

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED).

Issued daily except on Sundays. Contains Associated Press dispatches and is especially devoted to the Upper Peninsula interests.

SUBSCRIPTION RATES: Per year, by mail, \$6.00 Per month, by carrier, \$0.50

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

MARQUETTE, MICH., OCT. 26.

DEPENDING ON THE FARMERS.

According to the Washington correspondent of the Grand Rapids Press, the LaFollette boomers are depending on the farmers for support in Michigan for the presidential aspirations of the Wisconsin senator.

It is not quite clear how the LaFollette people can make strong headway in Michigan, when all the prominent Republican office holders consider it safe to tie themselves to President Taft.

Senator Townsend won on a progressive platform as against the conservative Burrows, and Gov. Osborn won as an outspoken radical.

Of course it is recognized that in dealing with the state central committee or with the state officers the progressives are dealing with the friends of Taft.

Showing up Barnes. A legislative investigating committee is now busy at Albany showing up some hitherto unrevealed chapters in the career of William Barnes Jr., the boss of Albany, the resourceful opponent

Emblagaard Dairy Pure Dairy Products From Holstein Cows George Gillette DISTRIBUTOR

throughout his term of service of former Governor Hughes, the inveterate enemy of the progressive element in the Republican party in New York, and the man whom Colonel Roosevelt bowled over at the Saratoga convention, but whose friends and followers throughout the state revenged by "bolting" in sufficient numbers to defeat the convention's choice for governor.

Barnes, it will be remembered, was not long out of his position of power in the Republican councils. Colonel Roosevelt did not seek to retain the leadership that he seized at Saratoga. He conceived then that there was an emergency that called for action by him, and believed the voters would show appreciation of the fact.

Barnes' sources of political revenue and the means by which his political leadership are upheld in Albany and in Albany county are now being mercilessly revealed. It is being made clear that Barnes, like most men of his type, is in public life for self and personal power.

The picture of Barnes being drawn at Albany is not a muckraker's picture, but is the product of a legislative investigation in which Barnes' rights are being zealously protected by the most resourceful attorneys, whose aim is to keep the sum total of damaging evidence down to the minimum.

Certain Battle Creek manufacturers are credited with having decided to fight the plan of the commission on tax inquiry to raise money for the support of the state by taxing the corporation excess, and they are quoted as saying that if the plan should be made effective, the tax would have to be met by reducing the wages of the workmen.

Speaking of the proposed cut in freight rates by the Steel corporation's ore carrying railroads, the Duluth Herald says: "There will be, no doubt, those who will scoff at the statement that the 'steel trust' makes this reduction because it is the right thing to do.

The proposal for the settlement of the questions at issue between the city and the Detroit United Railway appears to have met with general approval. The terms are regarded as fair to the city, and there is said to be little likelihood that there will be any organized opposition to their ratification.

gained by Mayor Thompson, a Democrat, out of the settlement will be an influence in greatly strengthening the entire Democratic party in Detroit and will enhance the likelihood that it will make a sweep in the next elections. But this is a narrow way in which to regard the matter and it can be taken for granted that there would be little popular sympathy for the men who would openly avow such an attitude.

President Taft continues to score by talking straight from the shoulder irrespective of the nature of the audience he is called on to address. He hasn't one line of talk for one state and an entirely different line for another. His addresses throughout his trip have varied little in their essentials.

"Wisconsin," says the Milwaukee Free Press, "refused to increase the pay of members of the legislature from \$500 to \$1,000, and New York is about to vote on an amendment of the constitution increasing the pay of its legislators from \$1,500 to \$3,000."

Sheriff Gaston of Wayne county is worth with Prosecuting Attorney Shepard because he pulled off a successful slot machine raid without the aid of any of the sheriff's deputies.

As far as one is able to judge by the press reports President Taft has fared as well in the "enemy's country" as he has in those states where his particular strength is believed to lie.

It was just Copenhagen's manner of taking it out of Dr. Cook for the way he slipped one over in the first instance. Copenhagen was evening the score for no end of jokes that have been aimed at it because it so trustfully accepted Dr. Cook as the man who discovered the pole.

Plot and counter plot are multiplying so rapidly in Milwaukee that the members of the senate investigating committee have to hold their heads before they are sure that they know where they are.

The recorder presented a conveyance of eight-of-way for a sewer and sewer outlet from the Pioneer Iron Company to the city. On motion of Alderman Asire, supported by Alderman Donovan, said conveyance was received, ordered recorded and placed on file.

State Press

Some way we like the weather predictions "unsettled." We then know what to expect.

It is now up to Dr. Wiley to demand that every chestnut shall be labeled with the date of its production.—Pontiac Press-Gazette.

The perfect wife, as we understand it, is the one who assures her husband that she is not improving lace curtains.—Jackson Citizen-Press.

The man who finally succeeds in discovering the result of the Maine election should be placed on the trail of Mona Lisa.—Kalamazoo Telegraph-Press.

An Ohio jury has been called upon to decide which was domestic and which was imported champagne by sampling both kinds. That jury will probably be out for a long time.—Grand Rapids Press

In New York a woman wants a divorce because her husband will not talk to her. When a woman complains that her husband will not talk to her she means that he will not listen to her.—Lansing State Journal.

Kent is without bonded debt at the present time. This is a very happy and comfortable condition in which to be. Yet, it is no excuse for undue timidity or conservatism in ordering a bond issue which will so unflinchingly justify itself as this will. A \$500,000 bond issue for good roads.—Grand Rapids Herald.

A Laugh or Two

Ben Butler's Comparison. "I happened to be in Massachusetts some years ago," said a Pittsburger, "when Ben Butler was running for governor. His opponent was a man named Dana. Sitting in the seat in the car with him was a farmerlike man. Getting into a conversation with him I asked about the relative standing of the two candidates."

"Well," he said, "the Danas is like the Adamses, the Adamses is like a hill of potatoes—the best on 'em is under the ground."

"Oh, that's all right!" Strathcona replied, with a smile; "we can easily renew it at the end of that time."—New York Post.

The Parson's Mistake. An amusing incident was witnessed at a big railway station recently. An old gentleman was waiting for a train, and at the same time interested in the surroundings, did not notice the approach of a porter struggling with a large traveling trunk, with the result that he was knocked off the platform on the rails, says Judge.

Frank A. Munsey, fresh from his annual tour of Europe, said at a recent banquet in New York: "It would be unreasonable to complain of American high prices, coupled as they are with relatively high wages, after one has just experienced the high prices, together with the low wages, of Europe."

Lord Claude Hamilton, testifying before the London railway commission, boasted—actually boasted—that the average pay of the railway worker—excluding overtime and Sunday work—was 25 shillings, or \$6.25 a week. And yet this railway worker has to pay 28 cents a pound for good beef and 30 cents a pound for good mutton. Is it any wonder, then, he strikes? It is any wonder he lives on bread and drippings?

"Yes, in comparison with those conditions, to talk of our high prices is unreasonable. It's like the man just back from Atlantic City. "Ah, some off!" exclaimed a listener. "I've been going regularly to Atlantic City for 39 years and I never saw the waves there over 12 feet."

One of the Curses. S. A. Miles, the manager of the National Association of Automobile Manufacturers, was talking about reckless automobilists. "They are a curse to motoring," he said. "They are, too, a curse to themselves. I'd especially warn chauffeurs against recklessness. It's anything but a recommendation when they come to look for work."

Copper Country

LEO M. GEISMAR IS ENTHUSIASTIC

Farm Expert Writes of Corn-Growing Possibilities and Copper Country Fair.

Secretary McNamara of the Copper Country Fair is in receipt of a letter from Superintendent Leo M. Geismar...

"After a careful count I found that there were 371 individual exhibits of corn at the Copper Country Fair. This is a record seldom obtained in states where corn is the leading crop and specie highly for the efficient management of your fair."

"While I attended your fair, one of the leading businessmen of Houghton brought up the question as to whether any considerable benefit has been derived from the corn-growing contests of the schools the past three years. My answer was that I instituted these contests, because you and John A. Doelle were the first to appreciate their value, not so much to the fair as for promoting the agricultural development of the Copper country. One of the objects of the contests is to stimulate an interest in corn-growing, and I have good reasons to think that the results are gratifying."

"During the past three years we have distributed to farmers throughout the upper peninsula over a thousand packages of seed from corn which we are propagating at the experiment station. During the first year less than one-half of 1 per cent went to Houghton county farmers, while this year nearly twenty-seven per cent of what we distributed was sent to the farmers of your county. Promoting better farming methods and preventing the impoverishment of the Houghton county farms was another object I had in view when starting these corn-growing contests. The fact not generally known was that out of every 100 acres under cultivation in Houghton county ninety-two acres were used for hay and oats as late as six years ago. That the land was not being properly fertilized is evident from the diminishing yields per acre as shown by statistics and from the great number of inquiries which I received up to that time from Houghton county farmers in regard to commercial fertilizers. During the past three years I have not received any such inquiry from Houghton county, and the further proof of beneficial results is found in the steady increase of the varieties and the quality of the exhibits at your fair. Each year the fact emphasizes more strongly the fact that almost every crop can be grown to perfection in Houghton county, and it advertises the little known fact that for fruit-growing, Houghton county has some of the most favorable locations in the upper peninsula. I take pleasure in repeating here what I have frequently stated elsewhere, that as a fair, purely agricultural, with education as its primary and entertainment as its secondary object, I consider the copper country institution the best managed and most successful county fair in the whole state."

JOINT CELEBRATION.

Lutherans of Hancock and Calumet Will Unite Sunday. The German Lutheran churches of Hancock and Calumet will unite at Hancock next Sunday in a joint celebration in observance of the one hundredth anniversary of the birth of Dr. Carl P. W. Walther, the greatest Lutheran theologian this country has produced and familiarly known as "the Luther of America." The celebration Sunday will consist of a morning and evening service, with special music by the different choirs. The principal speakers will be Rev. Mr. Traub of the Hancock church and the pastor of the Calumet church, The Walther centennial will be observed in all the other churches of the Missouri synod. This synod was founded in 1847 by Dr. Walther.

Stops a Cough Quickly - Even Whooping Cough

A While Pint of the Quickest, Surest Cough Remedy for 50c. Money Refunded if It Fails. If you have an obstinate, deep-seated cough, which refuses to be cured, get a five-cent bottle of Pinex, mix it with homemade sugar syrup and start taking it. Inside of 24 hours your cough will be gone, or very nearly so. Even whooping-cough is quickly conquered in this way. A 50-cent bottle of Pinex, when mixed with home-made sugar syrup, gives you a pint—a family supply—of the finest cough remedy that money could buy, at a clear saving of 82. Very easy to prepare—full directions in package. Pinex soothes and heals the inflamed membranes with remarkable rapidity. It stimulates the appetite, is slightly laxative, and has a pleasant taste—children take it willingly. Splendid for croup, asthma, bronchitis, throat tickle, chest pains, etc., and a thoroughly successful remedy for incipient lung troubles. Pinex is a special and highly concentrated compound of Norway White Pine extract rich in gualacol and other healing pine elements. It has often been imitated, though never successfully, for nothing else will produce the same results. Simply mix with sugar syrup or strained honey, in a pint bottle, and it is ready for use. Anyone who tries Pinex will quickly understand why it is used in more homes in the U. S. and Canada than any other cough remedy. The genuine is guaranteed to give absolute satisfaction or money refunded. Certificate of guarantee is wrapped in each package. Your druggist has Pinex or will get it for you. If not, send to The Pinex Co., Ft. Wayne, Ind.

J.W. BUNDY IS KILLED AT TRINIDAD, COLO.

Former Hancock Man Meets a Violent Death, Presumably in an Auto Accident.

Alex J. Scott of East Hancock received a telegram yesterday morning from Trinidad, Colorado, advising him of the demise of his son-in-law, Jay W. Bundy, which took place Tuesday evening. Details of the death are lacking, the telegram only conveying the information that Mr. Bundy had been killed. The Hancock relatives incline to the idea that the deceased met with an accident while driving an automobile, as he was engaged as demonstrator for the Reo Automobile company of Lansing. Mr. Bundy went to Hancock four years ago from New York to take a position as chauffeur for Ed M. Lieblein. Shortly after arriving there he established a garage, which he conducted for two years. A year ago he entered the employ of the Lansing corporation and was subsequently promoted to demonstrator. While in Hancock he met Miss Bernice Scott, whom he married. Mrs. Bundy left last week to join her husband and was with him only two days when the fatal accident occurred. The remains will be sent to the former home of the deceased in New York. Mr. Bundy was twenty-six years of age.

Boy Succumbs to Wound. Walter Major passed away Tuesday night at St. Joseph's hospital, Hancock, after suffering almost twenty-four hours as the result of an accidental discharge of a shotgun carried by one of his companions while on a hunting expedition. The shot from the gun entering his back and piercing both lungs. The boy was a son of Thomas Major of Hancock township, one of the most prominent farmers in that district.

Another Hunting Accident Rumored. Word came yesterday that a hunting accident had taken place north of L'Anse. The report was to the effect that a hunter had been mistaken for a deer. Attorney H. A. Brennan of L'Anse said that he was yesterday morning inquired if there was any foundation to the report he replied he had heard such an accident had taken place but did not know the details.

SEARCH IS ABANDONED.

Derelict Hopkins Is Believed to Have Gone to the Bottom. The government yacht, Vidette, under command of Captain Brown, has abandoned the search for the derelict Hopkins and has returned to Duluth. Captain Brown reported that only wreckage was seen. He expressed the belief that the ship has sunk.

JUDGE STREETER HONORED.

Presented With Umbrella and Cane at Eagle River. At Eagle River Monday evening, Captain Wesley Clark of Copper Falls presented Circuit Judge Albert T. Streeter with a gold-headed cane and gold-headed umbrella, suitably engraved, on behalf of the officials and the board of supervisors of Keweenaw county. The presentation took place while Judge Streeter and the attorneys attending the session of circuit court at Eagle River were at luncheon at the Eagle River Hotel. The presentation was to have been made at the last session of the board of supervisors, but Judge Streeter was unable to attend. Captain Clark spoke of the high esteem in which Judge Streeter is held in Keweenaw county and of his great ability as a jurist and of his kindness and excellent qualities that have made him liked by all. The judge responded feelingly. Captain Clark, Judge of Probate Smith, County Clerk F. X. Kaiser, Sheriff Thomas Jackson, Presenting Attorney J. A. Hamilton, Colonel J. P. Peterson, a graduate of the Finnish college of Hancock. He is expected to accept the proffer of the pupil.

PASTOR IS CALLED.

Rev. Matti Pesonen of West Superior, Wis., has been invited to become pastor of the Finnish Lutheran church of Hancock. The church has been without a pastor for several months, following the resignation of Rev. John Back. Mr. Pesonen is a graduate of the Finnish college of Hancock. He is expected to accept the proffer of the pupil.

KEWEENAW COUNTY COURT.

The October term of circuit court in Keweenaw county closed Tuesday evening.

CRICKET MEETING SATURDAY.

Officials Will Settle Dispute as to Ownership of Cup. Secretary Reid of the Copper Country Cricket League has issued a call to the league directors for a meeting at Hancock Saturday evening. The meeting is called to award the Trevorvow cup, a trophy given to the team scoring the greatest number of runs during the season. Mohawk won the cup last year and is to win it again in order to retain it permanently.

Tamarack is credited with the highest number of runs the past season, but its

ROSWELL Baking Powder Absolutely Pure

The Standard Leavening Agent of the World Contains all the excellence possible to be attained in a perfect baking powder Insures delicious and appetizing home-baked foods. No Alum - No Lime Phosphates

right to the cup is contested by Mohawk, which claims the cup really belongs to Mohawk. Mohawk's protest is on the grounds that two Mohawk games remained unfinished and had these games been completed the honor of sporting the greatest number of runs would have gone to the Keweenaw county team.

The Norman W. Haire trophy will be officially awarded to Mohawk two weeks hence, when the league officials will gather at Mohawk. The management of the winning team has arranged for a concert and supper to be held in connection with the ceremony. Mohawk won the cup a year ago and if the team can repeat this trick next year it will hold the trophy permanently.

TESTS ABOUT COMPLETED.

Hancock Consolidated Will Stop Shipments First of November. The Hancock Consolidated mine will discontinue sending rock to the Allouez central station will the first of November. Shipping has been going on for the past six months, the shipments being made for test purposes only. The mine officials state that the tests have been very satisfactory. The discontinuance of shipping will not result in any material reduction in the working force, as has been rumored the past few days. The work of opening up new ground will continue.

D. W. KUHN PREDICTS BIG INDUSTRIAL WAR

Pittsburg Man Looks for Gigantic Struggle Between Coal Operators and Miners. Chicago, Oct. 25.—A prediction of industrial warfare and dissolution of organized coal mining next spring was made at the American Mining congress here today in a paper prepared by D. W. Kuhn of Pittsburg. Mr. Kuhn was not present and his paper was read. Mr. Kuhn says: "For the last four years the coal operator has met every condition of the country sought to put on him, and he has failed. The losses from operation cannot be continued longer and the crisis is at hand."

MISS SALISBURY ADVANCING.

Miss Winifred Salisbury, for two years secretary and general working agent for the Calumet Associated Charities, has taken a position as superintendent of agents with the Minneapolis Associated Charities and began her duties in that office Oct. 16. Miss Salisbury left Calumet last spring. During her two years with the Calumet Associated Charities Miss Salisbury gained a wide experience that will stand her in good stead in her work in Minneapolis, especially as that city has a large foreign population.

PASTOR IS CALLED.

Rev. Matti Pesonen of West Superior, Wis., has been invited to become pastor of the Finnish Lutheran church of Hancock. The church has been without a pastor for several months, following the resignation of Rev. John Back. Mr. Pesonen is a graduate of the Finnish college of Hancock. He is expected to accept the proffer of the pupil.

GRADUATE OF CORNELL TO REPRESENT CHINA AS MINISTER AT WASHINGTON.

Washington, Oct. 25.—S. Alfred Sze has been selected to be the Chinese minister to Washington, to succeed the incumbent, Chang Yin Tang, who is now in Mexico. Mr. Sze is a graduate of Cornell university and is connected with the Chinese foreign office.

Indemnity to Be Paid on Time.

Washington, Oct. 25.—The Chinese government has withdrawn its request of the United States for permission to postpone the payment of the current installment of the Boxer indemnity. This action is interpreted as indicating China's success in obtaining a large loan from some secret source or in effecting an arrangement with the revolutionists for the reestablishment of order.

MRS. STANNARD TAKES STAND AT ONTAGON

She Testifies in Own Behalf and Is Conceded to Have Helped Her Case. (Continued from Page One.)

Dr. Hanna told of experiments. Dr. Hanna's testimony referred to by Judge Flannigan was offered shortly before the people closed. Mr. Jones had announced to the court that the people would not offer any more witnesses, but would submit his list of witnesses to the defense for purposes of cross-examination. Mr. O'Brien asked that Elaine Stannard, Alvah Stannard, Dolly Hammes and Dr. W. B. Hanna be recalled.

Dr. Hanna testified that he had made experiments with coffee and cream containing strychnine, for the purpose of testing the bitter taste. Starting with doses of one-sixteenth of a grain and going through a number to one and one-half grains, using a cup of coffee with two teaspoonsful each of sugar and cream, he found that the one-sixteenth dose gave a very bitter taste and the others in increasing bitterness.

Both Sides Fighting Hard. This case has been hard fought. Its progress has been hampered more than a full working day by delays coming up through knotty legal points that had to be untangled. There was one this morning and there was one yesterday morning.

FOND DU LAC PREPARED TO GIVE THE PRESIDENT A ROUSING RECEPTION.

Fond du Lac, Wis., Oct. 25.—Fond du Lac has made great plans for the entertainment of President Taft tomorrow.

DEFENDANT A FORLORN FIGURE.

Mrs. Stannard is not the cheerful woman she was at the opening of the trial. She is a forlorn figure, except when she was on the stand today, almost constantly turning her face from the audience and weeping silently. Her face looks more drawn and older. The woman undoubtedly has aged in a week. She no longer has energy and a word for the reporters at recess.

Various Legislation Urged.

Chicago, Oct. 25.—The American Mining congress, in session here today, adopted resolutions endorsing the deep waterways movement, recommending the passage of an equitable workmen's compensation act and urging a modification of the Sherman act in permit reasonable agreements between the coal operators.

Health Officer Quarantines Hospital.—Demonstrating that the health and quarantine laws must be obeyed without respect to the individuals concerned, the Delta county hospital was placed under quarantine yesterday by Dr. H. W. Long, city health commissioner, says the Escanaba Press. He is charged by Commissioner Long that when a maid employed in a family suffering from scarlet fever and under quarantine became ill with the same disease she was taken from the home by Dr. H. B. Reynolds and placed in the hospital. The health physician visited the hospital yesterday and found the young woman suffering from the disease and learned that she had been there since Thursday. He promptly placed the institution under quarantine rules and asserted that the rules would be enforced until danger of the spread of the malady was passed. Following the discovery of the alleged infraction of the quarantine rules, a heated telephone conversation followed between the health commissioner and Dr. Reynolds. The health officer maintained that to allow any person physician to break quarantine rules that had been established over any home was dangerous to the health of the city and would not be tolerated. Dr. Reynolds held that peculiar conditions prevailed in the case and for that reason he did not notify the health officer of the removal of the patient.

Astronomer Grinding Big Lens.

Between six and seven years' labor to be spent on one piece of glass eighteen inches in diameter. That is the work upon which John Novak, Escanaba astronomer, is now engaged, and when it is completed Mr. Novak will have an eighteen-inch objective lens valued at about \$7,000. The piece of glass cost \$200. Mr. Novak is making the lens for use in a big new telescope for his observatory. The instrument will have a focal length of twenty-one and one-half feet, and its value will exceed \$12,000. Very few persons aside from those engaged in the manufacture of telescopes realize the expenditure of time, care and training necessary to grind an eighteen-inch lens. Mr. Novak stated that it takes so long a time to grind a lens is because the grinding can be done only a few minutes at a time. In the process the glass becomes warm, and as soon as it is warm the grinding must stop. When the glass becomes heated there is an expansion which makes it impossible to do the grinding accurately. And there cannot be more than one-thirtieth of an inch variation. For this reason the work must be done in a room in which there is the smallest possible variation in temperature. Mr. Novak's workshop is at his residence on lower Wells avenue. He grinds all kinds of lenses, including those used in spectacles. Mr. Novak has succeeded in securing a very fine photograph of Brook's comet, which has been visible in the western sky for several months, but which is almost invisible now, owing to the fact that it is disappearing behind the sun. Mr. Novak secured a very fine photograph of Haley's comet one year ago last May. Those who were disposed to think that comet was pretty much of a fake would be surprised to see what the telescope at the Novak observatory found that the naked eye could not see.

IS THE WORLD GROWING BETTER? Many things are trying to help others who are suffering. For every year I used failed until I took Electric Bitters. But this great remedy helped me wonderfully. They'll help any woman. They're the best tonic and finest liver and kidney remedy that's made. Try them. You'll see. 50c. at The Stafford Drug Co.

STOCK MICHELIN TIRES Look for this Sign on Leading Garages You cannot know what a good tire is until you try a Michelin properly inflated IN STOCK BY Pioneer Motor Co., 219 Baraga Ave.

Wise Men and Women Know that most of the sicknesses of life come from inactive bowels and from unhealthy condition of the organs of digestion. If your digestive system is not working right, your food does not nourish you—poor blood and weakness follow; if your bowels are inactive—waste matter poisons the whole system and serious sickness is sure to follow. To take promptly BEECHAM'S PILLS is to save yourself trouble and expense. Gently, but quick; safe, but thorough, they enable the bowels to carry away waste matter naturally and tone up the whole digestive system. They will not injure the most delicate. They help you to get your bowels and your digestive organs in that condition when they can take good care of themselves and of you. Beecham's Pills Do Good Naturally For females, Beecham's Pills are especially suitable. See instructions with each box. Sold Everywhere in boxes, 10c. and 25c.

Yesterday's temperatures: Seven a. m., 38 degrees; noon, 40; 7 p. m., 32. Highest, 40; lowest, 32. Today's weather: Generally fair.

William H. Faucett, of Calumet, was a Marquette visitor yesterday.

Mrs. A. E. Miller left last evening to spend a few days in Chicago.

P. J. O'Donnell left last night for Duluth on a short business trip.

E. A. Culver, of Trenary, is spending a few days in the city.

Born, to Mr. and Mrs. Austin Harmon, of Sand River, a daughter.

Albert Langenbach, of Escanaba, was in the city on business yesterday.

W. W. Walker, of Duluth, general freight agent of the South Shore road, was in the city yesterday.

"The Sources of Woe" will be the subject of the prayer meeting at the Presbyterian church at 7:30 this evening.

Mrs. John Hanley, of Calumet, arrived yesterday to spend a few days with her mother, Mrs. Myers, corner Ridge and Fourth streets.

Dennis Hogan returned Tuesday night from a two weeks' hunting trip at Point Abbye. He succeeded in killing two small deer.

Phil Trombley, who has been hunting deer near Kenton, has been successful in his quest of game. He has bagged a fine big buck.

John A. Deasy, of Jackson street, a who is employed as a stenographer at Garnet, Mich., was successful in shooting a deer on a hunt Sunday.

Mrs. Salome Runksa, of Republic, was adjudged insane in probate court yesterday and was taken to the Newberry hospital by Sheriff Lehman on the afternoon train.

Sleighting Last Year—The few flakes of snow that fell about 11 o'clock yesterday were sufficient to remind many people that a year ago on Oct. 25, the ground was covered with two feet of snow, which staid on the ground until well along into March. A year ago today sleighs were being used almost exclusively in this city.

Bogon-Duhaime Wedding—Francis Bogon, of Hancock, and Miss Bernice Duhaime, of this city, were united in marriage Tuesday evening at St. Peter's cathedral. Rev. Father Pinton performed the wedding ceremony. The bride is a niece of Mrs. Dan Mullaly. Mr. Bogon is employed as a brakeman on the L. S. & I. railroad, and the happy couple will make their home in this city.

Small Craft Warning—A new storm warning to be known as a "small craft warning" for display only when moderately strong winds are expected, will be adopted by the United States weather bureau Dec. 1. This warning will be for the benefit of fishing boats and pleasure craft. This warning will be represented by a red pennant and will be displayed at storm warning stations, but during the day time only.

Winter Schedule Nov. 1—As the winter passenger train schedule on the L. S. & I. and Munising, Marquette & Southeastern railroads will go into effect Nov. 1, next Sunday will be the last Sunday patrons of the road will have opportunity to go to the various points on those lines. Last year, a hunters' Sunday special was run to Birch and Big Bay until the close of the deer season, but it has not been determined whether this special will be put on again this year.

Will Finish Big Dam—Work on the construction of the big dam at the light and power station is rapidly being pushed to completion, and it is expected that the dam will have been finished by Nov. 15. Nearly all of the concrete is in, the weather during the past month having been very favorable. At the Silver Lake dam very slow progress is being made, as the contractors are having difficulty in getting laborers. They have been working on the job about six days but no more than a good start has been made on the work. The Silver Lake dam was to have finished Nov. 1, but it will not be completed until long after that date.

Toledo Firm Gets Bonds—Hoehler & Cummings, of Toledo, Ohio, were the successful bidders for the \$65,000 issue of water works improvement bonds, the bonds being sold at a meeting of the board last evening. The money obtained from the sale of these bonds will be used to extend the intake pipe. The Toledo firm's bid for the lot was \$6,663 and accrued interest from Nov. 1. The buyers agree to furnish \$15,000 as soon as convenient and the remaining \$50,000 Jan. 1. The bonds bear four and a half per cent interest. The three Marquette banks also put in bids for the bonds but their offers were less than that of the Toledo firm. The Elks will elect officers to fill vacancies, at a meeting to be held this evening.

INSURE WITH PETER WHITE & CO. SOO CANAL PASSAGES.

Names of the Boats Bound for Ports on Lake Superior.

Sault Ste. Marie, Mich., Oct. 25—[Special.]—The following upbound boats have passed the canals the past twenty-four hours: Saronic, 7:30 last evening; Kirby, 8; Mrs. Boyce, 10; Bannock, Goshawk, 1 this morning; Empire City, 2; Andaste, 3; Argo, George Owen, 7; Jones, 9:30; Keevatin, 10; Dunn, 11; Glenellah, 11:30; Woodruff, noon; Dinkey, 1 this afternoon; Northern King, 3:30; Mathews, Collingwood, 4; Craig, Dave Mills, Anderson, 4:30; Morrow, 5:30; Scottish Hero, 6; Princeton, Magna, 7; Penobscott, Verona, 8; Bixby, 9.

J. W. Copeland, of Dayton, Ohio, purchased a bottle of Chamberlain's Cough Remedy for his boy who had a cold, and before the bottle was all used the boy's cold was gone. Is that not better than to pay a five dollar doctor's bill? For sale by the People's Drug Store.

Mild, kind to the taste, easy-going cigar. Marquette Club. 10c. 10-3-11.

### RECRUITING STATION FOR U. S. MARINES

Sergeant Burdick, of Detroit, Has Decided to Open an Office in Marquette.

A recruiting office for the United States marine corps is to be opened in Marquette about Nov. 1, and young men who are desirous of entering the service of Uncle Sam are invited to investigate.

Sergeant Edwin C. Burdick, of Detroit, arrived in the city yesterday to look over the situation, and after consulting with a number of people has decided that Marquette is the proper location for an upper peninsula recruiting office.

Arrangements have been made with Dr. H. T. Carriel, whose office is in the Werner block on Front street, to act as official medical examiner for the marine service. Any who may wish to enlist may apply to him. Sergeant Burdick will be in Dr. Carriel's office this forenoon, but any who cannot see him then may make application for enlistment of Dr. Carriel at any time. Sergeant Burdick will take those who apply this forenoon to Detroit with him, provided they pass the medical examination.

"Service in the United States marine corps offers an excellent opportunity for a young man to see the world and at the same time serve his country," said Sergeant Burdick last night. "Marines are stationed at all navy yards along the southeast and they also serve aboard seagoing men-of-war, thus having opportunity to visit foreign countries. The marine corps maintains permanent stations in China, Japan, Korea, Alaska, the Philippine islands, Guam, Hawaii and various other places outside the United States. While serving ashore in foreign countries, the marines receive 20 per cent higher pay.

"The term of service is four years. The drills, etc., are not hard and the pay is as good as in any of the departments of military service. In addition to his monthly pay, a marine receives his board, lodging and an ample allowance for clothing. Any part of the allowance for clothing that is not used is paid over in cash at the time of discharge, as well as the allowance of four cents per mile from the place of discharge to the place of enlistment.

"There are numerous ways in which a marine can increase his income, such as excellence in marksmanship, earning promotion, etc. Surplus money as a marine may desire to save may be deposited with the government and interest at the rate of 4 per cent will be paid.

"During his term of enlistment, a marine does shore service in the United States, service aboard ship and service in foreign countries. It is possible that he may make a trip around the world. In any case, one who enlists will receive the benefit of extensive travel, physical training, and a knowledge of the world.

"In order to be eligible for enlistment a man must be between nineteen and thirty-five years of age, not less than five feet, five inches tall in his bare feet and must weigh in proportion to his height. His eyesight and hearing must be normal, his teeth must be in good condition and he must be without dependent relatives. For those under twenty-one years, the written consent of parents or guardian is required. Men enlisting at Marquette now will be sent to Norfolk, Va."

Col. Goethals and his busy men are going to build two dry docks at Colon. They will be used for docking and repairing merchant vessels going through the Panama canal, and the plant is to include machine shops, cooling wharves and equipment shops. All these will also be at the service of our warships. The order is to have this great ship yard ready for operation by July, 1913. The order is a big one, the customary time for building a dry dock being somewhere between three and four years. Col. Goethals is a man who does things, however, and he probably will do this.—Hartford Courier.

The long standing potash war with Germany has been ended by the ostensible surrender of \$25,000,000 of American money to Germany, according to a statement made today by an officer of the American Agricultural Chemical company. The actual results of the settlement are that the American contractors retain a substantial amount of the profits obtained from the low priced contracts made before the potash law went into effect and at the same time obtain a refund of the surplus tax from the German government sufficiently not only to pay for the cancellation of the independent contracts, but also to reduce the prices existing in 1909 before these contracts were made. The independent mines will re-enter the syndicate and the American buyers will hereafter obtain their supplies from the potash syndicate under identical contracts, thus in a measure re-establishing the monopoly.

In his circular letter addressed to the school principals of New York city, which calls attention to the traffic dangers to children, Supt. Maxwell gives the following statistics for the twenty-one months ended Sept. 30: There were forty-six children between the ages of one and sixteen years killed by automobiles and 140 injured; there were twenty-nine killed by trolley cars and seventeen injured; there were 104 killed by wagons, and twenty-three injured. One child was killed in a collision between two wagons and twelve were injured, making a total killed of 180 and a total injured of 192.

C. P. Rogers, the aviator, who has traveled through the air from New York to Texas, with the Pacific coast as his destination some time or other, is now in a latitude where he can fly all winter if he dodges the northerners. His route will naturally lie along the Southern Pacific, but it will take him through deserts and over mountain ranges, where gasoline is scarce, but not as scarce as mechanics. His difficulties and hardships are all to come.—New York Sun.

J. W. Copeland, of Dayton, Ohio, purchased a bottle of Chamberlain's Cough Remedy for his boy who had a cold, and before the bottle was all used the boy's cold was gone. Is that not better than to pay a five dollar doctor's bill? For sale by the People's Drug Store.

Mild, kind to the taste, easy-going cigar. Marquette Club. 10c. 10-3-11.

The really critical man about his footwear cannot find a smarter style than the "hub" model, 1 all leathers at \$4.00.

### You Men

who know good Shoe making—you men who are willing to pay higher prices for select leathers and individual handwork: this is your store.

At no other place in Marquette will you find the styles in footwear we are now showing. There's no extra charge for the advantage of the great stock and vast assortments of styles from which to make a selection; nor for the certainty that whatever you choose is good.

Notably among the fall styles we direct attention to our extensive showing of tan water proof leathers so popular this season, priced

\$3.50 to \$6.00

### NERVOUS DIBILITY

If worry, dissipation, or hard work have worn you out, if you have overtaxed nature's laws, then your nerves are unstrung, you lack energy and ambition for business, you have lost the vigor you once had. Are you as tired in the morning as you are at night? Does slight exercise tire you? Is your mind dull? Memory poor? These symptoms precede insanity and suicide. You are curable now and may not be credible in one month from now. Longer you put off treatment the deeper seated the disease becomes and the harder and more expensive to cure. There is a remedy for every disease. The only incurable cases I have had were those that had been improperly treated before they came to me. Patent nostrums cannot cure, as each case must be treated according to conditions. No two cases are exactly alike. Do not put off any longer. Have your case attended to at once. You cannot afford to lose your most valuable possession, your health.

## Lower State Notes

**PETOSKEY**—A. B. Mudgett, one of the receivers of the Bear River Paper and Bag company, announces that sufficient backing has been secured to begin operations at the paper mill by Feb. 1. The mill has not been operated for months since the company went into the hands of receivers, following the death of G. N. Friend, former manager of the company.

**TRAVERSE CITY**—The nine-month-old infant daughter of Mr. and Mrs. James E. Burden was found smothered to death in bed. After the mother had put the child to sleep the infant evidently burrowed its way beneath the bed clothing and was unable to secure air. The dead infant was found by the mother when she went to look after it after doing her housework. The mother is prostrated with grief.

**PONTIAC**—Failure of the supervisors at their session which ended last week to vote to submit to the electors the proposition of bonding the county for good roads may result in the circulation of petitions in each township asking that this action be taken. Good roads advocates say they will take this course and if the required number of signatures are secured it will be obligatory upon the supervisors to submit the question to a vote. Attorney F. L. Covert, acting for city patrolmen whose bills of arrest and arrangements were disallowed by the supervisors, is preparing a petition to the circuit court which will be in the form of an appeal from the decision of the supervisors.

**ANN ARBOR**—If the suggestion of the university senate is concurred in by the regents, the diamond jubilee of the U. of M. in commemoration of the seventy-fifth anniversary of its founding, will not be held until 1913. The regents set the time for the celebration as June next year, but the senate thought it would be better to postpone it until the new Arthur Hill auditorium is completed in June, 1913, and decided at a meeting to recommend this course to the regents. The regents will meet this week and probably will take action on the matter.

**MT. CLEMENS**—The illness at his home at Romeo of Judge Henry McKaye caused a postponement of the appeal will case of William J. Daley, which was scheduled to start in circuit court. Court was adjourned until next Monday. The Daley will case is one of the most important remaining on the court's September docket. Three prominent Detroit women are fighting for an estate valued at \$55,000 which, it is said, was willed to them by their brother. A second will disinherited them in favor of his widow, who resides here.

**FLINT**—Probate Judge Swayze has suggested to the board of supervisors that a juvenile farm be established in connection with the county infirmary. He proposes that the county should purchase an additional farm near the county farm and use it in the training of boys who requires restraint, but who should not be placed in the industrial school. Judge Swayze, who is judge of the juvenile court, is opposed to sending boys to an industrial school unless it is absolutely necessary, and he believes the establishment of a place such as he has proposed would not match best for results in the training of boys. His idea of the place would be something

## Handy Bottled Heat

A hot water bottle is apt to be needed at any time, but especially at this season.

Heat is a comfort and a healing agency as well and is the most prompt method of relieving many injuries and ailments. In no other way can heat be so well applied as by means of a hot water bottle. Those we supply will prove a good investment. We have all sizes, all worthy quality and all bargains at the price.

along the line of the Ford republic, although there wouldn't be sufficient boys here to have a regular republic. He claims that the stigma attached to boys because they are inmates of an industrial school is very serious. He believes that a firm with some arrangements for technical training and school education would net splendid results for the boys that he is now compelled to send to the industrial school.

**JACKSON**—A coroner's jury has decided that the death of 5-year-old Rose Marie Rolan, daughter of Samuel Rolan, was due to scarlet fever, and mistreatment of her stepmother, Hannah Rolan. The inquest was the result of charges made by the neighbors of the family. One woman testified on the stand that while the girl was ill, she left the home and went out on the street. The stepmother followed, shipping the girl with a horsewhip. Other neighbors testified regarding similar conduct of the woman toward the child. The prosecuting attorney is now making a further investigation. Mr. and Mrs. Rolan deny that they ill-treated the child.

**BATTLE CREEK**—Banley G. McNabb, a former well-known resident of this city, was instantly killed while hunting ducks on the St. Lawrence river, with a party of hunters. Whether the bullet from his own gun, or from the gun of some member of the party, killed him is not known. He was found in the bottom of the boat after a search of several hours by his companions. Mr. McNabb was formerly sales manager for the Battle Creek Gas Co., but left about eighteen months ago to accept a similar position with the Montreal Gas Co.

**NILES**—The New York Life insurance company intends to put George Kimmel, the man of mystery now in Niles, on the stand at St. Louis, Mo. Kimmel is willing, and will stay around where he is bound until the trial of the insurance case, which is set for December 11 next. George Ranken of Washington, D. C., receiver for the defunct First National bank of Niles, seeks to recover on the \$5,000 Kimmel policy that was assigned by Mrs. Ella Bonsett, sister of Kimmel, to the First National bank before its failure in 1901.

**DETROIT**—The Saginaw Bay Southwestern railway has been reorganized and the controlling interest goes into the hands of Albert J. Jacob, real estate dealer of Grand Haven, former right hand man of the late Tom L. Johnson of Cleveland. His associates include Col. W. G. Emerick of Saginaw, J. E. Cummings of Escanaba, William M. Durand of Detroit, Alexander C. Bishop and J. Emmet Sullivan. Eastern capitalists are also interested. The new company has also purchased all assets, right-of-way, franchises and property of every kind of the Saginaw, Owosso & Lansing railway, which was organized in 1906.

## THE EFFECTIVE LAXATIVE

Tastes Like and Is Eaten Like Candy.

In our experience in the handling of drugs and medicines, we believe we have never had experience with any Remedy that gave such great satisfaction to our customers as do Rexall Orderlies. This Remedy is not like any other laxative or cathartic. It contains all the good features of other laxatives, but none of their faults.

Our own faith in Rexall Orderlies is so strong that we offer them to you with our own positive personal guarantee, that if they do not thoroughly satisfy you, you only need tell us and we will hand back to you every penny you paid us for them. Therefore, in trying them upon our recommendation you take no risk whatever.

Rexall Orderlies taste like and are eaten like candy. They do not gripe, cause nausea, excessive looseness, or any other annoyance. They act so easily that they may be taken at any time, day or night. They are particularly good for children, aged, or delicate persons. They are put up in convenient tablets in three sizes of packages. Prices, 10c, 25c, and 50c.

Remember, Rexall Remedies can be obtained in this community only at our store—The Rexall Store, The Stafford Drug Co.

## Upper Peninsula

City's Tax Rate Is Reduced—

The tax rate at Iron Mountain the present fiscal year will be \$2.32 per hundred, compared with \$2.92 per hundred last year, a reduction of sixty cents. The reduction is made possible owing to the recent increase made in the valuation of mining property by the state tax commission. A further decrease would have been possible but for the fact that it has been necessary to make some unusually large appropriations.

## Proposed Industry for Escanaba

A proposition to secure for Escanaba a plant for the manufacture of a newly patented window frame has been placed before the Business Men's association by O. L. Mertz of Gladstone, acting for his brother, Edward Mertz of Milwaukee, who holds the patent. By the invention the use of putty in holding glass is completely eliminated by a strip of lead set into the frame and which when pressed against the outside surface is practically indestructible. It is said that the new window frames, which are not yet added, can be manufactured with but slightly increased cost over the present style.

## Soo's Mayor Offers a Reward

Addressing the common council, Mayor Short of the Soo called the aldermen's attention to the condition of the two fire department horses after a useless run in answer to false alarms. He declared that the thing was going to be a matter that should receive attention. He supplemented his remarks by offering a reward of \$25 to be paid personally by him for information that would lead to the arrest and conviction of the person or persons who turned in false alarms. Every such run costs the taxpayers of the Soo money. A number of the aldermen were of the opinion that the false alarms were the outcome of pranks perpetrated by mischievous boys. City Attorney McDonald, in a brief statement, explained why the penalty would be if the culprit were apprehended and convicted. He also declared that the ferreting out of such persons was a work that the police had jurisdiction over and that it should be up to the police commission to take steps to get at the guilty party or parties.

## Strong Man Wants to Wrestle

J. W. Hill, Ontonagon's "strong man," is getting himself in condition for a season of wrestling matches. He has been working hard all summer and has reduced his weight from 270 pounds to 246 and says that he will weigh down to 225 before the winter sets in. He challenges anyone in the United States for a match either in Ontonagon or elsewhere. It is Hill's chief desire to secure an engagement with Fred Pilkoft of Duluth, who claims the Finnish championship. He will meet Pilkoft at any time or place and wrestle with him on any terms or any style hold. Hill would also like to have someone who claims to be strong make a proposition relative to heavy lifting. Hill has one set of dumbbells that no man excepting himself has ever been able to lift, while Hill handles them with ease. Hill has not wrestled over two years, but he says that he will be in shape to show those heavy boys a few "stunts" this winter that will surprise them. Mr. Hill was instrumental in Lehto's success as a wrestler and wrestled with Lehto about three years ago to a draw, being on the mat about nine minutes.

## Lake Trout Trolling Fine Sport

Generally a profitable and ever a popular pastime during the month of October is trolling for lake trout in the waters of Lake Superior in the vicinity of Munising. Not for many years, if ever in the history of the village, it is asserted, has this sport been better than during the present season. Only the other day fifteen boats, loaded with fishermen, were seen off Grand Portage, where the best fishing is supposed to be, and according to reports the occupants of each and every boat were well rewarded for their efforts. All had at least a few fish and some had a considerable number. Harold Stewart is said to have taken the largest lake trout this season, the fish weighing forty pounds. Some of the boats took home as much as 150 pounds of fish, which even at eight cents a pound, made the catch well worth while. Those who indulge in trolling for lake trout declare that effecting the capture of a big one—say, from twenty pounds up—is no child's play. The roof of the mouth of a large lake trout is so tough as to be almost impenetrable by the largest and sharpest fishhook. But tightly that he may be brought to the gaff, provided one keeps him constantly coming toward the boat. Once the trout is permitted to turn around he generally succeeds, fishermen say, in "spitting" out the hook and his disgusted would-be captor loses him. Sometimes the fish takes notion to make off with the line and if he is large enough seems to have little difficulty in getting the occupants of an ordinary rowboat a swift ride over a considerable expanse of water.

## Asks \$10,000 for Boy's Death

Jonathan E. Snell of Sault Ste. Marie announces his intention of seeking to recover \$10,000 from the city and others who are alleged to be indirectly responsible for the death of his adopted son, Harold Verne Snell. The child, four years of age, was drowned in an old quarry pit four weeks ago. The complaint alleges that the city is responsible for the reason that the pit was not properly guarded, though under the control of the city. Mr. Snell's communication to that effect has been referred by the common council to the city attorney and the board of public works. Just what liability the city is under is asserted to be problematical. The pit is on private property, and the boy, though under the age of reason, was a trespasser. The only "control" the city had over the pit, it is stated, was in an endeavor to have it filled up. Several years ago the pit was declared a nuisance and ordered abated. The owner consented to permit the city to use it

**THE HUB THE HUB**

Some interesting facts about the seedless pomelos of Siam are furnished to this consulate general by J. C. Barnett, agricultural adviser to the Siamese government. His statements about this citrus fruit, known in the United States mainly as grapefruit, follow: There are three kinds of seedless pomelos in Siam, all presenting the same outward appearance, but differing in flavor and inside appearance; two kinds have a sweet taste, but the one has a white meat and the other a red meat; the third kind has a white meat, but the taste strongly approaches sour. They are all more or less round (ball shaped), having diameters of four to six inches. The white is more prolific than the red, the trees grow ten to fifteen feet high, begin bearing at 4 years old, and continue to bear for more than a quarter of a century. One tree ordinarily produces about 100 pomelos in one year. During the dry season the pomelos yield no seed, but during a rainy season they sometimes contain many seeds. The trees like salt water. When the orchards are not overflooded by the sea water, it is the custom to apply about two pounds of salt to each tree.—Vice Consul General Carl C. Hansen, Bangkok.

### SLINEY-DONAHOE

### NUPTIALS YESTERDAY

Popular Ishpeming Couple United  
in Marriage at St. John's  
Catholic Church.

One of the prettiest matrimonial cere-  
monies that has been held in St. John's  
church in some years, was solemnized  
yesterday morning at 9 o'clock, when  
D. J. Sliney and Miss Mary Donahoe  
were united, Rev. J. A. Keul, the pastor,  
performing the ceremony. The bride  
was attended by her sister, Miss Sadie  
McHale, and Michael Navins, a life long  
friend and companion of the groom, was  
best man. The ushers were Joseph  
Sliney, brother of the groom, and P. J.  
O'Brien.

The church was filled with friends of  
the groom and his bride. As the bridal  
party entered the church, Prof. Fohrman  
played Mendelssohn's march. The groom  
and bridesmaid were the first to advance  
to the altar, the best man and bride fol-  
lowing. The marriage vows were spoken  
inside the altar railing and followed by  
the marriage ceremony the bride and  
groom and their attendants occupied  
seats in the sanctuary during the nup-  
tial mass.

The bride was attired in a most ex-  
quisite empire gown of crepe meteor,  
with train, and a veil of chiffon, em-  
chantilly flounce, and carried a white  
prayer book. The bridesmaid was at-  
tired in a pretty costume of white em-  
brothered marquisette over white messa-  
line, and carried a bouquet of chrys-  
themums. She wore a white lace bon-  
net, with white plumes and pink roses.  
The altar was decorated in white and  
green. During the service, the church  
male choir sang appropriate music. The  
solo, "Ave Maria" by Edward Hekey,  
and the "Agnus Dei," by Henry Navins,  
were a most pleasing feature.

Following the ceremony the members  
of the bridal party and members of their  
immediate families repaired to the home  
of the bride's mother, Mrs. P. McHale,  
on West Division street, where a sumptu-  
ous dinner was served.

Among the wedding gifts was a mag-  
nificent waxed oak library table and  
chair from the city officials. Mr. Sliney  
was an elderman for a number of  
years, being chairman of the finance  
committee for some time, and is one of  
the city's most prominent citizens. He  
holds the position of assistant to W. H.  
Johnston, general manager of the Oliver  
Iron Mining company's Marquette range  
properties. He has been with the Oliver  
company since boyhood, starting in a  
humble position and advancing gradually  
to the important place he now holds.  
His bride was born and reared in Ish-  
peming and is one of the city's most  
charming girls. For some years past  
she has been employed as a teacher in  
the public schools.

Mr. and Mrs. Sliney left last night on  
the St. Paul train for points in Colorado,  
Montana and other western states. He  
has two sisters living in the West, one  
in Denver, and the other in Montana,  
and they will visit both of them. They  
will be absent a month.

Out-of-town relatives in attendance  
at the wedding were Mrs. James Ken-  
nelly and John McHale, both of Escana-  
ba, and James Donahoe, brother of the  
bride, who is located in the Michipicoten  
district, in Canada. Mr. McHale,  
who is an attorney, is soon to leave  
Escanaba for Chicago, where he will en-  
ter the law office of Phil J. McKenna,  
formerly of that city.

### WILL BENEFIT OTHER RANGES

#### Surrender of Hill Lease by Steel Trust Will Mean More Exploratory Work.

That the surrender of the Steel cor-  
poration's lease on the Great Northern  
ore lands will be a good thing for the  
other ranges in which the corporation is  
operating properties is the opinion of  
Ishpeming men. It is expected that  
after the corporation surrenders the  
Great Northern lands more attention will  
be paid to the development of its hold-  
ings in other districts.

The Steel corporation owns extensive  
areas of mineral lands and the explora-  
tion and development of these holdings  
would be welcomed by the people in  
the districts where they are located. The  
corporation could do much more on the  
Marquette range than it is doing at  
the present time, as its exploratory  
work in this county has been conducted  
on a small scale compared to the manner  
in which the Cleveland-Cliffs Iron com-  
pany has conducted similar operations.

**Good Sized Railroad System.**

The Steel corporation's railroads are  
in keeping with its mining properties in  
value and importance. At the close of  
last year the corporation was operating  
2,036 miles of main line, 350 miles of  
side track and 921 miles of yard and  
siding, a total of 3,307 miles. This  
mileage is double that of the Reading  
system and double that of the N. Y. &  
Western railroad. The Lake Shore  
system operates only 700 miles more  
than the Steel corporation. The com-  
pany's railroads consist of the Duluth  
& Iron Range, Duluth, Mesaba & North-  
ern, Elgin, John & Eastern, Chicago,  
Lake Shore & Erie, the Union railroad  
and the Bessemer & Lake Erie systems.  
The corporations has 1,168 locomotives  
and nearly 50,000 freight cars. In ad-  
dition it owns 203 steamers and barges.

**Extensive Acreage in Lease.**

The IronAge, after reciting prelimi-  
naries leading up to the Great Northern  
ore lands lease says:

"Of lands covered by the lease to  
Great Western Mining Co., holding de-  
partment of the Steel Corporation in the  
Hill ore lands lease, there are 39,  
280 acres, Great Northern Railway  
holds in fee about 19,700 acres, has a  
leasehold in some 15,400 more, owns  
other fee interests than half in some  
300 acres and has under lease from  
other fee owners at royalty rates that  
permit it a profit in the Steel Corpora-  
tion transaction 28,900 acres more. Great  
Northern must be interested in title to  
some 1420 acres that had been leased to  
other operators prior to Great Western  
Mining lease.

"There is also a considerable acreage  
in the Great Western lease in which ore  
certificates have no interest, as the  
lands are leased to Great Northern at  
the same royalty as Great Northern re-  
ceives from the Steel Corporation. As  
to these lands the Great Northern rail-  
way is beneficiary, as the ore taken  
therefrom must be shipped to Lake Su-  
perior over that line, which secures what  
is commonly supposed to be a very large  
profit thereon."

**Heavy Royalties.**

Commenting on the scale of prices  
which the Steel Corporation pays, the  
article says that, should freights de-  
crease, the royalty portion rises similar-  
ly. The impression is general that the  
sliding scale of royalties is based on  
the definite factor of 3.4 cents per an-  
num, added to the price of 1907; but

**Millions Spent on One Process.**

A steel man who has inspected the  
Hill ore territory says the Steel Cor-  
poration has spent millions for ore-sepa-  
rating machinery. The Hill ore is said  
to be streaky and cannot be handled as  
economically as the average run of high-  
grade ores in the north. The problem  
of separating the ore from the sand has  
not been thoroughly solved.

A representative of an independent  
steel company says: "I believe the lease

## Classy Clothes for Men

Every man owes it to himself and his friends  
to be well dressed. Yes, a man's friends have a  
claim on him; they may think highly of a man's  
character and his abilities, and yet wish that he  
would look "more presentable." There may be  
differences of opinion as to what he meant by well  
dressed, but there is no excuse for any one not to  
be spic and span when there's Gately's to come to.

We have done all the style study for you—ma-  
terials, making, fit—all have been given expert  
attention. Yours just to pick and choose.

## GATELY-WIGGINS

ISHPEMING • CALLUMET • HOUGHTON IRON MOUNTAIN  
210 MAIN ST. 121 STEVENSON ST.

**PAY AS YOU GET PAID**

This idea is not in accord with terms  
of the lease, which is distinct as to the  
advance of 4 per cent on the original  
prices, which in part are as follows:  
Ore at 59 per cent, \$85 royalty; 66 per  
cent, \$118.75 royalty; 63 per cent, \$1-  
04.28 royalty.

The minimum of ore to be produced  
in 1911 is 3,750,000 tons, at royalty rate  
of 98.6 cents a ton. Royalty to be paid  
in January, 1912, will, therefore, be  
\$3,697,500, providing the Steel Corpora-  
tion is unable to make settlement on  
basis of actual grade of ore shipped un-  
der the entire contract to that time.  
If it can only do providing it shall  
then have completed shipment of all de-  
ficiencies to that time. As this will  
mean shipment during 1911 of 9,433,191  
tons, it is improbable any settlement  
can then be made.

To reach the accrued minimum up to  
the close of 1912, the Steel Corporation  
will have to take about 7,000,000 tons  
for each of the two years. It is safe  
to say that the minimum will not have  
been met before end of next year. When-  
ever that time arrives, there will be a  
return to the Steel Corporation of a  
sum based on the difference between  
grades of ore paid for and those actu-  
ally shipped. How much this may be is  
impossible of determination now. It may  
be assumed that average grade of ore  
shipped for these years will not be up  
to 59 per cent and that average grade  
to be shipped during term of the lease  
will not exceed 54 per cent.

Children's Sweaters—In colors brown,  
gray, green, blue, etc. Sizes, 22 to 30.  
Values, \$1-25. On sale now at \$1.00.

cities and they render a great deal of aid to the immigrants. "Only a short time ago a woman in California wired our missionary department in New York, asking them to locate a certain family that was expected to arrive from the old country and to see that they were properly taken care of while in the city and sent on their way to California.

The scope of the missionary work being conducted by the Woman's Christian Temperance Union in these cities is broadening right along and no one except those who are directly interested, fully realize the great good that our members are doing to strangers from the foreign lands.

While in the upper peninsula Mrs. Wilson met many members of the Woman's Christian Temperance Union who were favorably impressed with the outlook. She commented on the fact that this is a hard field for temperance workers, but said she was pleased to note that they are making progress and was satisfied that the membership of the various branches of the organization in this section will grow more rapidly in the future than they have in the past.

### \$300,000,000 OF GOLD MINED FROM GRAVELS

#### Geological Survey Issues Interesting Report on the Sierra Nevada Placer Region.

Washington, Oct. 25.—The natural distribution and origin of the \$300,000,000 of California gold which has been mined from the tertiary placer gravels of the Sierra Nevada is the subject of an exhaustive report by Waldemar Lindgren, geologist, which has been issued by the United States Geological Survey as Professional paper 73.

Studies by the Geological Survey on the tertiary placer deposits of the California Sierra began in 1886 and were concluded about fifteen years later. During this period twenty-two quadrangles were topographically mapped and fourteen of these were studied in geologic detail and the results published by the survey in geologic folios. Professional paper 73 includes the salient features of this earlier work, most of which was accomplished by Mr. Lindgren himself. The report, thus comprehensive in geographic scope and the result of careful studies, is believed to be the most complete and thorough description of a great placer-gold province ever published.

While in the main the report is a detailed description of the entire area covered, including these gold placer gravels, Mr. Lindgren's general account of the tremendous earth forces which built up the Sierra, freed the gold from its mother rock, and then brought about its concentration in prehistoric river channels is a most impressive description of continent building. Looking backward through successively long vistas of time in which periods covering millions of years supplanted the centuries by which we now compute its passage, the geologist pictures the uplift of the new-born mountain range by the forcing upward of great bodies of molten granite. This was closely followed by the introduction of great masses of gold-bearing quartz. The resulting highland due to this continental uplift was then planed down by erosion in early Cretaceous time—a geologic period many thousands of years before the advent of man upon the earth.

Concentrated in Prehistoric Beds. After this erosion, and when the mountains had been reduced to gentle outlines, deep rock decay took place and much gold was released. Renewed uplift and the formation of steeper slopes resulted in greater erosion which concentrated the loosened gold along definite stream channels. During this period of most active gold concentration, faulting and slipping of the rock masses, with down throw on the east side of the Sierra, had transferred an approximately symmetrical mountain range to one with a steep easterly slope.

Tracing the long pathway of this early history the geologist now finds that toward the end of what is known as Tertiary time—a comparatively recent geologic period—long quiescent volcanic forces vigorously reasserted themselves. Rhyolite flows pouring from many craters

filled the valleys covered with gold-bearing gravels deeply burying the gold, and new stream courses were outlined in the old valleys. Renewed disturbances and eruptions began along the scarcely heaved eastern breaks of the Sierra, resulting in a westward tilting of the main blocks of rock. This encouraged deeper cutting by the streams, which repeatedly crossed their old courses, so that now the concentration of gold proceeded under less favorable torrential conditions. At this time volcanic vents were opened along the crest of the Sierra, many of them sending forth immense volumes of lavas, ashies, and mud. These great flows filled many of the valleys to their rims and converted almost the whole of the northern Sierra into a desolate steaming mass of volcanic mud. Stream courses now began the canyon-cutting epoch, amazing in its results as we see them to-day. In many places the old rivers of Tertiary time were exposed, and cross sections of their valleys are now seen on steep canyon slopes, many of them high above the present river beds; but large stretches of the old river channels remain blanketed beneath a thousand feet or more of volcanic mud, now hardened into rock.

Advent of the Gold Hunters. The geologic events thus outlined were followed by the happenings of more recent history. In 1849 an army of gold seekers invaded the Sierra. They worked first along the present streams, but gradually the metal was traced to the old tertiary river beds on the summits of the ridges and to the quartz veins, the primary source of all the gold in the Sierra Nevada. Millions of dollars were produced annually up to the seventies of the last century, but since that time, owing to the prohibition of hydraulic mining and the gradual exhaustion of the richer channels suitable for drift mining, the industry has slowly diminished, until now less than \$1,000,000 is produced annually. Mr. Lindgren says: "Gold is still contained in the tertiary channels; miles of them are still unworked, but the problems are how to extract it without damage to other property from the debris and how to reduce the cost of drift mining so as to permit the exploitation of the less remunerative deep gravels." In this connection Mr. Lindgren has traced the old channels, and accurate maps accompanying his report show in detail the restoration of the tertiary drainage lines.

To compensate for the decrease in hydraulic mining, a new industry, that of dredging, has been developed along the bottom lands flanking the range and from this source, during 1908, gold valued at nearly \$7,500,000 was recovered.

ator and will be in the dividend paying class at any moment when the officials decide that it is wisdom to double the present capacity, then Alouez has advantages. Just at present the situation at the Alouez is much better than at the Centennial. The rock which the Alouez is sending to the stamp mills is running twice as high as that in copper in some stretches, as Centennial. In fact the situation right now is that Centennial is not making a cent and has actually lost money during most of the quarterly period of the year. Of course, ultimately, the Centennial is going to get into the richest copper course to be found anywhere on the Kearsarge lode. When the Centennial does get under the Wolverine and opens the same copper courses that the Wolverine is shipping there will be no doubt at all as to its merit and value and standing. In the meantime, the situation is none too brilliant, certainly not compared with the Alouez.

But the Alouez was quoted the other day as asserting that the Alouez was now in position so that dividends would be in sight any time the management decided to double the output. Alouez today is making a very good showing and is presently limited in output by the fact that the concentrates are coming out of the mine. It does not seem good policy to consider doubling production in these days of unfortunately low priced metal. However, when the metal does advance no mine in the district is able to profit by the advance to any greater financial betterment than the Alouez, for during the past year the underground openings have been extended in a very thorough manner. Furthermore, the rock that is now coming to the mill is showing copper contents that are favorably compared with the best that is coming from the Kearsarge lode at any point and away above the average run of the lode.

Alouez has not simply run into a streak of rich copper rock, which was the usual experience of the Alouez in the old conglomerate lode developments, and then run into poor ground again with the resultant pessimism and decline of stock values. The Kearsarge lode does not run in those streaks, like the conglomerate. Furthermore, the Alouez has so much ground broken in advance that it is known just what can be counted on, just what percentage to anticipate with a stamp mill running at double capacity. It would not surprise those best acquainted with the showing in the mine if the Alouez should, within a comparatively short time, make a record of copper content even better than the best shown by the Ahmeek.

It must be realized, too, in considering these mines, that we have a fine model stamp mill, owned independently and paid for and recognized all over the district as right up to the minute in equipment and management, as proved by the results obtained, in fact practically the best model mill showing in the district. It is just a question of "when!"

#### WHERE COPPER IS REFINED.

Eight plants handle the refining of upwards of 1,000,000,000 pounds of copper in the United States annually. When all plans have been carried out, the Guggenheim with their three refineries will lead in capacity with a total of 480,000,000 pounds a year. At the moment there is being sold through their sales agency approximately 340,000,000 pounds per annum.

Baritan	408,000,000
Boston & Montana	48,000,000
Nichols	398,000,000
Guggenheims	480,000,000
United States Refining	180,000,000
Balbach	30,000,000
Total	1,842,000,000

Ultimate capacity.

Selling and refining of copper have always gone for the most part hand in hand. The United Metals Selling company handles practically all of the Baritan and Boston & Montana output, which is full capacity would total 450,000,000 pounds. The Baritan plant, under recently acquired contracts, has been treating the product of three companies, Miami, British Columbia and South Utah, which it does not sell. All other copper refined by the International Smelting & Refining company the United Metals Selling company markets. The Nichols Copper company does not maintain a selling agency, its product being sold by the American Metal company. In addition to the Nichols output the American Metal company operates the Baritan, each refinery. The best customer of the Nichols company has for years been Phelps, Dodge & Co., with about 135,000,000 pounds of copper at the current rate of operation. Phelps, Dodge & Co., alone of the big selling agencies, do not own a refinery.

A close working alliance has existed for some years between the United States Smelting, Refining & Mining company and the E. Vogelstein & Co. selling agency, whereby the latter markets the output of the former. The Calumet & Hecla company owns and operates a small refinery at Buffalo, where a portion of its subsidiaries' product is being treated electrolytically. There is also the silver bearing rock of the Quincy com-

pany has been electrolytically treated for some time past.

Received highest award World's Pure Food Exposition, Chicago, 1907.

**BUTTE-BALLAKLAVA.** The Butte-Ballaklava company is shipping about four cars of ore a week to the East Butte smelter, which ore averages a little better than 4 per cent copper. Mining is being carried on in the 1200 and 1400-foot levels and preparations are being made to carry the shaft down to a depth of 1,600 feet. None of the ore so far encountered is nearly as rich as the ore on the 800 and upper levels, which was being mined up to the time the company was compelled to cease operations through a junction secured by the Anaconda company, on the ground that the Butte-Ballaklava company was extracting ore from property owned by the former. The parts now being worked are claimed to be outside of the territory covered by the injunction. The company is blocking out considerable ore with the expectation of increasing shipments to about 100 tons a day in the near future. No time has yet been set for the hearing of the suit brought by the Anaconda company and it is possible that several months will elapse before it comes up.

**ANACONDA.** The important part electricity is to play in the operation of the mines of the Anaconda company in the near future is just being realized. Every day in the week dozens of electricians are at work underground, stringing wires and generally preparing for the substitution of electricity in place of horses and mules for hauling ore. Immense rolls of copper wire have been lowered into the mines and by next spring it is estimated that every level in all the important mines of the company will have the electric cables in operation. Recently the electric locomotives were ordered and they are to be delivered in three and six months. Thirteen have been ordered to start with, but at least two dozen more will be ordered in the near future.

**Take a JAP ROSE BUBBLE BATH!**

Use JAP ROSE Every Day

Established 1879

dozen will be required before all the mines are supplied. Eight months from now and nearly all the mines will be equipped for hoisting ore by compressed air operated by electricity and the coal bill, which now amounts to over \$2,000,000 a year, will be reduced to almost nothing. Electricity is estimated to be at least 5 per cent cheaper than steam.

#### Markets

##### WALL STREET STOCKS.

Paine, Webber & Co. yesterday wired from New York as follows: The market today did not reflect any aggressive buying, but some of the rails, such as the Erie, Southern Pacific, M. & T. and Missouri Pacific have been quietly accumulated. The usual list was rather irregular, owing to such liquidation as was witnessed in Republic Steel. In addition to the accumulation of the above mentioned cheaper stocks, we see evidence of buying under the market in such stocks as Union Pacific, Reading, Atchison, Southern Pacific and Louisville & Nashville. The indicated crop of cotton as shown by the ginners' report of today will afford additional traffic for the railroads throughout the South where the staple is being merchandised. We see some favorable reports as to a firmer market for the copper metal, and as this product will not be influenced by the tariff tinkering in any kind of a general improvement in business and market conditions, the best of the copper stocks will rapidly gain favor. The day's closing prices were as follows:

Amalg.	117	No. Pac	117
Am. Smelter	67 1/2	Penn	12 1/2
Anacoda	24 1/2	Reading	14 1/2
Atchison	105 1/2	Rock I.	24 1/2

Mo. P.	10 1/2	Wash. P.	25
Mo. & W.	107 1/2		

##### Boston "Coppers."

Of the market at Boston, Paine, Webber & Co. yesterday said: This movement in copper begins to look like the real thing. It has as a basis the improvement in the metal market, which can be the only reason for a prolonged upward movement in the metal stocks. We have had small rallies on short covering and manipulation, but the prices soon sagged back to their old level. We believe, however, in this case that the advance is fully justified by improved copper prices and by the oversold condition of the market. We look for a further advance in Lake, North Butte, Copper Range, Greene Cananea, Butte Coalition, Hancock and Calumet & Arizona. All these stocks have the confidence of the traders and will be the first to feel the new buying which will come with the return of activity. Closing quotations follow:

##### Chicago Wheat.

Paine, Webber & Co.'s Chicago correspondent had the following to say of the wheat market in that city yesterday: In view of all the wheat which has been liquidated by buyers of last week and the continued weakness in all foreign markets, with a regular flood of bearish cable reports concerning the Argentine prospect it is not in any sense a weak market. The conditions in the wheat trade to consider are not much changed from previous days. One English cable went so far as to state that Europe expects the Argentine surplus to make good any shortage in other exporting countries. The one thing to keep in mind is Argentine's erratic climatic conditions and acreage. The market at the close was acting stubborn and it looks as if the bearish news was fairly well discounted. The closing prices were: May wheat, 103 1/2; corn, 63 1/2; oats, 40 1/2; pork, 15 1/2; lard, 9 1/2. December wheat, 101 1/2; corn, 64 1/2; oats, 47 1/2. January pork, 16 1/2.

##### Rue's Market Letter.

George F. Rue, broker of Ishpeming, yesterday said: The daily improvement in the metal market is at last having its effect on the copper share market. Lake was easily the feature in Boston, advancing from 25 to 27 1/2 on excellent buying based on conditions at the property, Hancock, Greene Cananea, Butte Coalition, Giroux and Calumet & Arizona were also in good demand. Buy any of the good coppers. These are all dirt cheap at the present level.

## ARRIVES HOME FROM I. O. O. F. CONVENTION

### R. G. Jackson Tells of Big Meeting That Was Held in Saginaw Last Week.

R. G. Jackson is home from his trip to Saginaw and Jackson, where he attended the annual convention of the grand lodge of Old Fellows of the state, and the meeting of the board of control of the Old Fellows' home. The grand lodge had the co-operation of the entire population of Saginaw in making the visitors' entertainment successful. There were from 2,500 to 3,000 strangers in Saginaw during the convention. The regular hotels and boarding houses did not begin to furnish accommodations for lodging and board, and it was in housing the visitors that the local organization had the co-operation of the citizens. A canvass was made of all those who could accommodate visitors, and a good many delegates stayed in private homes. Churches and social organizations did all they could to help feed the hungry crowds, by serving lunches and dinners at nominal rates.

Toward the end of the convention, the new grand officers for the coming year were elected. Frank B. Hamburger, of Detroit, was elected grand master and Harry F. McNeil was elected deputy grand master. The grand warden for the coming year is Herbert A. Thompson of Williamstown. Henry N. Wilder was re-elected grand secretary. Fred Cutler was elected grand treasurer. Louis C. Cranston was elected grand marshal. Robert E. Newville was elected grand conductor, and Thomas S. Cupbush was elected grand herald and Rev. S. J. Branch was elected grand chaplain.

## GOOD DRINKING WATER.

The fire department was called to extinguish a fire at the home of Herman Grandville, at the Collins location, yesterday morning at 7:30. Electric light wires, crossed in the attic, scorched the beams on which they were fastened, and filled the house with smoke.

## TOO MANY DRUNKS.

An Ishpeming man who came to Negaunee yesterday afternoon spoke with emphasis regarding the difference in the number of drunks found on the streets

here at night, as compared to the number in Ishpeming. In Negaunee there seem to be some saloon keepers who disregard the law which makes it a crime to sell liquor to a man already well under the influence of intoxicants. This offense is just as serious as selling liquor to a minor. It is suggested that a good many men who are "run in" by the police might be saved that disgrace if the liquor dealers more generally refused to sell to anyone already under the influence of intoxicants.

## PROGRAM FOR RECITAL.

- The following program will be rendered at the organ recital to be given at the Mitchell Methodist church Saturday evening, beginning at 8 o'clock:
- Prayer Rev. Cansfield.
  - (a) Meditation E. D'Evry
  - (b) March Pontificale Healt
  - (c) Death of Ase Grieg
  - (d) Eventide Meale
  - (e) Gloria Farmer
  - (f) Chor. Guilmant
  - (g) Offertoire in G Batiste
  - (h) Postlude in D flat Martin
  - (i) Alleluiah Wilson
  - (j) Chor. Von Wilh
  - (k) In der dämmerung Mozart
  - (l) Fugue in B flat Wagner
  - (m) Evening Star
  - Remarks Rev. Pascoe.
  - Procession March Clark
  - Ernest Yell, of Sands, was in the city yesterday, on business.
  - Clyde Drake, of Chicago, a brother of Dr. R. E. Drake, is in the city visiting.
  - Henry C. Russell of Marquette, spent yesterday in Negaunee, on business.
  - Mrs. A. McGraw, of Menominee, is in Negaunee visiting Mrs. A. Mattland.
  - Rev. Father Langner has returned from the consultation meeting of the diocese at Assinins.
  - A number of Negaunee people will go to Ishpeming tonight to see the production of "Checkers" at the theatre.
  - C. L. Sporely and son, Everitt, went to the Sporely camp at Little Lake yesterday to enjoy a few days' hunt.
  - Cleo Meilleur and family moved into his new house on the corner of Case street and McKenzie avenue yesterday.
  - Mr. Rosey, representing the Anso company, of Binghamton, New York, will be at Israel's studio today demonstrating professional and amateur Cyko photographic papers.
  - Mr. and Mrs. Harry Salvage and wife are grateful to the owners, superintendent and employees of the Breitung mines for their kindness to them in their need. Mr. Salvage was crippled at one of the mines and every fall the mining men take up a subscription to help them during the winter.
  - J. B. Mondloch, the Owl's organizer, has returned to the city after a short absence, during which he visited Washburn, Wis. Upon leaving Negaunee again, he will go to Munising to organize a nest.
  - The fire department was called to extinguish a fire at the home of Herman Grandville, at the Collins location, yesterday morning at 7:30. Electric light wires, crossed in the attic, scorched the beams on which they were fastened, and filled the house with smoke.
  - Fourteen Finns left Tuesday night for the old country, traveling in a party. A gathering of their countrymen saw them off. Local ticket agents report the travel to Europe is picking up, and they expect the coming thirty days will establish a record in the number of tickets sold.
  - The funeral of Victor Ellison was held yesterday afternoon. The body was taken directly to the cemetery from the morgue of Oliver Johnson, following a short service by the Rev. Mr. Hultman of the Swedish Mission. Two aunts of the deceased, Mrs. Christian Johnson of Alford, Mich., and Mrs. Andrew Dahlberg, of Baraga, came to Negaunee to attend the obsequies.
  - Richard Jenkins who has been a resident of Negaunee since March, leaves today for New York, where he will embark on the American Line steamer Philadelphia, sailing Saturday for his former home in Plymouth, England. Three years ago he came to America, landing in Canada, where he made his home until this spring. He does not expect to return to this country, for a few years, at any rate.

### Box Containing Twelve Partridges Confiscated at Milwaukee Results in Arrest of Two Escanaba Men for Violation of the Interstate Commerce Statute.

### Chas. E. Brewster, Who Has Been Traveling Over Upper Peninsula for Several Weeks, in Case Proceeded Under Law Passed at Last Session of Congress.

At last the secret is out. For several weeks Charles E. Brewster, an employe of the United States biological survey, has been spending much of his time in the upper peninsula, and when questioned regarding his business here he looked mysterious and led the conversation off into general subjects, usually a tirade on the revised Michigan game laws, which Mr. Brewster considers a huge joke. But with the arrest of Nicholas Niece and William Hart at Escanaba, Mr. Brewster's activity in the upper peninsula is explained.

In proceeding against these two Escanaba men, who are charged with having shipped partridges in a box to Milwaukee on Oct. 10, Mr. Brewster has made the first arrest of his kind to be made by a federal officer in the state of Michigan. The shipment of birds from Escanaba was caught in transit in Milwaukee by the federal officers and held as having been shipped in violation of the criminal code of the Interstate Commerce laws.

Immediately upon the arrest being made, Mr. Brewster was notified and he went to Milwaukee. After ascertaining the facts regarding the case, he went to Escanaba, where on Monday he consulted with Deputy Game Warden Herman Leisner. Though the name of neither the shipper nor the person to whom it was consigned could be distinctly made out, the shipment was traced Tuesday to Nicholas Niece.

Mr. Niece admitted having made the shipment and involved William Hart in the transaction, the latter having packed the birds in the box and delivered them to the express office. By this act he made himself liable, under the federal law, the same as Mr. Niece.

**Fined Under State Law.**  
Mr. Niece and Mr. Hart were brought before Justice Glaser in Escanaba, where they were charged with violation of the Michigan state law in having shipped birds out of the state. They pleaded guilty. Mr. Niece being fined \$25 and costs, while Mr. Hart got off with a fine and costs amounting to \$12.75. Whether the two men will be prosecuted under the federal law as well as that of the state, Mr. Brewster refuses to state.

**Working With State Wardens.**  
"Our officers are working in close cooperation with the game wardens of all of the states and we are determined to wipe out the practice of sending game to the big centers from outside points. It has been known for years that upper Michigan has been a hot bed of game law violation, both in killing and shipping game. The national government as well as the state officials are determined that this practice shall be broken

up and we will continue to make arrests both under the state law and under the federal law until the violations are at an end.

"I recently spent two weeks in the northern part of Michigan and I must say that Warden Oates has the best and most perfectly organized force Michigan ever had for the protection of game in this state. I look to see Mr. Oates accomplish wonders in stopping violations in this state and when it comes to shipments outside the state our officers will be constantly on the watch to see that pot hunters get a warm reception in seeking a market for their game."

## BASEBALL DANCE.

### Will Be Held November 3—Proceeds Will Wipe Out Deficit.

Very fair progress is being made with the task of placing tickets for the baseball dance that will be given in Fraternity Hall the night of Nov. 3. The fans who are conducting the sale are meeting with few refusals and in some cases as many as ten tickets have been purchased. Trombley's orchestra will furnish the music, and all necessary arrangements will be made to assure the people who attend a pleasant evening. The proceeds of the dance will be applied to cleaning up the deficit left after the players were paid off at the close of the season. The receipts in no one of the cities represented in the league were sufficient to defray all the expenses, and it has been necessary to do considerable post-season hustling to settle all the bills. The teams would have broken just about even had it not been that rainy weather caused the loss of two or three of the Sunday dates, the only dates that turn much money into the treasuries.

There is a sum somewhat in excess of \$200 that has to be raised here and the expedient of giving a dance was judged the best way to raise the money, as it will enable the men interested in the team to make the deficit good without calling on anyone for more than a modest amount. Whether there is a team here next year will depend largely on the success with which the effort to clean up the indebtedness meets, as it is pointed out that no one is likely to take up the work of organizing next year if it is necessary to pay off an old debt before a start can be made. The fans are, therefore, urged to respond liberally to the present appeal for assistance. If the dance is the success it is hoped it will be a meeting to consider plans for next year will be called shortly after it is held.

## BASKETBALL NEXT.

### K. of C. Team Likely to Reorganize and Lease Legion Hall.

With the coming of cooler weather, interest in basketball is being revived and it is predicted that this sport will be more popular than ever the coming winter. The Knights of Columbus team, which closed up everything before it last season, will be reorganized and the manager is now making arrangements to lease Legion Hall for the winter. Last year the hall was held under lease by the Red Cross, but this lease has been cancelled and the K. C.'s are dealing direct with the owners. It is probable that the K. C.'s will take over the hall on about the same terms as the Legion last year, and, if so, the lessees will be in position to sub-let it to others on dates when there are no K. C. games.

The K. C. team line-up will be practically the same as last year, although a number of likely basketball players have recently been taken into the order, some of whom may show up well enough to displace regulars on last year's five. One position will have to be filled, as B. E. Brown, who was one of the star players last season, is now in Milwaukee.

It is expected that a basketball team will be organized at the high school and also at the Normal. There is already a good deal of basketball talk among the high school boys, and if satisfactory arrangements for a hall can be made, a fast team is likely to be developed.

Members of the Macabees who are dissatisfied with the proposed increase of rates will hear something to their advantage by writing to S. G., care Mining Journal, 10-26-11.

## LOGGING RAILWAY EQUIPMENT FOR SALE.

Having purchased the Manistique railway that ran from Grand Marais to Seney, I am in position to furnish one locomotive and the following for immediate shipment: Two box cars; 25 flat cars, 30 feet long. Some 35, 40, 50 and 60-pound steel rails in first-class condition, besides a lot of track equipment, all F. O. B. Seney. I also can furnish for immediate shipment a lot of Russell log cars at bargain prices. I also deal in all kinds of new spikes and fastenings.

# WOODWORTH WILL OPEN SECOND PICTURE HOUSE

### Has Leased Colonial Inn Rooms and Will Put in Another Modern Theatre.

J. C. Woodworth, proprietor of the Grand theater, has leased the rooms formerly occupied by the Colonial Inn, and will open another moving picture house there as soon as the necessary changes and repairs can be made. Carpenters, decorators and electricians are to begin work at once and Mr. Woodworth hopes to be able to open the new theater by Nov. 15.

The new theater will be equipped with the latest moving picture machinery and the pictures shown there will be in every way equal to those shown at the Grand. Different sets of pictures will be shown at each theater until the change nights will be Tuesdays, Thursdays and Saturdays, while at the Grand new pictures are put on Mondays, Wednesdays and Fridays. With this arrangement, a new set of pictures may be seen at one or the other theater every day in a week.

Before the new theater is opened, the Colonial Inn building will be thoroughly remodeled. A new front similar to that at the Grand will be built. The interior will be redecorated throughout and a raised floor will be put in. Opera chairs are to be used for seats, and it is expected that the seating capacity of the new theater will be close to 200, or about one-third greater than that of the Grand. The plans assure good ventilation. Two kinodrome moving picture machines will be installed and the films will be shown on a daylight screen.

Business at the Grand has been exceptionally good all summer and very frequently people have had to be turned away as the house was filled to its capacity. By operating the two theaters Mr. Woodworth hopes to be able to accommodate all with seats, and as equally good shows will be put on at both houses, the people will have opportunity to see the pictures at whichever house is the least crowded. Besides, the two theaters will afford the public opportunity to see twice as many of the best pictures each week.

## Theatrical

**"Get Rich Quick Wallingford."**  
"What a fool an honest man is for being a crook." This speech delivered by the promoter of shady financial deals near the finish of the fourth act of "Get Rich Quick Wallingford," furnishes the key to the plot of this "buzzy" play and gives, better than any other line in this breezy comedy, the idea which Geo. M. Cohan undoubtedly had in mind when he made over the Wallingford tales for the stage. "Get Rich Quick Wallingford" will be the offering at the opera house next Monday night. It is, if the dictum of many theatregoers is to be accepted, the liveliest of the many brisks plays Geo. M. Cohan has offered to the amusement world. It is a play with what has been called an uplift motif and while it is far removed from that class of stage offerings described as preachy, it points a most obvious moral.

**"Hottest Coon in Dixie."**  
At the opera house this evening a troupe of colored comedians, singers and dancers will present "The Hottest Coon in Dixie." This show is advertised as a musical comedy, and as it will be presented by colored people, including a bevy of chorus girls, it will be a novelty. It is heralded not as a burlesque but as a good, clean comedy show. There will be a street parade in the afternoon and a band concert in front of the opera house at 7:15 this evening.

# Special Announcement Regarding Louis Getz's Cloak Department

We wish to make the announcement that we have just received an entirely new line of Ladies', Misses' and Children's COATS at a great bargain from the manufacturers. They wanted money; we got the Coats, and you get the benefit by saving money in buying one of them now. These are all the very latest styles, including the man-ish ones with large collars, and in all the new Camel's Hair goods. This is an opportunity that comes to one, that should be taken advantage of. Come and make your selection early. We will hold any garment for you providing a deposit is made.
