General Supervision of Departments.
The business affairs of the city will be conducted through six departments, as follows:
I. Public Affairs.
2. Accounts and Finance.
3. Public Works.
4. Public Health and Safety.
5. Light and Power.
6. Water.
The mayor will have charge of the department of public affairs. After the municipal election in each year, the genthe discussion of the group will have charge of the department of public affairs. After the municipal election in each year, the genthe discussion of the proposed charter is that the decisions of the court do not every government and it has also been contended legation of the section. It is a purely technical legat point that cannot be authoritatively setWANTED-An ambitious and reliable salesman to represent us in Marquette, salesman to represent us in Marquette, salesman to represent us in Marquette, busical and the devoting all or part of his time. **REAM OF TARTAR** is the crystallized acid of grapes refined to absolute purity and ground to a creamy flour. It is declared by physicians the most wholesome of all fruit acids, and has been proved by long and universal experience the most efficient and satisfactory for baking purposes.

Highly refined products of the grape, properly combined with bicarbonate of soda and a little corn starch to absorb atmospheric moisture, are the sole ingredients of the ideal, high-class, standard baking powder.

Many acids have been tried during the last hundred years to find a substitute for the grape cream of tartar which would cost less. In recent years alum, which makes a baking powder at a cost of two cents a pound, has been used because of its triffing cost. Alum, however, has been disapproved by scientific chemists and physicians and is not employed by manufacturers of high-class powders.

Cream of tartar powders being healthful themselves, add to the healthfulness of the food.
