

KAISER RENOUNCES FUTURE RIGHTS

RELEASES OFFICIALS FROM OATH OF FEALTY TO HIMSELF OR STATE

Understood to Be Awaiting Arrival of Wife in Holland Before He Leaves That Country for "Elsewhere."

NEW LIGHT ON AUSTRIA

Ludendorff Said to Have Threatened War on Her If She Concluded a Separate Peace with Allies.

(BY ASSOCIATED PRESS)

Amsterdam, Nov. 30.—William Hohenzollern has definitely renounced all his future rights to the crowns of Prussia and Germany and has released all officials and officers from their oaths of fealty, according to the text of a document signed by the former emperor, which is quoted in a telegram received here from Berlin.

Awaiting Wife's Arrival

Amerongen, Holland, Nov. 30.—It is understood here that William Hohenzollern has been awaiting the arrival of his wife before going elsewhere. Germans in his suite believe he will return to Germany and optimistic enough to think that he will return to resume his throne.

British Army Threat.

Amsterdam, Nov. 30.—In response to a threat by British army commanders that hostilities would be resumed unless the conditions under which British prisoners are given into the allied lines was remedied, a Berlin telegram declares that everything is being done by Germany to assure the orderly return of prisoners.

Austria Forced To "Stick."

Copenhagen, Nov. 30.—People of prominence in Vienna, who are in touch with the foreign department there, assert that in 1917 when Count Czernin, then foreign minister, sought, by Emperor Charles' order, to induce emperor William to conclude peace, he was referred to the supreme German headquarters. When the count pointed out that Austria was exhausted and might be compelled to make a separate peace, Gen. Ludendorff, striking the table with his clenched fist exclaimed:

24 DEATHS IN CITY DURING THIS MONTH

A practically complete report of the number of deaths in Escanaba during the month of November, on file in the office of the City Clerk Carl Anderson, shows a total of 24 deaths. Sixteen of this number was due to influenza and pneumonia and conditions growing out of one or the other of these diseases.

Camp Custer Boys Home For Holiday

George Potvin and George Greis, two Camp Custer men who spent Thanksgiving with relatives here, are believed to be the first two men to be mustered out of the service at that camp.

INFLUENZA IS SPREADING IN GLADSTONE NOW

Over One Hundred Cases Have Developed Within the Last Two Weeks Though But One Death Has Occurred.

CARE IS BEING URGED

Many People Are Taking the Serum Treatment in the Hope of Preventing Infection from Others.

According to information from Gladstone this morning the influenza epidemic there continues to spread, over 100 cases being reported now, about half of them having developed during the past week.

The Gladstone health authorities have the lid clamped down on all public gatherings, the schools have been closed and every precautionary measure is being brought to bear, and yet the disease continues to make headway.

Cases Rather Mild.

One gratifying feature, however, is the fact that the cases are not nearly so severe as were those of the previous epidemic and up to this time there has been but one death from pneumonia reported.

The people of the upper bay city are pretty generally submitting to vaccination, which is offered free to all who desire to take it. The serum treatment is administered by local physicians as well as the city health officer and no charge is made.

The same instructions are being issued to the people of that city as were urged upon them before. Briefly they are:

- Don't run yourself down by worrying that you may get the disease.
- Don't get into a crowd of people.
- Don't remain on your feet if you are in the least ill. Go to bed and call a physician. He will advise you further what to do.
- But above all—DON'T WORRY.

SAM HARRISON IS DANGEROUSLY ILL IN WASHINGTON

Well Known Railroad Man Who Went to National Capital Recently Is Believed in Critical Condition.

Samuel N. Harrison, well known manager of the Wisconsin & Michigan railroad, who resigned to accept a position on the railroad adjustment board at Washington, is reported to be dangerously ill in the nation's capital, says the Menominee Herald-Leader. Mrs. Harrison received a wire this forenoon conveying the message of Mr. Harrison's illness, and summoning her to his bedside.

No details were given, but it is understood that he is suffering from pneumonia which followed an attack of influenza.

Mr. Harrison left Menominee a week ago Sunday night to take up his work at Washington, feeling in the best of health.

Mrs. Harrison and daughter, Lucy, left for Washington this noon.

Miss Dolores Mallico of Negaunee is the guest of her many Escanaba

300 CHRISTMAS PACKAGES TO GO FROM ESCANABA

Red Cross Headquarters a Busy Place Today While Cartons Were Prepared For Shipment to Men Overseas.

OTHER BRANCHES BUSY

Remainder of County Expected to Send About 300 Cartons Also to Delta County Men Who Are in France.

Six o'clock tonight marks the last minute at which packages can be received at Red Cross headquarters for shipment to the boys in France if they are to receive them by Christmas. Today was another busy day. Up to noon approximately 275 Christmas packages had been brought in and it was expected that this number would be increased to at least 300 by the closing time tonight. If it is possible for the local postoffice to handle packages after six o'clock tonight, that will be done but it is believed that practically all that are intended to go from here, will be in by that time.

Every package must be inspected and in many cases the cartons must be repacked for greater safety. It all takes time and it is urged that parents who wish to remember their boys at the front with a Christmas package, give the inspectors as much time as possible.

With approximately 300 packages going from Escanaba alone and with about 25 other branches in the county also doing their own inspecting and mailing of packages, it is believed that not less than 600 or 700 packages will be sent from Delta county.

The volunteer workers at local Red Cross headquarters have been extremely busy for the last two days and to day of course, was another busy day. The ladies have manifested a world of patience and been of invaluable aid to parents in suggesting things to send how to pack the cartons, and in giving information of other kinds. They have worked hard and their diligent labor is rewarded with the knowledge that they have been extremely helpful in the way that is fully appreciated and in a cause that makes for human happiness both "over there" and "over here."

PRESIDENT TO MEET CONGRESS ON MONDAY P. M.

Wilson to Address Joint Session a Day Earlier Than Has Been the Usual Custom—Probably Sails on Tuesday.

(BY ASSOCIATED PRESS)

Washington, D. C., Nov. 30.—President Wilson will address the new session of congress Monday afternoon instead of following the usual custom of delivering the address on the second day of the session.

Senate and House leaders have been asked to arrange for a joint session at 1 o'clock Monday afternoon so as to hasten the President's departure for Europe. It is stated that he will sail from New York the day after the address is delivered.

The president's appearance before congress is awaited with interest. Besides discussing the great problems ahead of these countries in the readjustment room a war to a peace basis, it is expected that he will tell congress and the country something of his plans for the peace conference to which he goes at the head of the representatives of the United States.

Kipling Man Held To Circuit Court For Breaking Law

Edward Anderson, of Kipling, who has resided in and around that neighborhood for a number of years, was arrested in Gladstone yesterday in a bad state of intoxication after he had called for a grip at the Soo station. The grip contained five pints of whiskey which was promptly confiscated by Chief of Police Louis Danielson. Anderson was arraigned before Justice Huber and was held to the circuit court for violation of the state liquor laws.

Man Hunting With Dog Heavily Fined By Justice Reeves

Deputy Game Warden Henry Lelner and John Rough yesterday arrested George Shepperd, of Wells, on a charge of hunting deer with a dog. He was caught with the goods and admitted his guilt, paying a fine and costs amounting to \$30 in the court of Justice Reeves, near Rolph.

NIGHT CLASSES WILL ORGANIZE MONDAY NIGHT

Wonderful Opportunity for Further Development of Partial Education As Well As For Aliens to Improve.

BIG CLASSES WANTED

Supt. King Will Figure Out the Advantages for Every Applicant if They Will Explain Their Problems.

Organization of the night classes at the high school on Monday evening ought to bring out a fine gathering of young as well as middle aged folks, both native and alien. Some misapprehension seems to exist in some quarters relative to these classes. Some persons have gotten the impression that they are for manual training only, or for domestic science only, or that the classes are to be conducted for foreigners only.

This is not the case. Courses have been arranged which will afford the widest latitude for mental and physical development. The young men who may have graduated but taken no manual training will find a class for him. If he wishes to take the course in building trades, he will be accommodated. He will not be held back in a class with the man who perhaps reads but little English. He will not be compelled to waste his time going over the things he has already learned.

Chance For Aliens.

On the other hand the alien who has not had sufficient opportunity to study government, arithmetic or any of the ordinary branches of school work, or who does not read English, will find a class for him.

The girls will find a wide range of course along domestic science lines and the same conditions apply as to the male aliens. The classes are for the purpose of doing the greatest good for the greatest number and to be helpful in every respect.

Need Five to a Class.

Supt. King has stated that if each class can be organized with five members he will feel assured of the success to the movement and he, in succession with the school board, and many former students, wants the thing to go through with enthusiasm.

It certainly is a great opportunity for any young man or young woman to make up for lost time, or to overcome educational obstacles over which they have had no control. Every one should be sufficiently interested to recommend this to some other good deserving young man or woman and to take enough personal interest to take the matter up with Supt. King. It's a great thing don't overlook it.

DELTA COUNTY MEN CELEBRATE VICTORY IN MONTREAL, QUEBEC

Photograph in Mirror Window Shows a Number of Former Residents who Help Make Things Hum in Canadian City.

The Mirror is in receipt of a photograph from R. J. Chalut, a former Escanaba boy who is now manager of a branch of the Canadian Pacific railway telegraph service, in Montreal, which shows a group of former Delta county young men on a "victory" truck which paraded ten miles through the streets of Montreal, on Nov. 4 in celebration of the news that the entire allied world aflame with joy.

The float bore a large banner on which is inscribed the following information:

"We are from Michigan. Remember our loans. Over the Top with yours." The photo has been placed in the window of the Mirror office and many Escanabans will probably be able to identify former friends in the group.

262,723 MEN'S NAMES APPEAR ON CASUALTY LISTS

Figures Transmitted By Pershing By Cable Render List of Prisoners Unintelligible to War Department.

175,000 HOME SHORTLY

War Department Intends to Bring Home Men As Rapidly As They Can Be Released By Gen. Pershing.

(BY ASSOCIATED PRESS)

Washington, D. C., Nov. 30.—General Pershing has designated for an early return to the United States, a total of 3451 officers and 79,663 men. General March announced today, 120 units comprising these men will be made public later. In the list appear as entire divisions the 39th, 76th and 87th. The other troops comprise artillery units and army corps troops.

Gen. March gave out the amended casualty reports from Gen. Pershing, giving the official total to November 26 as 262,723 exclusive of prisoners. The figures on prisoners are unintelligible in the cablegram. Gen. March said the total under this head probably would be practically the same as announced last week.

Gen. Pershing reported the following official casualties to November 26:

Killed in action 28,363, died of wound 12,011, died of disease 16,004, died of other causes 1,980. Missing in action 14,290, prisoners unintelligible. Wounded 189,955 divided as follows: Severely 54,751, degree undetermined 43,163, slightly 92,036.

The war department expects to bring home in December between 150,000 and 175,000 men. Gen. March said to accomplish this it will use, in addition to the regular army transports and converted cruisers, enough old battleships and cruisers to furnish a carrying capacity for 25,000 men.

FATHER BENEDICT CALLED TO HOME OF HIS DYING MOTHER

Popular Assistant Priest at St. Joseph's Church Leaves for Middleton, Ohio, Wednesday Evening.

Rev. Father Benedict of St. Joseph's church left Wednesday night for Middleton, Ohio, where he has been transferred out of consideration for the health of his mother who is dangerously ill in Cincinnati. Father Benedict sister died recently of influenza and he was unable to attend the funeral.

He has been here about two months in the capacity of assistant and has made many warm friends during that time, particularly among the young people of the parish, whose interests he has always made his own.

Father Benedict is succeeded here by Rev. John Heitman, who will be the assistant to Father Xavier. Father John as the new assistant is known, has already taken up the work here and will materially lighten the burden of Father Xavier.

PRIVATE FUNERAL OF MRS. UTT TO BE HELD TOMORROW

Arrangements have been made for the funeral of Mrs. M. U. Utt at the family home 904 Washington avenue at 2:30 o'clock Sunday afternoon. The funeral will be strictly private.

Mrs. Utt is survived by both her parents, Mr. and Mrs. John Flemming of Birch street besides her husband and three children, and a brother who lives in France.

Mrs. Flemming is quite ill of the influenza following her ministrations to her daughter.

Senator Newberry To Deliver First Speech December 4

Lansing, Mich., Nov. 30.—Senator-elect Truman H. Newberry is expected to speak in the senate chamber, here, Wednesday afternoon, Dec. 4, addressing the State Association of Farmers' Clubs. Governor Albert E. Steppor will also speak.

This will be the first public appearance of Commander Newberry in the state since the election.

ENGLAND WILL PUNISH KAISER PERSONALLY IF HE REGAINS HIS POWER

Lansing Hunting Party Returns To Home With 6 Deer

A party of Lansing hunters headed by Harold Fuller, son of O. B. Fuller, Auditor General, left Escanaba today for their homes after having spent about two weeks in the woods at the head of Whitefish river. They brought six fine deer back with them.

INFLUENZA HAS SHOWN INCREASE IN RECENT DAYS

Sixty-nine Cases Reported to City Health Officer As Well As a Few Cases of Pneumonia.

CAN BE VACCINATED

Serum Treatment Is Being Administered Free to Those Who Wish to Try Preventative Measure.

Escanaba now has 59 cases of influenza, according to the report of health officer Dr. A. J. Carlson today. It is stated there is also a little pneumonia running along as this condition is always present. He advises the people to be as careful as possible.

Many persons are availing themselves of the opportunity for free vaccination against the influenza. There is nothing compulsory about it and it is not necessary to go to the board of health to have the serum administered free of charge. Persons wishing to take preventative measures can go to their own physicians and be treated.

Should Take Precautions

Whether or not there is a danger that Escanaba will again have to be closed down, so far as public gatherings is concerned, remains to be seen. The disease has been increasing steadily but it is not raging with the same violence and is apparently not of the same virulent type as afflicted the city before.

Precautionary measures are urged on all the people. The board of health doesn't wish to have to close up the city again. Whether or not this will have to be done would seem to rest largely in the hand of the people themselves. If they conduct their business in such a way that the malady is given no chance to spread, all will be well, but if carelessness is allowed to creep in, then another epidemic may be expected.

QUESTIONNAIRES MUST BE FILLED BY MEN 18 TO 36

Through what seems to be a misinterpretation of the ruling regarding the filling out of questionnaires by men between the ages of 18 and 36, number of Delta county men are taking chances in facing trouble of a rather serious kind with the government.

Those who misinterpret the questionnaires and return them, the ruling is clear at that point. The signing of the questionnaire has made no difference. The local draft board has a limited time in which to close up its records and if these questionnaires are not in by the time the records are closed, they will be falling to return them and will be considered deserters and will be dealt with.

It is estimated that about 25 men in Delta county fall into this class and it is urged to them to get busy if they wish to avoid trouble.

Ed. J. Lewis and Charles G. Gossings have returned from the military camp in which they served their term of service. They were with the 10th Cavalry at Fort Sill, Okla. Mr. Lewis was in the 1st Squadron and Mr. Gossings in the 2nd Squadron. They were both in the 1st Squadron and were both in the 1st Squadron.

Will Insist on Personal Accountability for Crimes Which He Caused To Be Committed.

OTHERS ARE SLATED

Would Make No Distinction Between Those Holding High Place and Those in More Humble Positions.

(BY ASSOCIATED PRESS)

London, Nov. 30.—The coalition government policy, if emperor William returns to power, will be to insist on his personal accountability for the crimes for which he is responsible. It is said the government is determined to give the emperor an opportunity to answer the charges against him and it is equally determined to make the criminals pay the penalty. It would make no distinction between the occupants of high offices and those in more humble places. It was also declared the intention of the government to punish those Germans who had broken every law—human and divine.

Former emperor William signed his abdication at Amerongen, Holland today, according to dispatches to the Wolff bureau of Berlin, transmitted by the Exchange Telegraph company correspondent of Copenhagen. The abdication decree expresses the hope that the "new regent" would be able to protect the German people against anarchy, starvation and foreign supremacy. The use of the word "regent" is considered as being significant.

VICTORY IS THE SOLDIERS' GIFT TO THE NATION

Gen. Pershing Pays Glowing Tribute to Men and Declares New Vision of Duty to God Has Come to All.

(BY ASSOCIATED PRESS)

Amerongen Headquarters in France, Nov. 30.—Victory won by the American soldiers in hard fighting and at the cost of self-sacrifices was the Thanksgiving Day gift to the American nation and the American army, General Pershing declared in a Thanksgiving Day address at general headquarters. The debt of gratitude to the men who have been paid and the invaders who have been driven back in defeat, he said, will be paid by the American commander in chief paid tribute to the dead and urged Americans to thank God for the victory and declared that a new vision of duty to God had come to all American mothers, he said, awaiting the homecoming of their gallant sons.

R. C. Richardson is an Marquette of the city.

Fred Cherrette is the guest of Milwaukee relatives this week.

W. A. Maki will leave tomorrow for Racine where he will visit.

NOTICE OF PETITION AND APPLICATION TO BOARD OF SUPERVISORS OF SCHOONCRAFT COUNTY, MICHIGAN, FOR LEAVE TO CONSTRUCT A DAM AND STRUCTURES ACROSS THE MANISTIQUE RIVER IN MANISTIQUE, SCHOONCRAFT COUNTY, MICHIGAN.

It is hereby given that Manistigue Pulp and Paper Company, a corporation hereinafter called petitioner, in and through its successors and assigns, has presented to said Board of Supervisors, and filed to be presented to them, its petition wherein it asks and applies for leave to construct a dam and structures across the Manistigue River in Manistigue, Schooncraft County, Michigan, the dam and structures connected therewith in said petition described, for the purpose, in the location, to the height, and of the description therein set forth.

Said dam and structures are to be located in Manistigue, Schooncraft County, Michigan, in the following location:
Commencing at a point on the dividing line between Sections 1 and 12 Township 41, North of Range 16 West in said County, 1212 feet East of the Northwest corner of the Northeast Quarter of said Section 12 (which Northwest corner is also at the intersection of Bear Street and Alger Avenue, Manistigue, Michigan); thence due North in a straight line 1.2 feet to a point designated point A; thence from said point A South 3 degrees 17 minutes West 767.5 feet; thence South 8 degrees 34 minutes West 143.95 feet; thence North 88 degrees 29 minutes West 37.75 feet to a point designated point B being on the Southern corner of said dam and being the point of beginning of the description of the area to be occupied by said dam and structures hereinafter described;
Thence North 2 degrees 46 minutes West 15 feet 7 inches;
Thence North 87 degrees 14 minutes West 95 feet;
Thence South 2 degrees 46 minutes West 15 feet 7 inches;
Thence South 87 degrees 14 minutes West 12 feet;
Thence South 2 degrees 46 minutes East 14 feet to a point designated point C;
Thence (beginning of Easterly face of canal) South easterly 139.1 feet on a curve, being the arc of a circle whose radius is 360 feet measured Westerly at right angles to said last described straight line at said point C;
Thence South 21 degrees 32 minutes West 531.3 feet (Northern side of log sluice at end of this course);
Thence South 21 degrees 32 minutes West 16.4 feet (Southern side of log sluice at end of this course);
Thence South 21 degrees 32 minutes West 223.95 feet (Northern side of Railroad bridge at end of this course);
Thence South 21 degrees 32 minutes West 249.5 feet (Southern side of Railroad bridge at end of this course);
Thence South 21 degrees 32 minutes West 306.25 feet to a point designated point D;
Thence Southwesterly 57.1 feet on a curve, being the arc of a circle whose radius is 172 feet measured Westerly at right angles to said last described straight line at said mentioned point D (Northern side of highway bridge at end of this course);
Thence South 41 degrees 1 minutes West 66 feet (Southern side of highway bridge at end of this course);
Thence South 45 degrees 50 minutes West 951 feet (water main to Consolidated Lumber Company at end of this course);
Thence South 45 degrees 50 minutes West 258 feet (gate in old dam opposite end of this course);
Thence South 45 degrees 50 minutes West 75.2 feet (Northern side of tainter gates at end of this course);
Thence South 46 degrees 50 minutes West 55.8 feet (Southern side of tainter gates at end of this course);
Thence South 46 degrees 50 minutes West 133.85 feet;
Thence South 26 degrees 53 minutes East 121 feet;
Thence South 63 degrees 7 minutes West 6 feet (Easterly canal wall ends at end of this course);
Thence South 26 degrees 53 minutes East (along Easterly end of pulp mill and power station) 59.63 feet (Southwest corner of pulp mill and power station at end of this course);
Thence South 63 degrees 7 minutes

West (along Southern side of pulp mill and power station) 230 feet (Southwest corner of pulp mill and power house at end of this course);
Thence North 26 degrees 53 minutes West 4 feet;
Thence South 63 degrees 7 minutes West (along the Southern side of an annex to said pulp mill and power station building) 45.5 feet;
Thence North 39 degrees 38 minutes West (along the Westerly side of said annex) 45.2 feet;
Thence North 50 degrees 22 minutes East (along the Northern side of said annex) 56.2 feet, (to the Northwest corner of the pulp mill and power station);
Thence (beginning of Westerly canal wall) North 39 degrees 38 minutes West 45.2 feet;
Thence North 13 degrees 49 minutes West 147.8 feet;
Thence North 47 degrees 53 minutes West 1280.15 feet to a point designated point E;
Thence North easterly 30 feet along a curve being the arc of a circle whose radius is 193.48 feet measured Westerly at right angles to said last described straight line at said last mentioned point E;
Thence North 41 degrees 17 minutes East 154.65 feet (Southern side of said highway bridge at end of this course);
Thence North 41 degrees 17 minutes East 66 feet to a point designated point F (Northern side of said highway bridge at end of this course);
Thence Northeast easterly 43.9 feet on a curve being the arc of a circle whose radius is 139.65 feet measured Westerly at right angles to said last mentioned straight line at said last mentioned point F;
Thence North 21 degrees 32 minutes East 190.9 feet; (Southern side of said Railroad bridge at end of this course);
Thence North 21 degrees 32 minutes East 249.5 feet (Northern side of said Railroad bridge at end of this course);
Thence North 21 degrees 32 minutes East 971.35 feet to a point designated point G;
Thence Northeast easterly 150.2 feet on a curve being the arc of a circle whose radius is 490 feet measured Westerly at right angles to said last mentioned straight line at said last mentioned point G;
Thence North 60 degrees 15 minutes East 151.7 feet;
Thence North 59 degrees 42 minutes East 7.7 feet (Westerly canal wall ends here);
Thence (beginning of Westerly abutment wall) North 60 degrees 15 minutes East 61 feet;
Thence North 60 degrees 15 minutes East (along the continuation of said abutment wall Northernly of said dam herein mentioned) 530.55 feet;
Thence North 2 degrees 11 minutes East (along said wall) 85 feet;
Thence North 60 degrees 15 minutes East (along said wall) 90.3 feet;
Thence across said wall to the Easterly face thereof;
Thence (returning) South 60 degrees 15 minutes West 90.3 feet;
Thence South 2 degrees 11 minutes West 85 feet;
Thence South 60 degrees 15 minutes West 330.35 feet (to the Northernly side of said dam);
Thence North 87 degrees 14 minutes East 361.25 feet;
Thence South 2 degrees 46 minutes East along the Westerly face of the Easterly abutment of said dam to said point B being the said point of beginning;
Said abutment on said Easterly river bank is the Easterly abutment of said dam and the distance from the Westerly face of said abutment to the Easterly face thereof is 3 feet, making said abutment 3 feet thick, and the portion thereof facing the river is 45 feet 1 inch long from North to South, and as a part thereof there are anchor walls extending diagonally into the ground of the river bank, said anchor walls being of the thickness of said abutment and the Northernly anchor wall being of the length of 45 feet 2 inches and the Southernly anchor wall being of the length of 19 feet, and the top of said abutment being of the same elevation as the tops of the piers separating the sluices of said dam.
Beginning at said abutment on the Easterly bank of said River and proceeding Westerly across the river to the Westerly bank and to the Westerly abutment wall, which is also a retaining wall, the dam structure is of the following description:
(1) In the first 120 feet, going Westerly, there are five sluices each 16 feet wide Easterly and Westerly, separated by four piers, each 4 feet thick Easterly and Westerly, which said sluices and piers are of the length of 36 feet Northernly and Southernly making said dam 26 feet wide up and down stream, where said piers and sluices are; and each of said sluices is equipped with a proper gate for opening and closing to admit or exclude water, such gate in each instance being equipped with proper mechanism to manipulate the same.
Each sluice is also equipped with timber slots, and the bottom of each sluice is made of concrete and such bottom is higher near the up-stream end of the sluice than at the down-stream end thereof, there being a slope from the up-stream part of said bottom toward the down-stream end of such bottom, and the up-stream end of such bottom, at the highest point, is 3 feet above the elevation of the down-stream end of such bottom.
In said 120 feet there is also a log sluice 8 feet wide Easterly and Westerly, separated from the fifth of said above mentioned sluices by a pier 4 feet thick Easterly and Westerly and 32 feet long Northernly and Southernly, said log sluice being also equipped

with a proper gate for opening and closing said gate being equipped with proper appliances for manipulating the same, and said log sluice being also equipped with proper timber slots and said log sluice being 32 feet long up and down stream; and said log sluice is equipped with an apron made of concrete, reinforced with steel, which apron runs from the up-stream end of said sluice to the down-stream end of said sluice, and the down-stream of said apron is 13.52 feet below the bench mark herein mentioned and the up-stream part of said apron, at its highest point, is 8 feet above the level of the down-stream end of said apron, there being a clean slope from the up-stream part of said apron to the down-stream end of said apron, and said up-stream part is sufficiently low to permit a sufficient flow of water through said log sluice to carry logs and timber through said sluice. In said 120 feet there is, next Westerly of said log sluice, a pier 4 feet thick Easterly and Westerly and 45 feet long Northernly and Southernly; and next Westerly of said last mentioned pier there is a fishway 4 feet wide Easterly and Westerly and of the length of said last mentioned pier up and down stream; and next Westerly of said fishway there is another pier of the same size as said last mentioned pier and running parallel thereto and the down-stream opening of said fishway opens into that part of the river which lies Easterly of the Easterly canal wall hereinafter mentioned.
(2) In the next 88 feet, proceeding Westerly, there are five sluices, three of which are 16 feet wide Easterly and Westerly, and the next of which is 14 feet wide Easterly and Westerly, and the last of which is 10 feet wide Easterly and Westerly; and the sluices are separated by four piers each 4 feet thick Easterly and Westerly and 25 feet long Northernly and Southernly, and each of said sluices is equipped with timber slots and gates.
(3) In the next 101 feet, proceeding Westerly, there are five sluices, one 19 feet wide and the others 15 feet wide Easterly and Westerly; and on the Easterly side of the most Easterly of these sluices is a pier 5 feet thick Easterly and Westerly and on the Westerly side of the most Westerly of these sluices is a pier 5 feet thick Easterly and Westerly; and said five sluices are separated by piers each 3 feet thick Easterly and Westerly; and said sluices are equipped with timber slots and gates and there are racks supported by the piers extending downward into the water for the purpose of straining out driftwood and debris; Southernly from said piers and sluices is the old Manistigue Light and Power Company power house, which said power house is 44 feet wide Northernly and Southernly and 101 feet long Easterly and Westerly, and the distance from the Northernly side of the dam to the Southernly side of said power house is 61 feet 9 inches.
(4) In the next 22.25 feet, proceeding Westerly, there are three sluices, each 14 feet 9 inches wide Easterly and Westerly, separated by two piers each four feet thick Easterly and Westerly and 26 feet long Northernly and Southernly, and each of said sluices is equipped with timber slots and gates and on the most Westerly side of the most Westerly of said sluices is the Westerly abutment wall.
Said abutment has a coping 12 inches thick vertically and 2 feet 11 inches wide horizontally and said coping projects beyond the top edge of the wall 5.5 inches on each side; and the wall at the top, immediately below said coping, is 2 feet wide Easterly and Westerly; and on its Easterly surface said wall runs perpendicularly from the point immediately below said coping to solid bottom in the river; and the thickness of said wall, below the coping, extends from its Easterly surface Westerly, and the Westerly surface of said wall runs on an angle of 25 degrees 12 minutes from the top, immediately below said coping to solid bottom; the deflection being from the perpendicular toward and into the Westerly river bank. The elevation of the top of said wall is 100.
The lines of the canal walls above given are the most easterly lines of the Easterly wall and the most Westerly lines of the Westerly wall. These walls at the top have a slab 3 feet wide horizontally and 12 inches thick vertically. Connected with this slab and extending from the same to the bottom of the river at an angle of 45 degrees, deflecting toward the inside of the canal there is a slab or apron the bottom edge of which is built in solid rock in the bottom of the river, and this apron is 10 inches thick at the top and gradually increases in thickness as it proceeds to the bottom of the river, the increase being at the rate of approximately one-quarter of an inch per foot of descent.
Below said slab and on the Easterly side of said apron, in the case of the East wall, and on the Westerly side of said apron in the case of the West wall, there are buttresses supporting said slab and said apron. These buttresses are 15 inches thick horizontally and on their Easterly surfaces, in the case of the East wall, and on their Westerly surfaces in the case of the West wall, they are perpendicular extending from said slab down to solid rock in the bottom of the river and said buttresses follow said apron from top to bottom; and said buttresses supporting the Easterly wall point down stream at the angle shown by the drawings attached to said petition; and said buttresses supporting the Westerly wall point up stream at the angle shown by the drawings attached to said petition; and said buttresses are on solid bottom in the river and stand on proper footings; and said buttresses are built at intervals of not

more than 15 feet. The elevation of the top of the East wall is 99.5 and the elevation of the top of the West wall is 100.
The Easterly wall of the canal is in the river between the Easterly and Westerly banks, and from the Northernly end of said wall to a point about 159 feet down stream below said highway bridge it is somewhat nearer to the Easterly bank than to the Westerly bank and from said last mentioned point to the Southernly end of said wall it is somewhat nearer to the Westerly bank than to the Easterly bank. The Westerly wall is at some points in the river near the Westerly bank and at other points on the Westerly bank.
Said log sluice in said Easterly canal is built Westerly into said canal so that the distance from the most Easterly face of the top of the canal wall to the most Westerly end of the sluice along its center line is 31 feet horizontally.
Said log sluice is equipped with an apron whose highest point is its most Easterly end which is at an elevation of 94.5 and said apron slopes down to the open river to an elevation of 84. The incline surface of said apron being 31 feet 3 inches long; and the most Easterly end of said apron is in the vertical plane of the most Easterly end of said canal wall. On the up-stream side and also on the down-stream side of said apron there is a wall extending from said apron upward to elevation 99.5. These walls at the most Westerly end of said apron are equipped with timber slots, and there is also a gate which can be opened and closed. The opening of said log sluice at said Westerly end is 10 feet wide up and down stream. Said log sluice is built of reinforced concrete and is properly supported by reinforced concrete supports.
Said three tainter gates in said East wall are each 16 feet wide up and down stream and are separated by two piers each 24 inches thick up and down stream extending into said canal so that the distance from the Easterly face of the top of said canal wall to the Westerly end of said piers is 16 feet 6 inches measured horizontally, and said piers extend from elevation 100 to solid bottom in the river. At the up-stream end of said gates and also at the down stream end there is in each instance a pier the same as the two above described. The bottom of each of the three openings is a reinforced concrete apron whose highest point is its most Westerly end which is at an elevation of 89; it runs Easterly at said elevation for a distance of 2 feet 6 inches and then runs Easterly on a downward slope for a distance of 12 feet 3 inches to elevation 87, and its most Easterly end is in the vertical plane of the most Easterly line at the top of said canal wall and leads to the open river outside of said canal. Each of the three openings is equipped with a tainter gate and said gates are equipped with proper appliances for manipulating the same.
The pulp mill and power station is at the Southernly end of said canal walls. The main part thereof is 54 feet Northernly and Southernly by 230 feet Easterly and Westerly; and said pulp mill and power station will extend into the river from one of the canal walls to the other.
Northernly of and under said pulp mill and power station there is sufficient excavation to carry the water to the full depth of said canal and into said pulp mill and power station to the full width of said canal and to the full length of said pulp mill and power station. Southernly of said pulp mill and power station there is an excavation for a tail race to a depth of elevation 60; and on its Easterly side said tail race is protected by a wall 24 inches thick and 79.5 feet long up and down stream; and on its Westerly side said tail race is protected by a wall 24 inches thick and 141 feet long up and down stream.
On the Northernly side of said power station and pulp mill there is a platform resting on piers, which platform is 12 feet wide Northernly and Southernly and will extend from the Easterly end of the power station and pulp mill to the Westerly end thereof, and the top of said platform is to be at elevation 100; and Northernly of said platform are racks extending downward into the water for the purpose of straining out wood and debris. On the Northernly side of said power station and pulp mill are gates for opening and closing the sluices leading into said power station and pulp mill, so as to admit or exclude the water there; and said power station and pulp mill will be equipped with water wheels and means of discharging tail water; and said power station and pulp mill will also be equipped with power developing machinery and equipment and appliances for developing, generating, making, using, applying and transmitting power and energy of any or all kinds, or the doing of any or all of said things, and with pump grinding machinery, and machine, equipment and appliances for manufacturing and industrial purposes, including the manufacture of pulp and paper.
Said railroad bridge extends from the Easterly bank of said river to the Westerly bank in a straight line and crosses said canal walls at the places hereinafter shown. It is of reinforced concrete construction. The abutment on the Easterly river bank is 23 feet long Northernly and Southernly and 3 feet thick and extends down to solid bottom; it has on each end an anchor running diagonally into the bank 17 feet 6 inches long and 24 inches thick. Proceeding Westerly there are between said abutment and the Easterly canal wall, two piers each 30 inches thick Easterly and Westerly

and extending across said bridge up and down stream and from the lower side of said bridge to solid bottom. The distance from the Westerly face of said abutment to the center line of the most Easterly of said two piers is 29 feet 6 inches, and the distance between the center lines of said two piers is 30 feet 6 inches; and the distance between the center line of the most Westerly of said two piers and the most Easterly line of said Easterly canal wall is 20 feet 9 inches. In said part of said bridge there are two reinforced concrete girders each 24 inches thick horizontally and 4 feet thick vertically, said girders running parallel and their inside surfaces being 3 feet apart and said girders being connected by a concrete slab. Said part of said bridge has side walls 12 inches thick and the tops thereof are lower than in the case of the side walls across said canal. The distance between the inside surfaces of said walls is 12 feet. Said girder construction runs from said Easterly abutment to a pier at the Easterly canal wall which is 5 feet thick Easterly and Westerly and runs across the said bridge up and down stream, which pier is built to solid bottom in the river. Between said pier and the Westerly canal wall there are four piers, each 30 inches thick Easterly and Westerly, extending across the width of said bridge and to solid bottom in the river.
At the Western canal wall there is a pier 3 feet thick Easterly and Westerly extending across the width of said bridge and to solid bottom.
The distance between the center of said 5 foot pier and the center of the first pier Westerly of said pier is 39 feet 3 inches; and as to said four piers situated between said canal walls, the distance between the centers of each two piers is 31 feet 6 inches; and the distance between the center of the most Westerly of said four piers and the Westerly face of said pier at the Westerly canal wall is 41 feet 9 inches.
Above said piers across said canal there is a reinforced concrete slab 33 inches thick vertically, extending across the full width and length of said bridge across said canal, the elevation of the top of said slab being 93.75, which is also the elevation of the top of the slab constituting the floor of that part of the bridge across the open river. Across said canal said bridge has concrete side walls connected with said slab, each of said side walls being 18 inches thick and having a coping 21 inches thick and the distance between the inner surfaces of said side walls is 20 feet; and the tops of said side walls are at an elevation of 100.5; and said side walls are connected with said canal walls so that the water in the canal is confined and must pass under the bridge.
Said bridge is to be used for the purpose of a railroad bridge by the Manistigue and Lake Superior Railroad Company.
Said highway bridge extends across said river from the Easterly bank to the Westerly bank in a straight line. The abutment on the Easterly river bank is 73 feet 6 inches long up and down stream and 3 feet thick and extends to solid bottom. Said abutment has on each end an anchor wall running diagonally into the river bank; and each of said anchor walls is 14 feet long and 3 feet thick and extends to solid bottom.
Between said abutment and the Easterly canal wall said bridge is supported by two piers each 30 inches thick Easterly and Westerly extending across the width of said bridge up and down stream and said piers extend down to solid bottom. The distance between the Easterly side of said abutment and the center of the most Easterly of said piers is 38 feet and the distance between the centers of said two piers is 36 feet. The distance from the center of the most Westerly of said two piers to the center of a pier at the Easterly side of said Easterly canal wall is 37 feet 6 inches. Said pier at the Easterly side of said Easterly canal wall is 5 feet thick Easterly and Westerly and extends across said bridge up and down stream and to solid bottom in the river below. The distance between the center of said 5 foot pier and the next westerly pier is 43 feet 9 inches. Said last mentioned pier and the next three piers going Westerly are each 30 inches thick Easterly and Westerly and extend across said bridge up and down stream and down to solid bottom and there is a distance of 32 feet 4 inches between the centers of each two of said four last mentioned piers. The distance between the center of the most Westerly of said four piers and the Westerly side of a pier at the West canal wall is 43 feet 9 inches. The pier at the Westerly canal wall is 38 inches thick and extends across said bridge up and down stream and down to solid bottom.
On that part of the bridge crossing the Easterly part of the river outside of the canal the bridge is of a beam construction, said beam construction extending from said abutment on the East bank of the river to said 5 foot pier at the Easterly canal wall, there being a center beam 24 inches thick horizontally and two beams on each side of the center beam each 16 inches thick horizontally. Above said beams there is a concrete slab 4 inches thick and the thickness from the top of said slab to the bottom of said beams is 40 inches. The sidewalk and side wall parts of said bridge across said Easterly part of said river outside of the canal are also of beam and concrete slab construction.
Across said canal the surface of said bridge is a reinforced concrete slab which in the center of the roadway is 30 inches thick vertically and

at the curb line is 24 inches thick and across the sidewalk is of a thickness of 24 inches extending up to 30 inches. The elevation of the floor of said bridge at the East and West ends is 96 feet; and said bridge has a crowning of 2 feet in its entire length of 236 feet and the crowning across the roadway is 6 inches.
The width of the roadway is 42 feet between the curbs and there is a sidewalk on each side 10 feet wide. There is a wall on each side 2 feet thick horizontally and the top of each side wall at the Westerly and Easterly ends of the bridge is of an elevation of 100.5 and across said canal said side walls are connected with the canal walls so as to confine the water and make it pass under the bridge.
In each sidewalk near the curb there is a trench, the trench on the Northernly side being designated to take care of wires and the trench on the Southernly side being intended to carry a water main.
On the top of each side wall there are four ornamental lamp posts.
Said highway bridge will be used by the public for the purposes of travel.
Said water main to Consolidated Lumber Company extends across the Easterly part of the river outside of said canal from the Easterly canal wall at the point hereinafter mentioned, to the mill of the Consolidated Lumber Company on the East bank of said river near the end of the old dam. It is a 14 inch main, the elevation of the top of which is at its lowest point 90. It will be supported by proper supports including three piers in the river and the bottom of said water main will be higher than the top of the old dam. Said water main will be used to carry water to the Consolidated Lumber Company's plant.
Near the Easterly end of said old dam there is a fishway 50 feet long Northernly and Southernly and 4 feet wide. The center line of said fishway where it intersects said old dam is 254 feet Easterly of the most Easterly line of said East canal wall measured at right angles.
Said sluice through the old dam at the point where the said old dam joins said Easterly canal wall is 14 feet wide and extends to the bottom of the river. On each side of the pier of a concrete pier the elevation of the top of which is 89.75; and said sluice is equipped with timber slots for opening and closing. This sluice is to be used for discharging timber and drift wood.
The creek on the Westerly bank of said river about 250 feet Northernly of the Northernly line of said Railroad bridge will be carried by a trench extending along a line following the Westerly line of said Westerly canal wall and discharging through a sewer into the river immediately below said pulp mill and power station. Said water from said creek will pass said Railroad and highway bridges in culverts.
Said dam and structures will be of first-class concrete construction, reinforced with steel, as to all abutments, piers, walls, aprons, buttresses and other masonry, and of good and appropriate material as to gates, racks and other appliances, machinery, and equipment.
Said fishways will be built in accordance with all lawful requirements imposed by and under the statutes of Michigan.
The heights of the various parts of said dam are shown on the drawings hereinafter referred to. Said dam will be built to such a height and in such a manner that the water of said river, by means of the operation of the gates therein, can be raised, held and used to a height and elevation of 2.52 feet below the bench mark which is marked and designated by an iron monument placed in concrete at the Northeast corner of said Manistigue Light and Power Company power house, designated "Dam BM".
The location of said bench mark also appears on a map attached to the deed recorded in Liber 27 of Deeds, pages 9 to 15 Register's Office, Schooncraft County, Michigan.
In the elevations in this notice said bench mark is elevation 100, and said elevations in this notice given are based thereon.
Said dam and structures are to be used for the purpose of developing, applying and using water power, generating and producing electricity, for power and other purposes, and for the purpose of developing, applying and using power for the grinding of pulpwood, manufacturing of pulp, paper, and for other manufacturing purposes, and for the purpose of producing electricity and power for the purpose of sale and transmission to be used for any and all purposes for which power and electricity and electrical current are or may be useful.
The location, description and height of said dam and structures, and other facts pertaining to the same, are further specified and shown on the drawings to said petition attached and made a part thereof being marked Exhibits A, B, C, and D.
Said petitioner is the assignee, and successor in interest as to all rights of Francis W. Little and the Manistigue Light and Power Company who applied for leave to construct dams across said river in locations reached by said petition.
The hearing of said petition has been set for January 2, 1919, at 2:00 o'clock P. M., in the Court House in Manistigue, Schooncraft County, Michigan, said Board of Supervisors having adjourned its regular meeting and session to said date and place.
Dated at Manistigue, Michigan, November 25, 1918.

Nov. 30, 1918. Dec. 31, 1918
TO THE OWNER OR OWNERS OF ANY AND ALL INTERESTS IN OR LIENS UPON THE LAND HEREIN DESCRIBED:
TAKE NOTICE, That sale has been lawfully made of the following described land for unpaid taxes thereon, and that the undersigned has title thereto under tax deed or deeds issued therefor, and that you are entitled to a reconveyance thereof, at any time within six months after return of service of this notice, upon payment to the undersigned or to the register in charge of the county in which the lands lie of all sums paid upon such purchase, together with one hundred percentum additional thereto, and the fees of the sheriff for the service or cost of publication of this notice, to be computed as upon personal service of a declaration as commencement of suit, and the further sum of five dollars for each description without other additional cost or charges. If payment as aforesaid is not made, the undersigned will institute proceedings for possession of the land.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$74.39, Taxes for the years 1892 to 1902 inclusive.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$3.55, Taxes for the year 1903.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$6.05, Taxes for the years 1904 and 1905.
Total amount paid \$83.99.
The amounts paid for each year taxes on said described premises as above stated were as follows:
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$7.07, Taxes for the year 1892.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$13.22, Taxes for the year 1893.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$4.96, Taxes for the year 1894.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$12.90, Taxes for the year 1895.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$5.25, Taxes for the year 1896.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$5.11, Taxes for the year 1897.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$4.33, Taxes for the year 1898.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$5.57, Taxes for the year 1899.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$4.27, Taxes for the year 1900.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$5.45, Taxes for the year 1901.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$3.96, Taxes for the year 1902.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$3.55, Taxes for the year 1903.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$3.56, Taxes for the year 1904.
8 1/2% of SE 1/4, Section 11, Town North 35, Range West 19, Amount Paid \$2.49, Taxes for the year 1905.
Total as above \$83.99.
And the amounts paid for the taxes for the years 1903, 1904 and 1905 were paid as a condition of the purchase of said land for the taxes of the years 1892 to 1902, inclusive, on October 18, 1906.
All in Delta County, State of Michigan.
(Signed) ANTOINE DELORIA,
Place of Business Garden, Michigan.
Dated November 2, 1918.
To John Routhier and James Vadvais.

UNCLE SAM NOW TAKING HAND IN LIQUOR DEALS

Assisting in the Prosecution of Cases in Which Liquor Is Being Smuggled Into the State.

VIGILANCE REDOUBLED Whiskey Said To Be Retailing At 50 Cents a Drink in Detroit and Other Michigan Cities.

(BY ASSOCIATED PRESS) Detroit, Mich., Nov. 30.—Uncle Sam is now taking a hand in the prosecution of cases of violation of the Webb-Kenyon law as it applies to the smuggling or attempted smuggling of liquor into the state of Michigan.

Whiskey is retailing, it is said, in Detroit and some other Michigan towns at 50 cents a drink. As high as \$1 a drink has been paid, it is said.

Hot water bags filled with liquor are concealed beneath the clothing of children brought in by the smugglers. "Lifepreservers" filled with bottles of liquor, loads of apples, cabbage, spinach, potatoes, hay, red peppers and other fruits, vegetables and grains have been used to camouflage the shipments.

During the past two weeks the authorities at Detroit have uncovered more than 200 barrels of liquor camouflaged in these and other ways but still it comes in and can be bought in scores of places, it is said.

November 23, 1918. December 7, 1918. ORDER FOR PUBLICATION—Appointment of Administrator.

State of Michigan, the Probate Court for the County of Delta.

At a session of said Court, held at the Probate Office in the city of Escanaba, in said County, on the twentieth day of November, A. D. 1918.

Present: Hon. Judd Yelland, Judge of Probate.

November 16, 1918. November 30, 1918. ORDER FOR PUBLICATION—Appointment of Administrator.

STATE OF MICHIGAN, the Probate Court for the County of Delta.

At a session of said Court, held at the Probate Office in the city of Escanaba, in said County, on the fourteenth day of November, A. D. 1918.

Present: Hon. Judd Yelland, Judge of Probate.

PERSONAL PARAGRAPHS

Miss Loretta McCauley is ill at her home on N. Jennie St.

David Goulder of Carney visited here yesterday.

Word has been received in the city that John Maga, son-in-law of Mr. and Mrs. J. LaCaptain has arrived safely overseas.

Frank Seidl left last night for Des Moines Iowa where he will accept a position.

Miss Margaret Costley returned recently to her home in Northland after a visit with friends and relatives in this city.

Miss Helen Arnold has returned from a weeks visit with relatives and friends in Detroit.

Arthur Potvin has returned from Camp Custer. The young man has arrived home to stay, having been honorably discharged.

Miss Aurelia LaBelle has returned from Iron River where she spent a few days with her sister Mrs. E. J. Yelland. She was accompanied home by her nephew Wilfred James.

Mr. and Mrs. E. J. Yelland will arrive in the city tonight to spend the week-end at the LaBelle home here.

O. C. Tracey representing the Good-year Tire and Rubber Co., of Chicago arrived in the city for a brief business visit.

Mr. and Mrs. George Weber of Chicago are the guests of their Escanaba friends.

Lloyd McKittrick is enjoying a brief furlough at his home in this city. He is from the Great Lakes.

George Peterson arrived in the city yesterday to spend a short furlough with his parents. The young man has been stationed at the Great Lakes for the past several months.

Mrs. W. H. Hussey of the Soo, Ont. is visiting Escanaba relatives and friends.

H. B. Fuller of Lansing is an Escanaba caller this week-end.

Mr. and Mrs. H. R. Andrews of Daggett arrived in Escanaba to spend a few days.

Mrs. C. Bourdais of 203 Biren St. has received word from her son Walter Morton who is in France. Walter says that he has been over the top several times and has enjoyed the experience.

Miss Josephine Walsh has returned from a weeks visit in Detroit.

William Leglier, C. Harding have left for Manistique where they will enjoy a brief visit.

Louis Schram Hurt Slightly And Also "Gassed" Recently

A letter received yesterday by Ike Schram states that his brother Louis, who has gone through some of the stiffest fighting of the war, had finally been injured in the fighting. He was recently gassed and sustained a broken rib and is now in a French hospital south of Paris. He is recovering rapidly and when the letter was written hoped to soon be with his company again. He says his injuries did not amount to much.

November 23, 1918. December 7, 1918. ORDER FOR PUBLICATION—Probate of Foreign Will.

State of Michigan, the Probate Court for the County of Delta.

At a session of said Court, held at the Probate Office in the city of Escanaba, in said County, on the twenty-second day of November, A. D. 1918.

Present: Hon. Judd Yelland, Judge of Probate.

In the Matter of the Estate of Charles T. Barney, Deceased.

John P. McCall, Agent for Lilly W. Barney, sole legatee of said decedent, having filed in said court an instrument in writing, purporting to be a duly exemplified copy of the last will and testament of said decedent and the record admitting the same to probate in the state of New York and his petition praying that said will be allowed, filed and recorded, and that the administration of said estate be granted to John P. McCall or to some other suitable person.

It is Ordered, That the sixteenth day of December, A. D. 1918, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Escanaba Daily Mirror, a newspaper printed and circulated in said county.

SUNDAY AT THE CHURCHES

Notice to Pastors—Copy for church notices for publication in this column must be in this office not later than 2:00 o'clock a. m. Saturday morning to insure publication.

ST. STEPHEN'S EPISCOPAL CHURCH Corner Ayr and Wolcott Streets. Celebration of Holy Communion and Sermon at 10:30.

METHODIST EPISCOPAL CHURCH. Corner Hale and Wolcott Streets. 9:30 Sunday School Session. Men's Bible Class at the same hour. Men cordially invited.

PRESBYTERIAN CHURCH. Corner Wells Ave. and George St. Public Worship, 10:30.

FIRST BAPTIST CHURCH. Corner Sarah and Ayr Streets. Sunday School at 10:00.

DON'T FUSS WITH MUSTARD PLASTERS!

Musterole Works Easier, Quicker and Without the Blister

There's no sense in mixing a mess of mustard, flour and water when you can easily relieve pain, soreness or stiffness with a little clean, white Musterole.

Musterole is made of pure oil of mustard and other helpful ingredients, combined in the form of the present white ointment. It takes the place of out-of-date mustard plasters, and will not blister.

Musterole usually gives prompt relief from sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, sprains, sore muscles, bruises, chilblains, frost-bite, colds of the chest (it also prevents pneumonia).

10c and 60c jars; hospital size \$2.50.

Plenty of exercise, fresh air, regular hours—is all the prescription you need to avoid Influenza—unless through neglect or otherwise, a cold gets you. Then take—at once

Standard cold remedy for 20 years—in tablet form—safe, sure, no opiates—breaks up a cold in 24 hours—relieves grip in 3 days. Money back if it fails. The genuine box has a Red top with Mr. Hill's picture. At All Drug Stores.

ALLIED FLYERS SINK SUBMARINE WITH HEAVY BOMB

Story of How a "Blimp" Sent U-Boat to Bottom Is Told For First Time to the Public.

(BY ASSOCIATED PRESS)

London, Nov. 30.—Out from a dense fog streaking the sea shot a small dirigible—called a "blimp", manned by three Allied flyers. Directly in front of them a mile away, was a U-boat with its conning tower and decks out of the water, says an account of one of the most successful encounters of a British air craft with a German submarine.

Opening out his engine to its full capacity, the pilot "beared straight for the German craft many of whose crew were on deck. They had seen the blimp approaching and immediately brought a quick firing gun into action. With a scolding burst about them, the airman pushed on and soon were within effective machine gun range.

The observer used his gun to such good effect that with one drum he accounted for the submarine's gun crew. Thereupon the Germans, without waiting to rescue their wounded, began hurriedly to submerge. Meanwhile the blimp's busy sending out urgent signals to various patrol boats and submarine chasers known to be in the vicinity.

Clung to a height of about 15,000 feet, the pilot now got ready to use his machine's heavy bombs. The U-boat although submerged was still easily visible, and taking careful aim through his sights the "blimp's" gunner pulled the trigger of the roaring gun.

The airship received the heavy weight, shot up like an express elevator in a New York skyscraper, but careless of its movements the occupant hung over watching the bomb as it safely and in struck the water, perhaps two hundred feet ahead of the U-boat.

When its first burst into action, a dash of lightning seemed to strike through the dark dots of the ocean, and a peculiar boom, cloudy mass developed the fore part of the U-boat. It seemed ages before the effect of the explosion reached the surface. Then, like a geyser, the water shot into the air. In the center of dis-

THE THEATRES

AT THE STRAND

"The Girl of Today," starring Corinne Griffith, the beautiful Vitagraph star is the attraction at the Strand today and Sunday.

The character of picture is a modern drama, rounded up by nefarious plotting schemes of Germany to destroy American property, with scenes of action in and around New York City.

Leslie Sheldon severely takes to task her sweetheart, Jack Wynn, because he does not wear a uniform. An admirer of Leslie is in reality a German spy, and much disliked by Jack. Later, Jack accuses Wolf of being a spy, and after a struggle, is made prisoner in his house, while a forged note is sent to Leslie stating he has run away to escape the draft. Leslie manages to install a dictograph in Wolf's home and learns on his plans or wrecking New York City at a dozen vital points. With the aid of the State Constabulary the Germans in time to save Jack from being shot are prevented just in time. Finally they arrive at Wolf's residence just by Wolf, while the latter meets his just deserts. The picture closes with Jack bidding Leslie farewell well before he leaves for France.

AT THE DELFT.

Supporting Dorothy Dalton in her latest Paramount photoplay of the far North, "Tyrant Fear", are many players who long since have become favorites with motion picture theatre goers all over the country. This is a splendid Thomas H. Ince production and was directed by R. William Neill. The scenario was written by R. Cecil Smith. In this delightful photoplay, Miss Dalton will be seen as Allaine Grandet, a Canadian girl, daughter of a wreckless Canadian whom she fears and to whose stern will she is wholly subservient. He sells her to a brutal trapper, a primitive beast who mistreats her shamefully, and to which treatment she submits with the patience born of her inherent fear of men and things.

Tiring of her docility, the trapper gambles her away to the keeper of a notorious den of vice and crime in a gold settlement where she is thrown in contact with dissolute characters, but without being contaminated. She is befriended by a pianist, who has seen better days and they love each other. Allaine still is the victim of fear but one day in resenting the dive keeper's advances, she shoots and wounds him. This awakes her soul to its responsibilities and casting off fear, she becomes a new woman, brave and resourceful, at length finding happiness in the love of Dan, the pianist, with whom she makes her escape and who finds the body of her husband in a snow drift.

Thurston Hall is the pianist, Melbourne MacDowd, the dive keeper, William Conklin, Latour, the brutal trapper. Others in the cast of "Tyrant Fear," which will be shown at the Delft theatre today are Lou Salter and Carmen Phillips.

OPEN NOSTRILS END A COLD OR CATARRH

How to Get Relief When Head and Nose are Stuffed Up.

Count fifty! Your cold in head or catarrh disappears. Your clogged nostrils will open, the air passages of your head will clear and you can breathe freely. No more snuffing, hawking, mucous discharge, dryness or headache, no struggling for breath at night.

Get a small bottle of Ely's Cream Balm from your druggist and apply a little of this fragrant antiseptic cream in your nostrils. It penetrates through every air passage of the head, soothing and healing the swollen or inflamed mucous membrane, giving you instant relief. Head colds and catarrh yield like magic. Don't stay stuffed-up and miserable. Relief is sure.

7,649 DEATHS IN THE STATE OF MICHIGAN DURING LAST MONTH

Greatest Rate of Mortality For Month of October is Found in Luce County Where Influenza Raged.

There were 7,649 deaths reported to the Department of State as having occurred in the State of Michigan during the month of October, 1918. This number corresponds to an annual death rate of 28.3 per 1,000 estimated population.

By ages there were 814 deaths of infants under one year of age; 593 deaths of children aged 1 to 4 years, both inclusive; 1,170 deaths of elderly persons aged 65 years and over. The number of deaths of infants under one year of age shows an increase as compared with the month immediately preceding.

Important causes of death were as follows: Pulmonary tuberculosis, 250; other tuberculosis, 39; typhoid fever, 64; diphtheria and croup, 78; scarlet fever, 7; measles, 7; whooping cough, 52; pneumonia and broncho-pneumonia, 1,539; diarrhea, enteritis, under two years, 170; meningitis, 18; influenza, 2,451; cancer, 228; violence, 221. Among the deaths reported from violence were 11 deaths from railway accidents; 5 street railway; 16 automobile accidents; 3 homicides; 19 suicides; and 11 drownings. As compared with the month immediately preceding a marked increase is noted in the number of deaths returned from all causes with the exception of enteritis and cancer, which causes show a slight decrease.

The greatest rate of mortality for the month is for the County of Luce, with a rate of 201.1 per 1,000 estimated population. Wayne County with a rate of 41.5 shows the highest birth rate for the month.

There were 7,006 birth certificates returned to the Department for the month of October. This number corresponds to an annual birth rate of 25.9 per 1,000 estimated population. A decrease of 224 births is noted as compared with the month immediately preceding.

November 16, 1918. November 30, 1918. ORDER FOR PUBLICATION—Appointment of Administrator.

Christmas

Would'nt be
CHRISTMAS
Without Children
and
Toys!!

Lots of Them Both

Committees who have been called together to decide upon the importance of various gifts, have decided that **TOYS ARE ESSENTIAL CHRISTMAS GIFTS**; indeed, they are quite as important as books in developing the Child's imagination.

In Our Basement Is a Wondrous Display of Toys

Toys that will bring gladness to hundreds and hundreds of children. Folks who take time by the forelock will have a most complete assortment of every kind of toys to select from; will escape the hurry and confusion the final shopping days will bring.

A delightful showing of every Toy in our west window now.

MRS. BUCHANAN TOLD OF DEATH OF TWO NEPHEWS

Both Natives of Scotland and Had Been in War with British Forces Since the Beginning of the Conflict.

KILLED IN SEPTEMBER

Joe Buchanan, of Escanaba, Writes on Nov. 1 That He Is Still Safe and Is with Other Escanaba Boys.

Mrs. A. Buchanan of this city today received a letter from her son Joseph, who is in France, stating that he had received a letter from Mrs. Buchanan's sister in Glasgow, Scotland, stating that she had been informed of the death of her two sons Daniel and William, in September. Both were killed in action and were two of six sons who were in the service.

This was the first information Mrs. Buchanan had received relative to her nephews being in the war but it developed that they have been in the fighting since the very beginning with the British forces. Joe Buchanan has been asked to locate their graves if possible.

Fighting On Nov. 1st.

His letter was written on Nov. 1st at which time the Americans were, as he stated "hard at it." Incidentally he stated that Verdun, near where he was three years. He pictured the desolation and destruction as something awful, saying there was scarcely a building or tree standing and that the cathedral in Verdun was simply a mass of ruins.

Will Fitzsimmons and Anton Roeser, both of Escanaba, are in the same division with Buchanan and he says he sees them quite often.

How Spider Saved Its Life.

A large spider was taken from his web under the basement of a mill, put on a chip, and set afloat on the quiet waters of a pond. He walked all about the sides of his bark, surveying the situation very carefully, and when the fact that he was really afloat and about a yard from shore seemed to be fully comprehended, he looked out for the nearest land.

This point fairly settled upon, he immediately began to cast a web for it. He threw it as far as possible in the air, and with the wind. It soon reached the shore, and made fast to the spires of grass. Then he turned himself about, and in true sailor fashion began to haul in hand-over-hand on his cable. Carefully he drew upon it until his bark began to move toward the shore. As it moved the faster, he then faster drew upon it to keep his heavier tent and from touching the shore, and quickly leaping to terra firma, he sped his way homeward.

Thinking he might be a special expert, and an exception in that line of boatmanship to the rest of his companions, several of them were tried. They all came to shore in like manner.

How Caste Thwarts Progress.

Occupation is still preserved among the Indian natives by inheritance and tradition, so that the diversion of labor to industrial pursuits has been an almost impossible task confronting the British government, says the National Geographic Magazine. The supply of agricultural labor constantly outruns the demand, thus keeping the wage scale extremely low. Caste also prevents people from leaving crowded districts and going to sparsely inhabited regions, of which there are many. In time of distress the restrictions which caste throws about rescue and relief work would be exasperating if they were not so tragic. For example, in the terrible Orissa famine thousands of Santals perished, in the midst of ample supplies furnished by the government, before it was discovered that there was a peculiar tenet of their faith which forbids them to touch food cooked by Brahmans. It was also discovered that skilled weavers would not go to the ordinary relief work camps for fear that the hard labor would cause them to lose the delicacy of touch which they value so highly.

DOES IT PAY?

Is it worth you while and does it pay you to have in your midst an institution which deals on honor and who use alike one and all fair, square and above board. Are we worthy of your support? If you find that we are, let us have it with out stint, for ever any man tried to do his very best by you all. Such had and ever will do.

YOUR

CENTRAL CASH MARKET

without raising one's voice, and the birds could fly over it with one sweep of their wings. And on the two banks there were millions of men, the one turned to the other eye to eye. But the distance which separated them was greater than the space between the stars in the sky; it was the distance which separates right and injustice.

"The ocean is so vast that the sea gulls do not dare to cross it. During seven days and seven nights the great steamships of America, going at full speed drive through the deep waters before the lighthouses of France come into view; but from one side to the other, hearts are touching."

CITY OF QUEER CONTRASTS

Nome, Desolate in Winter, Is Fearfully Lively During the Short Months of Summer.

Ships approaching the coast of Alaska watch eagerly for the first glimpse of a break in the low horizon line, and as the faint silhouette of a city is caught by the spy glass word goes round that Nome is in sight. The square outlines grow steadily plainer and broader. Unmindful of the heavy waves that crash so dangerously near its doors the city is reaching out to the very water's edge to greet the incoming ship. A bobbing launch comes out to meet the ship and bring in the passengers to the shore.

The gold seekers built Nome in the rush of 1898, and the gold seekers still add their quota to its population. They have made it a city of contrasts—of ostentatious wealth and hopeless desires. Where they camped on the beach and built wooden huts and saloons the city has grown up. When more space was needed, it spread its houses along the beach in long uneven rows.

From November to June it is frozen into a dull apathy from which it rouses to attend theaters, dances, and other social frivolities which make the winter tolerable. Ice bound and dark the winter may be, with only three or four hours of pale sunlight a day, but the popular idea of the wilds of Nome is an interesting myth. Electric lights, telephones, department stores, banks, hotels—Nome has all of these perquisites of modern civilization.

When the sun begins to shine steadily and the fresh surf pounds on the beach, Nome awakes and the summer residents who have gone "outside" return. The population is practically doubled. Nome spends its summer months in wildly rushing about to make up for the enforced dullness of the frozen winter.

AFTER-THE-WAR BUSINESS IS A GRAVE PROBLEM

Control of Raw Materials and Shipping Is Now Receiving the Greatest Attention in Great Britain.

(BY ASSOCIATED PRESS)

London, Nov. 30.—The after-war business problem received the most important attention at present in England is that the control of raw material and shipping, says a statement issued by the American Chamber of Commerce in London. It adds: "Detailed studies of sources and methods of control and distribution are being made, but there does not yet appear to be agreement on the general principles of control. On the one hand powerful interests are urging immediate co-operation between Great Britain, France and the United States, for the formation of a world control which will at the appropriate time, be able to distribute raw materials as seems best. On the other hand some are pointing out that such action would interfere by contrary to President Wilson's policy of 'no economic combination within the League of Nations.' World arrangements are already being made with the sanction and even the assistance of the British government in regard to oil and metals, while shipping plans change or develop daily. The American Chamber of Commerce in London has urged commercial bodies in America to consider the entire subject."

BREWING OF BEER TO STOP AT MIDNIGHT IN ALL UNITED STATES

(BY ASSOCIATED PRESS)

Washington, D. C., Nov. 30.—The brewing of beer and other malt beverages will stop at midnight tonight throughout the entire United States. The special presidential committee which recommended the prohibition of beer as a war measure, despite strong pressure brought to bear for that purpose, would make no recommendation to have the order rescinded because of the signing of the armistice.

SENATE TO SEND REPRESENTATIVE TO PEACE TALK

Senators Take Steps To Remedy President's Oversight in Not Selecting a Senator on Delegation.

(BY ASSOCIATED PRESS)

Washington, D. C., Nov. 30.—The failure of President Wilson to include in the peace delegation, a member of the senate, has resulted in a move by the senate to send a senator or a committee to France, principally to furnish the senate with information of the discussions. A resolution to this end was framed for submission on Monday.

The secretary of the delegation, it was announced today by the state department would be Joseph G. Brewster, secretary of the embassy at Paris who is now in Paris making arrangements for the delegation. William McNeill will go as disbursing officer and S. Y. Smith, as draughting officer, and a large force of clerical assistants from the state department will accompany the party. Dr. James H. Brown Scott and David Hunter Miller will accompany the delegation as technical advisors on international law.

SCHOOL GIRL DESCRIBES THE YANK ARRIVAL

Tells of the Way the Americans Plunge Through the Foam While Armies Face Each Other on the Yser.

Odette Gistinel, a thirteen-year old girl of one of the school rooms near the front in France, wrote the following essay on the coming of the Americans:

"It was only a little river, almost a brook; it was called the Yser. One could talk from one side to the other

VERY INTERESTING SAMPLE DISPLAY

Made Up Samples of Royal Society Package Goods on Display at The Fair Savings Bank Store Monday.

Mr. Anderson, the company's special art needle work instructor, will be in charge of this most interesting display. A fine chance for those who are in a quandry in regards to "WHAT TO GIVE." Scores of suggestions and ideas to be gleaned from this special display. The Fair Savings Bank carries in stock a full line of Stamped Royal Society Goods—ready for working. All package goods as well as silks sold at manufacturers lowest minimum resale prices.

NIGHT SCHOOL TO BE OPENED HERE ON DECEMBER 2ND

Splendid Opportunity for Young Men and Women and Foreigners to Improve Their Condition in Life at Classes.

On December 2nd there is to be a night school organized. It is to be hoped that every one that wants the work will take advantage of this opportunity.

Courses in English, Arithmetic, Manual Training and Domestic Science are to be offered.

The work in English and Arithmetic has been given before, but the Manual Training and Domestic Science have not before been given in night school.

The course in Domestic Science is planned to be of practical value to every girl that has not had the opportunity to take the work, to every young housekeeper that has not had the training, or for any one that cares for the work.

The course is to consist of sufficient lessons to cover the selection of food for the best health, proper cooking, food value, methods of cooking, cost of foods and serving of meals. There will also be a few lessons on practical labor saving devices in the kitchen and care of the kitchen.

The classes are to meet twice a week. The cost of the lessons is to be figured on the actual cost of material used, making the cost within the reach of anyone.

No text book is to be used, but important notes are to be distributed by the instructor and these notes when collected from each lesson are to serve as a notebook.

PERSONALS

Leslie Winegar who is stationed at the Naval Training School at Philadelphia, is home for a brief visit with his parents Mr. and Mrs. D. D. Winegar.

Earl Brown is ill at his home on Mary street.

T. A. Carroll of Chicago is transacting business here over the weekend.

URGE ADOPTION OF THE METRIC SYSTEM IN U. S.

Think It Would Bring More Staple Financial Relations Between U. S. and South and Central America.

(BY ASSOCIATED PRESS)

Washington, Nov. 30.—Adoption of the metric system of weights and measurements for the United States will be urged upon Congress by the American section of the International High Commission, which aims to bring about greater uniformity of commercial law and regulations and more stable financial relations between the United States and the South and Central American republics.

The American Section holds that in view of probable closer commercial relations between North and South America, it would be of immense value to business interests to substitute the meter, kilogram, centimeter, liter, hectoliter, hectare, gram and kilogram, for the yard, mile, inch, quart, gallon, acre, ounce and pound.
