A MORNING PAPER PUBLISHED BY

The Mining Journal Company, Limited.

Issued daily except on Sundays. Contains Associated Press dispatches, and is especially devoted to the Upper Peninsula interests.

SUBSCRIPTION RATES:

Per year, by mail, \$6.00 Per month, by carrier, .60

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

MONDAY, APRIL 19, 1915.

UP TO THE COURT.

The question whether Alger county will be wet or dry for the next two years will now be referred to the courts.

The dispute is over Mathias township where the wets were in a majority. Common sense makes clear that the only time the condition of ballot boxes can be a question of fact is before they are opened.

When the ballots for Mathias township were inspected it was found that the returns made by the election board credited the wets with four too many votes and the dries with four less votes than they were entitled to.

As in opening the ballot boxes for Mathias the supervisors found that they were in condition to be opened, and as there appears to have been as much, and as good, reason for formally recording the results of the recount for Mathias as for any other division of the county.

Over at Escanaba, for instance, Alderman Smith recently polled more votes for mayor than any other candidate, but another man has taken the oath of office.

The result in Alger suggests that the really important question, when an election dispute of this nature comes up, is the personnel of the board with the power to make a review.

While co-incident with the defeat of the Straight bill in the senate by the dries, because they held that the amendments with which it had been loaded down had emasculated it.

It is the consensus of opinion that the dries in the senate were outgeneraled by the wets. Straight's leadership was unpopular, and blundering as well.

Certain reasons exist why the public may be pleased at the turn things have taken. The Straight measure proposed statutory prohibition, whereas if the dries move by petition the question of constitutional prohibition will be submitted.

lature would be relieved of the necessity of grappling with this discord breeding subject, and its service to the state in general legislation should be much better than it could otherwise be.

The dries are probably well advised in seeking to force a vote in the fall of 1916, for their chances should be best in an election in which the heaviest vote is polled.

There is nothing so much needed in the political system of this country as the wholesome entrance into it of the American business man.

Who is to get the \$8,000,000 in gold carried by the steamship Kronprinzessin Cecilie, which made that record breaking trip to Bar Harbor last summer after the big war broke out?

A movement that deserves encouragement is that which contemplates the production in this country of the dyes that are essential to the prosecution of various industries.

At least it must be said for Russia that no other nation could be licked so thoroughly and so often and yet come back so strong.

When King Alcohol reviews the situation in Europe, he is inclined to endorse General Sherman's definition of war.

Deputy Collector Kriemer appears to have been insufficiently instructed as to the nature of his duties. They are simple in the extreme, consisting of due care to see that Uncle Sam gets all the revenues the collection of which he is charged with.

EDITORIAL OPINION

preferred the submission of constitutional, rather than statutory, prohibition.

Charles T. Wilkins, a Detroit attorney, directs attention to one aspect of the plan to secure more daylight by moving the hands of the clocks ahead an hour that has perhaps not received the attention it merits.

Just now, because the government in Washington fails to agree with the views on the subject of conscription held by the government in Berlin, there is some talk of including this country among the nations which are to be hated by good Germans.

Not content to rule the waves England seems bent on dispensing with the seas.—Hillsdale Daily.

Up to date the family has not concerned itself over what father wore on Easter.—Bay City Times.

The netting of a submarine off Dover suggests a new fishing industry for the North sea.—Saginaw Courier-Herald.

Many people regard with hostility the man who sets an uncomfortable example to the whole neighborhood by cleaning up his back yard.—Flint Journal.

It may come about that the one who loses the European war will be the one who captures, and has to board, the most prisoners.—Battle Creek Enquirer.

President Wilson announces that he will not reply to his critics, but it might not be safe to make any disparaging comments on Baby Saigne.—Jackson Citizen-Press.

editor, Charles Clogston, daily faced threats of death, and did go down into the solitary prison cell—all to let the light of honest publicity onto the political fifth that had well nigh engulfed Terre Haute and had made it a place where honesty was a political byword.

The power of the gangsters in Terre Haute is a thing of the past. All that now remains is to carry out the sentence of the court.—Saginaw News.

What purports to be an allied statement of the price of peace is going the rounds of the press. According to this arrangement the allies are willing to quit if Belgium is evacuated and compensated for invasion.

From the German standpoint the proposal is a joke. Before it can be given any serious consideration Germany must be beaten to her knees.

On the Ohio and Mississippi, the possibilities of a spring flood continue until summer, and any felicitations on the absence of high water must be tempered with some reserve.

Wise men turn back to account, but never depend on it. It is to be hoped that the trouble maker and federal government will at last follow the wise plan in dealing with these huge and erratic rivers.

The engineers of the war department assure us that, with a levee system costing about one-sixth as much as the Panama canal, the age of floods can be brought to a permanent end.

Fraud, deceit and political corruption very often get to the end of their road; the truth of that was never more strongly illustrated than by the conviction of the Terre Haute political corruptionists in the federal court at Indianapolis.

Approxes of the widespread irritation in the United States over the tone of the memorandum recently handed by the German ambassador to the state department, it may be in point to suggest that the writer of the note has not given due consideration to the circumstances that this country occupies one strategic position with relation to Great Britain and quite another with relation to Germany.

LOWER STATE NOTES

REDFORD—Redford's village council decided to obey the letter of the Warner-Cramton law as regards the population restrictions limiting one section for every 500 persons, and reduced the number of its bars from three to one. Licenses were denied to three applicants.

ADRIAN—Albert Anderson, aged 19 years, met his death by drowning in the Raisin river where it is only one foot deep. It is supposed that Anderson had a sudden attack of illness, to which he is subject and was unable to call for help. He had recently completed two years in Adrian high school and was running a cigar stand in the National bank building.

PONTIAC—The application for a recount of the local option vote in Oakland county was presented to the board of supervisors by the "wets." The "dries" concurred in the petition. Supervisors J. K. Kindl, of Waterford, and A. W. Wilson, of Royal Oak, were added to the canvassing board.

BATTLE CREEK—Several arrests on charges of "dope" trafficking are expected as the result of information given the police by Mrs. J. L. Davis, whose son, Verne, was committed to the state hospital at Kalamazoo, crazed by the use of drugs. The mother gave dozens of packages of drugs to the police and names of those from whom she said it was purchased.

FLINT—The citizens committee organized for the enforcement of the local option laws includes one man from each ward in Flint and one from each township in the county, a total of twenty-four. Representative Flint men named are: Fred J. Wells, of the Walker, Weiss Axle Co., Floyd A. Allen, of the Buick Motor Co., A. B. C. Hardy, general manager of the Chevrolet Motor Car Co., Major Guy M. Wilson, of the Michigan National Guard, M. P. Cook and S. New Tom Andrews. In the townships representative farmers and heads of farmers' associations are named.

YOUR BOY AND YOU. You have figured a lot on his young career. You have dreamed, and planned, and thought; You have pictured him manly and full of cheer. With a will for the fight you've fought, But he'll never come up to the dreams you dream.

GERMAN SHIPS IDLE. The thousands of travelers by the ferries to New Jersey gaze with never-ending interest at the three funnels of the giant Hamburg-American liner Vaterland, lying at her Hoboken pier, mute evidence of the sturdiness with which the European war broke and of England's control of the seas.

THE BELGIAN BREAD LINE. Most appetizing that soup prepared under the direction of the best chefs in Brussels. The meat and the green vegetables in it were Belgian and the peas American. Steaming hot, in big cans it was sent to the communal canteens, where lines of people with pots, pitchers and pails waited to get their daily allowance.

WHY IT IS A FAVORITE. There are good reasons why Chamberlain's Cough Remedy is a favorite with the mothers of young children. Read what one of them says of it: "There could be no better medicine than Chamberlain's Cough Remedy. My children were all sick with whooping cough. One of them was in bed, had a high fever and was coughing up blood. Our doctor gave them Chamberlain's Cough Remedy and the first dose eased them, and three bottles cured them." Mrs. R. A. Donaldson, of Lexington, Miss. For sale by All Dealers.

### City Brevities

Mrs. Webb and Mrs. Dellaas left last night for Chicago.

Mrs. LaRoche left last night for Chicago on a purchasing trip.

H. J. Strom, of Michigan, spent Sunday with Marquette friends.

Mr. and Mrs. H. N. Truckey, of Iron River, were in Marquette Saturday.

R. E. Birchard has returned to the city from an extended business trip.

H. A. Rudolph, of Iron Mountain, was a visitor in the city yesterday.

K. M. Way, of Duluth, has been a Marquette visitor the last few days.

A. McFarland, of Rumley, spent yesterday in Marquette, visiting friends.

Carl Hinz and F. E. McCormick, of Munising, visited in the city Saturday.

W. S. Hill left Saturday afternoon for Detroit, on a several days' business trip.

E. S. Bridges, of Crystal Falls, was among the visitors in the city yesterday.

Miss Pauline Adams, of Negaunee, visited with Marquette friends Saturday afternoon.

The Women's Relief corps will give a card party in Keough's hall at 3 o'clock this afternoon.

Mrs. Powers and Mrs. Barney Linn, of Houghton, are in the city visiting with relatives.

H. F. Handford went to Newberry Saturday with a patient for the state hospital in charge.

Circle No. 2 of the Methodist Ladies' Aid society will conduct a rummage sale at the church Wednesday from 9:30 to 5 o'clock. Persons having donations for this sale are asked to send them to the church.

Prof. S. D. Mager, of the Northern State Normal school, spoke at the Gwinn High school Friday night on "Birds." Friday morning he addressed the teachers of the Gwinn schools.

Lovell Youngquist left yesterday afternoon for Ann Arbor to resume his studies at the University of Michigan after spending the spring vacation with his parents, Dr. and Mrs. O. G. Young, of Iron River.

Fred J. Schulteis has purchased from the Cleveland Auto company a thirty-seven horsepower Buick five-passenger roadster. His former car, a Studebaker twenty-five, is for sale by the company at a bargain.

Bruno Primeau, who has been visiting at his home the last week or ten days, left yesterday afternoon for Detroit, on his way to Ann Arbor, to resume his work at the state university, following the spring vacation.

Thomas Conlin, of Crystal Falls, was in the city yesterday on his way to Newberry, to attend a meeting of the board of the Newberry state hospital. He was accompanied by F. S. Case, of this city, who also is a member of the board of control.

Mrs. E. C. Quarters and daughter, Miss Florence Rule, left last night for Chicago on their way to Amavilla, Texas, where Miss Rule will be married to Frank Cook, formerly of this city. Mr. Cook is at present employed by the Santa Fe Railway company.

The Baraga Juniors defeated the Swatters by a score of 8 to 7 Saturday in one of the first baseball games of the season. King and Madigan were the battery for the Juniors and L. Beaudry and H. Stensrud for the Swatters.

### Our Weekly Chat

A stone cast into a pool starts a ripple that expands in constantly widening circles. How like that stone in this city, and how like the pool this community in which its fortunes are cast.

Our little ripple on entering has widened and is still widening; and as it broadens in circumference so does this store broaden to accommodate its broadening trade.

We expect to grow bigger still—with your help, of course. To earn this help we pledge you the same fair dealing, the same good service, the same splendid values that have been a part of our store-keeping system since the first ripple appeared.

Very truly,  
*R. D. Dutton*

Prices: Boxes and divans, \$1.50; balance parquet and first two rows of balcony, \$1.00; balance balcony, 75c; gallery, 50c. Seats on sale at Bigelow's store Tuesday at 8:30 a.m. Mail orders received now

**STOP AND REFLECT**

YOU who have settled in matrimony—you who intend to some day—think of those around whom your whole thoughts are centered. Think of the duty imposed upon you to provide comfort and happiness for them.

You Can't Provide for Them with an Empty Purse

Wouldn't it be wise for you to begin to save now so that you'll be able to provide against poverty? You don't have to save much—but you must save regularly.

Put your funds here, where safety and personal service go hand in hand with conscientious effort.

### MARQUETTE NATIONAL BANK

MARQUETTE-MICH.

The game was played at Longyear's field.

Program of Interest—There was a good audience present at the high school Friday night to hear the program presented by the "M" club of the school. Among those who gave selections were Mrs. E. G. Rushmore, Mrs. Louis Vierling, and E. A. Spessard.

Brush Fire Saturday—The fire department had a long run at 1 o'clock Saturday afternoon to the hill at the rear of the Town & Country club to extinguish a brush fire. The progress of the fire was stopped by heating it out. Several acres were burned over.

Breakfast at Presque Isle—The seniors of the Northern State Normal school entertained at a breakfast at Presque Isle Friday morning, and the greater number of the members of the class were present. The breakfast is an annual event. Friday night the senior girls' basketball team defeated the juniors.

Outfit Attracts Attention—The peanut and popcorn wagon, purchased recently by Frank Burrows, made its first appearance on the business streets Saturday, and was an object of considerable attention. It is a fine equipment. Peanuts and popcorn are prepared with apparatus carried on the wagon, in full view of passersby.

Students at Funeral—Funeral services for Clyde Williams, the fifteen-year-old son of Mr. and Mrs. Fred Williams, North Pine street, were held at St. Paul's Episcopal church yesterday afternoon at 2:30 o'clock. The church was filled with the many friends of the boy, who was popular. Practically the entire student body of the high school attended. Burial was made in Park cemetery.

That watch put away in the drawer because it won't run—let Conklin fix it. He will make it a timepiece.

Argentina has fifty-six cooperative societies.

### "THE BLACK BOX"

The big, sensational feature of the Universal Company, written by E. Phillips Oppenheim and produced by Otis Turner, with a strong cast as follows:  
HERBERT RAWLINSON and ANNA LITTLE in the leading roles, supported by Laura Oakley, Wm. Worthington, Helen Wright, Beatrice Van, Frank Lloyd, Frank McQuarrie, Marc Fenton

The greatest serial ever produced.

Moving Picture World—March 20.  
THE BLACK BOX (Universal Special), "The Apartment House Case," March 14.—This first installment of the new Oppenheim serial opens in a decidedly interesting manner. It has been carefully staged by Otis Turner and the cast includes Herbert Rawlinson, Anna Little, Wm. Worthington, Frank Lloyd and others. The story commences with thrills and they continue with absorbing complications through both reels.

Do not miss the first episode.

How Uncle Sam Works When Making Measures to Be Used by a Nation

Uncle Sam is busy trying to make perfect standards for weights and measures, yet few realize the work that is going on along this line.

But the busy citizen seldom bothers about this point. He accepts his quart of berries or his pound of butter as a matter of course, as things which are done for as far as improvements is concerned.

A large corps of scientists are constantly at work in measuring, weighing and testing just as earnestly as if it were the beginning of determining the accuracy of such things.

In the matter of making a standard for colors the tinting of a ray of light is used in the test. Colors are easily faded, and there are myriads of variations in one shade.

Yet the United States has not adopted the kilogram form of weighing, though in order to be in accordance with this international agreement it does use it as a standard.

The determination of candlepower is another exceedingly complicated test which has been perfected. After much delicate testing a dozen lights have been secured as a standard to which others must conform to be correct.

The way in which a standard of measure by making it equal eight and one-third pounds of water, hence any vessel which can contain eight and one-third pounds of water

received from this international conference is an exact copy. It represents the weight of the bureau by the side of the kilogram, and is a long bar of platinum-iridium.

Another important work is that of establishing a standard time measure. For this purpose there is the precision standard clock, a mechanism made in Germany, of the finest workmanship possible.

It tells the minutes, seconds and hours, and reposes in a double glass stand, which is partially exhausted of air. The air which enters the case is made absolutely devoid of moisture by passing through chemicals.

In the matter of making a standard for colors the tinting of a ray of light is used in the test. Colors are easily faded, and there are myriads of variations in one shade.

The way in which a standard of measure by making it equal eight and one-third pounds of water, hence any vessel which can contain eight and one-third pounds of water

will hold a gallon. By this test, the hydrometers used in the internal revenue service are gauged. The bushel of dry measure is equal to 2,150.42 cubic inches of water.

The work done at the bureau of standards is of the most delicate and technical character, and there is not an industry in the country which is not financially interested in what it is doing.

The steel tapes which aided in running the Panama canal were tested here and 56 are the hundreds of standards of all business plants from over the land.

In chemistry, milling, brewing, engineering, cooking, lighting—in fact, in about every branch of life's industries, there is use for the standard of a perfect measure.

Its importance is shown by the fact that so many fraudulent weights and scales have been used that in some cities they have been seized and publicly burned.

Inspection is employed in every city to prevent the customer being cheated by scales in stores.

In colonial times many of the states differed in their weights and measures, but now the scale is uniform throughout the nation.

With a perfect standard in Washington by which comparison can be made, and with a large corps of scientists ready to test material, there is every reason to believe that Uncle Sam is on the point of making the measures about as near perfection as they can be brought.—Washington Star.

"MORE DAYLIGHT" ASSAILED.

I trust you will keep up your fight against this utterly senseless proposition to adopt eastern time in Detroit.

It would mean endless confusion and disgust for a large body of citizens, those who have occasion to use the railroads, and certainly for the business and pleasure-seekers who come to Detroit from various parts of the state.

Plenty of evidence can be obtained in Cleveland by interviewing the hotel and restaurant men and all who come in contact with people from other towns.

I have done so and know their opinion of the eastern time, "More Daylight" is all right and desirable, but uniformity is much better. Central standard is the legal time of Michigan and legal matters must be conducted with reference to that time.

In Cleveland the Erie and the Wheeling & Lake Erie railway lines and the Cleveland, Painesville & Ashtabula electric lines adopted eastern time, after it was adopted by the city.

The other transportation lines continued to use central time. The result is a beautiful mix-up. Does Detroit want to wade in such a mess? I hope that the common sense of the Detroit people and sober judgment will prevent them from being carried away by the fairy tales of the delights of eastern time, after it was adopted by the people of Cleveland to go to bed with the chickens and arise before daylight.

It's a foolish fad, and one which should be speedily forgotten, as it deserves.—Henry E. Harris in letter to Detroit Free Press.

REMARKABLE WORK DONE IN SALVAGING LOST SHIP EMPRESS

Robert G. Skerrett describes in the Scientific American the "notable salvage work" on the wreck of the Canadian Pacific Railway's steamship Empress of Ireland.

The steel tapes which aided in running the Panama canal were tested here and 56 are the hundreds of standards of all business plants from over the land.

In chemistry, milling, brewing, engineering, cooking, lighting—in fact, in about every branch of life's industries, there is use for the standard of a perfect measure.

It's a foolish fad, and one which should be speedily forgotten, as it deserves.—Henry E. Harris in letter to Detroit Free Press.

WHAT SWISS CAN DO IN WAR TIME

With a population of about 4,000,000 and an expenditure of less than \$5,000,000 annually, the Swiss confederation can, in an hour of need, muster a fighting force of 500,000 men, trained and perfectly equipped.

With a population of more than 90,000,000, it costs the republic of the United States in the neighborhood of \$90,000,000 to maintain a professional military organization which, in emergency, is completely equipped, into line of battle.

To trace the Swiss \$8,000,000 into a first-class defensive force of 500,000 is exceedingly simple.

The money goes for training, clothing and equipment, and pay of soldiers and officers while they are with the colors. It is not wasted in politics because it is next to impossible to play politics with the Swiss military system.

Every male citizen of Switzerland, who is able, receives military training for certain short periods between the ages of seventeen and thirty. Every boy is trained for the first ten years—that is, five times in all—answers a call to the colors. His period of training is never more than ninety days for any one year, and that only in the first year.

WRIGLEYS

means the best in chewing gum—it means the Perfect Gum in the Perfect Package—sealed air-tight.

It means the largest, most up-to-date and most sanitary chewing gum factories in the world.

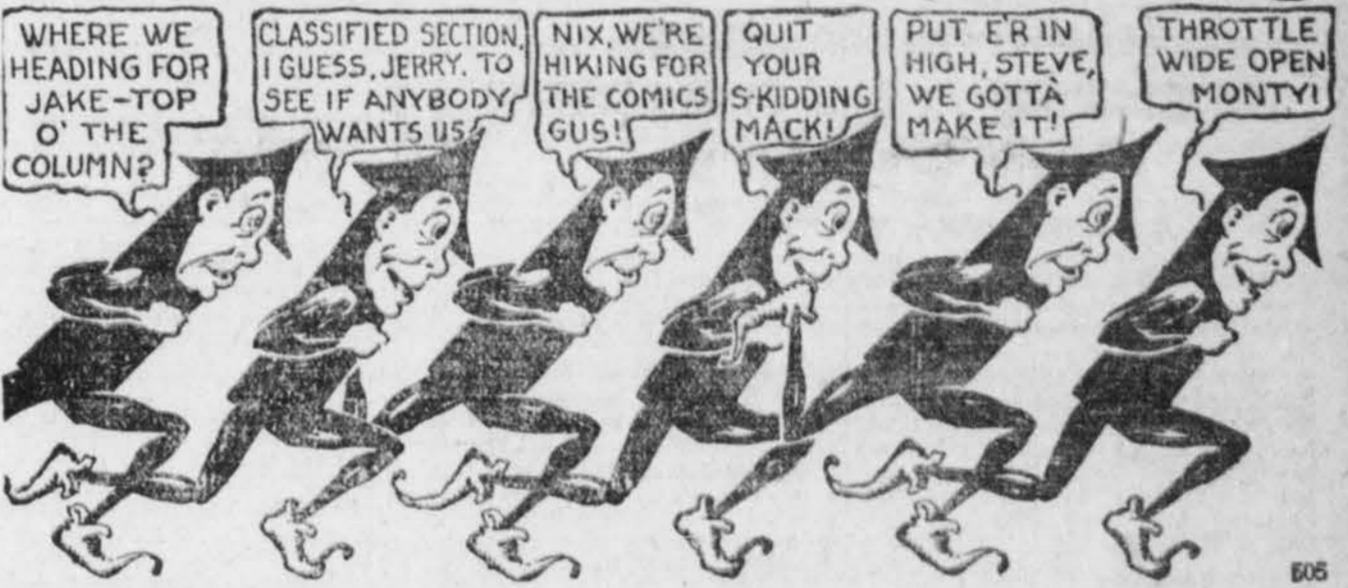

It means a wholesome, beneficial and economical confection, good for everybody.

With United Profit-Sharing Coupons around each package it means a rapid accumulation of these valuable and popular merchandise certificates.

Write for your free copy of "Wrigley's Mother Goose" in which the Wrigley Spearmen have acted all the old familiar "scenes" to the "tune" of the new Wrigley jingles!

WE ANNOUNCE THE ARRIVAL OF

The Season's Newest in Suits

The very heavy demand for our first stock of Spring suits exhausted our supply sooner than even we had anticipated.

At \$25.00

we offer some unusually attractive values that will win the admiration of all critical dressers.

The new lot which has just been put on display features men's wear serges more prominently.

THE PARIS FASHION STYLE AUTHORITY SHOP

What Was Achieved. All of the bodies were recovered that could possibly be reached, and this was really the prime concern of the officials of the Canadian Pacific railway.

The Swiss youth, from his earliest school days is taught that the army is for defense only. Patriotism is interwoven in his development.

He learns to look upon each as essential to real citizenship. By the time he leaves school he is not a raw recruit.

It seems a pity to lay a destroying hand on such a delightful recollection as centers around the barfoot boy.

It is a pity to lay a destroying hand on such a delightful recollection as centers around the barfoot boy.

In recent years scientists have discovered facts which show that nearly one quarter of our deadliest diseases are known to attack us through breaks or scratches in the skin and by the bites of certain insects.

Going barefoot means that the feet will have bruises and scratches and cuts, and when we know, as we do now, that most, if not all, our bacteria disease germs and parasites live in the ground, the inference is easily to be drawn.

The soil of cities swarms with germs of all kinds, and lockjaw (tetanus), tuberculosis, cholera, bubonic plague, hookworm and yellow fever all come to us through tiny animals attacking us through the skin.

The hookworm of the south bores its way through the skin, and here until it breaks into some tiny blood vessel. Taken up in the circulation, it is carried through the system, and, in time, reaches the intestines, where it anchors

itself by its hooks, and there lays its eggs. The risk of going barefoot extends to all parts of the world.

DOG DIES OF "BROKEN HEART." "Old age and broken heart." That was the verdict returned by Bill Snyder, head keeper of the Central Park menagerie, on the death of Jack, the park sheepdog given to the society by the late J. P. Morgan.

Jack had attained the ripe old age of sixteen and last summer became separated from his best friend when James Conway, the custodian of the sheepfold, retired. Conway had seen fifty-three years of service.

It seems a pity to lay a destroying hand on such a delightful recollection as centers around the barfoot boy.

Queenie, an Airedale, has been promoted to Jack's position. With "Bill" Hoey, the new shepherd, she does the work that Jack and Mr. Conway once did.

Never take whisky or pepsin as an aid to digestion, but take Chamberlain's Tablets. They will strengthen the stomach and enable it to perform its duties naturally.

BOARD OF EDUCATION PROCEEDINGS. Marquette, Mich., Feb. 19, 1915. Meeting of the Board of Education held at the superintendent's office at 8 o'clock p. m.

Members present—J. F. Neidhart, president, H. J. Hornbogen, Edw. S. Rice and Jas. O'Reilly. Absent—H. A. St. John.

Resolved that the request of Miss MacLeod be granted. Resolved that two drinking fountains be installed on the second floor of the Fisher street school building.

books valued at \$15.14 furnished to improve pupils, leaving a balance from Mr. Jones on Jan. 6, date of inventory, \$86.17.

Secretary turned over to the treasurer of the board check for said amount. The statement also showed that value of books unsold at Jones' store on Jan. 6 was \$29.25.

Resolved that hereafter children will be admitted to the first grade only twice a year, Sept. 1 and Feb. 1, and that they are required to be five years of age previous to date of entry.

Resolved that the schools close Thursday evening, April 1, for the Easter vacation and reopen Tuesday morning, April 6.

Resolved that the bills be allowed and ordered paid. Further business, the meeting adjourned.

Members present—President J. F. Neidhart, E. S. Rice, H. J. Hornbogen, H. A. St. John and Jas. O'Reilly.

Resolved that the request of Miss MacLeod be granted. Resolved that two drinking fountains be installed on the second floor of the Fisher street school building.

Resolved that the bills be allowed and ordered paid. Further business, the meeting adjourned.

JAMES O'REILLY, Secretary.

GIVES TO FLOWERS COLORS AND SHAPES

Englishman Attains Remarkable Effects by Shading Plants from the Sunlight.

London, April 18.—Remarkable variations in the form and color of flowers have been obtained by Colonel H. E. Rawson, C. B., as the result of experiments in screening them from sunlight at certain hours of the day.

Nasturtium plants that originally yielded yellow flowers now, for example, bear purple blossoms, and those that gave orange flowers formerly, have become chocolate-colored. Similar variations have been obtained with poppies, chrysanthemums and daisies. The structure of these plants has also been altered.

Begun in South Africa, the experiments are now being continued at Colonel Rawson's home at Heronsgate. Shrubs and trees form natural screens out of doors, and for plants grown inside the ordinary shelving and roofing of the conservatory are used for screening the plants at given hours.

The origin of the experiments was the spectacle of a wonderful sunrise which Colonel Rawson saw just after crossing the equator on the way to South Africa ten years ago to take up his command of the Royal Engineers.

Very high up in the sky the small cirrus particles were arranging themselves in most extraordinary lines of filaments, extending completely from the northern to the southern horizon. When the sun got high these filaments varied their structure perceptibly.

How Discovery Was Made.

"It was while watching the effect of the sun on these lines during the day," Colonel Rawson said, in an interview with a representative of the Pall Mall Gazette, "that I jumped to the conclusion that on the surface of the earth it should show similar action."

"The very first experiment I made showed that the rays of early sunrise and those of the later hours of the day had very different effects upon vegetation."

"It resolved itself into this fact, that the absorption of the atmosphere was sufficiently different at these various altitudes of the sun to sift out different rays at different hours. Plants appear to be sensitive to this action, much in the same way as the photographic film to the actinic rays."

"The whole process, then, consisted in stopping the full sun from falling on the plants during the desired intervals, and in trying to ascertain what plants would do to recover equilibrium and repair the disturbance caused by shutting off light at these times."

"In practice, if, for example a yellow tomato was put into low, or sunrise, sun, and given enough light, or midday sun, to ripen its fruit, you would get a very much better return than if you cut off the low sun altogether and gave it only the intermediate sun."

"The fact also, that there is a red tomato in place of the yellow fruit leads to the supposition that the one has been changed into the other by the sunlight, in which it has been constantly kept."

"In addition to the effect of sunlight on coloration, changes of structure very soon begin to take place. For example, under its action, will increase the number of its petals from five to seven. Their shape will vary, and as many as three or four spurs will grow instead of one."

"The margins of the petals will also adhere and form a tubular, instead of an open flower, resembling us of the aquilegia (the columbine)."

LACK OF PHYSICIANS A SERIOUS PROBLEM

Glasgow, Scotland, April 5.—(Correspondence of the Associated Press.)—The serious situation which has arisen owing to the dearth of physicians is emphasized by a notice issued by the Scottish Emergency Medical Service Committee appealing to the public to refrain from calling upon doctors unnecessarily. The appeal says:

"It will help materially to relieve the great strain now imposed on medical practitioners remaining at their posts throughout the country—many of whom are at present working fifteen or sixteen hours a day—if patients will send for the doctor early as possible and so allow him to arrange his daily round with a view to economy of time. When the case is not an urgent one and a visit the next day would suffice, this should be stated."

"Local educational authorities are asked to note that, important as is medical inspection of school children, it is not nearly so urgent as the care of those who are dangerously ill. An appeal is therefore made for the release of school medical officers entirely or in part during the present emergency."

Retired doctors are invited to offer their services, and the younger lecturers and assistants in the medical schools and hospitals are asked to forego their usual Easter holidays or to substitute for them a "change of work."

SOAP IS BAD FOR THE HAIR

Soap should be used very sparingly, if at all, if you want to keep your hair looking its best. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and ruins it.

The best thing for steady use is just ordinary unsifted coconut oil (which is pure and greaseless), is cheaper and better than soap or anything else you can use.

One or two teaspoonfuls will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It makes an abundance of rich, creamy lather, which rinses out easily, removing every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves the scalp soft, and the hair fine and silky, bright, lustrous, fluffy and easy to manage.

You can get purified coconut oil at any pharmacy, and a few ounces will supply every member of the family for months.

TEXAS RANCH HOME MANSION OF KIND

Residence of Mrs. Henrietta M. King, Built on 1,280,000-Acre Tract, Cost \$150,000.

Kingsville, Tex., April 19.—The new country home upon the ranch of Mrs. Henrietta M. King was recently finished at a cost of more than \$150,000, including the elaborate interior decorations and furnishings. It is said to be the most magnificent ranch home in the United States. The estate upon which it is situated embraces 1,280,000 acres. This big ranch is a solid body of land that borders the Gulf of Mexico for more than 100 miles, extending from a point near Corpus Christi almost to Brownsville, on the Rio Grande.

The original residence of Mrs. King and her husband, the late Capt. Richard King, was a blockhouse, which was built in the early days of border ruffianism. Upon the parapet of the old fortified house were several cannon of ancient design, and portholes ranged the walls of the lower floor. In those troublesome times roving bands of Mexican brigands preyed upon the cattle herds and other property of the pioneer ranchmen of the border. Not infrequently outbreaks made during raids upon the ranch home for the purpose of robbery.

Mrs. King is now 74 years old. For many years she has lived quietly at her ranch home with her children and grand-children around her. Notwithstanding the fact that she is one of the richest women in America she is personally known to but few persons outside of her own family and neighborhood circles. She has made a few brief trips to New York, but her chief enjoyment is administering to the needs and pleasures of the residents of the town of Kingsville, which she established several years ago, and of the several hundred Mexicans and their families, who are employed upon her ranch. She has a beautiful home in Corpus Christi, where she usually spends a few months of each year.

Entertained Many Travelers.

When the land that comprises the ranch had advanced in value from a few cents per acre that was originally paid for it to several dollars per acre, and the number of cattle upon the big estate had multiplied until they were counted by the hundreds of thousands, the late Capt. King erected a new residence near the site of the one that had served the double purpose of home and fortress. This new home was large, and it was equipped with all the conveniences that were obtainable in those days. It contained twenty guest rooms, and for many years hospitality was dispensed with a free hand by Capt. and Mrs. King to all travelers who came their way. This splendid free-heartedness and neighborly kindness is kept up even now by Mrs. King and her son-in-law and daughter, Mr. and Mrs. R. J. Kleberg, who make their home with her.

The commodious frame dwelling was burned three years ago. The new magnificent concrete residence that now stands upon its ruins is about as complete in every respect as money and art could make it. In type it is a mixture of castle of ancient times and the modern mansion. The mission style of architecture is maintained to some degree. Wherever possible, severe lines were carefully avoided. Its design and construction are in keeping with the climate. The halls are broad and the window and door spaces are large, in order that the cooling breeze from the adjacent Gulf of Mexico may sweep through the entire interior during the hot months of summer.

The rugs and tapestry are of special design, and were woven in Austria from original patterns that were suggested by Mrs. King. They portray allegorically Texas historical incidents and the wild life upon the range. The many guest chambers are each equipped with a private bath, the pure water for the entire building being provided by means of an artesian well. A private plant generates the electricity for the illumination system. The sanitary arrangement of the residence is perfect. In fact, every detail of design and construction is along the most modern lines.

Number of Cattle Unknown.

The site of this wonderful ranch home is upon a slight elevation that commands a broad view of the grazing and farm lands that surround it. Just how many cattle are upon the ranch even Mrs. King does not know, although she keeps in constant close touch with her vast business interests which are under the active management of Kleberg. It is stated that approximately 100,000 calves are branded upon the ranch each year.

With that number as a basis, it is certain that there are several times that number of cattle upon the 1,280,000 acres.

The Mexico working population of the ranch is about 600. They are provided with comfortable homes, and Mrs. King looks after their welfare as if they were so many children. A few years ago she donated a large tract of land near Kingsville for the establishment of an industrial school for Mexican boys and girls. It was only about twelve years ago that a railroad was built through the King ranch. This new transportation outlet immediately led to the establishment of the town of Kingsville, which is within three miles of the ranch home. Up to that time it was thirty miles from Mrs. King's home to the nearest town. She has taken an active interest in the growth of Kingsville. Her benefactions to the town and people of the community have been many. Among them was the donation of a large and well-equipped school building. In laying out the town site and in the sale of lots, Mrs. King stipulated in each deed that no saloon should be established upon the property. As a result of this restrictive clause in the deeds, Kingsville is a "dry" town in the midst of a "wet" territory that covers most of South Texas.

Although the King ranch is essentially a cattle-grazing proposition, a

"A Rubber Chain Tread built on a Powerful Modern Tire"

We challenge the world with our Famous Popular-Priced "Chain Tread" Tires. Keep a tire record and prove it for yourself

Our total factory capacity has been doubled. Now we are ready to supply our famous "Chain Tread" Tires in unlimited quantities at the lowest price in their history. Now we challenge any competitor's tire to show you the same combination of real anti-skid protection and low cost per mile. Get our Tire Record Cards and prove it for yourself.

"Chain Tread" Tires

Safety experts acknowledge our rubber chain tread, built on this powerful modern tire, to be an absolutely marvelous anti-skid device.

"Chain Treads" are not simply a fancy design stamped on a tire—they are real anti-skid tires. Send your name and address, for a set of Free Tire Record Blanks, to

Milwaukee Branch United States Tire Co., 454 Milwaukee St.

"Chain Tread" Tires are sold by Leading Reliable Dealers. Do not accept substitutes

United States Tires logo and text: Made by the Largest Rubber Company in the World (Operating 46 Factories)

WORLD OF IMPERFECTION.

Nothing is perfect in this world. The perfect man or woman is still to be born. Even the angels have their imperfections. Since the world was created, the imperfections of man have baffled science. Wars have played their frantic havoc from the time when Cain slew his brother.

Humanity has been scourged from time immemorial by dreadful diseases, but the same diseases exist today. Countless cures have been proclaimed for cancer, consumption and all other scourges of humanity and all have failed.

Scientific medical discoveries, like vaccination for smallpox, have not put an end to the frightful epidemics of the earlier ages, but medical skill is still baffled and the mystery of the origin of cancer is matched by the mystery of the origin of the common wart or the prevailing baldness among men and women.

Astronomers measuring the height of the mountains of the moon and the orbits of the planets are still unable to solve the riddles of the universe. It is only a conjecture that Mars is inhabited. How little we know of the spots on the sun and the possibilities of their influence on our climate. Astrology still has its believers and the psychic forces are

ROTTERDAM HARD HIT BY GREAT WAR

Its Commerce Has Been Curtailed by Measures of the Several Belligerents.

Rotterdam, March 25.—(Correspondence of the Associated Press.)—The transit shipping trade of Rotterdam is suffering to an enormous extent. In peace times this port ranks third in Europe for this kind of trade. During January and February only 749 vessels of all kinds entered port as compared with 1,765 in the corresponding period of 1914, and their tonnage was only 884,311 against 2,096,612 in January and February last year.

The loss is due not only to the curtailment of traffic by sea, but also to the fact that a large proportion of the usually immense water-borne trade in the Rhine districts has been cut off by the prohibition of export of certain goods. The labor exchanges are consequently more crowded every day with the numberless unemployed. Groups of them are to be seen also at all hours of the day around the wharves in the Rhine districts, where they wait for the prohibition of export of certain goods. The labor exchanges are consequently more crowded every day with the numberless unemployed. Groups of them are to be seen also at all hours of the day around the wharves in the Rhine districts, where they wait for the prohibition of export of certain goods.

CAN'T FIND DANDRUFF

Every bit of dandruff disappears after one or two applications of Danderine rubbed well into the scalp with the finger tips. Get a 25-cent bottle of Danderine at any drug store and save your hair. After a few applications you can't even find a particle of dandruff or any falling hair, and the scalp will never itch.

THE NOISE A BULLET MAKES.

What sound does a fast-traveling bullet make, anyway? Correspondents at the front or near front continually describe its whining, hissing, howling, humming or whispering, according to the fancy of the writer. In this war most of the bullets have whined. In other wars they have hissed or hummed, and in every war since the invention of gunpowder they have made some unmeaning sound. At least the chroniclers of wars have caused them to sing in various ways as they passed overhead or by one's ears.

Now comes Edward C. Crossman, in Outlook, with the assertion that to make a bullet second, which all bullets do when discharged from high-powered rifles. But Mr. Crossman says they do not whine, hiss, howl, hum or whisper. At 700 yards from where the missile starts it makes a sharp crash in passing overhead, according to the Outlook writer. He describes the sound phonetically as "puck-puck." The "puck" part of the sound is the report of the rifle itself struggling to keep up with the noise created by the speeier bullet boring its way through the air.

Perhaps after all, there are many sounds made by a bullet, and the state of the correspondent's nerves translates it into a whine, hiss, howl, hum, whisper or even a "puck-puck."

ABOUT RHEUMATISM.

People are learning that it is only a waste of time and money to take medicine internally for chronic and muscular rheumatism, and about ninety-nine out of a hundred cases are one or the other of these varieties. All that is really necessary to afford relief is to apply Chamberlain's Liniment freely. Mrs. H. Miller, Loganport, Ind., writes: "I have used Chamberlain's Liniment for rheumatism and it always gives relief." For sale by All Dealers.

Chicago "dope fiends" in large numbers have been swindled by fakers selling white powders of a harmless nature instead of cocaine.

JERSEY FOX RANCH AIM OF CAPITALIST

Wellknown Men, Successful in Alaska, Will Now Try Scheme in the East.

Trenton, N. J., April 18.—Some Jersey men expect to become millionaires in a peculiar way within the next few years. They are not going to take a wild chance on making this money, but they have already tried out the scheme. They include several of the shrewdest business men of the state who have made comfortable fortunes in other lines.

The ranch in Alaska is located at Fairbanks. Frederic A. Duggan of this city, owner of the Imperial Porcelain company, and one of Trenton's wealthiest men, is the president and treasurer. Daniel Haverstick of Trenton is the secretary and Joseph S. Sterling is the general manager.

The eastern ranch, which these men intend to establish, will be for raising foxes for sale for breeding purposes. It is their contention that the raising of these animals will be a great boon to farmers and for that reason a good agricultural community will be chosen for the ranch.

A HOT ARTESIAN WELL. In the Flathead Indian reservation near Canon, Mont., is an artesian well containing hot mineral water, said to

Ishpeming Department

COUNTY COMMISSION PLANS MUCH WORK

Bids Called for on Thirteen Miles of Highway Construction This Year.

The Marquette county road commission is preparing for an active summer in road building on both the eastern and western ends of the county. During the winter the engineers were busy planning the work on the highways that will be improved this season.

The commission is now calling for bids on three jobs, two in the western end of the county and one in the east. A portion of the west road, between Dishno and Michigamme, a distance of three and a quarter miles, will be rebuilt, and a mile of new road will be constructed between the Barron mine and Humboldt.

The work in the eastern end of the county will be the improvement of a portion of the road running south from Marquette, from the Dukes Siding road to Carlsend, a distance of nine miles. The work here will be similar to that to be done in the western end of the county.

Bids must be in the office of the commission in Ishpeming before 6 o'clock p. m., on Friday, the 30th. Bidders on the Dishno-Michigamme road must send a certified check for \$200; bidders on the work at Humboldt must send a check for \$50 and those bidding on the job south of Marquette must send a check for \$100. The checks will be returned to unsuccessful bidders.

Blank forms on which to make bids can be obtained at the commission's office.

KILLED BY FALLING CAP. The late John Rosewald, formerly of this city, whose death in a mine on the Mesaba range was announced in Saturday's issue of The Mining Journal, was killed instantly and fatally while they were placing a cap on timber. The posts became dislodged, falling on them. A piece of timber weighing several hundred pounds struck Rosewald. As the timber fell away dirt from the roof also came down, part of it striking the fellow. Rosewald had been employed at the Cyprus mine for several years.

EBEN JUNCTION GROWING. Charles Ringstrom and Victor Wall left Saturday for Eben Junction, on the line of the Munising, Marquette & Southeastern railway, where they will spend the next two weeks erecting a barn on their farm of eighty acres. Mr. Ringstrom has an option on eighty additional acres, which he expects to purchase this year. Eben Junction is growing rapidly. Many farmers have located nearby in the past two or three years. The township is erecting a school building on a fifteen-acre tract, purchased from the Cleveland City Iron company, that will cost, with furnishings and equipment, about \$25,000. Lee Part, a Munising contractor, is doing the work.

REBECCA SOCIAL TONIGHT. Rebecca lodge, No. 173, will give a ten-cent social this evening at 8 o'clock in the Odd Fellows' hall. The public is invited. The program will be as follows: Piano solo—Maud Treiblock. Vocal solo—Theodore Nichols. Reading—Grace Terrill. Piano and violin duet—Manila and John Freethy. Vocal solo—Minnie Cornish. Reading—Ruth Greene. Piano solo—Nina Blangren. Vocal solo—Dr. Robbison. Piano solo—Martha Grenfell.

ISHPEMING IN BRIEF. Mrs. J. Ham returned Saturday from Munising, where she visited relatives for a few days.

Ed Hassenger, a former wellknown resident, is here from Duluth, on a visit to relatives.

Mrs. J. E. Anderson and children and Mrs. Thomas Russell and son are visiting E. A. Bone and family at Gwin.

Mrs. Henry Jones, of the Lake Angelina, left Saturday night for the Mesaba range to attend the funeral of the late John Rosewald.

Births recorded in the city Saturday are a son to Mr. and Mrs. Alfred Nault, 1141 South Pine street, and a daughter to Mr. and Mrs. William Pryor, 173 Excelsior street.

The funeral of the late Edward Murray was held yesterday afternoon. Services were conducted at the house by Rev. N. C. Kerr, pastor of the First Methodist Episcopal church.

The annual business meeting of the Ishpeming Ski club will be held this evening at 8 o'clock in the club house on North Second street. Officers will be elected for the ensuing year.

church parlors this afternoon and evening. Golf and auto will be served, and many pretty and useful articles made by the young ladies will be sold.

MRS. EDWARD LOCHER DEAD. Former, Ishpeming Resident Passed Away Friday at Hibbing, Minn.

Mrs. Mary O'Connell, of the Lake Angelina location, Saturday received a telegram informing her of the death of her niece, Mrs. Edward Locher, at Hibbing, Minn. The body will be received here this morning.

PORTABLE SAW MILLS. Farmers South of Ishpeming Are to Cut Their Own Timber. A number of the Finnish farmers in the district south of Ishpeming have organized an association to purchase a portable saw mill, at which they will cut their own timber. It is known as the Temper association and Jafet Pinola is president.

S. L. Hall, of the Hall-Werline company of Escanaba, dealers in portable mills, gasoline and other machinery, has a portable saw mill on hand. It will be operated by a twelve-horsepower gasoline engine. The mill will be delivered within a week or two, and the association will then start sawing timber that the farmers cut during the winter months. Mr. Hall sold a similar outfit to Anti Kullalatti of Palmer, who will cut lumber for several of the farmers in that district. There are two other portable mills owned by farmers in the Palmer territory.

DOMESTIC ORDERS GROW. Iron and Steel Plants Will Increase Scale of Operations.

Indications are said to point to a further increase in the operating ratio of iron and steel plants during the next few weeks. Manufacturers say that domestic orders are increasing, and that there are no signs of any letup in orders for war supplies from the European belligerents.

Prices in all lines are holding well and further advances are expected. The United States Steel corporation has announced an advance of ten cents per 100 pounds on bars, plates and shapes for the second half of the year-delivery, making the quotation \$12.25. Structural steel orders are said to be good, and it is considered that pig iron has taken a turn for the better in tonnage, although prices are low.

An interesting development in the structural steel trade is the statement that material for six bridges to be put up at points along the Rhine in Germany has been ordered by the British government from the Bethlehem Steel company. This is said to be one of the largest orders in part of tonnage ever given to a steel concern. It involves many hundred thousand tons of steel and a large sum of money.

Independent steel companies are conceded to be depending a great deal upon European orders. Germany has been a purchaser from the Cleveland City Iron company, that will cost, with furnishings and equipment, about \$25,000. Lee Part, a Munising contractor, is doing the work.

CHILDREN'S GIFTS APPRECIATED. The Christmas ship contained a number of gifts from children in Champion. Several notes acknowledging their receipt have been received there, all but one of which is written in a foreign language. Last week Miss Mary E. Koskinen, who aided in collecting and delivering the gifts, received a card, written in English, from Rosine Treumel, of Neuburg, Bavaria, Germany, which read as follows:

"Dear Miss Mary Koskinen: I have to thank you very much for the beautiful things you have sent to Germany in the Christmas box. You may be assured that you have given a great pleasure to three little babies (one girl and two boys) who are mourning for a father who died on the field of battle on Dec. 14. They would have liked to write to you themselves, but they are too small. Their mother (my sister-in-law) also sends her thanks to you, and I am most obliged to you for your kindness."

"PEG O' MY HEART" TONIGHT. J. Hartley Manners' striking comedy, "Peg o' My Heart," will be the attraction at the Ishpeming theater this evening. The company comes to this city from Superior, Wis., and arrived on the early train this morning.

The cast is headed by Elsa Ryan, who many people believe to be the prettiest of the city. This time she is supported by many of the original New York cast. Theatregoers who have witnessed the delightful work of Miss Ryan will never forget the roguish tactics of the little Irish-American girl, who dearly loved two beings—her father and her dog, Michael. Reports indicate that the play has been meeting with the same success that it did last year.

PICTURES AT MATINEE TODAY. At the Ishpeming theater today vaudeville will be given only in the afternoon, commencing at 2:30 o'clock, as "The Peg O' My Heart" company will be the attraction this evening. The afternoon program is an excellent one and includes the Tolan Bros., who present a pleasing musical act. They carry 700 pounds of instruments. The pictures will include "The Sage Brush Gal," a Vitaphone three reel feature drama, and "A Leap From the Water Tank," one of the "Hazards of Helen" series. Of the latter picture the critics on the Dramatic Mirror say: "Director J. F. McGowan is main-

taining a high average in preparing thrilling incidents for "The Hazards of Helen" series, in which Helen Holmes is being featured. The title of this one gives a clue to the chief happening that shows Miss Holmes dropping from a water tower onto the top of a speeding freight car. This film is on a par with others in the series—good railroad melodrama."

CORN IN ENGLAND 2,800 YEARS AGO

Important Archaeological Discovery Made at Bournemouth by the Society of Antiquaries.

London, April 18.—Now that thousands of English women who never did so before are making their own bread, owing to the war, the highbrows of the Society of Antiquaries at Hengistbury-head, Hampshire, come forward with the singular discovery that the early inhabitants of Britain knew how to make bread and did make it as far back as the stone-age and all through the age of bronze and iron.

There is evidence that corn was grown in Britain 2,800 years before the Christian era, and in the district east of Bournemouth relics of a surprising culture 3,000 years ago have been found. Those old folk may have come across the water from Denmark, or from Norway or Sweden. On a promontory overlooking the sea they built a large fort, and back on the mainland lay their gardens. They also fished and hunted at sea with flint implements. Their artists stayed at home, later on, and made bronze urns for the ashes of the dead. They worked in gold and amber, too.

Huts of Wattle and Daub. The poorer of them dwelt in huts of wattle and daub, with floors of beaten clay. They wore baked bread and made glass into ornaments. They stored corn in sunken jars. The excavators have brought up 1,000 coins of gold, silver and bronze, apparently copied from Greek originals. Hundreds of Chinese copper coins and unused bronze arrowheads, dropped unobserved from a caravan proceeding across Central Asia more than 2,000 years ago, have been found in a perfect state of preservation by members of Sir Aurel Stein's exploring expedition. The ancient caravan probably was moving at night, to avoid attack by brigands.

Buried Under Drifting Sand. It was in the famous Lop-Nor region in the Tarim basin of the Khotan river, where everything more than 500 years old now lies buried under the drifting sand that has converted great tracts into deserts. Here and there ruined Buddhist settlements and vestiges of colonies that flourished in the oasis age have been discovered by the dry wind, which has acted as a remarkable preservative. In the pre-Mohammedan epoch that whole country was well watered and green with vegetation. Large ruined forts and towns abandoned 1,000 years ago were found by Sir Aurel and his men. The ossuaries date back to 129 B. C. Among other "finds" are silk garments finely woven, and many metal curus.

BIRTHPLACE OF JOFFRE.

A writer in the France de Bordeaux set out Sud-Ouest, who recently returned from Riverdale, the birthplace of General Joffre, publishes some interesting reminiscences told him by a younger sister of the general. The family is of Spanish descent, and the name originally was De Gouffre. Of the eleven children born to Joffre's father, an honest cooper, there are only living the general, his sister and a brother, who is a tax collector. After studying at the school of Perpignan, Joseph, then fifteen and a half years old, went to Paris to prepare himself for the Ecole Polytechnique. He entered the school at the age of seventeen, ranking fourteenth at the examination. "And do you know why only fourteen?" asks the sister. "Because the German language gave him

Responsible Methods

Our conception of Ideal Service is a service that offers to patrons every accommodation consistent with security and strength. Every transaction is subjected to careful consideration and is guided in spirit as well as in letter by the laws and ideals of responsible banking methods.

Long experience with the commercial and financial needs of Ishpeming has enabled our officers to guide this intensive service for the best interests of all patrons.

so much trouble. He has learned it since." Mathematics was his favorite study. Joffre had been barely a year at the Ecole Polytechnique when the war of 1870 broke out. As sub-lieutenant of the corps of engineers he won his first spurs during the siege of Paris. After the conclusion of peace, Joffre was entrusted with the designing of plans for fortifications, notably around Paris, and soon achieved distinction. At Versailles and Montpelier, as well as in Brittany, he constructed barracks; in China, in Africa, and wherever the French had colonies, his designs were adopted; he was rapidly promoted, and at the age of forty-nine Joffre was a general. But whenever he returns to Riverdale, to see his old father, the writer

goes on to say, Joseph Joffre shows himself the same good son, the same simple, amiable, reserved dreamer he has always been. There he finds a pleasant pastime in a game of cards with his father, his uncle and his friends. They talk Catalan, according to an old custom. On one occasion he advised his father to dig transverse trenches on his property at Bonapas, in order to allow the water to flow off and prevent the spring floods. "I know something about trenches," he said; "they are my speciality."

Now is the time to join the mid-spring term in vocal culture and piano, which commences Tuesday, April 20, Mrs. George Voelker. (4-13-15)

### PLAYGROUNDS ARE RECEIVING ATTENTION

School Board Has Force of Men at Work Putting Them in Condition for Use.

The board of education has a crew of men employed putting the school playgrounds, on Teal Lake avenue, in condition for use during the spring and summer. H. A. Smith, physical director, has divided the grounds into plots that will be used for different games.

The workmen are now employed making a baseball diamond. It is located in the northwest part of the grounds, adjoining the football gridiron. The board plans to make the ball grounds the finest in the upper peninsula. The infield will be covered with a foot of clay and the outfield will be sodded. The men employed on the job are assisted after school hours by the members of the high school athletic association.

One part of the grounds, which contains over five acres, will be set aside for tennis, handball and basketball courts. Several courts, with under dressing, will be provided. The field will be rolled with a heavy roller in order to make it level.

A race track, with under dressing, will also be built. Mr. Smith has a large squad of boys out nightly training for a track meet which will be held before the close of school. Should an upper peninsula, or county, track meet be arranged Negaunee will enter a full team.

Mr. Smith has had several years' experience with track teams and he is well pleased with the material in the Negaunee high school. Morgan Quinn and Leonard Willberg are developing into two of the best all around track men that have been turned out by an upper peninsula high school. Quinn has already made some remarkable records in jumping and Willberg, who is an all around athlete, can handle the weights like a college star. In practice records he put the shot forty feet and cleared the pole in a vault of over nine feet. He is also a distance runner. A school meet between the boys of the four high school classes will be put on within the next three weeks.

The board will within a few days place an order for a complete playground equipment. It will be used during the summer months and Mr. Smith, who has been engaged for the entire year, will give special physical culture instructions every day.

#### SAND LOT CHAMPIONS.

The Negaunee Juniors is the name of the latest baseball team organized here. It is composed of boys about sixteen years of age and Frank Hogan is the captain. The team practices every afternoon in the vacant lot near the Independent Lumber & Coal company's office and some good players are being developed. It is expected that games with other junior nines in the county will be arranged. The first game was played yesterday afternoon at the Park street team. The team line up as follows: Arthur Field, third base; Ray Cox, short stop; Leonard Hill, first base; Jim Bennett, second base; Frank Hogan, catcher; Ed Abu, pitcher; Gerald Vizina, center field; Albert Johnson, left field and Arthur Vizina, right field.

#### LOCAL LAONICS.

Captain J. H. Rough spent Saturday on business at Michigamme. A basketball team composed of William Collins, Mark Shomon, Duncan Simm, Everett Doyle and Jonas Fredrickson went to Champion Saturday

evening and played a contest with the Champion city team.

William Goyen of Gwinn, visited here yesterday with friends.

Victor Bicknell left Saturday for Detroit, where he has secured a position.

Mr. and Mrs. Frank Winter are here from Iron River on a visit with relatives.

Duncan Best is here from Calumet on a few days' visit with relatives and friends.

Mrs. J. E. O'Donoghue and son, Edward, visited with Marquette friends Saturday.

Mrs. Kenneth Pellow is spending a few days visiting with her parents at Escanaba.

Mrs. John J. Hauserman visited yesterday with relatives and friends at Marquette.

J. H. Sawbridge & Son have an attractive window display of wall papers and paints.

Joe Flynn has returned to Escanaba, after spending a few days here visiting with friends.

John B. Perenchio has returned from a few days' business visit at Gwinn and Princeton.

John Moffat attended the production of "Potash & Perlmutter" at Marquette Saturday evening.

Mrs. Thomas Connors, A. F. Willman and Vainey visited Saturday with friends at Marquette.

Mrs. M. L. Smith returned home Saturday from Gwinn, where she conducted a millinery opening.

Thomas Pellow arrived home Saturday morning from Detroit, where he spent several days on business.

Mrs. C. F. Moll, of Keweenaw, spent the past few days here visiting with her mother, Mrs. H. N. Mackenzie.

Mrs. Younger has returned to her home at Sault, after an extended visit here with Miles Doyle and family.

Mrs. Gannar Hull, of Gwinn, spent the weekend visiting with Negaunee and Ishpeming relatives and friends.

An enjoyable dancing party was given Friday evening in the high school gymnasium by the boys and girls' glee clubs.

Mrs. William Miller, who spent the past few weeks here visiting with relatives, has returned to her home at Green Bay, Wis.

Word has been received that Charles E. Jewell, son of Captain Samuel Jewell, is at present confined to a hospital at Bisbee, Arizona.

Mrs. H. Troyer and son, James, who have been the guests for a month of her parents, Mr. and Mrs. Paul Beaudet, have returned to their home at Chicago.

Captain and Mrs. Richard Trezona, who were the guests of Negaunee relatives and friends for the past several days, have returned to their home at Evelett, Minn.

Charles Sporely, Jr., and Paul Bell, who spent a week here visiting with their folks, departed yesterday for Ann Arbor, to resume their studies at the University of Michigan.

At a recent meeting of the Old Fellows a committee was appointed to take charge of the arrangements for a joint meeting with the Rebekah society next Saturday evening. A program will be given and refreshments will be served.

David Bluver was arrested Saturday upon complaint of T. M. Wells, county sealer of weights and measures, for selling apples with a short bushel measure. He was arraigned before Judge William Verlan and paid a fine and costs which amounted to \$26.50.

"The Vampire" is the title of the sixth episode of "The Exploits of Elaine," which will be shown tonight at the Star theatre. "Broncho Billy and the False Note," an Essanay western drama with G. M. Anderson in the leading role, will also be shown. Other pictures on the program will be "The New Editor" and "They Looked Alike," Lubin comedies, and "The Girl He Brought Home," a Biograph drama.

The city officials will today place a force of men and teams at work cleaning up the alleys and streets. The property owners are asked to co-operate with the city by cleaning up their premises and putting the garbage in the alleys so that the teams can remove it without unnecessary trouble. If the yards are cleaned this week all at the same time that the alleys are being cleaned.

Rev. Wm. B. Coombe left for a sojourn at Escanaba Springs, Mich., last Thursday evening. Some four weeks ago he contracted a severe cold and it seemed to grow worse as time passed. It is hoped that he will find much benefit from the treatment there. His pulpit will be supplied every Sunday, next Sunday by Mr. F. J. Baldwin, of Escanaba, editor of the Escanaba Journal, and a week later by Rev. J. H. Outney, of Houghton. Crystal Falls, Diamond, Drill.

## PRISONERS OF HABIT

America is the most extravagant country on the globe. It is filled with men who make big salaries and spend them. What do they profit? They accustom themselves to luxury, shackle themselves in the chains of extravagance. And with appalling regularity they spend old age in want.

An account with this bank begets economy. Economy insures independence. Begin today. It is easier to forego a luxury now than to lack a necessity later.

#### EARN A FORTUNE AS A RAGTIME COMPOSER.

Ragtime may be on the decline, but the statement that Irving Berlin, the young Russian Jew who wrote "Alexander's Ragtime Band," "Everybody's Doing It," "I Want to Be in Dixie," "That Mysterious Hag" and a dozen other ragtimes which have haunted people on both sides of the Atlantic, has earned as much as \$125,000 a year in royalties from his songs calls attention to the amazing success of this young composer.

As a youth Irving Berlin served in the dual role of waiter and entertainer in a small cafe in Chinatown, New York. He had been taught to sing by his father, and, having a natural aptitude for music and a gift of mimicry, quickly established himself as a popular favorite in Chinatown, where he would sing twenty to thirty songs a night.

Possessing the knack of parrying popular songs, he quickly gained a local reputation; but his real chance came when after Longboat, the Indian runner, had defeated that wonderful Italian, Donatello, he wrote some verses telling how an Italian porter had bet his shop on his countryman and lost. He thought so well of his effort that he tried to sell it to a vaudeville actor, but without success. Finally he submitted it to a music publisher in the hope of selling it as a song lyric.

"Why don't you write the music for it yourself?" asked the publisher, for whom, as a partner, Berlin subsequently made a fortune. "If you do, I will buy the song."

Irving Berlin wrote the song, and not long afterwards the former waiter of the Chinatown cafe was telling his chauffeur where to drive him in his \$5,000 motor car.

Perhaps the most extraordinary fact about Berlin is that he knows practically nothing of the technique of music. He can play only chords on the piano—Tit-Bits.

# LONDO CHANGES PLEA TO GUILTY

### After All Testimony Had Been Taken Saturday, Mackinac County Man Surprised District Court by Acknowledging That He Had Violated the Mann Act.

### Court Today Probably Will Take Up the Case Against Tony Denardi of Ishpeming—Motion Saturday to Quash Indictment Overruled by Judge Messers.

After the testimony of the witnesses for the prosecution had been heard, Clarence Londo, of Rexton, Mackinac county, terminated the case against him in the United States district court late Saturday afternoon by changing his plea to guilty. Londo was charged with a violation of the Mann "white slave" act. The testimony of the girl, Ida Clare, of Garnet, Mich., the girl's mother, a keeper of a hotel in Green Bay and other persons whom the couple came in contact with during the period of their association left little room for doubt that Londo was guilty. It was shown that Londo induced the girl to leave her home on the pretense that her father intended sending her to a reform school. They went to Escanaba, thence to Green Bay, Wis., and then to Duck Creek, Wis., where Londo was arrested. Previously they were married in Menominee, Mich. The testimony indicated that the environment of the girl's home was not of the best, and that she left home at the first suggestion.

Londo was formerly an inmate of the Marquette prison. He was released there several years ago.

"It's either good luck this time or I'll be back in the Marquette prison," the girl testified Londo had told her as they were driving from Garnet to Rexton.

While she is only fourteen years of age, Miss Clare has the appearance of a girl of eighteen or twenty years. She was a good witness, and willingly told the court of her relations with Londo from the time they left her home until he was placed under arrest a few days later.

It is probable that the court will today take up the case of Tony Denardi, of Ishpeming, charged with having written threatening letters through the United States mails. Charles Button, of this city, who represents the defendant, Saturday entered a motion to quash the indictment, but it was overruled by Judge Messers after the arguments of counsel had been heard.

### CLEANING PUSHED VIGOROUSLY.

Department of Public Works Will Make the City Spotless.

The general cleaning of the city streets is to be pushed vigorously this week. The force that has been employed in the downtown district will be doubled, and every street will receive attention.

It is the aim of the department of public works not only to have the streets but the entire city clean. The street department will dispose of all raking from yards, provided the grass plot outside of each yard is put in proper order. Ashes and like refuse will not be taken, and must not be put into the street.

The material to be hauled should be placed in the street in advance of the cleaning. It will not be taken later. That part of the city bounded by Washington, Fisher and Seventh streets will be cleaned first.

### GETS LIFE TERM.

Omar Leatherman, of Detroit, Will Be Brought to Marquette Prison.

Omar Leatherman, a negro, of Detroit, convicted of killing his wife, is to serve a life sentence in the Marquette prison. A Detroit paper says:

"It required less than ten minutes for a jury in Judge Phelan's court this noon

to convict Omar Leatherman, negro, of slaying his wife in a St. Antoine street restaurant, March 15. Both were employed in the place and Leatherman killed the woman with a cleaver. Judge Phelan sentenced him at once to life imprisonment in Marquette.

"In extenuation of the slaying, Leatherman claimed that his wife had been running around with other men. I have seen a lot of mean men," said Judge Phelan in passing sentence, "but the most contemptible is the man who snatches his wife's name while she is lying moldering in her grave."

### WILL OPEN WEDNESDAY.

Fixtures for Richards' Store in Elks' Building Have Been Received.

A. O. Richards will open his store in the Elks' building Wednesday morning. The fixtures have been received and are being installed. A window display of sporting goods, of which a full line will be carried in stock, has attracted considerable attention the last few days. Wall paper and all manner of decorating material will be a part of the store's stock. Sign painting and similar work will be done in a work room at the rear. The interior of the store has been decorated and presents a pleasing appearance.

# COAST GUARD STATION RESUMES FOR SEASON

### Captain Cleary's Men Are Now on Duty—First Freighter Was Sighted Saturday.

The Marquette coast guard station, in charge of Captain Henry Cleary, has been opened for the 1915 season of navigation since April 10, and the members of the crew have now settled down to their duties in earnest. The crew, with one exception, is the same as a year ago. Dan Shelson, No. 1 man last year, has been promoted and is now in charge of the station at Crisp point. His place is taken by Thomas Deegan, of this city.

Captain Cleary Saturday sighted the first like freighter to pass here this season. It was seen on toward Granite rock and was, it is believed, headed for Duluth.

Following are the men who compose the Marquette crew this year: Captain Henry Cleary, Thomas Deegan, Fred Perry, Fred Liedka, Louis Cours, Norman Mattson, Charles Cleary, John Fagan and Charles Johnson.

# Theatrical

### Marquette Opera House.

The Mariotte troupe of five people, in a cycle and monologue novelty act, will appear at the Marquette Opera House the first three days of the week. Tonight's pictures will be "The Call of the Waves," a two-act Gold Seal drama featuring Grace Cunard and Francis Ford, and "The Fat Girl's Romance," a Crystal comedy. Tomorrow there will be shown the Patrie weekly.

Wednesday the theater will show the first installment of "The Black Box," the Universal company's mystery story. There are to be fifteen installments, each of two reels, issued once a week. The play is the creation of E. Phillips Oppenheim.

### Delft Program.

"The Escape on the East Freight," a thrilling "Hazard of Helen" story, and the Hearst-Selig News pictorial will feature today's program at the Delft theater. There also will be shown "Burglarious Billy," a comedy with Billy Quirk. Tomorrow the Delft will offer "Tyrone Power in the society drama, 'Aristocracy,' a Famous Players' special feature.

Dull lifeless eyes, colorless lips, sallow yellow cheeks give a girl little chance for a "man" these days. Don't lose heart, just take Hollister's Rocky Mountain Tea—helps to make you attractive and fair. Don't delay, begin today. Jones Drug Store.

Let Conklin fix your watch.

# ORE DOCKS MAKING READY FOR SEASON

### First Boat Expected Latter Part of Week—Vessels Chartered at Last Year's Rate.

The office of the South Shore ore dock was opened Saturday and the dock is now being put in readiness for the loading of vessels. The first vessel is expected here from Sault Ste. Marie the latter part of the week. Navigation at the Amerigo Soo was opened Saturday afternoon. The vessels in the Steel Trust fleet, many of which load in Marquette, will clear for the first time on the 23rd, a week earlier than a year ago.

The steamers Lakeport and McKeo, which have arrived at the Soo, are now on their way to Duluth.

Some chartering has been done, and last year's rate has been fixed for a block of ore to be removed from the head of the lakes. The amount of ore that has been covered by freight contracts is not large, but a start has been made, and the general opinion is that the 1914 rates will generally prevail. The spread between the Lake Superior and Escanaba rates is too great, the vesselmen say, and they assert that small carriers cannot make any money at the rate that was paid from the latter port last season.

The ore market is quiet and it is not expected that there will be much change during the next two weeks.

Some more chartering for the season will be done in the coal trade, but the bulk of the coal that will be sent forward in 1915 has been covered. The early movement will be slow, and aside from small carriers, little tonnage will be wanted during April.

### BOWLING NOTES.

High Scores and Averages in League Games at Elks' Alleys.

### "POTASH & PERLMUTTER."

Popular Comedy Was Well Received at Marquette Opera House.

The partnership joys and sorrows of "Abe" Potash and "Mawruss" Perlmutter were unfolded before two good-sized audiences at the Marquette Opera House Saturday. They were well pleased and sympathetic audiences, too, and were unstinting in their approval of the excellent cast that appeared in the much talked of "Potash & Perlmutter." Lew Welch and Jules Jordan presented adequate portraits of the parts of "Mawruss" and "Abe," and were well supported by a strong company in which Miss Jane Fernley, as Emma Goldman, the designer is a particularly valuable member. The production was one of the most pleasing that has visited the Marquette house in months.

The Paris Fashion show this morning announces the receipt of a new shipment of women's and misses' spring suits.

A Big Line of Everything for Men and Boys to Wear

### WHEN SUN DRAWS WATER.

When the sun is to the east or west of us on a cloudy or hazy day, beams are often seen, radiating from it toward the horizon; then many people say the sun is "drawing water." They actually believe that the lines of light and shadow appearing to converge in the sun are great shafts of water and vapor that the sun is drawing up into the air to be precipitated later on the earth as rain or snow. These shafts, as a matter of fact are generally indicative of coming rainy weather, but they cannot be counted on as infallible signs.

The idea that the sun is "drawing water," however, is entirely erroneous, for the lines seen are the result of the passage of light through openings in clouds already formed. The lines that appear dark are shadows of clouds, while the light lines or rays from the sun are made visible in the air by the presence therein of dust or watery vapor, just as the dust in the air of a room makes visible the light that enters it through small apertures. Although as an effect of perspective the shadows and bars of light appear to converge in the sun, they are really parallel. Usually the condition of the atmosphere which makes it possible for the beams and shadows to be seen is indicative of the active condensation of moisture, so that when the sun "draws water" rain may be expected with some degree of certainty, although like all local signs it is far from infallible.

Sometimes when the sun is below the horizon a phenomenon, almost the same, is observed—a group of beams spreading fanlike upward from the sun, in lines of blue alternating with lines of pink—in the western sky in the evening and in the eastern sky in the morning.—The Pathfinder.

### HAVE COURAGE.

If there is one thing more than another that will cause discouragement it is indigestion, but you should bear in mind that hundreds have been cured, and at a very small expense. Mrs. E. Forster, Lima, Ohio, writes: "I was troubled for a year or more with indigestion. Chamberlain's Tablets afforded the first real relief I obtained, and by taking two bottles of them my whole system was put into a healthy condition." For sale by All Dealers.

### A LECTURE ON CHRISTIAN SCIENCE

By Bicknell-Young, C. S. B.

Member of the Board of Lectureship of the Mother Church, the First Church of Christ, Scientist, in Boston, Mass.

It takes a great deal of instruction to convince the average human being that the word "God" does not mean something remote or inaccessible. Now we can think certain ideas which reveal God. We have seen that here. These ideas reveal power because God and power are one. They are God with us, and therefore power with us. On the other hand, we can think of our bodies, and as a matter of fact we think of them a great deal too much. Nevertheless, as long as that is our tendency, it might not be difficult for us to recognize that the true thought of what God is may affect our bodies, since some kind of thought is doing something to our bodies all the time. We walk because of mind; and talk and think, and think our city, because of mind, and do everything else we are doing because of mind, and we do absolutely nothing because of matter, for matter cannot think nor talk nor walk by itself when thought is absent.

### Influence on Thought.

To recognize the nature and action of thought is educational. To arouse or awaken a human being to the necessity for correct thinking and the power to attain it as a habit, is the object of all true religious and philosophical endeavor. For this reason it is universally recognized that the thought of good moral results it is necessary that moral teaching should be carried on, and in accordance with this necessity people are taught to guard themselves against evil thoughts, whether audible or silent. Is there not the same necessity to guard against the thought of disease? What must then be the conclusion as to the present effort made through the press and elsewhere to instill the belief of disease into children, and others, by means of processes that are called educational?

If it were not obvious that such efforts are basically wrong the results of the last ten years prove them to be so. The advocates of such systems themselves admit that the diseases, which such so-called education was aimed to mitigate or destroy, have increased enormously in that decade, and any one who has observed carefully the increase of thought in human history should have no difficulty in perceiving that such results would necessarily follow such a wrong system; for, if one is to learn about disease and the constantly shifting theories which characterize medical science in order to guard himself against disease, if one is to be forced to build up in his own thought images of disease and germs and microbes and bacilli through the use of charts and experiments in the laboratory and other means in order to be healthy, why would it not be as necessary to familiarize the young, and others, with all the vices and sins that characterize depravity, in order that they may thereby gain in virtue and morality?

If it be true, as experience has proved beyond any doubt, that moral education and high ideals tend to improve character, why is it not equally true that the inculcation of true ideas as to the origin, cause and law of being tends to improve health, and that contrary teaching tends to produce disease?

Notwithstanding the somewhat common notion that Christian Scientists oppose sanitation and hygiene, the fact is that they are enthusiastic believers in, and advocates of, both. Scrupulous cleanliness in everything is a rule among those who practice Christian Science. They require not only personal cleanliness, but clean air, clean food, clean houses, and that everything be clean with which they may be associated or surrounded. And when all this is done, Christian Scientists are still unsatisfied, for Christian Science shows that little has been accomplished in the nature of true hygiene, and very little that is worthy of the name of sanitation, until the human mind itself is cleansed out and kept clean.

Jesus stated this fact more strongly than any one else could, and Christian Science practice has proved conclusively that to the extent that the human mind is emptied of fear, malice, envy, hatred, revenge, evil thinking, evil speaking, and all the beliefs of vice and sin and disease, just to that extent is a true sanitary system being established. And furthermore, Christian Science has proved in innumerable instances that when such a system of hygiene, purely mental, is established, all of the world's hygienic requirements are more than fulfilled, and just in that proportion also is the law of health unmistakably and permanently established, both individually and collectively.

The human body never gets ill because of any inherent capacity to do so. To put it exactly as it is, the human body does not know enough to suffer. Deprived of mind it never suffers. In Science and Health and her other works Mrs. Eddy has most clearly set forth the fact that it is the human or mortal sense of things that suffers. The mortal mind, so-called, is the sufferer, and she has enabled thousands of people through her books to prove that immortal Mind heals. The objection made to this is often to the effect that you cannot have thought

### Castle Brew

IT'S GREAT!

Positively No Better BEER made

Nothing But the Best brewing material, together with the purest spring water, is used in its manufacture.

Try a case, in quarts or pints

## U.P. Brewing Co.

### NOVEL SOURCE OF WEALTH.

The Duke of Sermoneta, who is acting as president of the committees formed in Rome to promote the independence of Poland, ranks among the greatest landowners in Italy. Fogliano, his estate near the Pontine marshes, extending to 80,000 acres, mainly under grass, for the duke owns vast herds of cattle. The most productive part of the estate, however, is a lake several miles long and about a mile in breadth, which from the time of the Roman empire has supplied fish for a market in Rome. Whenever there is a flood caused by rain on the hills, the lake overflows through a narrow channel into the sea. The sea fish find their way into the lake, remain to fatten in the fresh water, and then are captured on their return by an ingenious lady, ruth constructed of reeds, into which they swim. They are of the best kind—chiefly gray mullet.

Any one wanting good clay for use in making bricks may have the same for 75 cents a single load, delivered. John Downey, 349 Genesee street, Phone 397-W. (4-15-14)

Can repair any watch, no matter how complicated. Satisfaction guaranteed, at Conklin's. (2-26-1m-ood)
