

FEDERATION OF LABOR ASKS CONGRESS TO INVESTIGATE COPPER MINE STRIKE

Michigan Operators Bitterly Attacked Both in Speech and Resolution at the Annual Convention in Session at Seattle.

THUGS HAVE KILLED IN GOLD BLOOD, IT IS CHARGED; SOLDIERS DECLARED GUILTY OF GROSS IMMORALITY

Men Work Naked in 8,000-Foot Levels, Without Ventilation, Breathing Their Own Foul Air, Mixed With the Poisonous Fumes of the Metal They Dig, Asserts John H. Walker--Calumet & Hecla's Title Is Assailed and It Is Indicated That an Inquiry Into How the Company Obtained Its Land Will Be Demanded--Much Turbulence in the Keweenaw Peninsula Yesterday--Shootings Take Place at Quincy and Superior and Three Men Are Wounded, One Probably Fatally.

Seattle, Wash., Nov. 17.—Fiery speeches were made in the annual convention of the American Federation of Labor here today. The Michigan copper mine owners, who are resisting a strike of the Western Federation of Miners, were attacked bitterly.

Resolutions demanding a congressional investigation for contributions for the support of the strikers were adopted and President Samuel Gompers said the convention undoubtedly would adopt a resolution, if it were presented, "demanding an investigation as to how the Calumet & Hecla company obtained title to its copper lands."

Text of the Resolutions. The resolutions which were adopted are as follows:

"Whereas, the mine owners have ignored the demands of the men, spurned their attempts at conciliation and in many ways treated them with contempt; have imported gunmen, thugs and so-called detectives into the strike zone, and these men have deliberately killed strikers in cold blood, assaulted women and beaten and terrorized children; and

"Whereas, twenty-five hundred militia have been sent into the strike district, and these soldiers have driven their horses over men, women and children, using them with grooves, bayonets and swords, and outraging women and girls; and

"Resolved, That the American Federation of Labor demands a congressional investigation of the strike and the causes leading up to it;

"Resolved, That the Federation of Labor unqualifiedly approves of the stand of the Michigan miners and calls on all affiliated unions to contribute at least the amount asked by the executive council of the federation and, where it can be afforded, that larger amounts be donated, and that it possible means be devised by the unions to raise money for the purpose of providing food, clothing and shelter for those fighting the battle of oppressed humanity."

C. & H. Titles Attacked. Joseph D. Cannon, of the Western Federation of Miners, described the conditions under which the workers revolted, and declared documentary evidence was available to prove that the Calumet & Hecla mining company obtained free from the United States government in 1852 valuable mineral land, as a grant in aid of a canal, the land never being used for canal purposes, but for the copper it contained.

John H. Walker, president of the Illinois Mine Workers, who has spent much time in the Calumet region, said it would be impossible to exaggerate conditions there. These conditions, he said, "would disgrace the most barbarous country in the world." Mr. Walker declared that the miners worked naked in 8,000-foot levels, without ventilation, breathing again and again the air of their own lungs, mixed with the poisonous fumes of the copper.

Soldiers Assailed. John B. Lennon, treasurer of the federation, described the daily parades of men and women in the copper country. Armed men—militia and detective agency employees—marched along with the strikers on the highway, he said, seeking to provoke them to violence. Soldiers rode their horses across and through the parades, he said.

"After midnight," said Mr. Lennon, "I walked through the streets of Calumet, in company with Michigan public officials, and saw young soldiers, with belts on and revolvers in their belts, drunk in the streets. They were unfit to be soldiers of this or any other country."

forwarded to President Wilson, calling upon him publicly to rebuke Secretary of Labor Wilson for his recent Seattle speech attacking the Michigan copper mine operators. It is said that the petition will declare the Seattle speech to have been socialistic and in conflict with the tenets of the Democratic party on property rights.

DEPUTY'S FAMILY ROUTED BY FLAMES. Fire Late at Night Badly Damages Dwelling of Calumet & Hecla Guard.

Houghton, Mich., Nov. 17.—[Special.]—The dwelling house of Joseph Hirsch, a deputy sheriff in the employ of the Calumet & Hecla Mining company and living on Hecla street, Laurium, was badly damaged by a supposedly incendiary fire which broke out at 11:30 o'clock tonight.

On Sunday, last, Mr. Hirsch was threatened in an anonymous letter pinned to the front door of his residence, the notice warning him that if he did not cease serving as a deputy sheriff he would be given reasons to be sorry. The fire of tonight is taken as the carrying out of the written threat.

The fire broke out while Mr. Hirsch's family was sleeping on the second floor of the house. The early discovery of the blaze by a passerby, who once rushed to the house and by rapping on the doors awakened the occupants, probably saved their lives. The blaze soon afterward had progressed to a stage where egress from the house would have been cut off.

RENEWED DISORDER ALARMS COPPERDOM. Strikers Aggressive, There Is Apprehension Much More Turbulence Is in Store.

Houghton, Mich., Nov. 17.—[Special.]—Indications of a determined purpose on the part of the Western Federation of Miners to resume aggressive tactics against the mining companies and particularly against the workers that are being imported have been numerous enough recently to cause apprehension that much more turbulence is in prospect for the copper country. The strike still is a serious problem, if the events of the last few days are to be looked upon as a criterion.

The disorders of Saturday and Sunday were followed today by noisy parades all over the district, culminating in a serious gunfight at Quincy. The strikers are determined not to yield; the Western Federation of Miners heads are inflexible in their purpose; they are met by an equally adamant front on the part of the mine officials. The situation just now is ominous.

The attitude of the strikers may best be explained by an interview had by a reporter for this newspaper with Lancelotti, an Italian, and Frank Verbanach, a Croatian, Quincy strikers, who were arrested this morning in connection with the Quincy riot.

Both of these men said that they would remain on strike for two years if necessary. They did not explain what they wanted to gain by striking, though that omission is due to their inability to speak English well. Asked if they received strike benefits sufficient to live on, they answered in the affirmative.

DEMOCRATS IN MICHIGAN TO MAKE PROTEST AGAINST SEATTLE SPEECH OF WILSON. Houghton, Mich., Nov. 17.—[Special.]—Prominent northern Michigan Democrats are authority for the statement that a position, signed by a large number of Michigan Democrats, soon will be

judgment, but they are typical strikers as the copper country knows them and the impulse is strong to judge them as men willing to be satisfied with the barest livelihood, if it does not include work.

Many Shots Fired in Quincy Riot. Between sixty and seventy shots were fired in a strike riot at Quincy this morning and Frank Gorshe, a striker, and Edward Barker, a deputy sheriff, were wounded. Barker's wound is the more serious, Gorshe's being only a flesh wound in the leg. Barker identified Gorshe as the man who shot him. Whether or not Barker shot Gorshe is not known, though Barker fired several shots after he was struck.

This parade at the Quincy was lengthy. Some of the strikers arrested said that it numbered six hundred and fifty persons. At No. 2 shaft, when the miners were about to go underground, about 7 o'clock, the paraders indulged in their usual yell of "scab" but seemed more vindictive than usual about it. The story of the subsequent events is rather confused.

Deputy Sheriff Richard Dineen, in charge of the operations at Quincy, says that Deputy Ravencamp attempted to arrest Matti Hendrickson because the latter was throwing rocks at the miners. A number of men threw rocks and the situation had begun to take on an ugly aspect. As Ravencamp grappled with Hendrickson, Lancelotti, another striker, struck Ravencamp in the face. This seemed to have precipitated a general riot.

Six Men Placed Under Arrest. Deputy Sheriff Barker attempted to arrest Mike Vranach and when they struggled a shot was fired from the crowd of paraders. Barker, still clutching Vranach, staggered back and fell. He had received a bullet in the abdomen near the right hip. As Barker fell he began shouting and then other deputies and the small military guard ran toward the scene from various shafts.

The new forces split up the parade and half of the strikers were forced up the hill and off the road. From this crowd a fusillade was kept up for some minutes and Deputy Sheriff Dineen says that between sixty and seventy shots were fired. He says that it is remarkable that others were not hurt. Six men were arrested—Frank Gorshe, the wounded striker; Lancelotti, Dominick Bianco, Matti Hendrickson, Mike Vranach and Frank Verbanach.

Deputy Barker was taken to military headquarters and placed on a cot. The six men were arrayed before him and he identified Gorshe as the man who shot him. Barker says the five others took to Joseph's hospital and the five others to the county jail.

Striker's Side of the Story. Dominick Bianco was the only man of the five taken to the county jail who could talk English. He denied all knowledge of the shooting and said that he had been arrested before a shot was fired, though "they find on me a gun in pocket."

Bianco said that his gun was a 32-caliber revolver in a bad state of repair, that he had taken it with him for protection. He is a miner at the Hancock. The officers say that Bianco's gun was in good condition and that three shots had been fired from it. The other four men denied all knowledge of the shooting, excepting that they had heard the shots. They all said they were arrested before any shooting took place.

The men are held at the county jail pending an investigation which is being conducted by Assistant Prosecuting Attorney Nichols.

Federation Men Ask Protection. A committee of Quincy strikers waited on Sheriff Cruise this afternoon. It consisted of two Irishmen, two Finns, one Italian and one Croatian. The names of the men were not taken. This committee asked the sheriff for protection for their parades. They said the parade this morning was peaceable until the deputies broke it up, though it is contended by the deputies that the strikers broke from the parade themselves and began throwing rocks at workmen before the deputies made any move.

meant a parade not characterized by calls of "scab," throwing rocks at workmen and other displays of animosity. There was shooting at North Kearsarge and at Baltic during Sunday night. These shootings are looked upon by the authorities as intimidation, practical threats to shoot to some purpose. The men now at work do not quit. In these as in other instances the shooters were not apprehended.

Serious Affray at the Superior. In an altercation at the Superior mine tonight at 7 o'clock George Gregorich, a striker, was shot by a non-union miner employed at the Superior. It is rumored that Gregorich will die; that he was shot through the liver. The striker's assailant, Peter Howith, is under arrest.

Gregorich was spirited away and up to midnight had not been located. It is supposed that he was taken to the home of friends in Hancock. The man had two companions who ran away and barricaded themselves in a house in Dodgeville. When the deputies went there to arrest them, a woman fired on them with a shotgun. At midnight the house was surrounded by deputies, but the officers had little hope of making an entrance before daylight.

It has developed that the affair was not a personal quarrel, as supposed at first, but an attack by strikers on non-union men. The nature of Gregorich's wound is only guessed at, but it is believed to be serious, if not fatal.

Railroad Company Offers Reward. The Copper Range Railroad company tonight offered a reward for the arrest and conviction of the man or men that fired on the Northern Michigan Special at Riceville Sunday morning.

The Quincy received a carload of new workmen today. The Copper Range expects this week a party of old employees, who are returning from visits in England. Preparations to import one thousand men to the Mohawk and Wolverine mines are in the making and the first lot is expected this week.

Today's compilation of mine operations shows daily rock outputs, as follows: Calumet & Hecla, 7,120 tons; Osceola, 1,000; Kearsarge, 815; Isle Royale, 510; Copper Range, 1,220; Superior, 530; Quincy, 1,100.

HEARING IN COURT AT LANSING TODAY. Mine Strike Injunction Issue to Be Argued Before State's Highest Tribunal.

Houghton, Mich., Nov. 17.—[Special.]—That may be the final hearing on the strike injunction will take place in the Michigan supreme court in Laurium tomorrow. It is a hearing on an order to show cause issued to Judge O'Brien of the Houghton county circuit court, why a mandamus should not be issued directing him to vacate the injunction granted by him Sept. 20, later vacated and later rehabilitated in part by the state's highest tribunal.

Attorney A. F. Rees, associated with Attorney Otto Kitchener of Detroit, represents the mining companies, complainants in the original suit. Attorneys A. W. Kerr and E. F. LeGendre represent the Western Federation of Miners, against which the original writ was directed.

While the hearing actually is to determine whether or not Judge O'Brien will be ordered to vacate the injunction, it is a matter in which he is not interested personally. The proponents and opponents of the injunction must argue the case before the supreme court, just as they would in the court below, though their argument is in effect for and against Judge O'Brien's opinion. The injunction now is in force by virtue of a supreme court order and it is safe to say that four hundred strikers or strike sympathizers have been arrested and are now out on their own recognizances for violating its provisions, in effect for contempt of court. Punishment has not been given any of these alleged violators, because none has been convicted. Whether or not the action of the supreme court tomorrow will have an effect on Judge O'Brien's attitude toward these persons alleged to have held their court in contempt is something that only the judge knows.

Injunctions have been invoked infrequently in Houghton county. The present mandate probably holds more interest than any ever previously issued in the state. It lies with the supreme court whether it is to remain in force or be dissolved. The outcome is awaited with interest.

Deputy Lavers' Hearing Today. The hearing of Deputy Sheriff John Lavers, charged with shooting Margaret Fazakas at Wolverine on Labor Day, will take place before Justice David Armit in Laurium tomorrow.

The case of Margaret Fazakas has attracted wide attention. This sixteen-year-old girl was shot during a strike riot, presumably by deputies who were returning the fire of strikers. A bullet went through her head. It was believed she would die, that there was absolutely no hope for her, a bullet through the head ordinarily being instantly fatal. The girl is alive and well.

HUERTA GOING AHEAD WITH PROGRAM IN BOLD DEFIANCE OF WASHINGTON

Organization of the Congress Is Completed and There Are No Signs the Formal Opening Will Not Take Place Thursday as Scheduled.

PROVISIONAL PRESIDENT APPARENTLY CONSIDERS DISPUTE WITH THE U. S. A CLOSED INCIDENT

Discussing the Possibility of Intervention, He Intimates to Friends He Is Prepared to Resist Such a Step--That the American Government Will Institute a Blockade of the Ports Is the Belief at Mexico City--Silence Is Maintained by Mr. Wilson and Secretary Bryan, Along With a Display of Calm Confidence That the Southern Chief Will Yield--Reliance Is Placed on Financial Boycott--Vigorous Move Is Likely Should Railroad Travel to Seacoast Be Interrupted.

Mexico City, Nov. 17.—The organization of President Huerta's new congress was completed late today, when enough senators were gathered to form a quorum in the upper house. There is nothing to indicate that the formal opening of congress next Thursday will be postponed.

President Huerta talked tonight informally to the members of his staff and a few personal friends regarding the possibility of intervention by the United States. He intimated that he would be ready to resist such a step.

The opinion is expressed in various circles here that the United States will soon inaugurate a blockade of Mexican ports. Rumor has it that President Wilson would be content with such an action and might even permit the embassy to remain in Mexico City until an open rupture occurred.

The German minister summoned tonight the heads of the more important German commercial houses and asked them to give him the inventories of expected shipments. He explained that he would then be in a position better to guard their interests in case of a blockade.

General Huerta resumed business at the national palace today, apparently with the thought of any questions pending between his government and that of the United States. He seems to regard the recent incidents growing out of Washington's demand that he vacate the presidency as closed, and so they are, so far as he is concerned, if his statements and those close to him are to be believed.

Situation Tense, Nevertheless. With the exception of one development, and that of a rather negative character, the day was almost devoid of acts relating to the situation, which still is tense notwithstanding the indifferent attitude assumed by Mexico. The American charge d'affaires received instructions to continue to advise Washington with respect to developments, but he was not instructed to approach the Mexican government officials again; nor did his instructions include anything relative to the withdrawal of the embassy.

Rumors that the American charge had been ordered to leave persisted, although an emphatic denial was made at the embassy, and trains leaving for Vera Cruz were watched anxiously by Americans, who have made up their minds not to delay their departure, if Mr. O'Shaughnessy goes.

Rumors of plots and intrigues were common throughout the day, but no facts were forthcoming to indicate that General Huerta was losing his grip on affairs in the capital. Reports from outlying points, especially in the north, were far from reassuring to the war department.

Ciudad Victoria, the capital of Tamaulipas, the capture of which by the rebels was denied last week by the government, is now admitted to be in a bad way, although not yet taken. The government has not even confirmed the capture of Juarez, and the newspapers are still holding out hopes to their readers that possibly the report of its capture by General Villa is not true.

Washington's Calm Unruffled. Washington, Nov. 17.—That the United States in its policy towards Mexico is content to await the outcome of the steady pressure being exerted to bring about the downfall of the Huerta regime was apparent today in official circles here. Exciting rumors from Mexico City wholly failed to rattle the calm confidence of President Wilson or Secretary of State Bryan. "The mills of the Gods grind slowly," was the declaration of one high official of the government, in discussing the developments.

The president was not at all aroused by reports that Mr. O'Shaughnessy, the American charge d'affaires, was about to quit Mexico City, and it was stated that no orders had been given either to Mr. O'Shaughnessy or John Lind to leave Mexico. A report that the American embassy would be closed within forty-eight hours were characterized in official circles as a "fake."

Mr. O'Shaughnessy of the resignation of Manuel Garza Alabi as minister of the interior, but he has heard only rumors of the intention of General Blanquet to surrender his portfolio as minister of war.

While in some quarters there was a disposition to regard the cabinet changes as the forerunner of the disintegration of the Huerta regime, in others it was pointed out that it might mark the adoption by General Huerta of a more active and vigorous policy, and one more in defiance of the United States government. An early development of his purpose is expected, in view of the fact that he must submit his special message to the congress not later than Thursday.

Railroad Situation Watched Closely. The possibility of an interruption of the railroad communication between the City of Mexico and the seaport of Vera Cruz, which is now practically the only outlet from the capital, is giving considerable concern to the officials here, and it is said that any attempt to thus completely isolate Americans and other foreigners in the Mexican capital would result in quick action by the United States to prevent it.

The orders for the second division of the Atlantic fleet to return to the United States remain suspended, leaving practically half of the fleet's battleships in a few hundred miles of Hampton Roads, returning from the Mediterranean cruise, at least some of the ships would be ordered by radio to Mexico. The vessels will leave the Mediterranean Dec. 1.

HUERTA COMMANDER TRICKED BY REBELS. Train With Constitutionalists Allowed to Enter Juarez on Federal General's Order.

Douglas, Ariz., Nov. 17.—It was on the order of General Castro, commander of the federal garrison at Juarez, that the train carrying Pancho Villa's fifteen hundred Constitutionalists proceeded into Juarez early Saturday morning, according to Francisco Elias, a representative of the Constitutionalists.

"General Villa," said Elias, "with three thousand men, made a wide detour around Chihuahua city, reaching Terres Friday. A small detachment of soldiers captured the telegraph office before the operator had an opportunity to warn the federals at Juarez. A train bound for Chihuahua arrived there shortly afterward. It was captured by Villa's men."

"Then one of the Constitutionalists, who was a telegraph operator, took the key. Calling Juarez, he reported that the train's engine had gone through a trestle and asked that another engine be sent south. This was refused, and the order was sent to put the engine back on the track."

"An hour later Villa ordered the operator to call Juarez again and tell General Castro the engine had been placed on the track, but that two culverts to the south had been burned and it was feared the train might fall into the hands of the rebels. He suggested that the train return to Juarez. Castro consented and General Villa's infantry boarded the train."

"Thus by Castro's own order, the train proceeded into the center of Juarez, before the presence of the Constitutionalists was known."

LORD COWDRAY DENIES SUPPORTING FINANCIALLY THE REGIME OF HUERTA. London, Nov. 17.—Speaking for himself and any company in which he is interested, Lord Cowdray writes to the newspapers, denying that Sir Lionel Gordon was appointed minister by his wish or suggestion or that he himself is concerned directly or indirectly in financing the present de facto Mexican government.

TEXAS NATIONAL GUARD HELD READY TO DEAL WITH INVADING MEXICANS. Austin, Tex., Nov. 17.—"In the event that the Mexicans start any trouble we will protect our citizens and not wait for Washington to act," declared Governor O. B. Colquhoun late today, after a conference with Adjutant General Hutchings.

While no official statement was given out, it is known that the Texas National Guard is in readiness to answer quickly any call that might be made. The conference was the outcome of a threat by Mexicans today to make "Texas answer to the whole Mexican people" unless mercy was shown Mexican ammunition smugglers, charged with murder.

NATAL EAST INDIANS REBEL AGAINST LAW. Strike Marked by Burning of Plantations Terrorizes South African People.

Durban, Natal, Union of South Africa, Nov. 17.—The East Indians resident in Natal today declared a general strike, which was accompanied by rioting and the burning of sugar plantations.

The police force is insufficient to deal with the rioters and white women and children are in a state of terror. Troops have been ordered to the district. In Durban, itself, practically the whole East Indian community struck work. In the country districts, hundreds of acres of sugar cane were burned.

The revolt of the East Indians was brought about by the exclusion laws in force against them here.

Serious Problem for London. London, Nov. 17.—The question of the British East Indians has again reached an acute stage, nearly every dominion and colony to which these British subjects emigrate either barring them or having legislation which very effectually prevents them from entering or remaining in those places. The imperial government has taken steps to make the life of the East Indians in those colonies more bearable.

In the dominions, the imperial government, which would have the Indians treated as are other British subjects, is faced by exactly the same difficulty as is the federal government at Washington in connection with California's anti-Japanese legislation. The people of the dominions insist upon having them "white men's countries."

In Australasia, East Indians, like other Asiatics, are barred out under the operation of a new law which empowers the state governments to make the entry of East Indians conditional upon their ability to pass an examination in a European language.

NEWSPAPER AGITATION DEMORALIZES DISCIPLINE IN MISSOURI PRISON. Jefferson City, Mo., Nov. 17.—Special precautions against mutiny among the prisoners in the Missouri state penitentiary were taken here tonight. Though there has been no open outbreak, discipline among the convicts has been demoralized during the last few days by newspaper agitation for an investigation of the methods of punishment used in the prison. Many threats have been made to the officers, and as a result the punishment list is far beyond the average.

TOM THUMP'S VALET DIES AT KANSAS CITY, AGED 80. Kansas City, Mo., Nov. 17.—Benjamin Sellers, for fourteen years the valet of General Tom Thump, is dead at his home here at the age of eighty years. Sellers traveled all over the world with the Yambon little man and had in his home as prized relics many of the general's belongings, including pieces from his tiny wardrobe.

D. NICHOLSON ENDS LIFE WITH A BULLET

Despondent Because of Illness, Hancock Man Shoots Himself in the Head.

Duncan Nicholson, living at the home of Stephen Rouleau, 1027 61st street, Hancock, ended his life shortly after 1 o'clock yesterday morning by firing a bullet from a .38 calibre revolver into his brain. The man was fifty-three years of age and for the last three years had been employed as night watch at the Quincy smelter. Previously he was a rockhouse boss at the Quincy mine. He had lived at Hancock for almost his entire life.

Mr. Nicholson was seriously ill a year ago and never fully recovered. Several days ago he complained of not feeling well, but remained at his work until Thursday evening. Saturday night he grew delirious and on Sunday he told visitors who called to see him that his end was close. The attending physician informed the relatives that the man was suffering from dropsy and he might live for weeks or might die any day.

Long continued suffering and the thought that death was but a matter of days are believed to have caused a despondency that prompted the man to take his life. Justice Funkey was notified of the tragedy and, as coroner, summoned a jury. The inquest was adjourned until 7 o'clock the evening of Nov. 20. The jury consists of Arthur Meyers, Frank Payne, Edward Yaezel, Frank E. McKinnley, Joseph Payne and William J. Hoffenbacher.

Mr. Nicholson is survived by two sons and two daughters. The children are Edith and Will, of Hancock, and John and Hattie, of California. Brothers are Daniel, Neil and John, the latter two living at Hancock, the whereabouts of Dan being unknown. Sisters are Mrs. Kate Jennings and Mrs. Sarah Wareham, of Lake Linden.

Mr. Nicholson was a member of the Lake Linden lodge of Odd Fellows, which lodge will have charge of the funeral. The son and daughter in California were advised yesterday of their father's death.

DEATH OF JOHN ROBBINS.

The officers of Pilgrim lodge, I. O. O. F., were informed yesterday morning of the death in Akron, O., of John Robbins, former shift boss at the Isle Royale mine. Mr. Robbins left Houghton for Akron about three years ago. He was forty-three years of age. Mr. Robbins was a member of the Pilgrim lodge, Foster encampment and Canton Copper City, I. O. O. F. He is survived by his wife and a daughter, Winifred, living at Hancock; a daughter, Mrs. Sidney Pascoe of Isle Royale, and two sons, John, Jr., and Merley, at Akron. It had not been decided yesterday whether the body will be brought to Houghton for burial.

LABOR LAWS OBSERVED IN THE COPPER REGION

State Deputy Inspector M. J. Scully Finds Regulations Are Lived Up to Strictly.

M. C. Scully of Marquette, upper peninsula inspector for the state labor department, has just completed a two weeks survey of the factories in the copper country. His work includes the inspection of all buildings in which labor is employed and a survey of all conditions affected by the labor laws.

Mr. Scully says that as a general thing the employers of labor in the copper country are very willing to carry out any of the instructions of the department. The rules and regulations are numerous and in some cases are severe, but Mr. Scully finds the employers have a cheerful willingness to comply with all requests. The factory inspection takes him into the various shops of the mining companies, as well as into the shafts, for the purpose of investigating the compliance with the laws regulating safety appliances. In no case has Mr. Scully found a mining company remiss.

Mr. Scully's work includes the inspection of school houses, to see that they have fire escapes and other provisions to protect the children in case of fire. All of these regulations are complied with by the copper country schools. The regulations affecting fire escapes on large buildings of any kind do not touch the copper country in many instances, because there are few big buildings in the district. But in all cases the owners of buildings have complied with the regulations governing fire escapes, the outward opening of doors and other contributions to safety.

In stores, the employers are complying with the regulation limiting the hours of work of women to fifty-four hours a week, a maximum of ten hours in any one day being permitted. The inspector says he has received no complaints from employers.

In stores, the employers are complying with the regulation limiting the hours of work of women to fifty-four hours a week, a maximum of ten hours in any one day being permitted. The inspector says he has received no complaints from employers. In stores, the employers are complying with the regulation limiting the hours of work of women to fifty-four hours a week, a maximum of ten hours in any one day being permitted. KEWENAW LODGE DEDICATION.

Laurium Masons Arrange a Home-warming With Elaborate Details.

A program of toasts and musical numbers has been prepared in connection with the arrangements for the dedication of the new home of Kewenaw lodge, F. & M. which is to take place Wednesday evening and be conducted by the members of the grand lodge. Rev. A. E. Healy of Ironwood, formerly of the copper country, will act as toastmaster. The program follows: "Our Order"—William M. Perret, Detroit grand master. "Solemn"—Masonic quartet; Harry E. King, Joseph H. Bennett, John Dryant and Lew Hall. "Why Dedicated"—Professor E. J. Hall. "Friendship"—George L. Lusk, Bay City grand senior warden. "Foot of the Order"—Rev. William H. Gallagher, Lansing, grand chaplain. Vocal solo—Joseph H. Bennett. "History of Kewenaw Lodge"—Dr. John MacLennan. "The Growth of the Order"—Lou B. Winsor, Lead City, grand secretary. "Selection"—Masonic quartet. Selected—John H. Hawks, Ypsilanti, grand junior warden. Selected—Charles B. Eddy, Saginaw, grand marshal. Selected—James F. McGregor, Detroit, grand Tyler. There will also be talks by Senator Charles Smith of Hubbard, Professor James Fisher of Houghton, Dr. Alfred Baldwin of Calumet, Dr. N. B. Cox of Hancock, Stephen James of Lake Linden and others. The banquet will be served in the dining rooms of the Calumet social club. A sleighride party has been arranged for the entertainment of the grand lodge members.

Kewenaw lodge, No. 242, was instituted at the Central mine location Jan. 8, 1908, with fourteen members, of whom Captain S. B. Harris of Hancock is the only survivor. Captain Harris is expected to attend the dedication. The other charter members were Captain William S. Spaulding, Godfrey Vivian, Justin Shapley, N. C. Page, A. C. Bishop, John Daniel, A. P. Thomas, Henry Silbey, D. Plummer, Frank Hopkins, D. M. Gregg, W. L. Ball and M. G. Hanna. There are 121 members in the lodge now.

BISHOP TO DEDICATE CHURCH.

Rev. W. E. Marvin, of Hancock, superintendent of the Houghton district of the Methodist Episcopal church, has received word that Bishop Shepherd of Kansas City will visit Ironwood in January to officiate at the dedication of the new Newport church. Mr. Marvin will assist in the exercises. The Newport church will replace the Jesseville church and will cost \$10,000 to \$15,000. Mr. Marvin left Sunday afternoon for the iron district to conduct quarterly conferences.

LEAVES TEN CHILDREN.

Mrs. Annie Arthur, wife of Thomas Arthur, of Lake Mine, died at that place Sunday morning. Her husband and ten children, seven girls and three boys, survive. The funeral service will be conducted at the residence this afternoon and the remains taken to Houghton for interment at Forest Hill cemetery.

MARIGOLD IN PORT.

Lighthouse Ship Going to Detroit—Amaranth to Replace Her.

The lighthouse supply steamer Marigold arrived in port yesterday, in command of Captain G. Gunderson, acting master. Captain Gunderson took charge at Duluth a few days ago, when Captain Alfred Bernier left to take command of the Amaranth at Detroit.

Captain Gunderson says that on his trip down the lake last week he encountered no wrecks, no results of the big storm of a week ago. He says that orders are out for the Marigold to take station at Detroit and that Captain Bernier and the Amaranth will now have charge of the lighthouse on Lake Superior. The latter steamer will come to Lake Superior early next month to begin taking lightkeepers off their stations for the winter. The keepers at Standard rock, Manitowish island and Huron island will be taken off Dec. 5 or as near thereafter as possible and that date thus will be the official closing of navigation.

Marine Insurance Adjuster Comes.

Captain S. Sinclair of Duluth, marine insurance adjuster, arrived in Houghton yesterday on his way to the wrecked steamer Waido at Manitowish island and the wrecked steamer Forest Chief near Copper Harbor. He will survey the wrecks to determine whether there is a likelihood that the boats can be saved. He will not make the trip till weather conditions are more favorable.

CURES SHOW VALUE OF THE SANATORIUM

Two More Patients Discharged from Tuberculosis Hospital as "Arrested" Cases.

Two patients, one of whom had been at the institution for a year and the other for six months, were discharged from the Houghton County Tuberculosis sanatorium, on Saturday as arrested cases.

The "arrested" case is one that has to all intents and purposes reached a cure. The practice is not to speak of the case as cured, because that idea might result in carelessness in the patient. The arrested case is supposed to continue at home the mode of living prescribed by the sanatorium and if this is continued the cure undoubtedly is permanent. It is obvious that the names of the patients thus discharged should not be given publicity. They would be objects of public interest and too much attention might not be favorable to a continuance of their present favorable condition.

The six-month case entered the sanatorium as an incipient case. He was very ill and undoubtedly would have gone the way of the consumptive of a less enlightened day had he not had recourse to the sanatorium at once. He was in the early stages and, rigorously according to the sanatorium's routine and is now ready to go back to work, confident that the seeds of consumption have been eradicated from his system, to stay away as long as he lives rightly. The other case was moderately advanced when the patient entered the sanatorium. He was in far worse condition than the other. A year at the sanatorium, with a careful compliance with the rules, has brought him so far back toward health that he is able to return home and continue the treatment there. It is not recommended that he return to work for some time yet, but he leaves the sanatorium with the absolute assurance that his cure is effected and will be permanent if he sticks to the rules regarding fresh air, sunlight and good food.

The Houghton County Tuberculosis sanatorium now has on its record five cures. For a hospital devoted to the treatment of any other disease this would be a small record, considering the time the sanatorium has been in operation. For a tuberculosis hospital it is a good record.

The sanatorium still has four cases that are well on the way to recovery—three children and one adult. The outlook is promising. But it is a promise that is held out only to those who take the disease in its early stages and fight it persistently, with unflinching courage. There have been deaths in the tuberculosis sanatorium, but these deaths have been of persons who have gone to the sanatorium with no hope remaining.

Mrs. Iler, acting superintendent of the sanatorium, was greatly pleased yesterday to announce these cures. She and the other active workers for the conquest of consumption in Houghton county see in the cases just described a ray of hope for many persons who might well consider they are doomed to die were it not for the recent light shed on the disease and for the unselfish devotion to the fight of many Houghton county people.

ADRIAN GETS CONVENTION.

Clergymen in the copper country are advised that Adrian won the contest for the 1914 convention of the Michigan Sunday school association. This district was not represented at this year's meeting, a fact attributed to the strike. In the election of officers Claude Cole of Haskaska was chosen president. Thomas Hyslop of Calumet was elected a member.

RUB PAIN FROM BACK ALL BACKACHE GONE

Rub Backache Away With a Small Trial Bottle of Old "St. Jacobs Oil."

Al! Pain is gone! Quickly?—Yes. Almost instant relief from soreness, stiffness, lameness and pain follows a gentle rubbing with "St. Jacobs Oil." Apply this soothing, penetrating oil directly upon the ache, and like magic relief comes. "St. Jacobs Oil" is a harmless backache, lumbago and sciatica cure which never disappoints and doesn't burn the skin.

Strengthen up! Quit complaining! Stop those nervous "stitches" in a moment you will forget that you ever had a back, because it won't hurt or be stiff or lame. Don't suffer! Get a small trial bottle of "St. Jacobs Oil" from your druggist now and get this lasting relief.

Cheap and Easily Made, But Ends a Cough Quickly

How to Make the Very Best Cough Remedy at Home. Fully Guaranteed.

This pint of cough syrup is easily made at home and saves you about \$2.00 compared with ordinary cough remedies. It relieves obstinate coughs—even whooping cough—quickly, and is splendid, too, for bronchial asthma, spasmodic croup and hoarseness.

Mix one pint of granulated sugar with 1/2 pint of warm water, and stir for 2 minutes. Put 2 1/2 ounces of Pinex (fifty cents worth) in a pint bottle, and add the Sugar Syrup. Take a teaspoonful every one, two or three hours. Tastes good.

This takes right hold of a cough and gives almost instant relief. It stimulates the appetite, and is slightly laxative—both excellent features.

Pinex, as perhaps you know, is the most valuable concentrated compound of Norway white pine extract, rich in quinine and the other natural healing pine elements.

No other preparation will do the work of Pinex in this matter. Strained honey may be used instead of the sugar syrup, if desired.

Thousands of housewives in the United States and Canada now use this Pinex and Sugar Syrup remedy. This plan has often been imitated, but the old-fashioned combination has never been equalled. Its low cost and good results have made it immensely popular.

A guaranty of absolute satisfaction, or money promptly returned, goes with this preparation. Your druggist has Pinex, or will get it for you. If not, send to The Pinex Co., Ft. Wayne, Ind.

ber of the executive committee and George C. Higbee of Marquette was chosen one of the vice presidents.

PLAN ANOTHER NOMINATION.

Second List of Candidates to Be Named by Sons of St. George.

A meeting of Mistletoe lodge, Sons of St. George of Quincy, will take place next Friday evening to nominate a second list of candidates for offices in the lodge. The election will take place later. The nominations already made follow: President—John T. Trevathan, secretary—Ben Trembath, president—John T. Vickers, assistant—William Gouge, Jr., messenger—J. B. Rippon, inside sentinel—William Paul, outside sentinel—C. T. Trevelyan, trustees—William Simmons, B. Trembath and Daniel Hoard.

CHAMPION SHEEP DOG OF WEST.

Jet Is a Prize Guardian of Flocks and Is the Pride of His Master.

James McLay, of Laramie, Wyo., is the proud possessor of the champion sheep dog of the West.

"Jet" is the name of the dog, whose performances in herding sheep have aroused the amazement of flockmasters in Wyoming and Idaho. He has won many prizes at international sheep shows. Jet is a black and white collie, who boasts a distinguished ancestry.

Mr. McLay is a noted sheep authority in the West. He believes that the quality of sheep dogs in this country, as well as the quality of sheep, can be improved, to the advantage of the sheep man. Some flockmasters in this country, particularly in the Southwest, have become discouraged with the "dog proposition" and refuse to hire herders who work with dogs. They claim that the average herder with a dog will let the animal do all the work, and that a dog will run the flesh of sheep and, by chasing the animals through dense brush and over fallen timber, will injure their fleeces for shearing.

A high-class sheep dog, however, will do none of these things, and Mr. McLay believes that if American sheep men devote the proper attention to raising and training their four-footed guardians of the flocks, the dog will never be displaced from his pedestal as the natural caretaker of the sheep.

Jet lives in the midst of a country that is famous for its sheep. The Laramie plains are grazed over by countless bands of sheep and there is no lack of opportunity to put a sheep dog to a practical test. Jet was put through her first training when she was about nine months old.

Mr. McLay, like most western sheep herders, believes in working a dog by signs, rather than by command. This is absolutely necessary in the far west, for the high winds of the plains often

Markets

The closing prices at Boston yesterday were as follows:

Table with columns for various commodities and their prices. Includes items like U.S. Cons, No. 1, No. 2, No. 3, No. 4, No. 5, No. 6, No. 7, No. 8, No. 9, No. 10, No. 11, No. 12, No. 13, No. 14, No. 15, No. 16, No. 17, No. 18, No. 19, No. 20, No. 21, No. 22, No. 23, No. 24, No. 25, No. 26, No. 27, No. 28, No. 29, No. 30, No. 31, No. 32, No. 33, No. 34, No. 35, No. 36, No. 37, No. 38, No. 39, No. 40, No. 41, No. 42, No. 43, No. 44, No. 45, No. 46, No. 47, No. 48, No. 49, No. 50, No. 51, No. 52, No. 53, No. 54, No. 55, No. 56, No. 57, No. 58, No. 59, No. 60, No. 61, No. 62, No. 63, No. 64, No. 65, No. 66, No. 67, No. 68, No. 69, No. 70, No. 71, No. 72, No. 73, No. 74, No. 75, No. 76, No. 77, No. 78, No. 79, No. 80, No. 81, No. 82, No. 83, No. 84, No. 85, No. 86, No. 87, No. 88, No. 89, No. 90, No. 91, No. 92, No. 93, No. 94, No. 95, No. 96, No. 97, No. 98, No. 99, No. 100.

Turn the Baby's Tears to Laughter

A Gentle Baby Laxative Will Quickly Relieve the Usual Cause of the Trouble.

It is often difficult to tell just what is the matter with a crying, peevish baby or child too young to express its feelings in words, but as a general rule the mother will find that there is a tendency to constipation, which has brought on a headache or nervousness. The little one has no pain, but feels "out of sorts."

The first thing to try is a family remedy containing good but mild laxative properties, and many mothers will say that the choice would be Dr. Caldwell's Syrup Pepsin. Thousands of mothers keep it in the house for such emergencies, among whom may be mentioned Mrs. John Kirch, Jr., 1527 Abstract Ave., Pittsburg, Pa. She was giving it successfully to little Walter, whose pictures we present at the top of this page, when he was only three months old. He is a healthy, laughing youngster today and Mrs. Kirch gladly gives Dr. Caldwell's Syrup Pepsin credit. It saves many an illness and many a large doctor bill, for by administering it promptly when the first symptoms of illness are noticed it prevents a serious ailment.

Families wishing to try a free sample bottle can obtain it postpaid by addressing Dr. W. B. Caldwell, 419 Washington St., Monticello, Ill. A postal card with your name and address on it will do.

The doughty old general, a stranger, a stranger to despair and too busy breast-feeding the rising flood of the northern legions to heed the striking of the clock of Fate, was leading a desperate charge at Salior's Creek, the last battle of the war, when he heard a rumor of Lee's surrender. Filled with astonishment and anxiety, he turned his horse at the close of the fight and rode in search of his commander-in-chief.

As he splashed along the muddy road, unkempt, unshaven and himself a spectator of mud after forty-eight hours in the saddle, he chanced upon General Lee, with his staff, on his way to arrange the details of the surrender with General Grant.

The fiery old autocrat, too much overborne by tumultuous emotions to give a thought to military discipline and forgetting that General Lee was not still his young protégé, pushed through the circle of officers and riding up to the commander, blurted out: "General, what's this talk I hear about your surrendering?"

"It is true, general," replied General Lee sadly, and overlooking the old warrior's gross breach of discipline, "I am just on my way to meet General Grant. "Surrender!" ejaculated the old governor. "I am astonished. And what am I to do; tell me, what am I to do, sir?"

As General Lee gazed upon his overwrought subordinate his eye, even in that hour of bitter trial, caught the ludicrous aspect of the doughty old soldier as he sat there besplashed from crown to toe, his bare head a tangled mass of wild knots, his face a dirty mottle of mud, streaked like the make-up of a masquerade, with powder smudges running crazily about his features, his whole appearance in grotesque contrast to the tragic sorrow that overwhelmed him. And a ghost of a smile flitted over the sad countenance of the commander as he replied gently to the old general's insistent query: "I think, general, you had better go home and wash your face."

And with a nod he departed, leaving the astonished old soldier with a painful miscellany of feelings to carry out the last order of General Lee.

ARMENIAN PEASANT LIFE.

Among the Armenian peasants the old patriarchal system prevails. The entire family of a score or two of people of several generations lives beneath a single roof, says the Christian Herald. Together both men and women till the fields in a primitive manner, and when the grain is ripe, they take a sheet to the roadside that the passing stranger may give a present and thus less their crop. Their houses are of stone roughly laid, or of mud, or frequently they are half underground, and from a distance their domelike roofs resemble the mounds of a prairie dog settlement.

PERFECT Satisfaction is the MECCA slogan.

What is more important—MECCA lives up to this slogan.

MECCA is the largest selling brand in America today, because millions of experienced smokers find in MECCA enjoyment and satisfaction that no other cigarette affords them.

They have tried other brands—and they have come back to MECCA with greater appreciation of its marvelous qualities.

The new foil package of 20 is immensely popular with MECCA smokers, because it is so compact and convenient.

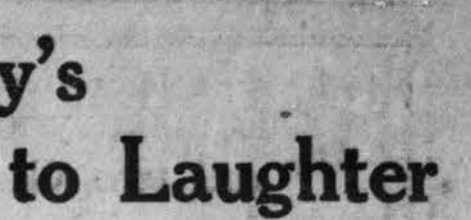

Try MECCA in this new package and you will realize that quality is the sole reason for the marvelous MECCA success.

are always guaranteed or money will be refunded.

Syrup Pepsin is for all the family from infancy to old age, and because of its mildness families should prefer it over all other remedies. It is absolutely safe and reliable. You will never again give cathartics, pills, salts or such harsh physics, for they are usually unnecessary, and in the case of children, women and elderly people are a great shock to the system, and hence should be avoided.

Families wishing to try a free sample bottle can obtain it postpaid by addressing Dr. W. B. Caldwell, 419 Washington St., Monticello, Ill. A postal card with your name and address on it will do.

Every Woman Appreciates the Charm and Comfort of a Fair Face

It has been said that beauty is a grace beyond the reach of art. Beauty cannot be created—once nature's charms are gone. But a woman can remain beautiful by using approved methods of retaining the freshness of her complexion. The skin must be fed, and the best thing for this purpose is

NYAL'S FACE CREAM.

It is an excellent skin food and tissue builder. It is quickly absorbed by the pores, removes impurities, rounds out the muscles and makes the skin fair and firm. It is perfectly harmless and is delightfully perfumed, so as to make its use a delight and comfort. Price, 25 and 50 cents.

City Brevities

Today's weather: Cloudy and unsettled; somewhat colder. Yesterday's temperatures: Seven a. m., 45 degrees; noon, 50; 7 p. m., 47. Highest, 56 degrees; lowest, 37.

The Pythian Sisters will meet at Fraternity Hall this evening.

Mr. and Mrs. John Lier spent Sunday with friends in Ishpeming.

Funeral services over the late Silas Robinson were held yesterday morning at 8:30 at St. Peter's cathedral. Burial was in Holy Cross cemetery.

A regular meeting of Division No. 4, A. O. H., will be held at Keough's Hall tomorrow evening. A luncheon and smoker will follow the business meeting.

The usual bi-monthly dancing party will be given at Guild Hall next Saturday. The committee in charge requests both parents and young people to attend.

Invitations for the Kappa Alpha Psi dancing party Friday evening, Nov. 21, have been sent out. The party will be in Fraternity Hall. The ideal orchestra has been engaged to furnish the music. Light refreshments will be served.

The special meeting of Presque Isle chapter, O. E. S., No. 403, called for Wednesday evening, will be postponed until Dec. 10, as the consistory is using the hall every evening for rehearsals for their annual meeting to be held Dec. 3.

Playing to two audiences, so large that standing room was sold last evening, the Five McLarens, putting on a Scotch musical and dancing act at the Opera House the first half of the week, were a decided hit. The youngest of the sisters, with drum and traps, starred in the act.

Story Hour Today—"Story hour" for children of school grades 1 to 4 will be conducted at the Peter White Public Library this afternoon, beginning at 4 o'clock.

Council Met Last Evening—The council met last evening and approved the assessment roll for the grading of Cedar street, from Hewitt avenue to Crescent. That was the only piece of business that came before the aldermen.

Gets Two More Bears—Two bears, a mother and her cub, together weighing 186 pounds, were shipped yesterday to Hathways' meat market from Humboldt. It is not known who shot them. The skins of the four bears sent here Saturday have already been sold, and the meat will be sent to Chicago, where it is served in high class cafes.

Has Music Published—John P. Snider, of Marquette, is the author of words to the song "The Treasure That Passed Away," composed by Arthur Penn, and put on sale a short time ago. Mr. Snider also wrote the words for "A Boy of the U. S. A." and is waiting on two other songs, "Rosa Lee" and "Delicious Dreams." Mr. Snider is employed at Ormsbee & Atkins.

Jay Pickands Seriously Ill—J. G. Reynolds last evening received word that Jay Pickands, of Cleveland, who was operated on in that city last week for appendicitis, had, after doing well for some days, suddenly taken a turn for the worse, and that his condition is considered serious. Mr. Pickands suffered the attack while in Ishpeming on a business visit, and left at once for Chicago, going right through to Cleveland. He is a member of the firm of Pickands, Mather & Co.

Preparing for Election—With the vote on the proposed commission charter less than two weeks away lines are being drawn in preparation for the election. The opponents of the charter have organized with John Robinson, former mayor, as chairman, and John Tobin, Jr., as secretary and treasurer, and it is announced that headquarters will be opened in the city hall. It is likely that the friends of the charter will also prepare to take an active part in the election. The activity will take the form of preparation to get out the vote.

To Be Buried This Morning—The funeral of the late "Ted" Maney, thirteen-year-old son of T. J. Maney, chief of the fire department, who died Saturday evening, after a short illness with appendicitis, will be held this morning, with services at 10 o'clock. The interment will be in Holy Cross cemetery. Mr. and Mrs. James Maney, of Duluth, uncle and aunt of the boy; his two aunts, the Misses Margaret and Elizabeth, of Duluth, and two uncles, William Maney, of Superior, and John Coleman, of Marquette, are in the city to attend the funeral. "Ted" was in school only last Friday.

Mayor Receives Request—Mayor Fassbender yesterday received a request from Alice Tait, of Kingston, Ont., to forward the body of her brother John Tait, first officer of the steamer Henry R. Smith, in case it should be cast upon the shore near Marquette. She also asked for any information about the loss of the Smith that has not already been given. Persons living along the shore east from Marquette are keeping eyes on the beach and it is reported that wreckage has been cast on the shore as far east as Munising. As far as has yet been reported no bodies have yet come ashore.

Improvements Nearly Finished—The improvements to the front of Schoch & Hallam's jewelry store are nearing completion. All that remains to be done is the placing of a crown of ornamental iron around the canopy. The plate glass was put in yesterday. The display of jewelry in the window will be from a series of steps, covered with red satin. The jewelry will be placed on dark velvet. On the suggestion of a diamond salesman the lighting will be done by "invisible" globes. Instead of having the regular drop lights in the windows each light will be placed in a box in the ceiling. The sides of the windows will be hung with white Holland drapery, to match the white marble baseboard on the outside of the building.

AGE AND MATRIMONY IN GREENLAND. Neither old age nor matrimony is at all popular in Greenland, according to the latest census of that country, which also sets forth the fact that civilization has imposed its restrictions even on this remote realm with such effect that during the last decade there have been, as far as the public was aware, but three inhabitants of the region who possessed more than one wife, each. There are only twenty-six men and forty-four women who have passed beyond the age of sixty years, and in every 1,000 of population there are 650 unmarried, 310 married and 31 widows.

HOOKS AND SLIPS IS MEMORY PLAN

New York Vaudeville Performer Has a Record of Remembering 300,000 Facts.

New York, Nov. 17.—A young immigrant boy, dishwasher by occupation, walked into Cooper Union one night, sleepy and tired, and picked up a book at random. He was a very ignorant boy; he had never heard of Shakespeare, and Lincoln was a myth but he liked a book now and then. So he read.

The boy was Felix Berol, today the greatest "memory man" alive; the dishwasher who twenty years ago knew nothing except that he existed in a rather dull world, today is the man who has 300,000 facts at his instant command. The book was Henry George's "Progress and Poverty," the factor in Berol's life that changed the whole current of his career. For he found that he couldn't remember anything he read, so he hunted books on memory. For seven months after that first night, he was kicked around from the pillar of Cooper Union to the post of Astor library as a loafer.

For sometimes, even though he was interested greatly, he would nod over his book; dishwashing for 12 hours was rather fatiguing. But he read voraciously on the subject that was fascinating his awakening mind. He began to plan a little system by which he could remember things. In seven months he was on the vaudeville stage as "Berol, the Mental Marvel, with 5,000 Facts in His Head."

60 Times 5,000 Now.

Mr. Berol smiles deprecatingly now at that paltry store of information, for today there are 60 times 5,000.

How did he do it? What is his secret? Well, he had his bread and butter, and it would hardly do to tell. But he intends to have other people know, for he is conducting classes in memory training at the New York Y. M. C. A., and last year turned out more than 200 enthusiastic disciples of the "system."

The system is one of "hooks" and "slips," all very mysterious to the uninitiated but quite simple and practical to the men who know. Every single fact to be acquired is written down on a slip of paper, on the other side of which is the "hook" or suggestive idea. The student, by repeated reference to these slips, soon learns the "hook," and thereby, of course, instantly can recall the associated fact.

"We use the principle of assimilation," said Mr. Berol, "when we find, imagine, or make a word, which is easier for us to remember than the word we are trying to remember. Those assimilations are called homophones. As names of persons, for instance, generally mean little or nothing to us, they are hard to remember. By assimilating those hard-to-remember words which mean something to us, which therefore are easily remembered, we will be able to recall the names of people without difficulty. A little practice soon will enable you to find homophones to fit any name which we may encounter. There is no name, however strange, for which a homophone may not be found."

Kinds of Association.

"The homophone easily may be associated with something about the person's features, business peculiarities. There are several kinds of association, that of similarity, of contrast, or succession, of contiguity; it depends entirely upon your power of imagination. For instance, take that portly woman yonder. The most striking thing about her is that she is fat. Let her name be Fry. See how easy that is. There is a tailor, named Nutting. Assimilation: Nutting—nothing. Association: It is very seldom that one can get a good suit for nothing.

"Memory never starts on its own account; association is absolutely essential.

Just by way of experiment a few questions were put to Mr. Berol.

"When was Mendelssohn born?" asked the reporter.

"On the third of February, 1809," came the instant reply.

"How long is the River Jordan?"

"It extends 99 miles, though it really is 200 miles in length."

"What is the population of Ceylon?"

"Four hundred and thirty-eight thousand four hundred and fifty-six, with an area of 2,510,000 square miles."

"It is easy to be exact," he says "and so few people are. Now it really doesn't affect my happiness to know the Lima, Ohio, has a population of 30,508, but I want to show that people can remember anything they want to. If I were a minister, I would know every verse in the Bible; if I were an insurance man, I would know every premium."

FRENCH COOKING SECRETS.

"We French people taste food as we prepare it. You seldom taste a dish in the process of the making," said the French cook to the American housekeeper, who was extolling the cooking of his land.

"You go by rule, not by taste. I have watched cooks in this country prepare water for boiling potatoes by simply throwing some salt in. The French cook would not think of doing this. He would put a little salt in the water, then he would taste as he added more until the water was just salty enough."

"In making soup, preparing a sauce, cooking vegetables, etc. it is always the same rule—flavors added in small quantities, then more added until the cook's taste is satisfied."

"A French cook would never put a cake into the oven without tasting the dough. A recipe to us is simply a general guide, to be tuned to the taste of the cook. That is one reason why there is so much individuality in French cooking and why when you go about in French homes the food at one hostess's table does not taste just like that at her neighbor's. That is why inns and hotels in France are so renowned for a 'specialite de la maison.'"

"Another thing that amazes me in the kitchens over here is the way you cook things so quickly. If I had in a general way to tell the difference between the French and the American kitchen I should say that we let things simmer while you boil them."

"And, oh, why do you cook so much in water, which makes so many things insipid? It is the way you have with most vegetables—throw them into boiling water with some salt. Why do you

DO NOT BE CONTENTED!

The man who is contented with his lot will never better that lot. It's the man who is constantly forging ahead—reaching out for bigger things—who really does get ahead and to whom the better things do come. If you have a MARQUETTE NATIONAL Savings Account here, add to it—strive to increase it. If you haven't got one—start it now!

—Even your Dollars here are not contented to remain idle. Each one brings you in 3 per cent a year.

Discussions of City Charter

ESSENTIALS IN CHARTER DISCUSSION.

To the Editor of The Mining Journal: Shall Marquette be governed in a business-like way by five competent men...

The first of these provisions gives us interdepartmental unity; one department cannot suffer at the expense of another...

The fact that under the new charter the government of the entire city will center in five men will add dignity and importance to the office...

A charter is not an end in itself, but only an instrument—a means by which the public will can be most completely expressed...

If an incompetent commissioner should be elected he can be removed in two ways. First, by the recall, which applies also to all elective officers...

The election and retention of competent commissioners, therefore, is carefully guarded by the new charter...

To the Editor of The Mining Journal: "Man's inhumanity to man, makes countless thousands mourn."

The above quotation can never be more appropriately used than in reply to an article appearing in your issue of Saturday...

The article reminds me of a story about two old farmers getting at loggerheads over a line fence...

Fire Frightens Patients in Hospital at Chicago. Chicago, Nov. 17.—Fire on the second floor of a building under construction at the Cook county hospital tonight frightened two hundred patients in the north ward of the hospital.

Former Cashier Jossman Sentenced to Jackson. Pontiac, Mich., Nov. 17.—Ralph E. Jossman, defaulting cashier of the E. Jossman state bank of Clarkstown, near here, was today sentenced to serve from seven to twenty years in the state prison at Jackson.

Queer Source of Inspiration. A patient searcher gives the results of his labors in a Paris contemporary, from which we learn that Haydn never composed unless he had on his finger a ring given to him by Frederick the Great.

Accidental Discoveries. Valuable discoveries have been made, and valuable inventions suggested, by the veriest accidents. An alchemist, while seeking to discover a mixture of earths that would make the most durable crucibles, one day found that he had made porcelain.

Mezzotint owned its invention to the simple accident of the gun barrel of a sentry becoming rusted with dew. The swaying to and fro of a chandelier in a cathedral suggested to Galileo the application of the pendulum.

Not having pen, ink and paper convenient, he wrote the list on the stone with the etching preparation, intending to make a copy of it at leisure. A few days later, when about to clean the stone, he wondered what effect aqua fortis would have upon it.

The composition of which printing rollers are made was discovered by a Salsopian printer. Not being able to find the pelt ball, he inked the type with a piece of soft glue which had fallen out of a glue pot.

The shop of a Dublin tobacconist by the name of Landyfoot was destroyed by fire. While he was gazing dolefully into the smoldering ruins, he noticed that his poorer neighbors were gathering the snuff from the canisters.

Paris, Nov. 17.—The Paris fashion of London, Paris or New York spent as much time over her toilet as her sister of the Far East she would have very little left in which to attend to her social and domestic duties.

Paris, Nov. 17.—The Paris fashion of London, Paris or New York spent as much time over her toilet as her sister of the Far East she would have very little left in which to attend to her social and domestic duties.

A practical and useful birthday or Xmas gift for mother, sister or daughter.

Two agents wanted in every town.

KAISER IS GOOD FARMER. Emperor Wilhelm not only runs a nation, but a farm as well and he does it right.

Emperor Wilhelm not only runs a nation, but a farm as well and he does it right. Recently he made an address to farmers on farming from his own experience, and it contained many valuable hints.

This farm of the emperor's has 322 acres of tillable ground. In addition he has reclaimed 296 acres, adjoining of swamp. His pastures about seventy-five head of cattle and raises yearly 150 tons of hay, 5,000 bushels of potatoes, 60 tons of carrots and a thousand bushels of rye, states the Rural Farmer, and this feed takes care of 120 cattle and ninety-two horses.

In his talk he spoke of picking out the heads of rye that were big and strong and stood up above the rest. "Like the lances of the Uhlans." These he used for seed, and he has increased the yield 50 per cent.

The emperor is fond of oxen for farming, and crosses the zebu with the German cattle, making an ox that is strong and healthy. He has also crossed the native sheep with the Persian.

On his farm he has raised 800 bushels of potatoes to the acre. He advised the German farmers to mix brains with their fertilizer. One of the strong points of his address was his suggestion that the German army be utilized a part of the time in agricultural pursuits, and that the soldiers be instructed in the arts of peace as well as in the arts of war.

QUEER SOURCE OF INSPIRATION. A patient searcher gives the results of his labors in a Paris contemporary, from which we learn that Haydn never composed unless he had on his finger a ring given to him by Frederick the Great.

Perhaps you don't know that you can possess a beautiful set of fine furs and yet not give more than \$15.00 for them some as low as \$3.95, others up to \$150.

DR. HENRY HOLM TO ENLARGE HOSPITAL

Patients Come from Far and Near to Receive Treatment at Ishpeming Institution.

Dr. Henry Holm, who a short time ago purchased the interest of his partner, Dr. I. Lindgren, in the Hohn-Lindgren hospital on Division street, has planned a number of improvements in the building, some of which will be made this fall.

The demands on the hospital have increased steadily and of late it has not been large enough to accommodate all of the patients desiring treatment. On his arrival home from Europe, where he spent three months during the summer, Dr. Holm moved his family from the hospital to the Donance dwelling on Ridge street, to provide additional wards for patients. Eighteen to twenty can now be received. An addition is to be built at the rear for an operating room, and the present operating room will be used only for minor cases.

Next spring Dr. Holm plans to increase the floor space of the building so as to provide several more rooms for patients. Among Dr. Holm's patients are persons who come from outside points. There are at present twelve patients in the hospital, among them two from Wisconsin, two from Canada, one from Crystal Falls and two from Rumley. While abroad recently Dr. Holm engaged Miss Anna Hagg, a Finnish training nurse, to come here to take charge of the hospital, succeeding Miss Fannie Manley, who resigned to accompany Dr. Lindgren to Duluth. The more difficult operations at the hospital are performed by Drs. Holm and R. A. Burke, of Dorset.

REPORT IS CONFIRMED.

The officers of Zenith lodge, Knights of Pythias, are in receipt of a letter from H. B. Vandewalker, commander of the Michigan grand lodge of the order informing them that the executive board has decided to hold the next grand lodge convention in Ishpeming, if certain requirements are met. Among the requirements is a class of 150 candidates and the expenses of an excursion for the grand lodge officers and delegates from Ishpeming to Eagle Harbor and return. The members of Zenith lodge had already practically decided to arrange this excursion and also to secure the number of candidates mentioned by the grand chancellor, so Mr. Vandewalker will be informed immediately that the lodge accepts the requirements.

LILLIPIANS PLEASE.

Ergotti and his Lilliputians, who opened a three days' engagement last evening at Ishpeming theater, present an excellent adaptation of the play of best that has ever been seen here, and it was received with much enthusiasm last evening by capacity audiences. The performers were called before the curtain several times. A strong two-reel Vitagraph drama, "The Lilliputians" will be included in tonight's program. Other pictures will be the "Pathe Weekly" and two Biograph comedies, "Papa's Baby" and "Come Seben, Leven."

WAS DIFFICULT OPERATION.

Relatives and friends of Alderman John S. Olson of the A. W. Myers Mercantile company, who was operated on Saturday in Columbia hospital, Milwaukee, have been informed that he was in the operating table for five hours and that the operation, performed by Dr. Yates, was a most difficult one. Complications had arisen but it is reported that Mr. Olson has an even chance of recovery. It is said that if he had not been operated on he could have lived but a few days.

ISHPEMING IN BRIEF.

Miss Helen Lidberg has returned from a few days' visit with her sister, Viola, at Crystal Falls.
Roul Jacob, Dennis Hickey and Dick Adams are spending a week deer hunting at Voelker's camp, in the Dead river district.
Miss Florence Randall has resumed her duties at the Carnegie public library, after being confined to her home for three days with illness.
F. J. Heindel, Joe Vadnaiz and Al Denn left yesterday on a deer hunting expedition to P. J. Demas's camp, in the Dead river district, north of Ishpeming.
Captain Frank Platte of Port Caldone, Can., is home on a visit with his family. He will spend a week at Charles Johnson's camp, on the Flat Rock river, deer hunting.
J. H. Williams, ticket agent for the Chicago & Northwestern railway, was returned from a two days' visit in Milwaukee. Mr. Williams Sunday saw J. S. Olson, who is confined to the Columbia hospital.
Miss Minnie Shaney, who has been absent in the west for the past year or more, is expected to arrive home the latter part of the week. She has been visiting friends in Butte, Mont., since leaving Seattle more than a month ago.
Sidney Allen, cashier in the Ishpeming freight office of the Duluth, South Shore & Atlantic Railway company, has resigned to accept the position with the Consolidated Fuel & Lumber company made vacant by the resignation of Eugene Packard. Mr. Allen will be succeeded by J. W. Miller, who has been in the employ of the company in Marquette for the past ten years or so. Mr. Miller arrived yesterday and Mr. Allen will remain with him a few days, until he becomes familiar with the work.

A MAKER OF HEALTH.

A good honest medicine like Foley Kidney Pills gives health to many families. Mrs. O. Palmer, 635 Willow St., Green Bay, Wis., was seriously ill with kidney and bladder trouble. Mr. Palmer writes: "My wife is rapidly recovering her health and strength, due solely to the use of Foley Kidney Pills." For sale by All Dealers.

Repairing of All Kinds Promptly done and at right prices. Also Chimney Sweeping.

contemplated improvements were discussed.

TEAM ORGANIZED.

Old Players Will Take Up Basketball at the "Y" This Season.

Prospects are bright for a winning Y. M. C. A. basketball team this season, as all of the players of last year's team have decided to take up the game again. The first practice will be held Thursday evening. Among the old players are Eichler, Mudge, Nichols, Sivula, Cousineau and Beaglehold.

Cecl Bengry will have charge of the wrestling at the "Y" this season. Tomorrow evening, at 8:15 o'clock, the second game of the volley ball league series will be played by the Working Boys and Oliver teams.

The remaining games of the schedule are:
Nov. 19—Working Boys vs. the Olivers.
Nov. 26—Olivers vs. Cleveland-Cliffs Iron company.

Dec. 3—Y. M. C. A. vs. Working Boys.
Dec. 10—Y. M. C. A. vs. Oliver.
Dec. 17—C. C. I. vs. Working Boys.

MINING MEN OPTIMISTIC.

Several New Mines Will Probably Be Opened on Mesaba.

An Ishpeming man, who recently visited the Mesaba range and met a number of prominent mining men says the operators are looking forward to an active season in 1914. Although no definite announcement has been made, everything points to an exceptionally active year near Biwabic, as several new properties will probably be opened in and near that town. This applies particularly to the Higgins land, on which the Steel corporation has made some big finds.

It is said that the Higgins land is not for sale and that the Steel corporation, or others who may find ore on the tract, will have to operate under lease.

Mining News

CHILE COPPER COMPANY.

The Chile Copper company claims to have more than doubled its ore reserves since the first permanent financing was undertaken a few months ago. Diamond drills have proved up over 200,000,000 tons of ore, which, however, do not measure the possibilities of the property. Development work has been extended west from the original ore body. At a point 500 feet west a hole was put down and was still in ore at 1,100 feet. The Guggenheim interests believe that the property will be the largest in the world. The company has been financed for the next two years. With an authorized issue of \$15,000,000 convertible bonds the management arranged for future needs up to the point of production. Just how many of these bonds have actually been sold is not a matter of public record.

The Miners' National Bank, Ishpeming, Mich

STATEMENT, OCTOBER 21, 1913
(COMPTROLLER'S CALL)

RESOURCES		LIABILITIES	
Loans and Discounts	\$1,039,822.67	Capital	\$ 100,000.00

U. S. and other bonds	297,900.00	Reserved for interest	7,460.04
Cash and Exchange	336,251.29	Reserved for taxes	1,500.00
	\$1,707,903.96	Circulation	97,000.00
		Deposits	1,385,595.64
			\$1,707,903.96

but officials state that as the development and construction work progresses, the necessary funds will be available from proceeds of this issue. The plant under construction calls for an initial unit of 10,000 tons daily, with the works so laid out that they can be increased in capacity when desired. Cheap mining costs will prevail, according to official predictions. One of the favorable factors will be a small stripping charge, as the capping, where it does exist, is shallow. In many parts of the property, however, no capping at all is found.

CLARK OPTIMISTIC ON COPPER.

Senator W. A. Clark, in an address before the News Writers' association at a Butte banquet given in his honor in celebrating the fiftieth anniversary of his residence in Montana, said the future of the copper industry was never so bright as today. "There are only 80,000,000 pounds of copper available for use in the industries of the world, and such a condition in any other commodity would create a panic. It takes sixty days from the time copper is mined to get it to market. There is absolutely only three weeks' supply of metal on hand now, and the copper business was never so firm a foundation," he said.

LAKE DIVIDENDS.

The eight dividend-paying copper companies at the Lake, namely, Ahmeek, Calumet & Hecla, Copper Range, Quincy, Mohawk, Osceola, Wolverine and the St. Mary's Mineral Land company, during the current calendar year will pay about \$8,194,788 in dividends, compared with \$9,069,257 last year. The decrease in dividends the past year is, of course, due to the strike of the miners. The Calumet & Hecla will disburse \$3,200,000 this year, provided the dividend now due for declaration is the same as for the last quarter, against total payments of \$4,200,000 last year, which was 46 per cent of the total of all the Lake mines. The dividend payments by Calumet & Hecla

this year represent 29 per cent of the total.

In 1905, 1906 and 1907 there were nine dividend-paying companies, in 1908 six, in 1909 and 1910 seven, and in the past three years eight. The most important change during the past decade has been the passing of Tamarack from the dividend ranks. After forty-three consecutive payments, covering a period of nineteen years, Tamarack discontinued dividend payments in 1907, after disbursing \$9,420,000. Tamarack paid \$7 per share in 1907, \$8 in 1906 and \$5 in 1905.

Dividend payments during 1913 by the eight Lake Superior dividend-paying copper companies follow, comparison being made with the previous year:

Companies	1913	1912
Calumet & Hecla	\$3,200,000	\$4,200,000
Ahmeek	1,100,000	900,000
Copper Range	1,082,713	787,382
Osceola	1,909,575	1,201,875
Quincy	522,500	550,000
Wolverine	300,000	600,000
St. Mary's	480,000	480,000
Mohawk	500,000	350,000
Total	\$8,194,788	\$9,069,257

INSPIRATION.

The Inspiration Copper company has been carrying on its preliminary work without a hitch, according to an official of the company. The experimental mill will probably be ready to commence operations next month; its capacity will be 600 tons of ore daily. The flotation process will be used in the treatment of these ores, but there remain some details to be perfected. Actual production has been scheduled for late in 1914, but it will probably be 1915 before Inspiration is regarded as a regular producer. The railroad has been completed and the ore bins practically finished. Construction work has not occupied the entire time of the management for there has been added an additional tonnage to ore reserves, the extent of which, however, will not be made known until next year.

POSSIBLE ADDITION TO IRON RANGES

Discoveries, Said to Be Important, Have Been Made at Blueberry, Near Superior.

The Blueberry field, the latest addition to the Lake Superior iron ranges, which may be called an extension of the Gogebic range, was only recently discovered by George W. Butterfield, a mining man well known in this region who began studying the new district last June. Mr. Butterfield is a man of technical education and a broad practical experience in iron mining work, and he predicts positively that rich mines of hematite iron will be developed in the Blueberry district.

Mr. Butterfield has resided in Duluth for the past five years and for three years of this time he was in the Wisconsin forestry reserve service. He was raised in Houghton, and in 1885 entered the Houghton school of mines, in the first class that was formed, graduating from that school. He acquired considerable knowledge of the copper mines in Houghton county and the iron mines in Marquette and Menominee fields.

When Mr. Butterfield began his search for minerals in the Blueberry district last June he gave up all other work to read the iron secrets around the town of Blueberry, Wis. While employed in the government service he had observed rock outcroppings and noted other indications that led him to believe that ore existed in the swamps of the region near the Blueberry station, on the Northern Pacific railroad, some ten miles or so east from the Allouez ore docks in Superior. A short time ago Mr. Butterfield turned up ore by test pitting.

Mr. Butterfield now proposes to thoroughly explore the field with diamond drills and by test pitting, and he is so confident as to his conclusions that he has secured 1,000 acres of land which he has turned over to the Butterfield-Mass Mining company. Duluth and Superior men are associated with him in this corporation, and a campaign of practical explorations has just been started. The first hole is now down seventy feet in slate.

ISHPEMING IN BRIEF.

C. A. Fohrman is here from Chicago, on a business trip.

Captain Alfred Collick, brought two deer from Michigan, Sunday, after a week's hunting trip.

Fred Alderton and Will Cole will leave today for their camp, in the Dead River district, on a week's deer hunting trip.

Samuel L. Ring, representative of the Stein-Bloch company, will be at the John L. Bradford company's store today.

Trembath Bros. on Saturday replaced the big plate glass window in the Braastad block that was shattered by the storm a week ago today.

Miss Hazel Smith, of Douglas street, entertained sixteen of her schoolmates Saturday afternoon and evening, the occasion being her sixteenth birthday.

John Dougherty, who spent Sunday and yesterday in the city visiting his brother-in-law, J. H. Quinn, and family, left last night for his home in Manitoba.

The members of the Women's Foreign Missionary society of the First Methodist Episcopal church will meet this afternoon with Mrs. William Argall, of Fifth street.

A special meeting of Hematite chapter, Order of Eastern Star, for degree work, will be held this evening. There will be music and refreshments during the social hour.

One of the Cleveland-Cliffs Iron company's steam shovel crews went to Marquette yesterday to load ore at the Lake Superior & Ishpeming Railway company's docks for a few days.

Gust Anderson has resumed his duties as towerman at the North Lake crossing, for the Lake Superior & Ishpeming Railway company, after being laid up for a month with an injured knee.

Mrs. Bessie Jaedecke and son, Gordon, and Mr. and Mrs. Fred Ongie have returned from a week's hunting trip to Camp Florence. Mr. Jaedecke got two deer, but Mr. Ongie failed to get a shot.

The fifth of the series of dancing parties, under auspices of Uniform rank, Knights of Pythias, will be given next Friday in Braastad's hall. Dancing will start at 8:30 o'clock, continuing until 12. Lundahl's orchestra will furnish the music.

Dave Verquist, baggage man at the Duluth, South Shore & Atlantic Railway company's depot, has been ill and confined to his home the past few days. James Deasy, who is in the company's employ.

Consumption Takes 350 People Daily

In the United States and the deadly germs claim more victims in cities than in rural districts, due no doubt to the increased number of indoor workers in confining quarters and their lack of sunshine.

Tubercular germs always attack when the system is weakened from colds or sickness, overwork, overstrain, confining quarters or any drain which has reduced the resistive forces of the body. But nature always provides a corrector and the best physicians emphasize that during changing climate our blood should be kept rich and pure and active by taking Scott's Emulsion after meals; the cod liver oil in Scott's Emulsion warms the body by enriching the blood—it peculiarly strengthens the lungs and upbuilds the resistive forces of the body to avoid colds and prevent consumption.

If you work indoors, tire easily, feel languid or nervous, Scott's Emulsion is the most strengthening food-medicine known; it builds energy and strength and is totally free from alcohol or any stupefying drug—every druggist has it.

DOCTORS IN GERMANY PROCLAIM A STRIKE

Operation of Insurance Contracts Limits Physicians to Over-Crowded Field.

Berlin, Nov. 17.—More than twenty one thousand German physicians from small town and country districts have decided to follow the example of their professional brethren in Great Britain and declare a "doctors' strike" against sickness and accident insurance associations established under the imperial insurance laws. They complain against certain regulations under the laws, which they say militate against them, particularly one depriving the patient who is a member of an organization of any say in the choice of the physician by whom he desires to be treated. They object, too, to the wide discretion given to the organizations in the matter of contracts with physicians. The decision to declare a strike against these regulations was reached at a meeting in Berlin of more than eight hundred delegates from all over Germany.

More than two-thirds of all the Germans are members of insurance organizations which have their own contract physicians, and the remaining medical field is over-crowded. The number of medical students in Germany has risen from 6,300 in 1905 to 14,000, an increase utterly disproportionate to the increase in the population. The result is according to statistics, that half of all the physicians have incomes less than \$1,500 yearly.

Mining News

WILSON'S SEATTLE SPEECH.

Secretary of Labor Wilson, who in his Seattle speech, broke loose in condemnation of Calumet & Hecla, was it is kind to say, indiscreet—uncalled for and vituperative would more nearly characterize his attack, comments the Boston News Bureau. Wilson, however, the secretary did not altogether stick close to facts; and sometimes he failed to give the "whole truth." In "confidence" he told his audience what has long been public property—viz., that in forty-two years Calumet & Hecla had paid \$121,000,000 in dividends and made re-investments out of its earnings of \$25,000,000. Yet, says the secretary, "they not only protest against meeting committees of their workmen, but refuse the good offices of the department of labor in negotiating the difficulty."

With regard to meeting the workmen, the secretary was unfamiliar with the present situation in the Lake Superior copper district. None of the companies involved has refused to meet committees of workmen who wanted to talk over working conditions or wages. All have, however, and in this they still stand firm, refused to meet committees who wanted to propose the recognition of the Western Federation of Miners. This is the issue in the present Lake Superior strike. Everything else is subordinate.

Calumet & Hecla has paid \$121,000,000 in dividends and invested \$20,000,000 or \$25,000,000 more in outside properties, as stated by the secretary, which indicates, of course, a very high degree of prosperity for Calumet & Hecla. He forgot, however, to mention that Calumet & Hecla has paid and does not pay its employees wages which compare favorably with any mining district in the world and, moreover, has done much more than the average mining company in providing outside advantages, such as libraries, hospitals, etc.

One would gather from the secretary's remarks that Calumet & Hecla's prosperity was a crime. Possibly it is not enough, in the secretary's mind, that the company should pay fair wages and treat its men like human beings. Calumet & Hecla's wealth, however, is not the result of oppression—it came from the wonderfully rich copper rock which Edwin J. Hurlbert a half century ago had the fortune to discover after years of discouragement. Men who have worked for the company during these years have had their fair share of this wealth—unless socialism is the true doctrine—but Calumet & Hecla shareholders have had—and rightly—a much greater proportion because of ownership. Originally some one had to take the risk—\$1,250,000, says Mr. Wilson; and the shareholders took it and profited.

Mr. Wilson also failed to mention that, notwithstanding Calumet & Hecla's wonderful percentage of return on the money invested, the average Lake Superior copper mining company, after being laid up for a month with an injured knee, has published that between 1849 and 1910 only fourteen Lake Superior mines have paid back in dividends the amount of money invested. By nearly four-score companies that at one time or another in this period attempted to work a profit from the low-grade Lake Superior copper rock, \$578,000,000 was paid in dividends with \$81,000,000 returned in dividends, these figures not including Calumet & Hecla. Perhaps this looks like prosperity, but it is not. The secretary Wilson might with justice have covered the other side of the ledger in order that his labor audience might have been properly informed.

SEX AND BUTTONS.

The difference of the sexes in the matter of buttoning clothes has many thoughtful correspondents to explain. Men button their garments from left to right. Women from right to left. And the difference arose, one may suspect, from the days when men habitually wore swords on their left side. In moments of emergency it was necessary to draw the sword with the right hand and button up the coat with the left. Therefore the tailors put the buttons on the right to be sought by the finger on the left side.

PAIN IN BACK AND RHEUMATISM.

Torment thousands of people daily. Don't be one of these sufferers when for so little cost you can get well rid of it. Cause, Foley Kidney Pills begin their good work from the very first dose. They exert so direct an action on the kidneys and bladder that the pain and torment of backache, rheumatism and kidney trouble is soon dispelled. For sale by all Dealers.

Second Great Harbor for Berlin.

Berlin is not usually looked upon as an important "seaport," for almost as much water passes daily through its water mains as through the little river Spree on which it is situated. The navigation interests of the German capital are so important, however, that after opening a large new harbor on the eastern side of the city only a few weeks ago at a cost of about \$8,000,000, the municipality has just decided to build another one on the western side, which will cost almost as much. It will cover, including warehouses and grounds used for harbor purposes, seventy-five acres. This step is taken in anticipation of a very large increase in canal and river shipping after the opening of the new canal at Stettin, now nearing completion. In view of its improved shipping facilities and enlarged waterways Berlin looks forward to a more rapid development of its manufacturing and commercial interests.

The princely Schaumburg-Lippe sailing fleet has been disbanded, in spite of its high sounding title, this navy consisted only of small sailing boats which plied the inland lake called Steinhuder meer. It was however, an historical curiosity. The Princes of Schaumburg-Lippe owned for nearly 150 years owned a little water fortress on an artificial island in the lake and maintained a sailing fleet, at first to provide communications with this castle of refuge in case of an attack but later for the more important use of excursionists. The eighteen seamen who manned the vessels were officials of the little state and wore its queer, antiquated uniform. The reigning prince finally decided that his navy was an expensive luxury and sold it to private persons. A royal yacht, however, was retained and the prince and kept up by a retired official from the little court of Duesbrouk, went under the hammer as well.

Lippe-Detmold is just having a new issue of the royal mint for nearly 150 years owned a little water fortress on an artificial island in the lake and maintained a sailing fleet, at first to provide communications with this castle of refuge in case of an attack but later for the more important use of excursionists. The eighteen seamen who manned the vessels were officials of the little state and wore its queer, antiquated uniform. The reigning prince finally decided that his navy was an expensive luxury and sold it to private persons. A royal yacht, however, was retained and the prince and kept up by a retired official from the little court of Duesbrouk, went under the hammer as well.

Aviation Prize in Dispute.

Victor Stoecker, the aviator, who by setting up a new world record of 1,270 miles for a day's flight, proved that Germany is to be considered a worthy rival of France in aviatorial accomplishment, may lose the \$25,000 prize which was supposed he had won by the feat. This was offered by the committee in charge of the National Aviation Subscriptions fund for a record in excess of the hurricane flight of Brindejonc des Moulinais from Paris to Warsaw. Objection has been raised in the committee, on the ground that Stoecker's flight was not made in the same direction as Brindejonc's, but that the last 435 miles was made by flying back and forth between Darmstadt and Muelhausen in Alsace. The aviators point out that the general

BUILD HOUSES FOR THE WORKING MEN

Toronto Capitalists Provide Also for Rebates When Property Is Cared for Well.

Washington, Nov. 17.—Semi-official advice from Toronto regarding the erection there of small, yet comfortable, homes for workmen and their families has a bit of human thrill about them. Describing in a graphic way the philanthropic movement in that Canadian city for the building of modern dwellings which are providing lots of comfort and convenience at a very moderate rental, the dispatches are highly suggestive of what may be done in a similar manner in this country, especially in many of the large cities and towns.

OIL INTEREST BACKING HUERTA.

Financial Support Keeps Mexican "Political Pot Boiling."

Boston, Nov. 17.—The part that oil has played in Mexican revolutions has now become a matter of something more than suspicion. These oil interests, notably the Pearson syndicate of England and the Standard Oil people, in their efforts to stand in with the party of reaction in power, are said to have "kept the pot boiling" with financial contributions and loans.

Vague rumors of all this have been reaching the United States from time to time. Not long ago it was reported that Standard Oil had offered Huerta \$200,000,000 on easy terms in return for certain oil concessions which it was busily putting the last touches on. It is said that Lord Cowdry, head of the Pearson syndicate, has helped Huerta obtain a loan, with an implied promise of further aid if the new congress should act favorably on certain oil land concessions.

Eager for New Homes.

The eagerness with which the homes were spoken for, even before the foundations were laid, and the anxiety with which many of the families watched the progress of the construction, showed how difficult it has been for the so-called working classes to house themselves. As the roofing was commenced, eager tenants besought the secretary of the philanthropic company that built the homes to let them move in.

There were the bride of a week there moving day, carrying their wedding presents and installment plan furniture in at front doors. There were middle-aged married people with many children. There were old couples and sets of brothers and sisters, orphans and grandfathers, widows and young girls. Spruce court, as it has been named, was alive with humankind, busy nest making though the front steps had not yet been put up and they had to walk up long boards to get into their homes.

Quarters Well Ventilated.

"Everything is in the smallest possible space, and yet the quarters are uniformly bright and well ventilated. Each suite has a veranda. All the buildings face the central court. This is to be a playground for the children."

"We have made a provision," said the secretary, "that if the tenants take proper care of their apartments they get back a considerable rebate at the end of the year. That is to say, if there is no broken plaster or scratched wood-work, they get the rebate. We want to encourage thrift and the sense of responsibility for property. It is more or less an experiment. There will undoubtedly be careless and unappreciative tenants, but we hope even to cure some of them of their untidy habits by giving them pleasant and up-to-date quarters to begin with, and making it cheaper to take care of their homes than to use them roughly."

HERE'S TO THE SHORT MEN.

J. M. Bullock, in his book about the famous Gordon Highlanders, states that the height of the first of them, drawn from the healthiest people of Scotland, was less than that of the average soldier today, for the average height of the Gordon recruits was 5 feet 3.2 inches, while in 1911 the average height of the recruits in the British army, excluding those under eighteen years of age, was 5 feet 6.2 inches. Only five men in the whole list of the original Gordon Highlanders exceeded 6 feet in height. This should please Alfred Tennyson, the grandson of the poet, for in his "Portentous History" he sings the praise of the short-legged, short-reached, short-tempered man. "The world likes those huge, fair men with slow pulses and sleepy movements. They're no good. Their hearts can't keep it up after forty years, anyway. The blood cell goes to feeding the remote extremities of the body. It hardly reaches their brain. 'Give me the swift, the tumult of the short man's circulation and the big stomach, set well in between the thighs, which shows a good digestion and a capacity for always attaining nourishment. That keeps the nerves sound and the brain clear, gives the Napoleonic brain-in-compartments organization."

CLEAN STREAMS.

Clean streams throughout this state mean a million dollars annually saved to the commonwealth. A statement issued from the department of fisheries shows these wardens mean business. They learned that the Susquehanna was "badly polluted" and searched the river from Williamsport back through Silver Spring to its source. There the offending manufacturers were warned to quit spitting deadly refuse into the water. This notice failing, prosecution was ordered and enforced. This is one instance of the good work being done to preserve a public utility.—Philadelphia Press.

ICE-MAKING PATENT WAS ISSUED IN 1851

Recent Refrigeration Meet Recalls First Venture in Industry—Papers in U. S. Museum.

Washington, Nov. 17.—An organization which has of late become a leading factor in the commercial progress of the world is the International Congress of Refrigeration. The first assembly of this body was held in Paris, the second in Brussels and the third held its sessions in Washington and Chicago last month. The coming of this congress to the United States recalls the part played by our country in the early days of the ice industry.

They are especially interesting, in that they cover completely Dr. Corrie's early method of making ice, and his refrigeration system, which was the indirect process; that is, the cooling of unobtainable liquids, which in turn cooled other substances. According to the early custom of the patent office, the papers and the patent are written on parchment, and, though now quite old, are, nevertheless, in excellent condition.

Writes of Invention. In 1808 George H. Whiteside of Apalachicola, Fla., secured these papers, which he presented to the Southern Ice exchange, and for that organization deposited them in the National museum, together with a series of articles on the same subject, which appeared in the Commercial Advertiser of Apalachicola, Fla., in the year 1844, as written by Dr. John Gorrie under the nom de plume of Jenner. There follows an abstract from specifications of Gorrie's first patent.

"To All Whom These My Concerns It is known that I, John Gorrie, of the city of New Orleans, in the parish of Orleans and state of Louisiana, have invented a new and useful machine for the artificial production of ice and for general refrigeratory purposes, of which the following is a full and complete description.

"The nature of my invention consists in taking advantage of this law to convert water into ice artificially, by absorbing its heat of liquefaction with expanding air. To obtain this effect in the most advantageous manner, it is necessary to compress atmospheric air into a reservoir by means of a force pump to one-eighth, one-tenth or other convenient and suitable proportion of its ordinary volume. The power thus consumed in compressing the air is, to a considerable extent, recovered, at the same time that the desired frigorific effect is produced by allowing the air to act with its expansive force upon the piston of an engine, which, by a connection with a beam or other contrivance, is adapted both, helps to work the condensing pump. This engine is constructed and arranged in the manner of a high-pressure steam engine.

Another Case. Nebo, Ill.—"I was bothered for ten years with female troubles and the doctors did not help me. I was so weak and nervous that I could not do my work and every month I had to spend a few days in bed. I read so many letters about Lydia E. Pinkham's Vegetable Compound curing female troubles that I got a bottle of it. It did me more good than anything else I ever took and now I have cured me. I feel better than I have for years and tell everybody what the Compound has done for me. I believe I would not be living to-day but for that."—Mrs. HETTY GREENSTREET, Nebo, Illinois.

er quantity from atmospheric air than can be done by any known means.

Makes Patents Claim. "Having thus fully made known my improved process of manufacturing ice and explained and exemplified suitable machinery for carrying the same practical operation—will it be understood that I do not claim as my invention any of the several parts of the apparatus in themselves, but what I do claim as my invention and desire to secure by letters patent, is:

"First, the employment of a liquid unobtainable at the low temperature at which it is required to keep the engine, to receive the heat of the water to be congealed and give it out to the expanding air.

"Second, I claim the employment of an engine for the purpose of rendering the expansion of the condensed air gradual in order to obtain its full refrigeratory effect, and, at the same time, render available the mechanical force with which it tends to dilate to aid in working the condensing pump, irrespective of the manner in which the several parts are made, arranged and operated.

"Third, I claim supplying the water gradually and slowly to the freezing vessels, and congealing it by abstracting the heat from its under surface, substantially as herein set forth. And lastly, I claim the process of cooling or freezing liquids by compressing air into a reservoir, abstracting the heat evolved in the compression by means of jet of water allowing the compressed air in an engine surrounded by a cylinder of unobtainable liquid which is continually injected into the engine and returned to the cylinder, and which serves as a medium to absorb the heat from the liquid to be cooled or frozen and give it out to the expanding air."

State of Ohio, City of Toledo, Lucas County, ss. Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, Ohio, and state of Ohio, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every copy of this issue of HALL'S CATHARTIC CURE. Sworn to before me on this 6th day of December, A. D. 1898.

CAMERA COPIES SUN MOVEMENTS

Moving Picture of Total Eclipse Is Shown by German Imperial Astronomer.

Vienna, Nov. 17.—Director Frederick S. Archenhold, the imperial astronomer of Berlin, gave for the first time in the annals of astronomy (during the Natural Scientists' congress in Vienna) demonstrations of the movements of the stars, and especially exhibited the last total eclipse of the sun from start to finish as taken through the monster telescope in Trepow-Berlin.

Archenhold says his telescope has the greatest length and magnifying power of any in the world. The glass is 65 centimeters, across, magnifying 6,000 times and the whole weight 260,000 pounds. It is operated by four electric motors. Its dome is divided into two parts. The protecting half moves within the telescope, while the other half will be totally removed. By this arrangement the air densities are undisturbed. Another feature of the telescope is that it is so simple a child can operate and turn it.

The entire construction is the fruit of Archenhold's genius and, being under pressure of means, he was forced to arrive at the greatest results with the smallest outlay, and this magnificent sight searcher can be reproduced for the modest sum of \$60,000.

"WILD SHEEP OF NOVA SCOTIA. Originally the Domestic Animal of the Early French Settler, They Now Are Roving, Untamed Dwellers of This Sea Coast. Was the ordinary domestic sheep the original beast combed? Was it intended to browse upon meadows and the tangle of dunes of the coast? These questions are suggested by conditions on the east coast of the province of Nova Scotia.

This is the Stove Polish YOU Should Use. It's different from others because more care is taken in the making and the materials used are of higher grade. Black Silk Stove Polish. Makes a brilliant, silky polish that does not rub off or oxidize, and the shine lasts four times as long as ordinary stove polish.

JEWIS ARE TURNING TO FARMING AGAIN

Abraham Fromenson Advises People to Get Away from Congested American Cities.

Sioux City, Ia., Nov. 17.—A wholesale turn toward their original occupation of tilling the soil is necessary to save the Jewish population in large cities of the United States, according to Abraham H. Fromenson, executive secretary of the National Farm school in Philadelphia, who gave an address at Mount Sinai Temple here on "The Jew in Agriculture."

According to figures which Mr. Fromenson has compiled, there are 2,000,000 Jews in the United States, half of whom live in and about Greater New York. Five hundred thousand live in other Eastern cities. Thus 1,500,000, or three-fourths of the Jewish population, live in the cities and for the most part under unhygienic conditions.

"The mass of Jews in the cities, Mr. Fromenson explained in an interview, do not know grain from weeds, nor a shovel from a corn planter. In spite of this ignorance, a number of colonies have attempted to turn to farming, but they were miserably unsuccessful because of their depleted strength, which was the result of centuries of unwholesome living.

"In the Philippines the cultivation of corn, after a campaign of education on the part of insular authorities has so increased that the consumption of rice and the importation of rice, have greatly declined. In 1911 the Philippine imports were 203,083 metric tons of rice, and produced 574,844 metric tons. In 1912 the imports were 209,250 metric tons, and the home production 325,429 metric tons. There was thus a total decrease of 192,271 metric tons for 1912 as compared with 1911. During 1913 the production of corn was 5,268,706 bushels, and during 1912 it was 5,570,426 bushels, an increase of about 44 per cent.

FOR CHILDREN THERE IS NOTHING BETTER. A cough medicine for children must help their coughs and colds without bad effects on their little stomachs and bowels. This, Foley's Honey and Sarsaparilla does. No opiates, no sour stomach, no constipation follows its use. Stuffy colds, wheezing, coughs, and croup are all quickly helped. For sale by All Dealers.

CORN IS POPULAR IN THE FAR EAST

Chinese and Filipino Farmers Planting an Increasing Acreage Each Year.

Washington, Nov. 17.—Official reports of the government call attention to the wonderful rise of Indian corn as a food factor in the far east, and suggest that, in consequence, some economic changes will be made in the countries among the peoples of that part of the world. Not until recent years did China or the Philippines know anything about corn that is so generally grown in the United States. A good many prejudices had to be overcome in order to secure its introduction into the countries, and now that it has been introduced, its popularity is going forward at such a wonderful rate as to suggest the coming in the near future of the economic changes just referred to.

Hardly Known 10 Years Ago. Ten years ago, say the government reports, corn was hardly known in Indo-China, but since that time its cultivation has so increased as to permit corn exports aggregating something like 80,000 metric tons a year, most of which goes to France, where it is manufactured into cheap flour and starch products.

"We now have on file at our school scores of letters from groups of Jewish pushcart peddlers and sweatshop workers in cities as far west as Detroit, who desire to turn to farming under the supervision of the graduates. This is our object, and by accomplishing it we will be enabled to do a great work by relieving materially the congestion in the cities and giving to the nation a number of farmers who are among the best. The Jew was originally a farmer, and his return to that vocation will be a benefit to him and to the nation, since it will aid him personally and give to the country a better and more useful citizen than formerly."

Barrie and the Lonely Man. Sir J. M. Barrie is a member of the Athenaeum, to which he was elected for literary merit without taking his turn on the waiting list, a distinction paid to very few men. There is a good story told of his first visit to the club. He had never been inside the building before, and, seeing a gentleman standing in the hall, he went up to him and asked him if he would kindly direct him to the cloakroom.

That Jar of MUSTEROLE On the Bath-Room Shelf. It has relieved pain for nearly everyone in the family. When little Susie had the cough, when Johnny got his feet wet and was shivering, when Granney's rheumatism bothered her—

ABSOLUTELY PURE & UNADULTERATED. HAS HELPED OTHERS. WILL HELP YOU. A MARK OF DISTINCTION SINCE 1860. Duffy's Pure Malt Whiskey. An absolutely pure distillation of malted grain from which all injurious substances have been removed. It is a wonderful tonic and stimulant in building up and strengthening the body.

WHISTLER'S WIT MADE ENEMIES

Famous Painter Antagonized Artists and Critics by His Bitter Remarks on Their Work. Long before James McNeil Whistler was famous as an artist he had made himself a public character by his eccentricities and his quarrels with British artists and critics. Don C. Seitz, in his little volume, "Whistler Stories," published by Harper's, gives a number of instances of the chilling wit of the man who wrote so well of "the gentle art of making enemies."

"Did I ever tell you how a frowsy old rube—a regular hayseed—once stung me?" an auctioneer who formerly worked in a fake auction on Broadway, asked a New York Press reporter. "I first saw the rube one afternoon when he had a pretty good crowd in the place, and I was selling off cheap watches. I could see at a glance that he was a farmer from way back in the woods."

"Rubbe Beat Broadway Fakker. He Was Stung Once, But Came Back and More Than Squared the Account. "Three days later the farmer came into the store again and walked quietly up front. I noticed that he was standing beside the same 'capper' that had raised his bids on the watch, but I thought nothing of it. My impression was that the old hayseed was pleased with the watch and had probably come back to buy another for a friend or relative."

More Bottles Sold Each Year. It is easy to understand why an increasing number of bottles of Foley's Honey and Tar Compound is sold yearly. Thos. Verran, 286 Edward street, Houghton, Mich., gives an excellent reason when he writes: "Foley's Honey and Tar Compound has always proved an effective remedy, quickly relieving tickling in the throat, and stopping the cough with no bad after effects." For sale by All Dealers.

MUSTEROLE. WILL NOT BLISTER. Pleurisy, Rheumatism, Lambrago, Pains and Aches of the Back or Joint, Sprains, Sore Muscles, Bruises, Chills, Frost-bite Feet, Colds on the Chest (it prevents Pneumonia). Nothing like MUSTEROLE for croupy children. In 25c and 50c jars, and a special large hospital size for \$2.50. Accept no substitute. If your druggist cannot supply you, send 25c or 50c to the MUSTEROLE Company, Cleveland, Ohio, and we will mail you a jar, postage prepaid.

Upper Peninsula

Man's Arm Torn Off.

Eugene LeBlanc of St. Ignace had his arm literally torn off last week while working on a dredge at the Jones & Kerry mill. The arm had become caught in a sprocket chain. Drs. Darby and Sherk found it necessary to amputate the injured limb near the shoulder.

Makes Boys Earn Money.

Five youths, ranging in age from twelve to fourteen years, have been put out on probation by Judge Chapman at the Soo and given an opportunity in a reasonable length of time to earn \$4.35 each, which will be turned over to Hugh Brown to pay him for damage which they inflicted on his property at 650 Bingham avenue several weeks ago. The total damage committed amounted to \$21.75, part of which will be paid by each boy. One of the strict injunctions which Judge Chapman placed upon the boys was that they should earn the money themselves and bring sufficient evidence into court to convince him that they had earned it.

Death of John B. Weimer.

John B. Weimer, one of Iron River's pioneers, and well-known throughout the upper peninsula as a mining promoter, died Wednesday, after an illness with pneumonia and other diseases, says the Iron River Reporter. Mr. Weimer was born on Dec. 26, 1852 near West Bend, Wis. He was raised and attended school in Milwaukee and later followed different occupations at the place of his birth until 1880 when he came to this vicinity, taking up his residence first at Florence. He entered the mining business as an explorer, prospector and promoter, operating extensively in the district and the Gogebie country. He left here with his family in 1886 and lived at various places between that time and the date of his return here in 1910. On his return he organized the Iron River Ore company, of which he was the first general manager and secretary, and with which he has been associated ever since. He explored the Bucholz mine, superintending the development of that property, and also did considerable exploring in Section 15 for the company. He was the originator of the plan to consolidate the Iron River Ore company with the McGreevy Steel company, which failed to materialize. However he held heavy interests in the McGreevy company. Mr. Weimer was

married at St. Louis, Mo., in June, 1875, to Miss Nettie Cutler, who with seven children survive to mourn his death. The children are Peter Weimer of Sevier, Utah; Mrs. Frank Worthing, of Kaufman, Idaho; Miss Maud Weimer, of Iron River; Mrs. Lillian Clawson, of Salt Lake City, Utah; Thomas Weimer, of Kaufman, Idaho; Mrs. Margaret Wright, of Salt Lake City, and John Weimer, of Kaufman, Idaho.

Surrender's Himself.

Ralph L. Cantlin, until recently proprietor of the Nonpareil Barber shop at Escanaba and erstwhile clerk of the Escanaba camp of the Modern Woodmen, voluntarily returned Saturday and surrendered himself to the prosecuting attorney and sheriff, who had been seeking his return to this state to answer to a charge of having stolen and used funds of the fraternal organization. Cantlin was located in Nebraska, and when informed that the officers were preparing to extradite him he left for Escanaba, thus saving the county an expense of about \$150. He went to the office of Prosecuting Attorney T. E. Ström and gave himself up, claiming he had not been trying to evade justice or become a fugitive from justice and that he had hastened back as soon as he learned he was desired on the warrant issued for his apprehension. He was taken to Justice McEwen's office, where he waived an examination and was bound over to the January term of the circuit court for trial.

Big Reward for Road Work.

Within several weeks County Clerk J. A. Foshar, at Manistique, will receive the sum of \$16,000 from the state as rewards for road building the past season. The highways are a little over nine miles in length. Frank J. Rodgers, state highway commissioner, inspected the highways that had been constructed under the plan and specifications as set forth for a class E road. The work was satisfactory and the state official announced that the reward to the county would be as above noted. The reason ascribed for the generous aid, according to the county clerk, is that the road, which is of macadam, will probably be turned over to the state. It will be used as a part of the proposed trunk line extending through the upper peninsula, from the Soo to Escanaba. Mr. Rodgers declared that Schoolcraft has the best county roads north of the Straits. The three roads accepted are the Cooks highway, approximately five and one-half miles in length, the Manistique-Whitdale road, which is two and

three-quarter miles long, and the stretch of road one and one-quarter miles in length through the townships of Doyle and Mueller. The county has issued bonds to the total of \$90,000 for the betterment and building of roads and the sum from the state will be turned over to the bond holders, to lessen the sum, it is said.

Boy Accidentally Kills Brother.

Waldmar Westton, seven-year-old son of John Westton of Cedarville, died at the Soo hospital late last week as a result of being accidentally shot in the right eye by a bullet from a 22-caliber rifle which his brother Richard, ten years of age, was carrying. The gun was accidentally discharged when the younger brother threw a snow ball at the other. Mr. and Mrs. Westton rushed the wounded boy to the city hospital as soon as possible, but he expired about five minutes after arriving there.

Mill Doing Good Work.

The plant of the D. N. McLeod Lumber company at Garnet, Mackinac county, is as busy as it was in its palmiest days under the Hudson regime. A million and a half of lumber is in stock in the yards. Since taking over the plant last summer Mr. McLeod has made many improvements thereto and it is in the best possible condition for the big cut it has ahead of it. It is considered fortunate for the township of Hudson that the property fell into such excellent hands, for there is ensured years of continued prosperity for the residents of the district. Mr. McLeod has disposed of his residence at Rexton to J. W. Gilliam and his interests in the mill at that place to Chris Hansen, his former partner. He will devote his entire attention to his lumbering and mill interests in the vicinity of Garnet.

Miss Thornton's Wedding.

At the wedding of Miss Inez Victoria, daughter of John T. Thornton, to Harry L. Finkbeiner at Manistique last week, Rev. Charles J. Johnson, pastor of the First M. E. church, officiated. Preceded by the minister, the wedding party marched down stairs to the first floor of the home of the bride's parents to the strains of the Lohengrin wedding march played by Miss Mary Rowe. Immediately before the ceremony Miss Ruth Baldwin sang "Oh Promise Me." The bride's gown was of white, charmeuse and old lace. Her bridesmaid, Miss Edna McCandless, of Sault Ste. Marie, was dressed in blue charmeuse. The bridegroom was attended by his brother, Ezra. The living rooms of the Thornton home were beautifully decorated with white and pink carnations and smilax. Twenty-five guests were present. These included, besides the relatives, immediate friends of the couple. A four-course wedding luncheon was served. For the last three years the bride had been a teacher in the Manistique schools. The bridegroom holds a responsible position in the mill offices of the Cleveland-Cliffs Iron company. The out-of-town guests were Mr. and Mrs. Ezra Finkbeiner, of Green Bay, Wis., the former a brother of the bridegroom, and Mrs. T. E. Ford, of Sault Ste. Marie, sister of the bride's mother.

The makers of Foley Kidney Pills know that they have absolutely the best combination of curative and healing medicines for kidney and bladder ailments and urinary irregularities that it is possible to produce. That is why Foley Kidney Pills are the best medicine for the purpose you can buy. For sale by All Dealers.

Negaunee Department

WILLIAM TEEHAN WAS ORDAINED SATURDAY

Negaunee Young Man Enters Priesthood at Norwalk, Conn., After Many Years' Study.

William Teehan, formerly of Negaunee, was ordained as a priest in Norwalk, Conn., Saturday, and celebrated solemn high mass in that city Sunday, according to a telegram received yesterday morning by Laverne Seass, of the Breitung hotel. Father Teehan's brother-in-law, Mrs. Seass and her mother, Mrs. Ann Teehan, were present at the ordination ceremonies. Father Teehan is about thirty years of age and was born and raised in Negaunee. When he was nineteen years of age he left for Marquette college in Milwaukee. Later he studied in other institutions.

His Negaunee father Teehan studied at St. Paul's school, and later was a student in the commercial department of the Negaunee high school, graduating from that institution. Upon finishing the high school he worked as clerk in several hotels in the upper peninsula, and then at Milwaukee. After being a student in Marquette college for two years, he went to Rensselaer, Ind., where he was a student for an additional two years. He then went to St. Mary's seminary at Norwalk, Conn., where he commenced his study for the priesthood in 1908. He has been there the past eight years.

Mrs. Seass and Mrs. Teehan are visiting with relatives in Brooklyn, N. Y., and will return to Negaunee in ten days or two weeks.

LOCAL LAONICS.

Miss Theresa Amonino spent Sunday in Marquette, the guest of friends.

Con Keating and daughter, Miss Anna, left yesterday afternoon for Ann Arbor.

Walter and Carl Miller went to Marquette Saturday, spending the day there with friends.

R. J. Crisp has returned from a several days' hunting trip, bringing a large buck with him.

Dan Shea left yesterday morning for Little Lake, where he will spend a few days at his camp.

A buck and a doe, consigned to Chris Messner, of Lincoln street, were received yesterday afternoon.

T. A. Thoren was among the business visitors in Marquette yesterday, returning yesterday afternoon.

Mrs. Stephen Paull and children leave this morning for Detroit, where they will reside permanently.

Malcolm Lacombe, of Republic, was among the Negaunee visitors Sunday, spending the day with friends.

William Newcombe, C. L. Spoley and party leave this morning for the woods to spend a few days' deer hunting.

Miss Jennie Beaupied, of Champion, who visited with her sister over the week-end, has returned to her home.

C. G. Griffey, of Rochester, Mich., who has spent the past few days with Negaunee friends, left for his home Saturday.

Mrs. E. Martel and daughter, Miss Myra, were Marquette visitors Sunday, spending the day as the guests of relatives.

F. J. Muck & Son's meat market will be opened to the public this morning at 7 o'clock, according to an announcement in this issue.

Mrs. E. A. Beyer, of Marquette, was a Negaunee visitor Sunday, spending the day with her mother, Mrs. B. Sullivan, of Case street.

W. B. Pattison, superintendent of the Negaunee properties of the Breitung interests, left last evening for Duluth, on a business mission.

Copies of the "Strike Situation," a booklet issued by the committee of the copper country commercial club, have been distributed in Negaunee.

Mrs. Baptiste Barasa, who was recently taken to Chicago where she was placed under the care of a specialist, is reported to be rapidly improving. She is living at the home of her son, Bernard P. Barasa.

Miss Mary Guido left yesterday morning for Iron River, where she will live with relatives. She formerly resided in Gwinn and has been visiting with Negaunee and Ishpeming friends and relatives during the past few days.

V. D. Simer, of Houghton, has been a Negaunee visitor for the past few days, closing up the business affairs of Sheridan & Co., who recently completed their contract for filling in the tract near the Negaunee hospital as a public playgrounds.

John Larkin and son, Cyril, of Iron Mountain, are here for a visit with relatives, leaving yesterday for Bass Lake, near Ishpeming, for a few days at camp. They were accompanied by Miss M. H. Sullivan, a sister-in-law of Mr. Larkin.

Jacob Kekolahti and Gust Finnila, farmers in the Dead River district, brought a large black bear to town yesterday morning. It was sold to S. S. Thomas. Both men claim to have killed the animal. They both shot at it at the same time, one of the bullets taking effect.

Rev. Hartley Cansfield, pastor of the Mitchell Methodist church, together with a delegation of members of the congregation, will go to Marquette Friday of this week to be present at the gathering of Methodists which will be addressed by Bishop Burt, of Buffalo. There will also be large delegations from Ishpeming, Republic, Champion and Gwinn.

George Ridge, of Lathrop, and Mrs. Ridge, also of that place, who were married there last week, passed through Negaunee on their wedding trip to the copper country and other points. Mr. Ridge is in charge of one of the camps owned by Thomas Connors. Mrs. Ridge was formerly married to a brother of her present husband. Both are well known in Negaunee.

UNIQUE DISPLAY.

Many Flowers Are Now Shown at Negaunee Greenhouses.

Thanksgiving and holiday flowers in many varieties are now on display at the Negaunee greenhouses, making a unique showing for holiday trade. Included in the showing are twenty varieties of chrysanthemums, roses, carnations and narcissus. Among the roses are the white and pink Killarney, the Richmond and Sunburst.

In addition to the many varieties of cut flowers the greenhouses have ferns and palms, and within a short time will have potted plants for sale.

FINED FOR ASSAULT.

Tony Antoni and Nick Rich were arrested Saturday on complaint of Sakarias Hongell, charged with assault and battery. The men were arraigned yesterday morning before Judge John Alpine, pleaded guilty to the charge and paid fines and costs. The defendants will probably be the complainants in another assault and battery case in a few days, as they will charge Hongell with the same offense, it was asserted. The trouble between the men started at the Negaunee mine, where they are employed underground.

MARRIED YESTERDAY.

At 6:30 o'clock yesterday morning Miss Agnes Peary and Oliver Lemere, of Palmer, were united in marriage by Rev. Father Dingfelder at St. Paul's church. The couple were attended by Miss Lesa Lemere, of Palmer, and Jerry Decaire, of Ishpeming. They will make their home in Palmer.

Now is the time to order your chin-chills overcoat. Peterson & Willers ladies' and men's tailors, Negaunee.

Lower State Notes

DETROIT—Bennett French, victim of the D. U. R. interurban wreck near Wayne, has died at Grace hospital despite the transfusion of a pint and a half of his brother's blood. He was twenty years old and an electrician.

His widow, father and mother and several brothers and sisters survive. Coroner Rothacher will hold an inquest.

PETOSKEY—A posse of indignant citizens of Pellston and other northern Emmet towns burned the camp of Joseph Myers, the hunter who mistook John Bodie for a deer as Bodie was riding a horse across a railroad trestle on the way to work. Bodie's condition is still critical as the bullet barely missed the jugular vein. Instead of blaming Myers, however, Bodie disavowed the act of his friends.

LANSING—Carl Dean, aged thirty-five, employed as conductor of a local freight crew on the Pere Marquette, was seriously injured when he fell off the running board of an engine and was dragged several yards beneath the locomotive. Dean's head was badly bruised and he is thought to have sustained internal injuries. He was removed to a local hospital. Dean's home is in Bay City, where he has a wife and two children.

KALAMAZOO—More mystery has been added to the disappearance of Bertha Robins, the Schoolcraft girl who left home a week ago. Her parents have received a letter from the girl which has an address in New York state. The girl told her parents she did not know why she left or where she was going and that she did not know how she got on the train. Officers believe she is wandering in a dazed condition. When she left home she had about \$100.

LANSING—The following appointments were made by Governor Ferris: Thomas McGrath, Hancock, chief probation officer of the Twelfth judicial circuit; Calvin E. Houk, Ironwood, chief probation officer of the Thirtieth judicial circuit; Alfred P. Heaslet, Petoskey, circuit court commissioner of Emmet county; Harlow A. Clark, Mar-

A Woman's Business Affairs

The woman who is called upon to assume business responsibility whether in connection with the care of an estate, investments or insurance, will find this bank of great assistance.

Its officers welcome the opportunity to counsel with those unfamiliar with business procedure concerning financial affairs. Commodious Ladies' Room for Woman Patrons.

WHEN YOU ARE HANDED A LOAF OF BREAD

at this bakery you get a combination of the finest flour, the most skillful mixing and perfect baking. And you get it every time too. Our bread never disappoints. Try it today and you can be sure of getting it just as good tomorrow and every day.

General Bakery

529 W. Iron St. Negaunee.

quette and C. W. Williams, South Haven, delegates to the National Rivers and Harbors congress at Washington, December 3.

DETROIT—Compulsory saving for a certain class of wives is to be enforced by Judge Lacey of the Wayne county domestic relations court, who says his experience has convinced him that many couples "go wrong" because some women are extravagant. In cases where men make complaints of this character Judge Lacey announced he will enter an order requiring the husband to pay his wife a specific amount each week and compelling the wife to deposit a specific amount in a bank. If the husband is extravagant he must turn over all his wages to his wife, she to deposit a portion each week.

FLINT—Bennie Meyerowitz, twenty-five years old, who came here from Detroit recently, put up a sensational piece of acting at his boarding house in portraying the role of an attempted suicide. Meyerowitz lay on the floor writhing, like a man dying of poison. The air was heavily scented with acid which he had sprinkled about the room, and a note addressed to his parents lay on the table. Police Captain Cole procured a needle when the young man failed to heed orders to quit bluffing, and thrust it into his leg, causing him to emit a whoop that startled the onlookers. Meyerowitz said he was "broke" and owed a \$30 board bill.

IONIA—The Degree of Honor of Michigan is conferred by a peculiar state of affairs regarding a loan of \$8,000 to the city of Belling several years ago, and the possibility of getting the money rests with the courts. Several years ago the officials of the order gave the grand treasurer, Mrs. Louella K. Webster, of Belling, authority to lend that city the money, the supreme order taking Belling's note for the amount. Mrs. Webster died two years ago, and now the order wants the money. The present officers have been trying to find out what the money was used for, and the grand chief, Mrs. Fannie Bivins, of Lansing, and Grand Treasurer Mary L. Springer, of Flint, have been in Belling making an investigation.

Birmingham, Ala., F. L. Willis, suffered greatly from asthma and bronchitis. He writes: "I got no relief until I took Foley's Honey and Tar Compound. It entirely removed those choking sensations, and never failed to produce an easy and comfortable condition of the throat and lungs." For sale by All Dealers.

SAY WEATHER MEN TO BLAME

Mariners Complain That Observers in Lake Ports Failed to Give Sufficient Warning of Big Storm, and That in No Case Were Hurricane Warnings Up.

Captain Answers Charge That Masters Were Daring and Disregarded Signals—In Marquette Observers Cannot Be Reached by Phone After Office Hours.

As an aftermath of the storm which sent more ships to the bottom of the great lakes than had ever been lost in any previous storm on their waters, the weather observers are being taxed by the marine men with much of the responsibility for the destruction of property and life. It is asserted that their warnings were not sufficiently indicative of the force of the approaching gale. In support of their contentions, the marine men point out that the Saturday afternoon forecast to indicate weather conditions on the upper great lakes up to 7 o'clock Sunday night was as follows: "High west and northwest winds; snow flurries and colder tonight." It is further asserted that only ordinary storm signals were displayed, and that no hurricane warnings were given.

A typical presentation of the ship masters' view of the situation is the following comment by Captain Frank C. Pratt, of the steamer James S. Dunham, on the statement of W. H. Alexander, Cleveland's weather forecaster, that "daring and disregard of government storm signals are the main cause of the disasters on the lakes." "The statement given out by Mr. Alexander is foolish. The United States weather bureau is itself responsible for the loss of life and property in the storm. The forecasts were not only inadequate, but not reliable. No warning was given along the lakes and we did not know there would be a storm.

"A week ago Friday I was with my ship in Duluth. My barometer was low and I called the Duluth weather bureau. I was informed there would be a high northwest wind and heavy fall of snow and left the harbor. There was no warning of a storm, and not only that but the forecast given me was absolutely unreliable. The wind switched after I had been out a short time and came from the opposite direction from what had been predicted."

Situation in Marquette.

Inquiry yesterday showed that there is room for great improvement in making the service of the Marquette weather bureau of practicable value for marine men. The trouble here lies in lack of sufficiently easy means of communication with either the observer, Mr. Patrick, or his assistant, Mr. Johnson, at hours when they are not at the office.

The hours of duty at the Marquette office are from 9 a. m. to 4 o'clock p. m. Usually either Mr. Patrick, or Mr. Johnson, or both, spend some time in the office in the evening, but this, it is said, is not required by the regulations. The office can be communicated with by telephone, but neither Mr. Patrick nor Mr. Johnson can be reached in this way after the office is closed.

Mr. Patrick has no telephone at his house, the bureau making no appropriation for such service. Thus it works out that a captain who desires information about the forecasts after the office is closed has to hunt up in person either Mr. Patrick or his assistant.

This naturally invites considerable trouble, and it is a safe statement that in many cases marine men would get information about the weather forecasts outside office hours if it was possible to reach one of the observers by telephone pass up this precaution.

In this respect there is room for improvement, at very small cost, in the service given in Marquette. At present it is unavailable for the greater part of the day, except at considerable trouble, for the men who most want and need information about the forecasts. In fact it is available conveniently, under the regulations, for but three hours in the morning and three in the afternoon.

The Forecasts.

Following are the forecasts for the upper peninsula and for Marquette for the period of the last storm, as printed in The Mining Journal.

Saturday, Nov. 8.—Washington forecast for upper peninsula: "Snow or rain; colder Saturday, with west to southwest winds." Local forecast: "Rain or snow and colder."

Sunday, Nov. 10.—Washington forecast for upper peninsula: "Snow and continued cold Monday, with north gale. Tuesday, partly cloudy and continued cold." Local forecast: "Fair."

The records of the Marquette weather office show that southwest storm warnings were displayed the afternoon of Friday, Nov. 7, and that they were changed to northwest storm warnings on the morning of the 8th, Saturday, the day the three days' gale set in. The northwest storm warnings were continued until 9:50 p. m. on the 10th, at which time the storm was entirely blown out.

Hurricane warnings were not displayed at any time.

During the progress of the storm the Marquette office had many inquiries from ship masters. Inspection of the records for the three day period indicates little trace of a lull in the storm Sunday, though there was a slight lull. However, the minimum wind velocity Sunday was 24 miles, and the records of the office show that at the time Captain Owen took the Henry B. Smith into the open sea the wind was blowing at a velocity of 31-32 miles. And less than three hours after the Smith left the harbor, or about 8:30 o'clock Sunday evening, the wind attained a velocity of 44 miles, or the maximum for the three days' blow.

The records show that not only did Captain Owen essay the hazardous trip almost in the height of the storm, but that there was nothing about the observations recorded at the Marquette office Sunday, and particularly in the late afternoon, to encourage him or any other master to think of leaving shelter.

WILL PROVIDE RINK.

Street Railway Company Will Offer Skating West of Power House.

The Marquette City & Presque Isle Railway company will this season provide entertainment for the skaters of the city by opening an ice rink west of the power house. It will be flooded as soon as cold weather sets in and will be kept in use throughout the winter months and as late in the spring as the weather will permit.

The flooded area will be 110 feet long and sixty feet wide, and will be enclosed by a fence. A structure will be erected for a rest room and it will be heated. A platform with chairs will be put in for the use of spectators, as it is hoped to secure some special attractions for the rink during the winter. Some provision for music will also be made. It is likely that a mechanical device will be installed.

For the use of the rink there will be no admission for persons who use the company's cars to get to it, and it is likely that a coupon ticket sold in connection with the tickets for street railway passage will be issued. For persons who do not use the cars to get to the rink there will be a small admission fee.

The ground for the rink has been leveled, and the material for the fence ordered. The preliminary work is not very extensive and it is expected to have the rink ready for the public shortly after the first cold spell sets in.

PHYSICIANS PAY VISIT TO BIG BAY

Drs. Robbins and Harkin Inspected Conditions With Relation to Smallpox.

Dr. N. G. Robbins, of Negaunee, county physician, and Dr. F. McD. Harkin, of Marquette, representing the state board of health, yesterday inspected conditions surrounding the epidemic of smallpox in Big Bay where the Brunswick-Balke-Golander company conducts extensive operations.

Smallpox has been prevalent there the past several weeks and some alarming reports concerning the wide extent of the disease have been current. These reports, Dr. Harkin said last night, have been considerably exaggerated. It has been said that there were as many as forty cases of the disease at Big Bay.

Drs. Robbins and Harkin yesterday found that there were ten cases still under quarantine, and that thirty-five cases have been reported since smallpox was first discovered there. Dr. Webster, the health officer, they say has taken all practical steps to handle the disease, and has the situation well in hand. General vaccination has been ordered, but many persons have not yet been vaccinated.

The likelihood that smallpox will spread at Big Bay is, however, by no means at an end, and the physicians urged the vaccination of all persons who have not yet taken this precaution to avoid the disease.

The state board of health intends to keep close track of the situation at Big Bay, and if the disease should become epidemic to a much greater extent it is likely that it will order a quarantine of the town. If this was done the railroad would be forbidden to carry any passengers either in or out of the place. The best way to avoid the danger of such a happening, the physicians say, is general vaccination.

The existence of smallpox at Big Bay has occasioned the physicians here much concern, as there is a considerable traffic between the town and Marquette. It is feared that unless all precautions are taken at Big Bay the result will be an increase of smallpox in this city.

KILLED DEER; GOT LICENSE.

Napoleon Lamont Fined Because He Inverted the Legal Order.

Because he killed a deer and then got a license instead of getting a license and then killing a deer Napoleon Lamont paid a fine and costs amounting to \$23.50 in Justice Meeker's court at Munising. The arrest was made by Deputy Mosher, of Marquette, and Marks, of Munising.

The hunter wounded a deer and then followed the trail for four miles when he came up with Lamont, who had cut in on the trail, overtaken the deer and killed it. Lamont refused to give up the carcass to the man who shot the deer originally, and took it to Au Train, Nov. 12, after he had killed the deer. Lamont obtained a license and attached one of the tags to the carcass. He was arrested and taken to Munising.

WRIGHT IN FLINT.

Marquette Man Has Assumed Charge of School for Deaf.

Marquette friends of L. J. Wright, former state superintendent of public instruction, have received word from him that he has gone to Flint to assume charge of the school for the deaf, and that hereafter Flint will be his post-office address. On leaving for Flint Mr. Wright made the following statement:

"The office of superintendent of public instruction should be taken out of politics. A year or two is required for a man to become familiar with the duties of this office and for the good of the people whose children are affected the superintendent of public instruction should not be made dependent upon the will of a political convention for his nomination. If I could have had any assurance of a reasonable tenure of office I would not have exchanged my position as head of the state school system for any other office in the gift of the people of the state or nation."

ANNOUNCEMENT.

I have a full line of Hirsch-Wickwire suits and overcoats now on sale at one-quarter off. This is an entirely new stock and this make of clothing is worn all over the world by the most up-to-date dressers. L. Getz New Clothing Department, 218 South Front St. (11-18-11).

The Stafford Drug Co. sell the Genuine Concord Port wine at \$1 for full quart. Sold only for medicinal purposes, a good blood builder. 11-7-4f.

See our imported woollens and prices before ordering your new fall suit and coat. Peterson & Willers, ladies' tailors, Negaunee, Mich. (10-23-4f).

HAWGOODS WILL SUE FOR LIBEL, IS SAID

Call Stories That They Forced Steamer Smith to Sea Force in Every Particular.

According to a Cleveland dispatch placed on the wires last evening W. A. and A. H. Hawgood, managers of the Acme line, to which the lost steamer Henry B. Smith belonged, will shortly press a suit for civil libel against the Marquette Chronicle because of statements in an article printed in connection with the loss of the steamer, asserting that Captain Owen of the Smith was led to take a chance in getting down the lakes by a threat of the owners. The dispatch follows:

"Cleveland, O., Nov. 17.—W. A. and A. H. Hawgood, managers of the Acme Transit company, announced today their intention of bringing civil libel suit against the Chronicle, a newspaper published at Marquette, Mich., because of a report by it that Captain James Owen, of the steamer Henry B. Smith, lost out from Marquette, said in the height of the storm under threat from the managers of the line. They gave out a statement to the effect that 'the story is false in every particular and in every intendment and in every insinuation. We have retained counsel and bring action civilly and if the statutes of Michigan permit we will proceed criminally against the author of the article.'

The heading of the article which the Hawgoods assert they will make the basis of the libel suit was: "Capt. Owen Was Under a Threat. This Explains Why He Left Port in the Teeth of a Storm. He Was Told to Make Time. Had a Run of Hard Luck and Was Eager to Please His Employers."

In the body of the article it was stated: "Bring your ship through on time! Such was the order given the commander of the Smith, and Captain Owen, like all good seamen, obeyed his orders, for it is said luck in running the boat on schedule this season broke bad for the captain, and, experienced navigator as he was, his ship frequently was overdue and he was chided again and again by the owners. When he cleared Cleveland on the fatal voyage it is said that he had orders to run on schedule-time at any cost and that failure to comply with the owners' demands might cost him his commission."

In another place it was stated: "I will clear as soon as the ore is aboard," said Captain Owen Sunday morning. "Wire the company that I am coming." Although the storm raged outside the breakwater he was encouraged by a slight rise in the barometer and a noticeable clearing of the sky. Owen signalled to east off the moment the loaders completed their work. He rounded the breakwater with his men still battering down the hatches and plunged into the storm. "I will go down the lake with the wind and make up lost time," he said, as the Smith steamed from the dock. Captain Owen was obeying his orders and he tried to maintain his schedule. The price of his company's folly was the Henry B. Smith, a loyal captain and thirty lives."

Loyal Brown, of the Holmes, a steamer of the same line as the Smith, Saturday asserted that Captain Owen was the most trusted master in the employ of the Hawgoods, and that the managers would not implicitly in his judgment on any occasion. He also denied that Captain Owen was in any danger of losing his position, saying that they were very close to the managers and that they thought the world of him.

PREPARING FOR DANCE.

Turkey Supper at Ball Marking Opening of New Masonic Hall.

While final arrangements have not been completed for the ball Thanksgiving night, marking the opening of the new Masonic hall in the Colonial building, it is announced that the function will be a memorable event in Masonic circles. A turkey supper will be served in the lodge rooms at 11 o'clock. The invitations for use hall have been issued. They will be sent to Masons all over the upper peninsula.

The ball is in charge of one general committee, composed of F. J. Schlutheiss, George Tucker, F. B. Bird, C. H. Schaffer, J. A. Anderson, P. W. Phelps, F. E. Stolpe, A. T. Roberts, L. J. Jacobs, Louis Pennell, M. M. Duncan, W. H. Johnston, H. W. Sheldon, C. C. Yates, L. B. Steward and H. A. Holden.

The decorations of the hall will be simple. "We want to let the hall speak for itself," one of the men in charge of the affair says.

SOME LEAVE CAMPS.

Men in Woods Do Not Like Reductions in Wages.

As a result of reductions in wages recently made effective at many of the lumber camps in Marquette and Alger counties there has been a considerable movement of men among the camps and into towns. Many men have thrown up positions when informed that wages would be cut. Some of them have gone to other camps, only to find that the same scale was generally in effect, and have decided that as they could not better themselves they might as well stick in the woods. Others have pulled out entirely and come to town. It was recently announced that the wages in the camps would run from \$26 to \$32 whereas they have run as high as \$40 in some cases in past years and have averaged over \$30. It is asserted, however, that as low as \$22 is now offered for some classes of labor in some camps.

NOTICE OF MEETING.

Notice is hereby given that a special meeting of stockholders of the Superior Lumber company will be held at the office of the company, in Marquette, Michigan, on December 1, 1913, at 11 o'clock a. m., or the purpose of ratifying, approving, authorizing and confirming the sale of all its property, the distribution amongst its stockholders of all its assets remaining after payment of its liabilities, the liquidation of the company, and the transaction of all other business which may come before the meeting.

Dated November 8th, 1913.

J. H. HICKOK, President. A. F. JACQUES, Secretary.

11-12-10.

The Right Time Is Now

and we desire to call your attention to a few facts.

Please do not overlook them — we will cut them short.

When you are ready for your winter outfitting we want to show you.

Stein-Bloch and Kuppenheimer Clothes

It's a fact that our clothes are the best clothes that money could buy.

It's a fact that the man we clothe always looks well groomed.

It's also a fact that when you buy Stein-Bloch or Kuppenheimer Suits or Overcoats or Knox, Malloy or Stetson Hats, Hanan or Bostonian Shoes, Davis Dress Shirts, Stephenson or Lewis Underwear — or anything you buy from us you can be sure you have the right thing in quality, style and price.

You will be pleased if you give us a call.

Ormsbee & Atkins

Marquette's Largest Clothiers and Haberdashers. Nester Block, Marquette.

TRADING IN STOCKS DULL; FLUCTUATIONS INSIGNIFICANT; THE STREET AWAITING NEWS.

New York, Nov. 17.—Speculation in the stock market today was listless throughout, and except in isolated instances the price changes were insignificant. Wall street is waiting for news. Investors are doing next to nothing. There was plenty of news today regarding Mexico, but nothing which indicated decisive developments. The copper failed to benefit by the strong showing made in the fortnightly reports of European supplies, showing a decrease of more than three million pounds. Intermittent buying in Europe had comparatively little effect, on account of the stagnant conditions in the domestic market.

Chicago Grain Markets.

Chicago, Nov. 17.—Late favorable news from Argentina caused wheat to close irregular today, after an early upturn. Corn and oats showed a gain. Final prices were: December wheat, 86 3/4; May, 91 1/4; December corn, 71 3/4.

STEAMER WYOMING IS SAFE IN HARBOR

Identity of Ship, Wreckage from Which Is Found in Huron, Is a Mystery.

Port Huron, Mich., Nov. 17.—Up to this evening, no further information of disasters on Lake Huron resulting from the recent storm had been received here. Assurances from the owners of the steamer Wyoming, at Buffalo, that the boat was safe at a harbor in Lake Superior, the marine men still in the dark as to the identity of the vessel whose wreckage was found Sunday on the Canadian shore north of here.

No more bodies were reported found today. The overturned freighter, the steamer Charles Price, a derelict for more than a week, sank in Lake Huron this morning.

Weather Bureau Defends Its Service.

Washington, Nov. 17.—In reply to published charges that the weather bureau had given inadequate warning to shipping on the Great Lakes of the approach of last week's terrific storm, resulting in a known loss of 254 lives, and the announcement by Representative Gordon, of Ohio, that he would seek an investigation of the matter, the bureau tonight issued a statement declaring that "the storm throughout its course was irregular in as complete a manner as possible." Full responsibility for the forecasts was taken by the bureau, the forecaster at Cleveland being absolved from any possible blame.

Canadian Government Gives \$25,000.

Ottawa, Ont., Nov. 17.—The cabinet today decided to grant \$25,000 in aid of the relief fund for the sufferers in the Great Lakes disasters during the recent storm. The amount will supplement the sum raised by the general public.

AILEEN HEPPNER'S TRIAL TO BE ON PERJURY CHARGE

Chicago, Nov. 17.—Aileen Heppner, indicted with Daniel Donahoe, attorney, and Isaac Stiefel, a detective, charged with perjury and conspiracy to defame Clarence S. Funk, will be tried on the perjury charge, according to a decision today by State's Attorney Hoyne and counsel for Mr. Funk. An effort will be made to have the case assigned for trial at once. The perjury charge can be punished by a penitentiary sentence. Conspiracy is punishable either by fine or imprisonment. After the experience in the trial of Donahoe, who was fined \$2,000, the state's attorney considered there was little probability that a jury would send a woman to prison on the same evidence.

SOO CANAL PASSAGES.
