Baking Powder
Absolutely Pure

There is a remarkable interest in Home Baking and Cooking throughout the land.

This is a most encouraging indication that the battle against impure, improper food is going to be won.

The credit for the victory will belong to the women of the country.

Home cooking has the backing of science and the approval of fashion. It adds to housekeeping a pride; to our food, healthfulness.

It is acknowledged by experts, and by the women who know, that the best cooking in the world to-day is with the aid of Royal Baking Powder.

The proposed lists will be an accommodation for newcom-ers and a convenience for persons with cooms or house to rent. It is Mr. Daley's plan to keep the information up-todate, and to secure it in such a systematic way that it will be certain the eatire city will be covered. He suggests that persons who take roomers at once notify the club of the number of rooms they have available and the rents charged. Information sent in now will be at once listed.

### DECLARE WAR ON COLDS.

A crusade of education which aims "that common colds may become uncommon within the next generation" has been begun by prominent New York physicians. Here is a list of the "don'ts" which the doctors say will prevent the annual visitation of the cold:

"Don't sit in a draughty car," "Don't sleep in hot rooms."
"Don't avoid the fresh air."

"Don't stuff yourself at meal time. Overeating reduces your resistance."

To which we would add—when you take a cold get rid of it as quickly as possible. To accomplish that you will find Chamberlain's Cough Remedy most excellent. Sold by All Dealers.

### Killed in Mistake for a Deer.

George E. McNeal of Mt. Pleasant, lealer in real estate and loans, was shot n mistake for a deer while hunting near larnet, Mickinac county, last Thursday and was fatally wounded. McNeal and three others, C. A. McColl, John Zimmerman and Luther Striver, were camped four miles north of Garnet. The unfortunate man was shot by McColl. He had left a runway and had got on a track that McColl was following. The brush was thick and McColl just saw a face through it. He was not looking for a man in that direction and, thinking it stock sold at 71. The high record for was a deer, shot. The bullets took effect in McNeal's body. The hunters at once started for Garnet with the wounded man, but he died on the way. The inquest was held at Garnet by Justice Patterson of Hudson township and a jury of six men, who returned a verdict of accidental shooting. McColl had placed himself at once at the disposal of the authorities. The surviving members of the party took the body of their Pleasant.

Not a Hunter's Victim. Contrary to reports of the fatality sent out at the time, James McDonald eighteen years of age, the section hand LAKE SUPERIOR & ISHPEMING RAIL who met death on the Northwestern railroad near Beechwood. Iron county, was not a victim of a hunter's bullet. He was killed by passenger train No. 121 known as the Iron River Express. The young man was at work tightening bolts, and was on his knees between the rails, in a stooping posture. Although the place was on a straight stretch of track several miles in length, on account of the position in which he was working he was not noticed by Engineer Drabe until the train had approached closely. The engineer at first mistook him for an animal of some sort, but when he saw that it was a man he made every effort to stop. The unfortunate man appeared not to hear the approach of the For Marquette, Harvey, Mangum, Yalmer, New Dalton, Skandia, when he started to raise his head. He was whirled under the wheels and his body was mangled. The train was Train leaves Negaunee ... stopped and the crew went back to the place where the body was found. Life was extinct. It is said that young Mc-Donald was in the habit of working with the collar of his mackinaw turned up. The collar of his mackinaw turn thus partly covering his ears. It is thought that he may have had it this way at the time of his death and this, coupled with the fact that the wind was from the west, would account for his not hearing the approach of the train. The peculiar circumstances surrounding the occurrence led to several wild conjectures and reports being circulated, one of which was to the effect that McDonald had been shot by care less hunters, who mistook him for a deer, and was crawling along the track towards Beechwood when the train over-took him. This story was groundless.

### VICTORIA.

Victoria is obtaining thirteen pounds f copper per ton of rock mined, a deeided improvement over the record for last year, which showed but nine pounds to the ton. There is reason for the belief that this betterment will continue for some time to come, as all the openings are in a grade of rock higher than Victoria's average. Nine pounds of rock to the ton is lean copper and would be mpossible to commercial operation were it not for the low operating cost at Victoria, due to the natural power advantage peculiar to this property. Last Saturday the two Englishmen who are touring in Italy, entered the parish church of Santa Maria Maggiore at Spello, in Umbria. STORY OF THE DOLLAR.

How It Came to Be Used in Its Various Forms in Different Parts of the World.

The word dollar is the English form of he German word thaler. The origin of he thaler is as follows: In the year 519 Count Schlick of Bohemia issued silver coins weighing one ounce each and worth 113 cents. They were coined at Joachimsthal, that is James' valley or lale, in Bohemia; hence they became nown as Joachimsthalers, soon shortened into thalers. On each coin was the gure of St. James. Through trade with he Dutch these coins came into England n the sixteenth century and are referred to sometimes as "dalers," The word dollar is found in Shakespeare's "Macbethod," act 1, scene 2:

### RED LARGE PIMPLES ALL OVER FACE

Festered and Came to Head. Scratching Made Sores. Caused Disfigurement. Used Cuticura Soap and Ointment. Face Now Clear.

1413 E. Genessee Avc., Saginaw, Mich. — Cuticura Soap and Ointment cured me of a very bad disease of the face without leaving a scar. Pimples broke out all over my face, red and large. They festered and came to a head. They itched and burned and caused me to scratch them and make sores. They said they were seed warts. At night I was restless from

itching. When the barber would shave me my face would bleed terribly. Then scabs would form afterwards, then they would drop off and the so-called seed warts would come back again. They were on my face for about nine months and the trouble caused disfigurement while it lasted.

"One day I read in the paper of the Cuticura Soap and Ointment. I received a free sample of Cuticura Soap and Ointment and it was so much value to me that I bought a cake of Cuticura Soap and a box of Cuticura Ointment at the drug store. In about ten days my face began to heal up. I kept using Cuticura Soap and Ointment and in a very short time after, the scabs dropped off the red spots where they were vanished also. My face is now clear of the warts and not a scar is left." (Signed) LeRoy C,

### Why a Man Should Insure

A man's wife is dependent upon him for support. Support means money. Few men save much; they are in danger of losing what they do save, which if followed by an early death leaves no estate for the wife's support. A few dollars paid now for life insurance means several thousand dollars when it ismost needed.

Children need support, money, shelter, food and clothing, as well as the wife, but children need more-an education-one that takes years and much money to get; the education they would get if their father lived. Insurance of a sufficient amount will assure the wife and children all the necessities of life, and some of the luxuries and an educa-

# WHAT

CLOTHES MEAN

Ask the scores of mothers who bring their boys here season to be fitted in our boys' suits what they think of them.

They will tell you that in all their experience in buying clothes, they are the best clothes their boy ever wore.

It is what the mothers think that counts more than anything we could say in our advertising.

But it is only fair to suppose that it is the way our clothes wear, and the way they look while being worn, that wins the favor of critical par-
