

JUAREZ FALLS INTO HANDS OF INSURRECTOS

Border Town Across the Rio Grande from El Paso Becomes the Provisional Capital of Mexico, With Francisco I. Madero, Jr., in Supreme Command.

Surrounded in the Barracks and Subjected to a Galling Fire, Gray-Haired General Juan Navarro Hoists the White Flag and Surrenders Unconditionally.

Juarez, Mexico, May 10.—This little border town tonight is the provisional capital of Mexico and Francisco I. Madero, Jr., provisional president, and his staff have taken complete possession after winning the bloodiest battle of the Mexican revolution.

In a corner room of the barracks where for two days he held out against the terrific fire of the rebels, sits General Juan J. Navarro, the federal commander, a captive, having surrendered today with all his entire garrison of several hundred men. His yellow face is sunken, his head is bowed and he does not talk, for the bitter sting of defeat has disheartened him.

In contrast is Francisco I. Madero, Jr., the conqueror, surrounded by members of his family and his staff, joyous, exultant and flushed with victory. He is ready, he says, to make peace with the Mexican government if it is disposed to deal frankly and sincerely with the revolutionists.

Wounded Number Scores.

There are scores of wounded, attended by a host of physicians and nurses from El Paso. The floors of the Porfirio Diaz hotel, where thirty wounded lay tonight, are covered with blood and soaked glory. "The fortunes of war," mumbled an insurrecto soldier in Spanish tonight as he stood with tears in his eyes over the body of a federal soldier whom he had known for years.

All the dead are being buried tonight. A conservative estimate puts the federal dead at nearly fifty and the rebel loss at about fifteen, with a total of nearly 250 wounded on both sides. The actual number lost probably will never be known, as desertions were many and the dead were buried quickly.

The Associated Press correspondent counted seven dead federals in the barracks late this afternoon. Among the dead was Colonel Tamborel, the man who a few days ago taunted the rebels as cowards.

On the American side of the line, five persons have been killed and about seventeen wounded, many of them being innocently engaged at a distance from the river front.

Garibaldi Receives Navarro's Sword.

The actual surrender of the town by General Navarro took place about 1 o'clock, General Navarro giving his sword to Colonel Garibaldi of the insurrecto army, after the rebels had completely surrounded the barracks and threatened to annihilate the garrison within.

The federal commander's eyes dimmed as he surrendered, but Colonel Garibaldi, with a handshake that bespoke his admiration for the brave fight the government leader had made, assured him of the desire of the rebels to afford him every courtesy.

There is the same fraternal sentiment tonight in the hearts of the entire insurrecto army for their countrymen who have been defeated, but everywhere are heard words of opprobrium for President Diaz, whom they hold responsible for the loss of life and the suffering of the wounded.

Madero, himself, when he arrived this afternoon at the corral where the federal prisoners are quartered, made an address full of sympathy and encouragement, landing them for their bravery and assuring them that in his heart as well as in those of his men, there is no feeling of enmity but of uniform friendship.

Soldiers Cheer His Remarks.

"You fought for General Diaz," he declared, "but because you had to, because you were a part of that system which we are trying to dissolve. In a few days, perhaps, peace will be restored. The shouting increased as the war is to be continued, you will have your choice of being paroled or joining the army of liberation. In the meantime, we shall treat you as brothers, not as foes." With shouts of "Viva Madero," the vast throng of prisoners and insurrectos who gathered to hear him threw their hats skyward and shouted in applause.

A few moments later down the main thoroughfare was heard the galloping of horses and soon the insurrecto standard flashed in the sunlight. Behind rode Mrs. Francisco I. Madero, Jr., and an escort of cavalry. With her face beaming with joy and her black dress covered with dust, Mrs. Madero spurred her horse to the scene of her husband's triumph. The shouting increased as the two embraced and entered the municipal building, now the Madero headquarters.

The town the federals thought impregnable to attack fell after a comparatively easy effort. The house to house attack, the advances, the same deadly fire which had driven the federals from their trenches and outposts early Monday when the skirmishing began, gave the rebels an entrance to the town hardly molested by the artillery of the federals.

Federal Stronghold Captured.

At the close of yesterday's fighting the rebels had extensive control of the town. During the night they discovered a federal stronghold and by the use of dynamite bombs and shells, a raging conflagration and fierce musketry they fought their way to the famous old

Spanish church, whose high brick fence formed a barricade for the federals. The insurrectos took the church at midnight. The federals retired further into the city to the roof of the municipal building, the edges of which were piled with sand bags for a barricade.

After the attack was renewed early today and the rebels had brought their machine guns within deadly range, the federals retired to the barracks and insurrectos by hundreds occupied the houses within 100 yards on every side. Their fire was rapidly demoralizing the building. There was no other alternative for General Navarro but to yield. Finally at noon General Navarro hoisted a white flag. He first attempted to secure an armistice, but the rebels would accept nothing except immediate surrender.

The gray-haired general stood in the doorway of the barracks and received Colonel Garibaldi. Raoul Madero, a brother of the rebel leader, dashed forward with his gun pointed at Navarro, ready to shoot if Garibaldi were hurt. Federals and insurrectos alike, however, withheld their fire while the surrender was being arranged.

Troops Doff Their Uniforms.

The fighting soon ceased and attention was immediately directed to the dead and wounded. The federals, in their uniforms, tore off their caps and uniforms and under guard of the rebels walked dejectedly in their underclothing down the street to the corral. They numbered about five hundred. Tonight it was reported that 150 of them had taken the oath of allegiance to General Madero and were to join his forces.

Church bells were rung and the insurrectos began a continuous uproar of shouts. The insurrectos then began to collect thousands of rounds of ammunition from the federal barracks and they have easily made the most valuable capture of the revolution.

The town of Juarez has been mauled by bullets and shells beyond recognition. The flags of all nations were flying from the dwellings of foreign residents today.

Officers Are Paroled.

General Navarro and his twenty-seven officers were paroled tonight by General Madero. After inviting them to dinner, the insurrecto chief announced that if they would promise on their honor not to leave the city, they could have the liberty of the town. They agreed to do so.

GREATLY STRENGTHENS INSURRECTO CAUSE

Capture of Juarez, It Is Conceded, Adds Immensely to Madero's Prestige.

Mexico City, May 10.—There is no one in the capital tonight not under the official ban of silence who does not admit that the capture of Juarez by the revolutionists adds immense prestige to the flag of the revolt and that as a morose it is being greatly to augment the strength of the insurrecto cause. Five months ago the Spanish press would have printed the news telegrams in their biggest type. It is significant that not a newspaper tonight has published them.

In the last few days a belief has sprung up that the federal force in this city does not come within 50 per cent of the strength which has been credited to it. In many minds there is doubt as to the loyalty of many of these troops should the revolutionary victories continue.

DIAZ MEN SURPRISE REBELS BY SUDDENLY ABANDONING THE TOWN OF AGUA PRIETA.

Douglas, Ariz., May 10.—With Agua Prieta, the town about which a desperate battle raged two weeks ago, thrown back on their hands by its abandonment today by the federals, the members of the rebel junta in this city are at a loss what to do with it.

The federals decamped early today. Yesterday they devoted themselves to building trenches and last night to destroying them. The town is deserted. The town of Maco also fell into rebel hands today, its volunteer garrison withdrawing.

Americans are wondering how business is to be carried on, with Juarez, Agua Prieta and Maco left without customs service. Because of the evacuation of Agua Prieta it is believed that the big copper mines in Sonora must suspend operations, as there is no port for exports. The Minneapolis Copper company of Minneapolis, Minn., and the Monte Cristo of Duluth, Minn., are among those affected.

MARCH ON MEXICO CITY MADERO'S NEXT MOVE, IN WASHINGTON'S OPINION.

Washington, May 10.—News of the fall of Juarez came to official Washington from various sources. The news of Madero's victory will spread rapidly throughout Mexico and without doubt recruits will swarm into his camp. Logically, with heavy reinforcements, his next move will be a march on the capital, itself, incidentally stopping on the way to besiege and capture all the considerable cities and towns in his path.

WILLIAM C. QUANTRELL, CIVIL WAR GUERRILLA, IS REPORTED ALIVE IN MEXICO.

Warrensburg, Mo., May 10.—According to a letter received here today by B. F. Ross from W. O. Coleman, of San Benito, Texas, William C. Quantrell, the noted guerrilla, is alive in Mexico. He was supposed to have been killed in a battle at Taylorville, Ky., Aug. 10, 1865, and what is purported to be his skull is now on exhibition in Topeka, Kas.

FIRE AT CHICAGO MAKES FIFTY FAMILIES HOMELESS.

Chicago, May 10.—Fifty families living south of the stockyards were made homeless tonight and twenty houses were destroyed by fire. A score of firemen were overcome by smoke. The loss is \$50,000.

FOES OF THE TRADE PACT ASSAULT IT

Farmers, Fishermen and Manufacturers Appear Before the Senate Committee on Finance and Pledge Opposition to the Reciprocity Agreement With Canada.

Greatest Outburst Comes When a Former Lieutenant Governor of Wisconsin Violently Assails the "Newspaper Trust" and Questions the President's Motives.

Washington, May 10.—Vicious assaults on the Canadian reciprocity bill marked today's hearing on that measure by the senate finance committee. Farmers from the border states, fishermen from Gloucester, Mass., manufacturers of wire cloth from paper-making and manufacturers of books and newspaper paper all poured forth their protests against the measure.

The greatest outburst occurred when former Lieutenant Governor Strange of Wisconsin, introduced as representing the wrapping paper manufacturers and the boards of trade of Neenah and Menasha, Wis., addressed the committee. He swerved from his criticism of the bill to attack "the American Publishers' association and its related organization, the Associated Press," until finally Senator Penrose asked him to limit his remarks to specific objections to the bill.

Mr. Strange characterized the bill as a "cowardly measure," as lacking love of country and as brought forth at the demand of "the greatest trust in the world." He said that congress would not be in session today considering the bill "if it had not been for this combination in restraint of trade."

Criticism Mr. Taft.

"When a man who occupies an exalted position listens to such demands for fear of failure of reelection rather than to the welfare of his nation, it is time to stop," he explained. "Why should the secretary of state be influenced to become auxiliary to the purchasing department of the newspaper trust of the country?" he asked. "To what trust do you refer?" inquired Senator Stone.

"The newspaper trust," responded the witness. "Well, you manufacturers have an association," suggested Senator Stone. "It is only social, like that of the lawyers," responded Mr. Strange. "It is not to control prices, but is for the purpose of defense."

The witness contended that the "purpose of the alleged newspaper trust was to monopolize news through the incorporated Associated Press."

J. P. Carey, president of the International Brotherhood of Paper Workers, and Bernard Benson of Kalamazoo, Mich., opposed the bill on behalf of the paper mill workers.

Hull Presents Farmers' Protests.

N. P. Hull, master of the Michigan State Grange, presented written protests against the bill in which thousands of Democratic and Republican farmers pledged themselves never to vote for anyone who worked or voted for the agreement.

Mr. Hull referred to the farmers' call on the president, whose attitude he ascribed as "indifferent," and thanked the senate committee for its courteous treatment.

"So the senate is not so bad, after all," suggested a member of the committee. "God knows, we hope it will prove that it is not," responded Mr. Hull.

Annexation of Canada instead of reciprocity with that country was advocated by George S. Ladd of the Massachusetts State Grange. Mr. Ladd argued against any trade agreement, declaring that if one were made it should be by annexation, so Canada might share the burdens of the United States as well as to enjoy its benefits.

FARMERS' ORGANIZATION COMES TO THE DECISION RECIPROCITY IS HARMFUL.

Chicago, May 10.—Legislative Agent John N. Stull of the Farmers' National congress announced tonight that the alliance, which is represented in its membership in nearly all the important farming states, would oppose reciprocity with Canada. This decision, he said, had been reached after a thorough investigation of all the economic and industrial conditions involved.

"The price of grain and farm animals are much less than a year ago. This reduction means, not that the profits of the farmer have been reduced so much, but that nearly all or quite all have been already wiped out. And while wheat on the Illinois or Kansas farms is one-fourth lower than a year ago, the same loaf of bread is sold for five cents in Chicago. The price of hogs on the Illinois or Iowa farm during the past thirty days has been only 60 per cent of the price during the same period of 1910, but the price of meat to the city consumer are nearly as high now as then.

TUG TRUST INVESTIGATION IS SHIFTED TO MILWAUKEE.

Chicago, May 10.—The government's investigation of the possibility of a tug trust in the shape of the Great Lakes Towing company closed here today and moved to Milwaukee, whence it will go to Superior and to Duluth, further Chicago session may be held in two weeks.

The Weather

Washington, May 10.—The following is the weather bureau's forecast for Upper Michigan: Rain, Thursday and probably Friday; brisk and probably high east winds shifting to north winds.

CATHOLICS AT NEW YORK CELEBRATE GOLDEN JUBILEE OF CARDINAL GIBBONS.

New York, May 10.—In the manner observed at Rome, six pages in uniform and bearing lighted torches met his eminence, Cardinal Gibbons, at the doors of the Catholic club here tonight and escorted the distinguished American prelate to a throne in the grand ballroom, where he was welcomed by a large gathering of prominent Catholics. The occasion was the golden jubilee of the prelate's ordination to the priesthood and the silver jubilee of his elevation to the cardinalate.

Just Tells of Church's Growth.

The remarkable growth of the Catholic church in America was outlined by Supreme Court Justice Dowling. In 1818 the church had but two bishops and sixty-nine priests, he said, while today there are thirteen archbishops, ninety-seven bishops, seventeen thousand and eighty-four priests and a church membership of 15,000,000.

PENNSYLVANIA HOUSE VOTES FOR A FEDERAL INCOME TAX.

Harrisburg, Pa., May 10.—The house today voted in favor of the ratification of the proposed income tax amendment to the federal constitution. The resolution will be messaged to the senate for action during the coming week.

VITERBO TRIAL AGAIN IS ABRUPTLY HALTED

Alleged Chief of the Camorra Is the Star Actor in a Sensational Scene.

Viterbo, Italy, May 10.—The afternoon sitting of the trial of the Camorrista was brought to a sudden close today by a scene in which Enrico Alfano was a principal actor. The prisoner had gradually worked himself into a state of frenzy during the confrontation of Abbattamaglio, the informer, by Giovanni Rappi, the alleged treasurer of the organization.

Alfano's wrath boiled forth when the informer began to recite Rappi's account of times. He suddenly leaped to his feet and, pointing to Abbattamaglio, cried: "He is driving me mad. Take me to a lunatic asylum. Send me to hard labor, although I am innocent, but relieve me of the presence of that bounder. I cannot stand him a moment longer."

Alfano was ghastly and struggling. He was surrounded by the prisoners in the cage, and fearing that the man might collapse the president adjourned the court.

HAREM SKIRT IS DEAD IN FASHION'S CENTER

New Style of Dress Disappears—The Hoop Sleeve Is the Latest Freak.

Paris, France, May 10.—What has become of the famous harem skirt? Is it living or is it dead? This question seems to be running through the minds of women throughout the world. This inquiry is impossible to distinguish from the conventional skirt. The harem skirt is not seen on the streets.

Leading costumers admit that things had not gone well. "The harem skirt," said M. Drecoll, "was intended merely as a house gown. It was killed by enemies who sold cheap imitations at thirty francs (\$6) each. The worst class of women tried to wear it and consequently the better sort ignored it. Occasionally we sell one or two home wear, but I really believe it is dead beyond hope of resurrection."

Didn't Take Forty Years Ago.

"My grandfather made and tried to launch the harem skirt forty years ago," said John Worth, "but was unsuccessful. Then, as now, the women did not want it. It was acceptable to the inmates of Turkish harems, who recline on cushions, wear or clothe, but it does not go in the present, but I believe it probably that it will be revived, say in two years, when it may be successful. Certainly it is practical, if nothing else."

"It was not intended for street wear," explained a member of the firm of Beech, David & Co. "A few fashionable women are still wearing it indoors and at receptions. My wife recently wore it at a royal reception in St. Petersburg and I must probably will never adopt it, but I believe that really aristocratic women will continue to use it for ball gowns and house gowns."

The latest fashion freak is the "hoop sleeve." The hoop is placed at the middle of the forearm and its diameter is seven inches. The sleeve is drawn at the wrist and elbow.

DIETZ WANTS EDWARD HINES AS A WITNESS

Lumber Baron Attends the Trial at Hayward, Whereupon the Settler, After Pondering on the Matter, Announces He Will Call Him to the Stand.

Evidence Important to the Defense Is Given When a Surveyor Shows How Deputies Themselves Could Have Shot Harp from More Than Twenty Points.

Hayward, Wis., May 10.—Harry Orwig, of Chicago, a surveyor, was put on the stand today by John F. Dietz, the settler who is being tried for the alleged murder of Deputy Oscar Harp in the battle at the Cameron dam last fall, and testified that the deputies themselves could have shot Harp from more than twenty points.

A diagram he had prepared showed the line from where the deputies were stationed to the point at which the body of Harp was found. Dietz today ordered a bench warrant issued for one of his witnesses, who had applied when he was served with a subpoena to the "knew nothing of the case and was not coming."

Edward Hines, the Chicago lumberman, attended the afternoon hearing.

Technical Objections Anger Settler.

This morning, Dietz, angered by technical objections of the prosecution, asked Judge Rees if he was not taking advantage of his innocence in court procedure. The court replied that concessions had been made to the defendants in the rulings.

Dietz tonight announced that tomorrow he will subpoena Edward Hines. The fact that Mr. Hines was in town was made known to Dietz early today. Until late in the evening he pondered on the advisability of calling him to the stand. He finally decided on the step, declaring that he wanted to show why he feared the advances of the then attorney general of Wisconsin, F. L. Gilbert; the governor's secretary, Colonel G. Munson, and G. W. Froehel of St. Paul, the last of whom he announced had claimed that he "represented a man greater than the governor of any state."

Dietz said he intended to let the jury hear what Edward Hines had to say, irrespective of the testimony he "saw fit to give."

Court Denies Prisoner's Motions.

Yesterday Dietz made a brief motion for the dismissal of the case on the following grounds: That Roy Van Alstyne and William Fortier admitted they fired on a direct line with Harp, that on the testimony of Waite Ackley that Thorbahn told him not to move closer to the barn with Harp and the others because it was dangerous, and because there was no proof that Harp had been killed by Harp came from the guns of any of the family; that the steel jacketed bullet would not flatten by striking human bone or flesh as it was flattened when found in Harp's body, indicating that the ball had hit a hard substance and been deflected to Harp; that Van Alstyne admitted having shot a steel jacketed bullet, the same as found in Harp's body; that no evidence was produced to show he was in the loft.

The judge denied the motion, declaring it was a question for the jury whether a reasonable doubt. Right after this decision Dietz jumped up again and asked that the case be taken from the jury.

"I don't want these men to be persecuted like I have been," declared the lumber trust, said Dietz. "I pity a dog who would have to submit to the despotism of the lumber trust like we have, and I want to save this jury the same persecution." The motion was promptly denied.

Dietz's first witness was Michael Yave of Winter. The testimony he gave was to show that he and others had never had any trouble about getting into the clearing.

Surprised at Cordial Reception.

N. A. Nelson, of Bangor, Wis., testified that, with a party of hunters, all visited the Dietz cabin in 1905 and had never seen Dietz before. The state objected to this sort of testimony, but John Dietz said he wanted to show that it was not difficult to approach his place in the proper manner and he was allowed to go on. Nelson said that when the hunters entered the clearing, a dozen deer all carried rifles and met with no resistance.

"When we left Winter we were told to stay away from the Dietz clearing; that we would be shot on sight, but we were surprised at our reception after that warning," said Nelson. Nelson was cross-examined at length by M. F. Sturdevant, but the only thing that was brought out was the fact that the witness was one of Dietz's bondsmen.

Almost from the jump Dietz commenced to contradict the state's testimony. Two photographers took the stand and submitted photographs of the barn roof taken two days after the battle and the photographs showed no perforations in the roof, as the state's witnesses have testified.

Looks Like a Coup.

Dietz seems to have sprung a coup on the state, as all the pictures introduced by the defense were taken two or three days after the surrender, while the state pictures were taken at different times

and are materially different. Dietz did not know how to introduce the pictures as exhibits and L. Sturdevant took them and introduced them as legal evidence for the family.

"Dietz does not know what his own defense is and he has no testimony that will not be easy to rebut," said Mr. Sturdevant, and Dietz admitted as much when he declared that he did not know whether he or any member of the family would take the stand.

"We don't know anything about the killing of Harp, therefore what testimony could we give?" said Dietz. "The witnesses we will have on the stand will refute the state's testimony as far as possible and the rest is up to the jury. If they are out to get me, they will in spite of all I can do, and if the jury is square they will not convict on the case the state has. I don't fear for my wife and boy. It's me they want."

Would Hold Dietz Only.

It was admitted by the prosecution that had Dietz asked for the dismissal of his wife and Leslie on the grounds of lack of evidence to the complicity in the killing of Oscar Harp when he moved for the dismissal of the defendant, that there was a good chance the motion would have been granted by Judge Reid.

Dietz, however, resented both the imputation that he was seeking protection behind his wife and son.

"We are either all guilty or all not guilty of killing Oscar Harp and we will stand or fall together," said Dietz.

BIG CITIES SWELTER IN HEAT THAT CAUSES NUMEROUS PROSTRATIONS.

Chicago, May 10.—The thermometer rose from 52 degrees at 3 o'clock this morning to 87 degrees at 2:30 and Chicago its first touch of summer weather. One prostration was reported to the police.

New York, May 10.—The season of heat prostration began today when Jerry Watzell, a tinsmith, was overcome while at work on a steamship. The temperature at 3 o'clock this afternoon was 83 degrees.

Cleveland, May 10.—Seven persons went temporarily insane and two others were overcome by the heat here today. The maximum official temperature was 90 degrees.

LIGHTNING SPLITS A SCHOOLHOUSE IN TWO

One Upper Peninsula Student Is Killed and Three Are Seriously Injured.

Escanaba, Mich., May 10.—One student was instantly killed, three were seriously injured and six others were shocked when lightning struck a school house at Metropolitan today during a terrific electrical storm. The building was destroyed. Carl Dixon was the victim and of the injured, Minnie Dixon, Reginald McDonald and Arthur Backlund were rendered unconscious and their recovery is doubtful.

The bolt struck the school belfry and running down the chimney it struck in two. A panic immediately resulted, but the teacher and several of the cool-headed scholars carried the unconscious victims out of the school.

CYCLONE IN NORTHWEST DEMOLISHES BUILDINGS AND CAUSES HAVOC IN GENERAL.

Moorehead, Minn., May 10.—A great funnel-shaped cloud, bringing with it a terrific wind, bore down upon Felton, a small town twenty miles north of this city, this afternoon, tore down a dozen buildings, blew in every good-sized window in the town and tore up trees in large numbers. Andrew Peterson, a farmer living west of Felton, sustained severe injuries about the head. He was in his barn when it was overturned.

At Fargo, N. D., two dozen houses and barns were blown down and many of them were carried far across the country. The telephone and electric light service is demoralized. At Marion, in the west of here, and the locality in that neighborhood people rushed for their cellars to escape the debris and flying timbers. Up to a late hour tonight no reports of fatalities were heard from the west. Barns, machine sheds and many small buildings were taken bodily from the ground and carried considerable distances.

TWO PASSENGERS KILLED WHEN TRAIN IS WRECKED NEAR LEADVILLE, COLORADO.

Denver, May 10.—The westbound Denver & Rio Grande passenger train known as the Pacific Coast Flyer, which left Denver at 8 o'clock this morning, was wrecked thirty miles west of Leadville tonight, the chair car and a tourist sleeper plunging into the Eagle river, which is skirted by the railroad at that point. According to reports from the scene of the wreck, two persons were killed and twenty-seven were injured, eight seriously.

GERMAN ARMY OFFICERS FIGHT ON FIELD OF HONOR AND ONE IS SHOT DEAD.

Berlin, May 10.—A duel between officers, which ended fatally, occurred at dawn today in a forest near Berlin. Baron Oswald von Richtofen, son of the late secretary of foreign affairs and a reserve officer in one of the guards, shot and killed Wilhelm von Galfren, a retired officer. A quarrel over money matters led to the duel.

LIEUT. GEO. KELLY, U. S. A., FALLS FROM AN AEROPLANE AND IS DASHED TO DEATH.

San Antonio, Tex., May 10.—Lieutenant George M. E. Kelly of the Thirtieth infantry, United States army, was killed this morning in a fall from a Curtiss aeroplane at Fort San Houston.

Ann Arbor, Mich., May 10.—The Washash college team defeated the University of Michigan nine at baseball here this afternoon, by the score of 3 to 1.

WIFE SAID TO HAVE KILLED HER HUSBAND

That the Conclusion Reached by the Coroner's Jury at the Inquest Into the Peculiar and Sudden Death of C. F. Stannard of Greenland, Ontonagon County.

Man Expired in Agony and It Is the Belief of the Investigators That Strychnine Poisoning Was Responsible—Damaging Testimony Given by Four Witnesses.

Houghton, Mich., May 10.—(Special.)—"We do say that Charles F. Stannard came to his death March 26, 1911, in Greenland township by strychnine poisoning, administered by his wife, Mrs. Laura Stannard."

That was the verdict rendered at Greenland, Ontonagon county, today by the jury serving at the inquest conducted by Coroner James Corgan of Ontonagon to inquire into the death of Charles F. Stannard, who died on the date mentioned, under peculiar circumstances.

Mr. Stannard had been to a caucus the previous night and did not arise till 10 o'clock the morning of the 26th. He breakfasted at that time and became ill shortly thereafter. He died in great agony and, according to the testimony given at the inquest, said to his wife, "You've tried to get me a lot of times and I guess you've done it now."

Four damaging witnesses against Mrs. Stannard were introduced at the inquest by Samuel Goad, Grace Hammes, a domestic in the family, and Alva and Elaine, son and daughter, aged, respectively, sixteen and fourteen. Mr. Goad testified to the remark quoted. The Hammes girl testified that Mr. Stannard had detected a strange taste in the coffee at breakfast and remarked that he had been poisoned. He dumped the coffee into the sink, she said, and found a peculiar sediment or powder in it.

Mr. Goad was an unwilling witness. He testified that as soon as Mr. Stannard died, he sent for an undertaker and was about to have the body embalmed immediately, but was stopped by Dr. Larned, the physician of the Adventure mine. Dr. Larned reported the matter to Coroner Corgan. The two children said on the stand that their parents had quarreled that morning before breakfast.

Mrs. Stannard had not yet been arrested, as she is ill, suffering from a nervous collapse. She is closely watched, as the officers fear an attempt at suicide.

GRIEF OVER CHILD'S DEATH MAKES DULUTH WOMAN INSANE AND SHE COMMITS SUICIDE.

East Providence, R. I., May 10.—Driven into insanity through grief over the death of her child, Mrs. Effie Haney, twenty-eight years old, of Duluth, Minn., committed suicide by taking carbolic acid at the home of her mother, Mrs. Frank Stanley, at Riverside, late last night. Mrs. Haney came here after the death of her child a short time ago. Yesterday she became so deranged that she attacked her mother with a knife. Today arrangements were made to place her in some institution. It is believed that she learned of this and decided to end her life.

SAVED AT VERY BRINK OF NIAGARA FALLS

Desempered Woman Fighting Desperately to End Life Is Rescued by Constable.

Niagara Falls, N. Y., May 10.—Fighting with grim determination to end her life, Mrs. Elizabeth Hartley, of Buffalo, sixty years old, was rescued from death at the very brink of the cataract today by Constable Thomas Harrington, who faced the constant danger of being carried over the falls with the struggling woman.

Mrs. Hartley, who came here today, entered the water about sixty feet above the falls. Her dress caught on a rock fifteen feet from the brink of the falls. There she was held until Harrington reached the bank with a pike pole and hooked it into her dress.

Her arms pinioned by the terrific current, Mrs. Hartley tried to get free from the pole, but finally, weakened by her struggles, she became quiet and was dragged ashore. At the hospital where she was taken it is said she cannot live. On the river bank was found a letter and a

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED)

Subscription Rates: Per year, by mail, \$6.00

Entered as second class matter of the second class in the postoffice at Marquette, Mich.

MARQUETTE, MICH., MAY 11.

Senator Stone is a fine little jingo.

At least there was enough rain to hold the forest fires for a time.

The prevailing brand of spring weather is meeting with more than the usual amount of approval.

The engagement between the federal and the insurgents at Juarez was the real stuff, without the usual opera bouffe flavor.

To be sure the Tigers have a long lead, but the season is young. Jubilations over the winning of the 1911 pennant are a little premature.

The Democrats may have disagreed on their economy plan, but it is noticed that they did not disagree on it bad enough to defeat it.

Canadian reciprocity isn't the first question our Michigan grangers have gone off half cocked on.

The Democrats are proving so generous in their authorization of probing committees that it promises to become a matter of doubt whether they will be able to muster members enough to man them all.

Judging from the newspaper returns to date, Senator Smith chose the unpopular side of the contention when he decided to line up with Master Hull and his Michigan farmers against the ratification of the Canadian reciprocity agreement.

The police officers have abundant authority to enforce the curfew ordinance. Therefore, the safest course for the young people of the city who come within its provisions is to hie for their homes when the curfew signal is sounded.

Perhaps the protest against reciprocity is being stirred up by the automobile men, who are afraid that the demand for their product from the agricultural regions may be somewhat impaired.

The fight against Canadian reciprocity has been responsible for some strange lineups. For instance, the spectacle of Representative Cannon, of Illinois, and Representative Leuroot, of Wisconsin, standing shoulder to shoulder and voting the same way is unusual, to say the least.

In the best informed circles it is now predicted that there are enough senators ready to go in for political morality to insure an early inquiry into the Lorimer case and ultimately a vote the results of which will probably place on the Illinois legislature the duty of choosing a new senator.

Gotch, the wrestling champ, will receive \$21,000, win or lose, for a match to be wrestled with Haekenschmidt in Chicago next fall. Young America, as he reads the sporting pages, is pulled first this way and then the other between the prize ring, the wrestling arena and baseball in his choice of a future profession.

Now if the city council and the county board of supervisors will cut their budgets to respectable figures, in keeping with the nearly \$1,000,000 that Governor Osborn trimmed out of the legislative appropriations, our taxpayers may approximate actual pleasure when they exchange their coin of the realm for the tax receipts.

It has required so much space to relate the stories of the battles and minor engagements on Mexican soil that the peace plans appear to have been lost sight of, for the time being. As the clashes of the past few days have been the most serious that have been reported since the first shot was fired it will probably be found difficult to put any new life into them.

The Hartford mine disaster has opened the eyes of the iron country to the need of a United States rescue station in the upper peninsula, says the Hancock Journal. Had such a station been located at Hancock or Marquette, or some other centrally located point, there is every reason to believe that some of the men who met death by suffocation in the Hartford fire might have been saved. As it was, the nearest station was located at Urbana, Ill., more than five hundred miles distant, and the government's experts arrived too late to be of any assistance. Here is a matter with which

Representative H. Olin Young might concern himself with profit to his district.

The Houghton county board of supervisors has voted \$1,000 for the purposes of the Upper Peninsula Development bureau, contingent on the decision of the prosecuting attorney that the grant is legal. There is also a likelihood that J. O. Bruneau, a dairy farmer of the county, who for some reason has manifested consistent hostility to the bureau, may also try to prevent the appropriation being made available. But no action can offset the fact that the Houghton county board has shown its approval of the bureau's aims and purposes, and it is probable that the Houghton county bureau will ultimately find its way into the treasury. The action of the board was preceded on the previous evening by a gathering of about 100 representative men of the county, who sat down at banquet tables and later joined in a thorough discussion of the bureau, its work and opportunities, the meeting resembling the one recently held in Marquette. T. A. Green, president of the Development bureau, was the principal speaker, and he and other speakers developed much enthusiasm for the effort. No doubt was left when the meeting was closed that the bureau has the support and can expect the active encouragement of the strongest and most representative men in Houghton county.

In Milwaukee, where vice has an extra legal existence, and where the police endeavor as well as they can to regulate it, the city has been aroused by the shooting down and killing of two inmates of a brothel and the suicide of the murderer, while a second man lies dangerously wounded in a hospital. It is being seriously questioned whether the toleration of these resorts is, after all, the best policy. "The informed physician," says the Milwaukee Free Press, "knows that venereal disease, almost always traceable in the last instance to the brothel, is increasing here, as elsewhere; the social investigator knows that the recourse of youths not yet out of their teens to the brothel is increasing here, as elsewhere." What to do is the great question. But it appears that in Milwaukee, just prior to this noisome tragedy, Dean Willett and Chief of Police Jansen, in discussing the existing conditions, were inclined to the opinion that the absolute suppression of the brothels was a step that might well be considered. And the vice commission in the city of Chicago, after a painstaking and extended inquiry into the problem, recommended suppression as the most advisable course to follow. Even in the great cities the "necessary evil" theory is receiving some hard shocks.

"Before the bar of etiquette N. P. Hull, of Michigan, and his fellow grangers stand convicted of a breach," says the Washington correspondent of the Grand Rapids Press. "The White House states that the grange representatives arranged merely to pay their respects to the president, and that they did not ask for a chance to make a speech. Consequently they were told to go to the east room of the White House, where the president meets people informally and socially, and where speeches are considered out of place. This, together with the political trend of Grange Master Hull's speech against reciprocity, surprised Mr. Taft, who least of all enjoys reference to the political phase of his policy." Mr. Hull, however, maintains that he and his associates acted in good faith, after having arranged with one of the White House secretaries for the audience with the president, and with no idea of violating any of the proprieties. Yet the trend that their visit took was obviously a violation of the proprieties, and the president might well have been annoyed at it. It savored of lecturing a man in his own house, and in this particular instance the lecture was delivered to a man who had already made his position perfectly clear. It is obviously the right of Mr. Hull and his granger friends to disagree with the president about Canadian reciprocity. It appears to be rather questionable manners for them to go to the White House to scold and make threats about it.

The committee in charge of the home coming celebration that is being arranged for Hancock hopes to be able to complement the number of celebrities who have already promised to attend by the addition of Colonel Roosevelt, who will be strongly urged to accept its invitation, which will be generally endorsed by the press and people of the upper peninsula. If the colonel can see his way clear to visit Hancock, it will be in order for the publicity committee to disband, or what would perhaps be better still, to reinforce the committee that will be responsible for the arrangement to accommodate the visitors. There can be no question that the appearance of the colonel at Hancock would be the signal for the greatest outpouring of people in the history of the upper peninsula. The Mining Journal has the idea that he is still "our most popular American citizen" in this particular region, irrespective of what may be said of any other part of the country. Besides, the upper peninsula has never had the opportunity to give a real eighteen carat celebrity a reception into which it would throw its whole heart and soul. We are not unkindful that former Vice President Fairbanks visited our territory on a few occasions, but he took modest rank in the celebrity class, about with Vice President Sherman today. But Colonel Roosevelt would be a man to tear the

roof off, to journey long distances to see and hear. Would that he might elect to go to Hancock, if only that we might see what the upper peninsula could do, when put to the test, in the way of showing its distinguished visitor that it was glad he came. We confess to misgivings, however, on the score of his acceptance. It was announced in connection with his last western trip that it was the last of the colonel's extended tours.

AMERICANS ARE TO BLAME. Senator Stone is greatly concerned because the president has ordered the troops into Mexico, to prevent the combatants in that unfortunate country from firing any shots that can find their way across the border. He believes the president was bluffing when he ordered the troops to the border, and where he once had words of praise for the president's attitude he now has words of censure.

Evidence was not lacking that Senator Stone's remarks do not represent the views of a majority of his colleagues. Vigorous exception was taken to them and the president was strongly upheld, even by Democratic speakers. He may well be. It is clear that most of the casualties suffered by Americans near the seats of the engagements between the opposing Mexican forces have occurred because the Americans have insisted on treating the engagements as spectacles to be enjoyed to the full even at the risk of life and safety. They have, the press reports have shown, crowded the tops of buildings in the towns on the American side, and, in an effort to closely observe the operations of the warring troops, they have pushed as close to the border line as the American soldiery has been willing to permit. They have wanted to be in the thick of the fighting, and they have exposed themselves to fire, and as the engagements of the past few days at Juarez have been severe it is only strange that the list of dead and wounded American non-combatants has not been a more extended one.

There would have been comparatively few casualties among non-combatants if the people on the American side of the line had been content to follow their usual occupations while the hostilities were in progress, instead of treating the engagements as a theatrical spectacle to be observed from the points of vantage offering the best opportunity for bird's eye views, irrespective of the danger that the innocent bystander's body might stop a bullet at any moment. If the extra precautions to keep out of harm's way that the situation would seem to dictate had been taken, it is unlikely that a single serious injury of an American would have been reported. But because the inevitable price of curiosity is the inevitable price of injury, the list of the kind displayed at El Paso has had to be paid Senator Stone wants the American troops advanced across the border, with the certainty that if this step is taken a lot more good American blood will be shed.

It would be much more to the point if the commander of the American troops at El Paso, would be authorized, as an emergency measure, to chase every American non-combatant into their cellars while the Mexican forces are trying to shoot one another's heads off. Because a number of non-combatants have paid the price of idle curiosity and sustained self-inflicted death or injury is hardly a sufficient reason for taking such a serious step as sending the American troops across the border. Evidently President Taft takes this view of the question. The country will agree with him.

USE OF THE RECALL. Woodrow Wilson, New Jersey's militant governor, provided some interesting observations on the initiative, referendum and recall in his recent speech in Kansas City.

"If we felt that we had genuine representative government in our state legislatures no one would propose the initiative and referendum in America," he said. "They are being proposed now as a means of bringing our representatives back to the consciousness that what they are bound in duty and in mere policy to do as to represent the sovereign people. The recall is a means of administrative control. If properly regulated and devised it is a means of restoring to administrative officials what the initiative and referendum restore to legislators—a sense of direct responsibility to the people who choose them."

The governor has reached the heart of the public sentiment that supports this trio of new methods. The present form of government would be adequate were it representative. Michigan, for instance, is full of progressive sentiment. Yet the legislature which recently closed its session did little to voice it. Michigan's representation in congress does little to prove to the nation that this state is progressive. In cities, likewise, the accredited representatives frequently fail to represent the real majority sentiment. They are out of touch with the currents of thought among their constituents. Ideals, strong and flourishing among the people, have no chance for expression because those who should make them live lack either sympathy for or understanding of them. It is just this lack which has forced the people to look about for other methods by which they may enforce their will in statute and ordinance. The initiative, referendum and recall have been suggested as handy tools and the common people all over the country are reaching for them. Those who have not made up their minds to try them are studying their uses and attempting to decide if they fit their purposes. Michigan some day will be required to answer the question.—Grand Rapids Press.

A BURLGLAR'S AWFUL DEED. May not paralyze a home so completely as a mother's long illness. But Dr. King's New Life Pills are a splendid remedy for women. "They gave me wonderful benefit in constipation and female trouble," wrote Mrs. M. C. Dunlap, of Leadville, Tenn. "If ailing, try them. 25c. at The Stafford Drug Co."

SAM BLYTHE AND TOWNSEND.

Sam Blythe's "Who's Who—and Why," in the Saturday Evening Post, constituted a department which is widely read and is always entertaining, although the accuracy of the estimates made of public men by no means its strongest characteristic. In a recent article on Senator Charles E. Townsend, of Michigan, Blythe very obviously sacrificed accuracy to "smart" writing. Assuming that Townsend in his campaign for the nomination adopted the rule of the LaFollette type of insurgent, which is not true, Blythe now finds in Townsend's independent position a repudiation of his imaginary pre-election attitude. Because Senator Townsend recognizes that the people of Michigan did not elect LaFollette senator from Michigan, any more than they elected Aldrich, or Gallinger, and declines to permit the leader of either faction to do his thinking for him, therefore, according to Blythe's theory, Townsend is "calmly nugacious and neutral."

It is always easy to go with the crowd, and in politics, it is usually difficult and often is easily misunderstood when he attempts to assert his own individuality. It is wholly unfair and untrue to ascribe lack of stamina to a senator simply because he will not accept unhesitatingly and slavishly the leadership and dictation of Gallinger on the one side, or LaFollette on the other. Senator Townsend is conscious of the fact that he, and not Gallinger, or LaFollette, was elected senator from Michigan. He was sent to Washington to exercise his own best judgment rather than to blindly accept the dictation of another. Senator Townsend is not a man to be trifled with. He is a man of high character, and he is willing to assume this responsibility and stand sponsor for his own acts, rather than to seek to shield himself behind the acts of the leader of either faction in the senate.

Senator Townsend was by no means commissioned as the representative of a faction in the Republican party, and he is as little expected to take his orders from LaFollette as he is expected to take orders from Aldrich. Blind subservience to the one is as open to criticism as blind subservience to the other.

The good example set by both Senators Townsend and Smith in refusing to contribute to factionalism in the party in the present crisis is an example of which the party stands in great need at this time. If the great policies for which the Republican party stands are to continue to be made effective in government and in legislation, some basis of harmonious action must be found among Republicans, and those senators who in the present crisis conduct themselves first as Republicans, rather than as regulars and insurgents, are rendering the country and the Republican party service of a high order.

We have no fear when the test comes, on any of the great progressive questions of the day, of where we shall find Senator Townsend of Michigan. It was the earnestness of his devotion to the real underlying spirit of the progressive movement in the country which made it possible for him to sweep the states in the senatorial primary last year. When the hour of conflict over real principles arrives, Townsend will be found not "calmly nugacious or neutral," but as he is in the long continued contest for genuine railroad regulation, the fearless, valiant and aggressive in the cause of popular rights.—Soe News.

A Laugh or Two

Happiness in Store. "Channey M. Depeuw was the life and soul of Grasse last month," said a New York lawyer. "Grasse is a tranquil little town on the banks of a river, high up in the mountains, looking down on the glittering blue Mediterranean."

"One day at a luncheon Mr. Depeuw gave us specimens of the humor of various nations. I thought his specimen of Irish humor particularly good—it was gallant and at the same time it hit off so neatly our fondness for divorce."

"A pretty New York bride, he said, bought a blackthorn from an old Irishman who boarded the boat at Queens-town, and this old man said to her, as he pocketed her money: "Thank ye, me pretty darlin', an' happy the young man as'll be co-responder in yer divorce suit."

All Off. Witmer Stone, the naturalist of Philadelphia, was discussing at the Academy of Natural Sciences, a bird book that was full of errors.

"Really," said Mr. Stone, smiling, "the errors in this book make me think of the city hall clock."

"The city hall clock," said Mr. Stone, "is an anecdote," said Mr. Stone, "after an anecdote about two men who, after dining not wisely, strode arm-in-arm down North Broad street."

"One of them happened to raise his head and the illuminated face of the city hall clock, high up in the evening sky, caught his eye."

"Oh," he said, "look at the—hic—moon!"

"That isn't the moon," said his companion. "It's later than you think. That's—hic—the city hall clock."

"They argued, hunched on together, over this question a long time, and finally they agreed to leave it to the first man they met."

"A man soon drew near. They stopped him."

"Beg pardon," they said in concert, pointing to the clock tower, "but to settle a bet, would you kindly tell us, whether that's the moon or the sun?"

"The man looked at the clock, then he looked at the two men, and he said: "I'm sorry I can't oblige you, gentlemen," he said, "but the fact is, I'm a stranger in these parts."

Worth a Reward. "Both Tarkington is very difficult to please in matters theatrical," said a Philadelphia novelist, "and he is very difficult to please in matters of life here during the run of one of his own plays, and after dinner one evening we sauntered to the theater."

"But the doorkeeper didn't know us, and for some little time refused to let us in. Finally, though, Tarkington's identity was established, and we were conducted to a stage box."

"But the performance wasn't up to much. Tarkington flattered in his chair, and at the end of the first act he suggested that we go."

and other official papers and endorse checks or warrants covering Indian money by making an imprint of the ball of the right thumb, the imprint to be witnessed by an employee of the Indian agent's office or by one of the leading men of the tribe who can write. If an Indian is not living with his tribe, his thumb mark signature must be witnessed by the postmaster of the place where he lives.

"All the questions to which I have given serious study pertain to efficiency," says Walter L. Fisher, secretary of the interior. "Saving trees, water, coal and oil is but a part of the problem as a whole. I am concerned in conservation and all its sub-divisions, one of which is municipal government. Controversies between capital and labor is another. The contest between public interests and private interests began with civilization. The public, observing and feeling the activities of the private interests, retaliates with laws. Private interests complain. But, taking an epoch in its entirety, and not measuring a particular event, the public has not gone beyond ways to fair and right. The pendulum is ever swinging back and forth."

INDESTRUCTIBLE PESTS. Once They Have Runway, Rats and Mice Not Easy to Drive Away. A great deal is said about killing rats by electricity; it really does not amount to a great deal. Rats and mice have been here a long, long time, and it looks like they have come to stay. In city houses, quickly thrown together and cheaply built, once the mice get in and gnaw holes for runs from room to room and floor to floor, it is a big, bad job getting rid of them.

The same way with rats and mice. Inventors can get up all sorts of traps and triggers, but the rats and mice seem to grow wise and give traps and triggers a wide berth.

Rats and mice have just as much sense as folk when it comes to poison—maybe more. Scientists have experimented along this line and they find that in order to poison rats food must be set out several times free of poison. After the rats or mice eat this food freely, then arsenic may be put into it and many of the rodents bite at the bait and kick the bucket. But not all the rats and mice can be got this way, for some will eat only on taste or smell and is deadly to rats, mice or men, so beware, warns the New York Press, it might be easier to poison all the human beings in some tenements with ratsbane than it would be to poison all their rats and mice. Rats and mice pick up and leave once the poisoners get too wise for them.

JAPANESE AUCTIONS. No Bidding, No Shouting, Just Quaker-Like Gath'ring. To the uninitiated the announcement of a real Japanese auction meant real Japanese goods, but persons wise in the ways of auctions knew that it meant a lot more than that.

"It means, for one thing, silence," said a woman to the Philadelphia Public Ledger. "An Oriental Quaker prayer meeting. People do not exactly wait for the spirit to move them before making a bid, but they go about as silently as if meditating in a Lenten retreat."

"Nobody has anything to say, or if he has he exercises a powerful restraint over his emotions and refrains from saying it. Even the auctioneer holds his tongue. Every article that he offers for sale is simply held up for inspection."

"The wondrous vocabulary with which Occidental auctioneers proclaim the merits of their wares has no place in a Japanese auction room, the dramatic thrill of 'going, going, gone' is never felt. Purchasers write their bids on a slip of paper and send it up by a page. There is no hurry. Everybody has time to count his change and make up his mind how much he is worth and how much he can afford to pay."

"When the bids are all in the auctioneer coolly turns over the article to the clerk with the highest bidder's offer and takes up the next thing on the list. Unless people wish to talk afterward nobody will ever know what anybody else bid, not even the price paid by the successful bidder. As a popular diversion Japanese auctions will never rank high in America, but as a study of national customs an occasional Japanese sale has value."

HOW'S THIS? We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

Dr. J. C. KENNY, of Toledo, O. We, the undersigned, have known E. J. Cheney for the last 15 years, and believe him perfectly reliable in business transactions and financially able to carry out any obligations made by him.

W. A. LINDSAY, of Toledo, O. Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is a certain remedy, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all druggists.

Take Hall's Family Pills for constipation. Some of the sufferers from coughs and colds may feel disposed to try one of the remedies recommended by Piny. These include wolf's liver dissolved in hot wine, honey mixed with the gall of a bear, and powders made from rabbit skins and bullock's horns burned and pounded together. Should one's ills resist these simple remedies for a cough he might try wrapping any of his fingers in the skin of a freshly killed dog. Two frogs, too, are excellent for all forms of catarrh. Place one in the mouth for a minute, and when he makes his escape the sufferer is cured. No harm is done to the frog. For a cold in the head Piny prescribes a simple yet infallible remedy—three kidneys on the mouth of a mule.—Indianapolis News.

The site of the house at Missolonghi wherein Byron died is now almost covered by the waters of a neighboring lagoon, the building itself having disappeared. The spot is to be enclosed and on it will soon be erected a tablet to the memory of the poet. The public park of the town contains a statue of Byron whereon a wreath was placed the other day on the anniversary of his tragic sortie. There is a local tradition that a poor man was buried in this park, but this is undoubtedly a mistake, as Hobhouse records the bringing of that remnant of poor humanity to England.

The United States commissioner of Indian affairs has issued an order to officials throughout Oklahoma that hereafter every Indian who cannot write his name shall be required to sign all checks

FOR RENT-House, barn and two lots on Jackson street. 4-21-11

Copper Country

STARTLING RUMOR STIRS HOUGHTON

Story That College of Mines Was to Be Without Funds Is Not True, However.

A startling rumor gained credence in Houghton yesterday. It was to the effect that the Michigan legislature, recently adjourned, had neglected or forgotten to make the biennial appropriation for the Michigan College of Mines maintenance. In various quarters smoke pictures were drawn of the college being closed up for the ensuing two years, of technical education in the copper country with a black eye, of a mining college celebration in Houghton this summer without any mining college as a background. The rumor seemed to have some foundation and a reporter sought W. D. Calveley, a member of the board of control of the college. Mr. Calveley said that the rumor was untrue, that the legislature had appropriated the sum of \$130,000 for the ensuing two years.

It appears that the rumor arose from a hasty reading of Lansing dispatches which told of the manner in which Governor Osborn had slashed the college appropriation. He cut the appropriation to the extent of \$2,500 on the maintenance account and he cut off entirely several thousand dollars which were asked for other purposes, including a ventilation system for Hubbell hall and cement sidewalks for the campus. In making these cuts Governor Osborn is not condemned by anyone connected with the college. "Why," said Mr. Calveley, "the cut other institutions worse than he did."

The governor entered upon his duties with the avowed intention of bringing Michigan to her feet financially. The state virtually has been bankrupt and the governor does not intend that any administration will make that condition more serious, but rather hopes the state will be sounder financially when he leaves the office than when he entered it. For this reason he has used the pruning knife ruthlessly on appropriations which he considered were not backed by imperative need.

Concerning Those Walks. But the cutting of the appropriation leaves the Michigan College of Mines still in possession of its own infirmity, the lack of walks. It has almost come to be one of the cherished institutions of the college that in their daily walks around the campus the students shall greet the Mother Earth. Each succeeding legislature cuts off the appropriation for walks. Often that is the only cut made. The result is that there is no walk on College avenue in front of the college grounds nor any that are being built but which connect the buildings of the college.

There are a lot of people in East Houghton, however, people whose residences are beyond the college, in the Park addition, for example, who are not built. The dirt walk is a relief to aching feet that have pounded cement for the entire mile from the business district. Some of these residents have been heard to say that the legislature is unwisely conferring a blessing on some people by not building the walks.

HOUGHTON DEADMAN'S CURVE. President Bowden Advises Chauffeurs to be Careful at Franklin Street.

The attention of Village President Bowden of Houghton was called yesterday to the fact that people are constantly endangered by the traffic at the junction of College avenue, Franklin street and Sheldon street. The danger particularly is from speeding automobiles and President Bowden advises chauffeurs to use great caution in passing this curve if they wish to avoid official action by the village.

The union of three streets at this point makes a condition which may eventually mean for the point the name "dead man's curve," which is used to designate similar dangerous points in a number of cities. Here in a comparatively narrow space automobiles, street cars and horse drawn vehicles have an opportunity for congestion which is not offered by any other place in the copper country. Two years ago Chief Voetsch of an fire department advocated placing a alarm bell at this point to be rung when the department is running toward the curve, to warn people and vehicles to clear the way. Nothing has been done about it. But the fact that the chief made the suggestion shows that he is alive to the danger at this point.

BIDS ARE WANTED. Thirty Thousand Dollars to Be Spent for Highways by L'Anse Township.

John O. Massey, supervisor of L'Anse township has announced that the township will spend in the neighborhood of \$30,000 this year in repairing old roads and building new ones. He says that bids from copper country contractors will be acceptable and will receive the same consideration as that home contractors will be given. It is planned to commence work at an early date.

ITS WORK ONE OF MUCH IMPORTANCE

Equalization Committee Takes Up Task of Fixing the Valuation of Houghton County.

The equalization committee of the Houghton county board of supervisors met yesterday morning in the county building for the purpose of getting together information which will be incorporated in its report to the June meeting of the board. The committee, which is the most important of the standing committees of the board, is composed of Supervisors James MacNaughton of Calumet, Charles Smith of Houghton, Edward Koepel of Stanton, C. L. Lawton of Quincy and John L. Harris of Hancock. Chairman Edwards and other members of the board attended the meeting.

No information was given out from the meeting as to final action was taken, the meeting being simply a preliminary affair. But it is an important matter that this committee is taking up, the equalization of the valuation of the county. It is particularly important this year because the state board of equalization will meet in Lansing in August and if the committee has not given the county a sufficiently high valuation the state board will boost it.

The state board of equalization has been meeting once every five years, but a new law compels it to meet often, which fact, however, does not materially affect the present situation. The business of the board is to determine the valuation of the state and then apportion that valuation among the counties. Houghton county always comes in for considerable attention at the hands of the state equalization board, because it is the second county in the state in point of valuation and the board consistently attempts to increase its valuation.

In the same manner as the state equalization board works the county equalization committee determines the valuation of the county as a whole and then apportions the valuation among the townships. This work in Houghton county always has been attended by harmony, so that the work of the equalization committee makes little stir. But in other counties of the state, particularly agricultural counties, the session of the board at which the equalization committee makes its report is the most important session of the year, precipitating a fight between townships and occasioning a lot of rancor.

Will Send Representative. At the supervisors' meeting Tuesday Chairman Edwards forecast trouble for Houghton county before the state board by declaring that the county should be represented good and strong at the board meeting. The matter of appointing this representative was left with the equalization committee, but that body did not announce the appointment yesterday, nor will it before the June meeting, as far as now can be learned.

The impending meeting of the state equalization board is of unusual importance to Houghton county this year, because at the meeting the assessment of the new valuation of the mines will also be an important consideration. Supervisors and assessors this year must keep these two items in mind in making out their tax rolls because if they do not they have to fear the action of the equalization board and the state tax commission.

Already the probable action of the equalization board is occasioning speculation on the part of counties in lower Michigan, particularly Wayne county.

NATURALIZATION CLUBS. British-American and French-Canadian Organizations Are Active.

The Calumet branch of the British-American club will hold a social session at the Old Fellows' Hall in Red Jacket June 12. These gatherings are held for the purpose of bringing before the club British-American residents of Calumet who have not applied for citizenship. The club continues its active campaign for citizens and tomorrow night will take a big class for first and second papers to Houghton.

At the recent meeting of delegates from the several French-Canadian naturalization clubs of Houghton county at Calumet, central bureau officers were elected and considerable other business of importance was handled. The reports showed that the membership is increasing steadily. There were forty delegates present. Officers were elected as follows:

President—Louis N. Legris, Houghton. Vice President—E. F. Prince, Lake Linden. Secretary—Charles Bonleau, Hancock. Assistant Secretary—Joseph Chatel, Wolverine. Corresponding Secretary—O. D'Outit, Hubbell. Treasurer—George Vallier, Hubbell. Director—John B. Colutier, Laurium.

MAENNERCHOR MAIFEST. The Calumet maennerchor, assisted by the Houghton and Hubbell maennerchors, will give a maifest at the Losselyoung hall, Laurium, Saturday evening, May 27. It is expected that the affair will be largely attended from all parts of the county. The program will be informal. A choir of more than fifty male voices will take part. The Calumet maennerchor was organized thirteen years ago and it is in excellent condition financially and in point of membership.

RETURN FROM CALIFORNIA. Graham Pope and Miss Helen Pope have returned to Houghton from California, where they spent the winter.

John D. Rockefeller would go broke if he should spend his entire income trying to prepare a better medicine than Chamberlain's Colic, Cholera and Diarrhoea Remedy for diarrhoea, dysentery or bowel complaints. It is simply impossible, and so says every one that has used it. Sold by The People's Drug Store.

URGING PRESIDENT TAFT. Mining College Men all Over the United States to Wire Him.

President F. W. McNair of the Michigan College of Mines will be Washington May 18 for the purpose of urging upon President Taft a definite acceptance of the invitation to be the guest of Houghton and the Michigan College of Mines during the college quarter celebration and reunion. Already President Taft has given a tentative acceptance of the invitation, but he qualified that acceptance by the statement that if congress is in session when the time comes around he will not be able to come.

President McNair's visit next week will be for the purpose of obtaining a definite answer from the chief executive. He is to be backed up in his urging of the invitation upon the president by all the alumni of the college, by the entire congressional delegation from Michigan and by many prominent businessmen around the state.

To bring forcibly to the attention of the president the urgent desire of many men that he visit Houghton in August all the alumni and the businessmen who have decided to help the president to a decision will wire him on one of the two days preceding President McNair's visit. Fifty of these telegrams alone will go to him from Michigan, the South-west mining camps and from wherever there is a Michigan College of Mines alumnus.

DANGER IS LESSENER. Rain Falls Tuesday Night—Forest Fires Are Subdued.

The rain of Tuesday night must have had good effect in the localities where forest fires have threatened the copper country for several days. The reports yesterday were all to the effect that conditions are improving. A first train, the first of the year to run out of Calumet, was run over the Mineral Range and South Shore tracks Tuesday morning to Pulkie, Alston, Hazel and the Keweenaw bay district. It was reported that at Giddings the fire had crept to within 300 feet of the right-of-way, while at Pelkie the huge water tank and station were threatened. Superintendent Smith says that the fire, which consisted of a passenger coach and a huge tank, capable of carrying water enough to throw a steam fifty to seventy feet high for a distance of 500 feet two hours or more.

BISHOP EIS ARRIVES. Catholic Prelate from Marquette at Hancock Rectory.

Rev. Frederic Eis, bishop of Saint Ste. Marie and Marquette, arrived at Hancock yesterday and is the guest of Rev. T. J. Atfield at St. Patrick's rectory. Tuesday evening the bishop met with his advisory board at Assinins and the proposal to build a new organ was discussed. No definite plan was announced.

The bishop will administer the sacrament of confirmation Sunday to a large class at the Sacred Heart church at Calumet and during the following week will confirm classes at smaller locations. One week from Sunday he will confirm classes at Houghton, Hancock and Dollar Bay.

PAROCHIAL SCHOOL CLASS DAY. The commencement exercises of St. Patrick's parochial school of Hancock will be held in St. Patrick's church the night of June 15. They will be preceded by class day exercises June 12.

The commencement exercises will be of a religious character. The charge to the students will probably be delivered by Rev. Father Johnson of Chicago, recognized as one of the most powerful speakers along educational and religious lines that ever visited the copper country. Father Johnson was here a few years ago. His health during the past two years has been such that he gave up parish work and take charge of a mission. The evening's ceremonies will open with the address to the graduates and will be followed by the blessing of the medals which are to be worn by the class and the conferring of the diploma. The services will close with benediction of the blessed sacrament. Following these ceremonies a reception will be tendered the young folks in the church hall.

CALUMET & HECLA CONCERT. The full Calumet & Hecla band, under the direction of Conductor George D. Barnard, will give a concert at Athletic Park preceding the baseball game which is to be played there Saturday afternoon by the Calumet and Mohawk teams of the Copper Country Trolley League for the benefit of the Calumet Associated Charities. Conductor Barnard is arranging an excellent program. The concert will start shortly after 7 o'clock and all those who like the best of music, even though they do not care for the national game, are invited to be present. The concert will be continued during the game. The Calumet & Hecla band is donating its services.

MEMORIAL DAY EXERCISES. William H. Mason, who appeared before the Hancock common council Monday evening as a delegate from the Grand Army of the Republic, has stated that there will be a new and distinct feature added to the exercises on Memorial Day this year. The observance in past years has been almost wholly within the ranks of the military organizations. This year an attempt will be made to get away from that idea by inviting fraternal and civic organizations to participate.

MARRIED IN WISCONSIN. Miss Florence Grant, formerly a teacher in the public schools at Calumet, and Will Paul, also formerly of Calumet, were married last Saturday at Ripon, Wis., the home of the bride. Mr. and Mrs. Paul will make their home in Detroit.

THOMAS F. COLE HERE. Thomas F. Cole, the Duluth mining magnate, head of the Cole-Ryan interests, arrived in the copper country yesterday. His mission could not be learned.

HAS NARROW ESCAPE. John Churock, a Baraga lumberjack, walked off Roach & Seba's dock at Portage Lake at Houghton at midnight Tuesday. He was rescued, after he had

NEW LIFE FOR KENTON. J. S. Wiedman of Mt. Pleasant to Buy Out Sparrow-Kroll Company.

John S. Wiedman, a wealthy lumberman of Mt. Pleasant, this state, arrived at Kenton this week, accompanied by his son, John S. Wiedman, Jr., for the purpose of negotiating the purchase of the Sparrow-Kroll Lumber company's plant. Mr. Wiedman owns an immense tract of hardwood and hemlock lands south of Kenton. It is virtually settled now that he will buy the Sparrow-Kroll plant. Mr. Wiedman intends to cut 18,000,000 feet of lumber per year. He already has made plans to construct ten miles of logging railroad extending southerly from Kenton. He will employ at least three hundred men. Kenton people are overjoyed at the prospect. The Sparrow-Kroll people have been considering going out of the hardwood business and there has been a prospect of the closing of the mill. The Wiedman proposition means a new lease of life for Kenton.

STOCK MARKET IS STAGNANT. THE PRICES DRIFT DOWNWARD BUT CHANGE VERY LITTLE.

New York, May 10.—The state of peace which has been maintained in the stock market in the last few days was preserved today, the opposing forces in the speculation remaining virtually at a deadlock. The trading received no fresh impetus and the price changes were nominal, although there was a more decided drift downward, the leading issues with few exceptions receding by small amounts. The demand for stocks was limited.

The publication of the monthly statement of the netted orders of the United States Steel corporation did not rouse the market. The price of Steel fell scarcely moved when the announcement was made that the unfilled tonnage at the end of April was 228,000 tons less than at the end of the previous month. In view of the known conditions in the steel trade the statement was not surprising.

On the New York Metal exchange today, standard copper was still called dull, with spot, monthly and quarterly contracts at \$1.06 1/2, 1.10 and 1.15, and August at \$1.10 1/2. The market at London was quiet, the spot at £33. 1/2 and futures at £34. 08, 08, 08. The custom house returns show exports of copper so far this month as 8,469 tons, and New York copper lake contracts at 12.37 1/2 @ 12.50 cents, electrolytic at 12.12 1/2 @ 12.25 and casting at 11.87 1/2 @ 12.

TALK OF 'PHONE MERGER. Giles Bill Puts Railroad Commission in Control of Possible Monopoly.

Detroit, May 10.—President W. A. Jackson of the Home Telephone company of Michigan, the local independent concern in Detroit, practically confirms rumors recently circulated that a merger of the Bell and independent companies in this state is under serious consideration.

Admitting that present "talk" of a general telephone merger in the state under a single management and control, "might possibly lead to something definite," President Jackson repeatedly used the word "merger" in his remarks. He said that he knew of nothing of the "Giles bill." His emphasis was on the theory that a "Michigan telephone trust need not be greatly feared, simply because the recently passed Giles bill, permitting interchange of telephone connections between the various companies, leaves final authority and direction with the state railroad commission."

All the books of financial record belonging to the Home company were put aboard the cars six weeks ago and sent to New York city for minute examination. There has been at least a material improvement in the metal market. Michigan has a good mill upon which over \$200,000 has been spent, and to complete which would require but \$150,000 more. There are in the neighborhood of the mill several properties now under development and when they arrive at the productive stage, owing to the close proximity of this plant, the utilization of its two heads either by purchase or through custom treatment would not be unlikely.

In the Bee property the copper ground was very bumpy as a result of which it was decided to stop opening new ground and continue stopping as well as testing the portion of the territory already opened. A little more than 3,000 tons of ore was shipped to the Atlantic mill, the returns showing a trifling more than twelve pounds recovery. The diamond drill work amounted to 7,702 feet and it is by this method that Superintendent Brady believes development of the north amygdaloid, where greater and more regular values at depth have been indicated, should be pursued. The diamond drill work during the past year has been directed toward the completion of a cross section of the property from the Argonne series to the Eastern sandstone.

NOTES OF COPPER NOTES. Operations at Tamarack are being greatly restricted. Every pound of copper that the mine is now producing represents an operating loss of fully two cents per pound. In 1910 the company failed to earn operating expenses by \$172,000. Miners are leaving the location.

The Butte & Superior company has been successfully financed, and it will receive a total of \$650,000 from the sale of bonds, which will pay off its debts and leave a substantial working capital. A. B. Wolvin, president, says that the company is now earning at the rate of \$2 per share, has 2,000,000 tons of ore in sight, and is in a position to materially increase its output and earnings.

Rumors to the effect that the First National Copper company would shut down its smelter in the near future are apparently without foundation, as at a meeting of the directors held in New York the decision was reached to continue operations as at present.

Butte Coalition now has an income of \$1,253,000, or \$1.26 per share on its 1,000,000 outstanding shares. The major portion of this income is derived from dividends of \$2 per share on the 520,000 shares of Anaconda stock in its treasury. Considerable mystery surrounds the granting of a lease of bond on the fractional part of the Olympus mine claim

MINING NEWS ATLANTIC.

The offer to exchange 10,000 shares of its capital stock, made by the Copper Range Consolidated company for the 100,000 shares of Atlantic Mining company stock, has taken concrete form in the shape of a recommendation by the officers of the latter company that all stockholders make the exchange on the basis of one share of Copper Range for ten shares of Atlantic. In notifying the stockholders, Joseph E. Gay, president of the Atlantic Mining company, says: "The \$200,000 which was provided by the last assessment for the payment of further exploring the mineral lands of this company has all been expended, so that another assessment would have to be called immediately if work is to be continued. From the time the Baltic lode was discovered in 1897 up to the present time, continual explorations have been carried on in Section 16 in an endeavor profitably to operate the extension of that lode. All our efforts have been without satisfactory results, so that it does not seem wise to your directors to spend more money in this search. The only other mining chance lies in reopening the old Atlantic lode, but in view of the results obtained during the last five years that old mine was operated and the limited extent of the unmined portion of the lode, your directors can see no promise of profitable results from this course. Your directors have received a proposal from the Copper Range Consolidated company for an exchange of shares in Atlantic Mining company for shares in the Copper Range Consolidated on the basis of one share for ten, this stock to be issued as soon as a majority of the Atlantic stockholders have assented to this exchange. This offer will remain open until July 1, 1911. All your directors and many of the large stockholders have already assented to the arrangement and recommend all the stockholders to make this exchange. The American Trust company, 50 State street, Boston, Mass., will receive the Atlantic Mining company stock, issuing receipts therefor, which certificates will be exchanged for shares of the Copper Range Consolidated on the basis of one share for ten as soon as a majority of the Atlantic stock has been deposited. No certificates for fractions of shares will be issued, but the said Trust company will, at the option of the stockholder, either buy or sell any fractions of stock that may arise out of such exchange and will issue certificates for \$4 for each share of Atlantic. The assignment on the back of the certificates sent for exchange must be duly signed in blank."

On the treatment of 25,337 tons of ore by Ray Consolidated in April there was produced 1410 tons of concentrates, of an average grade of 28.82 per cent, copper. The handling of the ore treated was 2.34 per cent, and the ratio of concentration 17.9 into one. The average mill recovery for the entire period was 68 1/2 per cent, but when the mill had gotten into full swing and increased its daily capacity from 150 tons up to 1000 tons, the handling of the ore treated was 2.34 per cent, and the ratio of concentration 17.9 into one. The average mill recovery for the entire period was 68 1/2 per cent, but when the mill had gotten into full swing and increased its daily capacity from 150 tons up to 1000 tons, the handling of the ore treated was 2.34 per cent, and the ratio of concentration 17.9 into one. The average mill recovery for the entire period was 68 1/2 per cent, but when the mill had gotten into full swing and increased its daily capacity from 150 tons up to 1000 tons, the handling of the ore treated was 2.34 per cent, and the ratio of concentration 17.9 into one. City Brevities

Today's weather: Showers and cooler Thursday.

Yesterday's temperatures: Seven a. m., 58 degrees; noon, 50; 7 a. m., 66. Highest, 72 degrees; lowest, 40.

John and Emil Ewald, of Stephenson, were Marquette visitors yesterday.

Fred Beaudette, of Hancock, spent yesterday in the city.

F. M. Moore is opening an office in the Savings Bank building.

D. Fred Charlton, the architect, left last evening for Milwaukee, on a short business trip.

E. J. Longyear, of Minneapolis, and F. G. Jewett and G. G. Hartley, of Duluth, were in Marquette for a few hours yesterday morning.

Northwest storm warnings were displayed yesterday by the weather bureau on the flag pole of the Savings Bank building.

Miss Ruth Brotherton has accepted a position in the Manistique public schools on the flag pole of the Savings Bank building.

Northwest storm warnings were displayed yesterday by the weather bureau on the flag pole of the Savings Bank building.

Miss Ruth Brotherton has accepted a position in the Manistique public schools on the flag pole of the Savings Bank building.

Mrs. A. McAlfee, formerly of Marquette, now of Mantou, Mich., is spending a few days in the city, the guest of Mrs. J. A. Williams, West Park street.

E. E. McIntosh received three automobiles yesterday on the steamer Comaugh. One of the machines goes to Fred Thoney, who ordered an E-M-F some time ago.

Clester Blanchard, who recently moved to Minneapolis, is spending a few days with his parents here. Mr. Blanchard is a traveling salesman for a company manufacturing cigarettes.

Mr. and Mrs. J. W. Spear planted 12,000 of the consignment of trout fry received here yesterday along the Marquette & Southeastern between this city and Big Bay. While waiting until the return of the train they caught seven fish.

Back From the Navy—Benjamin Lawrence, son of C. A. Lawrence, has returned to the city after several years' service in the United States navy. During the term of his enlistment, young Lawrence circumnavigated the globe and has recently been in Australia. He plans to remain in the city but a few days and intends to go west.

Bijou Theatre—A novelty act is furnished by LeVeré and Palmer who do a singing specialty, decidedly novel and one with merit. "For Washington" is a picture play of Colonial days showing Washington and half his army crossing the Delaware river and capturing the Hessians. This picture is highly educational and of interest.

D. A. R. Elects Officers—At a meeting of the Daughters of the American Revolution held at the residence of Mrs. E. O. Stafford Tuesday afternoon, the following officers were elected: Regent, Mrs. W. S. Hill; vice regent, Mrs. R. A. Manhard; corresponding secretary, Mrs. C. Doll; register, Mrs. A. F. Kowpke; treasurer, Miss Minnie Brown; historian, Mrs. A. Kittleberger.

School Meeting Friday—On Friday the school boards and officers of Marquette and Alger counties will meet at the court house in this city with State Superintendent Wright. At this meeting Mr. Wright will explain the changes made in the school laws by the late legislature. Plans will be prepared to answer or discuss any problems that may come up in school administration during the year just passed. It is hoped that there will be a large attendance.

Ball Players Arrive—Two prospective members of the Marquette baseball team arrived in the city yesterday. Clarence Tiffany, who caught for Crystal Falls last season, and J. F. Bendit, who has been working out with the Appleton, Wis., team this spring. Bendit will try out for an infield position, while Tiffany is expected to play behind the bat. Tiffany has been spending the winter at Cornell, Ill. Bert Freed, who has been on a scouting trip in lower Michigan, is expected home today.

Bids Advertised For—At last it appears that Marquette is to get action from its water board. At the meeting Tuesday night it was decided to advertise for bids for extension of the intake, and yesterday the advertisements were gotten out and sent to two outside periodicals as well as to the local papers. These bids will be opened June 9, which was thought to be as soon as the water board could be expected to open the plans and specifications and prepare their figures. In the meantime, it is probable that the bonds authorized to pay the expense of the improvement will be sold, and every effort is to be made to get the job finished before winter sets in.

Another Big Catch—D. Fontaine, S. Paine and Morris Caspar returned last night from a fishing trip, each with as many trout as the law permits one to catch in any one day. All of the fish were good size and several of them were "whoppers." This is the second time within a week that these men have returned with all the fish they could carry. Those who have been less fortunate on their expeditions have implored these men to ascertain where and how they get such large catches, but little information has been given out. However, the champion fishermen stated last evening that they had about decided to start a fisherman's class with a tuition fee of \$10 per, guaranteeing to anyone who takes the course that he will be able to catch as many fish as his preceptors.

INSURE WITH PETER WHITE & CO.
CARD OF THANKS.

We hereby wish to voice our sincere thanks to our friends who, with loving hands, assisted us during our recent bereavement, and to all those who expressed sympathy for our loss through the beautiful floral offerings.

PROVISIONS OF NEW LABOR BILL

Stringent Regulations Governing the Employment of Women and Children.

The labor bill regulating the employment of women and minors, which was passed by the last legislature and has recently been signed by the governor, contains the following provisions:

Females shall be limited to 54 hours' work per week and not more than nine in any one day.

No female under the age of eighteen shall be employed in any manufacturing establishment between the hours of 8 o'clock p. m. and 6 o'clock a. m.

No child under the age of sixteen years shall be employed in any manufacturing establishment or workshop or messenger service in this state between the hours of 6 o'clock p. m. and 6 o'clock a. m.

No child under the age of eighteen years shall be employed between the hours of 11 o'clock a. m. and 5 o'clock a. m. in the transmission, distribution or delivery of messages or merchandise.

No child under the age of twenty-one years shall be employed, permitted or suffered to work in any theater, concert hall or place of amusement where intoxicating liquors are sold.

Bars Children Under 14.

No child under fourteen years of age shall be employed, permitted or suffered to work in or in connection with any mercantile institution, store, office, hotel, laundry, manufacturing establishment, mine, bowling alley, theatre, workshop, telegraph or messenger service, or any persons coming within the provisions of this act, to keep a register in which will be recorded the name, birthplace, age and place of residence of every person employed under the age of sixteen years, and it shall be unlawful for any such establishment or person to hire or employ, or permit to be hired or employed, or suffered to work, any child under the age of sixteen years without there being first provided and placed on file in the business office thereof, a permit issued by the superintendent of schools of the school district in which the child resides, or some one duly authorized by him in writing, or where there is no superintendent of schools, by the county commissioner of schools, or some one duly authorized by him in writing, or by the superintendent of schools, or by the judge of probate of the county wherein such child resides.

To Protect Health and Morals.

No female under the age of twenty-one years and no male under the age of eighteen years shall be allowed to clean machinery while it is in motion, nor be employed in or about any distillery, brewery, or any other establishment where malt or alcoholic liquors are manufactured, packed, wrapped or bottled, nor in any hazardous employment or where their health may be injured, or morals depraved, nor shall females be necessarily required, in any employment, to remain standing constantly.

No child under the age of sixteen years shall be employed in or about any theater, variety show, moving picture show, burlesque show, or any kind of play house, music or dance hall, pool room or billiard hall.

500 CANAL PASSAGES.

Names of the Boats Bound for Ports on Lake Superior.

Marie, Mich., May 10.—(Special.)—The following upbound boats have passed the canals the past twenty-four hours: Comaugh, 11:30 last night; Kingmont, Newona, midnight; Phipps, 12:30 this morning; Fulton, 1:30; Champlain, Ats, Mirtee, Hutchison (small), Security, oil barge, 9:30; H. Green, Northern Light, 11; Keewatin, Dalton, 11:30; Henry Rogers, noon; Perkins, 12:30; Corey, 1:30; Hawgood (small), Gary, 3; Buffalo, 3:30; McKee, 5; Jenks, 7:50.

GOVERNOR SAYS KANSAS WILL BE DRIER THAN EVER.

Topeka, Kan., May 10.—Backing up his threat that he would call out the militia if necessary to enforce the prohibitory law, Governor W. R. Stubbs says:

"Kansas has tolerated the boot-legger, speak-easy, basement, attic and every other kind of liquor violator too long. It must stop. These fellows are going to be driven out of business and they are going to stay out."

The term-law becomes effective next week and under it a boot-legger may be sentenced to the penitentiary for a second offense.

"I have been planning this work with the attorney general and the officers and the state temperance union for several months," added the governor. "There will be no let-up and Kansas will be drier than it ever has been before."

BROKERS FAIL FOR \$541,396.

Philadelphia, Pa., May 10.—Jamison Bros. & Co., bankers and brokers, announced their insolvency on the local stock exchange yesterday and today filed a voluntary petition in bankruptcy. They say their liabilities are \$541,396 and assets \$385,776.

Now is the time to have your pictures taken while Stierle is making his 88 pictures for \$4 a dozen, finished in the very latest style. 4-8-tf-o

YESTERDAY'S GAMES.

American League.

Chicago, 9; Washington, 6.
Chicago, May 10.—In a slugging match in which Washington used four pitchers and Chicago two, the home team won.
Score: R. H. E.
Chicago . . . 4 0 2 0 0 2 0 1 *—9 19 2
Washington . . . 0 1 2 0 3 0 0 0—6 10 4
Batteries: Walsh, Scott and Sullivan; Otey, Johnson, Sherry, Gray and Ainsmith. Two-base hits—Lord and Callahan (2); Chicago: Lelivelt, Washington. Three-base hits—Corhan, Collins and McIntyre (2); Chicago. Home run—Cunningham, Washington.

Philadelphia, 8; St. Louis, 6.
St. Louis, May 10.—In a sensational ninth inning rally, a base on balls, a single, an error, a triple and a double enabled Philadelphia to score enough runs to win the game.
Score: R. H. E.
St. Louis . . . 0 0 0 0 0 3 0 3 0—6 11 6
Philadelphia . . . 0 1 0 0 2 0 0 1 4—8 13 2
Batteries: Peltz, Bailey, Powell and Stephens and Clarke; Bender, Plank and Thomas. Two-base hits—Crisis, Hoffman and Clarke. St. Louis: Thomas, Philadelphia. Three-base hits—Collins and Murphy, Philadelphia.

Cleveland, 6; Boston, 0.
Cleveland, May 10.—Cleveland easily defeated Boston today, hitting both Pape and Collins hard.
Score: R. H. E.
Cleveland . . . 0 0 0 1 0 3 1 1 *—6 11 0
Boston . . . 0 0 0 0 0 0 0 0 0—0 5 2
Batteries: Gregg and Smith; Pape, Collins and Nummacker and Carrigan. Two-base hits—Olson, Stovall and Jackson, Cleveland. Three-base hit—Williams, Boston.

New York, 6; Detroit, 2.
Detroit, May 10.—George Mullin lost his first game of the season and Detroit the first game on its home grounds this year today. Features were Fisher's home run in the sixth and Chase's sensational defensive playing.
Score: R. H. E.
Detroit . . . 0 1 1 0 0 0 0 0—2 4 2
New York . . . 0 1 3 0 0 2 0 0—6 12 3
Batteries: Mullin and Stange; Fisher and Sweeney. Two-base hit—Mullin, Detroit. Three-base hit—Johnson, New York. Home runs—Wolter and Fisher, New York.

National League.

Philadelphia, 6; Pittsburg, 2.
Philadelphia, May 10.—The home team practically won today's game in the first inning, when it scored four runs on two singles, a sacrifice fly and home runs by Faskert and Luderus.
Score: R. H. E.
Philadelphia . . . 4 0 1 0 0 1 0 0—6 8 0
Pittsburg . . . 0 0 0 1 0 0 0 0—2 5 1
Batteries: Moore and Dooin; Nagel, Ferry and Gibson. Two-base hits—McKechnie and Hunter, Pittsburg. Home runs—Faskert and Luderus, Philadelphia; Wilson, Pittsburg.

St. Louis, 4; Brooklyn, 3.
Brooklyn, May 10.—Sallee held the locals 2 to 0 up to the seventh, when Brooklyn batted out three hits and tied the score. Steele then took up the pitching and another hit sent Brooklyn ahead. In the eighth, St. Louis went ahead again for good.
Score: R. H. E.
Brooklyn . . . 0 0 0 0 0 0 0 0—3 7 0
St. Louis . . . 2 0 0 0 0 0 0 2 0—4 9 2
Batteries: Ragon and Bergen and Zimmerman; Sallee, Steele and Bresnahan. Two-base hits—Ellis and Konetchy, St. Louis; Coulson, Brooklyn.

Cincinnati, 8; Boston, 7.
Boston, May 10.—It took fifteen innings to play today's game. Four home runs by the visitors were the features. They were made by Beck, Egan, E. Clarke and Hoblitzell.
Score: R. H. E.
Boston . . . 0 3 0 1 1 0 0 0 0 0 0 0—7 14 0
Cincinnati . . . 0 1 0 0 4 0 1 1 0 0 0 0—8 10 5
Batteries: Mattern, Curtis and Raridon; Burns, Fromme, Gaspar and E. Clarke. Two-base hits—Ingerton, Miller and J. Clarke, Boston. Three-base hit—Goode, Boston.

New York, 11; Chicago, 1.
New York, May 10.—The Giants won with ease from Chicago today. Chicago was saved from a shut-out by Hofman's lucky home run, the ball bounding into the center field bleachers.
Score: R. H. E.
New York . . . 2 0 4 1 0 1 3 0—11 11 1

Announcement!

We are offering a NEW HOSE for men, possessing wearing qualities, fit and appearance far superior to any half-hose ever before offered at anything like the price,—6 pairs for \$1.50.

It is a fine texture, light weight, snug-fitting hose in permanent silk-lustre colors and manufactured with the new wear-resisting

Interwoven TOE AND HEEL

which give it many times the wearing strength of ordinary hosiery. This new feature provides strength where strength is needed, without making the hose coarse or heavy.

The toe-resisting strength of this hose is simply marvelous. We unhesitatingly endorse this hose as the best wearing hose made.

We also offer some unusual values in silk thread hose,—all the popular shades, at 35, 50 and 75 cents a pair.

News of the Upper Peninsula

More Proposed Bond Issues—

For the purpose of raising money for use in constructing and maintaining highways, a bond issue of \$300,000 is proposed in Alger county. The question will be put to a vote June 15. In Ontonagon county, the people of Ontonagon township are to vote June 5 on the matter of floating a loan of \$10,000 for a similar purpose.

Bird Caught Far from Home—

One of the rarest birds yet received at the menagerie of Victor Johnson at North Escanaba on Turkey buzzard. The bird was caught near Powers, Menominee county, by a farmer and was bought by Mr. Johnson. The turkey buzzard is almost unknown in this district and its capture near Powers is considered remarkable.

Is Sentenced to Prison—

Circuit Judge Flannigan has sentenced Walter Due to a term in prison ranging from one to five years. Due broke down and cried when sentence was passed. The man was convicted in court at Menominee of the charge of larceny. It was alleged he had robbed a woman for whom he is said to have deserted his family. He has already been taken to Marquette prison.

Ball Park to Be Bettered—

The South park grounds at Escanaba are to be made one of the model baseball plants in the upper peninsula. The grand stand is to be extended south twenty-five feet to connect with the bleachers and the bleachers are to be repaired and rebuilt, thus considerably increasing the seating capacity. A new carload of clay has been ordered and will be placed on the diamond, in addition to that which has already been placed this spring and which was thoroughly rolled.

In Upper Michigan 74 Years—

Following an illness of several months, Levi Chapman passed away at Mackinac island. He was seventy-four years old, having been born on the island August 18, 1837. Mr. Chapman was city clerk for many years. He is survived by five daughters, Mrs. Oscar Johnson of New Troy, Mich., Mrs. Coghlin of St. Joseph, Mich., Mrs. Hattie Gallagher of Alpena, Mich., and Mrs. F. Lapp and Mrs. S. McDulpin, both of the island; two sons, Bela and Reuben, also of the island, and fifty grandchildren and seven great grandchildren.

Narrowly Escapes Death—

What might easily have proved a fatal accident occurred at the Commercial House at the Soo when Mrs. Henry Darnie, daughter of the proprietor, stepped out on the upper porch in the night. When she was leaning over the rail overlooking the street, the rail gave way and Mrs. Laramie fell to the pavement, a distance of fifteen feet. An ambulance was called and the injured woman was taken to the hospital. Dr. McLaughlin, who showed a compound fracture of the right arm and several painful bruises.

His Drowned Body Found—

The mystery that had surrounded the disappearance of Thomas Hannon, a lumberjack, forty-five years old, was cleared when his body was found at the mouth of Fall river, near Lake Umbagog, on the shore of the greater part of the winter and came out this spring and about April 3 he was missed. A diligent search was made at the time by the officers, who were unable to find him, and it was their impression that he had drowned. The body was found in a log raft, and was buried in Lake Umbagog.

"Blackhanders" Put to Rest—

"Leave one thousand dollars at the west yard limits tonight before 12 o'clock or we will blow up your place. Remember." This was the contents of a crudely scrawled note which J. H. Johnson found upon his hotel premises at Soo Junction the other afternoon. At the time a party of men deserted themselves near the place designated and after waiting for some time they saw two fellows approaching the place. The concealed men opened fire and the pair, who were carrying a large trunk, fled. Mr. Johnson treats the affair lightly and is inclined to think that the whole affair is purely a bluff or that some chump is attempting to play a practical joke.

Becomes Deputy Game Warden—

The election of a Democratic house of representatives has resulted in a number of Michigan men losing their positions at Washington. One of these is John O'Connell of Iron Mountain, who held the position of lieutenant of the capital police force. Mr. O'Connell entered the service as a private some two or three years ago as an appointee of the late Congressman Sherman. He was promoted to sergeant and then to lieutenant. The officer has returned to the upper peninsula to reside. He has gone to Crystal Falls, where he will serve as deputy state game, fish and fire warden, having been appointed to the position by State Warden Pierce.

Attorney Warns Liquor Men—

Attorney M. J. Doyle, who created something of a sensation at the meeting of the Menominee city council when he made an attack on City Attorney Cuddy, now has warned the saloon keepers of the possibility of rocks ahead, says a Menominee dispatch. Mr. Doyle was an unsuccessful candidate for the office of city attorney. He now has caused the different saloon keepers in the city to be notified that if they do not obey the state laws and ordinances requiring them to close at certain hours at night, and to remain closed all day Sunday, he will make complaints against them and use all his power in the prosecution. It is reported Mr. Doyle is contemplating starting a prohibition campaign in Menominee county.

Big Sugar Beet Year—

According to information given out by the Menominee River Sugar company, 10,000 acres of sugar beets have been contracted for, that corporation for the season of 1911. This is by far the largest acreage that the company has ever been able to obtain, and in the fall when the big factory starts operations it will be taxed to its capacity for at least 100 days. The terms of the company with more agriculturists engage in the raising of sugar beets. It is considered a safe crop and one that is not affected by droughts like other root crops. The sugar beets survived the long dry spell last year better than any crop in northern Wisconsin or the upper peninsula. According to advices from Ontario, at least a hundred workers have been engaged to work in the fields in that

county and similar reports come from other counties in the territory covered by the company.

Fire Sweeps Homestead—

By a fire, believed to have been of incendiary origin, the farm house and barn, together with their contents, were destroyed on the Casquette homestead, two miles south of the East branch of the Munising railway and a few miles from Cusino. Andrew Casquette, father of Joseph Casquette, the owner of the property, left everything alright on the night of 12:30. When returned at 5:00 p. m. the buildings had been reduced to heaps of ashes. He is positive the buildings were fired by an incendiary. Mr. Casquette, Sr., lost all his clothing except the badly worn suit he had on and \$300 in cash which he had in the house. Aside from this Mr. Casquette, Jr., has lost more than \$1000, the value of the buildings and contents.

Strange Sight Mystifies Town—

A mysterious body, consisting of a light, over which appeared a dark hulk, traveled over Nadeau, Menominee county, one evening last week, considerably exciting the people of the little village. The mysterious stranger appeared from the east. At first, people thought that it was a star or a comet that had unexpectedly come in contact with the earth's atmosphere without the knowledge of the astronomers. The body continued in a westerly direction, passing over the village. It did not appear at a great distance and the people are of the belief that it was either a balloon or an airship. No reports have been received of a trip being made to that part of the country by aeronauts, and Nadeau villagers are mystified as to what the object was.

Finds Diamond in Street Car—

Who lost a diamond ring on one of the Ogden avenue cars at Menominee? This question is being asked by officials of the Menominee & Marinette Light & Traction company, following the finding of a valuable gem, set in gold, on one of the cars. The jewel was picked up by a conductor, who acting upon standing orders turned it to the lost and found department. The ring was found more than a week ago, and the company has advertised the fact, but as yet the owner has not been located. It is presumed that it was lost by some person living outside of the city, who has no idea where it was lost and does not know where to look for it. If the ring is not claimed within six months the jewel will be turned over to the conductor who found it, as a reward for his faithfulness and honesty in turning it in.

Crystal Falls' Officials—

As appointed by Mayor Bjork and confirmed by the common council, the following men will serve the city of Crystal Falls in the various capacities stated, the ensuing year: City attorney, Fred H. Abbott; city marshal, Lewis Aeschliman; night watch, Art Noyes; night watch, Joseph Keast; street commissioner, A. Dalpra; cemetery board, Paul Smith; building inspectors, Andrew Nelson, J. E. Uld and D. M. Ross; chief fire department, Dan Davison; city physician, Dr. C. F. Larson. The salary of Superintendent Stephany has been raised from \$125 to \$150 per month and that of Alfred Haley and the team at the new plant to \$75 per month. The officials are the same as last year, with the exception of the street commissioner.

Iron Mountain Sanitarium—

The recently organized Scandinavian Hospital association at Iron Mountain has acquired ten lots in the Victoria Park from Messrs. Browning and Miller upon which to erect a sanitarium. Architect, Parnoles has been engaged to draft the plans and it is expected to let the contract for the construction work at an early date. The sanitarium will be a solid brick and will contain everything that is embraced in modern hospital construction. It will be 30x75 feet on the outside, and will be equipped with a full basement under the entire building. The dining-room, kitchen, laundry, dark room, X ray room, living rooms for janitor and heating plants will be located in the basement. On the first floor the office, parlors, rest rooms, operating room and a number of private apartments will be located. The second floor will be devoted to private rooms and wards. A hot water heating plant will be installed and no expense will be spared to make the building strictly sanitary. The site selected is a beautiful one for sanitarium purposes.

Destruction of the Cadillac—

Telling of the burning of the city's largest hotel, the St. Ignace Hotel, the citizens turned out to find the Hotel Cadillac in flames, and a fierce north-east wind blowing almost a gale. In a short time nothing was left but a large amount of twisted iron and a few trees to mark the spot where the large commodious hotel had stood. The firemen did all they could to save the building, but being unable to reach the attic or to gain the roof their efforts were futile. The only thing left to do was to remove the contents of the building. The Hotel Cadillac was built some twenty-five years ago by E. Sherwood and was conducted by him for fourteen to fifteen years, under the name Sherwood House. Some twelve years ago C. Y. Bennett, bought the property from Manager Whitney of the Michigan Fire and Marine insurance company, Detroit, since which time Mr. Bennett had conducted the hotel under the name "Cadillac." The building was a large structure with sixty-six guest rooms, fine large dining hall and a very commodious and pleasant office. Mr. Bennett carried \$6,000 insurance on the building, \$5,000 on the furniture and barn. The fire caught from a defective chimney leading to the laundry.

World's Largest Wagon—

The largest wagon in the world, weighing twenty tons, is being loaded on the cars at Minneapolis preparatory to its being shipped to Nome, where it will be operated in dredging for gold on the beach. The wagon, or more properly speaking, the dredge, is the invention of R. J. McKee of the Soo, and is the property of the Gold Platinium Dredge company, of which Charles H. Chapman is president, J. McKee, vice president and general manager, and James R. Ryan, secretary and treasurer. All these officials are Sault Ste. Marie men. The dredge proper is 10x32 feet, and with the boom and separating device is sixty feet long by eighteen feet in width. The company has a contract which calls for the dredge leaving Seattle June 4 for

Nome and it will be accompanied by Mr. Chapman and Frank J. Doyle. It is expected that the dredge will be in operation on the Nome ocean by June 15. So confident are the officers of the company that the dredge will do all that is claimed for it that arrangements have been made for the construction of two other machines almost immediately.

Alderman Makes Charges—

If statements made by Alderman Shipman at the council meeting are true it is high time for a searching investigation of the city poor commissioner and the affairs of his office, declares the Escanaba Journal. The alderman made allegations reflecting upon the way in which the affairs of the department are being conducted and have been conducted for some years past. His words were uttered during the discussion on the motion to adopt the report of the finance committee proposing to abolish the officers of city chemist, veterinarian and assistant city clerk. Speaking in opposition to the abolition of the report Alderman Shipman said, in part: "I believe in economy and a careful expenditure of the city funds, but I believe we should give more careful scrutiny to the big leaks and pay less attention to the small things. I think if we want to economize we should begin with the poor department. Every month the city is paying out from \$400 to \$500 to people who are supposed to be poor and needy, and the fact of the matter is that a lot of professional leeches are getting a big share of the money. I believe in caring for the poor of the city, but I have no doubt this amount of money could be used and every cent of it placed worthily, but I know it is not being done now." There have been reports current for some time of favoritism in the portioning out of the poor money, and it is alleged that a number of people are getting monthly allowances who have bank accounts, says the Escanaba Journal.

County Is Out of Debt—

Dickinson county now enjoys the distinction of having no bonded indebtedness and has a snug cash balance in the banks. It is probable that Dickinson is the only county in Michigan having no bonds outstanding. The last one of the court house and jail bonds, issued some fifteen years ago, was paid at the Commercial bank by Count. Cler. Quarnstrom a few days ago. The bond, with interest, amounted to \$2,133.33. The total issue of bonds for the past year, that sum represents the original cost of the court house and jail, including the site. The bonds were issued during the panic and were sold to the First National bank of Chicago. The court house and jail were erected under the supervision of Messrs. Kelly of Vulcan, Cook of Iron Mountain and MacNaughton of Calumet, who were members of the county board at that time, and who devoted a great deal of time to the duties. Labor and material were cheap, and a tight money market, and the county received every advantage of the conditions. It can be said, too, that the buildings were completed well within the appropriation. It would undoubtedly cost more than twice the bond issue to duplicate the buildings today. No county in the peninsula, excepting Marquette, where more than \$250,000 was expended, has better buildings than Dickinson.

"More Daylight" Move at the Soo—

The residents of the Soo have taken up the slogan, "More Daylight for Everyone During the Good Old Summer Time." The sentiment in favor of placing the clocks of the city an hour ahead and adopting sun time during the summer appears to be practically unanimous. Practically all of the manufacturing institutions have already or are planning to start an hour earlier and it is believed that in the next week or two the town will be practically doing business on sun time. The Union Carbide Works was the first to start the movement. The company adopted the more daylight plan last season and found it so satisfactory that the management continued on continuing it every summer. The works started this week an hour earlier and will continue to operate on this plan for the ensuing six months.

The Northwestern Leather company, the largest employer of labor in the city, also began the early schedule this week the men beginning their labors at 5:45 o'clock and quitting at 4:30. On Saturdays the employees will be given a half holiday. Kelly & Mayer last season began work a half hour earlier than other local plants and are ready to make it an hour with the other manufacturing institutions of the town. The Peninsular Bark & Lumber company also favors the new scheme. A. E. Cullis of the Soo Woolen Mills says that he is heartily in favor of running his plant on the new schedule providing that it is made general in the city. Thomas Mackie, general manager of the Great Lakes Dredge & Dock company, is another of the large labor employers who favor the plan and some of the dredgers are already operating on the more daylight system. Without exception the clerks in the stores and every class of labor want to go on sun time as it will give them more time for recreation without at all interfering with their duties. The men of the Soo are not going into the matter flinching. For years they have had opportunity of noting the benefits of sun time by watching the movements of their sister city, Sault Ste. Marie, Ont., which has been operating under the early hour system for years. The clerks and employees of the steel plant across the river are ready for play by the time those on this side are thinking about laying aside their business cards. The county and city officials are among those who favor making the movement general and as before stated the sentiment is almost unanimous in favor of making the change general.

SAVED CHILD FROM DEATH.

"After our child had suffered from severe bronchial trouble for a year," wrote G. T. Richardson, of Richardson's Mills, Ala. "we feared it had no chance of recovery. We tried many remedies without avail, and doctor's medicine seemed as useless. Finally we tried Dr. King's New Discovery, and are pleased to say that one bottle effected a complete cure, and our child is again strong and healthy. For coughs, colds, hoarseness, lagrippe, asthma, croup and sore lungs, it's the most infallible remedy that's made. Price 50c, and \$1.00. Trial bottle free. Guaranteed by The Stafford Drug Co."

FANNY CROSBY SINGS.

Miss Fanny Crosby, the famous blind singer of gospel songs, received a great ovation recently in Carnegie hall, where a great audience assembled to inaugurate the seventh season of the tent, open air and shop campaign of the Evangelical committee of New York city. Miss Crosby, who is in her ninety-second year, came from her home in Bridgeport, Conn., to sit on the platform and teach the immense crowd how to sing a new hymn, called "To the Rescue," which she had just written for the occasion.

The aged sweet singer was greeted with rounds of applause when she entered and even a greater outburst when she was introduced by William J. Schiefel, chairman of the Evangelical committee. When the assembly sang her hymn the author joined with more vigor than any one present.

Mr. Schiefel stood on one side of Miss Crosby and the Rev. Dr. Arthur J. Smith, general secretary of the committee, on the other. They arranged a chair in front of her, but she did not lean or either men on chair.

"You know I am just as young as ever," she said. "I haven't grown old one particle. I don't intend to grow old. They that trust in the Lord shall renew their strength." I have been trusting in the Lord sixty or seventy years. I am trusting in Him tonight. And praise the Lord, life is as sweet to me as it ever was. I believe the Lord is going to let me live to see 103 years. And when I will write more hymns for you to sing."

Here the aged hymn writer paused and repeated in a clear, deep voice all four verses of her famous hymn: "Some day the silver cord will break—and I shall see Him face to face." Then the audience rose and spontaneously sang the same hymn. Miss Crosby leaving.

BIRDS STEAL MONEY.

A pair of swallows of Fieberbrunn, in the Tyrol, have stolen a number of 10 kronen (\$2) banknotes to the tune of their nest. The parent birds discovered that the new notes are just the shade of blue to match their eggs, the tissue being tough but flexible, and exactly the material that they needed. The nest and the missing notes were discovered only when the swallows had abandoned them and they fell to the ground.

This feat has been equaled by that of an enterprising mouse in Dorchester, which abstracted a number of 20 kronen notes to the value of \$40 of a delicate reddish-brown shade from the cash drawer of a butcher, and tearing them to pieces, adapted them to the purpose of making a nest for her family of seven. The butcher in his search for the notes suspected and traced the mouse and found the nest under the boarding. He carefully picked up the remains of the notes and returned them to the bank, where they were pieced together. The butcher recovered £7 10s, the bank

WATCH YOUR KIDNEYS.

Their action controls your health. Read what Foley Kidney Pills have done for other sufferers. Clyde H. Fuller, 103 River St., Cadillac, Mich., says: "For the past two years I have been suffering with severe backaches, and dizzy headaches, so that at times my eyes were blurred. The kidney action was painful and troublesome and boring. I tried Foley's Kidney Pills. I decided to try them. After using them for a short time, I was entirely cured of the backaches; my kidney action became normal and regular. The Foley Kidney Pills cured me and I highly recommend them to any one suffering in a like manner." The People's Drug Store.

DO GHOSTS HAUNT SWAMPS?

No, never. It's foolish to fear a fancied evil, when there are real and deadly perils to guard against in swamps and marshes, bayous and lowlands. These are the malarial areas that cause ague, chills and fever, weakness, aches in the bones and muscles and may induce deadly typhoid. But Electric Bitters destroys and casts out these vicious germs from the blood. "Three bottles drove all the malaria from my system," wrote Wm. Fretwell of Lucama, N. C. "and I've had fine health ever since." Use this safe, sure remedy only. Get it at The Stafford Drug Co.

A STONE COFFIN.

In the end of last week there was unearthed in a field on Cockburn farm, near Duns, an ancient stone coffin. The interior of the grave, which was formed of four large slabs of the red sandstone which crops out on the bank of the River Whittadder, measured about three feet in length by two feet in width, and was about two feet deep. It was covered by a similar stone, but there was no bottom slab. The dimensions, like those of other cists recorded in the district, show that the body which it contained had been doubled up before burial. The grave contained in addition to some of the bones of the skeleton, a very fine urn of the bronze age. The urn measured about 5 1/2 inches in height by 3 1/2 inches across, the upper part adorned with two raised bands with a dotted pattern, the under part having a zig-zag ornament, and the whole by no means destitute of a certain rude artistic taste. It was preserved almost intact—London Globe.

Ishpeming Department

WILL CONDUCT THREE OUTINGS

TO HAVE BUSY SEASON.

Ishpeming's Amateur Baseball Teams Have Many Games in Prospect.

There will be much activity in amateur as well as in professional baseball in Marquette county this season, judging from the number of teams that have already been organized. There will be several good games in Ishpeming, but they will be at a disadvantage in not being able to secure the Union park grounds for their Sunday games. If they are given the use of the grounds Sunday mornings, there will probably be games between amateur teams nearly every Sunday, but as a rule it takes the greater part of the morning to put the diamond in good condition for the league games after dinner.

The Setters team, which made a good showing last Sunday against the league nine, has several games scheduled. The first will be played next Sunday with the Excelsior team and will take place in the Union park in the morning. If the grounds can be secured, if not, the game will be played in the afternoon on the Oliver grounds. The Dewey club's nine will meet the Setters a week from Sunday, the 21st and the Setters and Buffaloes will play on the 28th; on the 30th, Decoration Day, the Setters will play the Republic team on the latter's ground. The Setters have several other games in prospect and they expect to play nearly every Sunday during the season.

The Ishpeming Rivals defeated the Neegaunee Rivals in a ten inning game, played at Neegaunee, the score being 7 to 6. The battery for the Ishpeming team was Harper and Remillard and for Neegaunee, Hawkins and Edwards. The feature of the game was a home run driven by Charles Hall of Neegaunee, in the seventh inning.

TWENTY-FIFTH ANNIVERSARY.

Members of Swedish Home Society Will Celebrate Event This Year.

The twenty-fifth anniversary of the organization of the Swedish Home society of this city, will be celebrated by the members and their families on Midsummer day, June 24, with a picnic at Braastad's grove, on the western end of Teal lake. The society was organized with twenty-five charter members, nine of whom are still living in Ishpeming. Among the charter members living out of town are Peter Ramquist of Coleraine, Minn., and William Jeronist of Menominee.

The society has held picnics on Midsummer day nearly ever year since it was organized. On a few occasions its members have joined with other Scandinavian societies in the county. The society now has 255 active members, including the prominent Swedish residents of Ishpeming. The committee appointed to make arrangements for the celebration will report at the regular meeting to be held next Monday evening.

There will be several big picnics on Midsummer day in addition to the one to be held by the Swedish Home society. Cleveland park has been rented for a picnic and the French society of this city will entertain the members of other French societies of the upper peninsula at the annual reunion, the picnic taking place in the Deer Lake grove. A feature of the French celebration will be a parade, in which there will be a number of bands and it is expected that there will be at least from 500 to 600 members in line. Dinner will be served on the grounds and there will be an athletic program, also speeches by prominent members of the society.

BUSINESS MEN LEARN TO SWIM.

A number of the business men of the city, who hold membership in the Young Men's Christian association, are taking special instructions in swimming in the pool. They are to meet every Tuesday afternoon during the summer for swimming instructions. Swimming strokes, fancy diving and instructions in life saving will be taken up by the class. The schedule is being arranged so as to give each class one hour a week of special instructions in the pool. The "Y" tennis court, at the association building, is to be reserved for the business men's class every Friday between 5 and 6 o'clock. The business men plan to play volley ball at that time.

M. N. George, Irondale, Ala., was bothered with kidney trouble for many years. "I was persuaded to try Foley's Kidney Remedy, and before taking it three days I could feel its beneficial effects. The pain left my back, my kidney action cleared up, and I am so much better I do not hesitate to recommend Foley's Kidney Remedy." The People's Drug Store.

TO EXPLORE TRACT.

Will Make Second Attempt to Find Mine on Menominee Range.

The Jones & Laughlin company, whose mining operations in the Lake Superior district are directed from its Ishpeming office, is preparing to put a diamond drill in operation on the Gleason Exploration company's lands, in the western part of the Menominee range, a few miles from Iron River. This will be the second time in two years that the Jones & Laughlin company has entered the Menominee field. Several diamond drill holes were bored on tracts held under option there about a year ago, but nothing of an encouraging nature was found, and the option was surrendered.

It is said that the Jones & Laughlin company has excellent prospects of finding ore on the Gleason lands, which adjoins the tracts on which the New York State Steel company is now developing two properties, under supervision of Rudolph Erickson, former chief engineer of the Pittsburg & Lake Angeline Iron company in this city. The Gleason Exploration company was organized by

---	---

ISHPEMING IN BRIEF.

Michael Gleason and his son, Matthew, former well-known residents of Republic, and others interested in the property with them. The Gleason company was organized last year, with headquarters in Gladstone. It is anticipated that within a few years the stockholders in the Gleason Exploration company will be receiving royalty returns from the mines being opened by the New York State Steel company.

The Jones & Laughlin company intends to explore the tract thoroughly. If the drill operations are satisfactory to the officials, the property will be taken over under terms that have already been agreed upon. Only one drill will be operated at the start, but one or two more may be added later, if the first few holes borel run into ore of desirable quality.

It is reported from the range that the New York State Steel company is making rapid headway with its development work, which was started a little over a year ago. Two mines are being opened and both are being equipped with machinery and mine buildings. The properties are well located with reference to other producers in that immediate field and it is thought that in time both mines will be fairly large producers. It is largely because of the fine showing at the New York State Steel properties that the Jones & Laughlin company feels confident that it too will find paying ore bodies on the tract which they have taken under option from the Gleason Exploration company.

recorded, against 150 last year. Only two deaths have occurred in the city this month.

Mrs. W. H. Schacht of Redridge, Mich., is visiting relatives in the city.

R. P. Bronson is planning the erection of a summer camp at Island lake, near John P. Outwaite's camp.

J. H. Quinn arrived home Tuesday evening from Calumet, where he attended the funeral of the late Mrs. Cuddihy.

Mrs. W. W. Graff entertained the members of the Bridge Whist club at her home at North Lake yesterday afternoon.

Mrs. F. Braastad entertained a number of the older ladies of the Mission church congregation at her home on Cleveland avenue, yesterday.

Mrs. Robert J. Wise and her sister, Miss Jardine, have departed for Omaha, Neb., in response to a message advising them of the critical illness of their father.

A number of men are working on the grounds at the Mather cottage, under supervision of E. J. Carter, the landscape artist, who recently arrived here from Boston.

M. C. Quinn arrived home yesterday from Calumet, where he and Mrs. Quinn attended the funeral of her mother, the late Mrs. Cuddihy. Mrs. Quinn will remain in Calumet for several days.

Miss Ada Midden, who has been confined to a hospital in Chicago for the past year, has returned to her home here. She was accompanied by her brother-in-law, Ned Newton, and wife.

The rain showers yesterday morning and afternoon were very much appreciated in Ishpeming. The farmers have been complaining of the drought for the past two weeks and the rains have also shown the need of rain.

OUTPUT INCREASED.

April Production of Steel Corporation Greater Than in March.

It is reported from New York that the total net output of the United States Steel corporation in April were about 750,000 tons, against 676,000 tons in March, but the output and shipments were greater than in March.

Business in the steel trade last week was spasmodical and because of the smaller specifications on contracts, the operations of the furnaces and mills were reduced from 60 to 65 per cent of capacity. The railroads gave some indication of more generous orders, but buying continued intermittent.

Rail contracts aggregated only 10,000 tons, but specifications were received on 14,000 tons, which were placed in March. The principal car order was 1,239 for the Seaboard Air line. The greatest vitality was in locomotives, orders being placed for 143. Bridge orders were closed calling for 4,200 tons of steel, and inquiries are still pending for 20,000 tons.

Orders were placed for loft buildings in New York city calling for about 5,000 tons of structural steel, including railway and highway bridges, total fabricated contracts aggregated about 16,000 tons.

Estimates of the production of pig iron last month, are about 2,100,000 tons, including charcoal iron. It is further estimated that the output today is at the rate of scarcely 23,500,000 tons annually, but it is notable that the steel corporation increased its production in April 17,000 tons, although it decreased its active blast furnaces 9 per cent. Business last week was again light, sales reported aggregating less than 10,000 tons.

FEWER DEATHS THAN BIRTHS.

The official report of the deaths and births that have occurred in Ishpeming since the first of the year, show a decrease in both, as compared with the corresponding period last year. From Jan. 1, up to yesterday, fifty-four deaths had been recorded, compared with seventy in 1910, and 139 births have been

recorded, against 150 last year. Only two deaths have occurred in the city this month.

Mrs. W. H. Schacht of Redridge, Mich., is visiting relatives in the city.

R. P. Bronson is planning the erection of a summer camp at Island lake, near John P. Outwaite's camp.

J. H. Quinn arrived home Tuesday evening from Calumet, where he attended the funeral of the late Mrs. Cuddihy.

Mrs. W. W. Graff entertained the members of the Bridge Whist club at her home at North Lake yesterday afternoon.

Mrs. F. Braastad entertained a number of the older ladies of the Mission church congregation at her home on Cleveland avenue, yesterday.

Mrs. Robert J. Wise and her sister, Miss Jardine, have departed for Omaha, Neb., in response to a message advising them of the critical illness of their father.

A number of men are working on the grounds at the Mather cottage, under supervision of E. J. Carter, the landscape artist, who recently arrived here from Boston.

M. C. Quinn arrived home yesterday from Calumet, where he and Mrs. Quinn attended the funeral of her mother, the late Mrs. Cuddihy. Mrs. Quinn will remain in Calumet for several days.

Miss Ada Midden, who has been confined to a hospital in Chicago for the past year, has returned to her home here. She was accompanied by her brother-in-law, Ned Newton, and wife.

The rain showers yesterday morning and afternoon were very much appreciated in Ishpeming. The farmers have been complaining of the drought for the past two weeks and the rains have also shown the need of rain.

The commencement exercises of St. John's parochial school will be held at Ishpeming theatre on the afternoon of Wednesday, June 21. A program in which all the children of the school will take part is now being arranged. The senior class is composed of nine girls.

J. J. Laffer is making good headway with the excavating for the basement for the addition to the east side of his business block, corner Division and Lake streets. The brick work on the addition to the block facing Lake street has been started.

The Knights of Kaleva society, which a few months ago purchased the Donaldson brownstone property, on the corner of Division and Pine streets, from Dr. T. A. Felch, has started to remodel the structure. Men have begun work in the basement. After completing the alterations there they will start remodeling the first and second floors.

The members of the Young Ladies' circle of the First Methodist Episcopal church will meet tomorrow evening at 7:15 o'clock. The program will consist of two drills, sewing and reading. A feature will be a search for Ishpeming merchants.

The annual meeting of the Michigan Quartz Silver company in which a number of Marquette county people are financially interested, will be held in the Plankinton house, Milwaukee, on Monday, June 5, at 2 p. m., for the election of officers and the transaction of such other business as may properly come before the meeting.

The members of the senior class of the Ishpeming High school are preparing to issue their annual, which will be larger than the publications issued by former senior classes. The book will contain many interesting items, in addition to group pictures, including spraying tube, of members of the class and others connected with the school.

Gwinn

NEW ODD FELLOWS LODGE.

Organization Meeting Last Saturday Was a Notable Event.

The Gwinn lodge, No. 561, Independent Order of Odd Fellows, was instituted in the society's hall Saturday afternoon and evening by Past Grand Master W. T. Cole, of Ishpeming, who was appointed special deputy by the grand master of the state.

The afternoon session of the lodge was adjourned at 5:30 until 9 o'clock. In the evening the five officers and the thirty-nine candidates met in the lodge rooms and formed a procession that accompanied the members of the Vulcan lodge of Loretto, Alameda of Ishpeming, Iron Mountain of Negaunee, and members from the Bessemer and Rexton lodges from the special Northwestern train at 8:30 at New Swanzy to the lodge rooms.

The initiatory degrees were put on by the degree team of the Alameda lodge of Ishpeming.

The work was adjourned at 10:30 and a banquet was partaken at the Gwinn Hotel, at which 153 were seated.

After the banquet the first, second and third degrees were taken by the thirty-nine candidates. After the work the following officers were appointed by the noble grand: Warden, John Ellis; conductor, Tom Hartgrove; chaplain, John Lindberg; right supporter, William Maddiford; left supporter, William Maddiford.

The hall was artistically decorated with evergreens, the decorating having been done by Anar Kroghdahl, Will Maddiford and Saulson, assisted by other members of the lodge.

The feature of the evening was the presentation to W. T. Cole of a watch chain by the Gwinn lodge. On one side contained the emblems of the three degrees and on the reverse the following is inscribed: "Presented to W. T. Cole by Gwinn lodge, No. 561, Independent Order of Odd Fellows May 6, 1911. Token for trouble he has taken in organizing and installing the lodge."

At the close of the meeting speeches were made by the following prominent members: W. T. Cole, W. H. Fremboth of Alameda lodge of Ishpeming, W. H. Bath of Negaunee, and James Phillips of the Vulcan lodge.

WILL HAVE FAST TEAM.

The Gwinn baseball team has been organized for the coming season under the management of C. M. Leonard, who so ably conducted its affairs last season. A number of good men have been signed, including a number of old leaguers, such as Dr. Main, Len Olson, Froggie Messier, Ed Haglund and Chris Buckley and Jack Blamey of Escanaba. Buckley is a pitcher and fielder of no little renown and Blamey is an all around player. Main, Olson and Haglund have all seen service in the Marquette and Alger county leagues, and Messier played with the Negaunee champs the past two seasons. Captain Bill Johns will be on the receiving end of the battery and Del Laneville will be on the slab. The team will present the following line up this season: Catcher, Johns; pitchers, Laneville and Buckley; first base, Olson; second base, Haglund; third base, Messier; short stop, Main; extra infielders, Gunville, Tappala and Kroghdahl. The out field will be chosen from the following: Blamey, Tohore, Butler and Austin.

Games are wanted and can be secured by addressing the manager. White suits, with blue trimmings, have already been ordered and are expected to arrive some time this week.

WOODMEN INITIATE LARGE CLASS.

R. A. Langley, assistant district deputy of the Modern Woodmen of America, is in Gwinn securing members for the Gwinn camp. Mr. Langley has met with good success during the past week and he expects to have a class initiation on Decoration Day. The degree team of the Ishpeming camp will be invited to put on the work. The Gwinn camp now has a membership of sixty-five and Mr. Langley hopes through his efforts to raise the membership to 100.

As soon as a large enough membership is secured a degree team will be organized here. A special meeting of the Woodmen was held Tuesday evening and a number of applications that were submitted by Mr. Langley were balloted upon.

FIREMEN HAVE REORGANIZED.

At a recent meeting in the Club house the Gwinn Volunteer Fire department, which has been in existence a number of years in a small way, was reorganized and a permanent company was formed. The following officers were elected and have taken charge: Chief, J. O. Flack; assistant chief, Jake Dulbord; secretary, Charles Borgansen; treasurer, Bert Steed; foreman, Ed J. Goodman.

Arrangements are now being made for securing a suitable building to be used as a company headquarters and sufficient apparatus to fight fires. Uniforms have been ordered and a drill team will be formed in the near future.

The firemen are now collecting funds for the celebration to be given by them on the Fourth.

GWINN BRIEFS.

Mrs. A. D. Bolner is visiting with her parents in Negaunee.

E. C. Thompson, of Ishpeming, visited with Gwinn friends Sunday.

A crew of men are at work grading for a spur track to be put in from the Chicago & Northwestern railway's tracks at New Swanzy to the Munsing railway's tracks, near the baseball grounds.

Mrs. P. Lafrenier, of North Lake, is visiting with Sid Harvey and family. A son was born Sunday to John McCarthy and wife of Little Lake.

G. R. Jackson spent a few hours in Ishpeming Monday.

Frank Swardini has moved his family from Gwinn to Prineetou.

W. F. Collar, of Negaunee, was a business visitor in Gwinn Tuesday.

Joe Berryman, of Prineetou, has returned to work after a week's illness.

Miss Alma Lindquist has resigned her position as clerk in Quayle's dry goods department.

Arthur Carlson, of Ishpeming, visited with Gwinn friends Saturday and Sunday.

Mrs. John Simon, of Milwaukee, is visiting with her sister, Mrs. D. R. McIntyre.

Miss Jennie Lindquist was operated on at the Gwinn hospital Monday for appendicitis.

Ole Ren, Emil Fogelberg and Gust Warnholm spent Sunday in Ishpeming visiting with friends.

Mrs. C. E. Young, of Marquette, spent Monday in New Swanzy, visiting with friends.

Mrs. Glover, of Munsing, spent the forepart of the week in Little Lake, visiting with Mrs. Beupied.

Robert Taylor, of Dixon Siding, spent the forepart of the week calling on Gwinn and Princeton friends.

Superintendent White, of the Gwinn schools, spent Saturday in Ishpeming, on business.

Joseph Laroche, wife and children, spent the past two weeks in Chicago visiting with relatives.

Dan Danielson has returned from the Mesaba range, where he spent the greater part of the winter working.

Severd Oien, of Princeton, spent the greater part of the week on a fishing trip.

Mrs. N. B. Pratt has returned from Wisconsin, where she spent the past few weeks visiting with a daughter.

Jack Blamey, of Escanaba, has taken a position with the Cleveland-Cliffs Iron company's engineers here.

Mrs. Hocking, of Ishpeming, is making her home with her son, Charles Hocking and family.

Charles Erickson returned Monday from Republic, where he attended the funeral of his father, the late Eric Erickson.

A number of Gwinn residents were connected with electricity this week, as also were the Swedish and Finnish churches.

Dr. Laing of Rapid River spent last Wednesday in Gwinn looking over the hospital. He intends building a hospital at Rapid River this summer.

Work has been started on the foundation for a new residence that is to be erected for Frank Perkins, on Flint street.

Ernest Kalm, who has charge of the Cleveland-Cliffs drill crews, near the Northwestern mine, spent Sunday at his home in Ishpeming.

Mrs. George Davis came down Tuesday from Ishpeming, to join her husband. They will make their home at 129 Tamara street.

Jack Pohlman, of the firm of Laroche & Pohlman, of New Swanzy, has given up the salubrious business and has moved his family to his homestead, west of Princeton.

Markets

WALL STREET STOCKS.

Paine, Webber & Co. yesterday wired from New York as follows: The market possessed a rather heavy tone during the greater part of the day but the pressure appeared to emanate principally from professional sources. Steel held up quite well in face of a somewhat unfavorable statement on unfilled tonnage and a rather pessimistic view on the part of Iron Age. The traders in general were disinclined to take a decided stand on either side of the market in view of the near approach of another supreme court "decision day" and it seems probable that the remaining sessions of this week will be equally as dull and uninteresting as those which have been witnessed during the past few days.

Analogs: 62 1/2 Mo. Pac. 48 1/2 Amalg. 37 1/2 Reading 15 1/2 A. S. 74 St. Paul 12 1/2 C. P. & N. 21 Steel Com. 7 1/2 C. & N. 20 P. & N. 10 1/2 Erie 32 1/2 Union Pac. 17 1/2 M. K. & T. 32 1/2

Boston "Coppers."

Of the market at Boston, Paine, Webber & Co. yesterday said: Local interests have had another setback by the reduction in the Boston & Maine dividend and the ten point break in the stock. This has been partially offset by the advance in Telephone, but local speculators are not feeling any too happy. Coppers were as quiet as ever with a few small recessions. Lake sold down to 31, North Butte 27 1/2 and East Butte 11 1/2. The balance of the list was unchanged with only odd lot trades.

Table listing various stocks and their prices, including items like Lake, North Butte, East Butte, and various copper stocks.

Chicago Wheat.

Paine, Webber & Co.'s Chicago correspondent had the following to say of the wheat market: Yesterday was a busy day: The feeling that the deal in May wheat is not over had something to do with the strength in the market today. Private messages this morning confirmed the light general gains over the spring wheat. Barrett of the international staff of the U. S. M. C. A., and he wrote of a letter he saw in a letter to the New York Evening Post: "The public queue cutting to which I refer took place in a large tea house."

"Between 1500 and 2000 spectators were packed and jammed on the floor and in the galleries. Every pair of eyes was focused on a platform which occupied one end of the building. About this platform were gathered the 'elect,' those who had already been separated from their queues."

"One glance sufficed to show that most of them were young men and young women from the better classes, the chief seat of the short hair revival has been the colleges, both missionary and government of the land. One by one the men would screw up their courage and make their way to the platform, where one specially appointed man was ready to hold the queue while a second man with a huge pair of shears stood ready to perform the amputation. As one would go forward, a wave of applause would sweep over the tense crowd, and then be followed by an interval of silence, as every head bent forward so that nothing might be missed."

"In each case a dramatic scene ensued. The queue would be strung out at full length with a vicious jerk by its possessor or lifted gingerly up by him with a comical grimace of contempt, and then handed over to the waiting committee mentioned above. A few snips, and off would come the long, heavy braid. The applause would break forth again and a hubbub of voices fill the room. Usually a speech followed, sometimes cool and measured, more often impassioned, and almost savage as the new convert waves the despised object before the face of his audience, but always dramatic in the extreme, as the Chinese, down to the humblest coolie, is a born actor."

"While this was going on in the main hall of the tea house, thirty barbers were busy in other parts of the building giving their services free of charge. All together several hundred men, according to the native newspapers, went from Chang Su Ho's garden to their homes that night with their queues in their hands instead of down their backs, where they had hung and rubbed and flapped from their earliest days."

Quick climatic changes try strong constitutions and cause, among other evils, nasal catarrh, a troublesome and offensive disease. Sneezing and snuffling coughing and difficult breathing, and the drip, drip of the foul discharge into the throat—all are ended by Ely's Cream Balm. This honest remedy contains no cocaine, mercury, nor other harmful ingredient. The worst cases yield to treatment in a short time. All druggists, 50c. or mailed by Ely Bros., 36 Warren Street, New York, Dundee Advertiser.

THE NOELITE SOCIETY.

A society has just been formed on the Christmas day. It called the Noelite society. Among those who would have qualified for membership had they been living are Sir Isaac Newton, Richard Porson and William Collins, the poet. This Christmas name of Noel-singer early appropriate to a December 25 birthday is still occasionally to be met with in this country. But have you ever met a boy—or a girl—who has been christened "Christmas." There is the case of Christmas Evans, the famous Welsh preacher. Was he the last of his tribe? It is really a disastrous thing for a child to be born on Christmas day—or near it. So long as it is a child, or the parents, and friends economize on the presents, and the girl who has never had a birthday of her own and presents of her own. For she was born on Christmas day, and has always been cheated of her own birthday. And she wishes she were not all druggists, 50c. or mailed by Ely Bros., 36 Warren Street, New York, Dundee Advertiser.

Lower State Notes

PONTIAC—Max Lemaux, residing at 132 Perry street, heated two bricks and placed them at his feet when he went to bed the other night. An hour later he awoke to find the bed in flames and his feet burned. William Derby, a roomer at the Lemaux home, heard his cries for help and came to the rescue with a pail of water. The bedding was destroyed and Lemaux's feet badly blistered.

VASSAR—A train of 22 coaches and baggage cars loaded with sugar beet workers arrived here from Cincinnati, O., for the Michigan Sugar Co. at Caro, to be distributed between Vassar and Owosso. Many of the women and children of the foreign laborers were crying on arriving at Vassar, over the death of Joseph Menick's 6-month-old child. He died in transit on the sugar beet special between Detroit and Vassar.

PONTIAC—Glarence Dusenberry, aged 18, saved the life of the 2-year-old daughter of Mr. and Mrs. Joseph Hogan of Perry street, who fell into the mill race at the Pontiac Knitting Mills and was being carried into the flame. Dusenberry saw the child fall into the water and reached the flame just as the child was being swept into it. He grabbed her by the arms and pulled her to safety.

MT. CLEMENS—In connection with the proposed opening of the saloons next Sunday Mayor Bowers says he has been approached by citizens averse to the lifting of the lid and wishes all to understand he has nothing to do in the matter. He says: "The matter of reopening the saloons is entirely in the hands of the police commissioners and Hotel Men's association." Mr. Bowers declined to reply when asked whether the commission had asked his advice in allowing the saloons to sell liquor on Sundays.

IONIA—The Lake Odessa Savings bank has started suit in the Ionia circuit for the collection of more than \$5,000 from the stockholders of the defunct Michigan Food company of Lake Odessa. The food company went to the wall. It was organized with \$50,000 capital and the bill alleges that 20 per cent was paid in. The bank attorney believes that the 80 per cent unpaid capital is still an available obligation against the stockholders and that the bank's unpaid judgment can in this way be collected.

ANN ARBOR—A Detroit student, Alfred Warring, a sophomore engineer, is a hero here. A team of ponies belonging to Dr. Louis P. Hall took fright as they were driven past the animal ward and started to run down State street toward Ferry field. Several students attempted to stop them, but only succeeded in frightening the animals all the more. While the team was going at a high speed Warring jumped and grabbed one horse by the bridle, pulling the animal over onto him. There under the pony he lay, while the other pony pulled them more than 30 feet. Before he could be stopped Warring's clothes were torn and his face and body badly scratched, but as a crowd began to gather he "beat it" as fast as was possible in his bruised

and wished to pay two weeks' board in advance. He presented a check for \$20 and received \$8 in change. He disappeared and nothing has been seen of him since. The men for whom he engaged board did not know and it has been learned since that the alleged check was awarded weeks ago to local electricians.

BAY CITY—There will be no more riots and wholesale arrests on account of the dog catcher. The police commission has decided to elevate the dogcatcher to the dignity of a regular policeman, uniform and powers, and Edward Clark, six feet two, has taken the oath of office. For three years, during the spring and summer months, the police have had to save "Old Bill" Truesdale, former poundmaster, on an average of once a week from irate crowds composed largely of women and children. Ch. C. K's good judgment, six feet two and uniform are expected to work a reform in the "doggone" job.

CORUNNA—While Conductor Ezra Scott executed dry counties in general and Shawanaw in particular, a Grand Trunk eastbound passenger train was stranded 40 minutes at Corunna because of a lack of water. The standpipe in Owosso, where the engines usually take water, was undergoing repairs and could not be used. After running to Corunna, three miles from Owosso, the engineer found it necessary to run his fire and a message was sent to Durand, nine miles away, for a relief engine. Passengers who desired to make early connections at Durand, via other trains, transferred to the Ann Arbor slow passenger train, which arrived at about the same time.

JACKSON—While playing on the commons here with a loaded revolver, Daniel Noble, a 10-year-old boy whose home is in Detroit, accidentally shot and killed himself. The boy took the gun from his aunt's home out on the street to play with it. It is said that after pulling the trigger and seeing that it did not "go off," he declared in the presence of other boys that it wasn't loaded, and placing it against his temple, again pulled the trigger. This time the gun was discharged and the boy fell unconscious to the ground. The police station was notified and within an hour the boy had been taken to the hospital. The message was received at police headquarters the boy was in the city hospital where he died early in the evening. There were several boys playing around the place where the shooting happened, but he ran away before the police arrived, so the facts as to the shooting are mostly conjectures. The boy was the son of Mr. and Mrs. Abe Noble, the former a blacksmith of Detroit.

COEDS MUST SHUN THE BOYS.
Moonlight Strolls and Ice Cream Chats Prohibited at Kansas U.

Lawrence, Kan., May 8.—(Gone are the days when the women students of Kansas University may on week days go strolling in the bright moonlight, sit on the front porches, or their smoking houses or chat with men students in the ice cream parlors near the college grounds.)

Members of the Women's Student government association and several sororities are responsible for a new rule prohibiting such pastimes. It is believed that many women students have been neglecting their work in order that they might entertain friends. The rule does not entirely prohibit men and women from associating with one another. They are permitted to stroll together from the library to the rooming houses if they choose, but they must not stop to rest at any of the soft drink emporiums or drug stores on the way.

Since the new rule went into effect there has been an unusually large demand for library books.

JAPANESE BELIEFS.
The Japanese, in the past few years, have made extraordinary strides in the assimilation of Western civilization, but among them a great many old and quaint superstitions survive.

"Burr Fox," for instance, is blamed by the inhabitants of Nippon for every unfortunate accident or stroke of ill luck. He is the earthly form of evil one, they say, and he has the evil eye. Japanese children are taught that if they kill a frog they will be seized with paralysis, and will tremble all over for the rest of their lives.

Singing, according to the Japanese household, must never be indulged in till after breakfast; before that meal it leads to madness. You must never carry anything on the head or you will stop growing. And Jans hesitatingly consent to be photographed, because of a belief that it will cause their bodies to shrink or, in other words, shorten their lives.

TWAIN TOOK NO CHANCES.
At a dinner party the subject of eternal life and future punishment came up for discussion. Mark Twain, who was present, took no part. A lady near him suddenly exclaimed: "Why do you not say anything? Should I give your opinion?" Twain replied gravely: "Madam, you must excuse me. I have friends in both places."

OUR BUSY GLOBE.
There are about three thousand weddings every twenty-four hours, taking the entire world into consideration.

Negaunee Department

SPECIFICATIONS TO BE REVISED

Traction Co. Will Be Asked to Improve Iron St. Track Before Paving Work Starts.

At the meeting of the council Tuesday evening, Engineer Feesing, who will supervise the paving of Iron street, was instructed to prepare specifications to cover the relaying of the street car rails on Iron street. The council decided that the street cars will continue to run on that thoroughfare, but in order that the paving may be done to the best advantage, and that it may be maintained in good condition in the future, a complete relaying of the rails is necessary.

When the paving contract was being considered last year, the Marquette City Gas & Electric company ordered new rails for Iron street and intended to put them in, but the work was deferred until definite arrangements had been made for the paving. The question of moving the street car line to Jackson street, one block north of Iron street, was then under consideration, and a new route from Cyr street to Jackson, immediately north of the diamond crossing, was also considered. It was, however, impossible to secure right-of-way privileges from the Chicago & Northwestern Railway company. The business men protested against the proposed route from Iron street, and the council decided to let it remain there.

The specifications to be prepared by Engineer Feesing will call for a substantial road bed for the street railway line, the new equipment, including ties and heavy rail. Manager McCorkindale, of the Marquette City Gas & Electric company, will be consulted and it is expected that he will agree to any reasonable proposal that the engineer will make with reference to the relaying of the track. A new grade will be established for the track, but there will be but little change from the present grade.

It was the sentiment of the aldermen that the pavement work be started as soon as possible. Mr. Feesing was instructed to have the revised specifications ready for the council's approval at a meeting to be held at an early date. It is possible that the meeting may be called for tomorrow night, as Mr. Feesing expects to have the specifications rewritten by that time. Wick O'Connell & Co., who were last fall awarded the paving contract, are ready to begin work on short notice, but it is impossible at this time to tell just when it will be possible for them to start, as that will depend on what improvements are necessary on the street car line. It may take some time for the Marquette City Gas & Electric company to get the material needed for the relaying of the track.

GRASS SEED HIGH.

Is Bringing Higher Price Than Farmers Have Ever Paid Before.

The farmers in and about Negaunee are this year paying unusually high prices for grass seeds of various kinds. One of the veteran farmers yesterday said that during the thirty years he has been farming in this vicinity he has never before paid such high prices for seed. Timothy seed costs from eleven to thirteen cents per pound wholesale, according to quality, and is retailing at from sixteen to seventeen cents per pound. Last year the same quality seed sold at from five to eight cents per pound. The farmers are paying nearly three times as much as they did a year ago.

Clover seed of the best variety is wholesaling at from fifteen to seventeen cents per pound and retailing at twenty cents. Clover seed was also high last year, the wholesale prices being from twelve to fourteen cents.

SACCHARIN FOOD PROHIBITED.

Secretaries MacVeagh, Wilson and Nagel have issued the following food inspection decision: "At the request of the secretary of agriculture, the referee board of consulting scientific experts has conducted an investigation as to the effect on health of the use of saccharin. The investigation has been concluded, and the board reports that the continued use of saccharin for a long time in quantities over three-tenths of a gram per day is liable to impair digestion, and that the addition of saccharin as a substitute for cane sugar or other forms of sweetener reduces the food value of the sweetened product and hence lowers its quality. "Saccharin has been used as a substitute for sugar in over thirty classes of foods in which sugar is commonly recognized as a normal and valuable ingredient. If the use of saccharin be continued it is evident that amounts of saccharin may readily be consumed which will, through continual use, produce digestive disturbances. In every food in which saccharin is used, some other sweetening agent known to be harmless to health can be substituted, and there is not even a pretense that saccharin is a necessity in the manufacture of food products. Under the food and drug act articles of food are adulterated if they contain added poisonous or other harmful ingredients which may render them injurious to health. Articles of food are also adulterated when in the meaning of the act, if substances have been mixed and packed with foods so as to reduce or lower or injuriously affect their quality or strength. The findings of the referee board show that saccharin in food is such an added poisonous or other added deleterious ingredient as is contemplated by the act, and also that the substitution of saccharin for sugar in foods reduces and lowers their quality. "The secretary of agriculture, therefore, will regard as adulterated under

DOING BIG BUSINESS.

A. Bonnell, manager of the Mitchell Automobile company, spent a few hours in Negaunee Tuesday, visiting D. D. Smith, the company's Marquette city agent. He said that his company is this season doing the largest business in its history and that the factory is running to its capacity. Since Jan. 1 the Mitchell cars have sold eighty-two of their cars in Milwaukee alone.

MEN.

For tender face and neck after shaving, for pimples, black heads, dandruff or any skin or scalp disease use ZEMO and ZEMO SOAP. ZEMO is guaranteed to relieve all soreness and itching. The soap is part of the treatment,—best for all toilet purposes. Sold by druggists everywhere and in Marquette by The Stafford Drug Co.; City Drug Store, Negaunee; H. Harwood, Ishpeming.

A TRY OUT SUNDAY.

Negaunee and Ishpeming League Baseball Teams to Play Game.

The Negaunee and Ishpeming baseball fans will have an opportunity next Sunday afternoon of judging the relative strength of their teams, as Managers Thoren and Simous have agreed on an exhibition game, to commence at 2:30 o'clock. John Kuntz, who will play first base for the Negaunee team, is expected to arrive today from Kenosha, Wis., and he will remain here throughout the season, perhaps permanently. Kuntz has done first base with the Merrill, Wis., team last year and he was also captain of the nine.

A week from next Sunday, the Ishpeming and Marquette teams will play an exhibition game on the Marquette grounds and the Negaunee team will have a contest with one of the amateur nines of the county at the Union park diamond. On the following Sunday, the 27th, the league season will open with the Marquette and Negaunee teams playing here at the Escanaba and Ishpeming nines at Escanaba.

In the exhibition game Sunday the Negaunee team will line up as follows: Heidenson, catcher; Rosevaur, Mahoney and Mursi, pitchers, each throwing three innings; Kuntz, first base; Swick, second base; Raines, third base; Cullis, short stop; Lafave, left field; Simpson, center field and Faulk, right field.

LOCAL LACONICS.

C. J. Spelman, of Houghton, was a Negaunee business visitor yesterday.

J. M. Perkins, who has been in Chicago the past few days on business, is expected to arrive home this morning.

W. H. Mitchell, ex-city recorder, has taken a position as bookkeeper with the Jones & Laughlins company at its Rolling Mill mine in this city.

Thermometers in the city yesterday morning at 5 o'clock registered fifty above zero. There was a light rain shower between 5 and 8 o'clock.

William Clendenning, deputy state building inspector in the upper peninsula, will be in Negaunee Tuesday looking over some of the public buildings.

Mrs. E. T. McCarthy, of Duluth, came down from there yesterday morning and will spend some time in Negaunee and on the Cascade range, visiting her husband, who has charge of diamond drilling operations on Section 22 of Duluth parties.

H. W. Jackson's family have moved from C. W. Taylor's dwelling on Teal Lake avenue, to the former home of Mr. Jackson's parents, on the corner of Peck street and Brown avenue. William Bond and family, who formerly occupied the dwelling, have taken the rooms vacated by Mr. Jackson's family.

The funeral of Richard Yelland and his son, William, the last of the Hartford mine fire victims to be laid to rest, was held yesterday afternoon from the Mitchell Methodist church and was largely attended. Delegations of members of the Sons of St. George and Eagles societies, in which the late Yelland held membership, were present.

Fourteen friends of Abram Bonson had a fishing party in his honor Tuesday in the district south of Palmer. They made their headquarters at a camp owned by Jacob Salo and other Negaunee men. The party was in the nature of a farewell to Mr. Bonson, who will leave on the 25th, together with his wife, for their native place in Finland, where they will spend three months.

Underground operations will be started today in the Cambria and Lillie mines, which have been idle since Friday, because of the fire in the Hartford property. Hoisting will not be resumed in the Hartford as soon as the management expected, as the timber in the shaft, where the fire occurred, is in much worse condition than it appeared to be when it was first examined, immediately after the fire was extinguished. The shaft will need new timbers the greater part of the distance between the first and fifth levels. Three crews of twelve men each, including the best timber men in the mine, are now working in the shaft.

GENERAL MERCHANDISE.

Full line of fine groceries and provisions, clothing and notions. In fact, we handle almost everything. Phone orders are given prompt attention. Quick delivery service. D. McDONALD, McDonald block.

We are bakers of the best bread, cakes, toast and hard-tack. We wholesale and retail, shipping orders to all parts of Michigan. Prompt delivery of phone orders. LOFGREN & RANGAS.

EARLIEST COLD STORAGE.

In Macaulay's essay on "Lord Bacon," he points out that in 1626 the subject of his memoir tried the experiment of stuffing a fowl with snow to prevent it from rotting, and in carrying out the work caught cold from which he died. Macaulay adds: "In the last letter that he ever wrote, with fingers which, as he said, could not steadily hold a pen, he did not omit to mention that the experiment of the snow had succeeded excellently well." If, however, we turn to nature there are instances in Siberia of mammoths preserved in ice so that their flesh is still edible from a period probably coeval with the first appearance of man on this globe. If the Romans brought to their banquets the dainties of all the known world, had they not some knowledge of cold storage?

IF I HAD ECZEMA.

I'd wash it away with that mild, soothing liquid, D. D. D. Trial bottle, 25c. Relieves all kinds of skin trouble, clearing away the impurities and clearing up the complexion as nothing else can. Yes, if I had any kind of skin trouble I'D USE D. D. D. Stafford Drug Co., Marquette; City Drug Store, Ishpeming.

Fortune Telling

Does not take into consideration the one essential to woman's happiness—womanly health. The woman who neglects her health is neglecting the very foundation of all good fortune. For without health love loses its lustre and gold is but brass. Womanly health when lost or impaired may generally be regained by the use of Dr. Pierce's Favorite Prescription.

This Prescription has, for over 40 years, been curing delicate, weak, pain-wracked women, by the hundred's of thousands and this too in the privacy of their homes without their having to submit to indecent examinations and offensively repugnant operations.

Sick women are invited to consult Dr. Pierce by letter free. All correspondence held as sacredly confidential. Address World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y. Dr. Pierce's Great Family Doctor Book, The People's Common Sense Medical Adviser, newly revised up-to-date edition—1000 pages, answers in Plain English hosts of delicate questions which every woman, single or married, ought to know about. Sent free, in plain wrapper to any address on receipt of 21 one-cent stamps to cover mailing only, or in cloth binding for 31 stamps.
