Marquette, Mich. To the Potato Growers of the Upper Peninsula of Michigan:

The Department of Agriculture at Washington D. C., and the Michigan Agricultural College, have for two years been doing special work on potatoes. There were four men employed in 1914 from July 1st to Oct. 1st. In 1915 there were eight men employed in the work of instructing the growers of potatoes in the identification of potato diseases and the meth. ods of eradicating and controlling these diseases, also the standardization of varieties, seed selecting, better cultural methods, spraying to prevent late blight, in fact, all that pertains to better potatoes. When better potatoes are grown, better markets will be secured.

Lansing, Mich., Oct. 18 .- For many years it has been the custom among influential members of the legislature to use their positions of land state institutions for their respective districts in order to strengthen themselves with their constituents and bolster up their political fences.

This was done during the session two years ago when Representative filbert Currie of Midland, speaker, of the house, induced the members to vote \$20,000 for the establishment of a new tuberculosis sanatorium at San IRGES LARGER ford, Midland country.

Members of the board of control of

the Howell sanatorium protested vigorously against the action of the legislature in establishing the new sanatorium, but Representative Currie had considerable influence and mustered enough votes to put the proposition through.

Philadelphia, Pa., Oct. 13,--The Boston Braves' sensational victory over the Athletics a year ago scared most of the experts out of picking the winner of the series just closed. Every baseball writer in the big leagues thought the Red Sox stronger than the Phillies, but they all thought last year that the Athletics outclassed the Braves, so when the 1915 advance dope had to be written they were gun shy. Pat Moran is not an object of sym-

pathy. He should be congratulated for winning one game in five and for making the others so close. His club was beaten four times by one run, when really it had little business in the same ball park with the American league champions.

Without Grover Mexander, Pat Moran's team was anything but a formidable bunch. With him it was still shy the punch that makes world's champions. Philadelphia's pitching staff had no second best. Among Alex's shipmates it was nearly a tossup. So was it a tossup among Carrigan's

To realize how well Carrigan was one has only to consider that Joe Wood, Ruth and Mays never tossed a ball in the series, and every one of them is rated a good pitcher. Moran did not use McQuillan, Demaree, Baumgartner and Tincup, but it wasn't because he had plenty of other depend able ones. It was because he didn't know how any of them would behave under scorching fire.

There is no alibit for the Phillies. There need be no alibi when the inferior club is trimmed. Pat's star catcher, Bill Killifer, was unable to play, but it is atremely doubtful that he could have done better than Eddle Burns, who perhaps was the real dark horse of the series. Advance dope had it that he would blow up and take was perfect. Besides, he had it better Paskert and Paskert outfit by Speak-
