

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED).

Issued daily except on Sundays. Contains Associated Press dispatches and is especially devoted to the Upper Peninsula interests.

SUBSCRIPTION RATES: Per year, by mail, \$6.00. Per month, by carrier, \$0.50.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

MARQUETTE, MICH., NOV. 3.

BUSINESS NOT SO BAD.

Considering the amount of calamity talk abroad and the long faces many of our most prominent citizens are pulling, business seems to be making a most satisfactory showing after all.

And then there is the farmer. This fortunate gentleman, who has certainly been coming into his own of late years, is enjoying another period of crops that are at least average and of prices that promise him very rich returns for his labor and his investment.

The gloom center is the east, and the very heart of the center is New York. There is found distinct disquietude because the Taft administration is embarking on prosecutions under the Sherman law.

The problem will be worked out successfully, and perhaps more quickly than most people expect. It is not long ago that the east, and New York in particular, was in much its present state of mind because President Roosevelt was putting through a well-defined plan for regulating and controlling the railroads.

A PLEASING OUTLOOK.

According to the statements of H. F. Waterman, secretary and treasurer of the Michigan Federation of Labor, who has been making a series of addresses in the upper peninsula, and who visited Marquette Wednesday evening, organized labor in Michigan will support the principle of the measure that is the special commission on an employers' liability law.

Emblagaard Dairy Pure Dairy Products From Holstein Cows. George Gillette DISTRIBUTOR.

and draw a bill on which they will be able to unite. The work of the special commission has been carried on with the idea in mind of giving a full hearing to the employment. Labor has been well represented on the board, although statements to the contrary have been made, and no effort has been spared to get its views.

The wise attitude of the commission in this respect has born excellent fruit. Labor throughout the state is apparently satisfied that its members have gone into the subject with the purpose of dealing fairly by all the interests involved, and it is ready to accept the recommendations that the commission will make as a conscientious effort to settle the mooted question in a manner that is fair to all.

From Washington comes the gratifying news that the postal department, for the first time since 1883, showed a profit for the fiscal year ending June 30, 1911. In twenty-four months the conduct of the postal department has resulted in the conversion of a deficit of \$17,500,000, in round numbers, into a surplus of \$200,000.

The women are to be the big factor in the forthcoming Los Angeles election. Of course; that is one of the penalties that follow on giving the women universal suffrage.

Belated railroad trains tell that the "kerensie crowd," the gentlemen who snare our game laws, are with us once more.

The Breitung-Kaufman interests and the Cleveland-Cliffs Iron company have evidently arrived at the decision that an admirable way to conserve that most significant of all resources—money—is to omit no possible precaution for keeping out of the courts.

The football season is getting on. Two important elimination contests will be held tomorrow. In the east Harvard and Princeton will play, for the first time in several years. Both are contenders for the eastern honors, and when the game is over one or the other of them will be pretty definitely out of the race.

The corporate excess plan would drive capital from the state, the manufacturers have been telling the members of the commission on tax inquiry. A very interesting generalization, no doubt. But get down to specifications, gentlemen. What the public wants to know is whether the plan is a fair and equitable one, and if so why. If it is not fair and

equitable, it also wants to know why. Buncombe is ever a poor substitute for argument.

Speaker Champ Clark takes a firm position against an amendment of the Sherman law. Champ believes that an attempt at revising it might result in its enasculation, and he favors letting it stand as it is.

Mayor Seidel, of Milwaukee, does not believe in prohibition, and he was frank enough to tell the delegates so at the annual convention of the W. C. T. U.

When asked if he gave R. J. Shields, of Superior, Wis., a blank check signed with his name, or if he had given a blank check to any one, Senator Stephenson rejoined, "No, sir, I have not got to that point yet."

Now that the chief is shortly to take up the task of deciding whom he will appoint to the supreme court, to succeed the late Justice Harlan, it is to be hoped that all the Grand Rapids, Mich., candidates have qualified.

The popular idea that the railroads had gotten entirely over the business of giving rebates is somewhat jarred by the charges that some of them have been unduly favoring the U. S. Steel corporation.

There are at least forty-nine varieties of plans for providing for the future of big business, every one of which is highly thought of by its principal proponent.

And in light of what it cost, it is clear that Insurance Commissioner Palmer did not say a word too much for the Marquette-Negaunee road.

Stories of Turkish victories, via Constantinople, are the subject of pronounced suspicion, in the lack of definite news from the front.

Belated railroad trains tell that the "kerensie crowd," the gentlemen who snare our game laws, are with us once more.

equitable, it also wants to know why. Buncombe is ever a poor substitute for argument.

A Laugh or Two

James Morro, day clerk at the Hotel Edward, Kansas City, Mo., encountered "new" a couple of mornings ago. The night before the "new one" was sprung a rural citizen from Osborn, Kas., registered at the hotel and was given the only unoccupied room in the house—one with a private bath in connection.

The next time Morro was approached by the guest was when the latter was ready to check out.

"Well, did you have a good night's rest?" the clerk asked.

"No, I didn't," replied the Kansan. "The room was all right and the bed was pretty good, but I couldn't sleep very much for I was afraid some one would want to take a bath, and the only door to it was through my room."

Trouble Ahead. When Grover Cleveland's little girl was quite young, her father once telephoned to the White House and asked Mrs. Cleveland to bring the child to the telephone.

Lifting the little one to the instrument, Mrs. Cleveland watched her expression change from bewilderment to wonder, and then to fear. It was surely her father's voice, yet she looked at the telephone incredulously.

After examining the tiny opening in the receiver, the little girl burst into tears.

"Oh, mamma," she sobbed, "how can we ever get papa out of that little hole!"

He Was a Good Forgive. I. R. Sherwood, Democratic representative from Ohio, tells this story: A man had for years employed a steady German workman. One day Jake came to him and asked to be excused from work the next day.

"Certainly, Jake," beamed the employer. "What are you going to do?"

"Vail," said Jake, slowly, "I think I must go by my wife's funeral. She dies yesterday."

Her Mistake. Sweet was the lass, low was the gas; it was the evening she expected him to put across the big question.

He did not look well. Something seemed to be troubling him. He tried to say something, but the words stuck in his throat, and the girl, noticing this, turned the gas even lower.

One for His Check. "Try our patent razors! Best value in the world! Two shillings and sixpence plus free, from Strop & Co., Sheffield."

Here and There. Fully 500 miles of roads on Vancouver Island are now open to the public and can be used by automobiles.

house and grounds as a resort for the faithful. The widow is understood to have made a good bargain in the sale.

Mrs. Clara A. Wright, of Newport, Wash., has announced herself a candidate for mayor of that city at the coming election.

It can be stated with perfect truth that a lump of sugar may be turned into diamonds. Not all the substance of the sugar, of course, will enter into the composition of the gem, but only the carbon that it contains.

At a recent drawing in the Fort Berthold reservation, North Dakota, the numbers from one down to 250 were said to vary in value from \$10,000 to \$5,000.

Shall Uncle Sam Hang Out Three Balls and Assist His Needy Citizens? Shall Uncle Sam follow the example set by France, Germany, Holland and other European nations and make it possible for the temporary embarrassed to obtain money on personal belongings without paying from 36 to 100 per cent interest on the loan?

Shall Uncle Sam follow the example set by France, Germany, Holland and other European nations and make it possible for the temporary embarrassed to obtain money on personal belongings without paying from 36 to 100 per cent interest on the loan?

Where the plan has been tried longest its success has been most marked, comments the Kansas City Times. The citizen is furnished with what money he needs up to a reasonable amount, on personal collateral.

FLINT—An unlimited supply of electricity will be carried on a line of steel towers now being erected between this city and the Au Sable dam.

CHICAGO & NORTHWESTERN. Important \$15,000,000 Property Expansion Is Almost Complete.

Milwaukee, Wis., Oct. 31.—Another six weeks is expected to see a very important piece of new mileage go into operation on the Chicago & Northwestern.

COUGHING AT NIGHT. Means loss of sleep which is bad for everyone. Foley's Honey and Tar Compound stops the cough at once, relieves the tickling and dryness in the throat and heals the inflamed membranes.

Lower State Notes

ROSEVILLE—Stove polish, that sets Henry House was using exploded, striking fire to her clothing. A neighbor tried to quench the flames but failed.

MUSKOGON—As a result of being thrown from the rear platform of his car, Obe Slaughter of Coopersville, conductor on the Muskogon interurban, died at Hackley hospital.

GRANT—As evidence that the northern counties "have nothing on" this vicinity when it comes to raising potatoes, J. B. Brackett of this place, who also owns a fine farm in Grant township, raised four potatoes that weighed 35 pounds and seven others, who can speak, read and write the English language.

GRANT—As a result of statements sent to rural patrons of the local telephone exchange, patrons plan a way to avoid the payment of a rate named by the company, which is an advance from \$12 to \$15 a year.

LUDINGTON—A telephone dispatch system adopted by the Pere Marquette Railway company between Ludington and Saginaw was put in operation this week and is giving satisfaction.

TRAVERSE CITY—G. Franke, a prominent farmer, very narrowly escaped inflicting serious or fatal injuries on two young men when he detected stealing chickens.

LANSING—Commissioner Glasgow of the Michigan commerce commission does not believe the decision of the United States supreme court regarding the safety appliances will retard the work of state commissioners.

FLINT—An unlimited supply of electricity will be carried on a line of steel towers now being erected between this city and the Au Sable dam.

CHICAGO & NORTHWESTERN. Important \$15,000,000 Property Expansion Is Almost Complete.

Moderate terms.
Prompt settlements.

City Brevities

Today's weather: Fair. Yesterday's temperatures: Seven a. m., 22 degrees; noon, 31; 7 p. m., 30; highest, 33; lowest, 19.

C. H. Schaffer left yesterday afternoon on a business trip to Grand Rapids. Chas. Rende's story "Paul Play," will be shown in moving pictures at the Grand today and tomorrow.

Over 800 deer licenses had been issued from the county clerk's office up to last evening. Last year 1,613 licenses were issued.

The Woman's Missionary society of the Baptist church will meet at 2:30 o'clock this afternoon with Mrs. W. A. Ross, West Ohio street.

S. J. Mitchell left last evening for Chicago to join his wife, who has been in that city for a few days. They expect to return Monday.

The Ladies' Aid society of the Methodist church will meet this afternoon at 2:30 o'clock with Mrs. Graves, 606 Pine street. The meeting is to be a "donation shower" for the Christmas sale.

The Woman's society of the Presbyterian church will meet this afternoon at 3 o'clock with Mrs. E. S. Bice, 343 East Hewitt avenue. Miss Conklin will give a talk on Holland.

J. C. Woodworth, proprietor of the Grand theater, left Chicago last evening to arrange for a film service and purchase the machines for the new theater he is soon to open on Front street.

William Daniels, first mate of the steamer Hurlbert Smith, which is at Duluth unloading coal, spent yesterday in the city, visiting with his mother, Mrs. Martin Daniels, 516 North Front street.

N. M. Kaufman, who came up from Chicago to attend the meeting that resulted in the formation of the Lucky Star and Bunker Hill mining companies, returned to that city last evening.

The supervisors of Kent county have arranged to give the deputy game warden 50 per cent of the fines imposed on game law violators. No such resolution has been adopted by the Marquette city board, as was stated, by reason of a typographical error, in yesterday's Mining Journal.

Death of Mrs. Martel—After a lingering illness, Mrs. Lane Martel, aged seventy years, passed away Wednesday evening at her home on East Prospect street. Mrs. Martel is survived by two sons, Peter and Abraham, both of this city. The funeral will be held from the residence at 2:30 this afternoon and will be conducted by Rev. Bates, G. Burt. Interment will be in Park cemetery.

L. W. Atkins Hurt—L. W. Atkins, of the firm of Ormsbee & Atkins, got a bad fall in front of the Nester Block yesterday forenoon, when he tripped over the cover of a coal hole. The walk was rather icy and Mr. Atkins was thrown prostrate, his face striking the outer edge of the sidewalk. He was taken to Hager Bros' store and a physician called. Several stitches were taken to close up a gash in his nose, but no bones were broken.

Has Made Good Record—For a wild carrier, the Pendennis White, a steamer owned by John Mitchell, of Cleveland, is believed to hold the record for the greatest number of cargoes this season. The Pendennis White left the L. S. & I. dock yesterday on her fifteenth round trip from lower lake ports to Lake Superior this season. On each occasion she has taken up coal and gone down with ore. Captain Fred Carter expects to make one more trip this season. She has been in service since May 23. She is 416 feet long with 50 feet beam.

Sutinen Case Settled—The criminal action started against August Sutinen, the Ishpeming druggist, who was accused by Ignas Socha, of West Branch, with having driven his automobile on a country road at a speed exceeding twenty-five miles an hour, has been withdrawn at the request of the complaining witness. Mr. Sutinen ran into Mr. Socha's rig just below Chocoley a few weeks ago, the car being wrecked and one of Mr. Socha's horses being badly injured. Mr. Socha is understood to have been paid \$250 by the automobile owner, in consideration of which all court proceedings were withdrawn.

Hunters Crossing Straits—South Shore train No. 1, due here at 3:15 p. m., has been from one to two and a half hours late this week, because of the large number of down state hunters who are coming across the straits into the upper peninsula. Up to Nov. 1, 1250 hunters had crossed the straits at St. Ignace and at least 500 have come over since then. Most of the hunters go into camp between St. Ignace and Marquette. The large amount of baggage carried by the hunters makes it impossible for either the Michigan Central or the South Shore trains to make their schedule. A special hunters' train will probably be made up at St. Ignace, and, if so, it should reach Marquette about on time.

Wedded in Iowa—The Anamosa (Iowa) Journal of Oct. 26 contains the following mention of the marriage of Mrs. Alia Bellinger, formerly of this city: "At the home of W. H. Holtman, H. Meek of this city and Mrs. Alia Bellinger of Marquette, Mich., were united in marriage by Rev. F. P. Shaffer of the M. E. church. Only the immediate relatives were present at the ceremony, which was followed by a delicious supper. Mr. and Mrs. Meek then repaired to their temporary residence at the H. Dripp's home on South Ford street, where they will be until their new home is completed. Mr. Meek enjoys a wide acquaintance in this vicinity, which has been his home for many years, and his many friends will be glad to welcome the delightful lady he has chosen, who made many friends during her visit here with her sister, Mrs. Holtman."

INSURE WITH PETER WHITE & CO.
ONE QUARTER OFF ON COLORED SWEATERS

Don't waste your money buying strengthening plasters. Chamberlain's Liniment is cheaper and better. Dampen a piece of flannel with it and bind it over the affected parts and it will relieve the pain and soreness. For sale by The People's Drug Store.

CHIEF DEPUTY IS ABOUT TO RESIGN

Ed. O'Connell Will Enter Race for Sheriff of Kent County, It Is Reported.

It is reported from Grand Rapids, and without contradiction, that Chief Deputy United States Marshal Ed O'Donnell, who visits Marquette as a deputy in the United States court, is about to resign, and will enter the race for nomination for sheriff of Kent county at the coming primaries. When he does, this district will be deprived of the distinction of having the oldest deputy in point of service in the United States. Mr. O'Donnell has served as chief deputy eighteen years under four succeeding marshals.

Chief deputy under four different marshals is a record. Mr. O'Donnell was appointed Feb. 4, 1894, by Marshal Charles Pratt. He was reappointed in turn by Marshals Wheeler, Waite and Whelan.

During the fall of 1906 United States Marshal Wheeler returned from a trip on which he had gone to serve a writ of ouster on two bad men known as the Schmidt brothers, whose property on an island in Lake Superior had been condemned by the government, reporting to Judge Wray that the Schmidts were protecting their property with loaded shotguns and would shoot the first man who attempted to interfere with them. The Schmidt brothers ran a hotel and saloon on a hill near the government lighthouse and their light at night, often mistaken for the beacon in the lighthouse, had caused the wreck of numerous vessels.

Marshal Wheeler, failing himself, sent his chief deputy to enforce the court order. Arrived at the scene O'Donnell could get no further than the Schmidt hotel. Walking up to the hotel alone, his badge concealed under his coat lapel, he found John Schmidt, the elder brother, alone in the saloon. Engaging him in conversation, O'Donnell kicked the stool from under his man, handcuffed him and was master of the situation. With the one brother as a hostage O'Donnell forced the rest of the household to disarm and the ejection was effected.

Mr. O'Donnell was instrumental in rounding up and capturing a member of the Mafia, Jim Penetti, who was terrorizing the workers in the Bessemer mines. One of his most recent cases brought to a successful issue was his arrest of Frank Rollins, who had been sending Black L. Hanger letters to ex-Senator Flood of Hart, Mich.

HAD GOOD TIME HERE.
President Taft and Mayor Jacobs Met at Mining Congress in Chicago.

"I never had a better time in my life than I had in your city of Marquette," declared President Taft to Mayor Jacobs in Chicago last Saturday. The Marquette mayor returned last evening from that city, where he has been in attendance at the American Mining congress. President Taft was the guest of the congress Saturday night.

Mayor Jacobs stated last evening that he was greatly disappointed at the poor showing made by the Lake Superior iron mining men at the congress. Mayor Jacobs and J. R. Van Evera were in attendance, while eight mining men from the copper country were there. Mine interests from all parts of the country were represented and the delegates were much interested in Mayor Jacobs' talk on the Lake Superior iron mining industry. "I believe the mining men of this county made a great mistake in not attending this meeting in large numbers," said Mayor Jacobs last evening.

The Marquette mayor was one of a committee of five appointed to audit and report on the conservation report of Walter L. Fisher, secretary of the interior. The pictures of the members of this committee were published in last Friday's Chicago News. Mayor Jacobs and one other member of the committee, Samuel A. Taylor, of Pittsburg, favored Secretary Fisher's plan for leasing government mining lands, while it was opposed by the other three members of the committee. Those opposing the Fisher report were Dr. H. H. Stock, Urbana, Ill.; S. S. Clarke, Leadwood, Mo., and Dr. J. E. Talmadge, Salt Lake City.

VERY FEW CASES.
United States Court Here Next Week Will Be of Short Duration.

The adjourned September term of United States court in Marquette, which is to begin next Tuesday, Nov. 7, at 10 a. m., will be one of the shortest terms in years, according to present indications. There are but six cases on the criminal docket and five on the civil calendar, and it is certain that two of the latter will be continued. None of the cases on the calendar is expected to take up much time and the business of the term will probably be concluded in two or three days.

There is a possibility that the criminal work of the term may be increased by the report of the grand jury, although with the exception of a few smuggling cases at the Soo, it is not known that any big matters will be brought to the attention of the grand jury. Deputy United States Marshal Willis has gone to the Soo to bring to Marquette three prisoners who are accused of smuggling and whose cases will be considered by the grand jury. Following are the cases on the docket for the term: United States vs. Hyman K. Kohn, buying U. S. Army property. United States vs. Wm Joseph Leighton, smuggling silver ore. United States vs. Max Kin Lai, corruptly attempting to influence a witness. United States vs. Edward Perron, failure to render monthly report as wholesale liquor dealer. United States vs. Arnaldo Emer, filling one bottle in bonded bottle. United States vs. Harry Harrison, silver ore. Petition of Arthur J. Luria to have the Michigan Lumber & Fire company adjudged bankrupt; denial of bankruptcy. Honora Byrne vs. Western Union Telegraph company, trespass on the case. United States vs. William Lewis and William L. Sherwood, surviving partners of Highstone, Lewis & Co.; trespass on the case. Alexander Maitland vs. Wilbur H. Traver.

The bankruptcy case of Samuel H.

A Sale of Dresses

at \$14.95

Made to Sell at \$18.50.

An Opportunity that Women Will Wish to Share.

Dresses from the best makers showing every favored style feature of the season, in all the newest and fascinating effects.

A handsome French serge Dress with peasant sleeve, with lace cuff and collar. The prettiest styles we have yet shown, at the very low price \$14.95

A splendid silk Eolise with collar and yoke with allover lace, waist trimmed with French embroidery. An excellent value at \$14.95

Women's and Misses' Coat Special

Standard \$15 values. Ladies who have never paid less than \$15 for a coat will be astonished beyond measure. Shown in splendid Scotch mixtures, Melton cloths and Serges. If you will come today and inspect these fine Coats, you will acknowledge them to be the best values we have ever offered at \$10.

FURS! We know the discriminating public are very particular from whom they buy furs as there is so much trickery practiced by unreliable stores. When buying Fur Sets or Coats one must rely on the reputation of the house—the character of the concern. We recognize these facts and while we are comparatively new to you we are egotistic enough to feel by this time you realize that Huetter's quality is of the dependable kind.

A. L. Huetter

Mining News

ANACONDA.

In view of the improved copper situation and the optimistic sentiment entertained by some of the leading figures in the copper world, the Anaconda Copper Mining company is devoting every energy toward placing its properties in condition for an increased output within the next few months. During the past year several of the more important shafts have been retimbered and many of them have been sunk to greater depths in order that when once the demand for the metal increases there shall be nothing in the way of increased production at a nominal cost. The Gagnon shaft is about completed and will afford better ventilation for a number of the mines with which it is connected. The Anaconda and Neveraset shafts have undergone extensive repairs, and the connections with the Belmont, which will be the main outlet for hoisting from several properties, including the old Anaconda mine, are rapidly nearing completion.

Within the next few weeks three of the heavy producing mines of the Anaconda company will be using air for hoisting purposes instead of steam, the three being the Mountain View, Diamond and High Ore. The first two are now using air and the High Ore will be ready for the substitution in a few weeks. In all of the properties electricity is being substituted for horses in hauling ore underground, and in every possible way electricity is being used to advantage. At the same time new reserves are being blocked out, and it is asserted that the best ore bodies in the camp have been opened in some of the Anaconda properties, proving the existence of high grade ore at depth. In the Badger State mine the Anaconda company has developed a rich mine in a comparatively new section of the Butte camp, considerably north of what was formerly believed to be the extreme north boundary of the rich copper belt. It will be only a matter of not more than two years before steam as a motive power will have entirely disappeared from the properties of the Anaconda company, and the new central compressor plant, the capacity of which is now being doubled, will furnish air for all of the company's mines, thus eliminating an expenditure of \$2,000,000 a year for coal. The Anaconda company is now said to be producing copper under eight cents a pound, and with the completion of the introduction of electrical devices and other improvements at the mines and smelters it is believed that the cost of production will be reduced to less than seven cents a pound.

EAST BUTTE.

At the East Butte properties the work of improving the surface equipment, upon which the company already has spent something like \$1,000,000, is nearing completion, and it is believed that

by Jan. 1 all of the dead work will have been completed and the company will be in position to increase its output. The material in the ground for a third furnace and it no doubt will be installed before the first of the year. This will increase the capacity of the plant to the treatment of 750 tons of first class ore daily, and will increase the copper production to more than 1,500,000 pounds a month. Two of the most important improvements now under way are the new dust chamber for saving the dust from the blast furnaces, and the new sintering plant for solidifying the dust from the flues. Both of these improvements will be completed by Jan. 1. The sintering plant is now about completed, and the new dust chamber, a gigantic affair, is nearing completion. Underground development is going on steadily, but under existing conditions the East Butte company is not making any effort to increase its metal production from its own ore reserves. Some work is being done on the 1000 and 1200-foot levels, however, in opening up the remarkable ore body which was developed about a year ago on the 800-foot level. The principal work of the past few months has been done on the 1000-foot level where the newly discovered ore body has been opened up in several places. Sufficient work has been done on all the levels, however, to prove the existence of an enormous tonnage of high class ore. The work has also satisfied the company's engineers that depth only is necessary to open up in the East Butte properties some of the greatest ore bodies in the Butte camp.

BOSTON & CORBIN.

In the Boston & Corbin annual report, General Manager Emerson says: "I believe that we have reached on the twelfth level, the permanent ore shute, and that for the next 800 to 1000 feet in length we will have a continuous body of ore, as this ore shute has been developed 500 feet southwest on the seventh level and over 1000 feet on the twelfth level. We have added about 50,000 tons to our ore reserves during the year. We are now developing ore between the seventh and twelfth levels at the rate of 650 tons per day. If we extend the shaft 300 feet deeper, and this with necessary drifting to reach the ore body could easily be done before the concentrator can be erected, we will have 300 feet more of stopping ground in addition to the 500 that we are now developing, which should give us more than 200,000 tons additional ore. This of course is to be considered only as probable ore and not to be taken into consideration with present ore reserves, which are thus ample to justify the building of the 300-ton concentrator."

UTAH COPPER.

The statement of the Utah Copper company for the quarter ended Sept. 30 shows the lowest production cost on record, a total of 25,851,456 pounds of copper being produced at an average cost of 7.55 cents a pound, comparing with

8.02 cents in the preceding three months. The income account shows net earnings from mining operations of \$1,159,523, against \$983,677 in the quarter ended June 30; total net, including the Nevada Consolidated dividend and other income, \$1,538,712; surplus after dividends paid, \$391,704. D. C. Jackling, general manager, says: "The entire Magna plant was in commission throughout the period although not at full capacity for the month of July. In August and September it handled an average normal capacity of 12,000 tons daily. The fourth remodeled section of the Arthur plant was started in July and the fifth in August, five sections being operated continuously during September. Both plants treated 1273, 373 tons of ore as compared with 1,050,414 tons for the previous quarter. The Magna plant handled about 83 per cent and Arthur plant 17 per cent. Average grade ore was 1.4829 per cent copper, as compared with 1.6332 per cent for the previous quarter.

The Nevada Consolidated reports for the quarter ended Sept. 30, net earnings of \$984,934, surplus after dividends, \$27,545, and surplus after depreciation for the quarter, \$100,554. S. W. Eccles, president, states that the copper content of the ore treated this quarter was 1.70 per cent, being the representative average of the ore reserves.

BUTTE & SUPERIOR.

Captain A. B. Wolvin, accompanied by the other members of the board of directors of the Butte & Superior Copper company, has been in Butte in connection with the treatment of the company's zinc ores. The new concentrator will

WHAT PONY CHILDREN NEED

More Food—How to Make Them Eat Heartily.

More food, better blood, these are the two things that pale, delicate children need most. "But they won't eat," says the anxious mother. Yes they will if you give them our delicious Vinol. It's the greatest thing we ever saw to create an appetite. It makes the blood rich, too—builds up weak children (and grown folks as well) and makes them strong and rosy. Mrs. W. O. Strother of Raleigh, N. C., says: "My little girl, Hazel, had been taking Vinol to build her up after a severe spell of sickness. It has done so much good by restoring her appetite and building up her strength that I think Vinol is the finest tonic ever prepared and I am telling everyone about it." Children like to take Vinol, the taste is so pleasant. It is not a strong medicine and there is not one harmful thing in it. We will give back your money if Vinol disappoints you. The Stafford Drug Co., Marquette; also Fred P. Tillson, Lehigh, and J. E. O'Donoghue, Negawau.

be built within 400 feet of the collar of the Black Rock shaft and will be 300 feet long and 80 feet wide, extending down the hill from the collar of the shaft, thus providing a gravity system of handling the ore. It will have an initial capacity for treating from 500 to 700 tons of ore a day and will be so built that additional units may be added at any time. It will be provided with the best machinery that is available from several years' experience at the Basin concentrator which the Butte & Superior company has been using under lease, and it is estimated that it will save better than 90 per cent of the mineral content of the ore. The ore now averages about 20 per cent zinc and carries good silver values. Recently, on the 900-foot level, the company opened up twenty feet of ore that averages about 30 per cent zinc, with about ten ounces of silver. There is said to be a tonnage of ore in sight sufficient to keep a mill of 1,000 tons daily capacity in operation for many years. The Butte & Superior company is now earning about \$50,000 a month, it is said, and it is claimed that the new concentrator in operation the earnings will be more than doubled.

NOTES OF MINING NEWS.

For the first time in three years the main shaft of the Anaconda mine is again in condition for operation, having been retimbered from top to bottom. Fire and gas practically prevented the use of the shaft for several years, but conditions now such that the lower levels of the Anaconda may again be mined.

The Houghton Copper company is making about fifty feet per month in the shaft sinking to develop an extension of the Superior lode. A depth of 540 feet has been reached about 600 feet above a crosscut will be sent out to the lode, which at the 400 level, though badly shattered, carries considerable copper in an eighteen-foot streak.

At the property of the Tuolumne Copper Mining company the work of installing the new surface hoisting plant is being pushed as fast as possible, and it is considered probable that it will be in operation before Dec. 1. About 100 tons of ore is being lifted daily and it is said to average about 9 per cent copper.

The installation of a larger hoist is delaying development work at the Superior in the shaft, which remains temporarily bottomed at the seventeenth level. Work in the No. 2 shaft is centered in the drift on the thirteenth level which is being extended to connect with the drift run at this depth in the No. 1 shaft. The extension is showing very little in the way of copper ground.

It is understood that the eighth level of the East Butte mine continues to show rich ore on extended explorations. Although the copper content of the first-class ore hoisted for the last quarter was 6.75 per cent, or 0.54 per cent less than that of the previous quarter, it is stated on good authority that ore being taken from certain parts of the eighth level, from which practically all the ore is now being mined, is of unusual richness. In one week recently some 1,000 tons of ore averaging 10 per cent copper was hoisted.

The repairs to the Ballaklava shaft have been completed, and sinking has been resumed. The next station will be cut on the 1600-foot level. On the 1400-foot level between four and five feet of close to 6 per cent ore was opened up and some shute was made. It was found necessary to repair the shaft, however, between the 1000 and 1200-foot levels, and during that period it was not possible to use the shaft below the latter depth. Shipments from the 1400 and 1200 level will be resumed at once, it is stated, and the shaft will be deepened.

The September net earnings of the Old Dominion mine proper were \$50,000 in round figures, compared with only \$30,000 in August. It is estimated that the 1911 net earnings of the Old Dominion, including \$200,000 of net profits from the United Globe, will be \$900,000, or \$3 per share against a present dividend rate of \$2 per share. There is a possibility of net profits from the United Globe end of a property being sold in shape an extra or increased dividend this year.

The Mayflower is down 200 feet in broken ground in the No. 10 drill hole, which has for its object the further disclosure of the several lodes previously located in this camp. The No. 16 is about 1600 feet east of the No. 15 hole and close to the eastern limits of a zone in which are found such lodes as the Baltic, Superior and St. Louis.

The Ducktown Copper company has declared an interim dividend on the ordinary shares at the rate of 10 per cent per annum for the six months ended June 30. This company, a British corporation controlled in England, operates a property in Tennessee near that of the Tennessee Copper company. Its ores are similar to that of the Tennessee company and carry large amounts of sulphur. For the purpose of treating the product on a local basis, the Ducktown company several years ago erected a sulphuric acid plant, contracts for the output of which were booked over a year ago with a chemical company.

The Goldfield Consolidated's net yield from September operations was \$444,399, or \$10.90 per ton secured, from a gross production of 367,383, or an average of 82.53 per cent. The net recovery from all ore was \$23.80 per ton, and total cost of production was \$7.20 per ton. Production was 26,759 tons as compared with 29,580 tons in August and 29,235 tons in July. The Grizzly Bear shaft has been cleaned out and equipped, and sinking is now in progress. The low tonnage for the month was caused by suspensions for the purpose of relining the mill and repairs to the Chilean mills.

John C. Watson, president of the South Lake state, reports that operations at the property have been suspended owing to lack of funds and are not quite in accordance with the facts. The immediate cause of the suspension is the fact that in the sunk shaft where the water was sunk so much water was encountered that further work was deemed inadvisable. At the moment, the management is uncertain whether a new vertical or inclined shaft should be started, but any further operations on the property will await the financing of the company. Mr. Watson further says that there have been no offers to sell 40,000 shares of the treasury stock of South Lake at \$8 per share, nor has any offer been made to the company to pay \$10 per share for 10,000 shares of its treasury stock.

MANISTIQUE CASHIER IN TOILS.

Officer of State Bank Believed to Be \$12,000 Short in Accounts.

Charged with embezzling \$12,000 of the Manistique State bank and falsifying the books of the bank to cover up his shortage, Melvin Orr, cashier of that bank, is under arrest at Manistique. Two warrants, one charging embezzlement and the other falsification of the books, have been served on Mr. Orr, and he has been bound over to circuit court. He has been released under bonds furnished by relatives. Mr. Orr had served as cashier of the Manistique State bank for eight years and for three years previous he had been assistant cashier. He was looked upon as one of the leading bankers and businessmen of Manistique. It is claimed that the examination of the books of the bank shows that his penulations began a number of years ago while he was serving as assistant cashier. Through clever manipulation of the books the shortages were concealed from the bank examiners. At no time, it is said, did he take more than \$200 in checks. Mr. Orr is said never to have speculated but to have spent the greater portion of the money taken from the bank in being a good fellow.

SOO CANAL PASSAGES.

Theatrical

"The Heart Breakers."

"The Heart Breakers," a musical comedy hit from the Princess theater, headed by George Damerel and a company of fifty, will be seen at the opera house on Nov. 9. The story of the "Heart Breakers" deals with the adventures of a band of bold young blades, whose avowed purpose in life is the kissing of girls. In this delicate art these ambitious youths are adepts, and they are well versed in the nice distinctions of the kissing, crossing the kiss compassionate, and the peck conjugal. They progress demorally on their mad osculatory quest until they attempt to exercise their fatal fascinations upon an ingenue maiden, who in the play is known simply as "The Girl" played by Ruth Peebles. This alluring lassie has been brought up by her father in ignorance of masculine attentions, and she is moreover most jealously guarded by her watchful parent. In desperation, the hapless heart breakers disguise themselves and enter the old gentleman's castle as servants, in order to be near their innamorata. They are, however, distraught by jealousy of one another and many complications set in. Eventually, none the less, the master heart breaker, George Damerel, pursues the girl to a mountain fastness, succeeds in captivating the coy creature's heart, and at the cost of imminent marriage clears the blench from the heart breaker's record. Mort H. Singer, under whose management the "Heart Breakers" will be seen, has spared neither time nor expense to make this one of the most elaborate productions ever sent from the Princess theater. Among the song hits are "Somebody's Day," "Honey, Honey, Honey," "Somebody's She's Flirting With Somebody," and "Two to Duita."

TELLS OF COMPOSITION OF THE BROOKS COMET

Celestial Surgeon Dissects the Sky Traveler, Many Millions of Miles Away.

Flagstaff, Ariz., Oct. 31.—A recent news dispatch reported important discoveries regarding Brooks' comet, made at Lowell observatory. An authoritative statement regarding these important scientific developments is made by Dr. Percival Lowell, director of the observatory, himself. Dr. Lowell is one of the world's most noted astronomers, author of several important volumes, member and medalist of the leading astronomical societies. His discoveries of Mars have won him particular note. Dr. Lowell says: "The most important discovery recently made about comets is in regard to the distribution of the matter composing their heads and tails. A comet is a swarm of meteorites—meteoric stones—carrying with them in their light certain characteristic gases. Now from researches here on Halley's comet we have learned that these gases are driven off from the head to form the tail—an action disputed up to that time, some scientists supposing that gases could not be so repelled, but only solid particles. Furthermore, the same investigation showed, as far as light was concerned, that the tails were not only partly, but mostly gaseous.

"The interest in the present determination about Brooks' comet centers in the fact that its revelations go further in the same line, demonstrating that its tail is composed almost exclusively of one gas. That gas is carbon monoxide. It is gas found in pits and mines and has been playing with a lambent blue flame over a hard coal fire. "Astronomically our knowledge of this gas is recent and striking. From experiments in his South Kensington laboratory three years ago Professor Fowler found that this gas when under very low pressure, exhibited just the hands which had hitherto been unidentified in comets' tails, especially Mouchouse's. When Halley's comet was spectrographed here it disclosed the very bands. Fowler had found. Brooks' comet has none of the same, only with more insistency and singleness.

"The tail is almost entirely one stupendous stream of carbon monoxide. The curious part of the affair is that this gas is not conspicuous in the head while the two other prominent gases of the comet, cyanogen and some one of the hydrocarbons, are there very conspicuous. It is noteworthy that all these

VAN HOUTEN'S COCOA

One-yes-less than one cent a cup! The aristocrat of all cocoas! Richest and most delightful to the taste! If you are not a constant drinker of cocoa the chances are that you have not tasted Van Houten's—properly made. A MILLINERY OPENING.
Miss Ruth Thompson's millinery opening was quite a rush, having her room with the whole store of her father's filled with guests. Miss Thompson gave several dozen carnations as souvenirs and eight gallons of frappe with lady fingers were served. The father, J. E. Thompson, gave several dozen lead pencils as souvenirs and held a guessing contest, giving a set of dishes to the one guessing nearest the amount of money paid out by the Thompson Mutual Funeral Expense association, for funerals of members, having buried forty-two members since organization in March, 1903, and paying out \$399.10 assessments. The contest will be closed at 8 p. m. Roscoe Beadle entertained the guests with graphophone music.—Illinois Courier.

SILVER DOLLARS AND BABIES.
"How in this world New York babies can ever get decent teeth with no silver dollars to cut them on is more than I can understand," said a western woman while staying a few days in New York city. "Why, in Nevada and all those western states a baby who doesn't cut his teeth on a silver dollar is a pariah from the date of his first tooth. The minute his little gums begin to swell the newest, shiniest dollar the mints can produce is obtained for him to chew on. No other silver coin will answer. Dimes, quarters, and half dollars may be just as new and shiny, but a baby with a

Ishpeming Department

CHEERFUL NEWS FOR ISHPEMING PEOPLE

W. G. Mather's Announcement Created Hopeful Feeling Here Yesterday.

The statement credited to W. G. Mather, president of the Cleveland-Cliffs Iron company, in the Marquette department of yesterday's issue of The Mining Journal, that the company's present forces at the mines on the Marquette and Swansee ranges would probably remain intact through the winter, was received with pleasure by Ishpeming business men, who have been fearful that the working forces would be reduced at the close of the shipping season.

The Cleveland-Cliffs Iron company has employed a larger number of men on the Marquette and Swansee ranges during the present year than at any previous time in its history, and although the company's Imperial and Barnes mines have been closed, and the force at the Negaunee mine has been reduced, the working force on the ranges is still large. In addition to the forces at the various mines, large crews have been employed on improvement and development work. The company's new water power project on the Carp river has kept a force of from 150 to 200 men busy since early in the spring. The work at this project is now being forced in order to finish up the more important part of it before winter sets in for good. The company has just completed extensive work on the streets in its Nebraska Hill location, where from thirty-five to sixty men were employed for nearly three months. Additional labor has also been employed in the North Lake district, erecting mine buildings and dwellings, and at the Negaunee mine, where a number of new buildings have recently been completed.

With the Cleveland-Cliffs operating its usual forces throughout the winter, Ishpeming people will have little reason to complain. Many feared that there would be a heavy curtailment in the Cleveland-Cliffs forces, because of the large accumulation of ore at the mines, but provision has been made at all of the properties to take care of the extra tonnage that will be stocked before the opening of the next shipping season. It is not expected that the Oliver Iron Mining company will make any changes in its present scope of operations, nor is it expected that the Pittsburg & Lake Angeline Iron company will cut down its working force at the Lake Angeline mine. The usual crew has been maintained at the latter property throughout the year.

CHINAMEN TO BE ENVIED.
The male garments of the present day, save where a ceremonial occasion or a professional convention alters the circumstances, are loose in texture, not tightly fitting, and not necessarily dark in color. They are hygienically reasonable and practically well adapted for the requirements of ordinary life. And yet how often do wearers of our "male garments" envy the Chinaman his privilege of wearing his shirt in a different way, and the longshoreman his collarless.

LEVINE NOT GUILTY.
Game Warden Could Not Prove That Republican Man Shipped Partridge.
Louis Levine, a Republic businessman, who was last week charged by Deputy Game Warden John Andrews, of Iron Mountain, with shipping partridge to Joseph Decker, in Detroit, was yesterday found not guilty by a jury of Ishpeming men in Judge West's court. W. T. Potter defended Mr. Levine and M. J. Kennedy represented the state. No evidence was introduced to show that Mr. Levine had shipped the birds, although his name was on the outside of the package containing four partridges, that was intercepted on the St. Paul line below Iron Mountain. James Peebles, agent of the Chicago, Milwaukee & St. Paul Railway company, at Republic, and George Uberg, his assistant, were the principal witnesses. Neither could say positively that Mr. Levine had shipped the package, as they found it in the office a short time before the departure of the train. Mr. Peebles testified that he did not even see Mr.

Ishpeming, Michigan

The snow fall Wednesday will help the deer hunters. Many went to the woods yesterday for the first time this season, and several are planning to leave today. Up to this time the deer hunters have not been having as good success as in former years, but this is largely attributed to the fact that there are too many men with guns and dogs in the woods, hunting birds.

"THE THREE TWINS"
Popular Musical Comedy Production Will be Greeted by A Good House.

HOWE'S TRAVEL FESTIVAL.
Program Has Been Highly Praised By Newspaper Critics.

WANTED—To buy a new milch cow. John Anderson, 813 North Third street. 11-3-2t

"The Three Twins", which comes to the Ishpeming theatre tomorrow evening, will be greeted by a good house. "The Three Twins" comes to Ishpeming with the full prestige of metropolitan success behind it, it having run five months in Chicago at the Whitney Opera House and ten months in New York at the Herald Square Theatre, where it received the unanimous praise of the entire New York press, as being one of the smartest musical plays produced in years.

Mr. Gaites has spared no expense in mounting this attraction, the costuming is gorgeous, the scenery magnificent, and the electrical effects bewildering. The finale of the first act is one of the most elaborate pieces of mechanism that has ever been placed on the stage. It shows an aerial circular swing with six beautiful show girls in baskets. While revolving the swing is illuminated with hundreds of incandescent lights, making a gorgeous spectacle.

DIME BUYS A LUNCH, HOT AND APPETIZING

High School Cafe at Grand Rapids Serves Hundreds of Students Daily.

Grand Rapids, Mich., Nov. 1.—Folks here who each morning used to trudge two miles down the sandy road to the little old frame schoolhouse, carrying a dinner pail, find that times are changed. Now their sons or daughters may unconsciously step down to the basement lunch room between sessions, run over the menu in a bored way, order up an appetizing dish or two, and after eating, saunter back to the classroom.

Times have changed for certain. In all the modern appointments of the new Central High school building, the fine suite of offices, the excellent classrooms, the library, the large, finely equipped auditorium, it is doubtful if there is anything that reflects more the up-to-date in school buildings than the fine lunch room in its spacious quarters in the basement. No longer are students forced to rush across the city to their homes, miles distant and choke down luncheon all in a forty-five-minute period. Yet the knowledge that up at school they are actually serving lunches to the children comes as a distinct shock to many parents, who are left breathless at these changes. Some perhaps wonder if the food is half-cooked, and others may brand it all as an unnecessary expense, until they find that meals are being served up there for about half price, and that the food is of the best.

Maybe it's contracting the lunch counter habit pretty early, and the habit is certainly fastened onto the American people. The young people go at it like veterans, too, as much at home as the business man at his mid-day luncheon. When they want more gravy they ask for it. They scan the daily menu board with the eye of a connoisseur, shrug their shoulders in disdain at its unpleasant suggestions, and are quick to grasp its possibilities for an appetizer. But be the habit what it may, the lunch room is a mighty convenient feature of the new high school building, and one fully as popular as any other. It places Grand Rapids in line with the big schools, too, for Boston, New York, Chicago and Detroit all have these lunch rooms. It is questionable if any are more successfully operated than the local one, which has been running since the building opened in February.

Food Is Sold at Cost.

Let it be said that the board of education, under whose auspices it is conducted, is not in the lunch-room business for the money there is in it. If it were it would charge more than three cents for a glass of milk, more than three cents for a cup of cocoa, more than two cents for a sandwich, more than five cents for meat and potato and gravy. Indeed, the schedule of prices at the lunch room shows rather a light on the short-order and restaurant business, and indicates there ought to be good money in it at the wide divergence of prices that are considered normal at a downtown eatery and those up at school. But the board of education is conducting the lunch room merely as a matter of convenience, because they recognized that under the adopted system of scheduling classes many students would unfortunately be forced to elect periods which would prevent them from taking sufficient time to run home for luncheon. Hence, eat it in the building.

Miss Mary Baldwin is the domestic science teacher who supervises the lunch room. Probably, when she accepted the faculty position, she had no idea of entering the lunch business, but the board has found her a capital proprietor notwithstanding, with a good business head. She admits, too, that she rather enjoys the work, welcoming the change it affords from her customary classroom work, while it presents opportunity for experimentation. Of course, Miss Baldwin does not do much of the work herself, except that of supervision. In the kitchen is a competent cook and her assistants, while several young ladies of the high school assist at the lunch counter during a period each, for the sake of their mid-day luncheon. The room is conducted on the serve-self plan, students calling at the counter for what they want.

The lunch room has fine quarters in the basement, a large skylight overhead affording plenty of light, while the room is well ventilated. At one end runs the counter, while back of it, through large openings, is seen the kitchen. Every matter of convenience in the equipment of the room has been attended to.

Dining Room Seats 200.

All the handling of money is done in the hall and at the doorway. Here the pupils buy up as many aluminum checks of three denominations, two, three and five cents, as they feel will suffice their hunger or their allowance permits. It certainly calls for rapid work, too, on the part of the exchangers, when the students swarm down the stairways in scores at the end of a period all clamoring at once for checks. These checks, in turn, are exchanged at the counter for the different food, which saves time and avoids confusion and error in the process.

Luncheon is served during the three mid-day periods, from 11 o'clock to 11 o'clock, until near one. The middle period is of course the busiest of all, and it keeps the attendants rushing for a while. The students sometimes pile up three or four deep around the counter and the sharp clatter of the dishes, the click of the checks, the hum of conversation intermingling, raises a din greater than that at a chicken pie social.

Around the sides of the room are arranged chairs with the wide arm, while down the center are placed tables that will accommodate two or four or six. In an extension of the room, to the right, are more chairs and tables which are used more especially by the country students who carry their dinners. These are welcomed, too, the board being glad to offer accommodations for these pupils, who have no other place to eat their lunches. Usually these students buy something warm to add to that prepared at home. Between the two rooms stands a young lady at the ice cream freezer, while at her side are racks, carrying plates of cookies and fruit.

The lunch room will accommodate more than 200 at one time and it is hardly emptied of one group than it is filled with another. On rainy days sometimes between 600 and 700 are fed here, and ordinarily 300 and 400. The

majority of these are students who live in the city and who, as has been stated, have their periods so arranged that they have no opportunity to go home for luncheon. The next semester, perhaps, these students will be more fortunate in their classification, while others will take the turn about. But there are many country pupils as well who find the lunch room a great convenience and their patronage is certain.

No Coffee for Students.

Miss Baldwin has the task of arranging the menu each day, one that requires some little thought and study, for she aims to avoid repetition at frequent intervals, and, too, puts the ban on foods and drinks that are considered injurious. Thus, for example, no coffee is served to the students, and it never finds a place on the blackboard that each day heralds the bill of fare.

"No coffee for the children. Just the teachers," smiled Miss Baldwin. This caused a laugh, and occasioned a remark on the seeming inconsistency of the plan. "What's bad for the child ought to be bad for the adult, too, I should think." But the instructor stoutly defended the plan. "Fathers who smoke tell their boys to wait until they grow up before beginning, you know," she observed.

"But the newness of the menu each day is a real pleasure. Miss Baldwin usually has a genuine surprise for the students. 'I try not to repeat anything within two weeks, and usually succeed. We do not always have meat, sometimes substituting beans or macaroni and cheese.' It so happened that on this day the menu was as follows:

- Celery soup 3c
- Roast beef, potato and gravy, bread and butter 10c
- Nut sandwich 2c
- Lettuce sandwich 3c
- Cocoa 3c
- Milk 3c
- Chocolate blanc mange 3c
- Grape sauce 3c
- Ice cream 5c

Miss Baldwin endeavors to so arrange the menu each day that the students may get a pretty good lunch for ten cents. "Of course," she says, "this doesn't allow for a great deal. But it always gives the children a little meat, some potato and usually something else. Today the meat, potato, gravy and bread and butter costs ten cents. Some days, on other meats, we cut it to less, even five cents. Of course, some want other delicacies and that costs more, just as it would down town." Most people will agree, however, that a child can get a good lunch for ten cents.

Buys in Large Lots.

Between \$30 and \$40 passes across the counter in checks each day, which leads one to realize that this high school lunch room, serving but one meal a day, does quite a business nevertheless. Miss Baldwin is careful in her buying, purchasing the staple food stuffs in big lots at wholesale. Other things, of course, bought daily. She estimates that on an average ten bushels of potatoes are consumed each day, and when one notes the rapidity with which the plates carrying the big, steaming tubers are passed across the counter, he readily believes it. On an average fifty pounds of meat are used daily also. For the sandwiches and bread and butter thirty double loaves are needed, and the students get away with twenty-five bricks of ice cream. They drink a great amount of milk, and not a little cocoa either, though the former proves the more popular.

As has been said, the lunch room is not a business venture. Miss Baldwin seeks to just make expenses, that is all. All the board of education asks is that it pay for its upkeep. And it has done so, and better, for out of last year's funds the dishes were purchased. Now the domestic science teacher has the whole thing systematized, knowing the average cost of things, and how little she can charge for luncheon and still be even.

It is a good idea, too, the lunchroom, and stamps Central High as a modern, progressive institution. If one is still skeptical as to its usefulness let him drop in some noon hour, note the students swarming there, and buy a few checks himself to appease the hunger started at sight of so many appetizing dishes.

JAPANESE DRAMA LENGTHY.

A short drama in Japan begins at 9 a. m. and lasts until 11 p. m. A drama of good length may require a week for its performance. People who go to the theatre to pass away the time between dinner and supper should rejoice at the opportunity of also passing away the time between lunch and dinner. There would be something to be said for Japanese drama if it could be introduced in this country.

DON'T EXPERIMENT.

You Will Make No Mistake if You Follow This Advice. Never neglect your kidneys.

If you have pain in the back, urinary disorders, dizziness and nervousness, it's time to act and no time to experiment. These are common symptoms of kidney trouble, and you should seek a remedy which is recommended for the kidneys. Doan's Kidney Pills is the remedy to use. It has cured many stubborn cases in this vicinity.

Can Marquette residents, demand further proof than the following testimonial? Henry Hassenger, 429 E. High St., Ishpeming, Mich., says: "I suffered for days from backache and was unable to get relief from the many remedies I tried. At last Doan's Kidney Pills were brought to my notice and I procured a supply. They did me a world of good, and I know of other persons who have taken them with great benefit. I willingly recommend Doan's Kidney Pills, as I know they are a reliable kidney remedy."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

The "Pure food law" is designed by the government to protect the public from injurious ingredients in both foods and drugs. It is beneficial both to the public and to the conscientious manufacturer. Ely's Cream Balm, a successful remedy for cold in the head, nasal catarrh, hay fever, etc., containing no injurious drugs meets fully the requirements of the new law, and that fact is prominently stated on every package. It contains none of the injurious drugs which are required by the law to be mentioned on the label. Hence you can use it safely.

Maxwell

WINS

the Glidden Tour

With a team of 3 perfect-score cars, Maxwell is the only one of 74 competitors to finish the gruelling 1454-mile journey without a single penalty.

Three Maxwell Cars which left New York on October 14th, finished their 1454 mile journey at Jacksonville on October 26th, and were

Awarded The Glidden Trophy

Of 74 of America's leading cars, some costing \$5,000 each, which competed in the most gruelling contest in motor car history, the Maxwell came through as the

Only Team with Perfect Score

Whirling over the smooth roads at railroad speed, plowing through mud and sand, fording swollen streams, pounding over the Appalachian Mountains through a cloudburst, and surmounting obstacles that no ordinary tourist would ever meet, they led the way into each control with time table precision and justly earned the title of

A. A. A. National Touring Champion

They completed their daily journey on the exact schedule, although several times the committee conducting the event had to extend the fixed schedule time to offset unexpectedly difficult conditions met with. The Maxwells never needed these extensions.

Besides the great victory of the Maxwell team, another Maxwell entered by Gov. Hoke Smith, of Georgia, won the Anderson Trophy for the best individual showing. There were no other trophies to win.

The Maxwell victory is made more remarkable by the fact that it

Duplicates Last Year's Triumph

in the Glidden Tour when Maxwell likewise achieved the best team score.

This undisputable evidence of reliability of Maxwell cars is no surprise to the 47,000 Maxwell owners who have learned to know the dependability of the car through years of consistent daily service.

No car ever made has achieved a record approaching the Maxwell registration in New York State, which shows 91% of the cars made in 1905 still in service in 1911 after

Seven Years of Continuous Use

All the 1912 models of Maxwell cars bristle with good points of design, construction, power, and style, which makes them undisputed leaders in the motor world.

These car values cannot be equaled by any other makers.

1912 MAXWELL MODELS

- Special Touring Car . . . \$1280
- Mercury Roadster . . . \$1150
- Mascotte Touring Car . . . \$980
- Mascotte Roadster . . . \$950
- Messenger Runabout . . . \$600

Better order your car now. You may not be able to get one at once, for there are orders ahead, but if you don't order now, you may not get one at all.

FISH WITH TEETH LIKE HUMAN BEINGS

Dr. C. P. Andrews Tells of Wonderful Things to Be Found in Brazilian Jungles.

New York, Oct. 30.—There is a fish down in the Amazon river and its tributaries that has teeth like a human being and likes white meat. Dr. C. P. Andrews, who has just arrived at the Breasil after practicing his profession for fifteen months in the heart of a Brazilian jungle, says that this fish, the name of which he was not able to learn, has a double row of incisors straight across the front of its mouth.

"These fishes weigh about fifty pounds when full grown," said Dr. Andrews, "and two or three of them could easily drown a man if they attacked him. The young of the species make good eating, but a full grown specimen put an end to our bathing in the Amazon. We were all in swimming one day when one of the part yelled that something had bit him. So it had, we found, and taken a chunk out of his back as big as an egg. After that we did our bathing on shore."

Dr. Andrews has been acting as surgeon for the Madeira & Mamore railway, which is being built from Porto Velho, about nine hundred miles above Manaus, Brazil, to a point on the Rio Mamore, which forms part of the Bolivian frontier. The road, which will be about 150 miles long, is to serve as the outlet for the Bolivian rubber district, and goes around the falls of the Madeira, which makes the transportation of rubber, carried on now by boats, difficult and costly. According to Dr. Andrews, the road should be completed and open for traffic in six months.

"Sickness has been greatly reduced among the Americans who work down there," said Dr. Andrews. "At the outset there was a great deal of trouble from beriberi, which is always there and occasionally used to crop out in the form of an epidemic. However, there have been few cases of late. For this improved sanitary arrangements are largely responsible. Then not by any means so many Americans who go down there to work get invalided home as formerly. The hospital at Porto Velho is well equipped. There are four American doctors in it and a staff of trained women nurses who had previously got experience in Panama. They are the only white women in that part of Brazil. The contractors have had their wives down there at times, but they did not stay. There are about 1,000 Americans at work in various capacities.

"The road is actually being operated now about 110 miles. They have cleared the right of way the whole distance, and the roadbed has been made for all except the last twenty-five miles. Laying the track is a small matter comparatively, the work of building the roadbed and can be done quickly. Even now a lot of rubber is being brought down by the railroad. I was with the surveying party that went to the southern terminus. This is just opposite the Bolivian village of Guajara-Merim. When the location party

TO GET RID OF RHEUMATISM

If we suffer with Rheumatism and desire to get rid of it we must make up our minds to subject our systems to the proper course of treatment for a while. The only way to cure oneself of Rheumatism is to remove the cause—expel the irritating uric acid from the blood; every other method of treatment has proved a failure. S. S. S. cares Rheumatism because it is the greatest of all blood purifiers. This medicine goes down into the circulation, and expels every particle of the sour, inflammatory uric acid which is the one great cause of the disease. The cure can be greatly hastened with a little care and self denial by the patient. In the first place do not let anything interfere to prevent your taking S. S. S. regularly and according to directions; be guarded in your eating, because an attack of indigestion will always aggravate the symptoms of Rheumatism. Do not expose yourself to damp and inclement weather any more than is necessary. When S. S. S. has had time to rid the blood of the uric acid; then these little restrictions may be left off. This simple course has cured many thousands of cases of Rheumatism. Book on Rheumatism and any medical advice free. S. S. S. is sold at drug stores. THE SWIFT SPECIFIC CO., Atlanta, Ga.

finished its work the terminus was in a jungle. There are lots of Indians in the jungle, and we heard of many fierce kinds, but the only true with which we came into contact was the Carapumas, who seemed very friendly and would come down to see how we were getting along. Why the hostile savages did not attack some of our isolated parties I cannot explain, if the tales we heard are true.

"There are all kinds of game birds in the jungle and plenty of deer and tapir. A tapir will furnish about as much meat as a steer. I could never bring myself to tackle a tapir steak. The natives attribute all their ills to eating tapir meat, but I don't think that is anything but superstition. The game to be had has been of great benefit to the laborers in helping them to keep their health, which might be difficult on a diet of canned or salt food, and any time we wanted fresh food there was plenty to be got with a rifle or a shotgun.

"Yes, I was lost once or twice in the jungle. Getting lost was not difficult. All you had to do was to get about six feet off the trail. Some of our men were frequently lost for several days, but up to date I have heard of only one man who failed to return, and he was a Spanish laborer. The only way to get back is to find a stream and follow it to the river, and then follow the bank of the river. Of course if it is in the time when Brazil nuts are ripe it is easy to get from starving.

"I didn't see many tarantulas, but in camping out there were myriads of insects to entertain you. Once we had a plague of caterpillars which covered every thing, and it was all we could do to keep them out of the food. But the king of all the insects down there is the smallest. It is the sand fly, which abounds on the river banks by the million. When it bites it leaves a black spot. Its bite is worse than that of the mosquito. To protect against them ordinary mosquito netting does not serve, and we have to sleep under screens of close meshed cheesecloth.

"I was with a camp for a whole year without seeing Porto Velho once. My party was small one, and we had very little sickness still I found plenty to do in looking after the sanitary arrangements of the camp and seeing that the water was boiled. We used the river water, though in the dry season we took water from the little streams. This was as clear as crystal and free from the contamination of plant life, but for all that it was more unwholesome unboiled than the river water. If it were not for the malaria living in the tropics, provided one drank boiled water, would be more healthful than living in the States. We used to have a few sporadic cases of yellow fever, but in every instance they were brought in and the disease did not spread.

"Yes, it was a long way from civilization, but I must say I had a mighty good time down there. A man who loves nature can be happy down there, and as there were seven or eight congenial men in our party, we found frontier life enjoyable. Of course the stiffness at night was sometimes almost terrifying. Sometimes we would be two months without word from the outside world. We were the party furthest south. However, we really stayed at the terminus only long enough to plant a stage.

"Yes, I heard a great deal about the poeage system practised in the interior of Brazil in the rubber industry. Sometimes the slaves would escape, and making their way down the river would go to work for us. The Americans would tell them that they would not have to go back, but when their parones would come after them they invariably went back voluntarily to their beatings.

"There is one peculiarity I noticed about the Madeira river, and that is when a person falls into the water he doesn't rise the traditional three times, but sinks at once. I knew a laborer who was an excellent swimmer who was drowned in this way. It is more cool, of course, is very strong, and sometimes a body is recovered some distance down stream. The river is full of crocodiles—I thought they were alligators until a man who came up on the steamer with me and who speaks many years in the tropics said they were not, and shooting them is one of the favorite diversions."

LAYS PLANS TO STEER THE TIDE TO CANADA

Northwest Development League to Boom Settlement on American Side of Border.

St. Paul, Minn., Nov. 1.—The broad acres of western Canada are being taken in large part by American farmers. Men who have been trained in the Mississippi valley have left their homes there or have sent their sons to the land of the north to make homes for themselves in that region. Through St. Paul this fall as many as 2,000 men in a single day have gone to look at land in Canada, many of them to buy and settle there, taking across the border the live stock of the central west, together with their savings and their energy.

These American farmers for the United States is the main object of the Northwest Development league, a union of the state officials and commercial bodies of the seven states of Minnesota, North and South Dakota, Montana, Idaho, Washington and Oregon. Many farmers have gone from these states over the neighboring line, oftentimes to return at the end of a year or two, discouraged by the cold winters and the change of climate from the northern states of this union.

Business Men Co-operate.
The business men of the Northwest have joined in the biggest co-operative effort ever put forth by commercial organizations anywhere in the country. These are not wholly men who have had to sell, or men who want to haul freight from the North-Pacific coast to St. Paul and take supplies to the new settlers. They are the backbone of the business world in each of the commonwealths represented.

At the birth of the new league at Helena, Mont., last May, the business men of St. Paul and Minneapolis took a special train and went to Helena to meet the business men of the other states and there pledged their hard cash to the support of the movement. As soon as an American farmer goes over the line to Canada, his trade is practically lost for all time to come to the jobbers and manufacturers of this country. The Canadians have rejected the proffers of commercial peace the United States offered in the reciprocity pact. They want that trade for themselves.

Business men of the Central West are as much interested in the success of the Northwest Development league as are the men who are supporting it. If there is no room for the sons of farmers to stay at home and raise families as have their fathers, let these men consider the possibilities that await the efforts of young manhood in the states along the northern border of this western country. There is no reason why they should trade allegiance to another government to earn a livelihood.

Land Show Dec. 12 to 23.

To show the people of the central west what can be produced in the northwest, the Development league is planning a land product show to be held in St. Paul Dec. 12 to 23 and committees appointed by the governors of the seven states have been at work for a month collecting samples of the products of the soil to be sent to St. Paul. The league brought Will A. Campbell, born in Iowa and now in Missouri, from Omaha to manage the show and lend the league the benefit of his wide experience. Lewis Penwell of Helena is president and there are vice presidents in each of the states. These men are working to get that visitors to the land products show will have an adequate idea of the products of the states. In addition to grains and grasses and vegetables of all kinds there will be a variety of fruit which will surprise the farmer from Iowa and Missouri. There will be apples, carloads of them, and they will not all come from the famous irrigated valleys of Montana, Idaho and Washington. Along the many lakes in Minnesota there are apple orchards with fruit which for show cannot be touched by apples grown where there is not the tinge of cold weather which visits the North Star state.

Oregon Is Being Opened.

Visitors will have a chance to see what can be raised in the marvellously rich county of central Oregon, into which the railroads are now being pushed. A territory as large as three or four European countries has been without facilities for getting out the products ever since the edge of the state was settled. This is being opened to the world. For those who have little money to put into land, but have plenty of muscle and energy, there is out-over land in Putnam county which can be bought for \$7 an acre or a little more. This rich soil will produce wonderful garden crops. There is land in North Dakota which may be had from the government by merely asking for it and living on it, and hundreds of men have gotten good farms in this way.

There is practically no colored population in these states, and few foreigners. The Dutch and Scandinavian settlers make the best sort of farmer, and set an example to Americans in the care with which they till the soil.

The Northwest Development league has established headquarters in St. Paul and from this office the efforts to stem the tide toward Canada will be directed with all the skill that experience indicates.

BOON TO PILE VICTIMS.

A Cure Without Cutting or Other Objectionable Treatment.

Here is a priceless boon to anyone who suffers with piles of any kind. A medicine in tablet form, taken internally that cures all forms of piles. Only 2 per cent of known failures.

A medicine that is sold under strict guarantee. Your money back if you are not cured in 30 days.

A medicine that avoids operations and use of nasty salves or suppositories. The People's Drug Store, Marquette, Mich., and City Drug Store, Ishpeming, and druggists everywhere. Dr. Leonard's Hem-Roid, 41 for 24 days' treatment. Dr. Leonard's Co., Station B, Buffalo, N. Y., Props. Write for booklet.

Negaunee Department

FINANCIAL OFFICERS NOW UNDER BOND

Ladies of the Maccabees of the World Adopt a New Set of Regulations.

The Ladies of the Maccabees of the World adopted a new regulation at their convention at Atlantic City last July, and all financial officers of the hives and of the order must now be bonded. The bonds must be furnished by the companies, and personal bondsmen will not be accepted. The Negaunee hive has not yet met this regulation, but guaranty bonds will have to be furnished by the financial secretary.

Regarding the regulation, Lillian M. Hollister, formerly supreme commander, writes in her "Comprehensive Report," published in the Ladies' Review for the month of October: "The finances of the hive and order alike are guarded by bonding the responsible officers, the depositors, and the clerical force engaged in the financial part of the work, all these except the hive officers being summarized in Exhibit K.

"Besides these guaranty bonds, two states require bonds for faithful performance of duty, which are also arranged through surety companies.

"When the practice of requiring other than personal bondsmen for the hive officers was introduced, many felt that the requirements reflected upon their honesty. In this, however, as in so many other issues, women have proved themselves as capable of good business judgment as their brothers, and the system is now universally accepted by our hives as an ordinary business measure.

"At the last supreme hive review provisions were adopted for an indemnity fund leaving the date at which such law was to go into operation to be fixed by the board of trustees.

"Owing to the many problems of the term, and the responsibility of establishing such a fund, action was postponed by the board, and arrangements were made upon favorable terms with the National Surety company to continue the schedule for subordinate hives. The terms of this arrangement have been very satisfactory to the order. We have received every consideration from this company in the settlement made, and prompt payment of all losses."

Fresh Oysters, direct from the coast. Oysters with the ocean flavor at Haupt's grocery. 11-3-1d

MASONIC PARTIES.

Dancing Club Organized, and First Party Will Be Given Nov. 10.

This year's series of Masonic parties will commence Nov. 10. The Masonic club has been organized, an arrangement committee named. Phil Levine is the president, and Duke Wilson is secretary and treasurer. The committee on arrangement is made up of Charles Steele, A. P. Johnson, Ray Brotherton, W. A. Garner and C. O. Squires. All the dates for the season have not been settled upon, but the first will be the 10th inst. The second will be Dec. 1, and the third dance will be a new year's party, the evening of Dec. 29.

INDOOR BASEBALL.

With the coming of the winter season, there is much talk about organizing indoor baseball teams. In former years this sport was popular, and generally participated in. There have been a number of teams in Negaunee, and a like number in Ishpeming. Series of games were played in both cities, and much enthusiasm was developed.

Some of the "old-timers" are urging the organization of an indoor baseball team, but at present the arrangements seem to be more interested in basketball. It is possible that a basketball league may be formed, to include Ishpeming, Negaunee and Marquette. The only drawback to forming a team in Negaunee is that the gymnasium is quite small and that the high school gymnasium can only be used for high school purposes.

TO ADD MORE ROOMS.

More rooms are to be added to the King's Inn, at the west end of Iron street. The proprietor has made arrangements for the building of the building for extensive improvements, which are to be started very soon. The rooms are now divided into apartments, for the building was planned for an apartment house. This arrangement has not been made from the Dunham store, but the improvements now planned call for re-partitioning the floor space to obtain single guest rooms. Mr. King, the proprietor, plans also to have the stairway changed, so that it will lead into the lobby and office rooms. A steam heating plant will be installed.

Strictly fresh eggs at 32 cents a dozen at Haupt's grocery. 11-3-1d

IN NEW SHOP.

Eddie Faulk has moved back into his old stand in the Kuhlmann block. The store has all partitions removed and windows placed in the rear wall. The side walls of the shop have been covered with steel, to match that on the ceiling, and the interior has been repainted. A new fountain washstand has been placed on the floor near the middle of the shop.

LOCAL LACONICS.

Born, Tuesday, to Mr. and Mrs. William Pleau, a son.

John Buska is confined to his home suffering with rheumatism.

Fred Haeckenjos is installing a hot water heating plant in S. S. Mitchell's house.

Agnes, the ten-year-old daughter of Andrew Lindquist, is ill with a mild form of diphtheria.

A. E. Mielenz, of Milwaukee, state manager of the Aetna Life Insurance

company, was in the city yesterday on business.

Peter Rasmussen left Wednesday night for Chicago, to purchase his Christmas stock.

The city has placed wooden boxes over the fire hydrants, to keep them from being snowed in during the winter.

Seven Englishmen left Negaunee Wednesday night for the Dutch country, and four Finns also left for their native land.

Georgiana Majotte and Samuel Stawdry of this city were married last Saturday evening in Marquette by the Rev. J. M. Rodgers.

Mrs. John Ford, who has kept "The Bachelors' Inn" on Lincoln street for years, has retired from business, and will move into her own home in South Jackson.

Victoria Steele, the twelve-year-old daughter of William Steele, east Main street fell on a slippery sidewalk while playing in front of her home Wednesday afternoon, and sustained a compound fracture of her forearm.

The council met last night and disposed of routine business. One of the important matters that was brought up was that of the city's coal supply. With the completion of the new trestle at the water works, the city will buy its coal through the wholesale dealers in cargo or large wholesale lots. This will mean a big saving.

Upper Peninsula

Legislator Very Ill—J. H. Parks, of Crystal Falls, legislative representative of the Iron district, is reported very ill. He has been taken to Elk Creek for special treatment. Mr. Parks' wife died a few weeks ago and his condition since then has caused apprehension.

Costly Improvements at Hotel—Contracts for extensive improvements at the Grand Hotel at Mackinac Island having been awarded, a force of artisans is now at work at that big summer hotel. It is estimated that between forty and fifty thousand dollars will be expended. Among the improvements will be the placing of hot and cold water in every room and the enlarging of the lobby.

Game Law Violators Fined—Recent violations of the game laws, prosecuted by Game Warden Claude Larson of Ironwood, are as follows: Theodore LaCose, Thorton, arrested for having partridges in his possession in the closed season; pleaded guilty before Justice Haggerson at Bessemer and was fined \$15 and costs. M. Finerman of Kalamazoo, pleaded guilty to charges of trapping in the closed season and was fined \$15 and costs by Justice Olson of Wakefield.

Jury Disagrees in Damage Suit—After considering the evidence in the case brought by Mrs. Eliza LaSalle against Peter Dausey, jurors in the Delta county circuit court reported that they were unable to reach an agreement and were discharged from further service by Judge S. S. Cooper. Mrs. LaSalle sought a recovery damages from Mr. Dausey, who is a saloon keeper, because of the claim that he sold liquor to her husband, following which the latter went to their home and in a quarrel shot her.

Explosion Maims a Woman—Attempting to remove a dynamite cap from a stove at the family home at Wilson, near Escanaba, Mrs. A. Borden had three fingers of her right hand blown off. She is being cared for at home. Finding a dynamite cap in the house one of the children placed it on the stove in the kitchen "to hear it pop." Mrs. Borden entered the room and, seeing the cap, reached for it to brush it on the floor. Just as her fingers touched the cap it exploded, badly mangleing her hand.

Dead Man Found in Shack—Word has been received of the finding of the body of an unknown man in a deserted cabin in the woods five miles south of the Elk River valley near Northland. The body was discovered by Joseph Raymond. The officials of Dickinson county have been summoned to make an investigation. The body was badly decomposed and death evidently had come several weeks ago. There were found no papers by which identification could be made. The body was in a tumble-down shack on a road far from the regular route of travel and how the unfortunate man reached that place or whence he came are unknown.

Safe Crackers at Daggett—For the fifth time in three months a safe was blown at Daggett, Meenominia county, and the largest haul of the five robberies was the reward of the yeagmen. The safe of Dunham & Sons, who own a general store, was wrecked between midnight and 5 o'clock, dynamite and glycerine being used to blow off the combination. Between fifty and sixty dollars in money and jewelry valued at seventy-five dollars were taken by the robbers. The explosion was heard by Agent Malloy of the Northwestern road, who lives next to the Dunham store, but he made no investigation as he thought it was someone shooting. The robbery was discovered by the owners of the store when they arrived to open for the business of the day. A few nights previously an attempt was made to blow the safe of Nelson Bros. at Daggett, but except for the wrecking of the safe no loss was sustained.

Fears Deer Will Become Extinct—According to Deputy State Game Warden Herman Leisner of Escanaba practically all of the deer now being killed are does and fawns, a fact which cannot but aid materially in the final extermination of big game in the upper peninsula. The cause is ascribed by the warden to the early opening of the shooting season under the present game laws. "Of all the deer that have been brought down this season, and I have watched all of the avenues of entrance to the city, there have been but few bucks, the big majority of the kill being does and fawns," asserted Mr. Leisner. "At the present time and until after the tenth of the month the bucks are in the swamps and travel but little, while the does and fawns are feeding outside and are easy prey. In past seasons when the hunting season opened along toward the middle of November, the bucks had begun to run and the does and fawns were hidden in the swamps from them. The result was that the big part of the kill was bucks

"There could be no better medicine than Chamberlain's Cough Remedy. My children were all sick with whooping cough. One of them was in bed, had a high fever, and was coughing up blood. Our doctor gave them Chamberlain's Cough Remedy and the first dose eased them, and three bottles cured them," says Mrs. R. A. Donaldson, of Lexington, Miss. For sale by The People's Drug Store.

STEAMER LEUTY BROKEN IN TWO

Vessel Stranded Off Lighthouse Point Tuesday Night Has Big Hole at First Hatch and Will Probably Be a Total Loss—Owner Expected Last Night.

Order for Tug Hebard Countermanded and Boat Is Being Dis-mantled—Chas. Kimball, Light-house Keeper, Explains Why the Fog Whistle Was Not Blowing.

Upon going out to the steamer D. Leuty, which is stranded off Lighthouse point, at daybreak yesterday morning, Captain Sparling found the vessel in much worse shape than he had supposed. The Leuty broke in two at the first hatch Wednesday or Wednesday night, and Captain Sparling says that only by building a bulkhead can the vessel ever be floated. C. H. Prescott, of Cleveland, owner of the Leuty, was to arrive in the city last night.

As soon as Captain Sparling found that the vessel was in such shape that she would not float even if she were off the rocks, he telephoned to Pequaming and countermanded the order for the tug Hebard, which he had engaged the night before. Efforts of the crew of the vessel and the lifesavers yesterday were directed toward saving the furniture and other valuables on board, and during the day a large part of the equipment was removed to shore.

These operations were considerably hindered by the heavy sea, which came up early yesterday forenoon and did not subside until towards evening. While a number of the men were working on the boat during the forenoon it became so rough that they did not dare come ashore with the boat they went out in, and they signalled the life savers to bring them to shore. This heavy sea worked great damage to the hull of the Leuty and it is feared that another day of storm will smash the vessel to pieces.

Captain Sparling is of the opinion that Mr. Prescott, the owner of the Leuty, will decide to leave her to the mercy of the waves, after as much machinery and equipment as possible has been removed. Mr. Prescott, however, has always taken a great deal of pride in the Leuty, and it is possible that he will attempt to save and rebuild the boat, although such a course would probably be more costly than to turn the bulk over to the wreckers and underwriters. Captain Sparling states that there is about \$10,000 worth of machinery and equipment that can be taken out of the hull, provided she is not beaten to pieces by a storm before the removal is accomplished.

Kimball Not at Fault.

Lighthouse Keeper Kimball's explanation of the events of Tuesday night indicate that he was in no way to blame for the stranding of the steamer Leuty, as might be inferred from Captain Sparling's statement, published in yesterday's Mining Journal. Mr. Kimball agrees with Captain Sparling that the fog horn was not blowing when the Leuty went on the rocks, but says that it was not blowing because sufficient time had not elapsed after it began to snow to get up steam enough to blow the whistle.

"Our orders are to start fire in the whistle boiler whenever at night we hear a steamboat give three whistles, signifying thick weather on the lake," said Mr. Kimball last evening. "In foggy weather we are expected to keep steam in the boiler at all times, but on Tuesday and until after 9 o'clock Tuesday night the sky was perfectly clear and there was no indication that a snow storm was coming.

"Thirty-five minutes before the Leuty went on the rocks I heard her give three short whistles and I at once went to the boiler house and put a fire under the boiler. It takes from thirty to forty-

five minutes to get up steam enough to blow the whistle after the fire is lighted and in this instance it took forty-five minutes. The result was that the whistle was not blown nor could it be blown until ten minutes after the Leuty struck. The electric bell at the end of the breaker was started immediately after I heard the Leuty whistle, but with the noise of the sea and the wind from the northeast it is not surprising that Captain Sparling did not hear it.

"When I heard the Leuty whistle and went out to start the fire under the boiler, it had just begun to snow, and the fact that Captain Sparling was coming in with the squall explains the difference in time of the beginning of the snowstorm, as reported by Captain Sparling and myself. It was snowing on the lake before it snowed on shore. Presuming that Captain Sparling used all proper precautions under the circumstances (and I have no desire to criticize him) the stranding was due to a fact that it takes so long to get up steam in the fog whistle boiler. The new whistle now under construction will be operated by a gasoline engine and compressed air, with which the whistle can be sounded at once whenever a fog or storm sets in. Had this whistle been in service Tuesday night, the Leuty probably would have made the harbor safely."

ENTERTAINMENT AT NORMAL.

Program Tonight Under Auspices of Student Girls' League.

An entertainment under the auspices of the Student Girls' League will be given in the Normal assembly room this evening, beginning at 8:15 o'clock. It will consist of piano solos, readings, vocal solos and a farce to be presented by students. A admission of fifteen cents will be charged. The program will be as follows:

- Part I—
- Piano Solo—"Rondo Capriccioso"..... Mendelssohn
- Miss Mary Proudfoot.
- Reading—"Scene from King Henry V"..... Shakespeare
- Miss Louise Rushmore.
- Vocal Solo—"If I Were a Rose"..... Miss Louise Harwood.
- Readings—1. "The Low-Backed Car." 2. "Good Night, Mr. Johnson." 3. "Italian Love." Miss Louise Rushmore.
- Piano Solo—"Frühling"..... Grieg. Miss Mary Proudfoot.
- Part II—
- Farce—"The Dress Rehearsal"..... Presented by Normal Students.

COLTS DEFEATED S. F. S. TEAM.

The first match game of the season at the downtown alleys was bowled last night between the S. F. S. team and Andy Easley's Colts, with the following result:

S. F. S.—			
Jeanson	155	181	197

FIRE DEPARTMENT POORLY SUPPORTED

Has to Get Along With Little Money—Board Has Shown Little Interest in It.

There was considerable discussion yesterday of the comment made by The Mining Journal on the efficiency of the fire department. It was generally agreed—and even some of the firemen concurred in the view—that the criticism that the department is not as efficient as it should be, and that it is not prepared to meet a serious situation is just.

A well-known fireman expressed his views as follows: "There is a large measure of truth in what The Mining Journal had to say, but the fault is by no means wholly the department's. The organization has been insufficiently supported. The money the men get for their work is a sum so small that it hardly recompenses them for the wear and tear on their clothes in the course of answering and fighting fires through a year. The city has pursued a penny-wise policy and unless it is corrected it will some day pay a heavy price for it. More attention is given to worry over the small cost incurred in turning out to chimney fires than to plans for strengthening the department where it is lame.

"The department should have periodical drills, but the men should certainly be paid for the time that would have to be given up to them. More men should sleep in the hose house. I have not the slightest doubt that, for a small expense, the board of fire and water commissioners could arrange to have half a dozen of our unmarried members sleep at the headquarters, ready to turn out with the carts for night service if suitable accommodations were provided. The lack of effective organization would be remedied by the practice drills that should be introduced. Once the board gives the matter attention, it will have no difficulty, by co-operating with the department officers, in developing a first-class organization, capable of giving admirable service.

"The principal interest of the board in the past has been to hold the expenditures on the department down to the most miserly figure it could, and then allow it to sink or swim. There has not been in years an inspection of the department by the board to determine its efficiency, or any attempt to check up its work at fires. We have a lot of hard and willing workers, men who aren't afraid of fire and smoke. I know many of our members would be well pleased if the board gave the department the co-operation it should have, and aided its officers in developing it into a smooth-working, systematic and effective body.

And the way I look at this matter, it is up to the board more than to any one else. The department has been starved out both by lack of money and by lack of interest on the part of the men responsible for its well being. Chief Money believes that the most pressing need in connection with the department at present is the one that has so often been dwelt on, and that was the subject of comment by Deputy State Fire Marshal Wolff, namely, a second hose house, in the northern part of the city. The district north of Ridge street is now very poorly protected, owing to the length of time it takes to reach the scene of a fire from the present hose house. The steep hills between Washington and Ridge streets are horse killing, and much time is lost on them. In this connection the firemen criticize the department's equipment, which, they say, is entirely too heavy for the service that is now demanded in this city. This objection would be largely obviated if a second hose house was provided, for then the hard runs on the hills would be done away with.
