

# Copper Country

### ASSOCIATED CHARITIES' ANNUAL STOPS BILLBOARD CONSTRUCTION.

At the first annual meeting of the Calumet Associated Charities, held Monday evening, it was stated by the general secretary, Miss Winnifred Salisbury, that a conservative estimate of the amount of money needed for the work of the association the coming year would be \$3,000. It was therefore decided to conduct a campaign for new members in the four classes, associate, active, honorary and life, and to interest as many fraternal and charitable societies as possible. The association has obtained a firm footing, but the members feel that a greater effort should be shown by the public in general. The secretary stated that a communication had been received from the field secretary for organized charity throughout the United States, congratulating the Calumet organization and promising a visit to Calumet the coming winter or spring.

Directors were elected for the coming year as follows: James MacNaughton, W. J. Uren, Fred Smith, Charles Briggs, Joseph Hermann, Rev. L. K. Knox, Joseph Harper, Edward Usher, Rev. Lucas Klotzko, Mrs. Christine Dymowski, Mrs. Marie F. Grierson, Mrs. Emma Guck, Mrs. Susie B. Childs, Mrs. Eliza Boatson, Mrs. L. Bell Delf, F. S. Carlson, Peter Ruppe, William J. MacDonald, W. J. Gallaher, Dr. Albert B. Simonsen, Dr. A. J. Lawbaugh, Gordon R. Campbell, Rev. J. R. Bossmann, Rev. Daniel Stalker, Rev. E. Solvick, Joseph W. Selden, W. B. Anderson, Henry Brett, W. H. Thielen, Rev. Antonio Molinari, A. E. Petermann, E. W. Delf.

The annual report of Miss Salisbury shows that 199 families, including 832 persons, were aided by the bureau during the first year of its existence. In the 199 families, eighteen nationalities were represented.

### GROWTH OF WINE INDUSTRY.

Copper Range Grape Receipts Show Popularity of Beverage.

The wine manufacturing season of the district is at its height and it is safe to say that 100,000 gallons of home-made wine will be the product of the copper country this fall. These figures are based on the grape receipts reported by the Copper Range railroad. The grape traffic into the district this year has been a record breaker.

The Copper Range has received, in round numbers, 100 cars of grapes this fall, largely for the Italians of Calumet and the South range, though the Austrians make much wine also. Each car contains fifteen tons of grapes and a ton of grapes will make 100 gallons of wine. It is estimated that the 100 cars will yield 150,000 gallons of wine. But as the grapes may not all have been used for wine, it is safe to say that 100,000 gallons of wine are manufactured in the copper country this year.

This beverage is not manufactured for sale, but is used in the Italian and Austrian families. The manufacture has been growing rapidly for the last six or seven years until now it has reached amazing proportions. The unusually large crop of this year is due to the large crop of the fruit and the low price. The grapes come principally from northeastern Pennsylvania and Lockport, N. Y., though Lawton, Mich., sends many grapes to the copper country. The fruit is shipped in crates and basket baskets.

### SMALL CRIMINAL CALENDAR.

Prosecutor Will Have Few Cases—Court Sits in Chancery.

Prosecuting Attorney MacDonald was in Houghton yesterday, attending a chancery session of the circuit court, which is still in its September term. He says that he expects only a small criminal calendar at the November term, opening next Monday, probably not more than a dozen cases.

The case in chancery yesterday was that of Frank Schmidt vs. Carl and Oscar Schmidt. The three are brothers, and Frank brings suit for an accounting, claiming that he is a partner with the other two in the firm of Schmidt Brothers, operating a sawmill at Bear Lake, near the canal, an old institution. About \$20,000 is involved. Frank claims that he was employed at the mill from the age of twelve to the age of twenty-six, and that in that time he was not paid any wages and considered himself a partner. His clothing and other expenses were always charged against the firm, as was the case with his brothers.

### IN THE DAYS OF YOUR GRAND-MOTHER.

Cod Liver Oil was administered in a crude and most repulsive form, and would invariably upset the stomach. Today all the medicinal properties of Cod Liver Oil are combined with Tonic Iron in the Preparation called Viton without oil. It is very beneficial in pulmonary troubles and quickly creates strength for weak, run-down and aged persons. The Stafford Drug Co., Marquette Mich.

## ROYAL BAKING POWDER

Absolutely Pure

Makes the finest, most delicious biscuit, cake and pastry; conveys to food the most healthful of fruit properties

Absolutely Pure

### WANTS A PURE FOOD SHOW.

Houghton Businessmen Think That It Would Be a Good Idea.

A Houghton businessman comes forward with a suggestion that a pure food show would be a good thing to agitate. The question has been up before but without action. The businessman who now comes forward with the idea bases it on the fact that almost every town in the country has such an exposition if it happens to be a wholesale town such as Houghton is. The wholesale grocers, the cold storage houses, the provisions manufacturers, the packing house representatives of the district would be glad to enter such an arrangement and all of their clients, the manufacturers for whom they are agents, would be pleased to co-operate. Such an exposition would have to be held in the fall when the Amphitrope would be sold enough to permit a display of perishable goods without refrigeration. The idea is advanced for what it is worth.

### BOUQUETS FOR HANCOCK ELKS.

The current issue of the American Elk, published at Detroit, hands out bouquets to Charles F. McAshill and Alex. Stevenson of the Houghton lodge. Of McAshill it says: "One of the five wires in the business and national world of Hancock is Charles McAshill, treasurer of the Portage Coal company, and secretary of the Elks lodge. He is now residing in Indianapolis, secretary of a corporation which will manufacture paraffine milk bottles, backed by a million dollars. Mr. McAshill was a loyal booster for Hancock. He believed the town to be destined for a great future and to strangers within the gates he presented maps, statistics and arguments to prove it."

# Facts for Sick Women

We know of no other medicine which has been so successful in relieving the suffering of women, or secured so many genuine testimonials, as has Lydia E. Pinkham's Vegetable Compound.

In almost every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound. Almost every woman you meet has either been benefited by it, or knows some one who has.

In the Pinkham Laboratory at Lynn, Mass., are files containing over one million one hundred thousand letters from women seeking health, in which many openly state over their own signatures that they have regained their health by taking Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Vegetable Compound has saved many women from surgical operations.

Lydia E. Pinkham's Vegetable Compound is made exclusively from roots and herbs, and is perfectly harmless.

The reason why it is so successful is because it contains ingredients which act directly upon the female organism, restoring it to healthy and normal activity.

Thousands of unsolicited and genuine testimonials such as the following prove the efficiency of this simple remedy.

Minneapolis, Minn.:—"I was a great sufferer from female troubles which caused a weakness and broken down condition of the system. I read so much of what Lydia E. Pinkham's Vegetable Compound had done for other suffering women, I felt sure it would help me, and I must say it did help me wonderfully. Within three months I was a perfectly well woman."

"I want this letter made public to show the benefits to be derived from Lydia E. Pinkham's Vegetable Compound."—Mrs. John G. Moidan, 2115 Second St. North, Minneapolis, Minn.

Women who are suffering from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

### TO AMERICANIZE HAWAII.

Purpose of the Proposed Land Legislation—Move to Give White Men the Rights to Homesteads—Progress on Drydock at Pearl Harbor—Work of Dredging Channel in Full Swing

Honolulu, Hawaii, Nov. 2.—Governor Frear and a committee of local statesmen, near-statesmen and politicians have been going thoroughly into the subject of the land laws of the Territory of Hawaii, with a view to drafting a bill to be introduced in congress next December providing for the amendment of the Organic act by which Hawaii became a territory. The object is to alter the land laws so that inducements may be offered to white Americans on the mainland to come to the islands and settle here.

The greater part of the valuable agricultural lands that have been developed, and much that has not been developed, are in the hands of the sugar planters, who are very reluctant to release the hold on any of them. Some of them own in fee simple, but much they hold on long time leases from the government. Great tracts of thousands of acres were taken by the sugar planters twenty and thirty years ago for merely nominal rentals. Much of this land is now worth from \$500 to \$1,000 an acre as sugar land. A number of the old leases are expiring and while the sugar kings are making desperate efforts to renewals of their leases, the tendency of the administration is to break the big estates up into small farms that will support many American families.

In other words, the government wants to Americanize the islands and have the rich agricultural lands till-d by small farmers instead of by Orientals laboring for big corporations and rich sugar planters.

The governor and his confidential advisers have had several secret conferences during the past two weeks, but have not yet succeeded in getting together on a bill which they think can receive the endorsement of the Hawaiian legislature, which is essential before the bill can be submitted to congress with any hope of its being passed. The chief difficulty is that the governor and Prince Kuhio Kahanamiale, delegate to congress, disagree radically as to the amendments that should be made to the land laws. Each has his own scheme, and neither is willing to concede anything to the other. Besides this, there is the legislature to be considered, a legislature largely made up of Hawaiians, who are very jealous of their own dignity and views of the planters. The legislature at the recent session tried to agree on a bill to be introduced in congress providing for the amendment of the Organic Act, but split over the land law provision and failed to take any action at all.

If the governor and the conference can come to an agreement among themselves as to the bill which should be introduced by the legislature, the governor will call a special session of the land law makers and present the bill to them for their approval. At that time they will give it one of the questions that is most troubling the executive. It is recognized by everybody here, however, that if Hawaii is to be American in fact as well as in name, something must be done to bring white men here. They will not come as long as the land laws virtually shut them out from acquiring sites for their homes, as is the case now.

Shipping Laws Obnoxious.

A strong effort will be made at the coming session of congress to have the coastwise shipping laws suspended, so far as their application to Hawaii is concerned. An effort of this kind was made last year and was on the point of being successful when the action of a certain element in Honolulu opposed to such suspension persuaded congress that the demand was far from being unanimous and the matter was dropped. Trans-shipment matters, however, have not been touched. The application of the Hawaiian tariff of relief of some kind is an urgent necessity. There are not enough vessels flying the American flag touching here to handle the passenger and freight traffic to and from the islands, and many people intending to come to Hawaii are obliged to abandon the intention on account of the impossibility of getting steamer passage.

To travel to or from Hawaii to any other American port on a foreign bottom entails the payment of a fine of \$200 in addition to the regular fare. There are now on the mainland a large number of island people who have for weeks and in some cases months been unable to book their passage home because the steamships were full. A large number of tourists who have come to the islands during the summer and fall are still here for the simple reason that they cannot get away. This is very damaging to Hawaii, as it is keeping hundreds of tourists from seeing Honolulu being attacked, which they will not be able to get away again when they desire. There is also a congestion of freight which is causing serious losses to the business interests of the territory.

As Hawaii is twenty-one hundred miles from the coast, it is by many considered unjust that the coastwise shipping laws should be made to apply to the islands at all, especially in view of the fact that there are not enough American vessels in the Pacific to carry the traffic to and from Hawaii. When the congressional party was here last month, the members were petitioned to vote in favor of suspending the coastwise laws so far as they apply to this territory. The people of Hawaii do not ask to have the application of the coastwise laws to the islands abolished, but merely suspended until such time as there are enough American vessels to handle the traffic.

Fortifying Island of Oahu.

The work of fortifying the Island of Oahu is progressing rapidly and it will be but a few months until Honolulu will be at least reasonably safe from the possibility of a successful attack. The principal work now in progress is the dredging out of the Pearl Harbor channel, the mounting of the big twelve-inch guns at Pearl Harbor, and the completion of the emplacements for the two fourteen-inch guns at Waikiki Beach. The four big guns when mounted and ready for service will, with the mortar battery already installed back of Diamond Head, render Honolulu almost impregnable.

The contract for the construction of the drydock at Pearl Harbor has been let and the work is already begun. The drydock is not to be as large as was first contemplated, provision being made for the accommodation of only one battleship at a time, instead of two. The drydock is to be so constructed that it can be enlarged later when con-

## RHEUMATIC FOLKS.

Are You Sure Your Kidneys Are Well?

Many rheumatic attacks are due to uric acid in the blood. But the duty of the kidneys is to remove all uric acid from the blood. Its presence there shows the kidneys are inactive.

Don't dally with "uric acid solvents." You might go on until doomsday with them, but until you cure the kidneys you will never get well. Doan's Kidney Pills not only remove uric acid, but cure the kidneys and then all danger from uric acid is ended. Here is Marquette testimony to prove it.

Mrs. Sophia Gauthier, 206 Rock St., Marquette, Mich., says: "For the past six years I suffered from rheumatism and kidney trouble, the chief symptom being severe pains through the small of my back. Someone finally told me of Doan's Kidney Pills and I sent to the Stafford Drug Co. for a supply. When I had used several boxes of this remedy, I felt better in every way. From the benefit derived, I take pleasure in endorsing Doan's Kidney Pills.

For sale by all dealers. Price 50 cents. Fester-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

### City Brevities

Today's weather: Fair, Wednesday; stationary temperature.  
Yesterday's temperature: Seven a. m., 42 degrees; noon, 42; 7 p. m., 42; maximum, 44; minimum, 41.

Miss Flora Rettalie is visiting friends in Detroit.

Mrs. Charles Rettalie is visiting with her sister, Mrs. Samuel R. Sprague, in Newberry.

Born to Mr. and Mrs. William Raymond, 212 West Crescent street, yesterday, a son.

Mr. and Mrs. P. W. Brown returned yesterday after a two weeks' visit in Boston, Mass.

Mr. and Mrs. Thomas Pickett have gone to Chicago and Muscatine, Iowa, to spend two weeks with relatives.

Mr. and Mrs. Sam Houk left for Indianapolis last evening, where Mr. Houk will recuperate from his recent illness.

Mr. and Mrs. E. F. Kennedy have gone to Omaha, Neb., whether Mr. Kennedy was called by the illness of his mother.

The Ladies' auxiliary to the Brotherhood of Locomotive Engineers will meet at Keough's Hall at 2:30 o'clock this afternoon.

Frank Falardeau, formerly of Marquette but now residing in Ashland, Wis., is visiting his mother, Mrs. A. Marcotte.

There will be a meeting of the Guild Hall football team for practice at the Guild Hall gymnasium this evening at 7:30 o'clock.

The Woman's Missionary society of the Baptist church will meet at 2:30 this afternoon with Mrs. Northrup, 416 East Ridge street.

The Ladies' auxiliary to the A. O. H. will give a card party in Keough's Hall this evening. There will also be refreshments and dancing.

"The Short Story" will be the subject of the last of the series of lectures by Professor J. G. Carter, to be given in the high school auditorium Friday evening. Writings of Poe, Kipling and other short story writers will be discussed.

Many U. P. Visitors Here—The school officers meeting yesterday brought an unusual number of upper peninsula visitors to the city. Among the number were A. H. Blake, (Champion), T. W. Jones, (Republican), W. F. Escoe, (Republican), Henry Carver, (National Mine), John Garvin, (Ontagon), J. T. Rice, (Houghton), Wm. Leighton, (Grand Marais), G. J. Sarasin, (Princeton).

Many Deer Hunters—The westbound afternoon train on the South Shore was two hours late yesterday, owing to the large number of deer hunters from the upper peninsula on board, necessitating many stops and the handling of an extraordinary amount of baggage. Most of the hunters got off at Marquette. Now that the annual influx of hunters is expected to temporarily be behind time, owing to the increased traffic.

Not a Bad Record—Figures for the year 1902 show that there were 367 marriages and thirteen divorces granted in this county during that period. During the year twenty-one bills for alimony were filed in court, of which six were still pending, while others have been dismissed or settled. In 1901 there were twelve divorces granted in this county, twelve in 1900, twelve in 1901 and nine in 1902. Compared with any other county in the state the percentage of divorces in Marquette county has been very low. Figures compiled by the federal government in 1900 showed that out of every 1,000 marriages in existence in this country four were being dissolved by divorce.

The Way of Life—During the month of September there were 124 births and 163 deaths in Marquette county. Fourteen of these deaths were children under one year, eleven between one and four years and ten persons over sixty-five years. Five deaths from violence, and three from tuberculosis were reported in Marquette city there were twenty-two births and the same number of deaths, the death rate being abnormally high because of those who expire at the hospitals, who do not reside here. In this city, three deaths were children under one year, those between one and four years and six were persons over sixty-five years of age. Two deaths from violence were reported.

Wanted Election News—The nearest thing that I ever heard of a man doing happened on the line of the South Shore road several years ago, said a traveling man yesterday. "It was the day after the presidential election when Roosevelt had his great triumph. The passenger train over the South Shore from Duluth to Marquette was speeding along when a man appeared at a highway crossing, frantically waving his hands. It was plainly a sign of a broken rail just ahead, or some other danger, brought the train to a stop as quick as he could. Everything was excitement aboard the train. Passengers had their heads cut from the windows, and the platforms were crowded with people peering out. The conductor jumped down as soon as the train stopped and ran ahead. He was met by the stranger, who peacefully asked him if he had a morning paper. He explained that he wanted to get the election news. What the conductor said to the fellow is doubtless well remembered by him yet, but it would not look good in print."

## Upper Peninsula

Bessemer Man Killed—While a steam shovel was loading cars from a stockpile at the Colby mine, Bessemer, a pile of ore caught in, carrying with it the trestle above, William Farley, who was loading the cars, was struck and received injuries from which he died.

Divorce Takes New Husband—Less than twenty-four hours after the matrimonial ties which bound her to DeFord White, her first husband, were severed by Judge Cooper, Mrs. Jennie White of Gladstone became the wife of George L. Ascher. The marriage took place at the home of the bride and was performed by Rev. Mr. Eppson of the Congregational church of Gladstone.

Sheriff Offers a Reward—George A. Rainin, sheriff of Mackinac county, issues the following notice: Twenty-five dollars reward for the arrest and detention of Charles Smith, alias Charles Greer, until I can send an officer. Description: Nationality, Irish; age, twenty-nine; height, 5 feet 9 1/2 inches; weight, 190 pounds; blue eyes; light brown curly hair; white mustache; last seen wearing a sheepskin-lined colored coat, and had just been discharged from Marquette prison after serving a five-year term.

Big Timber Deal Pending—Judge Flanagan, president of the Sagola Lumber company of Sagola, Dickinson county, is negotiating for the purchase of a half interest in seven thousand acres of timber land located in Douglas, Coos and Lane counties in Oregon. The lands are estimated to contain 110,000,000 feet of pine. Interested with Judge Flanagan in the deal are George C. Jones, a banker of Appleton, Wis., and his son, E. L. Jones, who will purchase the other half. The parties are now having the lands estimated, and if the estimate agrees with the one submitted by the present owners the deal will no doubt be closed.

Mayor in Saloon on Sunday—One of Gladstone's prominent saloons was open after 11 o'clock Sunday night; the mayor and a police officer were invited to the saloon, the mayor, who suggested, says the Gladstone Delta. To explain this horrible state of affairs, which seems like conditions asserted to exist in Escanaba, it may be mentioned that the fire department broke the door down, which was blazing vigorously. The blaze was quickly put out; its cause is unknown, but matches and shavings under the door suggested incendiarism. Peterson's loss is covered by insurance as far as the building goes.

Wild Man's Identity Puzzle—Whether there is any connection between a wild man found in the woods near Kinross, Chippewa county, a few years ago and sent to Newberry and Joseph Krul, who was adjudged insane by Probate Judge Snell of the Soo, committed to the same place and who later escaped, is a question which Attorney George Reed of DeTour is now trying to solve. Four or five years ago farmers around Kinross reported a "wild man" roaming in the woods thereabouts. W. E. Lissett, the sheriff, captured the fellow and took him to the Soo. He was committed to the hospital for insane at Newberry. Little was learned about him as he could talk no English. He appeared to be a Russian. Joseph Krul was adjudged insane and sent to the

# S.S.S. CURES CHRONIC ULCERS

There is nothing that causes more worry and discomfort than a chronic, festering ulcer. As it lingers, slowly eating into the tissues and surrounding flesh, and by its tendency to grow worse in every way, it suggests the possibility of being cancerous in its nature. Efforts to heal the ulcer by means of salves, washes, lotions, etc., always result in failure, because such treatment can have no possible effect on the blood where the impurities and morbid matters form, and are carried through the circulation to the place, to keep it open, irritated and diseased. The impurities in the blood must be removed before the healing process can begin. S.S.S. goes to the fountain-head of the trouble, and drives out the germ-producing poisons and morbid impurities which keep the ulcer open. Then as this rich, purified blood is carried to the diseased place the healing commences, the inflammation gradually leaves, the discharge ceases, new tissue and healthy flesh are formed, and soon the sore is permanently cured because the source has been destroyed. S.S.S. does not make a surface cure, but by supplying the blood with healthful, tissue-building properties it begins at the bottom and causes the flesh at the diseased spot to firmly and permanently knit together, and the place is left sound and well. Book on Sores and Ulcers and any medical advice free to all who write.

### STEEL CORPORATION TO SPEND \$10,000,000

PART OF THE MONEY APPROPRIATED FOR IMPROVEMENTS WILL BE EXPENDED ON THE MARQUETTE RANGE.

Inasmuch as the United States Steel corporation has made an appropriation of \$10,000,000 for use in acquiring additional properties and new plants, for construction and the discharge of capital obligations, it is expected that the several iron ranges will share in the apportionment. Some new work has been outlined for this range, but the officials have not yet been advised as to whether it will be done during the ensuing year. The Steel corporation did very little new work on this range last year, but in 1907 in excess of \$150,000 was expended for new machinery, buildings and other improvements. The mines are now well equipped, but there are several places where money could be expended to good advantage. The heavy expenditures on the range in 1907 were at the Lake Superior Hard Ore mine, where a machine shop was erected; at the Regent group, where new machinery and buildings were provided, and at Section 21, where new boiler and dry houses were erected and thoroughly equipped.

Last year's apportionment was confined to pressing improvements, as the panic which set in in the fall of 1907 necessitated a change of plans in many directions. On account of the small apportionments that year the sum to be expended during the coming year was raised \$4,000,000 above the amount expended for similar purposes in 1907.

While no figures have yet been given out, it is estimated that the earnings of the steel corporation for the month just closed will run close to \$15,000,000, which is at the rate of \$180,000,000 annually. If the corporation could maintain this rate for twelve months the earnings on the common stock for the year would be more than 20 per cent. In the current quarter the corporation will put the deliveries on a higher price basis. This will help to swell the earnings considerably and the opinion has been expressed that the steel earnings for the fourth quarter will exceed those of the last quarter by at least \$5,000,000. For the quarter ending Sept. 30 the earnings were \$38,246,307. At that time the officers reported unfiled orders on hand at 4,796,833 tons. The net earnings of the corporation for that quarter were \$30,805,019.

The corporation's total earnings in the same quarter in 1908 were \$27,106,274 and the net earnings, \$21,310,417. The surplus for the quarter was \$5,152,923. At the close of the September quarter last year the unfiled orders on hand were 3,427,977 tons.

With \$10,000,000 set aside for use during the coming year there was still a surplus of \$2,115,111 in the treasury.

### HEAVY SHIPMENTS. Estimated That 6,500,000 Tons of Ore Went Down the Lake Last Month.

In spite of the fact that iron ore shipments to the lower lake ports during October were hampered by stormy weather, it is estimated that approximately 6,500,000 tons were moved. This amount makes the season's movement up to this time 39,200,000, compared with 37,000,050 tons in the corresponding time in 1907, when the outage broke all records.

It is now generally thought among the mining men that the Lake Superior region will this season send out more ore than ever before. The total shipments by water in 1907 were 41,282,750 tons. The movement in November and December of that year was only 4,240,000 tons, so that a movement of something over 5,000,000 tons during this month and next will bring the total figures to those of 1907. In view of the heavy tonnage moved last month it now seems likely that at least 6,000,000 tons will be shipped this month and next, while the total might possibly reach 7,000,000.

### FIGURES ON CAR SHORTAGE. Demand for Freight Cars is Greater Than a Year Ago.

The bureau of statistics of the department of commerce and labor at Washington reports that there is a constantly increasing demand for freight cars. Data collected for September shows that the business of the country and the movement of railway freight cars for that month reached proportions which exceeded those of the same month last year.

Indications of the improved conditions in both the coal and iron trade are most pronounced, as shown by the increased demand for cars for the movement of these products. The movement of lumber was also somewhat heavier, especially from the Virginia and Carolinas. The shipments of timber increased 50 per cent over the shipments of last year, but there was a sharp falling off in the quantity of yellow pine received in New York in August, though the September receipts were nearly double those of the corresponding month last year.

There was a considerable slump in the receipts of grain and flour at the four leading seaports, and the receipts of grain at Ritten of the principal interior markets likewise were below the aggregate for September, 1908. A similar condition is uncovered in the shipment of packing house products from Chicago, the chief slump being on canned meats, which show a relative loss over the corresponding figures of 1908 of approximately 45 per cent.

The report shows that the September total of cars handled was 2,993,064, or almost 10 per cent in excess of the corresponding month of last year.

Spiral wire hoops now take the place of wooden hoops on barrels and kegs.

#### GREETED BY FULL HOUSE.

Large Audience Witnessed "A Gentleman from Mississippi" Last Night.

The audience that greeted "A Gentleman from Mississippi" at Ishpeming theater last evening was one of the largest that has ever attended a dramatic production in this city. It was composed of not only Ishpeming and Negaunee people, but many were present from the towns in the western end of the county.

That the audience was thoroughly delighted with the entertainment was evident from the tremendous applause accorded the players, also from the fact that certain calls were demanded. The cast, which is headed by Burr McIntosh, the well known writer, actor, lecturer and photographer, is an exceptionally large and capable one. The company is the same as it was in Chicago, where the play was presented for a run of six months. Although Messrs. McIntosh and Deming carry off the honors, other players in the company are capable. The women are exquisitely gowned and the production is adequately staged in every respect. All things considered the attraction is one of the very best of its kind that has ever been seen here.

The story told in "A Gentleman from Mississippi" is simple and decidedly interesting from start to finish. William H. Langdon has been elected senator from Mississippi, and reaches the national capital with the experience in big politics that might be expected of a man who has lived his life on a plantation forty miles from a railroad. With him are his two fair daughters, Carolina and Hope. He has scarcely reached his hotel when he meets "Doc" Haines, a newspaper man, as his secretary.

Charles Norton, representative from Mississippi; James Stevens, senior senator from Mississippi, and reaches the national capital with the experience in big politics that might be expected of a man who has lived his life on a plantation forty miles from a railroad. With him are his two fair daughters, Carolina and Hope. He has scarcely reached his hotel when he meets "Doc" Haines, a newspaper man, as his secretary.

In order to insure his support Norton induces Langdon's son to invest \$30,000 in Altaicola and also puts in the fortune left the senator's daughter by her mother. He is the girl's accepted suitor, by the way. Haines, in the meantime, has been a thorn in the side of the crooks, but by reporting to each that the other has played false and invested money in the land project, they bring about an estrangement between him and Langdon, which is set right by Hope Langdon telling Haines, with whom she is in love, of the plot. Langdon and Haines find they have been duped and the man from Mississippi decides to balk the thieves, even if it ruins his family. The story comes to a right ending by Langdon stepping into the senate to make his maiden speech, denouncing the intended fraud, and declaring that he and the conspirators bought up the land to save the national treasury from being looted, after having discovered a conspiracy in another quarter, to commit the hold-up. Before this important event he has compelled the two rascally senators to come to his way of thinking through fear of exposure. Congressman Norton is sent on his way in disgrace. Langdon has gained the smiles and affection of a captivating widow, Mrs. Spangler, and Haines, again secretary, is engaged to wed Hope.

Because the company's baggage car went astray in the Ishpeming yards, the curtain did not go up last evening until some time after the hour set. However, the wait was by no means tedious. Burr McIntosh stepped into the breach and with a talk of half an hour's duration he kept the audience amused until the play began. Mr. McIntosh discussed politics in a humorous vein, told a few stories and entertained his auditors with a recital of some of his experiences in public life. The talk made a decided hit and was as much enjoyed as was the play.

Five Menominee men who have been annual visitors to this city for a number of years past during the hunting season are expected to arrive here Monday or Tuesday. They will immediately leave

for the woods north of the city and will be accompanied by Stephen Simons, who has hunted with them every year for several years past. The visitors will be Sheriff Erditz and his brother, Frank Erditz, former mayor of Menominee; John and Frank Reindl and Joseph Birmingham. They have a very comfortable camp in the district and they expect to remain there a week or ten days.

## ISHPEMING

LOGGING WORK STARTED.

Goodman Camps Near Clowery Have Been Moved to a Point Farther North.

B. J. Goodman, who has operated in the woods north of Clowery for some years past, is at present organizing his forces. About thirty men are now employed and the force will be increased to sixty-five. New camps have been completed a few miles north of the old camps, near Wolf Lake. Mr. Goodman expects to cut about 1,000,000 feet of timber this year. He has two sections of timber in that vicinity and he estimates that there is enough pine and spruce on the tract to keep a crew busy for four or five years.

The haul this year will be about five miles in length to Haines' siding, on the Northwestern line, above Clowery. The siding is one that the Haines Lumber company used when it operated in that district some eight or nine years ago. The road built by the Haines people will be used. It is one of the best to be found in the county, and follows a course practically the entire distance. For a distance of nearly a quarter of a mile the creek was substantially bridged by the Haines company and the structure is still in perfect condition.

Mr. Goodman will also handle timber from points south of here on the Chicago & Northwestern system, where he has operated for many years. Many of the jobbers will supply him with pine and mining timber and he plans to keep his mill at Little Lake in operation throughout the winter. B. J. Goodman, Jr., will spend most of his time at the mill, while Mr. Goodman and his son Austin will conduct the operations at Clowery.

**BUSINESS STILL BOOMING.**

New High Record in Sales of Iron and Steel Established Last Week.

It is reported from New York that a new high record for a single week's business was established last week in the iron and steel markets. The output of both pig iron and steel ingots was the highest ever known.

The railroads have continued to be the most important support of the steel works, placing very heavy orders for rails, cars and locomotives last week. New York Central purchases, which included nearly 19,000 cars, 325 locomotives and 165,000 tons of rails. The Baltimore & Ohio railroad also placed orders for 4,400 cars while other and smaller orders brought up the car tonnage for the week to 25,000 and for the month between 200,000 and 400,000. Rail contracts for the week aggregated 270,000 tons, making the total for October 500,000 tons. Contracts for locomotives placed during the month have been nearly 600.

It is estimated that the railroads have been responsible either directly or indirectly for 2,000,000 tons of finished steel product orders in October. Manufacturing industries have placed orders for semi-finished and finished material aggregating 1,600,000 tons.

The demand for wire products and tin plate has been especially heavy for this season of the year. In fact, all kinds of finished material, with the single exception of fabricated structural steel, have rolled up a very heavy tonnage. Fabricated material, however, has been unsettled during the last ten days, and prices dragged because of the efforts to secure new business, but some contractors who still have unfulfilled tonnage of iron material contracted with the mills at low prices. Last week's orders for fabricated material were less than anticipated, not more than 16,000 tons.

The sales of pig iron last week were again heavy, mainly in the East, where a large tonnage of Virginia and Alabama iron will be contracted for shipment to the Central West and Mississippi valley. Such contracts aggregated 226,000 tons. Sales of basic and Bessemer grades have aggregated about 70,000 tons.

With the last two days one sale of 5,000 tons of Virginia basic has been made for shipment into Eastern Pennsylvania at \$16 at the furnace, and 5,000

## Negaunee Department

### WORK TO BE RESUMED AT THREE PROPERTIES

**BREITUNG INTERESTS WILL OPERATE THE MILWAUKEE AND DAVIS MINES AND CLEVELAND-CLIFFS WILL REOPEN LUCY.**

Within a few months mining operations will be resumed at three Negaunee properties that have been idle for many years. The Breitung interests are preparing to begin work at the Milwaukee and Davis mines, and the Cleveland-Cliffs Iron company is to reopen the Lucy, on the hill south of Gold street. The greater part of the winter will be spent in preparatory work, and it is expected that all three properties will be producing early next season.

New machinery is to be installed at the Milwaukee and Davis mines by the Breitung people. The plan that was formerly in operation at the Lucy is to be returned to that mine. It was in use for some time at the Negaunee mine, but has lately been out of commission. The Lucy will be operated under supervision of S. R. Elliott, who has charge of the company's other mines in Negaunee.

Joseph Thomas, of the Massena mine, will direct the underground work at the start.

The Breitung interests will begin installing their machinery as soon as the track now being extended to the properties is finished. The machinery for about a year has been ordered. It will not take long to put the mines in operation after the equipment is installed.

A greater tonnage of ore was produced from the Lucy than from either of the other properties. It is credited with a total shipment of 546,159 tons. The Milwaukee mine shipped in all 375,451 tons. The Breitung interests operated the Milwaukee many years ago. The territory near it has recently been explored, and it is said that the mine will be a fairly large producer after it is properly opened up.

A considerable quantity of the ore shipped was obtained from an open pit, though some underground work was also done.

The Davis mine has had a checkered career, as it was at one time owned by individuals who became involved on account of the expense of opening it up. About the time the mine was ready to produce on a fairly large scale the bottom dropped out of the ore market. Many of the mining men here, who are familiar with the property, believe that the Breitung interests will make a fine mine of it, as the showing in the workings is a good one.

The Lucy, which was one time known as the McComber, produces a highly silicious ore, which is at present in better demand than for some years past. The Lucy has been operated both on the open pit and underground plans. A few years ago the Cleveland-Cliffs Iron company acquired the Jackson properties the Lucy and East Jackson mines were taken under option, but the holders became discouraged principally on account of the ore outlook, and threw up their option after holding it for the greater part of a year. The East Jackson has never been more than an exploration, but it is thought that it will also, in time, be developed into a mine.

Strictly fresh Blue Point Oysters, fresh from the coast. GEO. HAUPT. (10-22-11)

#### STRINGING WIRES.

The Cleveland Cliff Iron company has started to string wires for its electric transmission lines. It will take several weeks to put the wires in position. Several carloads of one-half inch copper wire will be used. The wire is so heavy that it is necessary to employ teams to install it between the towers. The work of installing the electrical machinery at the Massena mine engine house is progressing satisfactorily, and it is now expected that it will be possible to put the plant in commission on or about the first of the year. The new transformer house has been enclosed.

#### LOCAL LACONICS.

Postmaster Thomas Connors spent yesterday at Republic.

Mrs. A. D. Bohrer of Gwinn is visiting her parents, Captain and Mrs. J. H. Rough.

W. H. Israel, the photographer, will have an exhibition of portraits at his studio today, tomorrow and Friday.

The Lake Superior & Ishpeming Railway company is putting in some additional track at the Rolling Mill mine.

A large party of Negaunee people attended the production of "A Gentleman From Mississippi" at Ishpeming theatre last evening.

Will Wasmuth went to Swanzy yesterday to take a job with the Cleveland-Cliff Iron company. He is to work with the crew stringing the wires for the electric transmission line.

John Angrove, who has been in the copper country, has returned to Negaunee and accepted a position with John Honka, the barber. Mr. Angrove's family remained in Negaunee during the time he was in the copper country.

The announcement of the death of Edward Howard, of Houghton, was received with regret by his many friends in Ishpeming for a number of years before engaging in business on the Mesaba range.

The regular monthly meeting of the council will be held Thursday evening. Following the session the council will sit as a board of review to hear complaints relative to the sewer tax rates to be assessed against the extension recently completed on Heath street.

Sweet and boiled cider at Haupt's grocery. (11-1-11)

Croup is most prevalent during the dry cold weather of the early winter months. Parents of young children should be prepared for it. All that is needed is a bottle of Chamberlain's Cough Remedy. Many mothers are never without it in their homes and it has never disappointed them. Sold by The People's Drug Store.

#### TO SINK SHAFT

T. F. Cole and Associates Preparing to Mine on Cascade Range.

Thomas Fellow, who has charge of the Volunteer Ore company's work on the Cascade range, is hiring men to build a road leading to a point where a shaft is to be sunk near Palmer Lake. When the road is completed machinery will be moved in. Among the men who went out yesterday to work on the job are John J. Brady, William Moll, John Hagerty, Ed and Maurice Maloney, John Aere, Joseph Cody and Patrick O'Leary.

It is generally expected here that the mine to be opened by T. F. Cole and his associates, who are in control of the Volunteer Ore company, will in time be a large producer. Bessemer ore has been located by the drills that have been in operation in that district for nearly a year past, and it is said that the showing is satisfactory. All of the plans have not yet been worked out, but it is understood that a large working shaft will be sunk and then it will be equipped in a first-class manner. The Bessemer ore is said to lie at a considerable depth from surface.

\$100 REWARD, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO., Toledo, O. Sold by druggists, etc.

ANNUAL MEETING OF SCHOOL OFFICERS

THIRTY FROM THIS COUNTY MET WITH STATE SUPERINTENDENT WRIGHT YESTERDAY.

SCHOOL LAWS DISCUSSED

Features of Legislation at Last Session and Problems for the Next Legislature Taken Up.

A representative gathering of the school officers of Marquette county, about thirty in all, met with Luther L. Wright, state superintendent of public instruction, at the court house yesterday and informally discussed miscellaneous school matters.

It was expected that both Mr. Wright and Deputy State Superintendent Keeler would attend the meeting yesterday, but Mr. Keeler was unable to be present.

At the forenoon session, Mr. Wright took up the changes made in the school laws by the last legislature, most of which applied to rural schools.

Primary School Money.

At the meeting in the afternoon, Mr. Wright took up the proposed changes in the school laws which were likely to come up at the next legislative session.

There is a feeling all over the state that this law is wrong and that some change should be made. In consequence, I expect every member of the next legislature to consider this question.

"Another question that is likely to come up at the next legislative session is that of cheaper school books. When the working population move from one place to another as often as do the mining men of the upper peninsula and the tenant farmers of the lower peninsula.

School Book Laws.

"Another question that is likely to come up at the next legislative session is that of cheaper school books. When the working population move from one place to another as often as do the mining men of the upper peninsula and the tenant farmers of the lower peninsula.

"In Indiana they have a maximum price law, specifying the most that may be charged for any given text book. Upon investigation, I have found this law generally satisfactory to the taxpayers but unsatisfactory to teachers and pupils.

Normal Students Preferred. Before the meeting was adjourned, W. S. Ewing of Chocomaug introduced the following resolution, which was unanimously adopted:

Resolved, That hereafter it will be the policy of the township boards of education of this county to engage those teachers only in the rural districts who have finished the limited certificate course or better, at least a county second grade certificate.

SUICIDE OFF PICNIC ROCKS.

Miss Christine Clish Thought to Have Drowned Herself Yesterday.

Miss Christine Clish, daughter of Mr. and Mrs. Oliver Clish of Chocomaug township, is believed to have committed suicide by drowning herself off Picnic rocks about 5 o'clock yesterday afternoon. She was twenty-two years of age and she is thought to have been insane when she took the fatal plunge.

Search was instituted in the water, on the rocks and in other nearby places where it was hoped the girl might be found, but without avail. Last night the lake and shore near the rocks were searched for several hours but the waves were running high and the body could not be located.

COMMITTEES APPOINTED.

Plans for the Formation of County Art League.

There was a satisfactory attendance at the meeting held at the Marquette club yesterday afternoon for the purpose of discussing the preliminaries for the organization of a Marquette County Art League, and steps were taken for going ahead with the work.

THEATRICAL.

"A Gentleman from Mississippi"

A notable cast will present "A Gentleman from Mississippi" at the opera house on Friday evening. It is headed by Burr McIntosh in the title role.

There are five of the prettiest women in any comedy in this piece. They are Evelyn Moore, who plays the senator's youngest daughter; Mary Moran, who plays the oldest daughter; Genevieve Kane as the dashing widow; Ella Airey who is seen as the prima donna.

APPLES: APPLES!

We have a car of choice apples to be retained by the busload or more today and tomorrow at railroad crossing, foot of Third street.

CARD OF THANKS.

We beg to extend our heartfelt gratitude to the many friends whose help and sympathy was extended to us in the hour of our sad affliction, and to the many beautiful floral offerings sent to our darling, Ruth.

CARD OF THANKS.

We wish to extend our sincere thanks to our many friends for their gifts of flowers at the funeral of Albert E. Wardson; also to the Modern Brotherhood lodge for their attendance at the funeral and the choir of the M. E. church for their services.

THE CRESCENT LAUNDRY.

Mrs. A. M. Adams is receiving her fall and winter millinery. It is on display now. All are invited. 219 Bishop St. 10-16w

Favorite Base Burners are fuel savers.

Ask us why. (10-23 tf) KELLY HARDWARE CO.

DEPOSITIONS OF LOCAL FURNACE MEN

H. O. CHUTE, WHO INSTALLED WOOD ALCOHOL PLANT AT C. C. I. FURNACES, SUING WISCONSIN COMPANY FOR INFRINGEMENT.

Depositions of Austin Farrell and Dr. E. J. Hudson, of the Pioneer Iron company, and George J. Sling, of the Gladstone furnace, are being taken in the case of Harry O. Chute against the Wisconsin Chemical company, charging infringement of patent, which has been started in the United States court in Milwaukee.

Search was instituted in the water, on the rocks and in other nearby places where it was hoped the girl might be found, but without avail. Last night the lake and shore near the rocks were searched for several hours but the waves were running high and the body could not be located.
