

TELL STORY OF THRILLING AERIAL TRIP

Messrs. Hawley and Post, Aero-nauts of the Balloon America II, Arrive at Quebec, Enroute Home to New York City—Prominent Men Give Them a Dinner.

While They Say Their Lives Were Never Actually in Danger, They Consider It Fortunate They Met Trapper Maltais When They Did—Their Food Supply Short.

Quebec, Oct. 27.—Alan R. Hawley and Augustus Post, the heroes of the great balloon flight, arrived here tonight after their trying experience but mightily pleased because the cup for which they contested remains in America.

The first day after leaving the America II, at the end of their journey on the banks of the Peribonka river, Hawley's leg was injured so badly that he was laid up several hours. He has not yet entirely recovered.

He strained the limb in walking through underbrush. The doctor, Gebhardt Wilrich, American consul, and other prominent men met the party on the arrival of the train this evening and escorted them to the Hotel Frontenac, where an informal dinner was given in their honor.

Mr. Post resumed their journey to New York. Mr. Hawley said: "There never was a time when I considered our lives actually in danger, but our supply of food was very short and I consider that we were very fortunate in reaching Jacques Maltais' cabin in the woods when we did."

Post Describes the Journey. In describing the journey, Mr. Post said: "We followed a northeasterly course across the Mississippi and Missouri rivers and thence along the Illinois river into Wisconsin.

We were in a position just north of Milwaukee but over the lake. We descended so that our rope trailed in the water, but the air was light and we again rose high to get the eastern drift. That carried us up over Point Au Sable, near Ludington.

From there we rose high again and again got the easterly drift. "We crossed Lake Huron during the night and were high over Georgian bay and the country north of it.

We made the highest altitudes by easy stage. The wind had a strong drift to the northeast, and we dropped a trifle lower after passing Lake Nipissing. The wind was whipping us along at tremendous speed.

We decided to come down. The speed at which we were going, however, carried us beyond the place we had picked out. Slept in the Wilderness.

"Considering the circumstances, we made a very good landing on what we later learned was to the east of the Peribonka and near a chain of small lakes. A very heavy thunderstorm came up, and we slept in the basket that night.

The next morning it was impossible to move the balloon. We packed up for a journey on foot. We slept in the woods Thursday night. Hawley injured his leg in the afternoon. An account of this we took it easy on Friday.

"Saturday, on the shore of a small lake, we came upon the cabin of Jacques Maltais. We enjoyed his hospitality that night and the whole of the following day. Unfortunately, the cabin was short of supplies.

After explaining our situation, they readily agreed to aid us in reaching the nearest habitation. We went by canoe to Lake Blanche, where we camped Monday night. Our new-found friends caught some trout, and we enjoyed the first meal in a long time.

APPEAL IN CRIPPEN CASE MAY POSTPONE EXECUTION. London, Oct. 27.—An appeal in the Dr. Crippen case was filed today. This may necessitate the postponement of Dr. Crippen's execution.

"WHITE SLAVE" CONVENTION AT PARIS DECLARES FOR THE REPATRIATION OF WOMEN. Paris, Oct. 27.—The international white slave congress, in its session here today, adopted a resolution in favor of an international convention for the repatriation of women.

KAISER AND THE EMPRESS SPEND DAY MAKING CALLS. Brussels, Oct. 27.—The emperor and empress of Germany spent the day in this city making private calls.

BERLIN HEARS RUMORS OF A REVOLT IN GREECE.

Berlin, Oct. 27.—There was a persistent rumor in financial circles here today that a revolution had broken out at Athens. Telegraphic inquiries sent to the Greek capital this afternoon elicited no response.

CONNIE MACK IS MARRIED TO KATHERINE HALLOHAN.

Philadelphia, Oct. 27.—Cornelius McGillicuddy (Connie Mack), manager of the world's champion baseball team, was married here this morning to Miss Katherine Hallohan. The couple will tour Europe.

CHAMPION ABE ATTELL DEFEATS "BIZ" MACKKEY.

New York, Oct. 27.—"Biz" Mackkey of Cleveland proved an easy mark for Abe Attell, the featherweight champion, in their bout here tonight. After Attell had floored the Cleveland man three times in the sixth round the latter's seconds crawled into the ring and hauled Mackkey into a corner. The bout was to be ten rounds.

WRESTLER IS INDICTED FOR DOUBLE MURDER

John Burton's Strangle Hold Is Said to Have Crushed Two Men to Death.

Edwardsville, Ill., Oct. 27.—Two indictments were returned against John Burton, a professional wrestler, by the grand jury today, charging him with killing W. V. Wertz and Louis A. Weibrach. Burton, with a strangle hold, is alleged to have crushed the two men to death in a fight in a vacant house in Marine, Ill. He has been in jail here since. Bail was fixed at \$10,000.

Edwardsville, Ill., Oct. 27.—Two indictments were returned against John Burton, a professional wrestler, by the grand jury today, charging him with killing W. V. Wertz and Louis A. Weibrach. Burton, with a strangle hold, is alleged to have crushed the two men to death in a fight in a vacant house in Marine, Ill. He has been in jail here since. Bail was fixed at \$10,000.

Candy Bandit Waives His Hearing. East St. Louis, Ill., Oct. 27.—Leigh Rhodus, the "candy bandit" and self-confessed slayer of Dr. W. F. Michaelis of Chicago, was arraigned today. He waived the hearing. Justice Bell bound him over to the grand jury under \$1,000 bond in each of five cases of robbery.

Confesses to Another Murder. Chicago, Oct. 27.—The mystery which has surrounded the identity of the murderer of Anton Helbig here Aug. 7 was probably cleared today when the police received word from East St. Louis that Leigh Rhodus, in a supplemental confession to the Chicago detectives, had admitted shooting Helbig. The murder occurred two days after the shooting of Dr. Michaelis and only a few blocks from that spot.

Seven Fishers Drown in Newfoundland. St. Johns, N. F., Oct. 27.—News reached this city today of the loss yesterday of the Newfoundland fishing schooner Golden Arrow, together with her crew of seven men, in St. Mary's bay. During a heavy gale the schooner stranded on the rocky beach.

CORNELL STUDENT'S DEATH IS ATTRIBUTED TO INJURIES RECEIVED IN FOOTBALL GAME. Ithaca, N. Y., Oct. 27.—L. B. Paine of Duluth, Minn., acting captain of the Cornell freshman football team, died at the Cornell infirmary tonight from supposed internal injuries received while playing football.

Boy Who Claimed Kinship to Gladstone Is a Puzzle to the St. Louis Police. St. Louis, Oct. 27.—A nineteen-year-old youth held here for the Washington police in connection with the alleged theft of two cameras and who claimed to be a grandson of former Premier Gladstone of England developed into a mystery today. When confronted with evidence which tended to discredit his claims, the young man refused to talk.

LUTHER LEAGUE ELECTION IS HELD AT PITTSBURG. Pittsburg, Oct. 27.—The Luther League of America, which is in ninth annual convention here, today elected the following officers: President, W. E. Stahl, Philadelphia; general secretary, Luther M. Kunz, Omaha; assistant general secretary, Harry Hodges, Philadelphia; treasurer, C. T. A. Anderson, Chicago; district secretaries, Rev. C. K. Hinton of Salem, Va., Rev. P. H. Roth of Beloit, Wis., and Rev. George H. Schurr of St. Paul. There are 1,001 organizations in the country, with a membership of 48,199.

FIRE LOSS AT VICTORIA IS MORE THAN A MILLION; MANY FINE BLOCKS DESTROYED. Victoria, B. C., Oct. 27.—The fire in the business section which destroyed many of the finest blocks last night, was extinguished at noon today. The loss exceeds a million dollars.

FLIGHT AT ROME HAS A TRAGIC END

A Lieutenant of the Italian Army Is the Latest Victim to the Science of Aviation—He Falls With His Aeroplane and Is Dashed to Death.

Gale Rages at Belmont Park, Yet Some Participants in the International Meet Brave Its Dangers—Johnstone Believed to Have Gone Up 9,000 Feet.

Rome, Oct. 27.—Lieutenant Saglietti fell with a military biplane in which he was maneuvering here today, and was killed. The machine was wrecked.

New York, Oct. 27.—The fifth day of the international aviation meet, which began yesterday, spread from the New Jersey water front to Manhattan today and assumed a serious aspect. Tonight the threat of a general strike in an effort to tie up the whole metropolitan district was made by the officers of the International Brotherhood of Teamsters.

United States Steel Goes Up to Eighty. Speculative Operations for a Rise in Prices Are Resumed in Wall Street.

New York, Oct. 27.—There was a resumption of the operations for an advance in the prices of stocks in the Wall Street market today, and it was credited to speculative operations. Forces that were active in its inception, the prestige of this supposed leadership had an imposing effect on the rank and file of the professional traders, and they were inclined to follow the movement.

Wheat Loses Its Early Gain. Chicago, Oct. 27.—Wheat today closed 1/4 higher to 1/2 lower. News of a shutting down of Minneapolis flour mills made the final tone weak. The foreign market had quite a bearish front and held the bulls in check. It was asserted that France had already purchased half of the estimated import needed and that the docks at the chief ports there were over-stocked.

WIFE BRINGS SUIT AGAINST HUSBAND

Has She Right to Ask Damages for Assault?—This an Interesting Question.

Washington, Oct. 27.—If a husband beats his wife until she is bruised and bleeding, even crippled for life, should she be allowed to sue him for damages or would such suits violate the sanctity of the home and tend to break up civilization? Such a question was never brought out in open court, because before the suit came to trial the court had given judgment in favor of the accused, on the plea that at the time of the alleged assault the parties were husband and wife.

Entered as second class matter of the second class in the postoffice at Marquette, Mich.

MARQUETTE, MICH., OCT. 28.

The aviators at Belmont park find the upper air very chilly. What, pray, did they expect at the latter end of October?

Judging by the newspapers, the outcome in the First Michigan congressional district depends largely on where the voters stand on the stockings issue.

In New York in the present campaign the Democrats appear to be playing Judge Parker opposite Colonel Roosevelt. The last time they put Judge Parker in a similar role they paved the way for one of the most sweeping defeats recorded in their political annals. Will history repeat itself this year?

Vice President Sherman has gone to North Carolina to aid the Republicans in their campaign. It's a wise congressional campaign committee which has laid out a program that keeps the V. P. busy in the solid south. If he should carry North Carolina, or Alabama or Louisiana he would have accomplished something to restore his rather dimmed prestige.

Needless to say, our Democratic friends are not inclined to accept State Chairman Knox's prediction that they are confident that he will do much better, exactly as if they believed it, that he will be elected. They should remember, however, that Chairman Knox has proved himself an unusually capable political prognosticator. He had the outcome in the primaries accurately forecasted. He is in close touch with conditions in all parts of the state. His predictions are not empty bluffs. They are estimates on the probable outcome based on carefully ascertained data.

James Wilson, secretary of agriculture, has shown the attitude of his department toward the tuberculin test for cattle—a subject of much controversy between dairymen—by making an order against the sale of any milk in the buildings of the department that does not come from cattle shown by the test to be free of tuberculosis. It is estimated that 100 gallons of milk are daily delivered to the department buildings for luncheon purposes, most of which has come from dealers who have been selling milk without the guarantee that it was taken from cattle shown by the tuberculin test to be perfectly healthy. These dealers will either have to give up this business or arrange to supply milk certified to come from non-tubercular cattle. It is expected that the order will be duplicated by other departments. It is regarded as a severe blow to dealers who have undertaken to attack the tuberculin test, and who have even appeared before the department of justice in their efforts to discredit it. Secretary Wilson's order is expected to give a big impetus to the fight for pure milk in the city of Washington.

State Highway Commissioner Ely has transmitted to Governor Warner a special report on the feasibility of crushing trap rock at the Marquette prison for highway improvements throughout the state. Mr. Ely's investigations have persuaded him that the plan is practicable. Governor Warner has lately returned from Colorado, where he was greatly impressed with the system in vogue there of employing convicts on the highways. The governor evidently believes that some method of employing the convicts in connection with highway improvements can be evolved for the Marquette prison, at least, and the subject will probably be treated at length in the forthcoming report of the prison labor commission, of which he is a member. The convict labor problem will be one of the most serious and important questions put up to the next legislature, and it will claim much of its time, if it is disposed of intelligently. There are two sides to pretty nearly every proposal for the employment of the convicts, and this will appear in connection with the rock quarrying proposition, when it is thoroughly gone into.

The Republican state central committee has made public a letter received from Colonel Roosevelt in response to a telegram urging that he give at least one speaking date to Michigan, in which he warmly endorses both Mr. Osborn and Representative Townsend. The letter says in part: "I thoroughly understand, as you say, that in Michigan the progressives won a clean-cut victory and that

the platform takes a proper stand in favor of a tariff commission and conservation of natural resources and that my friend, Chase S. Osborn, the candidate for governor, is a progressive and a singularly able and honest man. Moreover I also agree with you as to the great desirability of electing Mr. Townsend as senator. Mr. Townsend, as joint author with Mr. Each of the first railroad rate bill while I was in the White House, did excellent work for railway rate legislation and I heartily wish his success as senator. It is a cause of genuine regret to me that I am not able to go and do all I can for the entire ticket in Michigan. Mr. Osborn is a man like Stimson of New York, who will clean house from cellar to garret, driving every wrongdoer from office. The effective way to prevent a thorough clean-up would be not to elect him, and indeed a failure to elect him would be a genuine calamity from the standpoint of good citizenship. Mr. Townsend's attitude on the railroad rate legislation is sufficient proof of the desirability of sending him to the senate. Michigan Republicans have nominated two progressive candidates and it is imperative that they give them aggressive support at the polls, and this can only be done by voting for the Republican candidates for the legislature."

**BALLOONISTS WELCOMED BACK.**  
Once more the country is thankful for the return to civilization of adventure-seeking aeronauts. As the days passed without definite word from Messrs. Hawley and Post, the pilots of the America II in the long distance race from St. Louis, the fear increased that they had been cast away in the wilds of Ontario, with an excellent chance that they would perish in an attempt to find their way back to civilization, or that their balloon had descended into the waters of one of the lakes, and they had perished miserably by drowning. They were, as a matter of fact, dropped into the inhospitable forests of Ontario, but, fortunately, not so far from habitations of men that they were not able slowly to report their way back to civilization and to report to their friends that all was well with them. Their exploit won for them the distinction of having made the longest flight of any of the balloons launched from St. Louis. They traveled approximately 1,350 miles, the longest flight that has ever been made on this continent. The anxiety occasioned by the disappearance of Messrs. Hawley and Post would seem to suggest the advisability of starting the annual balloon flights at some point farther south than St. Louis, then carried north by the winds, the balloonists would have opportunity to make considerable distances and still alight in settled country. It is a serious matter to send a balloon into the Ontario wilds. They are pathless forests in which it is hard to sustain life without comfortable camping arrangements and bountiful supplies. Now that the balloonists have proved that they can fly so far north it will become necessary to give some thought to their ultimate safety.

**WELL RID OF FORAKER.**  
Under the circumstances, Mr. Foraker will be little missed from the Ohio campaign, for the line of argument he was following was one of a nature to do the party more harm than good. Mr. Foraker devoted a goodly share of his addresses to a discussion of Colonel Roosevelt's "new nationalism" in an unfriendly spirit. Mr. Foraker, to be sure, has a right to any opinion he wants to hold concerning "new nationalism" or any other public question, but the men in charge of the Ohio campaign properly held that meetings arranged by the state committee to further the chances of Republican success were not the proper place for Mr. Foraker to unburden himself on this theme. It is one of the discussions of which is not germane to state issues in Ohio. Making it a subject of debate could, under no circumstances, help the party, but would be certain to breed disharmony and foment discord.

Thus the committee acted wisely in asking Mr. Foraker so to modify his addresses that they would not open up troublesome controversial questions which the party is trying to get away from, in the effort to elect Mr. Harding. Mr. Foraker, who is plainly not much interested in party success in Ohio this year, though Mr. Harding has been one of his loyal followers, refused to accept these suggestions in the spirit in which it was hoped he would take them, and has withdrawn from the campaign.

Mr. Foraker might have been a tower of strength to the party, had he followed out a line of argument designed to compose party differences, but as his purpose appeared to be, rather, to accentuate them and to bring about a bootless discussion of Colonel Roosevelt's latest political novelty—which is in no manner an issue in the Ohio campaign—the Republican managers are well rid of him, as he was certain to do more mischief than good. We fear, and the external appearances bear the fear out, that Mr. Foraker's sore ear is not entirely well, and that he can see nothing right in the world from his position outside the United States senate.

**FILES CURED IN 4 TO 14 DAYS**  
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 4 to 14 days or money refunded. 6c.

The best plaster. A piece of flannel dampened with Chamberlain's Liniment and bound on over the affected parts is superior to a plaster and costs only one-tenth as much. For sale by The People's Drug Store, S. B. Jones, prop.

**OWES HER LIFE TO**

**Lydia E. Pinkham's Vegetable Compound**

Chicago, Ill.—"I was troubled with falling and inflammation, and the doctors said I could not get well unless I had an operation. I knew I could not stand the strain of one, so I wrote to you sometime ago about my health and what to do. After taking Lydia E. Pinkham's Vegetable Compound and Blood Purifier I am today a well woman."—Mrs. WILLIAM A. BROWN, 88 W. 21st St., Chicago, Ill.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and to-day holds the record for the largest number of actual cures of female diseases of any similar medicine in the country, and thousands of voluntary testimonials are on file in the Pinkham laboratory at Lynn, Mass., from women who have been cured from almost every form of female complaints, inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration. Every such suffering woman owe it to herself to give Lydia E. Pinkham's Vegetable Compound a trial.

**IF YOU WOULD LIKE SPECIAL ADVICE** about your case write a confidential letter to Mrs. Pinkham, at Lynn, Mass. Her advice is free, and always helpful.

**HITCHECOCK AFTER POSTAL FRANK.**  
Mr. Hitchcock, the postmaster general, who has been taking a laudable interest in effecting economies in his department, and who has made considerable progress in reducing the annual deficit, has now decided to recommend the disuse of the congressional frank, and the issue, in its stead, of free stamps.

The abuse of the frank both by members of congress and by government departments has been notorious. It has been the means of loading down the mails with a non-paying burden of miscellaneous matter that has had a large part in making the postoffice department run behind. The free stamp system would be an advance, if, as is presumably the case, it would provide for a reasonably limited issue to each congressman.

It would conduce to good business management of the government's affairs if the frank were entirely done away with, and the departments, bureaus and all subdivisions of the government were required to ask for annual appropriations for postage. The result would doubtless be a much more economical use of the mails, and a less wide diffusion of government documents for which the recipients had made no request and had no possible use. This, in turn, might lessen the strain put on the public printing office. And it is within the bounds of possibility that it would mean cheaper mail contracts with the railroads, for there is always a stream of franked matter moving through the mails at the time they are weighed, to determine the compensation the railroads are to receive.

The postal frank is not only an evil in itself, but it is a contributing cause to many other evils. It is to be hoped that Mr. Hitchcock will put this before congress in a forcible manner, when he gets around to giving form to his recommendation.

**SITUATION IS SOUND.**  
The Lansing State Republican comments at some length on a recent article, published in The Mining Journal, expressing regret that Senator Smith's proposed tour of the upper peninsula had been cancelled and apprehension that unless some means of stirring the voters was found apathy in this region would result in a comparatively light vote.

The State Republican holds that the prominence given the upper peninsula on the state ticket should, in itself, be sufficient to dispel all apathy. The State Republican is right about this, too. The upper peninsula Republicans should be up on their toes this year, as they never were before. But in its comment The Mining Journal dealt with conditions rather than with theories. The apathy it commented on exists, in spite of the fact that it is inexcusable. The reasons for it have been briefly alluded to. The principal one is a general belief that the Republican state ticket is safe, and will be elected by good majorities. Contributing reasons are the absence of local fights of any warmth. The Democrats are pretty thoroughly whipped out in the upper peninsula counties, and furnish no opposition worthy of the name, to stir up the voters' interest. This year, as it happens, less attention than usual has been paid to the upper peninsula by the campaign managers, on the theory that the real fight, both in the primaries and now, has lain below the straits. This theory is doubtless correct, but the comparative neglect of this region has naturally had some effect in reducing the normal interest in politics.

The State Republican should not get the idea that The Mining Journal believes the situation in the upper peninsula is anything but sound. The State Republican is right about this, too. The upper peninsula Republicans should be up on their toes this year, as they never were before. But in its comment The Mining Journal dealt with conditions rather than with theories. This year, as it happens, less attention than usual has been paid to the upper peninsula by the campaign managers, on the theory that the real fight, both in the primaries and now, has lain below the straits. This theory is doubtless correct, but the comparative neglect of this region has naturally had some effect in reducing the normal interest in politics.

**HERE AND THERE.**  
With two exceptions the queens of all the European countries are said to be taller than their husbands. Queen Helen is more than a head taller than the King of Italy, Queen Victoria is more than half a head taller than Alfonso of Spain. The czar looks small beside the zarina. The German empress is a trifle taller than the Kaiser and for that reason always photographed with her husband taken together. King George of England is shorter than Queen Mary. The two exceptions are the queen of Norway and the new queen of the Belgians.

All over Norway women are voting at the municipal elections this fall. It is the first time that all women in Norway have had the opportunity. Nine years ago the municipal vote was given to all taxpaying women. This proved a success and three years ago they received the parliamentary suffrage. Now municipal suffrage for women has been made universal.

"The curie" is to be the standard unit for measuring radium emanations. This and the decision that Madame Curie shall be an international radium standard to be preserved in Paris are the main results of the congress of radiology and electricity recently held at Brussels.

John Alkman Stewart, who has been appointed president pro tem of Princeton university, following the resignation of Woodrow Wilson, is eighty-eight years old and has been a member of the board of trustees since April 29, 1868. Mr. Stewart is not a graduate of Princeton, but was a member of the class of 1840 of Columbia college. He has not missed a meeting of the trustees in five years. Mr. Stewart was for a long time president of the United States Trust company of New York and was formerly assistant United States treasurer.

Bismarck said a Russian only had sense to steal a day's living, a Dutchman a year's but an Englishman, said Bismarck, rarely stole less than a life's keeping. Bismarck said there was one absolute undeviating rock-bottom fact in Anglo-Saxon makeup and character it was thievish all flowered over and spiritualized and hidden by gardens of hypocrisy.

Last year this country supplied almost one-third of the world's tobacco.

For each member of the population of the United States about one-third of a pound of Japanese tea and ten or twelve paper napkins are sold annually in America. Of Japan's total exports of products the United States takes two-thirds.

**A GENEROUS AND CHARITABLE WISH.**  
"I wish all might know of the benefit I received from your Foley's Kidney Remedy," says I. N. Regan, Farmer, Mo. His kidney and bladder gave him so much pain, misery and annoyance, he could not work, nor sleep. He says Foley's Kidney Remedy completely cured him. The People's Drug Store.

insula is anything but sound, from the Republican viewpoint. Mr. Henans' campaign has made little impression in this region. The proportion of the vote favorable to the Republican ticket will be as large as ever, we have no doubt, but there is some danger that the total vote polled will not be as large as it should be. And, at that, of course, outward signs may be misleading, and there may be more live interest in politics than appears on the surface. The Mining Journal hopes for a bumper vote and suggests that lethargic county committees set about to put some energy into the closing period of the campaign. The responsibility is primarily theirs.

**THE STATE PRESS.**  
The annual report of the Grand Trunk shows an increase of \$2,225,000 in the gross receipts. In response to prolonged applause, the interstate commerce commission lifts its cap.—Detroit Journal.

Domestic life is made up of hiring one blamed hired girl after another.—Bay City Times.

The Michigan editor who is advocating debrutalizing bridge whist as the next great athletic reform has not raised what Mr. Bryan would call a paramount issue.—Grand Rapids Press.

If you are going to characterize Mr. Roosevelt as "the man on horseback," you'll have to concede that it's the Wall street bucking broncho he's riding.—Detroit News.

Rev. Fred Corbett, prohibition candidate for governor, is in danger of losing caste if he continues to attend his meetings on account of wet weather.—Flint Journal.

The prosperity of the farmers has even enlisted the attention of the Black Hand artists. Blessings are being sent for they'll never be blackmailed, kidnapped, lost in a balloon in mid-Atlantic, or thrown from an auto.—Detroit News.

The New York Herald says it hasn't seen any good poetry for years. It could have saved a good deal of ink by stating that they'll never be blackmailed, kidnapped, lost in a balloon in mid-Atlantic, or thrown from an auto.—Detroit News.

**RESTRAINING THE SEA.**  
Emil Seidel, the mayor of Milwaukee, said in a recent after-dinner speech: "Some people hold that alcohol is to blame for the poverty and wretchedness we see around us. That is as illogical a view as one I heard put forth by the newsboy the other day.

"As I waited on a corner for a car, a bootblack said to a newsboy: 'Bill, how is it the sea don't run over when all the rivers run into it?' 'Why, ye clump!' Bill answered, 'don't ye know the sea bill is full of sponges?'"

**MR. GEBHARD ON MARRIAGE.**  
The late Frederick Gebhard, at a dinner at Delmonico's listened to a prolonged discussion on matrimony. The disputants, male and female, all agreed that marriage cooled love, but beyond this point their views varied widely.

Mr. Gebhard, however, defined a successful marriage in a way that excited a good deal of assenting laughter. "A successful marriage," he said, "refrigerates love just enough to make it keep."

**WANT OF APPRECIATION.**  
Woodrow Wilson said at a recent dinner: "When all the world is well educated, as all the world will be some day then it will be better for everybody. Some foolish people, though, don't care to see all the world educated. These people want to shine—and to shine, of course, one must have darkness.

"But that is a poor way to look at it. These ambitious people should rather say: 'The more education the more appreciation.'"

"There's nothing more disagreeable than want of appreciation, you know. A multi-millionaire returned to his native village and erected a marble palace on a hilltop there. One day, after the palace was completed, he said to the postmaster and the crowd of loiterers in the general store: 'Boys, my million-dollar house up on the hill is simply full of Titians.' The loiterers exchanged looks of surprise and horror, and the postmaster exclaimed: 'Good gracious, ain't there no way o' killin' 'em?'"—Washington Star.

**THIS IS CERTAIN.**  
The Proof That Marquette Readers Cannot Deny.

What could furnish stronger evidence of the efficiency of any remedy than the test of time? Thousands of people testify that Doan's Kidney Pills cure permanently.

Home endorsement should prove undoubtedly the merit of this remedy. Years ago your friends and neighbors testified to the relief they had derived from the use of Doan's Kidney Pills. They now confirm their testimonials. They say time has completed the test.

Mrs. C. Carlton, 340 Alger St., Marquette, Mich., says: "I still recommend Doan's Kidney Pills highly, as the cure they effected several years ago has proven permanent. I will confirm the statement I gave for publication in their favor at that time. My kidneys were weak and caused my back to ache intensely. The kidney secretions were also unnatural and annoyed me. I often became dizzy and nervous and was subject to headaches. Doan's Kidney Pills, procured from the Stafford Drug Co., effected a complete cure."

For sale by all dealers. Price 50c. Doan's Kidney Pills, Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

**The Famous Rayo**  
The Lamp with Diffused Light

should always be used where several people sit, because it does not strain the eyes of those sitting far from it.

The Rayo Lamp is constructed to give the maximum diffused white light. Every detail that increases its light-giving value has been included.

The Rayo is a low-priced lamp. You may pay \$5, \$10 or even \$20 for other lamps and get a more expensive container—but you cannot get a better light than the Rayo gives.

This season's Rayo has a new and strengthened burner. A strong, durable shade-holder keeps the shade on firm and true. Easy to keep polished, as it is made of solid brass, finished in nickel.

**Once a Rayo User, Always One.**

STILL HOPE TO SAVE STEAMER MORELAND

Wreckers Report That a Few Hours of Good Weather is All That is Needed.

The tug Boynton was in Portage Lake again yesterday from the scene of the wreck of the steamer Moreland at Eagle River. Captain Ryerse still expresses a belief that the steamer will be floated. He said yesterday that the wreckers had all the water and cargo out of the after portion of the steamer, that she was floating but that her bow was still on the reef and it would be necessary to lighten the cargo out of this portion. A heavy sea came up yesterday morning and Captain Ryerse expected that by last night the steamer would have floated again. He says that a very few hours of good weather are all that is required now to float the big craft.

The Moreland went on sawtooth reef at Eagle River a week ago Tuesday night and has since been at the mercy of the waves of Lake Superior. There is a large wrecking fleet at work, consisting of the tugs Favorite of Port Huron, Boynton of the Soo and Whalen and Morrison of Port Arthur and the lighters Empire and Imperial of Port Arthur. Eight thousand tons of iron ore of the Moreland's cargo is now on the reef. The remainder will be lightened as the weather permits. The wrecking fleet has been working on the job for a week, but only for short periods continuously, as the wind rises frequently and drives the boats to shelter. The operations are in charge of Captain Joseph Kidd of Duluth, for the underwriters, and Captain Hill, shore captain for the Jones & Laughlin fleet, owner of the steamer.

Owing to the frequency of the interruptions of the wrecking operations, hope of saving the entire steamer has almost abandoned earlier in the week and a plan was made to save her after part and have the forward part of the reef, but Captain Ryerse said yesterday that he was sure a few hours of good weather would see the whole steamer float off and saved. If this is accomplished it will be one of the best wrecking jobs ever completed on Lake Superior, equalling the work of Captain Wash Harrow when he saved the Harlem at Isle Royale about ten years ago. The tug Whalen is a powerful steel craft, owned by Whalen Bros. of Port Arthur. She is used for general harbor and wrecking work at Port Arthur and is an ice breaker in the winter, keeping the harbor open constantly. She has not been out of commission for five years, being in action in places or acting in the wreck of the Moreland.

The wreck of the Moreland at Eagle River is the sixteenth in sixteen years on this same line of rocks. The reef is not protected for lake mariners in any way by light-house or fog horn or whistle. Not even a buoy or range light is there to warn captains of passing steamers of the danger.

At the time the Moreland struck the reef she was about four miles out of her course, due to a fall of almost impalpable smoke from forest fires which hung over the lake. There was not a breath of air stirring and the lake was perfectly calm. The steamer struck with such force that she ran out five feet forward, although drawing eighteen feet of water at the bow.

The first of the sixteen costly wrecks on Eagle River reef in the past sixteen years was that of the J. H. Pickands, a steamer, in 1894. The Pickands was a total loss with her cargo. One member of the crew was lost when she went to pieces. A couple of years later the steamer Colorado struck the reef and also proved a total loss, together with a large cargo of flour. A year later the wrecked Fern, while salvaging machinery from the two wrecks, was overloaded and sank during a storm, causing the loss of five lives of her crew, two of them local men. Several strandings, causing more or less damage, occurred after this, although none of them were very costly, and in each instance the stranded boats were saved. These came the wreck of the big steel carrier Uranus, which tried to punch a hole through the reef with disastrous results. It cost about \$40,000 to release and patch up the Uranus and half her cargo was lost. After a few more strandings, the steamer Pathfinder and large Sagamore tried to run across the reef, and another wrecking bill of between \$40,000 and \$50,000 was incurred. This disaster occurred on Aug. 9 of last year.

Three years ago the government discontinued the Houghton postoffice to make a petition to have the mail delivered at the fraternity house. The petition was denied, because the house is not within the village limits. The fraternity men asked if it would not be possible for them to locate a box within the limits and have their mail delivered there. This also was denied.

Deputy Postmaster McKernan said yesterday that the office had asked for another mail carrier for East Houghton. The district at present has but one carrier, and he is overworked. East Houghton has grown so rapidly in the few years since the free delivery was put in that the quantity of mail has increased beyond the power of one man to deliver it.

But the new mail carrier will not help the Park addition or the Sigma Rho. They are outside the limits, and unless they become by one process a part of the village they must still go to the post-office for their mail. The mail carrying limits of Houghton on the east are at the old highway which runs up to Forest Hill cemetery. This highway is now an important residence street, but it has no name.

ON AUTOMOBILE TOUR. Paul Honkavara of Palmer, Mich., in the Copper Country.

Paul Honkavara, one of the leading merchants of Palmer, Marquette county, was in the copper country on an automobile tour this week. Accompanied by his daughter, Ida, Mr. Honkavara arrived last Saturday by train, shipping his machine over the Anchor line. Subsequently he and his daughter visited

the different towns in the big car, accompanied by W. C. Mammis, upper peninsula representative of Charles H. Werner & Co. of Detroit. Mr. Honkavara said he greatly enjoyed his visit. The machine was shipped back yesterday and Mr. Honkavara went home by rail.

A BATTLE UNDERGROUND. Charles Rantila Goes After Louis Pastor With a Shovel.

Charles Rantila and Louis Pastor, miners employed in the Franklin mine, had words Wednesday night while at work underground. Then they came to blows. Rantila went after Pastor with a shovel, and when he struck the latter was wounded. Pastor was arrested, and yesterday morning Justice Oliver of Hancock fined him \$10 and the costs. Then Pastor brought suit for damages for personal injuries in the sum of \$100. This suit will be tried later.

MANY FOR NATURALIZATION. For Second Papers Twelve, for First Nineteen Applicants.

County Clerk Richardson Wednesday night entertained at his office in the county building forty-five men from Calumet—thirty-one applicants for citizenship and their witnesses. The crowd made the trip to and from Houghton in a special car. Of the applicants, nineteen were for first papers and twelve for full citizenship. The latter dozen will be heard by Judge Streeter some time during the January term of the circuit court. The county clerk will have their petitions posted today.

ABOUT TO INVADE THE GOGEBIC RANGE

Roach & Seeber to Build a Warehouse and Cold Storage Plant at Ironwood.

The Roach & Seeber company is making plans to invade the Gogebic range territory with its wholesale grocery and produce business and today A. W. Walsh, manager of the grocery department, will leave for Ironwood to let the contract for the erection of a concrete warehouse and cold storage plant at that place. The plans have been completed for some time and the company has been awaiting only the completion of the negotiations for a site adjoining the tracks of the Chicago & Northwestern railway. This latter deal was closed yesterday.

The building which the company will erect will be of concrete construction, two stories and a basement. It will be 125 feet long and 45 feet wide and will contain a refrigeration plant and facilities for the cold storage of butter and eggs, dried fruits and fish and other seasonable goods. It will be provided with facilities for the simultaneous unloading of four cars within the building.

Mr. Walsh said yesterday that the opportunities for business in the wholesale grocery and produce lines at Ironwood are very good. Ironwood is the center of a population of 35,000 people within a radius of fifteen miles, a territory which as yet has no jobbing house. He considers that this is remarkable these days, when wholesale grocery houses are common to very small communities. The Roach & Seeber company has steadily been expanding since 1890, when it first branched out from its parent location, Waterloo, Wis., to establish a plant at Houghton. The Roach & Seeber building on Isle Royale street was built for the firm at that time. The company has since added branches at Marquette and Calumet. About two years ago the original firm of Roach & Seeber became the Roach & Seeber company. Mr. Walsh becoming interested in the concern, which at the same time launched its business in the grocery business under his management.

The company had been an old Wisconsin concern for years before coming into northern Michigan. It has always been a produce concern and its business in the grocery business has been a food products has been large. The company now operates fourteen dairies in southern Wisconsin, in addition to its branch houses as named.

IN "WHITE SLAVE" CASE. Jean Mallen Is Bound Over to Next Term of Circuit Court.

Another arrest has been made in connection with the "white slave" case. Jean Mallen, proprietress of a resort in the west end of the city, has been taken before Justice Oliver on the charge of keeping a house of ill-fame and has been bound over to the next term of circuit court for trial. Being unable to furnish bonds of \$1,000, she was taken to the county jail at Houghton. She conducted the rendezvous in which the little girl was found Monday. This new piece of disgusting scandal which has aroused the decent people of Hancock has assumed several new dimensions in the coming men of the city, who have already been arrested on serious charges and more arrests are to follow.

Sheriff Byers has issued orders to all officers in Houghton county to arrest and bring in all young girls found on the street late at night or found at any time in questionable places or acting in any manner which might be considered questionable for a young girl. Sheriff Byers says he believes there are a great number of young girls, between fourteen and sixteen years of age, an age when they are easily susceptible, who are getting into the control of their parents and who are being affected by the influence of older women of questionable character. He believes the matter should be brought to the attention of the parents and the only way he knows of doing this is to arrest the girls. He is determined to put a stop to a condition which at present seems to be prevalent, that of young girls frequenting improper places and keeping late hours on the streets.

ADDITIONAL MAIL CARRIER. Houghton Postoffice Needs Another Man in East Houghton.

A committee of the Sigma Rho fraternity called yesterday on Postmaster Lewis of the Houghton postoffice to make a petition to have the mail delivered at the fraternity house. The petition was denied, because the house is not within the village limits. The fraternity men asked if it would not be possible for them to locate a box within the limits and have their mail delivered there. This also was denied.

Deputy Postmaster McKernan said yesterday that the office had asked for another mail carrier for East Houghton. The district at present has but one carrier, and he is overworked. East Houghton has grown so rapidly in the few years since the free delivery was put in that the quantity of mail has increased beyond the power of one man to deliver it.

But the new mail carrier will not help the Park addition or the Sigma Rho. They are outside the limits, and unless they become by one process a part of the village they must still go to the post-office for their mail. The mail carrying limits of Houghton on the east are at the old highway which runs up to Forest Hill cemetery. This highway is now an important residence street, but it has no name.

ON AUTOMOBILE TOUR. Paul Honkavara of Palmer, Mich., in the Copper Country.

Paul Honkavara, one of the leading merchants of Palmer, Marquette county, was in the copper country on an automobile tour this week. Accompanied by his daughter, Ida, Mr. Honkavara arrived last Saturday by train, shipping his machine over the Anchor line. Subsequently he and his daughter visited

the different towns in the big car, accompanied by W. C. Mammis, upper peninsula representative of Charles H. Werner & Co. of Detroit. Mr. Honkavara said he greatly enjoyed his visit. The machine was shipped back yesterday and Mr. Honkavara went home by rail.

A BATTLE UNDERGROUND. Charles Rantila Goes After Louis Pastor With a Shovel.

Charles Rantila and Louis Pastor, miners employed in the Franklin mine, had words Wednesday night while at work underground. Then they came to blows. Rantila went after Pastor with a shovel, and when he struck the latter was wounded. Pastor was arrested, and yesterday morning Justice Oliver of Hancock fined him \$10 and the costs. Then Pastor brought suit for damages for personal injuries in the sum of \$100. This suit will be tried later.

Saturday's Baking

Home cooking, when successful, is most delicious, healthful and economical. No fear of failure for the *Ramford* housewife. Her cake never falls, her crust is never tough, her biscuits never heavy. The baking is of fine texture and flavor and will retain its freshness much longer when she uses

Contains No Alum

the different towns in the big car, accompanied by W. C. Mammis, upper peninsula representative of Charles H. Werner & Co. of Detroit. Mr. Honkavara said he greatly enjoyed his visit. The machine was shipped back yesterday and Mr. Honkavara went home by rail.

MANY FOR NATURALIZATION. For Second Papers Twelve, for First Nineteen Applicants.

County Clerk Richardson Wednesday night entertained at his office in the county building forty-five men from Calumet—thirty-one applicants for citizenship and their witnesses. The crowd made the trip to and from Houghton in a special car. Of the applicants, nineteen were for first papers and twelve for full citizenship. The latter dozen will be heard by Judge Streeter some time during the January term of the circuit court. The county clerk will have their petitions posted today.

WEATHER BACK TO NORMAL. Slush and Snow Yesterday Was to Have Been Expected Sooner.

The copper country weather got back to normal yesterday morning. It had been just a trifle too summery for some days previous, throughout the entire month of October in fact. But yesterday it resumed its normal condition for this stage of the calendar. Copper country people who in the hurry of dressing yesterday morning jumped into the knee length and sleeveless and the low shoes as a matter of course, had to change to the front door and got into more seasonable things.

Observer Cowdrick said yesterday that if the snow could have remained on the ground it would have measured quite two inches, a considerable amount for any time. As it melted soon after reaching the earth and melted things up a whole lot. The temperature yesterday morning was 37.

ANNUAL MILITARY BALL. Big Social Event at Calumet the Eve of Thanksgiving Day.

Preparations were completed yesterday for the annual grand ball of the military organizations of Calumet, active and veteran. Interested in the affair will be the Civil war veterans, the Spanish-American war veterans, the veteran members of the old Calumet Light Guard and the Engineers. The Hill Calumet & Hecla have been engaged to furnish the music and the Light Guard Army will be magnificently decorated. The ball will be given on the eve of Thanksgiving Day. This is one of the largest annual social events in the copper country. The following committees have been appointed by the various organizations: Civil war veterans—Captain Will A. Childs. Spanish war veterans—Colonel William H. Thieman, Major P. D. MacNaughton, Captain John Treavor, Captain Albert E. Hooper. Light Guard veterans—P. D. McLellan, Nathaniel Vivian, Fred Danielson. Company A, Engineers—Captain Jesse Meads, Lieutenant Ira Pemberton, Lieutenant Henry McDuff, Lieutenant Jos. Wilmers, Sergeant Horace Krupp, Sergeant Richard Bell, Corporal Gemmill, Corporal Ham, Privates Melton, Lokovitch, LeBeau and Klinowick.

FOLEY BODY EXHUMED. Stomach of Man Once Interred Sent to Ann Arbor for Analysis.

Dr. W. S. Jackson, county physician of Houghton county, and Dr. J. E. Seaton of Hancock yesterday supervised the disinterment of the remains of the late Edward Foley of Twin Lakes, who died last Sunday and had been buried in the Hancock cemetery. The disinterment was at the request of the man's brother, who believes that Mr. Foley came to his death through foul play. He thinks his brother was poisoned. The stomach was taken from the body and was shipped to Ann Arbor for a chemical analysis. On this analysis will depend any future action in the matter.

QUINCY MINER KILLED. Frank Pertenni, a miner employed in the No. 7 shaft of the Quincy, was instantly killed yesterday morning. He was riding up in a skip at 7 o'clock and a projecting piece of timber struck him on the head, crushing his skull. Pertenni was a married man, thirty-four years of age, and leaves a family. Coroner Fisher of Red Jacket impelled a jury and held an inquest yesterday afternoon. The verdict was of accidental death.

COPPER RANGE COAL RECEIPTS.

Big Houghton Coal Dock Will Have Total of 160,000 Tons.

The steamer J. T. Hutchinson will arrive at the Copper Range coal dock today with a cargo of 5,217 tons, 1,800 pounds of coal for the Copper Range Consolidated. This will make a total of 139,583 tons of coal received over the dock this season and one or two more boats are expected before the season closes, their cargoes bringing up the total receipts to close to 160,000 tons. The following is a list of the coal receipts so far this season:

Table with columns for Name, Date, and Cargo. Includes entries for A. Augustus, Martin Mullen, William A. Paine, Mullen, June 5, Mullen, June 8, J. C. Butler, Jr., June 14, J. A. McLean, June 22, H. B. Nye, June 26, McLean, July 1, McLean, July 5, Mullen, July 8, Wilkinson, July 20, Mullen, July 30, Mullen, Aug. 10, McLean, Aug. 15, John Lambert, Aug. 17, Mullen, Sept. 16, McLean, Sept. 19, Augustus, Oct. 14, J. T. Hutchinson, Oct. 27.

Total 139,575. The difference between this total and that given above is due to the addition of the old pounds in each cargo, which totalled eight tons and 1,700 pounds.

ONTAGON HIGH SCHOOL. The board of education of Ontagon is considering plans for the erection of a new high school. The present building is inadequate and the board believes that a new one will be imperative next year. Nothing definite has been given out, as the board has discussed the matter only tentatively.

POLITICAL CAMPAIGN OPENS. The Republican campaign opened last night with a speech in the Red Jacket town hall by Hon. H. Olin Young of Ishpeming, candidate for congress and the present congressman. A big crowd turned out. Mr. Young spoke tonight at Wolverine and tomorrow night at Painesdale.

Mining News

ANACONDA. All the mines in the original Anaconda group are working except the St. Lawrence and portions of the Neverest and Anaconda. The collapse of the St. Lawrence ore bins necessitated a closing of operations at the St. Lawrence mine which was worked through the St. Lawrence shaft. A part of the Anaconda mine is now worked to a depth of 1,200 feet through the Molly Murphy shaft. The shut down of the St. Lawrence is taken advantage of to repair and straighten the shaft.

The curtailment of production at the Anaconda and allied mines does not mean that a corresponding reduction has been made in the working force; on the contrary, there has, comparatively, been very little reduction in the working force needed for mining, and there has been no curtailment of any of the new work or development. Under the present policy of production the Anaconda aims to keep the output of the Washoe smelter at about 10,000,000 pounds per month, and that of the Great Falls smelter at a little above 6,000,000 pounds, so that the total monthly production will be from about 22,000,000 to 22,250,000 pounds of copper per month. This includes all the ore treated at the Washoe and Great Falls smelters, and represents all the production of the Butte district except the output of the Pittsmon smelter of the East Butte company. There is no longer any account taken of the production by the different departments of the Anaconda company, representing the old mines like Boston & Montana, Butte Coalition, etc. These companies still keep account of their own output but when the ore reaches the smelters it becomes one lump. Only customers, like that of the North Butte, Toluome, etc., is kept in a separate account. This consolidation is one of the results of the merger, and works a great economy in operations.

Special important developments have been made on the 1,800 ft. level of the West Colusa and on the same level of the Minnie Healey. On the 1,800 ft. level of the West Colusa and on the same level of the Minnie Healey up to within forty feet of the workings of the West Colusa, the Minnie Healey is continuing its big showing in other portions of the property. The Trampway, which both the Minnie Healey and Rarus mines are worked, has been sunk to a depth of 2,000 feet, where work has been started on cutting a station.

Another important development has been made on the 2,200 level of the Mountain Consolidated mine, which is a new level. A large vein of high grade ore is being opened there. The large four-compartment shaft known as the Belmont, in the southern part of the city, has reached a depth which corresponds with the 2,000 and 2,100 of the Anaconda mine, and will be sunk to a depth of 2,400 feet. It will be connected with all the levels of the Anaconda mines, and besides providing an auxiliary shaft for the mill mines it furnishes a magnificent air supply.

RAY CONSOLIDATED. General Manager Daniel C. Jackling, of the Ray Consolidated property, says: "We expect to commence production about Feb. 1, operating on a plant of 100,000 tons of mill to handle the developed ore, which exceeds 38,000,000 tons, with an average copper content of 2.2 per cent. This does not by any means measure the possibilities of the property as there is a vast territory still unexplored. We have drilled about 340 holes, or a total of 140,000 feet. The average thickness of the Ray ore bodies is 118 feet with a capping of 315 feet. Our railroad is operating in a small way, and we are employing altogether 1,200 men; but when the mine mill, power plant and railroad are at full capacity, the payroll will carry from 2,500 to 3,000 men. Underground developments will be prosecuted from two main shafts each located on the line of the Ray Consolidated railroad. There are six other shafts extending to the main level for ventilation. The greatest depth to hoist is less than 300 feet and for years the larger tonnage will come from above the 170-foot level. All the mining done is under the "caving system." Our shaft will not be in operation until the middle of next year, and until then we have arranged for the concentrates to be handled at another smelter. The main building for the concentrator is practically completed and we are getting along well with the power plant. The concentrator mill and smelter are located on 4,000 acres at Hayden on the Arizona Eastern railroad, twenty-one miles from the mine and near the Gila river. The buildings are of steel and concrete throughout. The mill is designed to handle 1,000 tons per day. It will require the better part of next year to build the plant to maximum capacity, and when it is working full production will reach 80,000,000 pounds of copper per year at a cost which should not exceed nine cents per pound."

CALUMET & HECLA. Calumet & Hecla has and is taking advantage of the times, in preparing for the future. The improvements and repairs at the Big Red Jacket shaft include a changing of methods in the rock house, in the interest of greater economy in handling and breaking rock coming from the mine. For the six breakers formerly in this rock house, two mammoth breakers have been put in, one on either side, and a third breaker, for use on poor rock. All rock coming from the mine is now dumped into the mill, from which the poor rock is picked out, going to the poor rock pile, or to the third breaker, while the apron containing the good rock is automatically elevated, so that the rock runs in the mammoth breakers by gravity, passing from these to the rock bins for loading into cars going to the stamp mill. The changed methods are very satisfactory, so much so that it is more than probable they will be generally adopted and installed in the several rock houses of the big company, as well as in many a house of the subsidiary properties. This is but another of the many economies that are being almost continuously installed under the direction of General Manager James McNaughton and which make possible the mining and handling of two tons of rock today for less than the cost of one ton, only a short ten years ago.

NOTES OF COPPER NEWS. Just now the Algonah shaft, at a depth of a little over 100 feet, is sinking in the face of the wall of the lode, but the showing of copper ore continues. It has been a surprise to everybody else familiar with geological conditions to see that this copper ore continues to the present depth. In many ways it resembles the oxide of copper found in the mines of Arizona, except for the lack of iron in the composition of the ore. There have been trench developments which have important bearing on the future of the Algonah and have an interesting bearing on the Lake as well. This trench, which is 290 feet from the Lake's south boundary, ran into a very healthy looking amygdaloid formation. The amount of copper found was not large, but the formation was leached badly and it looks,

from its location and from the general characteristic of the lode, to be very similar to the Lake lode.

At the Indiana the overburden is comparatively shallow, about 110 feet. The shaft will be located between the sites of drill holes No. 7 and No. 9. There seems to be a wrong impression relative to the depth at which the copper rock is likely to be encountered, based on the fact that the drill holes which struck the Indiana lode cut it at a depth of 1,400 feet. From the best expert opinion, the lode is nearly vertical and the shaft will go down close to the lode all the way. It is reasonable to expect copper-bearing rock at any time after the shaft is in the lode.

The Franklin company has concluded an arrangement with the management of the Lake Copper company to purchase a depth which corresponds with the 2,000 and 2,100 of the Anaconda mine, and will be sunk to a depth of 2,400 feet. It will be connected with all the levels of the Anaconda mines, and besides providing an auxiliary shaft for the mill mines it furnishes a magnificent air supply.

RAY CONSOLIDATED. General Manager Daniel C. Jackling, of the Ray Consolidated property, says: "We expect to commence production about Feb. 1, operating on a plant of 100,000 tons of mill to handle the developed ore, which exceeds 38,000,000 tons, with an average copper content of 2.2 per cent. This does not by any means measure the possibilities of the property as there is a vast territory still unexplored. We have drilled about 340 holes, or a total of 140,000 feet. The average thickness of the Ray ore bodies is 118 feet with a capping of 315 feet. Our railroad is operating in a small way, and we are employing altogether 1,200 men; but when the mine mill, power plant and railroad are at full capacity, the payroll will carry from 2,500 to 3,000 men. Underground developments will be prosecuted from two main shafts each located on the line of the Ray Consolidated railroad. There are six other shafts extending to the main level for ventilation. The greatest depth to hoist is less than 300 feet and for years the larger tonnage will come from above the 170-foot level. All the mining done is under the "caving system." Our shaft will not be in operation until the middle of next year, and until then we have arranged for the concentrates to be handled at another smelter. The main building for the concentrator is practically completed and we are getting along well with the power plant. The concentrator mill and smelter are located on 4,000 acres at Hayden on the Arizona Eastern railroad, twenty-one miles from the mine and near the Gila river. The buildings are of steel and concrete throughout. The mill is designed to handle 1,000 tons per day. It will require the better part of next year to build the plant to maximum capacity, and when it is working full production will reach 80,000,000 pounds of copper per year at a cost which should not exceed nine cents per pound."

The United Verde is one of the larger copper producers which has not put into effect a policy of curtailment. Its yield has averaged 3,000,000 to 3,300,000 pounds monthly. But few of the company's shares are owned outside of Senator Clark. The company's dividend record is a good one and throughout the low prices for copper metal regular monthly disbursements of seventy-five cents a share have been made. The United Verde smelter has five furnaces, but of the one is always kept in reserve. There has been talk for years of selecting a new smelter site owing to cave-ins which have occurred near the present plant, but thus far nothing has been done in the matter.

The Twin Lakes Development company will shortly call a 25-cent assessment on its 10,000 shares in order to enable it to continue exploration work. The drill has reached a depth of 830 feet and is expected to enter good ground in another 400 feet. Until the funds are forthcoming from the assessment, work will be suspended.

Isle Royale copper laid on the smelter dock and including construction cost about 11.25 cents until Oct. 1 since which it has been about one cent less. Delivery and Eastern costs will be about one cent added to costs on smelter dock. Construction is between 1/4 and 1/2 cent.

The sixth level at the Algonah-Centennial mill is about ready to go into commission. This gives the mill three modern heads, also three old heads, and the latter are to be considered as the lines of the last three put in, that when complete this mill will have six heads, all modern and up-to-date, and prepared to do full duty. The Algonah mine keeps piling up resources of high grade reserves, which will stand the company well when improved conditions in the copper world warrant sending a largely increased tonnage of rock to the mill. The Centennial mine has some excellent runs of copper ground, and with a better price for the metal will likely be heard from in a substantial way.

No. 2 Teanosh shaft on La Salle lands is sinking to the 1,000 foot level, and in places good copper values are found. The openings from No. 1 shaft are not so good as the management would like. A limited tonnage goes to the mill daily, and the yield would indicate a low grade rock—too low to be operated successfully with the price of copper ruling as at present. La Salle has an immense acreage, with all the veins of the district traversing the lands, and there may be one, two or three big mines in the area.

MACHINERY ROBS FARM LIFE OF ITS POETRY. New Reason for Drift Toward City Given by Arkansas Philosopher.

And now we have a theory that queers the compass on the farm question, or rather that of rural versus urban life, is advanced by an Arkansas philosopher who is also a farmer on a large scale, and assumes to speak from experience, or at least practice—a rather new thing in philosophy. He says that the drift of city life is not because of the loneliness of farm life, but on account of its monotony and drudgery. He says that the farmer who is not a philosopher, but who has grown by reason of the "improved conditions of farm life." Time was when there was individuality in farm work. There was champions of neighborhoods who could drive the straightest furrow, could cut the widest swath. They led in ordering grain, in binding, and so on. But now what young farmer can swing a scythe? For more than a generation the invention and extension of farm machinery have been going on until a farm is pretty nearly as much as a factory. The machinery, the tractors, the combines and the days of the champion who could milk the most cows and milk them better in a given time are fading! Machinery is doing it all.

Well for us that this is so. But here comes in the farmer as merely a link in a machine, as a factory hand is. There is nothing left for his individuality. A ten-year-old boy can drive a team that pulls the machine that does the work almost as well as a man can. But this is not all. Not merely is the individual thus made of less account, but the boy is taken out of school at an early age and put in this treadmill of farm machinery work so that he grows old before his time, meanwhile lacking all of the personal accomplishment that made his father a champion in some form of farm work. Verily, there seems to be some truth in this. But the modern young farmer who is only a link in a machine, like a factory hand, is at least as well off in this particular. He is not, of course, philosopher enough to add that he is better off in his surroundings. For he reasons that he is deprived of the distractions of the city's streets and the many other things that may relieve the monotony of the day's grind. But he is certainly better off than his father in the daily receipt of mail and quick communication. This, too, he may not perhaps value as it truly worth; he would be an exception if he did.

We think that while the Arkansas philosopher may have brought to light conditions that make farm work less attractive in some things than it once was, it certainly is more attractive in the other things that he has knitted all right in your everyday household economy and weekly bills. If good methods can produce twice and three times as much wheat at less cost of labor and money, then you—the consumer—will not feel the squeeze of a shortage.

It is the same with every item on the household bills that the farmer catches you right in your everyday household economy and weekly bills. If good methods can produce twice and three times as much wheat at less cost of labor and money, then you—the consumer—will not feel the squeeze of a shortage.

Considering how much greater is demand than supply, how much faster population has grown than foodstuffs, how much more numerous the mouths are than the potatoes, it is not surprising that the forewarned thinkers have declared that the great problem before America today is how to increase the fertility of soil, how to increase farm products as fast as population; and that resolves itself into increasing the use of scientific methods. Scientific methods have increased the yield of potatoes from 10 bushels to 40, of wheat from 11 bushels to 40, of corn from 20 to 40 and 90, and of butter and milk from \$40 a head to \$300 and \$600. If scientific methods only doubled the averages of farm products, American farmers would be paying a yearly dividend equal to the capital stock of the steel trust.

All through the corn belt of the middle west and the wheat belt of the northwest railway presidents offered trains free to carry the agricultural specialists out through the farming country to lecture on the new methods, distribute samples of better seed, and demonstrate better dairy methods. "Gospel wheat trains" and "gospel corn specials" and "gospel oat excursions" ran through all these states preaching the new methods and showing proof of the practicality of the new methods. De Knapp realized that the burden and desolation of poverty-stricken farmers fell heaviest on the farmer's wife. Families will not succeed on farms if the women are wretched; and Dr. Knapp had a car fitted out with a simple sanitary kitchen just as cheaply rigged as the poverty-stricken kitchen, but fitted with every inexpensive device as to water and sink and milk and cooking that would save labor and make for health. This simple demonstration kitchen is still going on its missionary tour of the south, and when it is realized that many poor farmers in the south have neither cows nor chickens, fruit nor vegetables, it may be believed that the "gospel kitchen" is as a voice of the preacher crying in the wilderness.

## City Brevities

Today's weather: Generally fair, with snow flurries and colder. Yesterday's temperatures: Seven a. m., 37 degrees; noon, 37; 7 p. m., 31; highest, 38; lowest, 31.

Born, to Mr. and Mrs. M. W. Jopling, yesterday afternoon, a daughter.

City Controller Peter Primeau is confined to his home with rheumatism.

Matt Mattson, of Richmond township, was paid a wolf bounty at the court house yesterday.

St. Mary's guild will meet this afternoon at 2 o'clock with Mrs. L. Riedinger, 115 East Hewitt avenue.

A meeting of Our Lady of Victory court of Foresters will be held at Fraternity Hall this evening.

The Baptist ladies will meet this afternoon with Mrs. Minnie J. Reece, 207 East Crescent street.

The Ladies Aid society of the Methodist church will meet this afternoon at 2:30 with Mrs. H. F. Handford, 207 East Michigan street.

The French association Canada American will give a card party and dance at Legion Hall this evening. A door prize will be given.

The first snow of the season fell yesterday, flakes being in the air most of the day; but it melted as fast as it fell.

Mr. and Mrs. W. E. Noyes have returned to the city after a ten days' visit with Rush Culver and family at L'Anse. Mr. Noyes will go to Birch this morning.

The Woman's society of the Presbyterian church will meet at 3 o'clock this afternoon with Mrs. J. E. Burtless, Pine street.

The steamer Choctaw arrived at the L. S. & I. dock yesterday, the damage sustained in the collision with the American the first of the week having been repaired at the Soo.

The fire department was called to the apartment house on West Arch street, now under construction by J. Carter, about 6 o'clock last evening. Fire started in a fireplace but the damage was not extensive.

The Farther Lights society will give a Halloween social at the Baptist church tonight at 8 o'clock. A musical program will be given and ice cream and cake will be served. Admission, adults, fifteen cents; children, ten cents.

Water M. Cookson, of Ionia, formerly postoffice inspector in the upper peninsula district, who was largely instrumental in working up the prosecution in the Frank L. Higgins case, has been promoted to assistant superintendent of salaries, with headquarters at Indianapolis.

It is expected that a large number of Marquette Odd Fellows will accept the invitation of the Ishpeming lodge to participate in the initiation of a class in that city Saturday evening. The trip will be made on a special train, leaving the South Shore station at 7:30 p. m.

The Delta Alpha society of the Methodist church will hold a mountainair social this evening. Those attending are expected to appear in mountainair costume. A penny fine will be imposed for every ribbon, feather, stiff collar, article of jewelry or patent leather shoe, worn. Fortune telling will be a feature of the evening.

The funeral of the late E. LeBeau of Negaunee, who passed away at St. Mary's hospital Wednesday evening, will be held from St. Paul's church, Negaunee, Saturday at 9 o'clock. The remains have been removed to the home of the daughter of the deceased, Mrs. Harry Siegel, 118 North Third street, and will be kept there until forwarded to Negaunee on the train leaving here at 7:35 o'clock tomorrow morning.

Going Into Faster Company—It is probable that Leon Devet, of Rapid River, who pitched two games for Marquette against Negaunee during fair week, will break into faster company another season. He is now considering an offer from one of the teams in the southern Michigan league. Devet was in the upper peninsula in a comparatively short time, and there are many who believe that he has great possibilities as a baseball player.

Bound Over to Court—John Primau and Edward Evans, the two men who are charged with having taken a Marquette & Southeastern handcar and used it as a means to get to Marquette from Birch about a month ago, were arraigned before Justice Byrne yesterday and bound over to the circuit court. Railway officials state that there has been considerable misappropriation of railroad property all along the line of late and that they are determined to put a stop to it.

C. P. R. President Here—Sir Thomas Shandhuessy, president of the Canadian Pacific railroad, and one of the best known railway men in the world, was in the city for an hour yesterday, in company with three other officials of the C. P. R. and subsidiary lines, and President Fitch, of the South Shore. The party arrived in a special train of three private cars and a baggage car at 11:25 a. m. and left for the Soo at 12:20 p. m. The train was inspected and replenished with ice while here, and the visitors put in their time by making an automobile trip around Presque Isle.

Hemans Club Meeting—A meeting of the Marquette Hemans club will be held in the city hall this evening, at which plans for getting out the vote on election day will be considered. Local Democrats are sanguine of an unusually large vote for Mr. Hemans on election day, in spite of the reports being sent out from Republican headquarters. Several of the Democratic nominees for county offices—In particular, Shieley McCarthy, candidate for register of deeds, and Con Wellman, candidate for representative—are making a vigorous campaign in behalf of their candidacy.

Incorrigible at Fourteen—Clara Boushua, aged fourteen, said to claim Marquette as her home, is being detained at Menominee as an incorrigible and her case will likely be turned over to the Marquette county probate court for disposition. The girl was arrested at Menominee the first of the week and at that time she was staying with a woman whom the local officers did not think a fit associate for a girl of her age. The girl claims that the Menominee woman was a friend of her family and

that she was merely making a visit there, but after an investigation Prosecuting Attorney Doyle decided to have the girl removed to the detention ward.

Dock Hands on Strike—Without any notice or warning whatsoever, forty-three employees at the L. S. & I. docks went out on a strike yesterday morning and for some time it was impossible to find out what their grievance was. Finally, it became known that they wanted a raise from \$2.25 to \$2.50 per day, and the men will return to work this morning, the desired increase having been granted. This is the highest wages than was paid at Marquette last fall but corresponds with the wages now paid for similar work at Duluth. A very similar walkout occurred at the docks about a year ago. It would seem that a more justifiable course would be for the men to state their grievances to the railway officials in a legitimate manner rather than trying up dock operations for a day, as was the case yesterday.

INSURE WITH PETER WHITE & CO.

## COST OF LIVING LOW IN 'SIXTIES

Copy of Lake Superior Journal Gives Interesting Figures on Price of Staples.

The Mining Journal has received from Charles H. Spalding, assistant superintendent of the Falls canal, a copy of the Lake Superior Journal, one of the forerunners of the present Daily Mining Journal, dated of March 24, 1862, when Warren Isham was its publisher. At that time the Lake Superior Journal, which was originally published at Sault Ste. Marie, was being published in Marquette. The copy now at hand was found by Mr. Spalding when he was examining some old papers, and it abounds in interesting items and advertisements. The Lake Superior Journal was an eight page newspaper, eighteen by twelve inches, four columns wide and five-eighths inches each, to the page. In the number of March 24, 1862, there is not to be found a single line of matter that was not set in the office. "Boiler plate" was a later innovation in the publishing business, and the entire issue was a home production. The advertising patronage was most generous, and was contributed largely by Detroit and Cleveland houses, which at that time controlled the upper peninsula trade. There were eight columns of closely set Detroit advertisements in the issue, and four columns of space was given over to the announcements of Cleveland houses. There were some seven columns of Marquette advertisements, besides many miscellaneous announcements, so the Lake Superior Journal of the early 'sixties must have been a good money maker.

### Cost of Living Low.

The advertisements in the issue indicate that the cost of living in Marquette during war times was low, and that people could not have had much difficulty making both ends meet, even if wages were also low.

The advertisement of J. P. Pendill, one of the pioneer merchants, contains some interesting figures, which are here published in full:

- Beef, per pound—6 cents.
- Pork, per pound—9 cents.
- Butter, per pound—15 cents.
- Brown Sugar, per pound—6 to 8 cents.
- White sugar, per pound—10 to 12 1/2 cents.
- Pilot bread, per pound—4 to 5 cents.
- Crackers, per pound—5 to 6 cents.
- Flour, per barrel—\$4 to \$4.75.
- Oats, per bushel—44 cents.
- Corn, per bushel—\$1.
- Beans, per bushel—\$1.
- Lime, per barrel—\$1.50.
- Lard, per gallon—\$1.25.
- Turpentine, per gallon—88 cents.
- Paint, per keg—\$2.50.
- Calico, per yard—5 to 10 cents.
- Hats and caps—12 1/2 cents and up.
- Boots and shoes—25 cents and up.
- Candles—12 1/2 cents to 50 cents.

Some of these prices, notably those on beef and pork, are of a nature to make the thrifty housewife think enviously of the shopping opportunities offered nearly fifty years ago by the Pendill village emporium.

The Pendill advertisement is the only one in which a Marquette business man quoted figures. The largest advertiser in the Journal was Wetmore & Co., who spread themselves for an entire column, but the advertisement does not contain a single figure, being confined entirely to an enumeration of the articles that the prospective purchaser could find in stock at the Wetmore store, and it is a most comprehensive list.

### Two Firms Still Survive.

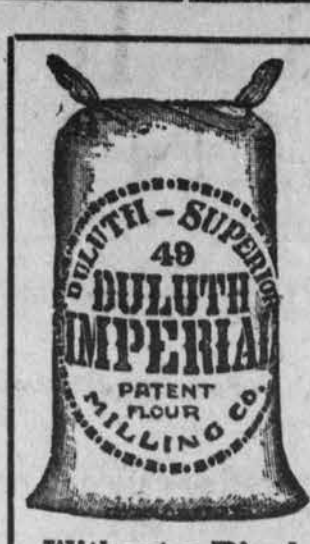

Among the advertisements is one of H. J. Hodgkins & Co., the Co. in this instance being the late B. Neidhart, whose business is continued by J. F. Neidhart. This and the H. H. Stafford company are the only Marquette business houses represented in the columns of this early edition of the Lake Superior Journal that are still in existence. The Stafford Drug company is the successor to H. H. Stafford.

Among the hotels advertised was the Pioneer House, conducted by William Cole, which announced that "the table will be always plentifully supplied with fresh fish from Lake Superior and speckled trout from the neighboring brooks, home made butter and the delicacies of the season. Terms moderate to suit the times." The Marquette house had a card announcing L. D. Jackson as the proprietor, supplied with fresh fish from Lake Superior and speckled trout from the neighboring brooks, home made butter and the delicacies of the season. Terms moderate to suit the times.

6 - 7 - 8 - 10 PER CENT

Sounds good to most people who have money to invest.

And it IS good when you get a good investment.

But about 99 out of a hundred so-called GOOD THINGS prove to be good ONLY on paper.

The investor loses—the promoter wins and starts another scheme.

And the dear public continues to buy.

Better put your money in a bank and be sure of both principal and interest.

Marquette National Bank MARQUETTE, MICHIGAN United States Depository Capital and Surplus, \$125,000.00

UNCERTAINTY IN INDIANA.

Leaders of Both Parties in Doubt as to Outcome of Election.

Indianapolis, Oct. 27.—With only a little of the campaign unfinished, the leaders of both of the old parties admit reluctantly that it is very difficult to forecast the outcome. It is conceded by members of both organizations that apparently there is no precedent whatever for the existing situation.

With Senator Beveridge and his associates attacking the old order of things within the Republican party, and with the Democrats insisting that Senator Beveridge is not a lone progressive, conditions have become so confusing that the leaders are hesitating in making any predictions.

The betting is unfavorable to Senator Beveridge and to the Republicans generally. Even money is offered that Senator Beveridge will not succeed himself. In spite of the display of confidence on the part of Senator Beveridge, who has been predicting that he would carry the state by 50,000, none of the Republicans are taking down any of the money that is offered against him.

The Democrats are asking 10 to 6 for John W. Kern, their nominee for United States senate. There has been very little betting up to this time, which is regarded as an evidence of the uncertainty that exists among the party leaders.

It is said that State Senator Steve Fleming of Fort Wayne, a Democratic hold-over, has wagered \$1000 even that Senator Beveridge will not be re-elected, even if the legislature should be Republican.

Bowling Scores

Table with columns for names, scores, and totals. Includes names like Barber, Rose, Gull, Kepler, Fussell, etc.

Totals 852 912 825 2589. The Square Deals won three straight. Tonight Guild Hall B and Teap No. 8 will bowl.

Will the German experts notify H. O. Bell if they will be able to bowl tonight? If not, what night can they bowl? Much interest has been excited in this prospective game.

TO PRINTERS. The Mining Journal has a large number of news and job cases and racks, all as good as new, which will be sold for a mere fraction of their value, for cash.

Telephone for the Vacuum house-cleaning wagon to get rid of your dust and dirt. Bell Tel. 650. (10-25-1w)

MURRAY MOVES TO PROTECT BANKS

New Plan of Comptroller of Currency Aims at Dishonest Borrowers.

Washington, Oct. 27.—Having studied the national banks from the inside and done his best to make them safe repositories for the money of the people, Comptroller of the Currency Lawrence O. Murray has now turned his attention to the outside and is seeking to protect the banks against dishonest borrowers.

The comptroller's idea has been to list and keep a record of men who make notes with no assets behind them and to break up the dishonest brokerage of the men who float such notes. In pursuance of this plan the comptroller appointed a committee of national bank examiners consisting of Frank L. Norris, chairman, Charles A. Hanna, E. F. Rorebeck and Samuel M. Hann, with orders to meet and formulate a plan whereby the information sent to the comptroller's office annually by the district chairman could be utilized by the examiners whenever necessary.

Bad Borrowers To Be Docketed. To begin with, every examiner in the system hereafter will be directed to keep for his own use a complete file of all large and extended borrowers in his district, from which lists will be sent to the office of the comptroller for summarizing. The examiners now meet annually in July, in their districts and compare notes, but hereafter the comptroller will require also regular annual meetings of the eleven district chairmen to be held at some central point every year.

The plan is not to interfere in the slightest degree with the intimate relations naturally existing between borrower and lender. On the contrary, the findings of the examiners will be held absolutely confidential between the comptroller and the examiners. The information will be useful, however, in enabling complete credit information covering suspicious circumstances surrounding a doubtful borrower and thus enable the officers of the bank to take such steps as they may close to protect their institution. The machinery of the comptroller's office is still too small to enable him to collect complete credit information covering commitments in all the banks, but it is enough to do a great deal of good.

Don't delay ordering your stove repairs. We furnish repairs for all stoves and furnaces. KELLY HARDWARE CO. (10-23-4f)

JUDGESHIP WORRIES TAFT.

Considers 100 Possibilities for the Supreme Court Bench.

Washington, Oct. 27.—The names of more than 100 judges have been submitted to President Taft for consideration in connection with the two vacancies on the bench of the United States supreme court.

It is known that the vacancy in the office of chief justice is giving the president a good deal of concern. Four men are now under consideration for that exalted position. They are Elihu Root, senator from New York, and Associate Justices Harlan, White and Hughes, Mr. White is a Democrat. The others are Republicans.

The impression seems to prevail in Washington that an associate justice is promoted to the lead the bench it will be Mr. Harlan. He is the senior on the bench in point of service and years.

ROOSEVELT THE SPELLBINDER.

Cabinet Members Giving Only Desultory Aid Toward the Campaign. Washington, Oct. 27.—In political circles at the capital Colonel Roosevelt is 'coming up' as one of the big features of the remaining days of the campaign. A few federal officials are out upon the stump, but it is many years since the roster of administration employees engaged in campaign activities has been as small.

The two or three cabinet members now filling speaking dates are at work in a more or less desultory fashion. But Colonel Roosevelt is far and away the most notable Republican stump speaker and promises to monopolize the publicity in that regard up to election day.

The congressional committee usually has two or three star speakers at large. Vice President Sherman and Speaker Cannon, who would naturally be the committee's stars, are keeping close to the base and are making no tours among the voters.

Many expect that the colonel will work in a more or less desultory fashion, but he is expected to make a hard finish under circumstances that will redound materially to his advantage, if the party wins any notable victories.

\$5 FOR ANY "WIDOW."

Rich Man Fixes Will So No Woman Can Claim Big Estate. Fall River, Mass., Oct. 26.—The will of John B. Luther of this city, which has been probated in San Francisco, where he resided most of his life and had his legal domicile, contains bequests to relatives in the vicinity of Fall River aggregating \$100,000.

"I do hereby declare that I am not married and that I have no children. I have noticed, however, the facility with which sworn testimony may be procured to relatives in support of the claims of alleged widows and adopted children and the frequent recurrence of such claims in recent years.

"I therefore make express provision in this, my last will, as follows: I give and bequeath to such person as shall be found, proved and established to be my surviving wife or widow, whether the marriage be found to have taken place

before or after the execution of this will, the sum of \$5, and to each and every person who shall be found, proved and established to be my child, by birth, adoption, acknowledgement or otherwise, and whether before or after the execution of this will, the sum of \$5, and I declare that I do intentionally omit to make for or in favor of any other or further provision."

FOSS SUPPORTERS GAIN CONFIDENCE

Liquor Interests in Massachusetts Said to Be Working for Democratic Ticket.

Boston, Mass., Oct. 27.—Foss, or his friends, or both, are dozing the street with betting money. It is said that a large sum, some place it as high as \$50,000, has been raised to wager at even money on Foss in order to influence the political tide. Boston Democrats certainly profess more confidence than they have shown up to now. Several of them say that, whereas a week ago they did not believe that Foss had a chance to win, they now think he has an excellent chance to do so.

There is one interesting report floating around town. If it is true, it might account, to a considerable degree, for the increased Democratic confidence. In brief, it is to the effect that the liquor interests of the state prefer Foss to Draper. More in detail the report is that at a recent meeting held in Hayward Hall, counsel for liquor interests stated that, if they succeeded in passing through the legislature of 1911 a bill to repeal the "bar-and-bottle" bill enacted by the legislature of 1910, he believed that Governor Draper would veto the repeal bill. He added that he had reason to believe that Foss would sign such a bill and that that information would be in the hands of every liquor dealer in Massachusetts between now and election day.

This bill was the most bitterly contested measure before the legislature of 1910. The "temperance" people, the churches and the settlement-house workers united in its support. The liquor interests fought it tooth and nail. It was enacted in the senate, 29 to 17, on a roll call, but the body had refused to send it to the next general court by exactly the reverse vote, on May 2. Governor Draper signed it immediately upon its reception, the next day, May 3.

The act took effect upon its passage, which was subsequent to the issuing of licenses for the year 1910, so that it will, in no respect, become operative until 1911. If a repeal bill should become law, the liquor men would gain all that for which they fought so hard last year, and the temperance and other friends of the measure would have lost all. The liquor men have made no secret of their attempt to defeat those members of last year's legislature who voted for the bill and are candidates for reelection, and in the case of new members to elect those who would favor a repeal bill. This, however, is the first report that they might oppose Draper.

WEDLOCK BY SCIENCE.

This, And Not Church, Should Govern, Says Rabbi Fleischer. Boston, Oct. 27.—Rabbi Charles Fleischer of the Temple Adath Israel, whose ideas as to divorce are widespread, declares that science, and not the church, should rule wedlock.

"Marriage is a matter which should come under the domain of science rather than under the domain of religion," he says. "There is no more reason why a minister should marry a couple than why a doctor should marry them. I wish to emphasize the physical, mental and spiritual fitness of those about to marry as among the most beautiful and most necessary of our duties.

"As for divorce, it will be a necessary evil just so long as people disregard the necessity of complete mutual fitness before they marry. As for universal divorce, as it has been called, I should tolerate that only because the present laxity with regard to marriage fitness is so great that divorce is and must be a necessary evil.

"It is better to be well divorced than to remain badly married. There is no more reason why the church should object to a necessary divorce than that it should object to an inauspicious marriage.

"The church, perhaps more than any other institution, has been backward in accepting the truths which are proclaimed by science. In this it has erred on the wrong side. Science is, or should be, the friend of religion, rather than its enemy."

PERFECT TISSUE BUILDER.

There is no known drug that will add in the slightest degree to the strength or vigor of the human body, and no "tissue-builder" on earth except food, writes Dr. Woods Hutchinson in the Woman's Home Companion. The only universally reliable "bracer" is exercise.

No Reason For Doubt

A Statement of Facts Backed by a Strong Guarantee

We guarantee complete relief to all sufferers from constipation. In every case where we fail we will supply the medicine free. Rexall Orderlies are a gentle, effective, dependable and safe bowel regulator, strengthener and tonic. They re-establish nature's functions in a quiet, easy way. They do not cause any inconvenience, griping or nausea. The are so pleasant to take and work so easily that they may be taken by any one at any time. Charlton & Kuenzli ARCHITECTS. MARQUETTE, - - MICH. of frost and of freezing weather turned the market higher, but the bear crowd did not cover as freely as they will have to do if the predictions are verified.

Chicago Wheat. Chicago, Oct. 27.—So far as May wheat was concerned, it was a standoff at the close. December closed heavy on a reaction to 93 3/4, a fraction lower than yesterday. The early selling was on the correct theory that many of the local shorts covered in yesterday's market, and that selling pressure would be in evidence at the outset, in line with an easier corn market, based on bright weather conditions. The chief bull feature was the drop to 76 cents in Du-hull receipts. The large interests in the trade were fairly evenly divided between the buying and selling sides, both early and late, but the prospects of some of the mills closing down at Minneapolis because of the inability to get shipping directions on flour, and the bearish foreign news, gave a heavy and tired market at the close.

EDNA LOFTUS, CAFE SINGER. San Francisco, Oct. 23.—Edna Loftus, the English musical comedy actress, accepting the challenge of Mrs. John Rheinstrom of Cincinnati, has obtained employment for the purpose of meeting the expenses of her husband, Harry Rheinstrom, at a Fruitvale sanitarium, where he has been undergoing treatment for a nervous condition. The young woman has signed a contract with a downtown cafe for a highly concert each evening for six weeks. Her engagement opens next Saturday.

DEVILFISH CRIPPLES SHIP. Seattle, Wash., Oct. 27.—The halibut fishing steamship Chicago has put in here with the rudder and propeller shafting lost as a result of an encounter with a devilfish. The creature's tentacles were eighteen feet long and these seized the stern of the vessel as she was moving and became badly entangled in the propeller. The engine had to be reversed to disentangle the propeller, but the strain was so great that the rudder pin in the shoe of the keel was loosened, and after that every time the wheel was put over the strain on the loose rudder set the ship vibrating so violently that even the compass was put out of commission. The steamer went into drydock at once. The end of one of the devilfish's tentacles was found still adhering to the shoe of the keel when the men started to repair the damage.

New York Cotton Market. New York, Oct. 27.—Liverpool turned buyer before we opened and it is evident that the spinner is more anxious to buy cotton than he will admit. This change of heart in the Liverpool market caught our market short, and the bulls were not disposed to be merciful, as they had passed a restless night and needed some compensation therefor. The predictions

Friday and Saturday Sale Extraordinary of High-class tailored Waists. We have just received a big shipment of beautiful plain tailored and trimmed Waists, made in the highest class workmanship; nicely finished in plain white and black and white stripes, laundered collar and cuffs; a very good \$1.25 value, special 98c. ### CANDIDATES CALL ON ISHPEMING VOTERS

Nominees on Democratic National and State Tickets in City Yesterday.

Adolph W. Peterson, of Ironwood, G. T. Werline, of Nadeau, and John Wickstrom, of Norway, three prominent upper peninsula Democrats, and all candidates for office, were in Ishpeming yesterday. Mr. Peterson is the nominee for secretary of state, Mr. Wickstrom is running for senator in the Thirty-first district, and Mr. Werline is his party's nominee for congress in the Twelfth congressional district.

Mr. Peterson is in the insurance and real estate business at Ironwood. Mr. Werline also conducts a real estate business, and is also farming at Nadeau. He was formerly in the hardware business there. Mr. Wickstrom conducts a general mercantile business at Norway.

The candidates are making a tour of the principal cities and towns in the upper peninsula. In Ishpeming yesterday they spent most of their time calling on the businessmen. They considered holding a public meeting for a discussion of the issues of the campaign, but inasmuch as the voters seem to be taking very little interest in politics the plan was given up. Mr. Werline expressed the belief that a light vote will be cast in the Twelfth district unless interest is rapidly aroused among the voters.

Up to this time arrangements have been made but for two rallies to be held here prior to the election—to the evening of Thursday, Nov. 3, and Monday, Nov. 7. Congressman H. O. Young will be the principal speaker on the 7th.

FUR EXHIBITION.

A representative of the Gordon-Ferguson company of St. Paul will be at our store today with a beautiful line of high grade furs. We will be pleased to take any special order and we cordially invite you to inspect this line. (10-27-11) N. E. SKUD.

"THE GOLDEN GIRL."

Popular Musical Comedy Attraction Coming Next Month.

The managers of the theaters in the iron and copper circuits have about completed negotiations for the popular musical show, "The Golden Girl." The date in Ishpeming will probably be Thursday, Nov. 17.

"The Golden Girl" is said to be one of the best of the late musical comedy productions. The company is a large one and some well known players are included in the cast. The production is a "Broken Idol," the attraction at the Ishpeming theater Wednesday evening, was greeted by a large audience. Nearly every seat in the house, including many in the boxes, were sold. The audience was enthusiastic, and many eulogies were demanded.

FUR EXHIBITION.

A representative of the Gordon-Ferguson company of St. Paul will be at our store today with a beautiful line of high grade furs. We will be pleased to take any special order and we cordially invite you to inspect this line. (10-27-11) N. E. SKUD.

MRS. ADAMS POPULAR.

Former Ishpeming Pastor and Wife Tendered a Reception in Calumet.

Mrs. C. L. Adams, wife of Rev. Adams, pastor of the Calumet Methodist Episcopal church, has already taken a prominent place among the ladies of the church. Mrs. Adams has made a very pleasant impression on the ladies and other members of the congregation and outside of the congregation who have met her, says the Houghton Gazette. Rev. and Mrs. Adams were formally presented to the Calumet M. E. congregation and the friends of the church last Saturday evening, when a reception was held at the church in their honor.

The evening was very pleasantly spent. The reception was attended by hundreds of members of the church and others.

First there was a musical and speaking program, held in the church auditorium. Stanley Martin gave the organ voluntary, and the Misses Mildred Rensdahl and Lillian Wright sang solos. One of the most beautiful numbers was a solo by Harry E. King. Short addresses were made by Rev. Adams and members of the congregation. Mrs. Adams was welcomed in the name of the ladies of the church by Mrs. John Gregg and replied in a pretty talk of compliment and wit.

Following the program refreshments were served in the church parlors. Here Rev. and Mrs. Adams received their new friends.

FUR EXHIBITION.

A representative of the Gordon-Ferguson company of St. Paul will be at our store today with a beautiful line of high grade furs. We will be pleased to take any special order and we cordially invite you to inspect this line. (10-27-11) N. E. SKUD.

TO RE-OPEN ALLEYS.

The Bank street bowling alleys and billiard hall will open tomorrow morning for the fall season, under the management of John Grey. The place has been closed since early in June. Mr. Grey has been working there for some days past getting both the alleys and billiard and pool tables in first-class condition. It is intended to organize several bowling teams that will participate in contests with the Marquette and Negaunee teams.

"IT BEATS ALL"

This is quoted from a letter of M. Stockwell, Hannibal, Mo: "I recently used Foley's Honey and Tar for the first time. To say I am pleased does not half express my feelings. It beats all the remedies I ever used. I contracted a bad cold and was threatened with pneumonia. The first doses gave great relief and one bottle completely cured me." Contains no opiates. The People's Drug Store.

### DEATH OF MRS. VICKLUND.

Old Resident of Ishpeming Passed Away Yesterday Morning.

Mrs. Andrew Vicklund, of North Third street, who had been a sufferer from diabetes for three years or more, died yesterday morning.

The deceased came to America in 1869, locating at Red Wing, Minn., where she was married in that year. Her husband survives her. In 1874 they moved from Red Wing to Ishpeming and have resided here ever since. The deceased was the mother of five children, all of them being dead. A brother, John Samuelson, lives in Calumet, and two sisters, Mrs. John A. Skoglund and Mrs. P. Anderson, reside in Minneapolis. All were former residents of Ishpeming and they are expected here to attend the funeral, which will be held on Sunday afternoon at 2 o'clock from the Swedish Lutheran church.

SIX-TEAM LEAGUE.

Many Members of I. M. C. A. Will Play Indoor Baseball This Winter.

Since the organization of four indoor baseball teams among the senior members of the Young Men's Christian association, a sufficient number of ball players have signed their intention of joining the association to warrant the organization of two more nine.

As many of the members of the teams scheduled to play Wednesday evening had other engagements, the games were postponed. Scrub teams played a fast ten-inning game to a tie, 12 to 12.

FOOTBALL TOMORROW.

The Y. M. C. A. football team will go to Marquette tomorrow afternoon to meet the Guild Hall eleven for the third time this season. The members of the Ishpeming team will meet this evening for a signal practice in the gymnasium. This will probably be the last game of the season between these eleven, and the winners will be declared the champions of the county.

BIG HALLOWEEN PARTY.

The arrangement committee for the Halloween party, to be given next Monday night in Braastad's Hall, under the auspices of the newly organized society of Owls, is making extensive preparations for the event. The members of the Marquette lodge and their ladies will be expected from that city. The decorations will be a unique feature. Trombones and orchestra of six pieces will furnish the music.

ISHPEMING IN BRIEF.

Mrs. A. Ellstrom submitted to an operation at St. Mary's hospital, Marquette, one day this week.

"The Fighting Parson," a pastoral comedy drama, will be the offering at the Ishpeming theater this evening. Popular prices will be charged.

The Uniform Rank of Zenith lodge, Knights of Pythias, conducted a Halloween party last night at Braastad's Hall. The dance was large and attended in spite of the inclement weather. The hall was prettily decorated.

James F. Viggias, manager of the Gately-Wiggins store, yesterday spent the day in the city, looking over the business of the local house. He left last night for Iron Mountain, where he will spend today, and will then return to his home in Calumet.

O. Ayoote, who owns the dwelling on Division street, between the Jacobs and Cole properties, intends to thoroughly remodel it. The families that have been occupying it for some time past are now moving out, and the improvement work is to be started immediately.

A special meeting of the Ishpeming branch of the American Yeoman society was held last evening, when arrangements were completed for the funeral of the late Ludwig Larson, to be held Sunday afternoon at 2 o'clock from the Swedish Methodist church. The deceased was a member of the society.

Sir Thomas Shaughnessy, president of the Canadian Pacific Railway company; W. F. Fitch, president of the Duluth, South Shore & Atlantic Railway company; and several other prominent officials passed through Ishpeming yesterday morning by special train, enroute from Duluth to Marquette.

The fur exhibition at N. E. Skud's store will be continued today. Although the weather was very unfavorable yesterday, many people called to look over the goods shown by the representative of the Gordon-Ferguson company of St. Paul. H. J. Hinde, manager of the store, yesterday said that the display is by far the finest they have ever shown.

From three to five inches of snow fell here yesterday and for a time it looked as though there would be good sleighing but the snow began to disappear late in the afternoon, when there was a rise of from five to ten degrees in the temperature.

The young people of the Swedish Mission church will conduct a ten-cent social in the church Friday evening, Oct. 28. A program will be given after which refreshments will be served. The program commences at 8 o'clock.

Several Norwegian Lutheran ministers and laymen, who are in attendance at the convention of the Ishpeming district, which opened last evening at the Norwegian church, on Ridge street, arrived in the city yesterday. There will be business meetings this morning and afternoon, and a general meeting will be held this evening. There will be three meetings tomorrow and three Sunday. The final service in the evening will be conducted in English.

### D. T. Morgan & Co's Letter.

The New York market showed much improvement today, and while not broad, gained in strength steadily from the opening until advances ranging from 1 to 2 1/2 points were recorded. Union Pacific, Steel and Amalgamated were the features. New York regarded the recent decline as but an interruption in an upward movement which will go much farther and advise buying Union Pacific. The Boston market was very narrow, but strong. There was a fairly good market in Lake and North Busted, resulting in advances of 3 and 1 1/2 points respectively. The advance of these two stocks indicates recoument in both. Shannon sold up to 13 and will be higher. Greene Cannons was in demand and we look for a sharp advance called a point. The market is under control of large interests and advances meant by the market are the easier money market on a clearer political outlook we shall see a strong bull market and the highest prices of the year. The cures were quiet, with the exception of Cactus, which was heavily sold and declined to 25. China and inspiration were firm. The others were dull and practically unchanged.

### George F. Ruez's Review.

The New York market followed the higher quotations set over from London this morning, and as the day progressed the demand for stock increased and the prices at the closing were the high of the day. Steel common, American Smelters and Amalgamated were the leaders in New York. Steel touched 80, Smelters 81 1/2 and Amalgamated advanced from 65 to 70 1/2. The Boston coppers were very strong and active all day. North Busted advanced from 32 to 34 1/2. Lake from 39 1/2 to 38 1/2. Hancock from 25 1/2 to 27 1/2. Shannon from 12 to 13. The buying of Shannon was excellent. It is reported that the annual statement to be issued soon will show the best results ever obtained in costs and grade of ore. The cures were only fairly active. Inspiration is beginning to show signs of life again. Live Oak was also in good demand but very little, which was heavily sold and declined to 25. Selling at 25 cents. A new low mark.

### Upper Peninsula

#### Opening Gun to Be Fired Late—

The opening gun of the campaign at the Soo will be fired next Monday evening when the Hon. H. O. Young of Ishpeming and Thomas W. Nadal will speak in the city hall. Mr. Nadal is dean of Olive college and Chairman Knox of the state central committee writes that he is one of the best speakers now stamping the state for the Republican ticket. There has been a paucity of speakers and enthusiasm so far, but it is expected that the meeting Monday evening will arouse interest and that the wind-up of the campaign will find every Republican in harness and out working for the success of the full ticket.

#### Jury Unable to Agree—

Orson LaSalle, of Escanaba, who on Aug. 11 made a desperate attempt to murder his wife at the home of the family and who succeeded only in injuring his wife and daughter, after a bloody encounter with a revolver, was not convicted of any offense when tried in circuit court this week. The members of the jury, who had been sworn to render their verdict according to the law and the evidence, reported that they were unable to agree upon a verdict. The

### Typoid at Escanaba—

City Chemist Dr. A. J. Carlson announces that the people of Escanaba, to be on the safe side, should boil the city water. Analysis of the water here has shown slight indications of typhoid germs. Dr. Carlson says: "The last two analyses have not been what I would desire. They were not bad, but I would advise all users of the water to boil it for at least half an hour before using. I have recently inspected the filtering plant of the Escanaba Water company and I consider that the company is doing everything possible to make the water pure. The plant is certainly modern and the best that could be secured. How the typhoid germs filter through I am yet unable to determine. There is considerable typhoid fever in the city."

### Will Have a Fine Yacht—

Grant T. Stephenson, superintendent of the Mashek Chemical Iron company of Wells, Delta county, is building what will be one of the finest yachts in the upper peninsula. The craft will be fifty feet in length and will be modernly equipped with all conveniences. Mr. Stephenson has secured a special barge from Gill's Rock, Wis., who is in direct charge of the construction of the boat.

Edison records for November now on sale at Grinnell Bros. (10-27-24)

court had instructed them that they might find the defendant guilty of assault with intent to commit murder; assault with intent to commit great bodily harm, or assault and battery. It is understood, although no official announcement was made by the jurors, that eight of the number stood for conviction on the major offense and four stood for conviction of the charge of assault with intent to commit great bodily harm. Conviction on the first charge would have resulted in imprisonment for any term up to life imprisonment, while conviction on the second charge would have resulted in a sentence of not more than ten years in the penitentiary. The defendant had taken the stand and had pleaded guilty that he was intoxicated when he fired the shots. He will be tried again.

### "Wolf" Said to Be a Dog—

It is reported at Escanaba that officials of Delta plan an investigation to determine whether the alleged wolf killed by George Kjalberg near the west city limits was not in fact a dog. Information has come to the notice of the county officials that the animal was nothing more than an ordinary canine, and it is said that proceedings may be started against the man who claimed the wolf bonny. It is claimed that a Flat Rock farmer missed his dog and that on visiting the home of the alleged wolf killer he identified the "wolf" as his pet. The county officials who paid over the bounty to Kjalberg are at sea in the matter.

### Farm Labor Scarce—

It is said that Chippewa county could use about two hundred men in its agricultural labors this fall and if it would be possible to get them the farmers would be satisfied to pay big salaries. Owing to the fact that frost has not been so deep or so prevalent the past couple of years the farmers have large crops in the ground for the winter which need some attention. The fall plowing, manuring, threshing and pressing also need men and although the employment bureaus are trying to obtain them it seems that they have already looked for the crops. It is reported that many farmers, rather than see their crops go to waste, are keeping their boys out of school to raise the vegetables and in other ways help on the farm. Commissioner Easterday has for the time being ceased to enforce the law in rural districts which makes it mandatory that up to the age of sixteen years children must attend school, except in very extreme cases. Mr. Easterday said this week that "until the frost had entered the ground to stay the farmers might keep their larger boys out of school, rather than have the crops perish."

# Banking Service

When the rooms equipped by this bank were planned, no detail was omitted which could in any way add to the efficiency of the service which the bank renders. Every modern device that aids in promptness and courtesy has been installed, and careful attention has been given to the selection of men adapted to the work which they are called upon to perform.

You are cordially invited to avail yourself of the unexcelled services which this bank affords.

### SAVINGS DEPARTMENT.

Saving deposits of \$1.00 or more are cordially invited and interest is allowed on the money at the rate of 3 per cent, compounded twice a year. Try saving a part of all the money that comes into your hands. Many of the substantial fortunes in this country have been started by careful saving. A little money in the bank is always a safeguard against misfortune and sickness.

### BANKING DEPARTMENT.

Accounts subject to check are invited in any amount, enabling our depositors to protect the money which they have on hand for personal or household expenses against loss by fire, burglary or other mishap. When you deposit all of your money and pay for all expenses by drawing your own personal checks, you always have receipts for your payments and do not have to pay a bill the second time.

### LOWER STATE NOTES.

**LANSING**—Dairy Food Commissioner C. C. Little has called a meeting of the board which has in charge the enforcement of the law relative to pure drugs. The board consists of Dairy and Food Commissioner Little, President William A. Dolan of the state board of pharmacy and President Angus McLean of the state board of health. The meeting is for the purpose of formulating methods for enforcing the provisions of the law and acting upon the findings of the inspectors who have been making an investigation of drug samples.

**HOLLAND**—The people of Holland, under the direction of the churches, will circulate forty petitions for signatures asking the postmaster general not to have the postoffice open at this place on Sunday. The petitions declare that few people patronize the postoffice on Sunday and that the custom deprives the postoffice officials and clerks of a day of rest. These petitions follow a general attack from the pulpits in which the members were secured for rushing from the house of worship to the postoffice to get their papers and business letters.

**PONTIAC**—Fred W. Corbett, prohibition candidate for governor, closed a two days' campaign in Oakland county with an address to a large crowd of men on the street here. In his address he said: "Mr. Osborn has been heartily endorsed by the liquor element in the Republican party. Three years ago when an attempt was made to put a prohibition clause in the state constitution Mr. Osborn, ex postulated with all his power. Last spring during the local option fight in Ingham county, Mr. Osborn again opposed all prohibition measures, but we won out even against him and have a dry capital in the state of Michigan. Now it is up to the people of the state of Michigan to put in a party in accordance with the situation at Lansing."

**CHARLOTTE**—Charles Eddle, aged seventy-five, a veteran of the Civil war and an old resident of this city, was badly hurt by being dragged by a cow which he was leading to pasture. His hip was dislocated and he suffered severe internal injuries.

**PONTIAC**—The warmest political battle the Oakland county has seen since the days of Sheriff Brewster, Democrat, is

now being waged here. The fight centers on the positions of sheriff and prosecuting attorney. Politics of the old style is entirely the rule. Sheriff Harris subjected himself to criticism by omitting his September account from the October bill presented to supervisors. Democrats at once charged that the omission had a political significance inasmuch as the sheriff was apparently endeavoring to show economy in his administration. The matter ended by the supervisors requiring the sheriff to present the whole account. Next a broadside was fired at A. L. Moore, Republican nominee for prosecuting attorney concerning Moore's alleged misdealing in a factory project here seven years ago being circulated about the county. Moore has denied the charges and promised explanation.

**CADILLAC**—Tom Murray, of Parkdale, Manistee county, met death in the forest near Hoxsiville, this county. He had been "swamping" near two woodmen who were felling a tree. Just before the tree fell the woodmen thought they saw Murray pass out of range. Not for an hour afterwards, while they were cutting branches from the tree did they find Murray crushed to death under the heavy trunk. He was probably killed instantly. He was sixty years old.

**MONROE**—About 150 people, including the mayor, members of the common council, supervisors and farmers of Monroe county, gathered in the room of the Merchants & Manufacturers' association and discussed the proposed construction of a Detroit-Monroe-Toledo boulevard. George S. Ladd, past master of the Massachusetts State Grange and an authority on good roads building, addressed the meeting, speaking not only of methods and materials but also on the cost of constructing good roads. Preliminary steps were taken toward an organization to further the boulevard project.

**MT. CLEMENS**—Wounded in fifteen places by knife thrusts and weak from loss of blood, Art Vanberverslays, a Belgian laborer, refuses to make any complaint against his assailant, Frank Stein, who was arrested but released later. The two men met in a saloon at the outskirts of the city and remained there until late in the evening. They began a dispute which ended in their being ejected from the place. Later they met on Floral avenue. Stein asserts that

## Negaunee Department

### FIRST SNOW STORM OF THE SEASON

Touch of Winter Caused an Unusual Demand for Footwear and Seasonable Goods.

Negaunee people had the first real touch of winter yesterday, when more than four inches of snow fell. It began snowing about 6:30 in the morning, and continued practically the entire day. With the temperature from thirty to thirty-five degrees, much of the snow disappeared as soon as it fell.

Last season's first snow storm took place on Oct. 13. There was a heavy fall of snow and hail, with a strong wind blowing on the 12th in various parts of the Northwest. A sufficient amount of snow fell in the copper country to put wagons out of commission. Up to yesterday very few Negaunee people made any preparations for winter, with the exception of getting in their fuel. The weather had not been cold enough at any previous time to cause the people to put on their storm windows, but this work will now be started.

The leaves on many of the trees are still green, as there has been no frost to speak of. The farmers have had an unusually favorable fall for the harvesting of their crops. Last year the work was delayed in October because of the weather. Many of the Negaunee farmers did not dig their potatoes last year until early in November. There was finer weather during November than in October and several of the farmers did plowing as late as Dec. 7.

Yesterday's snow storm caused an unusual demand for footwear, and winter clothing. The Negaunee merchants have had their rubber goods in for some time, but some of them were not unpacked until yesterday morning. Rubbers are now selling at higher prices than at any previous time. The wholesale prices have been going up gradually every year for the past eight or ten years. The increase the past two years has been about 25 per cent. The unusual demand for crude rubber is said to be responsible for the increase in the wholesale prices. The Negaunee dealers in clothing, dry goods and furnishings anticipate a record breaking business this winter. Their stocks are the largest they have ever carried.

The Negaunee fuel dealers are now having the largest demand for both wood and coal that they have ever experienced at this time of the year. All have been working extra men and teams for more than a week past.

### OVER 1,000 LOTS SOLD.

Rush for Locations Not as Great Yesterday as on Wednesday.

While a number of people visited the cemeteries yesterday to make their selections, the rush was not as great as on Wednesday. More than 600 lots were selected in the Catholic cemetery the first day, and over 400 in the city cemetery. The charts will be at the city building today. All of the lots taken are marked with red stakes. The charts of former residents of the city were here either Wednesday or yesterday to select lots and to make inquiries regarding the transfer of the remains of deceased relatives. Among the visitors were Gordon Murray, mayor of Norway, and his son, Gordon J. Murray, postmaster at Michigan; Captain John Christopher, also of Michigan, and Nels Hemmingsen of Green Bay. The latter left Negaunee twenty-three years ago and has been a resident of Wisconsin ever since. He is now engaged in farming. Mr. Hemmingsen is the father of Hans Hemmingsen, of Marquette, who resided here for many years.

The business of both the Catholic and City cemeteries will be handled by City Recorder W. H. Mische, under the direction of the cemetery committee of the council. Both burial grounds will be maintained by the city and all moneys received for lots will be placed in the cemetery fund. The council will build a chapel next spring. It will be located close to the city street. The city also plans to build a road from opposite the entrance to the South Shore and Lake Superior & Ishpeming railway tracks, about 300 yards to the

### The Cause of Many Sudden Deaths.

There is a disease prevailing in this country most dangerous because so deceptive. Many sudden deaths are caused by it—heart disease, pneumonia, apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, causing catarrh of the bladder, brick-dust or sediment in the urine, head ache, back ache, lame back, dizziness, sleeplessness, nervousness, or the kidneys themselves break down and waste away cell by cell.

Bladder troubles almost always result from a derangement of the kidneys and better health in that organ is obtained quickest by a proper treatment of the kidneys. Swamp-Root corrects inability to hold urine and scalding pain in passing it, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night. The mild and immediate effect of Swamp-Root, the great kidney remedy is soon realized. It stands the highest because of its remarkable health restoring properties. A trial will convince anyone. Swamp-Root is pleasant to take and is sold by all druggists in fifty-cent and one-dollar size bottles. You may have a sample bottle and a book that tells all about it, both sent free by mail. Address, Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper. Don't make any mistake, but remember the name, Swamp-Root, and don't let a dealer sell you something in place of Swamp-Root. If you do you will be disappointed.

**THE JUNIOR PARTNER.**

How He First Came, Unconsciously, to Find Favor With His Employer.

"Our junior partner," said a business man "came to us as a boy. We had two boys at that time, both equally promising, but one of these boys has since risen only to be a junior clerk in our shipping department, while the other has now become our junior partner. How did we come to know which was which? I will tell you.

"When I came down to the store one morning, I found one of the boys sweeping the sidewalk and he was sweeping against the wind. Dust and litter blowing back over the space he had swept, and he going back to sweep it up again. Nice boy and meant well, but lacked the kindling spark of quick intelligence. It didn't dawn on him that he was sweeping the wrong way.

"Next day I found the other boy sweeping and he was sweeping the right way, with the wind. No dust and litter blowing back, to be taken up again with him. He was sweeping the sidewalk cleaner, making a better job of it, and in half the time. Even at that age the boy had good sense and intelligence, a faculty for doing things the right way, and this faculty he developed more and more strongly as he went along."

### FIRST BURIAL TODAY.

Remains of Mrs. Catherine Brandt Will Be Interred in New Cemetery.

The funeral of the late Mrs. Catherine Brandt, who died Tuesday afternoon, will be held this morning 9 o'clock from St. Paul's church. Joseph Brandt, son of the deceased, and his wife, arrived yesterday morning from Proctor, Minn., and Frank Brandt, another son, came later from Milwaukee. Interment will be in the new Catholic cemetery. It will be the first burial there.

The late Mrs. Brandt was one of Negaunee's first settlers. She saw the passing of the original cemetery, located near Thomas Pellow's home, on Main street, and which was abandoned early in the seventies, shortly after St. Paul's church was erected. The deceased was one of the city's best known and most highly esteemed women. During the early days she conducted a boarding house and among those who boarded with her for several years was the late Edward Breitung. Mrs. Brandt's husband lost his life many years ago while sinking a well, the ground having caved in on him.

The remains of E. LeBeau, another pioneer resident of Negaunee, who died Wednesday evening at St. Mary's hospital, Marquette, will also be interred in the new Catholic cemetery, the funeral taking place tomorrow morning from St. Paul's church. For many years the deceased conducted a blacksmith business at his property on Pioneer avenue, where Peter Chiverette now has a shop. Mr. LeBeau had been in failing health for some time, especially since the death of his wife last January. Several of the members of his family living outside of the city arrived yesterday, while others are expected today.

### TOUR OF COPPER COUNTRY.

Paul Honkavara, the well-known resident of Palmer, and his daughter, Miss Ida, arrived home yesterday from the copper country, where they spent several days. Mr. Honkavara shipped his White Steamer touring car to Houghton by train and he and his daughter, and W. C. Mannis, upper peninsula representative of Charles H. Werner & Co. of Detroit, used it in making a tour of Houghton and Keweenaw counties. The party covered several hundred miles and they visited every point of interest in both counties.

Furniture, upholstery and hair mattresses made over by Franklin Wade, at Swanson & Person's store. Both phones, (9-1-1f)

### LOCAL LACONICS.

"The Fighting Lacon" was greeted by a fair-sized audience last night at McDonald's opera house.

H. C. Work, the well known representative of the National Biscuit company, called on his patrons in Negaunee yesterday.

L. A. Swanson, the plumber, and his family, have taken up their residence in Andrew Carlson's new dwelling, on Heath street.

The funeral of the two-year-old son of Gust Eskala, of the South Jackson locality, who died Monday, was held Wednesday afternoon.

The Negaunee lodge of the Fraternal Order of Elks has received an invitation to attend the annual memorial exercises at Ishpeming in December.

The funeral of the late E. LeBeau, will be held from St. Paul's church Saturday morning at 9 o'clock. The remains will be kept at Marquette until that time. Interment will be in the new cemetery.

Max Faust, the contractor, who is erecting Mrs. D. McDonald's new home on Oak street, is now doing the interior finishing work and he expects to have the dwelling ready for occupancy within four or five weeks.

Negaunee people who attended the production of "A Broken Idol" at the Ishpeming theatre Wednesday evening, were well pleased with the entertainment, and many of them declared that it was one of the best attractions of its kind that they have ever seen in the county.

The Halloween dancing party, announced for next Monday evening in the Scandinavian society's hall, under the name of the "N. H. S. Girls," has not been sanctioned by the school authorities. If the party is to be given by any of the high school girls they are acting of their own initiative. Superintendent Schurtz said yesterday that the high school girls are not permitted to give public dancing parties outside of the school building.

### FORCED TO LEAVE HOME.

Every year a large number of poor sufferers whose lungs are sore and racked with coughs are urged to go to another climate. But this is costly and not at all sure. There's a better way. Let Dr. King's New Discovery cure you at home. "I cured me of lung trouble," writes W. R. Nelson, of Calamine, Ark. "when all else failed and I gained 47 pounds in weight. Surely the King of all cough and lung cures." Thousands owe their lives and health to it. Its positively guaranteed for Coughs, Colds, LaGrippe, Asthma, Croup—all Throat and Lung troubles. 50c and \$1.00. Trial bottle free at The Stafford Drug Co.

### NOTICE TO CONTRACTORS.

Bids are now asked for the alterations and repairs to the Urban House, Ishpeming, Mich. Plans and specifications can be seen at Charles & Kusmi's office, Marquette, also at the Urban House, Ishpeming. A. E. KOEPECK, Executive.

Good results always follow the use of Foley's Kidney Pills. They contain just the ingredients necessary to tone strengthen and regulate the kidneys and bladder, and to cure backache. The People's Drug Store.

### Republic

Mrs. Toms, wife of Dr. Toms, of Big Bay, is visiting with her parents, Odel Lauroux, and wife.

W. F. Tobin spent Tuesday in Ishpeming, on business.

Mrs. W. Saw, of Negaunee, stopped off for a few days' visit with Al Hocking and family, while returning from Iron Mountain, where she visited with her daughter, who is teaching school there.

Dr. H. W. Price has moved his dentistry fixtures and office to Detroit.

The funeral of the late Mrs. Isaac Lascoux was held Wednesday afternoon from the Finnish church. The deceased was twenty-eight years old and is survived by her husband and four small children, the youngest of which is only three days old.

Postmaster Eric Erickson is able to be around with the aid of crutches, after being confined to his bed for some time with an injured leg.

Two teams are now working at the Kloman, loading cars from the stockpile.

A steam shovel is now working at the stockpile of the West Republic mine. The Barnum-Raffles Hypnotic company pleased large audiences at the town hall the forepart of the week.

Thomas Connolly has engaged Joe Grebo to cook at his lumber camp near Witbeck this winter. Mr. Connolly will start a crew of men working at the camp Monday.

Tate Selenthal, of Doris, visited with relatives and friends here Saturday and Sunday.

The local lodge of the Knights of Pythias is making arrangements for a banquet to be given soon.

Will St. Onge and family are here from Cobalt, Canada, where they spent the past year. Mr. St. Onge intends to locate in Republic.

H. A. Amen, representative of the Annen Biscuit company of Green Bay, Wis., called on the local trade Wednesday.

George Baron, of Champion, visited with Republic friends the forepart of the week.

J. F. Mullins, of Ishpeming, was a business visitor in Republic last week. Sam Wilkins and Miss Ida Schmidt were united in marriage Wednesday at the home of the bride's parents on Republic avenue. The groom was supported by Herman Schmidt and Miss Laura Wilkins was bridesmaid. The house was prettily decorated. A number of handsome gifts were received. The young couple will make their home in the residence formerly occupied by Mrs. Polkinghorn, which is already furnished.

### TRAPPING LAND ADDERS

When They Hunt the Hoptoads That Hunt the Flies.

"Along the ocean shore," said the man who has lived there and knows it's life "there may be more or less stuff cast up to the beach which may be of such sort as to attract flies and hoptoads come down to catch the flies.

"Back on the higher ground, in the wire grass, there may be sand adders, sometimes called house snakes. You know the sand adder? It is a very pretty little snake, maybe two and a half feet long, dark brown on its back, with oval black spots having a brown center. Men sometimes use the sand adder's skin for a hat band.

"The hoptoads come down to the beach to catch the flies, the sand adders come up to catch the hoptoads and go down to catch the hoptoads, and as a youngster I used to set traps to catch the sand adders.

"You take any small square box and make a hole in the top and one in the side, covering them over with scraps of netting, these holes being to look through, and then you put inside the box a hoptoad.

"The sand adder comes along and sees or smells the hoptoad through the open hole in the side of the box and then it slides smoothly through the hole inside, and then pretty soon the sand adder would have the hoptoad inside of it. But then the sand adder would be in a fix.

"Of its normal size it could get

# PROCESS OF GAS MANUFACTURING

Method by Which Coal Is Transformed Into Gas and Coke Not Generally Understood—Visit to Plant in South Marquette Proves Very Interesting.

Gaseous Vapor Is Obtained by Baking Coal in Intensely Hot Ovens, After Which Tar, Ammonia and Sulphur Are Extracted, to Make Commercial Product

Nearly everyone uses gas for cooking, heating or lighting, but comparatively few persons have any idea how it is manufactured or even what it is made of.

Most people know that there is such a thing as a gas plant on Lake street in South Marquette, but that is about the extent of their knowledge of where and from what the gas furnished by the Marquette Gas Light company is manufactured.

There are two kinds of manufactured gas commonly in use in the cities of this country, coal gas and water gas. That furnished by the Marquette company is almost entirely coal gas, though the plant includes apparatus for manufacturing water gas, which can be put into commission on short notice in cases of emergency.

Soft coal of good quality is the basic material from which coal gas is made. Soughlight, mined in Pennsylvania, being the best coal for this purpose. This coal is baked in air tight, fire clay ovens, until all gaseous elements have been vaporized, and it is these gaseous elements, purified, that constitute coal gas.

The residue left in the ovens is known as coke. The volume of coke left in the ovens after the gas has been extracted is practically the same as the original coal, but it has decreased in weight by almost one-half.

In addition to the elements that make coal gas suitable for commercial and household use, the gas vaporized from the coal in the ovens contains tar, ammonia and sulphur in varying amounts and proportions, depending upon the quality of the coal used. Before the gas reaches the storage tank from which it enters the city mains, these substances are extracted by the crude product being forced through a series of pipes and tanks.

After rising from the ovens, it first passes through a force pump into a water condenser and an air condenser, the purpose of which is to cool the gas, and in this process some of the tar solidifies and is deposited. It then passes into what is known as the "scrubber," one of the most important of all the processes. The scrubber is a large tank, filled with coke, through which water filters constantly, and the gas rises from the bottom to the top of the tank, its specific gravity being less than that of air.

By this process, nearly all of the tar and ammonia are removed and filter through the coke into an immense underground tank below the scrubber. The ammonia can be condensed from this tank and sold as a commercial product, but at the Marquette plant the amount obtained is so small that it is not utilized. The tar collects in the underground tank and from there is piped into cars and sold as a commercial product. Tar, next to coke, is the most important by-product of gas manufacturing.

From the scrubber, the partially purified gas passes into two more large tanks, which contain iron oxide and shavings. The iron oxide serves to take out what sulphur is in the gas and it also has an affinity for any ammonia that may have remained after passing through the scrubber. The gas is then commercially pure and is forced through a large meter into the storage tank, or holder, from which it is distributed throughout the city.

From the time the gas leaves the ovens until it leaves the storage tank, it is "water sealed," that is, surrounded by a jacket of water. Water and gas will not mix and it holds gas confined better than iron pipes, while at the same time it condenses many of the not wanted substances. Any dampness noticed in gas is due to damp air, not to water, as gas will not mix at all with water. The storage tank is covered with a three-inch layer of water, which also acts as a weight to force it through the mains. Additional pressure, when necessary, is supplied by a force pump, of the same character as that used to force the gas from the ovens to the storage tank.

Coke Manufacture. Coke is used for fuel to heat the ovens in which the coal is baked, as it affords the intense heat required, and about half of the residue from the ovens is utilized by the plant, for use in furnaces, forges, etc. Before being sold, the coke is put through a crusher, which sizes it to the proper dimensions for use in furnaces.

The coke contains most of the heat producing elements that were in the original coal, with the smoke taken out. It makes a more intense heat than the original coal and is to be compared with anthracite rather than bituminous coal. Fifty bushels of coke make a ton and twenty-seven bushels of coal will weigh a ton. It is claimed that a ton of coke contains more heat units than a ton of coal. The demand for coke in Marquette is just about equal to the supply, from year to year, though during the summer months, large quantities of coke accumulate at the plant.

The amount of gas that is obtained varies considerably, but on the average, a pound of coal makes about five cubic feet of gas. At the Marquette plant, from 80,000 to 100,000 cubic feet of gas are manufactured each day. The plant operates continuously, night and day. The supply is kept constant by means of

# CONVICT LABOR TO OUTPUT ROCK

State Highway Commissioner Recommends Installation of Crushing Plant at Marquette Prison, in Special Report Transmitted to Governor Warner This Week.

On Basis of Data He Has Gathered, He Believes Plan Is Practicable—Lease of Quarrying Rights Could Be Had at Small Cost—Good Shipping Facilities.

State Highway Commissioner Ely, in a report made to Governor Warner for the state industrial commission, urges working the convicts at the Marquette prison in quarrying trap rock for use in the construction of good roads throughout the state. He does not go into complete details regarding the scheme, but gives the result of investigations carried far enough to satisfy him that the plan is practicable.

Reference is made to the plan of the legislature to do away with the contract labor system in the prisons and he suggests that those convicts incarcerated in Marquette prison can be used in nearby quarries to good advantage and provide the material for constructing good roads all over the state for a minimum of cost. "More than \$25,000 is now expended annually in the construction of macadam roads in Michigan. For the most part these roads are built of limestone, which, on the average, not more than one-third the resistance to wear than can be obtained from trap rock. He appended to his report a blue print showing the location of an extensive quarry of traprock near the prison and a letter from the owners stating the state may have the rock for five cents a ton for all rock shipped and the taxes on the property leased to the state. He also includes letters from Illinois, Colorado and other states which use their convicts for this purpose with good results, as well as a letter from the federal director of the office of public roads favoring the scheme.

For Five Cents a Ton.

In a summary of facts secured by the investigation of the department, Mr. Ely points to the accessibility of the rock to the prison, the ample offer of sale made by the owners of the quarry, the great value of trap rock for road building and the excellence of the supply; the good facilities for running a side track to the quarry and transporting it to ore docks for shipment on shipboard to the southern section of the state, greatly reducing transportation charges, and cheap electric power available from the city of Marquette at the rate of 88 for 100 horse power for 10 hours. Continuing the discussion, the commissioner says Michigan is now building about 100 miles of macadam road a year, which, if surfaced with trap rock, would require 80,000 tons, or a daily output of 267 tons for 300 working days. He points out that large quantities could undoubtedly be sold to the state at a profit and says the difficulties in undertaking the project are few and could easily be overcome.

Turning to the convict's part of the plan he refers to the fact that it would not entail the use of convicts on public highways, but away from public view and that guards could be stationed on the rocky bluffs overlooking the quarry with no prisoner at any time out of their sight.

That it is practicable to ship stone as proposed is shown by the operations of a Milwaukee firm, Commissioner Ely says. He states that the concern controls the crushed stone trade along the west shore of Lake Michigan, and ships stone 30 to 40 miles to interior points. He adds: "If this can be done with free labor, purely as a commercial proposition, it would seem that there is no valid reason why it could not be duplicated with prison labor and similar shipping facilities."

The recommendations are in line with those of Governor Warner after his return from Colorado, where he watched convicts at work on highways without even a guard, and are in line with the repeated recommendations of Mr. Ely's predecessor, H. S. Earle.

SHIPMENTS BEING CURTAILED. Navigation Will Close Earlier This Fall Than for Many Years.

Shipments of ore to the lower lakes from Lake Superior are gradually being curtailed, and the season will undoubtedly close earlier than in many years. However, the total will probably show an increase over that of 1909 or even of 1907, the biggest year hitherto in ore shipments in the history of the traffic of that commodity on the Great Lakes. Owing to the fact that there was an unusually large amount sent down early in the season, it is possible to close earlier in the fall, thus avoiding the stormy and treacherous weather that is due at almost any time from now on.

Coal cargoes continue to come in and there is no doubt but that October will break all records for a single month of receipts of that commodity at Lake Superior ports. Grain shipments are still inactive and it is quite likely that they will remain so until at least the closing weeks of the season of navigation. It seems to be a deep-seated habit of grain shippers to hold off every season, evidently in the hope of securing better rates, while on the contrary the rates rise as navigation becomes more dangerous, and the grain men are the losers.

Mrs. Louis Vierling, studio 114 W. Hewitt Ave., Marquette. 9-12-10

I only burned 1 1/2 tons hard coal in my Favorite Base Burner last winter. J. R. McDonald, 109 E. Arch St. They are sold by Kelly Hardware Co. only. (10-17-10)

He also includes letters from Illinois, Colorado and other states which use their convicts for this purpose with good results, as well as a letter from the federal director of the office of public roads favoring the scheme.

For Five Cents a Ton.

In a summary of facts secured by the investigation of the department, Mr. Ely points to the accessibility of the rock to the prison, the ample offer of sale made by the owners of the quarry, the great value of trap rock for road building and the excellence of the supply; the good facilities for running a side track to the quarry and transporting it to ore docks for shipment on shipboard to the southern section of the state, greatly reducing transportation charges, and cheap electric power available from the city of Marquette at the rate of 88 for 100 horse power for 10 hours. Continuing the discussion, the commissioner says Michigan is now building about 100 miles of macadam road a year, which, if surfaced with trap rock, would require 80,000 tons, or a daily output of 267 tons for 300 working days. He points out that large quantities could undoubtedly be sold to the state at a profit and says the difficulties in undertaking the project are few and could easily be overcome.

Turning to the convict's part of the plan he refers to the fact that it would not entail the use of convicts on public highways, but away from public view and that guards could be stationed on the rocky bluffs overlooking the quarry with no prisoner at any time out of their sight.

That it is practicable to ship stone as proposed is shown by the operations of a Milwaukee firm, Commissioner Ely says. He states that the concern controls the crushed stone trade along the west shore of Lake Michigan, and ships stone 30 to 40 miles to interior points. He adds: "If this can be done with free labor, purely as a commercial proposition, it would seem that there is no valid reason why it could not be duplicated with prison labor and similar shipping facilities."

The recommendations are in line with those of Governor Warner after his return from Colorado, where he watched convicts at work on highways without even a guard, and are in line with the repeated recommendations of Mr. Ely's predecessor, H. S. Earle.

SHIPMENTS BEING CURTAILED. Navigation Will Close Earlier This Fall Than for Many Years.

Shipments of ore to the lower lakes from Lake Superior are gradually being curtailed, and the season will undoubtedly close earlier than in many years. However, the total will probably show an increase over that of 1909 or even of 1907, the biggest year hitherto in ore shipments in the history of the traffic of that commodity on the Great Lakes. Owing to the fact that there was an unusually large amount sent down early in the season, it is possible to close earlier in the fall, thus avoiding the stormy and treacherous weather that is due at almost any time from now on.

Coal cargoes continue to come in and there is no doubt but that October will break all records for a single month of receipts of that commodity at Lake Superior ports. Grain shipments are still inactive and it is quite likely that they will remain so until at least the closing weeks of the season of navigation. It seems to be a deep-seated habit of grain shippers to hold off every season, evidently in the hope of securing better rates, while on the contrary the rates rise as navigation becomes more dangerous, and the grain men are the losers.

Mrs. Louis Vierling, studio 114 W. Hewitt Ave., Marquette. 9-12-10

I only burned 1 1/2 tons hard coal in my Favorite Base Burner last winter. J. R. McDonald, 109 E. Arch St. They are sold by Kelly Hardware Co. only. (10-17-10)

FOR MORE THAN THREE DECADES. Foley's Honey and Tar has been a household favorite for coughs, colic, and ailments of the throat, chest and lungs. Contains no opiates. The People's Drug Store.

No one has ever made a salve, ointment or balm to compare with Buckley's Ointment. It's the one perfect healer of Cuts, Corns, Bursis, Bruises, Sores, Scalds, Boils, Ulcers, Eczema, Salt Rheum, For Sore Eyes, Cold Sores, Chapped Hands, or Sprains, it's superior. Infallible for Piles. Only 25c at The Stafford Drug Co.

NOTICE. I will not be responsible for any bills contracted in my name without my written order. M. SPECKER. Marquette. (10-28-10)

IT'S THE WORLD'S BEST.

# Evening Clothes For Men Are Rarely Made Well

Yet you need them for the most careful dressing you do. Only high-salaried tailors should ever touch them—and high-salaried tailors who work for the usual merchant tailor are few.

You need evening clothes for the winter's festivities—for club, for dance, for the theatre. The way of wisdom is to purchase them as built by STEIN-BLOCH, full dress and Tuxedo. A corps of tailors do nothing else in the STEIN-BLOCH shops—and they don't botch their work.

The matter of price is also an interesting one to listen to. Try us before you decide this full-dress question.

Full Dress Suits - \$38 to \$50. Business Suits - \$18 to \$30. Overcoats - \$18 to \$35. Raincoats - \$18 to \$25.

Boys' and Children's EXTRAGOOD Suits and Overcoats for winter at popular prices.
