

GERMANS RECAPTURE FRESNOY

RETAKE TOWN AFTER 5 DAYS OF FIGHTING

British Withdrawal, However, Is Not Forced Until Teutons Have Paid Terrible Price for Possession.

MADE MANY ATTACKS (BULLETIN) LONDON, May 8, 10:20 p. m.—The Germans, today, in the neighborhood of Fresnoy, succeeded, after heavy counter-attacks, in gaining a foothold in the British trenches northeast of the village. Later, however, the British in a counter-attack, regained the lost ground.

FRENCH BEAT BACK TEUTONS. (From a Staff Correspondent of the Associated Press.) Headquarters of the French army in France, May 8. (Afternoon.)—The Germans, today, desperately stormed the positions captured by the French to the south of Berry-au-Bac, but they made no impression. What was left of the strong attacking wings was forced to retire, leaving behind many dead and 129 prisoners in the hands of the French.

MANY PRISONERS TAKEN. The prisoners captured by the French between the sixteenth and twentieth of April, with the German divisions to which they belong, numbered 2,383 of the Ninth Bavarian reserve; 2,319 of the Twenty-First division, 1,929 of the Fifth, and 1,374 of the Forty-Third. These were all taken by one French army.

LEFT WING GIVES WAY. Reforming later, and reinforced by two fresh divisions, the Germans again made a bid for victory along the entire front before the village and wood. The right wing of the defenders held steadfastly and inflicted heavy losses on the Germans, but the left wing, notwithstanding its stubborn resistance, was compelled to give ground and evacuate the village and wood, leaving them in the hands of the Germans.

INTENSIVE ARTILLERY DUEL. (By a Staff Correspondent of the Associated Press.) British headquarters in France, May 8, via London, 11:15 p. m.—The liaison statement in this morning's British official communication, that "enemy artillery is firing in the direction of the British front line," is a general offensive.

(Continued on Page 8 Column 2)

MIDDLE-WEST IS STILL HOST OF FRENCH MISSION Reach Columbus, Ohio, and Are Entertained by City and State Officials

With French war mission, May 8.—On a speedy journey from Southern Illinois, through Indiana and Ohio, members of France's war mission today were given a hearty welcome at Terre Haute, Indianapolis, Richmond, Urbana, Ohio, and Columbus, Ohio.

CITY GAYLY DECORATED. Regular army troops, national guardsmen and student cadets from Ohio State University acted as an escort. The city was gayly decorated.

THINK 'SUB-KILLER' HAS BEEN INVENTED Navy Department Officials Highly Optimistic Over Plans Under Discussion. Washington, May 8.—Hope is brightening that American inventive genius has found the road that may lead to freedom of the seas from German submarines.

ARE ON THE RIGHT ROAD. "They believe they are on the right road," Mr. Daniels said. "They believe they are going to turn out something that is worth while."

KAISER SAYS HIS TROOPS ARE DOING WONDERFUL THINGS London, May 8, 8:27 p. m.—A dispatch to Reuter's Telegram company, from Amsterdam gives the reply of Emperor Wilhelm to recent congratulations sent him by the Sultan of Turkey, on the bravery of the German troops.

HOUSE PASSES BILL TO INCREASE THE NAVY'S STRENGTH Washington, May 8.—The bill to increase the war strength of the navy to 150,000 men and the marine corps to 30,000 was passed today in the house.

WAR REVENUE BILL APPROVED IN COMMITTEE

House Ways and Means Body Passes Measure Designed to Raise \$1,800,000,000 by Taxation This Year.

MANY CHANGES PLANNED Washington, May 8.—A war revenue bill designed to raise \$1,800,000,000 by taxation during the coming year, was approved finally in the house ways and means committee late today by a unanimous vote.

INCREASE TARIFF DUTIES. To bring the amount to be raised up to the desired total, the house committee, at today's session, wrote into the bill, a flat increase of 10 per cent on all existing tariff duties and 10 per cent duties on all articles now admitted free, all estimated to bring in \$214,000,000, this more than doubling the present tariff revenues.

SUBSTANTIAL DECREASE IN SUB SINKINGS TO BE SHOWN IN REPORT London, May 8, 6:20 p. m.—A substantial decrease in the number of sinkings by submarines in the last week will be shown in the forthcoming weekly report of shipping losses.

NO "MEATLESS" DAYS FOR THE BRITISH ISLES Food Controller Says This Would Throw Entire Burden On Grain Stocks

London, May 8, 6:19 p. m.—Great Britain's "meatless days" is to be abolished because it augments the demand on breadstuffs and other substitutes, which are less critical than meat.

CAN WAIT UNTIL HARVEST. "Provided that the call for a reduction is responded to and the efforts of the submarines are not successful beyond reasonable likelihood we shall get through with a merely satisfactory balance in hand to the time when the new harvest becomes available."

ROOSEVELT CALLS ON AMERICANS TO 'RALLY TO THE FLAG' New York, May 8.—An appeal for patriotic service and devotion to the nation in its hour of need, made tonight by Col. Theodore Roosevelt, before the King's County Republican committee, in Brooklyn, evoked great enthusiasm.

CONGRESS FAILS TO AGREE ON EXPORT EMBARGO SECTION Washington, May 8.—Four hours of debate behind closed doors today failed to change the senate's opinion of how the export embargo section of the administration's espionage bill should be taken, and an adjournment was taken with the provision, still in the broad terms, adopted last night, understood to be satisfactory to the administration branch of the government.

BALFOUR SEES ONLY VICTORY OVER GERMANS

British Foreign Secretary, in a Speech to Senate, Declares English-Speaking People Will Fight for Ideals

Washington, May 8.—Foreign Secretary Balfour declared, in an epochal address in the senate chamber today, that the war conferences here had cemented an allegiance of the great democracies destined to crush the greatest world menace of all times and to save civilization and liberty.

WILL DEFEAT TEUTONS. "It requires every man and woman on this side of the Atlantic as on the other side, to throw their efforts into the scale of right, but that effort unquestionably will be made. I speak with confidence about the issue of this struggle—a confidence which is redoubled since you have thrown in your lot."

ARE NOT AFRAID TO FIGHT. "Because we are unarmy," he continued. "They jumped rashly to the conclusion, firstly, that we were afraid to fight, and second, if we fought we should be negligible quantities. I think they are beginning possibly to find out their mistake."

SAY AMERICAN SHIPS CARRIED FOOD TO U-BOATS

U. S. Officials Probe Charge That Trans-Atlantic Boats Helped Germans

Washington, May 8.—Persistent rumors of German submarines in the south Atlantic were given additional color today when it was disclosed that the government investigating agencies are running down a story that freighters of the American Trans-Atlantic Company, flying the American flag, have carried food and supplies to the war U-boats.

T. R.'S ARMY STILL BONE OF CONTENTION Conferences Fail to Bring About Agreement on War Army Measure. Washington, May 8.—Two more conferences today on the war army bill, failed to bring senate and house committees together and adjournment was taken tonight with the prospects of an agreement still doubtful.

RAILROADS STILL FIGHT TO SECURE INCREASED RATES Washington, May 8.—Executives of southern railroads told the interstate commerce commission today that a general increase in freight rates is absolutely necessary if the systems are to meet "an endless chain of advancing cost, both of labor and material."

SMALL WHEAT CROP FOR 1917 IS PREDICTED

Forecast Compiled by the Department of Agriculture Shows Winter Yield of Only 366,000,000 Bushels.

IS LOWEST IN YEARS Washington, May 8.—Official wheat crop estimates, announced today, show that with the world facing a bread shortage the United States, unless it cuts its present consumption, probably will produce only enough wheat this year to supply its own population.

WHEAT CROP LOWEST EVER. The country's greatest spring wheat crop was 352,000,000 bushels, produced in 1915. The five year average from 1910 to 1914 is 234,000,000. The estimated production this year of 366,000,000 of winter wheat falls 116,000,000 of winter wheat falls 11,000,000 short of last year's poor crop and 308,000,000 below that of 1915, a bumper crop. It is 129,000,000 bushels less than the average for the preceding five years.

MUCH WHEAT TO EUROPE. Since the war started America has exported to Europe vast quantities of wheat, reaching a high mark of 332,000,000 bushels in 1915. Last year the total fell to 243,000,000 bushels. Before the war it ran slightly less than 100,000,000 bushels.

JOHN C. VOGLE, OF RED JACKET, KILLED IN THEATER FIRE Calumet, Mich., May 8.—(Special.)—John C. Vogle, owner and manager of the Crown theater, Red Jacket, lost his life last evening in a fire which destroyed the theater. A general conflagration of the business section was threatened, but four fire departments responded and their work prevented further serious destruction.

THE WEATHER WEDNESDAY, MAY 9. Marquette and vicinity: Fair and warmer. Upper Peninsula: Fair Wednesday and probably Thursday; rising temperature.

Table with columns for location (Boston, Buffalo, New York, etc.) and temperature (7 a.m., Noon, 7 p.m., Highest, Lowest).

Liberty Loan advertisement for Marquette National Bank, stating the bank has made a subscription to the forthcoming Government War Bonds and is in position to secure for its patrons whatever amount of this issue they may wish to buy as an investment.

Entered as mail matter of the second class in the postoffice at Marquette, Mich

WEDNESDAY, MAY 9, 1917.

TONIGHT'S MEETING.

The meeting of the Patriotic league this evening will differ from previous similar meetings here in the fact that there will be nothing in the size of the hall to limit the attendance.

NEGLECTANCE IS CRIMINAL.

There is a possibility that it will not become necessary for us to send troops to the trenches of Europe.

WILL PROTECT THE MEN.

Announcement is made in connection with the plans for the new army that a determined effort will be made to prevent the men assembled in the training camps from becoming the prey of booze and women, particularly women.

will call for long hours of application at study, as well as the severe exercises in the field that will be the lot of the men in the ranks.

Editorial Opinion

Sherman on Conscription.

The dangers of disingenuous quotation are neatly illustrated in a case of a pacifist paper which has cited some carefully culled passages from General Sherman's memoirs complimentary to the quality of the volunteers in the civil war, and quoted as proving the general's opposition to conscription.

Owing to the high cost of newspaper living, the Chicago Herald will sell for two cents in territory where it has been selling for one cent.

Samuel Gompers, head of the American Federation of Labor, pleads with the Russian workers against any slackening in Russia's part in the war.

Thoughtful American sentiment will support President Wilson's determination to override the recommendations of the general staff and send a small contingent of troops to take their place beside our allies on the Franco-Belgian firing line.

Send Our Flag to France.

Thoughtful American sentiment will support President Wilson's determination to override the recommendations of the general staff and send a small contingent of troops to take their place beside our allies on the Franco-Belgian firing line.

State Press

Hindenburg line—Siegfried line—Wotan line—broad line—Muskegon Chronicle.

Many young men, recently married, are now sitting in the draft.—Flint Journal.

The farmer this season can best show his patriotism by planting crops which will bring him more money than ever before.—Escanaba Press.

The evidence of foreign nations that an American army would do well in France is well-founded, and subject of proof.—Battle Creek Enquirer.

Don't worry about the political effects of permitting T. R. to go to Europe—they might keep him over there to be president of Russia.—Pontiac Press.

The efficiency of a volunteer system of raising an army is proved by the greater number of men who volunteer to let George do it.—Jackson Citizen Press.

Timely Quips

Promises. The Kaiser promised the Germans Paris before the war. In 1917 he promises them a change in the Prussian election system after the war.—Louisville Courier-Journal.

Hurray! The Copenhagen correspondent who predicts peace by July 1 prophesies by indirection a tremendous, old-fashioned, whooping July 4.—New York World.

Dig! France needs wheat. If the American farmer will look after the production, General Goethals will look after the delivery.—Washington Star.

Food. Food is as important as shells. The last hundred million bushels of wheat, or its equivalent of other staples, will be a big factor in bringing a triumphant end to the war.—Chicago Journal.

True. German efficiency is a wonderful thing, but it cannot do the impossible. Berlin is beginning to realize this with deep distress and anxiety.—Kansas City Journal.

A Laugh Or Two

You Can't Beat the Printer. There is a story in connection with a certain paper which tells how it referred to two learned gentlemen as "bibulous old flies" instead of "bibilophiles".

Wrong Course. "Germany is rushing straight to ruin. She is going the limit in wrong-doing. It's like the typesetter."

"A typesetter once said to me in my father's printing office in my boyhood: 'Will, how do you spell "graphic"?'—with one "f" or two?"

Copper Country

BEGIN RECRUITING OF M. C. M. BATTALION

Great Drive for Engineer Volunteers Is Opened by Alumni Association.

The recruiting for the Michigan College of Mines battalion of engineers for the United States army will be in full force by the end of this week.

The alumni association is mailing a circular letter to all the alumni of the college with a request that they enlist if possible or at least interest one recruit for each alumnus.

The question of officers gives no concern. All that remain to be named are the second lieutenants and there are two or three candidates for each commission.

The battalion requires only 130 men and thirty of these already have expressed their intention to go into the ranks.

Recruiting Company G. The enlistment of twelve recruits at Greenland Monday night brought the number of Lieut. Lamb's recruits for Company G up to thirty-six.

The war was brought a little closer to the South range Monday night by a recruiting meeting in the Foresters hall at Atlantic.

City Brevities

Fred Tate, of the Soo, was a business
 visitor in the city yesterday.

Troop No. 1, Boy Scouts, will meet to-
 night in the armory at 7:30 o'clock.

Edward T. Green left last night for
 Duluth, where he will resume his duties
 as chauffeur for W. W. Walker.

The Senior Branch of the confirmation
 class of St. Paul's church will meet to-
 night at 7:30 o'clock in the chapel.

Born, yesterday afternoon at 3 o'clock,
 to Mr. and Mrs. L. E. Garvin, 401 East
 Ridge street, a daughter, Mary Emma.

Mrs. Thomas Kone has returned from
 a visit to Fisher, Minn., where she has
 been visiting with friends for several
 weeks.

There will be a dance at Bureau's hall
 next Saturday night, to be given by
 the "Patriotic Six." Mrs. Weedman's
 orchestra will furnish the music.

A "Hard Time" dancing party will be
 held tonight in Keough's hall by the W.
 B. A. of the Macabees. A "one-cent"
 booth will furnish refreshments.

Mrs. Herman Cuthbert and young son,
 of Newark, New Jersey, and Mrs. B. C.
 Neely, of Crystal Falls, are spending a
 few days in the city visiting with rela-
 tives.

There will be a regular meeting of
 the Presque Isle chapter No. 403, O. E.
 S. in the chapter rooms tomorrow night
 at 7 o'clock. There will be initiation and
 other business.

A special meeting of the Pythian Siste-
 rs will be held in Pythian temple this
 evening at 7:30 for the purpose of mak-
 ing arrangements to go to Munising. Of-
 ficers and members are requested to be
 present.

E. C. Watson left yesterday to deliver
 two Packard cars; one to E. M. Leiblin,
 of Hancock, and the other to Peter
 Rippe, of Calumet. J. Vivian, of Calu-
 met, has also ordered a Packard from
 Mr. Watson.

Chester Hoatson, of Calumet, and
 Douglas Buchanan, of Houghton, were
 in the city yesterday being examined
 for admission to the officers' training
 camp, which opens at Fort Sheridan,
 Ill., May 8. The young men were among
 about thirty others, from this city and
 surrounding points, who took the ex-
 amination.

Senior-Junior Rush—The high school
 Senior-Junior annual "rush" will be held
 tomorrow afternoon on Longyear field,
 beginning at about 4:30 o'clock. It is
 an event which is usually looked for-
 ward to with great excitement by all
 the students of the school, as it decides
 the physical superiority of the two
 upper classes.

Joins Canadian Artillery—Walter
 Webster, son of George J. Webster of
 this city, who left Marquette a short
 time to join the Canadian aviation ser-
 vice, writes friends in the city that he
 has been rejected from this service on
 account of over-weight, but that he is
 now with C Battery, Royal Canadian
 Horse artillery, at Kingston, Ontario.

Aged Resident Passes—William Dollar,
 aged sixty-four, a resident of this city
 for the past fifty-four years, died last
 night about 8 o'clock, following a linger-
 ing illness. Mr. Dollar was well known
 throughout the county. He is survived
 by his widow and three children, Ernest,
 aged seventeen, and Rose, aged twelve,
 and Mrs. Orrin Racine, of Gwin, Three
 Brothers, Frank, of Munising, Steve and
 John, both residents of this city, also
 survive. Funeral arrangements will be
 announced later.

Elks' Party Friday—The last of the
 winter series of Elks' parties will be
 given in the Elks' hall next Friday
 night, and a number of attractive fea-
 tures are being planned for the event.
 Mrs. Weedman's orchestra will furnish
 music and refreshments will be served
 during intermission in Doncker's new
 ice-cream parlor, which formally opens
 today. Invitations were issued yester-
 day, and the committee wishes it un-
 derstood that should any who usually at-
 tend these affairs fail to receive invita-
 tions they are cordially invited.

Street Cleaning Resumed—City En-
 gineer Wright has resumed his street-
 cleaning program and now has a force
 of men working on Spring street. The
 crew has finished the district between
 Ridge and Washington, with the inter-
 secting streets, including the Nestor ad-
 dition. The men are now starting on
 the section from Washington to Fisher,
 and the intersecting streets. Residents
 living within the district on which the
 men are working are notified that all
 yard raking, if placed in the gutters,
 will be taken away by the city. No
 ashes must be included in the raking,
 however.

Theatrical

Delft Theater.
 "Betty to the Rescue" will be seen
 again at the Delft today.

The scenes in this picture are a repro-
 duction of Miss Ward's own home and
 some of her own actions at her own
 home. Miss Ward takes particular in-
 terest in these kind of pictures which
 show her in a costume which uses in her
 own work around her own house.

Miss Ward appears in one costume
 that is made up of the skins of a great
 number of moles that were killed on her
 estate in England when the gardener
 started to get rid of what he called a
 pest.

The Opera House.
 William Desmond and Margery Wil-
 son, in "The Last of the Ingrams," a
 Triangle feature, will be shown tonight.
 "The Last of the Ingrams" is said to
 offer William Desmond the greatest op-
 portunities for varied characterization
 that he has yet had. The story is an
 appealing one and deals with two tem-
 per-tossed souls who fought their bat-

THE TIMBER ROMANCE.

The nation was agitated ten years or
 so ago by the spectre of the lumber
 lords gobbling up all the timber lands
 of America, robbing the people of na-
 ture's inheritance and making it pos-
 sible to extract a tribute from posterity
 that would be terrible. Earnest gentle-
 men, among them Mr. Pinchot, Mr.
 Heney and others, spoke loudly and
 wrote at length on the burning subject.
 Mr. Ballinger, secretary in President
 Taft's cabinet, was disgraced or nearly
 disgraced by the fact that he was friend-
 ly to the timber interests. Mr. Taft
 himself got into trouble for being too
 eager to shield his cabinet minister.

It is odd how some things which
 frighten us greatly and which become
 matters of grave concern settle them-
 selves without surgical operations.

Nobody has heard of Mr. Pinchot or
 Mr. Heney raising their voices recently
 to alarm the natives regarding the
 predatory purposes of the lumber lords.
 Instead, if a person's hearing is acute,
 he may have heard the cries and the
 moans of the gentlemen who own large
 stretches of timber land.

It probably is true that what Mr.
 Pinchot and Mr. Heney warned Amer-
 ica against was real at that particular
 time, but there are evolutions and con-
 volutions in business and in customs
 that make the best laid plans of mice
 and men go astray.

The men who saw colossal fortunes
 through control of the timber lands did
 not suppose the timber land would
 change suddenly from an asset to a
 liability.

The ever increasing use of concrete
 and steel in constructive work in this
 country put the lumber business in a
 bad way. In the last ten years only
 two have been prosperous ones for lum-
 ber men. The per capita consumption
 of lumber has decreased decidedly and
 probably will continue to decline. The
 great prospect of revival in lumber to-
 day is centered around wooden ships and
 the foreign trade.

The men who in their rapacity gob-
 bled up vast stretches of timber land

and triumphed over hearts as hard
 as the rock bound coast of their native
 New England. It concerns the regenera-
 tion of a young ne'er-do-well through
 his meeting with the village Magada-
 lone and of his conquest of the narrow-
 minded bigots who strive to drive the
 two from their altar of sacrifice.

Her Graduation!

Never mind if you are a bit perplexed about what to give for a graduation token—when you enter our store gift perplexities go out.

Even as she labors over her last month's studies, the thought of it is uppermost in the mind of every sweet girl graduate! Of course it must be demure!

In the splendid lot of one-of-a-kind dresses we have so carefully chosen, every dream of "just the frock" may be delightfully realized.

There are models for every type—and in each model is that joyful expression of youthful charm—desired above all else.

One frock that emphasizes smart simplicity to a high degree is of sheer fancy net with ban leaf embroidered net on the bodice. Skirt has long tulle with two embroidered bands and three double ruffles, long sleeves and new cuff effect. A very striking gown, Price... **\$17.50**

Another very dainty frock is of fine white net, trimmed with washable satin ribbon. Bodice is made with flounce over the shoulder. Sleeves are three flounces satin ribbon trim. Skirt has pointed ribbon trimmed tulle, has wide satin **\$12.50** girdle. Price

There are many others to choose from at **\$8.50 to \$18.50**

"Exceptional" Crape de Chine and Satin Underwear, a very exceptional collection of these dainty undergarments includes Camisoles at 50c and \$1.00, Envelope Chemises at \$3.00 and \$3.50, Petticoats at \$4.00 and \$6.50, white or flesh tinted; splendid values.

Doctor That

A Free Prescription
 Elliot and
 Boston, Mass.—and other eye who wear glasses that Doctors and agree there is no them. Many who say they have had and many who have their own eyes, after they have thrown away their glasses, could not see any more. I can see my glasses, hurt any more. I am dreadfully nearsighted. I was a lady who used to wear glasses and she needed no glasses, but after she had worn them for fifteen years, she said, "I can see now, I can see now, I can see now." I was told that she had been caused by overuse of the eyes. I induced her to wear glasses for several weeks and she could not read a newspaper or a machine before it and have discolored glasses along with her. I have looked like a street now, and I have looked like a street now, and I have looked like a street now. I cannot see it has done for me. It is believed that wear glasses can be a reasonable time and will be able to see so as to be spared the expense of ever getting them. Dr. Beck, an eye specialist, came to me with a diagnosis of my eyes. He said that my eyes were in a state of inflammation and that I must wear glasses. I have worn glasses for several years and I have never had any trouble since. I have been able to see clearly and I have been able to do my work. I have been able to see clearly and I have been able to do my work. I have been able to see clearly and I have been able to do my work.

THE WOODEN SHIPS.

There is basis for doubting the virtue of building 1,000 wooden ships. These craft will not be able when the war ends and freight rates get back to a normal basis to compete with steel ships. It is a duty, however, now that the shipping board, in its wisdom, has committed the nation to such construction, to support the plan in earnest and give to it the fullest support so that the nation may get from it the largest measure of benefit.

As an emergency measure it has considerable worth. Wooden ships can be built quickly if ship carpenters in sufficient number can be found. The fabricating of 1,000 engines entails a great amount of labor. Standardization, however, simplifies the task to a degree and lessens cost. We shall have a tremendous call for ship timber. The lumber industry should know prosperity it has not enjoyed for many years. The ever widening use of steel and concrete in general construction lines has tended to restrict the lumber trade of recent years.

Along the Atlantic, the gulf and the Pacific coasts old and new shipyards should throw with new life. But if the building of wooden ships is to be anything more than an expedient it must be backed up by the commercial interests of the whole country. It will be of temporary profit only to have these ships if they are not utilized to develop new channels of commerce, channels that will be kept open when the war ends. The trade of Latin America should be in the hands of America, Brazil, Argentina, Chile, Paraguay, Uruguay, Central America must be united with America by ties that bind. Those ties are the ties of finance and of commerce.

We have been so busy supplying Europe and filling our domestic orders since the war began that we have not given to Latin America the attention that wonderful field warrants. If ever we are to grasp the opportunity the time is near.

The wooden ships may open wide the door to South America. It is for American financiers, American manufacturers, American merchants to keep the door open and not let it close with the close-

ing of the war. Then we must have steel ships. The wooden ships will be cheap if they bring to us this rich prize, but not if they serve only to bridge a gap for Europe while Europe's trade lines are in disorder.—Financial America.

THE WOMEN OF BELGIUM.

"I shall never think of Belgium," writes Charlotte Kellogg, "without seeing endless processions of silent men and black-shouldered women, pitchers in hand, waiting, waiting for the day's pint of soup. One and one-quarter million make a long procession. If you have imagined it in the sunshine, think of it in the rain!"

This paragraph is from "Women of Belgium; Turning Tragedy to Triumph" (Funk & Wagnalls company), the book evolved by Mrs. Kellogg from eight months' of service in the afflicted little kingdom and now published in this country for the sole benefit of the Belgium Relief commission. "It is a thick soup that is served to the waiting line—thick and full of calories." Writes Mrs. Kellogg: "To make it for Central Brussels the slaughter house has been converted into a mighty kitchen in charge of a famous pre-war maitre d'hotel. Ninety-five cooks and assistants from the best restaurants of the capital have been transferred from the making of patés and soufflés to the daily preparation of 25,000 quarts of soup! And they use the ingenuity born of long experience to secure an appetizing variety while strictly following the orders of directing physicians.

"They had been doing this over 700 days when I visited the kitchen, but there was still a fresh eagerness to produce something savory and different. And one must remember that the chances can come only from shifting the emphasis from our dried American pease to beans, from carrots to cabbages, from macaroni to rice."

In Liege it is a popular big skating rink that has been turned into a centre of relief.

Mrs. Kellogg tells of the work of the commission, of the courage of Belgian women and of the universal devotion to King Albert and Queen Elizabeth.

Upper Peninsula

Escanaba Man Appointed.

H. J. Rushton, of Escanaba, has been named by Governor Sleeper as a member of the navy recruiting committee for the state of Michigan, to work under the direction of the state war preparedness board. Mr. Rushton received word of his appointment from Major Vandereok, secretary of the war preparedness board. The letter to Mr. Rushton advises him that Major Daniel W. Smith, of Detroit, is chairman of the committee.

Injured at Lumber Camp.

Emil Bjorksen, an employe of a lumber camp a few miles east of Rapid River, was badly injured while assisting in the loading of logs on a flat car, one of the logs getting away from the hoist and rolling down two big stakes used as an incline. The log struck Bjorksen and nearly rolled over him before it was stopped. The injured man was attended by a physician who said that he found no broken bones, but that the man was badly bruised. Bjorksen was afterward cared for by his employer.

Garbage Collection Plans.

The Escanaba council adopted a formal ordinance providing for the appointment of a city garbage master and making it compulsory for the people of the city to pay the garbage master stated sums for the removal of refuse. The ordinance requires every householder to provide a garbage can of suitable size for his needs. The schedule of charges to be made by the garbage master for the removing of refuse follows: Up to ten gallons ten cents a week; twenty gallons fifteen cents a week; thirty gallons twenty cents a week and forty gallons twenty-five cents a week. For refusal to comply with the provisions of the ordinance the penalty fixed is a fine of not less than \$5 nor more than \$25, or imprisonment for not to exceed thirty days.

"Grow Potatoes"—McCormick.

The vital need for the growth of potatoes in the upper peninsula was expressed by C. W. McCormick, of Menominee, member of the Michigan Food Preparedness board, in a message to C. R. Hutchison, secretary of the Delta county committee. The increase in average of potatoes in the lower peninsula will be large, according to Mr. McCormick. And in the corn belt it is now past potato time. Thus, he said, farmers need not fear low prices on potatoes next fall. He advised the planting of a little spring wheat, also. More seed is needed to plant the potatoes and Mr. Hutchison is preparing to aid the farmers in this respect. Already he has had orders for more than a carload. More than 150 farmers have visited the office in the past three days, but all reports are not in yet, it was announced by Mr. Hutchison.

Bounty Swindler Arrested.

Another attempt to defraud an upper peninsula county by offering for the bounties wolf pelts shipped into the state from Canada was brought to light by the arrest at Iron Mountain of Forest M. Bell by Deputy Game Warden Andrews, of Dickinson county, and Deputy Game Warden Leisner of Delta county. Bell was arrested following an attempt to secure \$250 in bounties on ten wolf pelts in Iron Mountain by presenting them to the county board of supervisors for payment, claiming that he killed the wolves near Floodwood. Something about the man's actions aroused the suspicion of Deputy Warden Andrews and he started an investigation of the story told by Bell, who at first gave his name as H. A. MacManus and said that he came from Alberta in the lower peninsula. Bell claimed he had trapped the wolves two miles east of Floodwood. Deputy Andrews called on Deputy Herman Leisner, of Escanaba, to assist him and they went to Floodwood to investigate. Finding no trace of his shack of traps, Deputy Andrews instructed County Clerk Herbert Asp, of Dickinson county, who is a deputy sheriff, to bring Bell to Floodwood and he complied. Upon his arrival at Floodwood he was closely

questioned by the deputy game wardens. When he found that he had been trapped completely he let loose with part of the story relative to his attempted big steal. He gave his name as H. A. MacManus and said he had obtained the pelts in Minnesota and had them shipped to Iron Mountain. Later he made a clean breast of the whole affair. He confessed that he had bought the ten wolf pelts at Saskatchewan, Canada, and that he had paid seven dollars apiece for them. He said he had them shipped from Canada to Detroit and then to Iron Mountain. Deputies Andrews and Leisner arrested Bell on the charge of attempting to obtain money under a false pretense. Deputies Andrews and Leisner will make a further investigation to ascertain whether or not any others are engaged in the business of bringing wolf pelts from outside this state for the purpose of collecting the bounties.

Escanaba Grocer Bankrupt.

Forced into bankruptcy through leniency with customers, Charles LeFebvre, well-known grocer, at 320 Stephenson avenue, Escanaba, turned over the possession of his store to the National Grocery concern, which held a chattel mortgage on the property. Attorney John L. Loell is now preparing a petition in bankruptcy for Mr. LeFebvre which will be filed in a few days. "The present conditions, if continued, may force us on a strictly cash basis in the event of which all credit will absolutely be abolished," said a prominent Escanaba merchant. "Owing to the prevailing high prices which require more money than usual to transact business, we have to request credit customers to pay their accounts in full at least once a month."

Mayor Riley's Appointments.

Mayor T. J. Riley announced his appointments for the various city offices, the entire list being unanimously confirmed by the aldermen. The appointees are: H. R. Dotsch, city attorney; Walter J. Hudson, city engineer; Miss Valerka Eecka, city stenographer; Otto Nyquist, street commissioner; Dr. A. J. Carlson, health commissioner; B. J. Mackilligan, member of the board of public works; J. A. Allo, member of park commissioners; Dr. W. J. Firkus, city veterinarian; W. J. Hudson, C. G. Sween and A. H. Robb, special assessors; Walter Johnson, garbage master and city scavenger. Members of the police department: John J. Tolan, chief; Knute Larson, captain; Joseph Corney and Edward Brunelle, sergeants; Elmer Swanson, motorcycle policeman; Domin-

Seeks Retrial of Case.

Arguments for a new trial in the suit brought by Miss Frank Gray Shaver against the Baroness Van Pallandt Van Erde, in which a jury awarded the plaintiff judgment in the sum of \$13,500 at the November term of court, has been made in Menominee circuit court, F. J. Trudell, with John McFale, of Iron River, represented the baroness. George Power, who was the titled woman's lawyer at the last trial, is said to have withdrawn from the case. Sawyer & Sawyer, representing Miss Shaver, opposed the motion for a new trial. "Although the baroness and her friend, Miss Daisy Andrews, arrived Saturday from New York, and Miss Shaver has been in the city for several days, not any of the women were present in the court. Two more cases in which Mae Van Pallandt Van Erde is defendant and Miss Shaver, plaintiff, are listed for this term of court."

Forger Held in Delta.

James Smith, who successfully cashed three forged checks in Gladstone and Rapid River, totalling \$142.80, and made his getaway, is in custody in the Delta county jail after three months' liberty. Smith was arrested at Green Bay. The work of Smith, who assumed the role of a woodsman, was fast while it lasted. January 25 he appeared in the place of business of Soren Johnson in Gladstone, presented a check for \$47.40, signed with the name Swan Anderson, a timber operator near Trenary, and was given the money. Then he went to the place of Frank Lewis, presented a check for the same amount, and was paid. At the saloon of Alpha Cole, in Rapid River, he had cashed a check for \$48 before he went to Gladstone. All were signed with the name Swan Anderson. At the saloon of Louis Tardiff in Gladstone he presented the fourth check for about the same amount, but was turned down. Smith then hired an automobile to take him to Escanaba. Later he left that city and went to Green Bay. Postal cards were mailed to all sheriffs and chiefs of police in the northwest by Chief of Police Danielson, of Gladstone, and Sheriff Jeerson and it was through one of these

postal cards that Smith was picked up in Green Bay. He was held there and the Escanaba authorities notified. It is said that Smith has confessed to the job and will enter a plea of guilty.

RANCH FOR UNCLE SAM.

C. C. Slaughter and associates, who own a large ranch situated just west of Lubbock, Tex., have made a formal tender to the government through President Wilson of the use of 5,000 acres of the best tillable land. In his letter to the president, Mr. Slaughter says the acreage may be selected by the government without cost for the raising of food and feed stuff, continuing, he says:

"We do not want to adopt the attitude of dictating how the land shall be used, because we offer it without reservation. However, it is our idea that the government can enlist men from the congested centers and send them and their families out to God's out-of-doors, where they may live a healthier and more fruitful life than anywhere else. "The land is the best for agricultural

purposes in the state. Good farms are situated all around it. In fact, we are putting about 2,500 acres into cultivation this year. It has no trees, large rocks, creeks or other obstructions to tilling.

"If every landowner in the country would offer the same percentage of their property for the government's unrestricted use as we have, Uncle Sam would have more ground to till than a million men could take care of. "Of course, it is a little late now, but if the machinery was put in motion at once, crops could be raised this season. The government has established experimental farms—why not practical farms for the actual production of paying quantities of feed and food?"

TROUBLE ENTIRELY DISAPPEARED "Knut Lee, Wannaska, Minn., writes: "For several years my daughter had a bad chronic cough. Not until we tried Foley's Honey and Tar did anything produce any great relief. In a few days the trouble entirely disappeared and has never returned." Contains no opiates; a safe, reliable, remedy; children like it. Sold Everywhere.—Adv.

"GET THE HABIT" THAT WILL NEVER "GET YOU"

Some habits are dangerous things to cultivate for they are pretty sure to "stick to you."

But this

SAVINGS HABIT

When once cultivated will lift you toward higher and better things and the tighter it sticks the better it is for you and your family.

"The Bank That Service Built."

Doctors and Eye Specialists Agree That Bon-Opto Strengthens Eyesight 50% In a Week's Time In Many Instances

A Free Prescription You Can Have Filled and Use at Home.

Boston, Mass.—Victims of eye strain and other eye weaknesses, and those who wear glasses, will be glad to know that Doctors and Eye Specialists now agree there is real hope and help for them. Many whose eyes were failing say they have had their eyes restored and many who once wore glasses say they have thrown them away. One man says, after using it: "I was almost blind. Could not see to read at all. Now I can read everything without my glasses, and my eyes do not hurt any more. At night they would pain dreadfully. Now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything was clear. I can read even fine print without glasses." Another who used it says: "I was bothered with eye strain caused by overworked, tired eyes which induced fierce headaches. I have worn glasses for several years, both for distance and work, and without them I could not read my own name on an envelope or the typewriting on the machine before me. I can do both now, and have discarded my long distance glasses altogether. I can count the fluttering leaves on the trees across the street now, which for several years have looked like a dim green blur to me. I cannot express my joy at what it has done for me."

It is believed that thousands who wear glasses can now discard them in a reasonable time, and millions more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. Dr. Beck, an eye specialist of nearly twenty years practice, says: "A patient came to me who was suffering from Blepharitis Marginalis with all the concomitant symptoms, as morning agglutination of the lids, chronic con-

junctionitis and ephiphora. Her eyes, when not congested had the dull, suffused expression common to such cases. Having run out of her medicine a friend suggested Bon-Opto. She used this treatment and not only overcame her distressing condition, but strange and amazing as it may seem, so strengthened her eyesight that she was able to dispense with her distance glasses and her headache and neuralgia left her. In this instance I should say her eyesight was improved 100%. I have since verified the efficacy of this treatment in a number of cases and have seen the eyesight improve from 25 to 75 per cent in a remarkably short time. I can say it works more quickly than any other remedy I have prescribed for the eyes."

Dr. Smith, an oculist of wide experience, says: "I have treated in private practice a number of serious ophthalmic diseases with Bon-Opto and am able to report ultimate recovery in both acute and chronic cases. Mr. B. came to my office suffering with an infected eye. The condition was so serious that the operating treatment I prescribed Bon-Opto and in 24 hours secretion had lessened, inflammatory symptoms began to subside, and in seven days the eye was cured and retained its normal vision. Another case of extreme convergent strabismus (cross eyes) escaped the surgeon's knife by the timely use of your collyrium. The tightened external muscles yielded to the soothing and anodyne effects of Bon-Opto. I always instill Bon-Opto after removal of foreign bodies and apply it locally to all burns, ulcers and spots on the eyeball of the lids for its therapeutic effect. By cleansing the lids of secretions and acting as a tonic for the eyeball itself the vision is rendered more acute, hence the number of cases of discarded glasses."

Dr. Conner says: "My eyes were in bad condition owing to the severe strain arising from protracted microscopic research work. Bon-Opto used according to directions rendered a surprising service. I found my eyes remarkably strengthened, so much so I have put aside my glasses without discomfort. Several of my colleagues have also used it and we are agreed as to its results. In a few days, under my observation, the eyes of an astigmatic case were so improved that glasses have been discarded by the patient."

Eye troubles of many descriptions may be wonderfully benefited by the use of Bon-Opto and if you want to strengthen your eyes, go to any drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in a fourth of a glass of water and let it dissolve. With this liquid bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly. If redness, itching, inflammation and redness will quickly disappear. If your eyes bother you even a little it is your duty to take steps to save them now before it is too late. Many people are blind might have saved their sight if they had cared for their eyes in time.

Note: A city physician to whom the above article was submitted, said: "Yes, Bon-Opto is a remarkable eye remedy. Its constituent ingredients are well known to eminent eye specialists and widely prescribed by them. I have used it very successfully in my own practice on patients whose eyes were strained through work or night glasses. I can highly recommend it in case of weak, watery, itching, smarting, itching, burning eyes, red lids, blurred vision or for eyes inflamed from exposure to smokes, sun, dust or wind. It is one of the very few preparations I feel should be kept on hand for regular use in almost every family." Bon-Opto is not a patent medicine or secret remedy. It is an official preparation, the formula being printed on the package. The manufacturers guarantee it to strengthen eyesight 50 per cent in one week's time in many instances, or refund the money. It is dispensed by all good druggists in this city, including STAFFORD DRUG CO., Marquette.

 If our Merchandise does not give you your money's worth, we cheerfully refund your money.

SKUD'S
The Store That Does Things

PRINCESS PLANTS POTATOES.
 Princess Mary has taken up a plot of ground in the gardens of Windsor castle, where the English royal family is now living, which she is personally digging and preparing for potatoes.
 The latest restrictions adopted for the royal table are five potatoless days and one meatless day each week.
 More than two years ago the king and queen banished alcoholic drinks from the table. All members of the royal family, royal household and the royal servants are governed by the same rules. No royal guest is supplied with alcohol.

Ishpeming Department

ANNUAL CLEAN UP.
 Dr. G. G. Barnett, the Health Officer, Issues Notices to Residents.

Within the next day or two, Dr. G. G. Barnett, the health officer, will distribute notices urging house occupants and owners of property to clean up their premises. The health officer will make his first inspections on the 15th. His notice is as follows:
 "All tenants, householders and owners of property within the city limits are hereby notified to clean up and make presentable their grounds, yards and alleyways for inspection by the health officer not later than May 15, 1917. In the process of cleaning their premises people are expected to consume all combustible rubbish and refuse when conditions are favorable or to convey or have conveyed all such to the city incinerator. All ashes should be carefully separated from garbage to facilitate the proper burning."
 "When once cleaned all properties and alleys adjoining must be kept free from all rubbish, refuse and filth of every description at all times. Filth breeds flies and flies spread disease. Frequent inspections will be made to see that these instructions are complied with.
 "If not cleaned up by May 15, 1917, and kept clean, the penalty made and provided by the city ordinance will be enforced."

**ISHPEMING BOYS
 ALREADY IN NAVY**
**Four Young Men, Recently En-
 listed, Did Not Spend Much
 Time in Training.**

Four Ishpeming young men who recently enlisted are now serving in the navy. They are John Albert Sangala, 307 East Pearl street; Richard R. Velenzio, 310 West Division street; John Siivo, 332 West Johnston street, and Thomas J. Paul, Jr., 605 South Pine street. All four spent but a short time in the training camp.

Frederick R. Carne, 401 East North street, of this city, John R. Liberty and Robert Charles Miller, of Marquette, who were examined Monday, were found physically qualified.

Of the six applicants sent to Milwaukee Monday by the local recruiting office, five were accepted. This is an exceptionally high percentage. It is, in fact, the highest percentage of applicants that had been accepted from this section since the recruiting work was started.

Clarence G. Sturdy, of Menominee, Albert J. Godin, of Escanaba, and Douglas J. Johnson, of Princeton, have been accepted by the local recruiting officer and have been sent to Milwaukee for further examination.

Bonnavin Mate C. W. Mozley, of the navy, who arrived here a few days ago to assist Frederick Thoms, will be stationed at the postoffice in Marquette today, to receive applicants for the navy. Mr. Thoms, who is in charge of the recruiting station, has gone to Menominee to examine recruits.

MURPHY ENTERTAINED.

C. M. Murphy, who left the city last night for Coeuraine, Minn., to take the position of master mechanic for the Oliver Iron Mining company in that district, was tendered a farewell banquet by his associates of the Oliver club last evening, before his departure. Some seventy-five employees of the company were present. Mr. Murphy, who has been with the company here for the past twenty-three years, has many friends in Ishpeming. Very few of his associates at the mine knew of his intended departure until they read of it in yesterday's issue of The Mining Journal.

ISHPEMING IN BRIEF.

A son was born yesterday to M. and Mrs. Thomas Collins, North Third street.

Tomorrow night will be ladies night at the Ishpeming S.K. club. Dancing will start at 8 o'clock.

Mr. and Mrs. Antti Tuulila, of Neganuee, are the parents of a daughter, born in Dr. Henry Holm's hospital.

The members of the Schubert chorus are asked to attend the patriotic meeting tomorrow evening in the Butler theater.

Stanley Williams, who has been teaching school at Bruce's Crossing, has resigned to accept a position as teacher at Iron River.

George Mennie, who spent the past few weeks here visiting his son, John S. Mennie, and Mrs. Mennie, left yesterday for his home in Bessener.

Simon Fosberg, who came down from the Mesaba range to attend the funeral of his father, the late Charles Fosberg, left yesterday for his home on the Mesaba range.

The employees of the Oliver Iron Mining company will be paid for the last half of April as follows: Next Saturday, the 12th, Lake Superior mines; Monday, 14th, Queen mine; Tuesday, 15th, Stegmiller property.

Mr. and Mrs. Julien Payen arrived in the city yesterday, after an absence of several months in California in the service of W. G. Mather, president of the Cleveland-Cliffs Iron company, of whose Ishpeming cottage they have charge.

Miss Margaret Harrington, stenographer for the Gately-Wiggins company, who was a patient in the Ishpeming hospital, where she submitted to an operation for appendicitis, is able to be around again. It will be a week or more before she will be able to resume her position.

HOW'S THIS?

We offer one hundred dollars reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.
 We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

NATIONAL BANK OF COMMERCIAL.
 Toledo, O.
 Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75 cents per bottle. Sold by all druggists.
 Take Hall's Family Pills for constipation.—Adv.

COMMITTEE AT WORK.
 Patriotic Parade Will be Feature of Fourth of July Celebration.

The committee that is to have charge of the Fourth of July celebration met yesterday afternoon at the city hall. It was decided to have two parades, one in the morning, which will be in the form of a pageant, and one in the evening. The latter will be a patriotic demonstration.

A teacher from each school will be named to help plan the morning parade and to organize the children. The merchants will not be urged to put in floats as in former celebrations.

There will be no fire works in the evening, but there will be a program of sports and other entertainment features in the afternoon.

CARD OF THANKS.

We wish to express our appreciation of the many favors and the sympathy extended to us during the illness and after the death of our daughter and sister. We feel under deep obligations to members of Grace Episcopal church choir and to friends for floral offerings.

S. K. HOLM
 and Family.

THE SUPPLY OF CUTLERY.

Before the war cutlery was an item on which the average retail dealer was sure to be overstocked. Not always, it is true, of his own free will but usually because the goods were wished on him by the superior guise of some salesman. In other words cutlery was always sold, never bought, and the dealer always had more than he needed.

With the coming of the war the very heavy importations from Germany ceased entirely, and those from England have fallen to very small proportions. Meanwhile, the American manufacturers have not been able to increase their capacity sufficiently to meet the heavy demand which they alone must now satisfy.

Moreover, in some lines there are certain items, made entirely abroad, that cannot be had at all. Also certain parts such as genuine stag handles for cutters are scarce and difficult to obtain. The material, deer's horns, comes almost entirely from India, and its receipt is uncertain and it takes forever and a day to get it. So only a limited supply can be had and imitations are many.—New York Times.

Ishpeming Theater Tonight
"FORBIDDEN FRUIT"
 A vivid and absorbing photoplay, with PAULA SHAY and EVERETT BUTTERFIELD, supported by a splendid cast
 First show at 7 o'clock, new time—5c and 10c.

TOMORROW and FRIDAY, matinees both days, MARY PICKFORD, the nation's favorite, in the second of her own great productions, "THE PRIDE OF THE CLAN." Little Mary as the Scotch lassie will charm you.

THE HAYLES in dancing and drum novelty act.

Matinee at 2:30, new time, 10c and 20c. Evening, two shows, 10c and 25c.

NOTE: Fifth episode of "THE SECRET KINGDOM" will be shown Friday night at the Butler theater in connection with "HIS FATHER'S SON," featuring LIONEL BARRYMORE, Metro wonderplay.

ISHPEMING THEATER, SATURDAY—Final episode of "THE LASS OF THE LUMBERLANDS." Full of surprises and sensations.

BUTLER THEATER, SATURDAY—"FATTY" ARBUCKLE, the famous comedian, in his first Paramount comedy, "THE BUTCHER BOY," 2,000 feet of laughs.

BASEBALL

Detroit, May 8.—Stanley Coveleskie held Detroit to three hits today and Cleveland won, 5 to 2. The visitors bunched hits in the last two innings to overcome a one-run lead and were aided by two errors in the ninth. Wambaus was the batting star, getting a triple and three singles in four times at bat. A heavy shower just before the first game closed, made it impossible to play the second part of the scheduled double-header.

Score: R. H. E.
 Cleveland010000022—5 10 1
 Detroit010001000—2 3 2
Batteries: Coveleskie and O'Neil, Billings; Dauss and Stange.

Chicago, 4-9; St. Louis, 3-7.

St. Louis, May 8.—St. Louis outfit Chicago today, but inability to hit when runs were most needed, poor base-running and fielding lost both games for them. The scores were 4 to 3 and 9 to 7.

Score: R. H. E.
 Chicago012000010—4 5 2
 St. Louis000001200—3 13 3
Batteries: Scott, Cicotte, Danforth and Schalk; Davenport, Sothoron, Park, Hamilton, Plank and Severid and Hale.
Second game: R. H. E.
 Chicago000131202—9 10 1
 St. Louis032000110—7 11 5
Batteries: Williams, Benz, Russell and Schalk; Sothoron, Koob and Severid and Hale.

New York, 4; Philadelphia, 2.

Philadelphia, May 8.—Busch was ineffective in the first two innings in today's game and New York got a lead that Philadelphia could not overcome, the final score being 4 to 2.

Score: R. H. E.
 New York210000010—4 6 0
 Philadelphia011000000—2 9 3
Batteries: Cullip and Nunamaker; Busch, Meyers and Schang.

National League.

Boston, 2; Brooklyn, 1.

Boston, May 8.—Two singles, followed by a double, scored the run that won for Boston, 2 to 1. Tyler was hit safely only four times. A triple and a single scored the Brooklyn run in the second.

Score: R. H. E.
 Brooklyn010000000—1 4 1
 Boston000000101—2 6 1
Batteries: Pfeiffer and Myers; Tyler and Gowdy.

New York, 5; Philadelphia, 1.

New York, May 8.—New York won the last game of the series from Philadelphia today, 5 to 1. Rixey was hit hard by New York in the second and third innings.

Score: R. H. E.
 Philadelphia100000000—1 5 1
 New York032000000—5 12 0
Batteries: Rixey, Mayer, Fittery and Killifer; Anderson and Reardon.

NEW TIN COMPOUND.

Prof. Harper F. Zoller read a paper before the American Chemical society at its Kansas City meeting on a new body which he discovered in tin-plated containers in which alcoholic acid had been packed. He was able to produce apparently the same body with ease by bringing tin and carbolic acid together under certain conditions. Analysis showed it to consist of tin (stannic) oxide and organic matter of the aromatic series. At first it seemed possible, inasmuch as the tin was found with oxygen in the combination and it did not have this in the metallic state, that it had reduced the carbolic acid to benzene by taking its oxygen away, but further examination disproves this theory. Further work also shows that it is not any one of several things that it would appear to be to the chemist at first glance. Professor Zoller is still at work on it, and he is not likely to stop until he gets the riddle solved.

"You may expect almost anything from tin," says Ellwood Hendrik. "It is about the most irregular of all the elements. If elements were people and complaint were made as to the chemical behavior of tin, it would take all the leaders of the Kansas City bar to defend it, and even then they would have to hustle. Tin is tricky, as every chemist knows."—New York Journal of Commerce.

COAL UNDER STREAMS.

It has been known for some time that large quantities of anthracite coal existed in the beds of certain rivers running through the anthracite regions of Pennsylvania, the coal having been washed down years ago. In the Susquehanna river, the Schuylkill and the Lehigh, these deposits are exceedingly heavy, being found in greatest quantities in pockets along the river beds. During the last few years companies, independent of owners and operators of coal mines, have been at work digging out this coal by means of dredges, selling it afterward direct to the consumer. The coal is said to be of excellent quality, in fact, much of it is superior to that obtained direct from the mines. The cost of dredging averages about twelve cents a ton and the prices to consumers have been as low as \$1.35.

He had proposed and been rejected. "Very well," he said coldly, "there will come a time when your treatment of me will be regretted."
"I shall never regret it," she replied. "Oh, I don't mean you," he returned. "I refer to the man whom you will finally accept."—New York Times.

RECAPTURE FRESNOY

(Continued From Page One.)

lery, was active at intervals throughout the night at a number of places along the battle front, particularly in the sector between Fresnoy and Loos, and "that our artillery replied," dismisses, in coldly official language, one of the most marvelous spectacles of the night firing the world has ever seen.

It was a night made for terror. Great angry clouds scudded across the sky, successfully masking all attempts of the full May moon to break through the cloudy barrage. Eventually the heavens opened and poured forth a torrent of rain upon the hot cannon and the flames tagging along the blood-red line of battle.

A thunder-storm, in its greatest fury, could have broken above this appalling artillery duel, however, and been completely swallowed up—its electric flashes lost in the blinding concussion of the guns. Its thunder peals drowned in the reverberating waves of sound which came from hellowing cannon and bursting shells with most equal violence. Nature withstood the terrific bombardment until nearly dawn, then the rain, failing to bring it to an end, a heavy fog shut down and put a stop to the clangorous uproar as suddenly as if some word of supreme command had been shouted above the din of battle.

There were a few parting shots through the enveloping mist from either side and then absolute silence for the day.

ALL ALIEN ENEMIES WILL BE PLACED IN DETENTION CAMPS

Washington, May 8.—Arrangements for placing of all interned alien enemies in permanent detention camps where they will be well housed and given work at fair wages have been completed by Secretary Wilson, of the labor department. The first camp will be established on a 500 acre tract of agricultural land in the mountains of North Carolina and the 1,800 officers and sailors taken from German merchant vessels in American harbors will be the first aliens to go there.

Secretary Wilson expects the necessity will soon arise for the establishment of additional camps.

The first detachment of German sailors will go to the North Carolina camp this week.

GENERAL OREGON'S RESIGNATION ACCEPTED

Mexico City, May 8.—General Oregon's resignation as secretary of war, was accepted by President Carranza tonight. General Oregon's resignation was caused by ill-health.

U. S. STEEL COMPANY TO SUBSCRIBE TO WAR LOAN

New York, May 8.—The United States Steel corporation will subscribe \$25,000,000 to the Liberty Loan, the largest single subscription yet announced.

In small gardens do not attempt to grow sweet corn, cucumbers, egg plant, cauliflower or melons, as these take up too much room. Forego also planting such "fancy" kinds as brussel sprouts, artichoke, etc. Stick to root crops largely—kinds that will fill the vegetable bins next fall.—Wisconsin Horticulture.

EQUIPPING A DIVISION.

Compiled from data not hitherto published, the National Geographic society has issued from its headquarters the following bulletin on the units and equipment of an infantry division of the United States army as reorganized, in the light of the lessons learned during the thirty-one months of warfare in Europe. As reorganized for the war with Germany, an infantry division of the United States army will number 65 per cent more men than a division of the German army as now constituted. The enemy's divisions are made up of 17,000 men and 4,000 horses; the new United States division, at maximum strength, will be composed of 28,235 men, 6,834 horses and 4,875 mules.

The average layman has little conception of the various units which go to make up an infantry division or the enormous cost of its equipment. According to estimates made two years ago, the cost of fully equipping a division amounts to \$7,636,250, but since that time the cost of materials has advanced so greatly that a conservative estimate requires the addition of 20 per cent to this amount, making the total in excess of \$9,000,000. And this takes no consideration of the immense saving effected by the council of national defense in providing for the purchase by the government of munitions and equipment at a profit to the manufacturers not to exceed 10 per cent, which is far less than the profits ordinarily realized on materials sold in the world markets.

The new United States army divisions will be composed of the following units: Three infantry brigades, 18,579 officers and men; one field artillery brigade, 4,630 officers and men; one regiment of cavalry, 1,579 officers and men, 1,541 horses; one regiment of engineers, 1,098 officers and men; one field signal battalion, 239 officers and men; one aero squadron, 173 officers and men, twelve airplanes. Total, 25,871 officers and men. Total with wagon trains, 28,235 officers and men, or total with motor trains 28,334 officers and men.

The number of commissioned officers in a division is 817, with ninety additional officers for the wagon trains; ninety-two if the division is organized with motor trains.

The medical department of a division is composed of 125 officers, 1,232 enlisted men and forty-eight ambulances. If the division is equipped with wagon trains, 1,000 wagons are required, supplemented by sixty-seven motor trucks; if equipped with motor trains, 493 wagons supplement the 627 motor trucks.

The total number of riding horses required for a division and its wagon trains is 4,616, together with 2,218 draft horses and 4,875 pack and draft mules.

More than 20,000 rifles are required to arm a division and its trains, together with 8,000 pistols. The artillery consists of 50 3-inch field guns firing either high explosive shells or shrapnel, each projectile weighing 15 pounds, and 25 3.8-inch howitzers, the shell for which weigh 30 pounds. The number of machine guns with which a division is to be equipped is still an open question, but the number which will appear in army charts soon to be printed is 72 for the division itself and 20 additional guns for the wagon trains. The number, in all probability, will be greatly increased, perhaps to as high as 30 guns for every 1,000 rifles, making a total of 600 for the division.

The length of a division in marching order is more than 14 miles, while the wagon trains the length from the head

of the column to the last of the rear guard is 19 miles.

Within the next few weeks detailed tables, prepared by the army war college in Washington, will be issued from the government printing office, showing the strength and equipment of each unit of the various branches of the United States army. The foregoing statistics are based upon these forthcoming tables.

RAISE MORE HOGS.

The meat supply of the country can be increased more quickly by the "hog route" than by any other. The country's need to augment its supply is great but prevailing high prices alone should be sufficient inducement to farmers to raise more hogs. The prospect of success never was brighter. The high prices ruling in all markets show that the demand for pork is in excess of the supply.

No branch of livestock farming is more productive of satisfactory results than the raising of well-bred swine, if conducted with a reasonable care, according to the specialists of the bureau of animal industry, United States department of agriculture. Hogs fit into the modern scheme of farming on nearly every farm, and are one of the most important animals to raise both for meat and for money. They require less labor, less equipment, and less capital, make greater gains per hundred pounds of concentrates fed, reproduce themselves fast and in greater numbers, and give a quicker "turn over" of money than any other animal except poultry. Farmers of the south and west particularly have awakened to the merits of the hog and are rapidly increasing their output of pork and their bank accounts.

The hog has no rival as a consumer of by-products and numerous unmarketable materials which but for him might be wasted. Kitchen refuse, not only from farms, but also from hotels and restaurants, when cooked before being used, makes an excellent feed.

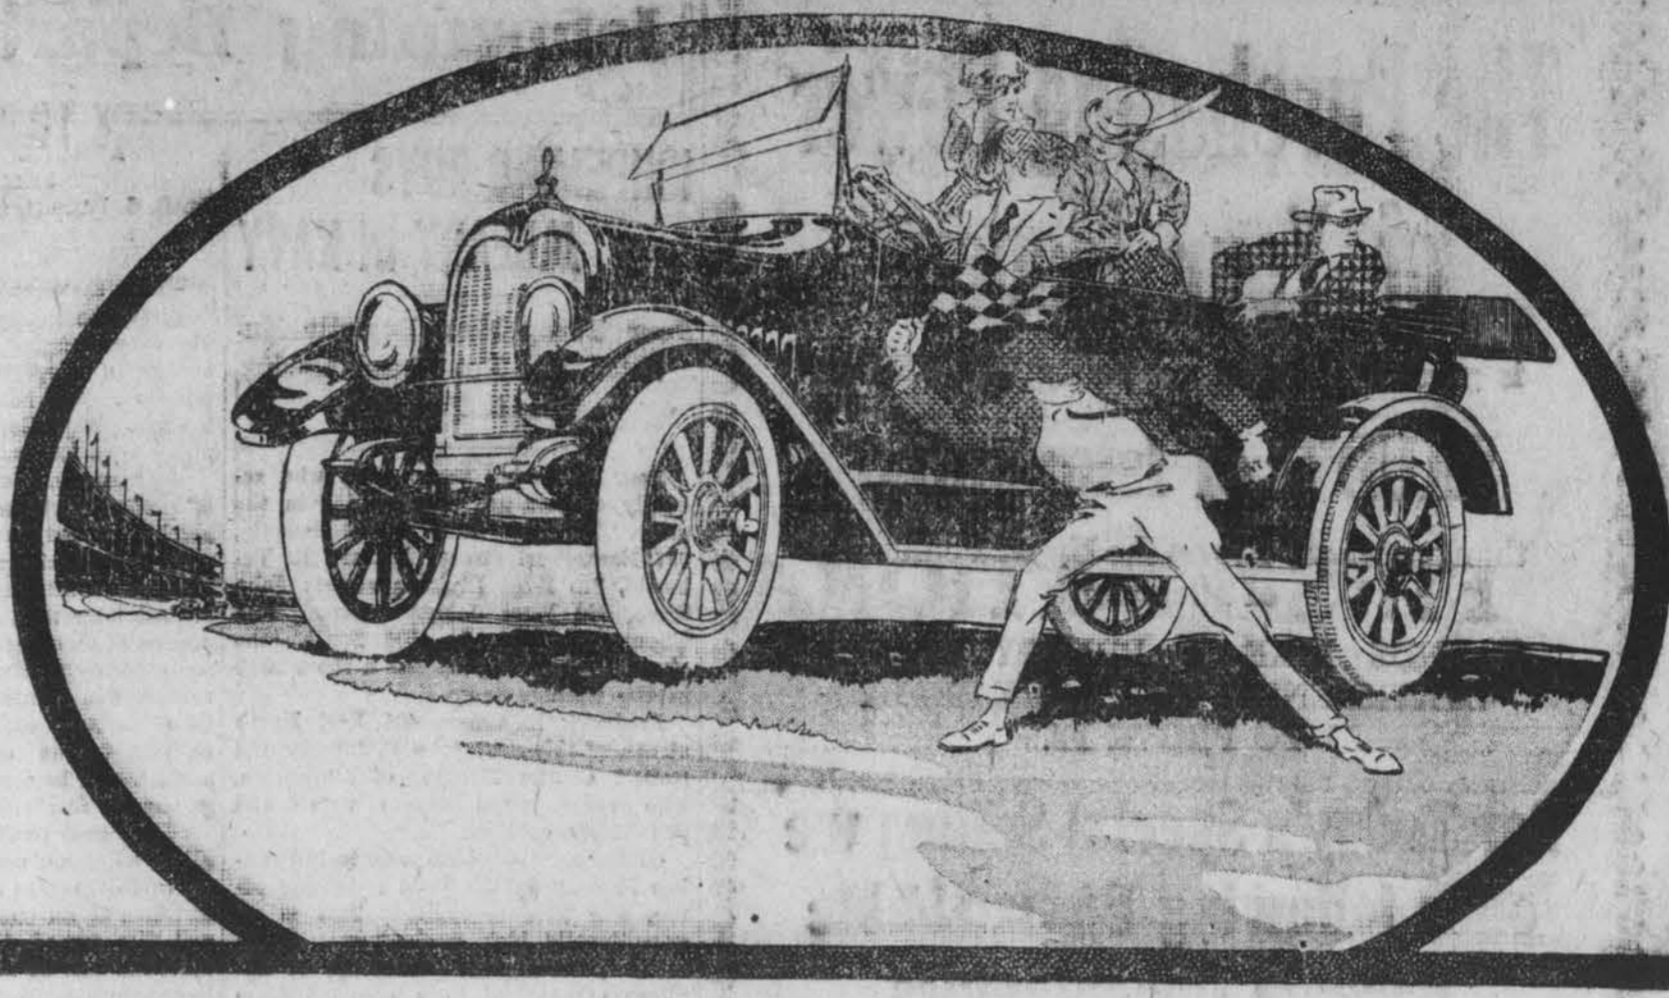

The value of skim milk as a hog feed is known on every farm though not always fully appreciated. In the neighborhood of many large dairies pork production is a very prominent and lucrative supplement to the dairy industry.

To prevent tuberculosis, all milk and milk products should be cooked before being fed to hogs. To control hog cholera use sanitary precautions and anti-hog cholera serum treatment.

Give your hog every chance to become meat.

The hog is also a large factor in cheapening the production of beef. Hogs are placed in the cattle feed lots to utilize the corn and other feeds the cattle have failed to digest and which otherwise would be wasted. Hogs following steers in many cases have increased the profit per steer by from \$6 to \$9. Hogs should not be allowed to follow dairy cattle unless the cattle are tuberculin tested.

Disease, such as cholera, has been taking a smaller toll the past season than in recent years; more pure-bred and high-grade hogs are available than ever before; prices of hogs are now past the sixteen-cent level; demand for pork for home consumption and for export is keen. All of which means that the farmer who does not raise hogs is losing a chance to increase the supply of pork and thus serve the country and at the same time expand a profitable phase of farming.

The Real Greatness of the Maxwell Is in Its Perfected Mechanism

Mechanical perfection has made the Maxwell endurance champion of the world—the most economical car to run—a source of complete satisfaction to 200,000 Maxwell Owners.

Let's consider the Maxwell first as a piece of machinery, —for that's what a real automobile is—a machine. Fancy upholstery, enamel, a highly polished instrument board are excellent things, —but they don't make a great motor car. Motor-car merit depends, first, last and always, on mechanical construction, —on the parts that are hidden from your view. The Maxwell has grace of form and line—travels easily—is roomy and comfortable, —a novice knows that—it's obvious. But, let us pick the car to pieces and see what you actually get for your money.

The Sturdy, Masterful Chassis
In the first place, there is one—and only one—Maxwell chassis, —and that chassis not an experimenter, —not the whim of some designer who craves a reputation to be different or original. Nobody is permitted to tinker with that one Maxwell model, —no smart ideas are allowed to swerve it from its course of development, refinement, perfection along the known, proved, time-tried principles of automobile construction.

The Maxwell Engine is the Embodiment of Efficiency and Power
The Maxwell engine is the concrete manifestation of efficiency and power brought up to an almost unbelievable point of perfection. It has much of the velvety smoothness characteristic of the motors in high-priced cars, —plus power, economy, reliability and simplicity.

This marvelous motor is daily taking Maxwells over tens of thousands of miles of the hardest sort of going at an average cost of only \$6 to \$8 a month. One of these Maxwell engines—just like the one your Maxwell will have—went for 44 days and nights without stopping, carrying a Maxwell over all kinds of roads, in all kinds of weather, at a rate of 25 miles an hour, on 22 miles per gallon of gasoline.

Some Other Mechanical Factors That Make the Maxwell Great
The Maxwell axles stand up like the foundations of a mighty skyscraper, —they are designed, forged, heat-treated and built complete in our own factories. The Maxwell transmission—noiseless, self-lubricating, trouble-proof—is the height of mechanical sanity and surety. The marvelous Maxwell clutch—running in oil, simple, smooth, wear-proof—has an efficiency greater than that of any other car, no matter how high-priced. Besides—each part of the Maxwell chassis is made of only the finest metal that can be procured, —and then only after the material has been subjected to the most rigid tests known to science.

Buy the Car That Stands the Test
Don't buy a car on looks, but find out just what is inside it —if the vital parts of the car are mechanically right. The more you study the Maxwell the more certain you will be, as we are, that the Maxwell is the world's greatest motor car. Come to our sales rooms and let us prove to you that the Maxwell is mechanically right. Roadster, \$650; Touring Car, \$665; Cabriolet, \$865; Town Car, \$915; Sedan, \$935; completely equipped, including electric starter and lights. All prices f. o. b. Detroit.

A Medicine for Women

For Forty Years Lydia E. Pinkham's Vegetable Compound has Relieved the Sufferings of Women.

It hardly seems possible that there is a woman in this country who continues to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world.

Mrs. Kieso Cured After Seven Month's Illness.
Aurora, Ill.—"For seven long months I suffered from a female trouble, with severe pains in my back and sides until I became so weak I could hardly walk from chair to chair, and got so nervous I would jump at the slightest noise. I was entirely unfit to do my house work, I was giving up hope of ever being well, when my sister asked me to try Lydia E. Pinkham's Vegetable Compound. I took six bottles and today I am a healthy woman able to do my own housework. I wish every suffering woman would try Lydia E. Pinkham's Vegetable Compound, and find out for herself how good it is."—Mrs. KARL A. KIESO, 596 North Ave., Aurora, Ill.

Could Hardly Get Off Her Bed.
Cincinnati, Ohio.—"I want you to know the good Lydia E. Pinkham's Vegetable Compound has done for me. I was in such bad health from female troubles that I could hardly get off my bed. I had been doctoring for a long time and my mother said, 'I want you to try Lydia E. Pinkham's Vegetable Compound.' So I did, and it has certainly made me a well woman. I am able to do my house work and am so happy as I never expected to go around the way I do again, and I want others to know what Lydia E. Pinkham's Vegetable Compound has done for me."—Mrs. JOSIE CORNER, 1608 Harrison Ave., Fairmount, Cincinnati, Ohio.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

THE DAIRY COW.

"No program of national preparedness for the impending food crisis is wise nor complete without sharp emphasis on conserving and increasing our national stock of dairy cows."

This is the statement of M. D. Mum, president of the National Dairy Council.

"We must, of course, bend all our efforts to the prevention of a war shortage in foodstuffs of all kinds," Mr. Mum continues, "but when prices for beef begin to rise, dairy cattle must not be slaughtered for dairy feeds diverted to other uses."

The dairy cow is mankind's greatest friend. She produces man's best, most serviceable food, and one of the cheapest. A 1,200-pound steer, ready for market, contains only about 300 pounds of actual food. A dairy cow at two years of age begins to produce and yield thereafter about 900 pounds of edible nutriment in the year, and will continue to produce the same amount for seven years thereafter; that is, she produces during her actual life 6,300 pounds of human food. In other words, it takes seventeen steers to produce the same amount of human food as a dairy cow produces during her lifetime.

I am indebted for these figures to the University of Minnesota. And the further very pertinent statement is made that the steer, before he pays for any of his food, is in debt to his master for two years, and, upon payment, ceases to live, while the cow pays for her food daily as she goes.

It seems to me, therefore, that in any program of preparedness in national food supply, first and foremost consideration should be given to this remarkable natural food-making machine, the dairy cow.

On behalf of the consumer, the widest publicity should be given to the bulletin issued by the United States department

of agriculture, dealing with the great food value and economy of milk and milk products, and showing milk to be an economical food even at a price of 15 cents per quart.

"An energy-giving power, one quart of milk is equal to 11 ounces of sirloin steak, or three-fourths of a pound of round steak, or 8½ eggs, or 10.7 ounces of fowl," says the bulletin.

Our people should bear in mind, also, the significance of the heart-rending appeal made to the German Reichstag by Field Marshal von Hindenburg. He cries for fat—fat—fat—for his soldiers and fat for the weakened people.

The fate of Germany may hang upon the question of fat. At no time in history has the value of fat assumed so ominous a meaning.

A plentiful stock of dairy cows means not only the quickest, richest and most continuous transformation of feed into human food, but, above all, it means a daily dependable supply of butterfat—the finest of all fats—and forestalls the possibility of such deep distress as is experienced in the shortage of fat by unhappy Germany.

A two-year-old steer, ready for market, contains only about 280 pounds of total fat, while a fair dairy cow will produce in her 6,900 pounds of milk 300 pounds of fat yearly for seven years, or a total of 2,100 pounds of fat during her lifetime; as against a steer's 280 pounds of fat in his life.

Unless our people adopt, as to the food value of milk, the view expressed by the U. S. department of agriculture, the tendency of our farmers will be to quit dairying and to send their cows to the butcher rather than perform the irksome services without profit and often at a loss. In consequence our stock of dairy cattle is lower today per thousand population than it has been for forty years.

As a nation, we may well be alarmed over the certainty of further depletion, when further rises in the cost of feed and aggravated shortage of farm labor make the production of milk wholly unprofitable or a losing venture at the very time when milk, butterfat, and the products derived therefrom should be the country's greatest safeguard and reliance.

Moreover, further retrogression in dairying means a shortage in animal manure, lowered soil-fertility, a lower yield per acre of cereal products, an excessive rise in the price of all foodstuffs coming from the soil, and a serious derangement of our economic life. It spells distress in its keener form.

It appears to me, then, to be the immediate duty of the government to

MRS. SLACK'S LETTER

To Mothers of Delicate Children.

Palmyra, Pa.—"My little girl had a chronic cough and was so thin you could count her ribs and she had no appetite. Nothing we gave her seemed to help her, until one day Mrs. Neibert asked me to try Vinol, and now she is hungry all the time, her cough is gone, she is stouter and has a more healthy color. I wish every mother who has a delicate child would try Vinol."—Mrs. Alfred Slack.

We guarantee Vinol, which contains beef and cod liver peptone, iron and manganese peptonates and glycerophosphates, to make delicate children healthy and strong. The Stafford Drug Co.

Vinol is sold in Ishpeming by The F. P. Tillson Drug Co., and in Negaunee by Arnett Bros. Druggists. Also at the leading drug stores in all Michigan towns.

WANTED—Girl for general housework. Apply Mrs. Ted Butler, 324 Gold St. 5-1-tf

FOR SALE—Forty acre farm about two miles from Negaunee. Thirty acres are cleared. Inquire at Mining Journal office, Negaunee. 5-3-6t.

Negaunee Department

"BACK TO THE LAND" NEGAUNEE'S MOTTO

Amateur Farmers from All Classes of People to Raise Vegetables This Year.

Baseball and other summer sports will receive only meager consideration from a majority of Negaunee people this year as practically every resident has turned farmer and all will be busily engaged looking after crops. Many will do more than the ordinary back yard farming and plan to go into the raising of food stuffs on a large scale. There are some who will cultivate an acre or more of land.

The mining companies are doing everything possible to assist employees in the "back to the land movement" and it is likely that every available piece of ground in the city will be utilized in some manner or other for farming purposes. In past years it has been the custom of the mining companies to lease large tracts of land for pastures for grazing cattle, but this year the corporations are dividing up their land among their employees so that they can raise foodstuffs on it.

The mining companies are also buying necessary seed on a large scale for distribution among employees at cost. In many instances those who purchase seed from mining companies can do so on monthly payment basis.

Some of the land allotted to the public for farming purposes is located within the city limits while other tracts are a little distance from town. A score or more of Negaunee men have taken up land in other townships and will devote their entire spare time to the raising of potatoes. The prospective farmers are drawn from all classes of people includ-

ing miners, merchants, clerks, bankers, railroad men and saloon men all are manifesting much interest in their respective farms. Some corporations are ploughing and tilling the land free of charge. Company teams and equipment are being used daily in getting the many tracts of land ploughed out so that the farmers and gardeners can start to plant as soon as the good weather sets in.

WILL ATTEND CHURCH.

Plans are being made by the officers of English Oak lodge, Sons of the St. George, for attendance of the lodge at divine service on Sunday, May 20. The Negaunee branch of the order will be joined on the occasion by the membership of Sir Humphrey Davey and Tre-lawney lodges of Ishpeming and Sir James Watts lodge of the National Mine. The members of Tre-lawney lodge's degree team will be present in uniform. The Negaunee City band has been engaged to furnish music and will head the procession. Rev. R. L. Hewson, pastor of the Mitchell Methodist Episcopal church, will deliver a patriotic sermon.

THEATRICAL.

The consequences of a trust falsely placed, the trust of an innocent girl in the nobility of a gambler and man of the world, make the background of the story of East and West which forms Gladys Brockwell's latest starring vehicle for William Fox. The picture is "One Touch of Sin," a vigorous story of a woman who pays the price, in shame and sorrow.

Also two reel Fox comedy "Social Pirates" will be shown.

NOTICE TO COAL DEALERS.

The city of Negaunee will receive bids on 2,500 tons of ¾ in. Youghiogheny soft coal F. O. B. coal trestle up to Wednesday, May 9, 1917 at 5 p. m. Alfred Bestrom Superintendent. 5-3-6t.

LOCAL LACONICS

John E. O'Donoghue spent yesterday on business at Maple Ridge.

William Helmsdorfer is visiting with relatives at Fort Francis, Ont.

Victor Davinago has purchased a home at Marquette and intends to move his family there in a few days.

Jay W. Gerrie, of Sault Ste. Marie, was a Negaunee visitor yesterday.

Wilfred J. C. Deschambeau has taken a position as warehouseman for the Chicago & Northwestern Railway.

Albert Mattson and Everett Nordstrom have gone to Racine, Wis., where they will be employed in a factory.

Mrs. W. B. Pattinson and son, Paul, spent the past few days at Loughton visiting with relatives and friends.

Charles Anderson has returned from Canada, where he was engaged in diamond drill work for several months.

Dennis McAlliff, who has been located at Sault Ste. Marie, where he has been railroading, is spending a few days in the city visiting with his folks.

Ben Grenier, son of Louis Grenier, clerk at the Consolidated Fuel & Lumber company's office, has notified his father

that he has enlisted in the army, and left Detroit a few days ago for Columbus, O.

Miss Cora Lee Wells has gone to Rochester, Minn., where she will visit with her mother, Mrs. Thomas M. Wells, who is a patient at the Mayo Brothers hospital.

Domonick Musatto, a well known Gwin business man, spent yesterday in the city visiting with relatives and friends. Mr. Musatto was accompanied by his two sons.

Kenneth C. Pellow, Marquette county agent for the Haynes automobile, yesterday received two machines. A six cylinder, seven passenger car will be delivered to Abel Levine and a twelve cylinder seven passenger car will go to Mr. Pellow's father, Thomas Pellow. Mr. Pellow expects to receive two roadsters within a few days.

Harry Harding, who has been employed at the Negaunee Greenhouses for the past four years, has resigned his position and has gone to Ironwood, where he will be similarly employed in the green house owned by Richard Lutey, a former well known Ishpeming resident. William Gilbert has been promoted to Mr. Harding's position and John Mitchell succeeds Mr. Gilbert.

Twenty Million Tires in 1917

United States Tires stand out unmistakably among that vast number.

Only service could give to United States Tires their universal popularity and tremendous sales,

- super-service which means to you lowest mileage cost,
- highest anti-skid efficiency from all four anti-skids,
- supreme resiliency and elasticity.

The man who uses United States Tires knows

- and he has told what he knows about United States Tires through vast sales increases,
- that United States Tires are the tires of super-service.

FIVE MEN CRAWL SEVEN MILES OVER THIN ICE TO GET FOOD

Part of Crew of Ice-Bound Steamer Munising Reaches Shore After Hard Journey.

F. P. Bamford, first mate of the steamer Munising, stuck fast in the ice about seven miles off the Black Rocks at Presque Isle, and four members of the crew, James Deagon, George Frisch, Arthur Marotki and Salem Hamsa, crawled on their hands and knees across the ice to Presque Isle yesterday, to secure provisions for the twenty other members of the crew remaining on the vessel.

Sailed From Cleveland.

The Munising, captained by Carl F. Rydholm, of this city, sailed from Cleveland, O., with coal for Pickands dock, Marquette, April 25. "We made good time after leaving the Soo, Whitefish Bay being practically free of ice," said the mate last night. "We encountered some solid ice, but had no difficulty getting through until we struck the heavy, windrowed field in which the Munising is now held fast. We ran into this field last Wednesday noon, and since then we have traveled only about a mile. Our first attempts to break through turned the boat until she headed directly off shore, and it required practically all of Thursday to swing her around and point her bow towards Marquette. We have made little or no progress since Friday morning."

Hoping for a south wind that would break up the solid ice field and afford a channel through which he might make a way, Captain Rydholm held on grimly. In the meantime the provisions were becoming sadly depleted. The last of the supply of potatoes, numbering just ten "spuds" in all, was consumed for dinner Sunday, and since then, according to the members of the crew who made the trip yesterday, the men have subsisted on pancakes.

Life-Savers Turned Out.

A Marquette landlubber, Alva Howard, prompted by curiosity, early yesterday morning set up his tripod on Black Rocks and settled down for a survey of the conditions which held the Munising and her crew of twenty-five men in the ice. About the same time the look-out at the life-saving station observed several men leaving the ice-bound steamer and starting out towards shore, across the ice. He reported to the captain, and a crew of men was started for Presque Isle. Arriving at Black Rocks, the crew, with the aid of the surveyor's apparatus, watched the progress of the expedition, as it laboriously made its way over the ice.

As for the five men from the Munising—their journey was fraught with about all the thrills that could possibly be crowded into a space of ten hours. For a time they used a life-rope, but finally discarded it, finding it a hindrance rather than a help. At one time the men had to make their way across an open lane of water, grasping a pine pole which they laid upon the solid ice on either side. They all were in water up to their shoulders. The mate, crawling ahead and making his way carefully, was suddenly pitched headlong into the ice waters, when he came upon a stretch of unusually thin ice. He was hauled to safety by his mates. The members of the expedition report frequent dips in the lake and numerous other harrowing experiences.

Boat Made Rescue.

Realizing that the men would not be able to cross a wide stretch of slush ice and water extending about half a mile

out from Black Rocks, the life-savers secured from Robert Humes, custodian of Presque Isle, a row boat, in which they started out to meet them. Crossing the open water, the life-guards pulled the boat up on the ice, and started to drag it after them in direction of the incoming sailors. The parties met about three-quarters of a mile from shore, and crew and life-guards began the trip back, which was accomplished without further trouble.

The five members of the Munising's crew were hurried into town, and went directly to the Hotel Clifton, arriving there shortly after 6 o'clock. They rushed directly into the dining room, and sat down to the first real meal they had tasted for several days. It was a silent but active crew that wielded the silverware for the next half hour. "Not a word until we've eaten," was the answer to all inquiries regarding the perilous journey.

Their meal finished, the men hurried down-town and purchased changes of footwear. Today the crew will attempt to return with a ship-load of provisions for the twenty men, comprising the remainder of the crew. At the same time Walter Durocher, of T. L. Durocher & Son, will attempt to push the tug Thompson through the heavy ice-field to the Munising, making a channel through which the big steamer can force its way into the harbor. Should this be impossible, it is expected that the Munising will have to try to return to the Soo, and remain there until the field breaks up sufficiently to warrant its starting out again.

Another Steamer Stuck.

The J. H. Bartow, coming up the lakes light, for ore from the local docks, is also stuck in the windrowed ice at a point about four miles northwest of the Munising, or about seven miles east of Granite Island.

MEN ARE EXAMINED FOR TRAINING CAMP

Over Thirty Reported Yesterday to Lieut. McNeal—Outline of Routine.

Some thirty young men, most of them residents of this city and the others from nearby communities, appeared before Captain J. W. McNeal, in the Pythian building, yesterday morning, and were given examinations for entrance into the officers' training camp which opened Tuesday at Fort Sheridan, Ill. Inasmuch as notification of acceptance must come from the central department, at Chicago, none of the men have been informed whether they have been accepted. Those who are accepted will be notified by means of a postal card from the department within a week or two. No one should report at Fort Sheridan without this card.

Some idea of what the daily routine at Fort Sheridan will be given by an outline of the schedule for the Minnesota camp, Fort Snelling.

Instruction will be given in, and much study devoted to, the infantry drill regulations, including the manual of the bayonet, the field service regulations and the manual of interior guard duty, in the first five weeks, it is declared.

"Special stress will be laid upon actual field service, use of the rifle, and signal work in the field, such as use of army signals and the two arm semaphore code of the United States army. When the first students begin arriving they will report to the commanding officer of the administration building. They will present their certificates of examination and approval from the army boards which examined them for admission, and will be turned over to the regular army surgeons, who give each one a physical examination, according to regular army standards. Those who

PATRIOTIC RALLY IN BARAGA AUDITORIUM—SIX RECRUITS LEAVE

A patriotic rally which the officers of the Marquette Patriotic league predict will surpass in enthusiasm and attendance any similar event which has been held in this city since the declaration of war against Germany will be held in the Baraga auditorium tonight, beginning at 7:30 o'clock. Plans are complete and everything is in readiness for a "recorder-breaker." The Rev. Fr. F. X. Barth, of Escanaba, widely known as an orator with a message which all should hear, will be the principal speaker. William Pryor, the shipping miner, who has stirred hundreds with his appeals for patriotism and support, has also consented to speak. A. W. Jones, chairman of the music committee, has arranged an attractive program of patriotic songs, including a new Marquette war song composed by himself.

It is a meeting which every true American resident of this city should attend. Tonight, at 7:30 o'clock, in the Baraga auditorium.

Six Marquette young men left last night at 5:15 o'clock for Jefferson Barracks, Mo., where they will enter the United States army, having enlisted here Monday. The men are: Arthur J. Coil, Con Grugman, Fred Gauthier, Cyril Cadieu, Leo Richer, Arthur N. Bessander, Carroll B. Barnes and Herbert Wolf who enlisted at the same time will leave today for the barracks.

The recruiting officers stationed here are pleased with the increased interest being taken in recruiting here, and are hopeful that Marquette's quota of 140 men will be rapidly forthcoming. "If the daily quota from here increases within the next few weeks as it has during the past few days, Marquette should soon be represented by a good-sized delegation, at Jefferson Barracks," said one of the officers yesterday.

are passed by the army surgeons will be assigned to companies, and given places in barracks which will be their home for three months. Equipment will be issued them and they will hold themselves in readiness for what duties their company commanders require until May 15, when their instruction will begin."

The official schedule of the work in the officers' training camp, at Fort Snelling, for the first period, is believed to be similar to the course outlined for Fort Sheridan, and is as follows:

FIRST WEEK—MAY 15. Hours: Organization of companies, issue of equipment, instruction in arrangement of beds and lockers and in barracks regulation, 8; Evening study hours, 8; Drill—Physical, 2; Practice marches, three without arms 3; Drill—Physical, 2; School of soldier, 1 1/2; School of squad—close and extended order, 3; Signaling, semaphore and flag, 3; Mounting guard, posting sentries, conduct of guard, 3; 12; Conferences, 15; Total, 47 1/2.

SECOND WEEK—MAY 21. Hours: Evening study hours, 8; Practice marches, light kit, 2; Drill—Physical, 2; School of the company, close and extended order, 6; Manual of the bayonet, 2; Position and aiming, and deflection and elevation correction, 2; Signaling, semaphore and flag, 1; 16; Conferences, 12; Total, 47 1/2.

THIRD WEEK—MAY 28. Hours: Evening study hours, 8; Practice marches, march kit, 2; Drill—Physical, 2; School of the company, close and extended order, 6; Manual of the bayonet, 2; Position and aiming, and deflection and elevation correction, 2; Signaling, semaphore and flag, 1; 16; Conferences, 12; Total, 47 1/2.

FOURTH WEEK—JUNE 4. Hours: Evening study hours, 8; Practice marches, two, march kit, 2; Drill—Physical, 2; School of the company, close and extended order, 6; Gallery practice, signaling, flag and semaphore, 10; Mounting guard, posting sentries, conduct of guard, 3; 29; Conferences, 15; Total, 47 1/2.

FIFTH WEEK—JUNE 11. Hours: Evening study hours, 8; Drill—Physical, 2; School of the company, close and extended order, 6; Gallery practice, signaling, 7 1/2; Field work, patrols, 7 1/2; Conferences, 15; Total, 47 1/2.

SOO CANAL PASSAGES. Sault Ste. Marie, Mich., May 8.—(Special).—Upbound vessels passing the canal the last twenty-four hours were: The Boland, 7:30; Underwood, 8:30; Odanah, Tomlinson, 10; Atikokan, mid-night; Viking, 5; (New) America, 11; O'Connor, 11:30; Anna Mineh, 4 p. m.; Ostland, Joyland, 4:30; Panay, 5:30.

CHOICE ROSE STOCK. I have just received a shipment of a choice lot of rose bushes, hybrid perpetuals and hybrid teas and climbers, which I am now ready to deliver at reasonable prices to parties desiring them. Inquire H. E. Johnson, 906 Pine St. Phone 829J. Office phone 483.

COUNTY PHYSICIANS OFFER THEIR SERVICES

War Plans Discussed at Meeting Monday Night—A. W. Hornbogen to Battle Creek.

Dr. A. W. Hornbogen, chairman of the auxiliary medical defense committee for Marquette and Alger counties, left this morning for Battle Creek to attend a special meeting of the state medical society to consider ways and means of raising the state's quota for the medical service of the national armies. The officers of the society have been informed, is 600 men. Considerable work along this line has already been done. The session now to be held is to take stock of the situation and to arrange for fully carrying out Michigan's part in the medical program.

Governor Sleeper, former Governor Ferris and many prominent Michigan men will attend the meeting.

County Physicians Meet.

A patriotic meeting of the Marquette-Alger County Medical Society was held at the Marquette high school Monday night. There was an unusually large attendance and the session was the most enthusiastic ever held by the organization.

President Burke outlined the duties of the society in furthering the work imposed upon the medical profession of the state in the enlisting of six hundred medical officers for active duty.

The quota asked for by the government is one-fourth the membership of the Michigan State Medical Society, and, as it has been aptly said, "this quota will be of the choicest character. Of this there can be no question. Michigan's medical standards are high and the personnel of the medical profession is excellent."

Dr. A. W. Hornbogen outlined the change in methods of enlisting medical reserves, as adopted by the government to expedite the work in this department. An aspirant can now apply direct to Lieutenant Hornbogen for application blank, and, when properly filled out, present himself for examination, and upon the examiner's recommendation the commission is issued at once.

A committee composed of nine members, Drs. T. A. Feich, H. S. Smith of Ishpeming; H. W. Sheldon, J. A. Andrews of Negaunee; Paul Van Riper of Champion; R. A. Burke of Diorite; T. W. Scholtes of Munising; T. M. Cunningham and H. J. Hornbogen of Marquette, were appointed to direct their energies to the conservation of local practice of the men at the front; to personally visit and assure themselves that physicians' families or dependents lack nothing; the creation a fund for the purchase of supplies in emergency for those at the front; the assurance of occasional luxuries and the necessities unobtainable because of all too meagre salaries.

Marquette-Alger County Medical Society feel justly proud and gratified in the record of enlistments. The quota for the society should be eight, and thirteen have signified their desire to enlist, by making application, as follows:

J. A. Abrahamson, Negaunee; V. H. Braden, Ishpeming; T. H. Wilson Negaunee; E. A. Florentine, Ewen; H. G. Loveland, Republic; I. Siotte, Michigamme; H. H. Ptolemy, Trenary; S. J. O'Brien, Munising; F. M. Harkin, Marquette, (Commissioned); A. W. Hornbogen, Marquette, (Commissioned); Wm. B. Luna, Marquette; H. T. Carriel, Marquette; R. C. Main, Marquette.

FOR HOME GARDENING.

Considerable Land is Still Available About the City. Considerable land that can be had for the asking is available about the city for gardening purposes. M. W. Wright has a number of lots in North Marquette that he believes could be used to advantage, and he will be pleased to allot them to any persons desiring to put them under cultivation. The lots along the Lake street road, from the Carp furnace to the gas house, owned by the Cleveland-Cliffs Iron company, can also be obtained. They have a heavy soil, and, with a little fertilizing, it is said they would yield generously for potatoes.

E. B. Spear & Sons have a considerable supply of certified seed potatoes they obtained specially to supply Marquette gardeners. They are selling them at cost.

A SYMBOL OF HEALTH. The Pythagorians of Ancient Greece ate simple food, practiced temperance and purity. As a badge they used the five pointed star which they regarded as a symbol of health. A red five pointed star appears on each package of Chamberlain's Tablets, and still fulfills its ancient mission as a symbol of health. If you are troubled with indigestion, biliousness or constipation, get a package of these tablets from your druggist. You will be surprised at the quick relief which they afford. Obtainable everywhere. Sold Everywhere.—Adv.

Princess Pine, 50c. a bunch. One bunch enough for two quarts of medicine. Phone 216. 5-3-64.
