Lake Shore Engineering Company Paces War Production In Upper Peninsula

Its Plants Converted 100 Per Cent

When Donald M. Nelson chairman of the War Production Board at Washington, said in a recent statement that "every American factory engaged in war production must increase its output by 25 per cent, and do it now," the Lake Shore Engineering corporation, of Marquette and Iron Mountain, took him literally-and then some.

Today the Lake Shore is pacing war production in Upper Michigan with a 100 per cent conversion to the war effort; working from six to seven days a week, from 12 to 24 hours a day, and paying the "freight" for overtime. Its main plant in Marquette, and auxiliary unit in Iron Mountain, are as near to peak production today as they ever will be, with the present machine and manpower. But, more than that, the company is "farming out" increasingly large contracts to other manufacturing concerns in this and adjacent areas, in the effort to meet the unprecedented demand for war goods.

And that, if Nelson's orders are correctly interpreted, is the spirit so strongly every day at his office and mainspring of the entire war- in Washington.' production effort-to achieve maximum production in all plants which may be converted to the war program, from huge industries covering many acres of ground to the small lathe in garage or basement which hitherto has been merely the outlet for one man's

"This," Nelson added in his statement," is the job of American in-dustry and labor." And this, it now appears, is precisely what Lake Shore is doing, on a rapidly-expanding scale and in closest cooperation with the men who operate the hundreds of units, large and small, in the Marquette plant and the auxiliary unit in Iron Mountain-the former Anderson Ma-Working With WPB

In this program the Lake Shore is working hand-in-hand with the U. P. office of the War Production board in Iron Mountain, George Wallner, manager. Already Wallner has found outlets through the Lake Shore for several urgent orders reaching his office, and is on the lookout for other manufacturing plants in this area which can be converted to war production.

Designed many years ago to serve, primarily, the mining industry in the Lake Superior district, the Lake Shore has quickly adjusted its production to the war emergency. All departments of the two manufacturing units, are now operating 24 hours a day, from six to seven days a week.

At the outset, many employes in-. A. Flodin, president. and W. B. Thompson, vice-president, their willingness to work 12 hours a day in the defense program, and many more have joined their number in the succeeding weeks. Departments in Marquette Tax Exemption Deadline include: Engineering, working 12 to 15 hours a day; pattern shop, recently seven days a week; grey iron foundry, operating at capacity; machine shop, and plate and structural shop. The recently-Mountain is operating 24 hours a day, six days a week.

In addition to long hours overtime, employes have subscribed tion, Spanish American, Indian generously to the savings bond and stamp plan which the company has set up, in compliance with instructions from the Treasury Depart-Many War Products

cargo winches for the Maritime \$5,000. Commission ships; mechanical equipment for cranes which are being shipped to the Mediterranean; mechanical units for Navy yard cranes; cast iron bases for gun mounts; castings for shell machines and "snatch blocks" for the Army.

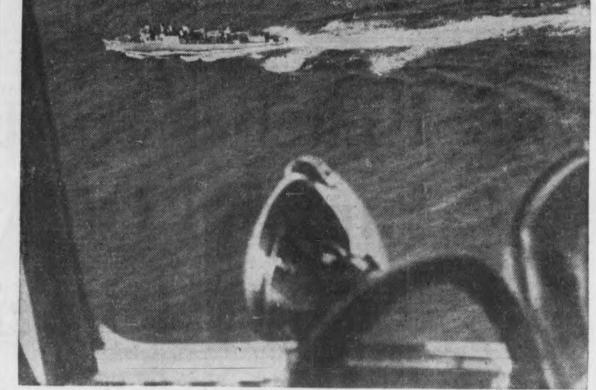

Since iron ore is essential for the manufacture of steel, mining machinery carries high priority ratings. The Lake Shore has supplied most of the mines in this district and recently completed two large hoists for the Mather mine of the Cleveland Cliffs company. In addition hoists have been turned out for the Sherwood mine at Iron River and the Greenwood at Ishpeming, both properties of the Inland Steel. Today the Lake Shore is building a large hoist for Pickands, Mather and company's Sunday Lake mine. Mine cars are being fabricated for several companies in this territory, and for others as far west as Idaho.

The great influx of war work taken on by the company has necessitated sub-contracting on some jobs. This has been achieved through cooperation with the War Production Board. Work has already been placed with the Calumet and Hecla Consolidated Copper company in its machine shop, foundry and pattern shop at Calumet and the machine shop at Tamarack. Similar work is being done by the Portage Lake Foundry, at Hancock, and the Copper Range company. Other work has been sublet as far south as Milwaukee. All Are Cooperating

"It has not been easy, in some instances, to achieve the conversion to war work," Flodin said; "yet the sub-contractors in every case have pitched in to make it possible and we commend that spirit which Donald Nelson urges

Viewing A Destroyer At Work

Army Seeks Officer School **Candidates**

Quotas for selective service regis-trants with 3-A classification who desire to enlist to attend Army officers' training schools are being set for local draft boards. The boards will consider each applicant and order the registrant to take a physical examination. The Army is seeking 75,000 new officers this

Preparations are being made at Fort Custer and other Army training centers to receive registrants desiring to enlist and apply for of-

ficers' school training.

VOC's, as the Volunteer Officer
Candidates will be known, will travel at their own expense to the nearest reception or replacement training center. There a final-type officers physical examination will be given, and the applicant will be interviewed and given the Army general classification test.

13 Weeks' Basic Training

Successful applicants will be sent a replacement training center on San Francisco underground orfor 13 weeks of basic training, having been processed through reception centers as other enlisted men. Applications for officers candidate schools may be made at any time in the replacement training center, but not later than 15 days after source of supply. Men holding key completion of the three months' positions and all others qualified basic training course.

Before four months' service all officer privileges.
An officer car fied of their acceptance or rejection study these applications has been for officer candidate training. Re- appointed at Fort Custer. At least els or any car with less than 1,000 lief from active service will be one officer on the board must be given to VIC's who request it after long to the arm of service for which four months' service, if they are applicants are applying. No Passenger **Car Retreads** Available

Many persons in this area are eligible for passenger car retread tires, but no tires in this classification are available for rationing this month because the Office of Price Administration did not set up a March quota for passenger retreads, Lloyd LeVasseur, county rationing chairman, said yesterday.

"It appears probable also that there will be no quota for April, becase the War Production Board did not authorize production of camelback in passenger car sizes in March," he said. "The only March quotas which Federal authorities have authorized for retreads apply to trucks and buses.

"We have received many applications from passenger car owners who believe they can have their tires retreaded," he added. "It would save their time and our time if they understood that in spite of the fact they are eligible, no quota has been made available."

Truck Buyers File in Lansing

Regarding the rationing of trucks, LeVasseur said applications for purchase of trucks must be filed with E. A. Moynihan, Bureau of Motor Carriers, Interstate Commerce Commission, 1608 Olds Tower, Lansing, Mich. They are not to be filed with the county rationing

After the applicant has filed his form with Moynihan, who is the local allocation officer, it is checked for eligibility and completeness as well as for accuracy. If it is as well as for accuracy. If it is approved it is sent to Washington, where approval also must be granted before application is forwarded to the War Production Board.

On final approval of the WPB, a certificate of transfer is issued by the WPB which entitles the wouldbe buyer to purchase the truck. The certificate is not transferable. "It is well to bear in mind that

this is a strict rationing program," LeVasseur said. "From present indications, no new trucks will be manufactured, at least before the end of 1943, and with the present inventory of 196,000 trucks, it is not probable that much, if any, consideration will be given users of commercial equipment who are not amounted to \$53.30, of which \$40.20 fully eligible.

Conservation Uppermost

"Conservation of present equipment should be uppermost in the mind of every truck owner during this national emergency."

Most consideration, it is indicated in information received by the local rationing board, will be given to prospective purchasers of vehicles used in connection with military forces, public health or safety, public utilities, police and chairman, were the best for any fire fighting; vehicles used princi- district in the county on a perpally in direct connection with the centage basis, final returns being war effort (transportation of food only \$125.16 short of twice the and defense materials) and vehicles quota. used indirectly in connection with

Road Weight Restrictions In Effect Now

Marking the start of the spring breakup period, weight restrictions on gravel and blacktop surfaced state highways in the Upper Peninsula went into effect yesterday.

Load limitations, which apply to trucks and other heavy commercial vehicles, represents a 25 per cent decrease from normal load limits on concrete pavements and a 35 per cent decrease on gravel roads or pavements without a concrete base

Restrictions on concrete highways in the Upper Peninsula probably will be placed in effect soon, G. Donald Kennedy, state high-way commissioner, said. Spring loading restrictions are provided for by law and are applied at the discretion of the state highway commissioner during the period from March 1 to May 31. Shoulders Soft

Shoulders on all highways are soft and motorists are advised to avoid driving on them unless it is necessary. To drive on the shoulders now is not only hazardous but the shoulders are also easily damaged by traffic, entailing additional repair costs.

Maintenance crews are now concentrating on work necessary to ombat the effects of spring thawing. Ditches and drainage structures are kept free of obstructions and in some cases holes are bored down through the subgrade to per-

agree with Senator Byrd's belief that "unless the OCD is stripped very promptly of such non-essential activities, what respect remains over the country for this organization will disappear completely."

Friendly Enemy Aliens

One of the most distressing things about this war, something which we are now discovering as the English discovered it before us, is that it means undeserved hardships for anti-Nazi Germans and anti-Fascist Italians within our borders.

These people are aliens, and most of them have arrived here so recently that they do not even have their first naturaliza-Subscription rate; BY MAIL, effective in all zones, 85c per month, \$2.50 three months, \$4.50 six months and \$9.00 yearly. FSA Helps Farmer In Many Ways

In the interests of national defense and to assist the farmer in every possible way, the Federal administration offers special real estate loans to farm families to refinance debts on land, renew other liens, pay taxes, pay off mortgages, improve their land, make repairs or build new buildings, buy additional land or to buy economic farm units, E. W. Banktson, of the Marquette FSA office, said yesterday.

"The loans are made to farm owners, tenants or laborers who, because of insufficient income, are unable to operate their farms successfully," he said. "Loans are made only to permanent residents of the community. They bear three per cent interest and are covered by first mortgage on the land. They are repaid in equal annual repayments for not more than 40 years.' Confer With Farmer

Banktson said the period of loan is determined by FSA officials after conferring with the farmer and making a close study of the operation of the farm. The new plan, he old system of giving rehabilitation and afloat indefinitely. loans to help farmers get needed livestock and farm machinery.

"The rehabilitation plan worked out fine in prairie states where farmers had lots of cleared land, and it helped in Marquette county also in cases where farmers here had 60 acres or more of cleared, but that isn't what we found in most cases.

"We found several families of five, six and seven persons living in small tarpaper shacks and with only 40 acres or so to support the family, and only five or 10 acres of cleared land," Banktston said. Troops, to fill vacancies caused by By appraising property, it is often the drafting or recall to U. S. To the People of Michigan . . . a Report

For the information of the people of Michigan who have entrusted to this Company the responsibility of providing the major part of the telephone service of the State, for the employees of the Company who operate the service, and for those who have invested their savings to build the telephone system, the Michigan Bell Telephone Company presents this report of its problems and accomplishments during 1941.

MONTHS of feverish expansion of Michigan's defense industries, capped by the arrival of war, made 1941 a year of unparalleled problems and important responsibilities for your Telephone Company.

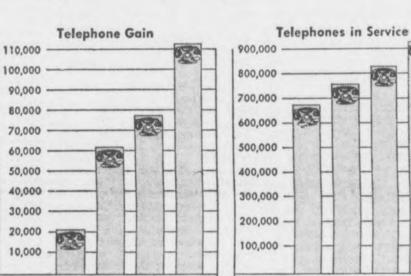

Before the outbreak of hostilities, the Company was engaged in meeting the greatest single-year expansion in its history. Expenses already were increasing faster than revenues. And throughout the year, a growing scarcity of materials essential to the business made it increasingly difficult to meet the unprecedented demands for service.

When war came, it not only multiplied an already tremendous demand for telephone service, but also made the swift handling of that demand even more vital to the nation.

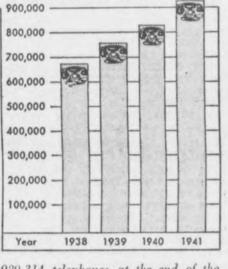

1941 saw the largest service demand in the Company's history

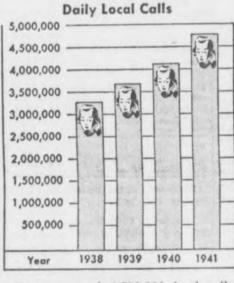

Under the pressure of the Defense and War Programs, industry and its workers used more telephones and used telephones more. Michigan Bell's rate of increase in telephones was nearly double the average rate of the Bell System as a whole. The volume of both long distance and local calls was the largest in the Company's history.

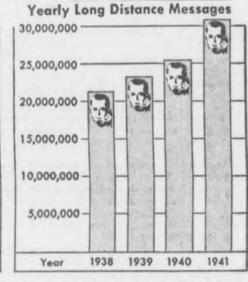

A telephone gain of 110,223, more than 41% above 1940's record growth.

929,314 telephones at the end of the year, 35% over pre-depression peak.

An average of 4,789,000 local calls daily, 17% above the 1940 record.

A record total of 30,137,000 toll and long distance calls, 19% over 1940.

1941 required record expenditure for construction

The tremendous demand for service required an expenditure of \$27,710,000 for new construction, a program which brought the total cost of telephone plant up to \$226,500,000.

1941 material shortage made job difficult

Construction work was handicapped by shortages of essential materials. Because those scarce materials also are essential to other defense industries, their use was held to a minimum through emergency engineering methods and by the use of alternate materials. Work was restricted to that absolutely necessary for short-period demand and material was salvaged which normally it would not be economical to salvage.

1941 construction required new financing

Financing of the construction program was greatly simplified by Michigan Bell's membership in the Bell System. To help pay for the expansion work, \$10,000,000 in common stock was sold to the American Telephone and Telegraph Company at par of \$100 per share. In December, the State of Michigan authorized issuance of an additional \$25,000,000 in common stock, to be sold as necessary.

1941 taxes totaled \$9,466,000

17 cents per \$1 of telephone revenue

Due mainly to rapidly mounting Federal taxes which support government and war activities, Michigan Bell's operating taxes for 1941 were \$9,466,000. That was the equivalent of 17 cents out of each dollar of revenue, or \$10.79 per telephone, or \$720 per employee, or \$6.59 per share of stock. We also collected, and paid the United States Government, approximately \$1,500,000 our customers paid as direct Federal tax on telephone service.

1941 wage rates were increased \$2,750,000

It is the aim of the Michigan Bell to pay wages in each locality that compare favorably with wages paid by other employers for work requiring similar ability. Adjustments in wage levels in 1941 totaled approximately \$2,750,000 on an annual basis, and brought rates of pay to a higher level than ever before.

1941 showed revenues UP, earnings DOWN

Revenues were higher than in 1940, but the growth in expenses, mainly wages and taxes, was greater than the revenue increase. Consequently, net income declined.

Revenues increased + 13% Expenses, including taxes, increased . . + 19% Net income decreased - 4%

Reduction in net income would have been even greater had it not been for the effect on taxes of the refunding in 1941 of certain toll revenues collected in previous years.

After payment of \$7 per share of stock, there was \$841,000 left for surplus, the "rainy day" reserve which every financially sound company must have.

1941 rates reduced \$1,500,000 annually

Local and long distance rate reductions placed in effect in 1941 will save Michigan telephone users some \$1,500,000 a year, based on current usage. In addition, \$1,500,000 was refunded to users of certain intrastate long distance service.

1941 brought 26% increase in workers

Rapid increases in telephone demand require corresponding increases in the number of employees. Additions during the year brought the total number employed to 13,872, a net year brought the increase of 26%.

AND NOW, THE WAR YEAR OF 1942

Summed up, 1941 was a year of challenging problems. To the men and women of the telephone organization, recognition is given for a job well done. The problems of 1942 will be greater than those of 1941. In military communications, in speeding our country's industrial production, in warning civilians of danger, in mustering defense workers, the telephone will play a vital role.

It is with confidence and sober determination that telephone people approach the 1942 job. While they recognize the increasing difficulty of supplying service demands as promptly as in the past, they are determined that every war-time need will continue to be met.

MICHIGAN BELL TELEPHONE COMPANY

Do You Keep Record Of Days 'Way Back When'?

(By MANTHEI HOWE)

Well, how did you like the heavy soggy snow that was dumped on us yesterday and was still sifting down

as this was written? I suppose it did accomplish something for some folk. At least I'm hoping that the exercise of slogging down to work through the heavy snow did something toward working off at least a sixteenth of an inch from my hips. It may be a forlorn hope but doggone it, 'twas something of a solace to my spirits. With all the slipping and sliding, and lifting of the feet, the workout out to do something for the poundage, if there is anything to the theory of exercising to reduce.

They Worked!

And all along the way householders were out huffing and puffing and grunting, on the business end of the snow shovel. The lads who have become a bit soft from lack of physical labor got a real workout yesterday and probably are hunting for linament to rub stiff muscles today.

The diverting thing is that one can't bear to give up and take the easy way out. Once deciding to walk, one walks even though on another day when walking was easier one might decide to take a

Well, if the scales this morning don't register at least a quarter of a pound less will I ever be "re-

However, this column wasn't to be about the weather, only when wet snow sifts down one's neck how refrain from yipping a bit? What I started out to write about was the fun of looking over old photo-

Went to the Photographer

Time was when every one had the family album out in plain sight on top the marble-topped, curlicued walnut center table in the parlor. EWT, Mondays through Fridays. There were no cameras in thos days and pictures were something of a luxury. Consequently folk val- Tri Mu Holds ued them the more nighly. And any family that had any family feeling Initiation, Dinner managed to get pictures taken of the children during the years.

the young folk was a bit more that one gains from an album or lor was given over to courting and a perusal is no end entertain-(though the door into the adjoining dining room was left standing wide open; the young couple, somewhat abashed by the knowledge of the nearness of listening paternal ears, likely found the old family album a good deal of a help. One probably could whisper things when flipping the heavy leaves of the

They Were Tossed Aside

Cameras available at a few dollars or as much as one wants to pay, put an end to the family album in most households. With snapshots being made dozens of times in a year, folk didn't bother, in most instances, to keep those pictures Some families have kept an album of snapshots, but many snapped the pictures, had them developed, exclaimed over them for awhile, and then left them lying around in a box, or between the pages of a hook, until every one has forgotten about them.

Yet those old albums had something to contribute, Reminder of that came the other night when looking over some old pictures. It's not such a bad pastime for a stormy evening, that thumbing over of old photographs. It is amazing how little some people change from childhood and on right through their sixties and seventies, and yet others will, in their adult years, bear no least resemblance to pictures taken when they were six or even sixteen years of age.

Equally amazing, too, is the fact that in looking over an album or box of old family pictures one finds 38 Silkworm. that a boy or girl who somewhat resembles the father or mother in childhood changes so surprisingly that when he is 25 or 30 he begins to look exactly like Grandfather Tobias of great Aunt Carolyn, And though no resemblance can be noted among cousins in childhood, in adult life there is the familiar marking of some feature or characteristic expression.

Even if one doesn't care two hoots about tracing resemblances to his cousins, uncles, aunts, or even parents, the old-fashioned album is fascinating for its reminders of changes in style and ways of living.

Album pictures showing the dress with the draped panniers and bustie, with the skin-tight basque; those showing the innovation of ankle-length skirts, and bloomers for bicycling; the suit the well dressed woman or man wore for snowshoeing; the coiffures of elaborate chignons, or even the short hair-cut worn by some women in Civil War days; the French twists, the fluffy and smooth pompadours; the hobble skirts and the very

Soo Indians Take Four-Goal Lead Over Sentinels In Wild Battle

Muzz Murray Stars In 4-0 Shutout

By Jimmie Ward

In one of the wildest, most riotous games seen at the Palestra in several years, the Sault Ste. Marie Indians shut out Marquette's Sentinels, 4-0, last night and gained a wide margin in the opening game of the four-game total-goal series for the "Doc" Gibson hockey trophy.

With Muzz Murray, Jr., Soo's spare goalie, turning back every puck thrust his way, the Soo forces rang up two goals in the first period and added one each in the last two periods to take a four-goal lead over the season champions with three games to go.

Fast an plenty exciting, despite slow, slushy ice, the game was largely a triumph for the alert Murray and an equally alert Soo defense that gave the home-bred Indian netman plenty of help. Taylor Scores Twice

One of the defenders, Al Taylor, also played an important role offensively. He scored the first and last goals of the night. Don Olson talied the second on an assist by Don Christie, and Tom McCormick chalked up the third with Duke MacDonald lending a helping hand.

Marquette kept punching all the way and played a fine offensive game, as a whole, but if there was any possible way to slip one past Muzz last night, the Sentinels had not heard of it.

He played phenomenal hockey, particularly in the third period first three minutes and 45 seconds training to be Marnie pilot. of play while Christie was serving out the rest of a five-minute penalty for cutting Frank Laurich's face with his high stick. Most of them were sensational saves.

Game Delayed 20 Minutes Taylor laid the foundation for Soo's four-game total by beating Goalie Wolff after Frank Deagle had been sucked out of position in making a futile stab at a loose puck in mid-ice. Charlie Good and Taylor bore down on a lone Marquette defenseman and the latter easily whipped in the first goal of the game and the one that swung the

Down Sports Trail

By WHITNEY MARTIN Wide World Sports Columnist

NEW YORK, March 17 - With Bernie Bierman, Jim Crowley, Biff Jones, Bob Neyland and other top-Uncle Sam, it seems the big queskind of coaching material the play-

If this steady flow from campus to corps keeps up there's liable to be stiff competition for the services of flat-wheeled, gouty gents guaranteed 4-F in any draft, with enough torn up contracts for the snow effect in Eliza crossing the ice. History has shown those coachschool contracts are tied at only one end anyway, and that whenever a coach finds a better job the school holding his contract agrees with three rousing, silent cheers.

Problems for Army Coaches

Seriously, the coaches who are answering the call and are being assigned to coaching duties in connection with the service units at various schools face problems to which they are strangers.

To begin with, they won't have any sophomoric alumni galloping around the country rounding up sturdy young high school graduates with a leaning toward footall from a barn door.

Plans Made for State Fair, Despite War

LANSING, March 17- AP -The board of managers of the Michigan state fair today unanimously voted to go ahead with plans for the annual exposition at Detroit September 2-13, despite the war.

Members declared the fairgrounds would be turned over to the Government if a formal request was made for the facilities in the war program, but meanwhile plans for the fair would go ahead

Bernard J. Youngblood, fair manager, said Government agencles had conducted frequent surveys of the fairgrounds, but failed to state definitely whether the site would be used for military purposes.

First FBI Film To Be **Shown Today**

NEGAUNEE, March 17 - The first of a series of motion pictures for aiding the civilian defense program will be shown at the Vista cheater Wednesday and Thursday, it was announced today by Jafet Rytkonen, theater manager.

How motion pictures can help America's war effort is effectively demonstrated by the Metro-Goldwyn-Mayer short subject, designed specifically to instruct the public in precautionary methods against fifth column activity in the United

Titled "Don't Talk," the Crime Does Not Pay two-reeler dramatizes a typical sabotage case, such as encountered by the Federal Bureau of Investigation in a vital defense industry.

In Eastern Plan

The case demonstrated begins in a big eastern plant which has on hand a large quantity of ferromanganese, an ore most essential in the making of machine tools, Suddenly the wail of a siren breaks plant. A terrific explosion follows, completely demolishing one of the storage bins.

FBI agents, examining the charred ruins, determine that the explosion was caused by an incendiary bomb. They also learn that the presence of the manganese was a carefully guarded secret known only to the five trusted employes who unloaded the shipment.

Each Questioned

Each is questioned nonetheless. The FBI men learn where they shave, what bars they patronize, where they eat. The G-men center their attention on a waitress in a nearby restaurant when they find false statements in her employment nections with a spy ring.

The Federal men are stumped as to how information is relayed They finally discover that the menu messages. Decoding the waitress' next message on the card they high school. learn that the spies were aware of an important shipment to be made by train the following night. They arrange to have the shipment made by truck. One of the loaders is injured and, after being bandaged, meets his wife in the restaurant and tells her how it happened.

Caught in End

BANKS PLEDGE PRESIDENT ROOSEVELT

Complete War Support

Banks have an important part to play in war time as well as in peace time. Not only steel, but money, is needed to build planes and tanks and guns. Banks are the "supply depots" of the nation's dollars.

We are glad to do our part. In the words of the President, we consider it a privilege to do everything we can to make the facilities of this bank helpful to this nation in its hour of trial.

FRECKLES AND HIS FRIENDS

'Frisco Eager To Get Going On War Job

BY FRED S. FERGUSON President of NEA Sevice

SAN FRANCISCO, March 17-There are a lot of indications as you go from place to place in this big country that there are thousands of people who would like to "get in there and pitch" in the war effort if they had somebody to just tell them what to do.

The apathy complained about in Washington isn't, from what may be judged in traveling a bit, necessarily all the fault of the folks back home. These folks are raring to go -certainly they are on the Pacific Coast, if some definite leadership will tell them what to do.

It's as simple as this. Art Caylor, who knows his way around San Francisco, does a daily column for the San Francisco News. Some shipyard workers, employed in the Bethlehem yards, wrote to Art and suggested they'd like to do more work. 'They'd like to feel they were really contributing something for which they weren't being paid, and wondered if they could work Sundays for nothing.

Caylor was interested, and the shipyard workers came in to see him. With some encouragement, but not being sure what the union reaction would be at the time, they started circulating a petition. It

But at last reports, some of the 15,000 employes at Bethlehem had signed the petition, volunteering Sunday work without pay to speed up ship production. It took a few days more before the plan was given the blessing of the proper labor council. Then it was endorsed by this one and that one, and if somebody who is big enough to make his endorsement heard all over the county speaks up, maybe Art and the Bethlehem boys started something.

Farmers Offer Scrap Iron

While this was going on, people in other fields of work became in- visitors show this reaction. terested, too, in building more ships, A man in a farm community wrote in and suggested that there was probably enough iron scrap rusting away behind barns, in the county, to build a ship if it could just be collected on a volunteer patriotic basis. The farmers would not sell the old equipment as junk.

Everybody can't be an air-raid watcher, but they are willing to do almost anything, if they are

Skaters Will Return

SAULT STE, MARIE, March 17 -The Brunets are coming back next summer, it was announced today by Fred C. Stephenson, president of the Hiawatha Skating club, under whose sponsorship the summer program of skating and pop concerts will be carried out. The Brunets are Pierre Brunet and Andree Joly, Olympic skating champions, whose performances on ice in pop concerts here last summer were the highlights of the skating season. in the Sault will start July 14 and continue eight weeks. The program will be under the direction of the Brunets who will also arrange the pop concerts and the mid-summer ice carnival.

Parolee Jailed

ESCANABA, March 17-Ambrose Beaver, Nahma Indian arrested by state police officers near Gladstone last Saturday afternoon and charged with driving under the influence of liquor, was sentenced here yesterday by Justice of the Peace Henry Ranguette to 90 days in the county jail. A parolee from Marquette prison where he served part of a sentence for negligent homicide, Beaver may be returned there to complete his sentence, state police officers said. The case has been turned over to prison parole authorities. Beaver was driving without an operator's license, his permit having been suspended following his conviction in the negligent homicide case in

Lightning Tags Her Bed; Leaves Girl Unscathed

Lightning splintered the wooden leg of her bed and knocked the metal caster across the room, but it was a slow process as the petition did no harm to three-year-old Marilyn Kaye Engstrom, of Grand Rapids, who was asleep in the bed. "It had to be circulated during lunch felt like a big wind," was all Marilyn could tell her parents.
