MEXICAN TOWN TO FALL IN THE HANDS OF REBELS

Ciudad Juarez is Hemmed in and at the Mercy of the Revolutionists—Town Must Fall When Its Surrender is Demanded—Foreign Residents Hoist Flags.

El Paso, Texas., Feb. 3.—With the rebels advancing and the town completely hemmed in, Ciudad Juarez must fall when the rebels demand its surrender.

Both railroads have been put out of business and all wires are down. The defending force of federal troops number about three hundred men.

May Be Attacked Soon. It is reported that the town is to be taken this afternoon after the foreign consuls have had proper notification of the attack.

At ten o'clock this morning the mayor of Juarez ordered all the places of business closed. The American and other foreign flags were at once put out by the foreign residents.

The consuls had not been notified of an attack. The mayor declined to say why he had issued the order.

Train Runs Over Dynamite. The Mexican postoffice and the two branch banks in Juarez were closed last night, after all the money and records had been brought here for safety.

The Fourteenth cavalry was sent out to dynamite the tracks of the Mexican Central railway, over which a train was traveling toward Juarez, loaded with rebels.

The train bearing the insurgents ran over a mine of dynamite, which exploded, shattering one of the coaches, but no rebels were killed. The coal passer on the engine was blown to pieces, but the engineer, was only slightly hurt.

Fierce Battle Rages. A battle between the Fourteenth cavalry and the insurgents raged for several hours. Thirty-two federal cavalrymen are believed to have been killed, as that number of riderless cavalry horses strayed into Juarez. Six insurgents were killed. Many were wounded on both sides.

Cornell's new school building is about completed and will be formally dedicated on Saturday, February 11. The dedication will be considerable of an event and will be participated in by school officials and teachers of the county. Among the speakers on the program will be County Commissioner of Schools P. R. Legg, Superintendent F. E. King of the Escanaba schools and Prosecuting Attorney Torval E. Strom. Following the dedication exercises a picnic supper will be served in the school basement.

ROOT TAKES A HARD CRACK AT SENATOR LORIMER

NEW YORK SENATOR DECLARES THAT HIS ILLINOIS COLLEAGUE HOLDS HIS SEAT THROUGH BRIBERY.

Declares That on That Account He Should Not Be Permitted to Continue His Membership in the Senate—Gives Legal Analysis of Testimony.

(By Associated Press.)

Washington, Feb. 3.—That Senator Lorimer holds his seat as a result of bribery and on that account should not be permitted to continue his membership in the senate, is the conclusion reached by Senator Elihu Root of New York, and so announced by

ELIHU ROOT, United States Senator from New York.

him in an argument on the floor of the senate today.

Senator Root spoke without notes and in the main his address consisted of a careful analysis of the testimony taken by the committee.

The whole of his argument was entirely legal.

At the conclusion of Senator Root's speech Senator Bailey created a sensation by asserting that if Lorimer were shut out by any such logic, then Senator Cullom also should be excluded, and he added impressively:

JOSEPH W. BAILEY, United States Senator from Texas.

"And there's no one here who would not acquit Cullom of having knowledge of any wrong doing in connection with his election."

ESCANABAN WILL SUE FOR DAMAGES

Louis Aschinger, who was quite seriously injured in a street car wreck at Fond du Lac Wis., seven or eight weeks ago, has so far recovered as to be able to be out again. Mr. Aschinger contemplates bringing suit against the Fond du Lac Street Railway company to recover damages for the injuries he sustained in the wreck.

PLANT IS WORKING BETTER

WATER DECLARED TO BE PERFECTLY SAFE AND ENTIRELY SATISFACTORY FOR DOMESTIC PURPOSES.

EXPERT MAKES ANOTHER REPORT

Statement issued Thursday Evening by Bacteriologist of the Escanaba Water Company Explaining the Nature and Scope of the Tests That Have Thus Far Been Made and the Results.

"It is the opinion of the company's bacteriologist that the plant is doing good work and turning out a product perfectly safe and entirely satisfactory for all domestic purposes, yet that it can be made to show even better results than at present."

The foregoing is the concluding paragraph of a report issued Thursday night by Prof. Henry Kneeland, the Escanaba Water company's bacteriologist, and is supplementary to and in some degree explanatory of the report issued Wednesday evening. In the second report Professor Kneeland explains at some length the nature and scope of the tests he has thus far conducted and gives the results, which would appear to bear out his conclusions as above stated. His statement in full is herewith submitted for the consideration of the citizens of Escanaba:

The Escanaba Water company now has its bacteriological laboratory completely installed and has made tests of the condition of the water at the plant and of the efficiency of the filters, for the past two days.

On Tuesday the raw water from the bay was found to contain 132

(Continued on page 2.)

DR. CARLSON DISCUSSES THE WATER QUESTION

CITY CHEMIST SAYS HE IS NOT READY YET TO REPORT THAT THE CITY WATER IS PURE AND WHOLESOME.

Expresses the Opinion That the Bacteriologist of the Water Company is Premature in Reporting Water O. K. and Gives His Reasons.

Editor The Daily Mirror: Kindly permit me space for a few remarks on the water question. Mr. Kneeland, the bacteriologist of the Water company, after partly completing his first test of the city water, came out with the positive statement that the water is perfectly safe. It seems to me that he is rather premature in reporting it safe on the result of one test alone and that not entirely completed.

During the month of January seven of my tests showed absence of the colon-bacillus on the litmus-lacose agar plate, while the remainder of the tests gave positive results. Since January 28th, my tests have shown the colon-bacillus to be absent, but I do not feel justified in reporting the water safe until tests for at least ten days in succession show continued absence of the colon bacillus.

I do not doubt that under Mr. Kneeland's management of the filter plant we will get purer water. I think, however, that one or two tests are not sufficient, but that a series of tests should be made and all show absence of contamination before recommending the water to the people of Escanaba. If my tests will show the absence of colon bacilli for ten days, dating from January 28th, when I last found the colon test positive, I shall be ready to report the water safe. Respectfully, A. J. Carlson, City Chemist.

EDITORS TO MEET AT MENOMINEE

President F. L. Baldwin and Secretary P. O'Brien of the Lake Superior Press association are arranging to have the annual meeting of the association at Menominee on February 20-21. The meeting will be held at the time of the meeting called for the organization of the Upper Peninsula Development Bureau and should be attended not only by every member of the association but by every newspaper man in the upper peninsula. It is planned to have the editors meet on the afternoon and evening of February 20 and on the morning of the 21st. This will permit of the transaction of all business in time to permit the editors to attend the other meeting.

METHODIST CHURCH HOLDS CONFERENCE

The quarterly conference of the First Methodist Episcopal church was held in the church Thursday evening and was attended by officers and members of the church. Rev. Dr. W. B. Collins of Sault Ste. Marie, district superintendent, presided over the conference. Considerable routine business was transacted and some new matters were discussed. Among the subjects considered was one relating to ways and means for reducing the church debt. Dr. Collins left this morning for Menominee, where he will this evening preside over the quarterly conference of the First M. E. church in that city.

Hancock Copper Evening Journal: Just now Marquette and Escanaba are eschewing city water, and the "drys" are not making much headway there.

MANY DEATHS HERE DURING JANUARY

Death reaped a heavy harvest in Escanaba during the month of January. According to the mortality reports, filed with City Clerk Lyons, there were no less than 24 deaths that occurred in the city in January. This is an unusually heavy rate, even for a month usually characterized by high mortality. All of the deaths, however, were not those of bona fide residents of Escanaba, several being of persons whose homes were not here. The birth rate early kept pace, for the city clerk had up to date received reports of 20 births that occurred in Escanaba during the month. There are probably some, however, that have not yet been reported.

FOUND GUILTY AND TAKES AN APPEAL

In Justice Huber's court at Gladstone this afternoon Peter Gennesens, arrested recently on a charge of stealing from Soo Line freight cars in the Gladstone yards, was tried before a jury and convicted of petit larceny. He was sentenced to pay a fine of \$10 and costs, with a term of 30 days in the county jail as the alternative. He took an appeal from the verdict and sentence and the case will go to the circuit court. At the trial the People were represented by Prosecuting Attorney Torval E. Strom and the defendant by Attorney John Cumminskey.

T. M. Judson is out of the city, transacting business in Chicago and other cities.

How They Will Go, the Scenes on the Way and Their Arrival in New York—What Tom Moore Says of Bermuda—Letter From Tourist Tomorrow.

COMPANY FORMED TO EXPLORE LAND

Escanaba Men are Interested in Formation of a Development Company Organized to Explore for Iron Ore in the Vicinity of Fogarty Mine Near Iron River.

For the purpose of exploring and developing a tract of land in which there is believed to be valuable iron ore deposits a number of Escanaba men and David Bailey of Gladstone have organized a company to be known as the Escanaba Development company. This company is officered as follows: President, C. W. Kates; vice president, and general manager, Duncan A. McRae; secretary and treasurer, Dr. C. B. J. Kitchen. Besides the officers named the holders of stock in the company include T. M. Judson, W. C. Ammermann, Edward Wicking, P. McRae, T. J. Martin, Carl Johnson, Dr. M. P. Fenelon, Dr. J. O. Groos and Waldo Roberts of this city and David Bailey of Gladstone.

Some time ago Duncan A. McRae secured options on an 80 acre tract of land in the vicinity of the Fogarty mine about two miles from Iron River, which options were turned over to the company upon its organization. Exploratory work has already been commenced and it will be in charge of General Manager Duncan A. McRae, who left this morning for the scene of operations. He will make his headquarters at Iron River.

LITTLE GIRL DIES AT FORD RIVER

After an illness of scarcely three days, Grace Bedore, the three year old daughter of Mr. and Mrs. Elie Bedore of Ford River, died at the family home about 1:30 o'clock this morning. The funeral will be held from the home tomorrow afternoon and the remains will be given burial in St. Ann's cemetery.

Miss Gertrude Lindsay entertained the Gypsy girls of the Kermis at her home on Wells avenue last evening.

The first stage of the journey. After bidding farewell to the friends and relatives who will crowd to the depot to wish "bon-voyage" to The Mirror tourists, the party will be whirled away in a Pullman and the last sight you will see of them will be the fluttering of handkerchiefs from the rear of the train.

And then the sights in store for the winners. Farms and hills and mountains, slits in the solid rock where rivers sleep, mammoth hotels on the crest of crags, with sloping lawns and grottos for the lovers, a shimmering sheet of lake, now glistening, now blotted out of sight by the rapid motion of the limited. Swift, snaky glides over trestles, and the more prolonged rumble as the flyer dashes over imposing river bridges. Stops in thickly crowded cities and the slow pull out again as the might drive-wheels gather momentum with every turn and you are on your way again, across four states you go and down into the beautiful valley of the Hudson.

Follows Historic River. The roadbed follows the windings (Continued on Page 2.)

ALPHA CLUB FIXES UP ITS QUARTERS

The Alpha Dramatic club, which is composed of young men of St. Joseph's church has been making improvement in its club rooms under that edifice. New electrical fixtures have been put in and a new hardwood floor and wainscoting adds materially to the interior appearance. The Dramatic club intends to put on plays from time to time and the rooms will be used for church entertainments and socials as well as for the purposes to which the club members may put it.

ARCHBISHOP RYAN'S LIFE IS EBBING

(By Associated Press.) Philadelphia, Feb. 3.—The condition of Archbishop Ryan is very critical and it is said by the watchers at his bedside that his death is expected momentarily.

CONGRESS WILL BE OF WORLD WIDE INTEREST

GREAT PLANS BEING FORMULATED FOR THE NEXT ANNUAL CONVENTION OF NATIONAL IRRIGATION CONGRESS.

It Will Be Held In Chicago December 5 to 9.—Notables From All Over the World to Be Present.—President Taft Will Deliver an Address.

(Special to The Mirror.)

Chicago, Ill., Feb. 3.—Plans are being formulated by the Chicago board of control to make the 19th annual convention of the National Irrigation Congress, which will meet here December 5 to 9, of world-wide interest.

Former Judge Charles F. Fishback, a member of the board of governors, has interested 20 prominent business and professional men of Chicago in the work of the local board of control of which he is chairman, and the cooperation of the people of Chicago and the millions tributary to this great central market is bound to be a tremendous aid to the movement, which has for its chief purposes the saving of forests, storing of flood waters, reclamation of deserts and making homes on the land.

"The National Irrigation Congress will have the support of our public-spirited men," said Judge Fishback, "and with the assistance of our friends in other parts of the country there is every reason to believe that the coming convention will be the most important in the history of the organization."

THEATRICAL

Henry W. Savage, to whom the metropolitan public is grateful for the presentation in America of "The Merry Widow," will provide one of the season's important events in the near future with his production of "Madame X," the famous drama of mother-love that thrilled all of Europe and is now establishing new records of popularity in the United States.

THE DAILY MIRROR PARTY ENROUTE TO NEW YORK

(Continued from Page 1.)

of the mighty river where so much American history was made. The noble hills shadow the river on either side with the Catskills back in the distance and pass Kingston Point with its fine view on the opposite side where the Astor estate runs down to the river's edge, Hyde Park the country home of Henry M. Hyde, Poughkeepsie, the home of Vassar College, Newburg, Cornwall, Storm King, Cold Spring, West Point, Stony Point, Haverstraw, Tarrytown, where John D. owns the surrounding Pocantico Hills, and where Miss Helen Gould has a marble summer home. Over the Spuyten Duyvil and King's Bridge and here the engine will be changed for an electric one to run down through Harlem on the elevated tracks over the city streets.

Three prolonged, hoarse whistles, the slowing down of the iron monster in the immense trainshed, where many other trains have halted and in long lines stand panting from their exertions or wheezing painfully away on other long journeys, and you have completed only the first stage of your journey and are in "Little old New York" and after a day's stop, will be ready to embark on the big ocean liner for Bermuda. Is it not worth while? More sight-seeing in New York will be done on the return from Bermuda, where the countless attractions of the Metropolis will be taken in.

Some of Bermuda's Attractions.

It was Tom Moore, the great Irish poet, who sang of Bermuda as— These leafy isles upon the ocean thrown, Like studs of emeralds o'er a silver zone; and many enthusiastic but less gifted ones have re-echoed his praises. Moore lived there in 1804, and his house in Walsingham is shown, and said to be the oldest private residence in Bermuda.

That these islands were deeply appreciated by the impressionable Irish bard is evident by this verse: "Could you but view the scenery fair That now beneath my window lies, You'd think that nature lavished there Her purest wave, her softest skies."

Winter Ocean Voyage.

Winter travel today is so expeditious and luxurious that all the discomforts and dangers which that season brings to so many people may be easily avoided by a pleasant journey to a more pleasant clime. Even though it may not be so practical to spend the whole season in this manner, the benefits and pleasures from a brief respite from the winter's storms and stress are so marked that thousands of men and women each winter seek renewed energy in a short trip to the tropics.

Columbus, on his first voyage from Spain, discovered America's most natural winter resorts—the West Indies. To these should be added the Bermudas and the chain of islands that fringe the eastern coast of the United States is complete. Travelers out of a northern port quickly learn that winter and summer are only a matter of latitude, and that a few degrees can make a wonderful difference.

Descriptive Letter Tomorrow.

The winter voyage from New York to Bermuda is a delightful experience worth taking the trip to enjoy. The passenger embarks with the mercury far down in the tube, and a cheerful aspect upon the sea. Within twelve hours the Gulf Stream has wrapped the vessel, and its genial warmth has thawed the blood and the spirits of those on board. Deck life becomes attractive, warps are thrown aside, the temperature mounts as the latitude decreases, verdure clad coral islands of Bermuda push their palm fringed tops above the southeastern horizon, the tourist, in summer garb, prepares to step ashore in a land of perpetual springtime and flowers.

A party of ladies from Hammond, Ind., has just returned from a trip, similar in all respects to the one planned and offered by The Mirror. These ladies were the winners of a contest on the News, of that city. One of them has written a descriptive letter, dealing with the party's experiences. We shall print that letter in tomorrow's issue. It is most entertaining and well worth reading.

On and after Monday, February 6, 1911, the "singles"—vote coupons printed in The Mirror every day—will be worth one vote each instead of five, as heretofore.

Subscription prices to the Daily Mirror and vote schedule. Table with columns for Carrier, Mail, Old, New, Takers.

IN THE WORLD OF SPORTS

HOPPE DENIES HIS RETIREMENT

Willie Hoppe, Champion Billiardist.

Willie Hoppe, billiard champion of the world, and his bride of a few weeks were much excited the other day over a report that he had announced his retirement from the game because of the objections of his wife and father-in-law.

The story was that Thomas W. Walsh, a wealthy Baltimore dry goods manufacturer, with whose daughter Alice young Hoppe eloped in December, insisted on his son-in-law's withdrawal from professional billiards to go into the dry goods business and that the champion of the cue intended giving up the game.

"It's all nonsense," said Hoppe. "Neither my wife nor my father-in-law objects to billiards. Why, I couldn't make a living any other way. Dry goods? Why, I don't know a bale of cloth from an aeroplane."

"When the way started, I guess, was when I told my manager that I wouldn't play any more one-night stands. I've been on the jump playing these engagements for nearly a month since our marriage, and naturally Mrs. Hoppe doesn't like it. I'll continue to accept engagements outside of New York, of course, but I will not go on the road for an extended trip. We are going to Europe in a month or two, and I expect to play a series of matches with the French champions, Vignaux, Cure, Cassignol and Addorjan."

Hoppe was born Oct. 11, 1887, in Cornwall on the Hudson. His father conducted a hotel there and the usual billiard room was a prominent adjunct in the hostelry. When a mere child, Willie and his brother Frank delighted in spending their play time at the pool table and it was not long before both of them could pocket all

the fifteen balls without a miss. Their skill soon reached the ears of the billiard and pool world and invitations to play exhibition games were extended to them from all parts of the country.

Frank developed a left handed stroke, while Willie worked right handed. Their father and mother also accompanied the youngsters on all their trips and gave exhibitions of billiard playing.

At the age of 6 years, Willie was allowed to play with the billiard ivorys and he developed so rapidly that to those who witnessed his playing it was only a question of time when he would be the world's master. His rise in the billiard world was not only rapid, but almost phenomenal. No man, not even the renowned Ives, showed such skill in the manipulations of the balls, and accuracy of his drive shots, and such perfect knowledge of the angles.

His playing was watched closely by all the old time champions. Schaefer, who was known as the "wizard" was practically the first to see the great future in Willie and obtained the consent of his parents to allow the youngster to accompany him on his tours.

Hoppe attributes his success to close application to practice, regular living, going to sleep and rising as early as possible. He is fond of long walks, which he takes every day in all sorts of weather, after which he will spend several hours in practice.

His advice to all players who desire to improve their game, is to take a few lessons from some good instructor. The fundamental principles must be learned in order to develop; the rest will then take care of itself with practice.

SPORTING GOSSIP

Mike Donlin is the latest to apply for membership in the Come Backs. Fred Lake will try his hand as a scout for the Boston National league team. Grover Land is being touted as the first catcher on the Cleveland Naps this year. Tony Hartzel played on the 1902, 1905 and 1910 pennant winners of the Athletics. Charley Hall, the Boston American's pitcher, is playing winter ball out in California. Tommy Burns is training to see if that injured knee is strong enough for two more bouts. Politeness will be one of the courses

PLANT IS WORKING WELL NOW

(Continued from page one.)

bacteria per cubic centimeter, about 15 drops) and the filtered water, 2 bacteria per c.c. This shows that the efficiency of the filter in removing bacteria was 98.53 per cent.

The samples of filtered water for examination were taken from the main leaving the pumps and therefore were fair samples of the water just as it is received in the city and not samples from any particular filter bed. Wednesday's examination showed 201 bacteria in the raw water and 2 1/2 in the filtered, giving the plant an efficiency of 98.76 per cent bacteria removed.

These tests were made on what is known as Lintus-Lactose-Agar, for bacteria being cultivated in an incubator kept at blood heat.

On Wednesday's tests, these cultures developed 40 "acid formers" in the raw and 2 in the filtered water. These "red" or "acid forming" bacteria are of special significance, since only germs of sewage origin belong to this class or family.

These germs are not in themselves harmful to health, since they exist naturally in the digestive tract of all healthy people. To detect their presence in a drinking water, however, is of value as an indicator, showing conclusively that the water has at some very recent date, been polluted with sewage.

The best indicator of this kind is the organism known as B. Coli, because of its presence in such great numbers in the large intestine of man and the larger animals. A special examination is made for this germ by a method of culture called the "presumptive test."

Standard to Judge By. On Tuesday, this test failed to disclose B. Coli in either water, but Wednesday's tests gave positive results in the raw and negative results in the filtered water.

In order that the people of Escanaba may be able to better judge of the result of tests which will probably, from time to time be published in the local newspapers, the Water company's bacteriologist will lay down the following standards which although not absolutely rigid and arbitrary are yet very good in a general way:

The figures here given are those laid down by investigators, universally recognized as authorities in such matters.

The blood heat count should not exceed 50 bacteria per cubic centimeter and red or acid forming colonies should be absent.

B. Coli should not show in 1 centimeter.

The count at room temperature (20 degrees centigrade) should not exceed 100 bacteria per c. c.

Counts at room temperature have not as yet been published, but will appear in later reports.

The figures above are given by William G. Savage in his work on Water supply, 1905.

The room temperature figure is the one established by law by the German government and applies to filter plants in the empire.

The efficiency of a filter plant should be 98 per cent or better.

It is the opinion of the company's bacteriologist that the plant is doing good work and turning out a product perfectly safe and entirely satisfactory for all domestic purposes, yet that it can be made to show even better results than at present.

ALPHA DRAMATIC CLUB TO APPEAR

Organization Formerly Known as St. Joseph's Dramatic Club is Preparing to Present Two Plays at the Opera House on Evenings of February 9 and 10.

The reorganized St. Joseph's Dramatic club now called the Alpha Dramatic club of St. Joseph's church, this city, is busily preparing two plays to be presented at Peterson's opera house on Thursday and Friday nights, February 9th and 10th.

Needless to say, the Alpha Dramatic club will make good on both evenings and will undoubtedly be one of the best productions ever rendered by amateurs in the city.

At Gladstone they also made a highly favorable impression, as the general comment was that the young men would be given a rousing reception on their next appearance.

You can rent a room, sell a stove or buy a baby buggy through an ad in this paper.

"A Virginia Mummy"

JAMES RANOUS, OLD RAILROADER, DEAD

He Was Formerly a Conductor in the Employ of the Chicago & Northwestern Railway—Father of George Ranous, Also a Conductor, Well Known in This City.

Some of the older citizens of Escanaba, to whom he was well known, will be interested and perhaps grieved in the announcement of the death of James Ranous, who was formerly a conductor in the employ of the Chicago & Northwestern railway.

Mr. Ranous died Tuesday night at his home in Green Bay. The following notice of his demise was published in the Green Bay Gazette of Wednesday:

"James Ranous, an old resident of the city and well known among railroad men, passed away at his home at 347 North Chestnut avenue last evening about 9 o'clock. The cause of his death was due to old age. He was 84 years of age and had resided in the city since 1872, coming here from Janesville and settling on the west side.

"Mr. Ranous was born in New York in 1827, coming to Wisconsin with his parents when a youth they settled at Milwaukee where they remained for some time, and later moved to Janesville. Mr. Ranous was employed by the Chicago & Northwestern railroad company for a number of years and was the conductor on the first train run into the city over the Chicago & Northwestern tracks. He was married to Miss Emma Mead of New York, who died during the year of 1882. Their marriage was blessed by three children, two of whom survive him, George of this city and Andrew of Powers, Mich.

"The funeral services will be conducted tomorrow (Thursday) afternoon from the residence at 2 o'clock and the remains will be laid to rest beside his wife in the family lot in Fort Howard cemetery."

THE NORTHWESTERN HAULS MUCH TIMBER

According to the Iron Mountain Press, the Chicago & Northwestern railway is handling on an average of 150 cars of logs per day on the Peninsula division, the timber coming from various points on the Ashland division. Watersmeet, Sounders, Stager, Chicago Lake branch, E. I. M. & W. branch and points on the north end or Ishpeming line.

The logs are distributed at various points as follows: Iron River, eight cars; Pentoga, five cars; McGovern's mill, eight cars; Chapin mine, six cars; Pawabic mine, four cars; von Platen saw-mill, twelve cars; Niagara, seventy-five cars, and Marinette thirty-two cars. The logs for Niagara have been coming faster than they can be handled and an embargo has been placed on the shipments for a few days to allow time for clearing the lockade of cars at the paper mill and at Guinness.

Allowing an average of 6,000 feet per car the amount of logs handled daily by the Northwestern on this division would reach 900,000 feet.

MEASURE WILL AFFECT GROCERS

Bill to Make Measurement Scales for Green Groceries Uniform Throughout the State is to be Introduced in the Legislature—Provisions of the Bill.

Grand Rapids, Feb. 3.—At the request of the commission merchants and the Retail Grocers' association of this city, Assistant City Attorney Ferguson has drafted a bill, which will be presented to the legislature by Representative Verdir in an effort to compel state-wide conformity in measurement scales coming under the classification of green groceries.

This action was hastened by the council's ordinance committee's notice to the grocers that no further delay of the local ordinance which, the dealers pointed out would work a hardship to them if different standards prevailed in nearby cities.

The proposed legislative enactment will provide that all such commodities as fruits, vegetables, berries or nuts must be sold in standard full-measure baskets, boxes, crates, cases, drawers or other receptacles, or by the pound.

Violations in the wording of the bill, shall constitute misdemeanors, and shall be punishable, for each offense, by fines of not less than \$10 nor more than \$100, or by imprisonment of not less than ten days nor more than sixty days, or by both fine and imprisonment, at the discretion of the court.

Copies of the draft have been sent to all Kent county representatives and senators, and Representatives Verdir will make the motion in its support.

SOCIALIST EDITOR WON'T GO TO JAIL

Washington, D. C., Feb. 3.—President Taft has commuted the sentence of Fred D. Warren, the Socialist editor of The Appeal to Reason, who was recently sentenced to six months' imprisonment and \$1,500 fine by striking out the imprisonment and reducing the fine of \$100, to be collected by civil process only.

NOME DEPOPULATED BY BIG GOLD RUSH

(By Associated Press.) Washington, D. C., Feb. 3.—Population statistics of the thirteenth census announced today included: Nome, Alaska, 2,600 in 1910 as against 12,488 in 1900, when there was a rush to the gold fields.

SHIPPERS' FORECAST

U. S. Department of Agriculture, Weather Bureau, Willis L. Moore, Chief.

Escanaba, Mich., Feb. 3. Shippers' Forecast: Protect 36-hour shipments north and west for temperatures of 5 degrees; south, 10 degrees.

KISSING BUG SPREADS COLDS AMONG CO-EDS

Madison, Wis., Feb. 3.—Two professors have discovered the cause of the epidemic of colds that has swept through the University of Wisconsin during the past two weeks. Fully 400 cases have been reported to the medical department and Professor W. D. Frost announced today that the blame attaches to a little germ which is very contagious and which is spread by kissing.

Increased Use of Electricity. The use of electricity for light and power in the United States has more than doubled in the last eight years.

Strengthen the Body For the day's work on Grape-Nuts and Cream. DELICIOUS!

HAS BRANCH AT CRYSTAL FALLS

Western Federation of Labor Quietly Organizes and Begins Activities on the Menominee Range—Few of the Members are American and Nearly All are Socialists.

Crystal Falls, Mich., Feb. 3.—The Western Federation of labor has a branch in Crystal Falls with quite a large membership. The fact that the labor organization has been formed here has been kept very quiet, fearing an opposition from the employers of labor and from the other laborers who are satisfied with the existing conditions.

In a talk had recently with a young man who was intending to join the organization he said: "We expect to get \$3 per day and an eight-hour shift."

Inquiry develops that but a very few of the members of the organization are English speaking and that almost all of them have been but a very short time in this country.

Another curious fact about the organization is that about every member is a Socialist. The Socialist views held by these members are those inculcated in the old country where oppression has bred hatred of authority and wealth into the very bone of the working classes.

BANKERS' LIFE ASSOCIATION.

I will be in Escanaba until February 12th—and will be pleased to explain our plan of insurance at actual cost, which during the past 31 years has never exceeded \$8.45, per thousand and per year at age 35 (other ages in proportion). Our policies are protected by assets of more than sixteen million dollars. Our securities are deposited with the insurance department of the state of Iowa. Call and see me in Bucholtz Block, over Young & Fillion's store or call phone 625 and I will call and see you at your place of business or at your home. R. R. Genge, Agent. 35

Pneumonia Follows a Cold.

But never follows the use of Foley's Honey and Tar, which cures the cough and expels the cold. M. Stockwell, Hannibal, Mo., says, "I contracted a bad cold and cough and was threatened with pneumonia. One bottle of Foley's Honey and Tar completely cured me." Sold by druggists.

WHAT'S THE USE?

Captain of Russian Cruiser—Flood the magazines, boys! Flood the magazines! Gunner's Mate—What's the use? The admiral will do it when the war is over.

WANTED TO KNOW.

Fuller Boose (3 a. m. and loaded)—Shay, sergeant, do you—hic—know where Fuller Boose—hic—lives? Police Sergeant—Why, you're Fuller Boose yourself. Fuller Boose—I know I am, but—hic—where do I live?

Judging a Man. "You can judge a man by the company he keeps," said Uncle Allen Sparks, "but you can't always judge him by his habits. Some men are a good deal better than the cigars they smoke."

Then Spoils It. A woman can look at a man in a way that makes him feel like a plugged nickel—then she spoils the effect by saying things.

For the Children

Little Pu Yi, Baby Emperor of China. While Pu Yi is the emperor of China, he does not rule over that great nation yet. He is too young for that. Some day, if he lives to grow up, he will sit on the throne. At present his father, Prince Chun, is the real ruler, acting for his son. Prince Chun is the brother of the late emperor, who died a couple of years ago. Pu Yi was born in February, 1906, and is therefore nearly five years old. When he becomes emperor he will be able to exercise but a small part of the autocratic power by which his predecessor ruled. China is advancing and has already decided to have a constitutional government. So Pu Yi must reign according to the written law and not as the emperor would decree under the old system.

Valentine Archery.

Cut from red kindergarten paper as many hearts as there are people. Divide in two lots. On the back of one lot write halves of verses and the other halves on the back of the second lot. Pin one lot a couple of feet apart to a white sheet and hang at one end of the room, removing breakable things from the vicinity. The other lot distribute to the girls. Each boy will in turn try to pierce a heart on the sheet with the bow and arrow given him. The one he comes nearest to belongs to him, and he finds his partner by the half verse on the back. For instance, Teddy pierces a heart on the back of which he finds: The rose is red, The violet blue, And he searches among the girls till he finds Nellie has: Sugar is sweet, And so are you. They are partners for the next game or for supper or whatever is arranged.

A Wonderful Person.

With what amazement would you regard a person who had a million ancestors? Yet by looking into a "mirror" you can behold the very individual—yourself. Now, we each had two parents, a father and a mother, both of whom had two parents. Thus, on this principle and assuming there has been no intermarriage of relations, a person who has had four grandparents has had eight great-grandparents. And our lineal ancestors during twenty generations number 1,048,576. So if these ancestors were all living they would be sufficient to populate Wales.

Conundrums.

Why is a nobleman like a book? Because he has a title. What class of women give tone to society? The belles. What is that which has a mouth, but never speaks; a bed, but never lies in it? A river. Why is a four quart jar like a side-saddle? Because it holds a gallon. Why are airships like tramps? Because they have no visible means of support. What islands would form a dainty party luncheon? Sandwich and Me deira.

Ingenious Wasps.

In South America lives a wasp that hangs from the boughs of trees a nest tough as pasteboard and remarkable also because the hole through which the nest swings freely in the wind. In most of these nests the hole is simply made through the thick upper part of the structure, but sometimes this is so molded that it looks like a ring. This wasp is named chertegus, a name derived from two Greek words meaning papermaker. The average nest is about a foot long and wide in proportion.

Dorothy's Valentines.

Woe Dorothy sits by the little stand. With paper smooth and white, A pencil held close in her chubby hand. Her eyes with smiles are bright. She has drawn a tree and palmed green The leaves of a vivid hue. Her flowers are the brightest ever seen. Their size is marvelous too. She wonders if papa will ever know From whom the picture came, For mamma says that it will go Without the sender's name. Her work she thinks is rather grand For a little girl, you see. And secretly hopes he will understand "To papa dear—from me." —M. F. Sherman.

TUBERCULOSIS DAY TO BE OBSERVED BY CHURCHES

April 30 is Set Aside for Preaching of Tuberculosis Sermons in 200,000 Churches.

April 30th has been set aside this year as "Tuberculosis Day," and will be observed in 200,000 churches in the country in a manner similar to that of "Tuberculosis Sunday" in 1910, when over 40,000 sermons were preached on the prevention of consumption. In this first official announcement of the occasion made by the National Association for the Study and Prevention of Tuberculosis. The leaders of the movement state that they hope to enlist all of the 33,000,000 church members in the country.

In a report on this movement "is to have this whole subject of tuberculosis discussed in all of the 200,000 churches of the United States at as nearly the same time as possible. This does not mean that stated service must be given over to this work, though that might be desirable but that any minister or other authority whom he may invite, can present the problem to his congregation before or after his regular service, or on any day within the week preceding or following April 30th."

In one respect Tuberculosis Day will differ from Tuberculosis Sunday of 1910. Instead of requesting the churches to give the tuberculosis cause a special Sunday service, the National Association is going to ask this year that meetings at which the subject of tuberculosis and its prevention can be discussed, be held on Sunday, April 30th, or on any other day near that date, either in the week preceding or the week following.

What is Desired. "What we want," says Dr. Livingston Farrand, Executive Secretary of the National Association for the Study and Prevention of Tuberculosis,

Serious Problem to Churches. The National Association is planning to gather statistics from thousands of ministers, showing how serious a problem tuberculosis is to every church.

These figures will show among other things the number of deaths last year from tuberculosis in the church congregation, and the ways in which the pastors are called on to minister to sufferers from this disease. It is planned also to issue millions of circulars and pamphlets on the prevention of tuberculosis, both from the national office and from the headquarters of the 450 anti-tuberculosis associations who will co-operate in the movement.

M'ADOO, GEORGIAN, NEW YORK RIVER TUNNELER.

WHEN the Boers fought the British in South Africa we heard much about the uitlander. Outlander is the meaning of the word translated into English. The Boers protested against the apparent intention of the outlanders—those from other places—to run the country. In the city of New York there is no protest against the outlander—the man who comes from Oshkosh, Wis.; Kalamazoo, Mich.; Lower Squankum, N. J., or Tralala, Mo. As a matter of fact, it is the outlanders who run New York. The natives really don't count for much except in the census. There's William G. McAdoo, for instance, a gentleman of hatched faced physiognomy, who went up to New York from the wilds of Georgia, where he was born at Marietta, in the very midst of the civil war. Mr. McAdoo practiced law for a time, but the law was too slow, even in Manhattan, for a man of his type. For a quarter of a century sundry persons had tried to build tunnels under the Hudson river for railroad transportation. They had failed. This Georgia "cracker" cracked the granite underneath the river and built the Hudson tunnels in New York, and to the end of time the name of McAdoo will be associated with this first subriver tube success.

BILL TO BAR THE UNFIT FROM WEDLOCK

Denver, Feb. 3.—The most drastic bill ever presented to any legislature has been drawn for presentation to the Colorado assembly. It has the united support of the four women members of the legislature. The bill provides for physical examination and requires a clean bill of

health before entering into the marriage state.

It denied the right of marriage to persons afflicted with tuberculosis or other constitutional communicable diseases.

Confirmed drunkards and those who are users of drugs are also barred as well as those engaged in infamous callings.

Heavy penalties are attached to those who violate the law in issuing licenses and for infractions by ministers.

DAILY DIET HINTS

By DR. T. J. ALLEN, Food Specialist.

COLDS AND HOW TO AVOID THEM.

"Catching cold" is not entirely dependent upon atmospheric changes. In cold, dry air, taking much exercise, one will contract cold less easily than in warmer moist air, taking little exercise. The condition of the blood is the essential factor. When the blood is overloaded with poisonous waste, due to overeating, especially of "rich" foods, and little exercise is taken, there will be a tendency to cold. Hence constipation is the most efficient prime cause of cold, because that tends to maintain a condition favorable to its development. Lack of bathing, by closing the pores which eliminate waste, and constant "cooling," which destroys the capacity for ready adjustment to changes of temperature (favoring congestion, the essential symptom in cold), is favorable to cold taking. Avoid overeating, exercise freely in the open air, bathe regularly, including tepid or cold water, daily, but avoiding extremes, avoid constipation, worry and exhaustion and undue exposure to chills and damps, but get all the fresh air and exercise possible. Stop eating for 24 hours, drink plenty of cold water, exercise freely in the open air, take a vapor bath and a morning friction bath—these are the natural remedies.

(Copyright, 1910, by Joseph B. Bowles.)

Marriages at St. George's. Hardly any church in Christendom has a record so remarkable for marriages of aristocrats or remarkable people as St. George's, Hanover square, London, England.

This is explained by the fact that for more than a century St. George's enjoyed a practical monopoly, because the rectors refused to risk loss of fees by allowing their huge parish—which included the best part of the West end—to be subdivided. It was not until 1844 that Bishop Blomfield, who had acquired the patronage, was enabled to enforce the formation of several daughter parishes. Two of these—St. Paul's, Knightsbridge and St. Peter's, Eaton square—having more ornate ceremonial and other attractions, have supplanted the mother church in the race for fashionable functions.

Bang Goes Altruism.

Because he was too soft hearted to ask his poverty-stricken landlady to buy new rugs for his room, the altruistic young man bought several small rugs and spread them over the floor. Immediately after the next sweeping day she presented a bill for the week's expenditures. Items, room rent, breakfasts, laundry and beating rugs, 25c.

"Hello," said the altruistic young man, "what does this mean?" "Just what it says," she returned. "If folks must cover their floor with extra rugs they'll have to pay for beating 'em, that's all. I can't afford to do it for nothing." And from that moment altruism lost a disciple.

Dating Eggs.

A rubber stamp to be worn on a finger so that when an egg is picked up the date will be imprinted on the shell is a recent invention.

Great Qualities.

We love any forms, however ugly, from which great qualities shine.—Emerson.

Remember The Name.

Foley's Honey and Tar for all coughs and colds, for croup, bronchitis, hoarseness and for racking lagrippe coughs. No opiates. Refuse substitutes. Sold by all druggists.

SUCCESS MARKS PYTHIAN SISTERS' 2D ANNUAL BALL

CLARK'S HALL IS THE SCENE THURSDAY EVENING OF A BRILLIANT AND ENJOYABLE SOCIETY FUNCTION.

There is a Generous Response to Invitations issued by Justice Temple of the Pythian Sisters—Pleasure of the Occasion is Unalloyed.

In response to invitations issued by Justice Temple No. 28 of the Pythian Sisters, a large number of Escanaba society folk assembled in Clark's hall Thursday evening to attend the second annual ball given by the members of Justice Temple. And long before they departed for their respective homes they were more than pleased that they had accepted those invitations, for they had just the finest kind of a time.

For the occasion the hall had been appropriately decorated and presented a most attractive appearance. Excellent music for the dance numbers was furnished by Brotherton's orchestra and there was nothing lacking to make the event one of unalloyed pleasure.

The Pythian Sisters proved themselves capable and charming hostesses and in their hospitable efforts they were ably aided and abetted by the Knights of Pythias. In all respects the ball was a complete and gratifying success, a fact which was in no small measure due to the well directed work of the several committees in charge. These were:

Arrangement committee—Mrs. C. W. Buckley, Mrs. W. J. Knorr, Miss Ethel Winn, D. A. Brotherton, Bert Ellsworth.

Reception committee—Mrs. Edward Sothe, Mrs. L. A. Rose, Mrs. Edward Smith, Mrs. M. Green, Mrs. E. Dougherty, Mrs. D. A. Brotherton, Edward Smith, L. A. Rose.

Floor committee—C. W. Buckley, C. G. Swan, William Knorr, Jacob Kratze, George H. Cobb.

Decoration committee—Mrs. C. G. Swan, Mrs. Dougherty, Mrs. L. A. Rose, D. A. Brotherton, C. G. Swan.

"THE BURGOMASTER" HEADED THIS WAY

The managers of the theaters in the iron and copper districts have secured William P. Cullen's big musical comedy success, "The Burgomaster," and its dates for this part of the circuit will probably be Ishpeming, Feb. 10; Calumet, 11; Hancock, 13; Marquette, 14 and Escanaba, 15.

Gus C. Weinberg, a wellknown comedian, is at the head of the company, which number fifty people. "The Burgomaster" is perhaps the best musical comedy attraction that will visit this circuit this season. Manager Cullen has spared neither time nor expense in making this season's production better than ever before. Gus C. Weinberg plays Peter Stuyvesant, the one-legged old governor of New Amsterdam. Mr. Weinberg is the original Burgomaster, and has never been seen to better advantage than in this part. He is supported by a strong company.

Your old friend THE MIRROR, has a new home. Come and see us at 713 Ludington street.

FORMER ESCANABAN IN MINSTREL SHOW

The minstrel performance given in Ishpeming Thursday evening by members of the Owls' organization under the direction of Holly G. Shepard, well known in Escanaba, is reported by the Marquette Mining Journal to have been the finest kind of a success. The theater was packed and every feature of the program was of a grade of excellence to merit unqualified approval and tremendous outbursts of applause. H. L. Ramadell, formerly of Escanaba, was the interlocutor in the first part of the performance and covered himself with glory. Mr. Shepard himself contributed several high grade numbers to the program. The performance is to be repeated this evening.

CHORAL CLUB HAS FINE REHEARSAL

Escanaba Choral club's meeting last evening was well attended and a fine rehearsal was held. Plans for the club's first concert, to be given in the First Presbyterian church on Thursday evening, February 16, are going steadily forward and there now seems to be every assurance that it will be a success. On Wednesday evening, February 15, there will be a special rehearsal in the church and the entire program for the concert will be gone through with.
