Advertisers who desire a copy by mail, or who have any objection to the advertisements and will require that they will be inserted until ordered and charged accordingly.

Yearly advertisers will be allowed to change their advertisements twice a year without extra charge.

## STATE OF MICHIGAN: Thanksgiving and Prayer.

Another year is drawing to its close, and through the loving kindness of the Almighty God, who in wisdom and mercy has directed the course of rich and poor, have been preserved from the mercies of peace and plenty of bountiful crops and general health - yet without its lessons of sorrow.

We, as a people, have enjoyed much of earthly happiness, and have been blessed with the abounding mercies of God, through this dear Son, who also has permitted us to witness the effects of his love and compassion, so devastating, but which have brought consolation to many families, and suddenly deprived thousands of our citizens of the rewards of industry and toil.

With him we lift up our hearts to God in thanksgiving and praise, for his great mercies towards us, for the earnest sympathy and noble character which greatly alleviate the suffering of our afflicted people.

In due recognition of our dependence upon the Supreme Ruler of men, we hereby appoint Thanksgiving Day, November, as a day of Thanksgiving and praise.

Let us on that day in our respective places of public worship, and with our families at home, rejoice in the goodness of God, and render unto him the thanks of a contrite and grateful heart.

Let this giving and expression in acts of benevolence and deeds of charity, in showing the sick and poor the sweet relief of sympathy and kind attention, be a true State and Nation even under my hand and the Great Seal of the State at Lansing this 15th day of November, in the year of our Lord Jesus Christ, 1852, and in the 35th year of the Independence of the United States, the ninth year of the reign of the Queen.

Given under my hand,

JAMES A. STONE, Secretary of State.

Before we give the total amount of money shipped from this port, we can now increase the sum to

The following vessels are now laying in the harbor waiting to be loaded:

S. J. Tilden, Negaunee, David Wagstaff, J. P. Card, R. Mott, Fanny Neil, A. H. Moss, Guiding Star, and the Exile, and there are yet due the Fred A. Morse, S. S. Osborn, H. J. Webb, L. J. Clark, Jane Bell, C. L. Johnston, Flying Mist, Minnie Mueller, White Squall, Mary Nau, Libbie Nau, Frankfort.

The cargoes of these vessels will probably bring the shipments from hereditat the neighborhood of 445,000 gross tons or nearly 500,000 net tons ore. This taken with the amount of pig iron shipped declares Escanaba to be a shipping point of no mean importance.

SMITH MINE.—Nearly 150 laborers are now employed at this location, and improvements almost without number are being made. Tracklaying from the Peninsula Division to the mine is progressing as fast as could be expected under circumstances. Four new frame and upwards of twelve log houses have been put up this fall. Surface striping, under the supervision of A. P. Wood, is constantly being carried on, several new pits, of fine hematite ore have been opened, and everything around the location, goes to show that this company means "business" the coming season.

In one of our exchanges we find the following in regard to patronizing home enterprise, which applies equally well to this place, as to others.

"On the activity and public spirit of the citizens depends the prosperity of a town." In our town there are reliable, responsible, tradesmen, stores, where you can buy everything for use in house, workshop, and field, to eat, drink, and to wear—and to be beautiful.

Our local newspaper, the Green Bay Advertiser says:

The first regular train of the North Extension, C. & N. W. Railway, between Fort Howard and Oconto, commenced running last Monday. They leave here as will be seen by the time-table, at 8 o'clock. A. M., arriving in Oconto at 10 A. M. Leaving Oconto at 3.15 P. M., they arrive here at 5.15. We congratulate our Oconto neighbors, as well as our own people on this event.

NORTHERN EXTENSION.—Three board-housing cars, from the Omahas Division, C. & N. W. arrived here on Tuesday morning, to go into service on the Northern Extension between Oconto and Menominee.

G. B. & L. P. R. R.—One and a half miles of iron were laid on the G. B. & L. P. R. R. on Saturday last. This was on the straight level grade. We learn that there will be no difficulty in laying one and a half miles per day now, as a full force of men and construction cars are now on the road.

At Taylor Bach's pier, at Carlton, six miles south of Keweenaw, last Wednesday, the schooner "Illinoian," loaded with cordwood, cleared on her own account, to some port not in the shipping bills. She had run on shore near that point, and her Captain went to Manitowoc for a tug to haul her off, leaving the crew in charge. A slight breeze coming up, her crew set the sails, in hopes to work her off, but failing in that they all went on shore and got on a sloop. A small boat soon sprung up and took the vessel off, and she sailed away to parts unknown, with all sail set and not a soul on board. The Captain, however, in due time to find his vessel "screamed," and as best as he could determine, he had to give up his search for her.

Yester morning was the time set at Pittsburgh for the argument, on motion of the attorney's for the Pullman Palace Car company, for a preliminary injunction to restrain Jonah Woodruff & Co from using the patent of the former for improved sleeping cars. When the case was called the motion was withdrawn by the plaintiff's counsel—a triumph for the Woodruff patent.

The weather reports of the signal office, as given to the press on Tuesday reveal a meteorological wonder. The whole country east of the Mississippi was then under a cyclone, from Lake Superior to Galveston and from Savanna to Montreal. Heretofore it has been supposed that a cyclonical storm of such dimensions was impossible. The centre of the rotary storm was in Ohio, the winds blowing in an almost perfect circle around the centre in direction against the hands of a watch—the variable direction in which the West Indian and all other tropical cyclones travel. This tremendous and

ed in all its quadrants fully before it reached the lower lakes and 35 hours before it fell upon New England. It is a grand stroke of science to be able thus to signal the path and gyration of such a immense gale whose winds especially on our lakes and lee shores, are so destructive to the unseating mariner. The great utility of the signal service was strikingly illustrated in connection with the recent storm. The day before the storm, under direction of the bureau, cautionary signals were displayed at 18 of the 20 stations along the line of all the lakes the whole Atlantic coast, from Florida to Maine, and on the coast of the Gulf of Mexico. At every port the warning signal was given from 5 to 10 hours in advance of the discipline of the signal service than this, the storm reaching as it did all the coasts of the United States, except the Pacific. Doubtless hundreds of vessels were saved from disaster by being warned of the impending peril hours in advance of its appearance.

The Marinette Eagle has again resumed publication in its old form, and the number before us is as usual, full of interesting locals. From its columns we clip the following:

DARING ATTEMPT AT MURDER.—Last Thursday evening, as Hon. Isaac Stephenson and Mr. Andrew Stephens, Jr., were returning home from Peshtigo Harbor on the Little river road, a pole came down suddenly across their laps from a thicket close by the roadside.

The horses were started into a run, and at that instant a pistol was fired from behind the bullet passing close to their heads, but fortunately doing no injury.

The speed of the horses soon took them beyond the reach of danger. It was the evident intention of the highwaymen that the pole should have stopped the horses, knocking them or frightening them, but the bullet passed to the right, and the horses, with the usual variations, would be beneficial for a few weeks.

The piles are all driven, and the greater part of the foundation timbers for the new railroad bridge at Peshtigo are in place. The superstructure will be finished and ready for the railroad iron in the course of a week, or ten days at the farthest.

There are about twenty-five new buildings completed at Peshtigo, and fifteen or twenty more are under contract, many of which are in process of construction.

The Marquette Journal publishes the following with the request that all neighboring papers copy:

If William Dunn, who formerly resided in this county and afterwards at the Fayette furnace, will send his address to the editor of this paper, or to Milo B. Stevens, 12, Case building, Cleveland, Ohio, he will receive in return information of his soldier's discharge and application for bounty.
