

VANDENBERG APPOINTED U. S. SENATOR

MAY EXTEND INQUIRY INTO OIL LEASES

LEGISLATORS SHOW INTEREST ON SUBJECT

Washington, Mar. 31-(P)—The investigation into the naval oil leases may be extended by the senate to encompass all oil leases in the public domain and in Indian lands made by Albert B. Fall during his two years of administration of the interior department under President Harding.

Contract Was Renewed

Senator Nye wrote Secretary Work a week ago saying that he had been requested to inquire whether Sinclair's contract had been renewed and the secretary replied today that it was renewed on last February 20.

Mother of Mrs. Coolidge Has Restful Day

Northampton, Mass., Mar. 31-(P)—Mrs. Lemira Goodhue spent a "fairly comfortable day," attendants at the Dickinson hospital said tonight. Her daughter, Mrs. Calvin Coolidge, was able to spend two and a half hours at the bedside in the course of the day, chatting for an hour and a half this morning and returning for an hour's visit in the afternoon.

Road Report

Upper Peninsula roads which are maintained open for wheel traffic this winter are as follows: Federal Highways U. S. 2—Sault Ste. Marie, Pictured Rocks, Escanaba, Marquette, Sault Ste. Marie, Gladstone, Escanaba, Spaulding, Norway, Iron Mountain, U. S. 2 through Wisconsin, double, U. S. 48 and U. S. 100—Crystal Falls, Crystal Falls, Iron River, Watermeet, Wakefield, Bessemer and Ironwood.

Nine Jackson County Rum Ring Members are Sentenced by Judge

Detroit, Mar. 31-(P)—The Jackson county liquor conspiracy case was virtually closed today when Federal Judge Charles C. Simons passed sentences on nine more members of the alleged "rum ring" headed by Warren C. Stoddard, former sheriff. Eighteen now have been sentenced. The sheriff and eight other defendants had been given heavy fines and jail and prison terms Tuesday, following their conviction. The nine sentenced today had pleaded guilty.

FORMER G. A. R. HEAD IS DEAD

Washington L. Gardner was Michigan Congressman

Albion, Mich., Mar. 31-(P)—Washington L. Gardner, former Michigan congressman, past national commander of the Grand Army of the Republic and commissioner of pensions under the Harding administration, is dead at his home here following a heart attack. The Civil War veteran, who had served six terms in congress, had been in ill health since 1921 when he was injured in an automobile accident in Washington. He died at 2:30 a. m. succumbing to a second heart attack after he had rallied from a previous attack last Wednesday. He was 83 years old.

Live Toad Found in Ancient Strata Is Two Years Old

Washington, Mar. 31-(P)—The live toad found recently near Frederick, Okla., in the same clay strata which has yielded relics of the Paeotogene or Glacial age of approximately 300,000 years ago, arrived at the national museum today and after undergoing the careful scrutiny of reptile experts and biologists was pronounced a perfect specimen of a two year old western toad.

OHIO POLITICAL FIGHT WILL GO FORWARD

DEATH OF WILLIS TO MAKE NO DIFFERENCE

Columbus, O., Mar. 31-(P)—Although a temporary truce has been called in the Ohio contest for presidential delegates between Senator Frank B. Willis' supporters and those of Secretary of Commerce Herbert Hoover because of Mr. Willis' sudden death at Delaware last night, the fight will go on unabated, Carmel A. Thompson, manager of the Willis campaign, declared tonight.

Girl Who Killed Former Employer Pleads Self-Defense

St. Joseph, Mo., Mar. 31-(P)—Miss Marguerita Baumgauch, 32, of Warsaw, Ind., who shot and fatally wounded her former employer, W. H. Cook, basket manufacturer, at Niles yesterday, will plead self defense.

Labor Troubles Are Blamed for Bombing in New York City

New York, Mar. 31-(P)—A bomb explosion in a 17-story building attributed by the police to labor troubles in the garment industry, today caused known injuries, none serious, to seven workers and wrecked the top of three floors. Other workers and some pedestrians were treated at drug stores of cuts received from the window glass which showered into the street.

Quake in Smyrna Kills 25; Many Others Injured

London, Mar. 31-(P)—A special dispatch to the London Sunday Express from Smyrna reports that the earthquake there today caused twenty-five or more deaths and the injury of about four score other persons.

German Plane May Start on Atlantic Hop Monday A. M.

Baldonne Airdrome, Irish Free State, Mar. 31-(P)—If Atlantic ocean conditions justify, a start of the German airplane, Bremen, can be attempted Monday morning. This conclusion was reached tonight by authorities of the Irish Free State air force as the result of a day of bright sunshine and wind which rapidly dried the field here.

CITY MOURNS WILLIS' DEATH

Body of Ohio Senator to Lie in State in University

Delaware, O., Mar. 31-(P)—The town that acclaimed Senator Frank B. Willis last night as its favorite son candidate for the Republican presidential nomination was in mourning tonight, hardly recovered from the shock of his death a few minutes before he was to deliver a campaign speech.

Prince of Wales Breaks Record; Scores 3 "Falls"

Bromsgrove Worcestershire, England, Mar. 31-(P)—Setting a new high record for royalty the world over to shoot at, the Prince of Wales "scored" three falls in the Harkaway club race meeting today, but was wildly cheered for his pluck, anyway.

Lindy Lands at Tulsa, Oklahoma

Tulsa, Okla., Mar. 31-(P)—Col. Charles A. Lindbergh arrived here this evening from St. Louis on his flight to San Diego. He landed at 6:45 p. m.

ALBERT FALL ENDS DIRECT EXAMINATION

FORMER SECRETARY SUMS UP ENERGY FOR QUESTIONING

El Paso, Tex., Mar. 31-(P)—Finishing up on direct examination his testimony that the leasing of Teapot Dome naval oil reserve to Harry F. Sinclair was conducted above board, untinted with bribery, Albert B. Fall today summoned strength for a grilling at the hands of Alton Pomerene, special government prosecutor in the oil case.

Truce Between Operators and Miners' Unions Comes to End

Chicago, Mar. 31-(P)—The last day of the truce in the union bituminous coal fields found the situation one of conflicting possibilities.

Hughes Declines to Be Chairman of G. O. P. Meeting

New York, Mar. 31-(P)—Charles E. Hughes has definitely declined to serve as temporary chairman of the Republican national convention at Kansas City, William M. Butler, chairman of the national committee, announced today.

Charles Hilton Dies at Detroit

Detroit, Mar. 31-(P)—Charles E. Hilton, financier, clubman and patron of arts, died at a hospital here following an illness of several weeks. He was 58 years old.

TO FILL VACANCY

ARTHUR H. VANDENBERG

MINE SITUATION IS CONFLICTING

Chicago, Mar. 31-(P)—The last day of the truce in the union bituminous coal fields found the situation one of conflicting possibilities.

Byrd to Have Aid of Gov't Experts to Test His Radio

Washington, Mar. 31-(P)—Commander Richard Byrd is completing arrangements with navy officials here for tests of the radio apparatus with which he hopes to keep in communication with the outside world on his forthcoming expedition to the South Pole.

Man Held for Shooting His Two Children

Detroit, Mar. 31-(P)—Police tonight were holding John Billicky, a street conductor, in connection with the shooting today of his 8-year-old son and his 4-year-old daughter. The boy was shot in the right arm, and his sister was wounded in the left leg.

Two Killed When Train Hits Auto

Ypsilanti, Mich., Mar. 31-(P)—Warren F. Lane, 16, was killed and Louis Wessner, 25, suffered fatal injuries late today when their automobile was struck at the Cogswell road crossing, west of Wayne, by a westbound Michigan Central passenger train. Both lived in Detroit.

GRAND RAPIDS MAN TO FILL FERRIS' TERM

PLANS TO BE REPUBLICAN CANDIDATE THIS FALL

Lansing, Mar. 31-(P)—Arthur H. Vandenberg of Grand Rapids, editor and author, is Michigan's new U. S. senator. His appointment to succeed the late Senator Woodbridge N. Ferris, who died March 23, was formally announced today by Gov. Fred W. Green and the editor, at Grand Rapids, accepted.

Confidence Between Men

Vandenberg expressed profound gratitude to Governor Green "for his generous confidence in a situation that has been difficult and perplexing."

FIVE PUBLISHERS

Washington, Mar. 31-(P)—With the appointment of Arthur H. Vandenberg of Grand Rapids, as senator to succeed the late Woodbridge N. Ferris of Michigan, the number of newspaper publishers holding senate seats was increased to five.

WEATHER

UPPER AND LOWER MICHIGAN—Partly cloudy to cloudy Sunday and Monday; slightly warmer Sunday. Weather Outlook for the Week: Region of the Great Lakes—Temperatures mostly above normal first part of week, followed by colder toward close; probably one or two precipitation periods.

'ELECTRIC ICE' HOUSEHOLD AID

Boston Expert Tells Advantages of Modern Refrigeration

BY MARTHA LANE
(In the Boston American)

Remember the hot day last summer when you wanted to take the children for a swim but didn't dare to 'till the ice man came? Remember the food you gave away to the neighbors before starting on that four-day trip, because you knew it would all spoil in the ice chest before you would get home? Remember how the ice chest drain pipe smelled every time you had to clean it out? (It proved so conclusively that there must have been germ life present.) And remember the anathemas you have breathed while cleaning up the ice gentlemen's footprints on the floor of hall or kitchen?

The answers to these questions are just a few of the answers to "Why an Electric Refrigerator This Year?"

Time was when an electrified ice-box was a luxury beyond the means of the average purse—may be you have the impression that it still is. Not so. It would take me just about two shakes of a lamb's tail to show you on paper how you can have a cooling unit installed in your present ice-box and enjoy all the comforts and conveniences of electrical refrigeration at no more than your usual monthly ice bill.

Money Melts Away.

I don't know of anything more aggravating in the world than to watch money melt away from a refrigerator, do you? And no matter how carefully we watch and plan, every so often it disappears about sixteen times faster than we had calculated; result—expensive food spoilage and more inconvenience. Then too, the offensive odor left in the chest after one of these disappearing acts raises the question in our minds whether anything that left so disagreeable a trail could have been safe for our drinking water? There's always the lurking danger of ice from contaminated ponds and germs acquired while the ice is in transit through dirty streets and often in a none too clean wagon.

As I've said before, I'm not unappreciative of the good friend that the faithful ice man has been to us in the past—but I do believe that before very long, for most of us, he will be as dim a memory as the kerosene lamp, the back-yard pump and the horse and buggy.

Of course it is a fact that the initial cost of an electrical refrigerator, including box and cooling unit, is greater than that of an old-fashioned ice chest—but a furnace costs more than a stove, and an automobile more than a horse and buggy. This hasn't kept the stove and the horse and buggy in use, though, has it?

Keeping Step.

All the histories of modern housekeeping methods show that if there is a better way, the American housewife wants it—and elec-

tric refrigeration is without question the better, safer way for preserving foods in the home. It is as dependable and trouble-free as your electric lights. It is entirely automatic. It keeps your refrigerator at the zone of safety—ten degrees lower than any cold that ice can create. It creates a dry cold that preserves perishable foods weeks and months without deterioration. It will make pure, clean ice cubes for table use, as well as delicious frozen desserts, without the mess of ice and salt and the elbow grease and back-breaking effort of turning the crank. It is not an experiment. I know of one electric refrigerator that has been in active service for ten years, and could be sold today for at least half of its original cost. I know of another that has been working four years without a call on the service man.

And these are not rare instances. Literally, thousands of homes, stores and apartment houses enjoy electrical refrigeration 365 days in the year. The wise landlord is equipping his properties with these modern cooling systems, realizing that a house or apartment that depends on ice for the preservation of food will be more difficult to rent.

Starts Itself.

Some day I am going to try to explain the mechanical mysteries of these wonder workers—even to the thermostat that saves so much electricity for you. Your electrical refrigerator will not keep the wheels of your electric meter going 'round all the time, you know. No indeed. The busy little thermostat will automatically shut off the power when your box reaches the proper degree of coldness. Then, when you start getting dinner and have the doors open frequently and the temperature goes up a little bit, the thermostat turns the power on again for you. You are really using power about a quarter of the time.

John Erickson Is Named Executive

John Erickson, associated for many years with the Ed Erickson company, has been appointed assistant manager of the Lauerman Brothers store. Mr. Erickson has had wide experience in this field and is thoroughly familiar with local conditions.

Eugene Caufield arrived from Chicago Saturday morning, having been called by the critical illness of his wife who was removed from the hospital to the home of her mother, Mrs. Mary Shy, last night.

CITY BRIEFS

Mr. and Mrs. Henry Moras, Mrs. William McDonald, Mrs. Louis Hart, Mrs. Eugene Hamelin and George Trudeau have returned from Manistiquette where they attended the funeral of their aunt Mrs. G. Gournaya.

Henry Jubian of Detroit arrived in the city yesterday for a few days visit with relatives and friends.

Matt Gleason of Negaunee visited here yesterday having been called by the illness of his mother-in-law.

An eleven-pound son was born to Mr. and Mrs. Gabriel Carlson at their home 1103 Stephenson Ave. Saturday. Mother and son are doing nicely.

Byron McCarthy of Detroit is visiting his mother, South Eighth street.

Mrs. E. Scheel left yesterday for her home at Narenta.

John Simon representing the Western Weighing Association left last night for Chicago after a business trip in the city.

Miss Lucile Foster left last night for a visit at Chicago.

Mrs. James Fisher of Ishpeming visited her parents, Mr. and Mrs. John Rubens, South Thirteenth street yesterday.

Mrs. Percy H. Miller and two sons left yesterday for a visit with relatives at Pensaukee and Menominee.

Mr. and Mrs. Fallmer Olson and daughter Rosemary left yesterday for a visit at Dagget.

Miss Mollie Gaffney is spending the week-end at Milwaukee.

Mr. and Mrs. Robert Cass left last night for a visit at Milwaukee and Chicago.

William Harding returned to his home at Marinette after a visit at the home of Mr. and Mrs. Joseph Poquette.

Mrs. Emil Luncour left last night for Detroit where she will visit relatives for a few days and will bring her little-niece, Baby Lorraine Therese Nadeau to her home here. The baby will be reared by Mrs. Luncour, her mother Mrs. Oscar Nadeau, Jr. was buried here last week.

Mrs. Reynold Gustafson has returned from a week-end visit at Milwaukee.

Herman Dittrich of Chicago is visiting with relatives at Ford River Switch.

Mrs. Frank Meunier left yesterday for a week-end visit at Peshigo where she will attend confirmation services at the Peshtigo church, a brother-in-law, being a member of the class.

Miss Florence Dittrich left Saturday for a visit at Chicago.

Jake Bink, Carl Sawyer, Al Molers, W. Steinhauer and Earl Taylor have returned from a bowling trip at Kansas City, Mo. They visited at Chicago enroute to this city. Win Schultes stopped at Green Bay to visit his mother before returning to this city.

Mr. and Mrs. Michael Hulsizer left Saturday for a visit at the home of relatives at Stephenson, Mich.

Mrs. Charles Dumas and son Victor of Powers have returned to their home after a shopping trip to this city.

T. Merkoris of Green Bay has returned to his home after a visit with friends in this city.

Mr. and Mrs. William Viau left Saturday for Carney where they will visit relatives over the week-end.

Mrs. Lena Guntly of Rock was a visitor in the city Saturday while on a shopping trip.

Mrs. Allen Tyrell of Brampton was a caller in the city yesterday.

Mr. and Mrs. C. M. Thatcher returned yesterday from an extended visit at various points in Florida.

M. Perron returned from Chicago yesterday where he transacted business.

Mr. and Mrs. Peter Nelson of Little Lake were visitors in the city yesterday.

Mrs. Alfred Derocher left yesterday for a visit with relatives at Chicago and Milwaukee.

Mr. and Mrs. Fred Caisse, who have spent the winter in Escanaba, will leave this week for the Uno hotel and resort at Uno Lake, to begin preparations for the opening of the resort season.

Promising Pirate Rookie

One of the most promising youngsters uncovered by Pittsburgh this year is Fred Fussell, pitcher with Wichita Falls in the Texas League last year.

Mrs. Casper Olson, Mrs. Erick Olson, Mrs. Erick Carlson and Mrs. Dulph Ayotte.

Pythian Sisters Dance.

The Pythian Sisters are sponsoring an Easter ball to be given at the Elks' clubrooms Wednesday evening, April 3. Tickets are now on sale and music will be furnished by the Blue Aces.

Mrs. Casper Olson, Mrs. Erick Olson, Mrs. Erick Carlson and Mrs. Dulph Ayotte.

OBITUARY

MRS. EMMA HALL.

The body of Mrs. Emma Hall was removed from the Anderson Funeral Home to the church at Perkins Saturday morning where funeral services were held Saturday afternoon at 2 o'clock, with Rev. C. E. Olsson of Gladstone officiating.

Many beautiful flowers surrounded the casket of the woman who had been a resident of that vicinity for more than forty years.

Burial was in Perkins cemetery. The pallbearers were five sons and one son-in-law: Edward, Charles, Mannie, Bennie and Titus, and Ed Day.

The following out-of-town relatives and friends were present: Ole Anderson, of Chicago; Mrs. Charles Welch, Minneapolis; Mrs. J. Anderson and Mrs. J. Louis, Gladstone; Nelson Hall, Mr. and Mrs. Bert Peterson and Mr. and Mrs. Oliver Peterson of Isabella; Mr. and Mrs. Ed Day and Ella and Earl Day, Mr. and Mrs. John Hall, Mrs. Jennie Hall, Mr. and Mrs. George Besson, Mrs. A. Arntzen.

a Successful Six now winning Even Greater Success

The Sport Landau Sedan • • Body by Fisher

Nowhere Else Such Features for \$745

When you actually learn what the New Series Pontiac Six offers you for a base price of only \$745, it's easy to understand the sensational success it is enjoying.

At the right is listed a group of advancements in design which never before have been combined in any low-priced six! Some of them—such as the G-M-R cylinder head and the cross-flow radiator—rank as master strokes of engineering. Yet these are only the new features that have been added to the basic design which enabled the Pontiac Six to make automobile history in the past two years!

You still get the largest engine used in any low-priced six. You still get the long life assured by an oiling system which forces 250 gallons an hour through the engine at 35 m.p.h. You still get the ability to maintain 50 miles an hour or more for as long as you like. Come in! Learn by comparison and by driving that you get the biggest, staunchest, most beautiful low-priced six the market affords today.

NEW SERIES

Progress demanded that we retire this 13-year-old truck from the tank service, but it's still doing its daily dozen as a gravel truck—

Because It Used Nothing But

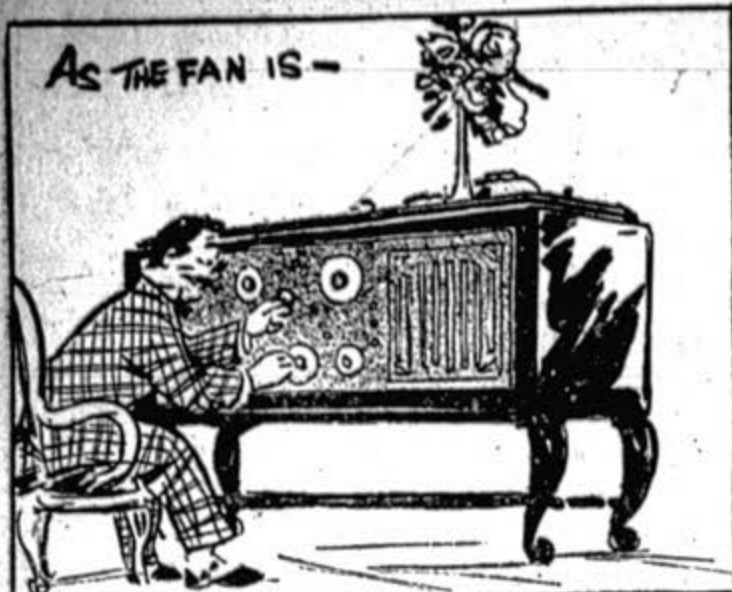

Quality Oils and Quality Gasoline

Many folks will take their car out for the first ride of the season, today or sometime this month. Right at the start of the season is the time to give serious thought to proper lubrication and ideal motive power. There are hundreds of reasons that we could present in behalf of Quality Oils and QUALITY Gasoline, but we believe that our former tank truck (pictured above) is the most convincing argument of all. This truck operated in our service as a gasoline and oil carrier for twelve years. This year, not because of disability but because of the demands of progress, we put a new tank truck in service. However, the old boy is still seeing active service as a gravel truck and we are firmly convinced that its longevity was due largely to proper lubrication and the consumption of proper motor fuels—which, of course, were QUALITY OILS and QUALITY GASOLINE.

Carnegie Library Notes

The Carnegie Public Library received this week over fifty books which are of special interest to boys. These have not been catalogued but will be put into circulation within a few days. There are four well-illustrated volumes, entitled "The Boy Mechanic." This library is published by the Popular Mechanics Press and contains directions for making boats, wireless outfits, kites, camp equipment, and hundreds of interesting things. Over forty volumes, about twenty-five titles, of "Everyboy's Library" were received. These books are approved by the library commission of the Boy Scouts of America and the following are some of the titles included:

Althier: Last of the Chiefs.
Bullen: Cruise of the Cachelot.
Dugmore: Adventures in Beaver Stream Camp.
Barbour: The Half-back.
Quirk: Baby Elton Quarter-back.
Gauss: Through College on Nothing a Year.

Wallace: Grit A-Plenty.
"Outdoor Sports, the Year Round" contains 225 clearly written and concise articles on how to make equipment for new and popular sports.

Popular Mechanics Boat Book tells how to build rowboats, canoes, motorboats, etc., and gives information on painting and calking hulls, laying up for winter, etc. It contains many illustrations.

Of interest to parents is a small volume by Charles Anderson Aldrich, M. D., entitled, "Cultivating the Child's Appetite." The preface states: "Much has been said about what children should eat. It is felt that a start should be made on the subject of how to get them to eat what we thing they should."

"The Earth Upsets" is a volume of interest to citizens of Michigan as its author, Chase S. Osborn, is a former governor of the state. The theory which is set forth in this work is that the earth ball is turning over from pole to pole at the rate of about a mile a year and that it turns over completely once in 24,000 years. The theory as set forth in the book has not been proven. The author in his preface states that this does not pretend to be a scientific book. He says, however, that the book has the merit of pioneering, that he believes there is a motion of the earth, perhaps more than one, that has not been recognized by anyone up to the present time.

Illustrations by Frederick Remington add much interest to "The Book of the American Indian," by Hamlin Garland.

Manners, by Helen Hathaway, is a new addition to books on the subject of etiquette.

One hundred and fifteen books were circulated from the station at the Webster school Thursday afternoon.

Knights of Columbus Give Escanaba Fine Publicity

Sessions of the Michigan state convention of the Knights of Columbus will open on Monday, June 18, and will be concluded on June 19, it has been officially announced by Deputy Frank J. E. O'Hara of Port Huron. The exemplification of the Fourth Degree will be held Sunday, June 17.

James Frenn, general chairman of the local convention committee, has been making rapid progress in the preparations for the event. Every council in the upper peninsula will contribute, in some way, to the gathering. Primarily a clone of third degree knights, the state convention for several years has been marked also by the exemplification of the fourth degree. Dr. F. O. Logic, of Iron Mountain, president of the Upper Peninsula Fourth Degree association, has reported that the 13 councils of the district will furnish 125 candidates for the fourth degree. Martin E. Galvin, of Detroit, accompanied by members of his official staff, will exemplify the fourth degree.

with the thousands of aggressive, progressive knights of that great woods, the rivers and the lakes and the mines of northern Michigan. And many of them do not snow of the great expanses of territory in between, the vast domains of lower Michigan.

"Upper Michigan invites the lower state tourists to come north by train, boat or motor and get acquainted. The convention offers a splendid occasion for making the trip. Escanaba council is making the greatest of preparations. There can be confidently expected such a welcome as has never been excelled in the history of state Columbianism.

"The sister councils of northern Michigan join in the invitation and in the preparations. They want as many as possible to visit them. So plan now to attend the convention. Plan to drive north if possible, because in this way the most can be gained from the trip, the beautiful scenery of both peninsulas, the fine towns and the fine people.

"Detailed plans of the convention will be announced from time to time in The Michigan Councillor, as they are completed by the Escanaba committees and there will be plenty of attraction contained in them.

"Red Shoes For Luck" Is Slogan

London—Mayfair society has reverted to folk lore as the basis for novelties. Red shoes and slippers are the thing just now. For birthdays, anniversaries of various kinds and other occasions where gifts are desired, old time superstitions have been dug out of the moldy past and given a nice colorful touch of modernism.

"Red shoes for luck," is the Mayfair slogan.

In the days of old the present of a pair of shoes, of any color, or some trinket in the form of shoes, was universally considered to imply the wish for a happy and prosperous journey along life's pathway.

It was a common practice for a pair of "charm" shoes wrought in wood, brass and sometimes even in gold, to be hung up near the fireplace to ensure happiness of the home.

These trinkets have reappeared in the novelty shops, and are the vogue, being as popular here as was the Teddy Bear in America when Theodore Roosevelt was in the White House.

Maine has provided for the establishment and management of town forests and Wisconsin has made similar provision for county forests.

COLLEGE SHEEP NOW A WRECK

Tragedy Stalks on Campus at Cornell University.

Ithaca, N. Y. (AP)—Horace, the game old wether of Cornell University, has had a nervous breakdown—a synthetic one, so to speak, for it was produced at the will of a physiologist.

Dr. Howard S. Liddell of the Cornell physiological field station, who is studying conditioned-motor reflexes in animals, upset the balance in the sheep's brain by over-taxing his habit-forming ability, and the result was that Horace became a neurotic. A long rest reconditioned him, however, and he is ready for further contributions to science.

The object of Dr. Liddell's painless experiments with Horace is to substitute the theory of Dr. I. P. Pavlov, celebrated Russian physiologist, that the brain of an animal is only a storehouse for reflex actions in which definitely localized processes of excitation and inhibition are delicately balanced. Positive response, or action, is regarded by Dr. Pavlov as the result of excitation, and negative response or inaction, is considered the corollary of inhibition.

These abstractions were tested on Horace in a very practical way. He was placed on a table in a quiet room where no distractions could divert his attention. Fastened to one leg were two thin wires. In the next room, out of the animal's sight, Dr. Liddell started a metronome, causing it to beat once a second. Every sixth second he sent a weak electric current through the wires. The prick of the charge caused the wether to lift the leg.

After this experiment had been repeated many times Horace moved the leg immediately after the sixth stroke, which always brought the shock. This was the conditioned reflex sought by Dr. Liddell. Horace's nervous system was automatically responding to the combined excitation of the tick of the instrument and the delayed urge of the current. But his brain was still preserving the balance between action and inaction.

The animal's breakdown came when the physiologist attempted to hasten the formation of the leg-lifting habit by doubling the daily number of experiments. Horace's power to control his re-

sponse to the metronome disappeared, and he would lift the leg on each beat, apparently being in a highly excited state.

The sheep was then given a month's vacation. During that interval his mental equilibrium was restored and when the experiments were resumed he was back at his old trick of lifting his leg at the completion of the fifth beat, without waiting for the shock that marked the sixth.

Although Dr. Liddell is not ready to draw any lessons for human beings from his observations of the sheep's behavior, he believes that what is popular called nervous breakdown due to over-work seems similar in every way to these experimentally produced nervous disturbances.

"It may be," he says, "that neurasthenia and hysteria are disturbances of this nature; in other words, unusual situations that upset the brain balance."

Nobleman Gives Fisherman's Prayer

Loeds, Eng.—Viscount Grey of Fallodon, former foreign minister, who is a noted angler, listened gleefully to a fishing yarn which Alderman Leslie Owen let off at a public ceremony here and then recommended to all fishermen the following prayer: "God grant that I may catch a fish so big that even I, in telling of it afterwards, may have no need to lie."

LEG FOILS HOLDUP.
Tampa, Fla.—A one-legged man has little chance in the holdup game. One of them tried it on H. R. Lewis here, but he was knocked unconscious for his trouble. After Lewis had given up his money the one-legged man started to run away. The victim, being dissatisfied with the bargain, picked up a club and followed. When police arrived, "Peggy" was out for the count and Lewis had retrieved his cash.

Talks on Health

By Dr. Morris Fishbein

SHORTNESS OF BREATH IS SERIOUS SYMPTOM

A person may be short of breath as a result of many different conditions. In some cases of exophthalmic goiter the chemical changes that go on in the body take place so rapidly and are so much overstimulated that they are from 50 to 100 per cent above normal.

Such people are not likely to be short of breath when resting, but the extra demand placed upon the lung is likely to make them short of breath when they do any work. They have to liberate an excessive amount of energy to get anything done and as a result are forced to breathe rapidly to get sufficient lung ventilation.

Chemical changes in some cases of kidney disease chemical changes take place in blood because the kidney is unable to get rid of acid substances

as it does in health. Therefore, the mechanism that controls breathing is stimulated and the person may show definite signs of shortness of breath. The increased breathing is an attempt to restore the normal reaction of the blood by getting rid of carbon dioxide. In the same way, any substances that may give rise to excessive amounts of acid in the body may bring about shortness of breath, this being particularly the case in diabetes when abnormal acids are formed by inability to use up fats and sugars in the body.

Such people breathe at first slowly and easily, but increase their pulmonary ventilation so much that actually they are short of breath and suffer with air hunger.

Shallow Breathing In some nervous diseases the breathing is shallow and the insufficient ventilation of the lung

results in shortness of breath. Heart disease particularly can cause shortness of breath because the heart is unable to force sufficient amounts of blood into the tissues to take care of their requirements. The lungs are unable to eliminate a sufficient amount of carbon dioxide. The blood vessels of the lung become congested and interfere with the aeration of the lungs.

As may be suggested by these facts, shortness of breath on any exertion is likely to be a serious symptom and should be given careful attention.

Day after day it becomes more apparent that the unrivaled popularity of the Bigger and Better Chevrolet is due to its basic elements of superiority. And the greatest factor of all is the effortless driving it provides. It steers with the weight of the hand—for the worm and gear steering mechanism is fitted with ball bearings throughout... even at the front axle

knuckles. The clutch is velvety smooth in action and the gear-shift lever responds to the lightest touch. Acceleration is swift and certain, while big non-locking four-wheel brakes assure perfect control under every condition of highway and traffic.

You'll never know what a great car it is until you sit at the wheel and drive! So come in today for a demonstration!

CAUTION
Should Be Learned From the Misfortunes of Others.

Sure! It ought to be—but isn't. You drive along and everything is all right as long as it is all right. The road narrows, the shoulders are narrow and slippery and sloping. You need at least half of the road but you don't get it. Result: A bent fender, a broken running board and maybe more—wife and kids scared half to death.

Both cars damaged and who's going to pay the repair bills? Who, unless the cars were insured!

Where like wise, WHO is the "careful driver" that can say for a certainty he has never had an accident and never will? Remember, there's always a first time, ALWAYS A FIRST TIME.

For your own peace of mind and to make your banker consider you a better risk, insure against the many hazards of the car Owner.

SERVICE FOR HOME-OWNER AND BUILDER

HERE'S EASY WAY FOR REINFORCING WALLBOARD JOINTS

Wallboard has come to occupy a pretty important place in the home-builders' and home-owners' lexicon. Hundreds of millions of feet of this used annually, which testifies to the virtue of wallboard as a construction material. There is, too, a choice of wallboards—that is, a choice of wallboards made from different materials. Some wallboards, for example, are made of pulp; some from rock, and so on. Now, wallboard, as first manufactured, seemed to demand paneling over it to hide the joints between the boards, for the effect of the weather and other things caused the individual boards to shrink or expand, and thus the seams became noticeable even through the decorative material. When the rock wallboard came in, paneling became largely unnecessary, because the rock character of the boards eliminated warping and buckling due to weather changes.

Use Reinforcing System
Put to eliminate any possibility of unsightly cracks in the joints between rock wallboards a simple reinforcing system has been devised that the home-owner or home-builder can follow to his profit. This reinforcing system makes use of nothing more than a tough cement and a strong reinforcing fabric.

Here is a simple explanation of the way the reinforcing system is used. After two of the rock wallboards, say, are nailed in place, the joint between them is liberally "battered" with the strong cement. Then the reinforcing fabric is pressed lightly down the joint. At this point the reinforcing virtually is completed for all that remains to be done is to run a semi-flexible knife down the joint with sufficient pressure to force the cement up through the mesh in the fabric.

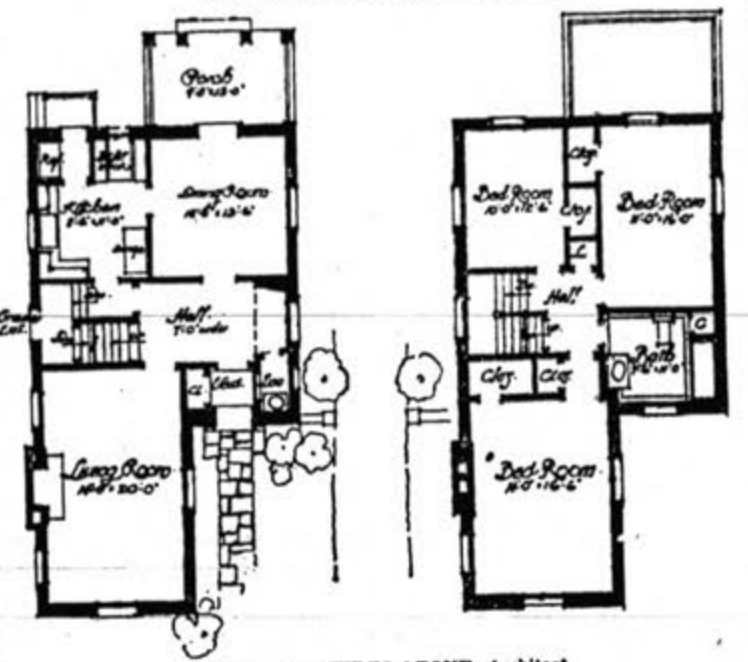

This completes the reinforcing. And the net result is that the joint is reinforced very much on the same principle that concrete is reinforced by steel, the fabric serving as the reinforcing material and the cement taking the place of the concrete.

Nail Heads Should Be "Spotted"
And here is another good thing to do in order to obtain the best results through the use of wallboard—that is, where a rock wallboard is being used: "Spot" the nailheads with the cement used in the reinforcing. This "spotting" will protect the decorative material you apply over the wallboard at the point where the decorative material would come in contact with the nailheads.

Wallboard, by the way, generally is manufactured to be nailed on 16-inch centers and can be obtained in various heights to fit the space between the floor and the ceiling in any room. Rock wallboards being incombustible have several other uses in addition to that of a wall and ceiling finish. For example, they often are used to provide a fireproof lining inside a garage. They also are used for fireproofing over heating plants and enclosing storage and furnace rooms.

Plan 121—Copyright by Audio Service, Chicago.
TYPICAL RESIDENCE OF FRENCH CITIES

Designed by AMEDEO LEONE, Architect, Detroit, Michigan.

The "very French" residence shown here is ideally adapted for a suburban residence street where the houses are of somewhat a formal character, or is equally suited to a large lot, where the house can be well set back from the street. In the cities of France you will find many residences of this architectural style.

Should the lot on which this house is built be narrow, the driveway shown at the right of the picture need not be included, but the driveway adds a great deal to the character of the house, enhancing, as it does, the air of spaciousness and dignity.

CONSTRUCTION: Can be of any approved system; brick, concrete or fire protected and insulated wood frame.

ANSWERS TO QUERIES ON HOME PROBLEMS

Question: Is it true that gypsum plaster bonds tighter to plasterboard than to any other type of lath?
Answer: Tests by high agencies have established this fact. What actually happens is that gypsum plaster knits to the gypsum core of the plasterboard.

Question: What is the proper spacing for wood lath?
Answer: Wood lath should be spaced a quarter of an inch apart. And the lath should not be too dry and should be free of bark and pitchy stain.

Question: Can gum wood used for interior trim be given a walnut stain satisfactorily?
Answer: Usually, it also can be given a mahogany stain. Be sure that the wood and the interior of your home are perfectly dry before the stain is applied.

Question: Does plastic paint require painting over?
Answer: Not necessarily. In applying plastic paint the color is mixed in before application, or may be included in a glaze finish coat. To redecorate a plastic paint wall, ordinary paint may be used.

Question: We would like to build a Dutch Colonial home, but friends tell us that the upstairs rooms are sure to be dark and poorly ventilated. Is it necessarily true?
Answer: Not necessarily, but likely. It is true of most of the original Dutch houses. It requires careful planning by a sensitive architect to introduce secondary gables or dormers and not destroy the character of the style.

MARKET NEWS

STOCK MARKET IS NERVOUS

Table with columns: Date, Industrials, Railroads. Rows: Saturday, Friday, Week ago, Year ago, High 1928, Low 1928.

New York, Mar. 31.—(AP)—Vivid contrasts were drawn in the stock market today, the most active and one of the most bewildering of all Saturday sessions in the history of the exchange.

The first hour was largely another bull market until profit-taking and bear selling attacked Radio, one of the recent bell-wethers and drove it down as much as 4 points between sales until it had reached the day's bottom at 185, a loss of 10 points.

There was nothing in the day's news to inspire operations in either direction, and speculative sentiment appeared widely diffused.

General Motors likewise was heavily hammered after an early advance of nearly 3 points to 184 7/8, and tumbled down to 187 at the close for a net loss of 5.

Wright Aeroplane, although reaching a new top of 99 3/4, was unable to weather a storm of selling, and plunged to 93 for a net loss of 5 1/4.

Trails were quiet with the exception of another burst of strength in the new St. Paul common, which closed at its record high of 35, up 1 1/4 on the day.

Chicago, Mar. 31.—(AP)—Hogs, receipts 6,000; market uneven, light, steady to weak; heavy butchers strong; spots the higher in comparison with Friday's average top.

Chicago, Mar. 31.—(AP)—Potatoes, receipts 141 cars on track 494; total United States shipments 543 cars; demand and movement on new stock moderate; market steady.

Table with columns: WHEAT, CORN, OATS, RYE. Rows: March, May, July, Sept. Columns: OPEN, HIGH, LOW, CLOSE.

IN NEW YORK

New York.—See-sawing up and down Manhattan Isle, I met Harold Bell Wright's little boy, in the Algonquin lobby. . . . George started out to be a cowboy, but wound up by being an actor.

At the Literary Guild birthday party I beheld such fountainheads of the literati as Zona Gale, Ellnor Wylie, Carl Van Doren and Joseph Woods Krutch taking orders from newspaper camera men.

Which reminds me that the gipsy fortune tellers of the lower East Side are packing their ransing bugies and making ready for the open road. Already several camps are starting south.

And yet, whatever their income, when the first spring winds blow, they're off and away to the open road.

Chicago, Mar. 31.—Liberal offerings of butter today resulted in declines on all grades.

Chicago, Mar. 31.—Active speculative buying lifted the wheat market today to the topmost points which deferred deliveries have reached yet this season.

Chicago, Mar. 31.—(AP)—Wheat, receipts 141 cars on track 494; total United States shipments 543 cars; demand and movement on new stock moderate; market steady.

CITY PROSPEROUS FIGURES SHOW

Employment Conditions Here Excellent, Compared With Others

Escanaba, with a population of 15,000 and 2,550 industrial employees earning \$4,100,000 annually, is a more prosperous and substantial industrial center than some of the largest and most important cities of the country, figures compiled by Secretary C. I. Bandeden of the Chamber of Commerce.

Escanaba has 190 industrial employees per 1,000 population; Chicago has 140; Milwaukee has 184; Cincinnati has 184; Indianapolis has 153; Detroit has 165.

Escanaba's industrial payroll is \$373,000 per 1,000 population—very much higher than the cities enumerated above, and surpassed in Michigan only by Flint, which is strictly an industrial community.

The following tables will prove illuminating to those who have an idea that this community is not prospering and progressing industrially:

City	Population	Industrial Employees	Industrial Payroll
Flint	257,000	257	\$414,000
Holland	229,000	229	225,000
Lansing	218,000	218	244,000
Jackson	200,000	200	227,000
ESCANABA	15,000	2,550	273,000
Milwaukee	184,000	184	194,000
Cincinnati	184,000	184	171,000
Detroit	174,000	174	246,000
Indianapolis	165,000	153	166,000
Buffalo	149,000	149	188,000
Chicago	149,000	149	187,000
St. Louis	140,000	140	141,000
Boston	117,000	117	128,000
Omaha	110,000	110	141,000
San Francisco	95,000	95	117,000
Ann Arbor	80,000	80	106,000
Los Angeles	71,000	71	95,000
Kansas City	68,000	68	73,000
New Orleans	68,000	68	63,000
Lexington	28,000	28	29,000

The foregoing statistics, Mr. Bandeden explains in his Chamber of Commerce news letter, were compiled from tables published by the United States Department of Commerce. In the case of Escanaba, the table includes as wage earners, the employees of the Chicago & Northwestern, the Chicago, Milwaukee & St. Paul and the Escanaba & Lake Superior railroads, the employees of the I. Stephenson Co. Trustees, the Delta Chemical & Iron company, the Escanaba Paper company and Bichler Brothers. The population of Escanaba, however, is placed at 15,000 instead of the 13,163, the official figure at the last government census. The 15,000

"Les Miserables" Will be Delft's Feature Monday

TODAY'S PROGRAMS.
At the Delft: Phyllis Haver, Tom Moore, Jacqueline Logan and Joseph Striker in "The Wise Wife."
At the Strand: Tom Tyler in an action drama, "The Cherokee Kid."

"Les Miserables," the Universal film version of Victor Hugo's famous novel, will be shown at the Delft theatre Monday and Tuesday. The picture is said to have taken years to produce and its cost ran into millions.

Many of the scenes of the French super picture were taken on the exact locations indicated by Victor Hugo in the novel. This entailed the necessity of reconstructing the main streets of the towns and villages in which the action takes place, to appear as they did a century ago. So intense was the interest of the French nation in the success of the gigantic motion picture enterprise that permission was readily granted by town authorities so that the reconstructors might do their work unhampered, even to the extent, in one case, of taking up a section of pavement and laying cobble stones.

The streets of Paris could not of course, be reconstructed, but massive sets were built that are said to be remarkable for their fidelity to the period represented.

Leading actors from the French stage were engaged to portray the characters created by Hugo, Gabriel Gabrio appearing as Jean Valjean. The other principal roles are enacted by players of equal note and the extra players, all in period dress, number thousands.

In the finished film, as exhibited throughout France, there were more than six thousand separate scenes. So long was the complete picture that it was exhibited in a series of five showings.

Universal has reduced the picture to feature length, leaving out many of the side excursions so dear to the heart of the French and leaving only the highly dramatic substance of the story of Jean Valjean. According to reviewers in the several cities in which the picture has been shown in its present length, a gripping story unfolds on the screen in an astonishing succession of "big scenes."

Among other things, a glittering fashion review is promised to those who visit the Strand Monday and Tuesday, when "Say It With Diamonds," Betty Compton's latest production, will be the feature attraction. Betty has always been recognized, both on the screen and off, as a model of fashion, and in this picture she has one of the best opportunities of her career to display a wide variety of the latest creations from the boulevards of Paris.

Betty, however, who will, perhaps, be the most dazzling model on display in this story, will be amply supported by Jocelyn Lee and Betty Baker, two popular young actresses, who will be seen in supporting roles. Armand Kalle, will make his own contribution to the sartorial parade.

The modes displayed in the sophisticated comedy, moreover, will not be limited to costumes, for, as the title implies, society's latest fads in jewels play a quite important part in the unique story. Diamond combs, diamond tiaras, diamond anklets and just diamonds will sparkle throughout the play.

LEGION BACKS DRAFT MEASURE

Local Post Joins Movement to Secure Bill's Passage

Cloverland Post No. 82 of the American Legion has joined hands with the other posts in the country in the movement to secure passage of universal draft bill, which embodies a peace plan and preparedness measure sponsored by the war veterans' organization.

Special programs in connection with the movement will be carried out by Legion posts in various cities on April 6, the anniversary of the declaration of war by the United States.

The text of the Universal Draft Bill follows: "Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that in the event of war declared by congress to exist, which in the judgment of the president demands the immediate increase of the military establishment, the president be, and he hereby is, authorized to draft into the service of the United States such members of the unorganized

militia as he may deem necessary: Provided, that all persons drafted into service between the ages of twenty-one and thirty, or such other limits as the president may fix, shall be drafted without exemption on account of industrial occupation.

"Sec. 2 That in case of war, or when the president shall judge the same to be imminent, he is authorized and it shall be his duty, when, in his opinion, such emergency requires it—

"(a) To determine and proclaim the material resources, industrial organizations and services over which government control is necessary to the successful termination of such emergency, and such control shall be exercised by him through agencies then existing or which he may create for such purposes;

"(b) To take such steps as may be necessary to stabilize prices of services and of all commodities declared to be essential, whether such services and commodities are required by the government or by the civilian population."

Loves to Play Baseball
Son of a very wealthy Cuban planter, Merito Acosta, American Association outfielder, plays baseball because he loves the game.

Musk is the foundation of most perfume; it comes from musk deer.

New Cinder Mill Is Installed in Local Block Plant

Installation of a new cinder crusher of the roller type will give the Universal Magnesian Products company a capacity of 8,000 to 10,000 cinder blocks daily. It was announced yesterday. The crusher will be in operation within a day or two and production at the plant, suspended temporarily during the installation, will be resumed.

The steam curing house at the plant is proving highly successful. This system cures blocks perfectly, in 14 hours, as compared with two weeks required under the former system.

Orders on hand and in sight indicate a very busy and prosperous season for the company.

MILWAUKEE MEN FLY TO ESKY

Swallow Biplane Makes Trip to This City in About Two Hours

Michael Belmont, Milwaukee pilot, and Allen McLaren, manager of the airplane department of a leading oil company, arrived in Escanaba yesterday at 4:10 p. m., landing at the local airport. They will remain in the city today.

The men left Milwaukee at 2:10 p. m., making the trip in two hours and ten minutes. Flying conditions were excellent, they said, and they enjoyed every minute of the ride.

The plane is of the "Swallow" type, carrying a pilot and one passenger. It is a late model and will be at the field today for the inspection of those interested. No passengers will be carried, it was announced.

The plane is the first outside ship to stop at the new airport of Upper Peninsula Airways, situated north of the city just east of the Delta county poor farm.

Donlin Gets in Movies
Mike Donlin, former National League star, is working with Richard Dix on a baseball movie to be titled, "Knocking 'Em Over."

DON'T MISS THIS GREAT EVENT

"WHAT! You Don't Trust Me?"

TRUE ENOUGH the blue sky artist becomes very indignant when asked for references or an independent audit of his "statement." Usually he won't come to your bank. And often enough you feel shame-faced to doubt this man who is "letting you in on the ground floor."

But remember this, over a half a billion dollars a year are stolen from the good people of this country by these very good salesmen. They talk big, they are likeable, they close fast and they don't like bankers, who are trained, skillful investors.

Let us check on investments that are offered you. We want you to prosper and make money. Our business is to make safe investments and our knowledge is yours for the asking.
