### DR. LINDHOLM IS IN PARIS AFTER BEING WOUNDED

Prominent Escanaba Physician Will be Sent to a Division as A Consultant on Specialty Surgical Work Shortly.

A card received here today from Dr. H. O. Lindholm, shows the popular Escanaba physician and surgeon is now stationed in Paris after having been through the last few months' big drives as battalion surgeon, until he was wounded himself. Dr. Lindholm says he has seen the Hun get lots of hell in that time. Dr. Lindholm expects to remain in Paris several months and then be sent to a division on specialty surgical work as a consultant.

He sends his kindest regards to all Escanaba friends and a vein of cheerful optimism runs through his communication that is characteristic of practically all American letters.

### CAMOUFLAGE NETS MADE BY WOMEN IN FIGHTING REGION

Screening of Artillery is Considered One of Most Important Works Done Behind the Front.

Behind American Lines in France, Oct. 23—Seven hundred French women are employed in the American Camouflage station here making nets to screen from observation American batteries and machine-gun sections. There was a burst of patriotic song as The Associated Press correspondent entered the large building where they work, for many of them sing as they sew.

The screening of artillery is the

most important work of camouflage as it is the main reliance in deceiving the aerial observer and camera and in preventing the enemy from locating our batteries.

For this purpose huge camouflage nets are provided, of wire and fish-net, which cover the guns like a great horizontal tent. In the netting are tied bunches of green burlap of the color as the surrounding grass or foliage. And thus viewed from above, the overhanging green net merges the battery into the landscape of trees and turf.

### POISON GAS PLANTS IN MANNHEIM ARE BRITISH TARGETS

Extensive Damage Has Been Done By Aerial Raids Made By The British Flyers During The Night Season.

London, Oct. 22—The Badische poison gas plant at Mannheim, in the Rhine Valley, is a favorite object for "strafing" by the British airmen.

Three consecutive raids upon it by night have extensively damaged it. The raiders' bombs partly destroyed the sulphuric acid and nitric vitriol factory and the aniline department. Other buildings of the plant were wrecked.

The other factories at Mannheim have been heavily bombed eleven times.

A heavy death toll has attended numerous air attacks on Cologne and heavily repaid in their own coin for their murderous work on London and Paris. The factories and railway station at Saarbrücken have been bombed ten times by the British; Karlsruhe, five times; Frankfurt-on-the-Rhine, three times; Stuttgart, and Zweibrücken, twice.

Most of the air attacks on the Rhine provinces have been directed against the key railway centers, notably those at Thionville, have been raided forty-six times. Photographs taken by the attacking airmen confirm the extent and magnitude of the damage done.

War traffic through Metz-Sablon has been materially reduced as a result of the frequent raids at a time when quick and regular transport of munitions was vital to Germany's military needs.

The big industrial centers on the Rhine contain, in addition to important railway junctions, some of the largest munition, poison gas and electrical plants in Western Germany. These military objectives have been attacked repeatedly with marked effect.

### MISS SHERBURNE STARTS PROJECT IN MARQUETTE

Assistant Field Secretary For American Bureau Made Hosts of Friends While In Escanaba.

Miss Ruth Sherburne, assistant field secretary of the American Recreation Bureau, left this morning for Marquette after having successfully completed her mission in Escanaba, culminating in the city council establishing a Recreation commission.

Miss Sherburne has labored most diligently, in some cases against rather discouraging conditions, but through her campaign here maintained a cheerful, optimistic attitude born of a naturally sunny disposition which won for her many warm personal friends during her activities here.

The task of concentrating public attention on the matter in hand, in the face of war conditions, an epidemic which just now holds the majority of the best thought of the community, and the natural opposition that usually develops among men when women are "doing things"—this task was a great one here and the fact that the proposition was put through the city council with but one dissenting vote, is a mute but most eloquent tribute to the infinite tact, patience and perseverance of Miss Sherburne, who seems to have been splendidly endowed by nature for carrying on just this sort of enlightening, uplifting public welfare work.

Her many friends wish her success in her mission in Marquette.

### READY TO OPEN NEW RAILWAY IN ALASKA SHORTLY

# IMPORTANT

**In Order to Combat the Epidemic of SPANISH INFLUENZA Which is Now Most Prevalent in Our State, and in Compliance With the State Board of Health, the Local Board of Health Requests That the Following Precautions be Observed.**

1. It is especially important to beware of the person who coughs or sneezes without covering his mouth and nose. It also follows that one should keep out of crowds and stuffy places as much as possible, keep homes, offices and workshops well aired, spend some time out of doors each day, walk to work if at all practicable—in short, make every possible effort to breathe as much pure air as possible.

**"Cover up each cough and sneeze, If you don't you'll spread disease."**

2. Where crowding is unavoidable, as in street cars, care should be taken to keep the face so turned as not to inhale directly the air breathed out by another person.
3. In guarding against disease of all kinds, it is important that the body be kept strong and able to fight off disease germs. This can be done by having a proper proportion of work, play and rest, by keeping the body well clothed, and by eating sufficient, wholesome and properly selected food.
4. It is very important that every person who becomes sick with INFLUENZA should go home at once and go to bed. This will help keep away dangerous complications and will, at the same time, keep the patient from scattering the disease far and wide. It is highly desirable that no one be allowed to sleep in the same room with the patient. In fact, no one but the nurse should be allowed in the room.
5. Call a physician and take only such medicine as is prescribed by the doctor. It is foolish to ask the druggist to prescribe and may be dangerous to take the so-called "safe, sure and harmless" remedies advertised by patent-medicine manufacturers.
6. The ordinance relative to spitting on the sidewalks and in public places, will be rigidly enforced.

arrival of the first passenger train from Anchorage on Uncle Sam's government railroad, the first stretch of the route to Fairbanks to reach completion.

Seward is the "ocean end" of the new line. Work is going ahead on the road above Anchorage, which is near the upper arm of Cook Inlet, and below Fairbanks, the proposed terminus just over the Alaska range and north of the Tanana, a branch of the Yukon river. The two gangs of railroad builders are now 190 miles apart.

Much of the winter traffic from interior Alaska will probably come out over the line of the new road this winter despite the fact the steel is not connected, it is believed here. The commission has gangs of men at work making a winter trail between the two ends of the roads. Trains will probably be operated from Fairbanks and Anchorage to the ends of the steel rails all winter. Travelers will "mush" the intervening distance on foot.

# Mind your eye!

A BUG darts at your eye. Your eye closes—before you think. Reflex action. Your eye telegraphs to your brain "Bug coming!" Your brain flashes back "Close up!" You aren't conscious of the exchange of messages—but your eyelids close. Force of habit protects you. Habit and reflex action save time and effort in numberless ways, and keep your brain clear for the real problem.

Habit, for example, sets the hour when the delicate departments of your digestion combine in a supreme reflex action to move your bowels. Nujol cultivates that habit. If they move regularly all you know is that you feel well.

If they don't move regularly, you know it—the habit has failed.

The food waste stagnates in your large intestine, decays, generates poisons, which are absorbed into your blood and carried all over your body. Your next effort will be more difficult—and soon the bad habit of constipation will be established. The good habit of regularity is replaced by the bad habit of irregularity—reflex action is paralyzed, and the waste accumulates.

Don't exchange a good habit for a bad one. Nujol builds such a strong habit that it offers a maximum of resistance to the clogging of the intestines. Don't wait until you're "sick" to start. Nujol night and morning will give you a reflex action as "regular as clockwork." Be as proud of your inside cleanliness as you are of a clean face and clean teeth.

Pills, purgative mineral waters, salts, castor oil and other cathartics, weaken and cause strain. They increase constipation. Nujol acts easily, harmlessly, naturally. Your druggist has it.

## YANKS CONSTANT SOURCE OF NEW IDEAS TO FRENCH

Are Vastly Impressed With the Way American Soldiers Take Their Work and the Unexpectedness of Their Play.

Behind Allied Lines In France, Oct. 23—The American soldier is a source of continual interest to the troops of the other nations with whom he is

fighting side by side, and to the people of France. They have been vastly impressed by the wholehearted way in which he carries out his duties. On parade and on the march he regards his work with the utmost seriousness, and every American column that passes leaves an impression of set, resolute faces very different from the nonchalant attitude of the British Tommy. In his moment of repose, the "Yank," as he is called everywhere in France, looks for a building with a short flight of steps to the door, foregatherers there with his friends, and eats nuts and chocolate in prodigious quantities.

Of an evening the "Yank's" regimental band plays to him. The selections are not "uplift stuff," but they cheer the tired soldiers amazingly. Perhaps a couple of soldiers will jump up and do a one step together up and down the sidewalk.

The bodies of Mr. and Mrs. Frank Colekkey, both victims of Spanish influenza, were taken from the Allo undertaking parlors to Schaffer this morning, where double funeral services were held at 9:00 o'clock. This is one of the saddest cases growing out of the present epidemic. Five small children are left by this family, the oldest being eight years and the youngest 30 days. The wife died two days after her husband and did not know that he was dead.

## 50,000 CHINESE ARE EMPLOYED BEHIND THE ALLIED LINES NOW

London, Oct. 23.—The Allies have employed 50,000 Chinese behind the fighting lines in France principally for road and railway building, blacksmith and carpentry work. Although China declared war on Germany almost a year ago the Chinese are made to understand that when transported to France they will not be used in the fighting lines.

Coolies are paid about \$13.50 per month and pay for other laborers will range upward to about \$27 a month for skilled men. In addition they are given \$250, a fabulous sum for coolies, as a bonus for embarking for France, \$75 in case of injury and in case of death \$150, is given to the next of kin.

### GERMAN PRISONERS IN-CAGES EXTEND NEW ONES WELCOME

Behind the British lines in France, Oct. 23—When the British were bringing back hundreds and thousands of prisoners in the last advance to the Hindenburg line often times batches of prisoners in the cages would laughingly welcome a new contingent. One cage was situated in a ravine and the Germans could see more prisoners over the brows of the hills. As crowds of them came in sight cheers would go up from the prison cage and as the men arrived at the enclosure they would be greeted with handshakes and smiles.

### SWITZERLAND TO BLOCK GERMAN ON TRADE MARK

Regulations Adopted Intended To Prevent German Goods From Coming Out Under a Swiss Trade Mark After the War.

Washington, D. C. Oct. 23—Regulations intended to prevent German owned firms with factories in Switzerland from exporting their product under the guise of Swiss goods after the war, have been adopted by the Swiss chamber of commerce in connection with the establishment of a new national trade mark for all Swiss exports. The regulations provide that use of the trade mark be confined to firms two-thirds of whose capital is Swiss and the goods actually are made in Switzerland exclusively by the Swiss. It is known that many firms operating in the country which are ostensibly Swiss, have been established by German capital, or acquired from their original owners by German manufacturers, in order that an apparently neutral outlet might be secured for German-made goods in the post-war period. The president of the Geneva Chamber of Commerce is quoted in advices received here as stating that control of these will not be easy, but that the Chamber is alive to the probability of improper use of the trade mark and Swiss manufacturers are being asked to bring cases of this kind to official notice.

### REGISTRANTS WHO HAVE GRIP SHOULD AVOID CITY HALL

Needless Exposure of Themselves and Others Has Developed Among Men Seeking Aid in Questionnaires.

In the work of aiding registrants in the filling out of their questionnaires, members of the legal advisory board today found that several men came in who were suffering from grip, or its symptoms and thus unnecessarily exposed themselves and others to the danger of spreading the disease. This afternoon it was stated that it was not necessary for these men to appear at the city hall. Other means will be found for aiding them and as a public duty they should not go to the city hall while feeling ill. It is probable that the board of health will make some rule covering the situation which has arisen and announcement of the plan will be made later.

### FOOD PLEDGE DRIVE IS POSTPONED UNTIL FIRST OF DECEMBER

As a result of the prevalence of Spanish influenza, the local Woman's Committee of the council of National Defense has postponed its campaign for the renewal of food pledge cards, which was to have started Oct. 23. The campaign will be undertaken the first week in December by which time it is hoped that the disease will have abated sufficiently to permit of a speedy conclusion of the work.

### "OUR BILL" GOING SOME.

"Bill" Herbst, one of the most popular boys that ever enlisted in this city is now on Long Island and says he expects soon to go across. He is going to drive a tank and if he does it as well as he has everything else he has ever tackled, he will cut a broad pathway right to Berlin. This capable young man was in the employ of the publishers of this paper from the time he was old enough to carry papers, until he made up his mind that his place was in the service.

### HAVE COLOR IN CHEEKS

Be Better Looking—Take Olive Tablets  
If your skin is yellow—complexion pallid—tongue coated—appetite poor—you have a bad taste in your mouth—a lazy, no-good feeling—you should take Olive Tablets. Dr. Edwards' Olive Tablets—a substitute for calomel—were prepared by Dr. Edwards after 17 years of study with his patients. Dr. Edwards' Olive Tablets are a purely vegetable compound mixed with olive oil. You will know them by their olive color. To have a clear, pink skin, bright eyes, no pimples, a feeling of buoyancy like childhood days you must get at the cause. Dr. Edwards' Olive Tablets act on the liver and bowels like calomel—yet have no dangerous after effects. They start the bile and overcome constipation. That's why millions of boxes are sold annually at 10¢ and 50¢ per box. All druggists. Take one or two nightly and note the pleasing results.

### MRS. J. H. COLLETTE PASSES AWAY IN THE CITY OF GREEN BAY

The wound is not reported to be dangerous. Clarence Holzgrebe is the young man who has written so many interesting letters to the Mirror and his many friends here hope for his speedy recovery.

### SITUATION IN CAUCUSUS IN MOST TRAGIC

Turkish Domination Proves to Be one of the Most Humiliating Blows Ever Delivered To the Mixed Races.

Moscow, Oct. 23.—Of all sad situations growing out of Russia's dismemberment, that in the Caucasus is most tragic. By the terms of the Brest-Litovsk peace treaty Russia ceded the provinces of Kars and Batoum to Turkey. But Caucasus which is a conglomeration of races, mountain tribes and feuds, was as strongly opposed to Turkish domination as it was to Bolshevik rule. The Armenian massacres still fresh in their memories, the Caucasian people refused to recognize the treaty and united to fight Turkish aggression. But they were weak and unorganized and could not withstand the onslaught of superior Turkish armies directed by German commanders. Their position was still further aggravated by persistent propaganda of the Bolsheviks who were anxious to rush an opposition and sowed dissension wherever possible. The hastily formed independent Trans-Caucasian Republic soon crumbled to pieces, Georgia alone, of all the component states, retaining a semblance of government and declaring itself an independent Republic. The new-born state was in no position to fight the Turks single-handed and was compelled to negotiate with Turkey a peace that makes virtually Georgia a Turkish protectorate. "United Trans-Caucasia has ceased to exist," writes I. Tzereteli, a member of the new Georgia government. "The southern part of it, populated mostly by Americans, has been occupied by the Turks; eastern Trans-Caucasia is willing to recognize voluntarily the power of Sultan. Georgia is all that was saved from free Trans-Caucasia, that is not yet enslaved by Turkey."

### AMMONIA ORDER IS NOT APPLICABLE TO MICHIGAN ICE RINKS

Calumet, Mich., Oct. 23—The federal order that ammonia be not used the coming winter in providing artificial ice for skating rinks hardly will hit the half dozen ice rinks of northern Michigan. The northern Michigan climate is such that artificial ice need not be depended upon. At Calumet there are two enormous rinks that will reopen this year, while Mohawk, Houghton and the two Soos, both Michigan and Canadian, have big covered skating palaces where hockey history has been made.

### MICHIGAN GIVES OPPORTUNITY TO HUNDREDS OF MEN

Lansing, Oct. 23—In a dozen or so Michigan colleges, including the University of Michigan, thousands of young men are now training under the Students Army Training corps plan, to lead the men of the nation in the great war for liberty and humanity. The number of applications received at every school on the S. A. T. C. list of the United States far exceeded the allotted number of places, the patriotic spirit and desire to serve being emphasized in a way that occasioned the
