HAD PRETTY WEDDING

Miss Elizabeth Corcoran and Edward M. Hogan United in Marriage

Miss Elizabeth Corcoran daughter of Mrs. Anna Corcoran and Edward M. Hogan of Hermarsville were married at eight o'clock Wednesday morning at Leonhard E, Arnson Fell Into- Water St. Patrick's church.

The wedding was a very pretty one and was attended by many friends and relatives of the bride and groom. Rev. Father Corcoran of Manistique, a BODY WAS RECOVERED brother of the bride performed the ceremony assisted by Rev. Father Barth of Stephenson and Rev. Father Buchholtz of Munising.

The bride was attended by Miss Margaret Corcoran as maid of honor and the Misses Gertrude Haring and Grace Doyle, cousins of the bride, as bridesmaids.

A. L. Hogan of Hermansville, brother of the groom acted as groomsman. An elaborate wedding breakfast at the home of the bride at 1000 Wells

avenue followed the ceremony.

Mr. and Mrs. Hogan left in the evening for a short wedding trip after which face. they will go to Hermansville to make their home.

Nothing more Charming

That there is a certain charm about everything, connected with Japan can not be denied and that, that country has not been used before in which to lay the action of a Comedy Drama is rather strange, and the only conjecture is that authors have not made a study of that strange land. It remains for G. Harris Eldon to commission, that well known American dramatist, H. Grattan Donnelly, to take up that country and present it to the theatre goers in its true light. To be accurate and to gain full knowledge of the Japanese, Mr. Donnelly made a trip to Japan and his observations while there furmished him his plot for this Comedy Drama, that will be a revelation to all. The beautiful scenery and costumes will be especially attractive, but they will be secondary compared to the singing, dancing and comedy which prevades throughout the the entire performance. That a pack house will greet this attraction, there is no doubt and therefore it is advisable to arrange for tickets early:

"QUINCY ADAMS SAYER"

Will Play at Peterson's Opera House This Evening

One of the most successful rural dramas of recent years, "Quincy Adams Sawyer." The play tells a story of more than usual interest and its characters are not simply stage creations, but

"Quincy Adams Sawyer" the novel upon which the book was founded, attained a remarkable popularity and the dramatization promises to find even more favor as it preserves the charm of the book and lends an added interest with its pretty stage pictures and clever characterizations. In fact it is one of graced the Peterson opera house for several seasons.

The most novel and amusing scene is that in the farm yard where and old fashioned husking bee is shown. There is singing, dancing, and kissing, and a sucession of laughable episodes that keeps the audience in continuous merri-

The company is for the most part capable and the stage settings are unplays the title role in a manly and sincere manner, and Lucy Millikin gives a pleasing impersonation of the blind Alice Pettengil, Clara Coleman furnishes an abundance of grotesque fun as Samantha, and S. H. Verney and Katherine Cherry also contribute largely to the merriment by their portrayal of their different parts. -

Not Decided Yet

The question of a site for a new government building, for which Congress appropriated \$50,000, has not been settle1. Aug. 1 was the date set for the opening of bids and propositions for a site but so far nothing is known as to what location the government will decide to accept.

Business men from both the lower and the upper ends of Ludington street are interested in seeing the building located in their particular part of the city and two sites one in each portion of the city have been offered to the government as donations in case the building will be located in either of these places.

1,000 PEOPLE PRESENT

At the Coal Hoisters Picnic Last Sunday.

The Coal Hoister's picnic held at Maywood last Sunday was a decided success in spite of the threatening weather during the forenoon.

But few people made the trip to the picnic grounds in the forenoon but in the afternoon the weather cleared up and a large number of pleasure seekers turned out.

Both the steamers Maywood and Lotus carried several large crowds of people to the resort, the former vessel carrying nearly 500 people on her first trip in the afternoon.

Numerous games and contests of various kinds were arranged for the amusement of the crowds and everything combined to make the outing one of the most successful held at that popular resort this season.

North Side Park

It is understood that Mayor M. Perron is making efforts to have a city park located on the north side of the city. The more than a half century that has elapsed since the formation of the society at Lansing in 1849, has marked a great transition in agriculture and allied pursuits during which period Michigan has grown from a comparatively wild and unsettled domain to a state of 2,500,000 people. The State Agricultural Society has kept pace with the progress of the state, each succeeding exhibition showing a marked advancement, each better than the one previous.

Lansing .- Determined to conclude | Tax Commission's Valuation. its work, the state board of equalization held an evening session at which the representatives of Wayne county state equalization board follows: were given a hearing. Robert Oakman made the claim for the county that it is assessed at cash value, and Alpena Alpena that if the tax commissioners' figures are allowed to stand, the county will be increased \$88,000,000, which is altogether out of proportion to its value or to the valuation of the remainder of the state. He said that the city was assessed at cash value in 1901 and that since that time the assessors have added \$58,000,000, bringing it up to cash value in 1906. The real estate of the county he claimed is actually assessed at more than cash value, and that while not every dollar of personal property is on the rolls, a greater proportion of it is assessed than in any other county of the state. The following counties were represented before the board: Cheboygan, Samuel J. Smith; Kent, R. B. Loomis; G. W. Gow; Keewenaw, A. W. Kerr; Lake, J. J. Roberts; Lapeer, Joseph Wilson: Lenawee, H. B. SPARROWS ARE THE CAUSE

The Heated Term Caused Many Deaths and Prostrations During the Past Week.

Fouled the Water.

Sparrows that built their nests around the top of the standpipe which supplies Three Oaks with drinking water have caused an epidemic of typhoid fever. It broke out 10 days ago, Twenty-one cases have been reported, with three of the patients in a critical condition.

Physicians from Niles and Buchanan, Mich., and Michigan City, Ind., as well as local doctors, tried to solve the source of disease. Yesterday, at the instance of a local physician, an examination was made of the standpipe. The bodies of hundreds of young sparrows were found in the water. They had fallen out of their nests built around the rim of the standpipe, which was not enclosed with a cover. The board of health at once cut off the town's water supply. The standpipo was emptied and men today are cleaning it. It will be painted and furnished with a cover.

The Hot Weather.

Reports from various parts of the state tell of deaths and prostrations from the intense heat. Many factories had to shut down as the men could not work. On Thursday 30,000 workers in Detroit factories had been obliged to stop as the heat had be come unbearable. During the day five deaths from the heat were reported and the ambulances of all the hospitals were out to bring in persons who were prostrated. A heavy shower during the afternoon brought some relief. In the Ionia reformatory one death was caused by heat; Muskegon reports three, Saginaw two, In Kalanazoo the severe heat drove two women insane. Mrs. Eva Scotney resisted the efforts of officers to place her in the asylum and broke her arm in the struggle. Mrs. Mary Hoboljo, an Austrian, ran amuck among women and children. It required two officers to place her in confinement.

A big bull, maddened by the heat and foaming at the mouth, created a panic on the Bay City road, a mile out of Saglnaw, He was seen by the engineer of a train coming down the track at a gallop, head lowered, straight for the locomotive which carried a red flag. The engineer stopped the train to avoid a collision.

A farmer on the Huebner place tried to drive the bull from the track. It got him down near the fence and but for the fact that it was dehorned, would have gored him to death. Help arrived in the nick of time. The bellowing at the jail for her. animal then ran amack on the high way, terrorizing the whole community and travelers.

Sheriff Burgess and Deputy McMillan were called and went out with Winchesters, The bull made a furious charge on McMillan, who waited till he was almost on him and fired a lucky shot, which killed the bull in his tracks. The animal was so rabid his owner was afraid to even skin him.

Will Give Fortune Away. Edward Pinchin, aged 73, a South Haven street sweeper, formerly of Plainwell, who recently received word that he had fallen heir to \$60,000 from a relative in England, declares he will give the money to some one who has more need of it than he has and stay at his work. Pinchin's life has been a long series of misfortunes.

"I am an old man and wen't live long," he said. "I know what it is to want things and not to be able to have them. So I think I'll give away this money to persons who are in want and keep on sweeping streets."

Labor Day.

Gov. Warner has issued his Labor day proclamation, designating Monday, September 3, as Labor day. It

Our state has been made rich and prosperous by labor. Within the past hundred years it has brought forth the hidden treasures of our fields and mines, reared our villages and cities and bound them together with belts of steel. Excellence cannot be obtained without great labor, and labor conquers all things. Brawn and musclehave long been recognized as important factors in our progress, and it is eminently proper that the triumphs of labor should be celebrated upon this

It is recommended that Michigan's establishments be closed and that all join with each other in the worthy observance of labor's holiday. The departments at the state capitol will be closed and state institutions will conform to the spirit of this declaration wherever it is possible to do so without detriment to the service.

MICHIGAN IN BRIEF.

Alonzo King, aged 10, was drowned while swimming at the Waverly stone quarry in Holland. .

"Roosevelt democrats,,' it will be remembered that there were a large list of them claiming that distinction in Michigan two years ago, are provided through the president's recent letter to Congressman Watson with some clear-cut details as to the necessary creed which the honorable relations they claim provide for them. "We stand unequivocally for a protective tariff, and we feel that the phenominal industry which we are now enjoying is not lightly to be jeopardized. It would be to the last degree foolish to secure here and there's small benefit at the cost of general depression. There are probably very few democrats in Michigan who will question the wisdom and timeliness of President Roosevelt's declaration, however unwilling they may be to openly announce their favor of his position.

"How long our present period of very favorable conditions will continue is debatable," announces one of our prominent tarifffor-revenue-only exchanges. Yes, debatable, perhaps, but the form of the question involved in a debate to decide that question should be, "When will the demoportunity to test its usual crop of experiments?" When the latterdate is secured a very prompt answer can be given as to when our present périod of favorable industrial and commercial conditionswiil take a more or less prolonged vacation.

President Roosevelt's state ment, that "to change the leadership and organization of the time means to bring confusion upon those who have successfully engaged in the steady working out of a great and compre- miles. hensive, scheme for the bettere ment of our social and civic condition," is one that can be serimatter how extreme may be the five feet under water. The possible maximum fine against the Standard Oil company is \$64,880,-

The charges-the most serious and tank car reductions.

All of the offenses charged by the grand jurors arise from rebates given at the Whiting, Ind., refinery.

It is afleged that the Standard Oil company has been receiving, contrary to law, from 2,1/2 to 33 1-3 per cent. reductions on the published prices that are applicable to independents.

The railroads accused, though not indicted, with the oil trust and the number of offenses named in the indictments are: Chicago, Burlington & Quincy, 544; Chicago, Burlington & Quincy, 1,800; Chicago & Alton, 984; Chicago & Alton, 1,053; Chicago & Eastern, Illinois, Evansville & Terre Haute, Illinois Central and Southern railroad, 103; Chicago & Eastern Illinois and Evansville & Terre Haute, 1,916; Lake Shore & Michigan Southern, 25.

In a summary of the indictments made by District Attorney Morrison, it is shown that while independent oil refineries are made to pay the published interstate commerce scale of 18 cents from East Whiting to East St. Louis, the Landard Oil company pays only six cents.

The rate to St. Louis is 191/2 cents to the general shipper of oil. The Standard Oil company, how-

ever, pay less than 71/2 cents. The indictments are expected by the federal prosecutors to prove the first effective move to stop the oil comting off competition.

FALLING TREE CUTS OFF HEAD

Woman Is Decapitated During Storm Near Keshena, Wis.

Keshena, Wis .- Mr. and Mrs. Mitchell Nonan and grandson were overtaken by a severe electric storm while returning home from the Crowe settlement Sunday. The horses became frightened at the lightning and refused to move.

The couple saw a large tree falling and endeavored to get out of the way, but to no avail.

The team paid no attention to the urging until the tree fell across the wagon, striking Mrs. Nonan, whose head was severed from her body.

Young Nonan was seriously injured. About 1,000 feet of lumber in the wagon at the time was reduced to kindling wood.

Respite for Mrs. Myers.

Kansas City, Mo .- Gov. Folk, of Jefferson City, Monday granted a reprieve till October 26 to Mrs. Agnes Myers, now in jail at Liberty awaiting execution for the murder of her husband. A similar respite was granted in the case of Frank Hottman, Mrs. Myer's accomplice, now in fail at Kansas City. Both were pre-

WHEN THE HOUSE IS CLOSED.

Precautione That Will Save Work After the Vacation.

Every housewife who closes her bome several weeks in the summer time knows the unpleasantness of returning to find everything coated with dust. And she retains distinct recoltections of the real work entailed in the dusting and shining processes that must be gone through with.

A little trouble given to the packing away of certain things before the house is closed will make all the difference in the world when the time comes for reopening the house. In Chicago.-Ten indictments, charging the first place, the rugs should be 6.428 separate offenses of receiving re- aired and cleaned and then rolled and placed in a clean, dry closet where Standard Oil company by two federal there are no moths. If there are carpets on the floors do not neglect to sprinkle them with camphor or some other moth preventive, for the weeks when the house is closed provide a harvest for the greedy little pests.

Bed and table linen should be put away into the linen closet and all the most numerous ever brought table and bureau covers nicely folded against the oil concern-will, it is away. If there is any delicately colthought end in a complete revelation ored upholstery it should be covered of the intrigue through which the with cretonne slips. If these things oil company secures its freight and are done it will be a small matter to put the house in order again. Perhaps the most essential thing is to make sure that no sewer gas will get into the house while the pipes are unused. The best plan is to give all the pipes in the house a good washing out with hot suds to which has been added some washing soda; then let the water run through for some minutes. Pour glycerine into the pipes just before leaving. It is not readily absorbed and is an excellent preventive against the poisonous gas.

Gas and electric light fixtures if bound with cheese cloth or covered with any material that will keep out the dust should be in good condition when the family returns, for there is no moisture in the service pipes to cause discoloration or rust.

THREE WAYS TO MAKE COFFEE.

American, French and Arabian Methods of Preparation.

AMERICAN COFFEE,-Rea! American coffee, supposedly made in the colonial coffee urn, is usually first bolled in the well-known agate coffee pot. A little of all the different recipes goes to make this coffee. First the coffee bean from across the seas, then a little chicory sometimes and an eggshell or a whole egg to clarify the mixture, which is "boiled up" pany's system of rebating and shut. and then "settled," with a few drops of cold water. After that it is poured into the elaborate urn as if it had been made there.

FRENCH COFFEE.-The most perfect French coffee is made in the will cover from 15 to 20 men, and New York.-The new railroad rate is filled with water. The water is delicate aroma of the coffee. None of the flavor is allowed to escape, the strongest and most delicious made anywhere.

ARABIAN COFFEE.-The Arabian coffee is delicious in flavor, due to the freshly roasted coffee berries and to the presence of cinnamon. drawer for future use. A whiskbroom makes the best of sprinklers for the house plants, the fine spray that it sheds when dipped in water and shaken over them coming in contact with all the foliage and overcoming in part the dry heat of the. house. If the table and other small ferns are sprinkled in this way every night their jardinieres will have to be replenished less frequently.

Apple Slump.

Pare, core and quarter a dozen tart, julcy apples, pour over them a cupful of hot water and place in a saucepan on the back of the range. Let them stand five or ten minutes, then add two curs molasses. Cook ten minutes, cover with a paste made from a heaping pint of sifted flour, a teaspoonful of sugar and two of baking powder, with enough sweet milk to make a soft dough. Spread this over the apples, cover the kettle closely and cook 25 minutes without uncovering. Serve with lemon or foamy sauce.

ERRORS ABOUT THE WHITE HOUSE.

To the Editor:

I noticed somewhere recently-1 would not say positively that it was in your columns—an article on the White House which contained several misstatements.

In the first place it was stated the White House was first occupied in 1809 and that its first occupant was President Madison. The fact is, its first occupant was President Adams, who took up his residence there in 1800.

The original mansion was begun in 1792. In 1814 it was burned by the British and rebuilt in 1818.

Another of the errors in the article referred to was the statement that ready-prepared paint is used on the ited Anglo-Saxon. Every man is the White House to make it beautifully

I noticed this especially because I have used considerable paint myself inine helpmeet; cringing to no emand wondered that "canned" paint should be used on such an important building when all painters know that freely extend and expect as freely in pure white lead and linseed oil make the best paint.

It so happened also that I knew white lead and linseed oil-not readymixed paint-were used on the White House, because I had just read a booklet published by a firm of ready-mixed paint manufacturers who also manufacture pure white lead. In that book the manufacturers admitted that for produces in abundance every cultivthe White House nothing but "the able growth common to the north best and purest of paint could be used," and said that their pure white lead had been selected.

Above all people, those who attempt to write on historical subjects should give us facts, even if it is only a date or a statement about wood, or brick, or paint, or other building material.

Yours for truth,

Immense Leaves of Palm. The palm family bears longer leaves than any other known tree. The Inaga palm, growing on the banks of the Amazon, has leaves which reach from 35 to 50 feet in length, and 10 to 12 feet in breadth. Specimens of the talepot palm, a native of Ceylon, has been met with 20 feet long and 18 feet broad. These leaves are used by the natives to make tents, and, thus employed, they make very efficient shelters from rain. The leaves of the double cocoanut palm are often 30 feet long and several wide. The leaves of the cannibal tree of Australia resemble broad planks and are frequently 15 feet long, 20 inches broad and 11/2 feet thick at the base. These boardlike leaves all shoot out at the top and hang down so as to form a sort of umbrella around the stem. The unibrella tree of Ceylon has leaves of such enormous size that a single one steam coffee pot, a tall brass affair often serves as a canopy to a boat, with two receptacles. The lower one or a tent for soldiers. A specimen leaf taken to England measured 36

A few years ago the foreign missionary schools were practically the only institutions in Foochow offering facilities for the acquisition of western learning. There are now at least 30 native schools fashioned after the foreign model. Foochow is a city of 600,000 inhabitants, and these schools embrace about 2,000 students. Posters placarded all over the city advertise the opening of various modern schools, which are springing up in every nook and corner of the place. Scarcely a week passes without the announcement of the opening of a new school.

THE WHITE RIVER COUNTRY.

In the opinion of one who has traveied much and observed closely, the most truly and rightfully contented people in the United States to-day are the small landowners in what is known as the Upper White River Country, anywhere from Newport, Ark., to Carthage, Mo. They are contented because their surroundings are ideal and, until recently, the great, uneasy, disquieting world, with its artificial needs and inadequate compensations, has been to them but little more tangible than a dream. Here, still existent, and by reason of their very rarity at this day and time more delectable than in the past, are the conditions which have ever appealed with irresistible force to the independent-spirsupreme ruler of his own little principality; acknowledging no master save the law-and possibly his femployer; asking no favors from the world, save those that his neighbors return. He lives in a latitude where the extremes of heat or cold are never known, and at an altitude that insures perfect health. The richest bounty of Nature has been showered upon him with unsparing hand, but it is a question whether he more than dimly realizes the fact. He accepts as a matter of course the fertile soil which temperate zone, the surrounding forests of valuable woods and the underlying stratas of precious minerals, the springs and streams of translucent purity on every hand, the wealth of fish and game at his very door, such as less favored mortals annually travel hundreds of miles to find. He is contented, but small credit is his for that, for how could he well be otherwise than content? It is sad that such idealistic conditions may not continue, but it is written that the present possessors of this favored land must soon give place to others more appreciative of its incomparable features. A railroad has recently cut its way through the best of this region. and the unaccustomed rustle of bank notes and chink of coin will eventually tempt the hill-dweiler to part with his birthright. So it has always been in the world's history-the good things that are ours without price invariably pass from our hands before we come to understand their value. The White River country will shortly be discoyered anew by a class of immigrants better capable of judging its possibil-

Stones to the Value of \$300 Found in

States has there been such a demand for diamonds as there was in 1905. Large quantities were imported, but the country produced none. In 1903 it produced diamonds to the

value of \$50, in 1901 it had an output worth \$100, in 1900 its production was valued at \$150, and in 1899 the country boasted native diamonds to the value of \$300.

Diamonds have been discovered in the United States in four different regions, but their actual place of orfgin is unknown. All have been found in loose and superficial deposits, and all accidentally.

It is not at all improbable, how ever, that some day the original sources of this queen of gems may be discovered. The high price of diamonds has made the recent search for these precious stones in the United States and Canada keener than ever before.-Scientific American.

BABY COVERED WITH SORES.

Cuba Wants Immigrants.

The Cuban congress, at its recent session, appropriated \$1,000,000 to be used for the purpose of inducing immigrants to come to Cuba from Europe and the Canary islands. It is proposed to pay the passage of each emigrant from his home. The field hands are to be brought from Sweden, Norway, Denmark and Italy.

Alum Baking Powder Is Wholesome. Dr. Herman Reinbold, the expert German chemist, in a recent official report concerning Baking Powders. declares that a pure alum baking powder is better and less injurious than the so-called cream of tartar powders. He says that if the quantity of alum contained in a sufficient quantity of baking powder for a batch of bread or cakes for an ordinary family, be concentrated to one mouthful of food, and taken into the stomach of any one person, no matter how delicate. it could do no harm. On the contrary, alum is wholesome in proper quantities. This is undoubtedly the reason the State of Missouri quickly repealed a law that prohibited the manufacture of the most wholesome of all baking powders. So much for Alum Baking

LANGE OF CHARLEN.

Hands and Teet's Play a Part Is Capracles the Octopus.

The native, fisherman of Hawaii, while an adept with the book and line. does not scorn to use his hands to capture his prey when occasion arises. The boulto is the fish most generally caught with hook and line, and as the book used is of mother of pearl, made from the shell of a mollusk now quite rare, which glistens with an iridescence similar to the shimmer from the seal / of the smaller kinds of fish on ... tomito lives, no balt is needed, the barb of these books is of bone, and two tuffs of bog's bristles attached at right angles to the barbed end keep the inner side up, so that the hook lies tlat on the surface of the sea. When a likely fishing ground has been reached, the fisherman, standing up in the canoe, casts out his line violently, so that the book falls with a slap on the water and attracts the attention of the fish. The line and the boat, as though it were a spoon, and the bonito, taking the hook to be a small fish, rises to it immediately. It is fortunate for the disherman that he has to waste no time in baiting his book, for this method of casting frightens the school, and the tish disappear within ten or lifteen minutes.

An ingenious plan by which very large fish are caught is by planting a long pole on the shore in such a posttion as to cause it to lean decidedly toward the water." On the top of this a bell-is arranged so that it can swing clear of the top of the pole. A block and fall are also attached to the pole close to the top, and a long line, with balted book at the end, is run through the block and allowed to float out to sea, the land end being tied in a slipknot to the bottom of the pole. As soon as a fish is booked its struggles cause the bell to ring, whereupon the fisherman runs to the pole, loosens the slipknot and plays the fish until he has drowned it, when it is hauled ashore.

In fishing for octopus the native dives to the bottom and with a stick pokes around in the small holes in which the octopus lives. When he touches one, it seizes the stick and allows him to draw it out of the hole When he General store business, pays \$1,400 a reaches the surface, the native grabs ft with his hands and bites into the

A Sandbag for the Sick-Room,

Sand holds the heat for a long time which makes the sandbag valuable is a elek-room. Dry some clean sanmoroughly in a kettle-on the stove Make a bag about a quarter of a yand square of Sannel, fill it with dry sand sew the epenings together, and cover with cotton or lines. This will preven: the sand sifting out, and will also en able you to heat the bag quickly by placing it in the oven, or even on the top of the steve. After using this you will never again warm the hands of feet of a slok person with hot water or a brick. The bag can be placed close up to the back without hurting the invalid.

Wemen and Old Age.

"Why is old age so intolerable to some women when they might make it so beautiful and dignified?" asked the conservative man. "Because," returned the equally conservative matron, "the majority of women are brought up at if they were gifted with eternal your and excepted from all responsibility Parents, too, allow their daughters the opportunity of anjoying themselves in the sunshine of spring and summer of lifetime, but teach them no protection against the damp of autumn or the large of the suncomfortable an anomaly as wo not be a hutterfly in Passember."—Philaday while Later.
