

ABSURD RUMOR ABOUT ROOSEVELT

That He Has Met Death in the Wilds of Africa Is the Baseless Rumor That Is Circulated Throughout the Country.

Douglas Robinson, His Brother-in-Law, Who Would Promptly Be Advised of Any Mishap to the Former President, Emphatically Denies the Story, and It Is Reported from Washington That No Such Tidings Have Come by Any of the Ocean Cables.

New York, Nov. 5.—Another apparently absurd rumor was sent about the country today concerning Theodore Roosevelt. This one asserted that the former president had been killed in Africa.

No Dire News by Any Cable. Washington, Nov. 5.—Confidential information from a source whose reliability cannot be questioned was obtained here this afternoon, making it apparently absolutely certain that no tidings of any mishap to Roosevelt had reached this country by any of the ocean cables.

BOILER TUBE BLOWS OUT.

Accident on Battleship North Dakota Injures Four Firemen. Portsmouth, N. H., Nov. 5.—As the new battleship North Dakota was completing a four-hour endurance run today, with the speed championship almost within her grasp, a boiler accident sent her scurrying back to port to land four injured firemen.

REWARD OF \$15,000 ALLOTTED.

Money Paid for Arrest and Conviction of Willie Whitt's Kidnappers. Harrisburg, Pa., Nov. 5.—The following allotment of the state's reward of \$15,000 for the apprehension and conviction of the parties who abducted Willie Whitt was announced tonight: Patrick O'Reilly, Cleveland, \$5,000; Wm. H. Hunley, of Cleveland, \$2,000; T. O. Cochran, of Mercer, Pa., \$500; Q. A. Gordon, of Mercer, \$500; Martin Crain, of Sharon, Pa., \$100; pension fund of the Cleveland police department, \$1,000.

DEFAULTER MAY GO FREE.

Settlement Appears Probable in the Case of Ex-Treasurer Warriner. Cincinnati, Nov. 5.—Whether prosecution will be pressed against C. L. Warriner, the defunct local treasurer of the Big Four, is said tonight to rest largely with President Brown of the New York Central lines. Warriner's friends are hopeful that a settlement will be effected. It is believed that the amount alleged due from Warriner is about \$100,000, fifty thousand of which was paid by the bonding company and twenty-five thousand is supposed to be covered in property turned over by Warriner.

SWITCH TAMPED WITH.

Nickle Plate Train Is Wrecked and Four Persons Are Injured. Cleveland, Nov. 5.—A switch tamped with by wreckers caused the wreck tonight of a round-trip passenger train No. 2 on the New York & Chicago railway at Willoughby. The train ran into a carload of ties and, leaving the track, entered a sawmill, which was demolished. The train was full, but only six persons were injured, as the speed was checked by plunging through the soft dirt. The engineer and fireman were internally injured and four others sustained lesser hurts. The engineer said that the switch-light indicated a clear track. A bar removed from the mechanism and a wrench were found beside the standard.

DAUGHTER OF THE REVOLUTION.

Father of Mrs. Elenora Simmons Served Under General George Washington. Dakota, Ill., Nov. 5.—Mrs. Elenora Simmons, whose father—Nicholas York—served in the Revolutionary war under Washington, died today, aged eighty-six.

STRAHER AUGUSTA AGROUND.

Savannah, Nov. 5.—The steamship City of Augusta is aground on the mouth of the river. Repeated efforts to free her have been futile and the passengers have been taken off.

SCHUYLER RANIER NEVER TRUSTED BANKS

Consequently He Is Out \$10,000, a Yeggman Having Visited His Farm in New Jersey and Dynamited His Safe. Burlington, N. J., Nov. 5.—Cash and bonds amounting nearly \$10,000 were stolen from the home of Schuyler Ranier, aged seventy-two, by a masked bandit late today. The robber locked up the aged farmer's housekeeper, who was the only person in the house, blew the safe with dynamite, gathered the contents and departed without leaving a trace. A posse of farmers is scouring the country. The robber had an hour's start before Ranier returned home and found the old housekeeper in a critical condition as a result of the shock and the struggle with the robber. Ranier had never trusted banks.

BIG ROBBERY UNEARTHED.

Mail Pouch Containing Money Orders Is Booty of Thieves. Chicago, Nov. 5.—The theft of a mail pouch believed to have contained \$25,000 to \$50,000 in express and postoffice money orders was revealed today through the catching of several of the stolen orders in Chicago. The filled bag was discovered by a farmer boy in a corn field near Tolona, Ill. Secret service operatives and postoffice inspectors are searching for the robbers.

HIS ARREST REVEALS A MAN'S DUAL LIFE

Henry West, an Alleged ex-Convict, Said to Have Swindled Many Banks While Posing as a Traveling Salesman. Chicago, Nov. 5.—Henry O. West, an alleged former convict, was arrested today, charged with being the leader of a gang of bank swindlers who have obtained more than \$25,000 from banks in Iowa, Illinois, Michigan, Florida, New York, Wisconsin, South Carolina and Canada.

The man's arrest led to the discovery that he was leading a dual life, his wife and many friends thinking that he was a traveling salesman for an Eastern hardware company. It is likely that West will be taken to Davenport, Ia., for the first trial, as he is said to have swindled the Iowa National bank there out of \$800.

West is said to have four confederates, known as G. E. Cameron, E. Richards, W. H. Kohler and George S. Taylor. It is believed that West and his companions have been operating since last March, when they were in Florida. Ten weeks ago, while working in St. Joseph, Mo., West and his companions are said to have swindled eleven banks in one day, getting about \$500 from each.

St. Joseph, Mo., Nov. 5.—Eleven St. Joseph banks were swindled Aug. 23 out of \$500 each by two men who said they were from St. Louis and had just disposed of their business there. They made small deposits each, and a few days later deposited forged drafts on the Third National bank of St. Louis, afterward withdrawing their deposits on checks. A reward of \$5,000 was offered for the men's capture.

REWARD OF \$15,000 ALLOTTED.

Money Paid for Arrest and Conviction of Willie Whitt's Kidnappers. Harrisburg, Pa., Nov. 5.—The following allotment of the state's reward of \$15,000 for the apprehension and conviction of the parties who abducted Willie Whitt was announced tonight: Patrick O'Reilly, Cleveland, \$5,000; Wm. H. Hunley, of Cleveland, \$2,000; T. O. Cochran, of Mercer, Pa., \$500; Q. A. Gordon, of Mercer, \$500; Martin Crain, of Sharon, Pa., \$100; pension fund of the Cleveland police department, \$1,000.

NATION'S CHIEF HAS AN EVENTFUL DAY

He Sees an Accident Almost Fatal to Two Men and He Rides in an Automobile at the Rate of Fifty-Two Miles an Hour.

He Enjoys a Sail from Savannah to Fort Screven, and He Arrives at Charleston, S. C., at Dusk to Find Awaiting Him One of the Most Picturesque Receptions of His Entire Trip and Senator Tillman One of the Most Cordial of His Hosts.

Charleston, S. C., Nov. 5.—Arriving here at dusk this evening, President Taft had one of the most picturesque receptions of his life, that is, a procession of automobiles, escorted by militia organizations, he passed through the principal business streets under arches of brilliant electric lights. The sidewalk throngs overflowed into the streets. The president's progress to the home of Mayor Elliott, where he is spending the night, was marked by cheers. A banquet was tendered by the city tonight. The only speech was the president's. Governor Ansel and Senators Tillman and Smith assisted in welcoming the president. It was the first presidential reception wherein Mr. Tillman has participated in many years. Until Mr. Taft was inaugurated, Senator Tillman had not even been a caller at the White House in a long time.

During his sail to Fort Screven from Savannah this morning, President Taft witnessed an accident which is a warning to all motorists. It was thought that two men had been killed. It turned out that one negro lost an arm, and another an eye. The two men were firing a salute to the president from a small cannon at the water front. A premature explosion occurred as one of the men was ramming the charge of powder. The president saw the man fly through the air and fall into the river. The ramrod shot across the bow of the revenue cutter Yamacraw, on the deck of which the president was standing. Mr. Taft called attention to the accident. The man in the water was rescued. After his trip the president participated in a parade through the streets and parks of Savannah, and was greeted by practically the entire population. He then had a spin over the automobile course at an average speed of forty miles an hour. On the straightaway stretches, the speed of the president's car was forty-eight miles. Afterward he made a short dash at the rate of fifty-two miles an hour. Returning to the city, the president reviewed the assembled militia. With their shrill cheers ringing in his ears, he boarded his train for Charleston.

GLEASON IN WITH BID.

Will Build Largest Arena in World, He Says, if He Gets Big Fight. New York, Nov. 5.—Jeffries has decided to remain in this city until the first of December, when bids for the fight with Johnson will be opened and the battleground decided upon. Two rival promoters, Jack Crofford and Jack Gleason, who can deliver big goods, will have the inside track when it comes to outbidding individuals outside of California; from all accounts, they will engage in a bitter struggle to land the match.

WINS BILLIARD MATCH.

DeOro, the Three-Cushion Carom Champion, Retains His Title. New York, Nov. 5.—Alfredo DeOro, holder of the world's three-cushion carom billiard championship, defeated John W. Daly, of Chicago, in the final game of their series here tonight. Daly, saying that he had obtained information that DeOro had used a ball unauthorized by the referee in the first game, served notice of a protest. DeOro ran fifty points tonight, in eighty-nine innings, with a high run of six, his opponent scoring forty-four points in the same time. The total score was: DeOro, 150; Daly, 119.

ROWING REGATTA AT PRINCETON.

Classmen Race on Lake Carnegie and Honors Go to Freshmen. Princeton, N. J., Nov. 5.—The Princeton freshmen won the eight-oared race on Lake Carnegie today for the Carnegie trophy, in ten minutes and twenty-eight seconds—the best record for the one and seven-eighths mile course. The sophomores were second, and the seniors third. The juniors captured, as the result of a broken seat, the four-oared race between the freshmen and the sophomores was won by the latter.

HIS SENTENCE SUSPENDED.

Mother Will Take Up Drafts Forged by Clergyman's Son. Seattle, Nov. 5.—Edwin T. Beveridge, son of Rev. John R. Beveridge, of Chicago, pleaded guilty to forgery here today, and received a suspended sentence of one to twenty years in the penitentiary. His mother promised to take up the numerous forged drafts that the son had issued.

THE WEATHER.

Washington, Nov. 5.—The following is the weather bureau's forecast for Upper Michigan: Fair, Saturday and Sunday; light to moderate variable winds, becoming south.

ITS TAXES NOT PAID.

Wisconsin & Michigan Railroad to Be Sold at Public Auction. Menominee, Mich., Nov. 5.—The Wisconsin & Michigan railroad will be sold at auction here Dec. 9, to satisfy a claim for \$44,579, the amount of the taxes due the state of Michigan. The notice of the sale was personally filed here today by Attorney General Bird and Deputy Auditor Simpson.

MILLINERS MAKE COMPLAINT.

As Hats Have Grown in Size, So Have the Express Rates. Chicago, Nov. 5.—The wholesale milliners of Chicago protested against the express companies' rates for carrying them, before the Illinois railroad commission here today. The milliners contend that the express companies have no right to charge for the sizes of the boxes, but only for the weight. One milliner testified that the hats were constantly increasing in size, but not in price. The express companies will submit their evidence, Dec. 9.

TRADE IS EXPANDING ALL OVER THE COUNTRY

Neither High Prices Nor Economic Discussions Seem to Shake Confidence or Check Industrial Progress, and There Is Promise for 1910 a Year of Unequaled Business. New York, Nov. 5.—R. G. Dun & Co.'s Trade Review will tomorrow say: Without exception, the reports of the wholesale and retail trade in all parts of the country are more than satisfactory. The year of unexampled business, what this means, expressed in almost incomprehensible figures, is that the United States is now increasing its wealth at an unprecedented rate. Neither the high prices of leather and cotton goods, nor the economic policies seem to shake the confidence or check the industrial progress. In all the principal cities the reports are of excellent retail distribution and the outlook for the holiday trade is bright.

NEW EXECUTIVE AT MANILA.

W. C. Forbes of Boston Is Appointed Governor of the Philippines. Washington, Nov. 5.—President Taft has appointed W. Cameron Forbes, vice-governor general of the Philippines, vice-governor general to succeed Governor General James Smith, whose resignation has been accepted to take effect Nov. 11, at the expiration of Governor Smith's leave of absence. Mr. Forbes has been acting for several months as governor general in the absence of Governor Smith.

DOESN'T WANT PROHIBITION.

Hawaii's Legislature Indignantly Protests at John G. Wooley's Plan. Honolulu, Nov. 5.—Both houses of the territorial legislature adopted today a joint resolution protesting against the attempt of John G. Wooley, the American temperance advocate, now a resident here, and others to secure a federal enactment prohibiting the sale of alcoholic liquors in the Hawaiian islands. The resolution, which was adopted by the house by the vote of twenty-six to two and was unanimously adopted by the senate, characterizes the proposed act as a violation of the right of self-government.

STAND FOR INDEPENDENCE.

Nationalists Win Many Seats in the Philippine Assembly. Manila, Nov. 5.—The returns from the recent election indicates that the assembly will be composed of sixty nationalists, fifteen progressives and five independents. The nationalists, who made large gains, stood for immediate independence for the islands.

PORTO RICCO'S NEW GOVERNOR.

San Juan, Nov. 5.—Colonel G. R. Colton, who will be inaugurated governor of Porto Rico tomorrow, arrived today. He was met at the pier by a large crowd of Porto Ricans and, escorted by Porto Ricans and a band, was driven to the palace.

PEERS' AMENDMENT REJECTED.

London, Nov. 5.—By the vote of 219 to 54, commons today refused to agree to the house of lords amendment to the Irish land bill.

IDLE CARS GROWING LESS.

Chicago, Nov. 5.—The fortnightly statement of the American Railway association says: "There is an increase of 56 per cent in the car shortage, which is a total of 26,536 cars. The surplus, however, shows a decrease of only 5, 681 cars, leaving 30,896. The surplus is principally in the Northwest."

EVERY TIME A CHRONIC KICKER STABS HIS TOE HE IMAGINES THE WORLD IS AGAINST HIM.

Every time a chronic kicker stubs his toe he imagines the world is against him.

NO MERCY SHOWN MME. STEINHILL

Galling Examination by the Presiding Judge of the Assize Court Leaves the Woman in a State of Utter Collapse.

Climax of the Relentless Inquisition Comes When the Jurist, Declaring That She Has Falsified Throughout, Brands Her Story as a Tissue of Lies, and When, Completely Unnerved, the Alleged Murderess Is Led Fainting from the Room.

Paris, Nov. 5.—After two days of merciless examination by the presiding judge of the assize court where she is being tried on the charge of murdering her husband and stepmother, Mme. Steinhill was led from the court late this afternoon in a state of utter collapse. Several times previously restoratives had been administered when it seemed that the madame was about to faint. Each time she recovered and replied to the interrogations.

PEACE MEETING AT BERLIN.

Prominent Men of Germany and America Exchange Compliments. Berlin, Nov. 5.—Large numbers of Germans and Americans met this evening for the "German-American evening," a function now held twice to three yearly. The principal speaker was Admiral Von Kester, who gave an account of his visit to the Hudson-Fulton celebration in Berlin which had been changed by the industrial progress. He stated that the American universities are the best guarantee that the two countries cannot drift apart. Concerning the naval development, Dr. Wheeler said that battleships in the hands of wise and just nations are messengers of peace.

ILLNESS IMPELS CRIME.

Mrs. Mary Cels of Chicago Kills Her Baby and Herself. Chicago, Nov. 5.—After buying mourning for her ten-year-old daughter Edna, and telling her not to return from school for luncheon, Mrs. Mary Cels killed her daughter Edna, one year of age, and committed suicide by asphyxiation today. Six months ago Edna frustrated her mother's attempt to commit suicide. The woman had been ill for more than a year.

ARMED FARMERS ON GUARD.

Drilling of an Illinois Farm for Oil Is Resisted. Vincennes, Ind., Nov. 5.—When twenty teamsters of the Ohio Oil company went to the farm of J. H. Dunlap, near Bridgeport, Ill., today with boring machinery, they were met by Dunlap and seven farmers, who were armed with shotguns and refused to allow the oil rigging to be unloaded. It was left in the road, to await the settlement of the dispute. The company claims that it contracted with Dunlap's mother, deceased.

NOTED EDUCATOR DIES.

Providence, R. I., Nov. 5.—Wm. Torrey Harris, former United States commissioner of education, died here tonight. His work along educational lines gained him international recognition.

WEALTHY SOCIAL LEADERS HELP HIM CELEBRATE

Paul Reys, an Immigrant Russian Laborer, the Hero and Guest of Honor at a Unique Event at St. Louis, Missouri.

St. Louis, Nov. 5.—Paul Reys, an immigrant Russian laborer, was the hero and guest of honor this afternoon at a unique celebration. His hostesses were among the wealthiest social leaders in St. Louis.

MANY INSTITUTIONS GIVEN LARGE SUMS

Will of the Late John Stewart Kennedy, Who Died at New York Last Sunday, Provides for Numerous Benefactions.

IN ADDITION TO APPROXIMATELY \$35,000,000 LEFT TO HIS WIFE, RELATIVES, FRIENDS AND EMPLOYEES, BEQUESTS AGGREGATING MORE THAN TWENTY-FIVE MILLION DOLLARS ARE MADE TO SOME SIXTY RELIGIOUS, CHARITABLE AND EDUCATIONAL ORGANIZATIONS.

RIVAL NATIONS MAY PUT END TO ANIMOSITIES

Possibility of an "Understanding" With Great Britain Reported Under Consideration in German Government Circles. Berlin, Nov. 5.—The possibility of an Anglo-German understanding appearing under consideration in government circles. The failure to reach such understanding heretofore is attributed to Great Britain. After the under secretary of the British foreign office, Charles Harcourt, had failed to obtain a satisfactory reply to his suggestion made at the meeting between King Edward and Emperor William at Kronberg, King Edward is understood to have tried to persuade the emperor of Austria, whom he met at Innsbruck, to make friendly representations to Germany.

IS THE PLACE FOR THE FARMER.

South's Soil Friendly to Nearly Every Crop, Says Secretary Wilson. Durham, N. C., Nov. 5.—"The place for the farmer now is the South, where there is a soil friendly to nearly every product of the country," declared Secretary of Agriculture Wilson today, in an address before the National Farmers' Congress during its visit to Durham to inspect the tobacco factories. Mr. Wilson said he had nothing against education in schools and colleges, but that tenancy has been to educate away from the farms. He is in sympathy with the man who proposed an agricultural school in every county. The secretary boasted of the freedom of his department from politics, and declared that out of the 11,000 men under him he did not know the politics of eleven.

ILLNESS IMPELS CRIME.

Mrs. Mary Cels of Chicago Kills Her Baby and Herself. Chicago, Nov. 5.—After buying mourning for her ten-year-old daughter Edna, and telling her not to return from school for luncheon, Mrs. Mary Cels killed her daughter Edna, one year of age, and committed suicide by asphyxiation today. Six months ago Edna frustrated her mother's attempt to commit suicide. The woman had been ill for more than a year.

Dunlap, near Bridgeport, Ill., today with boring machinery, they were met by Dunlap and seven farmers, who were armed with shotguns and refused to allow the oil rigging to be unloaded. It was left in the road, to await the settlement of the dispute. The company claims that it contracted with Dunlap's mother, deceased.

NOTED EDUCATOR DIES.

Providence, R. I., Nov. 5.—Wm. Torrey Harris, former United States commissioner of education, died here tonight. His work along educational lines gained him international recognition.

MANY INSTITUTIONS GIVEN LARGE SUMS

Will of the Late John Stewart Kennedy, Who Died at New York Last Sunday, Provides for Numerous Benefactions.

In Addition to Approximately \$35,000,000 Left to His Wife, Relatives, Friends and Employees, Bequests Aggregating More Than Twenty-Five Million Dollars Are Made to Some Sixty Religious, Charitable and Educational Organizations.

New York, Nov. 5.—John Stewart Kennedy, who died of whooping cough last Sunday, left bequests of more than \$25,000,000 to religious and charitable and educational institutions. It is the largest single contribution of its kind ever made, and includes sixty institutions. Nearly half goes to Presbyterian institutions. Mr. Kennedy also left approximately \$35,000,000 to his wife, relatives and a great number of friends and employees.

The larger gifts are as follows: Presbyterian board of foreign missions, Presbyterian board of home missions, Presbyterian church extension fund, Presbyterian hospital of New York, Metropolitan Museum of Art, New York Public Library and Columbia University \$2,500,000 each; Robert Centis, New Stanton, Pa., and United Charities, New York, \$1,500,000 each; Presbyterian board of aid for colleges, American Bible society and the Charity Organization society of New York, \$750,000 each.

Yale, Amherst, Williams, Dartmouth, Bowdoin and Hamilton colleges, the University of Glasgow, Tuskegee Institute and the Hampton Normal school each will receive \$100,000; Lafayette Oberlin, Wellesley, Barnard and other colleges, \$50,000 each; Lake Forest University, Danville, Ill., and Centre college, at Danville, Ky., \$25,000 each. The Presbyterian Relief Society for Disabled Ministers gets \$30,000.

Although well known to the financial leaders and those active in great benevolent work, Mr. Kennedy's way of doing business and doing good was so quiet that the public heard little about him. Many of his great benefactions probably will never be made public. As a banker and investor, he was always interested in the development of the Northwest. He was identified with Messrs. Morgan and Hill in the Northern Pacific and in other Northweg companies for many years. He retired from active participation in the banking house of Kennedy & Co. in 1883.

ILLNESS IMPELS CRIME.

Mrs. Mary Cels of Chicago Kills Her Baby and Herself. Chicago, Nov. 5.—After buying mourning for her ten-year-old daughter Edna, and telling her not to return from school for luncheon, Mrs. Mary Cels killed her daughter Edna, one year of age, and committed suicide by asphyxiation today. Six months ago Edna frustrated her mother's attempt to commit suicide. The woman had been ill for more than a year.

DAILY MINING JOURNAL

Associated Press published by THE MINING JOURNAL CO. (LIMITED).

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

Even a most tempting Georgia mint julep did not avail to get President Taft off the water wagon.

The state department has plenty of trouble that it can't get away from without mixing up in the north pole controversy.

Senator Cummins of Iowa is billed to pay his respect to Uncle Joe Cannon of Illinois before the Marquette club in Chicago tonight.

Not for a million dollars would Dick Croker hear of mixing up in New York politics again.

Mr. Murphy, now the near boss of New York, has left no doubt on the proposition that he will not resign as the Tammany leader until he is thrown out.

A spirited debate between the Detroit Free Press and the Detroit News as to whether the News is planning to sell its morning edition and the Sunday News-Tribune.

Dr. Cook is now busy getting his data in order for transmission to the University of Copenhagen.

It is now stated that, contrary to the general expectation, Senator Aldrich will not in his addresses to the commercial bodies in various western cities.

An ordinance strictly regulating the saloon business is before the Soo council, and it is predicted that it will be passed.

Michigan expects to defeat Notre Dame in the football game today.

Mr. Barnard, the Republican candidate for mayor in New York, conducted himself with the same dignity in defeat that he showed in the course of his canvass.

5% DEBENTURES Running on to five years secured by first mortgages on improved real estate worth more than double outstanding debentures. Superior Trust Company HANCOCK, MICH. Capital and Surplus \$200,000.00

The first number of the Northwesterner, the upper peninsula monthly published by Roger M. Andrews of Menominee, is now being circulated.

The report of the auditor of the post-office department for the fiscal year ending June 30 last, made public this week, shows a deficit for the year of \$17,479,770.

The Grand Rapids Daily News, in whose utterances National Committee-man Budgett is said to have a voice, reprints a recent article from the Detroit News on the collectorship for the Superior district.

Michigan expects to defeat Notre Dame in the football game today.

Mr. Barnard, the Republican candidate for mayor in New York, conducted himself with the same dignity in defeat that he showed in the course of his canvass.

The most important contest that has occurred in the British parliament since the passage of the reform bill in 1832 will come to a head on the 22nd of the month, when the house of lords will take up the debate on the Liberal budget.

The vote by which the house of commons passed the budget was even more decisive in its favor than was expected would be the case.

The situation has been precipitated by that bugaboo of all ministries, a deficit—a deficit that in this case is not far short of \$100,000,000.

liberal budget or the replacement of free trade by a protective tariff system.

The most astute observers of the course of British politics profess themselves at sea in facing the question of the attitude the house of lords will finally take in regard to the budget.

It is not surprising that the budget would mean a general election in which the country would have a practical referendum on the question.

What Robbie Wanted to Know. He asked so many questions that day that he finally wore out his mother's patience.

Not Yet. A Missouri clergyman had in his pastoral flock a member who was reluctant about meeting the confirmation basket.

Pinched. Clem Wilson was on the verge of starvation for two days and a night last week.

Changed Conditions in Georgia. We announced in last week's issue that our county jail was entirely empty.

A Famous Walker. Captain Barclay was the great English athlete of the early nineteenth century.

UP TO THE LORDS. The most important contest that has occurred in the British parliament since the passage of the reform bill in 1832.

Japanese Musicians. The shakuhachi players of Japan are a privileged class of itinerant musicians.

## HARBOR OF REFUGE PROJECT.

Supt. Banks Says It Is Up to People of Houghton and Hancock.

The project for a harbor of refuge in Portage lake is an important government engineering scheme for the Portage lake waterways which has been in contemplation for more than two years. The government engineers have recommended it and have prepared all plans, estimates, drawings and data necessary for the immediate commencement of the work. The only thing lacking is a government appropriation and it seems to be that it is up to the people of Houghton and Hancock to secure this through their representatives in congress.

Superintendent Banks, in charge of the waterway, Colonel Fitch, U. S. engineer in charge of Lake Superior, the great marine interests and the chief engineers of the United States have sanctioned the plan, have done everything but actually build the harbor. They recognize its need. The arguments to be advanced for the harbor may be briefly stated:

Portage lake is the only perfect shelter for boats between Marquette and Duluth. Lily pond in the upper canal provides a shelter for some of the boats but a harbor at Portage river would permit boats to run in and tie up from the eastward, giving an opportunity for a straight run west from Whitefish or Marquette, obviating the necessity of rounding Keweenaw point, one of the danger spots of the lake, to get into the Lily pond harbor. This latter harbor is often inadequate and this will become worse as the seasons advance.

The addition of a harbor of refuge in Portage river would have the effect of insuring greater safety for freight and would probably materially reduce transportation charges. There are two reasons affecting the material welfare of Houghton and Hancock. The harbor of refuge will cost \$200,000 and most of this sum would be spent in the two towns by the contractors. When the boats are in shelter they will require supplies and the business houses catering to marine trade in all branches would be benefited.

If these reasons are sufficient it is up to the businessmen of Houghton and Hancock to get together and use their influence with Congressman Young and Senators Burrows and Smith. The copper country, one of the great producers of wealth in this country, has seldom asked the government for anything. The expenditure on Portage lake have exceeded great many years and have never been particularly heavy. A request from the copper country for an appropriation at this time would not be a request from a section which is always reaching for assistance and the government would be ripe for a favorable reply to such a request.

## Ontonagon Harbor.

Right in this connection comes the question of the harbor at Ontonagon. This is a matter in which Portage lake people are not interested but the copper country as a whole is. But Hawley of Ontonagon, member of the firm of Hawley Bros., was in Houghton yesterday, coming here with his tug tramp to have repairs made on her at Crez's. Mr. Hawley said that this far the people of Ontonagon have not taken any decided steps in the harbor matter, though Colonel Fitch has asked them to do something.

The engineer has asked for the co-operation of Ontonagon people in this matter, asked them to express their willingness to assist in continuing the improvements. Congressman Young's recent visit to the copper country was for this purpose too. Ontonagon harbor as at present constituted requires constant attention because of the sand washing in from the lake and into the Ontonagon river. It is necessary to dredge the harbor out every year. It looks now as though the government wants to abandon this harbor.

Mr. Hawley explains that this would be a blow to navigation as Ontonagon harbor is the only shelter between Portage lake and Michigan island, a distance of ninety-three miles. The harbor is often used as a shelter by large boats, or has been in the past. But now they could not get into the place because of the sand. At a point 200 feet from the piers there is a new sand bar which has not more than thirteen feet of water over it. Inside the harbor the sand has washed in until a boat can not load to a depth of much more than eleven feet.

The government dredges usually dig a channel through the harbor seventeen feet deep but the sand soon washes in and fills this up. The only remedy would seem to be to alter the course of the Ontonagon river. At least this is a part of the plan proposed.

## Portage Lake Repairs.

Superintendent Banks is completing repairs to the upper breakwater, caused by the recent severe storm. The waves tore two big steel face plates from the breakwater and tore a hole in it which let out a few tons of rock. This has all been repaired with the exception of replacing the plates, and this will be done in a few days.

Two bad breaks in the revetment, caused by the schooner Chieftain during the summer, will be repaired by the government during the coming winter, by day's work. At the same time new protective timbers will be placed along the revetment in Lily pond harbor of refuge. Superintendent Banks has just completed the construction of cement walks around Watchman VanLew's residence at the entry.

## A BURGLARY IN HANCOCK.

Undersheriff Sheridan Has a Tough Case to Ferret Out.

Undersheriff Sheridan is working on a burglary case in Hancock which has baffled all his efforts for the past two days. The burglary was committed in the saloon of one Jack Salo early in the week. Salo, proprietor of the saloon, left the country and some one else attempted to continue the business under his license. Chief Tibor closed the place up when this was learned.

The night following the forcible closing some one broke into the saloon and abstracted about \$100 worth of booze. There is absolutely no clue. The case was placed in Undersheriff Sheridan's hands and he is working like a Sherlock Holmes on it but sees no light.

## DEATH OF J. C. FLYNN.

Old and Respected Resident of Hancock for Fifty Years.

J. C. Flynn, an old and respected resident of Hancock, died Thursday at the age of sixty years. For the past six weeks he had been ill, suffering from heart trouble. Mr. Flynn had lived in the copper country for fifty years and was known in every town in the county. At one time he was village marshal and United States deputy for this district. He was born in Ireland and came to this country fifty-eight years ago, landing at New Jersey. In 1850 he came to the copper country and had lived here ever since. For several years after reaching the copper country he was employed in Smith & Hanner's store. He held this position until 1882, when he was appointed marshal. He was a charter member of the Hancock branch of the Ancient Order of Hibernians. This society will attend the funeral, which will be held this morning from St. Patrick's church. The deceased is survived by a wife and six children, the children are Andrew, Thomas, William, Gustave, Sarah and May. A brother, James, lives in Minneapolis and a sister is Mrs. Maxwell of Ripley.

## OPENING OF DEER SEASON.

Licenses Being Issued 100 a Day—Five Lady Hunters.

The clerks in County Clerk's Richardson's office are busy people these days. The deer season comes on apace and hunters must perforce have licenses for the hunting. So they are coming at the rate of 100 per day for the tags which permit the slaughter. This far 500 licenses have been issued, the rate of 100 a day having been established only yesterday. There are enough licenses left for all as the clerk secured 1,600 blanks, which is a greater number than has ever been issued.

There are more ladies going a-hunting this fall than ever before, too. In all five have secured licenses, Mrs. Stambaugh of Kenon, Mrs. Chapman of Laurium, Mrs. Ferris, Mrs. Fannie Leadbetter and Mrs. D. M. Leadbetter of Houghton.

The season, it should be remembered, opens November 10, next Wednesday, continues for the remainder of the month, with three days of grace in December for bringing in the kill.

## CONSISTORY PROJECT PLEASES.

Upper Peninsula Thirty-Second Degree Masons Are Interested.

The suggestion, made by prominent thirty-second degree Masons of Laurium and Calumet, that a consistory be organized in the upper peninsula, has been received by thirty-second degree Masons all over northern Michigan and it is likely that the first steps towards organizing the new consistory will be taken at the first annual banquet and reunion of northern Michigan thirty-second degrees, to be held at Calumet on or about Nov. 26. An excellent program for being arranged for this reunion by James T. Fisher of Laurium and other prominent thirty-second degree Masons, practically all of whom will sanction the proposition to organize the new consistory.

## SOUTH STREET BLUFF WORK.

Teams May Drive Through Houghton's New Road Tomorrow Morning.

Superintendent Foley of the public works department at Houghton said yesterday that by tomorrow morning it will be possible for teams to drive through the new road which has been constructed through the old South street bluff, between Dakota and First streets. Operations on this bluff have been going on for two years.

The bluff was just twenty-seven feet higher than the street level and occupied the entire width of South street, and about half a block in length. It was of solid trap rock and had to be blasted to remove it. The blasting had to be carefully done as the bluff is in the midst of a thickly settled residential district and there was danger of injury to life and limb. As fast as the material was blasted out it was crushed in the new crusher which the village and township bought this year and the material was piled on a street when necessary. About 3,500 yards of rock were taken out to make the roadway which will be opened tomorrow. It will require another year to remove the entire bluff.

When this is done some of the houses will occupy peculiar positions. Those on the south side of the street, opposite the bluff, were built on a level of the bluff's crown. When the huge rock is all blasted away these houses will be perched on the edge of a canyon with a sheer south bluff rising twenty-seven feet from the level of the street.

## LAKE COMMERCE STATISTICS.

Report of Vessel Passages Through the Canals for October.

Superintendent George H. Banks of the Portage lake waterways, yesterday gave out his monthly statistical report of the commerce through the lake and canals, covering the month of October. For purposes of comparison, favorable to the month just closed, the following figures from the report of October, 1908, are given:

Total number of vessels.....	310
Total tonnage.....	357,351
Soft coal, up bound, tons.....	118,905
Copper, up bound, tons.....	1,752
Total cargo, tons.....	238,210
Passengers, up bound.....	107
Copper, east bound, tons.....	8,750
Passengers, east bound.....	82

The following are the principal bodies of the present report:

Tonnage and class of vessels passing through the canals during the month of October, 1909:	
—Bound Down—	No. Net tons.
Steam.....	80 87,521
Two barges.....	41 34,612
Totals.....	121 122,133
—Bound Up—	No. Net tons.
Steam.....	144 256,888
Two barges.....	45 39,800
Totals.....	189 296,688

Total number of vessels..... 510  
Total tonnage..... 418,821  
Statement of freight and passenger: carried through the canals during the month of October, 1909:

—Bound Down—	No. Net tons.
Iron ore, tons.....	47,222
Pig iron, tons.....	2,743
Copper, tons.....	8,852
Manufactured iron, tons.....	2,072
Stump sand, tons.....	3,760
Hay, tons.....	218
Wheat, bushels.....	78,506
Barley, bushels.....	28,928
Oats, bushels.....	13,143
Flax, bushels.....	50,000
Flour, barrels.....	156,080
Lumber, Gonsand feet.....	57,354
Shingles, thousand feet.....	10,671
Prill, wet tons.....	1,240
Miscellaneous merchandise, tons.....	4,416
Total cargo, tons.....	182,815
Passengers, number.....	30
—Bound Up—	No. Net tons.
Coal, soft, tons.....	102,151
Coal, hard, tons.....	33,867
Copper, tons.....	2,530
Manufactured iron, tons.....	20,928
Sand, tons.....	800
Limestone, tons.....	8,300
Brick, number.....	58,000
Kerosine oil, barrels.....	5,450
Salt, barrels.....	47,964
Lumber, thousand feet.....	1,240
Miscellaneous merchandise, tons.....	33,250
Total cargo, tons.....	302,929
Passengers, number.....	230

## HOLD MONTHLY EXAMINATION.

Houghton Light Infantrymen Will Try for the Rifle and Others.

The second monthly efficiency examination of the members of the Houghton Light Infantry will be held next Thursday night. This examination is for three prizes, a rifle from the U. S. Smith company, a hat from Jos. Seidenfeld and a box of cigars from the W. H. Dec Cigar company.

This competition is a continuation of Captain Foley's policy to improve the company by fostering a friendly rivalry among the men. He proposes to bring his men up to a high degree of efficiency through drill and study in all branches of the school of the soldier and through the generous co-operation of businessmen is succeeding in a manner gratifying to himself and his superiors in the Third regiment. The examination next Thursday will probably be conducted by Colonel Thielen of Calumet or Major Hecker of Houghton. All of the men are working hard and the examination should show an improvement in form throughout the company.

The examination for the capital prize, a gold watch now on exhibition at Matt Haug's, will be held in January and February and it will be conducted by the

## highest authority in the state, General Carl Wagner of Port Huron, inspector general of the Michigan National Guard, who heartily endorses Captain Foley's plan.

## A POOR WHITEFISH SEASON.

Fishermen Bring in Friday Cargo of Lake Trout Only.

Those people of Houghton who had whitefish for their Friday dinner yesterday had a feast which Lucullus might envy because this chiefest of lake dainties is sadly scarce. Fishermen bringing in their Friday cargoes from Lake Superior fishing grounds yesterday brought in nothing but lake trout and not much of that. They report that it has been a poor season for whitefish.

It is probable now that whitefish will be unknown to Houghton tables until the first of the year as the commercial fishing season closes November 29 and does not open again until December 15, the period being the spawning season for whitefish and trout and they are protected by law during that time.

## COPPER COUNTRY SPORTS.

Army and Navy Football—Various Sporting Matters.

The biggest and most important game of football in the copper country this season will be played at the Hancock Driving park tomorrow afternoon. It will be a game of the army vs. the navy, or the team of the Houghton Light Infantry against the team of the Hancock Naval Reserve.

The game will be presided by a parade. The members of the naval reserve will march in uniform from the armory to the Elks temple, where they will wait for the Houghton Light Infantry. Then both organizations, with their teams, life, drum and bugle corps, will march to the driving park. The proceeds of the game will be put into a fund which will be used to prepare a rifle range to be used by both reserves and militia.

The officials will be: Referee, Major Hecker; umpire, Professor Claffin; head linesman, Joe Lindsey; line judge, Lieutenant Abbott; timekeeper, John Condon and H. C. Folger. The following is the line-up of the team of the militia: Center, Haas; right guard, Prince; left guard, O'Leary; right tackle, Kutschel; left tackle, Cahoon; right end, C. McNeer; left end, Sullivan; quarterback, Barnes; right halfback, Shea; left halfback, Allee; fullback, Captain A. Anderson; substitutes, Dwyer, Doetsch and McCarthy.

Captain Weston of the naval reserve eleven will play the following men: Center, Erickson; right guard, Lieutenant Abbott; timekeeper, John Condon and H. C. Folger. The following is the line-up of the team of the militia: Center, Haas; right guard, Prince; left guard, O'Leary; right tackle, Kutschel; left tackle, Cahoon; right end, C. McNeer; left end, Sullivan; quarterback, Barnes; right halfback, Shea; left halfback, Allee; fullback, Captain A. Anderson; substitutes, Dwyer, Doetsch and McCarthy.

Bowling is going to be popular in Houghton this winter because of the prospect of the upper peninsula tournament next year. Hancock is also getting interested and as a result each town has three teams. Classes A, B and C. The Class A teams will play in Hancock tonight and will be made up of Hansen, Anderson, Treloar, Slockett and Krellwitz. The B team is made up of Krellwitz, Canady, Saylor, Priniński and Elliott. It will play the A team next Wednesday night. The C teams of both towns have games scheduled, to be announced later. Houghton A plays Sunday at Copper City and next Tuesday at Lake Linden.

The Hancock wrestling tourney at

## catch-as-catch-can style opened in the Kerodze theater last night and will continue tonight.

The Houghton High school football team left yesterday afternoon for Menominee, where a match will be played today with the local high school team.

## FINE HUNTING LODGE BURNED.

One of the finest and best equipped hunting lodges in the copper country district, located on the Traverse river at the point where the Mineral Range railroad line to Gray crosses the stream, was recently destroyed by fire and it is believed the blaze was of incendiary origin. This is not the only hunting lodge that has been destroyed in this section this season, either, and the hunters are very much stirred up over the incident. Deputy state and other game wardens are investigating the matter and it is said, are working on strong clues as to the persons who, it is believed, caused the destruction of the lodge. The building was a substantial one and was about fourteen years old.

It is stated that threats have frequently been made to burn this lodge. These are to be investigated thoroughly. The lodge was well stocked with provisions, bedding and other camping equipment and was a favorite stopping place of hunters in Keweenaw county. It was maintained by hunters of both Houghton and Keweenaw counties.

## Mining News

### OVER-PRODUCTION OF COPPER.

Individual Action by Leading Producers Suggested as a "Legal" Remedy.

While a tremendous buying wave in iron and steel has been sweeping over the country for months, it seems a remarkable meagreness to find copper falling utterly to respond to the buoyant conditions experienced not only in the metal above mentioned but in so many ramifications of business activity. The price of copper has fallen to a point which is equivalent, in this case, to pointing out the remedy. The evil and the cure are obvious, and suggest the logical method of relief. But what has prevented the application of the remedy?

One reason deserving attention has been the cultivation of a shallow optimism. People have tried to make themselves believe that copper was to score a pronounced advance before the close of 1909, and this in the face of a record-breaking production and a heavy accumulation of surplus stocks. In holding out the prospect of a strong market recovery as probable in the near future, what has been done is to cause overloading the trade with an excess output for which there is absolutely no outlet. We believe thoroughly in taking the optimistic outlook for copper ultimately when the equilibrium between production and consumption is restored. If, however, a line regard for market values is to prevail, there is no other recourse than to curtail output until the market's demands approximate the new outputting scale now in force.

A pedigree policy at the mines is reflected in the present market depression. The excessive increase in production has been prematurely found on the world before the melting capacity was equal to the task of handling such a huge output. There ought to be some way whereby production could be adjusted to requirements, and that too without entering into combinations or illegal agreements. A radical change at producing centers in this respect would soon be followed by a radical improvement in market conditions. The present extensive output creates a dead resistance to anything like a strong intensive market. Give consumption a chance to absorb the copper already above ground, and put the soft pedal on output long enough for the metal to right itself naturally, commercially, and sentimentally.

With the illuminating statistics sent broadcast each month there exists all the greater necessity for giving the world proof that copper production is to be governed with due regard to consumption demands, and the commercial value at which it is to be appraised in the markets of trade. In view of the wonderful reparation in financial and industrial circles within the past two years, the slow headway made by copper is strikingly significant. At the same time, thought would cure a frightful lung-racking cough that had defied all remedies for two years. After six months he returned, death dogging his steps. "Then I began to use Dr. King's New Discovery," he writes, "and after taking six bottles I am as well as ever." It saves thousands yearly from desperate lung diseases. Infallible for Coughs and Colds, it dispels Hoarseness and Sore Throat, Cures Grip, Whooping Cough, Sore and Inflamed Throat, Bronchitis, Hemorrhages, Asthma, Cramp, Whooping Cough, Sore and Inflamed Throat, guaranteed by The Stafford Drug Co.

**S.S.S. FOR RHEUMATISM**  
Rheumatism is in reality an internal inflammation; a diseased condition of the blood cells which supply the nourishment and strength necessary to sustain our bodies. The disease is caused by an excess of uric acid in the blood, which comes from indigestion, overeating, and other irregularities of the system. This uric acid produces an inflamed and acid condition of the blood, and the circulation, instead of nourishing the different portions of the body, continually deposits into the muscles, nerves, joints and bones, the irritating and pain-producing acid with which it is filled. Then follow the painful and torturing symptoms of Rheumatism. We do not claim for S. S. S. that it is anything more than a first class blood purifier, and that is just what is needed to cure Rheumatism. S. S. S. goes into the circulation, and by neutralizing the uric acid and driving it from the blood, effectually and surely removes the cause of Rheumatism. S. S. S. strengthens and invigorates the blood so that instead of a weak, sour stream, causing pain and agony throughout the system, it becomes an invigorating, nourishing fluid, furnishing health and vigor to every portion of the body, and permanently relieving the suffering caused by Rheumatism. S. S. S. is purely vegetable and will not injure the most delicate system. Book on Rheumatism and any medical advice free to all who write.

## City Brevities

Today's weather: Partly cloudy Saturday; stationary temperature. Monday's temperature: Seven a. m., 35 degrees; noon, 57; 7 p. m., 43. Maximum, 59 degrees; minimum, 33.

J. H. Rose left for Chicago last evening on business.

Mrs. E. N. Breitung went to Chicago last evening's train.

The quarterly conference of the M. E. church will be held this evening at 8 o'clock in the parlors of the church.

There were sixteen deaths and nine births in this city last month, according to figures compiled by the recorder.

Miss Mary Gray, 430 West Bluff street, was pleasantly surprised by about forty-five of her friends last evening. The evening was spent in playing games.

A Marquette friend of George Hibbard received a letter from him yesterday, stating that he had recovered from his accident of several weeks ago, except that he still carried his arm in a sling.

Austin Catlin was surprised at the prison last evening by a number of his friends. The company spent a pleasant evening, dancing and games being the chief amusements. Refreshments were served.

Hub Weiser, the right fielder on the Marquette baseball team this summer, has received a letter from the Saginaw club of the lower Michigan league, asking if Hub would consider playing professional ball and on what terms.

A reproduction of Kellar's painting, "Hero and Leander," in the show window of Hager's furniture store is attracting no little attention. The picture is a retouched and tinted photograph and is the work of R. Holzhey, the librarian at the branch prison.

Vessel Captain Hurt—Captain Pidgeon of the schooner Cattanoga, was injured last evening by falling into the hold of his vessel. The extent of his injuries could not be learned.

Neither Team Scored—The result of the football game at Newberry yesterday afternoon between the Normal and Newberry High school eleven resulted in a tie, either team scoring. The game must have been an intensely interesting and hard fought contest.

Oil Burners on Hand—J. E. Ream, up per peninsula agent for the Gen Oil burner, yesterday received a consignment of these burners from the factory at Willoughby, O., and is now prepared to supply them on short notice. This burner is attached to any cook or heating stove, making it possible to use kerosene instead of coal or other fuel.

Bound Over to U. S. Court—Deputy Marshal F. D. Mosher has returned from St. Ignace, where he arrested Emil Mason for failure to obtain the revenue stamp on several packages of liquor. Mattson was given a hearing before the United States court commissioner in that city and was bound over to the federal court, which will be in session in Marquette next May.

Taking of Testimony Ends—The taking of testimony of local witnesses in the patent infringement case of H. O. Chute vs. The Wisconsin Chemical company, which has been in progress since Monday, closed yesterday afternoon. No more testimony in this case will be taken for some time as some of the witnesses for the defense are out of the United States. The case will be heard in the United States court in Milwaukee.

Deer Licenses Issued—Up to last evening 425 deer licenses had been issued in Marquette county, which is about the same number as was issued at the same time last year. Of this number 200 have been issued to non-residents of the state and one to a woman, Miss Bridget Ford of Skandia. Miss Ford is an enthusiastic hunter and takes out a license each year. Last year the total number of licenses issued during the season was something over 1,700.

Boy Sent to Lansing—The first sentence of Probate Judge Potter since he became judge of the juvenile court Sept. 10 was imposed yesterday, the party sentenced being Carl Strand of Ishpeming, aged fourteen, who was sent to the industrial school at Lansing for truancy. Young Strand was before Justice Andrews in Ishpeming on the same charge once before, when a fatherly lecture was given him, which apparently did no good, as he has since persisted in his determination not to attend school. He was taken to Lansing by E. E. McIntosh yesterday afternoon.

Played Here Before—Marquette theatergoers who had the pleasure of seeing Burr McIntosh in "The Gentleman from Mississippi" last evening recalled Mr. McIntosh's last previous appearance in the city, when he was cast in the title role of "Budd'nhead Wilson," a dramatization of Mark Twain's novel of that name. At that time Frank Campbell, who in the role of Trampus, supported Dustin Farnum in "The Virginian," and who was seen here last season in that play, was in Mr. McIntosh's support. Shortly after his appearance here Mr. McIntosh left the stage for the long absence that was broken by his reappearance in the role of Senator Langdon in "The Gentleman from Mississippi."

INSURE WITH PETER WHITE & CO.

SUNDAY AT THE CHURCHES.

First Baptist—Worship and preaching; sermons by Dr. Kerr Boyce Tupper. Morning subject, "Christian Certitudes." Evening subject, "Christian Agnosticism."

First Church of Christ, Scientist—Service Sunday morning at 10:30 in Room 2, Opera House block. The subject of this week's lesson is "Adam and Fallen Man."

Presbyterian—Morning subject, "A Good Conscience"; evening theme, "More Than Takes for the Bible." In this last sermon, a Biblical character will be spoken of, but will not be mentioned by name throughout the discourse, leaving the congregation to decide as to the identity of the subject at their leisure.

First Methodist—Tomorrow morning the Rev. Jas. Pascoe, district superintendent, will preach at the M. E. church, and the communion of the Lord's supper will be celebrated. In the evening Mr. Maywood will deliver the first of four sermons on comparative religions. The sermons will treat of Confucius, the sage, Buddha, the mystic, Mahomet, the proselyter, and Christ, the light of the world.

## Northern Normal Notes.

Thursday morning Dr. Fracker gave an excellent talk in chapel on the meaning of Loyalty.

Mrs. Kelsey writes very enthusiastically of her work at Columbia. She is at present working out a report on a special educational problem assigned to her.

President Kaye is in Bessemer, conducting the Gogebic county institute, held there Thursday, Friday and Saturday. Professor Hewitt of Oshkosh is assisting him.

Miss Bill, of the training school, is in Ontonagon, assisting President McKenney of the Milwaukee Normal at the Ontonagon county institute, held there Friday and Saturday of this week.

A small frame building, 12 by 18 feet, has been erected back of the heating plant, for housing the animals used in the biological work. The building has a cement floor and the space is partitioned off into pens for the rabbits and other like animals. There are also cages for the pigeons and small birds.

The contract for converting the old gymnasium into domestic science rooms was let at the last meeting of the state board of education to Lipsitt & Sinclair of Marquette. The work will be begun at once, and as soon as the rooms are ready and equipment installed, domestic science courses will be offered.

The students in the art department are beginning their Christmas design work. No exhibition will be given this year of student work. Instead, there will be an exhibition of modern pictures, showing the latest methods of reproducing the works of the masters. This exhibition will be given the week before Thanksgiving.

The total enrollment to date is 263, a large percentage of these being enrolled in the life certificate course. Almost all of the students are high school graduates. The work is progressing most satisfactorily. The use of the library has increased materially, and the hours have been lengthened in order to meet the demands made upon it.

Rev. S. G. Anderson, father of Lewis Flint Anderson, died Saturday at the home of his daughter in southern Michigan. It will be remembered that Rev. Mr. Anderson spent some time in Marquette last winter. Until a few months ago, he was pastor of the Baptist church at St. Mary, Ill., but on account of ill health was forced to give up his work.

Monday afternoon a number of the students met and organized a give club. The officers elected are: President, Bertha Johnston; secretary, Christina Green; and treasurer, Edith Unsworth. The club, which will be under the direction of Miss Oltman of the music department, will meet at 4:10 o'clock Monday afternoons, in the music room. No definite line of work has as yet been decided upon.

During the past week the football team has been given thorough practice, in preparation for their game at Newberry yesterday. By special request of the business men of Newberry, the game was scheduled for Friday afternoon, in order that they might be more easily attended. Dispatches received late yesterday afternoon were to the effect that the game ended in a tie, the score being 9 to 9.

Cards have been received from Miss Hill, dated October 17th, Seville, Spain, stating that she is having a most delightful trip. She has already traveled through England and visited various historic places. She has made a special study of the homes, lives and customs of the English poets. She was leaving Seville for Granada and Alhambra, and after visiting other places of interest in Spain, she will go on to Italy.

Tuesday morning the pupils of Miss Melnich's room gave a very interesting October program. A number of selections were rendered, such as Albert Leighton's Autumn, Steadman's Autumn song, Allingham's Robin Redbreast, Thomas Hood's November, Alice Carey's Faded Leaves, Susan Coolidge's How the Leaves Come Down, and Bryant's Chrysanthemum and Gladness of Nature. The entire program gave the autumn atmosphere, as interpreted by the various poets.

### SHOULD CALL IN PERSON.

Duty of Treasurers in Cases of Non-Payment of Taxes.

For the purpose of collecting taxes remaining unpaid on January 10th, treasurers shall thereafter during the month call personally upon such persons liable to pay such taxes, and if a resident of such township at his place of residence or business and demand payment of the taxes charged against him. If not in the township but in the county or adjoining county demand must be made personally or by mail.

This is the tenor of the Michigan law on the collecting of taxes for township, village and city treasurers. It is rather significant at this time of the year. The law has been tested and upheld by the supreme court of the state, the test case coming up from Muskegon.

According to the law it is obligatory upon the part of the treasurer to make a personal visit to the taxpayer and demand payment of such amounts as are unpaid on the books. Of course he has no means of enforcing his demands other than to return the tax as delinquent, but it is for the purpose of making the treasurers display greater care in their work than otherwise would be the case.

The rigid enforcement of the law has never been noted, for no treasurer has been called upon to make up the amount represented by the delinquent personal property tax. Of course it would have to be proven that the treasurer did not comply with the law and make a personal visit to the parties whose taxes have been returned as delinquent.

### GOLD MEDAL FLOUR

## IMPORTANT DECISION BY JUDGE COOPER

HOLDS THAT SAILORS WHO SHIP FOR ROUND TRIPS BUT LEAVE BOAT ON COMPLETION OF HALF VOYAGE MAY RECOVER.

A case of unusual importance to the lake marine interests was decided by Judge Cooper this week, who is holding court for Judge Stone in Escanaba. The point of the decision is that sailors who ship for round trips and leave their boat on completion of half the voyage may recover. As nearly all of the lake sailors have contracts of that kind, Judge Cooper's decision is of wide import.

In September a sailor by the name of Wilbert Smith, who had signed articles at Conneaut to ship to the head of the lakes and return to Lake Erie ports, left his boat at Escanaba.

He asked the master of the vessel for wages for five days and a half that he had worked. The captain refused to meet the demand on three grounds, viz: First, that the general maritime law was that a sailor who deserted forfeited all wages earned up to the time of desertion. Second, that there was a United States statute to the effect that a sailor forfeited all earned wages by desertion.

Third, that the articles of agreement signed by the sailor provided that if the sailor broke any of his agreements he should forfeit all wages due him. The seaman assigned his claim for wages to an attorney, who sued the defendant, the Chicago Navigation company. The case was tried Monday night before Judge Cooper who took the case under advisement. He rendered a decision in favor of the sailor, giving Attorney Clyde Hayden, the seaman's attorney, a judgment for \$913 and \$20 costs.

The grounds of Judge Cooper's decision are as follows: That the general maritime law of forfeiture for desertion does not apply when the sailor sues in a common law court; that the United States statute passed in 1872 decreeing for desertion was later repealed in so far as it affected the great lakes and coastwise navigation; that the sailor's agreement to forfeit all his wages in case he should break any clause of his contract was unjust and illegal, and a penalty, and that the only method by which the company could defeat his action for wages earned would be to recoup any damages that the sailor's violation of his contract had caused them. The company did not show damages of any amount.

A further reason for deciding in favor of the sailor was that there were many decisions, even in admiralty courts to the effect that when a sailor deserted he was within the discretion of the judge to decree a forfeiture or not. The seaman, by his attorney, produced a decision by the Michigan supreme court, to the effect that he could recover wages in a Michigan court although the admiralty court had decided in the same case that they were forfeited owing to the fact of desertion.

In rendering his decision Judge Cooper said: "When a sailor brings his case to a common law court he should receive the same consideration under the law and the same decision that would be rendered a man whose occupation did not bring him under the scope of maritime law."

**SOO CANAL PASSAGES.**  
Sault Ste. Marie, Mich., Nov. 5.—The boats whose names are here appended have passed the canals the past twenty-four hours, bound for ports on Lake Superior: Kaminitiquia, 8 p. m.; Nicholas, 11; Pendants White, Crowe, midnight; Normanda, Jay Morse, 1 a. m.; Berlin, Anson, 3; John Hartung, 3:30; Alva, oil barge, 4; Amaranth, 5; Murphy, 6; Conly, Charles Neff, 6:30; Wolfe (small), Frank Peavy, Monroe Smith, 8:30; Weeks, 9; M. T. Green, 9:30; Manitoba, Taylor, Mahoning, 10:30; Matthews, 11; Oswego, Pat Anderson, Sagamore, Jenkins, Nov. 6: Adriatic, Glick, Cornelius, 1:30 p. m.; B. Lyman Smith, 2:30; William Hawgood, Nebing, 3; Maruba, Dinkey, 3:30; Peter White, Meaford, Rosemount, 4; Osborne, Kenora, 5:30; Bullington, 6; Ishpeming, Cole, 7; Renny, 7:30; George Peavy, 8:30; Townsend, 9.

**TO SHOOT AT AIRSHIPS.**  
Government Will Experiment on the Best Type of Gun to Use.

Washington, Nov. 5.—To devise means of defense against possible aerial invasion, the bureau of ordinance of the war department is about to begin experiments in shooting at air craft with cannon.

The experiment will be carried on at the Sandy Hook proving grounds. Captain Charles de F. Chandler of the signal corps, one of the two qualified pilots in the army, left Washington today for New York to make arrangements for the balloons to be used. Three balloons will be purchased for the tests. At the beginning of the work, only gas bags will be used, but as information is obtained the field of operation may be expanded. No tests of this nature have ever been made in America, as far as is known here, the only experiments of the character having been carried on by gun manufacturers in Germany.

The tests at Sandy Hook will be made with cannon now in use and such new designs will be drafted as the experiments show may be wise. At the same time ordinance officers are endeavoring to devise means to reduce the effectiveness of an enemy's balloons and aeroplanes, the signal corps will be engaged in the problems of navigating the air. Experiments shortly will be conducted in nullifying the motors of the Wright aeroplanes owned by the government so that the flight of an aeroplane may be made comparatively noiseless. Attempts to communicate by wireless telegraphy from an aeroplane also will be made.

The experiments of firing upon a balloon in flight with cannon made in Germany have resulted in three types of balloon cannon, it was stated at the war department. One is mounted on wheels, another on a pedestal and the third on an automobile. The work in Germany has demonstrated it is said, that ordinary field artillery is ineffective against airships.

Eli Couvion, the trucker, is taking up the work of Mr. Orchard to remove garbage. If you will give me a trial, call me up. Bell phone, 458-J. 6-7-10

## Upper Peninsula

**Trout Lake Booming.**  
O. W. Smith, a business man at that place, reports that Trout Lake, Chippewa county, is booming. Messrs. Steamer and Clegg, who recently purchased the old mill, are installing new machinery and are erecting a number of row houses for their employees. When the improvements are completed the town will be one of the finest in that part of the peninsula and will be opened day and night. Mr. Smith says the provisions of the new liquor law are being observed by all of the dealers at Trout Lake and that there is less lawlessness than in the past.

**Traveling Man Stricken.**  
John Thornton, a traveling man in the employ of Heister-Walton & Co. of New York, was suddenly stricken with an attack of locomotor ataxia at Menominee this week. The attack rendered the man completely helpless. The hotel management notified the house of his condition and William Allison, a physician from the firm, who has not arrived in Menominee, will have the patient removed as soon as his condition will permit the change to be made. Thornton has been employed by his house for twenty-five years and has made Menominee for the last twenty years.

**Much Illegal Shooting.**  
Circuit Judge Stone of the Soo is of the opinion that game wardens should be stationed through the woods comprising the deer hunting grounds of the upper peninsula early in the month. He says that during the month previous to the opening of the season such illegal hunting is done, and that hunters use dogs in the chase, which they refrain from doing during the season because of the probability of their being shot. There are many hunters in the woods now ostensibly for the purpose of selecting opening grounds, many of whom take the occasion, however, of getting a deer before the season begins.

**Epidemic Among Horses.**  
A serious epidemic has developed among the horses owned in the vicinity of Escanaba. Several of the leading lumber companies of the district and other concerns are being seriously hindered in their work, and while the veterinarians are successfully combating the disease several valuable animals have been lost. The disease starts with a sudden and high fever with which there is likely to be complications of pneumonia and, if untreated, results in a fatal condition which is apt to prove fatal. The disease is considered by veterinarians to be contagious. As high as twenty horses owned by one company have been out of commission at one time.

**Sue for Alleged Libel.**  
Suit has been brought by Peter L. Hote of Menominee against Gus Dittmore also of that city. The action is for damages of \$15,000 which L. Hote claims is due him for a libel which he alleges was uttered against him. He says that on various occasions Dittmore has called him a thief and that one day he was in the presence of a respectable business man, Dittmore said, "You are a thief." He holds that he is entitled to the damages claimed because of the injury to his feelings and reputation. Both L. Hote and Dittmore operate livery stables in Menominee. L. Hote now occupying a stable which is under lease to Dittmore. The case has many features and promises to be sensational.

**To Protect the Reserve from Fire.**  
A. V. Bennett has arrived at Grand Marais from the Soo and expects to remain there for the winter. He is connected with the United States lighthouse department and will direct the work of logging and cleaning up the lighthouse reserve four miles east of town. The reserve contains eight hundred acres upon which there are some things like 2,000,000 feet of standing pine. This territory, and all the timber on the government, is to be protected from fire and it is Mr. Bennett's mission to clean up the dead and down timber, log the defective trees and cut and burn much of the underbrush. It will be necessary to set considerable fire to the timber and this part of the work has been awarded on contract to John Lalonde, a lumberman, who will establish camps and carry on the work in the usual way. At the same time Mr. Bennett will direct a crew of men in the cleaning up process. It is estimated that it will take all winter to complete the work. The timber that is cut will be barked on the lake shore and will later be used in government construction work.

**Notes of Logging News.**  
The O. C. Lumber company, operating in Dickinson county, will put in about 1,000,000 feet of timber the coming winter. It will operate two camps of its own and have several small camps operated by jobbers. The largest camp is on the Felch Mountain road. It is known as No. 7 and at present there is a crew of forty men, which will be increased to a force of sixty later on. The output of this camp will be about 2,000,000 feet, with an average haul to the landing of five and one-half miles. The major portion of timber to be put in this winter is from burnt-over lands. In Iron county, Mich., Andrew Nelson has a camp just south of Crystal Falls on the Paint river. Mr. Nelson recently purchased a large tract of land from the Longyear interests and has enough timber to keep him busy for several years. Charles Uren, also operating on the Paint, has sufficient timber to keep him going most of the winter. E. M. Mitchell and R. P. Hollow have several jobbers working for them on the lower Michigan and are hunting for good logging territory for the coming winter. They are going into cedar quit extensively. The larger concerns are not rushing work as they have some other winters. Sawyer, Goodman & Co. have their railroad about ready for operation and have over eighty men at their camp west of the Durn, but just how heavily they will operate this winter has not been determined. If the price of lumber picks up they will probably rush the work, but if not they will operate only moderately. They log the year round, so that they do not rush winter work.

The Menasha Woodware company is not in the logging business on its own lands this winter. It is buying logs from jobbers whenever the price suits. F. A. Berglund has a camp north of Bessmer and is employing fifty men. D. N. McLeod of Hexton, Mackinac county, reports that he is having difficulty in operating his mill and camps on account of the scarcity of labor.

One ton of apples will usually yield 150 gallons of cider.

### GUNS AHEAD OF ARMOR?

Battleship Jena Riddled by Projectiles—Armor Easily Penetrated.

Washington, Nov. 5.—During the past two years several tests have been held to determine, if possible, the comparative strength of modern armor and modern guns. England shot up the battleship Jena; America used the old Florida for a target; France has just attacked the battleship Jena with projectiles of every calibre. What the results of these experiments have been has never been made public in exact detail but certain general conclusions have been reached. According to a writer in the Paris Matin, the French tests showed that the offense was much superior to the defense; in other words, guns of every calibre were able to penetrate the corresponding armor. Theoretically the armor was the stronger, practically it

proved itself much weaker. The experiments are considered to have established that the whole hull must be protected with armor of uniform strength. In this respect the Matin's writer claims superiority for the Danton class of warships over the Dreadnought class. The results also show that future French warships ought to have their primary armor and secondary batteries more completely armored and the ships should carry a larger supply of ammunition. They should have a minimum speed of twenty knots and their tonnage should be from 22,000 to 23,000. The cost price of such vessels would be at least \$13,000,000.

Atlantic City, N. J., Nov. 5.—Walter J. Travis, the veteran American golfing champion, is the selected champion for the Atlantic City fall tourney, following

### IMPORTANT IF TRUE.

Miss K.—I'm told your husband, under the influence of the wine at dinner the other night, declared he had "married beauty and brains."

Mrs. K.—Well, well! How nice. Miss K.—Now? Aren't you going to investigate? Evidently he's a bigamist.—Newark Star.

For good clothes for herself a woman has a desire; for the children a passion.

## Ishpeming Department

(Additional Ishpeming on Page Seven.)

### THINKS WELL OF COBALT DISTRICT

Mining Engineer, Located There for Four Years, Says Many of the Principal Properties Have Promise.

James F. Fee, a mining engineer who spent the past four years in the Cobalt district, was an Ishpeming visitor the past few days, leaving last night for Iron Mountain. When asked his opinion of the Cobalt region, Mr. Fee said that it has never looked better. The district has had a genuine boom the past year, in spite of the fact that the shares of the various companies operating properties in the field have not been as actively traded in as they were a year or two ago. Cobalt now has a population of 7,900.

The recent finds in the Red Jacket, Waldman, Young O'Brien and other properties to the south have extended the camp a mile farther in that direction. A number of the shipping mines have a large amount of ore blocked out. When the three new concentrators now being erected at the Temiskaming, Trethewey and Silver Cliff mines are completed, there will be ten mills in operation in the camp.

Mr. Fee said that the South Lorrain property is looking exceptionally well. This property is so situated that the ore can be moved to good advantage when the streams freeze over, and a good-sized tonnage has been accumulated to be shipped during the winter months. There are at least a dozen mines convenient to the Montreal river, Miller, Gan Ganda, Elk, Bloom and Maple Mountain lakes that will come in the line of sight during the winter, as they will begin shipping high grade ore when the snow comes.

"I cannot understand the reason for the slump in Cobalt stocks," said Mr. Fee. "There is no foundation for the report that the La Rose properties are losing their value with depth. Should the La Rose management decide to dispose of any portion of their holdings, they could easily sell the Lawson property alone for an amount at least equal to the company's entire capitalization. Mining men who have been in the field and are familiar with the properties have faith in them and I believe that within a few years the camp will be a large producer of mineral."

### DEATH OF JAMES GEORGE

Old Resident of Ishpeming Passes Away After Brief Illness.

James George, an old and highly esteemed resident of Ishpeming, died yesterday morning shortly before 9 o'clock at the home of his son-in-law, T. M. Tremberth, 114 Barnum street. Paralysis was the direct cause of his demise. Mr. George was stricken while giving his testimony at a meeting at the Salvation Army Hall a week ago tomorrow afternoon.

The deceased was born in Cornwall, Eng., Oct. 15, 1830, and came to America in 1850, locating in New Jersey, where he had charge of mining properties. He remained there until 1882, when he moved to Ontonagon county to take charge of mining work. From there he came to this county, taking a position in one of the mines as timber boss. In 1881 he moved to M'nominee county to take a similar position, remaining there until 1884, when he returned to Ishpeming. Shortly after his return to the city he became interested in real estate, and some years ago retired from active work.

During the many years the deceased had lived in Ishpeming he was an active church worker, being one of the leading members of the First Methodist Episcopal congregation. He is survived by three daughters and one son. The former are Medames Thomas Bettison and P. M. Tremberth of this city, and Miss Elizabeth George of Racine, Wis. The son is A. J. George, also residing at Racine. The two latter were called to the city during the week, and Mr. George's wife will arrive here this morning to attend the funeral, which will be held tomorrow afternoon at 3 o'clock from the First Methodist Episcopal church. The wife of the deceased died here three years ago.

If your piano needs tuning, William Leininger will take your order, and M. J. Olson will do the work. (6-28-11)

## Upper Peninsula

Asked \$5,000 for Slender—  
After being out almost six hours in the circuit court at Escanaba the jury unimpaled in the case of Ida Anderson vs. Frank Devel, in which the latter was charged with slender, returned a verdict for \$100, the amount to cover the costs of the plaintiff Mrs. Anderson brought suit for \$5,000, declaring that the defendant had so injured her reputation by certain libelous remarks that her friends and neighbors had refused to associate with her.

**New Railroad Proposed—**  
Articles of incorporation have been filed with the secretary of state in Madison incorporating the Montreal Valley Railway company and for the purpose of constructing a railroad from Myers, Wis., a station four miles east of Saxon on the South Shore, to Ontonagon, Mich. The length of the new road will be about seventy miles, four and a half miles of which are in Iron county, Wis. The corporation is capitalized at \$100,000 and the incorporators are Merin A. Myers, of Buffalo, N. Y., David H. Jack and Harry M. Jack, of Bradford, Pa., and Thos. E. Lyons and William B. Perry, of Superior. These men are interested in the Montreal River Lumber company, which has a saw mill several miles from Myers on the Montreal river.

The Ontonagon & Flint Steel railway is nearing completion. The rails and ties are now extended to the Ontonagon Lumber & Cedar company's camp, three miles east of the village of Ontonagon. Considerable filling is yet to be done, although the road is in such condition that it is already possible to run trains over the track.

An engineering corps is at work on the survey of the line which is to connect the Manistique & Lake Superior and Munising routes, in the eastern portion of the peninsula. The line is to be two miles in length and will be built this fall.

**W. F. Fitch for Osborn—**  
Visiting the Soo on business, W. F. Fitch of Marquette, president of the D. S. S. & A. railway, was asked regarding the Osborn sentiment in the iron country. Mr. Fitch said: "Personally, I know but little of what is transpiring in the political world, but I know that the candidacy of Mr. Osborn is being received very kindly in every part of the peninsula I have visited. I have been personally acquainted with Mr. Osborn for the past thirty years. I have hunted and fished with him, traveled with him and he has been my guest. I have visited him at his home, and I am frank to say that I do not believe there is a better qualified man in Michigan to occupy the gubernatorial chair than he is. He is strictly honest and his personal magnetism is such as to win him thousands of warm friends who will be found working night and day until after the primaries for his nomination. He would make a bully governor and I believe a majority of the voters of Michigan are of this opinion and will so express themselves at the primaries."

American leads the world in the production of rosin and turpentine.

audiences last night. The closing number is a duet, composed of bits of all the popular songs, put together in such a way that it is extremely funny. This act would well repay a visit to the BIJOU this week.

Matinee at 3 p. m. Saturday. 11-5-21

### FAT LADY RETORTED.

Fresh Conductor Meek Under Rebuke, Contrary to Expectation.

There are different ways of calling another person a liar. Sometimes it is made more effective by the use of a qualifying word or an epithet. Most any one with the use of an epithet, such as is forbidden in the Sunday schools, can make the appellation sound wicked enough. But it requires an expert to hand out the word "liar" pure and simple without any exterior adornments and make it stick.

The "most approved" method was exemplified in Indianapolis the other day, according to the News, by a large gray-haired, well-dressed woman, advanced in years, but apparently well preserved in physical strength. She was a fine looking old woman who had been at the head of a woman's literary club and the contents of two baskets which she was carrying might have been compositions and biographies of great men and such things, instead of carrots and beans and onions which she had just bought on the market.

It was a brightwood car that she was riding in and the conductor was of the type known as "fresh." He made a little girl climb down out of a seat and get on her mother's lap just because she had not paid a fare. He made a collector, with a big red book in his pocket, quit smoking, and all the others grumbled because they didn't like the collector. Then when the fat woman started to get off the car the conductor told her in rather brusque tones to hurry. He was standing on the rear platform and holding to the bell rope.

"You've carried me past my street three or four times," complained the fat woman, taking her time for it.

"I haven't did anything of the kind," snapped the conductor. "Trouble with you is you don't know what you're doing half the time."

"The fat woman stopped squarely in the car door and she filled the entire space. Then she braced herself, took a long breath and exclaimed in tones which could be heard as far away as the "little depot":

"You're a liar."

She did not repeat it. She said not another word, but it was quite sufficient. "That's pretty plain," said the conductor, meekly, as the fat woman leisurely left the car. Everybody laughed. Even a dog, which had run out to bark, hesitated, curled one lip and trotted away.

### CIRCULATION STILL GROWING.

Nearly 6,500 Books Were Drawn from the Carnegie Library Last Month.

The Carnegie Public Library is having a constant growth in circulation of books for home reading. New cards are being issued every day. The circulation for home reading in October was 6,460, a gain of 663 over the corresponding month last year, and 1,010 over October, 1907, and 2,743 over October, 1906.

Many new books have been purchased and put in circulation during the past few months. Among the important sets recently received are "The Jesuit Relations and Allied Documents," edited by Reuben Gold Thwaites, secretary of the Historical society of Wisconsin. The set consists of seventy-three volumes. The books are now being prepared for the shelves. They are in the original French, Latin and Italian texts, with English translations and notes, illustrated by portraits, maps and facsimiles. The edition is a limited one and the management of the library considers itself very fortunate in securing a set as the supply is nearly exhausted.

Among the new books just placed upon the shelves are the following:

- Osborn—The Andean Land; two volumes.
- The New International Year Book for 1908.
- Miler—Around the World with the Battleships.
- Fuller—The Up-to-Date Sandwich Book.
- Coolidge—Between Two Rebellions.
- Aster—Self Culture.
- Stowell—A Healthy Body.
- Raymond—Dante and Collected Verse.
- Reed—Old Rose and Silver.
- Tracy—The Stowaway.
- Hume—The Disappearing Eye.
- Wiggin—Susanna and Sue.
- Warner—Your Child and Mine.
- Brady—A Corner in Coffee.
- Hichens—Bella Donna.
- Crawford—Sirabella.
- Crockett—The Iron Lord.
- Jerome—They and I.
- Pemberton—The Fortunate Prisoner.
- Post—The Title Market.
- Hopper—The Trimming of Gossie.
- Kipling—Actions and Reactions.
- MacNaughton—The Expensive Miss DuCane.
- Cabot—The Man Without a Shadow.
- Eaton—The Runaway Place.
- Higgins—Tract Number 3377.
- Kaufman—The Stolen Throne.
- Sinclair—The Long Shadow.
- Wells—The One.
- Harben—The Redemption of Kenneth Galt.
- Smith—The Stolen Signet.
- Vance—The Romance of Terrence

### NECESSARY HUMAN FUEL.

Dr. Wiley, Eminent Food Expert, Tells What is Required to Keep Man's Machinery in Effective Operation.

In relation to the discussion as to whether Dr. Cook could have carried enough food to the North Pole to support himself, his two Eskimos and his dogs while on the way there, one of the most interesting statements in connection with the controversy was made by Dr. Harvey W. Wiley, the government's food expert, in a conversation with a Washington Post reporter.

Dr. Wiley says that a man can live on 1 per cent of his weight in dry food a day. So can his dogs. When asked to comment on just how much food people who lead strenuous lives ought to eat, Dr. Wiley was full of scientific facts, and, aside from an occasional witty remark, he forgot for the time his ability to make fun, and stuck to the bare facts.

"How much does a person need to eat?" was the first question put by the reporter.

"Nothing," was Dr. Wiley's terse rejoinder. But he added, "At least, that is what I understand the suffragettes are doing, and still live."

"But as to scientific facts. An average man of, say, 150 pounds weight, who is employed at gentle labor—that is, one who takes a certain amount of exercise each day—requires about 3,000 calories a day. Calorie is a unit of measurement of heat, and is so distributed as to consist of one-fourth of protein, one-fourth of fat, and the remaining one-half of starch or sugar. A man who is employed in hard labor requires 4,000 or 5,000 calories, while the sedentary man needs but from 2,000 to 2,500 calories a day."

"Does the quantity differ in the various climates?" asked the reporter.

"To a certain extent. A man working indoors, one who does not have to withstand the cold, naturally needs less food than the one fighting cold. And in the same way a man in the tropics needs less than a man in a very cold climate."

"And what constitutes a calorie?"

"Another way of expressing it is to say that a man needs 1 per cent of his

weight a day in dry food. That is, food minus the water. To get that amount means that he must eat about four and a half pounds of foods a day, which includes coffee, milk, beer and the other beverages he usually drinks.

"The food a man usually eats is termed wet food, while an example of dry foods is 'penmican.' That food, made up as it is of dried meat, raisins and sugar which, when thoroughly dried is placed in boiling tallow until the grease permeates to every part, is practically all dry food, the per cent of water being exceptionally small. It also contains most nourishing ingredients. Of the three things that go to make heat, fat is the greatest, having double the quantity that either sugar or starch contains for the same weight. The protein of nitrogenous foods occupy a middle class in the amount of heat they furnish.

"The human system is but an engine run by fuel, just as are other engines. In the human engine, food and not wood is required. The heat of the body may be used in walking, or any exercise, or in thinking, and the engine must be fed according to the amount of work required of it. When a person does not eat sufficiently, he begins to eat from his body, and consequently begins to get thin. I could get thin myself if I cut my allowance of food in half."

"And the penmican?"

"Penmican is a food that could not be eaten always without destruction to the digestive organs. It is sufficient for an emergency, but not as a permanent diet."

"And how long could the emergency last?" inquired the reporter.

"Well, penmican would serve as sufficient food for an emergency, and as long as that emergency might last."

"And the requirement for dogs?"

"The per cent would be the same in their case as in that of a human being. Eskimo dogs, I believe, weigh about 40 pounds. Therefore, a quarter of a pound a day would suffice for their needs. I understand that Commander Peary in his dash for the Pole ate one stage-gave each of his dogs four pounds. For a human being that would have amounted to about 15 pounds of dry food, or 60 of the wet, which would assuredly have disagreed with him. With the dogs,

however, it is different. Those animals are accustomed to eating a large quantity at one time, and then not taking any more for two or three days. But about a quarter of a pound of penmican a day would be sufficient food to enable them to pull sledges, and such a large quantity as that given by Commander Peary might have caused trouble."

### THANATOPSIS.

So live that when thy summons comes to join the innumerable caravan, which moves to that mysterious realm, where each shall take his chamber in the silent halls of death. Then go not, like the quarry-slave at night, Seized to his dungeon; but, sustained and soothed by an unflinching trust, approach thy grave Like one who wraps the drapery of his couch About him, and lies down to pleasant dreams. —Bryant.

## ISHPEMING

### ISHPEMING IN BRIEF.

Frank P. Needham and wife entertained the members of the Grace church choir at the Guild Hall Wednesday evening.

Miss F. Pansy Milden will arrive home the early part of next week from a visit at Cassopolis, South Bend and Chicago.

F. Heindel, in charge of N. E. Skud's dry goods department, is spending a few days at Saginaw, Mich., where he was called on account of the critical illness of his mother.

The Manhattan club, which recently completed a shack near Teal Lake, opened it Thursday evening. A number of friends of the members were present.

John Dillon, Jr., of West Johnson street, is suffering from a fractured forearm, caused by a fall while he was running on the railway track near his home. The lad is fourteen years of age.

At the morning service tomorrow at the Salisbury Methodist church Rev. L. C. Finch will preach on the subject, "True Evidence." At the evening service his subject will be "Fourteen Ways to Hell."

Will Donette has taken a position as traveling sales agent for the Leslie-Judge Publishing company. After canvassing Ishpeming thoroughly he will visit other towns in this section. He is meeting with splendid success here.

Miss Signe Smoller and Fred Madock, the latter of Negawane, were married Tuesday evening at the Mitchell Methodist church parsonage, in Negawane, by Rev. P. C. Plannett, the pastor.

The program for the men's meeting at the Young Men's Christian association's building tomorrow afternoon, commencing at 7 o'clock, will consist of music by the orchestra, selections by a mixed quartet, and piano solos.

James Wall, passenger conductor on the Chicago & Northwestern system, received a telegram yesterday morning advising him that he was a grandfather, a son having been born to his son, Will, and wife, who live at Pleasant, Wis.

The time of holding the evening service at the Presbyterian church has been changed from 7:30 to 7 o'clock. Congressman H. O. Young will speak tomorrow evening under auspices of the Men's Sunday Evening club. He will talk on his recent trip to Honolulu.

The quarterly meeting with reference to financial questions. Most of the great financial operations of the country have been in the hands of men whose chief objects were the making of money or the gaining of power or both. The great banks they have made possible often have seemed simple and unassuming. Great banks have not been made up by great bankers and the rapid developments in high finance have not produced trained economists. The United States has no hereditary banking class, as in England, France and Germany, and her leading men who have been eminent in economics as they have been successful in business make a class so small as not to be recognized.

It would be doing injustice to Director Andrew to suggest that the leaders of the congress have called him in as a doctor who would cure the fiscal ills of the nation. On the contrary, it was rather to head an investigation, to make a diagnosis as it were, than to prescribe that this college professor was requested to assist the government in its financial difficulties. When the credit of the country broke down in 1907, the politicians realized that this must not happen again. Senator Aldrich patched up an emergency currency bill to hold the legislative situation in statu quo for half a dozen years or so, and then organized the National Monetary commission to devise a plan of permanent relief. The leaders made up their minds that whatever legislation resulted, it must be intelligent and comprehensive. They were inspired wholly by patriotic motives, but they were ignorant and new to the work. Professor Andrew, at Harvard, therefore was employed to assist the commission in its researches and has travelled abroad with the members for that purpose. The commission determined also that it should not be enough that its own members were convinced that new financial system should be framed. They realized that the country must be educated in finance and shown the wisdom of the plan which the commission might recommend to congress. The life of the commission is six years, and many of its members would prefer to occupy all that time in study and discussion rather than try to force through congress a plan which public sentiment would not understand and approve.

### Greatest Banking History.

The first results of the work of Professor Andrew and the gentlemen associated with him will be seen in the publication of some thirty volumes of researches in finance soon to be published under the auspices of the National Monetary commission. About twenty of these books are in press and the remainder in preparation. They will present, first, a complete history of American banking, in all its phases, state and national, and the laws pertaining thereto. The Canadian and European systems will be fully discussed by an expert. The history of the first bank of the United States, for example, will be written by Dr. J. T. Holdsworth of the University of Pittsburgh.

Davis R. Dewey of the Massachusetts Institute of Technology will describe the second bank of the United States and will contribute also a history of the state banks before the Civil War. Dr. O. M. W. Sprague will present the history of Crises Under the National Banking System." Charles A. Conant will write the banking history of Belgium. The authors throughout are of a like grade, while the subjects have been so classified and subdivided that the whole will present the most complete history of banking ever written. All this work is being done under the direction of Professor Andrew, who thus may be said to be the editorial supervisor in this great educational campaign. These volumes will be made available to the community in accordance with such arrangements as congress may prescribe. The Monetary commission will meet in Washington in November, and authority for the publication and distribution of the books will be asked of congress early in the session.

From what has been said of the work of the director of the mint, it should

### ANDREW AS AN EXPERT.

Why Harvard Professor Entered Service of the Government.

He Will Be Something More Than Director of the Mint—Congress Is About to Undertake the Most Important Constructive Law-Making in the Country's History and the People Must Be Educated in Finance.

Washington, Nov. 5.—If Professor A. Platt Andrew, the new director of the mint, were to be expected to make his best showing as a government official solely in the work of his position, his friends might be warranted in wondering why he should have been willing to accept government office. The duties of the director of the mint are prescribed (and circumscribed) by law. He has general supervision of the mints and assay offices, and issues two reports annually; one giving the operations of the mints and the other of the precious metals for the calendar year. This work, important as it is, has been done satisfactorily by men of much more modest equipment than the professor. Andrew, and if it were not that the government has gone to the economic department of Harvard University for a psychological moment and for a special reason, the acceptance by Professor Andrew of this relatively unimportant position might cause surprise.

### Ambitious Plan of Congress.

The truth is that congress expects to enter soon upon a period of constructive law-making perhaps unrivaled in the history of the country—certainly unmatched in its relation to the national finances. The situation is suggested by the proposition to establish a central or United States bank; but that is only one factor in the plans for a complete overhauling of the national currency and credit system, albeit the whole may be said to turn upon that. The idea is to remodel completely the fiscal system of the United States, to eliminate its archaic features and bring it into line with the best of modern practice. That this appears to suggest the institution of a central bank of issue is true; but the plan is broader than one merely so to provide for currency issues as to avoid panic. It is in pursuance of this plan that Professor Andrew has been brought to Washington to act as a consulting financial engineer.

### To Combat Public Ignorance.

One of the greatest obstacles to the progress of a scientific legislative scheme is the setting of ignorance with reference to financial questions. Most of the great financial operations of the country have been in the hands of men whose chief objects were the making of money or the gaining of power or both. The great banks they have made possible often have seemed simple and unassuming. Great banks have not been made up by great bankers and the rapid developments in high finance have not produced trained economists. The United States has no hereditary banking class, as in England, France and Germany, and her leading men who have been eminent in economics as they have been successful in business make a class so small as not to be recognized.

It would be doing injustice to Director Andrew to suggest that the leaders of the congress have called him in as a doctor who would cure the fiscal ills of the nation. On the contrary, it was rather to head an investigation, to make a diagnosis as it were, than to prescribe that this college professor was requested to assist the government in its financial difficulties. When the credit of the country broke down in 1907, the politicians realized that this must not happen again. Senator Aldrich patched up an emergency currency bill to hold the legislative situation in statu quo for half a dozen years or so, and then organized the National Monetary commission to devise a plan of permanent relief. The leaders made up their minds that whatever legislation resulted, it must be intelligent and comprehensive. They were inspired wholly by patriotic motives, but they were ignorant and new to the work. Professor Andrew, at Harvard, therefore was employed to assist the commission in its researches and has travelled abroad with the members for that purpose. The commission determined also that it should not be enough that its own members were convinced that new financial system should be framed. They realized that the country must be educated in finance and shown the wisdom of the plan which the commission might recommend to congress. The life of the commission is six years, and many of its members would prefer to occupy all that time in study and discussion rather than try to force through congress a plan which public sentiment would not understand and approve.

not be inferred that the office is an unimportant one. On the contrary, the statistical presentations made by that office are the most celebrated of their kind in the world. Professor Andrew enters upon his work with some ideas of his own, and it will be surprising no confidence to say that he will aim especially to make the reports of his office the most complete and useful of their kind that ever have been issued. The work of the office was brought to a high standard by George E. Roberts, now the head of one of the great national banks in Chicago; and, like Professor Andrew, Mr. Roberts is a strong advocate of the central bank idea. The accession of the new director of the mint is interesting in view of the fearless criticism he has written in the past of the methods of government finance. One of his most celebrated pamphlets is that which places upon Secretaries of the Treasury Lyman J. Gage and Leslie M. Shaw much of the responsibility for the financial crisis of 1907. Professor Andrew describes the exceedingly conservative policy of secretaries of the treasury in declining to dispose of surplus revenue by depositing it with the banks. Until the time of Fairchild, the public deposits seldom reached \$10,000,000 and not more than \$500,000 were entrusted to any one bank. Mr. Fairchild in desperation over the sinking up in the treasury of an immense surplus, raised the limit to \$1,000,000, and in April, 1888, the public deposits reached sixty-one millions. Secretary Windom brought the working balance down to less than twenty millions, and until the advent of Gage the historic policy of holding the government aloof from the permutations of the market was followed.

### "Shaw's Financial Antics."

Under Gage, the treasury absorbed less money than under Fairchild, but Gage almost doubled the maximum of public deposits reached under Cleveland's secretary. The National City bank of New York was allowed more than fifteen and a half millions at one time, or more than fifteen times Fairchild's allowance to any one bank. Says Professor Andrew: "The change in policy foreshadowed and initiated by Secretary Gage became a full fledged reality with Secretary Shaw. With him it became the avowed endeavor of the department to check every incipient stringency and to prevent any contraction of credit, no matter what might have been its cause. During the five years of his service the traditions of half a century were completely set aside. Mr. Shaw apparently could conceive of but three evils in the financial world, high interest rates, a decline in the prices of stocks, and a contraction of credit, but these evils, in his opinion, were so serious that they were to be corrected at whatever cost. Whenever any of these evils seemed imminent, nothing could prevent him from forestalling them."

### In the stringency of 1902, Shaw anticipated interest payments and bought bonds in the open market, and when this scheme failed to bring down the interest rates he offered to accept other than government bonds as security for deposits of public money, and also informed the depositary banks that they need no longer keep cash reserves against their holdings of public funds. This last ruling alone would have warranted a credit expansion of ninety millions deposited in New York. The New York Clearing House association declined the offer and continued the old reserve.

When Mr. Fairchild and Mr. Gage had made large deposits with the banks they had merely allowed the internal revenue to accumulate there as it was collected. Mr. Shaw bettered this slow process by announcing, in 1903, that money could be transferred en bloc from the treasury vaults to the banks; and he added that his hand on hand about thirty-eight millions if the banks should need the money. In the fall of that year the government deposits rose to one hundred and sixty-eight millions. For whatever reason, Mr. Shaw did not go to the assistance of the banks in 1905, but in 1906, when there were unmistakable signs of impending contraction, he started in again. At first he allowed the banks to import gold and count it in transit as part of its reserve, and later he announced that he would deposit government money with banks which engaged to import gold, so that interest would not be lost during the period of shipment. Twice the National City bank of New York was aided with enormous deposits, once of thirty-one and again of twenty-five millions.

WHEN THEY WERE TWENTY-ONE.

What Some of the Wellknown Men of Today Were Doing at the Time They Reached their Majority.

At the age of twenty-one William Howard Taft was graduated from Yale and second in a large class. He was a student in the Phi Beta Kappa honor society, and divided the first prize on his graduation in law. His plans for the future study of law were undertaken the same year.

In his twenty-first year the future Rear Admiral Evans was serving as lieutenant commander.

At twenty-one William Dean Howells was an active newspaper man in a small Ohio community. He entered his father's newspaper office, worked first as a compositor, later occupying an editorial position. He was appointed news editor of the local paper in his twenty-second year. His appointment as editor to Venice followed two years later.

After graduating from the English High school of Boston, J. P. Morgan went abroad to study higher mathematics at the University of Göttingen. He returned to New York, says the Philadelphia Ledger, and began his business career just before reaching his twenty-first year.

In his twenty-first year August Belmont was graduated from Harvard. He spent several months thereafter in a trip abroad, when he returned to New York and entered his father's banking house.

Following his academic education Nelson W. Aldrich plunged into mercantile pursuits. He was an ardent Republican from his first vote, and early took an active part in local politics. He became president of the common council of Providence shortly after reaching his majority.

Joseph G. Cannon was busily engaged in studying law in his twenty-first year, and for several years thereafter. He had an education in the common schools and in law, he was admitted to the Illinois bar.

Long before his twenty-first year, John D. Rockefeller was well established in business, and had given evidence of his genius for organization. He went to Cleveland when fifteen years old and obtained his first position. Two years later he was engaged in an oil commission house. At twenty-one he was partner in the commission house of Charles & Rockefeller, which he had been established for more than two years.

James J. Hill was educated with the idea of becoming a physician. His father's death compelled him to enter business, when he obtained a position in a country store at the age of eighteen. Later he moved to St. Paul, and in his twenty-first year was engaged as shipping clerk in that city, with the Mississippi Packet company.

First as a school teacher, then printer, Hudson Maxim fought his way against unusual odds. By the time he had reached his twenty-first year he had become a printer and publisher of subscription books, and in selling these he

BACK FROM CANADA.

L. E. Chaussee and wife, who were called to Montreal, Canada, about ten days ago on account of the critical illness of Mr. Chaussee's mother, arrived home yesterday. They reached Montreal just three hours before Mrs. Chaussee passed away. The deceased had celebrated her eightieth birthday last June. She had been a resident of Canada the greater part of her life, but she had spent only the last four years at Montreal.

Montreal is booming, Mr. Chaussee said yesterday, and the city never before looked as prosperous as it does now. Much building is going on and many substantial improvements are being made. The city is widening a number of the more important streets and is paying liberally for the ground taken over. In many places it has been necessary to remove a portion of the buildings. Mechanics and laborers are receiving about the same wages in Montreal as they are here. Carpenters working under the union scale are paid thirty-five cents an hour, and brick layers and stone masons receive sixty cents. The mechanics are working eight hours a day. The cost of living, Mr. Chaussee stated, is no cheaper in Montreal than it is here, but hard coal is being sold at \$6.50 per ton, compared with \$7.85 here. Hard coal is duty free, because of none being produced in Canada. Practically all of the coal is shipped to Montreal from Pennsylvania by rail.

Charles M. Schwab started to earn his living as a farm hand. Next he became the driver of a coach, and later a clerk in a grocery store. At nineteen he became a civil engineer's assistant at \$1 a day. At twenty-one young Schwab was working hard in the field with an engineer corps. Five years later he was appointed chief assistant of the division engineer and under his direction the famous plant at Homestead was built.

Leaving school when but eight years old, Robert Collier was forced to seek a dry goods commission house in Baltimore. He had saved enough money by his nineteenth year to come to New York. He entered business actively and became a member of the stock exchange in his twenty-fourth year.

The study of law was engaging the mind of Joseph H. Choate in his twenty-first year, and for several years thereafter. He was graduated at twenty-one from Harvard, with Phi Beta Kappa honors, and entered the law school at Harvard, where he graduated with the degree of LL. B. at twenty-two.

A variety of occupations had been followed by Samuel L. Clemens before he had reached his twenty-first year. The greater part of this time had been spent in a printing office, where he became an expert compositor. At the age of twenty-one he was threading the difficult channels of the Mississippi river as a regular licensed pilot. His newspaper career followed.

TREATING TREE WOUNDS.

Plastic slate, that is to say mouldable slate, is a mixture formed by combining about one part of coal tar and four parts of slate dust and is recommended for covering large wounds in trees. This mass must be about the consistency of a not too thick glazier's putty, so that it can be pulled and rolled out in the hand. Slate dust can easily be made by crushing small pieces of slate. The mass sticks to wood, to metal, to stone, and in fact to everything that is not greasy and does not give opening air-float. Scientific American.

There is one mill in Minneapolis that turns out between 17,000 and 18,000 barrels of flour each day.

FREE TO YOU—MY SISTER

Free to You and Every Sister Suffering from Women's Ailments. I am a woman. I know woman's sufferings. I have found the cure. I will make free of any charge, my home treatment with full instructions to any sufferer from woman's ailments. I want to tell all women about this cure—you, my reader, for yourself, your daughter, your mother, or your sister. I want to tell you how to cure yourselves at home without the help of a doctor. Men cannot understand women's sufferings. What women know from experience, we know better than any doctor. I know that my home treatment is a safe and sure cure for Leucorrhoea or White Discharge, Uterine Displacement, Falling of the Womb, Profuse, Scanty or Painful Periods, Uterine or Ovarian Tumors or Growths, also pains in the head, back and bowels, bearing down feelings, nervousness, creeping feeling up the spine, melancholy, desire to cry, hot flashes, weakness, kidney and bladder troubles, where caused by weaknesses peculiar to our sex. I want to send you a complete ten day's treatment entirely free to prove to you that you can cure yourself at home, easily, quickly and surely. Remember, that it will cost you nothing to give the treatment a complete trial; and if you should wish to continue, it will cost you only about 12 cents a week, or less than two cents a day. It will not interfere with your work or occupation. Just send me your name and address, tell me how you suffer, and I will send you my free of cost, my book—"WOMAN'S OWN MEDICAL ADVISER," with explanatory illustrations showing why women suffer, and how they can easily cure themselves at home. Every woman should have it, and learn to think for herself. Then when the doctor says—"You must have an operation," you can decide for yourself. Thousands of women have cured themselves with my home remedy. I cure all old or young. To Mothers of Daughters, I will explain a simple home treatment, which speedily and effectively cures Leucorrhoea, Green Sicknes and Painful or Irregular Menstruation in Young Ladies. Plunness and health always results from its use. Wherever you live, I can refer you to ladies of your own locality who know and will gladly tell you any sufferer that this Home Treatment really cures all women's diseases, and makes women well, strong, plump and robust. Just send me your address, and the free ten day's treatment is yours, also the book. Write today, as you may not see this offer again. Address MRS. M. SUMMERS, Box H. Notre Dame, Ind., U. S. A.

Negaunee Department

IRON STREET IS TO RECEIVE ATTENTION

COUNCIL INSTRUCTS COMMITTEE TO ARRANGE WITH MANAGERS OF TELEPHONE AND STREET RAILWAY SYSTEMS TO REMOVE ALL POLES.

The proposed improvements on Iron street were discussed by members of the council Thursday evening, and it was decided to begin work the first thing next spring. The committee on streets and highways and the board of public works were instructed to confer with the managers of the Marquette County and the Bell Telephone companies, also the Marquette County Gas & Electric company, relative to the removal of poles from the street.

It was practically decided to give the street a dressing of crushed rock, also to put in concrete gutters from Pioneer avenue to Cyr street. The councilmen want the work done in a most thorough manner, and the opinion was expressed that much of the gravel should be removed, in order to permit the spreading of three courses of crushed rock, each from three to six inches in depth. This, when thoroughly rolled, will make an exceptionally fine street.

Besides regarding the removal of the telephone and gas poles, for the time being, the council will also ask the Marquette County Gas & Electric company to put in new rails the entire length of Iron street.

The committee on streets and highways reported that \$1,043.73 had been expended on the streets and roads leading to the locations last month. The cutting down and macadamizing of Park street cost \$47,150, and the filling of Heintz street cost \$102. It required an expenditure of \$105 to remove the mud from the street and gutters; for the operation of the crusher, \$282.68 was expended and it cost \$34 to open the road for the farmers back of the Buffalo mine. The other items of expense included cleaning alleys, repairing culverts, street repaving, filling in Rock street, cleaning out creeks and hauling ashes on East Lake avenue.

The purchasing committee, together with the committee on fire department, was instructed to purchase six smoke detectors, also two meters for the fire department. These articles were requested by Chief Johnson.

The sewer committee presented a profile of a proposed extension of twelve-inch pipe on Ann street, for a length of 300 feet. It places the trench well below twenty feet in depth. It is not likely that the work will be done this fall. The committee's report was adopted.

Superintendent Willman of the board of public works was instructed to grade and repave from Ann street, for the length of 300 feet, the street leading to the Consolidated Fuel & Lumber company and the Superior Lumber company each submitted bills of \$7.85 per ton for hard coal for the ensuing year.

The bids were referred to the purchasing committee with power to act.

The committee on lighting, together with the board of public works and city attorney, were instructed to adjust a misunderstanding relative to the wiring of the new high school building, due to the fact that the board of education desired not to install a fire alarm system after the contract for the wiring had been let.

CHOIR CONCERT TONIGHT.

The choir of the Mitchell Methodist church will give a concert this evening in the church parlors. The admission will be twenty-five cents for adults and ten for children. The program will be as follows:

- Choir, Mr. Richards. Violin Solo (selected), Mrs. John Toms. Cornet Solo, Mr. E. Hawke. Vocal Solo, Miss M. Cornish. Recitation, Mr. Levettson. Vocal Solo, Mrs. W. H. Bath. Vocal Solo (selected), Dr. E. G. Robbins. Recitation, John Pascoe. Vocal Solo, Miss M. Richards. Piano Solo, Miss Erickson. Vocal Duet, Misses M. and B. Cornish. Recitation, Miss B. Willis. Piano Solo, Miss Quayle. Vocal Solo, Mr. E. Hawke. Accompanist, Mrs. Haines, Miss M. Richards and Miss M. Cornish.

KILLS HER FOE OF 20 YEARS.

"The most mercurial enemy I had for 20 years," declares Mrs. James Dunan of Haynesville, Mo., "was Dyspepsia. I suffered intensely after eating or drinking and could scarcely sleep. After many remedies had failed and several doctors gave me up I tried tried Electric Bitters, which cured me completely. Now I can eat anything. I am 70 years old and am overjoyed to get my health and strength back again. For indigestion, loss of appetite, kidney trouble, lame back, female complaints, it's unequalled. Only 50c at The Staffed Drug Co.

In one portion of the grove there are ten trees each of which bears more than twenty-five feet and more than seventy with a diameter of from fifteen to twenty-five feet. The bark is from six inches to two feet in thickness, and the trees are so hard that forest fires produce almost no effect on them. Indeed, they are almost indestructible, except by man, and if saved from the ravages of the lumberman there is no reason to doubt that they will live for many centuries to come.

But the necessity for such protection is revealed in the statement that each of these big trees contains as much lumber as is ordinarily grown on fifteen or twenty acres of timber land. The Calaveras grove was in the possession of a Minnesota lumber concern operating mills on the Pacific coast, and the government obtained possession by trading an equal amount of other timber situated on the forest reserves.—Boston Globe.

NEARLY 8,000 LIGHTS.

Business of the Municipal Lighting Plant Continues to Grow.

W. H. Mitchell, clerk of the board of public works, submitted a report to the council at its meeting Thursday evening to the effect that the receipts for September were \$1,893.62, compared with \$1,731.84, in the corresponding month last year. A total of 149 lamps were added to the incandescent circuit, bringing the number in use up to 7,756. In addition to these there are sixty-four arc lights on the street circuit, also eleven commercial arcs.

Superintendent Willman, in his monthly statement to the council, reported that 189 tons 1,470 pounds of coal were consumed last month in the operation of the lighting plant. The cost of this, together with the cost of the waste, etc. used, brought the operating expenses, exclusive of labor, to \$769.21. In October last year 138 tons of coal were consumed. The number of kilowatts generated in the operation of the incandescent circuit was 48,200, and for the street circuit, 6,747. For the incandescent circuit in October last year 26,300 kilowatts were generated.

A total of 138 tons of coal was necessary for the operation of the water works plant. This, together with the cost of the oil and waste, brought the expenses to \$560.00. In October last year ninety-five tons and 985 pounds of coal were consumed. The average number of strokes in each twenty-four hours registered by the pump last month was 37,986, compared with 33,014 in October last year.

Sweet and boiled cider at Haupt's grocery. (11-1-t)

GIVEN A RECEPTION.

Former Negaunee Pastor and Wife Welcomed to Ironwood.

Rev. W. B. Coombe, former pastor of the Mitchell Methodist church, and wife, who left here about three weeks ago for Ironwood, were recently tendered a reception by the members of the Methodist congregation there. The Ironwood News-Record said of the function: "On Tuesday evening last the Rev. and Mrs. W. B. Coombe were tendered a reception at the First Methodist church. A goodly number assembled. A short musical program was given, including a chorus by the choir and solos by Miss Coombe and Mrs. Coombe, and Willie Hooper, all of which were well received. The president of the Methodist Brotherhood, John H. Speare, delivered the address of welcome. He said in part:

"We were surprised to have a change in pastors this year. We fully expected Bro. Palmer would have been returned to us, but as the change was inevitable, there is no pastor in this district whom we would rather have had appointed here than you, Bro. Coombe. Hence we heartily welcome you and your wife, and bespeak for you a pleasant and profitable time among us."

"Mr. Coombe in response said it was just as much of a surprise to him to be sent here as it was to the people of the Ironwood church, as he expected to be returned to Negaunee for the fifth year. The promotion of Mr. Palmer necessitates a number of changes. He mentioned the fact that he had met a goodly number of people here from the parish of St. Agnes, Cornwall, his native parish, and as the people of the church had given him such a cordial welcome he had been to feel quite at home."

Mr. Coombe said "it was at the service of the people of the church at any and all times, and said that the late string of the parsonage door always hangs on the outside."

"The chairman, F. W. May, observed that the parish of St. Agnes had turned out more preachers than any other in Cornwall, there being a record of forty-three having gone out to preach from that parish, and declared that it is an acknowledged fact that Cornwall has graduated more preachers than any other county in the world. Conspicuous among them was Bishop Bart, Dr. Daws, and the district's own superintendent, Mr. Pascoe."

Miss M. E. Crane will be at the Breeding House with a beautiful line of needle work on Friday and Saturday, Nov. 5 and 6. (11-4-3t)

Foley's Kidney Remedy will cure any case of kidney or bladder trouble that is not beyond the reach of medicine. Cures backache and irregularities that if neglected might result in Bright's disease or diabetes. Sold by all druggists.

### MILKMAN'S SIDE OF MILK QUESTION

F. H. VANDENBOOM DISCUSSES PROBLEM NOW BEING THRASHED OUT BY THE COUNCIL.

### SANITATION MOST IMPORTANT

Would Require Dairy Product to Be Cooled and Bottled but Would Not Force Tuberculin Test.

In order to get at the milkman's side of the milk question, F. H. Vandenberg, proprietor of the Marquette City dairy, was interviewed yesterday...

"My views on the milk question are very similar to those of State Inspector Hull, who was in Marquette this summer," said Mr. Vandenberg...

"On the other hand, I believe it is business policy for every dairyman to have his herd tested and free from tubercular stock and for that reason I keep my herd in that condition. Not only does that practice insure the good health of the herd but in order to maintain the reputation of a first class dairy, public sentiment demands that the cattle shall have been subjected to the tuberculin test and found free from the disease."

"Public sentiment is really the key to the whole situation, after all. When the public demands milk from tested herds and refuses to buy the product of herds that have not been tested, the dairyman will soon be forced to bring their herds up to that standard. Until public sentiment makes such a demand, it would be next to impossible to enforce any such requirement and the law would be apt to become a dead letter. Such an ordinance would also put the milkmen in a bad humor and they might decide upon retaliatory measures, such as refusing to supply the city with milk at all or making a substantial raise in the price. Though I am prepared to meet any requirement the council may decide to make, I am firmly of the opinion that much more will be accomplished by an organized and awakened public sentiment than by legislation."

"I should like to see an ordinance passed requiring that all cow stables must be properly ventilated and lighted and kept in a sanitary condition; the milk be drawn and handled in a sanitary manner; that it be cooled immediately to a temperature between 35 and 50 degrees and delivered to the customer at the same temperature, and that it be delivered only in sealed bottles, which have been cleaned with boiling water before filling. If these requirements were rigorously enforced, the city of Marquette need have little to fear regarding the safety and purity of its milk supply."

The Nov. 5 issue of Board's Dairyman, which has been designated as the dairyman's Bible, contains the following discussion of bovine tuberculosis and the accuracy of the tuberculin test:

"It is true that the best authorities claim that the tuberculin test is not infallible. On the other hand, they hold that it is the best method we have for determining whether an animal has tuberculosis or not. When the test is applied by men of understanding, it is accurate ninety-nine times out of a hundred, which of course makes it a very reliable test. There are conditions as are mentioned by our correspondent in which the test will fail to work. This is where the judgment of the veterinarian or person who uses the test must be brought into action, for unless a cow is in perfectly normal condition and handled in a proper manner, there is danger of the test indicating that an animal is tuberculous when she is well. But the fact that men misuse the test and are not competent to apply it properly does not necessarily detract from its value as a means of revealing tuberculosis."

"A year or two ago, Dr. Koch made a statement which led people to believe that bovine tuberculosis was not communicable to human beings. At the last tuberculosis conference, held in Washington, D. C., Dr. Koch denied that he ever made a positive statement that bovine tuberculosis was not communicable to human beings. As near as we can gather from his statements, he takes the position that bovine tuberculosis is communicable to human beings but not as infectious as some scientists would have us believe. We might add that he is a strong advocate of the tuberculin test and believes that the dairymen should do everything in their power to eradicate tuberculosis from their herds. We take the position that the dairymen cannot afford to wait for the board of health to demand the tuberculin testing of their herds. We believe the protection of the health of the herd if for no other reason, warrants a man to apply the tuberculin test to his cows. Moreover if there is the slightest danger of bovine tuberculosis being communicable from animals to human beings, no reasonable man would object to doing everything in his power to eradicate the disease from his herd."

All persons having claims against the late Carl Frize are requested to send them at once to Julian Kimmel, 915 N. Fourth St. (11-6-1w)

The regular Saturday night hop will be held at Fraternity Hall tonight. Music by the Peerless orchestra.

### ESTIMATE COST OF EXTENSION.

Water Board Took Important Action at Meeting Last Evening.

At a meeting of the water board held last evening, it was decided to engage the Dunth Engineering company to make an estimate on the cost of the proposed extension of the intake about 3,000 feet farther out into the lake. The board as well as a large proportion of the public has come to the conclusion that this is the most feasible method of improving the present contaminated city water supply. This concern is to be asked to make this estimate as soon as possible and it is hoped that it may be done before many weeks have passed.

When definite figures have been obtained as to what is planned to be done and what it will cost to do it, the board will devote their efforts to holding a bonding election in order to raise the necessary funds. Owing to the city charter providing that in order to bond the city for such a purpose, a majority of all the electors must vote in its favor—not simply a majority of those voting—it is believed that the water question is a serious one. This situation was discussed last evening, and it was decided to consult with City Attorney Brown as to the best course to pursue.

A politician and business man stated yesterday that he was of the opinion that if the election could be held while the water was bad, as it usually is at the fall of the year, a majority of all the electors in the city would vote in favor of bonding the city to extend the intake. In order to accomplish this, however, he said it would be necessary to make an effort to get the vote out and the bonding question be voted on separate ballots, in case any other election was held at the same time. Altogether, the prospect of getting better water in Marquette looks brighter than it has for some time.

### EARNINGS WERE LARGE DURING SEPTEMBER

RECEIPTS OF LIGHT AND POWER COMMISSION WERE \$600 IN EXCESS OF THE SAME MONTH LAST YEAR.

The earnings of the light and power commission during the month of September were about \$600 in excess of the same month last year. The gain in residence lighting was over \$300, in business lighting over \$200 and the balance of the increase was in street lighting, power, and miscellaneous items. The most interesting item in these figures is the gain in business lighting, September being the first month for some time that there has been any considerable gain from that source. In fact, during the last year and more the monthly reports of the commission have shown smaller earnings from the business customers than for the same month of the preceding year. The reduced earnings were ascribed to the hard times, causing the business men to be more economical and the installation of tungsten lamps, which supply the same amount of light as smaller candles than the old style lamps. The increased earnings from business lights during September are not due to an increase in the number of customers but to more generous use of the current, the largest single item going to make the increase probably being earnings from the Le S. & K. and D. S. & A. docks, both of which were running nights during the month.

The most plausible reason for the \$300 increase in earnings from residence lighting is to be found in the increased number of installations, which have jumped from 1,312 to 1,763 during the year. The average amount of a residence light bill in September, 1908, was \$1.00, and in September, 1909, \$1.05. The power account is practically the same as for the previous year, the increase from the current used at the Marquette Stone company's crusher being offset by the fact that the city crusher shut down a month earlier than usual this fall.

The expenses of maintaining and operating the plant increased over \$2,200, as compared with the same month a year ago, of which increased amount \$1,700 was spent in the construction of the new concrete foundation for the steel dam, which carries the water from the dam to the water wheel.

The city lighting and power plant is valued at \$235,066.41, with a bonded indebtedness of \$53,500. The cash balance on hand Oct. 31 was \$20,728.16. A comparative report of earnings and expenditures is given below:

—Earnings—		
Sept., '09.	Sept., '08.	
Street lighting	\$ 808 78	\$ 766 15
Com. are lighting	14 05	14 05
City lighting	98 71	99 08
Business lighting	1,765 15	1,354 25
Residence lighting	1,848 60	1,513 75
Power	653 08	646 52
Miscellaneous	60 39	32 10
Total electric	\$5,229 71	\$4,626 50
—Expenses—		
Manufacturing, including flume foundation	\$2,087 19	\$ 370 73
Distribution	1,146 04	705 82
General	392 36	257 18
Interest	50 00	50 00
Total	\$3,675 59	\$1,383 45
Net income—electric	\$1,554 12	\$3,243 05

### CARD OF THANKS.

We desire in this manner to publicly express our most sincere gratitude to our many friends and neighbors, who so graciously assisted and sympathized with us in the death and burial of our beloved daughter, and especially to all who sent flowers.

OLIVER CLISH and Family.

### POULTRY SALE.

Five-month old Bull Orpington Cockerels in two well-known strains. Large flock to choose from. Prices reasonably low, considering lateness of the year. Apply early to

WALTER C. HORNSTEIN, 1925 N. Front St.

Don't kick at your Haberdasher—give it to your "Laundryman" because he doesn't protect the breaking points in starched goods. If he won't do it you should change your Laundryman.

THE CRESCENT LAUNDRY.

Favorite Base Burners are fuel savers. Ask us why. (10-23-4) KELLY HARDWARE CO.

### THEATRICAL.

"The Gentleman from Mississippi."

While witnessing the production of "The Gentleman from Mississippi" at the opera house last evening, the writer was reminded of a quotation from Goethe, the substance of which is, that a good stage can do more for a people than any amount of police or laws. "The Gentleman from Mississippi" deals with a live problem; that of political graft in high places—it is a comedy with a purpose—and it must be that fact that makes its appeal so powerful. The public likes to see real, live, present day questions handled without gloves in a masterly manner, and by fulfilling that demand Burr McIntosh's play is a tremendous success.

As for the cast, it would be hard to say too much in their praise. Mr. McIntosh, as the senator from Mississippi about whom the plot centers, and Will Deming, as the metropolitan reporter who later becomes the senator's secretary, do not play their parts—they are their parts. With the stage setting in the first act an exact reproduction of a once popular Washington hotel, from the first the audience is thinking, living and moving in the atmosphere of the capital, so well do the players throw themselves into the spirit of the theme.

Both Mr. McIntosh and Mr. Deming appear on the stage with no make-up and they seem not to be acting, but just being themselves. Every other member of the company is fully adequate to his or her part and the result is a satisfying completeness. Though Miss Moran, in the strongest feminine part, could scarcely speak above a whisper owing to a cold, her acting was so clever that it was easy to supply any lines that could not be heard.

The play was greeted by the largest house of the season. Every seat was sold early yesterday and to make more room, the orchestra was moved into the lobby in the rear. Chairs were also placed back of the parquet seats.

The production was greeted with enthusiastic applause from beginning to end and at the close of every act, the company received repeated curtain calls. Before the audience would be satisfied after the third act, Mr. McIntosh was compelled to make a brief speech in which he set off certain phases of national politics in his own inimitable, happy style. Before the curtain was finally rung down, Mr. Deming came forward to say that he had written Mr. McIntosh's speech.

"The Gentleman from Mississippi" is a play in the same class as "The Man of the Hour" and its influence toward the purification of national politics must be considerable.

For milk, cream, butter and buttermilk of superior quality, call up the Marquette City Dairy. Everything modern, sanitary and up-to-date. Bell Phone 223.
