QUIET YESTERDAY

Today's official despatches indicate that there was no fighting of any importance yesterday although the French claim gains in the Champagne and Lorraine districts. The German statement says that the French attacks in these regions was repulsed while in the east the Russ appear to have maintained their offensive in North Poland.

The official German statement says that the Russians attacked in many places but were repelled each time.

C. graduate, last night while addressing the meeting held last night at East Lansing in connection with Farmers' "Custer's last Scout," to be shown this | Week. "In fully 90 per cent of the cases that have been called to my attention, it is the father that sows the seeds of longing for the city which leads to the constant migration from the farm."

"If the father of today wants to keep his boy on the farm, he must get him interested in the farm work. As a means to this end, I suggest letting the boy do much of the scientific farm work. Let the boy test the seed corn. Work like this will lead him to see that brains count in farming as much as in any other occupation.

"One of the worst influences upon country boys lies in the pool rooms to be found in many villages. The country boy must have recreation. and after his work is done, he goes to some village. There he spends his time in the pool room far too often because it is the only place open. In the pool room the surroundings may be immoral, and the tendency there is always to make the life of the big cities appear most attractive. Village e urches should keep their doors open at all times for the accommodation of country young people.

Dorr suggested. "No. The hotelkeeper and the police will see to it that they don't. All they wanted was you and me. Failing to catch us, they will disperse." "But where shall we find Ruth?"

"They will destroy all our things."

John went on eagerly. "Achmet will take her to a camp of beggars outside the city." he anwered.

"But how? She won't be safe with only a native."

"Safer than with a regiment of solliers," was the response. "I know where the place is. Let's go to it. I guarantee that we shall find Miss Gallon safe and sound. I know Achmet of old. He is specially trustworthy because he is a Mohammedan and he doesn't respect idols any more than you and I do."

Wilkerson Again on the Trail. T had not been difficult for Harry Wilkerson and Mrs. Darnell to trace Faversham and his party from the time they landed to their arrival to Bhala. But the idol itself, the object of their quest, still concealed its whereabouts in spite of the most minute inquiries. "We'll simply have to watch Dorr," Wilkerson said at last. "We know he is on the trail, and we'll just follow

him. Sooner or later we'll catch him." Jean Darnell sullenly agreed, but privately confided to Drake that she thought Wilkerson had lost his nerve.

With this slight clew both Drake and Wilkerson tolled unweariedly until they had established the fact that the idol had indeed been sent into another part of the country for safe keep-

Then they prepared to follow, having found out that Dorr and Faversham had vanished and were supposed also to have gone hillward

Mrs. Darnell most unwillingly cousented to stay behind, but yielded when Drake set before her the difficulties and perils of the road they must take.

Both men promised to be gone only so long as would be needful to recover the idol, and to both separately she made it plain that she had gone as far as she would in helping them.

The two men found a couple of halfbloods to their liking and by judicious expenditure of money managed to get together a small band to accompany them into the bills.

It was impressed upon them that the trip was dangerous and that the hillmen frequently dropped what small pretense they offered of peaceablene's and warred on friend and fee alike. It was through these also that they learned more specifically the route taken by the priests in charge of the

they feared its being stolen again they wouldn't be going to all this pains." "We'll find it all right," was Wilker son's sole response. The evening came when they were

to put their scheme to the test. Their own little company made camp and after supper gradually went to sleep. It was 10 o'clock when Wilkerson nodded to Drake, and they quit their places by the dying fire.

Outside of the circle they met the man who was to guide them, and one glance at his brutal face showed Wilkerson that he was once more confronted with a problem. The man made no bones of demand-

"Right-Cut," the Real Tobacco Chew, gives men fine, satisfying tobacco comfort-and nobody can notice that they are chewing.

A little chew of pure, rich, mellow tobacco-cut fine, short shred-seasoned and sweetened just enough, cuts out so much of the grinding and spitting.

Take a very small chew-less than one-quarter the old size. It will be more satisfying than a mouthful of ordinary tobacco. Just nibble on it until you find the strength chew that suits you. Tuck it away. Then let it rest. See how easily and evenly the real tobacco taste comes, how it satisfies without grinding, how much less you have to spit, how few chews you take to be tobacco satisfied. That's why it is The Real Tobacco Chew. That's why it costs less in the end.

It is a ready chew, cut fine and short shred so that you won't have to grind on it with your teeth. Grinding on ordinary candied tobacco makes you spit too much. The teste of pure, rich tobacco does not need to be covered up with molasses and nice. Nutice hew the salt brings out the rich tobacco tasts in "Right-Cut."

It is rather dangerous thing to ory the idea that you cannot let a boy go to work in a mine or a mill or any other hazardous occupation, is a fine thing. Undoubtedly when the legislature passed that law the members patted themselves on the back and said they were doing a great thing for the benefit of the growing youth of the land. But the way the thing works out in a mining location is not good, either for the boy or for the community. Our Calumet correspondent went into details on the subject in his news columns of the Gazette of Friday. His article reflects the sentiment of the most intelligent investigation on the subject in this district. The combination of laws makes loafers out of a lot of Calumet boys. The same applies to boys of other towns. The boys are through school at 16 and cannot go to work until they are 18. During those two years they have nothing to do but loaf. And loafing becomes a fixed habit in less than two years. Of course if the boys could get employment outside of the mines or the mills it would be a fine thing. But such positions are few and far between when the whole community is dependent, directly or indirectly, upon mining as a means of livelihood. There are a good many positions that boys can fill in stamp mills. And they can make good money too. But they cannot, under the law, take these places until they are 18 years of age. PRESIDENT SENDS **GREETING TO VAIL**

Then Congratulates Telephone Head.

President Wilson was one of the first to send his voice over the new Transcontinental Telephone Line. He spoke from the White House to San Francisco, and later was given connection with Theodore N. Vail, president of the American Telephone & Telegraph Company, at Jekyll Island, Georgia, whom he warmly congratulated on the Bell System's great achievement.

President Wilson talked first to

cific Exposition. He said: "It appeals to the imagination to speak across the continent. It is a fine omen for the exposition that the first thing it has done is to send its voice from sea to sea. I congratulate you on the fine prospects for a successful exposition. I am confidently hoping to take part in it, after the adjournment of congress. May I not send my greetings to the management and to all whose work has made it possible and has made it the great event it promises to be, and to convey my personal congratulations to you?" "I consider it an honor to be able to express my admiration for the inventive genius and scientific knowledge that has made this possible, and my pride that this vital cord should have been stretched across America as a new symbol of our unity and our enterprise. Will you not convey my cordial congratulations to Mr. Bell? And I want to convey to you my personal congratulations, sir."

The President then said to the inventor of the telephone, Doctor Bell, at New York:

"May I not congratulate you very warmly on this notable consummation of your long labors and remarkable achievement? You are justified in feeling a great pride in what has been done. This is a memorable day, and I convey to you my warm congratulations, sir.

Congratulates Vall.

Mr. Vall was then announced, and the President immediately placed the receiver to his ear, asking: "Is this Mr. Vail?" Mr. Vail's voice came over the wire so plainly that the President held his receiver lightly away from his ear, and then said:

"Mr. Vail, it is a great pleasure to hear your voice. New Haven, Conn.-A Babylonian tablet, believed to have been buried in the earth more than four thousand years and containing the earliest law code, recently has been unearthed, and is now in possession of Yale university. The tablet is heavily encrusted but part of it has been cleaned and deciphered.

The laws are written in the Sumerian language, the language of Southern Babylonia, prior to its conquest by the Semites or Accadians, in the time of Hammerabi. Owing to the imperfect knowledge of the language, the work of deciphering is extremely difficult, but the university expects to have complete translations made and

The laws that have been translated refer to legislation; concerning injury to women: the repudiation of children who have perhaps been adopted; elope ment; the hire of boats and cattle; and provision for the killing of a hired ox by a lion.

Pashions

For Women and Misses

The introduction to Spring Fashions is always an event of interest and those who've been disheartened by the extreme modes of the past few seasons will turn with welcome to the reversion to strictly tailored suits-simplicity is the keynote, with a tendency to military effects, and everywhere a precision of tailoring that's most satisfactory.

'Silent' colors are much in favor, thru the grays from the light dove tone to the darker dull stone gray and coverts in their soft sand shades. Blues stand out prominently, black and white checks, home spuns in gray, tan and green and plenty of black suits.

The early choosing of a spring suit in a leisurely fashion before sales people are rushed results in gratification, both in choice of the particular style you find best suited to your own individuality and in the comfort you have in knowing that your suit is home and ready any time you want to put it on.

The inspection of the Spring Modes even if you're not yet ready to buy, will be a pleasure, and we cordially invite you to make free use of our salespeople. Ask to see the variety of (Second Floor)

NOTED SCULLER JOINS ARMY Be not uneasy, discouraged or out of humor because practice falls short of precept in some particulars. If you happen to be beaten, return to the charge.-Marcus Aurelius.

No Use.

When you fail to wind up your time plece there is no use to swear next morning like a pirate when you discover that it has served as one of the silent watches of the night.

Corner on Calendars.

Among the Greeks and Romans almanacs or calendars were not written for the general public, but were preserved as part of the esoteric learning of the priests, whom the people had to consult, not only for the dates of the festivals, but for the proper times when various legal proceedings might be instituted. History does not relate how the society women of ancient times managed to get through a season without an engagement calendar.

Ups and Downs.

This life is composed of ups and downs: I might give myself as an example. Of course, I prefer to win, but if not I won't be dissatisfied. I have had my share of successes and reverses; successes I have endeavored to meet without elation, reverses without depression, and whenever I have fallen it has been my motto, and I think it has been a good one, to try again the following day.-Sir Wilfrid Laurier.

Blackness of the Crow. It was satisfactorily established by the old writers that the crows got their blackness in punishment for their sins. It seems to have been a futile punishment, for there is no living thing that shows in its demeanor less evidence of a repentant spirit. Instead of being ashamed of their blackness, crows, as an Indian writer has said, "swagger in it, and pretend that they chose that exact shade for them-
