

THE DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY The Mining Journal Company, Limited.

Issued daily except on Sundays. Contains Associated Press dispatches, and is especially devoted to the Upper Peninsula interests.

SUBSCRIPTION RATES:

Per year, by mail, \$6.00 Per month, by carrier, .60

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

TUESDAY, MAY 22, 1917.

WHAT WE SHOULD SEE.

Yesterday The Mining Journal, and all the other Associated Press newspapers, printed in a prominent position, an article that wasn't news. It dealt with the probable terms of the next German peace offer, and the reasons why the allies will refuse to consider it seriously.

It need be no cause for wonder that the American public does not attach the proper value to the southeastern issues of the war. The great conflict was many months old before they were fully valued even in Great Britain.

FOOD MEASURES.

In a statement issued Saturday night President Wilson discussed frankly the reasons that impel him to ask such far-reaching powers with regard to food control as are conferred by the measure now before congress.

BETTER AND BETTER.

The news from Russia is better and better, from the standpoint of the entente allies, and must be disappointing, to a degree, to the Germans, who have obviously been angling to bring about a separate peace with their burly, if temporarily disorganized, enemy.

Editorial Opinion

Germany is said to be contemplating the creation of a new and highly profitable industry after the war—salvaging torpedoed ships. German naval engineers have perfected a process by which it will be easy to raise ships from the bottom of the sea unless they lie at a great depth.

Ship Salvage.

Germany is said to be contemplating the creation of a new and highly profitable industry after the war—salvaging torpedoed ships. German naval engineers have perfected a process by which it will be easy to raise ships from the bottom of the sea unless they lie at a great depth.

Germany is said to be contemplating the creation of a new and highly profitable industry after the war—salvaging torpedoed ships. German naval engineers have perfected a process by which it will be easy to raise ships from the bottom of the sea unless they lie at a great depth.

THE MICHIGAN STATE TROOPS.

The state preparedness board says that it cannot undertake to equip the new units of the new Michigan state troops because the cost involved amounts to \$75,000.

Japan and the U-Boats.

Japan is showing no disposition to shirk in this war. Her warships are reported in the Mediterranean, ready to co-operate with those of France and Italy in protecting commerce.

Why We Went to War.

It is pleasant to have the members of the visiting commissions saying nice things about the United States and praising us for our entrance into the war, but it must be confessed that they do not always adhere to the strict letter of the facts.

Rush Organization of Chicago Engineer Regiment.

The cabinet high plotters, using the Labor's National Peace council as a bait, saw what they regarded as good opportunity to use Mr. Bryan to serve their purposes, and solicited his services in their movement.

R. D. Black, who is in Chicago to assist his father, General W. M. Black, chief of engineers, in making the Chicago drive for the Third Reserve Engineers...

The commanding officers of Fort Rosecrans, San Francisco, assert that two men on lookout duty reported a submarine in the Pacific. However, they haven't anything on the officers of one of the minor U. S. war vessels, who recently reported sighting one in the Atlantic, in close proximity to our shores.

Anticipated Improvement.

Miss Fordyoud—You must take back the parrot you sold me. I find that he swears very badly. The Dealer—Pardon me, miss, but it's a very young bird. It will learn to swear better when it's a little older.

Well-Mated.

A golf enthusiast was describing to his friend the varied joys the game afforded him. Finally he wound up by saying: "Do you know, I'd rather play golf than eat!"

Wonderful Touch.

The principal grocer of a small country town was chatting with several customers when discussion arose as to the wonderful sense of touch that the blind have.

No Mercy.

"The reckless automobilists is disappearing fast and it's good riddance," said Henry Ford, at one of his Dearborn dinners.

He Believed It, Too.

An elderly farmer from the border of the country wandered into a town dry-goods store where a sale of nightshirts was in progress.

Terrible Effect.

Robert Skinner, ex-consul general to London, said at a dinner: "Of course, neutrals see things from one view point and belligerents from another. We all have our various viewpoints."

Expert Opinion.

While preparing a series of articles on "Wives of men of Genius" we called on the wife of a famous inventor. "Which of your husband's inventions," we asked, "do you consider to be his most notable achievement?"

Lower State Notes

CADILLAC—Arthur Lindstrom, a farmer near here, has solved the problem of keeping his poultry flocks intact and at the same time branched out into another business.

R. D. Black, who is in Chicago to assist his father, General W. M. Black, chief of engineers, in making the Chicago drive for the Third Reserve Engineers...

WEST LANSING—The state board of agriculture at its meeting voted increases in salary to practically every member of the teaching staff, except the heads of the department.

A Laugh Or Two

Anticipated Improvement. Miss Fordyoud—You must take back the parrot you sold me. I find that he swears very badly. The Dealer—Pardon me, miss, but it's a very young bird. It will learn to swear better when it's a little older.

Copper Country

ENGINEERS ENLIST TWENTY-TWO MEN

This Many Copper Country Men Join New Upper Peninsula Battalion.

The Michigan battalion of engineers enlisted twenty-two men Sunday. They signed at the Houghton office for Company B, the company that is being recruited in the south end of Houghton county and in the iron country.

One of Sunday's recruits is Paul Hogan, one of the copper country's foremost athletes. Company B is confident Hogan's enlistment will prove a drawing card.

Vallet Arrives Today.

Major B. W. Vallet will arrive in Houghton from Detroit today to establish his headquarters at the Michigan College of Mines and take personal charge of the final drive for recruits.

Strange as it may seem, the difference between the foregoing list and the forty-two total claimed in the foregoing reference to Sunday's recruiting is represented by men who have enlisted and do not want the fact known for fear they may lose their jobs before they enter the service.

The name of the concern with which these recruits are employed can be obtained from Lieutenant White. The men did not apply in a group but singly and the coincidence, that each said he did not want his enlistment published for fear he might lose his job, struck the recruiting officer as evidence that the fears of the men might have some foundation. He has not given out the name of the company for fear it might be doing the company an injustice.

HOME FROM JACKSON MEETING.

Congregationalists Discussed Higher Salaries and Pension Question.

Rev. U. G. Rich, pastor of the First Congregational church, has returned from Jackson where he attended the seventy-fifth anniversary of the Michigan Congregational Church association.

Two topics that received a deal of attention were the questions of higher salaries to meet the increased cost of living and the pension fund. A nationwide campaign has been inaugurated to raise \$5,000,000 to pension aged pastors and their wives.

FOOD PREPAREDNESS CAMPAIGN.

Laurium Playgrounds as Gardens—Michigan Smelter Plan.

The Laurium Playgrounds association has returned to the Calumet and Hecla playground operated last year, with the suggestion that it be turned over to home gardeners.

One of the best and most practical expressions of confidence in the feasibility of the food preparedness campaign has been made by the Michigan Smelting company.

The company proposes to plow for the purpose of its employees enough land to provide at least twenty bushels of potatoes for each employee participating in the scheme.

The home garden campaign is being taken up very generally in Houghton. Throughout the residence districts rear lawns are being plowed or spaded and preparations are being made to plant vegetables that will be suitable for canning next fall.

C. J. McGee has made probably the greatest sacrifice to the food preparedness campaign in Houghton. He has plowed and planted to potatoes his front lawn at his residence on Agate street.

Rev. S. G. Gillette, pastor of Grace M. E. church, is going to set an example of the W. J. Uren residence site at Diamond and Agate streets and will turn it into an unwinding site for a garden but the Reverend agriculturist intends to make it blossom like a rose.

C. H. Moss, former manager of the Citizens National bank of Houghton, now manager of the Miners' National bank of Ishpeming, is taking the lead in the latter city. He has taken charge of the cultivation of the "rough" of Wannowin Golf Club and last week received a donation of ten boxes of dynamite from the Du Pont company.

This powder he will use in clearing the golf club's land preparatory to planting the potatoes.

Mr. Cochran is making extensive improvements and additions to his plant, which he claims will be the finest in Michigan when the work now under way is completed. This washing machine is only one of numerous improvements. It holds 300 bottles at one time and carries them through thirty-six actual washing operations, one-third of which are in a boiling caustic soda solution.

FISHING SEASON BACKWARD.

Anglers Assert Heavy Rain Needed to Make Sport Worth While.

Few big brook trout catches have been made this spring and the season will soon be a month old. Prior to May 1 predictions were flying right and left that the opening weeks would be the best in years, but the prognosticators seem to have been a bit off.

Anglers that spent last Sunday at nearby streams returned with little to show for the day. They say the streams are clear, trout can be seen but the fish will not bite. A heavy rain is what the sportsmen say is necessary to make worth while a trip to the streams.

BARAGA COUNTY COURT.

Judge O'Brien Opens May Terms at L'Anse—The Criminal Calendar.

Judge P. H. O'Brien, accompanied by Court Reporter Ingram, left yesterday morning for L'Anse, where yesterday afternoon he opened the May term of the Baraga county circuit court.

The criminal calendar is as follows: August Kovian, forgery. Emil Kojic, violation of local option law. Eli Curtis, assault.

OFFICIAL WAR NEWS AVAILABLE.

Postmaster Byers Posts The Official Bulletin in Postoffice.

Under instructions from Postmaster Burleson, Postmaster Byers has provided a file of The Official Bulletin, the United States government newspaper, for the use of patrons of the postoffice.

This bulletin is the first official journal of general news ever published by the United States. It is for the purpose of disseminating official war news during the present crisis.

THE BIGGEST MUSICAL EVENT.

Seat Sale for Galli-Curci and Ganz Announced for Thursday.

Manager McNamara of the Amphidrome will on Thursday place on sale in Atkin's drug store in Houghton and Vastlander and Road's, Calumet, the reserved seats for the Galli-Curci and Ganz concert at the Amphidrome June 5.

Mr. Galli-Curci is last season's American operatic sensation, a coloratura soprano of remarkable talents and personality. Her husband, Giuseppe, is well known in the Copper Country. It is believed that the drawing power of these artists will be enormous.

CONTRIBUTION TO SANITATION.

Cochran Bottling Works Installs a Modern Washing Machine.

John A. Cochran, the Houghton manufacturer of soda drinks, yesterday put into operation a remarkable machine, a Geyser bottle washer, which can wash and sterilize some thousands of bottles of all sizes in an hour.

The water in this machine is in continuous flow to a sewer outlet so that virtually no two bottles are washed in the same water. The machine is set up adjacent to the bottling machine and bottling and washing operations are carried on at the same time, insuring that no impurities may enter the bottle even from the air from the time they are cleaned till they are filled and hermetically sealed.

Upper Peninsula

Some Oppose Change.

Many of the workmen of Menominee and Marinette, particularly in the lumber mills and yards, do not favor the proposed "more daylight" plan of advancing the mill clocks one hour during the summer months.

Plan for Farm Labor. George W. McCormick, of Menominee, upper peninsula member of the Michigan Food Preparedness board, says that a plan has been outlined to secure from Michigan manufacturing plants an army of farm workers for the harvesting during July and August.

"Oh Look! I can eat 'em all—they won't hurt me! That's because they're made with Calumet—and that's why they're pure, tempting, tasty, wholesome—that's why they won't hurt any kid."

Plant Soon to Be Ready. In a few weeks the new sewer disposal plant at Escanaba will be completed and will be put into operation.

No Blame Attached. In a verdict which absolved Eugene Haller, and his janitor, Guy Kemp, Robert Gray, Leo Bunn and John (Francis) Parr of criminal carelessness or neglect, the jury investigating the explosion at the east end of the Soo Bay pier recommended that an adequate ordinance regulating the purchasing, storing, handling, transporting, sale and use of explosives be passed.

Desjardins' Goiter Remedy. Goiter is not only unsightly, but disagreeable—it has a tendency to make one nervous, irritable, short of breath, etc.

Desjardins' Goiter Remedy. A harmless, successful remedy that cures permanently all kinds of goiter, no matter how large they are or of how long standing, in the most simple manner, externally, by absorption. It checks the growth at once, reduces the enlargement gradually and improves your run-down system in a short time. Price \$2.00 postpaid.

BASEBALL

National League.

Philadelphia, 4; Chicago, 3.

Philadelphia, May 21.—Chicago not only lost today's game to Philadelphia but also dropped from first to third place in the National league. The home team won the game in the second inning by making six singles, the rally netting four runs.

Score: R. H. E. Chicago . . . 010000110—3 8 0 Philadelphia . . . 040000000—4 0 0 Batteries: Douglas, Prendergast, Demaree and Wilson; Rixey and Killifer.

Cincinnati, 2; Boston, 1.

Boston, May 21.—A sacrifice fly with the bases full and one out in the tenth inning scored the run that won for Cincinnati today.

Score: R. H. E. Cincinnati . . . 000001000—2 6 0 Boston . . . 000000100—1 6 3 Batteries: Schneider and Clarke; Tyler and Gowdy.

St. Louis, 6; Brooklyn, 2.

Brooklyn, May 21.—St. Louis bunched four hits on top of two errors in the second inning today, scoring four runs, and won from Brooklyn.

Score: R. H. E. St. Louis . . . 040100100—6 10 1 Brooklyn . . . 100100000—2 7 2 Batteries: Meadows and Gonzales; Cheney, Marquard, Dell and Miller.

New York, 4; Pittsburgh, 3.

New York, May 21.—New York went back into first place by defeating Pittsburgh here today in the third game of the series. McCarthy made a home run and two singles, also driving in the winning run in the sixth.

Score: R. H. E. Pittsburgh . . . 100000002—3 3 1 New York . . . 120001000—4 9 2 Batteries: Jacobs, Miller and Fisher; Toseau and McCarthy.

TEAM STANDINGS.

Table showing American League and National League team standings with columns for W, L, P.C.

TODAY'S GAMES.

American League. No games scheduled. National League. Pittsburgh at New York. Cincinnati at Boston. St. Louis at Brooklyn. Chicago at Philadelphia.

YESTERDAY'S RESULTS.

American League. Philadelphia, 4; Chicago, 3. New York, 4; Pittsburgh, 3. Cincinnati, 2; Boston, 1. St. Louis, 6; Brooklyn, 2. American Association. Louisville, 2; Indianapolis, 0. All others postponed; rain.

City Brevities

Stanley Birek is spending a few days
in Chicago visiting relatives.

F. B. Spear left yesterday for Cleve-
land, O., on a week's business trip.

Superior hive, No. 217, L. O. T. M., will
meet tomorrow afternoon at 2:30 o'clock
in Keough's hall.

There will be a meeting of the Knights
of Columbus in their club rooms at 8
o'clock this evening.

Naturalization Examiner Block is in
the city, on business connected with the
present session of circuit court.

There will be a regular meeting of the
ladies of the B. of L. F. and E. this
afternoon at 3 o'clock in Keough's hall.

Miss Gertrude Vaughan, of Hibbing,
who has been visiting relatives in the
city for the past several days, has left
to visit friends and relatives in Hancock.

Mr. and Mrs. W. J. King and children
motored to Iron Mountain Sunday, and
returned last night, after spending the
week-end visiting with Mr. King's par-
ents.

The "Patriotic Six" will give a dance
tonight in Bureau's hall. Mrs. Weedman's
orchestra will furnish the music. The
hall has been attractively decorated. The
members of Company M, Thirty-Third
Michigan Infantry, are cordially invited.

The chorus choir which is to sing "The
Holy City" in the Morgan Memorial
chapel in the near future will rehearse
tonight at 7:30 o'clock in the Morgan
Memorial chapel. A. W. Jones will have
charge of the rehearsal, in the absence of
the Rev. Bates G. Burt.

The temporary appointment of Charles
P. Crusier, employed for the past sev-
eral months as stenographer and clerk
in the offices of Captains Gooding and
Hanson, focal steamship inspectors, ter-
minates June 1. Mr. Crusier expects to
take up some outside work.

Is in Milwaukee Hospital—Thomas
Follis, of this city, is confined in a
Milwaukee hospital, where he is being
treated for a nervous ailment.

Get Six Recruits—A. T. Sweet and
Sergeant Beck, in charge of the work of
recruiting men here for the upper penin-
sula battalion of engineers, report that
six recruits were secured yesterday, and
that several more prospects are in sight
for today. The recruits will remain in
this city, subject to call.

Motored to Houghton—A party com-
posed of Ray Lambert, M. D. Lambert,
Joseph Mapletog, James Triggs and
William Dufner motored to Houghton
Sunday in M. D. Lambert's car, return-
ing Sunday night. They report the roads
to be in fairly good condition, except for
a stretch between Nestoria and L'Anse,
where the road bed is badly torn up in
places.

Scout Party Friday—Troop No. 3, Boy
Scouts, will give a dancing party in the
Guild Hall Friday night. Mrs. Weed-
man's orchestra will furnish the music.
These parties have been among the most
enjoyable of the season thus far, and a
large crowd is anticipated for Friday
night. No invitations will be issued, but
those who usually attend are cordially
invited.

Baseball Sunday—The Cubs defeated
the Braves on Longyear Field Sunday in
their first clash for the season, by a
score of 10 to 9. The game was largely
a "slugging match," but the pitchers
proved effective in the pinches. The fol-
lowing were credited with two-base hits:
Fisher, Anderson, Isadore, Gauthier, Ro-
bare, Stolpe, Sabotka (2), Madigan, De-
selle, Eymor, Downey and L'Huillier.
The battery for the Braves was Downey
and L'Huillier, and for the Cubs, Gauthier
and Rohare.

Two Recruits Yesterday—George D.
Hartley and Steven Studzinski enlisted
in the U. S. army here yesterday and
left last night for Escanaba, enroute to
Jefferson Barracks, Mo. Sergeant Ma-
honey, the officer in charge of the work
here, reports that he has several pros-
pects in sight for today, and that he
expects to send out a great many men
from here this week. Private Kurth,

EDITORIAL

THE fearlessnes with
which Columbus started on
his voyage of discovery 424
years ago sprang from the
same germ of restless en-
ergy that is so character-
istic of the American peo-
ple. This spirit of unrest is
often ridiculed and criticised
by other nations, but is it
not precisely the one thing
which has made the Ameri-
can nation so powerful?

The push, persistency and
energy personified in this
store has accomplished much
and results show the effi-
ciency of the methods in
force. We do not consider
restlessness a fault, but on
the contrary believe that it
is by and through such con-
tinuous activity that we

who has been assisting the sergeant in
the work here and who spent the past
several days in the copper country secur-
ing recruits, returned yesterday, and
reports that he secured six recruits in
Hancock.

Lots for Gardening—F. B. Spear &
Sons have ploughed and platted into
twenty-six garden lots about three acres
of fertile land, owned by them, west of
St. Luke's hospital, and have offered the
lots for the use of any person desiring
to plant and cultivate potatoes this
season. Twenty of the lots, which measure
100 by 150 feet, have already been sub-
scribed for, and the other six can be
secured by application at the offices of
F. B. Spear & Sons, on Lake street. F.
B. Spear, Jr., announced yesterday that
subscribers will be assigned the lots in
the order in which their applications
were received, and that the assignment
will be made within a few days. Here
is surely a chance for the amateur
farmer.

"In India" Tomorrow Night—Prepara-
tions for the operetta "In India", to be
given tomorrow night in the Normal
school auditorium by pupils of the train-
ing school, are complete, and indications
are that the affair will be unusually en-
tertaining. Judging from the interest
which has been manifested in the event
a large crowd is expected. Miss Mc-
Callum, head of the domestic science de-
partment, has charge of the costuming,
and the setting and properties are being
arranged under the direction of W. B.
McIntock. "In India" is an attractive
story of the Orient, and describes the
adventures of Meerah, the orphan girl.
The proceeds will be devoted to the work
of the Red Cross.

Theatrical
Opera House.

Nazimova, the great Russian traged-
ienne and the last great stage artist to
heed the call of the screen, will be seen
at the opera house tonight and tomor-
row in the wonderful photo-drama,
"War Brides."

This great picture begins with a series
of illustrations of the lives of the peas-
ants, and their hard struggle for exist-
ence. Joan the central figure, played by
Nazimova, is loved by a young man of
the village and they are married. In a
few weeks the young husband goes to
the front soon followed by his three
brothers. Word is received that the hus-
band has been killed in battle, and
Joan's impulse is to end her own life,
but prospective motherhood recalls a
new responsibility.

The military authorities begin a move-
ment to get the young women of the
neighborhood to marry departing sol-
diers, that the empire may have another
generation of fighting men. Joan is
aroused and goes among the women ur-
ging them not to submit. For this she
is imprisoned. Word is received that the
king is to pass through the village, and
Joan escapes from her cell to organize
the women in a general protest against
the war. She leads them, all clad in
black, in a long procession to meet the
monarch. The soldiers threaten to shoot
her unless she turns the women back,
but Joan comes face to face with the
ruler, and kills herself, as her message
from the women, their refusal to make
another generation victims of a ruthless
militarism.

Mme. Alla Nazimova has been known
throughout the world as one of the
greatest tragediennes and her debut be-
fore the moving picture audiences is
heralded with great expectation. The

ALL IN DAY'S WORK FOR THE AVIATORS

Attach No Significance to Hair-raising Exploits—One Air Engagement.

London, May 1.—(Correspondence of the Associated Press.)—In a service like the flying corps the standard of values is on a very different plane from that of average lay minds, writes a British military expert from the front.

This enlarged perspective has extended, though to a less degree, to the soldiers in the trenches, to whom the antics of an airplane, or squadron of airplanes, have long since ceased to be a novelty.

A Notable Pilot. One such pilot existed just at the time when the Germans introduced their much over-rated Fokker. This type of machine, and the tactics evolved with it, certainly scored an initial success against some British airmen.

Hair Raising Exploit. A British machine was engaged on a reconnaissance over the German lines when it was attacked by two Fokkers.

SUFFERING CATS! GIVE THIS MAN THE GOLD MEDAL. Let folks step on your feet hereafter; wear shoes a size smaller if you like.

MAIN. Is engaged in ten offices in New York City. Phone 45.

German fluttered down to earth so early damaged. The second Fokker, however, dived right behind the British machine, and so deluged it with machine-gun fire that the pilot had no course left but to attempt a forced landing.

The Briton "stalled" his machine, and managed to put several shots into the enemy from beneath. One shot killed the observer; another put the engine out of commission, and the Fokker, mortally hit, nose-dived steeply, throwing the dead observer out into mid-air.

The pilot was not finished with him. He circled overhead until the German had got clear of his machine, and then he descended further, and sprayed the Fokker with machine-gun fire till it burst into flames.

Upper Peninsula. Rains Extinguish Fires. A general rain over the upper peninsula as well as northern Wisconsin and Minnesota eliminated further danger from forest fires.

Seven Recruits for Navy. All of the seven applicants, six from Menominee and one from Marinette, for admission to the United States navy passed the examination successfully before C. W. Mazley, boatsman's mate of the U. S. N. S. "Ohio," together with Fred Thoms, in charge of the naval recruiting in the upper peninsula.

Cycle Driver Fined. George Sobiski appeared before Judge Waite in the municipal court at Menominee on the charge of being drunk, and while drunk, driving a motorcycle through the streets of Menominee.

BEEF SUPPLY PROBLEM HIGHLY IMPORTANT

Columbia, Mo., May 21.—With the prevailing high prices of foods and the recognized importance of an abundant supply of meats, the problems to be considered in furnishing beef cattle have increased in their significance, says a statement issued recently by the Missouri College of Agriculture.

The method of fattening cattle by the lavish use of corn, such as was the common practice when the price of grain was low, the statement declares, may not be profitable at the present prices. The extensive use of corn silage, when properly combined with other feeds, has demonstrated its efficiency and economy.

The University of Missouri marketed five lots of two-year-old steers on May 17, which marks the completion of a 120-day feeding test. The object of the test was to study the possibility of fattening cattle by the extensive use of corn silage without the addition of corn in the ration.

There were eight steers in each lot. Two of the lots, Nos. 3 and 5, received no corn other than that contained in the silage. One of these received in addition an average daily ration of 4.35 pounds of cottonseed meal and the other the same amount of oil process linseed oil meal.

The selling price was: Lot 1, \$12.40; lot 2, \$12.75; lot 3, \$11.85; lot 4, \$12, and lot 5, \$12.25. The profit on each steer with corn at \$50 a bushel and silage \$8.50 a ton, is as follows: Lot 1, \$0.08 (loss); lot 2, \$10.08; lot 3, \$11.59; lot 4, \$15.54; lot 5, \$9.24.

Venezuela has a tree the stem of which contains a milky fluid which flows out when a notch is cut. It is known locally as the cow tree or milk tree. Lemons Whiten and Beautify the Skin! Make Cheap Lotion. The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quart of the most remarkable lemon skin beautifier.

THIS BOY BOOSTS FOOD PRODUCTION

Eighteen-Year-Old George Ellis Willing to Plow Up White House Lawns.

Washington, May 21.—Into the hands of an eighteen-year-old boy has been placed the details of mobilizing 2,000,000 boys of America to grow food for the Allies. His name is George W. Ellis, and he says that if it's necessary he and his associates will plow up the lawn of the White House to grow potatoes.

Ellis is assistant national director of the Boys' Working Reserve of the United States, a volunteer organization of war workers enrolled under the auspices of the department of labor.

Hall and Ellis receive only nominal salaries, as their work is purely voluntary, though government sanctioned. According to the present plan, every boy in the United States between fifteen and nineteen who is physically capable of the work and who can gain the consent of his parents will be enrolled in a gigantic food army.

The boys who will enroll under this plan will be assigned to assist farmers in nearby country districts. The school-boys who volunteer their services in Washington will be sent to work on farms throughout Maryland and Virginia. These boys will be given full credit for their patriotic service by the school authorities, who will not permit time lost from their studies through this work to count against them.

"Plant! Plant! Plant!" This youngster Ellis, who is the assistant national director of the whole system, is something of a prodigy. He deserted his stenographer's she also draws a government salary—long enough to tell the world something of the task that confronts those who are engineering this plan.

"Do you know," said this boy of eighteen, with the smooth, official manner of thirty-five, "that there's not enough food in the United States to feed the country until next fall, if the supply were suddenly cut off? Do you know that the boys of this country have got to get out and serve or let the girls of America do it?"

"The people of the United States have got to plant, plant, plant. We've got to feed the Allies, and if our young men on the farms are to do military duty, we've got to get boys to take their places."

At this point, young Ellis was interrupted by the private secretary to Secretary of Labor Wilson, who desired a conference. And it was not a conference between an official and a subordinate; it was a conference of equals.

Ellis is not talking about what he has done before. He's never been employed by Uncle Sam, and the fact that his salary is nominal hints at an independent income of some sort. But he knows his business, and it doesn't take him long to convince one of the fact.

Ellis didn't say so, but he's the "man" who will do the work of handling this mass of detail. William E. Hall of New York, the director, is a busy man and his activities will be largely supervisory.

Knud Lee, Wannaska, Minn., writes: "For several years my daughter had a bad chronic cough. Not until we tried Foley's Honey and Tar did anything produce any great relief. In a few days the trouble entirely disappeared and has never returned." Contains no opiates; a safe, reliable, remedy; children like it. Sold Everywhere.—Adv.

It is doubtful if there is any work harder than house work. Overwork tells on the kidneys, and when the kidneys are affected one looks and feels older than the actual years. Mrs. A. G. Wells, R. R. 5, Rocky Mount, N. C., writes: "I cannot praise Foley Kidney Pills enough for the wonderful benefit I have derived." Sold Everywhere.—Adv.

MAINE NOT READY TO BUILD SHIPS

Yards Have Not Capacity for Big Vessels—Trained Workers Are Unavailable.

Bangor, Me., May 21.—Maine would welcome a revival of wooden ship building, and so the government's plan for the construction of a great fleet of vessels arouses general interest; but it is not at all clear how the government expects craft of 3,000 to 3,500 tons dead weight capacity to be built within such a short period as sixty days, or within six months, for that matter.

For many years the Maine builders of wooden vessels have obtained their frames from Virginia, "sour oak," so-called, and their planking and ceiling yellow pine; from the South Atlantic states, using native hard woods only for knees, breathhooks, hatch coamings, rails, etc. Of late it has been impossible, owing to scarcity of tonnage, to get material from the South, one vessel on the ways at Thomaston having been held up for months after she was in frame by delay in receipt of the ceiling and planking, which finally had to be forwarded by rail.

The frame of a ship cannot, like the frame of a house, be got out at short notice, and even after it has been cut it should be allowed time to season before being covered in. In the old days of Maine ship-building the hardwood frames and even the planking and other material were easily obtained from the forests close by the yards; but that time is long since past; the native supply of such timber became exhausted in the coast regions a generation or more ago, and for nearly half a century most of the materials have come from the South.

Maine might utilize her own native spruce in building vessels of moderate size, as is done in Nova Scotia, for, although it is not as good as oak for frames, not holding fastening so well, spruce grown near salt water makes a tough frame and a comparatively cheap one. For fifty years or more Nova Scotia has been building schooners of fifty to 500 tons almost entirely of spruce, and since the present war began great numbers of schooners, mostly three-masters and four-masters of 200 to 500 tons, have been launched from Provincial yards and have been making fortunes for their builders and owners while the Maine men have sat with folded hands, allowing millions of freight money to get away from them.

If the ship carpenters were to be had and the Maine builders could be induced to use their native materials, a big fleet of small to medium-sized sailing vessels might be set afloat within a year; but when the government talks of wooden motor or steam craft of 3,000 to 3,500 tons dead-weight capacity, which means from 2,000 to 2,400 tons net register, an entirely different and much greater problem is presented.

Cannot Be Thrown Together. A wooden vessel of 2,000 to 2,400 tons, to be fit to go to sea and carry heavy cargoes, must be "stiff" and strong, and to make her that way a heavy frame is necessary. She cannot be thrown together in a hurry with any sort of material and in a good fleet of the kind required can be undertaken here. Even if all the old-time yards were in operation not many of them could handle a 2,000 or 2,400 ton vessel, some not having sufficient depth of water in front of their ways to safely launch vessels of that size. Bath and one or two other places could undertake such contracts, but the dozens of yards that are scattered along the coast, many of them some distance up narrow rivers, would find it impossible. With few exceptions the old-time ships were of less than 1,200 tons net register, and the biggest ship ever built at Bangor, the Llewellyn J. Morse, is only of only 1,271 tons. Fifteen hundred tons was called big for a full-rigged ship up to the very last days of Maine's pre-eminence in wooden shipbuilding, and only a few places, like Bath and Thomaston, Rockland and Searsport, turned out vessels that big.

Only Two or Three Available. Many of the big schooners built at Bath, Camden, Waldoboro and Thomaston during the flush days of the eighties and nineties were larger in tonnage than the old-time ships, but few of them were so deep, being built on an entirely different model, for coasting service. The biggest schooner of all, the six-masted Wyoming, built at Bath in 1909 and just sold for about \$300,000, registered only 3,036 tons net, and there are few ports that she can get safely into.

If the builders can find enough heavy frames and other material to correspond, Bath and one or two other places might undertake the construction of steamers and motor craft of 3,000 to 3,500 tons capacity, but they cannot be built in any such hurry as Washington seems to expect. If, on the other hand, the government wanted a big fleet of medium-sized sailing vessels of motor ships and Maine native woods were to be utilized, Maine might help a lot—if the ship carpenters, riggers and sailmakers, caulkers and blacksmiths could be found. Wooden ship building, once dead, is difficult to revive, and in any event the resurrection cannot be sudden and to order.

ECONOMY WITH GOOD LIVING

is excellently attained by adding to the daily menu a ration of Grape-Nuts

Goodness—Energy—Ease of Digestion—Excellent Flavor—are all found in this truly remarkable wheat and barley food.

The heat is off—when you turn it off. You have instant heat for cooking. You can change from quick to slow heat by the turn of a handle. You can control the temperature exactly if you have a New Perfection Oil Cook Stove.

better paid pursuits, and how to fill their places will be the biggest problem in the construction of the vessels needed by the government. Yards Fallen Into Disuse. With most of the yards that used to flourish fallen into disuse and their equipment into decay, and with their crews long since scattered, it is difficult to see how much construction of the kind required can be undertaken here.

Don't Endure Itching Skin. We urge all skin sufferers who have sought relief in vain, to try this liquid wash, the D. D. D. Prescription for Eczema. All skin diseases yield instantly to its soothing oils. Its ingredients, oil of wintergreen, thymol and glycerine, have been used by doctors for years in the cure of the skin. The liquid form carries these healing ingredients down through the pores to the root of the disease.
