ACCIDENT AT REPUBLIC. of the present day. Now let us see if the pastors, and those churches, preach the same gospel that Christ and the apostles preached. They preached a gospel of a coming kingdom at hand, as the great motive for repentance, and an inheritance in that kingdom when Christshould come in his glory to set it up and take his seat on David's throne, and reign over the

house of Jacob forever.

This was the burden of their preaching, and Paul says in his letters to the Galatians, 1, 8, "If any man or an angel from Heaven preach any other gospel than we have preached, let him be accursed." Christ and the apostles preached to mortal, dying man, and invited him to believe in Christ the Life giver, to secure immortality and eternal life, which God has promised to be received at the second appearing of Christ. Bishop Davies' Visit.

The pastoral visit of Bishop Davies to St. Stephen's parish, on Monday last, was an occasion of much pleasure to all -to pastor and people alike. The ladies had made of the little church a bower; white water lilies in banks and other flowers in pots filled it with beauty and perfume; and a congregration of friends crowded it to the threshold. The service was the usual, impressive confirmation ritual, and the class consisted of Misses Symons, Thompson, Bell and Jessie Blake, Caddie and Connie Oliver, Test, Wallace and Crim, and Messrs. Webb, Booth, Swan, and the brothers Norden-fourteen

After the service the residence of Mr. and Mrs. F. D. Mead was thrown open to the congregation and the public that an opportunity might be had to become acousinted with he bishop, an opportunity which was embraced by many who could not find admission to the service but who desired the acquaintance and to express their good will and wishes toward the church.

Assisting at the reception were Mr. and Mrs. Greene and many others, and to the onlooker who reported for the Iron Port it was apparent that St. Stephen's is crescent-that a larger house must soon be had, and that the church will exercise a larger influence henceforth.

It is endorsed by architects, engineers, and scientific mer men all over the country, and 300,000 buildings plastered within the last three years, prove it to be the plastering material of this progressive age.

That the varying proportions of quick-lime, sand, and hair, with the two frequent unsatisfactory results of their com-bination, should have so many 'years afflicted a long-suffering people is truly a wonder. It has been no fault of the plasterers, who have done their work as well as the rude material at their command would admit. But it has long been a well-known fact that the plaster in a building was its poorest, weakest and most unsatisfactory part. MANK MINOR MATTERS.

The Iron Port News Gatherers Find Many Interesting Items.

It used to be the Quakers whose meetings brought rain, but our friends of the Methodist communion seem to be the ones now. The "moonlight excursion" proposed for last Friday and postponed until Tuesday was again postponed until to-night-on Tuesday night the "moonlight" was again lacking. We hope it may be bright to-night.

Rain fell, gently but steadily, during the night of Tuesday and a part of the day following. It would have been a God-send a month ago and is very welcome yet; will do much good in checking the fires and some no doubt to latecrops.

The series of lectures upon Romanism by the ex-priest, Chiniquy, of which promise was given two months since, will occupy the first week in August, every evening of the week. They will be given at the People's opera house.

#### ESCANABA.

The City of Escansba, the county seat of the County of Delta, and the outlet to market, by water, of one half the product of the iron mines of the upper peninsula of Michigan and Wisconsin, was founded only thirty years ago. For the first ten years after its foundation its connection by rail was with the north only, that to the south being by steamer to Green Bay during the season of navigation and by stage during the winter. For another decade, after the opening of the railway from the south and during the opening and development of the iron ranges at the west; it prospered as a trading point but its growth in members was slow. During the last decade it has doubled in population and more than doubled in the volume of business transacted. The population of the city is now close upon 9,000 and the arrivals and departures by lake. last year, were in excess of three thousand, and the exports of iron ore, pig iron

and lumber in excess of four millions of tons weight and of Twenty five millions dol-

The place is favorably located for Manufactures of iron or wood and certain to become a center of those industries in the near future. By water it has communication with every point in the valley of the great lakes, by the C. & N. W. railway and its connections and the M. S. & A. railway and its connections, with the south, west and northwest. A good agricultural county is tributary to it, by the development of which its population, wealth, and importance will be further enhanced and its future randered more stable and seems. rendered more stable and secure.

## THE IRON PORT.

The Iron Port Company.

J. C. VAN DUZER, . . . EDITOR. LEW. A. CATES, . . . MANAGER.

The Ohio democrats will make their campaign this summer on the old issue and their platform assails the "McKinley bill." They will have up hill work in wool growing Ohio against such market reports as the following by Justice, Bate

"The outlook is promising for a large ption of American wool. The decline in foreign wool and goods is responsible for the lower prices for American wool as compared with this time last year, yet as the consumption of wool in prospect for a good demand for the new | needed right away.,' clip so long as it is not held above the value of competing foreign wool; and while there may be some disappointment that prices are not higher, it must be remembered that with the present tariff the American wool grower receives about 12 cents per pound more for his wool than is obtained by growers of similar wool in other parts of the world, and this much more than he would receive without this degree of protection."

And against such facts as this:

"The largest importer of worsteds in Philadelphia, who under the tariff law of 1883 manufactured his goods in Bradford, England, paying the government here nearly \$1,000,000 duties upon his annual importations of cloth, has discontinued manufacturing in England, and has removed his machinery to a mill on the banks of the Delaware River, and is now preparing to manufacture in this county the goods he formerly imported. American labor now uses the raw material, the largest portion of which is grown in America, whereas before they used none grown in America."

Among the more recent sales were several of non-Bessemer hematites, for delivery within sixty miles of the sea-board, the total sales of this class of ore east of the mountains aggregating half a million tons. When it is considered that foreign tion with low ocean freights, the great shrinkage in the price of Lake Superior ore, to enable it to compete with this foreign ore, can better be appreciated. Eight cents per unit is the average cost to the eastern consumers, who in the present depressed state of the ore trade are enjoying a good thing.-Iron Trade Review.

For a 60 per cent. ore \$4.80 at the furnace, less 30 cents royalty, 70 cents rail freight from mine to lake, 90 cents lake freight, a dollar rail freight at the far end of the route and a dollar and a half cost of mining. The non-bessemer mines would not seem such bonanzas as Michigan legislators of '91 believed.

THE cultivation of tobacco in British

The cultivation of tobacco in British North Borneo is rapidly increasing. The output for last year was a million and a half pounds.

The exports of flaxseed from Argentina are 40,000 to 80,000 tons per annum, half of it going to Great Britain and twenty per cent. to the United States.

NEAR Milan, Italy, 22,000 acres of land, irrigated with water from the city sewers, are yielding crops of from eight to ten tons of hay as a rule, while occasionally some separate meadows will yield even larger amounts.

THE rape seed acreage of the Punjah, India, is 411,200 acres, being 113,200 acres in excess of last year. The crop is expected to be a very good one. The wheat area this year is 7,284,200 acres. or 1,011,300 more than last year.

SMALL farms are the rule in Sweden, and the Swedish peasant usually owns the soil he tills. Over two-thirds of the farms are between five and fifty acres in extent, and more than 23 per cent. are little homesteads of less than five

THERE is a family in Lithonia, Ga., which consists of husband, wife and four children-no twins-and the total weight of the family is less than three hundred pounds. The wife and mother weighs seventy-five pounds.

THE model husband was seen on a Detroit street car recently. He had a letter written by his wife stuck in his hat band so as to have a sure thing on mailing it. There was not a lady in the car who did not catch on and smile approvingly.

THE meanest man in the world lives in Atchison. He refused to say good morning to the people he met on the streets to-day, giving as an excuse that he was tired of saying good morning to the same people every day of his life .-Atchison Globe.

#### BOOKS AND BOOK WRITERS. George Kennan's "Siberia" will

shortly be published in London. PIERRE LOTI, the new member of the

French academy, has written most of his books on board ship during the long hours of the night.

THE new edition of Ruskin's "Modern Painters," it is said, will bring the author a profit of fully thirty thousand dollars. And yet to publish one's own books is declared to be a foolish plan.

THOMAS A. EDISON is writing his first novel. A telegraph, Atlantic cable, telephone, phonograph, audiphone and kinetograph will figure among the accessories, and the denouement occurs in a thunder shower.

Victor Hugo still sells largely. During the past five years the proceeds from his various works have amounted to 1,483,373 francs, excluding the sale of the Guillaume edition of "Notre Dame" and the "Oeavres inedites."

UNDER an old law making it illegal to shoot at night, a sportsman recently ar-rested in Paris for unlawful killing of game drew from the courts a legal definition of the day's end. It was de-cided that night began with the close of twilight, or when the sun had deseended six degrees below the horizon.

## CONCLUSIONS OF SCIENTISTS.

It has been reckoned that if the whole ocean were dried up, all the water passing away as vapor, the amount of salt remaining would be enough to cover 5,000,000 square miles with a layer one mile thick.

Mr. Mason Kinne, a distinguished scientist of San Francisco, claims that after examining the smallest fragments of inorganic matter, he has discovered traces that lead him to believe that all atoms, animal and vegetable, are male or female, and reproduce their species.

It has been concluded that with a balloon 330 feet long, with a maximum diameter of 55 feet, a speed of 25 or 80 miles an hour can be attained. At the same time it is thought that the problem of flight is more likely to be solved by means of an aeroplane than with a balloon.

MAYER has calculated that, if the motion of the earth were suddenly arrested, the temperature produced would be sufficient to melt and even volatilize-it; while, if it fell into the sun, as much heat would be produced as results from the combustion of 5,000 spheres of carbon the size of our globe.

THOMAS W. KNOX concludes that history has fully established that Capt. Kidd buried no treasure except on Gard-ner's island, and this, amounting, with what he had on board his vessel, to about \$70,000, was secured by the earl of Bellamont, governor of the British colonies in New England.

#### Railroad Lands in Southern Illinois,

The Illinois Central Railroad Company i offering lands at so low a price that it seems absurd to tell what they are capable of producing, yet it is a fact that the crops from apple orchards are yielding from \$300 to \$500 per acre. There are many farmers, fruit growers, who are realizing each year from \$150 to \$500 per acre for their fruit and early vegetables, and some who are realizing \$1000 per acre. These of course are successful men of business, who study how to do it Do you want the same chance to make money? You can have it by going into this country and buying some of the same lands, from the Illinois Central Railroad Company, and by ap-plying the ability you have in a business manner to their improvement and caltivation, you can have in a short time as valuable land as that of a successful fruit grower, on the line of this railroad, who said the other day, "I have brought my land to such a high state of cultivation that no one can buy it from me for \$500 per acre, as I can net \$100 per acre of

it every year.

Most of the lands offered for sale by the Illinois Central Railroad Company can be made to produce the same results. They lie along the line of this railroad at a distance of from 3 to 15 miles, and the country is traversed by many other railroads, thus affording every facility for transportation of early fruits and vegetables to any market that may be selected, fruit express trains being run daily to Chicago, St. Louis, and other points.

Sheep raising is as profitable on the hill lands as in any place in Ohio. Address or call upon E. P. SKENE.

DOMESITO WARE

# Spoons are as Old as Soup" 25

Our talk of domestic ware must begin with Spoons by right of seniority, for the most ancient pieces of English Hall marked plate in existence is a simple spoon.

It would be difficult any time for the last 600 years to find a man of however humble station who had not a spoon or two to bequeath to his widow or son. The will and inventories of the rich mention them in great numbers.
