

C. B. WHITNEY PASSES AWAY AT SAGINAW

Widely Known in Road Building and Lumbering Circles.

C. B. Whitney, road foreman for the Delta County Highway commission, and widely known in lumbering and highway building circles of the upper peninsula, died at Saginaw at 6:30 yesterday morning.

Mr. and Mrs. Whitney left Escanaba several weeks ago for Philadelphia to spend a few days with their son, Rintoul, a lieutenant in the United States navy, before the latter's departure on a European cruise. They returned to Saginaw to the home of Mr. and Mrs. Edward Arnold to spend the winter. Mrs. Arnold is Mrs. Whitney's sister. It was at the Arnold home that Mr. Whitney's death occurred.

Death was due from Bright's disease which resulted from an infection in a foot, injured several months ago. He had been seriously ill but a very short time.

The body will arrive in Escanaba at 7 o'clock tonight, over the Soo Line, accompanied by Mrs. Whitney. It will be removed to the family home, 321 South Twelfth street, to remain until the funeral, the time for which has not been announced.

Surviving are the widow, one son, Rintoul, who is now with the American fleet off the coast of Greece, his mother, Mrs. Mary Whitney of St. Louis, Mich., two sisters, Mrs. Thomas Tallon of St. Louis and Mrs. W. A. Bradley of Rosedale, and two grandchildren, Zoe Joyce Whitney of Philadelphia and Leland Halides of Trout Creek.

Mr. Whitney was about 60 years of age. He was formerly a

MOTHER-LOVE FATAL TO 200 BABES MONTHLY

Infants Are Smothered to Death by Over Covering.

Atlanta, Ga., March 20.—Two hundred babies are being smothered to death annually every month in the United States.

Mother-love is the cause! This startling announcement comes from Fred Longhead, editor of Atlanta's "The Evening Post," an exponent of the popular theory of fatal accidents to infants that have been brought to his attention.

"Doctors and newspapermen have waged vigorous campaigns to tell mothers how to keep the babies from being run over or drowned, and how to ward off disease," says Longhead, "yet none of them has ever waged a campaign to show the mothers how to keep their offspring from smothering during their first few months of life on this earth."

Fault in Covering. "Mothers, taking their babies to bed with them unwittingly cover the youngsters up from head to foot, and during the night the infants, unable to get air, and not possessing strength enough to fight off the covers, smother to death.

"In other cases, mothers have placed covers over the heads of their babies in their cribs, resulting in smothering.

"Every month 200 tragedies of this nature happen. They occur in all sorts of homes and among all sorts of people. I cannot tell the mothers that they were the direct cause of their baby's death. It would be too brutal, and therefore would be too great. Never miss an opportunity to sound a warning against babies sleeping with their mothers.

Cold Weather Fatal. "Cold weather means the death of many infants. The reason is the mother worries whether baby is warm enough, and finally takes the child into bed with her. If she isn't mighty careful, tragedy results.

The coroner says a child never should sleep with anyone, until it is six months or older. Its night-clothes and covering should be buttoned or pinned securely under baby's chin so that there can be no danger of baby getting down underneath the covers during the night and smothering to death.

"The baby whose face is covered so that it may 'sleep warm' will at times sleep its last sleep under that covering," he warns.

Institute Dates Set for April 23-27

Dates for the five-day merchants' institute, which was postponed Monday when it was learned that Pryor Irwin and Ben R. Vardaman, who were to have been in charge would be unable to reach Escanaba on account of the snowstorm, were fixed yesterday at April 23-27. The program arranged for the previous dates, will be carried out.

A Georgia farmer tells us his cattle have more ticks than a couple of eight-day clocks.

SUPERVISORS CALL MEETING FOR MARCH 28

Will be Last Session of Present Board

The Delta county board of supervisors will hold their final meeting before the April 2 election Wednesday, March 28. It was announced at the office of County Clerk George Harvey Wednesday.

The meeting called by Claude C. Hawkins, chairman of the board, will be a clean-up session for the members of the board whose term expires with the April election and will be the last meeting of the present membership of the board.

It is probable that the April election will see several changes in the personnel of the supervisors board, as there is opposition in Gladstone, Baldwin township and other townships.

SALT AND CELERY.

You can make a delicious flavoring for soups, oysters or gravies by saving the root of the celery, drying and grating it and mixing with it one-third as much salt.

ONION ODOR.

Remove the odor of fish or onions from frying pans by scalding vinegar in them, then washing in the usual fashion.

DRINK WATER IF BACK OR KIDNEYS HURT

Begin Taking Salts if You Feel Backache or Have Bladder Weakness.

Too much rich food forms acids which excite and overwork the kidneys in their efforts to filter it from the system. Flush the kidneys occasionally to relieve them like you relieve the bowels, removing acids, waste and poison, else you may feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, the stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste, begin drinking water. Also get about four ounces of Jad Salts from any pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear.

This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive and makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help prevent serious kidney and bladder disorders.

By all means drink lots of good water every day. Have your physician examine your kidneys at least twice a year. Adv.

MARKET REPORTS

NEW YORK STOCKS.

New York, March 21.—Speculators for the advance assumed control of today's stock market from the start bidding up all prices in all sections of the list and carrying more than a score of shares to new high levels for the year. Profit taking sales brought about a partial reaction in the late dealings.

Operators on the long side of the market were encouraged by the resistance shown by yesterday's market to the selling pressure occasioned by the violent fluctuations in Piggly-Wigly, by the strength of French francs, by the sales of copper at 17 1/2 cents a pound, a new high price; and by the optimistic nature of the weekly steel and iron trade reviews. Sales 1,343,000 shares.

CHICAGO PRODUCE.

Chicago, Ill., March 21.—Butter—higher; creamery extras, 51 1/2; standards 50 1/2; extra firsts 49 1/2 at 50 1/2; firsts 48 1/2 at 49; seconds 47 at 48.

Eggs, lower, receipts 18,698 cases; firsts 24 at 24 1/2; ordinary firsts 22 1/2 at 23; miscel. 23 1/2 at 24.

Poultry, alive, higher; fowls 27; springs 30; roosters 17.

Potatoes, stronger, receipts 60 cars; total U. S. shipments 599; Wisconsin sacked round whites \$1.10 at \$1.40; Minnesota sacked Red River Ohio \$1.35; Idaho sacked russets mostly \$1.50.

I Owe My Beauty Largely to this white super-clay By Edna Wallace Hopper. My youthful beauty is the marvel of millions. My complexion is soft and rosy as 40 years ago. Not a line or wrinkle mars it. I could easily pass for 19. On the stage I still play young girls' parts. Scores of my friends have secured like results by the methods I employ. They have multiplied their beauty and kept their youthful bloom. So I am convinced that women in general owe to what I have done. And I am going to help them if they wish. I have arranged to supply to dealers everywhere the very helps I use. They have proved themselves the best helps in existence. Now I want them to bring to millions what they brought to me. My 20-year clay. The chief reason for my youthful beauty is the use of facial clay. Not the crude and muddy clays so many use today, but a white, refined clay, wonderfully perfected. It is the final result of 20 years of scientific study. Famous beauties have used clays for ages. That's what made them famous. But only in late years has clay been really studied. Countless tests and analyses have proved what clay is best—a certain rare clay, mineral-laden. Ways have been found to refine it, to remove the useless matter. The clay I use is white and clean and dainty. And science has found some added factors which bring multiplied results. Any clay user will be amazed at the difference when she compares my Youth Clay with the old kinds.

The chief weapon of the future will be gas, probably used from airplanes. This is the conclusion reached by Colonel J. F. C. Fuller in his book, "The Reformation of War." During the closing period of the World War, he was chief of staff in Britain's tank corps.

The gas-spreading airplane, Fuller predicts, will "destroy infantry like vermin." He continues prophetically:

The infantry are toiling along a road. The airplanes approach. They fly at an altitude well outside effective bullet range. They open their chemical tanks and a fine spray and fog envelops the astonished column of men. Suppose that this gas is a deadly poison, all these men will shortly die.

Suppose that this gas is but an anaesthetic, then the whole column will fall into a mystic sleep. What general on earth is going to win decisive battles if whole divisions and corps are going to be put to bed for several hours at a time?

That last remark of Fuller's is a trifle facetious. The gas, of course, would be death-dealing. Warring nations are concerned chiefly with killing, not with temporarily disarming the enemy.

A horrible fate is in store for city dwellers during future big wars, according to Fuller: I believe that great cities such as London will be attacked from the air, and that a fleet of, let us suppose, 500 airplanes each carrying 500 bombs of, let us suppose, mustard gas, might cause 200,000 minor casualties and throw the whole city into a panic.

Picture, if you can, what the result will be: London for several days will be one vast raving Bedlam, the hospitals will be stormed, traffic will cease, the homeless will shriek for help, the city will be in pandemonium.

Therefore, Fuller argues, a defending air force must be ready to strike back at once. Which, of course, is second-best choice to international disarmament.

The past century has demonstrated that it costs increasingly more to kill a soldier, with each new war. New means of defense are quickly devised to protect soldiers against new means of attack. Militarists, thus frustrated, naturally are turning more and more to attacking civilians back of the lines.

It is safe to predict that, if another big war comes, the main campaigns will be directed at civilians instead of armies and navies. Starvation blockades, for instance. And, more particularly, destruction of cities by airplanes carrying high explosives and poison gas.

That's the outlook for your sons and daughters—unless a way can be found to disarm internationally.

THE GOLDEN ROAD.
"I just can't endure that man—or that woman." This is a favorite declaration of narrow souls. Pressed for a reason, the one who says it, ten to one means that there is some one trait or act of the other that he—or she—dislikes.

For years James Whitcomb Riley and Booth Tarkington were neighbors in Indianapolis. Often they spent their Sunday evenings together, discussing literary matters over their cigars. Sometimes they talked of Riley's poems, but never did they discuss Mr. Tarkington's work. That one subject was taboo. Riley, who always read the Tarkington books as they were published, disliked them. But he knew that others liked them, that they were successful, and he forbore saying anything about them to his friend. But one night Riley opened The Flirt, Tarkington's venture into a gentler, sunnier kind of realism. Riley sat up in bed and finished it around 4 a. m. The next morning, although an invalid, he was at Tarkington's gate in his carriage by 8 o'clock. "My friend," said Riley, "I've read other things of yours that I didn't like and I never said any-

THE OLD HOME TOWN
By Stanley

JUST WHEN EVERYBODY IN TOWN THOUGHT ED SIMPSON'S Hired MAN HAD BEEN CAUGHT IN THE WRECKAGE OF THE HORSE SHEDS, BACK OF THE CHURCH, IT WAS FOUND HE HAD BEEN ASLEEP IN THE BACK ROOM OF HAYMAN'S WIDE EXCHANGE.

SOCIAL

be held at the home of Mr. and Mrs. Gust Kallstrom, 320 No. 13 st., at seven-thirty o'clock. Rev. Hugo Herrgard of Gladstone, will be the speaker at these meetings. Everyone is cordially invited to attend these meetings.

Club entertained about 50 couples at a private dancing party which was held Saturday evening at the Eagles' hall. The affair was a basket social at which time the baskets were auctioned and the proceeds were used for a Marquette operator, who is ill at the Howell Sanatorium. A basket lunch was served

and coffee furnished by members of the club. Johnson's orchestra furnished the musical program for the evening. Every number was encored. The out-of-town persons who came here for the party were, Miss Alice Laurson, Iron Mountain; Miss Carrie Ruess and Miss Lenora Schultz. Menominee;

Walter Boucher, Sam and William Wilson, Powers, Mich. Those who attended are loud in their praise regarding the manner in which they were entertained. Swedish program. The program which will be presented at the North Star hall Thursday evening, March 29, at

8 o'clock at which time the famous Swedish star, Gustav Fonander, will appear, promises to be one of the best entertainments ever staged in this city. Gustav Fonander, whose name lives in the memory of anyone who once hears him, is a college graduate and also a graduate of the Technical High School of

Stockholm, Sweden. He is a professional singer and musician of note and has won the hearts of his hearers wherever he has appeared in concert numbers. He has also published a number of songs, each one being a hit in itself. His sailor songs and poems by Froding are especially fine and he also executes a large number of modern operatic songs with great fervor. He usually finishes the program with comic songs with accordion accompaniment, an instrument which he plays with virtuosity. He has proved himself a singing wizard. Any one wishing to spend an evening which will make you forget all your cares should attend the entertainment which will be presented here under the auspices of the Evening Star society. Order of Vasa. The program will be in the Swedish language.

HIGH COST OF BUILDING MAY HURT COUNTRY

U. S. Experts Say Builders' Strike May Halt Boom in Industry.

Washington, March 21.—The lumber industry, taken as an index to activity in other lines of building materials, indicates the strong demand, exceeding production, which government authorities say has resulted in inflated prices.

Figures for total production of softwood lumber, including pine, hemlock and redwood, for the 10 weeks of 1923 ending March 10, show a total cut of 2,019,481,896 feet.

In the same 10 weeks, however, shipments amounted to 2,194,592,365 feet and orders booked aggregated 2,699,371,684 feet. Orders, it will be noted, exceeded production by more than 680,000,000 feet.

As compared to the same period in 1922, production increased 287,098,827 feet, shipments climbed 802,955,157 feet, while orders were 955,128,923 above those for the same period last year.

BY HARRY HUNT (NEA Staff Correspondent.)

Washington, March 21.—Soaring building costs, which the government hopes to end by suspending work on all new government construction until present inflation is checked, is the biggest danger factor in America's business situation for 1923, say Department of Commerce authorities.

If inflation in the building trades can be stopped before impossible prices have resulted in another builders' strike, which would react on the whole range of the nation's industrial activities, the country may be expected to move ahead this year into the greatest period of general prosperity known since the early war-boom days.

"With the exception of the troubled area of central Europe, the whole world is getting back toward normal again," says a leading commerce authority. "And the effect of disturbed conditions in Europe on our commerce have been greatly overstated."

Gain in South America. "With most of Europe and with Asia and South America our commerce is showing steady and encouraging gains. The development of new business in South America is particularly encouraging."

There is no expectation that building costs ever will get back to the basis of pre-war days but figures compiled by experts indicate that a proper level for building construction today would be in the neighborhood of 75 per cent above the cost of similar construction in 1913. On an index figure of 100 for 1913, that would be 175 today.

Present costs, however, stand at 195 for brick buildings, 199 for frame dwellings and 195 for factory construction. This would indicate "inflation" of approximately 29 points or about 10 per cent of present costs.

Increase in 1922. Building construction for 1922 increased approximately 50 per cent over 1921, according to government figures, the total—in square feet of floor space—being 571,000,000 in 1922 as against 388,000,000 in 1921.

Unless further inflation in price forces a cessation of building activities, it is believed 1923 building will show construction aggregating well above 600,000,000 square feet.

Should material prices be forced higher, however, along with wages of bricklayers, carpenters, plasterers and other skilled workmen, for whom increases effective May 1, already have been announced, the year's total may show an actual slump below 1922.

A THOUGHT

Remove far from me vanity and lies; give me neither poverty nor riches; feed me with food convenient for me.—Prov. 30:8.

It is far more difficult to be simple than to be complicated; far more difficult to sacrifice skill and cease exertion in the proper place, than to expend both and indiscriminately.—Lincoln.

The average wife is raising two or three children and a husband.

AMUSEMENTS

AT THE DELETT.

"Forget-Me-Not," the Metro picture which comes to the Delett Theater today, reproduces with great fidelity the life story of two foundlings.

In the orphanage where her mother had left her as a baby, Ann Gordon had found one congenial soul, another foundling named Jimmy. But one day they were adopted and Ann is left alone. The other children eventually find homes but no one wants the little girl with a crippled leg. A street musician takes pity on her and she goes to share his meagre one-room home. This is the path of the two childhood sweethearts diverge but through the long years Ann carries the memory of Jimmy and from it draws inspiration and courage in her struggle to become a successful violinist.

It is a story of faith and love and yearning for happiness that is thoroughly human from beginning to end.

The orphans are played by Gertrude Hughes and Bessie Love who make the characters so lovable and so pitiful that there is a constant tug at the heart strings. "Forget-Me-Not" is a Louis Burston production, written by Henry R. Symonds and adapted by John B. Clynner. It was directed by W. S. Van Dyke.

AT THE STRAND.

Viola Dana in her latest Metro picture, "Love in the Dark," will be seen again today at the Strand. Shown there for the first time yesterday it proved to be a thrilling and fantastic story play, with the delightful star as entertaining and as sparkling as ever. It contains all the elements which go to make a thoroughly satisfactory screen play, and it is certain to find favor with photoplay fans.

Miss Dana appears as an orphan, adopted by a woman who is one of a band of thieves. She romps her husband, who is blind during the day and whose sight returns at night, to join her in her robberies. It is into this family that Mary—the character Miss Dana plays—introduced. She takes care of four-year-old Red, and together they stick through the various vicissitudes which the imaginative author has injected into the plot. There is always an element of surprise in the story, and it never fails to grip the attention. It is one of the most dramatic stories in which this star has ever been seen.

Harry Beaumont, the director, obtained excellent results from a fine cast.

Try PISO'S Astoundingly quick relief. A syrup—different from all others—pleasant—no upset stomach—no opiates. 35c and 60c everywhere.

COUGH Prescription. 

"Gets-It" Friendly Enemy of Corns

They Die While They Sleep
The only good corn is a dead corn. A few drops of "Gets-It" will quickly start any corn or callous on the way to the happy hunting ground. "Gets-It" brings instant relief from all pain and burning. One bottle contains enough "Gets-It" to remove a dozen corns, hard or soft, old or new. Costs you nothing if it fails—but it doesn't fail. Let your druggist tell you why millions demand it. E. Lawrence & Co., Mfg., Chicago.

DR. KING'S New Discovery

Better nip it Now!
If your nose is sore from blowing—if your head is stuffed-up and chest congested—now is the time for this syrup. For half a century, Dr. King's New Discovery has brought quick relief to children and grown-ups alike. It has certainly earned its reputation for dependability and safe family use. Your druggist carries it. Try it today.

SPRING OPENING

And Pre-Easter Presentation of Spring Styles

Thursday, Friday, Saturday

The Wraps
Women demand a beautiful and serviceable wrap as the most needed garment in the wardrobe. This season's garments are shown in new weaves—Arabia, Velvey, Marvella, Amrolaine—in such colors as barley, cinder, grey stone and blacks.

The Frocks
Most alluring as to style and fabric are the new arrivals in dresses and gowns—Many are decidedly Egyptian, others elaborately braided or beaded—Still others are tailored along more conservative lines for street or business wear.

The Suits
Are conspicuous with rich ornamentations. Dressy and at once practical—Two and three-piece varieties are about evenly balanced and are creating a sensation among careful and discriminating dressers.

Men's Clothing
New arrivals in Hart, Schaffner & Marx, Society Brand, and other reliable makes, put our showing at this time far above the ordinary.

Millinery
1923 Offers Unusual Styles.
Pre-eminently droopy of brim, gorgeous of color, for those who prefer it, or richly ornamented black, grey or tan. These new creations are truly delightful.

Fine Footwear
Slim of last, finely made, the low shoes of this Spring, fittingly accompany the Fashions. Many new combinations of leather and color, lend an attractive newness which is very pleasing.
