

The Escanaba

INDEPENDENT IN ALL THINGS. TERMS: \$2.00 a Year, in Advance. NUMBER 21. ESCANABA, DELTA COUNTY, MICH., SATURDAY, MAY 1, 1875.

NEWS PARAGRAPHS.

As Decoration Day falls on Sunday this year, it is generally conceded that it should be observed on that day, instead of the day following, as the ceremony would be more largely attended and appreciated. It is in fact a religious custom, and Sunday of all days, is the fittest for its observance.

Tim tickets to the ceremony of imposing the barrette upon Archbishop McCloskey, were printed in purple and the coat of arms and hat in ermine. Among others, forty archbishops and bishops and 1,200 priests received these tickets, also the president and cabinet.

The plan of associating the Presbyterian Churches of the world into one grand confederation has assumed definite shape. The New York Committee, appointed to draft a constitution for the proposed confederation, have prepared and submitted their report, which will be considered at the meeting in London, July 21, 1875.

A comparison of the statistics of the consumption of liquor in France and the spirit-drinking countries of Great Britain and the United States, shows something not expected. The amount of liquor consumed in the United States last year was 63,721,028 gallons, of which 1,307,828 were imported and the remainder of home manufacture. The cost of this to consumers was \$241,003,646.

The English premier has decided upon a plan for gradually reducing the national debt of England, the interest on which amounts to over £27,000,000 a year. He proposes to raise £28,000,000 every year, and apply the surplus to reducing the principal. The idea is a good one, and, providing no wars or other extraordinary expenses intervened, its success would only be a question of time.

Both sides are willing that Mrs. Tilton shall testify in the Brooklyn scandal case. Indeed, Tilton is anxious that she should, as he is confident of his ability to "hold his wife with his glittering eye," and confine her to the truth, a revenge for which she has not been accused of entertaining.

It now seems that the Cheyenne Indians, when they surrendered to our troops, buried their best guns in the mud-hills, where the recent fight took place in which the troops were badly beaten. When the 2,000 escaped from the agency, they were without arms, but on an attack in the hills, had improved rifles and plenty of ammunition. The troops charged recklessly, supposing the Indians to be unarmed, because the slaughter. There is great apprehension on the frontier.

A canvass of the newspaper editors of New York city as to their opinion of the guilt of Beecher, gives the following result:

Name	Guilt	Not Guilty
Tilden	21	2
World	21	2
Times	21	2
Herald	21	2
Star	21	2
Sun	21	2
Total	135	10

An attempt was recently made in the English House of Commons to summon the printers of the Times and News for a breach of privilege by exhibiting documents in the hands of the Select Committee on Foreign Loans. Disraeli moved a resolution that the Select Committee be instructed to investigate the affair and report how the press obtained the documents in question. This resolution was carried and the order summoning the printers was revoked.

The recent escape of a number of Cheyenne Indians, and their sharp fight with the United States troops, in which the latter were worsted, and to their cost ascertained that the escaped prisoners were equipped with first class arms, has led to serious consequences. The Cheyennes are on the war path, and are receiving acquisitions from other hostile bands of stragglers, and already all the available troops are ordered in pursuit.

CHAVEZ, a member of the gang of the bandit Vasquez, lately hung in California, is proving himself a worthy successor of that desperado. Himself and two comrades recently entered a station near San Bernardino, and with a liberal display of knives, pistols and rifles, went through the station, securing all the valuables, and then mounting, rode in their brigand style with the parting salutation of "Adios, senora!" who may be catch us.

A special train, containing six cattle cars and one passenger car, was thrown from the track near Mankato, Minn., recently by a landslide which fell upon the train with a force of several tons. The cattle cars were thrown from the track and the engine and passenger car were overturned. The passenger car was overturned and the engine and passenger car were overturned. The passenger car was overturned and the engine and passenger car were overturned.

The U. S. Court at Baltimore has made a decree in the case of the alleged private steamer "Eagle Star," forfeiting that vessel to the United States, on the ground that she was engaged in coasting trade and had left New London fully equipped and destined for the coast, which was contrary to the provisions of the act.

The South.
At Lexington, Kentucky, on the 19th inst., Michael Parry and Patrick O'Brien engaged in a quarrel at a farmers' fair, during which Parry shot O'Brien in the breast with a heavy rifle, and he fell, apparently lifeless, and a shot in the breast. Both were taken to the hospital.

A man named in Charlotte, North Carolina, recently destroyed about 2,000 birds of the species of the North Carolina and Carolina, and Columbia and Georgia, and a number of other species of birds, and he was taken to the hospital.

FLASHES OF NEWS.

Washington.
PRESIDENT GRANT has just received a letter from the Hon. William H. Hunt, of the Oregon territory, in which he has expressed his warm affection for the President, and his desire to see him in person.

A few days ago, the city was startled by the report of Gen. Sinton, by his partner Gen. Ross. The gentleman is a retired army officer, and was engaged in fitting up a building as a fashionable restaurant. He called his friend Sinton to an upper room of the building and there attached him with a halberd leaving him for dead. Ross has been sent to an asylum, it being the unanimous verdict of the physicians, after several days' examination, that he is insane. Sinton himself made an affidavit, in which he stated that Ross must be insane, as an angry word had never passed between them during their thirty years' friendly comradeship.

WILLIAM ALMAYER, General, has tendered his resignation, to take effect May 15th, and has been succeeded by Gen. Sherman. It is rumored that Secretary Tilden will succeed William in the Department of Justice.

The Secretary of the Navy has received a communication from F. W. Rice, formerly United States Consul at Annapolis, in relation to the late Commodore Rice. He says that Commodore Rice is 70 years of age, and is in poor health, and that the country much needs his services. The report of Commodore Rice is favorable to the longer route.

The Treasury Department has decided to permit special packages of sugar, in bulk or in small quantities, to be sent through the mails, with a view of testing whether any injury will be done to the other mail matter.

WOMANLY FAITHFULNESS of the Chicago Post and Mail, has made application to the Commissioner of Internal Revenue, for a contract for printing revenue stamps and back checks in the Northwest. Since Shawcross's contract there has been repeated applications from Chicago to do this work, but the Commissioner of Internal Revenue has never shown any disposition to let these contracts to Western parties, but has insisted on immediate application to the Department.

The East.
A BATHING BILLIONAIRE of New York, whose name is not given to the public, proposes to build a National College of Marine, on the Atlantic coast, for the purpose of giving one million dollars for the purpose, and his death will be a great loss to the nation.

An attempt was made, a few days ago, to burn the house of St. John's, Catholic Church, in Connecticut. Five stacks of hay and one can of oil were placed in the vestibule and a fire started and lit by wind. The powder and oil were thrown into the street, with a terrible explosion. Some of the hay was blown up, and there was a great fire. The explosion was caused by the powder and oil being thrown into the street, with a terrible explosion.

JOHN HARVEY, the senior member of the firm of Harper Brothers, publishers, died in New York on the 23d, after a prolonged illness, in the 70th year of his age. The death of Mr. Harvey was a great loss to the publishing world.

THE TWENTY-CENT COIN.
The design for the twenty-cent silver piece authorized by the act of Congress of March 3, 1875, was selected and approved by the President, and is now being struck at the Mint. The obverse of the coin contains a sitting figure of Liberty with the word "LIBERTY" inscribed on the shield, the whole surrounded by thirteen stars, and beneath the figure of the eagle with the word "EAGLE" inscribed on the shield.

THE RECLAMATION OF A VERY VALUABLE tract of land upon one of the Scotch islands, in the West Indies, has been recently made. The tract is situated in the island of St. Vincent, and is a very valuable tract of land.

PAUL BRYAN'S BUREAU.
The Provincial Congress of Massachusetts has adjourned; but the Committee of Safety is still upon the alert. The military stores of the people had been deposited at Concord, and the Committee of Safety is still upon the alert.

THE RECLAMATION OF A VERY VALUABLE tract of land upon one of the Scotch islands, in the West Indies, has been recently made. The tract is situated in the island of St. Vincent, and is a very valuable tract of land.

Leakings—1775.
WANTED FOR THE CHAMBERLAIN BY JOHN A. WARRICK.
No mauling, but for blood had they,
No battle was there, for what they
Against the alien layout,
Their homages then in that old day,
Their feet had broken parental ways,
They loved not strife, they dashed pain,
They saw not, what to us is pain,
That God would make men's wrath his gain,
No seas were they, but straight men,
On the shore, as on a plain,
The meaning of the work they did,
Was strange and dark and doubtful then,
Soft as the summer breeze they left
The pier and tower and sea-side wall,
The half-forgotten legend told,
The spirit, the soul, the heart,
They went, they were, they came to call,
They scarcely said the reason why,
They only knew they could not fail,
And death was not the worst of all.

On the shore, as on a plain.
The meaning of the work they did,
Was strange and dark and doubtful then,
Soft as the summer breeze they left
The pier and tower and sea-side wall,
The half-forgotten legend told,
The spirit, the soul, the heart,
They went, they were, they came to call,
They scarcely said the reason why,
They only knew they could not fail,
And death was not the worst of all.

FARM AND HOUSEHOLD.
Feed for Young Chickens.
They want no food for many hours
after they are hatched, as they are then
digesting the yolk of the egg, which
constitutes their first food, and acquir-
ing strength to run about. When they
begin to peck, they should be fed with
soft food and very small grain. Un-
questionably, the best food is an egg
beaten up with a tablespoonful of milk,
and heated in an oven or by the side
of a fire until it is into a soft custard.
Chickens fed on this make wonderful
progress. If they are to be made
large fowls, they must be fed soon
after daylight, if not too often during
the day.

Heavy Cow Crop.
The Practical Farmer thus notices the
crop of Alexander Squire, at De-
laire County, Pa. Sixty bushels to
the acre of shelled corn is a common
crop on this farm, which will no doubt
be exceeded this year, as it is variously
estimated by different persons at from
100 to 120 bushels per acre. This field
of thirteen acres was managed as in
other seasons, but the corn in many
places about the year standing being first
plowed down to the depth of from six
to eight inches. On the ripened surface
700 bushels of lime was spread, and
100 pounds of bone to the acre. The
soil being naturally of the best quality,
it is difficult to conceive of a more ap-
propriate manure for a heavy crop.
The corn crop was planted 4th, and
when we say it was of a rich, dark
green color, and the ears were
stalks having two ears on. When this
corn-field is harvested and gathered,
we shall give the results to our readers.

One of the best of journals says:
Every farmer who has a field of corn
to dry a half ton seasoned oak posts
knows its liability to bend and break.
If the posts are rotted in the months,
it will usually drive more kindly. Oil
is still better, but keep an eye on them
and cut up each nail separately into it.
Another point observed is that boards
become loose eventually by the rusting
of the nails, which, communicating to
the wood, causes not only an enlargement
of the nail hole, but the rusting
of the wood itself, and the building shaky
and insecure. This may be prevented by
using a rough grease until it smokes,
and then pouring it over the nails to be
used. The grease will fill the pores
of the iron and cause the nails to
rust. Besides this, no trouble will be
experienced in driving them into the
hardest wood. The reason is that the
coating of grease prevents the rusting
of the iron, and consequently, oxidation.
Oxygen is the great destroyer of iron,
and moisture is the inducing cause.

Geo. W. Shaw furnishes the following
recipe to the Western Farm Journal:
One gallon strong soft soap, one gal-
lon of rain water, and one pound of
copperas dissolved in it. Bring this to
a boil, strain, and use. If too thick
to use with a brush, add strong ley.
If too thin, add lime, or better, sulphur.
Clean the dirt from the tree, to the
depth of one inch, remove the honey,
and then apply the mixture to the tree,
from the ground up, eight or nine
inches at a time, until the whole of
the month of June for the better eggs,
though, if earlier, it causes the tree to
make a better growth. Mr. Shaw does
not state the kind of adding the sulphur,
and whether the sulphur is to be added
to the trunk, it hardly seems worth
while to add so many ingredients, such
as lime, sulphur, and copperas, whose
chief value is to destroy fungoid
growth. But he says he has applied
it fifteen years, with good success. It
is after the round-headed borer, espe-
cially, in working so low down.

A Question for Scientists.
A very important question has been
raised regarding the use of Paris green
for the destruction of insects upon
potatoes and other vegetables, main-
taining that it not only poisons the
plants to which it is applied, but that it
also poisons the soil in such a manner
as to affect future crops.
A scientific observer reports that he
has detected traces of arsenic in the
crops raised from seed which had been
applied in arsenic to prevent them. If
so small an amount of poison can so
affect the soil as to be taken up by
the plant, it is not properly understood. A con-
siderable amount of the American potato
is raised in the following mode:
If you want to make out, knead
a cup of meal, roll it out thin, and
cut it in squares, then bake in an oven,
with the crust on both sides.
Mix your oatmeal smoothly in cold
water, then pour into boiling water,
adding a little oil to season. Keep the
water at the boiling point for two hours,
and add a little oil to the water, and
the flavor. Stir thoroughly at inter-
vals.
Baked Oatmeal.—Five quarts of dried,
large shelled oatmeal, rolled in flour,
is the best. A large tablespoonful of
lard is added in the middle of the year.

Small tablespoonful of milk, about 1
quart of quail water, two-thirds
cup of fresh yeast, mix thoroughly,
leaving with the hands and covering it
with a cloth. Set it to rest overnight.
In the morning let it rise a second time
in a buttered tin, and when it has
risen about one hour, stir it with a
spoon. Yeast for this bread is a potato
boiled in one quart of water, 3 table-
spoonfuls of a cup of sugar, 1
part of boiling water, Mash and strain
the potato. Pour the water into a
cup, which is as good as any
place it across the heat of the stock,
and force it down with a wooden mal-
let. We use a very narrow screw-driver
or keeping open the split. Shape
them wedge-fashion both
ways, keeping the bark intact.
We make a shoulder as far up as the
season is shaved; it is not so strong, but
insures growth. The inside of the bark
of both sides and stock must meet
across. But the section at slight angle
spreading from each other. When the
stock is small and only one section inserted,
place a piece of wood on the
opposite side. If the slit does not close up,
it is round a cotton string to keep it
tight upon the growth. Cover with wax
every part of the cut wood and slit. In
three weeks time go over the grafts and
re-wax if needed. It is air and rain
getting in that destroy. Where the limb
to be grafted is from two to four inches
long, it should be cut six inches from
the tree, and from four to six inches
may be inserted.—German Journal.

The French Vintage of 1874.
The Fall Gazette, of March 18,
says: "The expectations of the French
vintage with regard to the vintage of
1874, have not been disappointed. It has
proved one of the most abundant of the
century. Indeed, since 1860, it has
been exceeded only twice, in 1865 and
1866, and in 1869, and in 1866 the
gain was very slight. But it is when
we compare the vintage of 1874 with
those of the three years immediately
preceding that we become aware of the
abundance. It exceeds the yield of
1873 by 37,421,000 hectolitres, and that
of 1872 by 13,000,000. The average
price of late years of ordinary wine in
France—especially that, in wine of
quality and of high price, is estimated
by M. de Foville, at about 50 francs
50 centimes. Even at this low average
the gain of France—of the whole
community, that is, not of the wine-grow-
ers, but of the nation, is estimated at
more than 1,000,000,000 francs. The
vintage of 1874 is estimated at 1873
by 37,421,000 hectolitres, and that of
1872 by 13,000,000. The average price
of late years of ordinary wine in France—
especially that, in wine of quality and

community, that is, not of the wine-grow-
ers, but of the nation, is estimated at
more than 1,000,000,000 francs. The
vintage of 1874 is estimated at 1873
by 37,421,000 hectolitres, and that of
1872 by 13,000,000. The average price
of late years of ordinary wine in France—
especially that, in wine of quality and
of high price, is estimated by M. de
Foville, at about 50 francs 50 centimes.
Even at this low average the gain of
France—of the whole community, that is,
not of the wine-growers, but of the nation,
is estimated at more than 1,000,000,000
francs. The vintage of 1874 is estimated
at 1873 by 37,421,000 hectolitres, and
that of 1872 by 13,000,000. The average
price of late years of ordinary wine in
France—especially that, in wine of
quality and of high price, is estimated
by M. de Foville, at about 50 francs
50 centimes. Even at this low average
the gain of France—of the whole
community, that is, not of the wine-grow-
ers, but of the nation, is estimated at
more than 1,000,000,000 francs. The
vintage of 1874 is estimated at 1873
by 37,421,000 hectolitres, and that of
1872 by 13,000,000. The average price
of late years of ordinary wine in France—
especially that, in wine of quality and
of high price, is estimated by M. de
Foville, at about 50 francs 50 centimes.
Even at this low average the gain of
France—of the whole community, that is,

by 37,421,000 hectolitres, and that of
1872 by 13,000,000. The average price
of late years of ordinary wine in France—
especially that, in wine of quality and
of high price, is estimated by M. de
Foville, at about 50 francs 50 centimes.
Even at this low average the gain of
France—of the whole community, that is,
not of the wine-growers, but of the nation,
is estimated at more than 1,000,000,000
francs. The vintage of 1874 is estimated
at 1873 by 37,421,000 hectolitres, and
that of 1872 by 13,000,000. The average
