former engagement antedated the modern muckraker, so never before has it had all its deficiencies so boldly hurled in its face.

The Marquette men and their Detroit friends will meet again for the next time at the national reunion of the Elks in July, when Detroit is going to show the assembled multiutde just how to do an Elks' convention up a beautiful brown.

In order that the forthcoming harmony convention in Wisconsin may go off with the greatest measure of success and real accomplishment, The Mining Journal suggests Senator La Follette for temporary chairman and Senator Stephenson for temporary secretary.

Much effort has been exerted to arouse interest in the voting on the water bonding proposals that will be submitted today. Every citizen entitled to the balsion obtained will not be open to the attack of not being representative. If the proper interest is manifested the total is given the credit of "trimming" vote will closely approximate 1,800.

A Republican "harmony" convention has been called for Wisconsin, to meet in Milwaukee, June 8. The call has 1.000 signers, including representatives of all factions. But if the convention can actually accomplish anything to restore harmony there will be much surprise, and no great wonder if it only makes a bad situation worse. Many a harmony convention in the past has worked out that way.

Fred W. Carpenter, who has been President Taft's private secretary, is to be appointed United States minister to Morocco. Reports that the transfer was made because Carpenter was persona non grata in the immediate neighborhood of the president were taken cognizance of by an official statement that Carpenter was giving up his old position because its demands had made serious inroads on his health, which would be benefitted n the delightful climate of Morocco. So why make a mystery out of this development, and why be at the trouble of finding an elaborate explanation of a matter that appears to be simple enough, to be sure.

The poison, the specific germs of which are breathed into the the poison through the bites of mosquitos. All however agree that MALARIA is a blood affection, and any treatment to successfully overcome it must not only purify this vital fluid, but at the same time add the necessary qualities of richness and strength to the circulation.

The malarial poison destroys large numbers of the rich, red corpuscies

A PHYSICAL WRECK.

During 1900 I was running a farm on the Mississippi River, and became so impregnated with malaria that for a year after wards I was a physical wreck. I tooka number of medicines recommend-ed as blocd purifiers, chill cures and malaria cradicators, but nothand malaris oradicators, but noth-ing did me any good until 1 began to use S.S.S., which I did about a year ago. The result was that after taking several bottles of the large size I was as well and strong as I ever was, and have never had a chill since. I expact to take S.S. every year as a preventive, and would advise everybody else to follow my example. S.R. COWLEY, Amory, Miss.

have a limited stay unless they can Checken Inter Debuster	I would take mus an and to should the	and well and the second s		the second se	

may have a limited stay unless they can now get a reappointment. But Brynes is bound to land sometime for the full term. Recent developments have clearly indicated that the Burrows crowd had failed to take Senator Smith into camp and it looks now as though Burrows had concluded that it was not worth while to make compromises with his colleague.

The condition of affairs outlined in this dispatch, if it continues, is hardly likely to be without its affect on the senatorial situation. Its natural tend-ency would be to increase Senator Smith's interest in the welfare of Representative Townsend. It has been previously pointed out that Senator Smith's interests will best be served this year by having a man from the the eastern part of the state elected senator. If Senator Burrows is reelected, the eastern part of the state will have neither of the senators, and the likelihood of a fight on Senator Smith, when his present term expires, will be increased.

The Marquette collectorship has been attracting less attention in this part of ish. the state of late, largely because it has been realized that disposal of it is now squarely up to the senators, and that the situation can no longer be affected by work done in this region. Under the Travelers. conditions existing, there is little probability that the office will be disposed Blind Mice. of before congress adjourns.

The Marquette City band will give n dance at Fraternity Hall this evening. (5.27-3d) evening.

Refrigerators That Are Built for Economy

Primarily there is only one thing for a refrigerator to do, and that is to keep food at such a temperature that it will not spoil in warm weather. The refrigerator that will accomplish this with the least possible consumption of ice, is the best refrigerator. A refrigerator must be built on scientific principles or it will fail in its mission.

Every refrigerator sold in our store has gone through an efficiency test, and we believe that each in its particular grade is the best refrigerator that will be had anywhere for the money.

Our line of high grade refrigerators are far superior to all others, as they are constructed of thoroughly seasoned hardwood, and contain eight walls of the best known non-conductors of heat and cold.

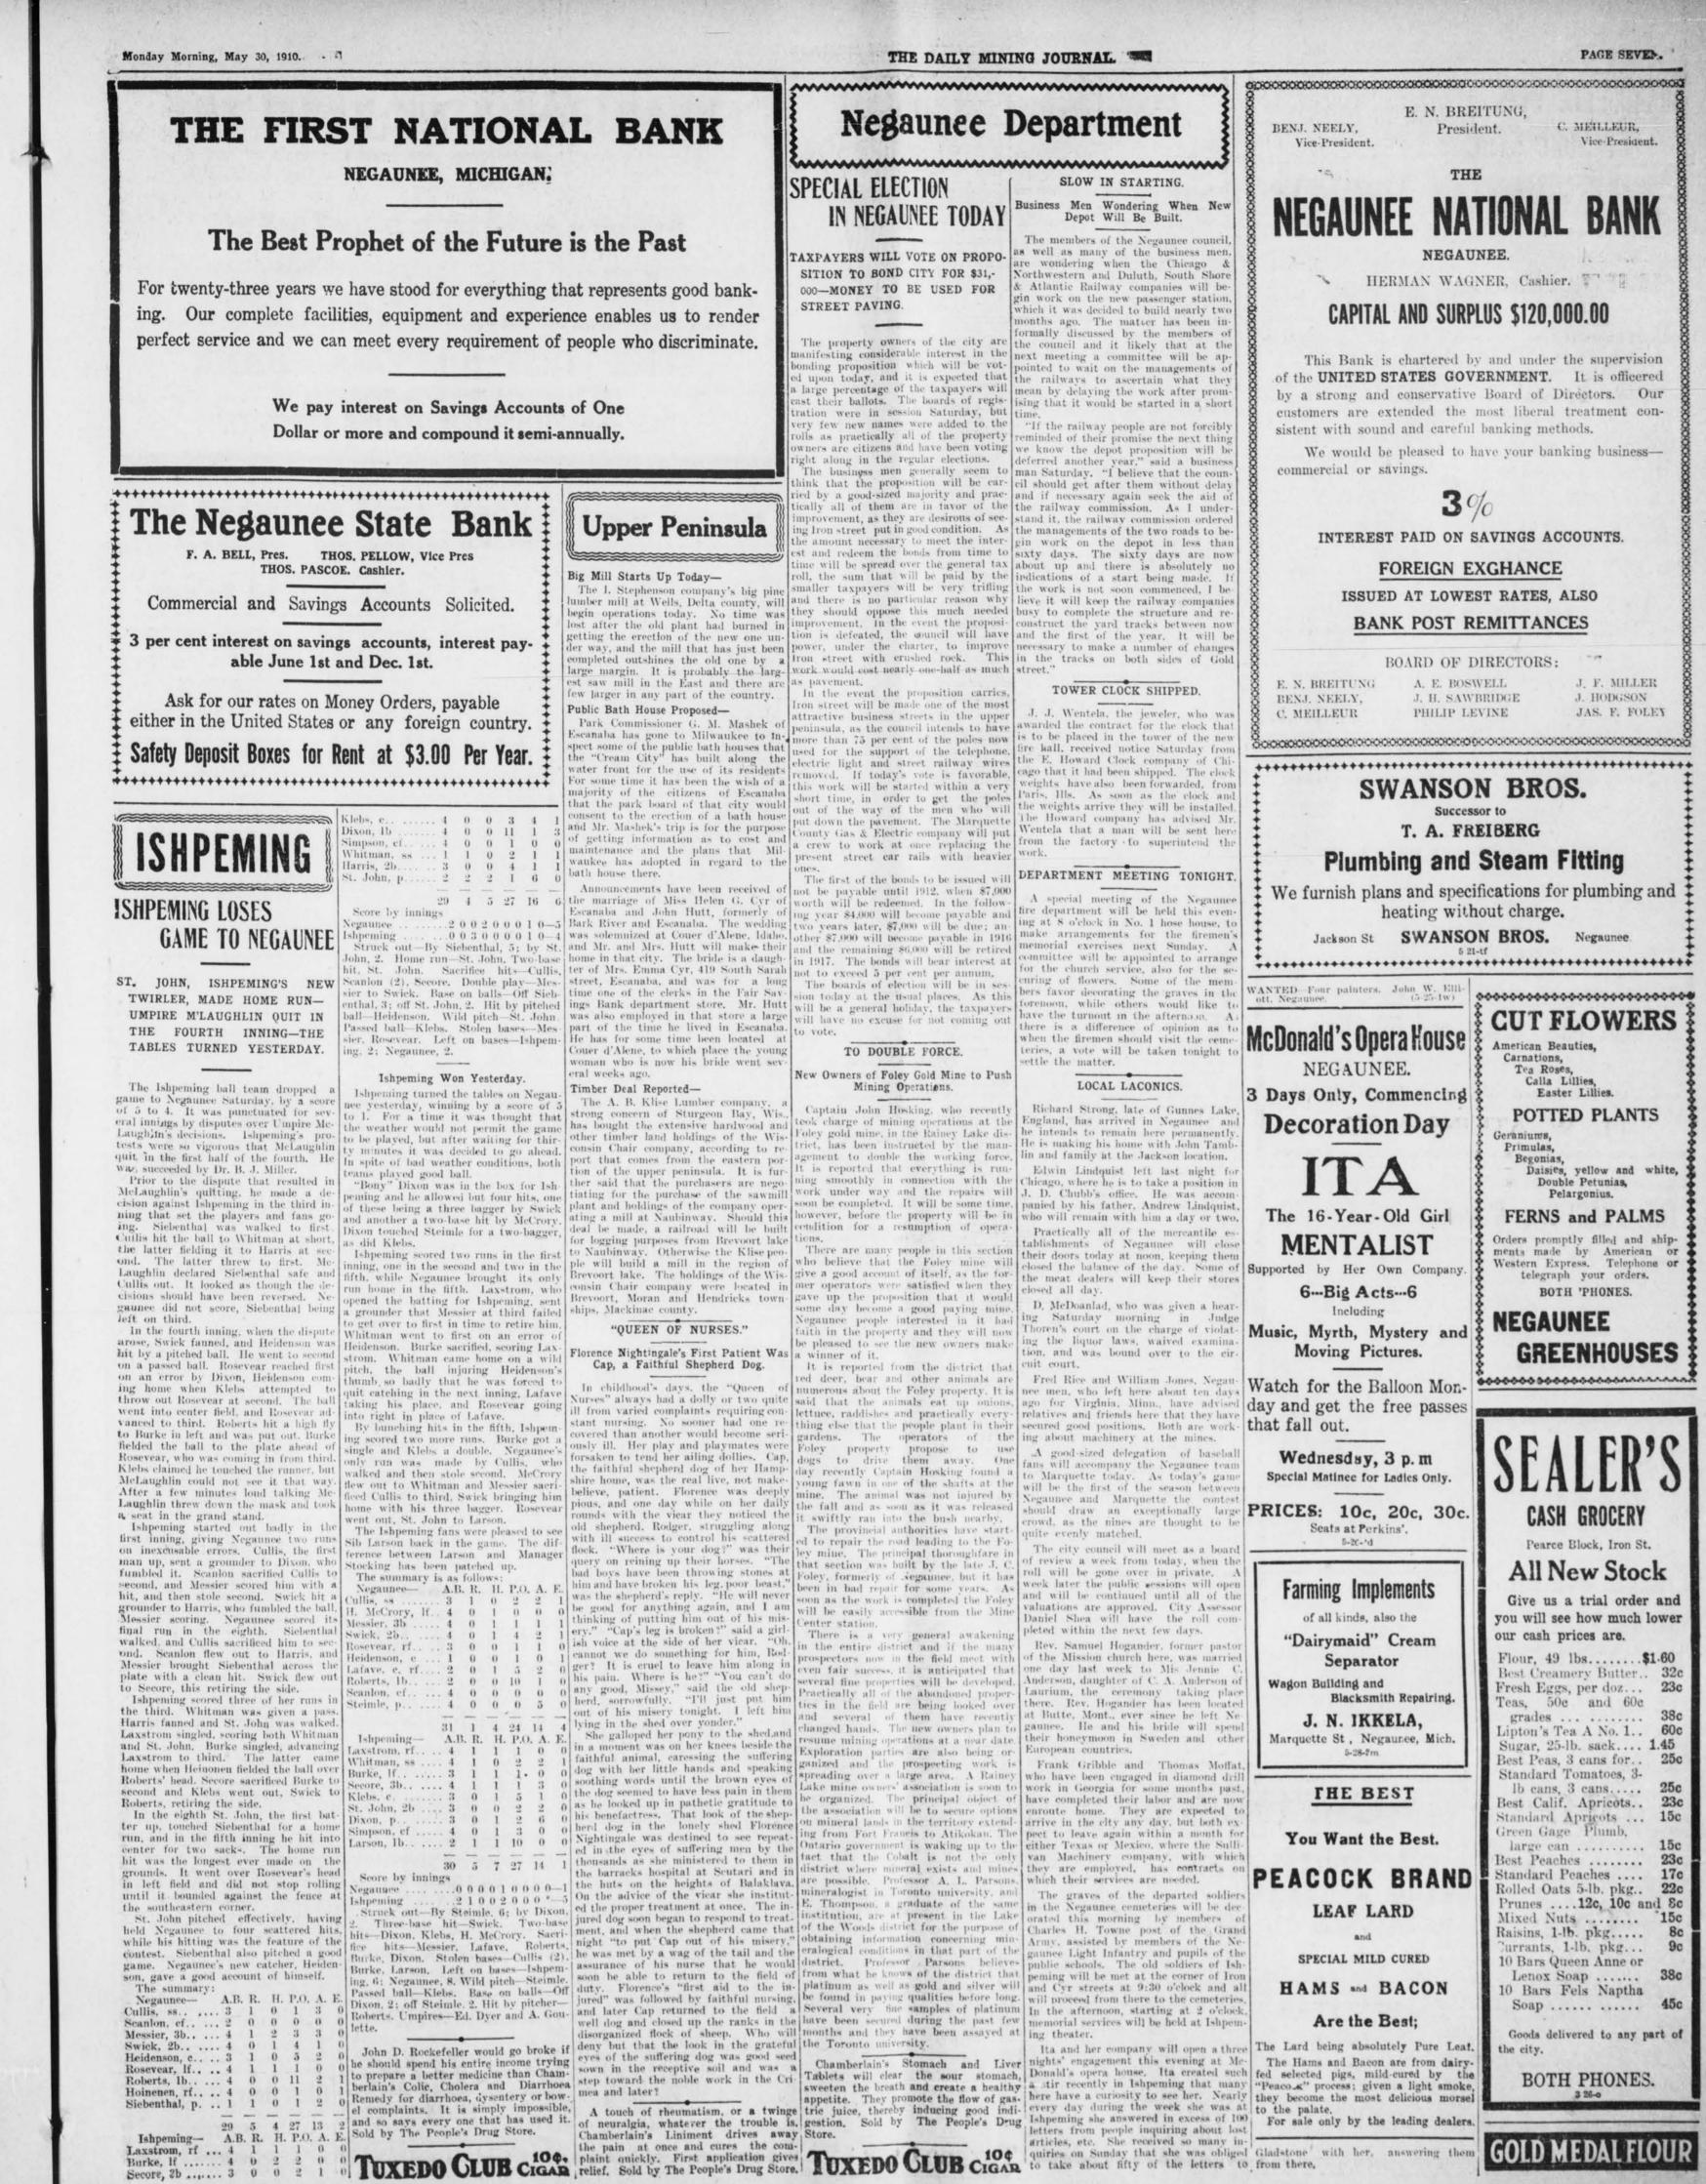

Yukon, the great Sanitary Refriger- ator; prices 15.50 to \$29	Chilkoot, the best low priced Refrig- erator on the market; prices \$15.50 to \$26.

If you don't care to pay cash, we will arrange terms to suit.

Buy the best-they cost no more than others and will give better satisfaction.
