three sides made to the assessment district; city attorney has no authority to sit as a member of the board of review; the sewer was never ordered, only deemed advisable; corporation not allowed to file the sewer for drainage purposes. Judge Steere has issued an order to show cause why an injunction should not be issued, returnable at his chambers No. 4.

Miner Meets Death—Alfred Verrellino, employed at the Millie mine at Iron Mountain, was fatally injured by a fall of ground last week and left from his injuries. Verrellino and his partner were working in a stope. A hole had been blasted and the men were harring down some loose ground when a large piece of overhanging ore came down suddenly and struck Verrellino on the right thigh, knocking him down from the quarries at Bloomington, Ind. The public lobbies will be of marble with terrazzo floors; the wires for telephones, electric lighting and the electrical clocks, of which there will be several will pass through conduits built in the floors. The building will be heated by hot steam and the most modern system of plumbing will be used. The building is of Roman design with Greek details, and is one of the handsomest in the entire state. The contract price is \$100,000. Frank P. Ward, the government inspector, says the site is one of the most beautiful in the whole country. The building will be sufficient to accommodate all of the United States officials and furnish a postoffice with a capacity necessary in a community of this size of from 75,000 to 100,000 inhabitants.

Chippewa Farmers Prosperous—James L. Lipsett, implement dealer of the Soo, grew reminiscent in a talk the other day on the general conditions of Chippewa county. Mr. Lipsett established his business in 1875, thirty-four years ago. "This has been the banner year for the farmers in the history of the county," said Mr. Lipsett. "There have been enormous crops of peas, oats and high prices prevail. The hay crop was not as heavy as usual, but the farmers are receiving \$1.50 a ton for a fair yield and will really derive as much money from the crop as in former years. There is not a farmer in Chippewa county that is not making money. I know because I deal extensively with them and have personal knowledge of their condition. For several years after I started in the business my annual sale of farm implements did not amount to more than \$200 or \$300. There were but a few scattered farms and the roads were little better than trails. Now my annual sales run into the thousands of dollars and Chippewa county farmers have the best up-to-date machinery manufactured; the county has hundreds of its fine farms as can be found anywhere in the United States and the county has the best roads of any in the upper country."

Condit is a pretty sure sign of a lack of experience.

**HIGH AND LOW PRICES.**  
Paine, Webber & Co. furnish The Mining Journal with the following "high and low" prices of copper stocks for the week ending Saturday:

	High	Low
Adventure	5	4 1/2
Alouez	60	54
Arizona	4 1/2	4
Atlantic	1 1/2	1 1/4

Paine, Webber & Co's Wheat Summary.

CANADIAN NAVAL PLAN ENTERS ROUGH WATERS

Dominion Government's Proposal to Build and Fit Out Warships Provokes a Controversy Which Recognizes No Party—News and Comment from Over Border.

Montreal, Oct. 31.—With the session of the federal parliament near at hand, political activity is rapidly approaching the abusive stage.

Glodwin Smith's Argument. From several quarters the appeal has come that the whole subject be laid before the electorate before final action is taken by the Canadian government.

May Be "Called" by Experts as Is the Moose—Color of the Antlers. In an earlier issue as a rule the open countries are travelled on fine warm days.

Intercolonial Railway. A few months ago the intercolonial railway was handed over to a board of management and confident hope was expressed that the day of better things had come.

MAN'S DEBT TO THE HORSE.

A Decile, Willing, and Useful Servant for Ages. Of all dumb brutes the horse is the one which most deserves the gratitude of man.

A SIMIAN PICKPOCKET.

One of the most singular captures ever effected by the Paris police, like many recent ones which arrested an acrobat named Miguel Androval, who is attached to a traveling circus playing near Paris.

DEVIL FISH OF GREAT SIZE.

Devil fish weighing up to 200 pounds are sometimes caught in Japan. These fish are amphibious; they are often seen wallowing on their backs.

CAMPAIGN ENERGETIC.

Dr. Wiley's Force Actively on the Trail of Dealers in Impure Foods—During the Last Three Months Three Hundred Cases of Violation of the Law Have Been Reported.

Washington, Oct. 31.—The bureau of chemistry in the agricultural department which administers the pure food law, has never more energetically on the trail of dealers in impure foods than at present.

Wiley's Bureau Investigates. Dr. Wiley's bureau cannot prosecute, it cannot even refer cases direct to the department of justice.

No Leniency to be Shown.

The bureau of chemistry says that from this time no leniency is to be shown violators of the law.

THE REAL BLACK DIAMOND. It is Found Only in a Very Small Section of Brazil.

The term "black diamonds" is sometimes loosely applied to ordinary coal which we burn in our furnaces.

Each of the coins is an evidence of petty larceny.

Hardly six months passed before one of the telephone companies discovered that the collectors were yielding a harvest of three-cent pieces.

Each company forwarded the pieces to the manufacturing company, and more or less politely asked that a corresponding number of dimes or a check for an equivalent amount be sent back in exchange.

A record was held at the office of the manufacturing company. The cost of collecting the boxes was compared with fairly trustworthy information of the number of three-cent pieces in circulation.

It is said that if over the premium on three-cent pieces goes high enough, the coins will be offered to collectors at prices based upon the original cost to the company, plus 6 per cent a year, plus cost of storage, plus cost of guarding, plus cost of carrying the funds up

EXPECTS NO TARIFF WAR.

Congressman Sereno Payne Decries Current Suggestions.

Believes This Country Will Get Better Arrangements—Maximum-Minimum Plan a Great Advantage—He Thinks There Will Be No Early Legislation.

Washington, Oct. 31.—Sereno E. Payne, chairman of the ways and means committee, who is in Washington for the first time since the new tariff law was enacted, deprecates the report that the United States will soon find itself in a tariff war with France and Germany, and perhaps Canada.

Mr. Payne's attention was called to the suggestion made in the Canadian press that the tariff law would be modified by congress at the coming session where it touched the duties on paper and wood pulp.

"Yes, it is certainly true that we have purer food and purer drugs than we ever had before in this country," said Dr. Wiley.

"I have a very definite idea as to what should be done, but that is the very thing I cannot discuss now."

"The new tariff board," said he, "was appointed under the new law which authorizes such a commission to aid the president in carrying out the maximum and minimum provisions of the law."

Mr. Payne has an impression that President Taft will appoint the members of the customs court provided for in the tariff bill soon after congress meets.

THE INVOLUNTARY WORK OF A DIME SLOT MACHINE COMPANY.

Each of the coins is an evidence of petty larceny.

Hardly six months passed before one of the telephone companies discovered that the collectors were yielding a harvest of three-cent pieces.

Each company forwarded the pieces to the manufacturing company, and more or less politely asked that a corresponding number of dimes or a check for an equivalent amount be sent back in exchange.

A record was held at the office of the manufacturing company. The cost of collecting the boxes was compared with fairly trustworthy information of the number of three-cent pieces in circulation.

It is said that if over the premium on three-cent pieces goes high enough, the coins will be offered to collectors at prices based upon the original cost to the company, plus 6 per cent a year, plus cost of storage, plus cost of guarding, plus cost of carrying the funds up

ON THE LOOK.

Long ago the slot machines that collected them were relegated to the scrap heap—New York Star.

A RACE WITH A KING.

A Returned Tourist's Story of a Brush With Alfonso of Spain.

Of the many residents of Baltimore who have passed the summer in Europe probably none attained the distinction of Samuel C. Rowland, vice president of the International Trust company, who while motoring in Spain met King Alfonso of the land of Cervantes.

The meetings occurred on the road from Biarritz to San Sebastian and although interesting were brief.

"I'm a little dubious of this king business," said Mr. Rowland democratically.

"Your autos were going in the same direction?" was suggested.

"And which was ahead?"

"Well, we were ahead at first, but the king passed us. Then somehow we began to gain on him—whether my son Harvey, who was driving, opened the throttle a little, I am hardly prepared to say.

"Most persistent king I ever saw," said Mr. Rowland.

"And who was ahead at the finish?"

"Well, noblesse oblige, you know, and we let Alfonso keep the lead."

According to Mr. Rowland, the rival autos were within hailing distance for about four miles, and time went quickly on that distance.

THE REAL BLACK DIAMOND. It is Found Only in a Very Small Section of Brazil.

The term "black diamonds" is sometimes loosely applied to ordinary coal which we burn in our furnaces.

Each of the coins is an evidence of petty larceny.

Hardly six months passed before one of the telephone companies discovered that the collectors were yielding a harvest of three-cent pieces.

Each company forwarded the pieces to the manufacturing company, and more or less politely asked that a corresponding number of dimes or a check for an equivalent amount be sent back in exchange.

A record was held at the office of the manufacturing company. The cost of collecting the boxes was compared with fairly trustworthy information of the number of three-cent pieces in circulation.

It is said that if over the premium on three-cent pieces goes high enough, the coins will be offered to collectors at prices based upon the original cost to the company, plus 6 per cent a year, plus cost of storage, plus cost of guarding, plus cost of carrying the funds up

iron called bits and these bits are attached to tubing. Armed with these black diamond teeth the drills push their way under severe pressure to a depth of five thousand or six thousand feet, cutting through the hardest kind of rock.

Black diamonds or pure carbon are not by any means cheap and the owners of the mines in Brazil where they are gathered are making a good thing out of their monopoly.

In the last thirty years the price of black diamonds has advanced from \$5 to nearly \$85 a carat, and the tendency is still upward.

The arming of a drill with diamond points is thus a rather expensive matter. Usually a set of eight stones are placed in the head of a single drill. If each diamond weighs only 3/2 carats the total cost at \$85 a carat would be about \$2,800 for a single bit.

Great as the expense is, however, it pays, for the black diamonds are so tough that they last a long time, and they achieve results which could not be obtained in any other way.

There is no known substance that can take the place of carbon in drills in boring for gold, silver, copper and other mineral deposits. Before the black diamonds of Brazil were discovered it was impossible to make deep borings.

When the carbon was first introduced in our industries it was used in diamond saws for cutting stones, marble and similar substances. Then the price advanced so that the carbon was found to be too expensive for such use and was substituted for stone cutting. Bort is really an imperfect crystal or gem diamond, but it is too brittle for use in drills.

Consequently bort has taken the place of black diamonds for stone cutting and the latter have been restricted almost entirely to diamond drilling purposes.

The average size of black diamonds used by the drills ranges from two to five carats, but the larger specimens of black diamonds for stone cutting and the latter have been restricted almost entirely to diamond drilling purposes.

The price of black diamonds for stone cutting and the latter have been restricted almost entirely to diamond drilling purposes.

A Philadelphia man was in great distress one morning not long since by reason of the delay in serving his breakfast.

"I wish you'd go to the kitchen," said he to his wife, "and see what the trouble is. I've an appointment at 9."

The wife complied with the request. When she returned to the dining room the husband observed a strangely melancholy expression on her face.

"Well," asked he, impatiently, "did you tell the cook that I wanted my breakfast immediately?"

"I did."

"And what did she say?"

"She said," responded the wife, "that we all have our disappointments."—Buffalo Commercial.

PHOTOGRAPHING SOUND.

Professor Dayton C. Miller, of Cleveland, Ohio says he has discovered a means of photographing sound. He claims that by the use of his device it will be possible to distinguish on films the difference between the human voice and the tones of a musical instrument.

The invention directly photographs the sound waves, magnifying them 2,000 times, and recording them on films.

In his invention Professor Miller has used a harmonic analyzer an instrument made in Switzerland, which separates sound waves into their component parts.—Van Norden Magazine.

SIMPLE RULES FOR SUCCESS.

Pleasure and simplicity are two old acquaintances. Entertain simply, meet your friends simply. If you come from work well done, are as amiable and genuine as possible, toward your companions, and speak no evil.—Charles Wagner.

ADVICE TO THE MIDDLE-AGED.

After you are 40, you may, if you are not a fool, choose your own rules, your own medicine and your own food. But you will find that the more you are in the open air and the more you are with other people the better you will succeed. You will also find that there is nothing gained by brooding over failure.—Edward Everett Hale.

TO-DAY AND TO-MORROW.

Happy men are full of the present, for its bounty satisfies them; and wise men also, for its duties engage them. Our grand business undoubtedly is not to see what lies dimly at a distance, but to do what lies clearly at hand.—Edward Fitzgerald, "Polonius."

ENIGMATICAL CALAMITY.

Men have often abandoned what was visible for the sake of what was uncertain. have not got what was expected, and have lost what they had—being unfortunate by an enigmatical sort of calamity.—Demetrius Phaleron.

Mrs. A. M. Adams is receiving her fall and winter millinery. It's on display now. All are invited. 219 Blaker St. 10-1-09

**RICH BY TAMING SNAKES.**  
Texas Man Removes Poison and Sells Large Numbers.

Most people would consider the "taming" of snakes to be impossible, and so it is; nevertheless, says the World-Work Magazine, there is a man who does it and who has grown wealthy at this queer trade. This man is F. B. Anthony of Brownsville, Tex.

His establishment, known by the name of the "Rattlesnake ranch," everything in Texas is a ranch—is located right on the Mexican border and within a mile of the city of Brownsville. The ranch consists of a tract of land surrounded by a high fence of boards, so tightly fitted together that nothing can get through, not the slightest crack being allowed.

There are no footways of any kind, entrance being effected by means of ladders over the top. Inside the fence is divided into three inclosures for the safety and comfort of the snakes, some species of which are deadly enemies to others. Brush and dried grass afford hiding places and shade. In these pens and in boxes in the pens are kept, in cages, hundreds of snakes, many of them monsters in size, are kept in stock.

The snakes are captured by Mexicans all over Texas, Mexico, Arizona and other states and territories, and are sent in with the certainty of sale, for Mr. Anthony always has a market for them. The treatment of this queer merchandise, strange to say, is simple and not particularly dangerous. The workers handle these deadly snakes quite fearlessly.

One of the snakes is coiled around a stick, which is rather gingerly held by a visitor who believes in running no risks. This stick is the part of the rattle which rattles when the snake is coiled around it. At its tip is a loop of leather. The Mexican snake hunter punches the snake with this stick until the infuriated reptile coils to strike, meantime keeping up a rattle which sounds like a clock running down. The loop of leather is then deftly dropped over the snake's head, and from that time, rattles he ever so fiercely, he is a helpless captive.

All tales of the distance to which the "rattles" can be thrown, are contrary. It cannot leap at all or strike beyond half its length, and if a third of him is off the ground he can neither coil nor strike. His captor next drags him ignominiously to camp, where he is handled with an immense pair of wire tongs. It takes a strong man to negotiate an enraged rattler when fully aroused and writhing, with his immense power of muscle, for the creatures weigh many pounds, are from six to nine feet long and sometimes as thick through as a man's leg.

The snake is next put into a box with a sliding lid. This lid is carefully drawn back until the snake protrudes his head and is then allowed to crawl in. The snake is helpless to strike, but meantime is making things particularly lively with the portions of his anatomy inside the box. Thumping its sides until it seems as if it would smash it, his rattles keeping up a whizzing sound that can be compared to nothing else over or under the earth.

The snake's head is now forced over the side of the box until the jaws open; glass is held conveniently and the head released when the jaws close on the rim of the glass just as if the snake had struck. This is done to collect the deadly virus, which runs down the side into the glass and is bottled for sale to physicians and chemists of an incalculable amount of experimental purposes. It is supposed to be employed in making anti-toxins, and some day may be used in making it, though it is hardly to be expected that rattlesnake virus will ever become a popular beverage of outlaws themselves favorite household pets.

Each snake yields one or two spoonfuls of virus, and is then practically harmless until the poison glands have been removed with a knife or saw. Later the mouth is again forced open and the fangs drawn out entirely with a pair of forceps, the poison sacs, or glands, which are situated just behind the eyes and at the roots of these fangs, being removed with a knife.

The unfortunate snake is then turned

## Ishpeming Department

### CITY TEAMS PLAY HARD FOUGHT GAME

SOME 300 PEOPLE WITNESSED THE CONTEST BETWEEN THE ISHPEMING CITY TEAM AND THE NEGAUNEE TIGERS.

The Ishpeming City football team defeated the Negaunee tigers yesterday at Union Park by the score of 6 to 2. The game was one of the hardest that has ever been played on the park ground. It was witnessed by a large crowd and owing to inability to keep it off the field the game was at all times slow.

Ishpeming kicked an inside kick, but it failed, and Negaunee tried an inside kick, but it failed and Ishpeming obtained the ball. Kicks were exchanged and Johns, for Ishpeming, tore off ten yards on a pretty double forward pass. Ishpeming fumbled on Negaunee's twenty-yard line. Negaunee tried an inside kick, but it failed, and Ishpeming obtained the ball. Gunville was sent around the end for ten yards, Johns failed in an attempt at a drop kick for goal. Negaunee kicked from their twenty-five-yard line to Johnson on Ishpeming's thirty-five yard line. He missed the kick, the ball going to Negaunee on its fifty-yard line. Negaunee failed on a forward pass. Watters went around Negaunee's right end for ten yards. Ishpeming fumbled on Negaunee's thirty-yard line. Negaunee tried an inside kick and the half ended with the ball in the center of the field. All the playing in this half was in Negaunee's territory.

In the second half Negaunee kicked to Westman on Ishpeming's thirty-yard line. Ishpeming steadily advanced the ball to Negaunee's ten-yard line. Negaunee punted to the center of the field. Kicks and forward passes failed to make the distance for both teams and for eight minutes the ball was played in the center of the field. Ishpeming made a long inside kick, which was recovered by Gunville, who ran in for a touchdown. Johns kicked goal, score 6 to 0.

Ishpeming kicked off to Negaunee, which advanced the ball rapidly by forward passes but finally lost it on Ishpeming's twenty-yard line. Gunville was sent around the right end for twenty yards and Gill took twenty more on a line buck. Time was called with the ball on Negaunee's forty-yard line.

The stars for Ishpeming were Gunville, Johnson, J. Gill, Watters, Johns and Lind. For Negaunee the most conspicuous were McNabb, Hansen, Buska and Annala. The officials were Everett Burge of Negaunee and Oscar Nicholl of Ishpeming. Ted Butler acted as head linesman. Twenty-five and twenty-minute halves were played as follows:

Ishpeming City—E. Gill, center; Guy, right guard; Webber, right tackle; Johns, right end; Lind, left guard; Thompson, left tackle; Gunville, left end; Westman, quarterback; Johnson, right half; Watters, left half; J. Gill, fullback.

Negaunee Tigers—Lamere, center; DeFrance, right guard; Northy and Murso, right tackle; Wasnuth, right end; Johnson, left end; Heinoonen, left tackle; Annala, left end; Choinette, quarterback; Hansen, right half; McNabb, left half; Buska, fullback.

**PAID \$500 TO SEE PLAY.**  
Sick Man Secured Presentation of "Gentleman from Mississippi" in Hospital.

The following story relating to "The Gentleman from Mississippi" is out of the ordinary line:

"John Langdon Randolph, a wealthy planter of Gulfport, Miss., who has been in Duluth looking after his interests, was taken to the hospital suffering with a slight attack of paralysis of the lower limbs. He had had his mind fully made up to witness 'A Gentleman from Mississippi' played by Burr McIntosh, Will Denning and supporting company, and he didn't let a little trifle like money stand in his way.

"The representative of Messrs. Brady and Grismer, the managers of the play, was 'phoned for and he went to the hospital, entered into negotiations with Mr. Randolph and left with a check for \$500 in his pocket. The entire company went to the hospital Thursday morning in a large trolley, gave the performance in street attire, and with improvised 'stage settings,' much to the satisfaction of Mr. Randolph, the other patients, doctors and nurses, whom he had invited to attend."

The Duluth Evening Herald of Friday evening had this announcement of the matinee to be given the following day:

"On Saturday afternoon every lady attending the performance of 'A Gentleman from Mississippi' at the Lyceum theater will be presented with a souvenir of that popular play. It is still drawing large houses, and has proven to be one of the biggest comedy hits ever seen in Duluth. A play as clean as a whistle, with not a suggestive line in it. The cast is an admirable one, and the ladies and their gowns are pretty enough even for Washington."

**DEAFNESS CANNOT BE CURED**  
By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional reform. Deafness is caused by inflammation of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running ear or the ear drums are affected. It is entirely cured. Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are cured. Do not lose hope. Nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Sent for circular free.

F. J. CHENEY & CO., Toledo, O.

**CONGRESSMAN YOUNG IS INTERVIEWED**  
ISHPEMING MAN IN THE COPPER COUNTRY LAST WEEK COMMENTED ON SENATORIAL SITUATION AND OTHER THINGS.

Congressman H. O. Young of Ishpeming was in Houghton this morning on his way home from Ontonagon where he investigated the harbor question at that place, says the Calumet Evening News. Asked concerning the situation there he stated it has not been definitely decided as yet just what will be done. The question of the harbor improvement, clamoring for harbor improvements, but as the board of review of the rivers and harbors committee, of which Mr. Young is a member, does not believe the proposed work will be sufficient to warrant the government shouldering all of the expense of desired improvements. Chief Engineer Fitch has asked the business men what extent they are willing to aid the government in carrying out the proposed work. Mr. Fitch, who is in charge of the question and the projects in the Lake Superior district, recently gave the business men of the village only a limited time in which to make reply. While in Ontonagon Mr. Young talked with influential citizens and he was desired by him to request Mr. Fitch to delay action for a time until the matter is thoroughly gone over and some understanding reached as to what will be done.

**Tonnage Tax Matter.**  
Asked concerning the tonnage tax matter, which promises to become an issue in the gubernatorial campaign in Michigan, Mr. Young stated that there is no doubt that the question will be seriously discussed in the latter part of the state and that the time for the copper and iron interests of the upper peninsula to get busy on this subject is now, in order to forestall any possible action by the state and to have a concerted movement to make an issue.

Concerning the appointment of a successor to the late G. D. Smith as collector of customs for the Superior district, Mr. Young said there are three candidates, Charles Byers of Ishpeming and D. W. Powell and E. W. McPherson of Marquette. Although he has been approached by friends of all three he has not done anything in the matter, the senators and representatives here are in a waiting position, standing that such appointments would be left entirely to the senators and postoffice appointments to the representatives.

Mr. Young commented on the campaign for the senatorship, which is to be waged by Senator Burrows and Congressman Townsend. Mr. Young said that he told Mr. Burrows last winter that if he got out and made a fight for the office he would be re-elected but that if he did not conduct a vigorous campaign he would not be. Mr. Young will leave for home today.

**BIJOU HAS NEW MANAGER.**  
J. A. Reikopf, who has been operating the moving picture machine at the Bijou theater ever since J. C. Woodworth left to take the management of the Grand at Marquette, has been made manager of the house. J. A. Germain is to operate the machine. Mr. Reikopf

**FINAL LECTURE TONIGHT.**  
Professor Trapp will give the last of the lectures in the Chicago Unitarian extension course this evening at 8 o'clock at the Lyceum theater. He will talk on "Victor Hugo." The lecture will start at 8 o'clock.

The Ishpeming center, which was organized a short time before Professor Trapp gave his first lecture here, paid \$200 for the lecture, charged to members \$1 each. The number of members necessary to pay for the cost of the course at the price charged here was not secured, so that it cannot be said that the course was a success financially, but from a moral point of view it has been more than the officers of the organization expected. The course has been given in four other cities, Negaunee, Marquette, Hancock and Crystal Falls.

**They Injure Children**  
Ordinary Cathartics and Pills and Harsh Physic Cause Distressing Complaints

You cannot be over-careful in the selection of medicine for children. Only the very gentlest bowel medicine should ever be given, except in emergency cases. Ordinary pills, cathartics and purgatives are apt to do more harm than good. They cause griping, nausea and other distressing after-effects that are frequently health-destroying and life-lasting annoyances.

We personally recommend and guarantee Rexall's Remedies as the safest and most dependable remedy for constipation and associated bowel disorders. We have such absolute faith in the virtues of this remedy that we sell it on our guarantee of money back in every instance where it fails to give entire satisfaction, and we urge all in need of such medicine to try it at our risk.

Rexall's Remedies contain an entirely new ingredient which is colorless, tasteless and odorless. As an active agent, it enhances the valuable qualities of the best known intestinal purgative tonics. Rexall's Remedies are eaten like candy. They are particularly prompt and agreeable in action, may be taken at any time, day or night, do not cause diarrhoea, nausea, griping, excessive looseness or other undesirable effects. They have a very natural action upon the glands and organs with which they come in contact, act as a positive and regulative tonic upon the relaxed muscular coat of the bowel and its dry mucous lining; remove irritation, overcome weakness, tone and strengthen the nerves and muscles, and restore the bowels and associate organs to more vigorous and healthy activity.

Rexall's Remedies completely relieve constipation, except when of a surgical character. They also tend to overcome the necessity of constantly taking laxatives to keep the bowels in normal condition.

There is really no medicine for this purpose so good as Rexall's Remedies, especially for children, aged and delicate persons. They are prepared in tablet form, in two sizes of packages: 12 tablets 10 cents, and 36 tablets 25 cents. Remember you can obtain Rexall's Remedies in Marquette only at our store.—The Rexall Store, The Stafford Drug Co.

## ISHPEMING THEATRE

Tuesday, Nov. 2

Wm. A. Brady and Joseph R. Crismer announce the beautiful comedy drama  
**A Gentleman from Mississippi**  
By Harrison Rhodes and Thomas A. Wise.

Direct from its triumphant run of more than six months in Chicago.

With Burr McIntosh, Will Denning and the Entire Chicago Cast.

The best American play since "The Senator"—N. Y. Ev. Tel.

**PRICES:**  
Parquet and Box Seats \$1.50  
Dress Circle \$1.00  
First two rows of Balcony \$1.00  
Balance of Balcony .75  
Gallery .50  
Seat orders now being received. Order early. Curtain at 8:30. 10-23-11-1

## CHICHESTER'S PILLS

Small, round, white pills, containing a powerful purgative, which is not only safe, but also pleasant to take. They are the best for all cases of constipation, indigestion, headache, and all other ailments of the bowels. They are sold everywhere.

the woods, hunting partridge. About twenty-five went up on the South Shore train yesterday morning to Clowery and other points west of here. Many drove out early to the districts, both north and south of the city. Several Ishpeming men who have shanks in the woods visited them yesterday, to see if they were in good condition for deer hunting season.

The Uniform Rank, Knights of Pythias, will give its next hop on Friday evening at Braastad's Hall. Dancing will start at 8:30 o'clock, continuing until 12. Landahl's orchestra will furnish the music.

Thomas Malloney, who has been confined to his home with typhoid fever for nearly a month past, is convalescent, and it is expected that he will be able to sit up for a while today. Joseph Rollins is covering Mr. Malloney's territory for Swift & Co. during his illness.

W. C. Rice, who was in T. Hughes & Son's employ for some time prior to about a year ago, has returned to take his former place in the dry goods department until the first of the year, when he expects to locate in the copper country.

**ACTION OF LIGHTNING.**  
Lightning makes trees explode like overcharged boilers. The flames of the lightning does not burn them up, nor does the electric flash split them like an ax. The bolt flows through into all the damp interstices of the trunk and into the hollows under its bark. All the moisture at once is turned into steam, which by its immediate explosion rips open the tree. For centuries this simple theory puzzled scientists, but they have got it right at last.

When a cold becomes settled in the system, it will take several days' treatment to cure it, and the best remedy to use is Chamberlain's Cough Remedy. It will cure quicker than any other, and also leaves the system in a natural and healthy condition. Sold by The People's Drug Store.

It is estimated that over 300 Ishpeming men and boys spent yesterday in

OLD AGE AND EFFICIENCY.

How the Man of Fifty May Check the Failing Process by Reforming His Habits of Life.

Professor Osler's verdict that the man of sixty might be chlorotormed without loss to the community was generally recognized as too sweeping...

Both premature deaths and premature senility are the results of erroneous habits of life, writes Dr. J. H. Kellogg in Good Health.

Professor Osler remarks that the "effective, moving, vitalizing work of the world is done between the ages of twenty-five and forty."

Dr. Dorland has shown that both these statements are erroneous. Here are a few of the things which the doctor tells us would be missed if the results of the work of men over forty years of age were to be blotted out of human experience.

"Printing from type, the discovery of dynamic electricity, of oxygen, of vaccination, of the circulation of the blood, the invention of the reflecting telescope, of the Bessemer process of making steel, of the double-acting steam engine, of railways, and all the inventions and discoveries and advances in chemistry, medicine, manufactures, and commerce which have naturally followed these epoch-making achievements."

History would have to be rewritten, for the names of Washington, Lincoln, Grant, Sherman, Kosuth, Tallyrand, Peel, Cavour, Nelson, Cromwell, Richelieu, Luther, John Knox, Palmerston, Bismarck, von Moltke, Garibaldi, Columbus, and a host of others would have been forgotten in the absence of their most notable deeds.

In science, in manufacture, in commerce, in diplomacy, in literature, in painting, in music, the world would be many a great, and the world would be centuries behind where it is today could the results of the work of men who had passed Professor Osler's limit of forty years be eliminated.

If the man of fifty years finds himself failing in efficiency, let him at once hold a solemn council with himself about his habits of life. Does he smoke? If so he is damaging heart, kidneys, liver, to say nothing about the brain and other delicate tissues.

Does he eat freely of flesh foods? Let him discard fish, fowl and meat at once and forever. Emperor William I, by the advice of his physician, ate no meat during the last ten years of his life.

Does he drink alcohol, tea or coffee? Let him stop at once the use of these poisons. All of them cause hardening of the arteries, and thus premature old age.

Does he live a sedentary life? Let him at once change his habits in this regard, taking several hours' moderate exercise in the open air daily, and let him sleep in pure cold air at night.

Strictly Fresh Blue Point Oysters fresh from the coast. GEO. HAUPP.

WHERE PENN IS BURIED.

The Names of Milton and Burke Associated With the Neighborhood.

By deep lanes which are jeweled with violets in spring, through rich glades of beechwood, pilgrims come every year to a quaint, high-roofed, green-roofed meeting house called Jordans.

By the burial ground behind lies William Penn, the most famous of all "the people called Quakers," the founder of the state of Pennsylvania and the author of a book which has not yet come into its own.

Americans, the most zealous pilgrims of the modern world, are naturally foremost in their devotion to the founder of one of the greatest states.

The reverence of America is natural, and it may well explain the project of which we hear to remove Penn's ashes to the American shrine.

No place in America could have the same fitness as the humble burial ground at Jordans, with its memories of the days when the followers of George Fox persecuted and mocked by the powers of the day, were fighting their battle for freedom and the dignity of man.

In England the fight was won, and to England belongs the dust of the victors. If any other country than the land of his birth and his death, of his work and of his sufferings, is to claim the shrine of Penn, not America alone, but all the civilized world might appeal to him as much as to its founder.

FASHIONS IN FOOD. One Authority Who Has Respect for the Hearty Eater.

Many millions of quiet citizens eat what they please, achieve as green an old age as the most pig-headed of dieticians, are for the most part unconscious of the workings of the alimentary canal.

We are informed that there are, in divers parts of our fair land, sanitariums where the bills of fare are arranged in tabular form to enable one to calculate quickly the proteid, carbohydrate and saline percentages of the various items.

What do our neurologists think of this centering the mind on the digestive system? If there is a law of diet, it is that there are as many laws as individuals. "One man's meat is another man's poison" is an aphorism founded on profound observation.

When you seal an envelope with the white of an egg it is impossible to steam it open.

Mary school children suffer from constipation, which is often the cause of seeming stupidity at lessons.

ous; the utmost freedom of individuality should be accorded them.

Raw meat feeders may deserve respect, but not imitation; breakfast food, however, who prefer to pay four times the price of bread for the same thing, are harmless except under persecution.

Never should a concerted attack be made on these people; they should be allowed to destroy themselves individually. They should not be permitted to organize in gangs to molest normal diners; we object to these monomaniacs, as we do to prohibitionists, precipitating themselves upon persons of normal appetite and thirst who wish to be let alone.

We know gentlemen who for seventy years and more have partaken of meat three times a day and of fried potatoes, hot bread, strong coffee, sausage, scrapple, pate de foie gras, tea, high balls, claret, champagne, and all kinds of delicacies into the bargain, with out apparent impairment of their health.

The Mary Charlotte Mining company has started to enlarge its stockpile ground at its No. 2 shaft, where an increased tonnage of ore will be raised during the coming winter.

PRICE OF BROOMS ADVANCES. Important Household Necessity Has More Than Doubled in Cost.

The failure of the corn crops in Illinois and Oklahoma this year has affected the broom corn market to such an extent that the commodity is now worth \$1.50 a ton, whereas a few years ago it could be bought for \$1.00.

JAPAN WON'T FIGHT. Japan does not want to fight the United States because both government and people cherish a deep and abiding sentiment of friendship and gratitude for this government and its people.

St. John's Episcopal church, which left here about two weeks ago to take charge of the parish at St. Louis, in Gratiot county, Mich., has left the ministry and is at present located in Ypsilanti, where he is engaged in educational work.

LEAVES MINISTRY. Sweet and boiled cider at Haupt's grocery. DID WELL ON MESABA. James Cranley, who lived in Negaunee for a number of years, and who was at one time proprietor of the Garfield House, recently retired from business at Hibbing, Minn.

THE "CANDLE TREE." One of the wonders of the vegetable kingdom is undoubtedly the "candle tree" of Panama, known to botanists as parmentaria candelaria.

WANTED! A CASE OF ECZEMA. Soreful, Salt Rheum, Psoriasis or Ulcers that has baffled all doctors' skill and other medicines.

Case of Nine Years Cured With a Single Set. Gentlemen—We wish to certify that we used Dr. Taylor's Eczema Remedy.

The green grocer usually acquires a lot of ripe experience. When you seal an envelope with the white of an egg it is impossible to steam it open.

Mary school children suffer from constipation, which is often the cause of seeming stupidity at lessons.

### ESCANABA DOWNED NORMAL ELEVEN

USING OPEN STYLE OF PLAY AND  
CLEVER FORWARD PASSES  
HIGH SCHOOL WON GAME.

### SECOND CONTEST SCRAPPY

Though Putting Up a Plucky Defense,  
Marquette Was Beaten by Ishpeming  
on a Questionable Drop Kick.

With ideal weather conditions for the spectators, though a little too warm for the comfort of the players, a large crowd witnessed the two games of football played at the fair grounds Saturday afternoon, in which the Escanaba high school defeated the Normals 12 to 0 and the Ishpeming high school the Marquette high school 3 to 0. The second game was marred by a great deal of quarreling, due to the decisions of Referee Watson of Ishpeming, several of which were highly satisfactory to the Marquette team. In fact, the Marquette boys claim they should have a credit of holding the Ishpeming team to a 0 to 0 score, alleging that the drop kick which the referee declared a goal went at least a foot outside of the post. On the whole, however, Ishpeming played a little the better game.

The work of the Normal eleven against the Escanaba high school team was a disappointment to their supporters. From start to finish the local team was outclassed in every department of the game and the high school players had the jump on them, both on offense and defense. The Escanaba team was splendidly drilled, using the open style of play nearly all the time and frequently making good gains on forward passes. The Normals relied on the old game but were so slow in getting started that to make first down was the exception, though at times Rogers and Heughens ploughed through the line for good gains. The Normal team did not seem to be in so good form as a week ago, due possibly to the fact that a number of the players broke training and attended a dance Friday night.

### Escanaba Scores in First Half.

The Normals kicked off at Escanaba and within fifteen minutes the latter sent Shaw over for the first touchdown and on the goal kick, the ball went squarely between the posts. Score, Escanaba 6, Normal 0. Toward the end of the half, when Escanaba had worked the ball down to the Normals twenty-five yard line, a place kick was tried, on which the officials disagreed as to its being a goal. Umpire Grosse said the ball went over the post and Referee Connell was of the opposite opinion. As the referee's decision seems to be in matters of dispute, the rules would indicate that the score should not be counted.

In the second half, the Normals attempted to punt from their own ten-yard line, but the kick was blocked by Groth, the Escanaba fullback, who grabbed the ball and carried it over or a touchdown. The goal was easy, making the score 12 to 0. The Normals' best chance to score came near the end of the second half, when Pendill recovered a fumble in a scrimmage and ran eighty yards down the field, but first was tackled on the Escanaba twenty-yard line. There Escanaba held the Normals for downs and the game ended with the ball near the center of the field. Heughens replaced Richardson at left half in the second half, which was the only change in either line-up during the game.

### Plucky on Defense.

In the second game, between the Marquette and Ishpeming high schools, Marquette played in much better form than at any time this season, and repeatedly held their opponents for downs when near their own goal. In the first half the ball was never out of Marquette territory and the goals were saved from being scored upon only by holding Ishpeming for downs within the fifteen-yard line. Once Ishpeming fumbled the ball on the Marquette goal line, and it was recovered and carried out of danger by a Marquette player. The features of the half were the excellent punting of Hodson, for Marquette, and the tackle backs and end runs of Sivola, for Ishpeming. Both teams were noticeably quiet and were slow in getting down under the kicks. The half ended with no score.

In the second half Marquette made a slightly better showing on offensive work, and had they been able to hold the field as well as they did when near their own goal, a touchdown might have been made. After ten minutes of play, Butler of Ishpeming tried a drop kick from the twenty-yard line, which to those in line with the ball looked outside the goal post, but the referee declared that it was a goal and should count. The Marquette players strenuously objected and threatened to quit the field, but finally returned to the game. After that there was a scrap after nearly every down and the rest of the game was a farce.

### SOO CANAL PASSAGES.

Boats Locked Through, Bound for Ports on Lake Superior.

Sault Ste. Marie, Mich., Oct. 31.—The boats whose names are here appended have passed the canals the past twenty-four hours, bound for ports on Lake Superior: Dasek, W. W. Brown, Dolnith, 10 p. m.; Dakota, Maud, 10:30; German, 11; Gatterson, 11:40; Sylvavia, 2 a. m.; Cuddy, 4; Mifflin, 5; Clark, 5:30; Howe, 6; Kopp, 7; Woodruff, Adams, Pere Marquette, 7:30; Northern Light, 8; Augustus, W. W. Hutchinson, 2:30 p. m.; Algonquin, Astoria, 3:20; 4:30; Nettleton, Jorie, 5; Reusslaer, Krupp, Ward, Ames, 6:30; Zimmerman, 8.

Miss M. E. Crane will be at Hotel Marquette with a beautiful line of needle work from Saturday, Oct. 30, to Wednesday, Nov. 3rd. (10-30-44)

Favorite Base Burners are fuel savers. Ask us why. (10-23-11) KELLY HARDWARE CO.

### LITTLE DAMAGE DONE.

Hallow'en Pranks Assumed No Serious Proportions in Marquette.

Hallow'en passed off rather quietly in Marquette—that is, as Hallow'ens go. Of course, the boys and some of the girls had their fun, and there are few who have so completely forgotten their youth that they would have it otherwise on All Saints eve, when from time immemorial a certain degree of license has been tolerated. In view of Hallow'en coming on Sunday this year, the youngsters celebrated Saturday night. They confined their pranks largely to harmless tricks, such as throwing ovals, taking up loose boards, tying doors shut and what was a little worse—soaping windows. The entire force of regular policemen augmented by several special officers were on duty until late in the evening and undoubtedly prevented more serious disturbances. The police report that the worst thing that they know of being done was the stretching of a wire across the sidewalk on Front street.

### MRS. BURNELL AT GUILD HALL.

Will Give Dramatic Monologue, "Chandray Lela," This Evening.

Mrs. Abby Snell Burnell, who gave a wonderfully dramatic and realistic entertainment in her impersonation of "Menarche," a high caste Hindu woman, at the Presbyterian church Thursday evening and again at the Methodist church Sunday morning, will give "Chandray Lela" at the Guild Hall this evening at 7:30. This entertainment will be in the nature of a dramatic monologue

in which Mrs. Burnell impersonates the character of a Hindu priestess. An admission will be charged, twenty-five cents for adults and fifteen cents for children. Those who have heard Mrs. Burnell in "Menarche" will want to hear her again tonight and those who have not yet heard her should not fail to take advantage of the opportunity. Her entertainment is not only intensely interesting but in addition she gives her hearers information and ideas of the life of woman in India that could be obtained in no other way, except to visit the country. Her impersonation of the Hindu character is so realistic that one can scarcely realize that it is not a native of that country who is telling the story of her own life.

### THEATRICAL.

#### "A Gentleman from Mississippi."

Burr McIntosh, whose delightful performance in "Scaramo" Langdon in "A Gentleman from Mississippi" has raised that part to the importance of a stellar role, was one of the most popular of American character actors before he settled down to make artistic photography a profession in New York a few years ago. He is best remembered by his creation of such characters as Vernon, the blacksmith in "Mizouza," Tully in "Filib," Joe, the profane cowboy, in "The Cowboy and the Lady," and Daniel Boone Bingley in "The Governor of Kentucky." He also played a round of

Burr McIntosh in "A Gentleman from Mississippi."

parts with Miss Ada Behan when the latter went to London in the Augustin Daily production, "A Gentleman from Mississippi" comes to the opera house Friday night with the reputation of being a merry comedy without any suggestive dialogue or scenes, depending entirely upon sparkling wit and humor as with provoking elements. Romance and sentiment are strong factors in making the play interesting. Delightful little love stories well worked out make the performance charming, while the tactful humor of the old southern senator adds to the importance of his young northern secretary and irresistible in their mirth provoking efforts.

**POLARIS MINERAL WATER** delivered to any part of the city in sterilized one-gallon bottles. Telephone, Bell, No. 217. Polaris Water Co., Marquette.

### FIRST MATCH IS SET FOR TOMORROW EVENING

NEW FIVE-MEN HANDICAP BOWLING LEAGUE TO CONSIST OF EIGHT TEAMS—MUCH ENTHUSIASM MANIFESTED.

The five-men handicap bowling contest at the downtown alleys, in which each bowler will receive a handicap, based on "past performances," is an assured success.

At the meeting Saturday evening it was decided to have eight teams. A committee consisting of H. O. Bell, L. H. Drumme, M. H. Ford, J. H. Godwin, E. Jeanson, O. Manes, A. E. Miller and E. O. Stafford was appointed to receive entries and to adopt rules. The committee got to work promptly and soon found that the new plan has made some a bit with the bowlers that the only difficulty will be to find places on the eight teams for all who wish to enter. Almost all the bowlers who took part in contests last season will join the new league, and at least twenty others who have not figured in league contests before have expressed their desire to take a hand in this one.

It is considered desirable that as many teams as possible be formed voluntarily on the principle of natural selection, as it is believed that teams chosen in this way will develop more team spirit than if the players are arbitrarily divided among the various teams. The committee, however, will find a place on some team for every one who wishes to participate.

The well known Square Deals have already filed their entry and three other teams have already been formed and will be known as Guild Hall No. 1, Guild Hall No. 2 and the Vikings. The entries will close tonight, and the names and membership of all the teams will be announced in tomorrow's Mining Journal. The first match will be played tomorrow evening at 8 o'clock sharp.

The committee has prepared a list of all Marquette bowlers who are thought likely to join the league. The teams will be made up from this list and from any additional names that may be handed in by this evening. The list, with the handicaps allowed, is as follows: E. W. Allen, scratch; A. E. Anderson, 18; Oscar Anderson, 27; Andy Anderson, 27; Dr. W. M. Anderson, 27; H. O. Bell, scratch; O. E. Barber, 31; Vincent Burrows, 35; B. G. Burt, 30; E. Brown, 55; Blake, 45; P. Bolduc, 45; G. N. Conklin, 12; Chas. A. Carr, 25; C. Charlton, 35; A. Carlson, 35; Caine, 45; L. H. Drumme, 14; Wilfred Davis, 18; L. Drake, 18; Chas. Drake, 27; E. East, 25; Wm. Fennessy, 35; M. H. Ford, scratch; C. M. Gooding, 24; J. H. Godwin, 10; Ed. Gregson, 34; A. J. Hamel, 12; A. Hall, 43; E. Jeanson, 5; F. G. Jenks, scratch; G. Jarvis, 35; F. J. Kepler, 36; J. Kimbell, 15; F. B. King, 35; Gus Rydholm, 10; Sam Rose, 35; A. E. Roberts, 45; Ed. Reau, 45; Victor Reau, 45; Wm. Robertson, 35; Leon Shamer, 35; Savola, 35; E. O. Stafford, 13; G. G. Tucker, 36; A. Talbacka, 22; Turi, 49; W. H. Van Idersitie, scratch; F. H. Whitney, 15; H. E. Waters, 45; A. Wheeler, 40; E. Weiser, 35; H. Weiser, 30; H. Williams, 30; S. Webb, 15; Yungbluth, 15; Waltman, 45; Zerbel, 45.

In each game the actual score made by each player will be added to his handicap and he will be credited with the total. Each match will consist of three games. There will be three rounds, in each of which every team will play one match with every other team. The usual rules as to substitutes and other rules governing five-men contests will apply. Suitable prizes will be awarded at the end of the season to the winning team and to the individuals making high average and high score in one game.

All indications point to this being the most successful league series held in several years.

### ART ASSOCIATION POSSIBLE.

Effort Being Made to Interest Public in Its Organization.

J. W. Young, of Chicago, is in the city and it is possible that a result of his visit here will be the organization of a County Art association, for the purpose of holding annual exhibitions in each of these cities. The matter has been discussed in Ishpeming and Negaunee and Mr. Young expects to take it up with Marquette people today and tomorrow. It is possible that a meeting of people from the three cities will be held here tomorrow, when a plan of organization will be discussed. Up-to-read the project has, Mr. Young says, been received with favor.

### TOYS FOR CHRISTMAS.

Manufacturers Are Busy Preparing to Make the Children Happy.

While few Marquette people are yet thinking of the coming Christmas, though it is less than two months away, the toy makers have been busy for a long time, and American dealers are preparing to meet the demands of the boys and girls of this country. The men of small hearts will soon warm up to "Old Chris" and it may interest them to learn something of the real Santa Claus, the German toy maker. For many years, reports an American expert, Nuremberg has been the center of the toy trade of the world, the principal products being metal toys of infinite variety—in soldiers, engines, railways, musical instruments, swords, rattles, etc., and, to some extent, wooden and pasteboard toys, blocks and puzzles. About 12,000 persons are employed in this industry in the twin cities of Nuremberg and Fuerth, the half of whom are women and girls. The workshops, with their so-called trade secrets, are very closely guarded and it is difficult for a stranger to gain admittance. The wages of females employees are five and one-quarter cents an hour, while those of the male workers are about ten and one-quarter cents. They work nine and one-half hours a day, with one hour less on Saturdays. The total value of the toy output of this district during 1908 was \$4,000,000, which is 25 per cent under that of 1907. The toys were exported to every land on the globe but, considerably more than one-third came to the United States. Our imports of toys from Nuremberg were: 1904, \$938,477; 1905,

### BIGELOW & CO.

Booksellers and Stationers.

31, 127, 157, 1906, 21, 47, 600; 1907, 82, 209, 2005, and 1908, 21, 200, 545.

In addition to the total given of exports to the United States during 1908 must be added marbles, celluloid toys and rubber balls, the value of which was \$90,049. It will surprise most persons to know that marbles valued at \$21,169 were bought in Nuremberg last year for the amusement of the American boy. More than three times as many celluloid toys were bought in Nuremberg for the United States in 1908 as in 1907.

### SINGLE MEN—YOUNG OR OLD.

We mend your linen, darn your socks, put a stiffener, sew on a button, clean and launder your linen in a satisfactory manner. In fact, we give your linen "mother attention," which means that your linen will always be in good repair and give very much longer service. Become a regular patron of a white man's laundry and get the benefit of our expert repairing free of charge.

### THE CRESCENT LAUNDRY.

We have heating stoves of all descriptions at all prices.
