## BY TELEGRAPH.

[Special Dispatch to the Escanaba Tribune.]

**NEW YORK, Sept. 17.**  
Last night's telegraph news was to the effect that Bazine had broken out of Metz with his army, well supplied with provisions; and is on his way to Sedan; the Prussians are on the lookout for him.

The Prussians have surrounded Paris, are 400,000 strong, and have effectively cut off all regular connections with that city.

The Italian army has surrounded Rome, and had an engagement with the Papal troops. They expect to occupy the Papal states, and will then summon a national parliament, to be chosen by universal suffrage. The action of Victor Emmanuel is evidently to be regarded as a blow at the temporal power of the Pope.

Whenever important news comes we shall issue an extra, and we shall expect the citizens to help us stand the expense.

A Hand Organ Man and another Monkey are parading the streets.

R. A. CONOLLY & Co., have established a lumber yard in Lower Ishpeming, with J. H. Macdonald as Agent.

Calls for county conventions will be found in another column. Roll up, and make it exciting. We are prepared to print enough tickets this fall.

Dr. Greenill, Lake Superior's favorite dentist, is in town, and all wishing their teeth filled had better call him.

Among the other good things handed us by our friends this week, were two bushels of little muckmelons, grown by A. C. Darling.

We have received Mr. E. P. Royce a bunch of beautiful grapes which were raised out of doors, and will fully ripen before sets in; but the Delight County is too far north for fruit.

A Swede by the name of O. C. Addell from a seafaring near the top of F. O. Clark's building, and put his ankle out of joint, besides bruising himself elsewhere. He was fortunate to escape so lightly.

Mr. L. B. Noyes' back again, and is engaged in getting up a list of subscribers for his paper. The Chicago Republic is the ablest Tariff Journal printed in the west, and we hope to see him raise a good list for it.

We notice the pleasant face of our friend J. H. Hiller, Esq., in our streets once more. He seems to have enjoyed his two months' trip to the East, and has gone into business with renewed vigor.

We have received from T. W. Ferry M. C. from this district a "Hand Book of Politics" containing Judicial Decisions, and the important measures inaugurated by the 40th Congress.

We have been doing a large amount of job work this week and want to do so some more." Give us a chance at all the work in the county and if we don't give satisfaction, no charge will be made.

Frank Crikilair, House and Sign painter, wishes to announce that he will be here for the next two weeks and will do any work in his line in a manner that will be found satisfactory. He may be addressed through the Post Office.

The card of Prof. Gordon, musician, will be found in another column. He is highly spoken of, and expresses his willingness to come here during the coming winter and teach a class in vocal and instrumental music, hold conventions, &c. Let those interested make a note of it!

"The Star Club," has been formed by the young men of the village and meets every Friday evening in the Hall over John Seamer's store. Good music is always in attendance, and good order prevails, while the hall is admirably adapted for dancing purposes.

Many of the cases tried before the Court this term have been petty in extreme, involving not more than half the expense of the suit. Remember that the laws are intended to promote justice, not as instruments for venting personal spite. One of the judgments rendered was for \$300.

Quite a number of families have moved in and around Bay's River this summer and are making themselves homes and pre-

paring the land, for farming purposes as fast as possible. It is only necessary to complete the State Road which Mr. Selden is surveying to have as good a farming country along its course, as can be found anywhere.

John Sipkin's new building is progressing finely; when completed it will be 60x60 feet. The upper story will be 14 feet in height and the full size of the building, and will be used as a public hall. It will seat comfortably 600 persons, with stage &

we notice that the R. R. Company are getting out some beautiful limestone rock near the track at Maple Ridge which cannot be excelled for building purposes, and would like to see a few white stone fronts go up in Escanaba and we doubt not, the Company would furnish it cheap for the purpose.

Mr. Hiller has brought back with him a large stock of goods which he is engaged in opening. Among other things we notice a lot of Gent's fancy goods such as Cuffs, Collars, Sleeve Buttons, Neck Ties &c. while he proposes to sell cheap, we are looking for something nice in the shape of a suit when he gets into Clark's new building.

A lot of "nice young men" (save the mark,) came down from Marquette on Tuesday last, and indulged in a spree, making a disgraceful exhibition of themselves in the streets. It is fortunate for them that our Village Marshall did not happen to be around at the time, for he has a habit of "going for" such fellows, and bounding them at County expense till they sober off.

We sold three Florence Sewing Machines last week, and all are pleased with them and thoroughly convinced (as they should be) that it is the one to do well of "going for" such fellows, and bounding them at County expense till they sober off.

We received this week by the hands of the Rev. Mr. N. E. Pierson, a beet weighing five pounds and five ounces, raised by Mr. Lathrop, at Centreville. It was solid and firm, and taken in connection with other farm products that have been shown from time to time, prove conclusively that Delta county will make as good a showing as any other in the state.

From Henry Mier across the bay we have received a peck of beautiful tomatoes, well ripened, and very large, some of them weighing nearly a pound each. Evidences of the productiveness of Delta county will be accumulating every day, and an agricultural society would make as good a showing as in any county in this latitude.

We were glad to see him once again during the week the pleasant faced H. H. Hunt, Esq., the popular landlord of the Northwestern hotel at Marquette. He informs us that he has rented the Tavern house at that place, and will have it rechristened a open for guests before the winter sets in, and be in shape to do the winter business there, although the Northwestern will not be entirely closed. We thought when Mr. Hunt went to Marquette that we could hardly spare him, but, on the whole we are inclined to the belief that it was for the best, for he has entirely renovated the hotel of that village, which before were a disgrace to presentable populous.

The Beginning.—On Friday evening last the U. S. Marshal at this place arrested one Thomas Lemmigan, charged with giving whisky to two Indians, and upon the testimony of two witnesses, one of whom saw him give the whisky to the Indian, and the other took a drink out of the same bottle, he was committed to jail in default of bail, and will have his trial before the October term of the U. S. Court for this district. We mention this as a warning in regard to the infringement of all U. S. laws, and will add that the offenders will all be punished with the utmost rigor of the law.

SPURRED TROUT.—Mr. Young who has been fishing for the Tilden House for the past season sent in a box this week containing 88 trout, weighing 74 pounds. This makes about 600 lbs. received by Mr. Hutchinson from this party during the season. We should like to know the number taken from the Escanaba River this summer, and are sure that it would amount to many tons.

DETROIT ISHPENING.—As we noticed a few weeks since, the C. & N. W. R. are constructing a neat little depot at Ishpeming, opposite Mr. Nelson's store, and we learn with pleasure that Mr. MacDonald is an old railroad man, and has been in the employ of this Co. for several years, filling different responsible positions with credit. But a short time will elapse before Ishpeming will be a very important point on the road, and the recent appointment is a mark of confidence, as well as a refutation of the old theory that "corporations have no souls."

Thursday afternoon, as the wind changed and blew down the bay, fresh and strong from the north, we noticed a little speck out upon the waters, beyond Light House point, that by careful scrutiny we made out to be a little sail boat endeavoring to make the harbor. A further examination proved our conjectures correct, but we soliloquized "could this little frail craft live long in such a sea?" We watched its progress from the eastern extremity of the pier, with interest. The wind increased, the waves dashed angrily, but onward sped the little frail craft.

Over the bad waters like a thing of life, while at every breath of the gale, and every dash of the sea, it seemed that the boat must swamp. The mast bent like a reed, the sail belted out to its

utmost tension, the leeward rail of the boat was frequently engulfed, but the occupants managed her admirably and she came in safe. A bystander enquired facetiously, if we wouldn't like a turn in that boat? to which we replied that we had rather be termed a "land lubber" than take such a chance.

With a smooth sea, a jolly party, a fine breeze and a staunch craft, we can enjoy sailing, but when old Boreas blusters, lashes the waters into a foam, and raises a big-muss generally—please count us out.

COURT COURER.—The Circuit Court for the County of Delta, Hon. Daniel Goodwin presiding, has been in session since Monday last, and will probably close its labors to day. A large amt. of business has been disposed of, records of which will be found below.—The Attorneys present were M. H. Crocker, Dan. H. Ball, E. J. Mapes, E. P. Royce and F. O. Clark.

## NEW YORK CORRESPONDENCE.

From Chicago to the East—Hartford—New England—Rockville—Sewing Silk—How Made—Bridging—Bras & Co.—East and West.

New York, Aug. 25.—In 1850 I was a week in New Haven, New Haven to Milwaukee. Two weeks ago I was twenty-seven hours in coming from Chicago to New York. There were no railroads in the West, save the wood on corduroy over otherwise impassable marshes, and the trip from Beloit to Milwaukee takes occupied four or five days. Now, I am in the Pullman Silver Palace car at the Michigan Central Depot in Chicago, and passing over the Michigan Central and Great Western Roads, with a smooth, gliding motion, in sixteen hours I found myself at the door of my hotel in New York.

THEATRICAL SUITE & WATERMAN, 242 Lake street, Chicago, manufacturers of Stoves; also 18 sizes and styles of Farmers Feed Boilers and Stoves. Send for catalogue.
