

DIAZ MAKES A COMPLETE SURRENDER

Along With Vice President Corral, He Agrees to Resign Before the First of June—He Yields to the Revolutionists on Practically Every Material Point.

His "Compromise" Provides for a Joint Regency of Madero and De LaBarra, Pending New Elections, and That It Will Be Accepted There Is No Doubt.

Mexico City, May 17.—President Diaz and Vice President Corral will resign before June 1. Minister of Foreign Relations De LaBarra will become president ad interim.

Francisco I. Madero, the revolutionary leader, will be called to the City of Mexico as De LaBarra's chief adviser and at the greatest guarantee possible that every pledge made by the government will be carried out.

The cabinet will be reorganized. The minister of war will be named by De LaBarra. The foreign office will be in charge of a sub-secretary named by De LaBarra.

These are the conditions upon which President Diaz will compromise. Virtually they are admitted in high quarters to be a complete surrender to the revolutionists.

The resignation of Diaz and the "joint regency" of De LaBarra and Madero are said to constitute a guarantee so complete that the original insurrector demands for fourteen governors no longer need to be considered.

The cabinet was in almost continuous session for two days, during which the illness of President Diaz, the president's entire face is infected from an ulcerated tooth.

Inasmuch as the government believes it has made every concession that the revolutionists have requested, it is firmly believed that a treaty of peace will follow.

The scene wherein Porfirio Diaz renounced the sceptre he has wielded so many years would have been wholly pathetic had it not been for the heroic character of the man who was its central figure.

In an agony of pain, relieved only by narcotics; able to utter but a few words, and those with difficulty; recumbent on his bed; relinquishing his power—he was still the dominant figure of the council.

General Armistice Is Signed. El Paso, Tex., May 17.—At 11 o'clock tonight Judge Carabajal received instructions from Mexico City to sign the general armistice which Madero already had signed earlier in the day.

KNOX FORGES LETTERS FOR DOGS OF WAR

With the Arbitration of All Disputes as the Basis, the Secretary of State Inaugurates a World Movement for Permanent Peace Between the Nations.

He Drafts a Tentative Treaty Covering Important New Points and Much to the General Surprise He Submits It to France as Well as to Great Britain.

Washington, May 17.—The principle of the arbitration of practically all disputes between nations, including even questions of vital interest and national honor, assumed vitality today when Secretary of State Knox submitted to the British and French ambassadors at Washington the draft of a convention to serve as a basis for negotiations.

This elimination is the real accomplishment of the proposed treaty. The exceptions mentioned are found in arbitration treaties the world over and have constituted the chief obstacle to the application of the arbitration principle.

Recognizing that there may be questions of policy and other matters likely to force the tension to the brink of war but which no people would be willing to arbitrate, the tentative draft of the treaty provides that differences that either party considers within this category shall be referred to a commission of inquiry empowered to make recommendations for their settlement.

Arbitration the Last Resort. Arbitration in all cases will be a last resort. After the two countries have concluded that it is impossible to settle a dispute through diplomatic circles, the question will be submitted to a commission of inquiry, charged with the duty of projecting a way to avoid arbitration if possible.

The United States senate will not be asked to ratify this treaty until the question of arbitrating each dispute. All agreements to arbitrate will be entered with "the advice and consent of the senate" as under existing conventions.

The submission of the draft to Great Britain and France marks the actual beginning of negotiations. It is the desire of the administration to complete the negotiations as possible in time for submission to the senate before the adjournment of the present session of congress.

forward again recently by those who believe the Dauphin escaped from the temple in Paris instead of dying there in 1795, as recorded in history.

A Man of Humble Ancestry. In a pamphlet just issued by Professor Tschirch, the state archivist of Brandenburg, who has had access to all the state archives, proof is given that the alleged Dauphin was a man of humble extraction, and the author declares that there is not a single point in the state papers which could give substantiation to the legend of his royal ancestry.

ANACONDA REPORT SHOWS \$50,000,000 WAS PAID FOR SENATOR CLARKE'S MINES. Butte, Mont., May 17.—The annual meeting of the Anaconda Copper Mining company was held in Anaconda today.

FINLAND'S DIET IS BROKEN UP

It Proves Quite as Anti-Russian as Its Predecessor, So the Emperor Dissolves It.

St. Petersburg, May 17.—An imperial ukase issued tonight orders the dissolution of the Finnish diet. The diet proved to be quite as anti-Russian as the old house dissolved last October.

German Crown Prince Is Czar's Guest. St. Petersburg, May 17.—Crown Prince Frederick William and the crown princess of Germany arrived here today to visit the emperor and congratulate him on the occasion of his birthday May 18.

WORLDWIDE STRIKE OF SEAMEN IS FIXED TO BEGIN MAY 25. Southampton, England, May 17.—The long threatened international strike of seamen, it is reported here today, has been fixed for May 25, with the object of dislocating traffic during the coronation of King George.

ANDREW CARNEGIE GIVES \$25,000 TO LONDON COLLEGE. London, May 17.—Andrew Carnegie of New York has given \$25,000 to equip the medical institute of the University college of London.

SOLVING PROBLEMS OF NAVAL WARFARE

German Battleship Division Engaged in Important Maneuvers in the North Sea.

Berlin, May 17.—[Correspondence.]—The spring manoeuvres of the German fleet in the North sea, which may be of special interest in America this year because of the approaching visit of the American battleship squadron to Kiel, have brought together for the first time a division—four ships—of the dreadnought class.

With one complete tactical unit of the four which will compose a future German fleet, four homogeneous, high-power battleships, co-operating with a high speed battleship cruiser for locating the enemy under his command, Admiral von Holtzendorff is now able to work out some of the problems of the naval war in operations which were hitherto obliged to study only in theory.

Great Ship Canal Proposed. A plan for turning Munich into a harbor city has been drawn up by the officials of the Bavarian government at the suggestion of Prince Ludwig of Bavaria. It is proposed to cut through northern Bavaria, a great ship canal 150 miles in length, fed by the rivers Isar, Amper and Lech and connecting with the Main and the Rhine, to permit the navigation of vessels displacing up to 1,000 tons as far as the Bavarian capital.

AVIATION PUPIL IS KILLED AT LOS ANGELES MEET. Los Angeles, May 17.—A. V. Hartle, a young Ohioan, ambitious to become an aviator, fell to his death today at the aviation grounds. It was Hartle's second day's apprenticeship as a bird man, Hartle apparently lost control of his machine when up about one hundred feet. He was twenty-six years old.

The Weather

Washington, May 17.—The following is the weather bureau's forecast for Michigan: Local showers; Thursday and probably Friday; warmer; Thursday; moderate south and southwest winds.

CHAS. A. WRIGHT DIES SUDDENLY

Houghton, Mich., May 17.—[Special.]—Charles A. Wright, Sr., of Hancock, president of the Superior National bank of that city, the Keweenaw Copper company, the Phoenix Mining company and Keweenaw Central Railroad company and other corporations, died suddenly of apoplexy while roller skating at the Amphidrome in this village this evening.

FOREIGN MINISTER IS TOO SECRETIVE

London, May 17.—[Correspondence.]—While the entire tendency of British government is toward democracy, and if the Conservatives are to be listened to the country is rushing into socialism, one exception to this rule is charged to the foreign minister, Sir Edward Grey.

BRITISH PUBLIC PROTESTS BECAUSE EXCLUDED FROM SIR EDWARD GREY'S CONFIDENCE.

Washington, May 17.—The address of Governor Osborn of Michigan, favoring the reciprocity bill, featured today's hearing before the senate finance committee on the reciprocity and free list bills.

GOV. OSBORN TESTIFIES AT WASHINGTON

Michigan Executive a Witness Before the Senate Committee in the Interest of Closer Trade Relations With Canada—He Makes an Excellent Impression.

Washington, May 17.—The address of Governor Osborn of Michigan, favoring the reciprocity bill, featured today's hearing before the senate finance committee on the reciprocity and free list bills.

SENATORS INTRODUCE BILLS AMENDING ANTI-TRUST LAW; SEQUEL TO OIL DECISION.

Washington, May 17.—As indicating the national affect on legislation of the United States supreme court's Standard Oil decision, three bills were introduced in the senate today, one by Senator Jones of Washington, Republican, and the other two from Senators Culberson of Texas and Reed of Missouri, Democrats.

DEMOCRATS PATCH UP THEIR DIFFERENCES

Trust Probers Are Elected by the House as Nominated by the Rules Committee.

Washington, May 17.—After a full day's fight over the proposal to elect the sugar trust investigating committee nominated by Chairman Henry of the rules committee, the Democrats of the house came together late this afternoon and elected the committee practically without dissent.

NEW YORK MARKET AGAIN VERY STRONG

All Stocks Go Up and Some Register New High Records for the Year.

New York, May 17.—The advance in stocks was continued today. The volume of business was almost as large as yesterday, and the gains were as general although smaller.

TARIFF BOARD GIVES PRINT PAPER DATA

Cost of Production in Canada Is \$27.53 a Ton—In the United States, \$32.88.

Washington, May 17.—President Taft today sent to the senate the tariff board's full report of its investigation of the pulp and print paper industry in the United States and Canada.

MANUFACTURERS' ASSOCIATION PROTESTS TO TAFT AGAINST THE FEDERATION OF LABOR.

New York, May 17.—President Taft was asked today to end the boycott for all time by seeking the punishment or the dissolution of the organizations enforcing it.

TEMPERATURE AT CHICAGO CLIMBS TO 90 DEGREES.

Chicago, May 17.—The thermometer rose twenty degrees in a few hours today, reaching ninety degrees at 4 o'clock. The temperature tonight is hanging close to the high point.

Wm. Lorimer Not Elected Honestly

So Illinois Senate Committee Concludes—It Charges Bribery and Corruption.

Springfield, Ills., May 17.—"Your committee has reached the conclusion that the election of Wm. Lorimer before the last general assembly would not have occurred had it not been for bribery and corruption."

MANUFACTURERS' ASSOCIATION PROTESTS TO TAFT AGAINST THE FEDERATION OF LABOR.

New York, May 17.—President Taft was asked today to end the boycott for all time by seeking the punishment or the dissolution of the organizations enforcing it.

Another resolution condemns the federal eight-hour labor law as "uneconomic, vicious and dangerous."

SENSATIONAL INCIDENT STIRS CAPITAL CITY

Two Members of the Board of Governors and the Secretary of an Executive Washington Club Resign, Following an Address by President Taft.

Blackballing of Prominent Men Proposed for Membership Had Aroused the Executive's Resentment and He Denounced It Vigorously—Means a New Policy.

Washington, May 17.—The resignation of two members of the board of governors and the secretary of the Metropolitan club in this city, made known today, following a speech by President Taft last night in which he denounced the "small-headed men" who, in clubs, attempt to manifest their greatness by blackballing men of promise proposed for membership, has stirred Washington to the core.

President Taft, who is a member of the exclusive Metropolitan, was reported, several weeks ago, to have felt some resentment over the exclusion from the organization of several newly elected congressmen and senators, proposed for membership by some of the most influential men in the club.

JUDGE CARPENTER REFUSES TO HEAR ARGUMENTS FROM MEAT BARONS' ATTORNEYS.

Chicago, May 17.—Judge George A. Carpenter, in the United States district court, today refused to hear oral arguments from the attorneys for the indicted Chicago meat packers on their plea for a rehearing on the demurrer that Judge Carpenter overruled May 12. He gave them a week to file briefs.

GRAND RAPIDS STRIKERS ENJOINED FROM PICKETING THE FURNITURE FACTORIES.

Grand Rapids, Mich., May 17.—Judge John S. McDonald, in the circuit court, this afternoon issued a temporary injunction restraining the striking furniture workers from picketing and maintaining pickets at the various factories.

Chicago, May 17.—The thermometer rose twenty degrees in a few hours today, reaching ninety degrees at 4 o'clock. The temperature tonight is hanging close to the high point.

Copper Country

WILL GIVE THE FANS EXCELLENT BALL

All the Copper Country Trolley League Wants Its Patronage—Teams Are Strong.

The Copper Country Trolley League season opens next Saturday at Calumet, where Sunday ball is not permitted, with Calumet and Hubbell as the contestants. The Double II, plays the opener at Hubbell next Sunday.

The Trolley League expects to give the copper country good baseball this summer, if the games are patronized. The copper country for a number of years has been content to take its baseball by wire, but this season it can have good ball in its home yards if it works it.

Take the Double II team, for one. This nine is just as good as any club that the copper country supported in the Northern-Copper Country League days. Of course, the copper country did not support that league or it would have been yet, but the present teams are just as good and the Double II is cited as an example.

The team has for principal pitcher Barley Wagner, who is pretty fair. The only reason he is not pitching in league company now is because he prefers to stay home. Cy Wedge is the catcher, Bill Mutter first base and Nick Kaiser second. These are the three greatest ball players the copper country ever saw in action on home diamonds. Werner is the third baseman and Manager John Croze of the Double II claims that he is the best third baseman in the copper district. Anyway, all of the other teams in the league tried to land him. Douglas Matheson is the shortest stopper.

Matheson is one of the fastest young ball players any one of the copper country has in the red metal district. He is a coming league star. The Double II has a big outfield squad to pick from and they are all so good that Manager Croze and Captain Kaiser have not yet made permanent selections. The outfield candidates are Anderson, Galt, Nettie, Sullivan, Misen and Williams.

The Copper Country Trolley League this season is made up of Double II, Mohawk, Calumet, Hubbell and Hancock. From all of the towns come reports of good, strong teams. The only thing necessary now is support. The copper country has thousands of alleged baseball fans who are satisfied to read the box scores and talk about the relative merits of Cobb and Speaker and when "them Tigers" are running wild but they have not in recent years evinced a desire to see an actual game. They deplore the lack of baseball in the copper country, but are not willing to do anything to boost the game.

If the crowd that will hang around the league offices next fall will support the league, the copper country will go up to Calumet next Saturday or to Hubbell next Sunday or to Hurontown a week from Sunday they will see some good ball, the real thing. Seeing a baseball game through a telegraph wire is about as satisfying as sucking cider through the same medium.

When the church matter was first taken up the Ahmeek and Copper City Roman Catholics proposed to take up the proposition together, raise the money, secure a suitable site and erect a building. When it came to deciding on a site for the edifice, however, there arose a division in the ranks. As Ahmeek and vicinity have something over 800 Catholics and Copper City's body is considerably smaller, the Ahmeek people decided to break away from the Copper City organization. A site was donated for the church at Ahmeek, situated about midway between Seneca and Allouez, both of which locations have many Catholics.

The bishop is making an attempt to reconcile the two factions, with the idea of building the proposed church midway between Copper City and Ahmeek, which are about three-quarters of a mile apart. The Ahmeek people are reticent to agree to this proposition, however, the bishop has the entire matter under consideration and promises to make an announcement shortly.

The joint committee of the military orders of Calumet met Tuesday night to complete arrangements for the Memorial Day exercises. No change in the program as originally announced in the Mining Journal was made excepting that Rev. Father Heruleon of the Sacred Heart church will deliver the address at Lake View cemetery.

Both Ahmeek and Copper City Catholics See Bishop—No Decision.

Bishop Eis of Marquette was visited Tuesday at Mohawk, where he was the guest of Rev. Father Alban, by delegations of Roman Catholics from Ahmeek and Copper City. Both parties bore the petition to build churches at their respective towns. As only one church will be granted, both Copper City and Ahmeek are very anxious to secure permission to build that one.

W. FRANK KNOX MUCH ALARMED

State Chairman Calls on Hancock Republicans to Help Save the Nation.

In response to a burly call from W. Frank Knox of the So., chairman of the Republican state central committee, W. H. Mason of Hancock, chairman of the Republican city committee, has called a meeting of the committee for this afternoon.

Chairman Knox writes Chairman Mason that because the Democrats have control of the lower house of congress he is in danger, or words to that effect, and it appears to be his desire that the Republicans of Hancock get busy and save the situation. Mr. Knox advises Mr. Mason that a president of these United States is to be nominated and elected in 1912 and if he doesn't watch out there will be a Democrat named for that high office.

Just what the Republican organization of Hancock is going to do about it can only be conjectured, but it is certain the organization will do what it can to make Mr. Knox's mind easy. This is the earliest date for the starting of a presidential campaign in the copper country.

PURE FOOD EXPERT HERE.

One of Dr. Wiley's Sleuths on Mysterious Mission Hereabouts.

A sleuth from the pure food bureau of the agricultural department, J. A. Walsh by name, one of Dr. Harvey W. Wiley's young men, was in the copper country this week. He left yesterday, after having been in the district for several days diligently inspecting breweries and wholesale groceries. He departed yesterday, no one knows whether.

Mr. Walsh did not state the nature of his mission to any of the businessmen on whom he called. Here merely offered his credentials and took samples. Some of the samples of food stuffs were sent to Washington by express. Whether or not he found foods that were deleterious he did not state, nor did he state his object in sending the samples. One of the businessmen whose plant was inspected said that he thought the expert kept some special notes, probably trying to locate samples of the goods of some manufacturer who is trying to evade the law.

Mr. Walsh represents that department of the federal government which tries to keep honest and under the food supply of the land. It may be that copper country people are eating emerald meats, canned vegetables that are preserved with boracic acid, fruit products that are prevented from working by formaldehyde, or catsup that contains benzene of soda. If such is the case, Mr. Walsh's visit probably will result in stopping the sale of such goods. The dealers who are selling them are not expected to know these things and the department by these inspections protects both dealer and consumer.

MUCH LUMBERING ACTIVITY.

Frank Buschell of Lake Linden Expects to Have Busy Season.

Frank Buschell of Lake Linden is a lumberman who expects a big and busy summer. He recently took a contract to take over 15,000 poles and ties, while a large amount of ties and logs. This material will be cut near Copper Harbor.

Mr. Buschell recently sold the National Pole company of Escanaba, which concern has big cedar yards at L'Anse, several thousand poles and ties, while the logs cut last winter have been sold to Hebard & Son of Peapack.

The poles will be made into rafts and towed to L'Anse, whence they will be shipped during the summer. The ties sold by the same contractor to the National Pole company will be loaded on boats at Copper Harbor and shipped to the West.

The camp crew at present numbers thirty-five men, but it is intended to increase the number to 100 before the summer advances very far. The poles, ties and fence posts are taken out by men who do piece-work. He employs twelve men each for ties and from twenty-five to seventy-five cents each for poles, the amount being paid according to the length and quality of the pole. Men working by the piece usually board themselves and oftentimes are able to make from three to four dollars a day over and above expenses.

CRACK CRICKET PLAYER.

A considerable stir has been caused in cricket circles by the arrival in Calumet this week of Joseph H. Trevean, one of the best known bowlers of Penzance, Cornwall, Mr. Trevean intends to make his home in the copper country, at least for the present year. He has been one of the most expert bowlers in the Minor Counties league of Cornwall. He also is said to be an expert at soccer, coming from the English home of this game, the Penzance district. He is a member of the Young Men's Christian association, Cornish branch. A number of the cricket teams of Houghton county are out after the services of Mr. Trevean, if it probably he will be seen with some one of the clubs at the opening of the season.

ELECTRIC PARK OPENING.

Electric Park, the Houghton County Trolley company's summer resort midway between Calumet & Hancock, will be opened May 28 with a concert in the afternoon by the Calumet & Hecla band. Bandsman Simovich will sing a baritone solo with band accompaniment. Mr. Simovich is the discovery of Bandsmaster Barnard. He is said to have a wonderful voice and he will be featured in the park band concerts this summer.

JEALOUS HUSBAND SHOOT.

John Hilmakki of Keweenaw Bay was arrested Tuesday by Sheriff DeWagon of Baraga county, charged with shooting at Waino Petersaari. He was taken to the county jail at L'Anse. It is said the shooter resented the other man's attentions to Mrs. Hilmakki.

LAKE LINDEN COUNCIL.

The Lake Linden council met yesterday afternoon in special session to discuss the proposition of Calumet avenue, the principal street. No definite action was taken.

SCHOOL OFFICERS' MEETING.

An important meeting of the school officers of Houghton, Baraga, Keweenaw and Ontonagon counties will be held in Houghton today. About seventy-five persons are expected to be present. Superintendent E. L. Wright of the state department of public instruction will be present to address the meeting on the subject of recent school legislation.

RETURNS FROM THE SPOKANE.

Captain Crocker of the Reid tug Manistique returned to Portage lake yesterday from Ashland, where he had been engaged in releasing the steamer Spokane, one of the Reid's fleet, which was aground at that port. The Manistique will now remain on Portage lake to assist in the release of the Moreland.

CHARGED WITH EMBEZZLEMENT.

Warrant out for Henry Dolky, Singer Sewing Machine Agent.

A warrant was issued yesterday at Calumet by Justice Fisher, on complaint of W. W. Wright, agent for the Singer Sewing Machine company, charging Henry Dolky, collector for the agency, with embezzlement. The warrant specifies charges the embezzlement of \$30, but Mr. Wright claims that the books show the man to be apparently \$1,000 short. Chief of Police Trudell of Red Jacket was looking for Dolky yesterday afternoon and expected no difficulty in locating him.

SHERIDAN IS OFF AGAIN.

Under Sheriff Phil Sheridan returned Tuesday from Astoria, Ore., and other points on the Pacific coast. He brought with him the prisoner Isaac Babko of Hancock and Thomas Bastian of Laurium, both charged with wife desertion.

No sooner had the officer arrived in Houghton than he was provided by Sheriff Myers with papers which took him to the prison at same Babko of Hancock and Thomas Bastian of Laurium, both charged with wife desertion.

ANNIVERSARY OF BIG FIRE.

Forty-One Years Ago Today Since Red Jacket Burned Down.

Today is the forty-first anniversary of the fire which swept the village of Red Jacket May 18, 1870. Practically all of the town was destroyed, including all of the stores and many of the residences and boarding houses.

ANNIVERSARY OF BIG FIRE.

Forty-One Years Ago Today Since Red Jacket Burned Down.

Today is the forty-first anniversary of the fire which swept the village of Red Jacket May 18, 1870. Practically all of the town was destroyed, including all of the stores and many of the residences and boarding houses.

An old history speaks of the conflagration as follows: "In 1870 the village of Red Jacket was well nigh destroyed by fire, which came in from the bushes. At least two-thirds of the place, including the central or business portion, was entirely swept away; at a time, too, when there were no fire facilities organized to stay its ravages. The loss was large and severe to many who were not able to meet a sudden calamity. However the village was gradually rebuilt, in many instances with a better class of buildings."

Experience, it is said, is the best teacher, yet the lesson taught in this old Red Jacket fire so many years ago does not seem to have been taken to heart. The bush fire that caused the destruction of Red Jacket was started in just the same way as many of the bush fires in this region have been started, in just the way fires that nearly destroyed the village of Chassell recently were started.

A careless homesteader, burning brush, was responsible for the destruction of Red Jacket village.

In this latter instance a man clearing ground where Yellow Jacket now stands set fire to a pile of brush. There was a brisk wind, which swept the flames through the brush, and in a few minutes the fire had reached the boundaries of Red Jacket village, which were then much nearer Fifth street than at present. A sudden change in wind gave the fire a good start into the town. As there was no fire department, the residents were unable to fight the flames to any extent.

Five years after this fire Red Jacket's first fire department was organized. This was the Protection Fire company, No. 1, and had a membership of fifty men. It was in a conflict with the village council in 1876 and was disorganized and then the Eureka Fire company was organized, with Peter Ruppe as foreman and James L. Nankervis as secretary.

NORWEGIAN INDEPENDENCE.

The anniversary of Norwegian independence was celebrated in Calumet and Hancock yesterday by the Norwegian societies. In each of the towns a concert was given in celebration was a concert in the evening.

Mining News

The Victoria company cannot make any money on the present low price of copper. The town and necessary expenses, however, that all of the future prospects of the company have been exhausted. Its water power is valuable, and it is said that arrangements are being made to consolidate it with other power over on the same river, and it through the generation of electric power.

Figured on the basis of its present demonstrated ore and volume of production, Nevada Consolidated is said to have something like twenty years of life ahead of it. Its porphyry area has been quite extensively prospected, but few veins of any importance have been discovered, especially that in the Veteran property, has not been investigated. The latter may develop sufficient ore to very greatly increase the productive life of the Nevada Consolidated company.

The discovery of a lode apparently containing copper in commercial quantities, lying near the Eastern sandstone in about the same position as the Baltic, Superior and New Baltic lodes, gives basis for hope that a deposit of value may be opened at the Mayflower. The lode was discovered by prospecting. Mr. Hovey, some speculative possibilities by the Mayflower. It is in the latter property, however, that the lode appears to carry sufficient copper to form the basis of a mine.

The Tuolumne is engaged in drifting from the 1600-foot level on the north ledge, and the ore still continues of the high grade. The vein is a regular one on the vein two weeks ago. The vein is twelve feet wide and the ore is averaging a little better than 12 per cent copper. About all the ore going to the surface just now comes from the 1,600-foot level, and it runs from 7 to 9 per cent. The Tuolumne is shipping 150 tons to the Washoe smelter every day, and shipments to this amount will be continued until after the new equipment is installed in August, when the company expects to double its output.

According to all reports the North Entie company property is in better condition than at any time in the history of the mine. Although maintaining an output of about 2,000,000 pounds a month this could be nearly doubled, as a large quantity of high-grade ore is blocked out and only awaits improved conditions and a release of the curtailment agreement to be sent to the smelter. Shaft sinking to a depth of about 2,900 feet will be completed in about three weeks. The 2800-foot mark has now been passed. A section is being cut at the 2800-foot level, and the remaining 100 feet will be used as a sump. As soon as the 2900-foot mark is reached crosscutting from the 2800-foot level will be started.

We feel that Adventure is in a peculiarly strong position, viewed as a property, comments the Boston Commercial. It has been demonstrated that the property carries lodes which, in places, at least, carry copper in paying quantities. These lodes are being opened up by a shaft which is now over 1,300 feet deep. The company is in one and a half years ahead of its neighboring prospects, excepting only Lake, and the two lodes penetrated by the shaft have a splendid showing of copper. There is a good prospect that Mass may open equally

MGILL STUDENTS TONIGHT.

Mining Students from Canadian University Travel in Style.

A party of twenty students from McGill University, Montreal, students of the mining department of that institution, will arrive in Houghton tonight for the evening session of the summer school. They are expected to have been studying mining conditions.

The party will visit the Baltic mine and will particularly while in the copper country and expect to spend four days at the south range properties. It is not announced whether they will visit any other part of the copper country.

The students are traveling in style. They have two Canadian Pacific special sleepers and a baggage car.

ANNIVERSARY OF BIG FIRE.

Forty-One Years Ago Today Since Red Jacket Burned Down.

Today is the forty-first anniversary of the fire which swept the village of Red Jacket May 18, 1870. Practically all of the town was destroyed, including all of the stores and many of the residences and boarding houses.

An old history speaks of the conflagration as follows: "In 1870 the village of Red Jacket was well nigh destroyed by fire, which came in from the bushes. At least two-thirds of the place, including the central or business portion, was entirely swept away; at a time, too, when there were no fire facilities organized to stay its ravages. The loss was large and severe to many who were not able to meet a sudden calamity. However the village was gradually rebuilt, in many instances with a better class of buildings."

Experience, it is said, is the best teacher, yet the lesson taught in this old Red Jacket fire so many years ago does not seem to have been taken to heart. The bush fire that caused the destruction of Red Jacket was started in just the same way as many of the bush fires in this region have been started, in just the way fires that nearly destroyed the village of Chassell recently were started.

A careless homesteader, burning brush, was responsible for the destruction of Red Jacket village.

In this latter instance a man clearing ground where Yellow Jacket now stands set fire to a pile of brush. There was a brisk wind, which swept the flames through the brush, and in a few minutes the fire had reached the boundaries of Red Jacket village, which were then much nearer Fifth street than at present. A sudden change in wind gave the fire a good start into the town. As there was no fire department, the residents were unable to fight the flames to any extent.

Five years after this fire Red Jacket's first fire department was organized. This was the Protection Fire company, No. 1, and had a membership of fifty men. It was in a conflict with the village council in 1876 and was disorganized and then the Eureka Fire company was organized, with Peter Ruppe as foreman and James L. Nankervis as secretary.

NORWEGIAN INDEPENDENCE.

The anniversary of Norwegian independence was celebrated in Calumet and Hancock yesterday by the Norwegian societies. In each of the towns a concert was given in celebration was a concert in the evening.

Mining News

The Victoria company cannot make any money on the present low price of copper. The town and necessary expenses, however, that all of the future prospects of the company have been exhausted. Its water power is valuable, and it is said that arrangements are being made to consolidate it with other power over on the same river, and it through the generation of electric power.

Figured on the basis of its present demonstrated ore and volume of production, Nevada Consolidated is said to have something like twenty years of life ahead of it. Its porphyry area has been quite extensively prospected, but few veins of any importance have been discovered, especially that in the Veteran property, has not been investigated. The latter may develop sufficient ore to very greatly increase the productive life of the Nevada Consolidated company.

The discovery of a lode apparently containing copper in commercial quantities, lying near the Eastern sandstone in about the same position as the Baltic, Superior and New Baltic lodes, gives basis for hope that a deposit of value may be opened at the Mayflower. The lode was discovered by prospecting. Mr. Hovey, some speculative possibilities by the Mayflower. It is in the latter property, however, that the lode appears to carry sufficient copper to form the basis of a mine.

The Tuolumne is engaged in drifting from the 1600-foot level on the north ledge, and the ore still continues of the high grade. The vein is a regular one on the vein two weeks ago. The vein is twelve feet wide and the ore is averaging a little better than 12 per cent copper. About all the ore going to the surface just now comes from the 1,600-foot level, and it runs from 7 to 9 per cent. The Tuolumne is shipping 150 tons to the Washoe smelter every day, and shipments to this amount will be continued until after the new equipment is installed in August, when the company expects to double its output.

According to all reports the North Entie company property is in better condition than at any time in the history of the mine. Although maintaining an output of about 2,000,000 pounds a month this could be nearly doubled, as a large quantity of high-grade ore is blocked out and only awaits improved conditions and a release of the curtailment agreement to be sent to the smelter. DETROIT POLICEMAN A MARTYR TO DUTY

Saves the Lives of People Menaced by Flames, Then Dies of Heart Disease.

Detroit, May 17.—Police Officer Henry Walpole early this morning sacrificed his life to save the lives of several persons sleeping in the third story of a building which was shattered by an explosion believed to have been caused by gasoline. Walpole rushed from the police station nearby, fought his way through the flames and succeeded in alarming the sleepers. Then he succumbed to an attack of heart disease. One man sustained injuries. He was blown through a second story window and landed in the street but was not badly hurt. The loss is \$34,000.

OLDEST TOWN IN THE COUNTRY.

The Strange Pueblo of Acoma Mentioned in 1539 by Spaniards.

Acoma, an Indian village, has the distinction of being the oldest inhabited settlement in the United States. St. Augustine, the first permanent European settlement planted within the limits of the United States was founded in 1565. Acoma was mentioned as early as 1539 by Fray Marcos de Niza and was visited by members of Coronado's army in the following year, twenty-five years before St. Augustine's period of foundation. Early Spanish chroniclers have designated the population at that period as high as 6,000.

Every traveler of greater or less degree traversing the Southwest has heard of this "most wonderful aboriginal city on earth, cliff built, cloud swept, matchless." It is built on a great oblong rocky pedestal rising nearly 400 feet above the plain.

The Indians built this pueblo evidently with the intention of resisting the attacks of Navajos and Apaches, who for many years made war upon this peaceful people. In 1540 Coronado and his band of conquistadors have discovered the pueblo so impregnable that it was only after a long siege that he was able to accomplish its capture.

The top of the mesa is said to contain about a hundred and fifty acres. It is only accessible by three circuitous trails, over which, on the back of the mesa, are built a series of stone walls, every bit of material used in the construction of the dwellings and other buildings all food, fuel and other articles necessary to their livelihood. One of these trails has recently been enlarged so that material may now be brought up a road leading to the pueblo, and a burro, with which the tribe seem plentifully supplied.

The village proper consists of three parallel rows of adobe houses, three feet high; nearly one hundred in all. In these dwellings live a population of about 600 people. Entrance to the houses is made by ladders over the roofs, passing through passageways to the lower floor or into the second terrace by doors, or up to the third terrace again by ladders.

It is said that the senior members of the family live in the first story, the daughter first married gets the second terrace and the second the third terrace. All other members have to seek quarters elsewhere or live with the old people.

The most conspicuous and interesting building in the pueblo is the ancient adobe cathedral, which stands near the edge on the east side of the mesa. In this church, a priest now holds services occasionally. The church is said to be several hundred years old—built some time in the year 1600—and until in recent years the tribe buried their dead under its floor. Now they use the court in front of the church for that purpose.

The building is of Spanish mission style with two large towers facing the front, each of which contains a massive Spanish bell. These bells, upon close inspection, proved to be retained in place by numerous wadded things. This church, being much painted, one of which is called bloodied and strife. Its possession is believed by the Indians to insure good fortune and plentiful crop so it is naturally coveted by other tribes. Several times it has been captured by the Laguna Indians, and was, after the Acomas only after a bitter struggle.

A SCIENTIFIC JOB

is always done by an expert carpenter, when he uses such superior steel tools as he chooses from our high grade stock. "A good carpenter may be known by his chips," but a carpenter that is up-to-date and expert in his work won't use anything but our fine steel tools. He can make his reputation on them.

City Brevities

Today's weather: Showers; not much change in temperature.
Yesterday's temperature: Seven a. m., 58 degrees; noon, 71; 7 p. m., 70; highest, 73; lowest, 46.

Born, to Mr. and Mrs. C. V. Oberg, yesterday, a son.
J. R. Van Evers left last evening to transact business in Chicago.

Mr. and Mrs. Joseph Biscomb, of Duluth, former residents of this city, are spending a few days with friends.

Arthur Brooks, manager of the Northern Lumber company at Birch, left last evening on a business trip to West Virginia.

Austin Farrell and R. P. Bronson, the latter of Ishpeming, have been added to the directorate of the Marquette National bank.

Mr. and Mrs. A. L. Greene and son, Carl, arrived yesterday to make a month's visit with relatives in Marquette. They reside in El Reno, Okla.

W. W. Hargrave, of Grand Marais, was in the city yesterday looking after the flat building, he is now constructing at the corner of Front and Ohio streets.

"Their work is of an exceptionally high order." This is the opinion of Professor W. N. Ferris, of Ferris institute, Pigeon Rapids, Mich., of the Colored Jubilee singers who will give a concert at the opera house Monday night.

The Ladies' Aid society of the Methodist church will be entertained Friday by Mrs. H. B. Patrick at her camp at Lakewood. Trains leave over the Marquette & Southeastern at 6:45 a. m. and over the South Shore at 2:45 p. m.

The Woman's Home Missionary society of the M. E. church is collecting old rubbers. It will be grateful for all donations of that kind. Persons having old rubbers to give are asked to send them to the church or call Bell telephone 873-L.

T. Lajeunesse, of Chocoy, was found guilty of negligently and carelessly setting fire to brush and stumps on his farm near Chocoy, in Justice Byrne's court yesterday afternoon. The offense was committed May 5. He was fined \$15 and \$7 costs.

Red Cross legion and the Marquette branch of the Modern Brotherhood of America both entertained last evening with social hops, the former at Legion Hall and the latter at the Owl's Hall. Both dances were well attended and were thoroughly enjoyable events.

Death of Mrs. Gillon—Mrs. Robert Gillon, aged thirty-eight years, died last yesterday afternoon at her home, 808 West Bluff street, after a lingering illness. She is survived by a husband, four daughters and one son. Time and place of the funeral will be announced later.

Louis Page's Hearing—The preliminary hearing of Louis Page, of Big Bay, who is charged with having broken into Clifford Garceau's saloon on Washington street a week ago, was begun yesterday in Justice Cray's court. Attorney Geo. P. Brown is acting attorney for the prosecution, while Page is defended by J. H. Primeau, Jr. The hearing was not concluded yesterday and will be continued this morning.

Has Bought Pool Room—Bert Freed, playing manager of the Marquette baseball team, has purchased and taken possession of Thoney's pool room on South Front street. Though he has been in this city only a few weeks, Mr. Freed has already made many friends and his place will undoubtedly be well patronized. He expects to make the place a baseball headquarters and to conduct the business in a hustling, up-to-date manner.

Will Produce Play Here—According to reports from the copper country, "The Golden Rule" was a success, fully presented at the Kerridge theater, Hancock, a short time ago by the Knights of Columbus of that city, will be presented in Marquette and Ishpeming the latter part of the month. The entire company and properties as seen in Hancock will make the trip to the iron country, and the Knights of Columbus councils of this city and Ishpeming are preparing to give them a cordial greeting.

New Office Building—Chas. Meecke has broken ground for a handsome new office building at the Upper Peninsula brewery, which will be located immediately in front of the present office. The building will be of railroad sandstone construction and of the same general architecture as all the other brewery buildings. The office will be one of the finest in the city, and from one dollar to quarters will be equipped with the most modern furnishings. The first floor will be of tile and in one corner a concrete vault will be constructed. The second floor will be fitted up as living rooms for the office help.

HOW TO CATCH 'EM.
No Need to Be Kept Awake by Mosquitoes, Says Timely Bulletin.

The agricultural department has issued a timely pamphlet on an "Apparatus for Catching Adult Mosquitoes." The volume is by Chief Entomologist L. O. Howard, who discusses the mosquito from the cradle to the grave. There are two preferred ways of killing the adult, according to Dr. Howard. One is to drown him in oil and the other is to catch him in a trap and then asphyxiate him with benzine.

Dr. Howard says: "The apparatus for catching adult mosquitoes consists of a tin cup or a tin can cover nailed to the end of a long stick in such a way that a spoonful or so of kerosene can be placed in the cup, which may then, by means of the stick, be pressed up to the ceiling so as to inclose one mosquito after another.

"When covered over in this way the captured mosquito will attempt to fly and be caught in the kerosene. By this method perhaps the majority of the mosquitoes in a given bedroom—certainly all of those resting on the ceiling—can be caught before one goes to bed.

"H. Maxwell-Lefroy of India makes a trap consisting of a wooden box lined with dark green baize and having a hinged door. The trap is 12 inches long, 12 inches broad and 5 inches deep. A small hole covered by a revolving piece of wood or metal is prepared in the top of the box. Owing to the habit of mosquitoes to seek a cool, shady place, such as a dark corner of the room or a book shelf, they will enter the trap, all other dark places being rendered uninhabitable so far as possible. The door is then closed and fastened and into the small hole at the top of the box a teaspoonful or less of benzine is introduced. This kills all of the mosquitoes."

SOO CANAL PASSAGES.
Names of the Boats Bound for Ports on Lake Superior.

Sault Ste. Marie, Mich., May 17.—[Special.]—The following upbound boats have passed the canals the past twenty-four hours: Robbins, 8:30 this morning; Keevatin, 11; Jones, noon; Shaugnessy, 12:30 this afternoon; Empire City, 1; Gogebie, 1:30; Choctaw, 5:30.

Marine Notes

The Mather and the Brazil were at the L. S. & L. dock yesterday. The Mather expected to clear last evening. There were no boats at the South Shore dock yesterday, but the Empress of Midland was expected during the night. The Centurion is still at the coal dock.

The tug Boynton with lighter, has commenced work on the barge Thomas aground in the upper St. Mary's river. The Thomas was in tow of the steamer McDougall and after being dropped by the latter to be towed through the American locks, while the steamer took the Canadiana, she went aground. Water in the upper river fell two feet during the day making it necessary for the barge to be lightened in order to be released.

The Weitzel lock at the Soo went into commission yesterday. Opening was delayed by the changing of a new set of upper gates. The new gates will have cement walks, which is an innovation to be tried out. The upper section of the gates are also faced with cement. The draft for the Weitzel lock is 12 feet three inches.

The sandusker Ellen turned turtle at the Schlitz coal dock, Milwaukee. She had 500 tons of coal aboard consigned to the Commerce street dock of the Milwaukee-Western Fuel company and was temporarily tied up at the Schlitz dock. The first intimation that the crew had that anything was wrong, was when they woke and found themselves almost standing on their heads. They immediately started to lighten the boat and Ellen suddenly keeled clean over leaving her rudder sticking up out of the water. The Ellen was built eighteen years ago, and measures 194 tons. The Milwaukee Sand and Gravel company are her owners and they estimate her value at \$14,000.

CARD OF THANKS.

To the Knights of Columbus, The Brotherhood of Railroad Trainmen, The Brotherhood of Locomotive Engineers & Firemen and also to our many friends we wish to extend our most heartfelt thanks for the many kind favors shown us in our late bereavement and also for the many beautiful flowers sent.

MRS. ED. J. PELISSIER
MR. & MRS. A. J. PELISSIER

DO GHOSTS HAUNT SWAMPS?
No, never. It's foolish to fear a fancied evil, when there are real and deadly perils to guard against in swamps and marshes, bayous and lowlands. These are the malaria germs that cause ague, chills and fever, weakness, aches in the bones and muscles and may induce deadly typhoid. But Electric Bitters destroys and casts out these vicious germs from the blood. "Three bottles drove all the malaria from my system," wrote Wm. Fretwell of Lucama, N. C. "I had I've had fine health ever since." Use this safe, sure remedy only. 50c. at

INSURE WITH PETER WHITE & CO.

A. L. Huettner's May sale of Muslim Underwear, is attracting crowds of people to his very popular Marquette store. The excellent values and noteworthy price reductions are paramount issues in this remarkable sale. There are also wonderful values to be had in coats, suits and dresses. This sale continues until June 1. 5-18-11

The Visiting Nurse association have exhausted their supply of second hand clothing and would be very grateful for donations of old clothing. The demand for same being very great among the deserving poor on the list of the association. Baby clothing is particularly needed, also for children and grown people. If notified at the office of the association, Bell telephone No. 477-L, between the hours of one and two p. m., the visiting nurse will be glad to call for all donations. 5-16-5d.

WATCH YOUR KIDNEYS.

Their action controls your health. Read what Foley Kidney Pills have done for other sufferers. Clyde H. Fuller, 406 River St., Cadillac, Mich., says: "For the past two years I have been suffering with severe backaches, and dizzy headaches, so that at times my eyes were blurred. The kidney action was painful and troublesome and hearing of Foley's Kidney Pills, I decided to try them. After using them for a short time, I was entirely cured of the backaches; my kidney action became normal and regular. Foley Kidney Pills cured me and I highly recommend them to any one suffering in a like manner." The People's Drug Store.

RAISING SNAKES IS PROFITABLE.
Thriving North Carolina Industry That Companies Would Check If Possible.

In Swain county, North Carolina, an enterprising woodsman succeeded in building up a profitable business in shipping rattlesnakes to the east. That section of North Carolina, it appears, produces a superior breed of rattlesnakes and New York scientists and naturalists have been paying willingly \$5 apiece for good specimens of rattler, according to the Louisville Courier-Journal.

Manuel Weeks, who has been supplying the scientific world with live and luskly snakes, owns a large body of land in the North Carolina mountains. The most of the land is too poor and too rugged to raise a fuss on, but it abounds in rattlesnakes. A New York professor on a vacation, looking around for specimens of flora and fauna and other things of interest to nature lovers, saw some of the snakes and wanted a few for his collection. Weeks agreed to catch them and ship them and did so. Subsequently the fame of the North Carolina snakes spread over New York and other naturalists wanted specimens. Weeks was furnishing them right along, boxing them up and sending them by express from Bryston City.

The business was going merrily and remuneratively until one day a careless messenger dropped a box of snakes and smashed it on the floor of the express car. The express messenger left the car in haste and the whole train crew was summoned for general snake killing. It was an exciting time and it delayed traffic and threw a number of passengers into a condition approaching nervous prostration. Weeks not only failed to realize on that particular consignment, but the express company sent a hurry up order to the agent at Bryston City to accept no more snakes for shipment. The next time that Weeks appeared with a box of snakes the agent gave him the icy stare and suggested that rattlers were very much persona non grata, and there didn't seem to be any indication of the company warming up to Week's peculiar industry.

Weeks has sued the company for \$5,000 damages probably on the ground that it is acting in restraint of trade. In North Carolina, snakes are a drug on the market. It looks bad for the snake farm unless ways and means for shipment of its products may be found. Nevertheless, the express company and its employees, the trainmen and the traveling public must be contented to have some rights in the matter.

FREE MEAT WOULDN'T LOWER LIVING COST

Chicago Packers Would Still Control and Prices Would Not Be Reduced.

Washington, May 17.—In all the current talk of free mutton, in congress and outside, the special friends of the Western farmer, with his respectful voting power, sound the loudest notes on the alleged dangers of competition from Argentina. The Western progressives are expected to vote against the Democratic farmers' free list because of its provision for free meats. Argentina is the largest exporter in the world of frozen meats, the second of wool, the first of corn and the second of wheat. This being the case, it may be only a natural conclusion that the moment the duties on meats, wool and wheat are removed the Argentine will proceed at once to flood the United States with its products and prices will fall. The consumer therefore—meaning in this case the people of the great manufacturing cities—thinks it is only fair to the farmer vote jumps on that but as soon as it strikes the ground.

As far as meat is concerned, this political jugglery can be carried on safely enough by Democrats and Republicans alike—the consumer will not gain and the farmer will not lose. Special Agent James D. Whelpley of the department of commerce and labor tells why in language so plain that even the demagogue cannot misunderstand it. "The meat only in the present story, Mr. Whelpley shows in a very few words that the predominating influence in the meat production of Argentina is American, and should congress in its wisdom place meat on the free list, the American producer would still have the Chicago packer to deal with and prices would remain the same.

Chicago Packers Control Argentina.

The Chicago meat companies, says Mr. Whelpley, entered the Argentine field only seven years ago, but they have already obtained such a position that they are decided if not a dominating influence in the progress of the trade and the control of prices. The extent of their interest is only partly known to the public, either of Argentina or the United States, but they admittedly hold two of the seven companies engaged in the production and export of cold-storage meat and are believed to have at least a working understanding with several of the others. They have also secured land for the purpose, it is believed, of establishing new plants. The La Plata Cold-Storage company and the La Blanca company are the two avowedly North American enterprises. The first-named has risen to be the largest single producer in the Argentine field.

A sensation was created by this company at the recent fat-stock show in Buenos Ayres by the extraordinary prices paid for the purpose of showing breeders what it wanted and to encourage them to develop a superior breed of animal. For five steers the company gave about \$5000 apiece, and for a total of 177 gave \$771 to the United States breeders. It was estimated that the available beef on the five steers that brought top prices cost the company about five dollars a pound. Last year these two companies produced about 100,000,000 pounds of cold-storage beef and almost as large a proportion

of the mutton and lamb. They have just chartered all the space in nine recent new steamships ordered by the Nelson line for the River Plate fresh-meat trade.

Chilled Supplanting Frozen Beef.

The most important influence of the American companies has been shown in the introduction of progressive methods, particularly in the development of chilled beef—the kind to which United States consumers are accustomed. This has been brought into commercial operation within the last year or more by the North American companies and seems destined to supplant the frozen product. In 1909 the La Plata Cold-Storage company produced more than twice as much chilled meat as any other company, and with the La Blanca company, makes those two firms fifty per cent of the entire output of that article.

The importance of the position of the Chicago companies in the Argentine in that, apparently, it puts the meat industry of the two principal producing countries in the same hands. Argentina is the largest exporter of beef in the world, and next to New England, the largest shipper of mutton. Argentina now occupies a place formerly held by the United States as a purveyor of beef to Europe, the increase in the home consumption having cut down our exports in marked degree.

No Cheap Beef From Argentina.

Argentina has been looked upon as a competitor of the United States in the meat industry and has even been considered by some as a possible source of cheaper meat for this country. The present outlook there leads no color to such supposition. Mr. Whelpley concludes, "Shipments of beef from the Argentine to the United States may come shortly, he says, but they probably will be directed by the same interests which supply the market here, not in opposition to them.

So far as the American packers are concerned, their present operations in the Argentine field have nothing to do with the meat supply of the United States. The immediate object is to obtain supplies, which can no longer be secured at home, for their English markets. They have not given up their foreign business, as the diminishing export figures of the United States might lead one to suppose, but have simply transferred their base from the Mississippi valley to the River Plate.

Even were it not for the position of the American packers in the Argentine field, there would be no likelihood that United States consumers could secure a meat supply from that quarter at less than prevailing rates, and probably not at such low figures. One reason for this is that Argentina has an ample market in Europe. For the year 1910 Great Britain took 98 per cent of the exports both of beef and mutton, but this represented only 65 per cent of Great Britain's total imports of beef and 27 per cent of her total imports of mutton. It is apparent, therefore, that in Great Britain alone the market can be much extended. Moreover, it appears that the Continental nations of Europe, which have heretofore used practically no cold-storage beef are on account of the scarcity of live animals and consequent rising prices, hence, if the United States wants Argentine meat it will be necessary to pay for it at European prices. Added to this, as a further obstacle in the way of supplies from Argentina, is the fact that the cost of living in Argentina is high. This makes the production of beef high in spite of the country's great natural advantages for that industry.

Trade of the Argentine with the United States is of a character to delight the soul of the high protectionist. For the five years ending 1909 exports from the United States to the Argentine Republic exceeded imports in value by more than 100 per cent. This, of course, has a direct effect upon shipping. For example, steam-producing coal can be bought cheaper in Argentina than in England, yet the Argentine imports no coal from the United States. She takes it all from England, in vessels which are chartered to return with grain.

Argentina, like almost all foreign countries with which the United States does business, has her share of complaints of the unsatisfactory methods employed by Americans. One of the losses due to pilfering on the New York docks. This is said to be due to the fact that, contrary to usual practice in Europe, United States shippers deliver goods to and get a receipt from a wharf company instead of dealing with the steamship companies direct. This leads to many legal contentions, lawsuits and claims for damages involving long delays, to say nothing of the fact that when shipments are received in the Argentine it is found that the orders are incompletely filled, and this naturally causes friction between importer and exporter. Losses are said to be especially heavy on shipments of canned lobsters, revolvers, safety-razor blades and cigars.

Complaints are also made by Argentine purchasers to the effect that North American exporters consider that they have fulfilled their contract with Argentine buyers as to date of delivery when such date of delivery is covered by receipt from a wharf or warehouse company on the Argentine coast. The fine purchasers of United States goods say that in this way the shippers evade responsibility for date of final delivery.

J. J. CARTY CROWNS HIS ANNUAL INCOME TELEPHONE CAREER

Communication Between the Atlantic and Pacific Coasts Is Now Possible.

New York, May 17.—When a long-distance telephone wire connecting New York city with Denver, Col., demonstrated its capacity to carry a message a distance of over 2,000 miles, J. J. Carty, one of the greatest distinctions of his career, although he has been a telephone engineer for a little over twenty-five years.

Mr. Carty was born and brought up in Cambridge, Mass. When Professor Bell demonstrated the commercial practicability of the telephone, Carty was still a lad, and soon became intensely interested in the new invention. After receiving some instruction in the technical schools of Boston he became associated with the original inventor as a consulting and operating engineer.

In those early days one of the drawbacks to the telephone apparatus was the crude and bewildering method adopted for sending signals from the central office to the person whose number was called. Mr. Carty was one of the first to perfect the problem, and at last perfected the simple apparatus now in universal use by means of which a bell is rung at the receiving end. That bell has ever since been known as Carty's bell.

While still a young man Carty was called to New York and was appointed chief engineer of the New York Telephone company. At once a work of magnitude almost appalling was put before him. The entire New York city was to be wired under the surface, and the work of establishing this new system was of itself a very difficult and complicated engineering problem. It was especially so because telephone service in New York was very rapidly increasing, and there were some other complications due to the discovery by expert electricians that it was practicable to use telephone wires for the transmission of the Morse telegraph code without interrupting a telephone message.

Long-Distance Telephone.

At that time Mr. Carty was working in co-operation with a score of other electrical engineers, almost all of whom were young men who passed immediately from the technical schools into the service of the New York Telephone company. For in that early day the possibilities of the long-distance telephone were not generally understood, although the magnificent commercial field which was open to it was not clearly demonstrated.

Some absolutely original problems were to be solved before the long-distance telephone that is, in a commercial sense, a household name, could be established. Experiments and patiently conducted tests were carried on under the directing eye of Mr. Carty. One of the most difficult problems was to discover how to keep adapting well within commercial limitations. Many months passed before this was accomplished.

The young men of science worked with the enthusiasm of original investigators. They discovered the means by which perplexing obstacles could be overcome, as, for instance, those due to induction. At last Professor Bell was called from Washington, and in the presence of a varied and distinguished committee he sat before a telephone in the offices of the New York Telephone company, some seventeen years ago, and in a moment was engaged in a conversation with representatives of the company who were assembled at the Chicago office. Science had at last mastered the long-distance telephone over such distances as between Chicago or St. Louis and New York, and in that achievement the share which Mr. Carty had was cordially acknowledged at the time.

This triumph was not the culmination of the long-distance telephony, nor will it be reached until New York and San Francisco are brought together. New York and Denver are now united. It is only a question of time when the long-distance telephone will prove as beneficially as profitable as the shorter lines.

Demand from the West.

In 1907 the demands for telephone installation which came to the attention of the New York Telephone company, and which Theodore N. Vail is president and Mr. Carty chief engineer, from the remote West, the valley of the Missouri and from the wheat and corn belts were so great that it was decided to expend \$150,000,000 throughout these regions. A most careful estimate was made, which showed that this sum could be expended

HIS ANNUAL INCOME RUNS INTO MILLIONS

Once Poor Bolivian, Tin Mine Owner, Is on the Road to Immense Riches.

New York, May 17.—Horace G. Knowles, minister from the United States to Bolivia, in New York. He has brought some information of special interest to American merchants and manufacturers respecting new and very great developments now in progress in Bolivia, which he will discuss in an address before the manufacturers' club of New York, as soon as he has made his report to the state department in Washington. He will undoubtedly tell the manufacturers' club a story of recent achievement in Bolivia which illustrates the rapid growth here of the development of the resources of that interior republic of South America.

In the year 1905 an industrious, energetic citizen of Bolivia, Patino by name, was employed in some subordinate capacity at La Paz, Bolivia, at \$24 a month. In the year 1910, Patino received each month an income of \$200,000, and his total income for the year was \$2,000,000. His gains will probably be greater in the year 1911, and he should be in the list of the richest of the richest men of the world.

Although until 1905 a common workman, Patino kept his eyes about him. He knew that in the vicinity of La Paz, the capital of Bolivia, there were many tin mines, and he was not slow to take advantage of the fact that there were evidences of much larger mines. He was able to secure either through credit or borrowed money, concessions, and became the owner of mining claims, and in the year 1905 he had in his possession a tin mine in England. With the income gained the first year he secured additional properties and in the course of another year or two enlarged his operations to such an extent that he is now one of the greatest tin producers of the world.

Bolivia and Tin Mining.

When Patino began to work his tin mines, Bolivia produced a little over 5 per cent of the total mined throughout the world. Last year the total output of tin was 40 per cent of the entire world product, the mines of Wales and of the Straits Settlements producing about 60 per cent. Within the next three or four years Bolivia will undoubtedly be found producing one-half of the total amount of the world's output of tin.

Mr. Knowles tells this story not merely for the romantic interest that is in it, but to illustrate the commercial possibilities which are awaiting development in Bolivia and of which he believes the United States should take full advantage at once. So far we have been a little negligent of our opportunities. A few years ago the banking house of which James Speyer is the head obtained concessions from Bolivia for the construction of a railway line for about 300 miles, bisecting the wonderfully rich Yungas district. Bolivia, by these concessions, gave large grants of land to the railroad company. The Yungas district only needed transportation for its agricultural products and is a rich agricultural region.

Real riches is not considered superior to the coffee produced in the Yungas district, where it grows wild and in abundance. The rubber trees are of almost inexhaustible capacity, and these two agricultural products are only a part of the great resources of that district. The proposed new railway is to have a terminal upon the navigable waters of the upper Amazon, so that communication from interior Bolivia to the Atlantic and to the markets of the world will be at last effected.

Apparently American capital failed to take advantage of the concessions obtained by the Speyers. At all events, the Speyers approached English capital, which was furnished in abundance. Surveyors are now laying out the route for this railway, the work of construction will begin as soon as possible. The bonds, which were sold in England, have already appreciated in value.

Commerce Barriers to South America.

American capital has recently been attracted to South America and in some unexpected ways. The United Fruit company proposes to dispatch steamers to west coast South American ports, and to carry full cargoes from the United States, and hoping that they will soon be able to secure return freights in such amount as will considerably reduce charges either way. If commerce barriers from the United States are able to secure good return cargoes, then immediately after the Panama canal is opened there will be

FIRST CUYUNA RANGE ORE IS DUMPED INTO POCKETS OF DOCK AT SUPERIOR.

Superior, Wis., May 17.—A train of twenty-five cars of ore from the Cuyuna range, the first to reach the Soo Line's new dock on St. Louis bay, was unloaded into the pockets of the structure yesterday afternoon at 4 o'clock. Other trains will bring the remainder of 130 to 200 cars stored in the Stinson avenue yards up to the dock in the course of the next day or two. Trains from the range will be run as loaded, but for the present the traffic will be light.

Superintendent J. B. Michaels of the Twin Ports division of the Soo Line and Superintendents Johnston of the Ashland division and Urbahn of the Stevens Point headquarters were among the officials present at the dock upon the arrival of the first train and witnessed the unloading of the first few cars before departing. As yet no boat has been assigned to the dock to load so far as known to the officials, but it is expected that a cargo will be taken shortly. "The loading of the range will undoubtedly be light for a while," said Superintendent Michaels, "and consequently but few trains relatively speaking, will be run. It is possible, however, to store a considerable quantity of ore in the pockets of the dock without any being loaded out."

The new dock has 100 pockets each with an approximate capacity of 300 tons, and since the average ore car will carry from forty to fifty tons it will be possible to unload 600 or more cars before all the pockets would be filled, even if no loading or unloading were done. The dock is entirely completed although some work yet remains to be done on the line to it, including the completion of the ore yards at Twenty-eighth street. Steel structures carry the line across Sixty-fourth, Twenty-eighth and Twenty-first streets and also the crossing of the Northern Pacific line to the Grassy point bridge. The remainder of the trestle approach is constructed of piling and timbers.

FINDS RABIES PREVALENT.

Bureau of Animal Industry Official Urges That All Dogs Be Muzzled.

Washington, May 17.—According to a bulletin issued by the department of agriculture, there is occasion for alarm in certain sections of the country with reference to the increasing prevalence of rabies. The bulletin prepared by John R. Mohler of the bureau of animal industry.

"It may be true that many newspaper stories have been exaggerated or are entirely false, but it is not true that rabies is a disease which is confined to the building up of the dog's body. It is shown by a number of cases traced by the writer where the diagnosis had been made in reputable laboratories by recognized scientists.

"Kerr and Stimson in their investigation of the prevalence of rabies used a number of press clippings, and in no instance did a press report lack official confirmation, which is contrary to the general opinion on this subject.

"Reference is made to recent outbreaks of rabies or hydrophobia in Kansas City and other sections of Missouri, and in many other states. Not only is there a gradual increase in the number of outbreaks, but many new centers, which appear to be more or less permanent, are being established from year to year.

"In order to secure state and municipal legislation for the control of rabies it will require concerted action on the part of all interested parties, whether professional men or laymen, to prove to the public the need, value and benefits of such a procedure. With such legislation properly enforced no dog would be seen running at large without a muzzle.

"These contracting the disease would be unable to transfer the disease to other animals.

"Monetary loss, untold suffering and death both among human beings and animals, caused by the disease, would rapidly decrease, and in a relatively short period rabies would be eradicated from the country. After reaching the desired goal the reappearance of the disease could be readily prevented by a six-months' quarantine of all dogs imported into the United States from countries where rabies is prevalent."

WASH THOSE PIMPLES OFF.

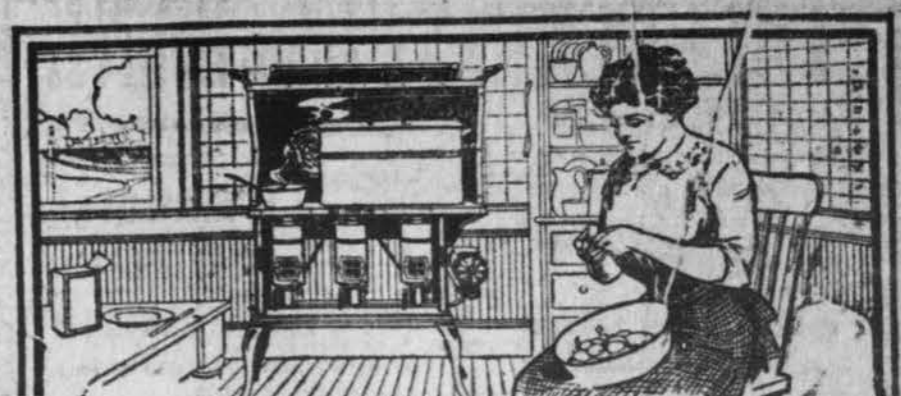

Use D. D. D., that mild, scorching wash that recognized remedy for acne, zema and skin troubles. First drops take away that awful burning itch, cleanse the skin—wash away every simple—every impurity. Nothing like D. D. D., for the complexion.

Get a 25c trial bottle today—worth ten times its cost to have a bottle in the house. At any rate, drop into our store to talk over the merits of this wonderful prescription. Stafford Drug Co.; City Drug Store, Ishpeming.

The Modern Wash-day

Time was when The Wash was a weekly nightmare, wash-day dinner a by-word. The New Perfection Oil Cook-stove has changed all that. Once the wash-boiler is on the stove, it leaves you free to attend to the dinner or any other work.

You can move a New Perfection where you please and light it in a moment. It requires no attention after that. A single gallon of oil lasts all three burners seven hours or more. No coal or wood to carry; no fire to feed; no soot nor ashes. It keeps a kitchen or laundry cool and clean. It cooks to perfection, with the least trouble and expense.

REVOLVING DOOR PUZZLER FOR LEAVENWORTH DOGS.

Problem is Complicated and Animals Seldom Try It Second Time.

Leavenworth, Kan., May 17.—There is one class of patrons of the post office which without doubt will experience a welcome change when the warmer days result in the removal of the cold-proof revolving doors. Reference is made to dogs, for the apparent discomfort of the canine patronage of the federal building caused by the turnstile type of door has often been apparent to post office employees, from postmaster to janitor. Three 90-degree doors in succession will cause the change to be made.

The turnstile door as a means of entrance or exit is a problem which never has been solved by a city dog. Probably it may be because the post office is about the only building in the city which has been fitted with them. Nevertheless the fact remains that dogs, once having experienced a trip through the post office, shrunk from the whirling door and wait on the stone steps for their owners.

Many an unsuspecting pup has run up the steps, at either entrance to the federal building, only to find a swinging barrier between himself and his master when he would have gone into the building. From there it is an even bet whether the dog plunges blindly into the entrance or stays outside.

If he plunges, the odds are against the dog. Conservatively speaking, only one in ten of the canines which have found themselves in quarter segment of the doorway have got through the door. And that tenth of the city's canine population took a merry-go-round ride before the centrifugal force sent him spinning out of the floor of the lobby. The remaining nine-tenths fled down the steps at the first sign of the door.

Once in the building, doggy's troubles continue. At the other end of the building is another revolving door. It has been a test of the dog's courage to determine if he would voluntarily make a second attempt to go through the turnstile door. Few have done it, and more have refused to be taken out that way.

Now comes trouble for employees. Early in the morning, the janitor, in some cases, masculine insistence has prevailed. But the usual method, after futile attempts to coax or cajole a way dog into the revolving doors, is to take it out by the rear door, where only a wire cage bars the way out.

CHINESE LOVE TO RACE.

"The Chinese are great lovers of horse racing and in Manchuria are bred some of the fleetest ponies in the world," said B. R. Wiley of San Francisco, who spent years in the Orient, to the Baltimore American.

"Twice a year there are grand racing meets in Shanghai, and the elite of these game, little steeds from the north, come down to compete for supremacy of the track. The handicapping is based on height; a pony of 12 hands is given a low weight to carry than one that is taller. Enormous crowds go out to see them run, and the Europeans are just as eager patrons of the sport as the Celestials.

"Betting is open and unrestricted and is done something after the fashion of the pari-mutuel system. The climax of the meeting is when the grand prize of several thousand taels is awarded. In the contest no horse is eligible unless he has previously won a race. All the racing is on the turf, there being no made tracks as in this country, and the course is perfectly straight."

AMOUNT OF REST NEEDED.

Persons who may be unwilling to accept the Sabbath as a day of rest prescribed by the Infinite, may find the observation recently made in behalf of the German army. Germans as a people, long have been regarded as a people eager to convincing scientific observations and deductions.

In drilling, marching and maneuvering his troops the German government has discovered that in long marches especially no commissary will supply to troops the waste of carbohydrates without rest intervals. In this connection army experts never more than double the period in the Scriptures injunction and have decided that after every three days' marching the marchers should have a full day's rest for recuperation. To keep an army column longer in heavy marching order is to weaken the physical forces of the soldier.

MARQUETTE SCHOOL BOARD PROCEEDINGS.

Marquette, Mich., May 17, 1911. Meeting of the Board of Education held at superintendent's office at eight o'clock p. m.

Present: President N. J. Hart, Trustees D. H. Bell, James O'Reilly, H. J. Horgan and Edw. S. Blevins.

Meeting called to order by President N. J. Hart.

Minutes of meeting April 22nd, 1911, were read and the same duly approved.

Resolution of Principal J. M. Noel was presented and upon motion, which was seconded, same was allowed.

Upon motion, which was seconded, Mr. Arthur H. Richardson was engaged to take the school census for the year 1911 at four and one-half cents per pupil.

Resolution of Superintendent J. M. Noel was presented and upon motion, which was seconded, same was allowed.

Upon motion, which was seconded, Miss Helen Sherman was engaged as Latin teacher in the high school for the ensuing year, at a salary of \$85 per school month.

Upon motion, which was seconded, the following resolution was offered and unanimously adopted:

"Resolved, that the sum of fifty-two thousand dollars (\$52,000.00) be and the same is hereby voted to be raised and assessed on the taxable property of the city for the present year 1911, for the support of the public schools of the city of Marquette, and the president and secretary be and are hereby authorized to create the bonds of the city of Marquette, to be raised on the taxable property of the city for the year 1911, in the same way as was allowed and ordered paid, no further business appearing, the meeting was duly adjourned.

EDW. S. BLEVINS, Secretary.

STOMACH LIVER LUNGS

Each of the chief organs of the body is a link in the Chain of Health. The chain is as strong as its weakest link, the body is as strong as its weakest organ. If there is weakness of stomach, liver or lungs, there is a weak link in the chain of life which may snap at any time. Often this so-called "weakness" is caused by lack of nutrition, the result of indigestion and disease of the stomach and other organs of digestion and nutrition. Diseases and weaknesses of the stomach and its allied organs are cured by the use of Dr. Pierce's Golden Medical Discovery. When the weak or diseased stomach is cured, diseases of other organs which seem remote from the stomach but which have their origin in a diseased condition of the stomach and other organs of digestion and nutrition, are cured also.

The strong man has a strong stomach. Take the above recommended "Discovery" and you may have a strong stomach and a strong body.

GIVEN AWAY.—Dr. Pierce's Common Sense Medical Adviser, new revised Edition, is sent free on payment of postage stamps to the expense of mailing only. Send 21 one-cent stamps for the book in paper cover or 31 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

DIED SUDDENLY.

Winthrop Man Expired Yesterday Afternoon While On His Way to Work.

Hans C. Olson, an old and well-known resident of the Winthrop location, died yesterday shortly after dinner, while on his way to work at the Pluto Powder company's plant. He expired at the home of August Larson, about midway between his dwelling and the powder plant. The deceased was walking along the road when members of the Larson family saw him fall. They immediately came to his assistance but he expired within a few minutes. Heart disease was the cause of his demise.

The deceased lived with his only daughter, Mrs. Paul Solka, whose husband is in Alaska. He was in the city a few days ago and he appeared to be in splendid health. He was about sixty years of age. His wife died at the Winthrop some years ago. The funeral arrangements will be completed today.

DIED IN BUTTE.

Former Upper Peninsula Man Passed Away in Montana City.

Jeremiah D. Murphy, brother of Con M. Murphy, the Oliver Iron Mining company's master mechanic on the Marquette range, and Mrs. James McGee of this city, died last week in Butte, Mont., where he had resided for the past thirty-two years. The deceased lived at Rockland in the copper country for a number of years before going west, his parents being among the old settlers of Ontonagon county. His brother Con went to Butte during the winter to see him, and

UPPER PENINSULA RESIDENT SINCE 1849

Charles Ham Was One of the Lake Superior Country's Earliest Citizens.

In the death of Charles Ham, whose demise was briefly announced in yesterday's issue of The Mining Journal, the upper peninsula loses one of its earliest settlers, he having been a resident of this section since 1849. Mr. Ham's death was directly due to an injury that he sustained a week ago last Saturday, when he fell over a wire in an alley near his home. He received internal injuries by the fall that two days later developed into peritonitis. For two or three days prior to his passing, his physicians gave no hope for his recovery, though he felt well, and seemed to be so much improved on Tuesday, that the members of the family felt quite certain that he would pull through. He was conscious up to a short time before he died and he remarked that he was feeling much better than he had felt for some time.

The passing of Mr. Ham is mourned by a large circle of friends in Ishpeming, as he was a man who held the esteem and confidence of all who knew him. He was an honest, conscientious and upright citizen and one who befriended many people during his residence in the upper peninsula. He was a great favorite with the children of his neighborhood, as well as with older people, and dozens of "little boys" called him "Grandpa," will miss him.

The deceased was born in Tavistock, Devonshire, Eng., in 1825, and was eighty-six years of age May 7. On his birthday a number of relatives called to extend their greetings. He remarked while they were about him that it would be his last birthday. The members of the family thought that a rather strange remark, as Mr. Ham was in good health and had not been a day during the past winter. He was unusually strong for a man of his years and he looked fully fifteen years younger than he was.

Mr. Ham left his native home when he was ten years of age, settling in Canada, where he remained until 1849, when he came to the Lake Superior country, locating at Eagle River. Several times during the voyage from Detroit to Eagle River in an old scow, Mr. Ham felt certain that he would not reach his destination, as the weather was very rough, and the boat was finally wrecked on a beach in the copper country. No one was lost, but the crew and passengers had a hard time saving some cattle that were shipped up from Detroit.

Shortly after locating at Eagle River the deceased engaged in the timber contracting business. He continued in this line for several years and sold lumber to a number of the first mines opened in the copper region. He remained in that section, spending several years at Quinsey, until about forty years ago. Fifty-eight years ago he was married to Miss Margaret A. Pentecost, who died in Ishpeming in 1896.

Before locating in Ishpeming, over thirty years ago, Mr. Ham spent one year at Lansing and he also resided at Sault Ste. Marie for a few years. During the first eight or ten years of his residence here he was engaged in the retail meat business, at the stand known as the "Corner Market," which occupied the site on which the Young Men's Christian association's building now stands. He retired from that business twenty-three years ago.

The deceased is survived by one son, Henry Ham, who lives in Laurium, and three daughters, Mrs. W. S. Nelson of Gwinn, Mrs. F. M. Sackler of this city, and Mrs. Will Walthew of North Yakimo, Wash. All of the immediate relatives of the family, with some exception of Mrs. Walthew, also other relatives, were present when Mr. Ham passed away.

The funeral will be held this afternoon from the Presbyterian church, of which the deceased had been a member ever since his arrival in Ishpeming. For some years, while living in the copper country, Mr. Ham was a member of the Congregational church of Hancock. Short services will be conducted at the house at 2:15 o'clock, and the church services will be held fifteen minutes later. Rev. M. M. Allen will officiate. Special music will be rendered at the church by a quartet composed of Dr. E. G. Robbins, W. H. Norman, Mrs. R. A. Burkee and Miss Stone. Edward Ham, a grandnephew of the deceased, will preside at the organ. The pallbearers will be Henry Ham, son of the deceased, W. S. Nelson, son-in-law, R. G. Jackson and Will Schacht, grand-sons-in-law. Dr. T. A. Felch and B. W. Wright.

WIRELESS ON ALL STEAMSHIPS.

It is barely five years since the wireless telegraph passed out of the experimental stage and was universally recognized as a practical means of long-distance communication. By July 1, every ocean-going steamship leaving an American port that carries fifty persons, including passengers and crew, by law must be equipped with a wireless telegraph outfit capable of sending a message 100 miles.

Nothing more important has been done in many years to increase the safety of travel at sea than the general installation of wireless. Under the new system not only will every steamship be provided with a better means of self-protection but it will be a means of protection to other ships. The quickness with which relief arrived from distant quarters at the time of the collision that resulted in the sinking of the Republic demonstrated once for all how hereafter the ocean is to be dotted with life-saving stations.

Other uses of the wireless at sea are to be regarded as a convenience for passengers and owners that could be dispensed with without great loss. The compulsory adoption of it by all passenger-carrying steamships has now become almost as much of a safeguard against disaster as a proper equipment of lifeboats.—New York World.

DEATH OF FRANK JONES.

Wellknown Ishpeming Young Man Passed Away Yesterday Afternoon.

Frank Jones, youngest son of John Jones, died yesterday afternoon at 1:30 o'clock. Death did not come unexpectedly, as the deceased, who had been in poor health for two years, was confined to his bed for six weeks, and his condition for twenty-four hours before he passed away was precarious.

The deceased was thirty-three years of age, and he was born and reared in Ishpeming. He was one of the most popular young men in the city, and his passing is very generally mourned by his friends and acquaintances. For some time before his health failed him, the deceased was in the employ of his brother, George Jones, agent of the American Express company. He was for some time a member of the Ishpeming Fire Department, but gave up his membership at the time he was taken ill.

Besides his parents, the deceased is survived by his brother George, and three sisters, Mrs. Dangle Ryan of this city; Mrs. Harry Hesse of Duluth, and Mrs. Neil Nelson of Escanaba. Mrs. Hesse has been in the city the past several weeks. The funeral will be held tomorrow morning from St. John's church.

AFTER ANOTHER CATCHER.

The Ishpeming and Marquette league baseball teams will play an exhibition

The Miner's National Bank

ISHPEMING, MICHIGAN

Capital, \$100,000
Surplus, \$100,000

United States Depository

We solicit your business, large or small, and we pay interest on all savings accounts. We sell money orders payable in all parts of the world. Get our rates before you buy elsewhere.

DIRECTORS: D. T. MORGAN, F. BRAASTAD, A. B. MINER, W. H. JOHNSTON, A. MAITLAND, JAMES CLANCEY, H. O. YOUNG, M. M. DUNCAN, DR. T. A. FELCH.

OFFICERS: A. B. MINER, Cashier, F. BRAASTAD, Vice Pres., H. O. YOUNG, Pres., O. G. AAS, Ass't Cashier, GEO. HATHAWAY, 2nd Ass't Cashier.

game on the Marquette grounds next Sunday afternoon. This will be the last exhibition contest prior to the opening of the league series a week from Saturday, the 27th. Captain Hagel of the Ishpeming team, will leave tomorrow or Saturday for Chicago in search for a catcher for the team. Mr. Hagel knows a great many of the ball players in Chicago and he believes that he will be able to find a man for the position. Bill Laxstrom and Abo Nicholls will be the team's extra catchers. Manager

Simons corresponded with a first-class catcher, who had experience in the big leagues, but he decided not to come here.

JUNIOR RECEPTION AND HOP.

The members of the junior class of the Ishpeming high school are making extensive preparations for the reception and hop, to be tendered the seniors tomorrow night in Braastad's Hall. The hall will be appropriately decorated for

the occasion. Quite a number of guests will be present from Negaunee, Marquette and other places in the county. The reception will be from 8 until 8:30 o'clock and there will be dancing from the latter hour until 12. Trombly's orchestra will furnish the music. The admission will be \$1 per couple. All those who have received invitations are requested to present them at the door.

Alex Claven and wife, 132 Reidy street, are the parents of a son.

Convenient credit terms if desired.

GATELY-WIGGINS
ISHPEMING'S CALUMNEY HOUGHTON IRON MOUNTAIN
FOR MAIN BANKS 325 SOUTH 122 SHELBOURN ST. 121 STEVENSON

Ishpeming

MAKES HEAVY INVESTMENT.

John Gately Co. to Put Up Big Business Block in Minneapolis.

That the business of the John Gately company and the Gately-Wiggins company is growing, is evident from the way the concern is branching out. The former company recently opened a branch store in Tacoma, Wash., making ninety-eight in all now under its control, and \$100,000 was recently expended for a property in Minneapolis, where a branch has been maintained for a number of years.

All of the stores, with the exception of four in the upper peninsula, are under control of the John Gately company, the Gately-Wiggins company having supervision over the stores in Calumet, Houghton, Iron Mountain and Ishpeming. The Minneapolis Tribune said of the company's real estate deal in Minneapolis: "Martin Beck, through his agent, G. E. Raymond, of the Orpheum theater, turned over to John Gately of Chicago, through Agent Ell Torrence, the property at 35-37 Seventh street south, adjoining the Orpheum theater."

ISHPEMING IN BRIEF.

Mrs. Eugene Coffee of Calumet is visiting in the city.

M. F. Lynch has taken a position in the shipping department of the Cleveland-Cliffs Iron company.

Mrs. E. J. Coombe of Ishpeming is visiting her daughter, Mrs. Albert Uren, at the Kearsarge location in the copper country.

Fred Stoyke, W. H. Feasing and W. G. Lucas of Houghton, spent a few hours in Ishpeming yesterday morning, having stopped off here between trains on their way east.

Mrs. T. H. Nesbitt has gone to Trivium on a visit to relatives, and her daughter, Miss Leona, left yesterday for Green Bay and Milwaukee, where she will spend a few weeks visiting.

Mrs. Charles Cornish, who was called down from the copper country a few weeks ago on account of the critical illness of her father, John Verran, has returned to her home at the Kearsarge.

Miss Louise Moran, who has been employed in T. Hughes & Son's dry goods store for some time past, resigned to take the position left vacant by the resignation of Miss Ella Jacobs, in the N. E. Skud estate's store.

Alex Wood of California is here on an extended visit to his brother, Joseph Wood, of Euclid street. Mr. Wood resided on the Swaney range some years ago and he and other members of his family still have interests there.

The funeral of Miss Elizabeth Blatchford will be held this afternoon at 2:30 o'clock from Grace Episcopal church. The deceased made her home with her niece, Mrs. George Drew, 412 East Division street. She lived in Republic for some time before locating in Ishpeming.

STATUELESS PRESIDENTS.

The misfortunes to Franklin Pierce's memory is not that he is to be without a statue in his native state, but that the honor should have been proposed and refused. The senate of New Hampshire has definitely killed for the present at least the house bill providing for a statue for the only president New Hampshire ever had.

Most of our presidents are statueless. We do not recall any such honors to Madison or Monroe or Tyler in Virginia, although the first was the father of the constitution and the second the sponsor for the controlling doctrine in our international policy. Neither of the Adamses has received a tribute in bronze from Massachusetts. Has the state of New York erected a statue of Van Buren, or Tennessee of Polk or Johnson, or Pennsylvania of Buchanan, or Ohio of Hayes? We believe not; yet every school boy has to know they were presidents, and the name of Franklin Pierce will live on the lips of all the coming generations of youths while the republic lasts.—Boston Globe.

YESTERDAY'S GAMES.

American League.
Chicago, 7; Philadelphia, 5.
Chicago, May 17.—Chicago won four straight games from Philadelphia. Oldling's home run was the feature of the game today, the ball going over the left field fence, registering the longest hit on the grounds.
Score: R. H. E.
Chicago . . . 31000201—7 12 1
Philadelphia . . . 11000201—5 10 2
Batteries: Lange, Olmstead and Sullivan; Russell, Morgan and Livingston.
Two-base hits—Bodie, Lange and McIntyre. Chicago, Livingstone, Philadelphia. Three-base hits—Lange, Chicago; Oldring, Philadelphia. Home run—Oldring, Philadelphia.

St. Louis, 9; Washington, 2.
St. Louis, May 17.—The home team had little trouble in winning from Washington today again.
Score: R. H. E.
St. Louis . . . 4200030—9 6 1
Washington . . . 00000002—2 5 3
Batteries: Peity and Stephens; Walker, Ely, Sherry and Ainsmith. Home run—Austin, St. Louis.

National League.
Philadelphia, 4; Cincinnati, 3.
Philadelphia, May 17.—Luders' long hit enabled Philadelphia to defeat Cincinnati today, in eleven innings. Luders drove in two runs with a two-bagger and he won the game in the eleventh with a home run drive over the right field fence.
Score: R. H. E.
Philadelphia . . . 1000020001—4 7 2
Cincinnati . . . 1002000000—3 8 2
Batteries: Alexander and Dooin; Fromme and McLean. Two-base hits—Mitchell, Cincinnati; Luders, Philadelphia. Home run—Luders, Philadelphia.

Brooklyn, 1; Chicago, 0.
Brooklyn, May 17.—In a pitchers' battle today with Richie, Bell shut out the Chicago. The winning run was scored by Daubert, on a scratch hit, Wheat's sacrifice and an out and another scratch hit by Burch. Only one of the visitors reached second.
Score: R. H. E.
Brooklyn . . . 00000010—1 4 0
Chicago . . . 00000000—0 3 2
Batteries: Bell and Bergen; Richie and Kling.

Pittsburg, 7; Boston, 6.
Boston, May 17.—Herzog's wild throw in the twelfth let in Pittsburg's winning run from Boston today. Both teams furnished sensational hitting.
Score: R. H. E.
Pittsburg . . . 001003000200—6 10 3
Boston . . . 1000210201—7 13 1
Batteries: Curtis and Graham and Haridon; Ferry, Liefeld, Carnatt and

Gilson. Two-base hits—Sweeney and J. Clarke, Boston; Wilson (2), Wagner, Liefeld and Leach, Pittsburg. Three-base hit—Goode, Boston. Home runs—Wagner, Pittsburg; Herzog and Ingerton, Boston.

St. Louis, 3; New York, 1.
New York, May 17.—Good pitching by Sallee enabled the visitors to take today's game from New York. Costly errors by Crandall and Bridwell helped the visitors to make two runs in the fifth.

Score: R. H. E.
New York . . . 001000000—1 6 2
St. Louis . . . 000021000—3 9 0
Batteries: Crandall and Myers; Sallee and Bliss and Bresnahan. Three-base hit—Ellis, St. Louis.

American Association.
Milwaukee, 2; St. Paul, 1.
Toledo, 3; Columbus, 4.
Indianapolis, 0; Louisville, 1.
Michigan Defeats Oberlin.
Ann Arbor—Michigan, 4; Oberlin, 1.
MY DOG, A LOWLY TEACHER.

Some years ago one of our American bishops wrote a sonnet about his dog, which must have been a noble animal. I have forgotten how the sonnet ran; all I recall is the first line: "I will believe he thinks that I am God."

When I read it and some of the good bishop's personal traits flashed rather vividly to mind, my first mental response was that it was no wonder the dog thought so, if he had seen the bishop, as I had, in the dignity of full canonicals. Then I chided myself for being so imprudently profane, and of course, that was not the reason at all, writes John Franklin Genung in Harper's Magazine. The church vestments had nothing to do with it. I have seen dogs look up with equal devotion to men in overalls. We read of dogs that licked the soles of beggars; and we know what poor apologies for masters dogs will be faithful to, even though their worship goes wholly wasted. A very significant thing when you think of it; it became one of my first lessons in theology. For it seems to reveal that such an emotion exists in the core of creation, even in the strata below us. There are creatures in actual existence in whom has been put the instinct to look upward from their station to being higher in the scale, to choose them for masters and friends, to stand by them and reverence them, not for what they can gain by it; for, too often, abating no jot of fidelity, they get hit kicks and hard words—just purely as a spontaneous, intrinsic flow of dog nature. I like to contemplate a creature that is rich enough to include such a thing as this; to contain disinterested affection as a broader elemental fact; it gives me a better opinion of the universe. Some things, scholars tell us, are evolved in the animal than in man; the eye in the eagle, the swift foot in the stag. I should be sorry to think that, because the Lord of creation gets things so tangled up with reason and selfishness, the dog should have got the start of us in this virtue. I am glad he is not self-conscious; that would spoil it all.

Many times a day Caleb comes to my armchair, as I sit studying, with no apparent purpose except to say, "How do you do?" and, never without waiting for the word of permission, he jumps up on my knee, remaining a minute and then goes about his affairs. And many a time I have been half started by a wondering yet wholly loving expression in the great brown eyes so inquiringly searching mine. Only asking me to drop the prosy book or go walking with him? No; that expression is quite different. Those eyes look as if they were searching for something that we two might hold in common and so have a little rest and refreshment of each other. Is it something higher than can enter his dog consciousness? I am often moved to respond: "It's you and I, Caleb. We know each other in some things, don't we?" And there, and, oddly enough, it sets me thinking of what an apostle once said about a whole creation groaning in pain and travail together, waiting for some adoption which should redeem the body. I am sometimes tempted to ask him: "Do you not have a sense of that vast continuous line of upward looking, onward-looking things? Are you, dimly conscious of waiting for something which is destined to come somehow by the way of the higher order? Does the Firstborn of every creature make his relationship felt in some far-off way even as you?" He never answers me except by that wistful look, which vanishes as soon as I begin to theologize; but the look has on me the strange effect of worship, so that I am almost afraid to recall the bishop's sonnet. Who am I, to be scrutinized so? What is man's office in the sun of things, when such great liquid eyes are gazing up at him below?

Boston "Coppers."
Of the market at Boston, Paine, Webber & Co. yesterday said: The bullish enthusiasm grew up today. As fast as the traders took profits new buying orders came in and absorbed all offerings. Almost every stock in the copper list shared in the advance, with Greene Cananea and North Butte the most active. The buying of North Butte was widespread and consistent. Hancock was scarce and advanced easily to 25 1/2. We look for a continuation of the present movement and considerably higher prices. Closing quotations follow:

Chamberlain's Cough Remedy

Cures Croup and Whooping Cough.

To the Careful Piano Purchaser There is a Definite Meaning in the Immense number of Sales and the Fast Growing Popularity of the

Grinnell Bros.' OWN MAKE Piano

And this meaning is expressed in the word SATISFACTION—for only an instrument which pleases fully and permanently, and does so without exception, could be so firmly established among the World's Finest Makes. So great is the demand for the incomparable Grinnell Bros. (own make) Piano that our output of the past year is practically double that of any previous year.

This instrument is built right in every detail. Herein is the secret of that quality which is a characteristic of every instrument of our own manufacture. At no Piano Factory in the country will be found finer or more modern equipment—better workmen—or supervision more expert and exacting—while a higher grade of materials than enter into the construction of this Piano cannot be procured. That the Grinnell Bros. (own make) Piano is built right in every part is quickly apparent to all who investigate.

This Piano is sold only through our own stores and at Factory-to-Home prices. It is furnished in both Upright and Grand form; and in a variety of beautiful designs. A small amount down, and convenient monthly or quarterly payments, makes ownership of the magnificent Grinnell Bros. (own make) Piano easy for every family. Let us mail you Catalogue and other interesting literature if you can't call.

Markets

WALL STREET STOCKS.

Paine, Webber & Co. yesterday wired from New York as follows: Despite a rather large volume of profit-taking, the stock market displayed considerable buoyancy during most of the session. The dealings in Steel were exceptionally heavy, and were thought to be induced somewhat by cheerful tone of the trade journals, notably the Iron Trade Review, which was quoted as stating that it was confidently believed that, following the improvement in sentiment, orders for steel products would be placed more freely than has been the case for a long while. The strength of the proposed new issue of Panama bonds on the curb, where the same were quoted 2 1/2 points above par, did much towards stimulating investment inquiry and it is generally felt that the successful placing of the issue will do much towards restoring confidence among investment buyers. We are inclined to believe that the market is gradually reaching a point from which a reaction of reasonable extent may come, but we think the general trend is upward and favor purchases on the setbacks. Closing prices were as follows:

Anaconda	66	N. Y. C.	108
Amalg.	2 1/2	Pen.	122 1/2
Am.	3 1/2	Rock.	31
A. Com.	17 1/2	St. Paul	124 1/2
Am. Exp.	2 1/2	St. P.	120 1/2
B. & C.	5 1/2	St. Paul	124 1/2
B. & O.	13 1/2	So. Pac.	118 1/2
C. & A.	5 1/2	Union Pac.	187 1/2
M. Pac.	2 1/2	Wabash	37 1/2

The old and reliable general contractors. Established here over 60 years. The largest in this section of the country. J. WAHLMAN & SON, corner Second and Bank Sts. Bell phone 140. County phone 12.

FURNITURE AND CARPETS.
We can fit you out when it comes to home furnishings. We handle everything in the line, and a full line of undertaking supplies. WILLIAM LEININGER, 212-14 S. Main St. Phone 14.

Ruez's Market Letter.
George F. Ruez, broker, of Ishpeming, yesterday said: Under the leadership of Amalgamated and Steel the New York market made further headway today, advances ranging from one to three points with the closing quotations within but a fraction of the high for the day. Amalgamated was the feature, advancing from 64 1/2 to 66 1/2. The buying of Amalgamated started the Boston coppers and they fairly boiled all day. The buying covered the entire list, with Greene Cananea, North Butte, Hancock, Butte, Calumet, East Butte, Calumet & Arizona and Lake the leaders. The buying of Greene Cananea was very heavy and carried the price from 65 1/2 to 7 1/4. North Butte advanced from 25 1/2 to 31 1/2, the coppers closed at the high for the day. The buying orders are increasing and as offerings of stocks are very light high prices are sure to prevail. Do not, however, climb for stocks. Buy them on small recessions which we are sure to get after sharp advances. Live Oak, Oneco and South Lake were the only carb stocks to show any activity or gain. Live Oak sold from 18 1/2 to 20, and will sell much higher.

Queer Trick of a Badger.
The pelt of an adult badger is extremely thick and difficult to penetrate, writes a trapper in Fur News, and so loosely does the skin cover the body that the animal is able to turn almost around in its hide.
Should a dog acquire a hold on the throat the badger turns himself so that the dog's grip is on the back of the badger's neck, without having loosened his first hold. Then the badger secures a viselike grip upon some convenient portion of his enemy, and while his long tusks penetrate to the limit he digs and scratches with his front feet, that are furnished with claws almost as formidable and deadly as might be expected from an eater of the dark continent.
He who has removed the pelt of a badger and is at all observing does not wonder at this animal being sharp bit ten and that he is able to hang on to the bulldog tenacity when the formation and adjustment of the jaws are noted. Neither is it so much of a mystery how he manages to bore through the soil so rapidly that half a dozen men with shovels cannot overtake him, for he is a mass of cords and muscles, particularly in the neck, chest and shoulders, very similar in physical construction to the ground mole.
The badger toes inward sharply when

traveling and he is always on the walk, waiting about here or there very much like the movements of a skunk, while if he is in winter he makes a business of hunting buried dormant woodchucks.
He is a fur bearer of rather coarse quality and there is a great range of value in the pelts taken, all the way from ten cents to \$2 or more, depending upon the length of the coat. A badger is chiefly valuable when it has a long coat, so that the guard hairs can be plucked and used to make shaving brushes.

DOG CUSTOMERS.
At a corner a street fakir has a dog on or so little, soft, woolly toy lamb spread upon the sidewalk. He sees a woman approaching with a terrier on a leash, and take a few steps backward to give plenty of room to the dog. The woman and the dog come, and the terrier makes a fierce plunge for a little lamb. It is hard and fast between his iron jaws, and he will not let go. The woman pays and the terrier proudly trots along with her, the woolly toy in the stubborn jaws. Soon another woman with a dog, and the same performance. So it goes on, says the New York Press. The slick street fakir counting every day long.

Gwinn

WILL HAVE RACKED HOUSE.

When the curtain raises on the first part of the Baseball Minstrels Saturday evening the Club house will be filled to the doors. The members of the baseball team are selling tickets and prospects are that the largest crowd that has ever assembled in the club house will greet the minstrels.

The performers appearing in the opening will be specially costumed and special scenery will be used. The costumes of the soloists and chorus will be unique and the end men will appear in comedy make up. High class solos and end men songs will be sung and real new and up-to-date jokes will be sprung. Some lively dancing will also be introduced in the first part.

The club will be a complete vaudeville performance and will have as its features: Bud Goodman, Jack Blaney, Tom Sayle, Ted Butler and an Italian band.

The following is the program for the performance: Interlocutor—J. R. Pratt, End Men—Ted Butler, A. Hameral, A. Kroghdahl, Walter Fern.

Opening Chorus Entertainers—J. R. Pratt, End Men—Ted Butler, A. Hameral, A. Kroghdahl, Walter Fern.

High School Team Lost. The Gwinn high school baseball team met defeat Saturday afternoon on the school grounds at the hands of Ishpeming.

Married Saturday Evening. Miss Amanda Knaggs and Emanuel Askinen were married Saturday evening at the home of the groom, on Maple street.

Card of Thanks. We feel very grateful to our friends on the Swanzy range for the sympathy expressed during our bereavement, also for floral offerings.

Gwinn Briefs. Frank Sardini called on Ishpeming friends Tuesday. Gilbert Marotte spent Saturday with friends in Ishpeming.

Saved Child from Death. "After our child had suffered from severe bronchial trouble for a year," writes G. T. Richardson, of Richardson's Mills, Ala., "we feared it had consumption.

Upper Peninsula

Ironwood's Saloons

The applications approved at the last meeting of the council have brought the number of saloons in Ironwood up to forty-eight, three less than in 1909, the year that the new liquor license law went into effect.

Tannery Doubles Its Output. The Northwestern Tanning company, which for some time has been treating only 400 hides or 600 hides per day at its plant at Manistique, is now turning out 600 hides or 1,200 sides every twenty-four hours.

Goat's Death Reveals Key. Over a year ago Joe Holkup of Crystal Falls sold a goat to Antonio Bauer, a neighbor. Recently Mr. Bauer killed the animal.

Some Out Field. The Sagola Lumber company of Sagola, Dickinson county, will have the largest field of oaks in the upper peninsula.

Lightning Invades Schoolhouse. The teachers and pupils of the Palatka school in Iron county had a real experience the other day which they are not likely to forget for some time.

Captures Six Baby Foxes. James Ball of Pickford, Chippewa county, made a lucky find the other day when he ran across a nest of crossed gray and black fox.

Forest Fire Havoc. Fire that started on section 35, near the South Shore railway, in Ironwood township, burned over an area about three-quarters of a mile square in that part of Gogebie county, destroying the Section 35 school and causing much damage to settlers in the vicinity.

Escanaba Wants Roosevelt. As Hancock has done, Escanaba has invited Colonel Theodore Roosevelt to visit it this summer.

Gets Historic Pen. The pen which was used by H. F. Balmor, speaker of the house of the Michigan legislature, to sign the two-cent rate

Manistique's Senior Class

The class which will graduate from the Manistique high school this spring is the largest in the history of the school.

School Bonds for the People. It has been decided at Iron Mountain to offer at public subscription the \$100,000 of bonds, the issue of which recently was authorized for the purpose of procuring funds for the construction of modern high school buildings.

Lumber Company to Quit. According to information claimed to be from an authoritative source, the Ford River Lumber company will discontinue the operation of its big plant at Ford River, Delta county, at the conclusion of this season's work.

Soo Angler's Unusual Catch. Lieutenant E. H. Taal of the Soo, while fishing in the St. Mary's river the other day, caught a two and one-half pound German brown trout.

Aid for Village Treasury. The businessmen and other property owners of Stambaugh have again shown their faith in the future prosperity of the village.

Lake Superior's Recession. Perhaps at no place along the shore of Lake Superior can the low stage of the water be noticed more than at Eagle Harbor, says the Keweenaw Miner.

Fishermen Catch Big Trout. A brook trout caught by F. E. Bolger of Escanaba in the Escanaba river at Croas last week measured sixteen and three-quarter inches in length.

Uncle Sam Prosecutes Dealer. Hymen Kohn who conducts a second hand store at the Soo, was arrested recently on the charge of purchasing and having in his possession government clothing procured from soldiers at Fort Grady.

Manistique's Senior Class. The class which will graduate from the Manistique high school this spring is the largest in the history of the school.

are not so amusing concerning his craft and cruelty, the tyranny that he exercises over his peons, who number 30,000 and the penalties he imposes upon those who interfere with his will.

Peons Treated Like Slaves.

One of the reasons given for the revolution in Chihuahua is his treatment of his peons. He has kept them on the scantiest wages, he has exacted labor to the limit of endurance, has compelled them to pay back their wages in made at his stores, he has treated them as slaves, and while he has been growing richer and richer every day, they have been growing poorer. Now that the revolution has given them an opportunity for revenge, they are joining the bands of guerrillas and are plundering his villages and ranch houses, burning his buildings, killing his cattle and doing him as much damage as possible.

Francisco Madero, who provoked the revolution, has encouraged these rates, during his campaign for the presidency last fall, he told the peons of the Terrazas estate that the land belonged to them, and that they should arm themselves and compel their employer to give each of them a farm and pay of 30 and 40 cents, which is the maximum paid on the estate. He told them that, while they were being taxed to support the government, Don Luis was paying no taxes, and that if he, Don Francisco, was elected president, he would have things changed; he would increase wages to \$1 a day and distribute the cattle and sheep among them.

While the vaqueros and peons upon the Terrazas estate were generally loyal to their master, and continued to be so as long as they were kept in ignorance, these speeches of Madero naturally caused universal unrest and inquiry. The Mexican peon is illiterate, but has a fair degree of intelligence, and the possibility of having a farm of his own and a share of the cattle and sheep that now belong to his master very naturally appealed to him. These aspirations are said to have been encouraged by the priests, and gradually the loyalty of the peons has been undermined, and they are now almost universally in sympathy with the insurgents, who are being recruited, supported and aided by the vaqueros and other employes on the Terrazas estate. There are no more what negotiations may be had on at the City of Mexico, the rebellion in Chihuahua can never be subdued. The old feudal relations between Don Luis and his employes, who are said to number more than 100,000, will never be resumed, and the first estate in the republic to be broken up and divided among the peons will be his. There will never be peace in Chihuahua until this done.

DR. OWEN'S HUNT TIME IS WASTED, IT SAYS.

Ohio Paper Cannot Find Any Interest in a Worn-Out Controversy.

The ordinary American citizen who is busily engaged in a strenuous effort to keep a couple of laps ahead of the sheriff is not going to become unduly excited over this recrudescence of the Bacon-Shakespeare controversy, which has been brought up again by the Ohio Paper. We are glad to see that the Ohio Paper is not going to become unduly excited over this recrudescence of the Bacon-Shakespeare controversy, which has been brought up again by the Ohio Paper. We are glad to see that the Ohio Paper is not going to become unduly excited over this recrudescence of the Bacon-Shakespeare controversy, which has been brought up again by the Ohio Paper.

FOLEY GOLD MINE.

Property in Rainy Lake Region Soon to Be Reopened.

According to reports received from the Rainy Lake region, the outlook for gold mining is better now than for any time in the past ten years, and there is promise that the district will be livelier this summer than for many years past.

WEDDING LARGELY ATTENDED.

Aaron Stephens and Miss Sarah Schwartzberg Are Married.

In the presence of a large assemblage of relatives and friends, Miss Sarah Schwartzberg was united in marriage to Aaron Stephens at a ceremony performed in the S. H. & E. F. hall at 6:30 o'clock Tuesday evening. Both bride and groom are well-known Negaunee young people, the former residing at 520 Jackson street. The bridesmaid was Miss Clara Beckman of Marquette, the best man, Wm. Schwartzberg of this city. The bride was dressed in white messaline and wore a veil of white net decorated with yellow rose-buds. She carried yellow roses. The bridesmaid was gowned in a costume of white ambrosia. She carried a bouquet of white and pink carnations. Mendelssohn's wedding march and a grand march were played on the piano by Miss Violetta Cox. The decorations of the main hall were in red and white, those of the dining room, in white and green. A wedding supper was served shortly after the nuptial ceremony, and it was followed from 8:30 until 12:30 o'clock by dancing to the music of an orchestra. The newly wedded couple were the recipients of a large number of gifts. Mr. and Mrs. Stephens will live in this city, occupying the residence at 326 Clark street.

WILL SOON FINISH WORK.

Removal of Bodies Will Be Removed from Cemetery Within Two Weeks.

C. O. Stensrud expects to take the last of the bodies from the old cemetery of the first of next month. Since resuming work, over a month ago, he has employed a large crew and the work has proceeded without any serious interruptions.

HAD A PLEASANT TIME.

The members of the Negaunee tent of the Lady Macabees of the World, who attended the meeting Tuesday evening, had an enjoyable time.

LOCAL LACONICS.

Louis Saladin has gone to Coleraine, Minn.

John P. Jones was up from Marquette yesterday to look after the removal of the bodies of deceased relatives from the old to the new cemetery.

Marshall Jackson and the other police officers of this city, who are in their new uniforms within a week or ten days. H. J. Peterson has the contract to furnish them.

Maki & Johnson, who conducted a pop manufacturing business in the copper country, have moved to Negaunee, their outfit arriving here yesterday. They have rented a place on Bluff street and will be ready to solicit trade within a few days. This will give Negaunee two concerns of that character.

It has been decided to hold the commencement exercises of the Negaunee high school in the auditorium on the evening of Thursday, June 15. The eighth grade exercises will be held Tuesday evening, the 13th, and the class play will be given on the evening of Friday, the 9th. The schools will close on the 15th, a week later than last year, also a week later than most of the other schools in the upper peninsula.

Mayor John W. Elliott, who fractured his left leg while he held Tuesday evening, the 13th, and the class play will be given on the evening of Friday, the 9th. The schools will close on the 15th, a week later than last year, also a week later than most of the other schools in the upper peninsula.

Captain R. F. Mitchell, of Eveleth, Minn., visited Negaunee, and received a friendly Tuesday and yesterday. Captain Mitchell holds a responsible position with the Oliver Iron Mining company and he has been located at Eveleth for a number of years. He is a brother of Percival Mitchell, vice president of the Oliver Iron Mining company. He spent many years in Negaunee before moving to the Mesaba district. While here he will look after the removal of the bodies of some relatives from the old to the new cemetery. He will leave tonight for his home.

Eugene Francis, a well-known mining engineer and chemist, of Ishpeming, yesterday took a position with the Volunteer Ore company at the Volunteer mine. He will have charge of the engineering work and will also look after the chemical department. Mr. Francis was with the Oliver Iron Mining company for

Negaunee Department

ORE MOVEMENT IS INCREASING STEADILY

Several Properties on Marquette Range Are Now Loading With Shovels.

The ore movement from the mines on the Marquette range is increasing gradually, but up to this time it has been comparatively small. Several steam shovels are in operation and most of the mines are now shipping from the stockpiles. The Duluth, South Shore & Atlantic Railway company is handling the greater part of the ore from the properties in Negaunee. It has three yard crews at work in this city, one in Ishpeming and one at the American mine. The Chicago & Northwestern and Lake Superior & Ishpeming lines also have several crews employed about the mines.

The volume of ore moving from the mines is increasing slowly and we look for a constant increase from this time on," said a railroad man yesterday. "While there has been a falling off in the tonnage moved this year as compared with the movement of the mines is increasing slowly and we look for a constant increase from this time on," said a railroad man yesterday. "While there has been a falling off in the tonnage moved this year as compared with the movement of the mines is increasing slowly and we look for a constant increase from this time on," said a railroad man yesterday.

The Volunteer Ore company, which is opening a new property at Palmer, has started to ship from the pockets. The management has made arrangements for the stockpile within a week or two. It is said that the company will have no trouble disposing of Volunteer ore, as it is of very good grade.

At the Oliver Iron Mining company's Regent mines charge, a shovel is also being operated. The ore movement from the Breitung mines is heavier this spring than from any of the other Negaunee properties. The Mary Charlotte was the first mine to start shipping ore from this property, which will soon be increased. Shipments from the Hartford and Lillie mines were suspended following the Hartford mine fire and it is not expected that any ore to speak of will be shipped from either of these properties until hoisting is resumed at the Hartford.

The Breitung interests have made their first shipment of some twenty cars from the Milwaukee-Davis property, where operations were resumed last year. The first shipment is a sample lot.

The Duluth, South Shore & Atlantic Railway company is handling the shipments from the American mine, and the fairly large tonnage being forwarded. Practically all of the ore now being hoisted is going out, and a steam shovel is in operation at the stockpiles.

It is reported from the Mesaba range that the shipments of iron ore have been resumed since the opening of navigation as they were during the corresponding period in 1910, but the movement is increasing daily. It is said that the Great Northern railroad is now handling more ore than it did last season and that the tonnage shipped from the Mesaba district show a falling off in the tonnage moved, as compared with a corresponding period last year. The Great Northern has a contract with the United States Steel corporation for the carrying of an immense tonnage under the Lull leases.

PROPERTY IN RAINY LAKE REGION SOON TO BE REOPENED.

According to reports received from the Rainy Lake region, the outlook for gold mining is better now than for any time in the past ten years, and there is promise that the district will be livelier this summer than for many years past.

The Foley gold mine, which was discovered and opened by the late Joseph Foley, brother of Captain James P. Foley of this city, is soon to be reopened. The owners had planned to resume work last season, but owing to the lack of fuel the machinery could not be started. The company has secured an ample supply of wood and it is now expected that the property will be running with a full force before many weeks. Captain Hosking, who is in charge of the property, is now repairing and enlarging the buildings. Repair work at the mine was started last fall, but all of the lumber for a freeze up. A new boiler house is to be erected and new equipment installed at the South shaft, and it is possible that a new hoist will also be provided for the shaft. The Foley property has a full force before many weeks. Captain Hosking, who is in charge of the property, is now repairing and enlarging the buildings. SAYS ROBERTO DID NOT DO IT

Attorney Button, for Defendant in Murder Trial, Springs Surprise When He Declares He Expects to Show That Paralara Was Not Killed by His Client.

Evidence of Prosecution Submitted Yesterday and Two Witnesses for Defense Were Called—Roberto Admits to Witnesses Having "Pushed" Paralara.

That Peter Roberto did not inflict the blow that resulted in the death of Raphael Paralara at Princeton last February will be the contention of C. F. Button, attorney for Roberto, who is on trial in circuit court for murder, according to the opening statement made by Mr. Button to the jury late yesterday afternoon. The trial of Roberto was taken up at the opening of court yesterday morning and continued through-out the day, the prosecution having rested its case and two witnesses for the defendant having been examined when court adjourned last evening.

Obtaining a jury that was satisfactory to both sides proved a rather easy matter and the first witness was called about 10 o'clock. The evidence brought out by the prosecution was practically the same as was brought out in the hearing before a justice some months ago and, in fact, the witnesses told about the same story of the alleged murder as was related in The Mining Journal the day after Paralara's body was found lying in the road on the Princeton location, with the skull crushed in, Paralara dying a few hours later at the Gwin hospital.

The theory of the prosecution concerning Paralara's death on which The People are trying to have Roberto convicted of murder is substantially as follows: The night that the alleged crime was committed Paralara and Roberto were at the house of John Paris, on the Princeton location. Paralara boarded there and Roberto came to make a call about 7 o'clock. There is some evidence to show that the two men were suitors for the hand of Mary Paris, a fifteen year old girl, who is an important witness in the case.

Two Men Quarreled.

At any rate, trouble arose between the two men before they had been together long. Roberto appears to have been showing an electric lamp to Mary when Paralara interposed, saying, "You had better not let a policeman see you with that or you will be sent to jail." Roberto retorted, "That's nobody's business but my own." Paralara rejoined with an angry retort, and Roberto to go outside the house with him.

A few minutes later it appears that Roberto went out of doors and was followed by Paralara, who had a beer bottle in his hand. From two to five minutes later, Paralara returned to the house but only stayed a few minutes when he again went out of doors and never returned. All the witnesses agree that Paralara left about 9 o'clock.

The next morning Paralara was found unconscious in the road a few hundred feet from the Paris house, with an ugly wound in the side of his head and in a dying condition. Shortly after the body was found, Roberto was arrested by Deputy Sheriff Maloney as he (Roberto) was bringing a load of wood to town from his father's farm.

That same day in the presence of G. R. Jackson and Deputy Sheriff Maloney, Roberto told that he had had trouble with Paralara at the Paris house the night before and that he had started for home about 9 o'clock in the evening. Scarcely had he left the house, he said, when some one called, "Look out, he's coming," and a moment later he heard some one running across the field with the evident purpose of intercepting him on his way home. Soon after he met Paralara in the road, who held a heavy club in his hands, upraised over his shoulder as if to strike. At that, Roberto stated that he grabbed the club, which was in Paralara's hands, and "pushed him with it" on the side of the head. Roberto stated that as soon as the man was out of his way, he continued on his way home, without turning around to see whether or not Paralara had fallen. As a reason for not looking around, Roberto stated that Paralara was a bigger man than he was, though later he told Sheriff Lehman that he was not afraid of Paralara. Roberto has told the sheriff on different occasions that he (Roberto) is not "the right man."

Defense Springs a Surprise.

When the prosecution rested its case yesterday afternoon, Attorney Button moved that the case be dismissed, alleging that by putting the worst possible construction on The People's testimony, Roberto had only acted in self defense and that if he had killed Paralara he had no intention to do so—that it was purely a misadventure. Judge Flannigan overruled the motion and the jury was recalled.

In stating his side of the case to the jury, Mr. Button sprang a surprise. He stated that he proposed to show that the club incident, which, the prosecution claims, resulted in the death of Paralara, occurred the first time that Paralara returned to house afterwards, apparently unharmed. He declared the defense expected to show that Roberto went straight home when he left the house and that Paralara did not receive the fatal blow on the head until about 11 o'clock that night, when Roberto was at home and in bed. He declared that it was unreasonable to think that Roberto or anyone else could inflict the terrible wound in Paralara's head by "pushing" him with a club, in the manner indicated by the witnesses for the prosecution.

Two witnesses were called by the defense yesterday, both of them near neighbors of the Paris family. The first testified that he had been visiting at a neighbor's house, and that he had started for home, passing the Paris house, about 9:15. Just before reaching his own home, he stated that he

saw some one running from the direction of the Paris house across the field toward him. He carried a club about four feet long and stopped or looked behind him occasionally. The witness stated that he could not identify the man, but that he was about his own or Paralara's size and build. The man finally disappeared over the hill beyond the witness' home. On cross examination, the witness stated that the man was running in the direction of Roberto's house, and the prosecution also showed that the man's appearance was not materially different from the general appearance of Roberto.

Woman Heard Jangling.

The last witness called by Mr. Button was a woman, who lives three doors from the Paris home, who said that about 11 o'clock that night she heard Italians talking loudly in the swamp near her house, the sounds apparently coming from about the location where Paralara's body was found the next morning. On cross examination, the witness stated that there were many paths about her house and that almost every night she heard loud talking and jangling in the neighborhood. Court then adjourned until this morning.

Roberto is a well dressed, neat appearing young Italian, perhaps nineteen or twenty years of age, and does not have a criminal face. He listened attentively to the trial proceedings yesterday and occasionally spoke to his counsel, but did not appear at all nervous or excited at any stage of the proceedings, on the result of which his future liberty depends.

ISHPEMING HERE SUNDAY.

Fans Will Have Opportunity to See Fast Exhibition Game.

Marquette baseball fans who are hungry for a game will at least have an opportunity to whet their appetites next Sunday, when an exhibition game will be played between the Marquette team and the Ishpeming nine. This will be the first public game that Marquette has played this season and will doubtless draw a large crowd. Ishpeming and Negaunee played last Sunday, Negaunee winning the game, but to date Marquette has not played a game this year. As several of the local players have never been seen in action by the fans, there will be much interest in seeing what they are capable of delivering.

Plans were made yesterday afternoon to play the Marquette prison team, but on account of the threatening weather, the game was called off. The weather is favorable, the game will be played this afternoon. The prison team is reported to be stronger than ever this season and the league players will probably have to work hard in order to get away with the big end of the score.

Two more players arrived in the city yesterday, both of whom have been with the Boyne City team this season. One of the men is highly recommended as an outfielder by Manager Parlow, but the other is an unknown quantity. Both are likely to be given a try out at the prison today.

PROCLAMATION ISSUED.

Governor Osborn Urges General Observance of Memorial Day.

In accordance with the annual custom Governor Osborn has issued the following proclamation in which he urges the observance of Memorial Day in all cities of the state. The proclamation follows: "The custom of observing a day once a year for the purpose of especially paying tributes of memory to those who so bravely gave their lives that the nation might live and be a purer and better home for the oppressed of all lands, is one of the most commendable of our national life. Greater love hath no man than this—that a man lay down his life for his friends."

"The legions that lie buried in Mother Earth, very many of them in unmarked graves, will never be forgotten. Their sacrifice will be forever an inspiration to higher citizenship upon the part of those who live today and tomorrow, in order that we may so guide the state that it will be worthy of the hallowed dead who died for it.

"Then let us gather throughout all Michigan and strew flowers on land and water in honor of the heroes of the army and navy who are gone, but not forgotten. And let us consecrate ourselves anew to the service of God and our country, so that the march of the living may be always upward to better things, higher motives, and truer ideals. A grateful people makes a gracious land."

"Therefore, I, Chase S. Osborn, governor of the commonwealth of Michigan, do hereby issue this my proclamation, and earnestly urge the observance of Tuesday, May 30, 1911, as Decoration and Memorial Day."

CLEAN YOUR CHIMNEYS.

I have arranged with Lafrenre & Rangette, of Ishpeming, to spend some time cleaning chimneys. They are a reliable firm, and charge fifty cents for cleaning a small chimney and seventy-five cents for a large one. Property owners whose chimneys are in bad condition should take this opportunity of having them cleaned. Orders telephoned to me will receive attention.

CARL SIEGEL, Fire Warden.
Messrs. Lafrenre and Rangette are now in the city doing the work. 5-18-11

NOTICE TO PROPERTY OWNERS.

Property owners who desire to have the city construct their concrete walks during the present season, should file their petitions for such work at the office of the Park, Cemetery and Street Commission, where blanks are furnished for this purpose. It is important that all such petitions be filed at an early date, in order to make it possible for the commission to properly arrange the sidewalk work for the season.

Price on all standard sidewalks will be 10 cents per square foot and for lawn walks a price of 15 cents per square foot.

Dated Marquette, Mich. May 17th, 1911.
THE PARK, CEMETERY AND STREET COMMISSION.
J. F. Anderson, Secretary.

WHY DO WE LEAD?

Because we have the neatest and most up-to-date Barber shop in the city. Fixtures new and mechanics the best. Try us and be convinced.

JOHNSON & PERRIN.

PRINCIPAL PROVISIONS OF NEW GAME LAWS

Synopsis of Michigan Regulations, as Revised by the Last Legislature.

A synopsis of the principal provisions of the revised Michigan game laws, some of which are important, has been made. The deer season opens Oct. 15 and closes Nov. 30. The partridge season runs from Oct. 15 to Nov. 30. Six partridge only may be taken in one day, and but 30 in one calendar year. The spring duck shooting season is from March 2 to April 10. The fish laws are materially unchanged. The synopsis follows:

Game Animals.

Deer—Open season from October 15 to November 30, inclusive. Non-resident hunter's license, \$150; resident hunter's license, \$25. Each license expires 25 days after date of issue. Unlawful for any person to kill more than two. Unlawful to kill in red coat, or fawn or spotted coat. Unlawful to pursue, kill or capture any deer while it is in the water. Unlawful to use dogs in hunting. Unlawful to use artificial lights in hunting. Unlawful to kill, until 1912, in Arenac, Benzie, Cheboygan, Emmet, and Leelanau counties.

Rabbits—Open season from October 15 to March 1, inclusive. Unlawful to use ferrets or Guinea pigs in hunting. Farmers and fruit growers may use ferrets in killing rabbits on their enclosed lands.

Squirrel—Unlawful to hunt fox, black or gray until 1914.

Fur-Bearing Animals.

Beaver—Unlawful to kill until January 1, 1912.

Bear, Otter, Fisher, Marten, Fox, Mink, Raccoon and Skunk—Unlawful to take, trap or kill from April 1 to November 1.

Muskrat—Unlawful to take, trap or kill from April to November 1.

Muskrat or Beaver Homes—Unlawful to destroy, disturb or molest at any time, or set any trap within six feet of a muskrat house. Unlawful to set or put up any muskrat traps preceding the day of the open season.

Wolf, Lynx and Wildcat—Bounty for wolf over six months, \$25; for wolf under six months, \$10; for lynx, \$5; for wildcat, \$3.

Game Birds.

Quail—Open season from Oct. 15 to Nov. 30, inclusive. Unlawful to take more than 10 in one day. Unlawful to take more than 50 in one calendar year. Unlawful to have in possession more than 15 at one time.

Partridge and spruce hen—Open season from Oct. 15 to Nov. 30, inclusive. Unlawful to take more than six in one day. Unlawful to take more than 50 in all at one time.

European Partridge—Unlawful to kill until 1912.

Homing pigeons and morning doves—Unlawful to capture or kill at any time.

Non-Game Birds.

Unlawful to kill, capture or have in possession, excepting blackbirds, English sparrows, crows, Cooper's hawks, sharp-shinned hawks and great horned owls.

Waterfowl.

Ducks, snipe, plover, woodcock, geese, brant, shore birds, rails and coots—Open season from Oct. 15 to Dec. 31, inclusive. Blue bill, canvasback, red head, wilson, pintail, whistler, spoon-bill, butterball and swirlbill ducks may also be hunted from March 2 to April 10, inclusive. Teal and mallard ducks may be killed from Sept. 15 to Dec. 31, inclusive. Unlawful to take in one day more than 25 ducks, geese and brant; six woodcock, 10 plovers, 10 snipe and other shore birds. Unlawful to have in possession at one time in all more than 25 geese, brant and duck, 20 plover, woodcock or snipe and other shore birds. Unlawful to use any floating device propelled by steam, gas, gasolene, oil, gasoline or electricity for sail boat, or to use any swivel punt gun, battery, sinkboat or similar device. Unlawful to use gun of greater size than 10 gauge. Unlawful to hunt from sunset to sunrise.

Miscellaneous Provisions.

Game—Shall not be shipped by express, freight or baggage, nor in any other manner, but shall be carried only in hand baggage.

Hunter's license—Unlawful for non-residents to hunt or kill protected game birds or animals; other than deer, without having procured license. License \$10; deer license \$25. Not applicable to persons hunting on their own land.

Protected game and fish—Unlawful to transport beyond the boundaries of this state at any time. Unlawful to ship deer or portions of deer within this state, unless accompanied by license tag.

The state game, fish and forestry warden may issue permit to non-resident licensed hunter to take one deer out of this state. A licensed non-resident hunter may take from the state as hand baggage not to exceed the number of birds of any kind that may be legally killed by him in one day.

Sale of protected game—Unlawful to sell, at any time, any game animal or game bird protected by the laws of this state.

Use of dogs—Lawful to train on game birds within 15 days of the rutted grouse season, but persons training must not carry firearms when so doing. Unlawful to use in hunting deer.

Deadfalls, poison, etc.—Unlawful to use any deadfalls, snare, poison or explosives.

Hunting on enclosed lands, etc.—Unlawful to hunt in public parks or game preserves; or on enclosed lands of another when such lands are posted against hunting, except with owner's consent.

Sparring—Unlawful to spear fish in inland lakes except through the ice during December, January, February and March. Lawful to spear fish in rivers and streams, but during March, April, May and June only grasspike, mullet, suckers and redfish may be speared. Unlawful to spear at any time, in either lakes or streams, sturgeon, any kind of bass (except rock bass), or any kind of trout.
