

A Home.
Gen. HENRY M. WHITFIELD, for a long time on Gen. Howard's staff, died at Washington on Friday.

JOHN WEX, of Tongkeepsie, murdered his wife and then committed suicide; they leave seven children.

A CHINIAN camp of laborers working on the narrow gauge railroad near Rosalia, California, were attacked by a crowd of eight drunken white men, who tore down their tents and pelled the Chinamen with stones and clubs. The Chinese fled like sheep into the hills. All work is suspended. Several Chinamen were found miles away from the place of attack.

A fire at Chicago, on Saturday morning, destroyed the foundry of Knott Bros. & Barron, Nos. 825 to 830 Hubbard street, and the dwelling No. 834 Hubbard. Loss on the property, \$12,000; insured for \$1,000 each in Grand of Philadelphia, and Dennis of New York. Loss on dwelling, \$700, insured in the National of Philadelphia; amount unknown.

From Warren county, Ky., reported a marriage between a boy aged 13 and a girl aged 11.

The trot at Buffalo, Saturday, seems to be merely an exhibition affair. Goldsmith Maid won in three heats, the quickest time being 23¾.

On Saturday night burglars robbed the vaults of Richards, Shaw & Winslow, corner of Madison and State streets, Chicago, of two thousand dollars, and then attempted to burn the building. The flames were fortunately discovered in time and extinguished.

A GRATEFUL TRAIL running through a swamp between Orrville and Orlerville, Ohio, ran over two cows. The van, containing horses, was badly broken up, and two, Mrs. Stevens and Powell, were instantly killed, and six others fatally wounded.

The Agricultural Department reports that the probable wheat yield for 1873 will be 225,000,000 bushels. The largest absolute falling off is seen in Illinois, where there is a reduction of 15 per cent. The Department reports that the salt culture is greatly on the increase in Iowa.

JAMES BIRKELAND, physician at British Hollow, Grant county, Wis., was found, on Saturday, with his family out from ear to ear, and had been sick nine hours when found. An inquest was held, and the verdict rendered was that he died by his own hand, with the aid of a surgical instrument.

Another occurred in Warren county, Ky., last week, in which Wm. Shiree was shot through the arm. Constable Howard attempted to stop the fugitive, when he was stabbed twice by Wm. Lark, one of the constables.

Another constable named Wilson was struck in the forehead with a rock, inflicting a wound, from which he died last night. How-

ever, wounds are not fatal.

At Bay City, Mich., Saturday, a fire in William Peters' saw-mill burned the mill and 180,000 feet of lumber on the docks, damaging the salt works to the extent of \$1,000. The mill was old, and valued at \$10,000, without insurance. The salt works were also uninsured. The lumber was valued at \$10,000.

A source from Berlin says the cholera is prevalent in the barracks in that city.

Six sailors at Worcester, Mass., were on Thursday fined \$10 and costs, sentenced to the House of Correction for six months, and to \$1,000 bail not to violate the law for a year.

CHARLES ANASTAS, principal of St. Joseph's Academy for boys, in Cincinnati, has disappeared with a servant, servant girl and \$1,200 belonging to the institution. He was last heard from in Maryland.

CHICAGO has reappeared in Chattanooga, Tenn., there were eight cases, two fatal. The disease is confined to the colored people, caused from eating unripe fruit and vegetables.

DAVID JONES, a watchman, and Hugh Murray, fireman on the steamer Atala, living at pier twelve, North River, New York, had an altercation, when Jones seized Murray and threw him into the river, and before help could reach him he was drowned. Jones was arrested.

The old distillery building on Prince street, Boston, was burned, Friday morning. Loss \$65,000; insurance \$55,000 in the America of Pittsburg.

The bark ANAWAN, from New Bedford, June 19th, for a cruise in the Atlantic, capsized and five crew were drowned. The remainder, seventeen in number, were rescued by a racing vessel and landed at Liverpool.

A L. & R. rice mill in the Steppen suburbs of London, has been destroyed by fire. Loss about \$5,000.

BEAR ADMIRAL STEEDMAN, commanding the South Pacific fleet, has been placed on the retired list in the Department. Bear Admiral Almy has received preparatory orders to command a fleet in the navy. Bear Admiral Taylor, commanding the South Atlantic fleet, will be retired, and relieved of command by Bear Admiral Strong. Bear Admiral Jenkins, commanding the Asiatic fleet, will be retired in December. His successor is not yet designated.

The wife of Charles Claxton, living in Henry county, Ky., was awakened a few nights since by a man named Payne attempting to get in a window. Mrs. Claxton seized a pistol and shot Payne through the head, inflicting a fatal wound. Mrs. Claxton was tried and honorably acquitted.

THOMAS CONVERSE, and Thomas Peasey and Patrick Peasey, brothers, were killed in a well at Burlington, Vt., Thursday afternoon.

CASE four, a child, was born to the Conversees, followed by his brother, when both suffered the same fate. Converse leaves a wife and seven children.

TWO sons of David Klandall, a highly respectable citizen of Henry county, Tenn., aged eighteen and twenty-two, were drowned, Saturday, while bathing.

A GERMAN named Rittan was shot, probably fatally, Tuesday night, through the neck and body, at Richmond, Indiana, by a pistol in the hands of a boy fourteen years old, who mistook him for a burglar.

A TELEGRAM from Bridgeport, Conn., states that while offering Jennings and a party were coming, Thursday evening, a dog owned by the latter attacked the men, and animal and its master, who jumped at the dog, catching hold of its neck and cheek, and inflicting fearful and probably fatal wounds.

TAX directory of Detroit for this year contains 25,672 names, which, on the basis of three and a half inhabitants for each name, would give a population of 123,000.

A serious railroad accident occurred Tuesday afternoon on the Southern, Head, near Janesville, Wis. A double engine train was coming down the grade rapidly, when a drove of cattle started to cross the track ahead of the train. The engine ran into their midst, and threw them in various directions, but ditched both engines and wrecked the train. A fireman named John Morgan was instantly killed. The two engineers, Edward Mills and George Wallingford, were badly injured.

THE firm of Case, Klans & Co., of Green Bay, makers of dealers in lumber and shingles, have been thrown into bankruptcy. The estate of O. K. Moore, of Neenah, was the complainant, the entire owing by the firm of Case, Klans & Co., of Green Bay, and the widow's voice for the best boatman that ever was might have an accident on a equally evening like this."

"There, there, Marge, be still, poor girl, you don't know what you're saying," interposed Joe.

"Yes I do," said she passionately;

"never you think that Joe Gorton,

"I'll help it!" cried the girl passionately, twisting her fingers in the palm-swing so that it snapped: "he's my father, and never was a better but for the drink—you know, yourself everybody says so—and if you could tell me what he did to you, he's your murderer."

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

"Do you mean I should refuse to tell him?" said Joe slowly.

"What good would that do?" said the girl, impatiently. "Kelly or some of 'em would take him fast enough."

"It's your turn to hear," said the girl, looking wonderingly at her.

THE TRIBUNE.

PUBLISHED EVERY SATURDAY AT
Escanaba, Delta County, Michigan.

CHAS. D. JEWELL, Editor.

TERMS - \$1.50 PER ANNUM IN ADVANCE.

Turkey now takes third place on the roll of naval countries. While England has fifty, and France thirty, iron clads, Turkey has nineteen.

Portland, Maine, has had a six hundred thousand dollar fire. It caught in one of the Grand Trunk wharves, near Commercial street, and came unfeasted from that to various other wharves, on which were freight houses and elevators. Three steamships were destroyed and two lives lost.

Importers are now laying down goods in Chicago, via Montreal, in twenty days from Liverpool. Last year the average time was about 30 days; but this year with greatly improved facilities for transhipment at Montreal, the time has been greatly reduced. Twenty days is less than average via New York.

The editor of the Wyandotte Gazette has been imprisoned and sued for libel, just because he said that F. A. Cobb, a Member of Congress from that district was a back lobbyist and a humbug colonel; that he cheated the government out of \$10,000, and attempted to bribe a witness in a law suit in which he was attorney.

The crop reports from fifty-six points along the line of the Milwaukee & St. Paul Railroad in Wisconsin, says that the wheat and other small grains were never better, and that wheat will average twenty bushels to the acre, and is of excellent quality. Sixteen points in Minnesota also give flattering accounts of the harvest, and some points estimate the yield at thirty bushels to the acre. A few places in Northern Iowa report a good yield, equal to that of last year.

The steamer Whansett was burned on the Potomac River last week, causing the death of about sixty-seven persons. Panic, defective fire extinguishing apparatus, and inability to get at life preservers, seemed to be the cause of the large number of deaths.

Later reports of the disaster state that seventy-two lives are known to have been lost. The government has now taken the matter in hand, and proposes to prosecute the owners of the boat for carrying more passengers than the law allows to vessels of that size.

The cost of the new State Capitol is counted up by the Lansing Republican with the following result: "The building will cost each citizen of the State, (according to the census of 1870) \$1.01, or an average of 10 $\frac{1}{2}$ cents annually for six years. The rate of tax required to produce the necessary amount will be 1.9-10 mills on the taxable property of the State as equalized in 1871—a little less than $\frac{1}{4}$ of a mill annually for six years. Each person paying taxes on \$1,000 valuation pay 31 $\frac{1}{2}$ cents annually for six years—Detroit Adt."

The "paragraphic editorial" in the last Mining Journal contains an item giving the size, depth and elevation of the different lakes. It gives the depth and elevation as follows:

Lake Superior..... Depth, Elevar.
Lake Michigan..... 608 627
Huron..... 500 527
Erie..... 440 450
Total..... 1558 1550

According to these figures, what a fearful hole that Lake Huron must be, anyhow. The water rashes down out of Lake Michigan and the impetus given it by the fall must drive it up into Lake Erie. Is that the way it is done?

The Delta County Board of Supervisors met Thursday and transacted the business which came before their notice. There were present Supervisors Rhodes, Mason, Elliott and Ansel. Next week we will publish the proceedings.

It will be remembered at a meeting of the Board held a few weeks since, we took occasion to rather severely censure certain members of the board for non-attendance; among these was C. L. Rhodes, Esq., of Fayette. In the course of an interview with Mr. R. while he was here in attendance at the last meeting, we learned that the cause of his non-attendance at the previous one was the severe illness of Mr. J. B. Kitchen, the cashier and accountant at Fayette, which necessitated his presence at home.

A few weeks since the Mining Journal published an account of a large day work accomplished at the Morgan Furnace, and also the total amount of iron manufactured by the same furnace during the same week. We have forgotten the figures now, but it is sufficient to say this furnace has earned the broom for big work for 9 feet blast furnaces for that length of time, but we feel loth to give her the supremacy over the Jackson Furnace at Fayette, taking the run for the entire season. It would be an easy matter for furnace men to prepare for a large day's or week's work, when perhaps they might not be able to arrange so well for the entire season. We give it for the day, but can't afford to yield the total run of the No. 2 stack of the Jackson Furnace of 100 days until it has attained to her height.

The entrances and clearances from the ports of Marquette, Escanaba and Menominee, during the month ending July 31, are as follows:

Port	No. Vessels	Tonnage	Crew
Marquette	337	131,447	2,200
Menominee	159	44,650	1,180
Total	756	176,097	3,380

Which shows that while Escanaba lags somewhat in number, compares quite favorably in tonnage.

The State of Superior.

The Ontonagon Miner is in earnest about the establishment of the State of Superior. Nearly every issue of that journal contains arguments in its favor. From its last number we copy the following:

We are glad to notice our people are again awakening to the importance of this movement. Since our assuming control of the Miner we have ever advocated such a scheme, and we have no reason to recall a word we have said. On the contrary, every day convinces us more and more of the urgent necessity of separation from the state of Michigan. We think some steps should be taken by which a united action can be taken at the next session of our legislature, so that our legislators cannot be mistaken at our action or of our intentions. Some steps should also be taken to ascertain the opinion of the citizens of Ashland and Douglas counties, whom we have no doubt would be willing to cast their lot with the future state of Superior. In this connection we would say that we think the legislature of Wisconsin has heretofore been too liberal in annexing the territory of Wisconsin. We object to having so large a slice of that territory, we need only the counties bordering on the lake—only them and nothing more. We think the move is taking an earnest shape from the people, and we hope the papers of lower Michigan will discuss the question in all its bearings impartially, so that the next legislature will be prepared to act on an almost unanimous demand of the people of Lake Superior for a separation from Michigan, and the creation of the STATE OF SUPERIOR.

SUPPLIERS.—The following is a statement of the amount of ore and pig iron shipped from this port up to Wednesday evening, the 13th inst.

At this well known stand will be found Soda, Butter, Sugar, Graham, Biscuit, Hams, Eggs, Pie Crust, Candy, Nuts, Coffee, Tea, Sausages, Lemon Creams, Cream Crackers, also the best

Indian.

Graham,

Rye and

White Bread,

Bakes, Pies and Confectionery of the best quality; green and Canned fruits in their season. We are now prepared to serve our numerous customers with

Escanaba Tribune -- Supplement.

Escanaba, Mich., Saturday, Aug. 16th, 1873.

The Iron Fields of Menominee Co.

Col. B. F. H. Lynn, editor of the Marquette Mining Journal has lately made a minute examination of the new and old iron discoveries in the Menominee Range, and has pronounced at least a portion to be of great value, and equal both as regards quantity and quality, to the mines in the Lake Superior country. It was our intention to copy the Col. Lynn's article in reference to the matter, but our exchange containing it having been made way by certain bunglers-on, to be found about all printing offices, we are unable, now that we want to, to make use of the article, so we content ourselves with the following extracts from the correspondence of the Milwaukee Sentinel:

The Lake Superior iron region has been pretty thoroughly explored as the ridge which divides the waters which flow into Superior from those that flows into Green Bay and Lake Michigan; and the country lying north of this ridge includes nearly all of that popularly classed as the iron fields of the Upper Peninsula of Michigan. In the minds of a few, however, there has long been an impression that south of this ridge, in the space of country extending to the Menominee river, the boundary line between Michigan and Wisconsin and, indeed, in Wisconsin there are immense beds of iron ore in extent and richness to those of the Superior side of the water-shed. Reasonable ground for this belief was formed in the discovery of what is known as Little Sturgeon Falls mine, in 1867, at a point about 28 miles from the mouth of Deer Creek, a small stream falling into Green Bay. The ores then taken from this mine, near the surface of the ground, and submitted to analysis, gave 60 per cent of metallic iron. This test was repeated some time in the summer of 1870 with a similar result, and about the same time a deposit of marble or granite was found in the vicinity. It is known now that almost inexhaustable quantities of it are there, and so situated as to be easily quarried so soon as means of conveying it to market are supplied. Whether it will be useful for the various purposes to which told, but a high authority has already asserted that no other building stone in America equals it.

The Breen mine, about which much has been said, lies about two miles east of Little Sturgeon Falls mine. It presents on one side of a high ridge a solid wall of iron ore from 30 to 50 feet in perpendicular width. The ridge is a quarter of a mile wide at its base, and from 50 to 100 feet at its top. On the crown where trees have been uprooted by the most daring gales made concerning

such deposits as exist here cannot fail to create industries fully equal to that which has grown up since 1858 on the north shore of the peninsula. Immense forests of timber extends on each side of the Menominee and on all its branches through to Lake Michigan and furnish inexhaustable supplies for shipments and for charcoal. Indeed, this whole district is comprised within the comparatively unexplored portion of the peninsula, and only enough is known of it to give assurance that it holds a wealth beyond the most daring gales made concerning

The iron field of which this forms a part reaches through to Lake Superior; or in other words, the Menominee iron mines are only a southern outcrop of the Superior mines. They have already been followed north to Lake Michigan and are found without digging to be sufficiently distinct to warrant that belief.

A force of habit is fully illustrated in the case of a retired milkman who says he never sees a can of water without an almost irresistible desire to put some milk in it.

5,000 LAWS--Examined and Annotated by the Legislature at its Session in 1872--An Article to Cooper Children is Given to School.

SCHOOL LAW--The people of the State of Michigan are still five miles further west, in attracting attention just now. It is in the hands of citizens of Menominee, who are developing its extent and quality as fast as possible. The exposure is on a southern and eastern slope, and crevices have cut across the veins at right angles, exposing first a vein of brown hematite, which I am assured by Col. Lynn, of the Marquette Mining Journal, is not exceeded by any in the country. A fair quality of red specular ore has also been found, and work is now progressing for the further development of it.

In a space of eighteen miles north by fifteen west from the Breen mine--which is the nearest to the bay shore--there are fourteen mines having distinct outcroppings, and on which special examinations have been made to the satisfaction and often to the surprise of iron men. This includes no reference to numerous fainter appearances where no work has been done. In fact little has been accomplished in comparison with the extent of the field to be explored. From Green Bay to the mines in all a dense forest, and few roads are yet provided for the accommodation of the work. Until recently it was necessary for all explorers to carry, in their stores on their backs; but the impetus received from this summer's operations will soon clear away these hindrances. One may readily foresee the iron horse packing in supplies and packing out a boundless wealth of iron, for

the growth of such industries as shall be created by the fact that he is a *blacksmith*.

THE TRIBUNE.

PUBLISHED EVERY SATURDAY AT
Escanaba, Delta County, Michigan

CHAS. D. JEWELL, EDITOR.

FREIGHTS \$1.50 PER ANNUM IN ADVANCE

Turkey now takes third place on the roll of naval countries. While England has fifty, and France thirty, iron clads, Turkey has nineteen.

Portland, Maine, has had a six hundred thousand dollar fire. It caught in one of the Grand Trunk wharves, near Commercial street, and came unbroken from that to various other wharves, on which were freight houses and elevators. Three steam ships were destroyed and two lives lost.

Importers are now laying down goods in Chicago, via Montreal, in twenty days from Liverpool. Last year the average time was about 30 days; but this year with greatly improved facilities for transportation at Montreal, the time has been greatly reduced. Twenty days is less than average via New York.

The editor of the Wyandotta Gazette has been imprisoned and sued for libel, just because he said that E. A. Cobb, a Member of Congress from that district was a back-pay lobbyist and a humbug colonel; that he cheated the government out of \$10,000, and attempted to bribe a witness in a law suit in which he was trying.

The crop reports from fifty-six points along the line of the Milwaukee & St. Paul Railroad in Wisconsin, say that the wheat and other small grains were never better, and that wheat will average twenty bushels to the acre, and is of excellent quality. Sixteen points in Minnesota also give flattering accounts of the harvest, and some points estimate the yield at thirty bushels to the acre. A few places in Northern Iowa report a good yield, equal to that of last year.

The steamer Wauasset was burned on the Potomac River last week, causing the death of about sixty-seven persons. Panic, defective fire extinguishing apparatus, and inability to get at life preservers, seemed to be the cause of the large number of deaths.

Later reports of the disaster state that seventy-two lives are known to have been lost. The government has now taken the matter in hand, and proposes to prosecute the owners of the boat for carrying more passengers than the law allows to vessels of that size.

The cost of the new State Capitol is counted up by the Lansing Republican with the following result: "The building will cost each citizen of the State, (according to the census of 1870) \$1.01, or an average of 16 $\frac{1}{2}$ cents annually for six years. The rate of tax required to produce the necessary amount will be 1.9-10 mills on the taxable property of the State as equalized in 1871—a little less than $\frac{1}{4}$ of a mill annually for six years. Each person paying taxes on \$1,000 valuation pay \$14 cents annually for six years.—Detroit Advertiser."

The "paraphrastic editorial" in the last Mining Journal contains an item giving the size, depth and elevation of the different lakes. It gives the depth and elevation as follows:

Lake Superior..... Depth, Elevation
Michigan..... 600 607
Huron..... 500 507
Michigan..... 400 407
Erie..... 300 307

According to these figures, what a fearful hole that Lake Huron must be, anyhow. The water rushes down out of Lake Michigan and the impetus given it by the fall must drive it up into Lake Erie. Is that the way it is done?

The Delta County Board of Supervisors met Thursday and transacted the business which came before their notice. There were present Supervisors Rhodes, Mason, Elliott and Ansel. Next week we will publish the proceedings.

It will be remembered at a meeting of the Board held a few weeks since, we took occasion to rather severely censure certain members of the board for non-attendance; among these was C. L. Rhodes, Esq., of Fayette. In the course of an interview with Mr. R. while he was here in attendance at the last meeting, we learned that the cause of his non-attendance at the previous one was the severe illness of Mr. J. B. Kitchen, the cashier and accountant at Fayette, which necessitated his presence at home.

A few weeks since the Mining Journal published an account of a large day's work accomplished at the Morgan Furnace, and also the total amount of iron manufactured by the same furnace during the same week. We have forgotten the figures now, but it is sufficient to say this furnace has earned the broom for big work for 2 feet both furnaces for that length of time, but we feel loth to give her the supremacy over the Jackson Furnace at Fayette, taking the run for the entire season. It would be an easy matter for furnace men to prepare for a large day's work, when, perhaps they might not be able to arrange so well for the entire season. We give it for the day but can't afford to yield the total run of the No. 2 stack of the Morgan Furnace of 160 days until it has actually been beaten.

The entrances and clearances from the ports of Marquette, Escanaba and Mesonine, during the month ending July 31, are as follows:

Port.	No. Vessel.	Tonsage.	Crew.
Marquette	252	130,500	5,048
Marquette	257	131,477	5,059
Marquette	159	14,879	1,150
Total	728	269,856	5,007

Which shows that while Escanaba lacks somewhat in number, compares quite favorably in tonnage.

The State of Superior.

The Otonagon Miner is in earnest about the establishment of the State of Superior. Nearly every issue of that journal contains arguments in its favor. From its last number we copy the following:

We are glad to notice our people are again awakening to the importance of this movement. Since our assuming control of the Miner we have ever advocated such a scheme, and we have no reason to recall a word we have said. On the contrary, every day convinces us more and more of the urgent necessity of a separation from the state of Michigan. We think some steps should be taken by which a united action can be taken at the next session of our legislature, so that our legislators cannot be mistaken at our action or of our intentions. Some steps should also be taken to ascertain the opinion of the citizens of Ashland and Douglas counties, whom we have no doubt would be willing to cast their lot with the future state of Superior. In this connection we would say that we think the legislature of Wisconsin have heretofore been too hasty in annexing the territory of Wisconsin. We object to having so large a slice of that territory, that we need only the counties bordering on the lake—only them and nothing more. We think the move is taking an earnest shape from the people and we hope the papers of lower Michigan will discuss the question in all its bearings impartially, so that the next legislature will be prepared to act on an almost unanimous demand of the people of Lake Superior for a separation from Michigan, and the creation of the STATE OF SUPERIOR.

SHIPMENTS.—The following is a statement of the amount of ore and pig iron shipped from this port up to Wednesday evening, the 13th inst.

PASSED AWAY.
Weep no more; strive no more; let the dream go; so few sumer showers make plucked roses blow.
The fair was broken; the soft roses lost; Let the crushed fragments lie; you'll not the cost.
The bond that is severed can never be mended; No magic can make again noon-day's spent again.

Weep no more; hope no more; pray not, nor Oh! fair was our idol; we framed it of dust. It crumbled before us; the gay colors faded. The radiance has vanished; the glory is dead.
Year no more; look no more; merrily back; Let the long grasses wave over the track.
Let the soft sunnings sleep quiet and calm; Let the low wind breath its musical balm.
Till the gang is forgotten, forgotten the tomb— Till over the crushed leaflets fresh violet bloom.
What they will not leave fragrance like those! Hurrah! think no more; weep no more; home is gone!

AGRICULTURAL.

CURE FOR CHOLEST.

The following is recommended as an infallible remedy:

When the disease makes its appearance, take six oil and grease the chickens well on the back, neck, and under the wings. It does not require much oil to grease a large flock, and if this is attempted to promptly, you will have no cholera. All, or nearly all, chickens that have the cholera are covered with lice, which produces the disease. These the chickens eat. This remedy has never failed to stop the disease where it has been tried. It is worth a trial by those who have chickens suffering from this disease. Yours,

WEST NEWTON, O. C. M. COFFIN.

Ravages of the Turnip Fly.

It is stated that spirits of turpentine, if applied to the seed a few hours before sowing, will effectually prevent the destruction of the young seedling by the fly. The best way to use it is to wet the seed with turpentine and allow it to stand about two hours, then dry it with a cloth or ashes, and sow as usual. We are assured by parties who have tried it that it is an excellent preservative. The cost is very small, and we believe no evil can result. In some cases the seed has remained wet with turpentine for several days before being sown, and no perceptible evil arose from the delay. One gentleman assures us that he has used this application for ten years, and has never lost any plants by the fly. On questioning him closely as to the modus operandi, he states his belief that the turpentine passes into circulation with the sap of the plant, as it can be distinctly detected by the peculiar taste it possesses when testing its presence by chewing some of the young plants.

Principles of Breeding.

The National Live Stock Journal says: Scientific investigation and research have established the following propositions as true, in the transmission of disease life in all its varieties:

1st. Like produces like, or the like.

2d. Where there is great uniformity among the members of a species, the divergence of offspring from the average type are usually small.

3d. When a considerable divergence has once been established, unlike novelties among the offspring are frequent and great.

4th. Any accidental variation from the established type in the form, disposition or color of a part may be perpetuated, and to a large extent intensified, by careful selection and use.

5th. An unnatural strain or demand on any particular part of the animal machinery, long continued, tends to weaken or dwarf all the other parts not allied to the one so stimulated.

6th. Hereditary faults are liable to be weakened, if not entirely lost, by disease.

High Farming.

A noted farmer of New England, after visiting England and examining with the critical eye of a practical and experienced agriculturist the system pursued there, says:

I am thoroughly confirmed in my old faith that the only good farmer of our fathers is to be a high farmer. There is a widely prevailing indisposition among the common farmers of our country against not only the practice of high farming but against the use of the phrase by agricultural writers. This is all wrong and should at once be corrected. Through some misconception of the meaning of the phrase, and also of its application, they have come to believe it synonymous with theoretical "book farming," "new-fangled notions," "boasted strides of progress, followed by disappointment and final failure. This is all an error. High farming simply means thorough cultivation, liberal manuring, bountiful crops, good stock, good feed, and paying profits well deserved.

It is not strange that this misconception has had such a hold in the minds of doubting farmers who have been eye-witnesses to some of the spread-eagle experiments of enthusiastic farmers, better supplied with money obtained in a business than know how to manage than with practical experience on the farm. Bountiful crops and paying profits of course are what all farmers who are dependent upon the farm for an income are striving to obtain; and every year as it passes is confirming the opinion that the profits are small, and will grow "beautifully less" where high farming is not practiced.

The Best Bee-Hive.

Mrs. Tupper, of the town of Honesdale, answers a novice who inquires what hive is the best, as he is just starting the honey business, as follows:

Our friend opens a wide question, and if I give an honest answer I shall bring down upon my head the maladies of worthless patent-hive men. I am getting used to that, however, and so venture to say that if real cheapness and convenience be required, a simple beehive, as in "Notice," recommends, and which can be made for one dollar, is as good as any. I am putting in some of these now, and am well pleased. Everything that is a model can be made for one dollar. Some, however, would prefer a few extra in the way of paint and finish, but this is confirming the opinion that the profits are small, and will grow "beautifully less" where high farming is not practiced.

Condemned Honey.

A physician in a small town in Maine had long been pestered by little street urchins who came to peddle candy. At last, when patience had ceased to be a virtue, he told the boy to stand on the top of a cliff which was 500 feet in height. At the end of the year he saw a few birds hovering on the cliff in lame members, and of one party, David A. Bell, 22 years old, had gone to roll a stone off the top in order to raise the birds, when he overbalanced himself, and tumbled down the giddy height. His companions, from the spot where he stood, and like Bell, concealed an arrow with which he had穿孔ed the bottom as speedily as possible. A boat was brought round. Nothing, however, was to be found, except a few loose tufts of grass on the rocks that had been dislodged by the young man descended. He had fallen to the sea, and his body, at the time the mail left, had not been recovered. Some conception of the distance may be arrived at by recollecting that the cliff presented a perpendicular of more than one-tenth of a mile.
