PLAY GAME AT NIGHT

UNIQUE FEATURE WILL BE OFFERED HERE WHEN BLOOMER GIRLS COME NEXT WEEK.

A baseball game played by electric light will be unusual feature offered in Escanaba on Wednesday evening of next week when Hopkins Brothers Womans baseball team will come here for two games with the local leaguers. The team is to play two games at south park, meeting the locals on Wednesday afternoon in a regular game and playing an evening performance at 8 o'clock. The women team carries its own private lighting plant and the unique feature of an evening game here is certain to attract a monster crowd of people. The team has played evening games in several cities, appearing in the White Sox park in Chicago before a crowd of 15,000 people in a night game.

Announcement was received by local officials of the baseball club that because of a mixup in the schedule of Port Washington's league games that team will be unable to come here for the series of two games scheduled for Tuesday and Wednesday of next week. With the withdrawal of the Lake Shore league team it was possible for the local management to book the two games for Wednesday afternoon and evening with the traveling bloomer girls.

CONDITION CRITICAL

The condition of Mrs. W. L. Hill, who was found Tuesday morning at the home of her son James Hill, 524 Ogden avenue, in an unconscious condition as the result of a sudden stroke of apoplexy, is still very critical and early this morning she was not expected to survive the day. Mrs. Hill is one of Escanaba's oldest residents and has many acquaintances in the city.

BLUE SOX STILL ARE GETTING BUMPS

After but one team in the Marquette Delta county league had downed Senator Prostor's Blue Sox of Elkhardt, the Hoosiers are now regularly getting their bumps. It is reported that since striking the north country the Blue Sox trawlers have suffered a bad slump and which explains some of the recent drubbings given the tourists. The latest team to humble the Sox is the Newberry squad where the visitors were shut out 5 to 0 on Wednesday. Of the game a correspondent says:

With Dixon and Tiffany a Marquette battery, doing the heavy work for Newberry, the astringent city team shut out the Elkhardt Blue Sox yesterday, 5 to 0. Hogan, the copper country recruit, pitched for the Hoosier team. Young and Hamilton, both well-known players among Marquette fans, played on the Newberry team. The Blue Sox play at Sault Ste. Marie today.

INSURANCE HEAD VISITS ESCANABA

Robert Fry, president of the Old Line Life Insurance company of America, which corporation has a number of stockholders in Escanaba, is spending a few days in this city. The company recently received its commission to carry on a general life insurance business in this state and district and local officers are now being established by the concern. District agents are being named by President Fry and the district agents will be given authority to name the several local agents in each city and community. Mr. Kimball of Marinette has been appointed district agent for this territory and a local agency for the company will be established here within a few days.

PLEASANT PARTY WAS ARRANGED

Miss Beatrice Richer, daughter of Mr. and Mrs. E. M. Richer, of Flat Rock was the guest of honor at a delightful party held at the Flat Rock home of the family on Tuesday evening. A large number of guests both from the city and the Flat Rock settlement were entertained at the home with games and music after which refreshments were served.

PROGRAM IS ANNOUNCED

A preliminary announcement of the program which is to mark the next annual meeting of the Upper Peninsula Educational association to be held in Houghton on Oct. 5 and 6, has been made by officers of the association.

Following is the letter issued by the association concerning the next convention:

The following preliminary announcement of the next annual meeting of the Upper Peninsula Educational association is sent out early in the year with the hope that it will stimulate interest and ensure a large attendance.

The dates fixed by the executive committee are October 5 and 6, 1911 and the place of meeting, Houghton. The meeting will open with a general session and program at 10:30 Thursday forenoon and close Friday evening with a reception and dance tendered the members by the citizens of Houghton. It seems to be the consensus of opinion that the usual Saturday morning session is no longer profitable, and the officers of the association, therefore, decided to devote two full days to the meeting, beginning the first day with the opening program in the forenoon instead of the afternoon, as has been customary heretofore.

The intention is to make this opening program one of the very strongest of the entire meeting so strong and attractive that few will feel like missing it. The Thursday afternoon program will also be a general one before the entire association, followed by the lecture Thursday evening, by Dr. P. P. Claxton of the University of Tennessee, recently appointed United States Commissioner of Education by President Taft, a brilliant orator and educator.

Friday forenoon will be given to section meetings,—high school and science; grammar school; primary and kindergarten; manual training; athletic; school officers and commissioners; music and art.

Friday afternoon will be devoted to a third general program before the (Continued on Page Eight)

MOSQUITOES ARE A PEST HERE FOR THE FIRST TIME

For the first time within the memory of the city's oldest resident mosquitoes are now a pest in Escanaba. During every summer season of the past Escanaba has been noted for its freedom from mosquitoes. For the past week however every place about the city is infested with the stinging little insect and residents from all quarters of the municipality are sending up a mighty howl of complaint.

The rainy season that Escanaba has experienced since the opening of spring is given by the knowing ones as the cause for the pest now spreading over the city.

PRETTY PARTY WAS GIVEN YESTERDAY

Mrs. Q. R. Hesse and Miss May Hesse entertained yesterday afternoon at their home, 406 Ogden avenue, at a delightful party. The program of the afternoon's entertainment consisted of cards and sewing. For those who did not wish to sew there were tables of both "500" and bridge. Following the above program a delightful luncheon was served, the guests departing early last evening.

PRIMED FOR CLEAN SWEEP

LOCALS LEFT FOR ISHPeming YESTERDAY DETERMINED TO TAKE FOUR GAMES.

Primed to a high pitch and determined to make a desperate fight to make a clean sweep of the four game series at Ishpeming Escanaba's leaguers left yesterday for the Hematite City. A clean sweep of the series at Ishpeming, even if Negaunee takes both games from Marquette will place Escanaba at the top of the percentage column with a one game lead, and that the worst that Marquette can draw in its series with the leaguers will be a draw is the confident opinion of local dopesters, thus giving the locals an excellent opportunity to leap to the top before Monday.

The Ishpeming team will be badly crippled in the present series as Scott Ishpeming's strongest twirler has been in Escanaba since Wednesday and despite the effort of friends to induce him to return to his team yesterday he refused to consent to leave for his home until this morning.

The Negaunee team may also be crippled in its Marquette-series as Mahoney, who has been pitching consistent ball for the leaders throughout the season, has been in Escanaba with Scott since Wednesday and had returned to his team last night.

Capt. Ohlin of the Menominee team joined the locals yesterday and accompanied them to Ishpeming but Pitcher Nagle has not yet reported and he will inform Manager Hodson this morning whether or not he can report for service before Monday. Menominee has games booked for Saturday and Sunday and neither Nagle or the local management desires to place the Menominee team in a hole by taking their pitcher and unless a substitute can be secured for the Menominee twirler he will not come here before Monday or Tuesday.

MUCH INTEREST IN TOURNAMENT ABOUT PENINSULA

Much interest is being aroused throughout the peninsula in the coming wrestling tournament to be held at Gladstone during the big two days Labor Day celebration arranged for the Upper Bay City. Of contestants who will enter the tournament from Gwinn a correspondent of that village says:

Dick Johns, Gwinn's clever light weight wrestler, will participate in the Cornish wrestling tournament to be held in Gladstone on Labor day and the day following. Mr. Johns recently moved to Gwinn from the copper country, where he learned the wrestling game under Joe Ziehr, one of the best jacket artists in the country. Ziehr took first money in the wrestling matches held here on July 5 and Mr. Johns took second.

The tournament will be under the direction of James H. Billings, of Ishpeming. Mr. Billings is endeavoring to arrange to have John Rowett, the champion of the world, enter the tournament.

Among the other first-class wrestlers who will enter are: Ziehr, Chapman brothers and Orr from the copper country and the Sampson brothers from Iron Mountain.

ATTEND MEETING AT IRON MOUNTAIN

Attending the convention of Canadian French Societies which is now in session at Iron Mountain, are three Escanaba men, Matt Pillion, Edward Perron and Dr. C. Girard. Dr. Girard is the official physician for the district and Mr. Pillion is a member of the board of directors.

About 80 delegates are in attendance from this district, which embraces the district between Duluth and Detroit. The convention is being held in the Finnish hall and will continue in session until Friday evening.

Mrs. J. C. Manistiquie is visiting in the city with friends and relatives.

SALOON CASES ARE CONTINUED

Cases against saloon keepers of Escanaba who were arrested early in July charged with keeping their places of business open on July 4, were called in Judge O. V. Linden's court yesterday and upon the application of Atty. H. J. Rushton, appearing for the defendants all of the cases were continued for a week.

UMP IS MISSING

Lost—One umpire for the Marquette Delta County league between Bay City, Mich., and Escanaba. Answers to the name of E. Richter. Report all information to Dr. R. E. Hodson, manager of the Escanaba baseball team.

Although Dr. Hodson of this city, was delegated with the task of securing two professional umpires for the local league but one had appeared up to last night. Art Connelly, one of the umpires arrived in the city last night and will report to President Frank Russell at Marquette this morning. The other, E. Richter of Bay City, the doctor received a wire, left his home city on Wednesday night and should have arrived here yesterday morning. He failed to appear up to late last night however. It was desired by the genial doctor that both umpires should report to the league president at the same time but such a proceeding now seems to be impossible. If the missing umpire arrives in Escanaba this morning he will be sent to Marquette this afternoon.

CURRAN NOT NAVIGATOR

Sheriff T. J. Curran has for months boastfully claimed that he was master of everything that is operated on the land and until Wednesday evening he vaingloriously asserted he also could ride or drive, single or double any boat that ever split a wave. With a friend early on Wednesday evening the sheriff borrowed the launch owned by Treasurer Joseph Mallmann for a trip to Gladstone. The trip up the bay to within a mile of Gladstone was made without incident and the county's chief officer was developing a mighty swelling about the chest as he thought of the tales that he would tell of his first mastery of a gasoline launch. Suddenly the engine coughed dyspeptically and after a few lingering revolutions stopped. The sheriff and his accomplice, equally as boastful of his prowess with a boat, bent solitiously over the silent power producer. Everything that was removable was taken off. Every part that could be tampered with was tampered. Finally one of the amateurs pulled the plug out of the cut off in the exhaust pipe in the bottom of the boat. When one of the men sat on the side of the boat from which the exhaust emerged a stream of water gurgled in causing the men to think that the boat was leaking in bucketfuls. By mighty, sweating strokes they paddled the craft to Gladstone and then telephoned to the owner that they thought best to return to the city by street car. Yesterday morning Mr. Mallmann went to Gladstone and with a few twists of the wrench fixed the adjustments that had been thrown out of gear by the amateurs and after restoring the plug to the exhaust cut off started up the engine and made a complete circuit about upper bay before returning to Escanaba.

TROLLEY OUTING AND PROM WERE WELL ATTENDED

A large number of Escanaba people took advantage of the trolley excursion to Gladstone last night given by the city band. Three cars left the lower end of Ludington street at 7:30 and by the time they had reached the upper end they were crowded.

A great many of the excursionists took in the promenade at the Gladstone theater last night and reported a most enjoyable time. The music for the party was furnished by Olson's orchestra and the musicians were forced to respond to repeated encores. Those who did not take in the dance spent the evening visiting with friends or about the streets of the pretty little upper bay city.

The band will give another excursion tonight from Gladstone to this city. The cars will leave the upper bay city at 7:15 and the tickets will be good returning on any car. By leaving a little earlier than usual the excursionists will be given more time to spend with friends or at the theaters of this city.

FUNERAL HELD ON WEDNESDAY NIGHT

Because of the fact that the four year old daughter of Mr. and Mrs. Benjamin LeDuc, 1108 Sinclair street, died of a contagious disease early Wednesday evening, it was necessary that interment take place at once. The child died of diphtheria. The funeral was held shortly after 10 o'clock Wednesday night from the house. The services were conducted by the Rev. P. B. Ferris and interment was at Lakewood cemetery.

ALL DETAILS ARE FIXED

TRADES AND LABOR COUNCIL FIX PLANS FOR BIG ABOR DAY DEMONSTRATION HERE.

A number of the details in plans for the big labor day celebration to be held in Escanaba on Sept. 4 were fixed at a meeting of the Trades & Labor Council last night.

The order in which the different unions of the city are to appear; in the parade the line of march and other important phases of the celebration were decided upon last night.

The Escanaba City band has been engaged for the day to head the parade, which is to form at the city hall promptly at 9 o'clock and to furnish a musical program at the park pavilion during the afternoon. A number of visiting unions are expected to come to Escanaba from different parts of the county for the celebration and all of the visitors will be given places at the head of the parade line. The city officials will appear in carriages also at the head and the members of the Trades and Labor council will also appear in a body.

Following is the order in which the local unions will appear in the parade line: Coal Hoisters No. 400; Carpenters No. 1832; Masons No. 34; Coal Heavers No. 144; Machinists No. 515; Barbers No. 340; Printers No. 278; Blacksmiths; Ore Trimmers No. 44; North Western Top Dock Workers No. 208; Cigar Makers No. 286; Lumber Handlers No. 43; Paper Hangers No. 811; St. Paul Top Dock Workers No. 279 and Brewery Workers No. 270. Following the big parade feature the line of march will be to the park where the exercises of the day will be held and addresses will be delivered by the mayor and the speaker of the day whose invitation to appear was issued last night. Different sports and games will occupy the day at South park where the regular Labor Day picnic is to be held. The event is to be brought to a close with a grand ball at Peterson's hall in the evening. Brotherton's orchestra having been engaged to furnish the music for that program.

TROLLEY OUTING AND PROM WERE WELL ATTENDED

By leaving a little earlier than usual the excursionists will be given more time to spend with friends or at the theaters of this city.

DELEGATE RETURNS HERE FROM DENVER

Frank J. Geniesse returned yesterday morning from Denver, Colo., where he went as one of the Michigan delegates to the National convention of the Modern Brotherhood of America. Mr. Geniesse stated yesterday that the convention this year was a most successful one in every respect. In accordance with the new insurance law recently passed by the legislature was required by Mrs. Jensen for insurance sections.

TO ATTEND DANCE AT BARK RIVER

A number of Escanaba pleasure seekers will go to Bark River tonight to take part in the dancing party to be given at that place by members of the Bark River Military band. All of the parties arranged by the Bark River band in the past have been most enjoyable and another delightful function is anticipated for this evening.

WATCHING INVESTIGATION

Marine men of Escanaba are generally interested in the outcome of the investigation that is being conducted by Inspectors Gooding and York of Marquette into the collision between the steamers W. H. Mack and John Mitchell on Lake Superior. In the collision the Mitchell was sunk and three members of the crew were drowned. The United States Inspectors are conducting a strict investigation to place the blame for the accident. Of the investigation that is being conducted the Mining Journal says:

United States Steamboat Inspectors Gooding and York held a hearing yesterday for the purpose of determining who, if anyone, was at fault in the collision between steamers W. H. Mack and John Mitchell which occurred off Whitefish point July 9, and resulted in the Mitchell being sunk. Captain Geo. A. Burnham, of the Mack and Captain John Massey of the Mitchell were examined, both by the inspectors and by the attorneys representing all parties concerned. Mr. Evans of the firm of Hoyt, Dustin, Kelley and Andrews, represented Captain Massey, while Mr. McCreary of the firm of Golden, Wright and McCreary, acted as counsel for Captain Burnham.

The collision, which was one of the most serious of the season, occurred in a dense fog, the Mitchell being up-bound and the Mack down-bound. The two captains told different stories as to the course the two boats were taking, but the captain of the Mack admitted that he was running at the rate of about twelve miles an hour, which is faster than the "moderate speed" required in a fog under the pilot rules. Captain Massey stated that his boat was moving along about seven miles an hour, but Captain Burnham thought it was going at full speed. The two boats exchanged signals several times just prior to the collision, but neither captain saw the other vessel until the two were so close that a collision was inevitable. The bow of the Mack crashed into the fourth forward hatch of the Mitchell and the boat sank almost immediately, her crew, with the exception of three men, being rescued and taken to the Soo on the Mack.

WOMAN SEES AFTER TWO YEARS; CURE IS EFFECTED

Mrs. Fred Jensen of 214 Ludington street, who was totally blind for two years, is now able to see perfectly with one eye as the result of the treatment taken by her from Dr. W. B. Boyce, eye, ear, nose and throat specialist of this city. According to Mrs. Jensen she visited specialists in Milwaukee and other cities repeatedly during the time that she was totally blind without obtaining any benefit whatever. Two months ago she began a course of treatment with the local specialist and now is able to see with one eye perfectly, the optic nerve having been found to be dead in the other eye. She is now able to walk about the streets unassisted and is now doing her own housework for the first time in nearly three years. Mrs. Jensen is enthusiastic over the benefit given her by the local specialist and it was at her personal request that credit is given to Dr. W. B. Boyce for what is considered by Mrs. Jensen as her family and friends to be a remarkable cure.

Henry Oliver, Albert Nelson and Sam Robinson left last night for

WORK IS STARTED

KRATZE BROTHERS BEGIN WORK WALLS FOR MONSTER NEW DEPARTMENT STORE.

Actual work has been started on the construction of Kratze Brothers new department store building at Ludington and Jennie streets, which is planned as the largest and most complete building of its kind in the upper peninsula. The work of laying the concrete piers on which the foundation wall will rest, was started on Wednesday and excellent progress is being made. As soon as the concrete piers are completed on the west side of the structure the foundation wall will be laid.

A great quantity of material is already on the site and the indications are that the new building will go up rapidly.

DIPHTHERIA DISCOVERED

That cases of diphtheria are being hidden from the health authorities of the city and a serious epidemic of the disease is threatened in Escanaba was made plain last night when Dr. H. W. Long, city health officer, accompanied by Officer Charles Larson forced their way into a home in the 1700 block on Ludington street upstairs and discovered a child ill with the disease in a room with three other children. The health officer was informed over the telephone last night that a case of diphtheria was being hidden at the number. Taking Officer Larson with him Dr. Long went to the place and upon inquiry was informed that no one was ill in the house. In the preliminary search of the house no one who was ill could be found. Upon going to the place from which the information was given that a child was ill at the house visited by the officers the statement was reiterated. Dr. Long and Officer Larson returned to the place and in one room found a child ill with diphtheria with three other children in the same place. The mother it was said had gone to Gladstone on the excursion. The house was immediately placed under quarantine and an officer was stationed there to watch the place and also a residence in the alley at the rear where it is claimed by neighbors that quarantine rules are not being observed.

DRUGGISTS SAY LAW IS A JOKE

Escanaba druggists, almost as a unit, claim that the law passed by the last legislature, requiring that all bottles containing poison shall be sealed with serrated stoppers, is one of the biggest jokes perpetrated by the last legislature. The new law will go into effect on Nov. 1 and the local druggists will comply with all of its provisions but they attest that the only ones to profit by it will be the manufacturers of serrated stoppers. The stopper which must be used on bottles containing poison under the new law is simply a cork, around which is placed a metal washer with a saw-tooth edge, the washer circling the cork a short distance above the neck of the bottle. Once the serrated stopper is placed in the bottle, it is very difficult to pull the cork without pricking one's fingers, and its adoption is very likely to result in an increase of profanity among those who use poisons to any extent.

As the reason for passing the law, the legislators gave out that it would make it impossible for anyone to take poison by mistake, while searching in the medicine chest after dark. The druggists say that it is very rarely that anyone takes poison by mistake, as bottles containing poison are always labelled with the skull and crossbones, and that a person who deliberately takes poison will not be deterred by a saw-tooth washer on a bottle. On the other hand, the law will make it impossible for anyone to take poison by mistake, while searching in the medicine chest after dark. The druggists say that it is very rarely that anyone takes poison by mistake, as bottles containing poison are always labelled with the skull and crossbones, and that a person who deliberately takes poison will not be deterred by a saw-tooth washer on a bottle. On the other hand, the law will make it impossible for anyone to take poison by mistake, while searching in the medicine chest after dark.

PILOTS COME VERY CLOSE TO LOSING LIVES

Chicago, Aug. 17.—Arthur Stone, driver of a Queen monoplane, was smashed back from death at the international aviation meet here today after hopes for his life had been given up. Howard Gill, in a baby Wright machine, came almost as close to death, but escaped from under the wreck of his machine, unhurt. Lincoln Beachey, after being driven far to the south and fighting his way back across the field, glided three thousand feet in safety to the earth, after his engine had stopped suddenly.

Stone's machine fell to the lake just at dusk. He leaped from the falling plane and was rescued at the point of exhaustion after he had supported himself in the water for more than a half hour. His machine was not recovered.

That Stone was rescued was attributed largely to the insistence of his wife that he guard himself with a life preserver. In spite of the order that all flyers should wear life preservers, Stone with other started for their machines unguarded. Mrs. Stone ran from the hangar just before the flight and insisted that her husband wait while she tied an inflated automobile tire to his shoulder.

Unnerved by the deaths yesterday of William R. Badger and St. Croix Johnstone and deterred by a high wind, many of the flyers here protested against going up and warned the contest committee that the aeroplanes should not be controlled with the half sale that prevailed in the upper air. The judges were insistent and finally a dozen flyers rose for a cross-country race from the shore around the Carter H. Harrison crib, three and one-half miles out.

Thomas Sopwith had completed the second lap of the race and had been declared winner when a cry arose that Stone's machine had fallen into the water and that the aviator had drowned. Later it was reported that Stone was afloat and then a rumor came that a tug was bringing his body to shore. None of these could be verified and Stone's fate was unknown until Commodore Hugh's motor boat, Disturber II, reached the Chicago Yacht club's landing with the aviator alive and well.

The report that Stone had been drowned was quickly flashed to the hangars. Almost the first to hear of his disappearance was his wife, Mrs. Irene Stone, who, with her baby, awaited Stone's return from the race far over the lake.

Mrs. Stone began to weep when a member of the Curtis team came in and reported he had been unable to find any trace of the missing aviator. She turned over the child to a friend. "Here, take this baby," she exclaimed, "I am going out to the lake to help find Arthur."

As Mrs. Stone started out from a group of friends who sought to have her returned to the hotel an automobile came in from the lake front and assured Mrs. Stone that her husband had been picked up alive and merely was the victim of a ducking.

"Lord! I'm glad I made Arthur put on that life preserver," exclaimed Mrs. Stone, her tears quickly dried. "I'll bet it saved his life."

Soon after the race for speed about the course was called, Aviator Ovington accosted Chairman Mud of the contest committee, saying:

"You aren't going to attempt to have us try the infield court and bank those pylons, are you?"

"That's up to the aviators," said Chairman Mud. "They know about the conditions."

"Yes, they thought they knew about the conditions yesterday," exclaimed Ovington, heatedly, "and you know where they are now. We are willing to try the lake course, but it means certain death to attempt to bank those pylons."

Following his discussion the aviators went to the judges' stand and as the wind subsided races were run over both the pylon and crib courses.

Beachey was an easy winner in the nine-mile race around the pylons, finishing in 9 minutes and 28.25 seconds. Ovington was second, 9 minutes and 49.25 seconds, and Ward third, 10 minutes and 41 seconds.

Thomas Sopwith won the fourteen-mile cross-water fight in 17 minutes and 2 seconds. Simon Lincoln was second, 18 minutes and 26.25 seconds, and Beachey was third, 18 minutes and 28 seconds.

Beachey was unofficially accorded the day's altitude record, he having reached a height of 7,079 feet.

Contests and indignation are being felt by all people here by such a display every day. Hollister's machine was removed to the side by the judges.

FRIEND OF LINCOLN WRITES HIS STORY

Chicago, Aug. 17.—General John McDonald, who raised the first union regiment in a southern state and who was the intimate friend and associate of Grant, Lincoln, Sherman and nearly all the prominent statesmen of the Civil war period and one of the last of the old guard, is busily engaged in the preparation of his autobiography, which is certain to be of remarkable interest because of its wide range and definite knowledge of affairs of state.

General McDonald was one of the pioneers of the Mississippi river. He left home to earn his own living when he was only 8 years old and after a boyhood of hard work and exciting adventure in the wild country of the western frontier, established himself in business in St. Louis. While he was still a very young man he was engaged in large enterprises and when he was little more than 30 was one of the new millionaires of the United States.

He owned one of the great steamboat lines of the Mississippi river and built the first boat that made the long trip from St. Louis to the falls of the Montana. To General McDonald's pioneering activities in steamboating and railroading has been due much of the opening up of the northwest.

At the beginning of the civil war, General McDonald then a private citizen, was one of the most influential citizens of St. Louis, although he resided most of his time at his home

at Green Lake, Wis., which was one of the finest country places in the states at that time, and on which he had spent over \$300,000.

At his own expense he outfitted the First Missouri regiment in which he was commissioned major by the governor of Missouri. General McDonald, promoted to rank after conspicuous deeds of bravery in the Kentucky campaign, remained with the army of the west and was the man who received the surrender of General Grant.

After the war General McDonald was conspicuously active in public life. Even when Grant was president he became the guest in St. Louis of McDonald, then collector of revenue for six states under the Grant administration.

Among the documents which General McDonald is using in the writing of his memoirs are autograph letters to him from Abraham Lincoln, General Sherman, General Grant, Secretary Belnap, Secretary Seward, Jay Gould, Admiral and Mrs. Porter, Admiral Farragut and various other famous men of that time.

Tortured for 15 Years

by a cure defying stomach trouble that baffled doctors, and resisted all remedies he tried, John W. Modders, of Moddersville, Mich., seemed doomed. He had to sell his farm and give up work. His neighbors said, "he can't live much longer." "Whatever I ate distressed me" he wrote, "I tried Electric Bitters, which worked such wonders for me that I can now eat things I could not take for years. It's surely a grand remedy for stomach trouble." Just as good for liver and kidneys. Every bottle guaranteed. Only 50c at all druggists.

HETTY GREEN SAYS NEW YORK HEAT CAUSED BY DIGGING PANAMA CANAL

New York, Aug. 17.—"The heat in New York is caused by the construction of the Panama canal. Man thinks he's greater than God, but the Lord knew what he was doing when He put the Isthmus of Panama where He did, and he wanted it to stay like He made it."

This new and remarkable theory was advanced today by Mrs. Hetty Green. Further comment on this she would not make, leaving the rest to imagination.

According to the world's richest woman the weather man is a "bunk" and all his talk about high and low pressure is mere child's pattle. It has nothing whatever to do with the heat question.

The heat is simply caused by the wrath of God visited upon the children of New York for going down to Panama and defacing nature. Stop the work and fill up the hole and New York will have a snowstorm. And there you are!

Mrs. Green went to borrow a step ladder from the manager of the Crane Oxygen company, at 5 West Nine-

teenth street, which is directly opposite the house bought by her son, Col. Green, and in the redecorating of which Mrs. Green has taken a great interest. She visits there several times a week from her home in West Hampton.

When she borrowed the ladder the manager offered to carry it across the street for her. She informed him she was perfectly healthy and able to do it herself, but delayed a while to pass the time of day with him. It was then that the talk about the canal and the heat came up. When the manager said he wasn't quite able to grasp her theory Mrs. Green picked up the ladder and departed without further words.

She came back later, however, and asked the manager if he knew who she was.

"Well, will you cash a check for \$16 for me? Guess you know my account is good, and it's too hot to walk to the bank," she said.

The check was cashed and Mrs. Green again departed. The manager said he was thinking seriously of framing the check.

AMERICA LOOKS GOOD TO THIS PRINCE IN SPITE OF FAULTS WHICH HE ENUMERATES

New York, Aug. 17.—The noble young Prince Ludovic Pignatelli d'Arago y Cavendish de Delmar, having passed six strenuous days in our midst, opines: "Liberty and freedom of action is left behind when one passes the Statue of Liberty. "America is a country of supine serfs."

"Blue laws and worse still, blue customs bind hand and foot the sons and daughters of the land.

"Our taxicab, restaurant and hotel proprietors are a bunch of heartless knaves, fit only for the knout."

But despite its faults the young Spaniard loves marvelous America still. He said to himself.

The prince when he received the reporter was a symphony in brown. It was a color which seemed to find favor with the large and languishing young lady who accompanied him. The young lady, to quote the prince is a compatriot and has been the noble's guide.

"My experiences," he said, adjusting his soft collar, "they have been—ah—fearful."

Indeed, tragic," interposed the young lady.

"Yes, tragic," repeated the prince, favoring the young woman with a grateful glance. "To begin with, I went to your Pol's Bergras last Sunday evening. I took a motor car, and had been told the circus was only a short way from the hotel, and do you know what the rigand at the wh charged me? Oh I cannot remember exactly, but it was many a penny."

lars.

"And when I sat at a table within the theater and called for a drink they told me the law did not allow them to serve me. What a ridiculous excuse. But I had to endure the entire performance without anything to drink."

"Not that the prince is a drinking man," murmured the suddenly animated young lady.

"No, I take a drink, some drinks, perhaps a few now and then, and between times, but I am not a drinking man," added the prince. "But that experience was only the beginning. The next night I went to a hotel above here."

"With me was a lady or two. Their names? No, no. It would not be at all apropos. Anyway, after our meal I pass the cigarettes and then I hold the match for my companions to light. They puff away and are smoking in great enjoyment when suddenly the butler comes to me and whispers that ladies cannot smoke there. Bah! disgusting!"

"In Paris I would have arisen and dealt him a terrible blow," continued the prince. "I would actually have kicked his face in three directions."

"Sh! I like your country. I go to Newport soon as the guest of Robert Goelet and there I expect to have a most enjoyable time."

"The hand of Chamberlain's Stomach and Liver Tablets gave me surprise and relief and the second bottle seemed to give me a new stomach and perfectly good health." For sale by Groce's Drug Store and Farrell & Lohmiller.

Seemed to Give Him a New Stomach.

"I suffered intensely after eating and no medicine or treatment I tried seemed to do any good," writes H. M. Youngpeters, editor of The Sun, Lake View, Ohio. "The first few doses of Chamberlain's Stomach and Liver Tablets gave me surprise and relief and the second bottle seemed to give me a new stomach and perfectly good health." For sale by Groce's Drug Store and Farrell & Lohmiller.

LOST.

LOST—Wedgway bicycle, black with red head, mud guards, No. 2319. Liberal reward for return to Morning Press office. 5037-228-3t

HE COULDN'T LIE EVEN FOR CUPID

St. Louis, Aug. 17.—Leon Smith, marriage license clerk of East St. Louis, was in his office waiting for Cupid to get busy when a young man and a young woman walked in. "Want a license," said the girl, smiling.

Smith regarded the young man with sympathetic eyes and sighed. It was too bad. Here was a deaf-mute whose affliction made it impossible for him to hear or answer the clerk's questions.

Instead of questioning the man, as is the custom, Smith turned to the young woman: "My name is Clara Putnam and his is Albert Sommerfeldt," she said. "We are both from St. Jacobs, Ill."

Smith told Miss Putnam she would have to make affidavit as to Albert's age.

"Albert is an orphan," she said. "To the best of my knowledge he is 21 years old. His only relative is a brother, who is not his guardian. His father died several weeks ago. On his deathbed he gave consent to our marriage."

Albert continued to twirl his hat and study the carpet. Smith prepared the necessary affidavit blanks and was handing them to Miss Putnam to sign when he heard a sob. Looking around he saw that tears were running down Albert's cheeks. To his even greater surprise Albert stepped forward and said:

"I can't tell a lie." He paused to weep some more and added. "I'm only 20 years old. I won't be a man until March 3, next year."

Miss Putnam quitted her fiance and they left the office without the license, promising to return when they found somebody to act as guardian for Albert and give consent to the marriage.

FIND NO CURE FOR DREADED DISEASE

Albany, Aug. 17.—No treatment so far as is known which can be regarded as specific or even effective has been found in dealing with the problem of infantile paralysis, according to Dr. Simon Flexner of New York, who has been making a special study of the disease. At a conference here of medical officers under the auspices of the state department of health Dr. Flexner among other things gave the following views in discussing infantile paralysis:
considerable portion of the state.
The disease is still alive over a
Our greatest concern is to determine how and under what circumstances the disease is spread.
There is no treatment so far as we know which can be regarded as specific or even effective.
It is easily transmitted from animals to man and is more fatal in animals than in man. One attack, however light, appears to establish an immunity against a second attack. This is due to a specific micro-organism the propagation of which in the body appears to bring about a reaction establishing an immunity.
Until we can succeed in determining how this disease is transmitted we cannot expect to accomplish its prevention.
Though paralysis is present in most all cases there are cases with no paralysis. Such cases are spoken of as abortive, and it is quite likely that they are the source of frequent extension of the disease—even fatal cases arising from abortive cases.
The period of incubation appears to be from three to thirty-three days.
Four weeks is supposed to be the period of infectiousness of the disease, after which it is not thought that infection emanates from the case.
The course of entrance of the germs of this disease appears to be through the upper air passages, especially the nose.
It would also appear that the most probable means of exit of this germ is through the nose and throat. It is therefore very important that the discharges from the nose and throat of cases suffering from infantile paralysis be properly destroyed.
Dr. Flexner appeals to the medical officers and to the health officers of the state to study in detail each case coming under their observation. He promises assistance and co-operation from the Rockefeller Institute of Medical Research whenever and wherever the same is possible.
During the year 1910, 322 cases of infantile paralysis in forty-nine counties were reported to the state department of health. This shows a wide distribution of the disease, with no apparent relation to any central focus. The disease, however, has been most prevalent in certain rather definitely limited areas, namely, in the counties bordering on the St. Lawrence river and in the area bounded on the north by Lake Ontario, south by Pennsylvania, east by a line drawn south from the eastern end of Lake Ontario and on the west by Monroe, Livingston and Cattaraugus counties. In 1910 the cases along the Hudson river were mostly north of Poughkeepsie, which city, however, reported no cases. Twenty-three cases were reported from the city of Schenectady.
An ordinary case of diarrhoea can, as a rule, be cured by a single dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy. This remedy has no superior for bowel complaints. For sale by Groos Drug Store and Farrell and Lohmiller.

BOSTON MARKETS

Organized support appeared in the New York market today for the first time in two weeks and the whole list showed a sustained rally. Shorts rushed to cover and prices advanced quickly two to three points. The market got dull, however, at top prices and it does not look as if the reaction was over. Stocks are not yet cheap enough to attract public speculation and we think they will be allowed to sag until an active market can be created. More bids were noticeable for the coppers and with the exception of the Amster stocks they showed no losses for the day and in many cases gains were recorded.

S. S. & R., Utah Cop, Victoria, Wadsworth, Wolverine, Winona.

NEW YORK MARKETS

After an early decline the market displayed a rather more steady tone than has been in evidence for some time, but in the last hour a resumption of the heavy pressure which has been noted recently, particularly in the Harriman issues, caused general declines and the closing was somewhat unsteady. The principal news of market influence was that bearing on the labor situation in England and although the news was some what conflicting as to whether a strike had been ordered, still domestic interests were disposed to sell stocks quite freely, fearing liquidation from the other side, should the situation become acute. It was said that some sort of a statement was likely to be issued bearing on the affairs of Union Pacific and for a time this served to stop the tide of liquidation in that issue. However, around 170 offerings were quite heavy and the issue did not show a disposition to get much beyond that price. It does not as yet seem as though liquidation has entirely run its course and we therefore would be rather cautious when operating on the buying side.

IRON TRADE REVIEW

The Iron Trade Review says: A good rate of activity of mills, a somewhat decreased volume of new business, and continued irregularity in prices of numerous finished products characterize the situation. Ability to borrow money readily at low interest rates seems to have improved the demand in certain directions for some time past. Municipalities and gas companies have little difficulty in borrowing money for improvements. Stocks of pig iron on the banks of the blast furnaces of the United States Steel corporation have been reduced to such a low level that that interest is now blowing in additional furnaces more freely. During the past six weeks, the iron stocks of the Steel Corporation have decreased about 100,000 tons, and now stand at a total of about 160,000 tons. The most important pig iron sale of the week was about ten thousand tons of basic to the Lukens Iron & Steel Co. at a shade less than \$15 delivered. In the south, makers are usually demanding \$10.50 for No. 2 Birmingham, but as shown by purchases of a sanitary interest at Pittsburg, a stove company for its plant near Cleveland, and by Chicago buyers, it is easy to buy at ten dollars in lots exceeding a thousand tons. A furnace company near Pittsburg has changed ten thousand tons of basic iron for billets. The quotation of fifteen dollars valley, which has now prevailed for a year seems to be firmly adhered to. The effects of the very active competition on shunting are being shown in low prices. This is true in spite of the fact that leading interests are adhering to the regular quotations, and are well supplied with orders. On merchant bars the quotation of 1.25 Pittsburg is adhered to on ordinary business, but 1.20 is freely made on good tonnage. Minneapolis has awarded two thousand tons of cast iron pipe to the United States Cast Iron Pipe & Foundry Co., which was also awarded two thousand tons by Portland, Ore., while a Portland company was awarded 1,600 tons. Teaching Life Insurance. No less than eighteen American universities and colleges are now giving courses in the subject of life insurance, while in fifteen others there are general courses given in which insurance forms a part.

WANT \$1,500 FOR DAMAGES

Menominee, Mich., Aug. 17.—Papers were served this afternoon in two damage suits started against Howard George a Marinette young man and grandson of Senator Isaac Stephenson for alleged injuries received when George's auto collided with a rig driven by the plaintiffs, Arnold Schults of Kaukauna who is employed as sawyer in one of the Marinette mills, and Ernest Gannegan of Marinette are the two young men who claim they were injured. The former wants \$500 and the latter double that amount for alleged damages done to their rig and for minor personal injuries.

The collision occurred on July 31

about nine o'clock in the evening on the Peahigo road. The George car which was being driven in the direction of Marinette is said to have been without lights and was going at a high rate of speed.

The horse which was owned by the Holquist livery was knocked down, and the two men were rendered unconscious by being thrown from the rig. They were taken to the Menominee River hospital in an ambulance where their injuries were attended to.

WIFE GOT TIP TOP ADVICE.

"My wife wanted me to take our boy to the doctor to cure on ugly boil, writes D. Frankel, of Stroud, Okla. "I said put Bucklen's Arnica Salve on it. She did so, and it cured the boil in a short time." Quickest healer of burns, Scalds, Cuts, Corns Bruises, Sprains, Swellings. Best Pile cure on earth. Try it. Only 25c at All Drugists.

Telephone your wants to 69.

PANAMA CANAL AS IT IS NOW

Marquette, Mich., Aug. 17.—Mr. and Mrs. Gilbert Cooper and infant daughter arrived home yesterday from the Isthmus of Panama, where Mr. Cooper is employed as civil engineer in railroad work and the construction of the Panama canal. When asked last evening to tell his friends about the present status of the work and conditions in the canal zone, he made the following statement:

"According to the present progress of construction the canal will be completed in slightly more than two years, and it will be given over to the world's traffic in January, 1915. A recent estimate shows that the excavation in Culebra cut, extending from Bas Obispo to Pedro Miguel, will be completed in two years. In addition to the removal of material from the prism of the cut, there will be a continued excavation for several slides, which are the last barrier toward a finished channel, according to the plans.

"After excavation is finished, it will be necessary to construct a rather extensive amount of concrete retaining wall along the sides of the channel so as to prevent further slides and to insure the stability of the present rock banks. Much of the rock has a tendency to disintegrate after it has been exposed to the air, and by the proper use of concrete the permanence and rigidity of the banks will be maintained.

"At present, about 90 per cent of the material removed from Culebra cut is rock. This is excavated by some fifty fine steam shovels and transported by train to the dumps at Balboa, Miraflores and at the Gatun dam. Excavation has always been a problem of transportation, rather than engineering.

"To the layman the Gatun dam and locks are spectacular. The dam will hold a lake of approximately 170 square miles to an elevation of 85 feet above sea level. It is of the type known as 'earth dam,' having a core of clay and earth, with rock for the face and back and at the toe.

"The Gatun locks will have three lifts and when completed will raise ships from sea level to an elevation of 85 feet. Reinforced concrete is used throughout the construction. The gates will be operated electrically. Each lock will be 1,600 feet long and 110 feet wide. At present the Gatun locks are about 60 per cent completed. The concrete at Gatun is placed by means of aerial cableways of the Lidgerwood design.

"At Miraflores and Pedro Miguel the design of the locks and gates is similar to that of Gatun and the method of construction is quite the same, except that the concrete is mixed and placed by cranes of the cantilever type. There is one lift at Pedro Miguel from elevation 85 to elevation 55, and two locks at Miraflores from elevation 55 to sea level. The only stretches of sea level channel are from Cristobal to Gatun and from Balboa to Miraflores.

"The sanitary department of the isthmian canal commission has attracted the world's admiration. By minute and rigid supervision and by the enforcing of strict sanitary laws, Panama has been transformed from a sodden pest hole, reeking with yellow fever and malaria, to a veritable winter resort. Without expert sanitation the canal could never be built.

"Perhaps the most remarkable personality on the Isthmus is Colonel Geo. W. Goethals. The form of government is absolute. Colonel Goethals is the ruler and his administration is admirable in its perfection of combining army discipline and wise and just execution. His is the last word on all matters, whether it be in civil administration, sanitation or engineering."

LIVE ITEMS OF INTEREST

John McRae is back from a business visit in Chicago.

Mr. and Mrs. A. J. Young are visiting with friends in Marinette and Menominee.

John Corcoran has returned to his home at Crystal Falls following a visit here.

We serve soda in individual Sanitary Paper Cups if preferred, or in absolutely clean glasses. "Sweet Corner."

Tenton and son Charles, returned last night to the city after making a trip in an automobile to Wells, Gladstone and Escanaba. Mr. Tenton found the Michigan roads in fine condition.

Marinette Eagle-Star:—Mrs. T. J. Cannon and Miss Lou Gordon of Gladstone, Mich., are guests of their sister, Mrs. Joseph A. Gagnon, Pierce avenue.

P. L. Utley of Escanaba who had been in the city has returned home. John Riley left yesterday for a short visit at Green Bay.

"Puretone" Buttermilk made right, kept right and served right. Ask your doctor. "Sweet Corner."

Supt. F. E. King of the public schools has returned from an extended visit with relatives in several cities in Iowa.

Miss Margaret Semper has left for a two weeks' visit with friends in Birch and Marquette.

Max A. Godin and Miss Anna LePoint have gone to Chicago where they will visit several days with friends.

AIR MEN ARE INDIGNANT

Chicago, Aug. 17.—The aviators here are inclined to criticize the local management for not calling off the program for the day when Badger was killed. Harry N. Atwood who is flying from St. Louis to New York, sent identical telegrams today to every afternoon paper, characterizing the non-action of the management in this regard as "ferocious and uncivilized."

Walter Brookins and Andrew Drew expressed themselves without restraint, while assent to their remarks was nodded by the bystanding flyers.

"We were all unmoved by the accidents," Brookins said. "But we were not signaled to come down, and so continued our flights. There wasn't an aviator on the grounds who felt fit to handle a machine after Badger's death. We knew him and liked him. Still the program never halted. No aviator would decline to fly, no matter how shaken his nerves were. If he did his prestige would suffer."

Owing to the danger, the trial for altitude with passenger was eliminated from the program, and this afternoon the aviators were warned to avoid spirals, dips and other hazardous feats.

A coroner's jury, being unable to fix definitely the cause of Badger's death, returned an open verdict, merely stating that death was due to a fall from an aeroplane.

Walter J. Fontain, a mechanic in the Baldwin camp, fainted when he saw Badger's body.

ARE STILL DRILLING FOR MORE ORE

The United States Steel corporation, which some time ago began drilling operations at the old Northwestern property, in the Michigan valley, south of Republic, is continuing the work with no indications of giving up the search in the near future. The Northwest property is located on a tract owned by the Michigan Land & Iron Company, and is under option to the steel corporation.

The Northwest was opened many years ago and at that time made total shipments of some 1,600 tons, which was the only ore that was ever taken from the tract. The corporation will put down several holes in an effort to ascertain what ore lies beneath the old shallow drifts.

The steel corporation also has drills at work on other lands owned by the Michigan Land & Iron company some distance south of the Northwest property. With crews working at two different points, a considerable stretch of new territory is being explored and there is considerable interest shown concerning the outcome of the work.

The John T. Jones interests, which are developing the old Kloman mine at Republic and installing an Ardis furnace plant there, expect to put the product of that mine on the market within a few weeks. The company has had several delays in the delivery of machinery and other material, though the building operations are now nearly completed. The new furnace house is constructed of concrete and is seventy-five feet in length by thirty feet in width. The building will contain three furnaces, each eighteen feet in length. The jig house, roll house and crusher building will soon be completed. The shaft house, engine and boiler houses, a generator house, warehouse and shop buildings are finished.

The Jones process, which was proved a success at the company's Iron Mountain plant is designed to make lean ores salesworthy through metallization. The mining men throughout the Lake Superior district are naturally much interested in the results obtained through the use of these furnaces. The installing of one at the Kloman mine will result in increasing the number of men employed in the Republic district. It is the belief of some that in time the Jones people will find it to their advantage to explore the Kloman property more thoroughly than ever before. For the first few years that the furnace plant will be in operation it will not be necessary for the company to expend any considerable sum in development or mining work, as practically all of the ore that will be treated will be mined at or near surface.

A well known fact is that the smah after suffering from one do- lera a \$1.00 rail all

NEWSPAPER REPORTER DISGUISED, GETS NEWS OF POPE'S CONDITION IN VATICAN

Rome, Aug. 17.—The cool air of the early morning helped to freshen the pope, who when he was visited by his physicians, appeared to be no worse than yesterday. Professor Marchiafava, the consulting doctor at the vatican, explained that the pontiff's restlessness during the night was due perhaps to the fact that he had slept less than usual yesterday afternoon. Moreover, the restlessness might be described as impatience at an invalid life which is really a symptom of convalescence.

An incident amusing to some, but annoying to the sisters of the pope, is related today. The sisters, who have been besieged by newspaper men and photographers, have become unapproachable to those wishing in-

formation regarding the pontiff's condition for public use. Late yesterday a reporter disguised as an inspector for the gas company entered their home and, after examining the meter and the pipes, humbly inquired for the holy father. The sisters, mistaking the man for a devout individual anxious for the pontiff's health, answered candidly. A few hours later they were chagrined to see every word they had spoken published in the Giornale Di Italia.

This morning a genuine clerk from the gas company's office, who had not read the Giornale Di Italia, visited the home of the sisters in the regular performance of his routine duty. No sooner had he explained his mission than he was overwhelmed by a torrent of Venetian remonstrances.

MAJ. OATES, FIRE WARDEN, HAS A SCHEME TO IMPRESS SCHOOL BOYS AS FIRE SCOUTS AS 'TWERE

Lansing, Mich., Aug. 17.—William R. Oates, the state's new game and forestry warden, has a scheme. He hopes, through the co-operation of Superintendent of Public Instruction L. L. Wright, to put it into effect in the fall. It is to make district schools, teachers and pupils co-ordinate branches of the state game and forestry department. Although this may require years to accomplish, Maj. Oates hopes to start the ball rolling, so that future generations will derive the benefit.

Although he has competent deputies in every county it is impossible, with the amount of territory they are required to cover, to discover a forest fire the instant it starts, and thereby prevent it from assuming alarming proportions. Maj. Oates, thinks that if he could interest the school boys they would instantly report to the teacher, who in turn would notify the nearest supervisor. He points out that by following such a system a force of fire fighters could be called to the scene of trouble before the flames had gained any headway and the loss of life and property might be averted.

To every boy who reports a fire, or is instrumental in stamping out a

blaze, Warden Oates would award a medal of honor, or some inexpensive token that the lad could keep as a memento of honorable service performed for the state. The possibility of youngsters, starting fires in order to get a medal or honorable mention from the department has been raised, but Maj. Oates declares that boys as a whole are "square" and have a creed of honor, which if broken makes the offender a black sheep among his fellows.

It is the wish of Maj. Oates that there may be introduced into the curriculum of study each day on the precinct of every district school on the northern counties a ten-minute ventilation of forest fires. Inability to cope with the situation after a fire has started has led many of the settlers to the belief that all the precaution in the world would not prevent a similar occurrence, according to Maj. Oates, but he hopes by scientifically educating the settlers and their children, especially the latter, that the great menace to property and homesteaders in the wilds of northern Michigan may be minimized or perhaps eliminated. If enthusiasm counts for anything, the friends of the new warden are confident that he will produce excellent results.

STATE TAX BOARD IS MORE THAN BUSY

Lansing, Mich., Aug. 17.—Members of the state tax commission are holding daily meetings and working with feverish haste to complete their reports before the state board of equalization convenes in Lansing next week. All information regarding the findings of James Finley, the mining expert appointed to appraise the mineral wealth of Michigan, is being closely guarded and the commissioners declare that the result of his work will not be given out until the board meet Monday afternoon.

SCIENCE OF HEALTH

By M. A. LANE, Sc. B. Former Research Fellow in Physiology University of Illinois

The Natural Way to Eat

When Rover is fed with a prime quality of beefsteak, he never puts a tooth in his morsel, but bolts them whole. Rover's stomach is ready for his meal, and he digests it without preliminary chewing. Rover's master or mistress could follow Rover's example without the slightest impairment of digestion, but of course the popular tradition has it that a man should chew his food, and this tradition is encouraged, not only by professional faddists, but also by medical advisers, who, in many cases, have their own reasons for doing so, but who, as a general thing, believe that a thorough mastication assists digestion.

the mouth, or from the grinding process of the teeth. Old Rover needs no doctor or faddist to tell him that he must not swallow his food unchewed. He would go right along bolting his beefsteak if the assembled "faculty" of Europe were there on the spot to threaten him with dire dyspepsia did he do so. He knows just what he can do, and just what he cannot do, better than his medical advisers—did he have any. But if you could persuade Rover to try to make a meal of soda crackers, he would probably do no end of chewing previously to sending his crackers down to his stomach.

The salivary juice will digest starches, and by starches are meant certain kinds of plant food, such as bread and potatoes; but it has not the slightest effect on animal food—inclusive of fat—and this, so far as the economy of nature is concerned, may be swallowed with little chewing or bolted outright. A piece of pilot bread—which is usually as hard as granite—will rapidly be attacked and partly digested by the salivary ferment, whereas a bit of beefsteak will remain in the mouth undigested for days, or even forever.

Should anyone accuse me of trying to "make practice" for the stomach specialists by giving bad advice, I will reply that it is more than probable that if men and women were more disposed than they generally are to bolt their meat, there would be less indigestion than at present. I say probably, because indigestion is never, so far as I am aware, caused by the bolting of meat food, but is most certainly caused by bacteria, and very often by the bolting of unchewed or insufficiently chewed starchy foods. Persons who, perforce, as in certain countries of Europe, must live almost altogether

or on starchy foods, such as potatoes, are often afflicted by what is known by the rather inelegant term of "potato belly"—technically, dilatation of the stomach. Now the stomach has precisely the need of "something solid" in the way of meat upon which to "set its grip," as it were. And this something solid is that very unchewed "chunk of meat" which Rover will watch for with a keen and eagerly anticipating eye, and let slip untouched down his esophagus the moment it is dropped into his mouth.

I have never undertaken to feed myself for any length of time with finely powdered meat on the theory of saving my stomach its "work." If there is any one thing the stomach needs, it is work. And feeding it with ground meat, or too well chewed meat, or meat that is chewed more sufficient to make it swallowable, unquestionably deprives the stomach of the work that it and its ancestral stomachs have been accustomed for ages to do.

Nature, in the machinery of digestion, has given us a capital hint as to how our food, animal and plant, should be ingested. The mouth is provided with juices that digest only starchy foods; and the stomach is provided with juices that digest only animal food, with the possible exception of fat. This fattest animal food (called proteids by chemists) is attacked by the juice of the stomach, say rather by certain substances in the gastric juice (called ferments), principally pepsin, and is made ready to be still further acted upon by the juice of the pancreas, when it is turned over by the stomach to the small intestine.

The pancreas, in fact, and not the stomach, is the main organ of digestion. With equal ease it digests animal food of every kind, including fat; and likewise all the starchy foods which have been only partly digested in the mouth. The Germans significantly call the pancreas the "abdominal salivary gland." Theoretically we would do quite well without either stomach or mouth. The famous German physiologist, Ludwig, reported that two of his dogs lived for several years in above-normal health with no stomachs at all. The moral of all this would seem to be: Chew well your starchy foods, if your hobby inclines you to that practice, and you have the necessary time to spare, but bolt your meat like Rover.

FASHIONS of the MOMENT

PARIS.—Nothing could have been more brilliant than the scene at the Restaurant Armonville, late in the afternoon on which the Grand Steeple was run. The little tables under the trees were all taken by members of the most exclusive social circles of Paris, and many of the toilettes worn were sartorial poems.

Armonville still remains the favorite open-air restaurant of fashionable Paris. The drive to it is delicious on a hot summer day, through the leafy Bois de Boulogne, and the restaurant itself is so favorably situated that it seems to form the very heart of the Jambos woods.

It has always seemed to me that pretty women look prettiest there. The soft shadows thrown by the great trees are infinitely becoming and the surroundings of exquisite flowers help to make a fascinating frame for beauty.

On the afternoon in question, I saw several charming summer costumes, composed of silk-finished linen in pale pastel shades, embroidered in the openwork style and mounted on supple black silk. This is a novel idea, but a remarkably effective one. It was first launched by Worth; at least, I think so. He made two lovely gowns of this order for Princess George of Greece a little while ago and since then one of somewhat similar design for the young queen of Spain.

The latter was carried out in pale putty-colored linen, richly embroidered in a languid and mounted on black serge silk. The skirt was round and only moderately clinging and there was a hem, 22 inches in depth, of

white linen and both skirt and coatee were trimmed with raised embroideries worked in heavy white silk and with frills of Valenciennes lace. The skirt was round and the embroideries, headed by three rows of frills, ran up into a point at the back, while in front they went away to nothing. The little coatee had a long, square basque at the back and this was embroidered and edged with lace frills, while over the shoulders was a fichu collar adorned in like manner. At the waist was a ceinture of black satin and the picturesque hat of Tuscan straw was lined with black velvet and trimmed with shaded ostrich feathers, which showed delicate tones of pale gray, pale pink, ivory and black.

Quite suddenly the Parisiennes have developed a strong affection for the picturesque coatees to which I have just alluded; quaint little garments made of taffetas, serge-silk, dull satin or fine linen. And very often the coats are of quite another color to that of the dress. Shout taffetas are very much in demand for these coats and the favorite trimming is a flat ruching on the hem of the coat and on the sleeves. Almost invariably the collar—generally a large one—is of the same material as the dress.

For garden parties or for afternoon concerts, casinos, etc., these little coats are most convenient. They give a "dreezy" appearance to a simple costume and they are simply made besides being practical.

I spoke a few weeks ago about the present rage for mixing linen and silk or linen and satin on summer costumes, and this fad seems to date a stronger hold on the affections of the Parisiennes. Most of the linens that are being used by the big dress-makers this year are of the silk-finished order and they melange excellently with silks and satins.

Of raised embroideries, as of open work, there seems no end. We find one or both on all the best linen costumes created by such artists as Paquin, Worth, Lanier, etc. Some, too, has lately made some ideal garden party toilettes of embroidered linen, notably one for the Boronno Henri de Roths child, in a warm shade of mastic. Or the skirt was a deep tone of venetian guipure in the same tone of mastic and the short, light coat was entirely composed of the same costly guipure. Both skirt and coat were mounted on taffetas of the raven's wing blue tint and there was a touch of sombre black at the folded waistband which showed itself in front. On the coat were four lovely buttons of dull silver and white enamel. This was a most original costume and yet so perfect in design that it could be worn at any time without attracting undue attention.

Redfern and the other well-known tailors are already hard at work on smart tailored suits for the naval review and for the Cowes week. The unwritten law demands that the members of the smart set shall wear serge, of one color or another, in the day time at Cowes and navy blue serge is an easy victor in this race for popular favor. It is not an exaggeration to say that in the royal circle nine women out of 10 wear smart suits of navy serge all during the famous "week." And these suits are varied in the most wonderful manner. There are fine serges handsomely braided and diagonal serges elaborately machine stitched and coarse serges which are left quite plain but which are worn in conjunction with attractive waistcoats and dainty skirts; these and many others, and of course cream of pure white serge is in great demand for Cowes' costumes.

Princess Plees, for example, almost always wears white serge suits at the regattas, while her sister, the duchess of Westminster, is generally faithful to navy blue. Mrs. George Cornwallis West of the same family invariably wears the smartest of smart suits in heavy serge and, to select an example in the very highest circle, the present queen of England is devoted to navy serge. Both she and her mother-in-law, Queen Alexandra, have a special fancy for diagonal serge of a very supple texture.

Redfern used to have lengths of this serge specially woven for Queen Alexandra and the color chosen was almost always that dark blue in which there is a faint tinge of purple. A robe of rose-colored tussore and venetian lace, with hat of tussore with a large pink rose is shown in the illustration.—Idalia de Villiers in the Boston Globe.

Arranging Flowers. Here are five golden rules which should be observed by those who often arrange flowers. Use plenty of foliage. Put your flowers in very lightly. Use artistic glasses. Do not put more than two or, at the most, three different kinds of flowers in one decoration. Arrange your colors to form a bold contrast or, better still, a soft harmony. The aim of the decorator should be to show off the flowers—not the vases that contain them; therefore the simpler ones are far preferable to even the most elaborate. Glasses for a dinner table should be either white, a delicate shade of green, or rose color, according to the flowers arranged in them.

His Training. "The writer to whom you directed my attention seems to be well posted on corners." "He ought to be. He used to be a street mail box collector."

Country Cousin. "Don't the bustles of the city make you nervous?" "I ain't see no bustles, but some of these hobble skirts make me shy a little."

PHILADELPHIA FINDS GREATEST THING ON EARTH

Important Discovery is Yours at Any Time—Cures Sores and Skin Diseases.

Read what this man says. After using only two cakes of Resinol Soap and one-half jar of Resinol Ointment he cured sores and eruptions of long standing. "I had a very sore face, and after trying most everything I thought I would try your Soap and Ointment. After using two cakes of Soap and part of a jar of Ointment I found them to be the greatest thing on earth. I advise all those who suffer from any skin disease to use Resinol Soap and Resinol Ointment. I am glad to say that my skin is nice and clear and I intend to use Resinol Soap as long as I can get it."

T. K. MATHIEU, Philadelphia, Pa. It is evident that common sense requires everybody everywhere to have on hand, ready for immediate use, the one standard remedy for all skin troubles. It is Resinol Ointment, put up in screw-top opal containers and selling at fifty cents or a dollar, according to size. This ointment should occupy a prominent place in every bathroom, on every medicine shelf and in every traveling bag, that it may be ready for immediate use. Resinol Ointment does not contain a particle of lead or mercury or other poison. It is absolutely non-irritant, and cannot injure the most delicate skin. It is highly recommended by physicians and nurses. For years Resinol Ointment has remained the standard remedy, noted for its effectiveness and complete harmlessness. It is sold by druggists everywhere. Resinol Chemical Co., Baltimore, Md.

Ended Cat's Sojourn. Felix Smith of Easton, Pa., bought a cat the other day. He paid \$5 for her. Why did Felix pay five bucks for the cat? Answer—Because she was guaranteed to be a good ratter. Did Felix have rats? We should say he did—the house was full of 'em! And the cat cleaned 'em out! No; that's the curious part of it. After the cat had been on the job a week the rats were as plentiful as ever. Felix wouldn't understand it until one evening he concealed himself in the basement to watch the cat. About 9 p. m., as the cat sat with her eye on a rat hole, Felix says that rat after rat came out of the hole, walked up to the old cat, kissed her good-night and then returned to the hole. After that Felix kicked the cat out of the house.—Boston Post.

Baffling the Mosquito. Last summer we were pestered with the awful nuisance, mosquitoes, night after night, and on one occasion killed between thirty and forty in our bedroom, at midnight. The following day I took a woolen cloth, put a little kerosene oil on it, and rubbed both sides of the wire mesh of the screens with it. That night one lonely mosquito disturbed our rest. Two or three times each week I rubbed the screens in like manner, and we enjoyed peace the rest of the summer. The odor from the oil remains only a few minutes, and the oil itself preserves the screens and keeps away flies.—Good Housekeeping Magazine.

Held the Records. Two ladies seated at afternoon tea fell to discussing the prowess of their respective husbands. After each had related several facts of endurance and hardihood, one of them remarked that her husband had on one occasion dived under the water and remained down for fully two minutes, without coming up to take breath. "Oh," said the other, "that is nothing. My first husband dived below the water five years ago, and has not yet come up to breathe."

STRONGER THAN MEAT A Judge's Opinion of Grape-Nuts. A gentleman who has acquired a judicial turn of mind from experience on the bench out in the Sunflower State writes a carefully considered opinion as to the value of Grape-Nuts as food. He says: "For the past 5 years Grape-Nuts has been a prominent feature in our bill of fare. The crisp food with the delicious, nutty flavor has become an indispensable necessity in my family's everyday life. It has proved to be most healthful and beneficial, and has enabled us to practically abolish pastry and pies from our table, for the children prefer Grape-Nuts, and do not crave rich and unwholesome food. "Grape-Nuts keeps us all in perfect physical condition—as a preventive of disease it is beyond value. I have been particularly impressed by the beneficial effects of Grape-Nuts when used by ladies who are troubled with face blemishes, skin eruptions, etc. It clears up the complexion wonderfully. "As to its nutritive qualities, my experience is that one small dish of Grape-Nuts is superior to a pound of meat for breakfast, which is an important consideration for anyone. It satisfies the appetite and strengthens the power of resisting fatigue, while its use involves none of the disagreeable consequences that sometimes follow a meat breakfast." Names given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in place of "There's a Reason."

IN THE COUNTRY.

The City Man—Your father, I believe, cleared the land of everything. The Countryman—Yes—everything but the mortgage.

Tit for Tat. A young man, who had not been married long, remarked at the dinner table the other day: "My dear, I wish you could make bread such as mother used to make." The bride smiled and answered in a voice that did not tremble: "Well, dear, I wish you could make the dough that father used to make."

More Than That. "Did they water the stock?" "They fairly turned the hose on it."

Instrumental music is sometimes only instrumental in making the people next door move.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, &c. &c. a bottle.

A wise man may forgive, but only a fool will forget.

SAVED FROM AN OPERATION

By Lydia E. Pinkham's Vegetable Compound

Pooria, Ill.—"I wish to let every one know what Lydia E. Pinkham's Vegetable Compound has done for me. For two years I suffered. The doctors said I had tumors, and the only remedy was the surgeon's knife. My mother bought me Lydia E. Pinkham's Vegetable Compound, and today I am a healthy woman. For months I suffered from inflammation, and your Sanative Wash relieved me. Your Liver Pills have no equal as a cathartic. Any one wishing proof of what your medicines have done for me can get it from any druggist or by writing to me. You can use my testimonial in any way you wish, and I will be glad to answer letters."—Mrs. CHRISTINA REYNOLDS, 106 Mound St., Pooria, Ill.

Another Operation Avoided. New Orleans, La.—"For years I suffered from severe female trouble. Finally I was confined to my bed and the doctor said an operation was necessary. I gave Lydia E. Pinkham's Vegetable Compound a trial first, and was saved from an operation."—Mrs. LILY PEYRON, 1111 Kerleron St., New Orleans, La.

The great volume of unsolicited testimony constantly pouring in proves conclusively that Lydia E. Pinkham's Vegetable Compound is a remarkable remedy for those distressing feminine ills from which so many women suffer.

DAISY FLY KILLER. Kills all flies, mosquitos, house flies, etc. Guaranteed to kill. Sold by all druggists. Price 25c per bottle. Write for Free Trial of Postum's Pleasant Pile Cure. S. K. WARREN, Auburn, Indiana.

Man Should Live 120 Years

What is the natural age to which men would live if they were blessed with the "sound mind in the sound body"—that dream of all hygienists from the time of Epicurus and before? Metchnikoff, the ingenious and startlingly original director of the Pasteur Institute in Paris, has placed the natural age of man at 120 years. The great Parisian scientist does not put out this assertion as an opinion or a theory, but as a plain fact. Man should live 120 years, and if you have the courage and persistence to follow Metchnikoff through the work he has been doing for many years in one of the world's most celebrated centers of science, you will probably be convinced of the truth of his bold announcement.

It is needless, however, to spend half one's life in a laboratory to satisfy one's self that Metchnikoff is right. A little hard thinking will do it. If we can only be persuaded to sit up and make due note of the marvels that are going on about us every day, and which for the most part we let slip by without taking in them the least spark of interest.

In the twelve months last past there died in this country at least five persons who had reached the age asserted by Metchnikoff to be the "natural" age of man. Five persons, during the past year, in the United States, died at the age of 120 years or over. Perhaps there were more than five. At least five were reported by the newspaper press services, and five are enough. If only one were certainly known to have lived to that age, that one alone would be warrant sufficient upon which to base Metchnikoff's remarkable claim.

Aburd as this may sound, it is theoretically true, and it would be practically true if all men were as sound to begin with, and as carefully protected, within and without, from disease and accident, from the poisons of industry and fatigue, from impure and insufficient food, and from the destructive effects of alcohol and tobacco as were the long-lived men themselves.

Prior to Metchnikoff's claim it was generally held that men inherited their natural age from their ancestors; that the natural age of a man—disease germs apart—was the sum total of the power to live resulting from the blending of such power in all his ancestors—going back as far as you like.

This remarkable law can be stated thus: Each man inherits from his ancestors a tendency to die at a certain age. Common observation seems to prove that this is the case. But every man also inherits from his ancestors another quality. He inherits the tendency to live longer or shorter than the grand average of his ancestors themselves; and it is because of the indeterminate mixing of all degrees of this potential life that the grand average at present hovers over the decade between 70 and 80 years.

But, says Metchnikoff, bacteria in the blood of the man who dies at 75 are generated by bacteria; traces of the phagocytes of the body that had been destroyed by the bacteria are still in the blood of the man who dies at 85.

and your man will live 50 years longer. Now here we have the test and turning point of Metchnikoff's claim: If 120 years be the average of the healthy man's life—bacterial poisons apart—some lives would be longer and some shorter than the average, according to the inherited potential of the individual; and the indiscriminate mixing of these potentials would leave the race in relatively the same condition, with reference to longevity, in which it now is. Some few men with low inherited potential would die of old age at 80; some would live to be two centuries old; and the average life of man would hover around 120 years.

But there are some who go farther than Metchnikoff and urge that the science of the chemistry of life can advance no good reason why life should not be prolonged for indefinite ages, with the body in a state of buoyant youth and health—if once the work going on in the nucleus of the cell could be even fairly understood.

Maupas, the French biologist, "rejuvenated" a dying race of microscopic animals whose bodies consisted of a single cell. Now the human body is merely a great cosmos of cells held together, probably, by ties too elusive for the microscope or for experimental demonstration. They can scarcely be regarded as independent individuals, but they are true cells, none the less. When a man dies and decays, we behold the slow death of a universe of cells—infinite if measured from the standpoint of the infinitely little cells composing it.

If this universe of cells—this great family of cell-races—could be rejuvenated, as Maupas rejuvenated his Paramecia, who can say that it would not continue in life virtually without end? Refreshen the nucleus—that microscopic organ whose activities determine inheritance, length of life, health and the rest of it—and maintain it refreshed, and man may live forever!

The Frenchman Leduc has recently published the most fascinating results of his work with artificial cells which behaves startlingly like the living cell itself. Fischer, the German chemist, has built up compounds identical with the complex compounds that form the framework of the living molecule. Natural sugar-splitting ferments have been found—ferments that split up sugars that have no existence—so far as is known—in nature, but which have been artificially made by synthesis. The drug fiend can swallow with impunity enough morphine to kill 100 men. Christian Science can, and does, through the central nervous system, produce in the body results wholly inexplicable by known facts of physiology.

Why should not some of the researchers now busy with the activities of the nucleus hit upon a method—and they are trying—not only of rejuvenating the nucleus, or the potent stuff contained within it, but of keeping it young? In some dressings sometimes come and sometimes the brass of yesterday is the bellows of tomorrow.

KNEW WHAT A LICENSE WAS

Small Marjorie Ready With an Explanation That Threw Light on the Subject.

Marjorie and Paul were playing railroad train on the floor of the sitting room and Aunt Sue, who was visiting their mother, was embroidering what Marjorie persisted in calling a "center-piece" for the table. After the railroad cars had been duly "wrecked" and all the passengers killed off, the sport began to ebb and the attention of the two youngsters began to wander. Paul's eye fell upon the figure of his aunt in the sunny window, bending over her needlework. "Aunt Sue?" began Paul. "Yes, dear."

"Don't you ever get lonesome when we ain't around, or anybody?" "Well—perhaps; what makes you ask, Paulie?"

"Well—I just was wonderin'. You haven't any little boys or girls of your own, have you, Aunt Sue?" "Why, no, Paul; I'm not even married, you know."

Paul thought a few seconds over this. "But you're grown up, Aunt Sue. Ain't—ain't you old enough to get married? Mother says—"

"Oh, yes, Paul, I'm old enough—" Aunt Sue, as a matter of fact, was at that very moment watching out the window with one eye for the postman to bring a Certain Letter, but she didn't feel equal to explaining in full to Paul. For the sake of making some sort of answer she replied to her small nephew who was patiently awaiting explanations: "But you know, Paul, you can't do these things all in a minute. Why, before I ever got married I'd have to get a license."

Paul looked greatly puzzled. He had not supposed it was such a complicated business—besides, what was a license, anyway? "What's a— a license, Auntie Sue?" he inquired with much interest. Sister Marjorie, who had five years to her credit and had hitherto taken no part in the conversation, aroused herself and gazed at her brother in candid scorn.

"Well, Paul, if you ain't the stupidest boy not to know! I license is what you get before you can have a dog!"

Power of Publicity. Commuter's Wife—John, did you get those pickles I wanted and showed you the poster of? Commuter—No, love. I was more moved by the advertisement of these books and eyes, so I bought them instead.—Woman's Home Companion.

The Only Tie. "They quarrel a good deal." "Yes; there's only one tie that keeps them together." "And that is?" "Her new gown. Having no maid, she has to depend on her husband to look her up the back."—Exchange.

Another rarely lovely dress, which would make an ideal model for a summer costume, was worn by the princess de Leca, who has been entertaining a great deal in a quiet way this season. The material was pure

openwork embroidery, the design showing garlands of vine leaves and bunches of small grapes. There was a quaint coatee which was cut away in front and which had a short basque at the back and the large collar, as well as the turned back cuffs, was covered with embroidery.

One of the prettiest toilettes seen at Armonville on the afternoon of the "Grand Steeple" was that worn by the viscountess de Poloux. The material was silk finished linen in an exquisite shade of palest salmon pink and the openwork embroideries were done in heavy washing silks. The round skirt was molded to the figure and was embroidered all round as far up as the knees. At the extreme hem was a bias band of black satin and the embroidered skirt was worn over a black satin underdress which showed distinctly.

There was a picturesque coatee of dull black satin. It was rather short and was double breasted, fastening at the waist with a flat rosette of satin. The sleeves barely reached to the elbows, and there was a large collar and turned back cuffs of embroidered linen. The coat opened in a V over a blouse of fine muslin and Valenciennes lace.

With this delightful dress the viscountess de Poloux wore a large, flat hat of pale yellow straw. Crossing the crown and falling loose at the back was a long length of black velvet ribbon and the crown itself was almost covered with wild flowers and ears of golden corn.

Another rarely lovely dress, which would make an ideal model for a summer costume, was worn by the princess de Leca, who has been entertaining a great deal in a quiet way this season. The material was pure

SPORTING DEPARTMENT

The Only Local Newspaper with a Reliable Sporting Department...

CUBS ARE BEATEN BY BOSTON 12-8

Boston, Aug. 17.—The locals landed on Richie for 15 safe bingles and won today's game easily 12 to 8. Perdue was touched for 11 hits but managed to keep them pretty well scattered.

The Score: R. H. E.
Chicago 8 11 3
Boston 12 15 1
Batteries—Richie and Archer.
Perdue and Raridan.
Umpires—Johnstone and Eason.

GIANTS POUND REDS PITCHERS AND WIN TWO GAMES.

New York, Aug. 17.—The Giants pounded the Reds' pitchers unmercifully today and won both games of the double bill 10 to 4 and 15 to 2. In the first game Keefe was landed on for 16 lovely swats and in the second Smith was binged for 15 safe ones. Both Ames and Crandall for the Giants pitched good ball allowing 9 and 7 hits respectively. The second game was called in the eighth on account of darkness.

The score—1st game:— R. H. E.
Cincinnati 4 9 2
New York 10 16 3
Batteries—Keefe and Clarke.
Ames and Meyers.
The Score—2d game: R. H. E.
Cincinnati 2 7 3
New York 15 15 2
Batteries—Smith and McLean.
Crandall and Meyers.
Umpires—Rigler and Finnegan.

ST. LOUIS CARDS WIN FROM PHILLIES BY SHUT OUT.

Philadelphia, Aug. 17.—Playing errorless ball and hitting Moore frequently and when hits were needed won for the Cards over the Phillies today 7 to 0. Steele allowed but 5 scattered hits while Moore was binged for 10 safe ones and had 5 errors chalked up behind him.

The Score R. H. E.
St. Louis 7 10 0
Philadelphia 0 5 5
Batteries—Steele and Bliss.
Moore and Spencer.
Umpires—O'Day and Emslie.

BROOKLYN TAKES A CLOSE GAME FROM PIRATES.

Brooklyn, Aug. 17.—Brooklyn took a close one from the Pirates today 8 to 7. Both Ferry and Burke were hit freely, the former allowing 14 and the latter 10 hits.

The Score R. H. E.
Pittsburg 7 10 3
Brooklyn 8 14 1
Batteries—Ferry and Gibson.
Burke and Erwin.
Umpires—Klem and Brennan.

COMISKEY MEETS FRIEND THOUGHT TO BE DEAD.

Chicago, Aug. 17.—Among the many friends that extended congratulations to President Comiskey on his fifty-second birthday yesterday was one who he thought was dead and whom he had not seen for eighteen years. In fact, the president of the White Sox did not recognize his visitor until he introduced himself as "Piggy" Ward, a former star who played second base on Comiskey's Cincinnati team twenty years back.

Ward was reported killed some time ago, a dispatch from the south announcing that he had been fatally injured as a result of grasping a live wire.

When he played with Comiskey Ward was considered one of the greatest second basemen on the game, being a speedy base runner and a dangerous batter. Comiskey secured him in a trade in which he gave Tony Mullane for Ward.

SMALLEST LIVING THINGS.

Organisms, generally called germs, are alive, but so small that in a thimbleful of milk there would be millions of them. Yet some of them are vicious little things, which by their combined attack can kill an elephant. That is why milk and water are liable to bring about disease, which is impossible in golden grain belt beers, which you can have in your cellar with absolute certainty that there is not a live germ in a carload. That's because the man who brews knows how, and has the preventive.

MARQUETTE GAMES TO BE IMPORTANT TO LOCAL TEAM

While the prime interest of Escanaba fans will be centered on the four league games to be played at Ishpeming opening today, nearly as great an interest will be held by the games at Marquette where the Lake Superior city players are to make a tremendous effort to shove Negaunee out of first place in the league percentage column. Of the Marquette series this week the Mining Journal says:

With Negaunee battling to maintain its position at the top of the percentage column and Marquette fighting just as hard to get within striking distance of the top, this week's baseball games at the fairgrounds should prove especially interesting. The regular lineup of both teams will play in these games and every player may be expected to give the best he has in him. For the first time, a professional and absolutely unprejudiced umpire will handle the indicator and the continual kicking that has marred many games will be absent.

Beauty. Beauty soon grows familiar to the lover, falls in his eye and palls upon the sense.—Addison.

BOSTON CLEANS UP DETROIT 4-3

Detroit, Aug. 17.—Although touched for 12 safe ones today Pape kept them well scattered and won from the Tigers 4 to 3. Mullin was landed on for 9 hits. Both teams played ragged ball at times.

The Score:— R. H. E.
Boston 4 9 3
Detroit 3 12 2
Batteries—Pape and Carrigan.
Mullin and Stange.
Umpires—Egan and Evans.

ATHLETICS PLAY ERRORLESS BALL; WIN DOUBLE BILL.

Chicago, Aug. 17.—Playing errorless ball all around today the Athletics took both games of the double header 3 to 1 and 5 to 1. The first game was a great pitchers battle between Coombs and Walsh. Coombs allowed 5 hits and Walsh 6. In the second both Bender and Baker were touched for 7 safe ones but they were bunched on the youngster.

The Score—1st game: R. H. E.
Philadelphia 4 6 0
Chicago 1 5 2
Batteries—Coombs and Lapp.
Walsh and Sullivan.

The Score—2d game R. H. E.
Philadelphia 5 7 0
Chicago 1 7 3
Batteries—Bender and Thomas.
Baker and Kreitz.
Umpires—Parker and Sheridan.

CLEVELAND LOSES HEAVY HITTING GAME TO YANKS.

Cleveland, Aug. 17.—The Yanks won today's game from the Naps 6 to 2. Both Ford for the visitors and Gregg for the Naps were hit freely. Ford allowed 10 and Gregg 11 hits but several were bunched on the latter in one inning.

The Score: R. H. E.
New York 6 11 0
Cleveland 2 10 7
Batteries—Ford and Sweeney.
Gregg and Fisher.
Umpires—O'Loughlin and Mullin.

WALTER JOHNSON CLEANS UP ON ST. LOUIS BROWNS, 5-0.

St. Louis, Aug. 17.—Walter Johnson let the Browns down today with 4 scattered hits and won by the shut out route, 5 to 0. Nelson, a new man for the locals, was touched for 10 safe ones.

The Score: R. H. E.
Washington 5 10 4
St. Louis 0 4 2
Batteries—Johnson and Street.
Nelson and Clark.
Umpires—Dineen and Ferrine.

OLD "CY" YOUNG LET OUT; WILL NOT QUIT THE GAME.

Cleveland, Ohio, Aug. 17.—"Nix on the back-to-the-farm talk; I'm going to say in baseball for years," declared Cy Young, the veteran pitcher, when it was announced that the Cleveland club had given him ten days' notice of his unconditional release.

Secretary E. S. Barnard of the Naps made the announcement after expressing regret that the Cleveland club would have to part with the "grand old man" of baseball, as the veteran twirler is styled. He is the oldest pitcher in baseball in point of service.

"You see, I am still in good condition, and my failure to round into form this season is not due to any physical disability, but rather to more or less bad-luck," said the veteran last night. "I'm not yet ready to retire from the game and there is many a good victory in my right arm now. I have not made any plans for the future, but you can depend upon it you'll find me occupying the mound for years yet."

Young entered the big leagues in 1890, when he joined the Cleveland National league club.

HIVES AND PRICKLY HEAT RELIEVED FREE!

There are no conditions attached to this offer. If you are suffering with hives, prickly heat, insect bites, or any other skin affliction, we want you to accept with our compliments a free bottle of ZEMO, the clean liquid remedy for eczema, and all diseases of the skin and scalp.

This free bottle is not full size, but it is large enough to show you the wonderful healing and soothing effects of ZEMO.

Call today for your sample bottle of ZEMO at the Groos Drug Store.

CULLIS OUT OF THE GAME WITH A SORE ARM

Ray Cullis, Negaunee's crack short stop, in out of the game suffering with a sore arm and will be unable to play in the present week end series against Marquette. Of the loss to the league leaders of one of their strongest players the Negaunee correspondent for the Mining Journal says:

The management of the Negaunee baseball team is looking for a short-stop to take Ray Cullis' place temporarily, as he is out of the game for some time. As stated in yesterday's issue, he has carried his arm in a sling, and his physician says that he must not use it for at least two weeks. The cords of the arm have been stretched. Cullis did not realize that it was in such a serious condition until he had it examined. He first injured his arm in the last games against Escanaba and he did not improve it any when he attempted to play Saturday and Sunday in the games against Ishpeming. In Sunday's game he was obliged to shift with Cullis at second and in the game Tuesday against the Elkhart Blue Sox Harley was brought in from left field to play short.

Captain Stelmie was yesterday endeavoring to get a shortstop from one of the copper country teams, and it may be necessary for him to go up there today and pick up one. With Cullis out of the game, all of his teammates, as well as the fans, fear that the team will be considerably crippled.

None of the postponed games will be played this week, and it is expected that there will be a shortstop here by Saturday. The managements of the Negaunee and Ishpeming teams have decided to play off their postponed contest the afternoon of Labor Day.

NEGAUNEE MAN HAS COMPOSED BASEBALL SONG.

Negaunee, Mich., Aug. 17.—W. S. Rowe of Negaunee has composed a baseball song, which is considered by many to be very good.

Mr. Rowe brings in every one of Negaunee's players into the verses. He has composed his own music to the verses and is now waiting to have it harmonized. Mr. Rowe is an expert accountant and is also skilled in composing.

We print below the verses and chorus of the song:

"There is a city in this state
One of the best, they say,
Famous for its baseball team
That's noted for fair play.
They've reached the highest pinnacle
In the league which they belong
And that is just the reason for writing
this, my song.
Chorus:
Goodbye Escanaba, farewell Marquette
Ishpeming, too, a lot of things must
learn yet.
Before they beat Negaunee
That team so staunch and true,
Together give three ringing cheers
For the Grey and Blue.
"Now Capt. Stelmie knows the way
To play the game that suits.
Rosevear is a pitcher dear,
The first baseman is Knutz.
Harley is a dandy boy,
And helps to win the games;
Mahoney, too, is "toney,"
And the third baseman is Rains.
"Cullis is the short-stop,
And he's up to every trick;
Carey, too, is wary,
And the second base is Swick.
Heidenson, the catcher,
Is of the greatest use,
And Casey isn't lazy
And the sub-pitcher is Moose."

Chooses Queer Quarters.

Queer quarters are those chosen by a thrush in Lincolnshire. It has built its nest over the axle and behind the grease-box of a railway wagon at Market Rasen. The bird is sitting on four eggs, and seems to be not at all disturbed when the wagon is shunted.

To Restore Chairs.

To clean and restore the elasticity of cane bottom chairs, turn the chair and with hot water and a sponge saturate the cane work thoroughly. If the chair is dirty use soap. Afterward set the chair to dry out of doors and the seat will be as taut as when new.

NOTICE TO CONTRACTORS

Sealed Bids will be received for the building of a school house in the Township of Ford River on the 7th day of August, 1911, before 2 o'clock p. m. All specifications can be seen, applying to Geo. Jensen, Ford River. The school board reserves the right to reject any and all bids.

Address bids to George Jensen, Ford River.
4911-907-511

HAS ALLEGED VICTIM A PITIFUL FIGURE

San Bernardino, Cal., Aug. 17.—Breaking into the offices of A. W. McDavid, a dentist, at midnight, Chief of Police Mesplet found huddled in a corner, with a baby at her breast, Miss Jennie McDonald, a high school girl missing from her home for eighteen months. The girl said she had been held in subjection in a house adjoining the dentist's office.

Miss McDonald, who is twenty years old, was a pitiful figure, clothed in ragged garments and wasted almost to a skeleton. McDavid, who is married, was arrested on a statutory charge.

Glass Beads in Demand.

There has recently sprung up a sudden demand for glass beads. They are used for beautifying costumes for women, for interior house decorating and a variety of other purposes.

INJURIES ARE FATAL

As the result of injuries received by being struck by a heavy concrete schute at the site of the new dam, that is being constructed across the Escanaba river, on Wednesday afternoon John Wicklund died at the Delta county hospital early yesterday morning. The unfortunate man's skull was crushed in and from the first no hope for his recovery was entertained.

The body was removed to the undertaking rooms of D. A. Oliver where it was prepared for burial. Funeral services will be conducted from the chapel at the undertaking rooms at 2:30 o'clock this afternoon. Rev. Silverman pastor of the Swedish Lutheran church of Gladstone officiating. Interment will be at Lakeview cemetery.

Mr. Wicklund was a member of the Ford River lodge of the Modern Woodmen of America and members of that organization will act as pallbearers at the funeral today.

He was 35 years of age and is survived by his wife and four children, the oldest of which is 10 years and the youngest three and one half years.

BADGER LUMBERMAN PUT THROUGH DEAL

Marinette, Wis., Aug. 17.—Henry Swart and G. A. Mitcheson, well known lumbermen, returned last night from San Francisco where they completed one of the largest timber deals made in the United States in recent years.

The Henry Swart Lumber company and Henry Swart personally sold to H. D. Beatty, and E. D. Connolly of San Francisco, 500 million feet of redwood timber located on the Elks river in Humboldt county, Cal.

The timber was purchased for the G. W. Hooper company of San Francisco and the consideration is said to have been anywhere from \$750,000 to \$1,000,000.

Dr. William Defnet of Detroit is spending a few days with his parents, Mr. and Mrs. F. J. Defnet.

PROTESTS AGAINST THE NEW MOLOCH

Chicago, Aug. 17.—Protesting against the continuation of the international aviation meet now in progress here, Dr. Steward Johnstone, father of St. Croix Johnstone, the aviator who was drowned yesterday in Lake Michigan, made a statement today calling for an inventive genius to safeguard the men flyers. The statement reads:

"I write in protest against this new Moloch that is swallowing up so many of the best of our young men. My boy is dead, a sacrifice to his altar. As a flyer, he was conservative, studying the art from the view point of the elimination of its dangers. He desired to specialize and study cross-country work. He was a type of dozens more now on the brink of the same sacrificial slaughter at this aviation meet.

"We cannot prevent their loss, you say; man must conquer the air. You can, I say, and still must conquer the air. It is perfectly obvious that these frail machines will break with a terrible strain upon them. It is just as true that in the hands of the best mechanics motors will act erratically, break, stop. Now let the inventive genius that has brought them to their present perfection be attracted toward providing life preserving agencies that will remove the pitiful helplessness of these men when the inevitable happens. Until this is done, in the name of humanity I call upon them to stop all human flying and to stop all human sacrifice."

AN OLD LETTER REUNITES FAMILY

Greensburg, Ind., Aug. 16.—After mourning each other as dead for more than thirty years, Mrs. O. L. Creath of this city and her mother, Mrs. Sarah Scott of Perkins, Ill., were reunited this morning. They had not seen each other since the child was two years old, when she was taken by a grandmother to raise, and only learned that her true parents were living through the existence of some old letters.

YOUNG WOMAN WELL KNOWN HERE IS MARRIED

Announcements have been received in Escanaba of the marriage at Marquette on Wednesday of Miss Florence Werner to Mr. John E. Riggs of Houghton. The bride has frequently visited here and is known to a number of Escanaba people. Of the wedding the Mining Journal of Marquette says:

At high noon yesterday, Florence, the oldest daughter of Mr. and Mrs. G. A. Werner, who reside at the corner of Main and Third street, was united in marriage to John E. Riggs, a Postal Telegraph operator of Houghton, the Rev. Gates G. Burt officiating. The wedding took place at the home of the bride's parents, which was beautifully decorated for the occasion with smilax, ferns and sweet peas. The ceremony was performed under an arch of flowers, built under a large doorway connecting the two parlors. After the nuptial vows were exchanged, a wedding dinner was served to the guests in the dining room upstairs. Besides the families of the contracting parties there were a few immediate friends from out of town present, the latter being Mrs. G. Gullikson of Chicago, Mrs. M. Robertson of Escanaba, and Mrs. Elbert Walters of Santa Rosa, California. Miss Alice Rean, a cousin of the bride, acted as maid of honor, while Arnold Werner, a brother of the bride, acted as best man. The newly married couple left on the afternoon train for the copper country, where they will make their residence.

MONSTER STEAMER WILL BE BUILT

Duluth, Minn., Aug. 17.—The contract for the new steel steamer for the Chicago & Duluth Transportation company, to be ready for the opening of the passenger season next year, will be let on September 1, and the successful bidder will be instructed to rush the boat to completion so that it will be ready by June 1.

J. W. Prindville, general manager of the company, is in Duluth from Chicago, and stated that all the plans have been completed and that the figures are expected within a few days from shipbuilders.

The vessel will be 350 feet long and 50 feet beam, having a passenger capacity of 400. It will be of solid steel, with 194 large staterooms and six parlors. Throughout it will be finished exactly as the Minnesota, which the company put into service last June.

The cost of the boat is estimated at over \$600,000. No name has been selected for her, but Mr. Prindville stated that some name with the prefix "Minne" will be chosen. Applications have been made for the changing of the names of the steamers Alva and William H., Gratwick No 1, both of which belong to the company, the former to be known as the Minntoka and the latter the Minnkabta.

STEAMER HANNA IS FITTING OUT

Houghton, Mich., Aug. 15.—After lying idle since the close of navigation in 1910, the steamer M. A. Hanna, Mitchell fleet, will be placed in commission next week. Ten members of the crew arrived here from Buffalo Tuesday to overhaul the vessel. The captain and others are coming next week. The Hanna has been tied up owing to inability to get cargoes.

Little Margaret Wade is visiting with relatives at Lathrop for a few days.

Life Saved At Death's Door

"I never felt so near my grave," writes W. R. Patterson, of Wellington Tex., as when a frightful cough and lung trouble pulled me down to 100 pounds, in spite of doctor's treatment for two years. My father, mother and two sisters died of consumption, and that I am alive today is due to Dr. King's New Discovery, which completely cured me.

Now I weigh 187 pounds and have been well and strong for years. Quick, safe, sure, its the best remedy on earth for coughs, colds, lagrippe, asthma, croup, and all throat and lung troubles. Price, 50c and \$1.00. Trial bottles free. Sold by All Drug Stores.

GIRL STOWAWAY MARRIED ON HIGH SEAS

Nome, Alaska, Aug. 17.—When the schooner Redfield, for Seattle and Nome, arrived off Cape Flattery, the captain found a seasick girl, 16 years old, on board. She confessed that she had stowed away to be near her sweetheart, the engineer of the vessel. By virtue of his authority as commander, Capt. McKenna pronounced the engineer and the stowaway husband and wife, and the couple arrived here yesterday after a happy voyage.

BILLS REGULATING HATS FOR CHURCH WEAR.

Atlanta, Ga., Aug. 17.—A bill making it a misdemeanor for a woman to wear in church a hat more than two feet wide was introduced into the Georgia legislature yesterday by State Senator Edwards. It was referred to the committee on sanitation and hygiene.

PLEADS GUILTY TO A LESSER CHARGE IN COURT

Pleading guilty to a charge of disorderly, Peter Blake, of Hyde, who was first arrested on a charge of keeping his saloon open after hours, was yesterday fined \$40 and costs in Judge O. V. Linden's court. When Blake appeared in court, through his attorney H. J. Rushton he agreed to enter a plea of guilty to the charge of disorderly under the general statute. As the evidence in the case was not considered to be of the strongest Pros. Atty. T. E. Strom accepted the plea and which action met with the approval of the complaining witness, C. H. Rutledge upper peninsula agent for the anti-saloon league.

Miss Mary Anderson has returned from a three weeks visit with friends in Chicago and Marinette.

PROGRAM IS ANNOUNCED

(Continued from Page 1.)

entire association, followed by the reception Friday evening.

The program is already so nearly completed that a successful meeting is assured. This together with the announcement that two of the most brilliant educators and speakers in the United States were secured before the close of the school year in June ought to assure that the officers are doing everything possible to give the teachers who attend the worth of their money. These men are: P. P. Claxton, United States Commissioner, appointed to this high office after the president of the association secured his services; and Dr. Henry H. Goddard, Director of Research in the Training School for Backward Children, Vineland, N. J. State Supt. Wright pronounces Dr. Goddard a coming man and says: "He gives the most illuminating and vivid addresses that I have ever heard. He surely will be an international figure in this field."

These men will each give three or four addresses before the association,

in fact it is intended they will furnish the principal "fire works." Mr. Wright also has promised to give at least one address. It will surely be worth going a long way to hear such a battery for two days.

Dr. Claxton's addresses will be as follows:

1. Education and Democracy.
2. The Place and Purpose of Geography in the Schools.
3. Recent Educational Development in the South.
4. Some Rights of the Child.

Dr. Goddard's subjects will be:

1. The Newest Problem in Education.
2. The Abnormal Child in the Public School.
3. What Can the Public School do for the Subnormal Child.
4. Causes of Backwardness and Mental Deficiency in Children and How to Prevent Them.

This announcement is to be sent to every teacher immediately at the opening of the schools in September. The complete program will be out soon after.

ORR SCHURTZ, President.
J. E. LAUTNER, Secretary.

For FRIDAY and SATURDAY

In Every Section All Over the Store

Most Uncommon Values

Special Offer of a Dainty Vanity Box

WILLIAM'S TALCUM POWDER

The Vanity Box carried in the purse or chateleine bag is in great demand and almost indispensable when automobiling, sailing, traveling or at the seashore.

We believe there are very few women, especially young women who will not be glad to get one of these attractive and useful little boxes for which, at a store, they would willingly pay a dollar. If you don't need it yourself, it will make an exquisite and acceptable little presents for some friends.

All you have to do to buy a can of William's Talcum Powder, send the J. B. Williams & Co. the coupon attached to every can, signed with your name and name of the dealer of whom you bought it, the date on which you bought it, and 15 cents in stamps. In return they will send a beautiful little silver-plated, hinged-top Vanity Box, with imported powder, brush and concentrating mirror. Sent only on above conditions. Offer good for a limited time only.

25c Can Talcum On Sale For 15c
