

SENATE BACKS UP THE ADMINISTRATION

BY VOTE OF 68 TO 14 THE GORE RESOLUTION ON WARNING TO AMERICANS IS LOST IN SENATE

Embarrassing Situation for President is Relieved When Senators Table Resolution by an Overwhelming Majority - Two Democrats Vote with Twelve Republicans Against Motion to Table - Will Carry Fight into the House

(By Associated Press) Washington, D. C., March 3.—By a vote of 68 to 14, a majority far greater than the administration leaders had expected, the Gore resolution to warn Americans off armed belligerent vessels, was tabled, thereby relieving a situation that has greatly embarrassed President Wilson. The Gore resolution and a substitute resolution offered by Senator McCumber were both defeated on roll call vote after Senator James, the administration whip, had made a motion to table the resolutions. It was said at the White House that the vote was partly due to the President and that the administration would now endeavor to take a similar action in the House. Senator Gore voted with the majority to table his own resolution. Senators Chamberlin and Gorman were the only Democratic senators to vote against the tabling of the resolution. The other 12 anti-administration votes were Republicans. Fifty-six Democrats and 22 Republicans voted to table the resolution. Immediately after the vote in the senate had been taken Senator Reed, Democrat, said he thought that it was important that the impression that congress was not behind the administration in its negotiations with Germany should be removed. "It is of the highest importance," he said, "that the world understand that this nation is a unit and will hold up, sustain and defend its rights to the last breath." Senator Clark protested against the Senate action. "The Senate," he said, "did not dispose of the matter with the dignity it should have." Senator Gallinger in explaining his vote said: "By our action we have reached no conclusion. I am in favor of doing all we can to prevent war and to that end would warn Americans to keep off armed belligerents." Senator Borah said: "We denounce Germany because we do not like her government or her militarism. Yet the senate of the United States has been organized today. We took the same attitude and followed the same process that the highest German body would have taken under directions from the Kaiser."

Death Claims a Young Man

Jerry Ashland Died Shortly Before Noon at Mother's Home in This City

Death at 11:30 o'clock today claimed Jerry Ashland, the son of Mrs. Alvina Ashland, of 216 Harrison avenue. He had been suffering from tuberculosis for more than a year and his death was not unexpected. The deceased was born in this city in 1887 and grew to manhood here. For some time he was employed in the garage of L. K. Edwards. A young man of exemplary habits, genial and obliging, he held the esteem of every acquaintance. He was a staunch member of the St. Anne's church here. He is survived by his mother, three brothers, James, Eli and Albert, of this city; and four sisters, Mrs. John Puddin, of Cornell; Mrs. Joseph Loupal of Milwaukee; Pearl and Lucy, at home. Funeral services will probably be held Monday morning.

COUNCIL CANVASSES WEDNESDAY PRIMARY

Name Election Board to Take Charge of the April General Election

The vote of Wednesday's primary was canvassed by the city council which met last night in special session for that purpose. The canvass showed no changes in unofficial totals as given in last evening's issue of The Mirror. Aldermen E. J. Noreus, J. E. Sheehan and C. G. Swan constituted the canvassing board. The salary of election inspectors for the primary of Wednesday was fixed at \$6 and that of the gatekeepers at \$2. T. J. Riley, George F. McEwen and George Peterson were appointed by Mayor MacKillean as members of the board of commissioners to have charge of the April election. These appointments were at once confirmed by council.

LOCAL MOOSE LODGE NOMINATES OFFICERS

Will be Elected at Next Meeting of the Order—Smoker is Enjoyed

The local lodge of the Loyal Order of Moose last night nominated officers who will be voted on at the next meeting of the lodge. Those nominated are: T. G. Vassaw and E. J. Sederlund, for dictator; Frank Smith, vice dictator; J. P. Carlson, treasurer; C. R. O'Connell, secretary; Joseph Moreau, prelate; Jed Bager, inside guard; George Olson, outside guard. The meeting was largely attended and following the transaction of business refreshments and a smoker were enjoyed. The local Moose lodge is one of the largest in this section of the country and is growing rapidly.

MENAGERIE IS HOME

Herman Leisner Returned With Victor Johnson's Animal Exhibit

Herman Leisner, state game warden, returned from Saginaw yesterday where he was in attendance at the Michigan Wild Life Conference. Mr. Leisner had in charge the animals from the menagerie of Victor Johnson of this city, which were on exhibition at Lansing. All the "varmints" stood the trip to lower Michigan without any apparent ill effects, in fact, Mr. Leisner says, they seemed to enjoy the change of scenery. The Escanaba exhibition attracted much attention at the Wild Life show and it was upon request of the committee in charge that the animals were kept there until Monday to give the public in general a chance to look them over.

"LITTLE WOMEN" AND DEFOE'S "ROBINSON CRUSOE" FAVORITES

GIRLS OF CITY LIKE THEM BOTH BUT BOYS IGNORE ALCOTT'S "LITTLE WOMEN"

MORE THAN 200 VOTED IN CONTEST

"Jessie James" Got a Few Votes From The Boys But They Were Mighty Few

The Ten Books Which the Girls in Escanaba Like Best

- 1. Little Women, by Alcott.
2. Robinson Crusoe, by Defoe.
3. Black Beauty, by Sewell.
4. Andersen's Fairy Tales.
5. Little Men, by Alcott.
6. Princess on the Glass Hill, by Lang.
7. Alice in Wonderland, by Carroll.
8. Grimm's Fairy Tales.
9. Mother Goose Rhymes.
10. Evangeline, by Longfellow.

Ten Books Which The Boys in Escanaba Like Best

- 1. Robinson Crusoe, by Defoe.
2. Arabian Nights.
3. Black Beauty, by Sewell.
4. Treasure Island, by Stevenson.
5. Stories of King Arthur, by Mallory.
6. Tom Sawyer, by Mark Twain.
7. Little Men, by Alcott.
8. Story of the Three Bears.
9. Man Without a Country, by Hale.
10. Two Arrows, by Stoddard.

"Nick Carter," "Frank Merriwell," and "Old Sleuth," were entirely ignored in the voting contest for the ten best books for boys and girls, according to the list which was made public today by Miss Lara Brubaker, the Carnegie librarian. Miss Brubaker states that over 200 young people voted and that taken right through, the book selections made by the young people were very encouraging.

"Jessie James" did get a few votes in the boys list but not enough to even make a good showing. Some of the girls and young ones at that thought that Bertha M. Clay was their favorite author, but "Bertha" was not popular enough to get across the wire. It will be noticed from the list printed at the head of this article that both girls and boys were strong for Robinson Crusoe, Little Men and Black Beauty. These three books were leaders in both lists. The girls seemed to like "Little Men" as well as "Little Women," but the boys were contented with "Little Men" and ignored "Little Women" by the same author. The contest was interesting to the librarian and her assistants and brought out a great deal of valuable information which will be an aid in the selection of future books.

TOO COLD FOR BABY WEEK OBSERVANCE

Woman's Club May Arrange For Proper Observance Sometime in April

"Baby Week" will not be observed by the Woman's Club in the city next week, according to Mrs. C. E. Andrews, president of the club. "I have received communications from several clubs in the upper peninsula and we have agreed that March is almost too cold to do much toward the observance of the week said Mrs. Andrews. "We will probably observe a "baby week" in April."

No definite plans for the observance of the week have been made here, but it is expected that the Mother's clubs of the various schools will hold appropriate exercises during their meetings.

Mrs. E. Peronto of Hardwood submitted to a slight operation on one eye at St. Francis hospital a few days ago. She is getting along nicely.

Surprise Sprung On ten Teachers

Algoma School Board Accepts Resignations of Striking Pedagogues

(By Associated Press)

Algoma, Mich., March 3.—The board of school directors last evening accepted the resignation of the 10 teachers who recently went on strike as a protest against the dismissal of a fellow teacher. The acceptance of the resignations was a great surprise to the teachers themselves. The board announces that it has already secured teachers to fill the vacancies. The charges against Principal George Bassford and some of the deposed members, were not sustained.

ATTORNEY A. H. RYALL TALKS ON TAXATION

Delivered Address on Timber Land Taxation at Grand Rapids

Attorney A. H. Ryall, second vice president of the Michigan State Tax association, yesterday delivered at the Fifth State conference of the association, held at the Paultine hotel, Grand Rapids, an address on "Taxation of Timber Lands. Mr. Ryall was the first speaker at the morning session. He is expected to return home Monday or Tuesday of the coming week.

ATTORNEYS WILL MEET

Complete Organization of Delta County Bar Association Tomorrow

The organization of the Delta County Bar association will be completed at a meeting to be held tomorrow evening at 6:30 o'clock in the Delta hotel. A luncheon will precede the business meeting. The committee on constitution and by laws will submit its draft and its adoption will complete the organization. At the meeting of next week a stated program will be carried out.

ENGLUND WILL RETIRE

Ford River Township Board Member Says He Will Not Be Candidate

Andrew Englund, who for six years has served as a member of the county board of supervisors from the township of Ford River, has announced that he will not be a candidate for reelection.

Mr. Englund has given 13 years of his life to official service in Ford River township and he feels that he has done his share. His retirement from the board will be greatly regretted. He was one of the board's most influential members and he has given a conscientious service that the people of the county will not soon forget. He will be especially missed by his fellow board members.

BASKETBALL SQUAD OFF TO MARINETTE

Ralph Dodge, a teacher in the local high school, left this morning for Marinette in charge of the Escanaba high school basketball squad, which meets the Marinette team, there this evening, as the main bill of a double header.

Of tonight's game the Marinette Eagle-Star says: "The first team has been practicing steadily this week in preparation for the game. This spirit was not smothered by the Oconto game although it was a hard pill to swallow. The Escanaba squad is fairly fast but nevertheless were defeated at home by Marinette high. A good game is expected and also a good crowd."

PECULIAR FACTS ABOUT WELL KNOWN PEOPLE

Washington, March 3.—Senator Lane of Oregon, is besieging Vice-President Marshall with requests to be relieved of "my onerous duties as a member of the committee on the disposition of useless papers in the executive departments."

CLUB WOMAN SUBMITS PERTINENT QUESTIONS ON WATER SITUATION

NOT CONVINCED THAT WATER FURNISHED HERE HAS ALL THE VIRTUOUS

SEVERAL THINGS SHE WANTS TO KNOW

Assumes a "Show Me" Attitude That Indicates She is From Missouri

The assurances of the city physician that the water used in Escanaba is not responsible for the many cases of winter cholera and that the water cannot be otherwise than pure because of the treatment it receives, is not sufficient to convince at least one resident of this city. In a communication headed "Show Me," a prominent club woman of the city writes "Granted that the city water is pure, why is there so strong an odor of creosote when a quantity of hot water runs through the faucets? "Why is there a dark, greasy streak on the tub after the water has remained for a time undisturbed? "Why, after boiling the water is there a green sediment in the bottom of the pan? "What is the green, oily substance found floating on the water underneath the ice in our bays? "These conditions existed in the cities of Marquette and Gladstone. What was done to alter conditions? "Are there any cases of winter cholera in Escanaba? or an increasing number of obstinate stomach troubles? "Have any deaths, directly or indirectly been caused by winter-cholera?"

Missourian."

The Mirror is unable to answer the communication satisfactorily and it is referred to the city physician.

KNIGHTS OF COLUMBUS PLANNING ON A TRIP

Plan to Take in Class Initiation and Banquet at Iron Mountain Sunday

At a meeting of Escanaba Council No. 640, Knights of Columbus, held last evening, an invitation from the Iron Mountain Council to attend the ceremonies attendant upon the initiation of a large class there Sunday and a banquet in the evening, was read. The invitation will probably be accepted by a hundred or more of the knights, who will leave on the early train Sunday morning for Iron Mountain and return after the banquet that evening. The meeting of last night was largely attended. A luncheon and smoker was enjoyed.

BOWLING CONTEST

Owing to the illness of Mrs. J. E. McCarthy of the Delft A team, the bowling clash between the Delft A team and the School Board which was scheduled for 8 o'clock tonight has been postponed until Monday night.

Mrs. G. Guindoin of Perronville is visiting in the city.

FRENCH SAY GERMANS ARE CHECKED; TEUTONS CLAIM BIG ADVANCES

FIERCE ATTACK MADE IN REGION OF VERDUN WHICH FRENCH SAY IS CHECKED

GERMANS PUSH LINE SOUTH OF DOUAMONT

Violent Artillery Fire in The Wouvre Region Does Great Damage

(By Associated Press) Paris, March 3.—The bombardment of Verdun and an attack on the part of the Germans is chronicled in today's official statement. The fighting continues with redoubled vigor near Douamont where several fruitless endeavors of the Germans were repulsed with heavy losses to the attackers. The Germans reached the village of Douamont and the village of Vaux was also attacked but the Germans were checked by the French fire and retired leaving many dead behind them. The bombardment in the Wouvre region continued with increased intensity in the North section but the French forces held the Germans in check with heavy artillery fire. The artillery of the Germans is active in the vicinity of the village of Haucourt. Berlin—The Germans have pushed their lines past Douamont to the west and south, says the German official statement today. More than 1,000 prisoners are reported as captured as a result of yesterday's attacks and a number of heavy guns were taken. It is maintained here that the French loss has been terrific while the German loss is comparatively light.

RELATED REPORT OF A PURSE SNATCHING

Milwaukee Visitor Loses Handbag Which Contained No Money

Mrs. Henry Purse, of Milwaukee, who was called here recently by the death of a relative, was the victim of a purse snatcher on Wednesday evening but the theft was not reported to the police until last evening. Mrs. Purse was walking along North Mary street when she noticed a youth walking towards her. She paid no attention to him until, as he came abreast of her, he snatched at her hand bag, which she had over her arm. She clung to the strap but the leather gave way and the thief made off with the purse, which fortunately contained only a few receipts, etc. Later an officer gave chase to a man who is now believed to have been the guilty person.

RELIEF OF WAR VICTIMS

(By Associated Press)

Washington, D. C. March 3.—A bill appropriating \$2,000,000 for the relief of the inhabitants of Poland was introduced by Senator Hitchcock in the United States senate today.

Foreign Ships Must Conform to The LaFollete Seamen's Law

VESSELS OF OTHER NATIONS WILL BE PLACED ON SAME FOOTING AS AMERICAN SHIPS BEGINNING TOMORROW, AS REGARDS PERSONNEL OF CREW AND SAFETY APPLIANCES.

Washington, March 3.—Foreign ships tomorrow will be placed on the footing of American ships as respects personnel of crew, rights of individual seamen and safety appliances. The LaFollette seamen's bill goes into effect as to non-American ships. The power of the United States to refuse clearance papers to such vessels as do not conform to the requirements of the law is ordered to take effect tomorrow. Enforcement is in the hands of the department of commerce. Hereafter, foreign as well as American vessels must live up to these requirements. No more passengers shall be carried than can be accommodated by the life boats and life rafts. Seventy-five per cent of the crew must be able to understand the orders of the officers. Forty per cent must be able to swim—at least 19 years old and with three years' experience, except as they are qualified by special examination conducted by the department of commerce. A sailor may leave his ship in port at will; and the provisions of treaties and other international agreements and other international agreements (Continued on Page Two)

GREAT INTEREST IN FIRST AID LECTURES AND DEMONSTRATIONS

DR. WILLIAM T. DAVIS TALKS TO EMPLOYEES OF THE NORTH-WESTERN

CAR LEAVES FOR ANTIGO SATURDAY

Last of the Lectures Will be Given in the Car at 7:30 O'clock Tonight

Much interest is being shown in the work of the American Red Cross work as evidenced by the large crowd that assembled last night to hear the lecture given by Dr. William T. Davis who is in charge of the car. More than 40 men were present. Today at 1 o'clock Dr. Davis gave a lecture and some practical demonstrations of first aid work at the Northwestern shops. The lecture lasted until 2 o'clock and was attended by all the men employed in the shops. The last of the lectures will be given at 7:30 o'clock tonight in the car.

LEAVES FOR MENOMINEE

Rev. Guy V. Hoard to Speak in Old Charge There This Evening

The Rev. and Mrs. Guy V. Hoard and daughter Miss Doris left this morning for Menominee where they will attend the seventh dedication anniversary services of the Methodist church there. Mr. Hoard was formerly pastor of that church. The Ladies Aid society of the church will entertain at a banquet in the church parlors tonight. Mr. Hoard will respond to the toast, "Greetings." The Rev. R. D. Hopkins of Menominee will be toastmaster. Other toasts will be given by E. P. Bowers and Miss Aurelia B. Potts. On Sunday Mr. Hoard will deliver sermons both at the morning and evening services. He will return to the city on Monday.

The car will be taken to Antigo tomorrow morning where the last of the lectures to the Northwestern employees will be given. After leaving Antigo, the car will go over the territory covered by the Erie railroad and complete the tour in New York in April.

Plead for Army-Navy White House Reception Invitations

BRILLIANT RECEPTION OF TONIGHT BY PRESIDENT AND HIS BRIDE IS SOCIETY FUNCTION WHICH ALL WASHINGTON WOULD BE MUCH PLEASSED TO TAKE PART IN.

Washington, March 3.—Spectacular to see and meet Uncle Sam's handsome land and sea officers. For weeks the White House clerks have been besieged from all sources to use their best efforts toward invitations for the event. But these beseechings have proved futile since the first reception held this winter. Fairly overwhelmed by the crowd which swept into the White House at the Pan-American reception, the President and Mrs. Wilson decided to be much of their own selecting of guests. The President's aides (Continued on Page Two)

Solid shoes at bottom prices—and everything boys and men wear.

Our prices on shoes and everything else we sell HIT BOTTOM when we FIRST mark them, except as now we want to clear out broken lines.

Come in and OUR PRICES will do the rest of the talking.

PETER OLSON

LEISNER IS ENTHUSED OVER WILD LIFE SHOW

Local Game Warden Found Much Educational Profit in Sessions

Herman Leisner, state game warden, who has just returned from Saginaw, is much enthused over the success of the Wild Life show in progress there last week.

Exhibits Are Varied.

According to Mr. Leisner the great exhibits in connection with the wild life show in the Saginaw auditorium included specimens of every wild animal and every wild bird found in Michigan, while the talks by noted wild-life authorities covered a wide range of subjects.

70 Wardens Present

There were about 70 deputy game wardens from all parts of the state present at the wild life show. Michigan's present game restrictions were thoroughly discussed. About the only change in the game laws which will probably be recommended to the legislature as a result of the Saginaw meeting will be the requested repeal of the law which acts a closed season for fox, mink and weasel. The majority of the wardens were of the opinion that hunters and trappers should be allowed to kill these the year around.

The efforts of the Wisconsin fish commission to get the game wardens of Michigan to put up their stamp of approval on the Wisconsin plan of allowing fishermen to use a smaller mesh net, and then compelling them to throw back small fish, met with

failure. The Michigan wardens did not believe that this plan of the Wisconsin commission would be practicable.

Praise Game Department.

The many outside speakers from states all over the Union were high in their praises of Warden Oates for his work which resulted in the Wild Life show and lauded the work which was being done by the game department of Michigan as shown by reports presented at the Saginaw meeting, according to Mr. Leisner.

Attend the "Gypsy Queen" at the high school Monday, March 6. 59-61

NOTICE TO THE PUBLIC

Notice is hereby given that L. W. O'diand has left my employ and no accounts due the F. A. Aronson tailoring establishment should be paid to the said O'diand from this date. Frank Norell has been appointed as manager and cutter for the F. A. Aronson Tailoring establishment and is duly authorized to take all orders and accept payment on all accounts.

Signed, F. A. Aronson.
Dated at Escanaba, Mich., this 28th day of February, 1916. 11

NOTICE

Inasmuch as we have experienced some losses due to the stealing of coal from our docks we wish now to give warning that any man, woman or child caught taking coal from, or around said docks, will be prosecuted to the full extent of the law.

Attend the "Gypsy Queen" at the high school Monday, March 6. 59-61

CHINESE FORAGE AND FOOD PLANTS WILL BE TRIED

Third Plant Introduction Expedition Yields Many Promising Specimens.

BRING IN 3,000 VARIETIES

Jujube, Alkali-Resistant Wild Peach and Marsh Vegetables Are of Particular Interest—Flora of Sections of China and the United States Related.

Washington, D. C.—The third expedition into China to discover new plants suitable for introduction into the United States has been completed by F. N. Meyer, plant explorer of the United States department of agriculture, who has just returned to Washington after a three-year trip in the far East. As a result of this expedition through the center of China, and two previous explorations of similar duration covering extremely cold Manchurian regions and the arid regions of Chinese Turkestan, there have been sent to America for planting and testing for commercial adaptability, seeds, roots, or cuttings of some 3,000 food and forage plants, flowers, ornamental shrubs and vines, shade and timber trees. The previous expeditions brought to America specimens of many cold-resistant and dry-land grains, sorghums, soy beans, alfalfa, and forage plants, and also certain semitropical plants, such as the bamboo, which are now under experimentation to determine their usefulness for the extreme South.

Of the many specimens forwarded to this country during the last expedition, the specialists regard as most significant the jujube, a fruit new to this country, which may be suitable for use in the Southwest; a wild peach resistant to alkali, cold, and drought, the root system of which offers great possibilities as a grafting host; certain Chinese persimmons larger than any hitherto known in this country; a number of aquatic food roots and vegetables which offer promising possibilities for the utilization of swamp land; some thirty varieties of vegetable and timber bamboos; and a number of Chinese vegetables, bush and climber roses, shrubs and trees.

Flora Closely Related.

Of scientific rather than commercial interest is the discovery on this expedition, near Hangchau, of a hickory tree, the first found in China. The existence of this tree, together with the facts that the sassafras and tulip trees are common in both countries and the Chinese tea box tree is closely related to the sweet gum of the South, confirms the fact that the flora of the southeastern United States and that of sections of China are closely related. Another discovery of botanical interest was the finding in a remote and hitherto unvisited valley in Tibet of a hazel tree 100 feet high—a surprising departure from the hazel bush. Elsewhere English walnuts were discovered in a wild state, and the discovery of the wild peach is regarded as significant because it seems to establish that the peach may have been a native of China rather than of Persia, to which its origin has been ascribed. The discoveries of native and hardy oranges and other citrus fruits, a number of which have been brought to this country for breed-

ing work, give added evidence that China was the home of the orange, which was introduced into other countries probably by early Portuguese travelers. Similarly many plants commonly ascribed to other countries, such as the wistaria, chrysanthemum, lilac, azalea, and certain peonies and rambler roses, have been developed by the Chinese, although, because they reach Caucasian use through other nearby nations, their Chinese origin often has been overlooked.

Hunt for Pointers.

The first or experimental exploration for new plants in China in 1905 was undertaken by the department because the wide range of climate, rainfall, elevation and soil conditions in that immense country gave promise that the Chinese, who had been farming successfully in some sections for about 4,000 years, might have found solutions for special difficulties which confronted American farmers in regions of excessive cold, or drought, or alkaline or swampy soils.

The investigators quickly found that China also offered a particularly fertile field for plant introduction work because for many centuries the Chinese farmers, in a crude way, had been selecting seeds and developing improved varieties now ready for commercial use in the United States. In many cases all that is needed is to bring the seed or plant to this country and use it, although in other cases, inasmuch as Chinese methods rarely produce pure strains, some further seed or plant selection is necessary to obtain constant varieties.

To locate these special varieties, however, it is necessary for the explorers to visit not merely individual villages but even to study single farms. There are no seed stores in China and no mechanism for extending the use of improved varieties. Superior varieties grown on one farm often are not used on adjoining farms, and are unheard of ten miles away. The farmer who develops an improved variety guards it jealously and gives seeds or cuttings or scions only to his immediate relatives. In the case of fruits, the Chinese farmer is averse to spraying or other treatment for diseases, largely because his ancestors have never done this, and the adoption of modern methods would be considered irreverent. As a result, excellent varieties which are traditional or mentioned in Chinese literature have either disappeared completely, or are to be found only on isolated farms. A striking example of this is the fact that the section around Shanghai even forty years ago was famous for a special kind of peach, although today this variety has completely disappeared.

Discovers Jujube Tree.

In the last trip the explorer penetrated through the center of China 1,500 miles on foot to the borders of Tibet and returned to the coast by a different route. On this expedition he covered territory the agricultural conditions of which are very similar to those of the southern Rocky mountain regions and portions of the Great Plains.

In this territory the most important discovery probably was the jujube tree, which bears a heavy crop of a brownish fruit, which is delicious when fresh and when dried offers a confection very similar in taste to the Persian date. This tree is of particular interest to the department because it can withstand cold and drought and neglect. The section in which it is productive in China is a semi-arid belt where winter temperatures do not go much below zero Fahrenheit. This indicates that it would be of particular value to Texas, California, New Mexico, Arizona, southern Utah, and perhaps even farther north. Already, several thousand seedlings have been grown at the Plant Introduction garden at Chico, Cal., from the specimens sent to this country, and some of these have borne desirable fruit, which confirms the experimenter's belief that this may contribute a new fruit industry to the sections indicated.

The wild peach discovered in China, and now brought to this country for the first time, is considered of great interest although its fruit is not desirable. Investigation in its native habitat showed that the roots of this plant are not as susceptible as our native peach to alkali in the soil, while it will withstand cold and does not require much moisture. Experiments are under way, therefore, to determine the usefulness of the rootstock of this peach for grafting with different hardy American varieties. If success is achieved, the specialists believe that they can develop peach trees which will make possible the raising of peaches in the southwestern or alkaline sections, and at the same time offer possibilities of peach cultivation in many droughty and cold regions, and possibly even into portions of Iowa beyond the northern edge of our present peach region.

Aquatic Food Plants.

Of special interest also are the collections of aquatic food plants secured in the recent expeditions. These include water chestnuts, water nuts, and a number of aquatic bulbs, as well as the water bamboo. The Chinese, the explorer found, have mastered through centuries of experiments the process of using swamp lands for the raising of food crops, and their success is believed to point to commercial possibilities for some of our swamp regions where reclamation by drainage is not practicable. Whether the American farmer would ever be willing, however, as a commercial enterprise, to grow crops which call for cultivation in water waist deep is, the specialists admit, open to question. The kauba, sometimes called wild

rice or water bamboo, now to be made the subject of experiment, is a vegetable in taste somewhat between grass and asparagus. The swollen stalks of the plant are eaten much like our asparagus. The ordinary bamboo, contrary to the prevailing opinion, is not an aquatic plant, and for successful cultivation calls for fertile and well-drained soil.

In selecting Chinese vegetables for introduction the explorer was greatly limited by the fact that many articles favored by Mongolian palates would be unpleasant to Caucasians. He has sent over, therefore, only those things which promise to add valuable vegetables or fruits to the American table, and also which fit in with a general plan for the introduction of certain food crops which will find a ready market among our Chinese populations. The Chinese, in many cases, are importing large quantities of favorite native foods in canned or dried form from China because they find difficulty in getting them in a fresh state in our larger cities. Some of the vegetables brought over which promise to find a dual market are a number of varieties of vegetable bamboo and improved varieties of pe tsai, the odorless Chinese cabbage, some kinds of which already are on sale as "celery cabbage" in American markets.

Suitable for Cold Slaw.

This cabbage is suitable for cooking or for cold slaw and can be grown wherever ordinary cabbage is raised. A vegetable novelty now under experiment is a Chinese radish with a root as large as a child's head. This is somewhat coarser and inferior in flavor to the small radish, though the Chinese cook it much like turnips, and also pickle it in strips in brine for use as a relish.

This and other explorations have given to this country a Chinese cherry, very successful in California because of its early maturity; and a number of varieties of wild pears and apples, wild almonds, and hardy citrus fruits which offer possibilities for hybridization with American varieties.

The explorer also brought over specimens of the Chinese pistache tree, which is hoped will give the United States a new and valuable tree for the adornment of city avenues in Georgia, Alabama, the Carolinas, Florida, Texas, California, Arizona and Oregon. Plantings were also secured on this trip of a Chinese white pine tree remarkable for its white bark. One of these specimens which Mr. Meyer brought has been planted on the grave of the late minister to China, W. W. Rockhill, who once expressed in the explorer's hearing a wish that this be done. Because of its drought-resisting qualities, this strikingly ornamental tree offers possibilities for the beautification of parks and grounds in Arizona, Texas, New Mexico and California.

Plead for Army-Navy White House Reception Invitations

(Continued from Page One)

having protested that they were considerably embarrassed when prominent persons requested invitations. The President promptly said he would relieve them. Hence all invitations now pass an executive board of censorship, to-wit, that of the President and his bride. As a result the reception tonight promises to be more or less exclusive. There will be the army and navy hosts in large numbers, some favored congressmen and the elite of Washington's society, together with a few perhaps not "so elite." The President and Mrs. Wilson will be assisted in the receiving line by the wives of cabinet officers. During the reception the Marine band will play, and refreshments will be served in the state dining room.

Foreign Ships Must Conform to Lafollette Seamen's Law

(Continued from Page One)

that officers of the United States must aid in searching for him as a deserter and returning him to his vessel is repealed. He can collect, however, but a fractional part of his wages if he quits this way. Senator Lafollette, author of the bill, claims the result of its going into effect as to foreign vessels will be to raise wages for seamen the world over, and to remove the high labor cost handicap of American operators. Sailors shipped in Liverpool, for instance, at a wage of \$12 to \$15 a month, will be within their legal rights in quitting their ship in New York and refusing to re-ship, except at the higher rate of American wages. Already, says Lafollette, the seamen's union is spreading this information among its men, and the ship owners are considering methods of fighting it. The bill has been in effect as to American ships since November 4, 1915.

Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

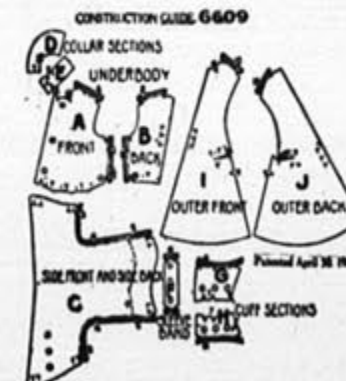

Blouse Costume In Taffeta.

This costume shows a novel blouse and is carried out in Joffre blue taffeta. The blouse closes at the left shoulder and under the left arm, extending below the waist-line and forming a petticoat with an inverted pleat at the sides. The underbody closes at the center-front. In medium size the blouse requires 4 yards 36-inch material, if made separately. The entire costume calls for 8 1/2 yards of taffeta.

To make the underbody, close underarm and shoulder seams as notched. Hem the front, pleat front and back, placing "T" on corresponding small "o" perforations and tack.

Next, gather lower edge of sleeve, between double "T" perforations, first having cut off the lower part of the sleeve to allow for the deep cuff. The side front, side back and sleeve are cut in one piece. Close underarm and sleeve seams as notched. Close cuff seams, leaving outside seam free below small "o" perforation. Gather entire lower edge of sleeve, sew cuff to

sleeve. Gather lower edge of side front and side back and arrange on underbody.

For the outer front and back, first close right side and right shoulder seams as notched; finish left shoulder and side edges for a closing. Form inverted pleat at side seam, bringing "T" perforations together on small "o" perforation and tack to position. Form plait in front and back above side seam, placing single "T" on corresponding small "o" perforations and tack. Arrange on underbody. Tack pleats near side seam to position on underbody; sew an ornament over the

Joffre blue taffeta blouse worn with a flounced skirt and trimmed with braid.

Pictorial Review Blouse No. 6609. Sizes 34, 36, 38, 40 and 42 inches bust. Price, 15 cents. Skirt No. 6610. Sizes 22 to 32 inches waist. Price, 15 cents. Center-backs even.

Bracelet Watch

To be given to the Most Popular Girl in this community

WHO IS SHE?

You may help us find her in the following way:

During this contest write the name of your candidate on the back of each Booster Credit and the name of your favorite Booster on the face of the credit. Each credit counts for as many votes for the Most Popular Girl as the amount that appears on the face of the credit.

The girl receiving the greatest number of votes will be given the Bracelet Watch.

RULES AND REGULATIONS.

No Booster, nor member of a Booster's family can enter this contest.

Any girl from eight to twenty-eight years old may be nominated in this Contest.

The standings in the Popular Girl Contest will be posted on each Monday at our store.

The Popular Girl Contest begins Monday Mar. 6 and ends Saturday Mar. 25.

The results will be announced on the Monday following.

Mrs. A. Kress received the set of dishes to be given as a Buyer's Premium. Another set will be given in the same way at the close of the Popular Girl Contest. Ask us for particulars.

Our Sale Day Special for next week is Can Goods.

Quality is some word—Attached to a vainglorious statement it means nothing. Coupled with forty-three years of hat selling it means LANPHER. The price is \$3.00

The J. F. OLIVER ESTATE C. B. OLIVER, Manager Steam & Heating Coal Phone 199

Peter Radford ON ADVERTISE IT IN AMERICA.

As a citizen of this nation and one intensely interested in its material development, I want to add my approval to the "Buy it in America" movement. Commercial patriotism and business pride are the foundation stones of success in industry and no country can become supreme in commerce and trade unless it fosters a spirit of friendship and partiality for its own products and institutions.

grown products coming to America. Any effort to minimize this economic waste ought to be encouraged. But as a farmer and friend of the manufacturer and merchant I want to suggest an "Advertise It in America" movement.

There are many most worthy organizations working to promote commerce and trade but we seldom find organized effort to promote the press, yet it is recognized as the most powerful agency for progress the world has ever produced.

INFLUENCE OF HABIT.

Childhood and youth know least of the trammings of the accustomed, which is why children find fresh zest in everything and lambskins leap throughout the long and eventful day. Old age comes when habit has placed the seal of ownership on its victim. Kittens never seek the dependable warmth of the inglenook, but cats and other folk who have ceased to live always do. Fault has been found with a Providence that permits wars and pestilences and famines to come along and disturb the settled order of the universe.

A number of new commercial enterprises have recently been undertaken in northeast Siberia. Many iodine works have been established in the neighborhood of Vladivostok, on the shore of the Japanese sea, the iodine being made from seaweed found there in abundance. An interesting distillery for ether has been opened, the bulk of the ingredients being violets and iris blossoms from the Ussuri countryside. A good deal of amber is being collected from the beach along the coast of the Premorsk and many new salt workings have been opened in the government of Irkutsk and in the Lena hinterland in the vicinity of Viluiak.

Columbus discovered America in 1492. America is discovering herself something like 500 years later. This country is learning for the first time how completely endowed with resources is the United States. In the beginning, this country was dependent on supplies from abroad. We have successively attained economic and political independence. Last of all has come the attainment of our financial independence. World leadership in all constructive enterprise now rests with the United States. Leadership entails responsibility. In the next stage of progress, Americans must not only work hard, but think on broader lines than ever before.

Cacao passed as currency among the natives of Central and South America at the time of the European conquest, and that despite a plentiful supply of gold. Joseph Acosta, in 1610, tells us the Indians used "none of their gold or silver for traffic in or buy withal, and unto this day the custom continues among them, that instead of money they use cacao." The Aztecs of ancient Mexico also used "cacao" as small exchange, as many as 8,000 beans being counted legal tender. The value of the beans may be judged from the fact that "a tolerably good slave" could be purchased for 100 of them.

Expert Advice For the Automobile Owner
Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

Can you give us some advice concerning the scoring of cylinder walls by particles of a broken spark plug porcelain getting down inside the cylinders? Is it possible for the broken particles to become granulated by the moving piston so that they act as an abrasive on the cylinder wall?

The chances are very small that a piece of porcelain would get between the piston and cylinder. It would have to be a very small piece, as the clearance between piston and cylinder is usually around .005 inch at the top. The probability is that the porcelain would be blown out with the exhaust.

What is the best way to polish a car? Paste or wax polishes are used to a greater extent than the liquids. In applying them the mistake often is made in rubbing the paste directly on to the body. Much better results will be obtained if the polish is placed in a small cloth sack or in a pocket formed by a piece of cloth. Then by rubbing the sack against the body the polish will ooze out through the pores in the cloth, and in this way the paste will be applied evenly all over the body surface. The polishing cloth which is used after the paste has been applied really gives the body its polish.

Why are not the disk type motorcar wheels worn more instead of the wire or wooden wheels? What are the advantages and disadvantages of this type?

There is little advantage to be gained by disks instead of, or in addition to, spokes. Two or three years ago racing drivers tried covering their wheels with metal disks to reduce wind resistance, but found that this affected the steering to too great a degree.

When cold weather set in I put two quarts of alcohol and one pint of glycerin in my radiator, and whenever I refilled it I mixed 25 per cent of alcohol with 75 per cent of water. The weather has become warm since I put in the mixture and the alcohol must evaporate more quickly than water. How can I tell how much alcohol there is in the radiator?

If there has been no leakage in the cooling system it will be sufficient to add alcohol because the amount of water that has been evaporated is negligible. For the reason that alcohol has a much lower boiling point than water, and, of course, there is no danger of the glycerin evaporating. But if some of the solution has leaked out and you know the specific gravity of the original mixture you may easily determine whether to add alcohol or water or both by means of a hydrometer. Take the specific gravity of the radiator compound and then add water or alcohol to bring the gravity to its original value. In case you do not know the specific gravity of the original mixture you might calculate it as follows:

Specific gravity of mixture—percentage of water by weight plus the percentage of alcohol by weight times .83 plus the percentage of glycerin by weight times 1.27.

How can a circulating system be cleaned with soda? Dissolve about one-half pound of soda in five gallons of water and pour it into the radiator and cooling system, the solution having been strained before using. The cooling system also

should be drained before application of the solution. Then run the motor for a few minutes, after which the system should be drained. Then pour in some clear water, run the engine again and drain it out. It should then be as well cleaned out as such a solution can clean it.

Can you tell me how to mix a good polish for my car? A recommended polish is mixed as follows: Mix one pint of turpentine with an equal amount of wood alcohol. Then mix together one quart of water and one quart of paraffin oil. The latter two will not mix readily, and the best way is to put them in a gallon bottle and shake vigorously until the best possible union is obtained. When this is done add the previously mixed alcohol and turpentine and shake the whole until thoroughly mixed. Apply this polish with a soft flannel cloth and rub the surface dry with another. The polish is likely to separate after standing, and it should be well shaken each time it is used.

How often should the timer be oiled in my electric system? One or two drops of oil every 1,000 miles is sufficient for the bearing pin on the breaker arm.

What is the proper width or opening of the slot in a diagonally cut piston ring? Does it vary with the size or is it standard for different cylinder diameters? The size of the slot in a diagonally cut eccentric ring does not vary with the diameter of the ring, but also varies with the different manufacturers. Some only take out the width of the cutter, which will be approximately .015 inches. Others make a practice of taking out as much as 1.4 inches in all sizes. The latter is true, especially for two cycle motors of the marine type.

Would a large size bearing which is constantly bathed in gasoline, revolving at a speed not over sixty or seventy revolutions per minute, with a light load, be likely to heat up if no lubricant other than gasoline were used? High grade gasoline has no lubricating qualities. In other words, it has no viscosity. The function of a lubricant is to separate metal surfaces and prevent friction, which produces heat. High grade gasoline is very volatile and evaporates readily, leaving no residue. The lower grades contain more or less crude oil, and possibly you have in mind the use of the lower grades.

Can you give the recipe of a few of the explosive chemicals which would be good to prime motors in case of hard starting in cold weather? A good grade of gasoline, one which will vaporize quickly, is perhaps as good as anything you might compound. The use of mixtures of ether and gasoline or keric acid and gasoline will give a more forceful explosion, but their use is not advised. If you do wish to use these chemicals the keric acid should be mixed in the proportions of one ounce to five gallons of gasoline and the ether three ounces to five gallons.

An Advance Display of Spring Apparel

Our Women's remodeled garment section under the new management now in readiness for the coming season with the finest early showing of

Women's Suits and Coats

Never before such beautiful showing so early in the season—never had better assortments to show. It may be a little early to buy, but not to early to get an advance peek at the new styles of the season. They are without question the prettiest we ever had. Our clientele naturally expects us to show them a greater variety at a little less in price than they can find elsewhere. We are not going to disappoint them this year.

Why Not Come in and Get Acquainted; will be Glad to Show the New Garments.

NEW SUITS

Individuality is the keynote of our new selection of our new Spring Suits. Every day they arrive. Poiret Twill, Grou de Londres, Taffetas, Faille Silks, Gaberdines, Serges and Poplins and Velour are among the many varied materials. Jackets are jaunty; skirts have just the right flare; season's best models.

NEW COATS

Among our New Coats are decidedly chic models of Charmeuse, Faille, Taffeta and Grou de Londres. There is also a comprehensive showing of smart coats made of Viennas, Tweeds, Gaberdines and Cheviots in plain and plaid effects, in spring season's most popular and exclusive models.

The price range of our New Spring Merchandise is one that readily adapt itself to the requirements of any purse

The Pulling Power of a Dollar

IT IS an easy matter to open a Savings Account with this bank. One Dollar, or more, will do it—and that first dollar will act as a magnet and draw others from where it came.

We offer our depositors **Safety Security Strength**

In selecting a bank, these three strong essential features should be seriously considered. We share our profits with our Savings Depositors by paying 3 per cent compound interest.

MISTOOK OFFICER FOR A HOLDUP MAN

Youth Reports Attempted Holdup To Officer Who Pursues Two Suspects

That two desperate holdup men had been arrested last night after a hard fight by night Patrolman T. J. Curran, was the current rumor about the city today. The facts in the case are not nearly so startling.

About 9 o'clock last night John Curran, a youth of about 20 years, reported to Officer Curran that an attempt had been made by two men to hold him up. It appears that as he was passing the two men in question one of them made a grab for them but the young man was fleet of foot and got away.

The officer, changing his police man's cap for another went in search of the alleged holdup men and in that section of the city in the rear of the postoffice, he sighted two whom he believed might be his quarry. He gave chase and the two bolted. He fired one shot and the men came to a halt. They showed fight but it soon developed that the two men had feared that the pursuing officer was himself a holdup man and after satisfactory explanations the two were allowed to proceed on their way.

BACK ON THE JOB AGAIN

Michael Snyder Has Completely Recovered From Attack of Small-pox

Michael Snyder, of the firm of Snyder brothers, who has been suffering from small pox the past four weeks, has entirely recovered; the quarantine has been removed from his home and the ever smiling "Mike" is back on the job again, greeting his many friends.

UNITED STATES DEPARTMENT OF AGRICULTURE
