Medical Science Asserts Stiff Hat is Menace to Health and Enemy of Hair.

We all would hoot a proposal to cram feet into blocks of wood in imitation of the Chinese or Dutch. Yet, with heerful inconsistency, we tolerate the derby bat. Women are to a large extent to blame for this. They tell us "Well, you look a little better in After that, of course, we have no choice but to submit. Perhaps we do look better in derbies. There ought to be at least that much to say in favor of these baneful headpieces if there is anything in the law of compensaion. But who can tell whether the woman whose satirical flattery lures us on to derbies is not secretly gloating over being able thus so easily to keep legions of the Lords of Creations under bondage to an evidence of barbarism? In the three centuries past men have freed them selves from the restraint of all other un couth and injurious articles of apparel, leaving high heels, ruffs and stays as the exclusive property of women. But the tyranny of the derby waxes.

The dominant fashion among hats for nine months of the year this tyrant rules with absurdities and whims. One season we must wear high-crowned black blocks, with narrow brims; another, the law requires crowns low enough and brims wide enough to outfit one of vau-
