**Council Takes Step Preparatory to** Paving of that Street in the Coming Spring.

### PLANS BEING PREPARED

City Surveyor to Make Specification and Estimates for Both Brick and Bitulithic Pavements.

In order that there may be as little elay as possible with the paving of Ludington street next spring, the city council on Tuesday evening directed the city surveyor to prepare specifications, plats, diagrams and estimates of cost for the paying and curbing of that

street from the east line of Smith Court to the west line of Stephenson avenue.

Although at the time appropriation made last fall it was specified that peninsula that the interests of a larger the material used should be vitrified brick, the council has decided to receive bids for both a brick pavement and a bitulithic pavement, and specifi-

FOR ANOTHER DISTRICT Started to Give Upper Another Congressional District.

A movement which has been start-ed at Lansing to provide for the for-mation of mother congressional district to be comprised of territory in the southern portion of the northern penin-sula and a few of the most northern

sula and a few of the most northern counties of the lower peninsula, is gradually gaining exponents in the ter-ritory that may be affected. Members of the legislature and sen-ate at Lansing whose districts would be affected by the change have been discussing the idea with their fellow legislature and it is said that a favorable feeling is growing among the mem-bers of both houses.

It is pointed out by the exponents of the idea that the territory comprising the Tweath congressional district in

the northern peninsula has many interests that are distinctly opposing to each other. It is said that while the interests of

one factor in the district are being conserved that the interests of another factor must be slighted and it is thought that should another division of the territory be made in a few of the counties along the southern portion of the upper

number of people could be better conserved than by the present arrangement.

Whether the movement will take lefinite form at this session of the legislature and result in the formation of a bill to be introduced is not known bat such action may be taken.

HARRY TYRRELL MARRIED

Harry Tyrrell, station agent on the Northwestern road at Spalding, and son of Mr. and Mrs. Stanley Tyrrell of this city was married on Sunday Jan. 29 to Miss Mayme Rose of Spalding. We clip the following account of the wedding from the Powers-Spalding Tribune.

On Sunday evening in Powers occur-ed the marriage of Miss Mayme Rose, the eldest daughter of Mr. and Mrs. John Rose of Spalding, and Mr. Harry Tyrrell, the popular young station agent at Spalding and a son of Mr. Stanley Tyrrell, engineer on the Watersmeet freight.

The wedding was a quiet one, and but few people in Spalding were aware of the event until Monday evening, although their friends suspected that they would be married some time this week.

Mr. and Mrs. Tyrrell are well known in Spalding and have made a host of friends, since their arrival in Spalding, who wish them a happy and prosperous journey though life.

The February "Smart Set." Readers of The Smart Set have learned to look upon the complete novel that appears in each issue of that magazine as the biggest event of the month in fiction; but even the most enthusiastic reader will be happily surprised by the story in the February number. Beyond a doubt "The Eavesdroppers," by Arthur Stringer, will prove one of the sensations of the year. The story deals with the careers or two daring criminals-a man and a woman-whose astonishing adventures the reader follows with breathless interest. From the very opening sentence the tale becomes one of rapid and exciting incident, and, moreover it is written with that literary distinction which always characterizes Mr. Stringer's work. Different as "The Eavesdroppers" and "Raffles," it combines all the interest of those stories with a movement and intensity entirely its own. It is a notable achievement for the author, and will prove a notable novelette in The Smart Set's long list of successful stories.

### BEST BUILDING MATERIALS. THE LOUISIANA PURCHASE.

from Expert Investigators of Baltimore Fire.

One of the standing committees of the National Fire Protection association devotes its attention to those features of construction which are best designed to check the progress of a conflagration. Immediately after the Baltimore disaster of February last, reports the New York Tribune, this committee entered upon an elaborate. investigation of the damaged property, with a view to obtaining such fresh information as might be afforded thereby.

It was hoped that a report would be ready in the spring or early summer. For some reason its appearance was delayed much longer. The document was distributed only a few days ago. In spite of its tardiness the opinions there embodied will prove of immense value to insurance men, architects, owners of large buildings and to those municipal officers who have occasion to study the essentials of fire resistive construction.

The committee was composed of 12 well-known experts, and in the performance of this special task had the assistance of four others. So authoritative an expression as that of these men has not appeared before in many years. Perhaps it is without precedent since the era of steel frame buildings. opened.

The first topic treated in the "conclusions" of the committee is the necessity for suitably shielding the metal columns, floor beams and other

figures compiled by the department of commerce and labor through its bureau of statistics with reference to the production and business conditions in the area included within the various

great additions to our territory, says the Washington Star. The land area of the Louisiana purchase exceeds that of the original

thirteen states, being 875,025 square miles, against a land area of 820,944 square miles in the original thirteen states. The states and territories which have been created in whole or in part from its area number 14 and their population in 1900 was 14,708,-616, against a population of less than 100,000 in the territory at the time of its purchase. Their total area is nearly one-third that of the entire union and their population about onefifth that of the entire United States. The total value of the agricultural products of the states formed from the Louisiana purchase, including in that category simply wheat, corn, oats, bar-

steel and iron members of a modern structure. The committee affirms in positive terms that nothing serves so effectively as well-burned brick, laid in cement mortar. Hollow tile lack stability; they do not stay in place; they are also perceptibly affected by severe heat. Plaster blocks are pronounced inferior to terra cotta.

Hollow tile proved unsatisfactory for floor arches in Baltimore for a variety of reasons. Sometimes the arches had too wide a span to insure strength. Sometimes they were not properly overlaid with cement. Often the lower layer of the tile-technically known as the web-would break under intense heat and thus weaken the rest of the tile.

Almost invariably the lower flanger of the I-beams in the floors showed that they had been inadequately protected. One form of covering failed because it was held by exposed metal clips. Another proved defective because the skew-backs-projections from the adjacent arch tile-broke and released their burden. On the whole, for increase of more than \$254,000,000 in arch construction cement "seemed to individual deposits during the period. stand up well," although it was not extensively used in Baltimore.

For exterior walls, those in front and rear, nothing has been found that is comparable with good brick. Stone suffers much more from fire. On the sides also the walls should be of brick and thick enough to stand alone if the adjoining buildings collapse. Even in partitions terra cotta, plaster blocks and metal lath proved unsatisfactory. The committee qualified its disapproval by limiting the same to the present methods of employing these materials. The best type of partition tested in the Baltimore fire was one composed of five-inch tile, but the latter usually became loosened, and hence ceased to do much good. The significance of this part of the report is enhanced by an additional comment of the committee relative to the proper subdivision of large floor spaces, like those in a department store. It declares that without a sufficient number of interior barriers the contents of a "fire resistive" building are scarcely safer than in one of the most careless construction.

This will be the first statue of a woman to appear in the capitol, but Illinois is proud to honor the great character and work of Miss Willard, which have made the state famous. One of the finest statues in this collection is that of a Jesuit priest, Pere Marquette, whose memory the state of Wisconsin has honored with a beautiful Parian marble presentment of this \_\_noted discoverer, missionary, priest and historian. At first there was some narrow-minded opposition to the admission of a statue of a Catholic priest, but as Wisconsin had selected Father Marquette as her greatest representative the statue could not be excluded from the hall.

So far there are but 19 states represented in Statuary hall, and some of them by only one noted son. Some of the newer states are waiting to see what the future and their history may reveal before selecting the man or men who might best represent them in this group. with any proposition to amend the present tariff laws. He says he wants a bill of particulars brought in to show wherein the present law works any injustice to the country. The other day he called at the white house and had a talk with President Roosevelt on the subject. The Remedy That Makes New Blood Banishes Weakness, Headaches, Indigestion and Nervous Troubles.~

Hundreds of women suffer from headaches, dizziness, restlessness, languor and timidity Few realize that their misery all comes from the bad state of their head, another for their stomach. a third for their nerves, and yet all the while it is simply their poor blood that is the cause of their discomfort.

If one sure remedy for making good, rich blood were used every one of their distressing ailments would disappear, as they did in the case of Mrs. Ella F. Stone, who had been ailing for years and was completely run down before she realized the nature of her trouble.

"For several years," said Mrs. Stone, "I suffered from general debility. It began about 1896 with indigestion, nervousness and steady headaches. Up to 1900 I hadn't been able to find any relief from this condition. I was then very thin and bloodless. An enthusiastic friend, who had used Dr. Williams' Pink Pills, urged me to give them a trial and I finally bought a box.

"I did not notice any marked change from the use of the first box, but I determined to give them a fair trial and I kept on. When I had finished the second box I could see very decided signs of improvement in my condition. I began to feel better all over and to have hopes of a complete cure. "I used in all eight or ten boxes, and

when I stopped I had got back my regu-lar weight and a good healthy color and the gain has lasted. I can eat what I Dr. Williams' Pink Pills to women who suffer as I did."

Mrs. Stops was seen at her pretty home in Lakewood, R. I., where, as the result of her experience, Dr. Williams result of her experience, Dr. Williams' Pink Pills are very popular. These fa-mons pills are sold by all druggists. A book that every woman needs is pub-lished by the Dr. Williams Medicine Company, Schenectady, N. Y. ### SATURDAY, FEB. 11, 1905.

The people want a primary election law which will do away with cancuses and convention se es dly controlled and manipulat. ed by scheming politicians. The right sort of primary election will give every vo'e a direct vote on every candidate for office without the interferance of convention trading or trickery.

No honest voter wants any thing but a free ballot and a fair count. A party primary election should be guarder against bribery and corruption.

Every good party man favora law which will punish rascality in party politics. The caucuand convention methods cover trickery, trades, sacrifices and agreements by the politicianwhich the rank and file vote knows nothing of and has to be whipps d into line to stand for

Then independent voter anand bolter is the direct result of the convention and caucus noninatiny system. The primary election puts out of business both big and little bosses.

There isn't much party discord when all have a chance to vote direct on a candidate and have the vote counted. Under the primary system, the candidate must stand before the people on his merits. The convention system is apt to name candid. ates who fail of nomination by direct vote.

It will evidently prove very disappointing and depressing to the editors and Washington correspondents of a number of so called independent newspapers if President Roosevelt shal continue to show favor for npublican policies and to indicate the possession of respect for republican pledges. From thes Washington correspondent have come almost daily report as to the woeful break that wa about to occur between the preident and his party. The r publican leaders are opposed to the president's plans, these corr spondents tell us and the presi dent prefers to go it alone, they hasten further to suggest in ex plainations of their prophecies o: party dissension. In the mean time, however, it is noted by those who are in normal health and not disturbed by bad dreams that President Roosevelt is doing his best to meet the expectation of the American people as created through republican policies and that the republican leaderin congress are cordially doing t'er part in their own legisla tive spheres to assist in the same d # rable end.

FARMERS NEED NO LICENSE Ossouri Supreme Court Decides He Osn't Be Fined for Vending Own Produce in City.

St. Louis .- As a result of a decisio of the supreme court of Missouri in the case of Henry Meyer, License Commis-sioner Clifford will be unable to collect the \$50,000 per annum he expected from the farmers of St. Louis county. Mr. Meyer, who is president of the St. Louis County Farmers' club, was prosecuted by Mr. Clifford in the police court for iolating a city ordinance in peddling farm products in St. Louis without a peddlers' license. He was fined \$25.

He appealed to the court of criminal correction, which sustained the lower court. His attorneys, George W. Lubke, Jr., W. F. Broadhead, of Clayton, and William D. Jones, of St. Louis, thereupon appealed to the supreme court.

In a decision written by Judge For the supreme court reverses the judgment of the lower courts, remits the fine against Meyer, and discharges him.

The decision ends a long contest adversely to the city. Since coming into office Mr. Clifford has diligently endeavored to collect all possible licenses due the municipality. When an ordinance was passed demanding that every person who sold farm products from house to house should pay a peddlers' license took to enforce it against the farmers of St. Louis county. They resisted it, and Mr. Meyer agreed to submit to a test CASE.

The position taken by the farmers, and there are said to be 3,000 of them in St. Louis county who at times sell their products in the city, was that a state law exempted farmers who sold only their own farm products from paying a peddlers' license. Their attorneys held that the ordi-

nance passed by the municipal assembly subsequently was in contravention of this statute and therefore illegal. This contention, it appears, has been sustained in the opinion of Judge Fox.

CREW CAPTURES RARE BIRD

A Gannet, Native of Gulf of St. Lawrence, Caught by Sailors Off Boston.

Boston .- The fishing schooner Meteor, which arrived here the other day, 50c. and SI. Al Druggin brought a bird rarely seen in these waters. It was a gannet, a species of sea fowl that rarely leaves the waters of the gulf of St. Lawrence, and is seldom seea below the grand banks. The bird was a handsome specimen, with a spread of wings fully six feet. It was game, and full of fight, and was tied by one of its wings to a deck post. The bird hovered over the schooner as she 'ay to about 70 miles southeast of Highland light, and one of the crew determined to catch it. He balted a hook with a piece of meat and threw it overhoard. down from where it was flying, 70 or 80 feet above, and selzed the hook. It was pulled on board, and after a hard fight the book was taken from its mouth. The bird was kept on deck, tied to

the post, until the other morning, when It was shown to the old fishermen at the wharf as a curiosity in this neighborhood. After everyone had seen it. it was set free and rut on the rail. It dived at once into the water and swam out from the vessel until about 200 feet away. It then tried to fly, but as it. feathers were wet through it could not rise, and continued to swim down the harbor, trying at intervals to rise.

While it was aboard the Meteor, the crew took good care of the bird, and fed it saveral times a day. It had t voracious appetite and ate eight large herring oach day. Before setting it free it was fed again, and consumed three large-sized herring.

### MACARONI WHEAT BEST.

Colorado Farmers, After Tests, Find They Can Raise the Cereal Without Irrigation.

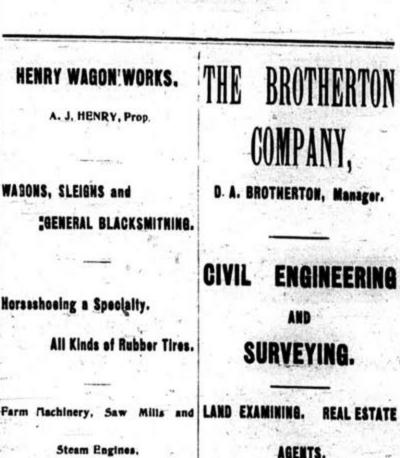

Denver .- Macaroul wheat for Colorade farmers. It needs no irrigation.

That is the slogan raised by the state agricultural college, which is now en gaged in a sampaign to show the wheat raisers of the state that this variety is not only a more hardy and a better grain than the ordinary sorts, but that it is also much more prolific under discouraging conditions.

Walter H. Olin, of the department of agronomy, and Prof. W. L. Carlyle, also of the college, are enthusiastic about it. Mr. Olin reports that within the last few months the college has made extensive tests of the macaroni, or durum wheat, and that it has been found to be better in all ways for practical use than the common spring or winter wheat now raised on the farms of Colorado. Individual tesus were made of Colorado spring wheat, Kansas hard winter wheat, durum wheat and Pillsbury's best flour for baking purposes, lightness counting 20 points, tenderness 20, flavor 20, texture 10, color 10, and general appearance 20. The tests were exhaustive the result being 91 points for durum wheat, 59 for Pillsbury's flour, 88 for Kansas winter wheat, and 83 for Colorado spring wheat. Laboratory tests also showed that the durum wheat contains a larger percentage of both sugar and gluten than do the common sorts, making it therefore more palatable and more directible when esten in bread.

Tests on various farms in Colorade have also shown that this wheat can be raised more advantageously than can any other variety known. Next door to postoffice. Both

### A FELLOW FEELING.

### Why She Felt Lenient Towards the Drunkard.

A great deal depends on the point of view. A good temperance woman was led, in a very peculiar way, to revise her somewhat harsh judgment of the poor devil who cannot resist his cups and she is now the more charitable. She writes:

"For many years I was a great sufferer from asthma. Finally my health got so poor that I found I could not lie down, but wasked the floor whilst others slept. I got so nervous I could not rest anywhere.

"Specialists told me I must give up the use of coffee-the main thing that always thought gave me some relief. I consulted our family physician, and he, being a coffee fiend himself, told me to pay no attention to their advice. Coffee had such a charm for me that in passing a restaurant and getting a whiff of the fragrance I could not resist a cup. I felt very lenient towards the drunkard who could not pass the saloon. Friends often urged me to try Postum, but I turned a deaf ear, saying: "That may do for people to whom Hoch, wanted in Chicago on a charge coffee is harmful, but not for me-cof-

> "At last, however, I bought a package of Postum, although I was sure I could not drink it. I prepared it as directed, and served it for breakfast. Well, bitter as I was against it, I must say that never before had I tasted a more delicious cup of coffee! From that day to this (more than two years) I have never had a desire for the old coffee. My health soon returned; the asthma disappeared, I began to sleep well and in a short time I gained 20 pounds in weight.

> "One day I handed my physician the tablets he had prescribed for me, telling him I had no use for them. He stayed for dinner. When I passed him his coffee cup he remarked: 'I am glad to see you were sensible enough not to let yourself be persuaded that coffee was harmful. This is the best cup of coffee I ever drank,' he continued; 'the trouble is so few people know how to make good coffee.' When he got his second cup I told him he was drinking Postum. He was incredulous, but I convinced him, and now he uses nothing but Postum in his home and has greatly improved in health." Name given by Postum Co., Battle Creek, Mich.

The Why of It Most factories either close or run with only a few men durmany of their high-class workers. We want to keep our large force busy all the time, so make this exceptional offer. Remember, we can only build the 1,000, as our factory must then take up our heavy spring work. We build and sell more high-class vehicles than any other factory in America selling direct to the uper

direct to the users.

### How Do You Want it Built?

Body Plano box or Corning style ? 22 x 54 inches of 24 x 54 inches? State which. It will be the same grade of body we use on our \$46.00 buggy.

Gear End spring (like cut) or Brewster ! State which-if you do not, we will send end spring. Gear will have a !!-inch high-grade axle and highest grade oil-tempered springs made. Wheels Do you want 28x 42 inches or 40x 44 inches ! These will be Barven patent, selected hickory, 14-in. tread and 14-in. tire, regular stock.

Top 8 or 4 Bow-which do you want? It will have leather quarters, and well made in every way, with heavy rubber side and back curtains.

Painting Be very careful to state what you want. We will red. Body-a plain gear either a nice, dark green or New York mottled green. Our painting and decorating is all done by hand - no disains.

Trimming An extra quality of dark-green Union body cloth or whipcord or Keratol leather. State which you want. The work is done by the highest class of mechanics we can secure. Spring seat and back.

Furnishings Leather dash; boot, with springs; rubber storm apron; carpet; trimmed all-hickory shafts; wrench, and anti-nitlers. Everything complete. Nicesy packed with dust-bag, and guaranteed to arrive safely. You could not duplicate elsewhere for less than \$50.00.

Our Guarantee "Free Trial" or "Ship for Inspection" offer ever made. There is NO TRICK in our guarantee. READ IT carefully. It's very plain, and made to protect you.

We furnish with every job a ONE YEAR GUARANTEE, in which we agree to replace free of charge, or repair any part that may break from defect in material or workmanship. We do not, however, allow unauthorised repair bills. Also understand that in addition to this rusrantee we make this offer: Any job that you purchase, if it is not better made and better finished than you could buy anywhere else at the price, or if it is not satisfactory in every way, you may return it and we will refund the purchase price and pay the freight both ways.

Just think of such a strong and liberal guarantee | We couldn't afford to ship a poor job, could we t

### We Know What's Under the

Paint A very important thing to know in any case, but of a guarantee to please. It was for this reason that we made an investment of over \$100,000 in a plant covering for a guarantee to please. It was for this reason that we made an investment of over \$100,000 in a plant covering for a guarantee to please. It was for this reason that we made an investment of over \$100,000 in a plant covering for a guarantee to please. We have the buy the materials ourselves -- wheels, bodies, etc. We have every plece that we made to see that it is up to the grade. We had the factory focated near us, so that we could be intimately connected with the building of our work, and know exactly what we are giving a militude of defocts, and does do it where the work is built for profit cely. We have other lines to sell, and hence could not afford, for the little we make on each ale, to mislead any one of our customers. As good vehicles for the money never were fixed outside of this house. We say this after very careful investigation among factories who furnish materials to nearly all bugg concerns, and also after having purchased inlished valicies and for a them to plezes to see of what they were made. You would be surprised if you knew what is in some of the buggies

offered by "loud-talking" houses. They cheapen the work where you will not notice it. We place our reputation of 83 years' standing back of this statement: We are giving our trade better wheels, better gears, better bodies, better finish, and a better job throughout for the money than any other factory in America.

## Free Vehicle Catalogue Int have a

Free venice catalogue not have a copy send for one at once. We have 200 different styles and kinds of vehicles, with prices from \$10.95 for a cart to \$150.00 for a surrey, and are building and selling more first-class work; more good, honest work than any other catalogue house in the world. Our rapidly growing vehicle business means comething; 50,000 people all over this country would not have sent us their orders last year if they were not convinced that they were getting more for their money here than elsewhere. If you want a job that will only last a few months, we cannot sell you -- we abso-lutely refuse to have such material in our factory. We are offering good work, vehicles that will give you good, long, setts-factory service. We want to sell you relatives, your neighbors and your friends. The essential thing in a purchase is, "What will get for my money t" If what you buy here does not please you, remember it may be returned at our expense. Fair, isn't itt

What Others Say "I know I have saved \$40.00 by buying from you." "My buggy far actly the same as your \$42.00 job." "I have just sold the buggy I bought of you 8 years ago for \$85.00; only paid \$87.50, new."

Do It Now Bend your order in at once. The 50c first remittance is merely an evidence of good faith. Be careful to say just what you want. We will secure the best freight rate possible for you. It will, however, be a small matter when compared to the excellent bargain you get in this job. If this job does not suit, do not buy until you see our Vehicle Book.
